

February 1, 1941

Dear Kendall,

I have no doubt that the material you have found is that for the 3000 criminals published by W.R. MacDonell, Biometrika I:177. He gives two-way tables for head length, head breadth and height, and other<sup>tables</sup> for 1000 Cambridge men. I should be glad to have your copy filed at the Galton Laboratory, if you care to send it along, as it evidently gives more detail than does MacDonell's paper.

Yours sincerely,
