Final Author Version (accepted manuscript)

When a research paper is accepted for publication in an NPG journal, authors are encouraged to submit the Final Author Version (the authors' accepted version of their manuscript) to PubMedCentral or other appropriate funding body's archive, for public release six months after first publication. In addition, authors are encouraged to archive this version of the manuscript in their institution's repositories and, if they wish, on their personal websites, also six months after the original publication. Authors should cite the publication reference and DOI number on the first page of any deposited version, and provide a link from it to the URL of the published article on the journal's website.

Where journals publish content online ahead of publication in a print issue (known as advanced online publication, or AOP), authors may make the archived version openly available six months after first online publication (AOP).
