

23 August 1943

Dear Dr Pye,

I shall be very glad to discuss with you the points arising from my impending retirement. I can be at University College, Gower Street, at or shortly after 10.30.

I am enclosing copy of a list of Glassware which you ought to know about as it does not belong to University College, having been bought out of a British Association grant, and which was left in one of the upper rooms of the animal-house. I send this list so that you can ~~advise~~ have the stock examined and valued, since it may be that one or more of your Departments may be glad of the glass at the present time, and as my own work can dispense with it now, it would seem a valuable item to set off against any property now used by my Department which the College might be willing to exchange therefor.

Yours sincerely,

see Galton Lab. file.
