

THE NEXT MEETING. TASMANIA PROPOSED.

At the meeting of the Council... Tasmania proposed as the next meeting place...

PEA-GROWING.

There are great possibilities in parts of this State for pea-growing in rotation with wheat.

VALUABLE ROTATION CROP.

Mr. W. S. Kelly, chairman of the Advisory Board of Agriculture, speaking before the Agricultural section...

Suitable Fertilizers.

The application of soluble phosphates for fertilizing wheat is a well-known fact...

GOVERNMENT WILL PROVIDE FUNDS.

When the delegates to the National Science Conference met in Hobart...

MOISTURE CONSERVATION NOT ONLY BENEFIT.

That moisture conservation was not the only benefit of following the contention of Professor Paterson...

STEELE-GRANT MICROBALANCE.

The application of the Steele-Grant microbalance to analytical problems...

POSTIONIA FIBRE.

Dr. J. C. R. Poston, F.R.S., and a party from the chemistry section of the Ministry of Pensions...

HISTORY TEACHING.

Mr. G. E. Brown, M.A., of the University of Melbourne, lecturer in the Department of Education...

SOILS OF THE SOUTH-EAST.

An interesting review of certain soils of the South East of South Australia...

HOW THEY SHOULD BE TREATED.

An interesting review of certain soils of the South East of South Australia...

The Chair of Anthropology Congress. A Chair of Anthropology Suggested. Afternoon Devoted to Excursions. General Council Meeting Held.

The meeting of the Australian Association for the Advancement of Science was continued at the University on Wednesday.

Before Mr. Professor Watt, of Sydney, read a paper on 'The World's Food Supply'. The afternoon was devoted to a number of the excursions in the various excursions to industrial establishments.

TRANSPORTATION.

ROADS AND THEIR DEVELOPMENT.

A separate Roads Department, free from political control, is held to be necessary for the proper development of the roads of the country.

Mr. Norman H. Taylor, Federal president of the National Roads Association, read an interesting paper on the engineering aspects of the subject of Roads and their Development in Relation to Modern Traffic.

The National Roads Association, and the time seemed ripe for the consideration of an Australian Road Code. Amongst the several topics which it would be expected to discharge...

It might be deemed more appropriate to place the matter in the hands of the Federal Institute of Science and Industry, although the subject is a matter for consideration and decision by the writers...

WORLD'S FOOD SUPPLY.

The problems of the world's food supply formed the subject of a presidential address to the agriculture and forestry section of the conference...

THE WHEAT CROP.

WATER REQUIREMENTS.

To produce a ton of grain, Dr. Richardson declares, 103 lb. of water is required to produce 1 lb. of wheat...

THE SYNTHETIC CHEMIST.

No one could tell what the synthetic chemist of the future might do in the way of food production, but at present they were absolutely dependent on the soil...

AGRICULTURE.

RESEARCH NECESSARY.

In Great Britain much has been achieved by the Agricultural Research Association, and the time has come when the Commonwealth must set up an analogous body in Australia.

LAND'S SUCCESS.

The Ashes Were Won. The captain of the English team says...

usually require a high degree of skill and experience in the selection of the soil...

PEA-GROWING.

There are great possibilities in parts of this State for pea-growing in rotation with wheat.

VALUABLE ROTATION CROP.

Mr. W. S. Kelly, chairman of the Advisory Board of Agriculture, speaking before the Agricultural section...
