

ACIDOSIS AND ALKALOSIS:

Their Relation to Practical Medicine.

Thesis submitted for
Degree of M.D.,
University of Adelaide.

June, 1920.

Albert Ray Southwood,
M.B., B.S.

Table of Contents

1. Section 1
The Laboratory: an Essential to Medical Progress
2. Section 2
The Physiological Balance between Acids and Bases
3. Section 3
Metabolism and the Acid-Base Equilibrium
4. Section 4
Regulating Mechanism of the Acid-Base Equilibrium
5. Section 5
Methods of Examination
6. Section 6
The Clinical Importance of the Acid-Base Equilibrium
7. Section 7
Acidosis and the Organs of Internal Secretion
8. Section 8
Resume

Bibliography

Appendix

Illustrative tables selected from results of practical laboratory and clinical work done in connection with this study
