

CAMBRIDGE UNIVERSITY PHILOSOPHY OF SCIENCE CLUB

President: EARL (BERTRAND) RUSSELL, D.M., M.A., F.R.S.

History of Science Museum,  
14 Corn Exchange  
Cambridge,  
Tuesday

Dear Sir Ronald,

May I thank you most warmly for your contribution to the discussion last evening. I found it a most profitable exchange of views, and I think it can be said that a good deal of enthusiasm was in evidence. Everyone to whom I have spoken has agreed that your presentation of your views was particularly impressive coming as they did after Braithwaite's lucid presentation of the 'minimax' procedures.

I am sorry that Goodie's tone was a trifle spiky; I had no idea whatever that he was to be in presence, - nor could I have

done very much about it had I known. In any case your handling of the situation was definitive.

No. - it certainly is not fixed that Ancombe will report on your meeting of 17<sup>th</sup> January, though I fear he has already done so on last night's meeting. I will edit his script and try to make it as fair as it ought to be.

But since Kraitlawite cannot open the discussion on the 17<sup>th</sup> of January (I learned that as a surprise last night!) is there anyone else you should like to have do so? And, indeed, can you suggest someone to report your meeting for the Review?

Yours,

Norman Russell Hanson
