

Enclosed:- "A Biological Assay of Tuberculin"
(filed under this title)

25th, March 1949.

Dear Chester,

I am enclosing a paper ^[K] derived from an old report of mine to the Agricultural Research Council, on the tuberculin reaction with bovine subjects. I remember mentioning it to you when I was over your side, and you said you would like it for Biometrics. Do not feel bound by this rash opinion, but if it is in your view still likely to be of interest to biometricians

[K See CP 235] _{Jan}

I should be glad to see it published in that journal.

Yours sincerely,
