USE OF SOIL SURVEY, FIELD EXPERIMENTS

and

SOIL AND PLANT ANALYSIS

for

DEFINING AREAS OF MICRONUTRIENT DEFICIENCY

A thesis presented in fulfilment of the
requirements for the Degree of Master of
Agricultural Science,
Faculty of Agricultural Science
University of Adelaide

by

P.M. KING

B. Ag. Sc.

SOUTH AUSTRALIAN DEPARTMENT OF AGRICULTURE

ADELAIDE

FEBRUARY 1974

S T A T E M E N T

This thesis contains no material which has been accepted for the award of any other degree or diploma in any University and, to the best of my knowledge and belief, this thesis contains no material previously published or written by any other person, except when due reference is made in the text of the thesis

I N D E X

<u>STATEMENT</u>	i
<u>INDEX</u>	ii
I <u>SUMMARY</u>	1
II <u>INTRODUCTION</u>	4
III <u>LITERATURE REVIEW</u>	5
PART 1 <u>SOIL CLASSIFICATION</u>	5
A Introduction	5
B Development of soil classification	5
C Three modern systems of soil classification	10
(1) The Soils of Europe	10
(2) Seventh Approximation	11
(3) Factual Key	14
D Specific purpose classifications	17
E Use of numerical methods in soil classification	17
F Problems of soil classification	19
PART 2 <u>SOIL SURVEY AND MAPPING</u>	21
A Types of mapping	21
(1) Soil mapping	21
(2) Land mapping	22
(3) Land-use mapping	23
B Survey and mapping procedure	23
(1) Collation of relevant information	23
(2) Interpretation of aerial photographs and use of remote sensors	24
(3) Survey procedures	25
(4) Naturally occurring groups of soils	27
C Examples of soil and land surveys	28
(1) Soil survey	28
(2) Land survey	30

PART 3	<u>SOIL CHEMISTRY OF MICRONUTRIENTS</u>	33
A	Distribution of micronutrients in soils	33
B	Chemical forms and reactions of micronutrients in soil	35
	(1) Concept of chemical pools	35
	(2) Adsorption reactions and occlusion	36
	(3) Organic matter reactions	38
	(a) Total soil organic matter and micronutrient deficiency	38
	(b) The chemical forms and reactions of organic matter complexes	38
	(c) Synthetic chelates	41
	(4) Reduction and oxidation reactions	42
C	Plant factors affecting micronutrient availability	43
	(1) Genotypic variations	43
	(2) Rhizosphere effects	45
D	Micronutrient soil tests	46
	(1) Biological tests	47
	(2) Chemical tests	48
	(3) Calibration and interpretation	50
E	Occurrence of micronutrient deficiencies	52
IV	<u>LAND AND SOIL CLASSIFICATION AND MAP</u>	55
	<u>WHARMINDA</u>	60
	Land Units	63
	Soil Mapping Units	68
	<u>STOKES</u>	77
	Land Units	79
	Soil Mapping Units	82
V	<u>MATERIALS AND METHODS - FIELD EXPERIMENTS</u>	87
A	Factorial Experiments	87
	(1) Selection of experiment sites	87
	(2) Experimental design and treatments	87
	(3) Sampling and yield measurement	90
	(4) Chemical and physical analysis	92
B	Ancillary experiments	94

VI	<u>RESULTS AND DISCUSSION</u>	97
	PART 1 <u>YIELD IN FIELD EXPERIMENTS</u>	97
	A Factorial experiments	97
	(1) Climatic factors	97
	(2) Deficiency symptoms	98
	(3) Main effects on yield	102
	(4) Interaction of micronutrient: effects on yield	108
	(5) Effect of B and Mo on plant numbers	113
	(6) Severity of deficiencies	114
	B Ancillary experiments	116
	PART 2 <u>RELATION OF YIELD RESPONSE TO SOIL PROPERTIES</u>	118
	A Concentration of micronutrients in plants and soils	118
	B Soil mapping units and the Factual Key	122
	C Distribution of deficiencies in different soils	124
	D Yield response to micronutrient application and soil and plant concentrations	128
	(1) Cu	128
	(2) Zn, Mn, Fe, B and Mo	135
	PART 3 <u>GENERAL CONCLUSIONS</u>	141
	A Identification of micronutrient deficient areas	141
	B Extrapolation of results	144
VII	<u>BIBLIOGRAPHY</u>	146
VIII	<u>ACKNOWLEDGEMENTS</u>	161
IX	<u>APPENDICES</u>	
	1 Description of soil profiles at the sites of the factorial experiments	162
	2 Botanical and common names of species	211
	3 Climatological data	213
	4 Mineralogical analysis of granitic gneiss	215
	5 Treatments used in factorial experiments	216

APPENDICES - Continued

6	Micronutrient concentrations in basal fertilizers	217
7	Harvests made in each factorial experiment	218
8	Description of ancillary experiments	219
9	Yields and plant members in factorial experiments	220
10	Analyses of plants from control plots of factorial experiments	240
