

1st. October, 1929.

Dr .U. Behrens,
Pflanzenbau-Institut,
Universität Königsberg,
Tragheimer Kirchenstrasse,
KONIGSBERG, Germany.

Dear Dr Behrens,

I have suggested to Mr Pepper, who has been working here temporarily that he should take up the tabulation of the integrals given by your formula. He has, I think, some ability in numerical computations, and I hope, at any rate after the completion of some work he is doing for Professor E. Pearson, he will take up the serious work of your problem. This I should much like to see done, and if Pepper were to fail you, since his plans are unsettled, I think I could find an alternative collaborator.

Yours sincerely,
