**CALENDAR VOLUME II**  
**Handbook of Courses**

**1996**

**THE UNIVERSITY OF ADELAIDE**

Australia

## address for correspondence

General correspondence should be addressed to the **Registrar**.

Correspondence about courses (and related matters such as admission, examinations, scholarships and prizes), educational matters generally to the **Deputy Vice-Chancellor (Academic)**.

Correspondence about financial matters, and matters relating to buildings and grounds to the **Deputy Registrar (Resources)**.

Correspondence about personnel matters and staff appointments to the **Director, Personnel Services**.

*The University's postal address is:*

The University of Adelaide  
Australia 5005

*telephone:* 61 8 303 4455

*freecall:* 1 800 061 459

*facsimile:* 61 8 224 0464

*telex:* UNIVAD AA89141

*email:* [sic@registry.adelaide.edu.au](mailto:sic@registry.adelaide.edu.au)

*Internet:* <http://www.adelaide.edu.au/home.html>

## **the Arms of the University**

The heraldic description of the Coat of Arms  
is as follows:

**Per pale Or and Argent an Open Book**

**proper edged Gold on a Chief Azure**

**five Mullets, one of eight, two of**

**seven, one of six and one of five**

**points of the second, representing**

**the Constellation of the Southern Cross;**

**and the Motto associated with the Arms is**

**Sub cruce lumen**

**'The light (of learning) under the (Southern) Cross'**

# Foreword

The University of Adelaide publishes the following official publications:

## Calendar Volume I

Published biennially in May.

General information, including:

The University Act, Principal Officers of the University, Statutes, Standing Orders of the Senate, The Elder Conservatorium of Music, Institutions, Foundations and Colleges of the University, Public Lectures and Courses, Service Departments and Divisions of the University, Scholarships and Prizes, Societies Associated with the University.

## Calendar Volume IA

Published biennially in February alternating with Volume I.

The Almanac, Membership of Council, Committees, Faculties and Boards, Staff (at 1 January), Amendments made to Volume I during the previous year.

## Calendar Volume II

### Handbook of Courses

Published annually in November of previous year.

Regulations, General Course Rules, Specific Course Rules and Syllabuses of courses.

*cost in 1996*                 \$30 including postage

*student price:*             \$12 excluding postage

## Annual Report

Published annually in September of the following year.

Available from the Public Relations and Marketing Office.

## Research Report

Published annually in October of the following year.

Available from the Public Relations and Marketing Office.

Research grants awarded, staff bibliography.

## Financial Statements

Published annually in August of the following year.

Available from Accountant.

## Statistics

Published annually.

Staff statistics, student statistics by subject and course.

## External Studies Handbook Faculty of Arts

Published annually in October of previous year.

Details of courses available (free of charge) from the Flexible Learning Centre, The University of South Australia, Underdale Campus.  
education.

## Calendar Volume IV

### Student Guide and Timetables

Published annually in December.

Available from Student Administration Branch.

Contains details of services provided to students together with time-tables of courses.

## Undergraduate Prospectus

Published annually in July of previous year.

Available free of charge from the Student Administration Branch

Details of undergraduate courses and services provided. This publication is useful to students considering study at University.

## Postgraduate Prospectus

Available free of charge from Research and Graduate Studies Branch.

Details of postgraduate courses. This publication is useful to students considering postgraduate study.

As of 1 January, 1996, the management structure of The University of Adelaide will change. There will be 6 academic divisions within which the present 11 faculties will be located.

<b>Division</b>	<b>Comprising Faculties of:</b>
Agricultural and Natural Resource Sciences	Agricultural and Natural Resource Sciences.
Engineering and Mathematics	Engineering; Mathematical and Computer Sciences.
Health Sciences	Medicine; Dentistry.
Humanities and Social Sciences	Arts.
Professional Studies ('PALACE')	Performing Arts; Law; Architecture and Urban Design; Economics and Commerce.
Science	Science.

The new management structure is not likely to impact on students in 1996.

# Contents

The information in this volume is accurate as at 13 November 1995.

## General Course Rules

Undergraduate courses.....	3
Postgraduate courses .....	22

## Faculty of Agricultural and Natural Resource Sciences

---

Regulations.....	30
Associate Diplomas and Bachelor degrees.....	31
Associate Diploma in Applied Science (Agricultural Production).....	48

### Associate Diploma in Applied Science (Farm Management)

The Associate Diploma in Applied Science (Farm Management) is no longer offered.

For syllabus entries in the course, refer to *The University Calendar Volume II: Handbook of Courses, 1994*.

Associate Diploma in Applied Science (Horse Husbandry and Management).....	53
Associate Diploma in Wine Marketing.....	57
Bachelor of Agricultural Business .....	63
Bachelor of Agricultural Science.....	79
Bachelor of Applied Science (Agriculture) .....	113
Bachelor of Applied Science (Natural Resources Management).....	121

### Bachelor of Applied Science (Wine Science)

The Bachelor of Applied Science (Wine Science) course has been replaced by the Bachelor of Agricultural Science (Viticulture or Oenology major).

For syllabus entries in the course, refer to *The University Calendar Volume II* for 1992 and 1993.

Bachelor of Applied Science (Honours).....	129
Master of Agricultural Science .....	131
Master of Applied Science .....	131
Graduate Certificate .....	131
Graduate Diploma .....	131
Postgraduate Diploma .....	131
Master .....	131

## Faculty of Architecture and Urban Design

---

Regulations.....	154
Bachelor of Design Studies.....	155
Bachelor of Architecture .....	172
Bachelor of Landscape Architecture.....	181
Graduate Certificate in Design Studies .....	189
Graduate Certificate in Design Studies (Landscape).....	189
Graduate Diploma in Design Studies .....	189
Graduate Diploma in Design Studies (Landscape).....	189

Master of Architecture .....	195
Master of Building Science .....	195
Master of Design Studies .....	195
Master of Design Studies (Landscape) .....	195
Master of Urban Design .....	195

## Faculty of Arts

---

Regulations .....	202
-------------------	-----

Associate Diploma in Labour Studies .....	204
---	-----

### Associate Diploma in Liberal Studies

There shall be no intake into this course from 1995. For information regarding the rules and regulations governing the Associate Diploma in Liberal Studies, please refer to *The University Calendar Volume II: Handbook of Courses 1994*.

Bachelor of Arts .....	206
------------------------	-----

Bachelor of Arts (Asian Studies) .....	206
--	-----

Bachelor of Arts (Australian Studies) .....	206
---	-----

Bachelor of Arts (Cultural Studies) .....	206
---	-----

Bachelor of Arts (European Studies) .....	206
---	-----

Bachelor of Arts (International Studies) .....	206
--	-----

### Bachelor of Arts (Jurisprudence)

This course is available only to Continuing Students. For information regarding the rules and regulations governing the Bachelor of Arts (Jurisprudence) please refer to *The University Calendar Volume II: Handbook of Courses 1995*.

Bachelor of Social Sciences .....	226
-----------------------------------	-----

Bachelor of Labour Studies .....	351
----------------------------------	-----

Bachelor of Arts (Honours) .....	359
----------------------------------	-----

Bachelor of Labour Studies (Honours) .....	361
--	-----

### Bachelor of Social Sciences (Honours)

For details of Bachelor of Social Sciences (Honours) consult Faculty of Arts office.

Graduate Certificate in Australian Studies .....	363
--	-----

Graduate Certificate in Cognitive Science .....	369
---	-----

Graduate Certificate in Educational Administration .....	371
--	-----

Graduate Certificate in Educational Studies .....	373
---	-----

Graduate Certificate in Environmental Management .....	375
--	-----

Graduate Certificate in Environmental Policy, Planning and Management .....	379
---	-----

Graduate Certificate in Historical Studies .....	381
--	-----

Graduate Certificate in Language Education .....	384
--	-----

Graduate Certificate in Logic .....	391
-------------------------------------	-----

Graduate Diploma in Anthropology .....	393
--	-----

Graduate Diploma in Applied Geographic Information Systems and Remote Sensing .....	397
---	-----

Graduate Diploma in Applied Historical Studies .....	401
--	-----

Graduate Diploma in Archaeology .....	403
---------------------------------------	-----

Graduate Diploma in Chinese Studies .....	407
---	-----

Graduate Diploma in Cognitive Science .....	410
---	-----

Graduate Diploma in Education .....	412
-------------------------------------	-----

Graduate Diploma in Environmental Studies .....	419
---	-----

Graduate Diploma in Japanese Studies .....	422
--	-----

Graduate Diploma in Labour Studies .....	425
--	-----

Graduate Diploma in Logic .....	429
---------------------------------	-----

Graduate Diploma in Women's Studies .....	431
---	-----

## **Bachelor of Education (In-Service)**

This course is available only to continuing students. For information regarding the rules and regulations governing the Bachelor of Education (In-Service), please refer to *The University Calendar Volume II: Handbook of Courses 1994*.

<b>Bachelor of Educational Studies</b> .....	440
<b>Master of Arts</b> .....	443
<b>Master of Arts (Applied Historical Studies)</b> .....	447
<b>Master of Arts (Geographic Information Systems and Remote Sensing)</b> .....	451
<b>Master of Arts (Population and Human Resources)</b> .....	453
<b>Master of Arts (Women's Studies)</b> .....	458
<b>Master of Cognitive Science</b> .....	464
<b>Master of Education</b> .....	471
<b>Master of Educational Administration</b> .....	473
<b>Master of Educational Studies</b> .....	478
<b>Master of Environmental Studies</b> .....	487
<b>Master of Logic</b> .....	497
<b>Master of Psychology (Clinical)</b> .....	502
<b>Doctor of Letters</b> .....	508

## **Faculty of Dentistry**

---

<b>Regulations</b> .....	510
<b>Diploma in Dental Therapy</b> The Diploma in Dental Therapy may not be offered in 1996. For syllabus entries in the course, refer to <i>The University Calendar Volume II: Handbook of Courses, 1994</i> .	
<b>Bachelor of Dental Surgery</b> .....	511
<b>Bachelor of Science in Dentistry (Honours)</b> .....	525

<b>Graduate Certificate in Dentistry</b> .....	527
<b>Graduate Diploma in Clinical Dentistry</b> .....	530
<b>Graduate Diploma in Forensic Odontology</b> .....	532
<b>Master of Dental Surgery</b> .....	534
<b>Master of Science in Dentistry</b> .....	543
<b>Doctor of Dental Science</b> .....	545

## **Faculty of Economics and Commerce**

---

<b>Regulations</b> .....	548
<b>Bachelor of Economics</b> .....	549
<b>Bachelor of Commerce</b> .....	562
<b>Graduate Certificate in Economics</b> .....	571
<b>Graduate Certificate in Management</b> .....	573
<b>Graduate Diploma in Economics</b> The Graduate Diploma in Economics is discontinued and available only to continuing students. For Regulations, Schedules and Syllabuses for this course, refer to <i>The University Calendar Volume II: Handbook of Courses, 1994</i> .	
<b>Graduate Diploma in Applied Economics</b> .....	576
<b>Graduate Diploma in Advanced Economics</b> .....	578
<b>Graduate Diploma in Management</b> .....	584
<b>Master of Business Administration</b> .....	586
<b>Master of Economics</b> .....	594
<b>Master of Economics (Coursework)</b> .....	596
<b>Master of Commerce</b> .....	599
<b>Master of Management (Leadership and Enterprise Development)</b> .....	601

## Faculty of Engineering

---

Regulations.....	607
Bachelor of Engineering.....	608
Graduate Certificate in Business Enterprise.....	667
Graduate Certificate in Engineering (Environmental Engineering).....	668
Graduate Certificate in Engineering (Hydrology and Water Resources).....	670
Graduate Certificate in Engineering (Signal Processing).....	672
Graduate Certificate in Telecommunications	
This course is jointly managed with the Faculty of Mathematical and Computer Sciences. For details, see under the Faculty of Mathematical and Computer Sciences.	
Graduate Diploma in Business Enterprise.....	676
Graduate Diploma in Computer Systems Engineering.....	679
Graduate Diploma in Engineering (Environmental Engineering).....	683
Graduate Diploma in Engineering (Materials Welding and Joining).....	685
Master of Engineering.....	687
Master of Engineering Science.....	688
Master of Engineering Science in Hydrology and Water Resources.....	693
Master of Engineering (Information Technology and Telecommunications).....	700
Master of Engineering Science in Materials Welding and Joining.....	708
Master of Applied Science.....	711
Master of Applied Science in Hydrology and Water Resources.....	714

Master of Applied Science in Materials Welding and Joining.....	717
Doctor of Engineering.....	719

## Faculty of Law

---

Regulations.....	722
Bachelor of Laws.....	723
Graduate Certificate in Mediation.....	747
Graduate Diploma in Corporate and Commercial Law.....	749
Graduate Diploma in Environmental Law.....	749
Graduate Diploma in Taxation Law.....	749
Master of Laws.....	753
Master of Laws (Corporate and Commercial).....	753
Master of Laws (General Studies).....	753
Master of Environmental Law.....	753
Doctor of Laws.....	765

# General Course Rules

## Preamble

The aim of the General Course Rules is to bring together in one place all general policies regarding course matters. If, for reasons of space, the full policy statement on any area is not included in the General Course Rules then appropriate cross-references have been included so that at least students and staff know where to look for policy statements on any given area.

The following rules are prescribed by the Council of the University and apply to all courses offered by the University although there is often a distinction made in the rules between undergraduate and postgraduate courses.

All courses offered by the University have been developed within the framework of the General Course Rules printed below.

As all students must comply with these rules, students are advised to become familiar with them in order to gain an understanding of their rights and responsibilities with regard to course matters.

## Glossary of terms

A glossary of terms is being developed for approval.

## 1 Undergraduate courses

### 1.1 Admission requirements

#### 1.1.1 Undergraduate courses

Chapter 9 of the Statutes, Of Admission and Enrolment, states that Council may prescribe rules and establish procedures for the selection and admission of students. Rules for entry to most undergraduate courses are to be provided in full in the Calendar, Vol I. However, please refer to the Specific Course Rules for entry into the following undergraduate courses: Bachelor of Arts (Dance), Bachelor of Arts (Drama Studies) and Bachelor of Labour Studies.

#### 1.1.2 Graduate Bachelor degree courses

The Bachelor of Laws (LL.B.), Bachelor of Architecture (B. Arch.) and the Bachelor of Educational Studies (B.Ed.St.) are Graduate Bachelor degrees requiring prior tertiary study on point of entry. The specific admission requirements for these courses are contained in the appropriate Specific Course Rules.

#### 1.1.3 Honours degree courses

Details of requirements for Honours degree courses are provided below in section 1.2.3 under Assessment and Examinations, as well as in the Specific Course Rules for individual Honours degree courses.

## 1.2 Assessment and examinations

Chapter 17 of the Statutes - Of Examinations and Other Forms of Assessment, prescribes procedures for dealing with misconduct in examinations and other forms of assessment.

In addition, the University has a detailed policy statement on assessment matters (including Student Appeal and Grievance Procedures) which is reproduced below.

### 1.2.1 Assessment Policy and Appeals

The Assessment Policy establishes recognised principles and procedures under which Departments conduct assessment of students' work, and under which students may claim a review of an assessment mark or seek resolution of a grievance to do with assessment or academic status for work done elsewhere. The general principles are largely a statement of existing practices in the University: they are not all completely applicable to every course or discipline, and some Faculties and Departments follow additional assessment principles which are appropriate to them but not necessarily relevant to the whole University.

Departmental Assessment Committees will provide an appropriate forum within which staff and students may periodically review assessment processes and make recommendations to the Head of Department, and where disputes may be resolved. The Student Academic Appeals Committee is required to deal with assessment and other grievances that have not been resolved at Departmental level. Its role is primarily to ensure due process and fairness: in assessment

appeals it would not override the academic judgment of academic staff expert in a subject, but it may on occasions need to moderate the judgement of one expert with that of others. If the basic principles and procedures in assessment are followed at the Departmental level, there should seldom be grounds on which a student could justifiably appeal.

It is assumed that students will exercise their right to appeal in assessment matters responsibly. That is appeals will be confined to cases where students genuinely believe they have reasonable grounds for expecting a higher mark. If the procedures are exploited merely in the hope of improving marks, the extra assessment load could become so burdensome that the right of appeal would have to be reviewed.

### General Assessment Policy Principles

- 1 Types of assessed work should be appropriate to the learning objectives of the subject.
- 2 As much assessed work as possible should be discussed with the students who produced it, and where appropriate returned with written comments, to provide feedback about their strengths and weaknesses.
- 3 The total burden of assessed work should not be such as to affect students' approaches to learning in ways that are inconsistent with the learning objectives of the subject.
- 4 In many disciplines, there are a variety of ways in which students may demonstrate their understanding and mastery of subject matter and techniques. Where this is compatible with the need to assess various objectives, students should be given some choice in the types of work they submit, or the relative weight of different components. In some disciplines it will be appropriate for students to have some choice in the particular subject matter they focus on.
- 5 Departments should, with the active participation of students, periodically review the methods of assessment, the relative importance and validity of different types of assessment, the range of choice and the quantity of work required.
- 6 Students should have the opportunity to undertake supplementary\* assessment if

they fail a subject, provided that they have made a reasonable effort, and it is considered that they have a reasonable possibility of passing at the second attempt. Where a substantial piece of work submitted during the teaching of a subject is judged below pass standard, students should have the opportunity of submitting another piece of work for assessment.

\*note: Please see under 1.2.7 Supplementary Examinations below.

- 7 Departments are required to inform all students in writing, either before or within the first two weeks of the teaching of each subject, precisely what its assessment requirements are, including any choices, deadlines, opportunity for re-submission or supplementary assessment etc. Opportunity should be given for students to ask questions and discuss the modes of assessment.
- 8 Where practicable, assessment procedures should be designed to allow for the participation of more than one assessor for each student. (It is recognised that many specialist subjects in the later years of courses are taught and assessed by one person. Departmental moderation of standards is advisable to ensure maintenance of comparability.)
- 9 Departments should take steps to ensure accuracy and to guard against bias. Checking of additions, and of the assessment of students with marks at the borderline between assessment grades, should be standard procedure. Anonymity of work submitted may be desirable as a protection against bias.

### Grading Schemes

There shall normally be four classifications of pass in subjects for Ordinary and Master degrees, Graduate Certificates and Graduate Diplomas:

Pass with High Distinction

Pass with Distinction

Pass with Credit

Pass

If the list of candidates who pass is published in two divisions, a pass in the higher division may be prescribed in the syllabus as a pre-requisite for admission to another subject.

There is also a classification of Conceded Pass. In some Faculties a candidate may present for an Ordinary degree only a limited number of subjects for which a Conceded Pass has been awarded - see the Specific Course Rules for details.

If marks are to be recorded on the academic transcript, then the range of marks for each classification of Pass is as follows:

High Distinction	85-100
Distinction	75-84
Credit	65-74
Pass	50-64
Conceded Pass	45-49

For certain subjects the grade of Pass is unclassified as either Non-Graded Pass or Satisfactory.

The grading scheme for Honours degrees is contained in section 1.2.3.

There are also grades used within the University mainly for administrative purposes such as 'Withdraw (Not Fail)' and 'Continuing'. Please refer to the Student Administration Branch for details.

## Assessment Procedures and Appeals

### 1 Departmental Assessment Committees

- 1 All Departments shall have an Assessment Committee consisting of staff and students; it may be an existing sub-committee of the Departmental Committee with other functions as well. (In small Departments it could appropriately be the Departmental Committee itself.)
- 2 The Committee should be primarily concerned with giving advice and making recommendations on assessment matters, including assessment disputes. Every staff member and student has the right to refer any assessment matter to this Committee.
- 3 The Committee shall be concerned with assessment in course-work subjects, not theses or research projects.

- 4 The Committee shall periodically review assessment schemes and procedures, and their relationship to course aims.
- 5 The Committee may receive complaints from staff or students relating to assessment schemes, the way an assessment scheme or procedure has been administered or the fairness of assessments actually made. (For appeals procedures against particular assessments, see Appeals below)
- 6 The Committee shall act as a lower tribunal in hearing allegations of offences against Statute Chapter XVII or against particular Faculty or Departmental rules concerning assessment.

### 2 Right to Request Review of Assessment

- 1 Where qualitative judgment is involved in assessment, a student may request that a piece of work assessed by one person be re-assessed, if, after discussing the piece of work and the mark with the assessor, the student remains aggrieved about the mark awarded.
- 2 In the first instance the request should be made to the lecturer in charge of the subject. If, after discussing the result with the lecturer, the student still wishes to have it re-assessed, the lecturer in charge should arrange for this to be done by a different person in the Department or elsewhere in the University, wherever this is practicable.
- 3 If the assessor is the only person assessing the subject, the student may make the request to the Head of Department, who should appoint a second assessor, unless there is no appropriately qualified person available.
- 4 The second assessor shall independently mark the piece of work. The two assessors shall then compare marks and endeavour to reach an agreed mark. If the two cannot agree, the Head of Department shall decide what mark shall be awarded.

5 If a student is denied a request for a second assessor, the student may take the matter to the Departmental Assessment Committee.

6 The Departmental Assessment Committee shall consider whether the student's grounds for requesting a second assessor are sufficient, and if so, advise the Head of Department to appoint a second assessor. If there is no appropriately qualified person available within the University, the Head, after consulting the lecturer in charge of a subject, shall ask an appropriate person outside the University to re-assess the work.

7 Where two or more staff members teach a subject, in which qualitative judgement forms a significant part of the assessment, at least two assessors should, whenever practicable, take part in the assessment of each student. No student should be given a Fail for such a subject unless two assessors have assessed at least part of that student's work, and agree that a Fail classification is appropriate.

8 A student who has been denied a request by the Departmental Assessment Committee for a second assessor may appeal to the Student Academic Appeals Committee (see below).

### 3 Assessment Appeals

1 Any student dissatisfied with the final grade awarded for a subject should discuss the result with the lecturer in charge of the subject as soon as possible after being notified of the result.

2 The Head of Department may endeavour to resolve the matter, or may refer it directly to the Departmental Assessment Committee. The student shall in any case have the right to take the matter to the Assessment Committee.

3 The Committee shall consider the appeal, discussing the matter with the student, the Head of Department and all staff members who have

participated in assessing the subject, and may seek advice from other persons as it thinks fit.

4 The Committee shall make a recommendation to the Head of Department who shall either accept it or refer it to the full Departmental Committee for further advice and shall inform the student of the Department's decision.

5 Where the examining body is a Faculty Board of Examiners, the student should discuss the result with the convener of the Board of Examiners, and may appeal to the Faculty Student Matters Committee.

6 A student who believes he or she has not been justly dealt with by the foregoing process may appeal to the Student Academic Appeals Committee.

### 4 Preclusion

Please refer to the section on 'Review of Academic Progress'.

### 5 Student Academic Appeals Committee

1 Students shall have the right to appeal against final grades for subjects, and committee decisions concerning assessment procedures. (The Student Academic Appeals Committee shall not hear appeals relating to misconduct.)

2 The following appeals policy and procedures do not apply to the progress or examination of postgraduate theses or research projects, for which the appeal body is the Board of Graduate Studies.

3 The Student Academic Appeals Committee shall be composed as follows:

- two members of Council who are not employees or students of the University;
- two members of the academic staff who are not members of the Department or Departments concerned in the appeal;

- two students who are not enrolled for subjects in the Department or Departments concerned in the appeal.

For appeals concerning administrative operations of the University, a nominee of the Registrar shall be added to the Committee.

- 4 The Council shall appoint the two Council members, one of them to be Convener of the Committee. The Vice-Chancellor shall nominate six members of the academic staff and, in consultation with the Students' Association, six students to a pool of potential Committee members. On notification by a student of intention to appeal, the Secretary of the Student Academic Appeals Committee shall select two academic and two student representatives from this pool in accordance with the restriction specified above.
- 5 An appeal against a decision shall be heard after the student concerned gives notice in writing of intention to appeal. Notice of appeal must give all relevant information regarding attempts which have been made to have the decision changed, and state the grounds for the appeal. Where there is no evidence that the matter has been previously taken to the appropriate Departmental or Faculty Committee the appeal will not be heard.
- 6 Adequate notification of the date of meeting shall be given both to the student and to the Department or Faculty defending the appeal.
- 7 The student may ask a Student Counsellor, another student, a staff member or an officer of a Students' Association, to assist in presenting the appeal.
- 8 The Appeals Committee shall determine its own procedures, but shall not itself re-assess a student's work which may be in dispute. If satisfied that there are sufficient grounds for so doing, it may order that a piece of work be re-assessed

by a person with appropriate expertise outside the Department concerned, selected in consultation with the Head of Department.

- 9 The Academic Appeals Committee may refuse to continue hearing an appeal or complaint if it decides that the appeal or complaint is vexatious or malicious.

note: Malicious or persistently vexatious appeals or complaints against individual members of the academic staff, or against Departments may be treated as misconduct, and the student may be proceeded against by an affected member of the University, or by the Student Academic Appeals Committee, under the provisions of Chapter XII of the Statutes, which state: 'misconduct means any... unjustified act or omission of a student which adversely affects the University or any member of the University in his or her capacity as such'.

### 1.2.2 Attendance requirements

Students are advised to check the Specific Course Rules for any policies on required attendance as these requirements may vary from course to course.

### 1.2.3 Honours degree courses

#### 1 Admission and qualification requirements

To be eligible to be admitted to an Honours degree course, a candidate shall complete the requirements for an Ordinary degree or equivalent to a standard which is acceptable to the Faculty for the purpose of admission to the Honours degree with the exception of the degrees specified below.

##### *Bachelor of Agricultural Science*

Detailed requirements for admission to and qualification for the Honours degree course are contained in the Specific Course Rules for the Bachelor of Agricultural Science.

##### *Bachelor of Architecture*

Detailed requirements for admission to and qualification for the Honours degree course are contained in the Specific Course Rules for the Bachelor of Architecture.

*Bachelor of Laws*

Detailed requirements for admission to and qualification for the Honours degree and the degree with Honours are contained in the Specific Course Rules for the Bachelor of Laws.

*Honours degree of Bachelor of Medical Science*

A candidate may intermit the course for the degrees of Bachelor of Medicine and Bachelor of Surgery for the purpose of proceeding to the Honours degree of Bachelor of Medical Science; or for such period and on such conditions as may in each case be determined by the Faculty.

*Honours degree of Bachelor of Science in Dentistry*

See the Specific Course Rules for details.

To qualify for an Honours degree course, a candidate shall comply with the provisions of the appropriate Specific Course Rules for Honours.

**2 Honours grading scheme**

A candidate who satisfies the requirements for Honours shall be awarded the Honours degree, but the Faculty shall decide within which of the following classes and divisions the degree shall be awarded:

- 1 First class
- 2A Second class div A
- 2B Second class div B
- 3 Third class
- NAH Not awarded

**1.2.4 Degree courses with Honours**

*Bachelor of Engineering (Chemical Engineering)*

*Bachelor of Engineering (Civil Engineering)*

*Bachelor of Engineering (Civil and Environmental Engineering)*

*Bachelor of Engineering (Computer Systems Engineering)*

*Bachelor of Engineering (Electrical and Electronic Engineering)*

*Bachelor of Engineering (Mechanical Engineering)*

The Bachelor of Engineering degree in the specialisations listed above may be awarded in the Pass or Honours grade.

The award of the Honours grade shall be made for meritorious performance in the course with greatest weight given to performance in the later years.

The Honours grade may be awarded in one of the following classifications: First Class, Second Class Division A, Second Class Division B. (There is no Third Class for the Bachelor of Engineering degree).

To qualify for the degree a candidate shall regularly attend lectures and do written, laboratory, and other practical work (where such is required), and pass examinations in the subjects prescribed in the Specific Course Rules for one of the specialisations listed above.

Before being admitted to the degree a candidate shall also submit satisfactory evidence of completion of a period of practical experience in work approved by the Faculty of Engineering as appropriate to the course which the candidate has followed.

*Bachelor of Laws*

Detailed requirements for admission to and qualification for the Honours degree and the degree with Honours are contained in the Specific Course Rules for the Bachelor of Laws. The degree with Honours is awarded in one of the following classifications: Second Class Division A, Second Class Division B.

*Bachelor of Medicine and Bachelor of Surgery (with Honours)*

A candidate whose results in the third-year, fourth-year, fifth-year and final (sixth-year) examinations, in the medicine course have been adjudged by the Faculty of Medicine to have been of distinguished merit may, by the decision of the Faculty on the recommendation of the Board of Examiners in the final year of the course, be awarded the degrees of Bachelor of Medicine and Bachelor of Surgery (with Honours).

**1.2.5 Plagiarism and related forms of cheating**

Section 7.12 of the Handbook of Administrative Policies and Procedures states the University's policy on dealing with plagiarism as follows:

**1 Statement and definition of plagiarism and related forms of cheating**

Plagiarism is expressly prohibited by Statute XVII 'Of Examinations and Assessment' which states under Section 2:

'No candidate shall submit for assessment, whether by examination or otherwise, any piece of work which is not entirely the candidate's own, except where either:

- (a) use of the words or ideas of others is appropriate and duly acknowledged, or
- (b) the examiner has given prior permission for joint or collaborative work to be submitted.

**2 Definition**

Plagiarism consists of a person using the words or ideas of another as if they were his or her own. The University of Adelaide regards plagiarism as a very serious offence. At the very least it is a misuse of academic conventions; where it is deliberate and systematic, plagiarism is cheating and false pretences. It is the obligation of every member of the University to understand and respect the rules concerning plagiarism; the excuse of ignorance will not be accepted. Plagiarism can take several forms:

- 1 presenting substantial extracts from books, articles, theses, and other published or unpublished works such as working papers, seminar and conference papers, internal reports, computer software, lecture notes or tapes, and other students' work, without clearly indicating their origin with quotation marks and references such as footnotes;
- 2 using very close paraphrasing of sentences or whole paragraphs without due acknowledgment in the form of reference to the original work;
- 3 quoting directly from a source and failing to insert quotation marks around the quoted passages. In such cases, it is not adequate to merely acknowledge the source.

**3 Related forms of cheating**

Other forms of cheating which will also be treated with the utmost seriousness include:

- 1 submitting work written by someone else on the student's behalf;
- 2 submitting another student's work whether or not it has been previously submitted by that student;
- 3 two students separately submitting the same piece of work upon which they have illicitly collaborated;
- 4 a student submitting a piece of his or her own work for two different subjects.

**4 Disciplinary action**

Cases of plagiarism or related forms of cheating will be dealt with under the terms of Statute XII 'Of Conduct of Students in the University'.

**1.2.6 Rules for the conduct of examinations**

The following are the University's approved rules for the conduct of examinations:

- 1 No candidate shall enter the examination room during any examination more than forty minutes after the time fixed for the beginning of the reading period of the examination except with the consent of a Supervisor.
- 2 No candidate shall be allowed to leave the examination room during any examination before forty minutes have elapsed from the commencement of the reading period of the examination except with the consent of a Supervisor.
- 3 (1) A candidate who wishes to leave the room temporarily must obtain the consent of a Supervisor before doing so.  
(2) A candidate who leaves the examination room may be permitted to return to it during that examination only at the absolute discretion of a Supervisor.
- 4 (1) When the five-minute warning before the end of the examination is given, all candidates shall remain seated until their examination papers have been collected.

- (2) All candidates shall remain seated until all examination papers have been collected and an announcement is made by a Supervisor that candidates may leave the room.

It is recommended that students carefully read the Statutes, Chapter XVII 'Examinations and Other Forms of Assessment'.

note: Special arrangements

When a student's performance in an examination could be affected by a physical condition of a permanent or temporary nature or for any other reason, such as language difficulty, the student should consult the Examinations Officer in the first instance as early as possible. Students who, because of religious beliefs, are unable to sit examinations on certain days (or at particular times), should also contact the Examinations Officer as early as possible.

### 1.2.7 Supplementary examinations

A candidate may be granted a supplementary examination in a subject only in circumstances approved by the Department or Centre administering such subject and consistent with any expressed Council policy.

- 1 Supplementary examinations may be awarded on academic grounds, as well as on medical and compassionate grounds.
- 2 Supplementary examinations shall be granted on the recommendation of the Department responsible for the subject.
- 3 Except with respect to specific courses or subjects on grounds approved by the Council, students shall have the opportunity to undertake supplementary assessment if they fail a subject, provided that they have made a reasonable effort, and it is considered that they have a reasonable possibility of passing at the second attempt.

(This shall apply to results of Conceded Pass as well.)

Each Department is responsible for defining its policy on academic supplementary examinations which shall be made available to students at the commencement of teaching of each subject.

- 4 All students will receive a single final result for each subject, regardless of whether some supplementary or

redemption work was necessary to achieve that result.

The results of supplementary examinations granted on medical, compassionate and mixed grounds will be classified.

- 5 The results of supplementary examinations granted on academic grounds shall not be classified above the level of 50 Pass, except where a higher division pass is required to proceed to the next level in a subject. In subjects with two Divisions of Pass, the Pass result after the supplementary examination on academic grounds shall be either 50 Pass Division II or 55 Pass Division I.
- 6 The medical conditions of students who apply for supplementary examinations on medical grounds shall be confidential and medical information from a student's private doctor shall be forwarded to the University Health Service for an assessment of the applicant's fitness to prepare for and/or undertake examinations.
- 7 Provided that the assessment by the Health Service justifies it, the opportunity to undertake supplementary examinations on medical or compassionate grounds shall be granted not only to students who have failed subjects, but also to those who have passed but wish to upgrade their results.
- 8 A candidate who has failed in only one full-year subject or one or two semester subjects which would complete his or her course for a degree may be granted a supplementary examination in the subject(s) concerned.
- 9 Supplementary examinations may be held between Semester I and Semester II and in December, as well as in the January examination period established by the Council.
- 10 (i) Students should lodge applications for supplementary examinations on medical and compassionate grounds with their Faculty Registrar within seven days of the corresponding primary examinations; and  
(ii) Applications for medical and compassionate supplementary examinations and the granting of discretionary supplementary

examinations on academic grounds shall be considered by a committee of Departmental examiners\*; and

- (iii) The above procedures shall be widely publicised for the information of students.

notes

1 In many cases, a 'reasonable effort' for the purposes of granting academic supplementary examinations is defined as results in the range of 40 - 49, with supplementary examinations being awarded automatically to students who achieve marks of 45 - 49 and at the discretion of the examiners' committee to students who achieve marks of 40 - 44.

2 The maximum result to be recorded on the academic transcript shall be the minimum results which will allow a student to pass to the next level in a subject: namely, a Pass mark of 50 shall be awarded for those subjects with a grading scheme of HD, D, C, P (CP), and F, or a Pass Division 1 mark of 55 for those subjects with a grading scheme HD, D, C, P1, P2, F.

For subjects with a grading scheme of HD, D, C, P1, P2, F, a result of 50 Pass Division 2 may also be recorded on the transcript. That is, the student can achieve the minimum Pass result in the subject but cannot proceed to the next level in the discipline if a Pass Division 1 is required for enrolment. For example, a final mark of 53 after a supplementary examination in Biology 1 will be recorded on the transcript as 50 P2. This would allow the subject to be counted towards the student's degree but would not permit the student to enrol in Botany 2 or any other subject for which Biology 1 is a pre-requisite.

\*The term 'Departmental examiners' encompasses faculty examiners.

### 1.3 Computing facilities: rules for student use

#### 1.3.1 General

Computing facilities provided by the University for students are primarily for use in association with a course of study and activities related to that course.

It is expected that all students will make use of University computing facilities in a manner which is ethical, legal and does not interfere with use by others.

Failure to abide by the following rules will be treated as misconduct and may result in disciplinary action.

#### 1.3.2 Rules for students

- (a) You may use only those facilities which have been authorised for your use. If access is protected by a password, you may not make this password available to others. You may not use any account set up for another user, nor may you attempt to find out the password of another user.

- (b) You may only use authorised facilities for authorised purposes. For example, facilities made available for learning and teaching may not be used for private purposes.

#### 1.3.3 Breach of rules

- (a) Failure to observe these requirements could mean that an action for misconduct will be brought against you. The University's Board of Conduct has the power to impose a fine of up to \$100 or suspend a student's right to use any University facility for up to one year. It can also recommend to Council that a student be suspended or expelled from the University.
- (b) Misconduct that amounts to sexual harassment may be dealt with by the University's Sexual Harassment Committee. Some types of harassment or offensive conduct may be in breach of the Equal Opportunities Act.
- (c) Some forms of conduct may be criminal offences. These include hacking, theft, and unauthorised copying. Using a password protected computer system without authority could result in a fine of up to \$2000 and imprisonment. Sending an offensive message may also be a criminal offence.
- (d) Some conduct, in particular unauthorised copying, could result in civil legal action being taken against you.
- (e) Academic staff have a general power to dismiss students from their classes if they consider the student is disrupting the class; and a Head of department may exclude any student from any class in that department 'for any cause he or she shall deem sufficient'. (Such exclusion may be reversed, varied or confirmed by University Council).
- (f) Breaches or suspected breaches of the rules should be reported to a supervisor, the Chair of the relevant Local Management Group, or the Director, University Computing Services.

### 1.4 Enrolment and re-enrolment

#### 1.4.1 Academic year

What follows is clause 1 of Statute Chapter VIII - Of the Academic Year.

- 1 (a) Subject to the following sub-sections of this clause the Council shall from time to time specify the

periods of the calendar year that shall constitute the academic year for teaching, examinations and vacation periods. Such specifications may divide the calendar year into semesters or into three or more terms.

- (b) The normal academic year shall begin on the Monday nearest 1 March and shall extend over a period of forty-two weeks with such vacation weeks within that period as may be determined from time to time and specified in advance by the Council.
- (c) For the clinical years of the medical and dental courses the Council may prescribe dates other than those of the normal academic year for the performance by undergraduates of part of their training and work in hospitals; provided that such undergraduates shall be enabled to have not less than eight weeks of vacation in any calendar year.
- (d) For practical tuition in music within the degree courses and all single subject tuition in the Elder Conservatorium of Music the Council may prescribe dates other than those of the normal academic year.
- (e) For candidates proceeding to a degree of master or doctor the academic year shall be the same as a calendar year; provided that any such student may have a vacation period or periods aggregating four weeks in each full year of study and research.
- (f) The Council shall have power to vary these dates to meet any special circumstances arising in any year.

Statute allowed 16 December, 1971.

Amended: 23 Jan. 1975: 1(b); 15 Jan. 1976: 2(c); 24 Feb. 1983: 1(d), 1(e), 1(f), 2; 20 July, 1989: 1(b), 2, 3(a), 3(b), 3(c); 1 Mar. 1990: 1(b)

note

- 1 The Australian Vice-Chancellors' Committee regularly prescribes certain weeks as 'common vacation weeks' for purposes of national conferences, inter-varsity contests, etc For the purpose of calculating those common weeks, the first teaching week as defined in 1(b) above shall be regarded as Week 1.
- 2 The academic year comprises two semesters, each consisting of two terms separated by a mid-semester break.

#### 1.4.2 Amendment to enrolment

Any amendment to an enrolment must be requested on the approved form and must be approved by the relevant Faculty. Except with the permission of the Faculty withdrawal from an annual or semester subject after the date prescribed by Council for such changes shall be counted as failure. [See also 1.4.23 Withdrawal Dates].

#### 1.4.3 Availability of subjects

If in any year/semester the student enrolment for a particular subject offered by the Faculty is less than the minimum specified by the Faculty, the Faculty shall not be bound to offer that subject.

The availability of any subject is conditional upon a minimum enrolment and the availability of staff and resources.

#### 1.4.4 Compliance with rules

Clause 15 of Chapter 25 of the Statutes, states the following: .

On each enrolment a student shall complete the following declaration: 'I undertake to obey the statutes and regulations of the University of Adelaide and to comply with such Rules as may from time to time lawfully have been made by or with the authority of the Council of the University.'

#### 1.4.5 Course overloads

The following is sub-section 7.9 of the Handbook of Administrative Policies and Procedures:

##### 1 Principles relating to student overloads

The following statements of principle and suggestions for practical implementation have been approved by Council in regard to students wishing to undertake course work study which constitutes more than a normal year's workload:

- 1 The problem of course overloads does not lie in the freedom of students to overload, since no difficulty is encountered by many students who attempt more than a normal workload. The problem lies with students who, in exercising their right of choice, decide badly. The University seeks therefore to assist the decision making capabilities of a student rather than to limit the choices available to all.
- 2 All students seeking to enrol with overload must be identified and interviewed by a Course Adviser.

Course Advisers should have available to them the previous academic record of the student, and both Adviser and student should be informed about the problems which may be associated with overload.

- 3 If the student after a full discussion and despite advice from the Course Adviser persists with the overload enrolment, it should not be prevented.
- 4 In the case of all overloads by students the Dean/Course Adviser should periodically consider the progress of the student concerned so that in the case where the student appeared not likely to be successful in his or her work, advice could be given for withdrawal from a subject prior to the scheduled last date of withdrawal.
- 5 In the case of a student wishing to take an overload, the Course Adviser should put his or her advice to the student in writing.
- 6 A student may decline the advice of a course adviser in which event the student risks the possibility in some Faculties of exclusion provisions being applied in the event of failure.

#### 1.4.6 Cross-institutional enrolment

Students enrolled in a course of study at one higher education institution who want to count subjects or topics offered at one (or more) of the other institutions as part of their award may be admitted to such subjects as Cross-Institutional Students.

The institution at which the award is to be completed is referred to as the 'home institution'. The institution at which cross enrolment in subjects is sought is referred to as the 'other institution'.

##### *Quotas*

Normal quotas on admission to award courses do not apply. However, the other institution may not admit Cross-Institutional students in subjects where insufficient places are available for its own students.

##### *Conditions of Admission*

Cross-Institutional Students are subject to the same Statutes, Regulations and rules as apply to students enrolled in an award course at the other

institution at which they are allowed to enrol. If a Cross-Institutional Student is subsequently admitted to a course leading to an award at the other institution at which they have been allowed cross-institutional enrolment, subjects or topics passed while enrolled on a cross-institutional basis may only be counted towards an award of the other institution if specific approval is granted by the other institution.

##### *Union membership and Fee*

Cross-Institutional Students will be required to pay the appropriate Union fee at the home institution and may be required to pay a statutory fee at the other institution.

note: In the case of Adelaide University, Council has delegated the authority to grant approval to students wishing to count cross-institutional subjects towards an award to the Dean of the Faculty concerned.

#### 1.4.7 Duration of courses

What follows are general statements about course duration. Please refer to the Specific Course Rules for each course for any precise statements about course duration.

##### **1 Associate Diplomas**

The course of study for an Associate Diploma will normally require at least two years of full-time study or the part-time equivalent.

(Note that the Associate Diploma in Aboriginal Studies in Music is an exception as it specifies a duration of three years full-time or the part-time equivalent).

##### **2 Diplomas**

The course of study for a Diploma will normally require at least the equivalent of three years of full-time study.

##### **3 Undergraduate degrees**

As the duration of undergraduate degrees may vary, please refer to the Specific Course Rules for details.

##### **4 Honours degrees**

Please refer to section 1.2.3 on Honours degrees as well as to the Specific Course Rules for details.

#### 1.4.8 Enrolment by prescribed date & payment of fees

Under Chapter IX 'Of Admission and Enrolment', clause 2 states the following:

An applicant may enrol in the University only if the applicant

- (a) has satisfied the requirements for admission under the Rules approved by Council;
- (b) has been offered a place in a course of study or subject in accordance with the selection criteria and procedures approved by Council; and
- (c) has lodged a completed enrolment form and has paid, or made arrangements satisfactory to the Registrar for payment of, the prescribed fees and charges.

The following are clauses 2 and 3 of Chapter 8 of the Statutes - Of the Academic Year:

- 2 A candidate shall enrol for the year's work not later than the date prescribed by the Council. An enrolment submitted after that date shall not necessarily be accepted, and if accepted shall incur such late enrolment fee as the Council may prescribe unless there be adequate reason why it had not been submitted by the prescribed date. Application for remission of the late enrolment fee must be made in writing and be addressed to the Registrar.
- 3
  - (a) Subject to subsections (b) and (c) of this clause, all fees and charges in any academic year shall be paid at the time of enrolment.
  - (b) A student shall be liable for any increase, or entitled to refund of any decrease, in the total fee so paid that may arise through variation of enrolment during the year.
  - (c) The Registrar may allow in individual cases an extension of time for payment of fees. A student who fails to pay fees as prescribed in sub-section (a) of this clause or within such extended time as may have been allowed by the Registrar shall incur such additional fee as may be prescribed by the Council.

Statute allowed 16 December, 1971.

Amended: 23 Jan. 1975: 1(b); 15 Jan. 1976: 2(c); 24 Feb. 1983: 1(d), 1(e), 1(f), 2; 20 July, 1989: 1(b), 2, 3(a), 3(b), 3(c); 1 Mar. 1990: 1(b)

See also section 5 on Fees.

#### 1.4.9 External studies

Some courses for awards offered by the Faculty of Arts are available by external study. Please consult *The University of Adelaide Faculty of Arts Handbook for External Studies*. Some courses for awards offered by the Faculty of Agricultural and Natural Resource Sciences are also available externally.

#### 1.4.10 Hepatitis B, HIV and medical and dental students

It is a condition of enrolment in the courses for the degree of Bachelor of Dental Surgery, the degree of Bachelor of Medicine and Bachelor of Surgery, and for all higher degrees in the Faculties of Medicine and Dentistry involving human experimentation or patient studies, that students abide by the following policy:

- 1 All new students (ie all students who have not previously been students in the Faculties of Medicine or Dentistry) must be screened by the University Health Service to establish their antibody and antigen status in respect of Hepatitis B, or must provide evidence which satisfies the Health Service of such status. The screening must occur within four weeks of enrolment. Screening performed by the Health Service will be at no cost to the student.
- 2 Where a screening test shows that a student does not have appropriate immunity against Hepatitis B, the student must either begin a vaccination program through the Health Service, or must provide evidence which satisfies the Health Service that the student has begun and duly completed such program. Immunisation provided by the Health Service will be at no cost to the student.
- 3 Students may choose to be screened to establish their HIV antibody status, but this is not compulsory.
- 4 Where a screening test shows that a student has a positive e-antigen status in respect of Hepatitis B, or a positive antibody status in respect of HIV/AIDS, the student must accede to counselling by a member of the medical staff of the Health Service. At all times the student's right to confidential treatment of information about himself or herself will be respected by the Director and staff of the Health Service.

- 5 The counselling will be directed at informing the student about Hepatitis B or HIV/AIDS as an illness, and having the student accept and acknowledge a duty of care, including the need to learn and use effective, safe, work practices. It will also include reference to current standards and work practices in the medical and dental professions, and their academic and professional implications. As part of the counselling, students will be encouraged to consult with the Dean of their Faculty about these matters. Where appropriate, a student will be referred to an infectious diseases specialist.
- 6 A student who has a positive e-antigen status in respect of Hepatitis B, or a positive antibody status in respect of HIV, will not be excluded from the course in which they are enrolled.
- 7 The Occupational Health and Safety HIV/AIDS/Hepatitis B Policy and Procedures (see sub-section 18.4 of the Handbook of Administrative Policies and Procedures ) will apply to all students who have a positive e-antigen status in respect of Hepatitis B, or a positive antibody status in respect of HIV/AIDS.
- 8 The University may revoke the enrolment of any student who does not comply with the screening, immunisation and counselling requirements of this policy.

#### 1.4.11 Hospital, Health Centre and IMVS rules

Rules for the admission of medical students to the practice of the teaching hospitals, health centres and the Institute of Medical and Veterinary Science may be found in the *The University Calendar Volume II: Handbook of Courses* following the Specific Course Rules for the M.B.,B.S. degree.

#### 1.4.12 Leave of absence

Please refer to the Specific Course Rules for individual courses for any precise policy statements about leave of absence; notably the Specific Course Rules for the M.B.,B.S. contain statements about 'intermission'. The Faculty of Performing Arts may require students to re-audition if they have been absent from a course - see the Specific Course Rules for details.

#### 1.4.13 Non-award enrolment

The following is clause 12 of Statute Chapter 25 - Miscellaneous:

'A person wishing to be admitted to a course of study not leading to a degree may be so admitted, upon such terms and conditions as the Council may prescribe. Such a person shall be known as a Non-award Student'.

##### *Quotas*

Normal quotas on admission to award courses do not apply. However, for some individual subjects, the University is not able to provide sufficient places for students enrolled in award courses. In these circumstances, Non-award Students will not be admitted to such subjects except with the prior approval of Council.

##### *Conditions of Admission*

Non-Award Students are subject to the same Statutes, Regulations and rules as apply to students enrolled in award courses.

Subject to the normal conditions, Non-Award Students may be admitted to examinations; results will be recorded on the student's academic transcript.

Should a Non-Award Student subsequently be admitted to a course of study leading to an award, credit may be given for subjects passed as a Non-Award Student, at the discretion of Council\* .

\* Council has delegated this authority to Deans of Faculties.

##### *Union membership and Fees*

Non-Award Students are required to pay tuition fees. Non-Award Students are also required to pay the Statutory annual fee appropriate to their student load and consequently are members of the Adelaide University Union .

#### 1.4.14 Prerequisite and corequisite studies

Except by permission of the relevant Faculty, a student shall not enrol in any subject for which the pre-requisite or co-requisite requirements prescribed in the syllabus have not been met. Pre-requisites must be passed at the minimum level prescribed by the Faculty.

#### 1.4.15 Prior knowledge

What follows is clause 3C of Chapter 25 of the Statutes:

A subject designed for students with no prior knowledge of it need not be made available to

students who have such knowledge. A Faculty may refuse to allow a student to enrol in a subject if, after receiving advice from the Head of the department which teaches the subject, it considers that the student's background and qualifications are fully adequate for another subject which is taught in that department and which is available as an alternative.

#### 1.4.16 Quotas

Clause 3 of Statute Chapter 9 - Of Admission and Enrolment states:

With due regard to the resources and educational objectives of the University, the Council may place quotas on courses and subjects.

(Sub-section 12.4 of the Handbook of Administrative Policies and Procedures provides details of the policy and procedures for administering subject quotas).

#### 1.4.17 Re-enrolment

See 1.4.7 Enrolment by Prescribed Date & Payment of Fees.

For re-enrolment *in subjects*, see also 1.4.19 Repeating a subject.

#### 1.4.18 Repeal or alterations of course of study

The following is clause 5 of Chapter 25 of the Statutes - Miscellaneous:

In all cases where regulations affecting the course of study for any degree or diploma of the University have been or shall be repealed or altered, the Council may nevertheless allow candidates who have previously entered under the regulations repealed or altered to complete their course thereunder, but may impose such conditions or modifications as may seem good to the Council in each individual case.

Clause 10 of Chapter 25 also states the following:

In all cases where the regulations affecting the degree of Master or Doctor in any faculty have been or shall be repealed or altered, the Council may nevertheless allow a candidate, who has qualified under the regulations repealed or altered to proceed to that degree, to complete his [or her] qualification under the regulations so repealed or altered, provided that [the candidate] complete his [or her] qualification for admission to the degree under those regulations within three years of the date of such repeal or alteration.

#### 1.4.19 Repeating a subject

##### *Exemptions*

##### *Repeating a subject for the second time - enrolment restriction*

No student shall repeat a subject already passed except where:

- (a) a higher classification of pass is necessary to enable the student to satisfy prerequisite subject requirements for a higher level subject;
- (b) a student needs to convert a conceded pass to a higher level pass in order to qualify for an award;
- (c) Specific Course Rules for an award provide for the repeating of a subject, notwithstanding that it may have been previously passed, or for the possibility of it in respect to special features of the structure or process of the award; or
- (d) there are sound academic reasons for the Council to permit it.

For rules on such matters as exemptions available or enrolment restrictions, please refer to the Specific Course Rules.

#### 1.4.20 Status/exemption\*/credit transfer

A candidate who has passed subjects in other faculties or tertiary institutions or who has other qualifications may, on written application to the Faculty, be granted such status in those subjects or exemption from the relevant course or subject requirements as the Faculty may determine, (provided always that the candidate shall give such evidence of their status as in the opinion of the Faculty shall be sufficient).

Students wanting to apply for prospective status for studies to be undertaken at another institution at a future date should apply to the Faculty.

##### *notes*

Within the Bachelor of Engineering degree, any exemptions granted from part of the requirements for a subject are approved by Heads of Departments and shall hold for one academic year only.

Specific courses for awards offered by the Faculty of Agricultural and Natural Resource Sciences use a broader definition of status than other Faculties within the University. Refer to the 'definitions' section of the Specific Course Rules for the Faculty.

\*See also section 1.4.19 on Repeating a Subject

14.21 Tuberculosis screening of overseas and Australian students

Under the umbrella of Statute Chapter 32, Infectious diseases, the following policy has been approved:

- 1 All overseas students studying at the University of Adelaide shall attend the University Health Service to have the standard screening tests to TB done to ensure that their TB status is satisfactory and that there is no transmission of infection. The standard screening test will comprise a short history to determine risk factors and a Mantoux test at the Health Service, followed up by a Chest X-ray at the RAH Chest Clinic. Information/results will be exchanged between the Health Service and the Chest Clinic and utilised for reporting, contact tracing and surveillance purposes.
- 2 Overseas students requiring treatment (both active and non-active) will be managed jointly by the Chest Clinic and University Health Service following the standard protocols for treatment developed by the RAH Chest Clinic.
- 3 Australian students and University staff at risk of infection will be screened as in 1. above, and any requiring treatment managed as in 2. above.
- 4 Those persons screened who do not show evidence of infection will be offered vaccination (BCG) by the University Health Service.

14.22 Unacceptable combinations of subjects

No candidate will be permitted to count towards an award any subject, together with any other subject, which, in the opinion of the Faculty concerned, contains a substantial amount of the same material; and no subject or portion of a subject may be counted twice towards an award.

14.23 Withdrawal dates

The last day for withdrawing from subjects *without* the withdrawal counting as a failure is as follows:

**semester 1 subjects:** the end of the ninth teaching week of the semester (excluding the mid-semester break)

**semester 2 subjects:** the end of the ninth teaching week of the semester (excluding the mid-semester break)

**full year subjects:** the end of the fourth teaching week of second semester

For withdrawal dates for summer semester subjects and for the MBA trimester subjects, please contact Student Administration or the Faculty concerned for details.

1.5 Fees

Chapter 89 of the Statutes - Of Fees, states the following:

- 1 (a) The Council may impose fees in respect of instruction, tuition, applications for awards, or any other matters.
- (b) The Council shall prescribe by rule those matters in respect of which a fee is to be charged, the categories of persons who are to pay them, the amounts to be charged and the time and manner of payment.
- (c) The Registrar may allow in individual cases an extension of time for payment of fees. A student who fails to pay the prescribed fees at the time prescribed by the Council or within such extended time as may have been allowed by the Registrar shall incur such additional fee as may be prescribed by the Council.
- 2 (a) Every student proceeding to a degree, diploma, or certificate of the University and such other students as the Council may from time to time decide shall, unless exempted therefrom by the Council, pay an entrance fee and an annual fee for membership of the Adelaide University Union.
- (b) The Council shall from time to time prescribe the entrance fee and the annual fee. The entrance fee shall be the same for all classes of students, but the annual fee may differ for different classes of students as determined from time to time by the Council.

(c) The Council may determine whether the entrance fee may be paid by instalments over the first two years of the student's enrolment in the University and whether any individual student or any class of student may be exempted from payment of either the entrance fee or the annual fee or both.

(d) The entrance and annual fees prescribed from time to time by the Council and the conditions under which they may be paid shall be published in the University Calendar.

3 When it deems there are adequate reasons for so doing the Council may:

- (i) reduce any fee payable by a student, or
- (ii) exempt a student from liability to pay any fee.

4 Subject to Clause 3 of this Statute a student may not re-enrol in the University and notwithstanding the provisions of the separate degree, diploma or certificate regulations applicable a candidate shall not be admitted to a degree, diploma or certificate of the University unless all outstanding fees and all other financial obligations due to the University have been discharged or arrangements of their discharge have been approved by the Registrar.

note: *The University Calendar Volume II: Student Guide and Timetables* contains some general information about Statutory fees (commonly called Union fees), tuition fees and other charges. See also the Specific Course Rules for any additional course-specific fees or special items which may need to be purchased.

## 1.6 Grievance procedures

The University has adopted the following procedures for dealing with student complaints in a range of areas, including academic programs, individual staff members and administrative operations and decisions. The University has also adopted an additional set of policies and procedures for the resolution of grievances by **postgraduate** students.

These procedures recognise that most complaints will be dealt with directly with the staff member, and resolved 'on the spot'.

Complaints are of distinct kinds, which are dealt with separately:

- 1 complaints relating to academic programs and status;
- 2 complaints relating to individual staff members;
- 3 complaints concerning administrative operations or decisions of the University;
- 4 complaints relating to a grade for assessed work - refer to the section on Assessment and Examinations - Student Assessment Procedures and Appeals.

For complaints relating to sexual harassment and equal opportunity issues, refer to *The University Calendar Volume II: Student Guide and Timetables*.

### 1.6.1 Complaints relating to academic programs and status

1 Students may raise a problem or issue relating to academic programs, eg the content or structure of a subject, or of a whole course, or its means of assessment, or academic status for work done elsewhere, in the appropriate academic committee through one of their student representatives, or by personal approach to the Secretary or Convener of the relevant body, ie

- the Departmental Committee
- the Departmental Assessment Committee
- the Faculty Curriculum Committee
- the Faculty
- the Faculty Student Applications/Matters Committee.

2 Alternatively, a student may make a specific and formal complaint about such a matter, to the person or body with immediate responsibility.

If a student decides that it is appropriate to raise the issue as a complaint, he or she should complain to:

- (a) the subject coordinator, for complaints relating to a particular subject;
- (b) the Head of Department, for complaints relating to a Department's subjects and academic procedures generally;
- (c) the Dean of the Faculty for complaints relating more generally to a course, or faculty policies concerning curriculum, teaching or assessment.

- 3 Oral complaints shall be dealt with informally.
- 4 With written complaints, the person receiving the written complaint shall acknowledge its receipt in writing within one week, and shall reply within one month informing students of the outcome of the complaint, or stating what progress has been made and when the next report to the student(s) will be made, and so on, until the matter is resolved. Where a complaint has a particular impact on individual staff member(s) responsible for a subject, they shall be kept fully informed as to the progress of the matter.
- 5 Responsibility for dealing with the complaint may be transferred to a Head of Department, Faculty Course Coordinator or Convener of a Faculty Curriculum Committee or Student Matters Committee, but the student must be kept informed as to who has carriage of the matter at any time.
- 6 If the matter is not resolved to the satisfaction of the complainant he/she may appeal to the Student Academic Appeals Committee which, if it agrees that it requires further consideration, may refer it back to the Faculty or to the Academic (Educational) Matters Sub-Committee.

#### 1.6.2 Complaints relating to individual staff members

- 1 Students should direct grievances about individual staff members (for example, unsatisfactory teaching, unsatisfactory relationship with a staff member) orally to the staff member concerned in the first instance, if possible. Most grievances can be resolved quickly with direct discussion between the student(s) and the lecturer. Complaints by postgraduate research students concerning their supervisor or Head of Department or otherwise pertaining to their status as research students shall be dealt with according to the procedures of the Board of Graduate Studies.

(For more information on procedures for postgraduate students see the University of Adelaide's *Code of Practice for Maintaining and Monitoring Academic Quality and Standards in Higher Degrees*)

Students and staff may enlist the aid of a disinterested third party to assist in these discussions (for example, Student Counsellor, Director - Equal Opportunity, a student representative on the Departmental Committee or on the Faculty).

- 2 If it is not feasible to approach the staff member directly and informally as above, or if there has been no satisfactory resolution from the direct and informal contact, then the student(s) may lodge a complaint in writing with the staff member's Head of Department (where the Head of Department is the person complained about, the student may lodge the complaint with the Dean of the Faculty\*). This document shall state the evidence on which the complaint rests.

(\*note: Where the words 'Head of Department' occur they may be read as 'Dean of the Faculty' where appropriate.)

- 3 Students may complain orally to the Head of Department. Where a complaint is made orally the Head of Department shall make a written note of the complaint and communicate it to the staff member concerned. If the Head of Department believes that the complaint warrants investigation he or she may ask the student to put the complaint in writing.
- 4 The Head shall acknowledge receipt of the complaint within five working days, inform the staff member complained about, and shall deal with the complaint as expeditiously as possible. Within one month of receipt, the student(s) shall be informed in writing of the outcome of the complaint, or what progress has been made and when the next written advice as to progress/outcome will be given, and so on until the matter is resolved. This does not preclude face-to-face meetings between the student(s) and the staff member, which may be convened by the Head or other person requested by the Head to assist.
- 5 Victimisation of students who lodge complaints is prohibited. The Head of Department will counsel the staff member accordingly. If the students fear they may be victimised, they may request the Head to make arrangements to protect the students' interests - including allocating the students to other classes, moderating

the assessment, etc The Director, Equal Opportunity, is available to advise students, staff and Heads of Departments about such arrangements.

#### Confidentiality

6 Students must state whether or not their identities are to be kept confidential from the staff member. If a student requests that his or her identity be kept confidential from the staff member, then;

1 If the matter can be resolved with the identity being kept confidential, then the student's name or any other information which will identify her or him shall be withheld from the staff member.

2 If in the opinion of the Head of Department the matter cannot be resolved with the identity of the student being kept confidential, then the student must agree to lifting the requirement for confidentiality, or else the complaint shall lapse (because it cannot proceed). The Head of Department shall take into account whether or not the staff member can properly defend him or herself without knowing the identity of a complainant.

#### Outcomes

7 (1) The Head of Department shall inform the student(s) who lodged the complaint, and the staff member concerned, of the final outcome.

(2) Furthermore, the Head of Department shall consider whether there are any other students who might have been affected by the same complaint, and who should benefit from the same outcome.

(3) A staff member dissatisfied by the Head of Department's determination of a complaint may appeal to the Vice-Chancellor.

8 If students are not satisfied with the outcome or progress with dealing with the complaint, then they may complain in writing to the Registrar. The same response schedule then applies as above.

#### Record Keeping

9 (1) For oral complaints which are satisfactorily resolved with nothing in writing, no records shall be kept.

(2) File records relating to a complaint which is not yet resolved shall be maintained by the Head of the Department.

(3) For written complaints for which there is an outcome which reflects adversely on the staff member's performance, all records which relate to the complaint shall be placed on the staff member's personal file. Where this occurs, the staff member shall be given a copy of the record and entitled to attach his or her own comments.

(4) For written complaints for which there is an outcome which does not reflect adversely on the staff member's performance, all records which relate to the complaint shall be destroyed. Furthermore, if the complaint has become public, then the Head of Department shall take action to update and correct the public record.

(5) Apart from the records defined in 9.2 and 9.3 no other records shall be kept that identify the staff member concerned.

#### 1.6.3 Complaints concerning administrative operations or decisions of the University or of some department, unit, branch, etc, thereof

1 Students should direct complaints concerning some administrative action, inaction, procedure or decision orally to the person with immediate responsibility in the first instance (or the person likely to have responsibility for this function, if the situation is not clear).

2 The officer or other employee of the University approached shall ascertain the nature of the complaint or problem, and either take immediate steps to have it rectified, or refer the matter to the officer with the authority to investigate the matter and if necessary initiate reform or redress. This shall be done either by referring the student directly to the superior officer, or by informing the officer in writing of the

complaint, and informing the student to whom the complaint has been referred.

- 3 The person who accepts responsibility for investigating the complaint shall inform the student within a reasonable time whether it is accepted that the complaint has substance, and if so, what is being done by way of redress and/or rectification. If the matter remains under consideration for a prolonged period, the student shall be kept informed of progress, and of the final outcome.
- 4 If a complaint was found to have substance, the officer who took responsibility for dealing with it shall consider whether other students' interests could be, or could have been, affected by the problem experienced by the complaining student. The officer shall take whatever steps are practicable to ensure equitable treatment, and shall also recommend any changes to procedures which might prevent a recurrence of the problem.
- 5 A student dissatisfied with the outcome of such a complaint may appeal to the Student Academic Appeals Committee.
- 6 **Complaints relating to a grade for assessed work**  
The procedures relating to complaints in relation to grades are provided in the section on Assessment and Examinations.
- 7 **Complaints relating to sexual harassment**  
The procedures relating to Sexual Harassment are outlined in the section 'Sexual Harassment' in the Student Guide.
- 8 **Complaints relating to equal opportunity issues**  
The procedures relating to Equal Opportunity are outlined in the section 'Equal Opportunity' in the Student Guide.

### 1.7 Intellectual property

The University's policy on intellectual property is contained in section 10.13 of the Handbook of Administrative Policies and Practices. The policy is also reproduced in the University of Adelaide's *Code of Practice for Maintaining and Monitoring Academic Quality and Standards in Higher Degrees*.

### 1.8 Safety Procedures

Under the South Australian Occupational Health, Safety and Welfare Act, 1986, students have a responsibility to work safely, taking reasonable care to protect their own health and safety and that of other students and staff. Specific responsibilities are outlined in the University's Health, Safety and Welfare Policy (Sub-section 18.1 of the Handbook of Administrative Policies and Procedures).

#### *Laboratory conduct procedures*

The University's approved laboratory conduct procedures are included as Appendix A to the General Course Rules.

The University also has the following sub-sections under *Research* in the Handbook of Administrative Policies and Procedures:

- 10.4 Experiments involving Animals
- 10.14 Ethics of Human Experimentation

### 1.9 Qualification requirements

Statute Chapter 11 - Of Degrees states the following:

- 1 Subject to Chapter LXXXIX \* candidates who shall have fulfilled all the conditions prescribed by the statutes and regulations for any degree, diploma, certificate or other award of the University shall be admitted to that degree or awarded that diploma, certificate or other award.

\* Statute Chapter 89 - Of Fees

### 1.10 Review of academic progress

Under the provisions of Clause 4C of Chapter 25 of the Statutes, students whose academic progress is considered to be unsatisfactory may be precluded from taking further studies in the course for which they are enrolled; or further enrolment in that course may not be permitted for one academic year; or they may be permitted to re-enrol, but with a restricted program of study.

Clause 4C is reproduced in full below.

- 4C (a) A faculty or board of studies may review the academic progress of any student enrolled for studies within the curriculum of that faculty or board at any time after the student has been enrolled for two semesters and, in the case of a student enrolled for a subject or subjects, has presented or has had an opportunity of presenting for the final examination in the subject or subjects for which (the student) was enrolled.

- (b) As a result of such review the faculty or board may decide (i) to take no action, or (ii) to permit the student to take during the current or next ensuing academic year only such programme of study as it may approve, or (iii) to recommend to the Council that the student be not permitted to enrol for further studies within its curriculum during the next ensuing academic year, or (iv) to recommend to the Council that the student be precluded from taking further studies in the subject or course for which [the student] was enrolled.
- (c) Whenever a student who has been enrolled for studies within the curriculum of a faculty or board of studies seeks enrolment for studies within the curriculum of another faculty or board of studies, or when a student who has been precluded under (b) seeks readmission to the faculty or board of studies from which he was precluded, the faculty or board of studies in which enrolment or re-enrolment is sought may consider the candidate's previous academic record in the University and elsewhere and may recommend to the Council that the enrolment be rejected.
- (d) Every student or candidate whose position is to be considered under the foregoing sections of this clause shall be notified accordingly, and may be requested to submit in writing for consideration by the faculty or board of studies such explanations as [the student] can offer for lack of satisfactory progress and reasons why [the student] should be permitted to enrol for further studies in the University. If the faculty or board of studies decides to recommend preclusion under section (b) or rejection under section (c) of this clause the recommendation shall be submitted to the Council which, after making such enquiry as it thinks fit, may confirm, vary or set aside the recommendation.
- (e) For the purposes of the foregoing sections of this clause and for the purposes of reducing the potential for delay in resolving the action to

be taken with respect to the student a faculty or board of studies may delegate its responsibilities and powers to a sub-committee consisting of a number of members of the faculty or the board of studies or to the dean of the faculty or the Convener of the board of studies. If, after making a review of the academic progress or history (as the case may require) of the student, the sub-committee or the dean or the Convener (as the case may be) decides to recommend preclusion under section (b) or rejection under section (c), the sub-committee or the dean or the Convener shall submit a recommendation directly to the Council and send a copy thereof to the faculty or board of studies.

Any delegation of its responsibilities and powers to a sub-committee or to its dean or Convener shall not thereby preclude the faculty or board of studies itself acting under the foregoing sections in relation to the student.

(note: Sub-section 7.10 of the Handbook of Administrative Policies and Procedures deals with the procedures for administering the '4C' policy and refers students to a document 'Academic Progress: Application of Clause 4C of Chapter 25 of the Statutes: Information for Students' available to students on request. Not all Faculties apply the clause 4C policy while some other Faculties may have additional requirements with regard to review of academic progress - see the Specific Course Rules for each course for details.)

### 1.11 Scholarships and prizes

Most of the rules for the scholarships and prizes available at the University of Adelaide are described in *The University Calendar, Volume 1*.

### 1.12 Special circumstances

When in the opinion of the relevant Faculty special circumstances exist, the Council, on the recommendation of the Faculty in each case, may vary any of the provisions of the Specific Course Rules for any particular award.

## 2 Postgraduate courses

### 2.1 Admission requirements

What follows are *general* rules for admission to postgraduate courses.

Detailed admission requirements for each postgraduate course are contained in the appropriate set of Specific Course Rules.

2.1.1 Graduate certificates

**1 Standard admission**

An applicant for admission to the course of study for the Graduate Certificate shall normally:

- (a) have qualified for an appropriate degree or an appropriate Honours degree of the University, or
- (b) hold qualifications from another institution accepted by the Faculty for the purpose, and
- (c) have completed such other prerequisite work as may be prescribed in the Specific Course Rules for the Graduate Certificate.

Courses within the Faculty of Performing Arts normally require a satisfactory audition as well.

**2 Discretionary admission**

The Council\* may, in special cases and subject to such conditions (if any) as it may see fit to impose in each case, accept as a candidate for the Graduate Certificate a person who does not satisfy the requirements of (1) above but who has given evidence satisfactory to the Faculty of fitness to undertake work for the Graduate Certificate.

\*Council has delegated this authority to Deans of Faculties.

2.1.2 Graduate diplomas

**1 Standard admission**

An applicant for admission to the course of study for the Graduate Diploma shall normally:

- (a) have qualified for an appropriate degree or an appropriate Honours degree of the University, or
- (b) hold qualifications from another institution accepted by the Faculty for the purpose, and
- (c) have completed such other prerequisite work as may be prescribed in the Specific Course Rules for the Graduate Diploma.

Courses within the Faculty of Performing Arts normally require a satisfactory audition as well.

**2 Discretionary admission**

The Council\* may, in special cases and subject to such conditions (if any) as it may see fit to impose in each case, accept as a candidate for the Graduate Diploma a person who does not satisfy the requirements of (1) above but who has given evidence satisfactory to the Faculty of fitness to undertake work for the Graduate Diploma.

\*Council has delegated this authority to Deans of Faculties.

2.1.3 Postgraduate diplomas

An applicant for admission to the course of study for a Postgraduate Diploma shall

- (i) have qualified for a Graduate Certificate of the University in an approved field of study or an equivalent award of another institution accepted for the purpose by the Faculty; or
- (ii) have qualified for a degree or a three year diploma of the University in an approved field of study, or for an equivalent award of another institution accepted for the purpose by the Faculty.

2.1.4 Master degrees

**1 Standard admission**

An applicant for admission to the course of study for the degree of Master shall normally:

- (a) have qualified for an appropriate degree or an appropriate Honours degree of the University, or
- (b) hold qualifications from another University or institution accepted by the Faculty for the purpose, and
- (c) have completed such other prerequisite work as may be prescribed in the Specific Course Rules for the Master degree.

Courses within the Faculty of Performing Arts normally require a satisfactory audition as well

**2 Discretionary admission**

With the approval of the Board of Graduate Studies, acting with authority wittingly devolved to it by Council\*, the Dean of Graduate Studies may, acting on a recommendation from the head of the department concerned, in special cases

and subject to such conditions (if any) as it may see fit to impose in each case, accept as a candidate for the degree of Master a person who does not satisfy the requirements of (1) above but who has given evidence satisfactory to the Board of fitness to undertake work for the degree of Master.

\* Council has delegated authority to the Dean of Faculty in the case of Master degrees by coursework.

### 3 Conditional Admission — qualifying or probationary period for Master degrees

A candidate admitted under (1) or (2) above may be required to pass such qualifying work or bridging work as the Board of Graduate Studies\*, acting on a recommendation from the head of the department concerned, shall determine before the candidate's admission to the Master degree may be confirmed by the Board.

\*The Faculty in the case of Master degrees by coursework.

#### 2.1.5 Degrees of Doctor of Philosophy (Ph.Ds)

The degree of Doctor of Philosophy has its own set of Regulations contained in *The University Calendar Volume II: Handbook of Courses*.

Regulation 6 of the Ph.D. states:

Except as otherwise prescribed in the schedules, the academic standing required for acceptance as a candidate shall be an Honours degree of Bachelor of at least a IIA Standard or a degree of Master of the University of Adelaide or the equivalent thereof. Applications from students with other qualifications will require the approval of the Board of Graduate Studies.

#### 2.1.6 Higher doctorates

Higher doctorates offered by the University have their own sets of Regulations contained in *The University Calendar Volume II: Handbook of Courses*. Please refer to these Regulations for admission requirements.

### 2.2 Assessment and examinations

Section 1.2 of the General Course Rules on assessment and examinations for undergraduate students also applies to students undertaking coursework postgraduate studies.

In addition, section 1.2.5 on Plagiarism and Related Forms of Cheating applies to students undertaking postgraduate studies by research.

Postgraduate students should consult the University of Adelaide's *Code of Practice for Maintaining and Monitoring Academic Quality and Standards in Higher Degrees* and the University of Adelaide's booklet on *Higher Degree Administration* as well as the Guidelines on Higher Degrees by Research and Specifications for Thesis contained in the *Calendar Volume II: Handbook of Courses*.

Postgraduate students should consult the Specific Course Rules for the course they are undertaking.

### 2.3 Computing facilities: rules for student use

Section 1.3 of the General Course Rules for undergraduate students also applies to postgraduate students.

### 2.4 Enrolment and re-enrolment

Section 1.4 of the General Course Rules for undergraduate students also applies to postgraduate students.

#### 2.4.1 Duration of courses

What follows are general statements about course duration. Please refer to the Specific Course Rules for each course for any precise statements about course duration.

##### 1 Graduate certificates

The course of study will normally be completed in one semester of full-time study or in not more than two years of part-time study.

##### 2 Graduate diplomas

The course of study will normally be completed in one year of full-time study or in not more than three years of part-time study.

##### 3 Postgraduate diplomas

The course of study will normally be completed in one year of full-time study or the part-time equivalent.

##### 4 Master degrees

The length of Master degrees varies from one year full-time to up to three years full-time. Please consult the Specific Course Rules for individual Master degrees for details on course duration.

## 5 Degrees of Doctor of Philosophy (Ph.Ds)

Regulation 8 for the degree of Doctor of Philosophy covers the length of study.

### 2.4.2 Repeal or alterations of course of study

The following is clause 5 of Chapter 25 of the Statutes - Miscellaneous:

In all cases where regulations affecting the course of study for any degree or diploma of the University have been or shall be repealed or altered, the Council may nevertheless allow candidates who have previously entered under the regulations repealed or altered to complete their course thereunder, but may impose such conditions or modifications as may seem good to the Council in each individual case.

Clause 10 of Chapter 25 also states the following:

In all cases where the regulations affecting the degree of Master or Doctor in any faculty have been or shall be repealed or altered, the Council may nevertheless allow a candidate, who has qualified under the regulations repealed or altered to proceed to that degree, to complete his [or her] qualification under the regulations so repealed or altered, provided that [the candidate] complete his [or her] qualification for admission to the degree under those regulations within three years of the date of such repeal or alteration.

### 2.4.3 Leave of absence

Please refer to the Specific Course Rules for individual courses for any precise policy statements about leave of absence.

The usual practice with regard to Master degree courses is that a maximum period of candidature is stipulated in the Specific Course Rules with the Faculty\* concerned being permitted to change the period of candidature - for details on suspensions, extensions and intermissions of candidature, see also the University of Adelaide's *Code of Practice for Maintaining and Monitoring Academic Quality and Standards in Higher Degrees* and the University of Adelaide's booklet on *Higher Degree Administration*.

\*The Faculty in the case of Master degrees by coursework and the Board of Graduate Studies in the case of Master degrees by research.

The Faculty of Performing Arts may require students to re-audition if they have been absent from a course - see the Specific Course Rules for details.

### 2.4.4 Withdrawal dates

Please refer to section 1.4.23.

## 2.5 Fees

Section 1.5 of the General Course Rules for undergraduate students also applies to postgraduate students.

## 2.6 Grievance procedures

The Grievance Procedures for postgraduate students are contained in the University's *Code of Practice for Maintaining and Monitoring Academic Quality and Standards in Higher Degrees*.

## 2.7 Intellectual property

The University's policy on intellectual property is contained in sub-section 10.13 of the Handbook of Administrative Policies and Practices.

The policy is also reproduced in the University of Adelaide's *Code of Practice for Maintaining and Monitoring Academic Quality and Standards in Higher Degrees*.

## 2.8 Safety Procedures

Under the South Australian Occupational Health, Safety and Welfare Act, 1986, students have a responsibility to work safely, taking reasonable care to protect their own health and safety and that of other students and staff. Specific responsibilities are outlined in the University's Health, Safety and Welfare Policy (Sub-section 18.1 of the Handbook of Administrative Policies and Procedures).

### *Laboratory conduct procedures*

The University's approved laboratory conduct procedures are included as Appendix A to the General Course Rules.

The University also has the following sub-sections under *Research* in the Handbook of Administrative Policies and Procedures:

10.4 Experiments involving Animals

10.14 Ethics of Human Experimentation

## 2.9 Qualification requirements

Statute Chapter 11 - Of Degrees states the following:

- 1 Subject to Chapter LXXXIX \* candidates who shall have fulfilled all the conditions prescribed by the statutes and regulations for any degree, diploma, certificate or other award of the University shall be admitted to that degree or awarded that diploma, certificate or other award.

\*Statute Chapter 89 - Of Fees

## 2.10 Review of academic progress

Postgraduate students should consult the University's *Code of Practice for Maintaining and Monitoring Academic Quality and Standards in Higher Degrees* or the Specific Course Rules for the course they are undertaking.

## 2.11 Scholarships and prizes

note: Most of the rules for the scholarships and prizes available at the University of Adelaide are described in The University Calendar, Volume I.

## 2.12 Special circumstances

When in the opinion of the relevant Faculty special circumstances exist, the Council, on the recommendation of the Faculty in each case, may vary any of the provisions of the Specific Course Rules

## Appendix A

### Laboratory conduct procedures

*These procedures have been developed from information supplied by the South Australian Department for Industrial Affairs and the Standards Association of Australia Standard AS2243, 'Safety in Laboratories'.*

The University of Adelaide recognises its obligation to take all reasonable precautions to safeguard the health, safety and welfare of its employees and students while they are at work.

The University of Adelaide also believes that students leaving this University must take with them an attitude which accepts good health and safety practice as normal.

To this end, the following Laboratory Conduct Procedures have been developed and must be adhered to by all who work in laboratories. It is strongly recommended that new students and research workers view the film entitled 'Safety in Laboratories' available from the Occupational Health & Safety Unit.

*Persons who fail to comply with these procedures will not be allowed to work in the laboratory.*

### General safety rules

- Eating, drinking and the application of cosmetics in laboratories is prohibited. (Wine tasting, which occurs as part of the Wine Science and Wine Marketing Courses at Roseworthy Campus is permitted in designated laboratories only.)
- Do not store food and/or drink in laboratory refrigerators or laboratory storage units.
- Do not run or indulge in horseplay.

### Fire prevention

- No smoking in laboratories.
- No open flames should be left unattended and no open flames should be used near any flammable solvents.
- Chemical waste should not be disposed of via sinks, drains or stormwater channels. Departments must provide suitable waste disposal containers and are responsible for removal by an approved waste disposal contractor.
- Keep fire escape routes clear at all times.
- Be familiar with FIRE PROCEDURES within the laboratory.
- Be familiar with the use of fire-fighting equipment.

### Personal protection

- Approved safety spectacles, goggles or safety shields must be worn in all areas where tools or substances such as chemicals, liquids, UV light or radiation may cause eye injury.
- Laboratory coats, or gowns tied at the back, must be worn. Gloves should be worn at the discretion of the supervisor.
- Wear closed-in footwear at all times. Bare feet, thongs and sandals are prohibited.
- Cover all open wounds when handling chemicals and animals.

- Wash hands after work and before leaving the laboratory.
- Use disinfectants after handling suspected infectious materials.
- Do not pipette by mouth, use mechanical pipetting devices.
- Avoid lifting heavy objects - use trolleys where appropriate. Where lifting is unavoidable, seek assistance (share the load).
- Do not use any machines or laboratory apparatus without prior instruction by the supervisor on safe work procedures and practices.
- Button loose clothing and tie back long hair. When using machinery, remove jewellery, rings etc should the possibility exist for such items to be caught in moving parts.

### Housekeeping

- Keep floors tidy and dry.
- Keep benches clean and free from chemicals and apparatus that are not being used.
- Keep aisles free from obstructions.
- Clean working area and equipment thoroughly after use.
- If last to leave the laboratory, make sure equipment is turned off, flames are extinguished etc.
- Keep the interior of fume cupboards and nearby areas clean and clear.
- Observe safety signs at all times.
- All apparatus left running overnight should be shielded and labelled with name and telephone number of person to be contacted, and the Security Office notified.
- If contractors are working in your area, make known to them any hazards which may exist in your area, ie flammable liquids.

## Chemicals

- Clearly label all containers in use within the laboratory.
- Always use safety carriers for transporting glass or plastic containers with a capacity of 2 litres or greater.
- Read the Material Safety Data Sheet before commencing work.
- Regard all substances as hazardous unless there is definite information to the contrary.
- Carry out work in fume cupboards if material is likely to give off toxic or unpleasant odours.
- Keep fume cupboard sashes closed whenever practicable.
- Do not place objects near fume cupboard baffles so that airflow is prevented.
- Do not allow flammable materials to accumulate in the laboratory.
- Use the correct containers provided to dispose of glass, sharps, metal, paper, infectious waste etc.
- Wash hands frequently and upon completion of work.

## Electrical equipment

- The use of electric open bar radiators or any fan heaters is prohibited.
- Switch off all electrical appliances when equipment is not in use.
- Display a 'LEAVE ON' sign on any equipment required to be left on for an extended period.
- Use Residual Current Devices (RCDs) for all hand held electrical appliances.

## Emergency/First Aid

- It is the responsibility of all supervisors to ensure that persons working in a laboratory know the location of:
  - (a) the nearest fire extinguishers
  - (b) first aid box
  - (c) emergency shower/eye wash facilities
  - (d) isolation devices for gas, water and power (where fitted)
  - (e) emergency spill containment equipment and procedures
  - (f) emergency personal protective equipment
  - (g) fire/emergency escape exits
- Wash skin immediately with plenty of water if contaminated with acids and alkalis.

- Eyes splashed with any chemical must be washed with water and medical advice obtained immediately.
- All breakages and spills must be reported to the supervisor and dealt with immediately. Materials should be cleaned up and a bin provided for broken glass and materials etc.

## After hours working in laboratories

Work outside of core hours 8:00am to 6:00pm, or at weekends, is regarded as after hours.

There is an extra danger in laboratory work after hours, when your supervisor may not be present, and it is particularly dangerous to work alone in a building or even far removed from other people.

Personnel of Departments who wish to work outside normal hours may be required to fill in a form on arrival and again on leaving the building. (Such a system operates in the Biochemistry, P&I Chemistry and Organic Chemistry Departments).

This form requires you to:

- Write your name
- Indicate the room(s) you are working in
- Indicate the times you commence and finish
- Notify the last person in the building that you are leaving

note: Work by undergraduate students can only be performed when supervised by an academic staff member (or nominee) during or outside core hours.

## Please note:

For work with recombinant DNA organisms, refer to the University of Adelaide Handbook of Administrative Policies and Procedures, Sub-Section: 10.2 (paragraphs 1-15).

For work with carcinogenic chemicals, refer to the NH&MRC publication, 'Guidelines for laboratory personnel working with carcinogenic or highly toxic chemicals', available from the OH&S Unit.

For work with radioactive substances, refer to rules available from the OH&S Unit.

*These procedures shall be read in conjunction with the Department's Health and Safety Manual and Australian Standard 2243, 'Safety in Laboratories', Parts 1 to 10 inclusive.*

## Faculty of Agricultural and Natural Resource Sciences

### Regulations

#### Of Awards in the Faculty of Agricultural and Natural Resource Sciences

1 In the Faculty of Agricultural and Natural Resource Sciences there shall be the following awards:

(a) Associate Diploma in Applied Science (Agricultural Production)

Associate Diploma in Applied Science (Farm Management)

Associate Diploma in Applied Science (Horse Husbandry and Management)

Associate Diploma in Wine Marketing

Ordinary degree of Bachelor of Agricultural Business

Ordinary degree of Bachelor of Agricultural Science

Ordinary degree of Bachelor of Applied Science (Agriculture)

Ordinary degree of Bachelor of Applied Science (Natural Resources Management)

Bachelor of Applied Science (Wine Science)

Honours degree of Bachelor of Agricultural Business

Honours degree of Bachelor of Agricultural Science

Honours degree of Bachelor of Applied Science (Agriculture)

Honours degree of Bachelor of Applied Science (Natural Resources Management)

Master of Agricultural Science

Master of Applied Science

(b) Graduate Certificate

Graduate Diploma

Postgraduate Diploma

Master

each of which shall be defined by one of the following fields of study:

Agricultural Biotechnology

Agricultural Business

Agronomy and Farming Systems

Animal Production

Crop Protection

Horticulture

Natural Resources Management

Oenology

Plant Science

Rangeland Management

Soil Management and Conservation

Veterinary Studies

Viticulture

2 The courses for the awards listed in Regulation 1 shall be governed by the General Course Rules and Specific Course Rules that the Council shall prescribe from time to time.

3 The syllabuses of subjects shall be specified by the Council.

Regulations effective from 1 August 1994.

Regulations amended 23 February 1995.

notes (not forming part of the Regulations)

1 Council has delegated the power to approve minor changes to the General Course Rules to the Deputy Vice-Chancellor (Academic).

2 Council has delegated the power to approve minor changes to the Specific Course Rules to the Deans of Faculties.

3 Council has delegated the power to specify syllabuses to the Head of each department or centre concerned, such syllabuses to be subject to approval by the Faculty or by the Dean on behalf of the Faculty. The Head of department or centre may approve minor changes to any previously approved syllabus.

## Associate Diplomas in

Applied Science (Agricultural Production)

Applied Science (Farm Management)

Applied Science (Horse Husbandry and Management)

Wine Marketing

Bachelor of Applied Science (Agriculture)

Bachelor of Applied Science  
(Natural Resources Management)

Bachelor of Applied Science (Wine Science)

The above awards have been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar.

As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

## Specific Course Rules

---

### Definitions

For the purposes of the Specific Course Rules for the above awards in the Faculty of Agricultural and Natural Resource Sciences, the following definitions shall apply:

**Academic day**-is a day on which lectures, tutorials, laboratory sessions and practical work are timetabled, and any day in the promulgated study vacation/examination period.

**Admission**-into a course involves acceptance of an offer of a place in a course by an applicant, and payment of such fees and charges as may be determined by Council from time to time.

**Assumed (subject)**-is a subject which students are advised to complete before attempting a more advanced subject, and a knowledge of which is assumed.

**Award**-is a postgraduate or graduate diploma, graduate certificate, degree or associate diploma which is conferred by the University upon completion of a course.

**Commencing student**-a student is a commencing student in a course if the student has enrolled for the first time in that course.

**Complete (or pass) a subject**-means that a student must obtain a grade of High Distinction, Distinction, Credit or Pass for a subject, or a Conceded Pass.

**Conceded Pass**-is a Pass conceded to a student, under certain conditions, to enable the student to graduate from a course. A Conceded Pass may not be used to satisfy prerequisite requirements.

**Continuing student**-a student is a continuing student in a course if the student has re-enrolled in that course.

**Course**-a prescribed program of subjects to be completed for an award.

**Course Adviser**-an academic member of Faculty appointed by the Faculty to oversee a course.

**Corequisite**-a subject specified by a Department which must be taken concurrently with a particular subject, unless the subject has already been passed.

**Dean (of Faculty)**-means the Dean of the Faculty of Agricultural and Natural Resource Sciences.

**Elective subject**-is a subject which may, subject to course requirements and the satisfaction of prerequisites, be chosen from a specified group of subjects offered by the University.

**Enrolment**-in a subject by a student is the act of notifying the Registrar on the appropriate form, together with the payment of applicable fees, within the period specified by Council, that the student intends to undertake the subject for the purpose of obtaining a final grade.

**Examination**-means any formally-supervised examination in a subject held at a fixed time and place.

**Exemption**-is dispensation granted from part of the requirement of a subject when a student has previously completed study of certain aspects of the subject to the satisfaction of the Subject Coordinator.

**Extenuating circumstances**-are any substantial unforeseen emotional or physical events which in the opinion of the Subject Coordinator prevent the student handing in an assignment on time or from sitting for an examination or test.

**External course**-a course of study taken in the external mode.

**External mode**-a student is enrolled in a subject in the external mode if that student is studying from teaching material especially prepared for off-campus students.

**External student**-a student enrolled only in subjects offered in a particular semester in the external mode.

**Faculty**-is the Faculty of Agricultural and Natural Resource Sciences.

**Full-time course**-is a course available to students on a full-time basis.

**Full-time student**-a student enrolled in subjects which, in a particular semester, amount to 75% or more of the load specified in the program of study for the course as being a full-time study load for that course.

**Grade**-is a final assessment in a subject.

**Graduation**-from a course is the conferring of the award appropriate to that course, either at a commemoration ceremony or in absentia.

**Internal mode**-a student is enrolled in a subject in the internal mode if classes are attended during the semester.

**Internal student**-a student enrolled only in subjects for which classes are attended during the semester.

**Multi-mode student**-a student who, in a particular semester, is permitted to enrol in some subjects in the internal mode and others in the external mode.

**Part-time course**-a course available to part-time students.

**Part-time student**-a student enrolled in subjects which, in a particular semester, amount to less than 75% of the load specified in the program of study for the course as being a full-time study load for that course.

**Preclusion**-of a student is the decision by Council not to permit a student to enrol for further studies in a course under the provisions of Clause 4C of Chapter XXV of the Statutes.

**Prerequisite**-is a subject specified by a Department in which a grade of Pass or better must be obtained prior to enrolment in a particular subject. See also Conceded Pass.

**Semester**-a period (normally 13 teaching weeks) specified by Council for the presentation of subjects within the courses of study. There are two semesters in each year.

**Status**-may be granted to an undergraduate student in some subjects on the basis of studies completed successfully in another tertiary course. Status may also be granted on the basis of extensive relevant work experience.

**Streams**-in a course are several prescribed sets of subjects, one set of which the student chooses to take.

**Subject**-is an amount of work specified by a Department, normally completed over the duration of one semester, for which a final assessment is recorded.

**Subject Coordinator**-of a subject is a member of the academic staff appointed by the relevant Head of Department to be responsible for the presentation and assessment of that subject.

**Withdrawal**-from a subject or a course by a student is the act of notifying the Registrar on the appropriate form and within the period specified by the Council that the student no longer intends to continue enrolment in the subject or the course.

**Working day**-is a 24 hour period following a set deadline, excluding Saturdays, Sundays and public holidays.

## **1 Admission requirements**

### **1.1 Undergraduate courses**

#### **1.1.1 Normal admission**

##### **(a) General requirements**

For admission to the above degree courses, an applicant must have completed SACE Stage 2 in South Australia with a minimum aggregate score specified by Council from time to time, or the equivalent.

For admission to the above associate diploma courses, an applicant must have completed SACE Stage 2 in South Australia with a minimum aggregate score specified by Council from time to time, or the equivalent. An applicant who holds a TAFE stream 3100-3300 award which is equivalent to a year of full-time study and

who has also completed SACE Stage 1 will be deemed to have met the academic requirements for admission to the associate diploma courses.

(b) Particular requirements

For admission to the Bachelor of Applied Science (Agriculture), an applicant must hold a South Australian Class 1 Drivers Licence or interstate equivalent.

For admission to the Associate Diploma of Applied Science courses an applicant must have obtained:

- (i) for the Farm Management course, at least one year of acceptable farm work experience undertaken after the completion of secondary studies.
- (ii) for the Horse Husbandry and Management course, experience with horses of a nature and for a period acceptable to the Faculty.

(c) Exceptions

Notwithstanding the requirements specified in (1)(a) and (1)(b) of this rule an applicant who does not meet these requirements may be admitted at the discretion of Faculty if Faculty is of the opinion that the applicant has reasonable prospects of success in the course.

Preference in selection for admission may be given to applicants who have obtained relevant experience or who have undertaken certain subjects in secondary school.

1.1.2 Special admission

Special admission is available to those who have, or will have, reached the age of 21 years by 1 January of the year in which they seek admission.

Special admission does not require any precisely defined academic attainment but depends upon an assessment by the Faculty of the applicant's ability to complete the course.

1.2 Postgraduate courses

Normal admission

Applicants for admission to postgraduate courses must normally hold an undergraduate degree or three-year diploma of The University of Adelaide or the former Roseworthy Agricultural College or another academic

qualification accepted by the Faculty as sufficient for the purpose. With Faculty approval admission to some postgraduate courses may be available to applicants without the required undergraduate qualification but with other attainments or experience.

2 Enrolment

2.1 Eligibility for enrolment

No student may be enrolled in a course unless an offer of a place in the course has been made and an acceptance has been received, and all the conditions for enrolment as prescribed in these Rules have been met, including the payment of all fees and charges.

2.2 Period when enrolment must be completed

All students shall enrol prior to the commencement of first semester on a date or dates determined by Council from time to time. A charge will be made by the University in cases of late enrolment.

2.3 Responsibility for correct enrolment

Each student is responsible for ensuring that he/she is correctly enrolled each semester. This includes ensuring that

- (a) information required on all enrolment forms is complete and correct;
- (b) the subjects are part of the course in which the student is enrolled;
- (c) prerequisites have been met;
- (d) the number of subjects taken does not (without the approval of the Course Adviser) exceed a normal load;
- (e) approval has been granted by Faculty to enrol for a third time in a subject which has been failed at two previous attempts;
- (f) all other enrolment conditions, including the payment of fees, are met by the date(s) specified.

2.4 Last date for enrolment in a subject

Applications to add a subject must be made on an Amendment to Enrolment form available from the Student Records Office at the Roseworthy Campus. The Amendment to Enrolment form must be signed by the Course Adviser.

External students may add subjects to their enrolment up until the Friday before the start of semester, provided that a place is available in the

quota for any subject(s) chosen. Applications to add a subject must be made in writing on an Amendment to Enrolment form and lodged in the Student Records Office at the Roseworthy Campus. If time does not permit, the request should be made by telephone to the Student Records Office at the Roseworthy Campus with confirmation in writing; notification by facsimile will be accepted.

## **2.5 Enrolments in additional subjects**

Students may only enrol in subjects additional to those required to meet course requirements, or as permitted in 2.9 below of this rule with the approval of the Course Adviser.

## **2.6 Prerequisites**

The prerequisite for a particular subject is a condition or set of conditions which must be met by a student before being permitted to enrol in that subject. Subject prerequisites are specified in the University Calendar.

### **2.6.1 Equivalent subjects**

Where a student has not met the prerequisite for a subject as specified in the University Calendar the Subject Coordinator, after consultation with the Course Adviser, may approve the student's enrolment in the subject on the basis of either

- (a) the completion of other subjects deemed to be equivalent to the prerequisite or
- (b) the demonstration by the student of other experience which suggests that the student would be able to complete the subject successfully.

### **2.6.2 Grades and prerequisites**

The following grades will not satisfy prerequisite requirements: Conceded Pass, Fail, Withdraw-Fail and the following grades used by Roseworthy Agricultural College up until (and including) 1990: F, F\*, N, WF, An I (Incomplete) or WH (Withheld) recorded for a subject will not satisfy a prerequisite.

### **2.6.3 Failure to meet a prerequisite**

Enrolment in a subject is invalid if a student has not met the prerequisite, other than as permitted under Clauses 2.6(1)(a) and 2.6(1)(b) above. A student who enrolls in a subject in anticipation of passing its prerequisite must withdraw from the subject if the prerequisite is subsequently failed.

### **2.6.4 Status**

The granting of status in a subject is equivalent to a pass in the subject for prerequisite purposes. However, a student may not, without the permission of the Course Adviser, enrol in a subject in anticipation of being granted status in its prerequisite.

### **2.6.5 Changes to prerequisites**

A student shall not be disadvantaged by any change in prerequisites for subjects in a course provided that the student remains continually enrolled in the course. Should a student withdraw from a course and be subsequently re-admitted the student will be required to satisfy prerequisites applying at the time of re-admission.

## **2.7 Multi-mode enrolment**

An internal student may apply to enrol in one or more external subjects in a semester. Permission may be granted, for example, to avoid a timetable clash, or to allow a student to graduate sooner than would be possible if time were to be spent waiting for a subject to be offered internally.

Application by an internal student for permission to take an external subject must be made to the Student Records Office at the Roseworthy Campus. Approval will be granted only with the consent of the Course Adviser, and will be subject to a place being available in the subject quota. Internal students may not add an external subject to their enrolment after the second week of semester.

## **2.8 Transfer from the internal to the external mode**

Subject to the availability of subject offerings and to quotas, a student may transfer from enrolment in the internal mode to enrolment in the external mode and vice versa provided the enrolment is completed within the time specified in 2.4 above.

Application for permission to effect such a transfer must be made to the Course Adviser and the result of the application lodged with the Student Records Office at the Roseworthy Campus.

Any additions to a student's enrolment must be lodged with the Student Records Office at the Roseworthy Campus.

## 2.9 Variations to course

Under special circumstances, Faculty, on the recommendation of the relevant Course Adviser, may approve the variation of a student's course by permitting the replacement of stream or elective subjects with subjects from other courses or streams, either from another tertiary institution or from The University of Adelaide, provided that

- (a) such variation may not exceed 15 points for a Bachelor's degree or 9 points for an Associate Diploma and
- (b) approval for such variation is given by Faculty before the student enrolls in the alternative subject or subjects and
- (c) any subject presented as a replacement for an elective in a course must be at least at the same level as the course in which the student is enrolled.

## 2.10 Refusal of enrolment

Enrolment may be refused by the University if

- (a) a student is indebted to the University by reason of non-payment of any fee or charge and has failed to make satisfactory settlement of indebtedness after receipt of due notice.
- (b) a student is overseas, unless the requirements of enrolment (including attendance at residential schools) are fulfilled.
- (c) a student who is not a permanent resident of Australia has not met all the requirements laid down by the Department of Employment, Education and Training.

## 2.11 Withdrawal from subjects

Notification of withdrawal

Students must notify their withdrawal from subjects on the Amendment to Enrolment form available from the Student Records Office at the Roseworthy Campus.

Late withdrawal

If withdrawal is effected after the deadlines specified in the General Course Rules, WF will be recorded for the subject except

- (a) if upon application by the student the Head of Department, on the recommendation of the Subject Coordinator, approves a WNF being recorded for a late withdrawal or

- (b) if the Head of Department, on the recommendation of the Subject Coordinator, approves a WNF being recorded for a student who takes leave from a course of study at the end of a semester when one half of a subject which extends over two semesters has been completed.

comment: The HECS Liability which a student has incurred will stand for any subject for which a withdrawal occurs after 31 March (for a first semester subject or a full-year (Code F) subject) or after 31 August (for a second semester subject), whether the withdrawal is with or without academic penalty (that is, whether WF or WNF has been recorded).

Withdrawal in the last three weeks of a semester

Applications for withdrawal without penalty from a subject in the last three weeks of a semester will not normally be granted. Instead, in cases of proven extenuating circumstances, the Subject Coordinator may approve an extension of time to complete the subject, and/or, where the student is prevented from sitting the final examination, the Subject Coordinator may approve a special examination.

Only where the misadventure is such as to prevent the student from completing the subject within a reasonable time (usually the end of the second week of the following semester) is withdrawal without academic penalty likely to be approved.

## 2.12 Withdrawal from a course

A student who wishes to withdraw from his/her course must notify the Student Records Office at the Roseworthy Campus on the appropriate form.

## 3 Assessment

See also the General Course Rules at the beginning of this volume.

### 3.1 Responsibility for assessment

The Subject Coordinator appointed by the Head of Department is responsible to the Head for deciding the manner in which a subject will be assessed, and for awarding a grade to each student enrolled in the subject.

### 3.2 Informing students of assessment schemes

Details of assessment to be given in writing

At the beginning of each semester (by the beginning of the second week of classes for internal students and in Booklet 1 of the subject

material for external students), students will be provided with a subject outline by the Subject Coordinator. Subject outlines will include the following:

#### Administrative information

- the subject number and name;
- the name of the Subject Coordinator;
- the number and type of class hours per week, if appropriate;
- details of residential schools, if appropriate;
- details of any trips and/or tours to be undertaken.

#### Academic information

- the subject description, including the aims and objectives of the subject;
- the method by which the subject material will be presented (lectures, tutorials, practicals, directed self-learning);
- what is expected of the students, particularly related to directed self-learning aspects of the presentation of the subject;
- editorial and other standards with which the students must comply;
- a semester plan for the subject showing the relative weighting of major components of the subject;
- details of which sessions (if any) are designated for compulsory attendance;
- prescribed textbooks and references;
- details of farm practice, field studies and the like to be undertaken.

#### Assessment information

- the work to be submitted for assessment which counts towards the final grade;
- other work which may or may not be assessable, which does not count towards the final grade, but which must be submitted to meet subject requirements;
- the relative weighting of each item assessed;
- any special requirements which must be satisfied for a student to pass the subject (for example, whether a pass must be obtained in both the assignment work and the examination);

- the date for the submission of each piece of work;
- the dates of any tests to be administered.

#### Examination Information

- whether an examination is to be conducted and, if so, the duration and format of the examination;
- the weighting given to the examination mark in the final grade.

Students must also be informed of the availability of staff members teaching the subject for consultation and have their attention drawn to Volume IV of the Calendar: The Student Guide.

No assessable work in subjects which have a final examination may have a due date falling after the completion of lecture week 13 of any semester.

### 3.3 Grades

See also the General Course Rules at the beginning of this volume of the Calendar.

The work of all students in each subject will be reported in terms of the following grades: High Distinction, Distinction, Credit, Pass, Conceded Pass, Status granted, Fail, Withdraw Fail and Withdraw (Not Fail).

If a subject is incomplete because it is conducted over more than one semester, CN (Continuing) will be recorded. If it is incomplete because work is still outstanding and an extension of time has been granted or because a result is not available at the time the notification of results are prepared for students WH (Withheld) will be recorded.

#### Conceded Pass

A student may present for any of the following courses:

Associate Diploma in Applied Science  
(Agricultural Production)

Associate Diploma in Applied Science  
(Farm Management)

Associate Diploma in Applied Science  
(Horse Husbandry and Management)

Associate Diploma in Wine Marketing  
Bachelor of Applied Science  
(Agriculture)

Bachelor of Applied Science  
(Natural Resources Management)

Bachelor of Applied Science  
(Wine Science)

conceded passes in subjects to a maximum value of six points, provided that such subjects shall not satisfy prerequisite requirements.

## **4 Examinations**

The following clauses refer specifically to the above courses. Students are advised to refer to the Rules for the Conduct of Examinations which are to be found in the General Course Rules.

Examinations will be conducted at the end of each semester, during the approved examination period, and in accordance with Statute XVII.

No student may take an examination at any time other than on the day and at the time it is timetabled.

External supervisors are required to certify that the requirements of this clause have been adhered to.

If it is established that a student sat an examination other than on the day and at the time it is timetabled, the student will receive zero marks for that examination.

### **4.1 Applications for special consideration**

Permanent or prolonged disability / illness and misadventure

Students are referred to the General Course Rules at the beginning of this volume of the Calendar and to Volume IV: Student Guide and Timetables.

Applications for special consideration above will not normally be approved where:

- a student's work commitments prevented attendance at a scheduled examination;
- a student missed an examination by misreading the examination timetable;
- an external student fails to nominate an external supervisor when requested to do so.

## **5 Compulsory Attendance**

Attendance at, and participation in, all designated classes, trips and tours is compulsory.

In the case of illness of a student or a member of a student's immediate family or of other extenuating circumstances, attendance may be excused but associated work must be completed to the satisfaction of the Subject Coordinator. In the event of illness of the student a medical certificate must be provided. In the event of illness of a member of the immediate family a

medical certificate together with a statement confirming that no suitable alternative arrangements could be made must be provided; for extenuating circumstances, other suitable evidence must be provided. Medical certificates or other such evidence as may be required must be lodged with the Student Records Officer at the Roseworthy Campus as soon as practicable but normally within three (3) working days.

note: In interpreting this clause, immediate family will include any person domiciled with or under the immediate responsibility of the student concerned and each case will be considered on its merits.

## **6 Plagiarism**

See also the General Course Rules at the beginning of this volume of the Calendar.

A student may not submit as his/her own work that which has been derived from another source, other than when properly acknowledged in the appropriate manner, nor may he/she improperly assist or obtain assistance from any other student.

## **7 Review of academic progress**

See also the General Course Rules at the beginning of this volume of the Calendar.

The academic progress of students is liable to review in terms of Clause 4C of Chapter XXV of the Statutes and the attendant policy of the Faculty as determined from time to time.

## **8 Status, exemption and credit transfer**

A student may be granted status for subjects in any of the above courses by the Faculty. Status may be granted in one of two ways:

Transfer status

Transfer status may be granted by virtue of subjects completed in another course at the University or the former Roseworthy Agricultural College, or by virtue of subjects completed at another educational institution approved by the University for the purpose of this Rule.

Proficiency status

Proficiency status may be granted where the student demonstrates proficiency in the subject matter of a subject to the satisfaction of the Head of a Department, who shall decide the method of assessment after consultation with the Subject Coordinator.

Where a student has failed a subject at The University of Adelaide or at the former Roseworthy Agricultural College he/she may not apply for proficiency status in the subject in lieu of repeating it.

Where status has been granted, the number of subjects required to complete a course shall be reduced by the number of subjects for which status has been granted.

### Exemption

Where status has not been granted a student may request exemption from part of the subject. The Subject Coordinator will make all decisions on the granting of exemption.

## 8.1 Limits on the granting of status

Normally status will only be considered for subjects passed within the previous ten years. Status may be granted on a subject-for-subject basis or on the basis of subject for group of subjects. Status will be granted only for subjects which meet the academic requirements of the award towards which credit is sought.

Within undergraduate awards, a student may be granted status in no more than one-half of the total requirements for the award as defined in Specific Course Rule 12.

Status will not be granted for part of a subject. Neither will a student be granted conditional status.

Students who do not receive full status in a subject may apply for exemption from part or parts of the subject.

## 8.2 Applications for Transfer status

An application for transfer status must be made on the appropriate form available from the Student Records Office at the Roseworthy Campus and must be lodged with that Office.

Applications must be accompanied by

- (a) certified copies of transcripts of academic qualifications;
- (b) an explanation of the grading system used, supplied by the institution where the studies being offered for status were taken;
- (c) a photocopy of subject outlines taken from an institution's Calendar or Handbook for the year in which the subjects were successfully completed. Subject outlines provided should include:
  - detailed list of the topics covered in the subject;

- the size and duration of the subject (for example, 3 hours per week for 15 weeks);
- the prescribed text book(s) and recommended readings.

(If the subject outlines do not include this information it should be supplied separately)

- (d) a certified translation if any of the documents is not in English.

Applications will be referred to the Faculty for decision. In reaching a decision the Faculty will be guided by recommendations made by the Head of Department and the Subject Coordinators.

Students will receive advice, in writing from the Faculty Registrar, of the results of their applications. Subjects for which a student receives status will be shown as such on the student's transcript. No grades will be shown for such subjects.

## 8.3 Applications for Proficiency status

An application for proficiency status must be made on the appropriate form available from the Student Records Office at the Roseworthy Campus and must be lodged with that Office.

A list of subjects which the Head of Department has decided are not open to an application for proficiency status will be kept in the Student Records Office on the Roseworthy Campus and promulgated from time to time.

The student must provide on the application form the basis upon which he/she believes he/she is proficient in the subject. Appropriate documents (for example a statement from an employer regarding work experience) should accompany the application.

The Head of Department will decide which subjects in the courses in his/her Department are open to an application for proficiency status. Applications will be referred to the Head of Department who, after consultation with the Subject Coordinator, will decide:

- (a) whether or not a particular student's application for proficiency status should be granted;
- (b) if an examination is required, where and when the examination is to be conducted and whether the examination is to be written or oral, or a combination of written and oral, or a demonstration of skill;
- (c) what costs (to be met by the applicant) are involved in any special assessment.

Students will receive advice, in writing from the Faculty Registrar, of the results of their applications. Subjects for which a student receives proficiency status will be shown as having been granted status on the student's transcript. No grades will be shown for such subjects.

#### 8.4 Status between courses offered at the Roseworthy Campus

Where a student is permitted to transfer from one Roseworthy course to another Roseworthy course, or where a student, having either graduated from, withdrawn from or been precluded from a Roseworthy course is admitted to a different Roseworthy course, the student may apply for transfer status or proficiency status in the new course on the basis of study undertaken in the earlier course.

Where such a student is granted either transfer or proficiency status, the subjects for which status has been granted will be shown as 'status granted' on the student's new course record and transcript.

In the case of subjects common to both courses, the result from the previous course may be counted towards the current course, and status is not given.

#### 8.5 Review of applications

A student who is dissatisfied with a decision not to grant him/her status in a subject should follow the procedures for appeal as set out in the General Course Rules at the beginning of this volume of the Calendar.

### 9 Qualification Requirements

To be entitled to an award a student shall

- unless otherwise approved by the Council, have completed the appropriate course of study prescribed in 12 or 13 below;
- have completed all subjects specified in the appropriate section of 12 or 13 below;
- complete satisfactorily any practical requirements, such as industry experience, which may be specified as part of the course of study;
- attend such tours, trips or field study exercises which may be specified as part of the course of study;
- meet the provisions of other conditions prescribed from time to time by Council.

### 10 Changes to course of study

Please refer to the General Course Rules printed at the beginning of this volume of the Calendar.

### 11 Student appeals

Please refer to the General Course Rules at the beginning of this volume and to The University Calendar Volume IV: Student Guide and Timetables.

### 12 Courses of study

note: Semester codes referred to in the Programs of Study below are:

- 1 = First semester
- 2 = Second semester
- F = Subject taught over the whole of the year
- U = Subject completed in summer semester plus semester 1.

#### 12.1 Bachelor of Applied Science (Agriculture)

There shall be an Ordinary degree and an Honours degree of Bachelor of Applied Science (Agriculture). For details of the Honours degree, please refer to 13 below.

For the Ordinary degree of Bachelor of Applied Science (Agriculture) a student shall complete all subjects listed for First Year, Second Year and Third Year in the course of study, including one of the streams

- Dryland Farming
- Livestock Production
- Horticulture and Irrigation
- Extension

Electives 12

\* these subjects are offered in alternate years. Student must complete both subjects, the year in which each is being taken determined by its availability.

**Electives**

Students in a stream may select approved subjects from other streams, or from the Bachelor of Agricultural Business, the Bachelor of Applied Science (Natural Resources Management) or the Bachelor of Agricultural Science courses provided that any prerequisites have been satisfied. *Elective subjects of particular relevance to this course include:*

*semester 1*

4988 Remote Sensing and Land Capability assessment A 3

5478 Integrated Pest Management A 3

3434 Mineral Nutrition of Plants 3

*semester 2*

1536 Agroforestry 3

1936 Soil Management and Conservation 3

8271	Crop and Pasture Ecology	3
9867	Crop Physiology III	3
4534	Insect Biological Control	3
7250	Managing the Farm Business	3

Students selecting electives from the Bachelor of Agricultural Science course will be required to attend classes at the Waite Campus. Students wishing to proceed to Honours in a Waite Campus department must consult with the Head of Department in order to select electives which might be required as prerequisites and/or assumed knowledge.

## 12.2 Associate Diploma in Applied Science (Agricultural Production)

For the award of Associate Diploma in Applied Science (Agricultural Production) a student shall complete all subjects listed in the Program of Study for both years of the course.

The program of study for students commencing the course **prior to 1996** is set out below.

code	subject title	points
------	---------------	--------

### First Year

#### semester 1

5735	Agricultural Business I	3
------	-------------------------	---

#### semester 2

3427	Communications and Statistics	3
2481	Horticulture I	2

#### full year

1395	Biology and Pest Control	3
1208	Basic Farm Workshop Structures and Services	3
9965	Soils, Climatology and Agronomy	3
3492	Introductory Animal Production	3
7591	Agricultural Practice IA	4

### Second Year

#### semester 1

5514	Horticulture II	2
------	-----------------	---

#### semester 2

8592	Agricultural Business II	2
9311	Animal Production IVA	2

#### full year

4228	Agronomy IIA	4
7890	Agricultural Practice IIA	4
7690	Agricultural Experience A	3

7838	Animal Production IIIAP	3
7581	Small Seeds Production A	2

#### full year

3812	Project and Seminars I	2
------	------------------------	---

### Stream 2

#### full year

7152	Agricultural Machinery	4
4984	Project and Seminars IA	3

Students will take either Stream 1 or Stream 2 in Second Year.

The program of study for students commencing the course **in 1996** is set out below:

#### semester 1

3309	Business Systems A (AP)	3
9812	Agricultural Production Systems	3
7075	Soils D	1.5
7557	Communications and Learning A	3

#### semester 2

2033	Engineering in Agriculture	3
5789	Computing and Statistics	1.5
8111	Animal Production A	3

#### full year

1395	Biology and Pest Control	3
7447	Agricultural Experience I	3

## 12.3 Associate Diploma in Applied Science (Farm Management)

For the award of Associate Diploma in Applied Science (Farm Management) a student shall complete all subjects listed for both years of the course in the Program of Study as set out in *The Calendar Volume II: Handbook of Courses, 1994*.

## 12.4 Associate Diploma in Applied Science (Horse Husbandry and Management)

For the award of Associate Diploma in Applied Science (Horse Husbandry and Management) a student shall complete all subjects listed for both years of the course in the Program of Study, including one of the streams Racing or Equitation.

code	subject title	points
<b>First Year</b>		
<i>semester 1</i>		
6653	Anatomy and Physiology H	3
<i>semester 2</i>		
4654	Breeding Management H	3
7637	Equitation IH	2

<i>semester 2</i>		
8282	Equitation and Instructional Skills II	4

## 12.5 Bachelor of Applied Science (Natural Resources Management)

There shall be an Ordinary and an Honours degree of Bachelor of Applied Science (Natural Resources Management). For details of the Honours course, please refer to 13 below.

For the Ordinary degree Bachelor of Applied Science (Natural Resources Management) a student shall complete 72 points from the subjects listed below, including all core subjects.

code	subject title	points
------	---------------	--------

### Level I

#### *semester 1*

2247	Agriculture, Environment and Society	3
8057	Biology INR	3
7151	Chemistry IHA	3
1775	Field Studies IA	3

#### *semester 2*

### Level III (1996)

#### *semester 1*

Electives	12
-----------	----

#### *semester 2*

4697	Economics of Resource Management III	3
Electives	9	

**Level III (from 1997)**

Students complete elective subjects to the value of 24 points

**Elective subjects (Level III)**

Elective subjects will not necessarily be offered in all years.

Elective subjects will be timetabled in streams which are discipline oriented. Timetabling constraints may well prevent cross-stream enrolment.

Quotas may apply to some electives.

**semester I**

9774	Aboriginal Land Use and Management III	3
5852	Ecology and Management of Freshwater Systems III	3
9296	Environmental Impact Assessment	3
4234	Environmental Toxicology	3
8305	Environmental Law III	3
1096	Expert Systems for Environmental Management	3
7083	Fauna Management III	3
4774	GIS for Environmental Management	3
7499	Individual Studies A	3
5478	Integrated Pest Management A	3
4988	Remote Sensing and Land Capability Assessment A	3
1570	Soil Ecology and Element Cycling	3

**semester 2**

4840	Aboriginal Australia III	6
1536	Agroforestry	3
4129	Behavioural Ecology III	3
9273	Conservation Biology	3
8271	Crop and Pasture Ecology	3
1387	Ecological Modelling	3
1134	Ecology and Management of Rangelands	3
1699	Environmental Chemistry III (NR)	3
5051	Extension and Sociology II	3
2990	Individual Studies B	3
4534	Insect Biological Control	3
6497	Integrated Spatial Information Systems	3
4854	Land Rehabilitation and Revegetation	3
5214	Recreation Management III	3
1936	Soil Management and Conservation	3

**full year**

7014	Individual Studies C	6
------	----------------------	---

**semester U**

9774	Aboriginal Land Use and Management III	3
7023	Vertebrate Pest Control III	3

**12.6 Associate Diploma in Wine Marketing**

12.6.1 For the award Associate Diploma in Wine Marketing a student shall complete all subjects listed in the Program of Study for both years of the course. This course is available in both the internal and the external modes.

The program of study for students commencing the course **prior to 1996** is set out below.

code	subject title	points
------	---------------	--------

**First Year**

**semester 1**

8622	Advertising, Promotion and Public Relations I	2
8483	Computing I	2
6428	Grape and Wine Production I	2
1864	Introductory Marketing I	2
7397	Sales and Communications I	2
5083	Sensory Evaluation IB	2

**semester 2**

7601	Accounting and Financial Management I	2
4491	Consumer Behaviour I	2
3666	Managerial Economics I	2
7680	Market Research—Quantitative I	2
9977	Wine in Society I	1
6662	Wine Marketing in Australia I	1

**Second Year**

**semester 1**

4524	Commercial Law IIA	2
3356	International Marketing IIA	2
1069	Market Experience II	2
4758	Market Research—Qualitative II	2
3176	Viticulture IIA	2
3831	Wine Technology IIA	3

**semester 2**

5071	Business Management IIA	2
9789	Group Marketing Studies II	2

2816	Sensory Evaluation IIB	3
2002	Strategic Marketing II	3

**full year**

2307	Individual Project II	3
------	-----------------------	---

The program of study for students commencing the course in 1996 and subsequent years is set out below.

code	subject title	points
------	---------------	--------

**First Year**

**semester 1**

8901	An Introduction to Grape and Wine Science	3
4932	Principles of Marketing (Wine Marketing)	3
9682	Economic Principles	3
2440	Legal Issues in Wine Marketing	3

**semester 2**

4478	Introduction to Managerial and Financial Accounting	3
6234	Introduction to Business Management (WM)	3
4605	Vineyard and Winery Operations I	3
5693	Wine and Marketing in Society	3

**Second Year**

**semester 1**

7927	Applied Marketing Research	3
2086	Retail Selling and Practice	3
1244	Advertising and Promotion	3
1053	Consumer Behavioural and Analysis	3
7435	Vineyard and Winery Operations II	3

**semester 2**

8590	International Marketing of Wine and Agricultural Products	3
4418	Sparkling and Fortified Wine and Wine Products	3
2639	Strategic Marketing Management	3

**12.6.2 Practical Experience**

Candidates must provide satisfactory evidence of the completion of a minimum of 13 weeks of practical marketing experience approved by the Practical Experience Administrator. The

appropriate experience may be spread over the 2 years of the course. On completion of the practical experience requirements (and no later than 5.00 p.m. on the Friday of Week 4, Semester 2, final year of the course), each candidate must submit to the Practical Experience Administrator, a diary of the activities undertaken at each of the places of experience and a 2,000-2,500 word report outlining what was gained from the experience, how successful the application of the theory taught during the course was to practical situations and overall impressions of the current state of the industry and its future directions. Candidates who have completed an appropriate diploma or degree may be exempted from the practical experience requirements of the course.

Candidates should discuss these requirements on first enrolment in the course with the Practical Experience Administrator.

The objective of the practical experience requirements is to provide the student with first-hand experience, knowledge and understanding of the complex operations of a marketing organisation. The student will be expected to gain practical experience with a wide range of wine marketing operations, first-hand appreciation of the interaction of the economic and social factors in marketing decision-making and understanding of the industrial and governmental infrastructure that services especially the wine marketing industry.

**13 Honours degree of Bachelor of Applied Science (Agriculture) and Honours degree of Bachelor of Applied Science (Natural Resources Management)**

**13.1** Each Honours degree shall require one year of full-time study including a supervised research project. In exceptional circumstances, students may apply to Faculty Board through the Associate Dean (Undergraduate Studies) for permission to undertake the degree part-time.

**13.2** The Honours degree of Bachelor of Applied Science (Agriculture) may be taken in the Departments of:

- Agricultural Business
- Agronomy and Farming Systems
- Animal Science
- Crop Protection, or
- Plant Science

or, with the approval of the Faculty in each case, in a subject taught by another Department of the University.

13.3 The coursework component of the Honours degree of Bachelor of Applied Science (Natural Resources Management) may be taken in the Department of Environmental Science and Rangeland Management, or, with the approval of the Faculty, in another Department of the University.

13.4 A candidate may proceed to the Honours degree in one of the above subjects provided that the candidate has obtained, before enrolment, the approval of the Department concerned, and of the Faculty if the Department is in another Faculty of the University.

13.5 A candidate for the Honours degree in any subject shall not begin the final year Honours work in that subject until he or she has qualified for the Ordinary Degree of Bachelor of Applied Science (Agriculture), Bachelor of Applied Science (Natural Resources Management) or Bachelor of Applied Science (Wine Science) or has qualified for a degree regarded by the Faculty of Agricultural and Natural Resource Sciences as equivalent, and has completed such prerequisite subjects as may be prescribed in the syllabus.

## Associate Diploma in Applied Science (Agricultural Production)

### Syllabuses

#### Level I

##### 5735 Agricultural Business I

*level:* I *points value:* 3 *duration:* semester 1

*availability:* continuing students only

*contact hours:* 6 hours on average per week

*content:* A systems approach to the basic principles and interrelationships of accounting, budgeting, financial mathematics and marketing as it applies to the management of a farm or related business.

**Accounting:** Financial and Management accounting as an information system: concepts and skills relevant to single and double entry accounting up to Profit and Loss Statement and Balance Sheet including depreciation, and inventory control methods. Introduction to computerised recording systems.

**Budgeting:** Master, Sales and Cash budgets: their uses and variance analysis. Farm budgetary techniques. Computer spreadsheets as aids to budgeting.

**Financial Mathematics:** Finance: purpose of financial management, the Australian financial system, NPV, IRR, DCF, annuities, Break-even analysis. Spreadsheet financial functions and other computer-based financial decision support.

**Marketing:** The marketing concept: market analysis, market segmentation, targeting and positioning, product, pricing, promotion and distribution strategies, elementary marketing plans.

**Computing:** Introduction to the use of the computer as a management tool including the use of wordprocessing, spreadsheet, data base and communications. Assessment of hardware and software.

*assessment:* exam (50%); assignment/s (50%)

##### 7447 Agricultural Experience I

*level:* I *points value:* 3 *duration:* full year

*syllabus details:* see Bachelor of Applied Science (Agriculture)

##### 7591 Agricultural Practice IA

*level:* I *points value:* 4 *duration:* full year

*availability:* continuing students only

*prerequisites:* students should have a South Australian Class 1 Driver's Licence endorsed to Class 2 for on-Campus use.

*contact hours:* 13 days of practical work experience, plus 13 three hour demonstrations

*content:* Practical experience—students are rostered to work on all farm enterprises where basic skills and knowledge in production agriculture are developed. Farm operations—practical demonstrations on a broad range of farm enterprise operations are presented and involve students in developing their skills.

##### 8111 Animal Production A

*level:* I *points value:* 3 *duration:* semester 2

*restrictions:* 3492 Introductory Animal Production

*contact hours:* 3 hours of lectures, 1 hour of tutorials and 2 hours of practicals per week

*content:* This subject covers the basic animal science components to enhance student appreciation of husbandry and production subjects to follow in the second year of the course. Areas covered in this subject include: Anatomy of farm animals; digestion and nutrition; reproduction and lactation; growth and development and its relationship to meat science; genetics and animal breeding; health and disease control; fibre growth and development.

*assessment:* assignments and practicals 40%; examination 60%.

##### 9812 Agricultural Production Systems

*level:* I *points value:* 3 *duration:* semester 1

*syllabus details:* see Bachelor of Applied Science (Agriculture)

##### 1208 Basic Farm Workshop Structures and Services

*level:* I *points value:* 3 *duration:* full year

*availability:* continuing students only

*assumed knowledge:* Year 10 Maths

*contact hours:* 1 one hour lecture and 1 two hour practical per week

*content:* Motor mechanics, concreting, fencing and surveying. Sufficient engineering theory is presented to enable students to solve elementary design problems for farm water supply systems, fences, buildings and electric circuits.

*assessment:* assignments/tests (20%); practical tasks (30%); exam (50%)

### 1395 Biology and Pest Control

level: I points value: 3 duration: full year

contact hours: 2 hours of lectures per week, 1 two hour practical per fortnight

content: Biology: includes structure and function of cells; cell division, mitosis and meiosis, cytokinesis, reproduction. Mendelian genetics. Description and morphological characteristics of viruses, Monera, Protista, Fungi, Plantae, Animalia. Introduction to Ecology: includes biosphere, biogeochemical cycles, nutrient budgets, trophic levels, communities and populations, succession, carrying capacity, competition symbiosis, predator-prey relationships. Entomology: includes classification, insect anatomy, reproduction and life-cycles, feeding behaviour, key pests and beneficials, monitoring and control strategies. Plant Pathology: includes pathogens, biotrophs, necrotrophs, key diseases, monitoring and control strategies. Occupational Health and Safety: issues included when and where appropriate.

assessment: theory exam (50%) (mid year 25%, final 25%), prac. exam (20%) (mid year 10%; final 10%); insect collection (20%) disease collection (10%).

### 3309 Business Systems A (AP)

level: I points value: 3 duration: semester 1

contact hours: 3 hours of lectures and 2 hours of tutorials per week

content: The aim of this subject is to provide perspective and understanding of the overall role of business and its place in the agricultural industry and the economy, and to demonstrate linkages between various management functions. Aspects covered include what is business, business management, business planning, accounting management, marketing management, strategic planning, budgeting, investment analysis, organisational design, human resources management, and monitoring.

assessment: assignment and tutorial exercises 40%; 3 hour final examination 60%.

### 7557 Communications and Learning A

level: I points value: 3 duration: semester 1

syllabus details: see Bachelor of Applied Science (Agriculture)

### 3427 Communications and Statistics

level: I points value: 3 duration: semester 2

availability: continuing students only

contact hours: communications: 26 hours lectures, 26 hours practicals. Statistics: 14 hours lectures, 12 hours practicals

content: Communication: Theory and practice; communications models; report and letter writing; informal and formal communication; non-verbal communication; speaking, particularly public

speaking; preparation of material for other media such as audio tapes, slides, charts, aids. Statistics: Experimental design, sampling, frequency tables and diagrams; mean, median, mode; standard deviation; ANOVAR: one- and two-way experiments; linear correlation and regression.

assessment: communications by assignment and seminar work (67%); statistics by practical work and final exam (33%)

### 2033 Engineering in Agriculture

level: I points value: 3 duration: semester 2

contact hours: 2 hours of lectures, 1 hour of tutorials and 2 hours of practicals per week

content: Engineering has made modern agriculture possible and a knowledge of some aspects of the discipline can be used in the improved management of many enterprises. This subject covers basic principles and practical applications of engineering to assist managers. Topics covered by the subject include the basic principles of machinery and fluids and elementary concepts of structures and electricity. These concepts will then be used to look at tractor/implement sizing, pump and pipe systems and tension and electric fencing. Students will also be taught basic levelling.

assessment: assignments and practicals 40%; examination 60%.

### 5789 Computing and Statistics

level: I points value: 1.5 duration: semester 2

assumed knowledge: 7557 Communications and Learning

contact hours: 1 hour of lectures and 2 hours of practicals per week

content: Statistics: experimental design, sampling, frequency tables and diagrams; mean, median and mode; standard deviation; ANOVAR: one- and two-way, factorial experiments, linear correlation and regression. Computing: development of spreadsheet building, statistical procedures.

assessment: continuous practical assessment and final examination

### 2481 Horticulture I

level: I points value: 2 duration: semester 2

availability: continuing students only

contact hours: 2 hours of lectures and 1 two hour practical per week

content: The importance of horticulture and the economic value of horticultural crops in South Australia; environmental factors in horticultural production; perennial plant growth and its control, including pruning principles; the propagation of horticultural crops; flowering and fruit production.

### 3492 Introductory Animal Production

*level:* I      *points value:* 3      *duration:* full year  
*contact hours:* 2 lectures and 2 hours of practical per week

*content:* Anatomy of farm animals, digestion and nutrition, reproduction and lactation, growth and development and relationship to meat science, genetics and animal breeding, health and disease control, fibre growth and development; production cycles for sheep, beef, horse, poultry, pig and dairy industries; measurement of productivity, associated characteristics; history, distribution, size and organisation of these animal industries.

*assessment:* assignments and practicals (5) (40%); exam (60%)

### 7075 Soils D

*level:* I      *points value:* 1.5      *duration:* semester 1  
*contact hours:* 1 hour of lectures per week and four hours practical per fortnight

*content:* The subject provides an introduction to the nature of soils and their management with reference to the major soils of agricultural importance in southern Australia. Topics covered include the effects of the chemical, physical and biological properties of soils on soil structure, water use and fertility; the causes, effects and prevention of structural degradation, wind and water erosion, acidity, sodicity and salinity; and the use of legislation to promote soil conservation and sustainable farming systems.

*assessment:* examinations: theory 50%; practical 20%; Practical Assignments 20%; essay 10%.

### 9965 Soils, Climatology and Agronomy

*level:* I      *points value:* 3      *duration:* full year  
*availability:* continuing students only

*assumed knowledge:* basic biology

*contact hours:* 1 lecture per week, 1 one hour tutorial or lecture each fortnight, 1 three hour practical each fortnight

*content:* Soils and climatology: composition, profile description, fertility, physical and chemical properties, essential nutrients, nutrient availability, soil and plant analysis, fertilisers, degradation of soils; components of weather, their determination and interpretation from maps and satellite photographs, Australian climates, growing seasons, microclimates. Agronomy: the principles and practices of cereal crop and pasture production. The importance of achieving yield potential in crops and pasture. Factors reducing yields in crops and pastures, eg weed competition, soil-borne diseases, foliar diseases, nutritional factors. Practical

work includes recognition and identification of common crop and pasture cultivars, weeds, pests and diseases. A collection of common weeds, crops and pastures is an important component of this subject.

*assessment:* to be advised

## Level II

---

### 8592 Agricultural Business II

*level:* II      *points value:* 2      *duration:* semester 2  
*contact hours:* 4 hours per week on average

*content:* An integrative systems approach to the principles of commercial law, human resource and organisational management as it applies to agricultural and related business.

**Commercial Law:** introduction to the Australian legal system and sources of law, basic legal principles and applications (especially to agriculture) of torts, property, contract and business including structure and employment.

**Organisational management:** principles and practices of management, levels and structure of authority and responsibility in organisations, development of organisational thought and theories especially between organisational role, and goal and individual behaviour and wants/needs.

**Human resource management:** human resource planning, recruitment, selection, induction, training, motivation, appraisal, rewards and benefits, industrial relations especially dismissal. Management and supervision of a marketing and sales force.

*assessment:* exam (50%), assignment/s (50%)

### 7690 Agricultural Experience A

*level:* II      *points value:* 3      *duration:* full year  
*contact hours:* 20 to 120 days' practical work experience, the duration to be determined by the Subject Coordinator

A student with no previous agricultural experience will be required to complete 24 weeks of approved agricultural experience, while a student who has had 12 months' agricultural experience will be required to undertake 4 weeks of experience on an approved commercial enterprise other than the home farm.

*content:* In addition to the off-Campus farm experience, students may be required to participate in a Tour program which will provide them with the opportunity to evaluate alternative forms of agricultural production, research, management practices, agricultural processing and servicing organisations.

### 7152 Agricultural Machinery

level: II points value: 4 duration: full year

contact hours: 1 lecture and 2 hours practical per week

content: Basic engineering concepts—forces, movements, power and efficiency, tractor performance and matching. Tillage, seeding, fodder conservation, spraying and harvesting equipment—principles of operation. Introduction to electronic components, their operation and use. Application of electronics in monitoring agricultural equipment. Power transmission systems—oil hydraulics components and operation, vee belt and chain drives. Materials handling and storage.

assessment: theory exam (50%); assignments (30%); practical reports (20%)

### 7890 Agricultural Practice IIA

level: II points value: 4 duration: full year

prerequisites: 7591 Agricultural Practice IA

contact hours: 26 days' practical work experience including 8 one hour tutorials with Enterprise Managers; four day shearing and wool classing practicals in vacation

content: Practical experience – students are rostered to work on all farm enterprises where skills and knowledge in all areas of production agriculture are further developed.

Enterprise Management: students are involved in the management issues of their elective enterprise and are required to undertake a problem-solving contract which addresses one of the issues and provides practical recommendations. Wool harvesting program: demonstrations and practical experience in shearing and wool classing are presented in conjunction with the Australian Wool Corporation.

### 4228 Agronomy IIA

level: II points value: 4 duration: full year

availability: continuing students only

assumed knowledge: 9965 Soils, Climatology and Agronomy

contact hours: 4 hours per week

content: Crops: cereal, grain, legume and oilseed crop production: distribution, rotations, tillage, seeding, growth and development, fertilisers, weed and pest control, harvesting, storage, utilisation, seed and hay production, choice of varieties. Comparison of conventional and organic farming techniques. Use of computer crop models.

Pastures: distribution, improvement, establishment, feed value, growth, reaction to cutting and grazing, management, annuals and perennials, legumes and/or

grasses, utilisation, fodder conservation, irrigation, seed production, fodder crop.

assessment: written theory exams (50%); practicals and practical exams (26%); field assignments (projects) (24%)

### 7838 Animal Production IIIAP

level: II points value: 3 duration: semester 1

assumed knowledge: 9283 Animal Production I; 3678 Animal Production IIB

contact hours: 6 hours per week

content: This subject deals with dairy cattle, pigs and poultry. Dairy cattle: this section gives a working knowledge of the management of a dairy farm as well as an understanding of the manufacturing and marketing sectors of the dairy industry. Pigs and Poultry: this section deals with the physical resources required for modern intensive pig and poultry production and the management practices used in the respective industries. It also looks at various aspects of the chicken meat, egg and pig industries.

assessment: to be advised

### 9311 Animal Production IVA

level: II points value: 2 duration: semester 2

assumed knowledge: 3492 Introductory Animal Production

contact hours: 2 lectures, 1 one hour tutorial and 1 two hour practical session per week

content: Recent developments in the optimisation of beef cattle and sheep fertility; growth and wool production; assessment of quality in wool and meat products; a study of local and overseas markets for beef and sheep products.

assessment: to be advised

### 5514 Horticulture II

level: II points value: 2 duration: semester 1

assumed knowledge: 2481 Horticulture I

contact hours: 2 lectures and 2 hours of practicals/tutorials each week

content: This subject covers the technical knowledge and professional competence required to manage a commercial fruit/vegetable/nut growing enterprise and the cultural requirements of potential alternative crops. The syllabus includes crop characteristics and seasonal management operations used in the viticulture, pome fruit, citrus and stone fruit industries and in vegetable, berry, nut and alternative crops.

### 3812 Project and Seminars I

*level:* II    *points value:* 2    *duration:* full year

*contact hours:* Formal contact between student and supervisor during the project is by mutual agreement. Seminar program reorganised annually.

*content:* Projects may comprise some or all of literature reviews, field trials, laboratory experiments, industry surveys, seminars and written reports. It is the student's responsibility to discuss his/her project with the Subject Coordinator (and members of staff who will supervise the project).

Agricultural seminars are given throughout the year on a wide range of topics by a number of people from both off and on Campus. Students and staff who attend the seminars are encouraged to question seminar speakers and discuss points raised by the speakers.

*assessment:* project (95%); seminars (5%), based on written report(s)

*note:* Students must attend at least 80% of seminars (or approved make-up seminars) in order to pass the subject.

### 4984 Project and Seminars IA

*level:* II    *points value:* 3    *duration:* full year

*contact hours:* Formal contact between students and supervisor during the project is by mutual agreement. Seminar program reorganised annually.

*content:* Projects may comprise some or all of literature review, field trials, laboratory experiments, industry surveys, seminars and written reports. It is the student's responsibility to discuss his/her project with the Subject Coordinator (and members of staff who will supervise the project). Project and Seminars IA has a larger project requirement than Project and Seminars I.

Agricultural seminars are given throughout the year on a wide range of topics by a number of people from both off and on Campus. Students and staff who attend the seminars are encouraged to question seminar speakers and discuss points raised by the speakers.

*assessment:* project (95%) seminars (5%), based on written report(s)

*note:* Students must attend at least 80% of seminars (or approved make-up seminars) in order to pass the subject.

### 7581 Small Seeds Production A

*level:* II    *points value:* 2    *duration:* semester 1

*assumed knowledge:* 9965 Soils, Climatology and Agronomy

*contact hours:* 1 lecture, 1 tutorial and 1 three hour practical per fortnight

*content:* The small seeds industry and its importance. The Seeds Act and associated regulations; seed quality testing; importance of Certified Seed and means of providing it to farmers. Selection of cultivars. Establishment, management and harvesting of dryland and irrigated small seeds crops (annual medics and clovers, perennial clovers, grasses and lucerne). Pollination of seed crops; maintenance of genetic integrity. Seed cleaning, grading and storage. Cultivar development and commercialisation; Plant Variety Rights.

*assessment:* practical reports (30%); examination (70%)

## Associate Diploma in Applied Science (Horse Husbandry and Management)

### Syllabuses

#### Level I

##### 6582 Agronomy IH

level: I points value: 2 duration: full year

quota: will apply

contact hours: 1 lecture per week and 1 two hour practical per fortnight

content: Climatology: air pressure, winds, solar radiation, temperature, clouds and precipitation, seasonal weather patterns, evapotranspiration. Soils: soil texture and structure, soil profiles and classification, soil moisture properties, plant nutrients and their chemistry, erosion and conservation. Cereals (especially oats): domestication of plants, land preparation, seeding, crop nutrition, crop protection, selecting varieties, hay making, harvest and storage. Other grain crops. Pastures: pastures of South Australia, species and ecology, pasture establishment and management, weed control and nutrition, grazing management, fodder conservation. Crop rotations for sustainable agriculture, disease control, soil conservation.

Practical work: laboratory experiments, plant identification, soil surveying, monitoring crops, running an oat trial, field trips.

assessment: to be advised

##### 6653 Anatomy and Physiology H

level: I points value: 3 duration: semester 1

quota: will apply

contact hours: 4 hours of lectures and 1 two hour practical per week

content: Anatomical and physiological studies of bones, joints, muscles, nervous systems, circulatory system, respiratory system, digestive system, male and female reproductive systems, excretory systems, and studies of growth and development and environmental physiology.

assessment: to be advised

##### 4654 Breeding Management H

level: I points value: 3 duration: semester 2

quota: will apply

contact hours: 6 hours per week

content: Reproductive biology of the mare: physiology of fertilisation, pregnancy, foaling and lactation; obstetrics, infertility, abortion and venereal diseases. Reproductive biology of the stallion: care and management, mating procedures, infertility and semen evaluation. Artificial breeding procedures, foal diseases, disease control on stud farms, stud design. Practical experience involves teasing practices used on stud farms and demonstrations of handling and control of stallions during mating; care of the mare before, during and after foaling.

assessment: to be advised

##### 7637 Equitation IH

level: I points value: 2 duration: semester 2

quota: will apply

contact hours: 4 hours per week

content: Topics include work at all paces, transitions, school figures, jumping and rider exercises with and without stirrups. Planning a training program. Preparation and care of a horse for more strenuous activities, for example, one-day events.

assessment: to be advised

##### 2066 Farm Mechanics H

level: I points value: 2 duration: full year

quota: will apply

contact hours: 1 one hour lecture per week and 1 two hour practical session per fortnight

content: This subject provides the student with an introduction to petrol and diesel engines, vehicle service and maintenance, concreting and fencing. All topics are related to a career in the horse industry.

assessment: to be advised

##### 6922 Horse Business Management I

level: I points value: 3 duration: full year

contact hours: 2 lectures, 1 tutorial, 1 practical per week on average

content: An integrative systems approach to the principles of commercial law, human resource and organisational management as it applies to horse and related business.

**Computing:** The introduction to the use of the computer as a management tool including the use of wordprocessing, spreadsheet, data base and communications. Assessment of hardware and software.

**Commercial Law:** Introduction to the Australian legal system and sources of law, basic legal principles and applications (especially to horse businesses) of torts, property, contract and business including structure and employment.

**Organisational Management:** Principles and practices of management, levels and structure of authority and responsibility in organisations, development of organisational thought and theories, especially between organisational role and goal and individual behaviour and wants/needs.

**Human Resource Management:** Human resource planning, recruitment, selection, induction, training, motivation, appraisal, rewards and benefits, industrial relations especially dismissal. Management and supervision of staff.

*assessment:* exam (50%), assignment/s (50%)

### 9395 Horse Husbandry and Handling

*level:* I *points value:* 4 *duration:* full year

*quota:* will apply

*contact hours:* 4 hours per week

*content:* Origin of the horse; breeds of horses and their significance; horse organisations; rules for events; identification and registration of horses; dentition and ageing; basic horse health; conformation and predisposition to lameness; natural and artificial gaits; human first aid; safety and the horse; law and the horse; horse behaviour. Need for and methods of hoof care; anatomy of the foot in relation to correct trimming and dressing of the hoof. Farriery course: shoeing requirements of the horse in training. Branding of the horse used in all breeds for identification. Clipping styles and the reasons the horse is clipped while in confinement. Practical sessions include foal handling and leading; yearling handling and leading; restraint and handling techniques; horse gear and its uses; harnessing Clydesdales; clinical examination; hoof care; shoeing; branding; clipping; riding lessons.

*assessment:* to be advised

### 2047 Stable Management

*level:* I *points value:* 2 *duration:* full year

*quota:* will apply

*contact hours:* daily management of rostered horses equivalent to 2 hours per week

*content:* Responsibilities of the manager; the structure and durability needed for horse confinement; reasons for stabling: safety aspects, accessibility, flexibility, suitability for purpose; types of bedding; facilities to improve management and enhance performance.

*assessment:* to be advised

### 1349 Training and Management

*level:* I *points value:* 3 *duration:* full year

*quota:* will apply

*contact hours:* 3 hours per week

*content:* Exercise physiology; the use of haematology, serum biochemistry, horse nutrition and electrocardiography in the performance horse; diseases and conditions such as stress and fatigue which primarily affect the performance of the horse; the use and misuse of drugs administered to performance horses; the thoroughbred and harness racing industries. Practical experience includes riding techniques used for racehorses and eventers, and driving techniques used for standardbred training.

*assessment:* to be advised

## Level II

### 8185 Education to Saddle and Harness

*level:* II *points value:* 3 *duration:* semester 1

*prerequisites:* 9395 Horse Husbandry and Handling 7637, Equitation 1H

*contact hours:* 6 hours per week

*content:* The initial training of young horses prior to riding including leading, lunging and long-reining; the initial saddling, mounting and riding of young horses; the initial training of young horses to harness and driving.

*assessment:* to be advised at first lecture

### 3781 Equitation IIA

*level:* II *points value:* 3 *duration:* semester 1

*assumed knowledge:* 7637 Equitation 1H

*contact hours:* 10 lectures & 42 hours of practical work

*content:* Preparation required to compete in Dressage, Show-jumping, Eventing and Show competition. Principles of course design. Development of a firmer and more effective seat for flat work and jumping. Training programs and assessment of horses at various stages of training.

*assessment:* to be advised

### 8282 Equitation and Instructional Skills II

level: II points value: 4 duration: semester 2

assumed knowledge: 3781 Equitation IIA, 8185 Education to Saddle and Harness

contact hours: 18 hours of lectures and 38 hours of practical work

content: Execution of schooling exercises within a progressive training program. Techniques of riding instruction, safety awareness, control of riding classes. Suitability of dress and manner.

An eight-week work experience period in an approved riding centre will be part of this subject to enable the student to practise and improve acquired knowledge and skills.

### 1169 Horse Business Management II

level: II points value: 2 duration: semester 1

contact hours: four hours per week of lectures and tutorials

content: A systems approach to the basic principles and inter-relationships of accounting, budgeting, financial mathematics and marketing as it applies to the management of a farm or related business.

Accounting: Financial and Management Accounting as an information system; concepts and skills relevant to single and double entry accounting up to Profit and Loss Statement and Balance Sheet including depreciation, and inventory control methods. Introduction to computerised recording systems.

Budgeting: Master, Sales and Cash budgets: their uses and variance analysis. Computer spreadsheets as aids to budgeting.

Financial Mathematics: Finance: purpose of financial management, the Australian financial system, NPV, IRR, DCF, annuities. Break-even analysis. Spreadsheet financial functions and other computer-based financial decision support.

Marketing: the marketing concept; market analysis, market segmentation, targeting and positioning; product, pricing, promotion and distribution strategies; elementary marketing plans.

assessment: exam (50%) assignment/s (50%)

### 5901 Horse Handling and Training

level: II points value: 4 duration: semester 2

pre-requisite: 8185 Education to Saddle and Harness

assumed knowledge: 7913 Training and Management IIA

contact hours: 8 hours per week

content: Comparisons of handling methods. Handling for horses when only the minimum facilities are available. Horses with behavioural problems. Methods of horse transportation including land, sea or air. Training and preparation for racing.

assessment: to be advised at first lecture

### 8913 Horse Health II

level: II points value: 3 duration: full year

assumed knowledge: 7203 Anatomy and Physiology or 6653 Anatomy and Physiology H

contact hours: 2 lectures and 1 three hour practical per week

content: General pathology, epidemiology, microbiology, immunology, toxicology, parasitology; diseases of respiratory, cardiac, abdominal, musculo-skeletal, integumentary and nervous systems; horse welfare; considerations regarding land use and housing systems; managerial decisions regarding the use of veterinary services.

assessment: to be advised at first lecture

### 3807 Horse Nutrition and Genetics II

level: II points value: 3 duration: semester 1

assumed knowledge: 9395 Horse Husbandry and Handling

contact hours: 2 lectures and 1 two hour practical per week

content: Nutritional requirements of foals, yearlings, stallions, pregnant and lactating mares and horses in work; the ability of crops, pastures and conserved feed to supply these needs; ration formulation for horses used in work and recreation.

Genetic and environmental variation; characters determined by single and many pairs of genes; genetic defects; selection progress associated with heritability, selection differential and generation interval; selection aids; sire lines; Bruce Lowe numbers; pedigrees; progeny; breeding plans, inbreeding, cross breeding and line breeding; compensatory mating.

assessment: to be advised

### 7683 Project (HM) II

level: II points value: 2 duration: semester 2

assumed knowledge: 9395 Horse Husbandry and Handling

contact hours: 1 full day a week for six weeks

content: This subject will concentrate on the conduct of

literature searches, the development of surveys, laboratory techniques, field techniques, seminar preparation and presentation, the preparation and presentation of written reports.

*assessment:* to be advised

### **7646 Stable Management II**

*level:* II    *points value:* 2    *duration:* full year

*pre-requisite:* 2047 Stable Management

*contact hours:* 4 hours per week

*content:* Methods of management. Managing the practical day-to-day running of a horse enterprise including the supervision of staff, keeping records and maintenance.

*assessment:* to be advised at first lecture

### **7913 Training and Management IIA**

*level:* II    *points value:* 3    *duration:* semester 1

*assumed knowledge:* 1349 Training and Management

*contact hours:* 14 hours of lectures and 42 hours of practicals with the student's own or a rostered horse

*content:* Conditioning of the performance horse; race riding and driving; handicapping, stipendiary stewards, race starting procedures. Regulations relating to all registered personnel; betting rules and regulations.

*assessment:* to be advised

### **7035 Yearling Preparation**

*level:* II    *points value:* 2    *duration:* semester 1

*assumed knowledge:* 9395 Horse Husbandry and Handling

*contact hours:* 4 hours per week

*content:* Preparation of thoroughbred and standardbred yearlings; methods of yearling conditioning; yearling presentation; participation at the annual Thoroughbred and Standardbred Yearling Sales.

*assessment:* to be advised at first lecture

## Associate Diploma in Wine Marketing

All subjects in this course are available in the full-time, part-time and external modes.

### Syllabuses

#### Level I

##### 7601 Accounting and Financial Management I

level: I points value: 2 duration: semester 2

availability: continuing students only

contact hours: 2 lectures and 2 tutorials per week

content: Basic principles and concepts of accounting systems in business and non-profit organisations. Balance sheet and its interpretation; trading statements. Asset structures and depreciation; ratio analysis; funds statements; inventory control; budgets and budgetary controls; cost analysis. Financial mathematics; investment and credit management and controls; methods of financing. Introduction to computerised accounting.

assessment: assignments (50%); accounting exams (50%)

##### 8622 Advertising, Promotion and Public Relations I

level: I points value: 2 duration: semester 1

availability: continuing students only

contact hours: 1 one hour lecture, 1 one hour seminar and 1 one hour tutorial (incorporating industry guest lecturers) per week

content: Three topics are combined in the one subject because they are inter-related. Advertising and communications theory and principles, media analysis, development and analysis of mass communicated products and evaluation of media effectiveness are discussed in the advertising segment. Promotion incorporates point of sales, direct mail marketing, telemarketing, training sponsorships and premiums. Public relations considers the evaluation of 'public' attitudes, social contexts and mass media relations which influence specific groups and pressure group activities.

assessment: exam (35%); seminar (30%) (oral 15%, written 15%) tutorial (20%) (oral 10%, written 10%); participation/attendance (10%); mid-semester test (5%)

##### 8901 An Introduction to Grape and Wine Science

level: I points value: 3 duration: semester 1

syllabus details: see entry for B.Ag.Bus.

##### 8483 Computing I

level: I points value: 2 duration: semester 1

availability: continuing students only

contact hours: 1 lecture and 2 hours of practical work per week

content: Setting up spreadsheets with emphasis on those which perform marketing functions. Wordprocessing, including introduction to desktop publishing and office automation. Database management techniques. Graphics. Communication. Computers in marketing. Generalised computer structure. Types of computers and operating systems. Comparison of programs for database management, spreadsheet and wordprocessing.

assessment: practical exam (60%); theory exam (20%); term paper (20%)

##### 4491 Consumer Behaviour I

level: I points value: 2 duration: semester 2

availability: continuing students only

prerequisite: 1864 Introductory Marketing I

contact hours: 2 one hour lectures, 1 one hour tutorial and 1 one hour seminar per week on average

content: The purchasing process and the many variables, both internal and external, which impinge upon an individual or group: market segmentation, models of consumer behaviour, perception, motivation, learning, memory, attitudes, positioning, marketing mix/5Cs, pre and post decisions, brand loyalty, brand switching, corporate influences and trial and retrieval characteristics.

assessment: exam (35%), seminar (30% - 15% oral, 15% written), tutorials (20% - 10% oral, 10% written), participation (10%) and mid semester test (5%)

##### 9682 Economic Principles

level: I points value: 3 duration: semester 1

syllabus details: see entry for Bachelor of Agricultural Business

### 6428 Grape and Wine Production I

level: I points value: 2 duration: semester 1

availability: offered in external mode; repeating students only

contact hours: 2 lectures per week, plus 1 four hour trip

content: The Australian wine industry: historical development, structure, present status and the future. Grape-growing in Australia and overseas countries. Still table wine, sparkling wine and fortified wine production. Winemaking in France, New Zealand, Italy, Germany, Portugal, the USA and other overseas countries.

assessment: written assignments (100%).

### 6234 Introduction to Business Management (WM)

level: I points value: 3 duration: semester 2

syllabus details: see entry for B. Ag.Bus.

### 4478 Introduction to Managerial and Financial Accounting

level: I points value: 3 duration: semester 2

syllabus details: see entry for B. Ag.Bus.

### 1864 Introductory Marketing I

level: I points value: 2 duration: semester 1

availability: continuing students only

contact hours: 2 one hour lectures and 1 one hour tutorial per week

content: A basic overview of marketing; the evolution of marketing; the role of marketing in society; the elements of the marketing mix. To apply theoretical concepts to a 'real world' context, students will undertake some elementary marketing planning. Emphasis will be placed on appropriate levels of presentation skills (oral and written) and teamwork skills required for effective work in marketing contexts.

assessment: assignments and exam (100%)

### 2440 Legal Issues in Wine Marketing

level: I points value: 3 duration: semester 1

contact hours: 2 hours of lectures and 1 hour of tutorials and seminars as notified

content: the aim of this subjects is to acquaint students with the legal issues relating to wine marketing and marketing in general. Over the last two decades there have been very significant legislative changes designed to realign the common law rules in this area to suit the

evolving needs of business and consumers. The wine aspects covered will relate to laws governing grades and standards, health, rights and obligations of buyers and suppliers of goods and services, etc.

assessment: examination 50%, assignments 50%

### 3666 Managerial Economics I

level: I points value: 2 duration: semester 2

availability: continuing students only

contact hours: 3 hours per week, consisting of lectures and tutorials as appropriate.

content: Principles of micro-economics (using the wine industry as the basis). Demand and supply analysis, production relationships, cost analysis. Principles of macro-economics (using the Australian economy as the basis). Contribution of the wine industry to the Australian national economy. Effect of macro-economic variables on the wine industry.

assessment: assignments and exam (100%)

### 7680 Market Research — Quantitative I

level: I points value: 2 duration: semester 2

availability: continuing students only

contact hours: 1 one hour lecture, 1 one hour seminar and 1 one hour tutorial each week

content: The subject covers all forms of quantitative market research emanating from problem identification. Control of interviews, coding, editing, questionnaire construction and analysis are some of the issues raised in the primary data collection methodology. Syndicated and desk research are also covered as are the means of collecting data. There is some overview of statistical analysis including sampling, hypothesis testing, probability, attitude measurement, population and sample means and the difference between means, analysis of variance, investigation of association and other forms of data analysis.

assessment: exam (35%), practical survey (30%), tutorials (20%), participation (10%), mid semester test (5%)

### 4932 Principles of Marketing (Wine Marketing)

level: I points value: 3 duration: semester 1

contact hours: 2 hours of lectures, and 1 hour of tutorials per week

content: the aim of this subject is to give wine marketing students an understanding of the role of the marketing manager through an introduction to the basic concepts and practices in marketing with

particular emphasis on agricultural products, especially wine products. The topics covered include the marketing environment and marketing strategy formulation. There will be particular examination of product, price, place and promotion strategies.

*assessment:* examination 50%, assignments 50%

### **7397 Sales and Communications I**

*level:* I *points value:* 2 *duration:* semester 1

*availability:* continuing students only

*contact hours:* 1 one hour lecture, 1 one hour workshop and 1 one hour tutorial (incorporating a seminar presentation) per week

There is an additional requirement to spend one day in the field with a sales representative and one day in a retail outlet.

*content:* This subject looks at three functions of the 'sales' dimension of wine marketing, namely: the structure and complexities of the sales department in an organisation; the communication process and difficulties; negotiating elements.

The subject defines the significance of the 'sales' element in an organisation and analyses the vagaries of a face-to-face selling situation. The many variables which impinge upon the relationship will be probed and discussed so the students apply a more professional analysis to their own, and others' performance.

*assessment:* exam (35%), sales experience (10%), retail experience (10%), tutorials (20% - 10% oral, 10% written), participation (10%), mid semester test (5%), workshop (10%)

### **5083 Sensory Evaluation IB**

*level:* I *points value:* 2 *duration:* semester 1

*availability:* offered in external mode only

*contact hours:* 1 week residential school

*content:* presented mainly via practical tasting/tutorial sessions, this subject covers the following topics: origin of major wine components; senses used in wine evaluation; basic taste sensations; balance and wine flavour; wine types; specification of wine types and styles; language for communication about wine; quality evaluation of wines.

*assessment:* tasting exams and written assignments

### **4605 Vineyard and Winery Operations I**

*level:* 1 *points value:* 3 *duration:* semester 2

*syllabus details:* see entry for B.Ag.Bus.

### **5693 Wine and Marketing in Society**

*level:* I *points value:* 3 *duration:* semester 2

*content:* the student will be exposed to studies that cover the history and future of the Australian grapegrowing industry including organisations which represent that industry and their structure and functions; alcohol and wine consumption habits and attitudes including societal influences on human behaviour; education and awareness programs, communication of wine information, wine and food complementarity, introduction to wine, food, licensing, labelling and product laws and standards and distribution, advertising and marketing management in Australia and overseas.

### **9977 Wine in Society I**

*level:* I *points value:* 1 *duration:* semester 2

*contact hours:* 2 hours per week

*availability:* continuing students only

*content:* The Australian society and its drinking habits and attitudes. Regional and ethnic differences in drinking habits. Implications of alcohol consumption in today's society. Groups in society and their role in influencing human behaviour and attitudes with respect to alcohol consumption. Alcohol, health and alcoholism. Alcohol and the licensing laws. Advertising. Influence of the anti-alcohol lobby. Communication of wine information. Wine and food complementarity. Social responsibility of the wine industry for educating the public on the consumption and use of wine.

*assessment:* internal students: seminar (30%), essay (30%), report (30%), participation (10%) external students: 2 assignments each (35%); report (30%)

### **6662 Wine Marketing in Australia I**

*level:* I *points value:* 1 *duration:* semester 2

*availability:* continuing students only

*contact hours:* 3 hours per week (including any trips) on average

*content:* The study of the grapegrowing industry's history and future, and the implications for grape supply in the future; the organisations which represent the industry, their structure and function; wine legislation, wine labelling, food laws, Australian winemaking standards, weights and measures, product liability, licensing laws and fees, accreditation schemes; alcohol and health, drinking in moderation campaigns; distribution and logistics; and current industry issues of concern such as taxation, generic name changes, advertising self-regulation, etc A practical wine-related business venture will also be incorporated.

*assessment:* written assessment including executive summaries, trip reports and business analysis

## Level II

---

### 1244 Advertising and Promotion

level: II points value: 3 duration: semester 1

availability: from 1997

syllabus details: see entry for B.Ag.Bus.

### 7927 Applied Marketing Research

level: II points value: 3 duration: semester 1

availability: from 1997

syllabus details: see entry for B.Ag.Bus.

### 5071 Business Management IIA

level: II points value: 2 duration: semester 2

*assumed knowledge:* Students are expected to have experience of a work situation such as obtained through 7069 Market Experience I, or 1069 Market Experience II.

*contact hours:* 3 hours per week on average

*content:* Principles and practices of management; management of a marketing and sales force; staffing requirements and managerial structure; the levels of authority and responsibility in an organisation; the relationships between organisational roles and individual behaviour; communication, motivation and leadership; relationships between the processes of planning, organising, directing and controlling; risk management and decision-making.

*assessment:* assignment

### 4524 Commercial Law IIA

level: II points value: 2 duration: semester 1

availability: continuing students only

*contact hours:* 2 lectures and 1 tutorial per week

*content:* Introduction to the Australian legal system and sources of law; basic legal principles and applications in areas of torts, property, contract, consumer and trade practices, agency, cheques, insurance, business structure, taxation, employment, other current issues.

*assessment:* assignments and exams (100%)

### 1053 Consumer Behavioural Analysis

level: II points value: 3 duration: semester 1

availability: from 1997

syllabus details: see entry for B.Ag.Bus.

### 9789 Group Marketing Studies II

level: II points value: 2 duration: semester 2

availability: continuing students only

*prerequisite:* 1864 Introductory Marketing I

*contact hours:* 3 hours per week together with additional hours necessary as dictated by the varying projects. A tour may be conducted.

*content:* Students will work in groups to solve specific problems. Industry people will be brought in to provide actual case studies of problems encountered in wine marketing and, using their 18 months' study in marketing as a basis, students will work through the problem in order to find solutions or potential opportunities. The subject utilises many of the skills and concepts learned in the course and attempts to put them into a practical framework. Three scenarios will be investigated, namely a retail practical study, a wine producer and a consumer study.

*assessment:* Students have a significant input. A typical format is likely to emerge as self-assessment (25%); group assessment (45%); lecturer assessment (30%).

### 2307 Individual Project II

level: II points value: 3 duration: full year

availability: continuing students only

*assumed knowledge:* completion of the first year of the course

*corequisite:* It is recommended that students undertake 2002 Strategic Marketing II in the same year as undertaking this subject.

*contact hours:* individual consultation with the Subject Coordinator by arrangement

*content:* the emphasis of this subject is on the application of marketing theory to a marketing problem. The student must select a topic relevant to the wine market specifically or to an aspect of marketing, subject to the approval of the Subject Coordinator. The topic may be an existing marketing situation, a proposed scenario or, with a view to adding to the industry's knowledge, an issue in which research is lacking.

The project will include a literature search and may incorporate data collection methodology. Innovation and lateral thinking in problem solving are the key elements in this subject.

*assessment:* (10%) proposal, (10%) progress report, (80%) final report

### 3356 International Marketing IIA

level: II points value: 2 duration: semester 1

availability: continuing students only

*prerequisite:* 1864 Introductory Marketing I

*contact hours:* 2 one hour lectures and 1 one hour tutorial per week

*content:* This subject provides the student with an overview of the considerations and contextual variables which confront the international marketer and specifically the wine marketer. The subject is structured to present firstly the broader issues and concepts involved in international marketing; this foundation will then allow more specifically the development of export strategies, with a particular focus on wine export marketing. Topics include: The nature and features of International Marketing; comparisons with domestic marketing; alternative methods of entry; strategic approaches to International Marketing; a review of Australia's major export markets for wine; the advantages and disadvantages of export to the wine company; market selection; agent selection; the marketing mix for wine export; export documentation; legal aspects; Austrade; the role played by imported wines in the Australian market; the role of Government bodies and the Australian Wine and Brandy Corporation in export regulation.

*assessment:* exam (40%); assignment (30%); presentation of tutorial and written paper (20%); attendance and participation in lectures and tutorial sessions (10%)

### **8590 International Marketing of Wine and Agricultural Products**

*level:* II *points value:* 3 *duration:* semester 2  
*availability:* from 1997

*syllabus details:* see entry for Bachelor of Agricultural Business

### **1069 Market Experience II**

*level:* II *points value:* 2 *duration:* semester 1  
*prerequisite:* 1864 Introductory Marketing I

*contact hours:* 240 hours of practical marketing experience

*content:* The student must complete six (6) weeks' experience in at least one of the following areas: cellar door sales in a position necessitating dealing with the attending public; the sales or marketing departments of a wine producer; a retail wine outlet or a wholesaler/agent/distributor; an agreed marketing environment where hands-on experience can be associated with marketing theory.

*assessment:* minimum 3,000 word report. This represents 100% of the assessment.

### **4758 Market Research — Qualitative II**

*level:* II *points value:* 2 *duration:* semester 1

*assumed knowledge:* 7680 Market Research — Quantitative I

*contact hours:* 1 one hour lecture, 1 one hour practical and 1 one hour tutorial per week

*content:* The student is aware of quantitative methodologies and the difficulties of problem identification. This subject considers the 'why' of research and is the analysis of human conditions such as attitude formation, perceptions, motivation and how these were formed. Based on psychological and sociological determinants qualitative research probes issues whether in a 1: 1 or small group environment, depending on the decision-making unit. It is an exploratory and probing technique of data collection. The student will address issues relating to how and to what consumers relate. It is necessary for the student to conduct either a focus group or an in-depth interview.

*assessment:* exam (40%); practical (35%) (oral 20%, written 15%); tutorial (15% - oral 10%, written 5%), participation and attendance (10%)

### **2086 Retail Selling and Practice**

*level:* II *points value:* 3 *duration:* semester 1

*availability:* from 1997

*syllabus details:* see entry for B.Ag.Bus.

### **2816 Sensory Evaluation IIB**

*level:* II *points value:* 3 *duration:* semester 2

*prerequisite:* 3831 Wine Technology IIA.

*contact hours:* 8 hours per week over weeks 2-7 inclusive - internal students; 5 day residential school - external students

*content:* This subject advances the student's ability to evaluate critically both Australian and overseas wines by developing the capacity to interpret characteristics in terms of style and quality against benchmark quality standards.

Through practical wine tastings, organoleptic appraisal of both Australian and overseas wines will be covered with particular emphasis on style and regional characteristics, factors contributing to style and overall assessment and judging of wine for style and quality.

*assessment:* to be advised

### **4418 Sparkling and Fortified Wine and Wine Products**

*level:* II *points value:* 3 *duration:* semester 2

*syllabus details:* see entry for B.Ag.Bus.

### **2002 Strategic Marketing II**

*level:* II *points value:* 3 *duration:* semester 2

*availability:* continuing students only

*prerequisite:* 1864 Introductory Marketing I

*assumed knowledge:* 4491 Consumer Behaviour, 7680 Market Research – Quantitative I, 4758 Market Research – Quantitative II

*contact hours:* 2 hours of lectures, 1 hour tutorial per week

*content:* This subject focuses on the marketing planning process, strategic market management and implementation. The models and methods covered include scenario analysis, impact analysis, strategic information scanning systems, the key success factor/competitor strength grid, experience curve, portfolio models, matrix of competitive environments, customer-based competitor identification and the capital asset pricing model. The uses of various marketing research techniques are examined and applied to real-world wine marketing situations. Students will gain practical experience through participation in wine marketing exercises which apply these analytical tools to the wine market.

*assessment:* to be advised

### **2639 Strategic Marketing Management**

*level:* II *points value:* 3 *duration:* semester 2

*availability:* from 1997

*syllabus details:* see entry for B.Ag.Bus.

### **7435 Vineyard and Winery Operations II**

*level:* II *points value:* 3 *duration:* semester I

*syllabus details:* see entry for B.Ag.Bus.

### **3176 Viticulture IIA**

*level:* II *points value:* 2 *duration:* semester 1

*prerequisite:* 6428 Grape and Wine Production I

*contact hours:* 1 lecture, 1 one hour tutorial and an intensive practical course to be held in the first week of the mid-semester break

*content:* the study of grapevine morphology, growth, development, pruning, propagation, climate and soil requirements, compositional changes during berry ripening; grapevine fruiting varieties and rootstocks; vintage practices; genetic improvement; vineyard establishment and operation.

Practical work includes pruning, juice analysis, sampling, variety identification.

*assessment:* to be advised

### **3831 Wine Technology IIA**

*level:* II *points value:* 3 *duration:* semester 1

*prerequisites:* 6428 Grape and Wine Production I; 5083 Sensory Evaluation IB.

*contact hours:* 2 lectures and 1 three hour practical per week

*content:* Wine production: grape quality and processing; methods of production of table, sparkling and fortified wines; pre-fermentation, fermentation and post-fermentation techniques. Wine distillation: base wine production – brandy and SVR; still types; brandy maturation; Cognac and Armagnac; non-grape spirit production. Introduction to the bottling process; packaging; palletisation and quality control. Practicals will cover exposure to routine cellar operations, especially those relating to the vintage period, including grape sampling and harvesting; grape handling and crushing; draining and pressing; must and juice handling; fermentation procedures and cellar hygiene; basic techniques in wine chemistry and wine microbiology.

*assessment:* to be advised

## Bachelor of Agricultural Business

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar.

As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

### Specific Course Rules

#### 1 General

- 1.1 There shall be an Ordinary and an Honours degree of Bachelor of Agricultural Business. A candidate may obtain either degree or both.
- 1.2 To qualify for the Honours degree a candidate shall complete the requirements for the Ordinary degree and comply with the provisions of 4 below.

#### 2 Assessment and examinations

- 2.1 A candidate shall not be eligible to attend for examination unless the prescribed work has been completed to the satisfaction of the teaching staff concerned. A candidate who is not eligible to attend for examination shall be deemed to have failed the examination.
- 2.2 A candidate who fails in a subject or who obtains a lower division pass and who desires to take the subject again shall, unless exempted wholly or partially therefrom by the Head of Department concerned, again complete the required work in that subject to the satisfaction of the teaching staff concerned.
- 2.3 A candidate who has twice failed to obtain a Division I pass or higher in the examination in any subject shall not enrol for the subject again, or for any other subject which in the opinion of the Faculty contains a substantial amount of the same material, except by permission of the Faculty and under such conditions as the Faculty may prescribe.
- 2.4 A candidate who does not attend the examination in any subject although eligible to do so, shall be deemed to have failed the examination.
- 2.5 In determining the candidate's final result in a subject the examiners may take into account oral, written, practical and examination work, provided that the candidate has been given adequate notice at the commencement of the teaching of the subject of the way in which work will be taken into account and of its relative importance in the final result.

- 2.6 There shall be four classifications of pass in any subject for the Ordinary degree, as follows: Pass with High Distinction, Pass with Distinction, Pass with Credit, and Pass.

If the pass classification be in two divisions, a pass in the higher division may be prescribed in the syllabuses as a prerequisite for admission to further studies in that subject or other subjects.

There shall also be a classification of Conceded Pass. A Conceded Pass may not be used to satisfy prerequisite requirements. Subjects passed at the Conceded Pass level to a maximum total of six points may be presented for the Ordinary Degree.

#### 3 Status, exemption and credit transfer

- 3.1 Candidates who have previously passed subjects in courses of other faculties in the University or other tertiary educational institutions may, on written application to the Faculty Registrar, be granted such status in appropriate subjects in the course for the degree of Bachelor of Agricultural Business as the Faculty in each case may determine.
- 3.2 Students who hold the Associate Diploma in Wine Marketing may be granted status for subjects passed to the value of up to 45 points in the course for the degree of Bachelor of Agricultural Business provided that, if status of 36 points or more is granted towards the B. Ag. Bus. degree the student shall surrender the Associate Diploma before being admitted to the degree.

#### 4 The Ordinary degree

In order to qualify for the Ordinary degree of Agricultural Business a student shall complete all of the subjects listed for the First Year, Second Year and Third Year in the Program of Study including one of the following streams:

Farm Management  
 Marketing  
 International Business Management  
 Extension  
 Wine Marketing

The program of study for students who commenced the course **prior to 1996** is set out below:

code	subject title	points
------	---------------	--------

<b>Year I</b>		
<i>semester 1</i>		
9812	Agricultural Production Systems	3
3366	Business Economics	3
<i>semester 2</i>		
2455	Introduction to Accounting	3

**Electives**

Students in a stream may select approved subjects from other streams or from the Bachelor of Applied Science (Agriculture), the Bachelor of Applied Science (Natural Resources Management) or the Bachelor of Agricultural Science courses or from courses in other Faculties provided that any prerequisites have been satisfied. Students selecting electives from the Bachelor of Agricultural Science course will be required to attend classes at the Waite Campus.

**5 Practical Experience**

**5.1 General**

Before being admitted to the Ordinary degree a candidate must provide satisfactory evidence of the completion of a minimum of 13 weeks of practical agricultural business experience approved by the Practical Experience Administrator. The appropriate experience may be spread over the 3 years of the course. On completion of the practical experience requirements (and no later than Friday 5.00 p.m. of Week 4, Semester 2, final year of degree), each candidate is required to submit to the Practical Experience Administrator, a diary of the activities undertaken at each of the places of experience and a 2,000-2,500 word report outlining what was gained from the experience, how successful the application of the theory

taught during the course was to practical situations and overall impressions of the current state of the industry and its future directions. Candidates who have completed an appropriate diploma or degree may be exempted from the practical experience requirements of the course. Candidates should discuss these requirements with the Practical Experience Administrator on first enrolment in the course.

**5.2 Objective**

The objective of the practical experience requirements is to provide the student with first-hand experience, knowledge and understanding of the complex operations of modern farm or agricultural and related business industries. The student will be expected to gain practical experience with a wide range of farm or agricultural business operations, first-hand appreciation of the interaction of the physiological, biological, economic and social factors in on-farm and off-farm decision-making and understanding of the industrial and governmental infrastructure that services agricultural businesses.

**6 The Honours degree**

- 6.1 A candidate for the Honours Degree of Bachelor of Agricultural Business must have completed the requirements for the Ordinary degree of Bachelor of Agricultural Business, or have qualified for a degree regarded by the Faculty of Agricultural and Natural Resource Sciences as equivalent.
- 6.2 Subject to the approval of the Head of the Department of Agricultural Business, the candidate will proceed to the Honours degree in the following subject: 2400 Honours Agricultural Business (B.Ag.Bus.).
- 6.3 A candidate may, subject to the approval of the Heads of the Departments concerned, proceed to the Honours degree taught jointly by the Department of Agricultural Business and another department. The candidate must apply in writing for the proposed course to be approved in advance by the Faculty.
- 6.4 A candidate for the Honours degree shall attend lectures and pass examinations in accordance with the provisions of these Specific Course Rules.
- 6.5 The work of the Honours year will normally be completed in one year of full-time study. The Faculty may permit a candidate to take two years, but no more, under such conditions as it may determine.

6.6 A candidate who is unable to complete the course for the Honours degree within the time allowed, or whose work is unsatisfactory at any stage of the course, or who withdraws from the course shall be reported to the Faculty, which may permit re-enrolment for an Honours degree under such conditions (if any) as it may determine.

6.7 There shall be three classifications for the Honours degree as follows:

First Class

Second Class Division A

Division B

Third Class

6.8 Candidates may not enrol for a second time for the Honours course if they (i) have already qualified for Honours, or (ii) have attended for examination but failed to obtain Honours, or (iii) have withdrawn from the Honours course unless the Faculty on such conditions as it may determine permits re-enrolment.

## Syllabuses

### Level I

#### 4471 Agricultural Business Marketing

*level:* I *points value:* 3 *duration:* semester 2

*availability:* continuing students only

*contact hours:* 2 hours lectures and 1 hour tutorial per week

*content:* The aim of this subject is to give students an understanding of the role of the marketing manager through an introduction to the basic concepts and practices in marketing with particular emphasis on agricultural products; especially wine and horticultural products. The topics covered include the marketing environment, analysing marketing opportunities, organising for marketing, covering product price decisions, channel decisions, physical distribution decisions, communication–promotion, advertising decisions, sales force decisions, and controlling and evaluating marketing programs.

*assessment:* exam (50%); assignments (50%)

#### 9812 Agricultural Production Systems

*level:* I *points value:* 3 *duration:* semester 1

*syllabus details:* see Bachelor of Applied Science (Agriculture)

#### 8901 An Introduction to Grape and Wine Science

*level:* I *points value:* 3 *duration:* semester 1

*contact hours:* 2 hours of lectures, 3 hours of tutorials/practicals per week

*content:* History, structure and development of the world and Australian wine industry. Grapevine morphology, growth and development. Grape berry development. Changes in grape berry composition during ripening Physiology of smell and taste. Basic winemaking principles. Basic sensory processes and their application to sensory evaluation.

Practical sessions relate to lecture topics and will include tasting sessions.

*assessment:* examination 70%, assignments 30%

#### 3366 Business Economics

*level:* I *points value:* 3 *duration:* semester 1

*availability:* continuing students only

*contact hours:* 2 lectures and 2 tutorials per week

*content:* This subject provides an introduction to economic principles as a basis for other subjects, more immediately, Managerial Economics. The subject is in two parts as follows: Basic tools required for analysing individual and organisational economic decision-making. Topics include: fundamentals of supply and demand analysis, consumer equilibrium theory including utility and indifference approaches, production theory; production functions and analysis of short and long-run costs of production, market structures and objectives of the firm, pricing policies and methods, market failure, welfare and public policy issues. The workings of the Australian economy in its international context. Topics include: theories of employment, inflation, interest rates and exchange rates; and current policy issues such as the use and abuse of monetary policy, inflation and the foreign debt debate.

*assessment:* exam (50%); assignments (50%)

#### 9682 Economic Principles

*level:* I *points value:* 3 *duration:* semester 1

*contact hours:* 2 hours of lectures and 1 hour of tutorials per week

*content:* This subject provides an introduction to economic principles as a basis for other subjects. It covers both micro and macro theory. The subject is in two parts. The first part provides basic tools required for analysing individual and organisational economic decision-making. Topics include: fundamentals of supply and demand analysis, consumer equilibrium theory including utility and indifference approaches, production theory, analysis of short and long-run cost of production, market structures and objectives of the firm, pricing policies and methods, market failure, welfare and public policy issues. The second part focuses on the workings of the Australian economy in its international context. Topics include theories of employment, inflation, interest rates and exchange rates, as well as an examination of relating to monetary policy and fiscal issues. Coverage of the subject includes applications of economic principles to agricultural business or wine marketing through interactive tutorial programs.

*assessment:* examination (50%), assignments (50%)

#### 2455 Introduction to Accounting

*level:* I *points value:* 3 *duration:* semester 2

*availability:* continuing students only

*contact hours:* 2 hours lectures, 1 tutorial and 1 hour of computer seminars per week

*content:* This subject provides an introduction to the nature and purpose of accounting as an information specialisation, with particular emphasis on agricultural businesses. Topics included are designed to demonstrate how the processes of measurement of financial events and the collection, sorting, classification, analysis and reporting of financial information (manually and computerised) are determined by the objective of accounting, which is to provide financial information for the purpose of decision-making by internal management and external parties.

*assessment:* exam (50%); assignments (50%)

### **6234 Introduction to Business Management (WM)**

*level:* I    *points value:* 3    *duration:* semester 2

*contact hours:* 2 lectures and 1 tutorial per week

*content:* This subject provides an overview of management with particular applications to agricultural businesses, in order to provide context and perspective for the other subjects in the program. Subjects will be oriented to participants' ability to diagnose and solve problems in the various functional areas of management, with emphasis on managerial decisions in relation to the wine marketing environment. The following topics will be addressed: introduction to and historical perspectives of management; strategic planning; organisational theory; financial management; human resources management and industrial relations; decision-making; organisational communication; ethics; operational management and Total Quality Management; management in the public and private sector; and emerging issues in management.

*assessment:* exams (50%); assignments (50%)

### **4478 Introduction to Managerial and Financial Accounting**

*level:* I    *points value:* 3    *duration:* semester 2

*contact hours:* 2 hours lectures, 1 hour of tutorials and 1 hour of computer practical per week

*content:* This subject provides an introduction to the nature and purpose of financial, managerial and cost accounting as an information specialisation, with particular emphasis on agricultural businesses. Topics included are designed to demonstrate how the processes of measurement of financial events and the collection, sorting, classification, analysis and reporting of financial information (manually and computerised) are determined by the objective of accounting, which is to provide financial information for the purpose of decision-making by internal

management and external parties, eg. Financial Statements, CVP, Product Costing, Budgeting Ratios.

*assessment:* exams (50%); assignments (50%)

### **2332 Issues in Australian Agribusiness**

*level:* I    *points value:* 3    *duration:* semester 2

*prerequisites:* 9129 Principles of Agricultural Business Marketing

*contact hours:* 2 hours lectures, and 2 hours of tutorials per week

*content:* this subject focuses on current issues relating to the food and fibre business in Australia. It examines the business strategy aspect relevant to distribution of activities in government. Of particular importance are interrelationships between the farm firm and the macro environment. Topics will include the role and functions of agricultural producers, production and consumption decisions in the firm and household, the pricing of agricultural inputs, institutions affecting decision-making in agriculture and the relevance of the political economy for changes in business environment facing Australian agricultural producers.

*assessment:* examinations 50%, assignments 50%

### **4963 Managerial Economics B**

*level:* I    *points value:* 3    *duration:* semester 2

*availability:* continuing students only

*prerequisites:* 3366 Business Economics.

*contact hours:* 2 hours of lectures and 1 hour tutorial per week

*content:* This subject develops further those aspects of Business Economics that are relevant to managerial decision-making. The syllabus will include such topics as industry structure analysis, behavioural model of the firm, the concept of X-efficiency, techniques for decision-making in risky conditions and the broader implications of uncertainty for the theory of the firm, estimating and forecasting demand, break-even analysis, pricing and the product life cycle, transfer pricing, non-price competition and the marketing mix, and the growth theories of the firm.

*assessment:* exam (50%); assignments (50%)

### **9129 Principles of Agricultural Business Marketing**

*level:* I    *points value:* 3    *duration:* semester 1

*contact hours:* 2 hours lectures, 1 hour of tutorials per week

*content:* This aim of this subject is to give students an understanding of the role of the marketing manager

through an introduction to the basic concepts and practices in marketing with particular emphasis on agricultural products. The topics covered include the marketing environment and marketing strategy formulation. There will be particular examination of product, price, place and promotion strategies.

*assessment:* examinations 50%, assignments 50%

#### **4844 Research and Quantitative Methods in Agricultural Business**

*level:* I      *points value:* 6      *duration:* full year

*contact hours:* 2 lectures, 1 tutorial and 2 hours practical/week

*content:* This subject is designed to provide an introductory overview of research and quantitative methods with applications relevant to business decision-making and strategy formulation. The aspects to be covered are: Computing Applications - introduction to the role of computers for businesses in relation to spreadsheets, database programs, evaluation of software and hardware, wordprocessing etc. Financial mathematics - simple and compound interest; time value of money; annuities, loans and sinking funds; contracts at flat rates of interest; net present value, internal rates of return. Descriptive statistics - presentation of data; frequency distribution, averages and measures of variations; bivariate analysis, correlation and regression; use of simple techniques for finding patterns and relationships, ratios, percentages, etc. Published statistics and analysis - major sources of published data; Australian official statistical collections, methods of collection and basic dimensions of economic and social statistics in Australia; national accounts; prices and price index numbers; seasonally adjusted indicators; social indicators. Inferential statistics - probability and theoretical models, binomial and normal distributions; sampling confidence intervals; hypothesis testing for means, proportions, goodness of fit and correlations coefficients. Management Science - inventory decisions, linear programming applications, decisions theory, network planning.

*assessment:* exams (50%); assignments and tutorial work (50%)

#### **4605 Vineyard and Winery Operations I**

*level:* 1      *points value:* 3      *duration:* semester 2

*prerequisites:* 8901 An Introduction to Grape and Wine Science

*contact hours:* 2 hours of lectures, 3 hours of tutorials/practicals per week

*content:* vineyard design, establishment and operations including pruning, irrigation, canopy management, soil

management and pest and disease management. Characteristics of major white wine grape varieties. Principles and practices of white wine production. Major white wine styles of the world.

Practical session relate to lecture topics and will include tasting sessions.

*assessment:* written examination 50%, practical examination 25%, assignments 25%

---

### **Level II**

---

#### **4619 Agricultural Business Finance**

*level:* II      *points value:* 3      *duration:* semester 2

*contact hours:* 4 hours of lectures, tutorials and computer seminars per week

*content:* This subject will focus on techniques for the effective management of finance as relevant to agricultural (including farm) business entities. The syllabus covers domestic and international investment decisions and financing, particularly as they relate to a deregulated environment in which agricultural businesses need to operate. Topics include purpose of financial management, Australian financial system, time preference, leverage, return and risk, investment planning and management, capital structure - equity and debt finance management and restructuring, introduction to futures, options and hedging. Recent innovations and developments in financing methods, the impact of international transactions on domestic firms, especially as to risk. This subject will constantly apply the theory to practical agribusiness situations using the computer and computer simulations.

*assessment:* exam (50%); assignments (50%)

#### **7927 Applied Marketing Research**

*level:* II      *points value:* 3      *duration:* semester 1

*assumed knowledge:* 4844 Research and Quantitative Methods in Agricultural Business

*contact hours:* 2 lectures and 1 tutorial and 1 practical per week

*content:* The aim of this subject is to study quantitative and qualitative marketing research for proactive and reactive marketing intelligence systems (Mk IS) as it applies to wine and agricultural marketers. Topics included are problem analysis, types of data collection systems, steps in research projects, controls of a research project, questionnaire design, statistical methodology for data reduction, sampling theory and the industry and operative organisations. Dealing with a market research organisation will be a significant aspect of the subject which is not aimed at producing researchers but clients who understand the intricacies

of the process - and the limitations. The focus will be the application of the theory for use in new wine/agricultural product evaluation, advertising measurement, corporate/product/range analysis, attitudinal research, as primary sources. Secondary sources such as trade, governmental or syndicated data will be explored and assessed.

*assessment:* exam (50%); assignments (50%)

### **8738 Applied Management Science and Decision Theory**

*level:* II *points value:* 3 *duration:* semester 1  
*availability:* from 1997

*prerequisites:* 4844 Research and Quantitative Methods in Agricultural Business

*contact hours:* 2 hours of lectures, 1 hour of tutorials and 1 hour computer practical per week

*content:* the subject is a continuation of *Research and Quantitative Methods in Business*. The focus is on the understanding and application of the quantitative and scientific approach to problem solving and decision making in business. The aim is to introduce a collection of techniques that helps business managers make better decisions, especially under risky conditions. More importantly, this subject fosters a logical, consistent and systematic approach to problem formulation, problem solving and decision making. Topics to be covered include: mathematical programming, decision analysis under risk and uncertainty, risk management concepts and techniques, CPM and PERT Network analysis simulation and business forecasting techniques.

*assessment:* examination 50%, assignment and tutorial work 50%

### **1053 Consumer Behavioural Analysis**

*level:* II *points value:* 3 *duration:* semester 1  
*assumed knowledge:* 4471 Agricultural Business Marketing or 4932 Principles of Marketing (Wine Marketing)

*contact hours:* 2 lectures and 2 tutorials per week

*content:* The aim of this subject is to alert wine and agricultural marketing students to the many variables which impinge upon the purchase of goods and services with particular reference to the implications for the student's vocational interests. Within this most important multi-disciplinary subject are the studies of perception, attitudes, human motivation, consumer information processing and decision-making, the sociology of people, external and internal variables, group influences and the segmentation of people into manageable communicable target groups for niche

markets. The implications for marketing are in providing direction and substance for all marketing efforts such as in advertising, promotion, public relations, packaging, pricing, distribution and the nature of the product.

*assessment:* exam (50%); assignments (50%)

### **5946 Economics of Agriculture**

*level:* II *points value:* 3 *duration:* semester 1

*prerequisites:* 3366 Business Economics

*contact hours:* 2 lectures and 2 tutorials per week

*content:* This subject will focus on the interrelationships between the farm firm and the macro environment, and encompasses essential managerial and economic concepts as they apply to all levels of decision-making in agricultural industries. Topics will include the role and functions of agricultural producers, production and consumption decisions in the firm and household, supply response analysis, the pricing of agricultural inputs, institutions affecting decision-making in agriculture and the relevance of the political economy for changes in Australian agricultural environment.

*assessment:* exam (50%); assignments (50%)

### **7517 Farm Business Communication**

*level:* II *points value:* 3 *duration:* semester 1

*contact hours:* 2 lectures and 1 tutorial

*content:* The aim of this subject is to study how farm business managers and operators acquire information concerning new technology thereby facilitating their decision-making as it affects the farm business. Aspects covered include: Farmers' information sources. Communications with person-person, group and mass audiences, the role and place of oral and written communications, formal and informal communications; report writing, letter writing, leadership in groups and presentation of information to larger groups via radio, television, newsletters, newspapers and other media; new communications technology; and diffusion and adoption of innovations.

*assessment:* exam (50%); assignments (50%)

### **2860 International Agricultural Marketing**

*level:* II *points value:* 3 *duration:* semester 2

*availability:* continuing students only

*prerequisites:* 4471 Agricultural Business Marketing.

*contact hours:* 2 lectures and 1 tutorial per week

*content:* This subject aims to provide a comprehensive review of the theory and practice of international marketing mainly in relation to agricultural products. Special emphasis will be given to marketing in the Asian region and the Middle East. Topics include the economic analysis of international trade and Australian business involvement, environmental factors affecting international marketing, strategic planning and organising for international marketing, decisions on segmentation, product policy and product planning, pricing, channels of distribution, international advertising and coordinating and controlling global marketing operations. It also focuses on international market research, multi-country data analysis and international marketing information systems.

*assessment:* exam (50%); assignments (50%)

### **8590 International Marketing of Wine and Agricultural Products**

*level:* II    *points value:* 3    *duration:* semester 2  
*availability:* from 1997

*prerequisites:* 9129 Principles of Agricultural Business Marketing or 4932 Principles of Marketing (Wine Marketing)

*contact hours:* 2 lectures, 1 hour of tutorial and 1 hour seminar per week

*content:* This subject aims to provide a comprehensive review of the theory and practice of international marketing mainly in relation to wine and agricultural products. Special emphasis will be given to marketing in the European and Asian regions and under GATT. Topics include the economic analysis of international trade and Australian business involvement, environmental factors affecting international marketing, strategic planning and organising for international marketing, decisions on segmentation, product policy including geographical indicators and product planning, pricing, channels of distribution, international advertising and coordinating and controlling global marketing operations. It also focuses on international market research, multi-country data analysis and international marketing information.

*assessment:* examination (50%), assignments (50%)

### **6784 International Trade and Agricultural Policy**

*level:* II    *points value:* 3    *duration:* semester 1

*prerequisites:* 9682 Economic Principles or 3366 Business Economics

*contact hours:* 2 lectures and 1 tutorial per week

*content:* This subject focuses on a study of the principles of international trade in relation to their

implications for agricultural policy, both domestic and international. Topics include: a survey of the theories of international trade; the economic effects of protection; the analysis of the balance of payments; policy projections for external and internal balance; capital flows and foreign investment; the rate of exchange; the problem of international liquidity; international monetary institutions; international trade and development.

*assessment:* exam (50%); assignments (50%)

### **9654 Introductory Animal Production B**

*level:* II    *points value:* 3    *duration:* full year

*contact hours:* 2 lectures, 2 hours practical per week

*content:* Anatomy of farm animals, digestion and nutrition, reproduction and lactation, growth and development and relationship to meat science, genetics and animal breeding, health and disease control, fibre growth and development; production cycles for sheep, beef, horse, poultry, pig and dairy industries; measurement of productivity, associated characteristics; history, distribution, size and organisation of these animal industries.

*assessment:* exam (50%); assignments (50%)

### **9788 Management Accounting for Agricultural Business**

*level:* II    *points value:* 3    *duration:* semester 1

*contact hours:* 2 lectures and 2 computerised tutorials per week

*content:* The aim in this subject is to enable the student to distinguish, classify and analyse different agricultural business costs and cost structures. The syllabus will, through the integrated use of computerised systems, cover the scope of management accounting; cost and revenue classifications; methods to account for materials, labour, overhead and the finished product; absorption and variable costing; job, process, standard and by-product costing methods; CVP analysis; measuring costs and benefits for decision-making and pricing decisions; capital investment decision-making especially under conditions of risk and uncertainty; the budgeting process; internal control systems; variance analysis; mathematical and quantitative approaches to cost estimation; decentralised and divisionalised costing methods including transfer pricing.

*assessment:* exam (50%); assignments (50%)

### **1858 Social Systems**

*level:* II    *points value:* 3    *duration:* semester 2

*contact hours:* 2 lectures and 1 tutorial

*content:* The objective is to provide students with a general background to the operation of the social system in Australia, particularly as it relates to rural Australia. The syllabus will include main sociological variables, age, gender, ethnicity, class, the political and administrative system; land use systems; ideology and agrarian ideology, family.

*assessment:* exam (50%); assignments (50%)

#### **2846 Soils, Climatology and Agronomy B**

*level:* II *points value:* 3 *duration:* full year

*contact hours:* 1 lecture per week, 1 tutorial a fortnight, 1 three hour practical per fortnight

*content:* Soils and Climatology: composition, profile description, fertility, physical and chemical properties, essential nutrients, nutrient availability, soil and plant analysis, fertilisers, degradation of soils; components of weather, their determination and interpretation from maps and satellite photographs, Australian climates, growing seasons, microclimates. Agronomy: the principles and practices of cereal crop and pasture production. The importance of achieving yield potential in crops and pasture. Factors reducing yields in crops and pastures, for example weed competition, soil-borne diseases, foliar diseases, nutritional factors. Practical work includes recognition and identification of common crop and pasture cultivars, weeds, pests and diseases. A collection of common weeds, crops and pastures is an important component of this subject.

*assessment:* to be advised.

#### **4418 Sparkling and Fortified Wine and Wine Products**

*level:* II *points value:* 3 *duration:* semester 2

*availability:* from 1997

*prerequisites:* 7435 Vineyard and Winery Operations II

*contact hours:* 2 hours of lectures and 3 hours tutorials/practicals per week

*content:* characteristics of grape varieties for sparkling, fortified wine and brandy production. Unit operations of sparkling and fortified wine production. Grape, spirit and brandy productions. Major sparkling and fortified wine styles of the world, wine products such as reduced, low and de-alcoholised wines and flavoured wines. Practical sessions relate to lecture topics and will include tasting sessions.

*assessment:* to be advised.

#### **2639 Strategic Marketing Management**

*level:* II *points value:* 3 *duration:* semester 2

*contact hours:* 2 lectures and 1 tutorial per week

*content:* This subject focuses on the marketing planning process, strategic market management, and implementation. The models and methods covered include scenario analysis, impact analysis, strategic information scanning systems, the key success factor/competitor strength grid, experience curve, portfolio models, matrix of competitive environments, customer-based competitor identification and the capital asset pricing model. The uses of various marketing research techniques are examined and applied to real-world situations. Students will gain practical experience through participation in marketing exercises, simulation games and computer modelling in the application of analytical tools for market analysis.

*assessment:* exam (50%); assignments (50%)

#### **7435 Vineyard and Winery Operations II**

*level:* II *points value:* 3 *duration:* semester 1

*availability:* from 1997

*prerequisites:* 4605 Vineyard and Winery Operations I

*contact hours:* 2 hours of lectures and 4 hours of tutorials/practicals per week

*content:* characteristics of major red wine grape varieties. Principles and practices of red wine production. Oak and cork production. Major red wine styles of the world. Practical sessions related to lecture topics and will include tasting sessions.

*assessment:* to be advised.

### **Level III**

#### **1244 Advertising and Promotion**

*level:* III *points value:* 3 *duration:* semester 1

*prerequisites:* 4471 Agricultural Business Marketing or 9129 Principles of Agricultural Business Marketing

*contact hours:* 2 lectures, 1 tutorial and 1 practical per week

*content:* The aim of this subject is to expose wine and agribusiness students to the human communications process, the media available for transmission of messages, the structure of that communication, the segmentation of people into meaningful groups aligned to product purchase or potential and the understanding of models which results in the maximisation of results. Involved in this subject is the study of effective advertising, promotion and public relations from many theoretical and pragmatic perspectives such as that of David Ogilvy, Rosser Reeves and William Wells. Contemporary theorists in Rossiter and Percy, Dommermuth, Farris and Quelch, Heame, etc will be probed for their relevance. The student will explore and apply these theories to practical examples, in case

studies, such that they must take the position of the Advertising Manager and be cognisant of the many variables influencing the decision. Implicit in this subject is problem definition, campaign strategy objectives, campaign implementation and the measurement of effectiveness. The latter will be explored in terms of the organisation's own ad hoc research as well as the syndicated or commercial options of Burke, Starch, Nielsen, Morgan, etc Budgetary control is an element of importance, as a dimension. Analysis of major and minor media will be a function of this subject and so guest speakers will add their own perspectives and practical input. The ultimate is to have students come up with their own theories on how advertising, public relations and promotion work relates to their particular industries.

*assessment:* exam (50%); assignments (50%)

#### **4143 Applied Issues in Wine Marketing**

*level:* III *points value:* 3 *duration:* semester 2

*prerequisites:* All Level I and Level II subjects in the Wine Marketing stream

*contact hours:* 3 hours of seminars per week

*content:* the subject will offer the opportunity to the student to cover a range of topics in Wine Marketing as it relates to the student's study program interests and the teaching and research interests of staff and visiting academics

*assessment:* 2 written assignments of 4000-6000 words and 2 oral presentations

#### **4697 Economics of Resource Management III**

*level:* III *points value:* 3 *duration:* semester 2

*syllabus details:* see Bachelor of Applied Science (Natural Resource Management)

#### **4203 Ethical Issues in Agricultural Business**

*level:* III *points value:* 3 *duration:* semester 2

*prerequisites:* all core subjects in the 1st and 2nd years of the course.

*contact hours:* 3 hours of seminars and lectures per week

*content:* This subject aims to provide students with an awareness of the ethical environment of business as well as the types of conflict situations in which business managers are likely to find themselves. A problem orientated and practical approach will be adopted to the identification of ethical dilemmas and to the resolution of ethical problems faced by business managers in Australia. The syllabus will begin with a

discussion of theoretical writings on the nature of ethics drawn from philosophical and historical sources. This will be followed by an analysis of the methods of resolution of ethical dilemmas by other professional groups subject to ethical regulation, such as lawyers and medical practitioners. The main part of the syllabus material includes an examination of particular ethical situations encountered by agricultural business administrators and is aimed to illustrate and facilitate the discussion of problems encountered by contemporary management. The problems include grades and standards, public health issues in food products, animal welfare, ecological responsibilities and other more general ethical issues. The more general issues include the handling of confidential price sensitive information, pollution control, whistle blowing, fraud control, share market manipulation, oppression of minority shareholders, expert reports, and the wider duties of directors to creditors and to employees. There is no one text which is appropriate for the whole of this subject, but there is a wealth of case study material from which a set of materials and a detailed reading list will be prepared and distributed to students.

*assessment:* exam (50%); assignments (50%)

#### **5646 International Finance**

*level:* III *points value:* 3 *duration:* semester 1

*availability:* continuing students only

*prerequisites:* 4471 Agricultural Business Finance.

*contact hours:* 2 lectures and 2 tutorials per week

*content:* This subject deals with the financial management of multinational business activities, the operation of international financial markets with reference to recent innovations in financing methods, and with the impact of international transactions on domestic firms. The financial management of asset creation and liability generation processes, and of the international financial risks associated with such activities play a central role in the unit. The emphasis is on providing students with an understanding of recent developments in both international financial markets, and the contribution that the theory of finance is making to international financial management.

*assessment:* exam (50%); assignments (50%)

#### **5481 Legal Issues in Agricultural Marketing**

*level:* III *points value:* 3 *duration:* semester 1

*contact hours:* 2 lectures and 1 tutorial per week

*content:* The aim of this subject is to acquaint students with the legal and ethical issues relating to agricultural marketing and marketing in general. Over the last two decades there have been very significant legislative

changes which are designed to re-align the common law rules in this area to suit the evolving needs of business and consumers. The agricultural aspects covered will relate to laws governing grades and standards, health, rights and obligations of buyers and suppliers of goods and services, etc.

*assessment:* exam (50%); assignments (50%)

### **7250 Managing the Farm Business**

*level:* III *points value:* 3 *duration:* semester 2

*assumed knowledge:* 2846 Soils, Climatology and Agronomy B, 3492 Introductory Animal Production B

*contact hours:* 5 hours per week of lectures, tutorials and visits

*content:* This subject is designed to encourage students to apply a systems approach in the general management context to the analysis and planning of a dryland farm business in South Australia. The syllabus includes the principles underlying the integration of crops, pastures and livestock in the farming system, the relationship between various environmental, economic and biological components of farming systems for the purpose of effective management, techniques to evaluate the performance of the dryland farm in terms of its technical and economic sustainability and flexibility, define major factors limiting performance, plan improvements and alternative management strategies to improve performance within the constraints imposed upon the farm business, and compare the projected performance of the proposed system with the performance of current farming policy. Visits will be made to a number of dryland farming enterprises in the Mid-North to analyse system performance and propose development and management strategies that will lead to an improvement in technical and economic sustainability. Considerable student participation is required.

*assessment:* exam (50%); assignments (50%)

### **3104 Principles and Practice of Extension**

*level:* III *points value:* 3 *duration:* semester 2

*syllabus details:* see Bachelor of Applied Science (Agriculture)

### **2086 Retail Selling and Practice**

*level:* II *points value:* 3 *duration:* semester 1

*availability:* from 1997

*prerequisites:* 4932 Principles of Marketing (Wine Marketing) or 9129 Principles of Agricultural Business Marketing

*contact hours:* 2 hours of lectures and 2 hours of practicals per week

*content:* this subject focuses on the principles of establishing and managing a retail concern and defining the role of sales promotion within the total marketing mix. It will expose the student to the theoretical and practical aspects of selling and retail practices in terms of communication, buyer behaviour, prospecting, sales presentation, negotiations, layout, all within a relationship-building framework between the salesperson and the client/customer. Some of the areas this subject will cover include: distribution and information systems, selling and marketing technology and trends, retail and wholesale operations, negotiation skills. The subject can involve some fieldwork, guest lectures and practical case studies.

*assessment:* examination 40%, assignments 60%

### **8358 Sensory Evaluation of Agricultural Products**

*level:* III *points value:* 3 *duration:* semester 1

*prerequisites:* understanding of introductory statistical principles particularly correlation and regression, analysis of variance

*contact hours:* 2 lectures and 1 practical

*content:* The role of sensory evaluation in marketing of food and fabrics, physiological and psychological factors affecting sensory perception, relationships between sensory properties and product acceptability, measurement of sensory perception, scaling methods, design and conduct of sensory evaluation experiments, difference testing, preference testing, panel selection procedures, pre- and post-evaluation tests of judge performance, taste and aroma profiling, texture profiling, product development and optimisation, strategies for developing sensory evaluation programs. A range of agricultural products will be assessed using the techniques and principles presented in the lecture program.

*assessment:* written exam, written assignments and practical reports

### **8581 Sociology of Agricultural and Social Change**

*level:* III *points value:* 3 *duration:* semester 1

*assumed knowledge:* 1858 Social Systems

*contact hours:* 2 lectures and 1 tutorial

*content:* The objective is to provide the opportunity for students to develop a sophisticated understanding of non-urban social environments in modern western countries, particularly Australia. The syllabus will include: sociological theories of social change; family

farming; agribusiness; aborigines; the environmental movement; women in agriculture.

*assessment:* exam (50%), assignments (50%)

### **6097 Special Project (Research Paper) A**

*level:* III *points value:* 2 *duration:* full year

*assumed knowledge:* completion of the 1st and 2nd years of the course

*contact hours:* No formal contact hours. Students work independently with supervisor and/or co-supervisor.

*content:* Each student is to undertake an individual project of significant size which exhibits original investigation, analysis and interpretation, and which results in the production of a well-written and well-presented report. The project may comprise a literature review (of at least 5,000 words), a research project, a case study of a business or related enterprise, or some other approved study.

*assessment:* seminar and dissertation (100%)

### **4684 Special Project (Research Paper) B**

*level:* III *points value:* 3 *duration:* full year

*assumed knowledge:* completion of the 1st and 2nd years of the course

*contact hours:* No formal contact hours. Students work independently with supervisor and/or co-supervisor.

*content:* Each student is to undertake an individual project of significant size which exhibits original investigation, analysis and interpretation, and which results in the production of a well-written and well-presented report. The project may comprise a major literature review (of at least 8,000 words), a research project, a case study of a business or related enterprise, or some other approved study.

*assessment:* seminar and dissertation (100%)

### **5510 Special Project (Research Paper) C**

*level:* III *points value:* 4 *duration:* full year

*assumed knowledge:* Completion of the 1st and 2nd years of the course

*contact hours:* No formal contact hours. Students work independently with supervisor and/or co-supervisor.

*content:* Each student is to undertake an individual project of significant size which exhibits original investigation, analysis and interpretation, and which results in the production of a well-written and well-presented report. The project may comprise a major literature review (of at least 10,000 words), a research project, a case study of a business or related enterprise, or some other approved study.

*assessment:* seminar presentation and dissertation

### **2880 Strategic Business Management**

*level:* III *points value:* 3 *duration:* semester 2

*contact hours:* 3 hours of seminars per week

*content:* This is a capstone subject that is concerned with establishing the long-term direction of an organisation, setting specific performance objectives, developing strategies to achieve these and executing appropriate plans. The subject concentrates on creating organisations which achieve superior performance, and the entrepreneurial skills required to create and maintain a competitive advantage. This requires an integrated approach using simulation analysis, and includes an analysis of markets, customers, competitors and technology, together with an understanding of organisational structure and culture, levels of strategy in a divisionalised firm, the role of the corporate centre with consideration given to financial implications of strategy, including acquisitions.

*assessment:* exam (50%); assignments (50%)

### **3021 International Business Environment**

*level:* III *points value:* 3 *duration:* semester 2

*prerequisites:* 9129 Principles of Agricultural Business Marketing, 9682 Economic Principles, 6234 Introduction to Business Management (WM)

*contact hours:* 3 hours of seminars and lectures per week

*content:* This capstone subject is designed to provide an overview of the international trade and financial environment within which business must function with particular emphasis on the broader Asian region, including the Middle East. It considers comparative advantage and the basis for international trade; factor movement across national boundaries, trade policies such as tariffs, quotas, VERs, administrative regulations, dumping, export subsidies and international commodity agreements; international and regional commercial policies; exchange rate determination; the balance of payments and its adjustment under alternative exchange rate regimes; exchange control; the international currency system; and exchange rate policies.

*assessment:* exam (50%); assignments (50%)

### **2400 Honours Agricultural Business (B.Ag. Bus.)**

*level:* IV *points value:* 24 *duration:* full year

*prerequisites:* a candidate for the Honours Degree of Bachelor of Agricultural Business must have completed the requirements for the Ordinary Degree of Bachelor of Agricultural Business or have qualified for a degree regarded by the Faculty of Agricultural and

Natural Resource Sciences as equivalent. At least a credit in appropriate Level III subjects offered by the Department of Agriculture Business or equivalents acceptable to the Head of Department

**corequisites:** 6946 Research Methodology and Methods

**requirements:** candidates are expected to acquire a more detailed knowledge of agricultural business than is required for the Ordinary Degree. Candidates are expected to study deeply in one branch of agricultural business. Candidates are required to carry out research in this field, to present seminars and to present the results in a written thesis to the value of 24 points.

**assessment:** the research project/thesis will be assessed by dissertation and seminar 100%

## Bachelor of Agricultural Science

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar.

As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

### Specific Course Rules

#### 1 General

- 1.1 There shall be an Ordinary and an Honours degree of Bachelor of Agricultural Science.
- 1.2 To qualify for the Ordinary degree a candidate shall comply with the provisions of 4 and 5, or 7 below.
- 1.3 To qualify for the Honours degree a candidate shall comply with the provisions of Rules 4,5 and 6, or 6 and 7 below.
- 1.4 A candidate who fails to obtain an Honours classification may be awarded the Ordinary degree provided the candidate has in all other respects completed the work for that degree.
- 1.5 No candidate may present the same part subject, section of a subject, unit of a subject or option in more than one subject of a degree.
- 1.6 Candidates who commenced their courses of study for the degree prior to 1989 may qualify for the degree by fulfilling the requirements of the present Regulations and Specific Course Rules, with such modifications as the Faculty may deem necessary to ensure that subjects validly passed under previous Regulations and Schedules may be counted under the present Specific Course Rules.

#### 2 Assessment and examinations

- 2.1 A candidate shall not be eligible to present for examination unless the prescribed classes have been regularly attended and the written, practical or other work required has been completed to the satisfaction of the teaching staff concerned.
- 2.2 In determining the candidate's final result in a subject the examiners may take into account assessments of the candidate's written, practical or other work, and the results of other

examinations in that subject provided that the candidate has been given notice at the beginning of the course of study for the subject of the way in which such assessments will be taken into account and of their relative importance in the final result.

- 2.3 There shall be four classifications of pass in any subject for the Ordinary degree, as follows: Pass with High Distinction, Pass with Distinction, Pass with Credit, Pass. If the list of candidates who pass be published in two divisions, a pass in the higher division may be prescribed in the appropriate syllabus as prerequisite for admission to another subject. A candidate with a lower division pass who wishes to gain a higher division pass shall be allowed to repeat the subject, subject to the provisions of 2.5 below. There shall also be a classification of Conceded Pass. A Conceded Pass may not be used to satisfy prerequisite requirements. A candidate may present for the Ordinary degree only a limited number of subjects for which a Conceded Pass has been awarded, as specified in 4.4 below.
- 2.4 Notwithstanding results in individual subjects, a candidate shall be deemed to have passed the whole of the first or the second year provided the total mark obtained at final examinations in all the subjects that constitute the year and the lowest mark obtained in any one subject thereof meet such requirements as the Faculty may determine from time to time.
- 2.5 A student may be granted a Faculty Pass in Level I and Level II of the course notwithstanding results in individual subjects, provided that the average mark obtained at annual examinations for all the subjects at that Level is 50 or over, and at least 45 in any one subject. Moreover:

(a) a Faculty Pass shall not be granted if the subject which the student has failed is a prerequisite for a compulsory subject to be undertaken by the student at a higher level;

(b) a student who has been granted a Faculty Pass in Level I or II shall not be permitted to take any subject in succeeding levels for which the prerequisite has been failed;

(c) a student who has been granted a Faculty Pass in Level I or II and who wishes to take a subject at Level III, having failed its prerequisite in the Level in which the Faculty Pass was granted, shall only be permitted to take that subject after having passed the prerequisite.

2.6 (a) A candidate who fails to pass in a subject or who obtains a lower division pass and who desires to take the subject again shall, unless exempted wholly or partially therefrom by the Head of Department concerned, again complete the required work in that subject to the satisfaction of the teaching staff concerned.

(b) A candidate who has twice failed to obtain a Division I pass or higher in the examination in any subject shall not enrol for the subject again, or for any other subject which in the opinion of the Faculty contains a substantial amount of the same material, except by permission of the Faculty and under such conditions as the Faculty may prescribe.

(c) For the purposes of 2.6(a) and (b) above, a candidate who is refused permission to sit for an examination, or who fails to attend the examination in any subject although eligible to do so, shall be deemed to have failed to pass the examination.

### 3 Status, exemption and credit transfer

3.1 Candidates from other Faculties in the University or from other tertiary educational institutions may, on written application to the Faculty Registrar, be granted such status in appropriate subjects in the course for the degree of Bachelor of Agricultural Science as the Faculty in each case may determine. Candidates in the general course and those undertaking the horticultural science major from within the University will, however, be required to satisfy the examiners in the subject 7972 Agricultural Practice, Policy and Communication.

3.2 Extra study as prescribed by the Head of the Department concerned may be required in nominated subjects before such candidates enter the course.

## 4 The Ordinary degree

4.1 The course for the Ordinary degree shall occupy four years of full-time study or equivalent.

4.2 It is not necessary for a candidate to take all the subjects of any one level simultaneously or to complete all the subjects set out for one level before enrolling for any subject of the following level provided that the prerequisite subjects have been passed. But a candidate who desires to take a third level subject before completing all compulsory first and second level subjects must obtain the permission of the Dean.

4.3 In addition to the general degree specified under 4 and 5, the option for candidates to major in Horticultural Science, Viticulture or Oenology is described under 7 below.

4.4 To qualify for the Ordinary degree a candidate shall satisfactorily complete the requirements of the subjects listed below, subject to such conditions and modifications as may be specified or allowed by the Specific Course Rules to the value of at least 96 points which satisfy the following requirements.

(a) A candidate shall satisfactorily complete Level I subjects to the value of at least 24 points.

(b) A candidate shall satisfactorily complete Level II subjects to the value of at least 24 points.

(c) A candidate shall satisfactorily complete Level III subjects to the value of at least 48 points, taken in the third and fourth years of the course. Under the provisions of 2.3 above, a candidate may be deemed to have satisfactorily completed a Level III subject for which a Conceded Pass has been awarded. A Conceded Pass may only be awarded in a Level III subject with a value of 3 points or less. Subjects passed at the Conceded Pass level to a maximum total value of six points may be presented towards the degree.

#### 4.5 Compulsory subjects

code	subject title	points
------	---------------	--------

##### (a) Level I subjects

2247	Agriculture, Environment and Society*	3
3174	Biology I	6
6976	Biomathematics and Statistics*	3
7312	Chemistry 1ANR	6
5683	Earth Science I*	3
7267	Genetics IW	3

##### (b) Level II subjects

9339	Agricultural Botany	3
3689	Agricultural Microbiology II	3
2847	Agricultural Production & Economics*	3
2448	Agricultural Zoology II	3
6553	Biological Chemistry	6
7931	Biometry	3
5681	Earth Science II	3

\*Candidates intending to study Level II and Level III subjects in the Faculties of Science or Mathematical and Computer Sciences or Economics and Commerce in the Bachelor of Agricultural Science degree may, with the permission of the Dean, enrol in and count towards the degree:

*one only of*

2136	Geology I in place of
5683	Earth Science I

9786	Mathematics I in place of
6976	Biomathematics and Statistics

*and both*

4309	Economics IA and 2076 Economics IB in place of
2247	Agriculture, Environment and Society

*or*

2847	Agricultural Production and Economics.
------	--

Students wishing to enrol in Level II subjects in the Statistics Department will require a pass in 9786 Mathematics I, at least a credit in 7931 Biometry and approval of the Head of that Department.

##### (c) Level III subjects

*compulsory and elective*

5286	Agricultural Experimentation**	3
7972	Agricultural Practice, Policy and Communication	3

and any of the following subjects offered in the following departments and faculties to the value of 42 points taken in the third and fourth years of the course. Subjects taken in the Faculties of Economics and Commerce, Mathematical and

Computer Sciences and Science and from other degree programs in the Faculty of Agricultural and Natural Resource Sciences to the value of no more than 20 points may be counted towards the degree of Bachelor of Agricultural Science.

The subjects 5286 Agricultural Experimentation and 7972 Agricultural Practice, Policy and Communication will normally be taken in the third year of the course.

Some of the subjects listed below are only offered in alternate years. See syllabuses for details.

\*\*Candidates counting 4523 Data Analysis and 1675 Linear Models II towards the degree are exempt from 5286 Agricultural Experimentation.

##### Agricultural Business

8394	Business Management for Agricultural Science	3
7521	Farm Management Systems	3
5851	Wool Marketing	3

##### Agronomy and Farming Systems

1536	Agroforestry	3
1446	Agronomy IIIA	3
8271	Crop and Pasture Ecology	3

##### Animal Science

8049	Animal Breeding and Genetics	3
3172	Animal Cell and Molecular Biotechnology	3
7906	Animal Diseases and Control	3
9011	Animal Nutrition	3
8548	Animal Production Science	3
4516	Animal Structure and Function	3
7904	Control of Animal Function	3
4522	Reproductive Biology and Technology	3
1114	Research Project: Animal Science	3
6108	Wool Biology	3
9576	Wool Production	3
2780	Wool Technology and Metrology	3

##### Crop Protection

4078	Biology of Insects	3
2471	Crop Protection	3
6129	Ecological Biochemistry	3
8867	Fungal Biology	3
5480	Insect Behaviour	3

4534 Insect Biological Control	3	6470 Soil Fertility	3
3416 Plant Disease and the Environment	3	1936 Soil Management and Conservation	3
6265 Plant Pathogens and Pathogenicity	3		
4763 Population Ecology of Insects	3	<b>Soil Science and Geology and Geophysics</b>	
1616 Research Project: Crop Protection	3	2083 Environmental Geology III	3
<b>Environmental Science and Rangeland Management</b>			
2830 Research Project: Environmental Science and Rangeland Management	3		
<b>Horticulture, Viticulture and Oenology</b>			
1018 Horticultural Production	3		
5882 Horticultural Science	3		
8645 Reproductive and Postharvest Horticulture	3		
2174 Viticultural Production A	3		
5153 Viticultural Production B	3		
6637 Research Project: Horticulture, Viticulture and Oenology	3		
<b>Plant Science</b>			
9446 Advanced Biometry	3		
8593 Advanced Plant Breeding	3		
7583 Agricultural Biotechnology	3		
9867 Crop Physiology III	3		
9545 Environmental and Developmental Biology of Plants	3		
7630 Genetic Technologies for Plant Improvement	3		
3434 Mineral Nutrition of Plants	3		
1450 Molecular Genetics of Plants III	3		
5501 Principles of Plant Breeding	3		
4001 Research Project: Plant Science	3		
<b>Plant Science and Animal Science</b>			
7531 Applied Genetics	3		
<b>Plant Science and Botany</b>			
5486 Molecular Activity of Plant Cells	3		
<b>Soil Science</b>			
9462 Remote Sensing and Land Evaluation	3		
4449 Research Project: Soil Science	3		
1031 Research Project A: Soil Science	3		
4633 Soil Biology and Biochemistry	3		

note (not forming part of the Specific Course Rules)

**Work required to complete an Adelaide degree**

- (a) Students from other universities and tertiary educational institutions who are granted status under 3.1 of these Specific Course Rules will be required to complete at least the whole of the work of the final year of the course at Adelaide in order to qualify for the degree; and
- (b) a student who has completed at Adelaide at least the first three years of the degree, or the equivalent, may with permission of the Faculty be permitted to complete the requirements of the degree at another institution.

**5 Practical experience**

note: The requirements set out in this Rule do not apply to candidates presenting a major in Horticultural Science, Viticulture or Oenology. Such candidates should refer to Rule 7 below.

**5.1 General**

Before a candidate shall be admitted to the Ordinary or Honours degree, he/she must provide satisfactory evidence of the completion of a minimum of thirteen weeks of practical agricultural experience and other contact with the farming industry as approved by the Practical Experience Administrator. The appropriate experience may be spread over the four years of the course. On completion of the practical experience requirements (and no later than the Friday of Teaching Week 1 of the second semester of fourth year) each candidate is required to submit to the Practical Experience Administrator evidence that the practical experience requirements have been satisfactorily completed. Candidates who have completed an appropriate diploma or degree may be exempted from the practical experience requirement of the course. Candidates should discuss these requirements on first enrolment in the course with the Practical Experience Administrator.

**5.2 Objectives**

The objective of the practical experience requirements is to provide the student with first-hand experience, knowledge and understanding of the complex operation of modern farming and of agricultural and related industries. The student will be expected to gain practical experience with a wide range of farm

operations, first-hand appreciation of the interaction of the physiological, biological and economic and social factors in on-farm decision-making, and understanding of the industrial and governmental infrastructure that services primary industry.

### 5.3 Farm Experience

(a) The primary farm: With the help of the Practical Experience Administrator early in the degree course, each student will choose one farm for study. The student will be required, with the help of the farmer and family, to gain a thorough knowledge of the nature and operation of this farm. This will necessitate several periods of work on the selected farm, in different years and at different seasons, plus other visits and correspondence. A minimum of eight weeks of working experience will be expected. A full written report on experiences gained on this farm will be submitted during the final year of the degree course.

(b) Each student will be expected to gain farm experience in at least two other agricultural areas (ie, different from that of the primary farm above). This experience may be used when writing the final report for contrast and comparison with the primary farm. A list of agricultural areas is provided by the Practical Experience Administrator. Help in the choice of farms can be provided.

A minimum of twelve weeks' farm experience will be required (total for 5.3(a) and (b) above). Students attending vacation courses and camps in elective subjects may seek to have the time counted towards the farm experience requirement.

### 5.4 Industry Experience

A minimum of one week will be spent with industrial firms, government departments and statutory bodies servicing the agriculture industry. The relevance of this experience may be mentioned in the final report.

## 6 The Honours degree

6.1 Before entering upon the requirements for an Honours course a candidate must obtain the approval of the Head of Department that will take responsibility for providing relevant supervision. Approval will depend on the candidate's academic record up to the time of

application. Normally such approval should be sought at the end of the third year of the course for the Ordinary degree. Whenever possible the planning of subjects to be counted towards the degree should begin at the end of the second year. Candidates must have completed all Level I and Level II subjects before enrolment for Honours.

6.2 A candidate for the Honours degree shall undertake a project in one of the Departments shown below in lieu of four of the Level III electives specified in 4.5 above.

7142	Honours Agronomy & Farming Systems (B.Ag.Science)	12
3490	Honours Agronomy & Farming Systems (B.Ag.Science)(M-Y)	12
1584	Honours Animal Science (B.Ag.Science)	12
3347	Honours Animal Science (B.Ag.Science)(M-Y)	12
5403	Honours Crop Protection (B.Ag.Science)	12
5438	Honours Crop Protection (B.Ag.Science)(M-Y)	12
7630	Honours Economics (B.Ag.Science)	12
5615	Honours Envir. Sc & Rangeland Management (B.Ag.Science)	12
7375	Honours Envir. Sc & Rangeland Management (B.Ag.Science)(M-Y)	12
1623	Hons Hort. Viticulture and Oenology (B.Ag.Sc.)	12
8312	Hons Hort. Viticulture and Oen (B.Ag.Sc.)(Mid-year Intake)	12
3062	Honours Plant Science (B.Ag.Science)	12
1317	Honours Plant Science (B.Ag.Sc.) (Mid-year Intake)	12
7232	Honours Soil Science (B.Ag.Science)	12
7526	Honours Soil Science (B.Ag.Sc.)(Mid-year Intake)	12

The requirements of this Rule do not apply to candidates presenting a major in Horticultural Science, Viticulture or Oenology. Such candidates should refer to 7 below.

6.3 The work of the Honours year shall normally be completed in the final year of study. The Faculty may permit a candidate to present the work over a period of not more than two years on such conditions as it may determine.

6.4 A candidate who qualifies for the Honours degree shall be awarded the Honours degree of Bachelor of Agricultural Science, but the Faculty shall decide within which of the following classes and divisions the degree shall be awarded:

First Class

Second Class      Division A  
                                 Division B

Third Class

6.5 Candidates may not enrol for a second time for the Honours course if they

- (a) have already qualified for Honours or
- (b) have presented for examination but failed to obtain Honours or
- (c) have withdrawn from the Honours course unless the Faculty on such conditions as it may determine permits re-enrolment.

## 7 Major in Horticultural Science, Viticulture or Oenology

### 7.1 Major in Horticultural Science

To major in Horticultural Science a candidate shall comply with the general requirements listed in Specific Course Rules 2, 4.1, 4.2, 4.4, 4.5(a) and (b).

Students offering a major in Horticultural Science will be required to present the following subjects:

5286 Agricultural Experimentation	3
7972 Agricultural Practice, Policy and Communication	3
2471 Crop Protection	3
6603 Fruit and Nut Crops	3
1018 Horticultural Production	3
5882 Horticultural Science	3
3434 Mineral Nutrition of Plants	3
9838 Ornamental Horticulture	3
8645 Reproductive and Postharvest Horticulture	3
5903 Vegetable Crops	3
<i>and either</i>	
6637 Research Project: Horticulture, Viticulture and Oenology	3
<i>or</i>	
1623 Honours Hort. Viticulture and Oenology (B.Ag.Science)	12

The following are recommended as suitable electives:

7483 Agricultural Biotechnology	3
9100 Engineering Science	3
9545 Environmental and Developmental Biology of Plants	3
8394 Business Management for Agricultural Science	3
9534 Insect Biological Control	3
3066 Irrigation Science	3
3416 Plant Disease and the Environment	3
5501 Principles of Plant Breeding	3
1242 Viticultural Science	3

Other Bachelor of Agricultural Science subjects may also be considered as electives subject to the permission of the Course Adviser and the Head of Department of Horticulture, Viticulture and Oenology.

Candidates for Honours shall comply with the requirements listed in 6 above.

### Horticulture Practical Experience

Candidates for the major in Horticultural Science must complete thirteen weeks of horticultural practical experience. Students should consult the Practical Experience Coordinator (Horticultural Science major) for allocation of suitable placements, which may be taken up any time during the vacation periods of the four years of the course. A diary of activities should be kept at each placement, and a written report on the activities of the property, business or enterprise presented to the Horticultural Science coordinator.

### 7.2 Major in Viticulture or Oenology

To major in Viticulture or Oenology a candidate shall comply with the general requirements listed in Specific Course Rules 2, 4.1 and 5 and satisfactorily complete the requirements of Specific Course Rules 7.3 or 7.4, and 7.5 below.

Candidates for the major in Viticulture shall also complete a minimum of three elective subjects (Ordinary degree) from Level III subjects listed under 4.5 above.

Candidates for the major in Oenology shall also complete a minimum of two elective subjects (Ordinary degree) from Level III subjects listed under 4.5 above.

Candidates for either the Viticulture or the Oenology major may select electives from subjects offered by other Departments within the

University as approved by the Head of the Department of Horticulture, Viticulture and Oenology.

### 7.3 Subjects for major in Viticulture

code	subject title	points
------	---------------	--------

#### Year 1

##### semester 1

2247	Agriculture, Environment and Society	3

#### full year

1623 Honours Horticulture, Viticulture and Oenology (B.Ag.Science)	12
--	----

\*Students must complete both of the paired subjects, the year in which each is undertaken being determined by its availability.

note:

2213 Grape Industry Practice, Policy and Communication is presented annually commencing in 1995.

2174 Viticultural Production A is presented in even years, commencing in 1994.

5153 Viticultural Production B is presented in odd years, commencing in 1995.

1958 Wine Packaging and Quality Management is presented in odd years, commencing in 1995.

9685 Advances in Oenology is presented in even years, commencing in 1994.

## 7.5 Tour

Candidates shall be required to attend and successfully complete a tour of one week's duration to viticulture and winemaking regions of Australia. This tour forms part of the requirements for the subject 9079 Industry Experience and Case Study (Viticulture) and the subject 9685 Advances in Oenology.

## Syllabuses

### textbooks

Information on appropriate textbooks will be provided by the department concerned, and at the preliminary lecture in Orientation Week.

In general, students are expected to have their own copies of textbooks but they are advised to await advice from the lecturer concerned before buying any particular book. Only the prescribed edition of any text-book should be bought.

### reference books

Although lists of books and journals for reference purposes are regarded as important, details have not been included in this Volume. These will however be issued from time to time by the departments concerned. It is hoped that all books and journals set for reference will be available to be consulted in the Barr Smith Library and/or the Waite Campus or Roseworthy Campus Libraries.

### examinations

For each subject students may obtain from the department concerned details of the assessment in that subject including the relative weights given to the components (eg such of the following as are relevant: assignments, semester tests, essays or other written or practical work, final written examinations, *viva voce* examinations).

## Level I

### 2247 Agriculture, Environment and Society

*level:* I    *points value:* 3    *duration:* semester 1

*contact hours:* 3 lectures and 1 tutorial per week

*content:* Of all human activities, agriculture has had the most profound effect on our physical, biological and social environment. With the continued growth in the world's population, it will be necessary at least to maintain current levels of agricultural production as well as minimise the adverse effects on the environment of any increased productivity. Modern agriculture and its management face changing sets of opportunities and threats which arise in part out of complex mixes of new technologies, economic development, dynamic international policies, increasingly competitive world markets and growing awareness of the importance of natural environments.

This subject is an introduction to the scope of Australian agriculture and its importance to Australian society. It covers topics such as the contribution of

Australia to world agriculture, the physical and biological basis of agriculture, the impact of agriculture on the environment, the impact of agricultural chemicals and a description of the major rural industries. Some of the environmental, social, ethical and economic issues faced by Australia's rural industries will be discussed.

*assessment:* essays (30%); tutorial exercises (20%) and final exam (50%)

### 3174 Biology I

*level:* I    *points value:* 6    *duration:* full year

*syllabus details:* see Bachelor of Science in the Faculty of Science

### 6976 Biomathematics and Statistics

*level:* I    *points value:* 3    *duration:* semester 2

*assumed knowledge:* Stage 2 Mathematics I

*restriction:* 5543 Statistics I; 9786 Mathematics I; 4357 Mathematics IH; 3617 Mathematics IM

Available only to students in the Faculty of Agricultural and Natural Resource Sciences.

*contact hours:* 4 lectures and 2 computer lab sessions/tutorials per week

*content:* The subject is intended to equip students with basic skills in mathematics and statistics, as an introduction to the use of quantitative methods in agriculture. Where possible, examples and data sets drawn from agricultural and biological sciences will be used. The course will involve the use of modern computing methods.

Topics will include: periodic, exponential and trigonometric functions, matrices and linear equations, integrals, differential equations; data collection and presentation, probability distributions, principles of experimentation (randomisation and application), estimation, hypothesis testing, confidence intervals, regression and correlation.

*assessment:* formal exam (at least 70%); exercise, practicals and project work (at most 30%)

### 7312 Chemistry 1ANR

*level:* I    *points value:* 6    *duration:* full year

*assumed knowledge:* SACE Stage 2 Chemistry and Mathematics I or equivalent) is desirable

*restrictions:* this subject is available only for students enrolled for the degree of Bachelor of Agricultural Science.

*contact hours:* 3 lectures and 1 tutorial per week; and a minimum of 5, up to a maximum of 10, 3 hour practical sessions a semester as determined by the Department of Chemistry

*content:* An introduction to chemical concepts needed for a scientific understanding of agriculture and the environment.

General and physical chemistry: Molecular shapes. Chemical bonds. Intermolecular forces. Solids, liquids and gases. Phase changes. Properties of solutions. Chemical energetics. Entropy. Chemical equilibrium. pH, acids and bases, buffering. Chemical kinetics. Catalysis. Electrochemistry. Oxidation and reduction. Surface phenomena. Biological membranes.

Inorganic chemistry: The chemistry of the main group and transition elements with particular reference to those elements of significance in agricultural and environmental issues.

Organic chemistry: An introduction to the properties and reactions (including mechanisms) of representative organic compounds.

*assessment:* end of semester exams. Laboratory work assessed during practical classes comprises 20% of the total marks available for the subject.

### 5683 Earth Science I

*level:* I     *points value:* 3     *duration:* semester 1

*restriction:* 2136 Geology I; 5339 Geology IW; 3482 Introduction to Physical Geography I

*contact hours:* 3 lectures and equivalent of 3 hours practical/tutorial/field work per week

*content:* This subject is concerned with the dynamics of the Earth's crust, atmosphere, hydrosphere and biosphere; origin of the Earth's major relief; evolution of landscapes; world climates; climatic influences on landscapes; climatic change over the past 2 million years; river systems, coastal zones and other erosional and depositional environments; soil variation and development; vegetation patterns; ecosystem processes.

We emphasise the interaction and interrelationships of various facets of the Earth's surface through time. We are concerned to examine how the present landscapes and systems came into being. We consider that the natural world is fascinating on its own account, and that human impacts (eg soil degradation, air and water pollution) are better understood if energy and time perspectives are clear.

*assessment:* 1 written exam, plus essays, tutorial and practical exercises and field excursions

### 7267 Genetics IW

*level:* I     *points value:* 3     *duration:* semester 2

*assumed knowledge:* 3174 Biology I

*restriction:* 7940 Genetics and Evolution I; 6424 Genetics ID; 7138 Molecular and Cell Biology I

*contact hours:* 3 lectures per week, 2 hours practical/tutorial per week

*content:* Heredity and variation; Genes and chromosomes; Linkage; Chromosomes and evolution; Properties of the genetic material and molecular organisation of chromosomes; Gene manipulation; Population genetics and evolution; Genetic diversity of agriculturally important plants; Quantitative inheritance; Principles of plant and animal breeding; Application of molecular genetics to agriculture.

*assessment:* 1 three hour paper (80%); assignments (20%)

## Level II

### 9339 Agricultural Botany

*level:* II     *points value:* 3     *duration:* full year

*prerequisites:* 3174 Biology I

*restriction:* 3673 Botany II, 1692 Botany IIA

*contact hours:* 2 lectures and 1 four-hour practical per week

*content:* The botanical and physiological aspects of plants of agricultural significance, emphasising the acquisition of skills required to identify those plants and to relate the structure of the various plant organs and tissues to their function and physiology. This will include the general principles of phylogeny and taxonomy of higher plants including the features used in classification, and the use of floras and keys. Species identification and anatomy will be addressed for the major agricultural families. Speciation, crop domestication and weed taxonomy will also be considered.

The relationship between structure and function will be addressed in terms of plant growth regulating chemicals in the control of root and shoot growth, and in the control of floral initiation and fruit growth. These processes will also be investigated in terms of plant responses to environmental influences including light, water and temperature; the interaction of environmental effects; the mechanism of response; and implications for plant life cycles.

*assessment:* to be advised at first lecture

### 3689 Agricultural Microbiology II

level: II points value: 3 duration: semester 1

prerequisites: 3174 Biology I

restriction: 5677 Agricultural Microbiology and Zoology

contact hours: 2 lectures, 1 four-hour practical session per week

content: The role of micro-organisms in agriculture and related environments. Topics covered include the biology and classification of bacteria, fungi and viruses important in agricultural situations and fermentation technology, nutrient cycling, micro-organisms as pathogens, symbionts and agents of biological control, genetically modified micro-organisms, microbiology of food, wine and animal fodder.

assessment: to be advised

### 2847 Agricultural Production and Economics

level: II points value: 3 duration: semester 2

prerequisites: 2247 Agriculture, Environment and Society

contact hours: 2 lectures and 3 hours practical/farm visit per week

content: A general introduction to the basic practices of Australian agricultural production including the operation of the pastoral system, mixed farming enterprises of the cereal zone, higher rainfall enterprises and irrigated agriculture. Approximately half of the lecture course is devoted to the description and study of the economics and marketing of agricultural commodities. The remainder of the lectures and most of the practical program is concerned with the description and evaluation of production units including crop, pasture, horticulture and animal enterprises.

assessment: exam, essay and practical/farm visit reports

### 2448 Agricultural Zoology II

level: II points value: 3 duration: semester 1

prerequisites: Biology I

restriction: 8712 Agricultural Zoology (Invertebrates), 5677 Agricultural Microbiology and Zoology

contact hours: 2 lectures, 1 four hour practical per week

content: The aim of this subject is to introduce the basic concepts of invertebrate and vertebrate taxonomy, physiology and function with particular emphasis on organisms of agricultural significance.

The first half of the subject deals with invertebrates within a comparative framework and covers molluscs, nematodes, annelids, and arthropods. The remainder deals with vertebrates including their physiological systems, production, disease control and biotechnology.

assessment: to be advised

### 6553 Biological Chemistry

level: II points value: 6 duration: full year

prerequisites: 3174 Biology I and one of 9312 Chemistry I (ANR) or 6878 Chemistry I

restriction: 1874 Chemistry IIA

contact hours: 2 lectures and 1 four-hour practical per week

content: A study of the chemistry and biochemistry of plant, animal and microbial components as well as consideration of the chemistry of synthetic compounds such as herbicides and pesticides and their effect on cell metabolism. The following topics will be included: chemistry and metabolism of carbohydrates, lipids, proteins and nucleic acids, thermodynamic analysis of energy exchanges in the cell, biochemistry of muscle action, photosynthesis, photorespiration and fermentative processes, nitrogen fixation, chemistry of natural and artificial additives used in the food industry, structural features of herbicides and pesticides that contribute to their reactivity plus consideration of their behaviour in the soil. Attention will be given to the relevant enzymology and impact of molecular biology in the understanding of the above processes. Practical classes will provide the opportunity for students to gain experience in a range of chemical and biochemical techniques and skills.

assessment: exams (60%), practical classes and exercises (30%), essay (10%)

### 7931 Biometry

level: II points value: 3

duration: semester 1 (for B.Ag.Sc. students); semester 2 ((for B.App.Sc.(Agriculture) and (Natural Resources Management) students))

prerequisite: 6976 Biomathematics and Statistics or an acceptable equivalent

contact hours: 2 lectures and 1 three hour tutorial a week

content: An extension of statistical methods and mathematical topics of importance in agricultural and wine sciences. Topics covered include: sampling methods, tests of significance, simple and multiple regression, introduction to the design of experiments and analysis of variance (both parametric and

non-parametric). The GENSTAT5 statistical package is utilised extensively throughout the subject.

*assessment:* continuous assessment of regular written assignments (20%) and exams (80%)

### 5681 Earth Science II

*level:* II    *points value:* 3    *duration:* semester 2

*prerequisites:* 5683 Earth Science I.

*contact hours:* 2 lectures and 4 hours of practical work (or equivalent) per week

*content:* The major topics considered are: Soil materials: organic, inorganic components of soils and their influence on soil properties and land use. Physical, chemical and biological properties of soils: soil structure, infiltration, storage and movement of water, salinity, chemical fertility, cation and anion exchange, soil biology. Soil conservation: wind and water erosion, causes and effects of erosion, land evaluation, methods of controlling degradation and erosion, reclamation.

*assessment:* exam, essay, practical and other assignments

*assessment:* assignments and tutorial exercises 40%, 3 hour final examination 60%

### 7521 Farm Management Systems

*level:* III    *points value:* 3    *duration:* semester 2

*quota:* may apply

*contact hours:* 5 hours per week

*content:* This subject is designed to encourage students to apply a systems approach to the analysis and planning of the dryland farm in South Australia. The syllabus includes the principles underlying the integration of crops, pastures and livestock in the farming system; the relationships between various environmental, economic and biological components of farming systems for the purpose of effective management; techniques to evaluate the performance of the dryland farm in terms of its technical and economic sustainability and flexibility, define major factors limiting performance, plan improvements and alternative management strategies to improve performance within the constraints imposed upon the farm business, and compare the projected performance of the proposed system with the performance of current farming policy. Visits will be made to a number of dryland farming enterprises in the Mid-North to analyse system performance and propose development and management strategies that will lead to an improvement in technical and economic sustainability. Considerable student participation is required.

*assessment:* assignment based on farm visits

---

## Level III

---

### Agricultural Business

#### 8394 Business Management for Agricultural Science

*level:* III    *points value:* 3    *duration:* semester 2

*assumed knowledge:* 2247 Agriculture, Environment and Society

*contact hours:* 3 hours of lectures and 2 hours of tutorials per week

*content:* this subject will introduce the student to the management of agricultural, horticultural, viticultural and wine enterprises and concentrate on: Finance: purpose of financial management; Australian financial system; financial mathematics; interest rates; break-even analysis and leverage; return and risk; principles of investment; debt and credit planning and management. Introduction to Marketing: ethics, social foundation, analysis of marketing opportunity, consumer behaviour, advertising and promotion, wide marketing, development of a marketing plan and tactical strategic marketing will be related to a product, consumer or competition based philosophy. Management: organisational structure and objectives; human resources planning and management; development practices and principles; OHS laws and issues; industrial relations issues.

#### 5851 Wool Marketing

*level:* III    *points value:* 3    *duration:* semester 2

*contact hours:* 3 hours of lectures, 3 hour practical

*content:* this subject is one of four wool-based subjects being offered by the Cooperative Research Centre for Premium Quality Wool. The majority of lectures will be offered by experts over the Picture Tel interactive video teaching system simultaneously at four universities.

In this subject students will study the principles of wool commerce and marketing in a series of lectures and practicals. This includes the wool pipeline, the supply and demand for raw wool and its products and the raw wool marketing system. The unit also addresses the issues of quality assurance, pricing, ownership transfer, information and the roles of government and industry bodies in the marketing of wool.

*assessment:* to be advised

## Agronomy and Farming Systems

The Department of Agronomy and Farming Systems conducts research and teaching in the following six areas:

- Crop and pasture agronomy
- Plant ecology and farming systems
- Soil management, tillage effects and water use efficiency
- Agricultural engineering
- Agroforestry
- Communications and extension

Students intending to make a career in Agronomy are advised to take at least three of the subjects 8556 Agronomy IIB, 1446 Agronomy IIIA, 8271 Crop and Pasture Ecology, 1536 Agroforestry, 9867 Crop Physiology III. The following additional subjects which are relevant to agronomists are recommended: 3434 Mineral Nutrition of Plants, 6470 Soil Fertility, 1936 Soil Management and Conservation, 2471 Crop Protection and 5501 Principles of Plant Breeding.

### 1446 Agronomy IIIA

*level:* III *points value:* 3 *duration:* semester 2  
*syllabus:* see B.App.Sc. (Agriculture)

### 8271 Crop and Pasture Ecology

*level:* III. *points value:* 3 *duration:* semester 2  
*availability:* odd years only

*prerequisites:* 1692 Botany IIA, 9339 Agricultural Botany or 8057 Biology INR.

*restriction:* 2834 Agronomic Principles

*contact hours:* 2 lectures and 1 four-hour practical per week

*content:* Crops and pastures are plant communities that are managed mainly for the production of food and fibre. Those used in agriculture range from natural vegetation to specialised, sown annual monocultures. It is important to understand how these communities function if they are to be productive. Crop and Pasture Ecology examines the structure and functioning of agricultural plant communities. Topics that will be covered include an examination of the similarities to, and differences between sown and natural communities, the effects of climate on the distribution and productivity of crops and pastures, interaction between a crop and its environment, competition, the impact of the grazing animal and the importance of genetic diversity among plants to adaptation to the environment and to agricultural productivity.

*assessment:* exam (50%); practical reports (30%); essays (20%)

### 7142 Honours Agronomy & Farming Systems (B.Ag.Science)

### 3490 Honours Agronomy & Farming Systems (B.Ag.Science) (mid year)

*level:* 4 *points value:* 12 *duration:* full year

*prerequisites:* A credit or higher standard in two level III subjects relevant to the research topic and approved by the Head of Department.

*corequisites:* Two additional level III subjects relevant to the proposed research project and approved by the Head of Department.

*requirements:* Students wishing to undertake an Honours degree should consult the Head of Department as soon as their intention in known, but no later than the end of semester 2 in the third year of their course. Studies commence at the beginning of February (normal intake) or July, (mid-year intake). A candidate will be required to undertake a research project under one or more members of the academic staff and present seminars and a thesis on their research work. The research project could be undertaken in one of the following areas: crop and pasture agronomy; plant ecology and farming systems; soil management; tillage effects and water use efficiency; agricultural engineering; agroforestry; communications and extension.

## Animal Science

The livestock industries earn over half of the total agricultural income of Australia. The Department of Animal Science offers a range of subjects relating to livestock production to allow students to pursue interests in basic or applied science including nutrition, genetics, immunology, reproduction, wool biology, microbiology or molecular biology.

Students wishing to specialise in Animal Science are advised to enrol in the following subject combinations, plus additional subjects as appropriate.

### Animal Production

4516 Animal Structure and Function

8548 Animal Production Science

9011 Animal Nutrition

7906 Animal Diseases and Control

### Animal Breeding

4516 Animal Structure and Function

7531 Applied Genetics

4522 Reproductive Biology and Technology

8049 Animal Breeding and Genetics

7904 Control of Animal Function

### **Animal Biotechnology**

- 4516 Animal Structure and Function
- 3172 Animal Cell and Molecular Biotechnology
- 7906 Animal Diseases and Control
- 4522 Reproductive Biology and Technology
- 7904 Control of Animal Function

### **Wool Production and Processing**

- 4516 Animal Structure and Function
- 6108 Wool Biology
- 5851 Wool Marketing
- 9576 Wool Production
- 2780 Wool Technology and Metrology

### **8049 Animal Breeding and Genetics**

*level:* III *points value:* 3 *duration:* semester 2  
*availability:* odd years only.

*prerequisites:* 2448 Agricultural Zoology II, 7931 Biometry and 7267 Genetics IW or equivalent approved by the Head of Department before enrolment

*assumed knowledge:* 7531 Applied Genetics or 4863 Genetics II

*contact hours:* 2 lectures, 1 hour tutorial and 2 hour practical a week

*content:* The principles of a quantitative genetic inheritance are developed to study the continuing improvement in productivity of farm livestock through genetic means. Topics covered include the genetical structures of the livestock industry in Australia. Basic concepts in the development of breeding programs, genetic value and artificial selection; relationship and inbreeding; quantitative inheritance, prediction of breeding value (heritability); prediction of genetic progress; comparison of selection programs; multi-trait selection; indirect selection; selection indices; mating systems; development of breeding objectives and selection criteria; natural selection; estimation of variance components and impact of new biotechnologies on animal improvement.

*assessment:* : regular assignments, exercises and essays; final exam

### **3172 Animal Cell and Molecular Biotechnology**

*level:* III *points value:* 3 *duration:* semester 2  
*availability:* odd years only.

*assumed knowledge:* 7583 Agricultural Biotechnology

*contact hours:* 2 lectures and 1 four-hour practical a week

*content:* gene expression and control in animal cells. Cell division, regulation and differentiation. Experimental production and uses of antibodies, natural and synthetic vaccines, synthetic growth promotants. Rumen microbial genetics and genetic engineering of rumen microflora. Genetic engineering in animal cells. Biotechnology in animal production.

*assessment:* to be advised

### **7906 Animal Diseases and Control**

*level:* III *points value:* 3 *duration:* semester 2  
*availability:* even years only.

*prerequisites:* 2448 Agricultural Zoology II.

*contact hours:* 2 lectures and one practical per week

*content:* The aim of this subject is to familiarise students with the agents of infectious diseases and the ways in which infectious, parasitic and metabolic diseases and toxins affect animals. Emphasis will be placed on the scientific basis of diagnosis and on the preparation of vaccines and other preventative methods. An introduction to the pathology genetic susceptibility and immune response of animals to diseases is included. It is not intended to cover differential diagnosis or methods of treatment of individual animals.

*assessment:* 3 hour written exam (60%); practicals (20%); and assignment (20%)

### **9011 Animal Nutrition**

*level:* III *points value:* 3 *duration:* semester 1  
*availability:* even years only

*restriction:* 1907 Animal Nutrition, Growth and Development

*assumed knowledge:* 4516 Animal Structure and Function

*contact hours:* 2 lectures and 1 four-hour practical a week

*content:* The analysis and composition of animal feeds; the essential nutrients (vitamins, minerals, amino acids and fatty acids) and their metabolic roles; symptoms of, and correction of, nutrient deficiency and toxicity states in farm animals; computerised ration formulation for livestock; nutrient supply from pastures; manipulation of nutrient supply to increase animal production; the impact of diet on human health.

*assessment:* to be advised

### **8548 Animal Production Science**

*level:* III *points value:* 3 *duration:* semester 1  
*availability:* odd years only

*restriction:* 4148 Animal Products and Production Systems

*assumed knowledge:* 3689 Agricultural Microbiology II, 2448 Agricultural Zoology II

*contact hours:* 2 lectures and 1 four-hour practical a week

*content:* This subject provides detailed coverage of the formation and composition of the main animal products (meat, milk, eggs and fibres) with particular emphasis on the factors influencing the efficiency of their synthesis and their quality in relation to consumer demands.

The scientific principles behind animal production are covered prior to investigation of management options for improving production efficiency and product quality. Where appropriate, the impact of genetics, nutrition and disease on animal production is discussed. Practical classes include laboratory work, animal experiments and trips to animal product processing plants.

*assessment:* to be advised

#### **4516 Animal Structure and Function**

*level:* III *points value:* 3 *duration:* semester 1

*restriction:* 7318 Animal Physiology A (Systems)

*assumed knowledge:* 3689 Agricultural Microbiology II, 2448 Agricultural Zoology II

*contact hours:* 2 lectures and 1 four-hour practical a week

*content:* The basic properties of mammalian cells. The physiology of the cardiovascular, immune, respiratory, nervous, digestive and excretory systems will be dealt with in detail, and the skeleton, muscle and skin will be considered.

*assessment:* to be advised

#### **7904 Control of Animal Function**

*level:* III *points value:* 3 *duration:* semester 2

*restriction:* 1617 Animal Physiology B (Regulation)

*assumed knowledge:* 4516 Animal Structure and Function

*contact hours:* 2 lectures and 1 four-hour practical a week

*content:* Nervous, metabolic, and hormonal control of animal function and productivity; adaption, thermoregulation, water and electrolyte balance, pharmacology and toxicology, special senses (ear, eye and nose), integrative physiology.

*assessment:* to be advised

#### **4522 Reproductive Biology and Technology**

*level:* III *points value:* 3 *duration:* semester 2

*availability:* odd years only.

*assumed knowledge:* 4516 Animal Structure and Function

*contact hours:* 2 lectures and 1 four-hour practical a week

*content:* The anatomy, physiology and endocrinology of the male and female reproductive systems. Gamete production, sexual behaviour, seasonal breeding, pregnancy, growth and development of the fetus, and lactation are discussed with an emphasis on agriculturally important species, although comparisons are made with other eutherian mammals, marsupials and birds. The technologies of artificial insemination, in vitro fertilisation and embryo transfer are introduced, and practicals allowing hands-on experience are an integral component of the subject.

*assessment:* to be advised

#### **1114 Research Project: Animal Science**

*level:* III *points value:* 3 *duration:* semester 1 or 2

In some cases in particular due to seasonal constraints, a project may be conducted over semester 1 and 2.

*prerequisites:* 7318 Animal Physiology A (Systems) or 4516 Animal Structure and Function plus one other course work subject offered by the Department of Animal Science.

*corequisites:* at least one other course work subject offered by the Department of Animal Science.

*contact hours:* No formal contact hours but students are expected to spend at least 10 hours of practical work a week for 1 semester (or equivalent) on their project.

*content:* The subject comprises a small research project to be undertaken during the 4th year of the course under the supervision of a staff member in the Department of Animal Science. Students wishing to undertake a research project should consult with the Head of the Department before the beginning of the 4th year.

*assessment:* Details of the assessment procedure will be provided prior to commencement of the project.

#### **6108 Wool Biology**

*level:* III *points value:* 3 *duration:* semester I

*assumed knowledge:* 2248 Agricultural Zoology II OR 6739 Physiology of Farm Animals and 5646 Nutrition Breeding and Health of Farm Animals.

*contact hours:* 3 hours of lectures, 3 hour practical per week

*content:* This subject is one of four wool-based subjects being offered by the Cooperative Research Centre for Premium Quality wool. The majority of lectures will be offered by experts over the Picture Tel interactive video teaching system simultaneously at four universities.

In this subject students will study the chemical and physical components of the wool as a fibre and its chemical and physical reactivity. It will cover in detail the morphology and function of skin and particularly the development and function of follicles. From this base students will study the molecular control mechanisms for follicle and fibre growth, including the relationship between follicle, fibre, genetics, nutrition and the environment. The physical characteristics of the fleece and their biological control will also be studied in detail and the characteristics of wool will be contrasted with those of other animal, vegetable and synthetic fibres.

Practical work will concentrate on the chemical and histochemical study of wool follicles and the fibres they produce and will include work on manipulation of the type of fibre produced within wool follicles.

*assessment:* to be advised

### **9576 Wool Production**

*level:* III *points value:* 3 *duration:* semester 2

*assumed knowledge:* 2248 Agricultural Zoology II OR 6739 Physiology of Farm Animals and 5646 Nutrition Breeding and Health of Farm Animals.

*contact hours:* 3 hours of lectures, 3 hour practical per week

*content:* This subject is one of four wool-based subjects being offered by the Cooperative Research Centre for Premium Quality wool. The majority of lectures will be offered by experts over the Picture Tel interactive video teaching system simultaneously at four universities.

This subject will focus on the characteristics of Merino wool that influence its value, such as fleece weight, average fibre diameter, staple strength, staple length colour, vegetable matter and style. Students will study in detail the impact of genetics, nutritional, environmental, physiological and management factors of these wool characteristics. The interactions between these factors will be explored in both Mediterranean and non-Mediterranean environments, providing a systems approach to wool production in each, and an understanding of the constraints to wool production at a national level. Students will be able to identify and evaluate the options available to the commercial wool grower for improving productivity and the value of the clip. Attention will also be given to the ram breeding

industry in terms of breeding objectives, selection strategies, bloodline comparisons and sire evaluation schemes.

*assessment:* to be advised.

### **2780 Wool Technology and Metrology**

*level:* III *points value:* 3 *duration:* semester I

*assumed knowledge:* 2248 Agricultural Zoology II OR 6739 Physiology of Farm Animals and 5646 Nutrition Breeding and Health of Farm Animals.

*contact hours:* 3 hours of lectures, 3 hour practical per week

*content:* This subject is one of four wool-based subjects being offered by the Cooperative Research Centre for Premium Quality wool. The majority of lectures will be offered by experts over the Picture Tel interactive video teaching system simultaneously at four universities.

The subject covers the way in which wool is processed and the qualities of wool that affect its processing. This, in turn, includes the measurement of wool fibres, staples and fleeces, the factors that influence the way in which wool can be processed and the prediction of the quality and characteristics of wool tops and yarns using these measurements. The subject also addresses the question of marketing by description, blending of lots to achieve specified outcomes in the processed product and the whole-industry implications of working with particular fleece types. In the practicals students will acquire experience in measurement of all of the main characteristics of wool and an understanding of the implications of these for the wool industry as a whole. Students will also be introduced to traditional wool classing by subjective assessment and will relate the consequences of wool classing techniques to processing performance and preparation for market.

*assessment:* to be advised.

### **1584 Honours Animal Science (B.Ag.Science)**

### **3347 Honours Animal Science (B.Ag. Science)(Mid Year Intake)**

*level:* IV *points value:* 12 *duration:* full year

*note:* Students wishing to take the Honours degree in Animal Science must consult the Head of the Department before beginning the fourth year but preferably before beginning the third year. Students cannot enrol in this subject and 1114 Research Project (Ordinary Degree).

*prerequisite:* Pass in all subjects chosen at levels I, II and III of the B.Ag.Sc. degree course and credit in 4516 Animal Structure and Function and a credit in one other level III subject offered by the Department of Animal Science, or equivalent.

**corequisite:** A sufficient number of semester subjects offered by the Department of Animal Science so that by the end of the fourth year, the student will have completed 4 subjects offered by the Department, or the equivalent.

**contact hours:** At least ten hours per week during semester I and II and at least 30 hours per week for 4 weeks during the month of February, or during the other vacations, working on the project and in relevant discussions, reading or preparation of an Honours thesis.

**requirements:** A candidate will be required to undertake a research project under the supervision of one or more members of the Academic staff and present seminars and a thesis on their research work. Candidates will also participate in tutorials and journal club. The research project can be undertaken in one of the following areas: Animal reproduction, Animal Production, Animal Nutrition, Digestive Physiology, Wool Biology, Immunology, Molecular Biology, Rumen Microbiology, Animal Genetics, Cell Biology, Biotechnology.

Interested candidates should consult with the Head of Department of Animal Science and potential supervisors during the third year of the degree, and be prepared to begin studies in the Department at the beginning of February (normal intake), July (mid year intake).

**assessment:** to be advised

## Crop Protection

The management and control of insects, nematodes, plant diseases and weeds are major costs in the production of agricultural commodities in Australia and the rest of the world. The Department of Crop Protection deals with the biology of these groups of organisms and options for managing them when they become pests. Students wishing to specialise in entomology are encouraged to enrol in Biology of Insects, Crop Protection, Insect Behaviour, and Insect Biological Control. Those who wish to specialise in plant pathology should enrol in Plant Pathogens and Pathogenicity, Plant Disease and the Environment, and Fungal Biology. Students interested in weeds and their control should enrol in Crop Protection. Ecological Biochemistry spans the disciplines of plant pathology, entomology, and weed science. Advanced students can explore more specialised topics in a Research Project or by enrolling in Honours in their fourth year.

## 4078 Biology of Insects

**level:** III **points value:** 3 **duration:** semester 1

**prerequisite:** 2448 Agricultural Zoology (pre-1992: 5677 Agricultural Microbiology and Zoology; pre-1989: 5114 Agricultural Zoology)

Students without such qualification must obtain permission of the Head of Department before enrolling.

**assumed knowledge:** 7940 Genetics and Evolution I

**contact hours:** 2 lectures and 4 hours of practical work a week

**content:** After a brief review covering the internal anatomy of insects and the processes involved in metamorphosis, excretion and reproduction, a number of specific topics will be explored in more detail, including: morphological and biological characteristics of the major insect orders; life histories of selected pest and beneficial species; sociality, caste formation and nest building in termites; sound production methods and functions; feeding mechanisms; adaptations and biology of vertebrate ectoparasites; insects as disease vectors of plants and animals; production and function of silk in insects and arachnids; mimicry and defensive adaptations; sociality and parasitism in the Hymenoptera.

The practical component will examine collecting techniques; identification of adult insects to family level; identification of immature stages and feeding damage. A requirement of the course is the presentation of a well-curated insect collection.

**assessment:** written exam (40%); practical exam (35%); and insect collection project (25%)

## 2471 Crop Protection

**level:** III **points value:** 3 **duration:** semester 1

**contact hours:** 2 lectures and 1 four-hour laboratory practical a week

**content:** This subject provides a coordinated introduction to the theory and practice of crop protection from diseases, pests and weeds using cultural, genetic, biological and agrichemical control methods and will serve as a basis for more specialised subjects. Topics considered are: the development, regulation and usage of pesticides. Environmental safety and fate of pesticides in ecosystems. Control of insects. The types of insect pests. Strategies and tactics for managing insect pests (biological, cultural, genetic and chemical control). Integrated pest management. Economics of managing insect and other crop pests. Control of plant diseases. The diagnosis of disease. Chemical control of fungi and nematodes. Strategies and tactics for managing disease outbreaks (biological, cultural, genetic and chemical methods of control). Control of weeds. Strategies and tactics for managing weed infestations (biological, cultural and chemical control). Integrated weed management.

**assessment:** final exam plus practical exercises

### **6129 Ecological Biochemistry**

*level:* III *points value:* 3

*availability:* not offered in 1996

*assumed knowledge:* all compulsory Level II subjects

*contact hours:* 2 lectures and 4 hours of practical work a week

*content:* Evolution of defence strategies of plants: physical and chemical barriers to penetration and metabolic changes associated with the pathogenic state. Allelopathy. Manipulation of natural defence mechanisms into agronomically important crops. The influence of secondary metabolites (non-protein amino acids, polyphenols, cyanogenic glucosides, terpenes) on the exploitation of plants by pathogens and herbivores, including man. Practical periods will include tutorials and student seminars.

*assessment:* details to be advised at first lecture

### **5480 Insect Behaviour**

*level:* III *points value:* 3 *duration:* semester 2

*availability:* odd years only

*prerequisites:* 4078 Biology of Insects or equivalent approved by Head of Department prior to enrolment.

*contact hours:* 2 lectures and 4 hours of practical work a week

*content:* This subject will take an evolutionary perspective on animal behaviour using insects as examples. Topics will include nervous coordinating mechanisms, genetics and development of behaviour, orientation and movement, behavioural ecology, mating and reproduction, communication, and social systems of insects.

*assessment:* written exam (60%); practicals, project and tutorials (40%)

### **4534 Insect Biological Control**

*level:* III *points value:* 3 *duration:* semester 2

*availability:* even years only on Waite Campus; annually on Roseworthy Campus

*prerequisites:* 2448 Agricultural Zoology II or 8712 Agricultural Zoology (Invertebrates), and 3689 Agricultural Microbiology II; or 3472 Zoology II; or 1151 Microbiology and Entomology A; or equivalent subjects approved by Head of Department

*contact hours:* 2 hours lecture and 4 hours practical or tutorial per week

*content:* Theory and practice of biological control of insects and the use of insects as agents of biological control. Includes: theory of population dynamics; classical biological control of insects, weeds and dung;

augmentation of natural enemies; use of pathogens and parasites to control insects.

*assessment:* written exam (60%); practical reports and assignments (40%)

### **8867 Fungal Biology**

*level:* III *points value:* 3 *duration:* semester 2

*availability:* even years only.

*prerequisites:* 3689 Agricultural Microbiology II (pre-1992: 5677 Agricultural Microbiology and Zoology) or equivalent approved by the Head of Department prior to enrolment.

*contact hours:* 2 lectures and 1 four-hour laboratory practical a week

*content:* Aspects of the biology of fungi, including classification, ecology, physiology, genetics and molecular biology, will be covered. Emphasis will be placed on fungi that are pathogens of economically important crops. Fungi of importance in industry, biotechnology and medicine will also be considered.

*assessment:* final exam, fungal collection and practical books examined

### **3416 Plant Disease and the Environment**

*level:* III *points value:* 3 *duration:* semester 2

*prerequisites:* 3689 Agricultural Microbiology II (pre-1992: 5677 Agricultural Microbiology and Zoology) or equivalent approved by the Head of Department prior to enrolment.

*contact hours:* 2 lectures and 1 four-hour laboratory practical a week

*content:* An environmentally responsible approach to the control of plant disease, based on knowledge of the factors which influence disease development and the survival and dispersal of pathogens. Emphasis will be placed on biological control, including cultural practices, genetic and induced host plant resistance and the use of antagonistic microorganisms.

*assessment:* final exam and practical books examined

### **6265 Plant Pathogens and Pathogenicity**

*level:* III *points value:* 3 *duration:* semester 1

*prerequisites:* 3689 Agricultural Microbiology II (pre-1992: 5677 Agricultural Microbiology and Zoology) or equivalent approved by the Head of Department prior to enrolment.

*contact hours:* 2 lectures and 1 four-hour laboratory practical a week

*content:* This subject focuses on the biology of plant pathogenic fungi, nematodes, bacteria and viruses with

emphasis on interactions with hosts, the nature of disease and diagnosis. It provides biological information required for devising disease control strategies and complements Plant Disease and the Environment (3416). Physiological, biochemical, genetic and molecular properties of pathogens will be discussed. Aspects of plant pathogen systems will include host physiology, disease development, resistance and molecular plant-microbe interactions.

*assessment:* final exam and practical books examined

### **4763 Population Ecology of Insects**

*level:* III *points value:* 3

*availability:* not offered in 1996

*prerequisites:* 7931 Biometry or equivalent approved by Head of Department prior to enrolment.

*contact hours:* 2 lectures and 4 hours of practical work a week

*content:* The following aspects of the population ecology of insects: rates of increase of populations; the ecological significance of diapause; population aspects of dispersal; the influence of weather, resources, mates and natural enemies on the population dynamics of insects; concepts of population stability, regulation and resilience.

*assessment:* written exam and practical books (details given at commencement)

### **1616 Research Project: Crop Protection**

*level:* IV *points value:* 3

*duration:* semester 1 or 2, or under special circumstances due to seasonal constraints, during part of the summer vacation.

*prerequisites:* at least 55% in each of two Level III subjects offered by the Department.

*corequisites:* students should consult with the Head of Department.

*contact hours:* There are no formal contact hours but students are expected to spend at least 10 hours of practical work a week for one semester (or equivalent) on their project.

*content:* The subject comprises a small research project to be undertaken during the fourth year of the course under the supervision of a staff member in the Department. Students wishing to undertake a research project should consult the Head of the Department before the beginning of the fourth year. The subjects presented as prerequisites should be relevant to the area of the research project.

*assessment:* details to be provided prior to commencement of the project

### **5403 Honours Crop Protection (B.Ag.Science)**

### **5438 Honours Crop Protection (B.Ag. Sciences)(M-Y)**

*level:* IV *points value:* 12 *duration:* full year

*prerequisites:* pass in all Level I, II and chosen level III subjects of the B.Ag.Sc. degree course, and a credit in at least two Level III subjects offered by the Department of Crop Protection.

*corequisites:* Two additional Level III subjects offered by the Department of Crop Protection. These subjects should be relevant to the proposed research project and be approved by the Head of Department. At the discretion of the Head of the Department, a relevant subject taught by another Department may be accepted.

*contact hours:* equivalent to four Level III subjects

*requirements:* Students wishing to undertake an honours degree should consult the Head of Department as soon as their intention is known, but no later than the end of Semester 2 in the third year of their course. Each candidate will be assigned a research project in an area of entomology, plant pathology, or weed science, which will be carried out under the supervision of one or more members of academic staff. The results will be presented in a dissertation and a seminar at the end of the subject. Candidates will begin studies on 1 February.

*assessment:* to be advised

### **Economics**

For syllabuses of Economics subjects that may be counted towards the degree of B.Ag.Sc., see syllabuses under the degree of B.Ec. in the Faculty of Economics and Commerce.

### **7603 Honours Economics (B.Ag.Science)**

*level:* IV *points value:* 12 *duration:* full year

*note:* Students wishing to take the Honours degree in Economics should consult the Head of the Department of Economics during the second semester of their third year of the B.Ag.Sc. Ordinary degree.

*availability:* not offered in 1996

*prerequisites:* 3658 Microeconomic Theory III (Credit)

*corequisite:* to be finalised with Economics Department

*requirements:* After consultation, each candidate will be assigned a research project, which will be carried out under supervision. The results will be presented in a dissertation at the end of the course. A candidate may also be required to prepare a seminar. Candidates will begin studies on 1 February.

*assessment:* to be advised

## Environmental Science and Rangeland Management

### 2830 Research Project: Environmental Science and Rangeland Management

*level:* III *points value:* 3 *duration:* semester 1 or 2

*prerequisites:* at least 55% in two level III subjects approved by the Head of Department.

*corequisites:* students should consult with the Head of Department.

*contact hours:* There are no formal contact hours but students are expected to spend at least 10 hours per week for one semester (or equivalent) on their project.

*content:* The subject comprises a small research project to be undertaken during the fourth year of the course under the supervision of a staff member in the Department. A student wishing to undertake a research project should consult the Head of the Department before the beginning of the fourth year. The subjects presented as pre-requisites and co-requisite should be relevant to the area of the research project.

*assessment:* Details will be provided by the Head of Department.

### 5615 Honours Environmental Science & Rangeland Management (B.Ag.Science)

### 7375 Honours Environmental Science & Rangeland Management (B.Ag.Science)(mid-year)

*level:* IV *points value:* 12 *duration:* full year

*prerequisites:* a credit or higher standard, in two Level III subjects approved by the Head of the Department or with special permission of the Head of Department.

*corequisites:* A Level III subject appropriate to the candidate's interests, with approval of the Head of Department of Environmental Science and Rangeland Management.

*requirements:* After consultation, each candidate will be assigned a research project which will be carried out under supervision. The results will be presented in a dissertation at the end of the course. A candidate may also be required to prepare an essay and give a seminar.

*assessment:* A full written statement will be provided.

## Horticulture, Viticulture and Oenology

The Level III subjects required by students wishing to major in Horticultural Science are listed in Specific Course Rule 7.1.

## 1018 Horticultural Production

*level:* III *points value:* 3 *duration:* semester 2

*availability:* even years only

*prerequisites:* 7312 Chemistry 1ANR or 8637 Biochemistry and Plant Science A (B.App.Sc.)

*contact hours:* 2 lectures and 1 4-hour practical per week (practicals may be replaced by a tour)

*content:* The application of scientific principles to the production of horticultural crops. The basis of decisions regarding the choice of the type of enterprise, including both open and protected cropping. Establishment of orchards, and the concept of alternative horticulture. Training and trellising methods, pruning and shaping, and control of pests and diseases. Root growth of crops, in relation to soil management, irrigation and drainage. Harvesting of the crop, including maturity indices, preharvest and postharvest handling and processing. Marketing of horticultural produce. The subject normally includes visits to horticultural enterprises.

*assessment:* exam (60%); assignments (40%)

## 5882 Horticultural Science

*level:* III *points value:* 3 *duration:* semester 1

*prerequisites:* 7312 Chemistry 1ANR or 8420 Chemistry and Introductory Biochemistry A

*contact hours:* 2 lectures and 4 hours practical work a week (3 hours practical work may be replaced by a tutorial or lecture for part of the semester)

*content:* The scientific principles underlying horticultural production including classification of horticultural crops, aspects of plant growth in relation to environmental and management factors. The basis of horticultural plant growth cycles, organic nutrition, growth regulation and the accumulation of reserves. Methods of vegetative and sexual propagation, and the use of rootstocks; plant improvement and cultivar development. The subject covers fruit, flower and vegetable crops of both temperate and tropical climates, and normally includes visits to horticultural enterprises.

*assessment:* exam (60%); and assignments (40%)

## 8645 Reproductive and Postharvest Horticulture

*level:* III *points value:* 3 *duration:* semester 2

*availability:* odd years only

*prerequisites:* 9339 Agricultural Botany.

*contact hours:* 2 lectures and 4 hours practical work a week (3 hours practical work may be replaced by a tutorial or lecture for part of semester)

*content:* The physiological principles underlying the flowering and fruiting of horticultural crops which are of importance to production of the economic commodity. Floral development, pollination requirements of crops, fruit set, drop, development and maturity. The physiological basis for successful postharvest handling of these crops including fruit ripening and metabolism. Response of horticultural crops to temperature, water, gas and injury stress in the postharvest phase. The subject normally includes visits to horticultural enterprises.

*assessment:* exam (60%); and assignments (40%)

### **2174 Viticultural Production A**

*level:* III *points value:* 3 *duration:* semester 2

*availability:* even years only

*prerequisites:* 1242 Viticultural Science or 5882 Horticultural Science

*contact hours:* 2 lectures plus 1 four hour practical per week

*content:* The principles behind the establishment of a viticultural enterprise comprising site selection, choice of planting material and the design and establishment of the vineyard. Trellising design, pruning principles, practices and mechanisation, and crop harvesting. The relationship between production aspects and the physiology of the vine including phenology and shoot development, effect of node position on fruitfulness, interaction with climate response to pruning, trellising and canopy management. The subject includes visits to commercial vineyards.

*assessment:* exam (50%); assignments (30%); practical reports (20%)

### **5153 Viticultural Production B**

*level:* III *points value:* 3 *duration:* semester 2

*availability:* odd years only

*prerequisites:* 1242 Viticultural Science or 5882 Horticultural Science

*contact hours:* 2 lectures plus 1 four-hour practical per week

*content:* The management aspects of the vineyard including pests and diseases of grapevines, their recognition and control, and principles of plant protection, particularly spray application technology. Soil management comprising weed control, plant nutrition and tissue analysis. The response of the grapevine to irrigation and salinity including plant and soil moisture determination and irrigation scheduling. Use of growth regulators and propagation. The subject includes visits to commercial vineyards and service companies.

*assessment:* assignments (50%); written exam (40%); practical report (10%)

### **6637 Research Project: Horticulture, Viticulture and Oenology**

*level:* III *points value:* 3 *duration:* full year

*prerequisites:* at least 55% in each of two Level III subjects offered by the Department.

*corequisites:* an additional Level III subject offered by the Department.

*contact hours:* There are no formal contact hours but students are expected to spend at least 10 hours a week of work for 1 semester (or equivalent) on their project.

*content:* The subject comprises a small project to be undertaken during the 4th year of the course under the supervision of a staff member in the Department. Students wishing to undertake a research project should consult the Head of Department before the beginning of 4th year.

*assessment:* Details will be provided by the Head of Department.

### **1623 Honours Horticulture, Viticulture and Oenology (B.Ag.Sc)**

### **8312 Honours Horticulture, Viticulture and Oenology (B.Ag.Sc)(mid-year Intake)**

*level:* IV *points value:* 12 *duration:* full year

*prerequisites:* credits in two Level III subjects offered by the Department.

*corequisites:* An additional two Level III subjects offered by the Department.

*requirements:* Intending candidates should consult the Head of Department and potential supervisors before October of Year III, and should be prepared to commence studies in the Department on or about 1 February (normal intake) or July (mid-year intake). After consultation, each candidate will be assigned a research project which will be carried out under supervision. The results will be presented in a dissertation at the end of the subject. A candidate may also be required to prepare an essay and give a seminar.

*assessment:* Procedures will be discussed at the beginning of the first semester of study.

### **Mathematical and Computer Sciences**

For syllabuses of Mathematical and Computer Sciences subjects that may be counted towards the degree of B.Ag.Sc., see syllabuses under the degree of B.Sc. in the Faculty of Mathematical and Computer Sciences.

## Plant Science

The Department of Plant Science offers a range of Level III subjects to allow students to pursue particular interests in basic or applied aspects of plant science with relevance to sustainable crop and pasture improvement. With a particular focus on cereals and legumes, basic studies on the physiology, biochemistry and genetics are linked with both traditional methods of plant breeding and modern biotechnological procedures for plant improvement.

For students wishing to specialise in Plant Science three main streams have been identified and the core and recommended subjects in these are shown below.

### Plant Biotechnology

**Core:** 9545 Environmental and Developmental Biology of Plants, 7583 Agricultural Biotechnology, 1450 Molecular Genetics of Plants III.

**Recommended:** 7531 Applied Genetics or 4863 Genetics II, 7630 Genetic Technologies for Plant Improvement, 5486 Molecular Activity of Plant Cells, 3434 Mineral Nutrition of Plants, 6265 Plant Pathogens and Pathogenicity, 6129 Ecological Biochemistry and 1377 Plant Nutrition and Membrane Transport.

### Plant Breeding

**Core:** 5501 Principles of Plant Breeding, 7531 Applied Genetics or 4863 Genetics II, 8493 Advanced Plant Breeding and 7630 Genetic Technologies for Plant Improvement and 9545 Environmental and Developmental Biology of Plants.

**Recommended:** 7583 Agricultural Biotechnology, 3434 Mineral Nutrition of Plants, 9867 Crop Physiology III, 6265 Plant Pathogens and Pathogenicity, 3416 Plant Disease and the Environment, 6470 Soil Fertility and 9446 Advanced Biometry.

### Crop and Pasture Science

**Core:** 9545 Environmental and Developmental Biology of Plants, 3434 Mineral Nutrition of Plants, 9867 Crop Physiology III and 8271 Crop and Pasture Ecology.

**Recommended:** 5501 Principles of Plant Breeding, 2471 Crop Protection, 3416 Plant Disease and the Environment, 6470 Soil Fertility, 1936 Soil Management and Conservation, 1446 Agronomy IIIA (1996 only) (3507 Crop Agronomy and 1981 Pasture Agronomy from 1997) and 9446 Advanced Biometry.

Students not taking Honours in one of the above areas are encouraged to take 4001 Research Project - Plant Science.

## 9446 Advanced Biometry

*level:* III    *points value:* 3    *duration:* semester 2  
*availability:* even years

*prerequisites:* 5286 Agricultural Experimentation.

*contact hours:* 3 lectures and 1 two hour tutorial per week

*content:* A selection of topics from the following: fractional replication; confounding; incomplete block designs; spatial analysis of large field trials; components of variance models; genotype x environment analysis (joint regression analysis and cluster analysis); multivariate analysis (principal components, factor analysis, Hotelling's  $T^2$  and the linear discriminant function); harmonic regression and transformations; design and analysis of repeat measures data; non-linear regression; epidemiological methods (logistic regression). As well as GENSTAT 5, the statistical packages SAS, REML and S will be utilised.

*assessment:* class exercises (10%); individual assignment (30%); final exam (60%)

## 8593 Advanced Plant Breeding

*level:* III    *points value:* 3    *duration:* semester 2  
*availability:* odd years only.

*prerequisites:* 5501 Principles of Plant Breeding and 7531 Applied Genetics or 4863 Genetics II.

*contact hours:* 2 lectures and 1 four-hour practical a week

*content:* Breeding for specific objectives: yield, processing quality, resistance to diseases and pests. Genetics of host-pathogen interactions. Biometrical analysis of breeding methods, parent evaluation, effectiveness of early generation selection. Genetic bases of various breeding methods.

*assessment:* exam, essays and practicals

## 7583 Agricultural Biotechnology

*level:* III    *points value:* 3    *duration:* semester 1  
*prerequisites:* 6553 Biological Chemistry

*contact hours:* 2 lectures plus 4 hours practical work a week

*content:* Biotechnology offers methods for producing exciting new products for agriculture, new ways of controlling pests and diseases and sophisticated diagnostic tools for selection and breeding. This subject is designed to provide students with an opportunity to understand the basic principles, practices and applications of new biotechnological approaches being used to improve agriculture. You will

learn some of the modern techniques in plant and animal cell culture, monoclonal antibody production, role of microbes in toxin degradation, use of recombinant DNA methods to express foreign proteins in micro-organisms and obtain an introduction to advanced procedures used in genetic manipulations of plants and animals. You will also gain an appreciation of the benefits, scientific limitations and ethical issues associated with these modern bio-techniques.

*assessment:* to be advised at first lecture

### **9867 Crop Physiology III**

*level:* III *points value:* 3 *duration:* semester 2

*availability:* even years only.

*prerequisites:* 1692 Botany IIA or 9339 Agricultural Botany.

*restriction:* 3507 Crop Agronomy

*contact hours:* 2 lectures and 1 four-hour practical per week

*content:* The development of appropriate management techniques and adapted cultivars of crop and pasture plants requires knowledge of the environmental constraints to growth and yield and of how plants in crops respond to environmental stresses. Crop physiology is a subject that examines the interaction between crops in the field and their environment. Discussions will concentrate on the crop and pasture canopy as the unit of organisation and the subject will analyse how productivity is affected by the field environment and the genetic and managerial means by which the adverse effects of environmental stress can be reduced and yield improved. The physiological basis for these practices will be stressed. Topics include solar radiation and crop production, water use by crops and water use efficiency, gas exchange by plant communities, dry matter production and partitioning, cereal and legume physiology, nitrogen fixation, the use of physiological characteristics in plant breeding, and case studies of important grain crops.

*assessment:* exam (50%); practical exercise (30%); essay (20%)

### **9545 Environmental and Developmental Biology of Plants**

*level:* III *points value:* 3 *duration:* semester 1

*prerequisites:* 9339 Agricultural Botany or 1692 Botany IIA

*contact hours:* 2 lectures and 1 four hour practical per week

*content:* The form, structure and growth of plants is controlled by a complex interaction of genetic and

environmental factors. An understanding of plant growth and development involves a consideration of plant physiology, biochemistry and molecular biology. Coordination of these fields of research is revealing the mechanisms involved in plant cell growth and differentiation and responses to the environment. This subject begins with the cell and progresses through an examination of vegetative growth and reproductive development. Topics include the molecular basis of differentiation, hormonal and environmental control of growth and development and sexual reproduction and senescence.

Responses to the normal range of major environmental factors (including light, temperature, water, salinity, aeration, gravity and biotic factors) which determine the growth of the plant in the field will be examined as well as stress reactions. Crop species will be used as examples. Practical classes will investigate aspects of plant growth and development and responses to selected environmental variations. Students will be encouraged to design and execute their own experiments.

*assessment:* final exam (60%); and practical reports (40%)

### **7630 Genetic Technologies for Plant Improvement**

*level:* III *points value:* 3 *duration:* semester 2

*availability:* even years only.

*prerequisites:* 1875 Genetics and Evolution I or 7267 Genetics IW, and 7531 Applied Genetics or 4863 Genetics II.

*assumed knowledge:* 5501 Principles of Plant Breeding or equivalent

*contact hours:* 2 lectures and 1 four-hour practical a week

*content:* Chromosomal engineering and cytogenetic procedures. Gene mapping in crop plants. Polyploidy, interspecific hybridisation and gene transfer from related species and genera. Haploid breeding, anther culture, embryo rescue, tissue culture and somaclonal variation. Cytoplasmic and genic male sterility and incompatibility systems in breeding. Induced mutations in breeding.

*assessment:* exam, essays and practicals

### **3434 Mineral Nutrition of Plants**

*level:* III *points value:* 3 *duration:* semester 1

*prerequisites:* one of 1692 Botany IIA or 9339 Agricultural Botany or 9529 Biology A, and one of 7312 Chemistry 1ANR or 6878 Chemistry I or 8420 Chemistry and Introductory Biochemistry A

*restriction:* 7723 Crop Nutrition and Nitrogen Fixation in Legumes

*contact hours:* 2 lectures and 1 four-hour practical per week

*content:* An advanced course which takes its brief from the acute deficiency in minerals of most South Australian soils, and the pre-eminent role of nutrition in successful agricultural production in this State. Topics are discussed in a context of both agricultural and horticultural industries, and include factors affecting nutrient acquisition by roots, diagnosis and correction of macro and micronutrient problems, fertiliser strategies, nutritional effects on produce quality, nutrition and disease resistance, genetic control of adaptation to nutrient limitations in soils, the role of symbiotic dinitrogen fixation, nutritional aspects of nitrogen fixation. A practical course supplements the lectures by providing hands-on experience of the important issues.

*assessment:* exam (50%); practical reports (30%); reviews and essays (20%)

#### **4793 Molecular Genetics of Plants**

*level:* III *points value:* 2 *duration:* semester 2

*availability:* repeating students only

*prerequisites:* 7583 Agricultural Biotechnology or any Level II subject offered by the Departments of Biochemistry, Botany, Microbiology and Immunology or Genetics.

*contact hours:* 2 lectures and 1 tutorial per week (North Terrace Campus)

*content:* The dramatic expansion of research in plant molecular genetics over the past few years has resulted in substantially increased understanding of the molecular basis for plant development, environmental responses and plant-microbe interactions. This subject provides a current review of our knowledge about the molecular mechanisms directing plant gene expression under diverse circumstances – an essential first step in understanding the biology of plants and our potential to modify their behaviour and properties.

Areas covered in the subject include: plant DNA structure and organisation; developmental gene expression and regulation; molecular genetics of symbiotic and pathogenic plant-microbe interactions and molecular responses to physiological and environmental stimuli. Tutorials will emphasise comprehension of current research literature and development of oral communication skills.

*assessment:* exam of lecture material (70%); tutorial participation and paper presentation (30%)

#### **6800 Molecular Genetics of Plants— Laboratory**

*level:* III *points value:* 1 *duration:* semester 2

*availability:* repeating students only

*prerequisites:* 7583 Agricultural Biotechnology or any Level II subject offered by the Departments of Biochemistry, Botany, Microbiology and Immunology or Genetics.

*contact hours:* a 4 hour practical class or equivalent (Waite Campus)

*content:* The advances in our knowledge of plant molecular genetic processes have resulted in large part from the development of reliable transformation procedures, that resulted in enormous financial inputs by commercial enterprises and government funding agencies due to the perceived benefits of genetic engineering for agricultural production. This laboratory class will examine some of the techniques used to generate molecular information about plant development and growth.

*assessment:* laboratory results

#### **1450 Molecular Genetics of Plants III**

*level:* III *points value:* 3 *duration:* semester 2

*prerequisites:* 7583 Agricultural Biotechnology or any Level II subjects offered by the Department of Biochemistry, Botany or Genetics

*restrictions:* 4793 Molecular Genetics of Plants, 6800 Molecular Genetics of Plants - Laboratory

*contact hours:* 2 hours of lectures, 1 hour of tutorials and 4 hours of practicals per week

*content:* After consultation, each candidate will be assigned a research project which will be carried out under supervision. The results will be presented in a dissertation at the end of the course. A candidate will also be required to prepare an essay and a research grant proposal and give a seminar. A candidate may undertake up to 3 points of coursework.

The dramatic expansion of research in plant molecular genetics over the past few years has resulted in substantially increased understanding of the molecular basis for plant development, environmental responses and plant-microbe interactions. This subject provides a current review of our knowledge about the molecular mechanisms directing plant gene expression under diverse circumstances – an essential first step in understanding the biology of plants and our potential to modify their behaviour and properties. Areas covered in the subject include: plant DNA structure and organisation; developmental gene expression and regulation; molecular genetics of symbiotic pathogenic plant-microbe interactions and molecular responses to

physiological and environmental stimuli. Tutorials will emphasise comprehension of current research literature and development of oral communication skills.

In the laboratory classes the techniques used to generate molecular information and the experimental design will be examined and a project undertaken utilising these skills.

*assessment:* to be advised

### **5501 Principles of Plant Breeding**

*level:* III *points value:* 3 *duration:* semester 1

*prerequisites:* 1875 Genetics and Evolution I or 7267 Genetics IW

*contact hours:* 2 lectures and 1 four-hour practical a week

*content:* An introductory subject covering the role of plant improvement in agriculture. The impact of new high-yielding cultivars on agronomic practice and world food production. Sources of variation and conservation of genetic resources. Breeding methods of self pollinated and cross pollinated crops. Field plot procedures. Cultivar testing and recommendation. Plant Variety Rights.

*assessment:* exams, essays and practical exam

### **4001 Research Project: Plant Science**

*level:* III *points value:* 3 *duration:* semester 1 or 2

*prerequisites:* at least 55% in each of two Level III subjects offered by the Department.

*corequisites:* an additional Level III subject approved by the Department.

*contact hours:* There are no formal contact hours but students are expected to spend at least 10 hours a week of practical work for one semester (or equivalent) on their project.

*content:* The subject comprises a small research project to be undertaken during the fourth year of the course under the supervision of a staff member in the Department. Students wishing to undertake a research project should consult the Head of the Department before the beginning of the fourth year. The subjects presented as prerequisites and corequisite should be relevant to the area of the research project.

*assessment:* Details will be provided by the Head of the Department.

### **3062 Honours Plant Science (B.Ag.Science)**

#### **1317 Honours Plant Science (B.Ag. Sc.) (Mid-year Intake)**

*level:* IV *points value:* 12 *duration:* full year

*prerequisites:* A credit or higher standard in at least two Level III subjects offered by the Department of Plant Science.

*corequisite:* 2 additional Level III subjects offered by the Department

As with the prerequisites these should be relevant to the proposed research project and be approved by the Head of the Department. At the discretion of the Head of the Department a relevant subject taught by another department may be accepted.

*requirements:* A candidate will be required to undertake a research project under the supervision of one or more members of academic staff and present seminars and a thesis on their research work. The research project could be undertaken in one of the following areas: Biometry, Crop Physiology and Biochemistry, Plant Molecular Biology or Plant Breeding. Intending candidates should consult the Head of the Department of Plant Science and potential supervisors during the third year and be prepared to begin studies in the Department at the beginning of February (normal intake) or July (mid-year intake).

*assessment:* Details available from Head of Department.

### **Plant Science and Animal Science**

#### **7531 Applied Genetics**

*level:* III *points value:* 3 *duration:* semester 1

*prerequisites:* 7940 Genetics and Evolution I or 7267 Genetics IW.

*restriction:* 4863 Genetics II

*contact hours:* 2 lectures and 1 four-hour practical per week

*content:* This course is designed to provide a background in applied genetic systems for students in agriculture and natural resource sciences. Topics covered include chromosome structure and behaviour, segregation, linkage and linkage analysis, genetic mapping, quantitative genetics and selection theory, population genetics, breeding systems, extrachromosomal inheritance, polyploidy and chromosome aberrations.

*assessment:* to be advised at first lecture

## Plant Science and Botany

### 5486 Molecular Activity of Plant Cells

level: III

duration: semester 2

syllabus: See Bachelor of Science in the Faculty of Science

## Science

For syllabuses of Science subjects that may be counted towards the degree of B.Ag.Sc., see syllabuses under the degree of B.Sc. in the Faculty of Science.

## Soil Science

The skilful management and conservation of Australian soils, many of which are nutrient deficient and fragile, is our most urgent environmental need. It is also one of our greatest economic needs. Exploitation of soil has led to serious land degradation problems which may undermine Australia's ability to sustain the production of high quality food and fibre into the 21st century. The Federal government has recognised these needs by proclaiming the "Decade of Land Care" and by the creation of the Cooperative Research Centre for Soil and Land Management on the Waite Campus which now has the largest concentration of soil scientists in the southern hemisphere.

The Department of Soil Science teaches the application of scientific principles to the management of soils for the purpose of conserving or improving their quality. Students interested in almost all aspects of agricultural production or natural resource management will inevitably need to be aware of Australia's soil resources and their limitations.

### 9462 Remote Sensing and Land Evaluation

level: III points value: 3 duration: semester 2

restriction: 4988 Remote Sensing and Land Capability Assessment; 2083 Environmental Geology and Pedology III; 2083 Environmental Geology III

prerequisites: B.Ag.Sc.: 5681 Earth Science II; B.Sc.: 1443 Environmental Geology II; B.App.Sc.: 3283 Soils; or acceptable equivalent

contact hours: 2 lectures and 4 hours practical work (or equivalent) a week

content: This subject deals with the evaluation of land for agricultural, horticultural, and engineering use and the application of remote sensing to environmental problems. There is a particular emphasis on the measurement of soil properties which affect land use and remote sensing techniques to assess land capability. Topics include soil survey and its application to land capability assessment, movement of water and solutes into and through soils and the FAO

and USDA land capability assessment schemes. In the beginning of the subject, students will be introduced to the theory and application of remote sensing. Topics in remote sensing include interaction of electromagnetic radiation with the earth's surface. Students will apply the principles and techniques of soil survey, land capability classification and remote sensing to the study of an area of land. In the latter part of the course, students will be introduced to the applications of remote sensing and geographical information systems. Topics include rangeland monitoring, tropical land cover mapping and erosion hazard mapping. Global Positioning Systems are also briefly covered.

assessment: written and practical exam at end of semester, practical reports and a soil and land evaluation assignment

### 4633 Soil Biology and Biochemistry

level: III points value: 3 duration: semester 1

prerequisites: 3174 Biology I and one of 3689 Agricultural Microbiology II or 5681 Earth Science II or an acceptable equivalent.

contact hours: 2 lectures and 4 hours of practical work (or equivalent) a week

content: The subject provides an appreciation of the interactions among plants, microorganisms and animals in the soil. The roles played by organisms in the decomposition of organic materials and availability of nutrients. The soil biomass and enzymes in soils. The biology of the rhizosphere and its relations with the chemical and physical properties of soil.

Practical work will consist of laboratory exercises and other assignments related to the above topics.

assessment: exam, essay, practical and other assignments

### 6470 Soil Fertility

level: III points value: 3 duration: semester 2

prerequisites: 5681 Earth Science II or 3283 Soils or an acceptable equivalent

contact hours: 2 lectures and 4 hours practical work (or equivalent) a week

content: The subject provides an understanding of processes in the soil which influence the availability to plants of nutrients in the soil and added fertilisers. The occurrence and reactions of nutrient elements in the soil. Effects of acidity, alkalinity and redox potential. Ion movement in soils and the relationship between root growth and nutrient availability. Principles of fertiliser application; reactions of fertilisers with the soil and the efficiency of fertiliser use by plants.

Practical work will consist of laboratory exercises related to the above topics.

*assessment:* exam, essay, practical and other assignments

### **1936 Soil Management and Conservation**

*level:* III *points value:* 3

*duration:* semester 1 (Waite Campus); semester 2 (Roseworthy Campus)

*prerequisites:* 5681 Earth Science II or 3283 Soils, or an acceptable equivalent.

*restriction:* 2535 Soil Conservation and Management; 4058 Land Rehabilitation and Soil Conservation

*contact hours:* 2 lectures and 4 hours of practical work or equivalent a week

*content:* This subject covers topics important to students of agriculture, horticulture and natural resource management. Degradative processes which pose the greatest threats to the soil resources of Australia are examined and their avoidance, management and amelioration are discussed. These processes include: erosion of soil by water and wind, water repellence, irrigation and dryland salinity, induced soil acidity, soil structure decline and sodicity. Other issues addressed are soil conservation legislation and land capability.

Practical work will consist of laboratory exercises, field excursions and other exercises related to the above topics.

*assessment:* exam, essay, tutorials and practical assignments

### **4449 Research Project: Soil Science**

*level:* III *points value:* 3 *duration:* semester 1 or 2 and

### **1031 Research Project: Soil Science A**

*level:* III *points value:* 3 *duration:* full year

*prerequisites:* at least 55% in each of two level III subjects offered by the Department of Soil Science or equivalents acceptable to the Head of the Department.

*corequisites:* two level III subjects offered by the Department of Soil Science other than those serving as prerequisites or equivalents acceptable to the Head of the Department.

*contact hours:* There are no formal contact hours, but students are expected to spend at least 10 hours of practical work a week for one semester (or the equivalent) on their projects.

*content:* The subject consists of a small research project of the student's choosing on a topic acceptable to the Department of Soil Science. It will be undertaken during the 4th year of the course.

*assessment:* an oral exam, a seminar and a written report on the project

### **7232 Honours Soil Science (B.Ag.Science)**

### **7526 Honours Soil Science (B.Ag.Sc.) (mid-year intake)**

*level:* Honours *points value:* 12 *duration:* full year

*prerequisite:* A credit or higher standard in at least two level III subjects approved by the Head of the Department of Soil Science.

*corequisites:* At least 4 level III subjects approved by the Head of the Department of Soil Science.

*requirements:* This subject comprises a substantial research project of the student's choosing on a topic acceptable to the Department of Soil Science. Intending candidates should consult the Head of Department, the Honours coordinator and potential supervisors as early as possible and in any case, no later than the end of the semester immediately preceding the start of the Honours program. Research topics will be decided at the end of that semester and full-time work within the Department must begin no later than February 1 or July 1 (mid-year intake).

*assessment:* based mainly on the research project and the marks achieved in the corequisite level III subjects

## **Soil Science and Geology and Geophysics**

### **2083 Environmental Geology III**

*level:* III *points value:* 3 *duration:* semester 2

*prerequisites:* 1443 Environmental Geology II or 5683 Earth Science I and 5681 Earth Science II

*restriction:* 2330 Pedology III

*contact hours:* 2 hours lectures and 4 hours practical work (or the equivalent) per week

*content:* This subject deals essentially with the regolith, or weathered rock mantle with its soils, groundwater and surficial sediments; and also with the geology of wetlands, coastal and nearshore areas. Special emphasis is given to the nature, history and extent of human interaction with coastal and nearshore 'developments', and with problems of pollution and waste management. Pedology includes the genesis, distribution, classification, and properties of soils, and methods by which these are mapped and assessed for agricultural and engineering use. Practicals deal with map interpretation using geological, hydrogeological, soil, and seafloor maps, soil analysis and soil hydrology measurements.

*assessment:* written and practical examination at end of semester, poster and seminar, and one essay, assessment of practical and field work

## Various Departments

### 5286 Agricultural Experimentation

level: III points value: 3 duration: semester 1

prerequisites: 7931 Biometry.

contact hours: 2 lectures and 1 two hour tutorial class a week

content: The philosophy of science and the experimental method. Topics covered include: Latin squares, factorial designs, split-plot designs, analysis of covariance, multiple comparisons, linear contrasts, orthogonal polynomials, generalised linear models, probit analysis, transformation of data. An appropriate computer package will be used for the analysis of data sets.

assessment: approximately 15% by regular written assignments; approximately 15% by an individual assignment; approximately 70% by final exam

### 7972 Agricultural Practice, Policy and Communication

level: III points value: 3 duration: semester 2

restriction: 9039 Agricultural Practice and Policy

prerequisites: 2847 Agricultural Production and Economics

contact hours: 6 hours per week

content: The aims of this subject are the development of a mature understanding of the place of agriculture in society and the refinement of students' abilities in written and spoken communication. Invited speakers explore important issues involving current practices and the future of agriculture in Australia and the world. Communication of technical information to specialists and lay persons through various media is developed. Emphasis is placed on student participation in questions, discussions and workshops. Job seeking skills are also covered.

assessment: will be based on a series of written and oral presentations, poster preparation and class participation

## Extra subjects in the Horticultural Science, Viticulture or Oenology Majors

### Level II

#### 8712 Agricultural Zoology (Invertebrates)

level: II points value: 1.5

duration: first half of semester 1

prerequisites: 3174 Biology I

restriction: 2448 Agricultural Zoology II

contact hours: 2 lectures, one four-hour practical per week

content: The aim of this subject is to introduce the basic concepts of invertebrate taxonomy, physiology, ecology and function with particular emphasis on organisms of agricultural significance. The subject deals with organisms within a comparative framework and covers molluscs, nematodes, annelids, and arthropods.

assessment: to be advised

#### 9100 Engineering Science

level: II points value: 3 duration: semester 2

assumed knowledge: Stage 2 Mathematics I

contact hours: 6 hours per week (including lectures and practicals)

content: Fundamental concepts: force, work, power, energy, pressure. Fluids: principles of hydrostatics, elementary hydrodynamics. Properties of fluids, behaviour of real fluids under reduced pressure, elementary pressure-wave theory, fluid pumping. Stress analysis: stress, strain, deformation and failure in elementary components. Thin-walled pressure vessel theory. Electricity: physiology of electric shock, elementary DC and AC circuit theory, single and 3 phase AC power, AC meter types and applications.

assessment: includes practicals, assignments and written exams

#### 5896 Introductory Winemaking

level: II points value: 3 duration: semester 2

assumed knowledge: level I

contact hours: 2 hours of lectures and 4 hours of practicals per week

content: Introduction to the Australian wine industry. Chemistry, microbiology and unit processes of winemaking. Production of table wines, including dry floral fruity white, full bodied white, sweet white, rose, medium and full bodied red and sparkling wines.

#### 1242 Viticultural Science

level: II points value: 3 duration: semester 1

prerequisites: 3174 Biology I

contact hours: 2 lectures plus one 4 hour practical per week

Students are required to attend practical classes in the week prior to the start of semester 1.

*content:* Growth and development of the grapevine with particular emphasis on flowering and fruiting. Floral initiation in relation to environmental control and vegetative growth. Fruit development and ripening, and chemical composition of the grape berry. The morphological and agronomic characteristics of fruiting varieties and rootstocks and their relationship with end-use. Vineyard sampling and yield estimation.

*assessment:* written exam (50%), practical reports, assignments and practical exam (50%)

#### **2497 Wine Technology IIAG**

*level:* II    *points value:* 3    *duration:* semester 2

*availability:* not offered in 1996

*prerequisites:* 9206 Viticulture and Oenology.

*assumed knowledge:* Level I

*content:* Grape quality, harvesting criteria, fermentation variables and production procedures for table, sparkling and fortified wines. Basic quality control principles and analyses methods used in winemaking, including sensory evaluation of juices and wine.

*assessment:* includes practicals, assignments and written exams

---

### **Levels III and IV**

---

#### **9685 Advances in Oenology**

*level:* III    *points value:* 3    *duration:* semester 2

*pre-requisite:* 5896 Introductory Winemaking

*assumed knowledge:* Level II

*contact hours:* 2 hours of lectures per week plus 1 week Tour

*contents:* Current research in oenology. Particular emphasis will be placed on colour, phenolic and flavour compounds present in grapes and wine; selection, improvement and evaluation of wine yeasts and lactic acid bacteria; aspects of wine quality and the application of current instrumental procedures in the analysis of grapes and wines. A tour of selected Australian grape-growing and wine-producing areas with particular emphasis on development of vineyard management practices, winery equipment and oenological and quality control practices.

*assessment:* written exam, written assignments and seminars

#### **2943 Advanced Sensory Practice**

*level:* III

*points value:* 1.5

*duration:* second half of semester 1

*prerequisites:* 8469 Sensory Science

*assumed knowledge:* Level II

*contact hours:* 2 hours of lectures and 4 hours of practicals per week for 7 weeks

*content:* Threshold testing, panel screening, evaluating panellist performance, advanced sensory experimental designs and their analysis, free choice profiling, texture profiling, time-intensity methods, methods in sensory-instrumental correlation, developing a sensory program and sensory facility design.

*assessment:* written exams and written assignments and practical reports

#### **2582 Biotechnology**

*level:* III

*points value:* 1.5

*duration:* second half of semester 1

*assumed knowledge:* Level II

*restrictions:* 7583 Agricultural Biotechnology

*contact hours:* 2 hours of lectures and 4 hours of practicals per week

*content:* Theoretical and practical aspects of biotechnology as applied to agriculture. The topics include genetic engineering, the use of recombinant DNA methods to express foreign proteins in bacteria and yeasts and to produce transgenic plants, enzyme engineering, food preservation, non-alcoholic fermented foods, alcoholic fermentation, malting and brewing.

*assessment:* practical reports, written assignments and written exams

#### **7549 Business Management for Viticulture and Oenology**

*level:* III    *points value:* 3    *duration:* semester 2

*assumed knowledge:* the first two years of the Viticulture and Oenology stream of the degree of Bachelor of Agricultural Science

*contact hours:* 2 hours of lectures and 1 two hour tutorial per week

*content:* Three weeks will be spent on each major topic area and the topics will be taught in the following order, with three hours of lectures one week and the two hour tutorial the following week.

**Economics:** structure of the Australian economy and agriculture's place in that economy; introduction to basic principles of monetary and fiscal policy; comparative advantage; exchange rates.

**Finance:** purpose of financial management; Australian financial system; financial mathematics; interest rates; break-even analysis and leverage; return and risk; principles of investment; debt and credit planning and management.

**Introduction to Marketing:** ethics, social foundation, analysis of marketing opportunity consumer behaviour, advertising and promotion, wide marketing, development of a marketing plan and tactical strategic marketing will be related to a product, consumer or competition based philosophy. All examples and case studies will be taken from the wine industry.

**Human Resource Management:** organisational structure and objectives; human resources planning and management; development practices and principles; OHS laws and issues; Industrial relations issues relating to the HVO industry and its practices.

Even though computers will be used throughout the subject to assist students to enhance their computer skills as associated to the topic area, the time allocated to tutorials in week 1 and lectures in week 13 will be dedicated to introduction to the computer and the use of integrated software packages.

**assessment:** 4 assignments (one per major topic area) (40%); 1 three hour exam (covering all four topic areas) (60%)

#### **4880 Cellar Management**

**level:** III **points value:** 1.5

**duration:** first half of semester 1

**prerequisite:** 5896 Introductory Winemaking

**assumed knowledge:** Level II

**contact hours:** 2 hours of lectures and 4 hours of practicals per week for 6 weeks

**content:** Cellar hygiene, wine spoilage by micro-organisms, basic quality control, winery record keeping and practical winery management.

**assessment:** exams and written assignments

#### **7547 Distillation and Fortified Winemaking**

**level:** III **points value:** 1.5

**duration:** second half of semester 1

**prerequisites:** 5896 Introductory Winemaking

**assumed knowledge:** Level II

**contact hours:** 2 hours of lectures and 4 hours of practicals per week for 7 weeks

**content:** Distillation principles and wine distillation practices. Production and maturation of Australian and overseas grape and non-grape spirits and liqueurs. Low alcohol wine production. Legal requirements. Sensory evaluation of spirits. Composition and production of Australian and overseas fortified and liqueur wine styles.

**assessment:** includes practical reports, written assignments and written exam

#### **6603 Fruit and Nut Crops**

**level:** III **points value:** 3 **duration:** semester 2

**availability:** odd years only

**prerequisites:** 6553 Biological Chemistry or 8420 Chemistry and Introductory Biochemistry A

**contact hours:** 2 hours of lectures and one 4-hour practical per week

**content:** This subject examines production aspects of common fruit and nut crops including limits to production and characteristic requirements for cultivars, management, irrigation, integrated pest and disease management, harvesting and marketing. Crops normally considered include citrus, vines, pome, berry, stone fruits, nut crops and the main tropical fruits. Students are normally required to participate in field visits to horticultural crop enterprises.

**assessment:** exam (60%); assignments (40%)

#### **6736 Grape and Wine Business Management**

**level:** III **points value:** 3 **duration:** semester 2

**prerequisites:** 7549 Business Management for Viticulture and Oenology

**contact hours:** 3 hours of lectures and 1 two hour tutorial per week

**content:** The subject will develop concepts of the strategic management of viticultural enterprises: business planning, particularly developing a marketing plan in the light of domestic and international markets, and financial planning including annual and development budgets. Monitoring will be covered with an emphasis on accounting systems.

**assessment:** 3 three hour examination 60%, assignments and tutorial exercises 40%

### 2213 Grape Industry, Practice, Policy and Communication

*level:* III *points value:* 1.5

*duration:* second half of semester 1

*prerequisite:* 3113 Winemaking

*assumed knowledge:* Level II

*contact hours:* 6 hours of lectures per week for last 7 weeks of semester 1

*content:* The aims of the subject are the development of a mature understanding of wine in society, the refinement of students' abilities in written and spoken communication and the provision of a forum for the exchange of information between students and wine industry professionals. Invited speakers explore important issues including occupational health and safety, alcohol awareness and current practices in Australia and the world. Emphasis is placed on student participation in questions, discussions and sensory sessions.

*assessment:* written assignments, seminar participation and presentation

### 7648 Horticultural Business Management

*level:* III *points value:* 3 *duration:* semester 2

*prerequisites:* 2847 Agricultural Production and Economics.

*contact hours:* 3 hour lecture and 1 two hour tutorial per week

*content:* Three weeks will be spent on each topic area and the topics will be taught in the following order, with three hours of lectures one week and the two hour tutorial the following week.

**Budgeting:** the complete budget; development of the budget; budgeting over time; special budgets for sales, purchases, cash flow; variance analysis.

**Finance:** purpose of financial management; Australian financial system; financial mathematics; interest rates; break-even analysis and leverage; return and risk; principles of investment, debt and credit planning and management.

**Horticultural Marketing:** application of general marketing management theory through appropriate planning techniques to horticultural commodities and products in the light of specific horticultural marketing systems, domestic and international. Strategic analysis of topical issues as they occur.

**Human Resource Management:** organisational structure and objectives; human resources planning, management and development practices and principles; OHS laws and issues; industrial relations issues relating to the HVO industry and its practices.

Even though ethical issues affecting each topic area will be introduced and discussed through the semester, the week 13 lecture will be dedicated to 'Ethics in Agricultural Business'.

*assessment:* 4 assignments (one per major topic area) (40%); 1 three hour final exam (covering all four topic areas) (60%)

### 9099 Industry Experience (Oenology)

*level:* III *points value:* 3

*duration:* Summer vacation plus semester 1

*prerequisites:* 3113 Winemaking

*assumed knowledge:* Level II

*contact hours:* approved work experience up to 10 weeks

*content:* This subject is largely practically orientated in that students must gain up to 10 weeks approved work experience at a commercial winery during vintage. A specified level of proficiency in the following operations is expected: grape receipt and weighbridge; crushing; draining and pressing; fermentation and post-fermentation operations and quality control procedures. Furthermore, an understanding of the contribution of each of the specified unit operations to the overall winemaking process is required.

*assessment:* written diary and written report

### 9079 Industry Experience and Case Study (Viticulture)

*level:* III *points value:* 3

*duration:* semester 1 plus vacation periods beginning in Year 3

*prerequisite:* 7708 Viticultural engineering and Operations

*contact hours:* minimum of 10 weeks including one week on campus during a vacation period

*content:* A minimum of 10 weeks' work experience in approved horticultural enterprises. Experience in a range of operations, for example, foliar spraying in spring, irrigation system management, yield estimation, disease and pest control, harvesting and preparation for marketing, the emphasis and expectation being on gaining hands-on commercial experience of selected horticultural practices. A study of the resources of the business; assessment of the practices associated with the horticultural enterprises to evaluate the efficiency of the operations.

*assessment:* includes practical report and assignments

### **3066 Irrigation Science**

*level:* III *points value:* 3 *duration:* semester 1

*prerequisites:* 9100 Engineering Science.

*contact hours:* 6 hours per week

*content:* Irrigation principles: evapotranspiration and soil moisture budget, crop requirements (peak rate and crop factor), adjustment for salinity (leaching fraction), sprinkler and dripper characteristics, sprinkler and dripper layout, hydraulics of pressure, irrigation systems, irrigation scheduling.

*assessment:* practicals, assignments and written exams

### **9838 Ornamental Horticulture**

*level:* III *points value:* 3 *duration:* semester 2

*availability:* even years only.

*prerequisites:* 9339 Agricultural Botany.

*contact hours:* 2 hours of lectures and a four hour practical per week

*content:* This subject considers all aspects of ornamental horticulture including landscaping, turfgrasses and amenity planting, the nursery industry and cut flower and pot plant production. Principles of production of ornamental crops including characteristic requirements for propagation, breeding, management, irrigation, hydroponics, pest and disease control, harvesting and marketing will be considered for major crops including rose, carnation and Australian native plants. The subject will normally include visits to appropriate horticultural enterprises.

*assessment:* exam (60%); assignments (40%)

### **1676 Research Project: Oenology**

*level:* III *points value:* 4.5 *duration:* full year

*prerequisites:* at least a Pass Division I in each of two Level III subjects offered by the Department

*corequisites:* an additional Level III subject offered by the Department.

*assumed knowledge:* Level II

*contact hours:* 4 hours of lectures/tutorials per week. Students are also expected to spend at least 10 hours a week for 1 semester or equivalent on their project.

*content:* The subject comprises a small research project to be undertaken during the 4th year of the course under the supervision of a staff member in the Department. Students wishing to undertake a research project should consult the Subject Coordinator before the beginning of the 4th year.

*assessment:* Literature review, research proposal, seminar.

### **8469 Sensory Science**

*level:* III *points value:* 3 *duration:* semester 2

*prerequisites:* 6976 Biomathematics and Statistics, 5896 Introductory Winemaking.

*assumed knowledge:* Level II

*contact hours:* 2 hours of lectures and 4 hours of practicals per week

*content:* Physiology of taste and olfaction; acidity, sweetness and bitterness; introductory psychophysics, scaling methods, score cards, sensory interactions in olfaction and taste; physiological and psychological factors affecting perception; context effects; discrimination testing; descriptive analysis, consumer testing; sensory impact of grape derived compounds, fermentation, other microbiological processes, oak treatment and ageing; judging of wine for style and quality; elements of good sensory practice.

*assessment:* written exam and tasting exams.

### **1045 Sensory Science V**

*level:* III *points value:* 1.5 *duration:* semester 1

*prerequisite:* 5896 Introductory Winemaking

*contact hours:* 2 hours of lectures and 4 hours of practicals per week

*content:* Functioning of physiological receptors, interactions of tastes and aromas, factors affecting sensory perception, introduction to evaluation of juices and wines, discrimination testing, descriptive analysis, the effect of oenological and viticultural practices on juice and wine sensory properties, introduction to wine types and styles.

*assessment:* written exam and tasting exam, written assignments and practical reports

### **2580 Stabilisation and Clarification**

*level:* III *points value:* 3 *duration:* semester 1

*prerequisites:* 5896 Introductory Winemaking

*assumed knowledge:* Level II

*contact hours:* 2 hours of lectures and 4 hours of practicals per week

*content:* Principles and practices of wine clarification and stabilisation. Protein, tartrate, metal, colour, oxidative, and microbiological stability of wine. Wine clarification by means of settling, centrifugation, filtration and fining.

*assessment:* includes practicals, reports, written assignments and written exams

### 5412 Table and Drying Grape Production

*level:* III *points value:* 1.5

*duration:* first half of semester 1

*availability:* even years from 1996

*prerequisites:* 1242 Viticultural Science or 5882 Horticultural Science

*assumed knowledge:* Level II

*contact hours:* 6 hours per week including field trips

*content:* Tablegrape production: varieties; genetic improvement; vineyard design; techniques to improve tablegrape quality particularly crop load adjustment and growth regulators; harvesting and handling including maturity standards, harvest methods, packing, post-harvest handling, marketing.

Dried grape production: climatic requirements, principles of grape drying; treatments to enhance drying; dried grape product types; preparation for harvest; harvesting and handling of fresh grapes for drying and trellis dried fruit; finish drying and dehydration; classing, processing and marketing.

*assessment:* assignments and written exam

### 5903 Vegetable Crops

*level:* III *points value:* 3 *duration:* semester 1

*availability:* odd years only.

*prerequisites:* 9339 Agricultural Botany.

*contact hours:* 2 hours of lectures and one 4-hour practical per week

*content:* Vegetable crops are categorised according to commercially important families. Primary and secondary centres of diversification, cytogenetics, commercially important genes, species identification, propagation, managerial, pest and disease control, harvesting and storage. Practicals and visits to horticultural enterprises are included.

*assessment:* exam (75%), assignments (25%)

### 7708 Viticultural Engineering and Operations

*level:* III *points value:* 3 *duration:* semester 2

*prerequisites:* 1242 Viticultural Science or 5882 Horticultural Science

*contact hours:* 6 hours per week

*content:* Machinery operation and application of agricultural chemicals—safety procedures, acts and regulations. Power and torque, engine characteristics, power transmission, traction: hydraulics. Introduction

to electronics. Buildings and services. Trellis and fence design, load characteristics, stress analysis. Principles and practices of vineyard operations including tractor and machinery operation, spray equipment calibration and spray application. Trellis construction. Irrigation system operation. Pruning and propagation. This subject includes visits to commercial vineyards.

*assessment:* assignments, tutorials, practicals and written exams

### 3113 Winemaking

*level:* III *points value:* 3 *duration:* semester 1

*prerequisites:* 5896 Introductory Winemaking.

*corequisites:* 4880 Cellar Management, 2580 Stabilisation and Clarification

*assumed knowledge:* Level II

*contact hours:* 2 hours of lectures and 4 hours of practicals per week

*content:* A major winemaking project will be utilised to integrate knowledge of fermentation techniques, decision making involved in wine production and quality control programs.

*assessment:* written assignments and written examination.

### 5974 Winery Engineering III

*level:* III *points value:* 3 *duration:* semester 1

*prerequisites:* 9100 Engineering Science.

*contact hours:* 6 hours per week

*content:* The first law of thermodynamics, the refrigeration cycle, components of refrigeration systems, heat transfer, fermentation loadings, carbon dioxide properties, nitrogen properties, winery gas systems, steam properties and winery steam systems, pasteurisation, centrifugation and filtration.

*assessment:* to be advised

### 1958 Wine Packaging and Quality Management

*level:* III *points value:* 3 *duration:* semester 2

*availability:* odd years only

*prerequisites:* 2580 Stabilisation and Clarification.

*assumed knowledge:* Level II

*contact hours:* 2 hours of lectures and 4 hours of practicals/field trips per week

*content:* Science and technology of bottling and packaging systems including chemical and physical properties of packaging materials, principles of filling

machinery; design and process control of wine filling/packaging systems.

Wine and food laws and commercial forces as quality standards. Taints and residues in grapes and wine, as quality issues. Approaches and systems of quality management using the wine industry as a focus, including the development of corporate quality cultures, standards and specifications, measurement for quality assurance, process and performance analysis methods, quality accreditation. Visits will be made to commercial plants.

**assessment:** practicals, reports, written assignments and written exams

# Bachelor of Applied Science (Agriculture)

## Syllabuses

### Level I

#### 7447 Agricultural Experience I

*level:* I    *points value:* 3    *duration:* full year

*contact hours:* 40 days practical agricultural experience; 12 three-hour demonstrations; 5 days agricultural business experience

*content:* Students are rostered on agricultural enterprises where skills and knowledge in the practice of agriculture are developed. Practical demonstrations on a broad range of farm enterprise operations are presented and involve students in developing their skills and knowledge. Students are required to negotiate 5 days work experience with an agribusiness company which provides a service to the rural industry.

*assessment:* to be advised

#### 9812 Agricultural Production Systems

*level:* I    *points value:* 3    *duration:* semester 1

*contact hours:* 6 hours per week

*content:* An introduction to agriculture is given within a systems framework. Topics include: the concepts and issues of sustainable agriculture; the evolution of Australian farming systems; understanding weather systems; extensive livestock systems (sheep, beef); intensive livestock systems (dairy, pigs, poultry, horses); pasture systems; cropping systems and tillage, rotations and weed management; horticultural systems; exotic alternatives (deer, emu, etc); organic farming and agroforestry.

*assessment:* to be advised

#### 9520 Biology A

*level:* I    *points value:* 3    *duration:* semester 1

*assumed knowledge:* Year 12 Maths IS, or Stage 2 Maths 1 or equivalent

*contact hours:* 6 hours per week.

*content:* This subject covers the following topics: introduction to phylogeny and classification, taxonomic principles; cell structure and mitosis and meiosis; characteristics of life—nutrition, growth, reproduction, respiration, excretion, irritability; DNA, RNA and protein synthesis, enzymes; genetics—Mendelian genetics, gene interaction, linkage, sex determination, population genetics, natural selection, evolution; the characteristics of viruses, Monera,

Protista, Fungi, Plantae, Animalia; the structure and anatomy of agricultural plants and animals.

*assessment:* practical reports (20%); practical exam (20%); theory exam (60%)

#### 6976 Biomathematics and Statistics

*level:* I    *points value:* 3    *duration:* semester 2

*syllabus details:* see Bachelor of Agricultural Science

#### 8420 Chemistry and Introductory Biochemistry A

*level:* I    *points value:* 3    *duration:* semester 1

*assumed knowledge:* Stage I/Year 11 Chemistry

*contact hours:* 3 lectures, 1 tutorial and 3 hours of practical work a week

*content:* A study of the chemistry and biochemistry relevant to current agricultural practices including: pH and buffers; oxidation and reduction reactions with reference to nitrogen compounds, chemistry of superphosphate and potash; electrochemical series and metal activity; photochemistry; chemical composition and chemical properties of plant and animal products — sugars, fats and proteins; chemistry of the major classes of pesticides; hydrocarbon fuels.

*assessment:* to be advised

#### 7557 Communications and Learning A

*level:* I    *points value:* 3    *duration:* semester 1

*contact hours:* 6 hours per week

*availability:* continuing students only

*content:* Communications in theory and practice: why communicate? why study communication? Methods of studying communications, communications models, feedback; report and letter writing; format, style, framework, informal and formal communications, non-verbal communication; writing for the media, speaking, including public speaking, preparation of material for groups and experience in other media such as audio and video tapes, slides, charts, aids and standards required for reports. The learning process: principles, learning as distinct from being taught, information searching, extracting and recording, general study skills. Word processors: software characteristics, introduction to usage. Electronic information transfer: systems and packages available, where to go for skills development.

*assessment:* to be advised

### 5708 Farm Skills IA

level: I points value: 1.5 duration: full year

availability: repeating students only

prerequisites: Students should have a South Australian Class I Drivers Licence endorsed to Class 2 for on-campus use.

contact hours: 26 days of practical work experience and 13 three hour demonstrations

content: Practical experience—students are rostered for work experience on all farm enterprises where basic skills and knowledge in production agriculture are developed. Farm Operations—practical demonstrations on a broad range of farm enterprise operations are presented and involve students in developing their skills. Enterprise production – assignments in cropping, dairying and pig and poultry production develop students' knowledge and skills in enterprise production analysis.

assessment: to be advised

### 9762 Farm Skills IB

level: I points value: 1.5

duration: full year including non-teaching weeks and summer vacation

availability: repeating students only

prerequisites: Students should have a South Australian Class I Drivers Licence endorsed to Class 2 for on-campus use.

contact hours: 25 days' practical work experience., five days' practical work with an agribusiness company

content: Practical experience students are rostered for work on all farm enterprises where skills and knowledge in all areas of production agriculture are further developed. Agribusiness work experience—students are required to negotiate 5 days' work experience with an agribusiness company which provides a service to the rural industry.

assessment: to be advised

### 1151 Microbiology and Entomology A

level: I points value: 3 duration: semester 2

assumed knowledge: 9520 Biology A, 8057 Biology INR or equivalent

contact hours: 6 hours per week

content: Microbiology: biology of bacteria, algae, protozoa, fungi, viruses, platyhelminthes and nematodes. Systems to be studied include antibiotics, the rhizosphere, fresh and waste water, and the release of genetically engineered micro-organisms.

Entomology: topics include classification, external and internal anatomy, insect reproduction and life cycles, insect feeding relationships, insect behaviour, predators, parasites and pathogens.

assessment: Microbiology: theory exam (35%), practical reports (15%). Entomology: theory exam (30%), insect collection (20%)

### 3283 Soils

level: I points value: 3 duration: semester 2

syllabus details: see B.App.Sc. (Natural Resources Management)

## Level II

### 6937 Agricultural Experience II

level: II points value: 3 duration: full year

contact hours: 13 week days of agricultural experience; 6 weekend days of agricultural experience; 6 one hour tutorials; 14 days off-campus farm experience

content: Students are rostered on agricultural enterprises where skills and knowledge in the practice of agriculture are developed. Student involvement on weekends includes taking responsibility for the operation of enterprises. Students are involved in the management of issues of their elective enterprise and are required to undertake a problem solving contract which addresses one of the issues and provides practical recommendations. Students are required to undertake 14 days off-campus work experience on an approved farm. Students may be required to participate in a tour program which will provide them with the opportunity to evaluate forms of agricultural productivity, research and management practices.

assessment: to be advised

### 8556 Agronomy IIB

level: II points value: 3 duration: semester 1

availability: continuing students only

assumed knowledge: 9812 Agricultural Production Systems

contact hours: 3 lectures per week and 3 hours of practical work per week

content: The use of climatic indices in the selection and management of dryland crops and pastures. Pasture establishment, pastures in a cropping rotation, annual and perennial pasture legumes and grasses, fodder conservation, grass-legume relationships in pastures, pasture management. Small seeds production and harvesting. Seed cleaning and grading. Storage and

longevity of seeds. Certification and seed testing aims and procedures. Seeds legislation, including Plant Variety Rights. Perennial pastures in the higher rainfall areas. An introduction to the principles and practices of cereal crop production. Tillage practices - conventional, minimum tillage, weed control, crop nutrition, rotations and reduction in disease carryover. Integration of crop and livestock enterprises.

*assessment:* to be advised

### 8637 Biochemistry and Plant Science A

*level:* II *points value:* 3 *duration:* semester 2

*availability:* from 1996 available to Level I students and continuing students only at Level II

*prerequisites:* 8420 Chemistry and Introductory Biochemistry A; 9520 Biology A.

*contact hours:* 2 lectures and 1 four hour practical a week

*content:* Biochemistry of the synthesis and utilisation of foodstuffs including photosynthesis (C<sub>3</sub> and C<sub>4</sub> plants), and photorespiration, nitrogen assimilation and protein synthesis, fat metabolism, mobilisation of seed reserves during germination including malting. Plant physiological processes important in growth including ion uptake, transpiration and translocation, photomorphogenesis and photoperiodism, senescence and seed development; the role of growth regulators and strategies utilised to cope with environmental stress. Molecular biological approaches to plant improvement.

*assessment:* to be advised

### 9548 Business Systems A

*level:* II *points value:* 3 *duration:* semester 1

*contact hours:* 3 hours of lectures and 2 hours of tutorials per week

*content:* the aim of this subject is to provide perspective and understanding of the overall role of business and its place in the agricultural industry and the economy and to demonstrate linkages between various management functions. Aspects covered include what is business?, business management, business planning, accounting management, marketing management, strategic planning, budgeting, investment analysis, organisational design, human resources management and monitoring.

*assessment:* assignments and tutorial exercises 40%, three hour final examination 60%

### 5039 Business Systems B

*level:* II *points value:* 3 *duration:* semester 2

*contact hours:* 5 hours of lectures and tutorials per week

*assumed knowledge:* 9548 Business Systems A

*content:* a systems approach to the principles of accounting, budgeting, financial mathematics and marketing as it applies to the management of a farm or related business. **Accounting:** financial and management accounting as an information system, concepts and skills relevant to single and double entry accounting up to Profit and Loss Statement and Balance Sheet Methods of budgeting appropriate to agricultural businesses, their uses and variance analysis, computer spreadsheets as aids to budgeting. **Financial Mathematics:** purpose of financial management, NPV, IRR, DCF, annuities. Spreadsheet financial functions and other computer-based financial decision support. **Marketing:** Development of the marketing concept, market analysis, market segmentation, targeting and positioning, product, pricing, promotion and distribution strategies, elementary marketing plans.

*assessment:* assignments and tutorial exercises 60%, three hour final examination 40%

### 9100 Engineering Science

*level:* II *points value:* 3 *duration:* semester 2

*syllabus details:* see Bachelor of Agricultural Science

### 5634 Farm Skills IIA

*level:* II *points value:* 1.5 *duration:* full year

*availability:* repeating students only

*contact hours:* 13 days' practical work experience including 6 one hour tutorials with enterprise managers. In addition a minimum of 6 days' work experience with responsibility undertaken on weekends.

*content:* Practical experience—students are rostered to work experience on all farm enterprises where skills and knowledge in all areas of production agriculture are further developed. Student involvement on weekends includes taking responsibility for the operation of enterprises. Enterprise management: Students are involved in management issues affecting their elective enterprise and are required to produce a production/financial analysis report in the second semester.

*assessment:* to be advised

### 8320 Farm Skills IIB

*level:* II *points value:* 1.5

*duration:* non-teaching weeks and summer vacation

*availability:* repeating students only

*contact hours:* 14 days of practical work experience

*content:* Practical experience – students are required to undertake off-campus work experience on an approved farm. Business operations and management - students are required to prepare a full report on the physical environment and layout of the farm, annual operation program and management methods.

*assessment:* to be advised

### **5636 Nutrition, Breeding and Health of Farm Animals**

*level:* II    *points value:* 3    *duration:* semester 2

*assumed knowledge:* 6739 The Physiology of Farm Animals

*contact hours:* 6 hours per week

*content:* This subject deals with the following topics: Animal nutrition: methods of investigation; evaluation of feeds—digestibility, energy content, protein, feeding standards for maintenance and growth; minerals and vitamins; voluntary feed intake; properties of common feeds. Animal genetics and breeding technologies: genetic and environmental variation; qualitative and quantitative characteristics; correlations; heritability; selection aids, breeding programs, selection differential and generation interval; manipulation of breeding strategies. Animal health: introduction to animal health; causes of disease and response of body to disease, control of animal disease. Epidemiology with reference to some diseases in grazing animals. Animal behaviour: phylogeny and classification of behaviour, behavioural patterns of importance to production; stress, animal welfare and welfare codes.

*assessment:* to be advised

### **1028 Principles of Sustainable Agriculture**

*level:* II    *points value:* 6    *duration:* full year

*contact hours:* 2 lectures, 1 tutorial, and 3 hour practical per week

*assumed knowledge:* 9812 Agricultural Production Systems or 2247 Agriculture Environment and Society

*content:* Agricultural production faces increasing pressure to be more productive, profitable, efficient and sustainable. Principles of Sustainable Agriculture provides the scientific basis for agriculture to meet these challenges. Through the application of principles, for example water use efficiency or nutrient cycling, it will be demonstrated that the goals of profitability and sustainability need not be in conflict. Practicals will aim to provide experience in the application of principles under realistic farming conditions. The subject will explore the concept of sustainability, and evaluate farming systems in terms of productivity, efficiency, stability, and social and economic equity.

Topics covered will include: agroclimatology, plant growth, morphology and phenology, crop and pasture agronomy, water use efficiency, plant nutrition, plant relations, plant community dynamics, weed management systems, pasture-animal interactions, crop rotations, tillage, indicators of sustainability, economics and geography of production systems. A range of crop and pasture species will be used to illustrate principles. Knowledge and skills introduced in this subject may be further developed in a range of core and elective level III subjects.

*assessment:* to be advised

### **1858 Social Systems**

*level:* II    *points value:* 3    *duration:* semester 2

*syllabus details:* see Bachelor of Agricultural Business

### **6739 The Physiology of Farm Animals**

*level:* II    *points value:* 3    *duration:* semester 1

*assumed knowledge:* 9520 Biology A; 8420 Chemistry and Introductory Biochemistry A

*contact hours:* 6 hours per week

*content:* Animal physiology: the tissues; physiology of the major systems including skeletal and muscular, circulatory, respiratory, digestive, excretory, nervous, endocrine, reproductive and immune; environmental physiology.

*assessment:* to be advised

## **Level III**

---

### **3384 Agricultural Seminars II**

*level:* III    *points value:* 2    *duration:* full year

*contact hours:* 5 two hour sessions per semester

*content:* Throughout the year agricultural seminars on a wide range of topics are given by a number of off-Campus and on-Campus people. Students and staff who attend the seminars are encouraged to question seminar speakers and discuss points raised by the speakers.

### **1536 Agroforestry**

*level:* III    *points value:* 3    *duration:* semester 2

*contact hours:* 2 hours of lectures plus associated practical work and excursions per week

*content:* The focus of this subject is the practical application of agroforestry in low and high rainfall environments in Australia. It also exposes students to agroforestry as it is practised elsewhere in the world.

The subject is presented in an agroecosystem framework. Topics include: the management of trees/shrubs for timber, fodder and other products; agroforestry for the control of salinity and ground water, soil erosion, and habitat management; practical tree establishment, maintenance and harvest; ecological interactions in agroforestry systems; the effect of shelter on crop, pasture and animal productivity, planning agroforestry on the farm; modelling agroforestry systems; agroforestry research and development in Australia; agroforestry in developing countries.

*assessment:* theory exam (60%), practical exam (10%), assignments (30%)

#### 1446 Agronomy IIIA

*level:* III *points value:* 3 *duration:* semester 2

*assumed knowledge:* 8556 Agronomy IIB

*contact hours:* 3 lectures per week and 4 hours of practical per fortnight

*content:* The principles and practices of cereal grain legume, oilseed and summer fodder crop production. Fodder trees and shrubs; special-purpose temperate crops as renewable energy sources. The design and maintenance of farming systems with crop and pasture components; recent trends including the Potter Farm Plan and the organic/biodynamic farming movement. Environmental considerations: soils, climate, water; species and cultivar selection; crop water requirements, including monitoring for moisture stress and salinity effects; use of models for irrigated crop management; integration of irrigation into farming systems; cultural practices; irrigation scheduling, ways in which irrigation can enhance marketing flexibility and profitability.

*assessment:* to be advised

#### 7246 Basic Irrigation A

*level:* III *points value:* 3 *duration:* semester 1

*assumed knowledge:* 9100 Engineering Science

*contact hours:* 6 hours per week

*content:* Topics to be studied include: evapotranspiration and soil moisture budget, crop requirements (peak rate and crop factor), adjustment for salinity (leaching fraction), sprinkler and dripper characteristics, sprinkler and dripper layout, hydraulics of pressure irrigation systems.

*assessment:* to be advised

#### 4784 Beef, Sheep and Goat Production A

*level:* III. *points value:* 3 *duration:* semester 2

*assumed knowledge:* 5636 Nutrition, Breeding and Health of Farm Animals for B.App.Sc.(Ag.) students

(may be taken in the same semester). B.Agric.Sc. students: contact subject coordinator.

*contact hours:* 3 lectures, 1 tutorial and 1 two hour practical per week

*content:* This subject will encompass grazing management of beef cattle, sheep and goats; management of the oestrous cycle, field applications of artificial insemination and embryo transfer; welfare and welfare codes for extensive livestock; factors affecting fibre growth and wool quality; aids to selection including Breedplan and Woolplan; assessment of beef cattle and sheep using Ausmeat language; computer aids to livestock production, the design and operation of cattle, sheep and goat yards. Local and export markets for beef, lamb, mutton, goat meat, wool, cashmere and mohair.

*assessment:* assignments (10%), seminars (20%), practical reports (40%), exams (30%)

#### 2644 Business Systems C

*level:* III *points value:* 3 *duration:* semester I

*contact hours:* 5 hours of lectures and tutorials per week

*assumed knowledge:* 9548 Business Systems A

*content:* Financial management: Ratio analysis, risk and return analysis, decision trees, investment planning and management, debt and credit management. Economics and Policy: Principles of production economics, market models, agricultural prices, structure of the Australian economy, the role of agriculture in the Australian economy, international trade, comparative advantage, exchange rates, monetary and fiscal economic policies, equity, efficiency, welfare and market failure.

*assessment:* assignments, seminars and tutorial exercises 50%, 3 hour final examination 50%

#### 3507 Crop Agronomy

*level:* III *points value:* 3 *duration:* semester 1

*availability:* from 1997

*contact hours:* 2 lectures and 3 hour practical per week

*assumed knowledge:* 1028 Principles of Sustainable Agriculture or 2847 Agricultural Production and Economics

*content:* Crop Agronomy builds on knowledge and concepts of crop science introduced in Principles of Sustainable Agriculture. Cereal, oilseed and crop legumes make a significant contribution to the Australian economy, yet their productivity is in general well below the achievable potential. Crop agronomy will examine how climatic factors such as radiation, temperature and water deficits affect adaptation of crops in different environments with Australia.

Specific information on the production, management, utilisation and marketing of temperate cereal, oilseed and legume crops will be covered. Current issues such as agronomic management packages required to produce specific quality products for new niche markets will also be covered. Topics covered will include climatic constraints to crop production, soils, nutrition, cultural practices affecting crop production, agronomic principles and practices for cereal, oilseed and crop legumes, and principles of irrigation management for field crop production.

*assessment:* to be advised

### **8165 Dairy Production A**

*level:* III *points value:* 3 *duration:* semester 1

*prerequisites:* 5636 Nutrition, Breeding and Health of Farm Animals.

*contact hours:* 6 hours per week

*content:* Composition of the dairy herd, feeding practices and management of dairy calves, vealers, replacements, dry stock, milking cows and bulls. Selection of replacements, selection of sires, enhancing reproductive performance of the herd, herd health, factors affecting milk production and composition. Herd dynamics. Milking procedure and hygiene, evaluation of alternative dairy animals. Milk production from, and management of dairy goats and dairy sheep. Integration of dairy enterprises in farming systems. Gross margins of typical dairy enterprises of cattle, goats and sheep.

*assessment:* to be advised

### **6603 Fruit and Nut Crops**

*level:* III *points value:* 3 *duration:* semester 2

*availability:* odd years only

*syllabus details:* see under Bachelor of Agricultural Science.

### **6213 Horticultural Marketing A**

*level:* III *points value:* 3 *duration:* semester 2

*contact hours:* 3 hours per week

*content:* Appropriate application of general marketing management theory to horticultural commodities and products in the light of the requirements of specific horticultural marketing systems and with an emphasis on international markets. Preparation and class presentation of marketing plans, in both academic case and real world contexts, at the level of the individual firm, horticultural industry and geographic region. Strategic analysis of topical issues as they occur.

*assessment:* to be advised

### **1018 Horticultural Production**

*level:* III *points value:* 3 *duration:* semester 2

*availability:* even years only

*syllabus details:* see Bachelor of Agricultural Science

### **5882 Horticultural Science**

*level:* III *points value:* 3 *duration:* semester 1

*syllabus details:* see Bachelor of Agricultural Science

### **4534 Insect Biological Control**

*level:* III *points value:* 3 *duration:* semester 2

*syllabus details:* see Bachelor of Agricultural Science

### **7338 Integrated Catchment Management III**

*level:* III *points value:* 3

*availability:* not offered in 1996

*syllabus details:* see Bachelor of Applied Science (Natural Resource Management)

### **5478 Integrated Pest Management A**

*level:* III *points value:* 3 *duration:* semester 1

*prerequisites:* 1151 Microbiology and Entomology A, 9520 Biology A.

*contact hours:* 6 hours per week

*content:* This subject provides a coordinated introduction to the theory and practice of crop protection from diseases, pests and weeds using cultural, genetic, biological and agrichemical control methods and will serve as a basis for more specialised subjects. Topics considered are: the development, regulation and usage of pesticides. Environmental safety and fate of pesticides in ecosystems. Control of insects. The types of insect pests. Strategies and tactics for managing insect pests (biological, cultural, genetic and chemical control). Integrated pest management. Economics of managing insect and other crop pests. Control of Plant Diseases. The diagnosis of disease. Chemical control of fungi and nematodes. Strategies and tactics for managing disease outbreaks (biological, cultural, genetic and chemical methods of control). Control of Weeds.. Strategies and tactics for managing weed infestations (biological, cultural and chemical control). Integrated weed management.

*assessment:* to be advised

### **8561 Irrigation Systems Design A**

*level:* III *points value:* 3 *duration:* semester 2

*assumed knowledge:* 7246 Basic Irrigation A, or 3066 Irrigation Science

*contact hours:* 6 hours per week

*content:* This subject includes techniques of irrigation system design further to those studied in Basic Irrigation A, particularly including computer-aided design methods. Students will be given a series of design exercises in which they will be provided with appropriate information (soil, climate, crop, topography and water supply characteristics) and given the task of producing a suitable irrigation system design.

*assessment:* to be advised

### **3434 Mineral Nutrition of Plants**

*level:* III *points value:* 3 *duration:* semester 1

*syllabus details:* see Bachelor of Agricultural Science

### **1981 Pasture Agronomy**

*level:* III *points value:* 3 *duration:* semester 2

*availability:* from 1997

*contact hours:* 2 lectures and 3 hour practical per week

*assumed knowledge:* 1028 Principles of Sustainable Agriculture or 2847 Agricultural Production and Economics

*content:* Pasture Agronomy builds on knowledge and concepts of pasture science introduced in Principles of Sustainable Agriculture. Pastures play an important role in maintaining productivity and sustainability of current farming systems and yet the general status of pastures remains well below potential productivity. Pasture Agronomy will examine current issues in pasture management such as legume decline, the role of grasses in ley pastures, and soil processes under pastures. Topics covered will include pasture plant adaptation to soil factors, manipulation of botanical composition, grazing management of pastures, seedbank ecology, pasture seed production, genetic variability and evolution in pasture plants, persistence of pasture plants, monitoring of pasture performance, management of pests, weeds and disease in pastures and the economics of pasture improvement. Examples will be drawn from the cereal-livestock zone, permanent high rainfall pastures and irrigated pastures.

*assessment:* exam 60%; practical reports 30%; review and essays 10%

### **2514 Pig and Poultry Production A**

*level:* III *points value:* 3 *duration:* semester 1

*prerequisites:* 5636 Nutrition, Breeding and Health of Farm Animals for B.App.Sc.(Ag.) students. B.Ag.Sc. students: Contact subject coordinator.

*contact hours:* 4 lectures and 2 hours of practical work per week

*content:* The influence of the environment on the production of housed animals social environment, temperature, humidity, ventilation and light; control of environment for production. Male and female reproduction in avian species. Housing requirements, housing types and equipment; management and nutrition pigs (young stock, growers and breeders) and poultry (replacement stock, layers, broilers and breeders); processing of feedstuffs and preparation of proprietary feeds methods, equipment storage, anti-nutritive factors, feed additives, least-cost ration formulation; breeding systems and selection; methods of handling, treating and disposal of wastes, the economics of pig and poultry production; other forms of meat production.

*assessment:* assignments (20%) practical reports (20%), exams (60%)

### **3104 Principles and Practice of Extension**

*level:* III *points value:* 3 *duration:* semester 2

*assumed knowledge:* 7517 Farm Business Communication, or 7557 Communications and Learning A

*contact hours:* 2 lectures and 1 tutorial

*content:* The aim of this subject is to apply principles of business communication and negotiation to the pool of knowledge associated with rural people and their businesses. The scope, purpose, structure and function of extension groups around the world are examined. Other aspects examined are: methods of influencing behaviour; extension ethics; extension methods; program planning; evaluation of extension programs; credibility, empathy, rapport; commercialisation of field-based farm services and the communication of agricultural technology in differing countries around the world.

*assessment:* exam seminar and written assignments

### **8340 Project/Case Study**

*level:* III *points value:* 4 *duration:* full year

*assumed knowledge:* completion of the first and second years of the course

*contact hours:* No formal contact hours. Students work independently with supervisor and/or co-supervisor.

*content:* Each student is to undertake an individual project of significant size which exhibits original investigation, analysis and interpretation, and which results in the production of a well-written and well-presented report. The project may comprise a major literature review (of at least 8,400 words), a research project, a case study of a business or related enterprise, or some other approved study.

**2631 Project/Case Study (Additional)**

*level:* III    *unit value:* 2    *duration:* full year

*assumed knowledge:* completion of the first and second years of the course

*contact hours:* No formal contact hours. Students work independently with supervisor and/or co-supervisor.

*content:* as for 8340 Project/Case Study but with a minimum word limit for a literature review of 12,600

**4988 Remote Sensing and Land Capability Assessment A**

*level:* III    *points value:* 3    *duration:* semester 1

*syllabus details:* for details of content and assessment see the entry for 9462 Remote Sensing and Land evaluation in the Bachelor of Agricultural Science.

**8581 Sociology of Agricultural and Social Change**

*level:* III    *points value:* 3    *duration:* semester 1

*syllabus details:* see Bachelor of Agricultural Business

**1570 Soil Ecology and Element Cycling**

*level:* III    *points value:* 3    *duration:* semester 1

*syllabus details:* see B.App.Sc. (Natural Resources Management)

**1936 Soil Management and Conservation**

*level:* III    *points value:* 3

*duration:* semester 1 (Waite Campus); semester 2 (Roseworthy Campus)

*syllabus details:* see Bachelor of Agricultural Science

## Bachelor of Applied Science (Natural Resources Management)

### Syllabuses

#### Level I

##### 2247 Agriculture, Environment and Society

level: I points value: 3 duration: semester 1

syllabus details: see Bachelor of Agricultural Science.

##### 8057 Biology INR

level: I points value: 3 duration: semester 1

prerequisites: Previous study of biology is not assumed. However, previous or concurrent study of chemistry is necessary.

contact hours: 3 lectures and 1 tutorial per week and 3 hours of practical work per fortnight

content: This subject is an introduction to cell biology that will form the basis for your later subjects in biology. It traces the development of life from its chemical origins, via cells through to multicellular organisms. The subject covers cell biology, including cell structure and how cells undertake the functions of membrane transport, fixing and using energy and reproducing by cell division. The discipline of genetics is introduced and the molecular basis of DNA replication and transcription is covered. The evolution of eukaryotes is reviewed and examples of how cells function in multicellular organisms are discussed.

assessment: final written exam; laboratory reports; essay; tutorial participation

##### 6976 Biomathematics and Statistics

level: I points value: 3 duration: semester 2

syllabus details: see under Bachelor Agricultural Science.

##### 7151 Chemistry IHA

level: I points value: 3 duration: semester 1

assumed knowledge: Stage 2 Chemistry and Physics

contact hours: 3 lectures and 1 tutorial a week; and a minimum of 5, up to a maximum of 10, 3 hour practical sessions

content: An introduction to general chemical ideas, the chemical basis of the properties of materials and biological systems, and to the chemistry of the environment. Electronic theories of bonding and the

structure of molecules, crystals and metals. Chemical energetics, chemical equilibria, acids and bases, electrochemistry and surface chemistry. Rates of chemical reactions. General organic chemistry.

assessment: end of semester exam (80%), laboratory work assessed during practical classes (20%)

Further details given during the preliminary lecture.

##### 1775 Field Studies IA

level: I points value: 3 duration: semester 1

contact hours: 1 full day (6 hours) per week

content: This subject covers a range of techniques for recording and analysing environmental data: animal capture and measurement; fauna handling and maintenance; radio-telemetry; plant propagation techniques; electronic data management and analysis; soil analysis and mapping; aquatic sampling.

assessment: reports, portfolios, seminars and field aptitude

##### 1151 Microbiology and Entomology A

level: I points value: 3 duration: semester 2

syllabus details: see Bachelor of Applied Science (Agriculture).

##### 7911 Plant and Animal Diversity

level: I points value: 3 duration: semester 2

prerequisites: 8057 Biology INR.

contact hours: 6 hours per week

content: The subject is an introduction to the diversity of form and function in higher plants and animals. Topics include: the taxonomic hierarchy applied to plants and animals, characteristics of selected taxa, the use of identification keys, structure and function of leaves, roots, stems and flowers, vertebrate anatomy.

assessment: theory (60%); practicals/assignments (40%)

##### 3283 Soils

level: I points value: 3 duration: semester 2

corequisites: other Level I subjects in B.App.Sc. (Nat.Res.Man't.) and the B.App.Sc. (Ag.) courses.

*assumed knowledge:* Matriculation with Science subjects

*contact hours:* 2 lectures and 4 hours of practical (or equivalent) per week

*content:* The aim of the subject is to provide an understanding of the composition, genesis, classification and distribution of soils, the processes important to soil fertility and the principles of soil conservation. The major topics considered are: soil materials: organic, inorganic components of soils and their influence on soil properties and land use. Physical, chemical and biological properties of soils: soil structure, infiltration, storage and movement of water, salinity, chemical fertility, cation and anion exchange, soil biology. Soil conservation: wind and water erosion, causes and effects of erosion, land evaluation, methods of controlling degradation and erosion, reclamation.

*assessment:* exam, essay, tutorials and practical assignments

## Level II

### 7931 Biometry

*level:* II *points value:* 3

*duration:* semester 2 (for students in B.App.Sc.(N.R.Man't))

*syllabus details:* see Bachelor of Agricultural Science

### 2184 Community Ecology

*level:* II *points value:* 3 *duration:* semester 2

*prerequisites:* 8057 Biology INR.

*contact hours:* 3 hours lectures, 4 hours practical per week, including a vacation field camp

*content:* The subject examines major ecological principles applied at community and ecosystem levels and demonstrates these with reference to Australian ecosystems. At community level topics are: concepts of community, detection and delineation of communities, community organisation, succession, species diversity measures, response to disturbance, and the stability/diversity controversy. Theory is applied in practical work covering quantification of vegetation, sampling systems, image-based and ground survey, numerical classification, temporal survey, habitat definition and assessment, and conservation evaluation. At ecosystem level structural and functional components of ecosystems are analysed, leading to examination of energy transfers, primary and secondary productivities, ecological efficiency, nutrient movements and budgets and ecosystem dynamics.

*assessment:* theory (60%), practicals/assignments (40%)

### 5051 Extension and Sociology II

*level:* II *points value:* 3 *duration:* semester 2

*contact hours:* 2 lectures, 1 tutorial

*content:* Introduction to scientific variables, the political system, agriculture in Australian history, agricultural ecology, agribusiness (national and international), family, community, women in agriculture. The setting, scope, objectives and functions of people and organisations involved in agricultural extension; comparative agricultural extension systems (Australian compared with overseas). Ethics in advising, professional liability, adult education objective setting and evaluation in agricultural extension. Experience in personal communications, presentation of seminars, writing a press release, preparing a radio talk (or videotape).

*assessment:* theory (60%); practicals/assignments (40%)

### 4113 Field Studies IIA

*level:* II *points value:* 3 *duration:* semester 2

*prerequisites:* 1775 Field Studies IA

*assumed knowledge:* Level I

*contact hours:* six hours per week

*content:* This subject builds on techniques presented in Field Studies I. The subject presents students with problems requiring logic and problem solving ability. More advanced techniques used in the analyses and recording of environmental data are presented to the students. The subject allows small groups of students (4-6) to work closely with an academic staff member, exposing students to a research environment. This subject allows students to focus on a particular area of interest common with the streams of the degree.

*assessment:* project report.

### 1498 Introduction to Environmental Systems II

*level:* II *points value:* 3 *duration:* semester 1

*contact hours:* 3 hours of lectures and 2 hours of tutorials per week

*content:* This subject presents the students with an introduction to the theory and principles of systems theory as it applies to the description, investigation and eventual management of environmental systems. The fundamental principles that govern the structural integrity and the functional activity of all environmental systems are described. A conceptual model of an environmental system is developed in terms of the storage, transfer and transformation of matter and/or energy, in accordance with the Laws of Thermodynamics. This conceptual model is then used to develop universally applicable strategies for the investigation, analysis and management of all environmental systems, spanning the full continuum

from wilderness areas to environmental systems that have been severely modified by Man.

*assessment:* theory (60%); practicals/assignments (40%)

### **6514 Introduction to Geographic Information Systems**

*level:* II *points value:* 3 *duration:* semester 2

*availability:* repeating students only

*prerequisites:* 8231 Resource Mapping and Survey.

*contact hours:* 3 hours of lectures and 4 hours of practical per week

*content:* Types of geographical information systems—vector and raster based; data input; editing and display; spatial modelling including map overlay, geographic registration, buffering and interpretation; concepts, structure and introductory usage of Arc/Info; digital elevation models; integration of GIS with remote sensing data; case histories of GIS application to natural resource management problems. Students gain experience in the use of both raster and vector GIS on personal computers.

*assessment:* theory (60%), practicals/assignments (40%)

### **4217 Plant and Animal Adaptations**

*level:* II *points value:* 3 *duration:* semester 1

*prerequisites:* 7911 Plant and Animal Diversity

*contact hours:* 6 hours per week

*content:* This subject deals with the physiological and anatomical adaptations of higher plants and animals to life in different environments. Particular emphasis is placed on: adaptations of plants to light, water stress, salinity and temperature extremes, adaptations of animals in regard to osmoregulation and thermoregulation, reproduction, nutrition and digestion.

*assessment:* theory (60%), practicals/assignments (40%)

### **6254 Population Ecology**

*level:* II *points value:* 3 *duration:* semester 1

*prerequisites:* 8057 Biology INR.

*contact hours:* 3 hours of lectures and 1 hour of tutorial per week, 4 hours of practical per fortnight will include a vacation field camp

*content:* This subject aims to provide a theoretical and practical understanding of the ecology of populations. Topics covered include: demographic attributes of populations which illustrate the structure, organisation

and dynamic nature of populations (including density, natality, mortality, survivorship, dispersal); the adaptive nature of these attributes in terms of for example, life-history strategies; models of population growth and regulation; and the nature of interspecific interactions. Theoretical principles are combined with practical work to investigate the methodology of population surveys with particular regard to fauna populations and their utilisation of the environment.

*assessment:* theory (60%), practicals/assignments (40%)

### **8231 Resource Mapping and Survey**

*level:* II *points value:* 3 *duration:* semester 1

*contact hours:* 2 hours of lectures and 1 hour of tutorial per week, 4 hours of practical per week

Some practicals are conducted in the field.

*content:* Introduces students to a range of mapping, surveying and remote sensing techniques and their application to natural resource surveys, and develops practical skills in map and remote imagery interpretation, basic surveying techniques and preparation of plans for resource survey; practical application of equipment and techniques used in surveying to exercises involving traversing, siting and contouring; construction of original thematic maps from image interpretation and ground survey; review of the theory and use of vertical air photos and their application in natural resource surveys; an introduction to the sources and nature of remotely-sensed imagery and the principles of earth-electromagnetic radiation interactions.

*assessment:* theory (60%), practicals/assignments (40%)

## **Level III**

---

### **4840 Aboriginal Australia III**

*level:* III *points value:* 6 *duration:* semester 2

*restriction:* 9774 Aboriginal Land Use and Management

*syllabus details:* see Bachelor of Arts

### **9774 Aboriginal Land Use and Management III**

*level:* III *points value:* 3 *duration:* semester 1

*restriction:* 4840 Aboriginal Australia III

*availability:* consult Head of the Department of Environmental Science and Rangeland Management.

*contact hours:* to be advised

*content:* This subject examines contemporary land use and land management by Aboriginal peoples through exploration of contemporary and traditional land use and management, social systems, land beliefs, and their interdependence; contemporary goals, problems and resources common to land use and management by different Aboriginal peoples, operation of Lands Councils and implications of Land Rights legislation; appropriate ways to approach and work effectively with contemporary Aboriginal organisations, authorities and communities; comparative studies in land science.

The syllabus includes land belief, social systems, diversity of management practices, diversity of economic systems, land use, impacts of European settlement and practice, response to European settlement and practice, Aboriginal achievement, Aboriginal organisations, Land Rights legislation and processes, contemporary land use and management, working with Aboriginal organisations and communities.

### 4129 Behavioural Ecology III

*level:* III *points value:* 3

*availability:* not offered in 1996

*prerequisites:* 4565 Community Ecology, 6076 Population Ecology

*contact hours:* 6 hours per week

*content:* The subject adopts an evolutionary approach towards the investigation and interpretation of animal behaviour. It introduces the theory and practice of cost-benefit analysis and ecological energetics in investigating the adaptive functions of specific behaviours.

*assessment:* combination of theory exams and assignments

### 9273 Conservation Biology

*level:* III *points value:* 3 *duration:* semester 2

*prerequisites:* 6254 Population Ecology, 2184 Community Ecology

*contact hours:* 2 hours of lectures, 1 hour of tutorial and 3 hours of practicals per week

*content:* This subject deals with key biological characteristics of native plant and animal species which influence their survival in increasingly disturbed and fragmented habitats. Topics include reproduction and renewal, population genetics, plant-animal interactions, habitat management, approaches to research, models of succession in environments prone to recurrent disturbance (eg, fire, flood, cyclone), continuous disturbance, persistence, dispersal, recruitment, life histories, fragmentation. Some emphasis is given to the forests and woodlands of the

sclerophyll land systems, but examples are taken from other systems when appropriate.

*assessment:* theory (60%); practicals/assignments (40%)

### 8271 Crop and Pasture Ecology

*level:* III *points value:* 3 *duration:* semester 2

*availability:* odd years only

*syllabus details:* see Bachelor of Agricultural Science

### 1387 Ecological Modelling

*points value:* 3 *duration:* semester 2

*restrictions:* 2422 System Models and Decision Support Systems; 6327 Ecosystem Modelling for Environmental Biologists

*prerequisites:* 7931 Biometry

*contact hours:* 2 hours of lectures, one 4 hour practical

*content:* Applied statistics for ecological modelling: empirical and theoretical distribution of ecological data, empirical equations, multi-variate statistics (methods and case studies)

The ecosystem concept: functional units of ecosystems, food-webs, conceptual models of terrestrial, aquatic and combined ecosystems.

Mathematical models of ecosystems: types and potentials for ecosystems simulation and control.

Input-output modelling of ecosystems: approach and case studies.

Autonomous deterministic models: growth kinetics and population dynamics of up to 4 species with competition, cooperation and predation.

Non-autonomous models of ecosystems: food-webs, nutrient cycles.

*assessment:* practicals/assignments (25%) and written examinations (75%)

### 5852 Ecology and Management of Freshwater Systems III

*level:* III *points value:* 3 *duration:* semester 1

*prerequisites:* 2184 Community Ecology

*restrictions:* 8896 Freshwater Ecology

*contact hours:* 2 lectures per week and 40 hours of laboratory practical classes and/or field day trips

*content:* An advanced level subject focusing on principles of inland waters ecology and the management of surface water bodies. The syllabus covers physical, thermal, optical and chemical properties of fresh water and the distinctive characteristics of Australian water bodies. Topics addressed are: stratification and its influence on water

quality, communities and their composition, primary and secondary production, eutrophication, nutrient budgets, effects of pollutants, biological monitoring. Standing and running water bodies are contrasted.

*assessment:* project (50%); exam (50%)

### 1134 Ecology and Management of Rangelands

*level:* III *points value:* 3 *duration:* semester 2

*prerequisites:* 2184 Community Ecology, 6254 Population Ecology.

*contact hours:* 3 hours per week plus 7-day field camp

*content:* Physical resources: landforms, geology; geomorphology, soil, climate, hydrology. Biological resources: plant and animal communities, changes in distribution as a result of grazing pressure and changed fire regimes, feral animals – their status, distribution and impact. Social aspects: tourism, Aborigines and European inhabitants, land use and alternative concepts of multiple and joint use. Rangeland management, including tools for managers. Management of pastoral leases in South Australia.

*assessment:* theory (60%); practicals/assignments (40%)

### 4697 Economics of Resource Management III

*level:* III *points value:* 3 *duration:* semester 2

*availability:* in 1996 this subject forms part of Level II and Level III of the course. From 1997 it will be part of Level II

*contact hours:* 3 hours of lectures and 1 hour of tutorials/seminars per week

*content:* Principles of strategic management. Paradigms of environmental management in development. Environmental ethics. Principles of micro-economics as they relate to the allocation, use and management of natural resources. Causes of market failure; and opportunities and scope for market intervention and control. Management for sustainable stocks and flows – renewable and exhaustible resources. Time preference, discount rates, and the economics of resource management over time. Development, preservation and conservation. Alternative techniques for valuing environmental resources.

*assessment:* assignments and exam (100%)

### 1699 Environmental Chemistry III (NR)

*level:* III *points value:* 3 *duration:* semester 2

*prerequisites:* 7151 Chemistry IHA

*contact hours:* 2 hours lectures and 4 hours practicals each week

*content:* The aims of this subject are to introduce the student to the environmental chemistry of air, water and soil pollutants. Topics covered include the environmental impact of acid rain, ozone depletion and atmospheric photochemistry. Biogeochemical cycles of selected elements are described, and students are shown how to use system modelling software Stella<sup>R</sup> to model processes governing environmental fate. Sources and speciation of selected metals and the effect of speciation on toxicity is also described. Ecological buffering capacity is discussed. Wastes and their management are considered along with various disposal strategies.

Chemical ecology particularly the chemistry of insect pheromones and the role of allelopathic compounds is outlined.

*assessment:* theory (60%); practicals and assignments (40%)

### 9296 Environmental Impact Assessment

*level:* III *points value:* 3

*availability:* not offered in 1996

*prerequisites:* 8231 Resource Mapping and Survey, 2184 Community Ecology.

*contact hours:* 2 hours of lectures and 2 hours of tutorials per week

*content:* The purpose, legal requirements and administrative procedures of Impact Assessment in Australia. The methods of identifying, predicting, measuring, weighting and assessing the impacts of different types of proposals. Checklists, matrix and network techniques and their derivatives. Quantification and ranking systems, social impact assessment and cost benefit analysis. Design of impact studies, sources of data, sampling, monitoring and use of models. Public involvement procedures and decision-making techniques. Case study of a recent impact statement.

*assessment:* theory (60%); practicals/assignments (40%)

### 8305 Environmental Law III

*level:* III *points value:* 3

*availability:* not offered in 1996

*contact hours:* 2 lectures per week and 1 three hour workshop per fortnight

*content:* The Australian legal system, sources of law, institutions of law and their roles; Common Law origins and relevance to environmental law; the Australian Constitution; partitioning of State and Commonwealth responsibilities; relative roles in

environmental management. The legislative process. Case studies of major areas of environmental legislation: flora, fauna and environmental conservation, land management, heritage, land use planning, coastal management, water resources, mining, Property law and land tenure, the impact of tenure on land management. Environmental protection agencies, charter and effectiveness, operation.

*assessment:* essays, seminar and exam

#### **4234 Environmental Toxicology**

*level:* III *points value:* 3 *duration:* semester 1

*prerequisites:* 7151 Chemistry IHA

*contact hours:* 2 lectures and 4 hours of practicals per week

*content:* The goals of this subject are to provide students with an understanding of the fate, consequences and assessment of toxicants in environmental and biological systems. Classes of environmental toxicants discussed include pesticides, air and water pollutants, food-borne toxicants and heavy metals. The properties of toxic chemicals which influence their distribution and transformations and the action of environmental forces which affect toxicant breakdown and accumulation are discussed. Students are introduced to the principles of toxicology necessary for an understanding of the environmental consequences of toxicants.

*assessment:* theory (60%); practicals and assignments (40%)

#### **1096 Expert Systems in Environmental Management**

*level:* III *points value:* 3 *duration:* semester 1

*restrictions:* 2422 Systems Models and Decision Support Systems

*contact hours:* 2 hours of lectures and one 4 hour practical per week

*content:* The design and development of expert systems, with specific reference to their application as decision-support aids for environmental resource management.

Topics covered include: the distinction between numeric and knowledge-based models; applications suited to the development of an expert system; knowledge representation techniques; knowledge processing and reasoning; expert systems as hybrid decision-support systems for environmental resource management.

*assessment:* includes practical, assignments and written examination

#### **7083 Fauna Management III**

*level:* III *points value:* 3 *duration:* semester 1

*prerequisites:* 6254 Population Ecology, 4217 Plant and Animal Adaptations

*contact hours:* 3 hours of lectures and 1 hour of tutorial per week

*content:* The subject deals with the management of captive and wild populations. Topics covered include: the reasons for management; conflicts between man and wildlife; the philosophical rationale for maintaining captive collections; management of diseases; development of ecologically-based management strategies for the purpose of conservation, commercial harvesting and pest control; management of captive collections; legal and administrative framework

*assessment:* theory (60%); practicals/assignments (40%)

#### **4774 GIS for Environmental Management**

*level:* III *points value:* 3 *duration:* semester 1

*availability:* from 1997

*prerequisites:* 8231 Resource Mapping and Survey

*corequisites:* 4988 Remote Sensing and Land capability Assessment A

*assumed knowledge:* Level II

*contact hours:* 2 lectures and 4 hours practical per week

*content:* This subject covers the types of Geographical Information Systems (GIS) used for environmental management and monitoring. The subject has a strong emphasis on spatial modelling and database design. Modelling techniques include Venn and Boolean overlays, buffering and digital elevation models; temporal simulation modelling using GIS is also covered. Relational and object oriented database concepts are introduced. Students gain experience in the use of both raster and vector GIS and the relational database Oracle. Case histories of GIS applications to natural resource management problems are presented throughout the subject.

*assessment:* based on practical report assignment and written examination

#### **7499 Individual Studies A**

*level:* III *points value:* 3 *duration:* semester 1

*prerequisites:* credit level in at least one relevant Level II subject, and approval by Senior Course Adviser. Only one Individual Studies subject can be credited towards the B.App.Sc. (NRM).

*contact hours:* individual or small group contact on a regular weekly basis

*content:* This subject is to enable students as individuals or small teams to undertake a laboratory or field-based research project, a literature review, and/or essays relevant to natural resource management. The objectives and nature of the program will be determined through consultation with the Senior Course Adviser as Subject Coordinator.

*assessment:* to be determined (in consultation) in each case

### **2990 Individual Studies B**

*level:* III *points value:* 3 *duration:* semester 2

*prerequisites:* credit level in at least one relevant Level II subject, and approval by Senior Course Adviser. Only one Individual Studies subject can be credited towards the B.App.Sc. (NRM).

*contact hours:* individual or small group contact on a regular weekly basis

*content:* This subject is to enable students as individuals or small teams to undertake a laboratory or field-based research project, a literature review, and/or essays relevant to natural resource management. The objectives and nature of the program will be determined through consultation with the Senior Course Adviser as Subject Coordinator.

*assessment:* to be determined (in consultation) in each case

### **7014 Individual Studies C**

*level:* III *points value:* 6 *duration:* full year

*prerequisites:* credit level in at least one relevant Level II subject, and approval by Senior Course Adviser. Only one Individual Studies subject can be credited towards the B.App.Sc. (NRM).

*contact hours:* individual or small group contact on a regular weekly basis

*content:* This subject is to enable students as individuals to undertake a major laboratory or field-based research project, a literature review, and/or essays relevant to natural resource management. The objectives and nature of the program will be determined through consultation with the Senior Course Adviser as Subject Coordinator.

*assessment:* to be determined (in consultation) in each case

### **4534 Insect Biological Control**

*level:* III *points value:* 3 *duration:* semester 2

*syllabus details:* see Bachelor of Agricultural Science

### **7338 Integrated Catchment Management III**

*level:* III

*points value:* 3

*availability:* not offered in 1996

*prerequisites:* 4349 Introduction to Environmental Systems or equivalent.

*assumed knowledge:* completion of second year

*contact hours:* 2 hours of lectures and 2 hours of tutorials per week

*content:* Conflicts in land use; functions of land, definitions and classifications of land; spatial characteristics and processes of land and landscapes; boundary processes in landscapes. Disturbances of components and processes by land use. Land management systems for both single and multiple use. Assessment and planning techniques.

*assessment:* theory (60%); practicals/assignments (40%)

### **5478 Integrated Pest Management A**

*level:* III *points value:* 3 *duration:* semester 1

*syllabus details:* see Bachelor of Applied Science (Agriculture)

### **6497 Integrated Spatial Information Systems**

*level:* III *points value:* 3 *duration:* semester 2

*prerequisites:* 6514 Introduction to Geographic Information Systems.

*contact hours:* 2 lectures and 4 hours of practicals per week

*content:* Principles of advanced spatial data processing and techniques. Classification of remotely sensed data and integration with GIS for thematic map production, modelling and analysis of environmental change. Data transfer mechanisms between GIS and image analysis systems. Quantitative relationships between remote sensing data and ground data: regressions, structural models, calibrations and multivariate models. Spatial model development and design. Applications of the combined technologies to resource mapping and simulation modelling. Advanced relational database techniques. Pattern analysis and hypothesis generation using PATN. Integration of GIS and expert systems to facilitate Intelligent GIS, use of expert systems in image classification. Advanced vector algorithms and network analysis using ARC/INFO. Future development in GIS technology and design.

*assessment:* theory (60%); practicals/assignments (40%)

### 5214 Recreation Management III

level: III points value: 3

availability: not offered in 1996

contact hours: 3 lectures per week and 1 two hour tutorial per fortnight. Field work approximately 2 hours per week towards project

content: Definitions and cultural perspectives: leisure and work, leisure and the community. The environmental context of recreation, outdoor recreation in urban parks, rural areas, national parks, tourism; the extent and demand for outdoor recreation and tourism; impact of recreation on natural systems, determination and monitoring of impact; management and planning for recreation in natural environments; concepts of ecological and perceptual carrying capacity and their measurement; planning and policy; government in recreation.

assessment: project (50%); exam (50%)

### 4988 Remote Sensing and Land Capability Assessment A

level: III points value: 3 duration: semester 1

syllabus details: see Bachelor of Applied Science (Ag.)

### 1570 Soil Ecology and Element Cycling

level: 3 points value: 3 duration: semester 1

pre-requisites: 3283 Soils or an acceptable equivalent

restrictions: 6470 Soil Fertility; 4633 Soil Biology and Biochemistry; 3434 Mineral Nutrition of Plants

contact hours: 2 lectures, 4 hours practical work (or equivalent) per week

content: The aim of the subject is to provide an understanding of the distribution and cycling in the biosphere of the major elements important for plant growth. It will consider the roles of soil organisms and the processes involved in cycling in natural environments, and how these are influenced in managed ecosystems. Nutrient acquisition by plants will also be considered.

The following topics are included. Element pools and flows: major element pools in the atmosphere and the mechanisms of transfer between the pools, cycles of carbon and nutrient elements in the soil-plant system.

Roles of organisms in nutrient cycling: important taxonomic and functional groups of organisms, processes carried out by organisms, importance of succession and cooperation in biodegradation, nutrient acquisition, roots and the rhizosphere, symbiotic associations.

Mineral nutrition of plants: mechanism of nutrient uptake including special modifications for particular environments.

assessment: exams (65%); practical work and tutorials (25%); essay (10%)

### 1936 Soil Management and Conservation

level: III points value: 3

duration: semester 1 (Waite Campus) semester 2 (Roseworthy Campus)

syllabus details: see Bachelor of Agricultural Science

### 7023 Vertebrate Pest Control III

level: III points value: 3

duration: summer semester and semester 1

quota: will apply

prerequisites: 4217 Plant and Animal Adaptation, 6254 Population Ecology.

contact hours: 10 days during the summer vacation

content: This subject, presented in conjunction with the Animal and Plant Control Commission, strongly emphasises the field application of vertebrate pest control techniques and provides the theoretical bases for these techniques. Topics covered are the biology and ecology of vertebrate pests; the damage caused by pest animals; the legislative and administrative aspects of vertebrate pest control; district organisations; extension; vertebrate pest control practice.

assessment: theory (60%); practicals/assignments (40%)

## Bachelor of Applied Science (Honours)

### Syllabuses

#### 9438 Honours Agronomy and Farming Systems (B.App.Sc.)

#### 3662 Honours Agronomy and Farming Systems (B.App.Sc.)(mid Year Intake)

*level:* Honours *duration:* full year

*prerequisites:* At least a credit standard in appropriate Level II and III stream subjects to the value of 9 points offered by the department or special permission of the Head of Department.

*requirements:* Candidates are expected to acquire a more detailed knowledge than is required in the ordinary degree. They are required to complete successfully 12 points of course work including 6495 Research Methodology (4 points) and two of the following 4-point Level IV subjects: 6363 Crops & Pastures, 1581 Dryland Farming Systems, 1328 Extensive Livestock, 1058 Rural Sociology, 2793 Social Psychology, 7518 Communications and Agricultural Extension, 8597 Agricultural Engineering. In addition, candidates are expected to study more deeply one branch of Agronomy and Farming Systems, by undertaking research to the value of 12 points in this field and to present the results in a written thesis and through the presentation of a seminar.

*assessment:* The research thesis and associated seminars comprise 50% of the final grade. The assessment of the remainder of the course will be as presented in the subject descriptions.

#### 1164 Honours Animal Science (B.App.Sc.)

*level:* Honours *duration:* full year

*prerequisites:* a Credit or higher standard in at least two Level III subjects approved by the Head of Department.

*requirements:* A candidate will be required to undertake a research project (12 points) and take additional course work (12 points) relevant to the research project. The course work will usually consist of four Level III subjects including Control of Animal Function plus at least 1 other subject offered by the Department of Animal Science for the B.Ag.Sc. degree. Remaining 2 subjects will be at the discretion of the Head of Department. In the Department of Animal Science, candidates can undertake the research work for their honours degree in one of the following areas: Animal Reproduction, Production, Wool Biology, Immunology, Molecular Biology, Rumen

Microbiology, Animal Genetics, Cell Biology, Biotechnology. The candidate will present oral reports and a thesis on research work undertaken during the year under the supervision of one or more members of the academic staff.

Intending candidates should consult the Head of Department and potential supervisors during the final year of the ordinary degree and be prepared to begin studies in the Department at the beginning of February.

*assessment:* the research thesis and associated seminars comprise 50% of the final grade. The assessment of the remainder of the course will be as presented in the subject descriptions.

#### 5556 Honours Agricultural Business (B.App.Sc.)

*level:* Honours *duration:* full year

*prerequisites:* at least a credit in appropriate Level III subjects offered by the Department of Agricultural Business or equivalents acceptable to the Head of Department.

*content:* Candidates are expected to acquire a more detailed knowledge than is required in the ordinary degree. Candidates are expected to undertake a substantial research project on a topic acceptable to the department (points value 12). They are required to complete successfully 12 points of course work including 6946 Research Methodology and Methods and 7376 Economics for Agricultural Business. The remaining two level IV subjects will be at the discretion of the Head of Department.

*assessment:* research project thesis and seminar (50%); coursework subjects (50%)

#### 1983 Honours Crop Protection (B.App.Sc.)

*level:* Honours *duration:* full year

*prerequisites:* a credit or higher standard in at least two Level III subjects approved by the Head of Department.

*requirements:* A candidate will be required to undertake a research project (12 points) and take additional course work relevant to the research project. The course work will usually consist of four Level III subjects from those listed by the Department in the Schedules for the B.Ag.Sc. degree but, at the discretion of the Head of Department, subjects from another department may be accepted. In the Department of

Crop Protection, students can undertake research work for their honours degree in one of the following areas: Entomology, Plant Pathology, or Weed Science. The candidate will present oral reports and a thesis on research work undertaken during the year under the supervision of one or more members of academic staff.

Intending candidates should consult the Head of the Department and potential supervisors during the final year of the ordinary degree and be prepared to begin studies in the Department at the beginning of February.

*assessment:* average of four Level III subjects (50%); research project and thesis (50%)

**6513 Honours Environmental Science and Rangeland Management (B.App.Sc.)**

**2315 Honours Environmental Science and Rangeland Management (B.App.Sc.) (Mid-year intake)**

*level:* Honours *duration:* full year

*prerequisites:* a credit or higher standard, in two Level III subjects approved by the Head of the Department or with special permission of the Head of Department.

*requirements:* Candidates are expected to acquire a more detailed knowledge of environmental science and rangeland management than is required for the Ordinary Degree. Candidates are expected to study deeply in one branch of environmental science and rangeland management. Candidates are required to carry out research in this field and present a thesis, which constitutes 50% of their assessment. The remaining 50% will be made up of a combination of essays, a seminar, a formal research proposal, a literature review and Level III or IV subjects approved by the Head of Department.

**7624 Honours Plant Science (B.App.Sc.)**

*level:* Honours *duration:* full year

*prerequisites:* a credit or higher standard in at least two Level III subjects approved by the Head of Department.

*requirements:* A candidate will be required to undertake a research project (12 points) and take additional course work (12 points) relevant to the research project. The course work will usually consist of four Level III subjects from those listed by the Department in the Schedules for the B.Ag.Sc. degree but at the discretion of the Head of Department subjects from another department may be accepted. In the Department of Plant Science, candidates can undertake the research work for their honours degree in one of the following areas: Crop Physiology and Biochemistry, Plant Molecular Biology, Plant Breeding or Biometry. The candidate will present oral reports

and a thesis on research work undertaken during the year under the supervision of one or more members of academic staff.

Intending candidates should consult the Head of the Department and potential supervisors during the final year of the ordinary degree and be prepared to begin studies in the Department at the beginning of February.

*assessment:* average of four Level III subjects (50%); research project/oral presentation (5%) and thesis (45%)

**6495 Research Methodology**

*level:* Honours *points value:* 4 *duration:* semester 1

*prerequisites:* entry to B.App.Sc.(Hons) or to a post-graduate course offered by the Faculty.

*contact hours:* 2 hours lectures per week, plus seminars and a 1 week field study.

*content* This subject introduces students to the research process and aims to stimulate a systems approach to thinking, writing and communicating. It covers topics such as priority-setting and planning; establishing and designing experiments; data collection and management; statistical analysis; grant application; scientific writing and communication of research results.

*assessment:* theory exam (40%); assignments (35%); practical report (15%); seminar (10%)

# Postgraduate Courses

by research

**Master of Agricultural Science**

**Master of Applied Science**

by coursework

**Graduate Certificate**

**Graduate Diploma**

**Postgraduate Diploma**

**Master**

The above awards have been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar.

As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

## Specific Course Rules

### 1 Admission requirements

- 1.1 An applicant for admission to the course of study for a Graduate Certificate shall have qualified for a degree of the University in an approved field of study, or a degree of another institution accepted for the purpose by the Faculty.
- 1.2 An applicant for admission to the course of study for a Graduate Diploma shall
  - (a) have qualified for a Graduate Certificate of the University in an approved field of study, or an equivalent award of another institution accepted for the purpose by the Faculty, or
  - (b) have qualified for a degree or a three year diploma of the University or an equivalent award of another institution accepted for the purpose by the Faculty.
- 1.3 An applicant for admission to the course of study for a Postgraduate Diploma shall
  - (a) have qualified for a Graduate Certificate of the University in an approved field of study or an equivalent award of another institution accepted for the purpose by the Faculty; or
  - (b) have qualified for a degree or a three year diploma of the University in an approved field of study, or for an equivalent award of another institution accepted for the purpose by the Faculty.
- 1.4 An applicant for admission to the course of study for a Master's degree by coursework shall
  - (a) have qualified for the Bachelor of Agricultural Science (Honours) or the Bachelor of Applied Science (Honours) of the University; or
  - (b) have qualified for a degree or other award of the University in an approved field of study or an award of another institution accepted by the Faculty as being equivalent to the Honours degree. Such an award may be a postgraduate Diploma with a significant research component in the field of study of the proposed research; or
  - (c) have qualified for a Bachelor's degree of the University in an approved field of study or an equivalent award of another institution accepted for the purpose by the Faculty, and

- (i) have completed at a satisfactory standard (normally credit average) work for the Graduate Certificate in the same field of study, or
- (ii) have other relevant practical experience approved by the Faculty.

**1.5** An applicant for admission to the Master of Agricultural Science or the Master of Applied Science shall

- (a) have qualified for an Honours degree offered by the Faculty or its equivalent in an institution accepted for the purpose by the Faculty; or
- (b) have qualified for a Postgraduate Diploma of the University which contained a significant research component in the field of study of the proposed Master's research or an equivalent award in an institution accepted for the purpose by the Faculty; or
- (c) have qualified for a Bachelor's degree of the University in an approved field of study or an equivalent award in an institution accepted for the purpose by the Faculty and have relevant professional experience.

**1.6** Applicants deemed to have a deficiency in some part of their preparation for candidature may be required to complete such other work as may be prescribed during the first year of their candidature.

**1.7** Under the authority delegated to it by Council, the Faculty may, in special cases and subject to such conditions (if any) as it may see fit to impose in each case, accept as a candidate for the Graduate Certificate, the Graduate Diploma or the Postgraduate Diploma a person who does not satisfy the requirements of 1.1, 1.2 or 1.3 above but who has given evidence satisfactory to the Faculty of fitness to undertake work for the Graduate Certificate, the Graduate Diploma or the Postgraduate Diploma.

**1.8** With the approval of the Board of Graduate Studies, the Faculty may, in special cases and subject to such conditions (if any) as it may see fit to impose in each case, accept as a candidate for the Master's degree a person who does not satisfy the requirements of 1.4 or 1.5 above but who has given evidence satisfactory to the Faculty of fitness to undertake work for the Master's degree.

## **2 Qualification requirements**

**2.1** To qualify for the Graduate Certificate a candidate shall present subjects to the value of 12 points (which may not include 6043 Research Proposal or a Research Project) from the Graduate Subject Pool.

A candidate who has been enrolled for the coursework Master's degree, the Postgraduate Diploma or the Graduate Diploma and who as such a candidate has completed the work prescribed for a Graduate Certificate and who has not been awarded the Master's degree, the Postgraduate Diploma or the Graduate Diploma shall, on written application to the Faculty Registrar, be awarded the appropriate Graduate Certificate, subject to the student discontinuing candidature for the higher award.

**2.2** To qualify for the Graduate Diploma a candidate shall present subjects to the value of 24 points, no fewer than half of which are from the Graduate Subject Pool and which may not include 6043 Research Proposal or a Research Project.

A candidate holding a Graduate Certificate of the University who has counted or presented the subjects in the Graduate Certificate towards the requirements of the Graduate Diploma shall surrender the Graduate Certificate before being admitted to the Graduate Diploma.

A candidate who has been enrolled for the coursework Master's degree or the Postgraduate Diploma and who as such a candidate has not been awarded the Master's degree or the Postgraduate Diploma shall, on written application to the Faculty Registrar, be permitted to transfer to the appropriate Graduate Diploma, subject to the student discontinuing candidature for the award of Master's degree or Postgraduate Diploma.

**2.3** To qualify for the Postgraduate Diploma a candidate shall present subjects to the value of 24 points, including, if required, 6043 Research Proposal, 6495 Research Methodology or 7046 Research Methodology and Experimentation; a minimum of six and a maximum of nine points deriving from research; and the balance from the Graduate Subject Pool.

A candidate holding a Graduate Certificate of the University who has counted or presented the subjects in the Graduate Certificate towards the requirements of the Postgraduate Diploma shall surrender the Graduate Certificate before being admitted to the Postgraduate Diploma.

A candidate who has been enrolled for the coursework Master's degree and who as such a candidate has completed the work prescribed for the Postgraduate Diploma and who has not been awarded the Master's degree shall, on written application to the Faculty Registrar, be awarded the appropriate Postgraduate Diploma, subject to the student discontinuing candidature for the higher award.

- 2.4** To qualify for the Master's degree by coursework a candidate shall present subjects to the value of 36 points, including, if required, 6043 Research Proposal, 6495 Research Methodology or 7046 Research Methodology and Experimentation; a minimum of twelve and a maximum of twenty one points deriving from research; and the balance from the Graduate Subject Pool.

Except with the permission of the Faculty, the Master's degree program, if taken full-time, will normally be completed in eighteen months, depending on the nature of the project activity, and over not less than two and not more than five years if taken part-time.

A candidate holding a Graduate Certificate or a Postgraduate Diploma of the University who has presented the subjects in the Certificate or Diploma towards the requirements of the Master's degree by coursework shall surrender the Graduate Certificate or Postgraduate Diploma before being admitted to the Master's degree.

- 2.5** To qualify for the Master's degree by research a candidate must submit a satisfactory thesis on a subject approved by the Faculty and shall adduce evidence acceptable to the Faculty that the thesis is the candidate's own work. The thesis shall give the results of original research on which the candidate has been engaged.

Except on the recommendation of the Faculty and with the approval of the Board of Graduate Studies, the work for the degree shall be completed and the thesis submitted in not less than one year and not more than three years from the date of commencement of the candidature in the case of a full-time candidate or not less than two years and not more than six years from the date of commencement of the candidature in the case of a part-time or external candidate.

note: A candidate who holds an Honours degree of The University of Adelaide approved for this purpose or its equivalent in a university recognised by The University of Adelaide may proceed to the degree of Master of Agricultural Science or Master of Applied Science at the expiration of one year from the date of the candidate's admission to the Honours degree of Bachelor; no other candidate may proceed to the degree before the expiration of two years from the date of the beginning of the candidature.

### **3 Graduate subject pool**

- 3.1** There shall be a Graduate Subject Pool which will include graduate level subjects, approved supplemented level III subjects (either of which may include intensive workshops) and research projects.
- 3.2** The selection of subjects and activities will be made by students in consultation with and with the approval of Postgraduate Coursework Advisers or supervisors. Such selected components
- shall form part of the formal coursework requirements, or
  - may form a preparatory portion of the research degrees.
- 3.3** The following subjects shall comprise the Graduate subject pool:

code	subject title	points
1452	Aboriginal Land Use and Management S	3
4063	Accounting for Agricultural Business	3
4091	Advanced Biometry S	3
9086	Advances in Oenology S	3
1086	Advanced Recombinant DNA Techniques	1.5
8138	Advanced Plant Breeding S	3
6448	Advanced Sensory Practice S	1.5
8424	Advertising and Promotion S	3
1190	Agricultural and Rural Development	3
1042	Agricultural Biotechnology S	3
4953	Agricultural Business Finance G	3
9002	Agricultural Business Management	3
2805	Agricultural Economics and Policy	4
8597	Agricultural Engineering	4
4843	Agricultural Marketing Principles and Strategies	3
1341	Agroforestry S	3
7824	Animal Breeding and Genetics S	3
9477	Animal Cell and Molecular Biotechnology S	3
8225	Animal Diseases and Control S	3
9436	Animal Microbiology and Disease Control	1.5
5574	Animal Nutrition S	3
4141	Animal Production Science S	3
8114	Animal Structure and Function S	3
9259	Animal Welfare	3

*Agricultural and Natural Resource Sciences — Postgraduate Courses*

5088	Biology of Insects S	3	4539	Horticultural Science S	3
3362	Breeding and Genetics of Animals	1.5	7032	Industry Experience (Oenology) S	3
1927	Business Management for Viticulture and Oenology S	3	8962	Insect Behaviour S	3

9022	Strategic Business Management S	3	7382	Project F (ANR)(One Semester)	12
5684	Table and Drying Grape Production S	1.5	7188	Project G (ANR)	21
8409	Topics in Agricultural Business A	3	3661	Project G (ANR)(Mid-year Intake)	21
6492	Topics in Agricultural Business B	3	8200	Natural Resources Project I	4
4945	Topics in Animal Science	3	6846	Natural Resources Project II	12
6826	Topics in Crop Protection	3	<b>3.4</b> Candidates may include, within those subjects presented to qualify for a coursework award, graduate level subjects from outside the Graduate Subject Pool subject to the approval of the Postgraduate Coursework Adviser and the Postgraduate Studies Committee.		
2379	Topics in Soil Science	3	<b>4</b> <b>Status, exemption and credit transfer</b>		
9822	Topics in Soil Science A	3	<b>4.1</b> No candidate will be permitted to count for an award any subject, project work, dissertation or research thesis which, in the opinion of the Faculty, contains substantially the same material as any other subject, project work, dissertation or research thesis which the candidate has already presented for another qualification.		
9508	Topics in Soil Science B	3			
5225	Vegetable Crops S	3			
3008	Vertebrate Pest Control S	3			
9630	Viticultural Engineering and Operations S	3			
7536	Viticultural Production A S	3			
2195	Viticultural Production B S	3			

4.2 A candidate who desires that work completed should be counted towards the requirements of these Specific Course Rules may, on written application to the Faculty Registrar (in the case of the Graduate Certificate, the Graduate Diploma or the Postgraduate Diploma) or the Registrar, Graduate Studies Branch (in the case of the Master's degree by coursework or the Master's degree by research), be granted such exemption from the requirements as the Faculty or the Board of Graduate Studies on the advice of the Faculty shall determine.

## **5 Program approval**

5.1 Every candidate for the Graduate Certificate or the Graduate Diploma in consultation with the Postgraduate Coursework Adviser shall prepare a program of subjects and activities to be submitted for the approval of the Postgraduate Coursework Adviser.

5.2 Every candidate for the Postgraduate Diploma or the Master's degree by coursework in consultation with the Postgraduate Coursework Adviser shall prepare a program of coursework and project work to be submitted for the approval of the Postgraduate Coursework Adviser. The project work shall be under the direction of a supervisor or supervisors who shall normally be members of the academic staff of the University, but an external supervisor may also be appointed.

5.3 Every candidate for the Master of Agricultural Science or the Master of Applied Science shall

- (a) prior to enrolment indicate in general terms the subject of the research work on which the candidate proposes to submit a thesis.
- (b) provide certification from the Head of Department of the intended supervisor that:
  - (i) the applicant has shown evidence of ability to undertake work for the Master's degree;
  - (ii) the proposed research project is appropriate;
  - (iii) there are available members of staff qualified and able to provide supervision of the proposed candidacy throughout its likely duration; and
  - (iv) suitable resources and facilities are available (either in the University or, by arrangement acceptable to the Faculty, elsewhere) for the proposed research to be undertaken.

- (c) complete a structured program of activities within the first twelve months from the commencement of candidature.

Continuation of the candidate's enrolment is conditional upon the completion of the activities to the satisfaction of the department

If the applicant is accepted as a candidate for the degree concerned the Faculty shall appoint at least two supervisors to guide the candidate in the candidate's work.

- 5.4
- (a) Except by permission of the Faculty, the whole of the work for the Master's degree must be completed within the University.
  - (b) Subject to such conditions as it may determine in each case, the Faculty may permit project or research work to be undertaken outside the University provided that it can be satisfied that
    - (i) this will result in academic benefit to the candidate;
    - (ii) there will be adequate contact and interaction between the candidate and the candidate's internal supervisor(s);
    - (iii) the supervisor's access to any experimental work, the candidate's availability for seminars and other discussions, and the publication of results will not thereby be prejudiced.

## **6 Assessment and examinations Coursework Awards**

6.1 There shall be four classifications of pass in each subject in the Graduate Subject Pool: Pass with High Distinction, Pass with Distinction, Pass with Credit, Pass.

6.2 A candidate who fails in a subject and desires to take the subject again shall attend lectures and satisfactorily do such written and practical work as the teaching staff concerned may prescribe, unless specifically exempted therefrom after written application to the Head of Department for such exemption.

6.3 A candidate who has twice failed in any subject may not enrol for that subject again except by special permission of the Faculty and then only under such conditions as may be prescribed.

6.4 A candidate shall not be eligible for examination in a subject unless the prescribed work has been completed to the satisfaction of the teaching staff concerned. A candidate who is not eligible for examination shall be deemed to have failed the examination.

**6.5** For the purpose of this Specific Course Rule a candidate who fails, without a reason accepted by the Dean of the Faculty (or nominee), to attend all or part of a final examination (or supplementary examination if granted) after remaining enrolled for at least nine teaching weeks of that semester, shall be deemed to have failed the examination.

**6.6** On completion of the work for the Postgraduate Diploma or the coursework Master's degree the candidate shall inform the Postgraduate Coursework Adviser concerned and lodge with the Postgraduate Coursework Adviser three copies of the dissertation prepared in accordance with directions given to candidates from time to time.

**6.7** On the submission or re-submission of the dissertation the Faculty shall nominate examiners who shall normally be members of the academic staff of the University, but an external examiner may be appointed. The examiners may recommend that the dissertation

- (a) be accepted subject to such amendments as the examiners may have suggested; or
- (b) be accepted subject to satisfactory oral examination; or
- (c) be not accepted but sent back to the candidate for revision and re-submission; or
- (d) be rejected.

The examiners of a dissertation re-submitted following recommendation (c) above may recommend only (a), (b) or (d) above.

Having considered the reports of the examiners the Faculty shall determine whether the dissertation is satisfactory.

### **Research Awards**

**6.8** On completion of the work for a research Master's degree the candidate shall inform the Head of Department concerned and lodge with the Registrar, Graduate Studies Branch, three copies of the thesis prepared in accordance with directions given to candidates from time to time.

**6.9** On the submission or re-submission of the thesis the Faculty shall appoint two examiners, at least one of whom shall be external to the University, to report on the thesis and any supporting papers which the candidate may submit.

The examiners may recommend that the thesis

- (a) be accepted, with or without conditions; or

- (b) be accepted, with or without conditions and subject to satisfactory performance in an examination, either written or oral or both, in the field of study immediately relevant to the subject of the thesis; or

- (c) be not accepted, but that the candidate be allowed to re-submit it after revision; or

- (d) be rejected.

The examiners of a thesis re-submitted following recommendation (c) may recommend only (a), (b) or (d) above.

Having considered the reports of the examiners the Faculty shall determine whether the thesis is satisfactory.

## **7 Review of academic progress**

**7.1** The progress of each candidate in the Certificate, Diploma and coursework Master's program shall be reviewed by the Faculty each academic year.

**7.2** The progress of each candidate in the research Master's programs shall be reviewed annually and satisfactory progress shall be a condition of re-enrolment. Should the candidate's work be unsatisfactory further review and action shall be taken in accordance with University policies and procedures.

## **8 General**

**8.1** A candidate who complies with the foregoing conditions shall, on the recommendation of the Faculty, be admitted to the certificate, diploma or degree concerned.

## Syllabuses

### notes

- 1 The complete list of subjects in the Graduate Subject Pool is set out in Specific Course Rule 3. Included in the list are supplemented Level III subjects: that is Level III subjects with supplementary requirements; these subjects are distinguished by an 'S' in the title. Syllabus entries have not been included for these subjects. Please refer to the corresponding Level III entry (see index). Additional information will be provided at the first lecture session.
- 2 Not all the subjects listed in the Graduate Subject Pool will be available each year. While every effort has been made to offer accurate information on duration, staffing considerations may necessitate alterations. Information as to which subjects will be offered in a given year will be available from the departments.

### 4063 Accounting for Agricultural Business

*points value:* 3                      *duration:* semester 2

*availability:* internal only

*contact hours:* 1 three hour seminar per week

*content:* The subject covers all aspects of Accounting, ie Financial, Management and Cost. It provides an introduction to the nature, purpose, ethics, and legal aspects of accounting as an information specialisation, with particular emphasis on agricultural businesses. It will also enable students to distinguish, classify and analyse different agricultural costs and cost structures in farm and off-farm businesses. The integrated use of computerised systems and legal principles will be used to cover aspects of decision-making in relation to such factors as pricing, investment, break-even and risk.

*assessment:* written and practical assignments (50%); written 3 hour exam (50%)

### 1086 Advanced Recombinant DNA Techniques

*points value:* 1.5      *duration:* one week in semester 2

*assumed knowledge:* 9503 Molecular Markers in Plant Breeding; or equivalent background knowledge of recombinant DNA methods

*contact hours:* 40 hours

*content:* This subject builds on the basic recombinant DNA methodologies taught in 9503 Molecular Markers in Plant Breeding. The following techniques will be taught: cloning in lambda vectors; construction of DNA library; screening lambda libraries; lambda DNA isolation; DNA sequencing; computer assisted sequence analysis. Lecturers will describe various cloning techniques, methods of clone analysis and application of molecular genetics. The emphasis will be on plant molecular genetics.

*assessment:* work book assessment

### 1190 Agricultural and Rural Development

*points value:* 3                      *duration:* semester 2

*availability:* not offered in 1996

*contact hours:* 1 three hour seminar per week

*content:* This subject aims to provide students with an overview of development theories, development policy and planning, role of institutions and their development, social and cultural aspects, gender and environmental issues. Case studies will be analysed.

*assessment:* as arranged by supervisor/lecturer

### 4953 Agricultural Business Finance G

*points value:* 3                      *duration:* semester 2

*availability:* internal only

*contact hours:* four hours per week

*content:* This subject will focus on techniques for the effective management of finance as relevant to farm and off-farm agricultural business entities. The syllabus covers investment decisions and financing, particularly as they relate to a deregulated and ethical environment in which agricultural businesses need to operate. Topics include purpose of financial management as it applies to national and multinational business activities, Australian and international financial systems particularly the stock and futures markets, time preference, interest rates, and leverage, risk and return analysis and planning, investment planning and management, equity and debt finance management and restructuring, introduction to futures and options. An understanding of recent developments in both domestic and international financial markets, and the contribution that the theory of finance is making to international financial management.

*assessment:* written and practical assignments (50%); written 3 hour exam (50%)

### 9002 Agricultural Business Management

*points value:* 3                      *duration:* semester 1

*availability:* multi-modal

*contact hours:* 1 three hour seminar per week

*content:* The aim of this subject is to provide perspective and understanding of the overall management role, and to demonstrate linkages between various management functions. Aspects covered include business and society, business management, organisational design, entrepreneurship, human resources management, production management, marketing management, accounting management, financial management, information management, business and social ethics, and careers in agricultural business.

*assessment:* written assignments and seminar presentations (100%)

### **2805 Agricultural Economics and Policy**

*points value:* 4      *availability:* not offered in 1996

*content:* Principles of micro-economics using agriculture as the basis. Consumer demands, supply analysis, production relationships, cost analysis. Principles of macro-economics (using the Australian economy as the basis). Role of agriculture in the Australian national economy. Effect of macro-economic policy on the agricultural industry. The framework of agricultural policy formation, the need for government intervention in agriculture. Pricing policy, agricultural policy issues, comparative agricultural policy.

*assessment:* 4 assignments each (25%)

### **8597 Agricultural Engineering**

*points value:* 4      *duration:* full year

*contact hours:* 3 hours per week

*content:* The subject consists of a project, negotiated between the student and the Department of Agronomy and Farming Systems, and assignment and tutorial work as directed by the Department.

Each component is complementary in that the assignment and tutorial work is directed toward the theoretical and analytic basis of the topic in which the project has been selected.

### **4843 Agricultural Marketing Principles and Strategies**

*level:* IV      *points value:* 3      *duration:* semester 1

*availability:* internal only

*contact hours:* 1 three hour seminar per week

*content:* The aim of this subject is to give students an understanding of the principal role of the marketing manager through an introduction to the basic concepts and practices in marketing with particular emphasis on the marketing of agricultural products. The topics covered include the marketing environment, analysing marketing opportunities and associated ethical issues, organising for marketing, product price decisions, channel decisions, physical distribution decisions, communication-promotion, advertising decisions, sales force decisions, and controlling and evaluating marketing programs and marketing plans.

*assessment:* written assignments and reports (50%); written 3 hour exam (50%)

### **9259 Animal Welfare**

*points value:* 3

*duration:* semester 1

*contact hours:* 78 hours

*content:* The aim of this subject is to provide the necessary knowledge and understanding of the scientific and ethical bases of animal welfare and to be able to review objectively the current animal welfare problems in society. It does not seek to change people's minds, but to ensure that they have, or can find, the relevant information and have the required skills of analysis and integration.

The subject addresses animal welfare issues covering a range of disciplines, including biology, veterinary science, medicine, agriculture, philosophy, economics and sociology. It does not include practical animal handling.

The subject will comprise lectures, tutorials and field trips. The two major components, science and ethics are intermingled. In general, the subject develops progressively from simple to complex ethical questions relating to animal welfare.

*assessment:* written assignments and reports (50%); written 3 hour exam (50%)

### **3362 Breeding and Genetics of Animals**

*points value:* 1.5

*duration:* intensive workshop; first or second semester

*restrictions:* 8049 Animal Breeding and Genetics

*assumed knowledge:* degree in Agricultural Science or Science

*contact hours:* 40 hours

*content:* The principles of quantitative inheritance are developed to study the continuing improvement of farm livestock through genetic means. Estimation of breeding values, impact of artificial breeding technologies, use of marker assisted selection and other molecular techniques in Animal Breeding will also be covered.

*assessment:* work book assessment

### **7518 Communications and Agricultural Extension**

*points value:* 4

*duration:* full year

*availability:* external, odd years only

*contact hours:* 3 hours per week

*content:* Theory and models of communication. Language, meaning, culture, written and oral communications. Report writing. Readability. Style in writing. Application of learning and communications theories to the presentation of information. Role of

different extension techniques in the education process. Credibility, empathy and rapport. Communications for various audiences. The scope, purpose, structure and organisation of the agricultural extension services in the different states of Australia. Comparison of the history and underlying philosophy of agricultural extension services in Australia with those of other countries. Organisations and agencies (government and non-government) with a role in agricultural extension. The audience for agricultural extension. Agricultural extension in developing countries. Legal liability in extension. Group process and leadership. The preparation of press articles, tape-recordings, video-tape programs and micro-teaching presentations are included in practical exercises.

*assessment:* assignments

### **6363 Crops and Pastures G**

*points value:* 4 *duration:* full year

*availability:* external, odd years only

*assumed knowledge:* degree in Agriculture

*contact hours:* 3 hours per week

*content:* An advanced subject providing a detailed knowledge of recent technological developments in the production of crops and pastures in southern Australia with particular reference to dryland farming and promoting the ability to conduct field experiments and interpret the results of agronomic research.

The syllabus includes the technology of cereal, grain legume and oil-seed crop production, with particular emphasis on the effects of crop rotations, tillage systems and fertiliser usage on crop production; the selection and evaluation of herbage plants in relation to physical and biological factors in the environment; methods of pasture establishment, management, conservation and utilisation; recent advances in the control and management of weeds, pests and diseases of crops and pastures.

*assessment:* to be advised

### **5264 Current Topics in Animal Diseases**

*level:* Postgraduate *points value:* 3

*duration:* semester 1

*prerequisites:* Undergraduate degree in biological science

*restrictions:* 8225 Animal Diseases and Control S

*contact hours:* 2 hours of lectures and 4 hours of tutorials/practicals per week

*content:* The course will consist of lectures, tutorials and practical classes covering symptoms, causes and effects of production limiting diseases of livestock in

Mediterranean and arid zone climates. The primary focus will be diseases of sheep and cattle, pigs and poultry but other grazing species may be covered if there is a demand. Exotic animal diseases of concern to Australian agriculture will also be covered.

*assessment:* seminar 10%; assignment 20%; tutorial/practical participation 20%; examination 50%.

### **1581 Dryland Farming Systems**

*points value:* 4 *duration:* full year

*availability:* Internal each year. External, even years only

*assumed knowledge:* 1028 Principles of Sustainable Agriculture or equivalent

*contact hours:* 2 lectures/tutorials per week in semester 1 and 4 hours of lectures/practicals per week in semester 2

*content:* The use of a systems approach, within an ecological framework, for the study of dryland farming. The characteristics and operation of various types of dryland farming systems with emphasis on the Australian cereal belt. The principles underlying the integration of crops, pastures and livestock in dryland farming systems. Methods of defining the conditions and practices under which high productivity may be sustained in the major systems of the Australian cereal belt. Methods of evaluating a particular dryland farming system in order to define major limiting factors, interactions and regulating processes, and to suggest ways of improving productivity and sustainability.

*assessment:* to be advised

### **7376 Economics for Agricultural Business**

*points value:* 3 *duration:* semester 1

*availability:* internal only

*contact hours:* 1 three hour seminar per week

*content:* This subject provides a background of economic principles for study of other subjects in agricultural business. The subject is in two parts with a major emphasis on the application of the principles to agricultural related situations:

- 1 Basic tools required in analysing individual and organisational economic decision-making. Topics include: supply and demand analysis consumer equilibrium theory including utility and indifference approaches, production theory; production functions and analysis of short and long-run costs of production, market structures and objectives of the firm, pricing policies and methods, market failure, welfare and public policy issues.

- 2 The workings of the Australian economy in its international context. Topics include: theories of employment, inflation, interest rates and exchange rates; and current policy issues such as the use and abuse of monetary policy, inflation and the foreign debt debate.

*assessment:* written assignments (50%); written 3 hour exam (50%)

### **1756 Economics of Soil Conservation**

*points value:* 1.5 *duration:* between semesters 1 & 2

*prerequisites:* appropriate degree in Science, Agricultural Science or Environmental Science

*contact hours:* one week intensive course

*content:* This subject deals with the basic concepts of environmental economics. Topics covered include resource allocation, public policies and environmental issues, institutional obstacles to environmental change and agricultural pollution. Students will be introduced to use of the SOILEC model for evaluation of soil conservation systems at the farm level..

*assessment:* to be advised

### **5293 Environmental Systems**

*points value:* 4 *duration:* semester 1

*availability:* Internal and external. A minimum of 10 students will be required for this subject to be offered internally in 1996.

*content:* The theory and application of Systems Theory to the study and management of environmental systems. The following topics are included: fundamental principles of systems theory; different types of systems; environmental systems as 'thermodynamic' systems; dynamic changes in environmental systems; management of environmental systems.

### **7682 Ethical Issues in Agricultural Business S**

*level:* IV *points value:* 3 *duration:* semester 2

*prerequisites:* 9002 Agricultural Business Management; 7376 Economics for Agricultural Business; 4843 Agricultural Marketing Principles and Strategies

*contact hours:* 3 hours of seminars and lectures per week

*content:* As for Agricultural Business subject 4203 Ethical Issues in Agricultural Business.

*assessment:* exam (50%); assignments (50%)

### **6228 Extension of Soil Conservation**

*points value:* 1.5 *duration:* part semester 2

*prerequisites:* Appropriate degree in Science, Agricultural Science or Environmental Science

*contact hours:* eight half-day sessions of lectures, tutorials, discussion and seminars

*content:* This subject deals with the principles of extension work as they relate to soil conservation. Topics include the extension process, the basis of adoptive behaviour, the extension agent, the principles and practice of communication and the development of extension programs.

*assessment:* to be advised

### **6632 Extensive Livestock A**

*points value:* 3 *duration:* semester 1

*availability:* External, even years only.

*assumed knowledge:* 1022 Beef, Sheep and Goat Production IA (or equivalent)

*contact hours:* 2 lectures and 1 two hour practical per week

*content:* This subject presents recent developments in animal science and husbandry relevant to extensive animal production. It examines industry organisation, physiology, breeding, health and nutrition. A degree of specialisation will be allowed in sheep, beef cattle or goat production.

### **8749 Farm and Vineyard Business Management**

*points value:* 4 *duration:* full year

*availability:* external, odd years only

*content:* The basic concepts of management as applied to farm/vineyard business units. The role of accounting and other records in business management. Methods of farm/vineyard management appraisal and analysis — the role and limitations of such methods as input-output analysis, budgets, break-even concepts, gross margins, simplified programming, linear programming. Work studies and their role in efficiency. Systems of network analysis. Decision-making processes, risk and uncertainty. Estate management and appraisal, project evaluation. The role and influence of various forms of legal ownership. Investment. Intergeneration transfers of assets; the implications of income tax and other duties and taxes. The role of insurance and assurance.

*assessment:* assignments and exam (100%)

### 2729 Intensive Livestock A

points value: 3

duration: full year

availability: Internal each year. External odd years only

contact hours: 1 lecture and 2 hours of tutorials or practical work per week

content: This subject develops or extends the student's knowledge of the application of the principles and practices of intensive livestock production. The program will involve an examination of the following topics: accommodation of livestock; nutrition; animal behaviour; reproduction and animal breeding; animal health; animal welfare; industry structure and economics of production; marketing; product evaluation; by-product utilisation; alternative forms of meat production.

### 7912 International Business Environment S

points value: 3

duration: semester 2

assumed knowledge: 4843 Agricultural Marketing Principles and Strategies; 9002 Agricultural Business Management; 7376 Economics for Agricultural Business or equivalent.

contact hours: 3 hours of seminars and lectures per week

content: This capstone subject is designed to provide an overview of the international trade and financial environment within which business must function with particular emphasis on the broader Asian region, including the Middle East. It considers comparative advantage and the basis for international trade; factor movement across national boundaries, trade policies such as tariffs, quotas, VERs, administrative regulations, dumping, export subsidies and international commodity agreements; international and regional commercial policies; exchange rate determination; the balance of payments and its adjustment under alternative exchange rate regimes; exchange control; the international currency system; and exchange rate policies.

assessment: exam (50%); assignments (50%)

### 5078 Laboratory Animal Science I

level: Postgraduate

points value: 3

duration: semester 1

availability: from 1997 - in external mode only

prerequisites: Undergraduate degree in biological science

assumed knowledge: Undergraduate degree in biological science

contact hours: 2 hours of lectures, 4 hours of tutorials per week

content: Basic biology of laboratory animals, including taxonomy, anatomy, physiology, nutrition, behaviour. Husbandry and production of laboratory animals, including housing, reproduction, genetic monitoring and animal handling. Legal, ethical and welfare considerations relating to laboratory animal management, including state, national and international regulations and practices; the principles of reduction, replacement and refinement; the Australian Code of Practice.

assessment: presentation of seminar 10%; written project 20%; tutorial/workshop participation 20%; written examination 50%.

### 6454 Laboratory Animal Science II

level: Postgraduate

points value: 3

duration: semester 2

availability: from 1997 - external mode only

prerequisites: 5078 Laboratory Animal Science I

assumed knowledge: Undergraduate degree in biological science

contact hours: 2 hours of lectures and 4 hours of tutorials per week

content: Diseases of laboratory animals, diagnosis, treatment and prevention of diseases, health monitoring. Management, organisation and design of animal facilities, staff management, financial control, design and operation of barrier facilities, containment of microbiological or toxic hazards. Use of laboratory animals in research, models of disease, toxicology studies, surgical models. Transgenic animals and their use, occupational health and safety issues. Statistics and data handling.

assessment: presentation of seminar 10%; written project 20%; tutorial/workshop participation 20%; written examination 50%.

### 9971 Land Evaluation

points value: 4

duration: semester 2

restrictions: 2083 Environmental Geology and Pedology III, 2083 Environmental Geology III, 9000 Soil Classification, 7672 Soil Survey, 9462 Remote Sensing and Land Evaluation, 4988 Remote Sensing and Land Capability Assessment, 4311 Remote Sensing and Land Evaluation S

contact hours: 32 lectures or equivalent and associated practical work presented over four weeks

content: This subject considers the theoretical and practical aspects of the description, classification and

surveys of soils for land resource evaluation and planning for different forms of land use. The subject has a substantial field component.

*assessment:* to be advised

#### **4423 Livestock Farming Systems S**

*points value:* 4                      *duration:* semester 1

*availability:* even years from 1996

*assumed knowledge:* background in agricultural production management comparable to undergraduate degree in applied science or agricultural science

*contact hours:* 5 hours of lectures and 1 tutorial per week

*content:* this subject is designed to encourage students to apply a systems approach to the analysis and planning of the specialist livestock farm in South Australia. The syllabus includes the principles underlying the integration of livestock, pastures and forage crops in the farming system, the relationships between various environmental, economic and biological components of farming systems for the purpose of effective management techniques to evaluate the performance of the livestock farm in terms of its technical and economic sustainability and flexibility. Define major factors limiting performance, plan improvements and alternative management strategies to improve the performance within the constraints imposed upon the farm business, compare the projected performance of the proposed system with performance of current farming policy. Understanding of commodity issues relating to world trade and implications for farm management.

*assessment:* assessment based on farm visit and management reports 80%; report on implications of global issues on farm management 20%

#### **1788 Managing Agricultural Development**

*points value:* 3                      *duration:* semester 1

*assumed knowledge:* degree in agriculture or equivalent

*contact hours:* 1 three hour seminar per week

*content:* The subject aims to provide students with an analytical and structural framework for management of agricultural development in developing countries. It deals with functions, structures and organisation in managing agricultural development. Various types of management, for example financial, information and marketing, are studied which link and involve the production and marketing programs. Applications will be studied, eg credit and input supply, land reform, extension and research. Other aspects include: policy making and agricultural development planning,

management in government and non-government organisations, and participation at the community level.

*assessment:* as arranged by the supervisor/lecturer

#### **3075 Methods in Animal Cell and Tissue Culture**

*points value:* 1.5                      *availability:* not offered in 1996

*assumed knowledge:* degree in Agricultural Science or Science

*contact hours:* 40 hours

*content:* Principles of animal cell culture – behaviour of cells in culture; natural and defined media; isolation procedures; aseptic techniques; use of feeder layers; role of the extracellular matrix; large scale culture methods; explant and tissue cultures; histological and immunological techniques for cultured cells and tissues; production of cell lines. Many of the principles and techniques will be demonstrated by practical session using keratinocyte, lymphocyte and enterocyte cell cultures and culture of hair follicle organoids; biohazards in cell culture.

*assessment:* work book assessment

#### **9351 Microbial Control of Insects and Plant Pathogens**

*points value:* 1.5

*duration:* one week at the end of semester 2

*quota:* 20

*prerequisites:* Bachelor's degree in science, environmental science, agriculture or equivalent; some previous experience with microbiological techniques would be an advantage.

*contact hours:* 35 hours comprising lectures and practical over 5 days

*content:* Basic and applied aspects of the use of viruses, bacteria and fungi in controlling insect pests and plant pathogens. Topics will include characteristics of microbial agents, mode of action, ecology, and the practical application of biological control.

*assessment:* to be advised

#### **9503 Molecular Markers in Plant Breeding**

*points value:* 1.5                      *duration:* one week in semester 1

*assumed knowledge:* degree in Agricultural Science or Science

*contact hours:* 40 hours

*content:* The aim of this subject is to teach the basic principles of recombinant DNA technology with an

emphasis on the application of these techniques to plant breeding. The following techniques will be taught: DNA isolation from plant tissue; restriction digestion and gel electrophoresis; cloning DNA in plasmid vectors; plasmid DNA isolation; Polymerase Chain Reaction; Southern hybridisation; construction of linkage maps. Lectures will cover basic aspects of DNA structure and the organisation of the plant genome, the application of molecular markers to breeding programs and various related recombinant DNA techniques.

*assessment:* work book assessment

### **6627 Molecular Tools for Diagnosis of Plant Pathogens**

*points value:* 1.5

*duration:* one week at the end of semester 2

*quota:* 20

*prerequisites:* Bachelor's degree in Science, Agricultural Science or Environmental Science or equivalent

Some previous experience with techniques in molecular biology would be an advantage.

*contact hours:* 35 hours comprising lectures and practicals over 5 days

*content:* Molecular methods for the sensitive and rapid diagnosis of fungal, bacterial and viral pathogens, using both immunological and nucleic acid probing techniques appropriate for use by plant pathologists.

*assessment:* to be advised

### **5979 Natural Resources Economics**

*points value:* 4

*duration:* semester 2

*availability:* External, odd years only

*content:* Principles of micro-economics as they relate to the use and management of natural resources, causes of market failure in resource allocation and resource use and opportunities for market intervention, introduction to time preference and the economics of resource management over time.

*assessment:* assignment

### **5297 Natural Resources Management**

*points value:* 4

*duration:* semester 2

*availability:* external mode only

*content:* Population pressures and the demand for natural resources are discussed in the historical and current situations; development of a scientific approach to the allocation of resources; the conservation ethic; international, Australian and South

Australian organisations; public participation in management decisions. Decision-making processes for local, South Australian and Australian resources are used as case studies. Environmental law, relationship between international, Australian, State and Local Government laws and regulations.

*assessment:* to be advised

### **8130 Natural Resources Methodology**

*points value:* 4

*duration:* semester 1

*availability:* internal and external. Attendance at a residential school is compulsory. A minimum of 10 students will be required for this subject to be offered internally in 1996

*content:* Demonstrates a wide range of remote sensing and cartographic techniques and applications for surveying a range of environmental components, field verification and survey techniques; practical application to the design and conduct of surveys of vegetation, fauna and soils. Specific application of remote sensing and aerial images to resource inventory and assessment.

*assessment:* to be advised

### **2724 Plant Nutrition for Productive Systems**

*points value:* 1.5

*duration:* one week in semester 1

*restrictions:* 3434 Mineral Nutrition of Plants

*assumed knowledge:* Degree/diploma in Science or Agricultural Science

*contact hours:* 40 hours

*content:* A subject spanning 5 working days of a single week, comprising 10 lectures, 5 tutorials, one 5-hour field trip, and 20 hours laboratory, glasshouse and library work. Topics considered are: symptomatology, diagnosis and prognosis, correction and fertiliser strategies, interactions between nutrients, interactions with other factors in production such as, genotype, disease, herbicide, climate. Contemporary issues: pollution, profitability, role of nutrition in sustainable systems. Experimental methodology.

*assessment:* written work, short presentation.

### **3010 Plant Tissue Culture and Transformation**

*points value:* 1.5

*duration:* one week

*availability:* every year during semester break (early July)

*assumed knowledge:* B.Sc. (Biol)/B.Ag.Sc.

*contact hours:* 8 hours per day

*content:* This course is designed to introduce participants to the basic principles and techniques of

tissue culture and plant transformation. Each day of the course regular periods of time will be devoted to background information, practical training followed by discussion of results and the application of techniques. The topics covered will be:

(1) Basic principles, media composition, selection of growth regulators, explant tissue; (2) In vitro propagation of horticultural plants; shoot multiplication (direct organogenesis); (3) Mass propagation of plants from callus (indirect organogenesis); (4) Out planting; hardening and acclimatisation to soil; (5) Establishment of a cell suspension culture and its maintenance and applications; (6) Plant transformation, using Agrobacterium and direct DNA delivery techniques, its application in functional analysis of genes and genetic engineering of crop plants.

*assessment:* practical reports (40%); final exam (60%)

### 9105 Problems in Agricultural Business A

*points value:* 3                      *duration:* semester 1

*availability:* multi-modal

*contact hours:* as arranged with Head of Department

*content:* This subject will offer the student the opportunity to investigate a problem in the agricultural business area. The problem will relate to the student's study program and the teaching and research interests of staff and visiting academics.

*assessment:* written assignments and oral presentations

### 9281 Problems in Agricultural Business B

*points value:* 3                      *duration:* semester 2

*availability:* multi-modal

*contact hours:* as arranged with Head of Department

*content:* This subject will offer the student the opportunity to investigate a problem in the agricultural business area. The problem will relate to the student's study program and the teaching and research interests of staff and visiting academics.

*assessment:* written assignments and oral presentations

### 4837 Quantitative Methods in Agricultural Business

*points value:* 3                      *duration:* semester 1

*contact hours:* 1 four hour seminar per week

*content:* Financial mathematics – simple and compound interest; the value of money annuities, loans and sinking funds; contracts at flat rates of interest; equations of value, internal rates of return.

Application of micro-computers and software packages in financial calculations and decision-making.

Quantitative methods – mathematical and computer models that aid decision-making in agricultural business, including probability concepts; decision, games and utility theory; linear programming transportation and assignment problems; PERT; queuing; forecasting techniques; computer simulation.

*assessment:* written and practical assignments (50%); written 3 hour exam (50%)

### 6495 Research Methodology

*points value:* 4                      *duration:* semester 1

*prerequisites:* Admission to B.App.Sc.(Hons) or to a postgraduate course offered by the Faculty.

*contact hours:* 2 hours lectures per week, plus seminars and a 1 week field study.

*content:* This subject introduces students to the research process and aims to stimulate a systems approach to thinking, writing and communicating. It covers topics such as priority-setting and planning; establishing and designing experiments; data collection and management; statistical analysis; grant application; scientific writing and communication of research results.

*assessment:* theory exam (40%); assignments (35%); practical report (15%); seminar (10%)

### 7046 Research Methodology and Experimentation

*points value:* 3

*duration:* either (i) semester 1 or (ii) two week workshop during mid-year break

*prerequisites:* Undergraduate degree in Agricultural Science or Science

*assumed knowledge:* First course in Biometry or Introductory Statistics

*contact hours:* either (i) 3 lectures plus 3 hour tutorial per week or (ii) 9–5 Monday to Friday inclusive

*content:* The GENSTAT 5 Statistical Package is introduced and utilised extensively throughout the subject. Revision of basic regression and analysis of variance methodology. A selection of topics from the following: extension of regression (both linear and non linear); design and analysis of complicated multi-factor experiments; fractional replication and confounding; generalised linear models (including probit analysis and logistic regression); cluster analysis; multivariate methods (principal components and coordinates, Hotelling's  $T^2$ , linear discriminant function and factor analysis).

As part of the subject a selection of 'case studies' will be discussed to illustrate the important steps involved during a research program (ie development of aims, setting of hypotheses, design of the experiment, collection of data, analysis and interpretation of results).

*assessment:* written assignment and final written exam

### **6946 Research Methodology and Methods**

*points value:* 3                      *duration:* semester 1 or 2

*contact hours:* 3 hours seminars per week

*content:* This subject familiarises the student with: (1) the methodology of scientific research in agricultural business, ie. the system of rules and procedures on which agricultural business research is based and against which claims for knowledge are appraised; and (2) the methods or techniques commonly used in agricultural business research, including quantitative techniques and computer techniques. Coverage of techniques emphasise the types of problems each technique is suitable for, and the strength and limitations of each technique.. The first half of the subject concentrate on methodology, the second half on methods. Concepts required for writing a research proposal are presented in the first half of the semester. The methods are presented during the second half of the semester. During the second half of the semester, a student completes and successively refines his/her proposal to be presented at the end of the semester.

*assessment:* written assignments and seminar presentations (100%)

### **6043 Research Proposal**

*points value:* 3                      *duration:* semesters 1 or 2

*content:* The proposal will include a review of the relevant literature on a research topic, a justification of the proposal in terms of its academic and, if appropriate, industry value and a summary of the methodology which would be used in the investigation. The candidate will also present a seminar as part of the research proposal.

*assessment:* written report and seminar as arranged by the department

### **1341 Agroforestry S**

*points value:* 3                      *duration:* semesters 1 or 2

*availability:* internal and external

*prerequisites:* admission to honours or to a postgraduate course offered by the Faculty.

*contact hours:* 2 hours of lectures plus associated practical work and excursions per week

*content:* the focus of this subjects is the practical application of agroforestry in low and high rainfall environments in Australia. It also exposes students to agroforestry as it is practised elsewhere in the world. The subject is presented in an agroecosystem framework. Topics include: the management of trees/shrubs for timber, fodder and other products; agroforestry for the control of salinity and ground water, soil erosion and habitat management; practical tree establishment, maintenance and harvest; ecological interactions in agroforestry systems; the effect of shelter on crop, pasture and animal productivity, planning agroforestry on the farm, modelling agroforestry systems; agroforestry research and development in Australia; agroforestry in developing countries.

### **1058 Rural Sociology**

*points value:* 4                      *duration:* full year

*availability:* Internal each year. External even years only

*contact hours:* 3 hours per week

*content:* This subject provides an introduction to sociology and the sociology of agriculture and natural resources. Topics include classical sociological theories, sociology of agriculture, sociology of natural resources, implications for Australian farmers and research methods – their application and interpretation.

*assessment:* assignment

### **2665 Seminars: Agricultural and Natural Resource Sciences**

*level:* postgraduate                      *points value:* 1

*duration:* semester 1 or 2

*prerequisites:* appropriate degree in Science, Agricultural Science, Environmental Science or Agricultural Business

*contact hours:* tutorials/discussions with supervisor by arrangement, or a series of formal seminars/discussions, one per fortnight

*content:* Each student will be required: Either to prepare a substantial seminar paper (3000-5000) words on a specific topic, present the paper to a selected audience and lead/contribute to the following discussion, the topic for the paper being related to but not covered by other subjects taken by the student; Or prepare assignments on a series of formal seminars attended by the student, on current research topics.

*assessment:* written seminar and/or assignment 70%; oral seminar presentation and discussion 30%.

### 2793 Social Psychology

points value: 4

duration: full year

contact hours: 3 hours per week

*content:* Introductory social psychology – educational objectives in learning programs, perception, attitudes, attitude theory and attitude measurement, balanced theories, motivation, needs, wants, goals; groups, group dynamics; principles of educational learning theories, classical conditioning, operant conditioning, Gestalt psychology, cognitive theories, social learning, personality and motivational theories applied to learning, self-concept, defence mechanisms, non-Freudian personality and learning theories, elements of educational psychology, thinking methods and intelligence; adult education, agricultural education; human transactions, conflict resolutions; expectancy, role theory, social psychology of organisations, formal organisations, psychological implications of technological development, application of social psychology to working in developing countries.

*assessment:* to be advised

### 6818 Soil and Land Management

points value: 3

duration: part semester 2

*restrictions:* 4366 Soil Management and Conservation S, 1936 Soil Management and Conservation

*prerequisites:* Appropriate degree in Science, Agricultural Science or Environmental Science

*contact hours:* 24 lectures or equivalent and associated practical work presented over three weeks

*content:* This subject examines various management practices in relation to crop production and the maintenance of the soil resource. The subject has a substantial field component on the assessment of management systems.

*assessment:* to be advised

### 9000 Soil Classification

points value: 1.5

duration: part semester 2

*prerequisites:* appropriate degree in Science, Agricultural Science or Environmental Science

*restrictions:* 9971 Land Evaluation, 2083 Environmental Geology and Pedology III

*contact hours:* 1 week intensive course

*content:* This subject deals with the principles and practice of soil classification, in particular the structure and theory of 'Soil Taxonomy', the *de facto* world soil classification system. Topics covered include soil description and application of soil classification to land evaluation for rural and urban use.

*assessment:* to be advised

### 4900 Soil Conservation A

points value: 6

duration: part semester 2

*restrictions:* 4366 Soil Management and Conservation S, 1936 Soil Management and Conservation, 5026 Soil Fertility S, 6470 Soil Fertility

*prerequisites:* Appropriate degree in Science, Agricultural Science or Environmental Science

*contact hours:* 48 lectures or equivalent and associated practical work

*content:* This subject deals with soil materials, minerals and organic matter and their distribution in soil profiles. It considers soil water and hydrologic cycles, and the various processes involved in physical and chemical degradation of soil *viz* wind and water erosion, salinity, sodicity, acidity and nutrient deficiencies.

*assessment:* to be advised

### 3065 Soil Conservation G

points value: 4

duration: full year

*availability:* external, even years only

Attendance at a residential school is compulsory.

*assumed knowledge:* good basic knowledge of soils

*content:* Historical aspects of human activities on soil erosion, mechanics of wind and water erosion with emphasis on the theoretical aspects of soil structure, rainfall and wind erosivity. Introduction to aerial photographic interpretation with respect to erosion features, classification and production of erosion maps. The use of remote sensing imagery for broad scale erosion mapping. Laboratory techniques for erosion and structural measurements. Introduction to the sociological and legal constraints involved in conservation procedures.

*assessment:* written assignments

### 7672 Soil Survey

points value: 1.5

duration: part semester 2

*restrictions:* 9971 Land Evaluation, 2083 Environmental Geology and Pedology III, 9462 Remote Sensing and Land Evaluation, 4311 Remote Sensing and Land Evaluation S

*prerequisites:* Appropriate degree in Science, Agricultural Science or Environmental Science

*contact hours:* one week intensive course

*content:* This subject examines the theory and practice of soil survey and its role in land evaluation. The scope and limitations of different types of survey will be considered. The subject has a substantial field component in which students will produce their own survey and report.

*assessment:* to be advised

### **8588 Spatial Information Systems**

*points value:* 1.5                      *duration:* part semester 2

*restrictions:* 7072 Remote Sensing, 9462 Remote Sensing and Land Evaluation, 4311 Remote Sensing and Land Evaluation S

*prerequisites:* Appropriate degree in Science, Agricultural Science or Environmental Science

*contact hours:* one week intensive course

*content:* This subject deals with the use of global positioning units, analysis of satellite imagery and the manipulation of this data within a geographic information base. Use of these systems for the production of land evaluation criteria is discussed.

*assessment:* to be advised

### **8409 Topics in Agricultural Business A**

*points value:* 3                              *duration:* semester 1

*restrictions:* Approval of Head of Department and Agricultural Business Postgraduate Coordinator before enrolling

*contact hours:* 3 hours of seminars per week

*content:* The subject will offer the opportunity to the student to cover a range of topics in Agricultural Business as it relates to the student's study program and the teaching and research interests of staff and visiting academics.

*assessment:* written assignments and oral presentations

### **6492 Topics in Agricultural Business B**

*points value:* 3                              *duration:* semester 2

*restrictions:* Approval of Head of Department and Agricultural Business Postgraduate Coordinator before enrolling

*contact hours:* 3 hours of seminars per week

*content:* The subject will offer the opportunity to the student to cover a range of topics in Agricultural Business as it relates to the student's study program and the teaching and research interests of staff and visiting academics.

*assessment:* written assignments and oral presentations

### **4945 Topics in Animal Science**

*points value:* 3                              *duration:* semester 1 or 2

*assumed knowledge:* degree in Agricultural Science or Science

*contact hours:* 26 lectures or equivalent and associated practical work

*content:* The subject will offer the opportunity to cover a range of topics on Animal Science related to the teaching and research interests of staff. Candidates should consult the Head of Department for topics currently available.

*assessment:* to be advised

### **6826 Topics in Crop Protection**

*points value:* 3                              *duration:* semester 2

*prerequisites:* Bachelor's degree in Science, Environmental Science, Agriculture or equivalent

*contact hours:* 26 lectures or equivalent (comprising essays, tutorials and seminars) and associated practical work

*content:* The subject will review some of the following topics: population dynamics and seasonal occurrence of insect, plant pathogen and weed pests; biology of pests; quantitative methods of sampling, decision making and damage assessment; chemical control; plant resistance and biotechnology; biological control; quarantine procedures; integration and implementation of crop protection practices. Candidates should consult the Head of Department for topics currently available.

*assessment:* to be advised

### **2379 Topics in Soil Science**

*points value:* 3                              *duration:* semester 1 or 2

*availability:* to be advised

*prerequisites:* appropriate degree in Science, Agricultural Science or Environmental Science

*contact hours:* 24 lectures or equivalent and associated practical work

*content:* This subject may be offered from time to time as a means of examining current topics in soil science, soil management and land evaluation that are related to the research and teaching interests of staff and visiting scientists. Candidates should consult the Head of the Department for topics currently available.

*assessment:* to be advised

### **9822 Topics in Soil Science A**

*points value:* 3                              *duration:* full year

*availability:* to be advised

*prerequisites:* appropriate degree in Science, Agricultural Science or Environmental Science

*contact hours:* 24 lectures or equivalent and associated practical work

*content:* This subject may be offered from time to time as a means of examining current topics in soil science, soil management and land evaluation that are related to

the research and teaching interests of staff and visiting scientists. Candidates should consult the Head of the Department for topics currently available.

*assessment:* to be advised

### **9508 Topics in Soil Science B**

*points value:* 1.5      *duration:* semester 1 or 2

*contact hours:* 12 lectures or equivalent and associated practical work. May be presented as an intensive short course

*prerequisites:* Appropriate degree in Science, Agricultural Science, environmental Science or equivalent

*content:* This subject may be offered from time to time as a means of examining current topics in soil science, soil management and land evaluation that are related to the research interests of staff and visiting scientists. Candidates should consult the Head of the Department for topics currently available.

## **Research Projects**

### **4205 Project A (ANR)**

#### **7215 Project A (ANR)(Mid-year Intake)**

*points value:* 3      *duration:* full year

*assumed knowledge:* Students may be required to take certain subjects in preparation for the project.

*contact hours:* Formal contact between supervisor and student during the project is by arrangement.

*content:* Projects may comprise some or all of literature reviews, field trials, laboratory experiments, seminars and written assignments. Topics for projects may be chosen from any of the subjects included in the course.

### **5215 Project A (ANR)(One Semester)**

*points value:* 3      *duration:* semester 1 or 2

*assumed knowledge:* Students may be required to take certain subjects in preparation for the project.

*contact hours:* Formal contact between supervisor and student during the projects is by arrangement.

*content:* projects may comprise some or all of literature reviews, field trials, laboratory experiments, seminars and written assignments. Topics for projects may be chosen from any of the subjects included in the course.

### **7949 Project B (ANR)**

#### **6095 Project B (ANR)(Mid-year Intake)**

*points value:* 4      *duration:* full year

*assumed knowledge:* Students may be required to take certain subjects in preparation for the project.

*contact hours:* Formal contact between supervisor and student during the project is by arrangement.

*content:* Projects may comprise some or all of literature reviews, field trials, laboratory experiments, seminars and written assignments. Topics for projects may be chosen from any of the subjects included in the course.

### **9502 Project B (ANR)(One Semester)**

*points value:* 4      *duration:* semester 1 or 2

*assumed knowledge:* Students may be required to take certain subjects in preparation for the project.

*contact hours:* Formal contact between supervisor and student during the projects is by arrangement.

*content:* projects may comprise some or all of literature reviews, field trials, laboratory experiments, seminars and written assignments. Topics for projects may be chosen from any of the subjects included in the course.

### **1717 Project C (ANR)**

#### **3653 Project C (ANR)(Mid-year Intake)**

*points value:* 6      *duration:* full year

*assumed knowledge:* Students may be required to take certain subjects in preparation for the project.

*contact hours:* Formal contact between supervisor and student during the project is by arrangement.

*content:* Projects may comprise some or all of literature reviews, field trials, laboratory experiments, seminars and written assignments. Topics for projects may be chosen from any of the subjects included in the course.

### **3004 Project C (ANR)(One Semester)**

*points value:* 6      *duration:* semester 1 or 2

*assumed knowledge:* Students may be required to take certain subjects in preparation for the project.

*contact hours:* Formal contact between supervisor and student during the projects is by arrangement.

*content:* projects may comprise some or all of literature reviews, field trials, laboratory experiments, seminars and written assignments. Topics for projects may be chosen from any of the subjects included in the course.

**1320 Project D (ANR)**

**8676 Project D (ANR) (Mid-year intake)**

*points value:* 8 *duration:* full year

*assumed knowledge:* Students may be required to take certain subjects in preparation for the project.

*contact hours:* Formal contact between supervisor and student during the project is by arrangement.

*content:* Projects may comprise some or all of literature reviews, field trials, laboratory experiments, seminars and written assignments. Topics for projects may be chosen from any of the subjects included in the course.

**4621 Project D (ANR)(One Semester)**

*points value:* 8 *duration:* semester 1 or 2

*assumed knowledge:* Students may be required to take certain subjects in preparation for the project.

*contact hours:* Formal contact between supervisor and student during the projects is by arrangement.

*content:* projects may comprise some or all of literature reviews, field trials, laboratory experiments, seminars and written assignments. Topics for projects may be chosen from any of the subjects included in the course.

**2211 Project E (ANR)**

**2018 Project E (ANR) (Mid-year intake)**

*points value:* 9 *duration:* full year

*assumed knowledge:* Students may be required to take certain subjects in preparation for the project.

*contact hours:* Formal contact between supervisor and student during the project is by arrangement.

*content:* Projects may comprise some or all of literature reviews, field trials, laboratory experiments, seminars and written assignments. Topics for projects may be chosen from any of the subjects included in the course.

**3522 Project E (ANR)(One Semester)**

*points value:* 9 *duration:* semester 1 or 2

*assumed knowledge:* Students may be required to take certain subjects in preparation for the project.

*contact hours:* Formal contact between supervisor and student during the projects is by arrangement.

*content:* projects may comprise some or all of literature reviews, field trials, laboratory experiments, seminars and written assignments. Topics for projects may be chosen from any of the subjects included in the course.

**2854 Project F (ANR)**

**8492 Project F (ANR)(Mid-year Intake)**

*points value:* 12 *duration:* full year

*assumed knowledge:* Students may be required to take certain subjects in preparation for the project.

*contact hours:* Formal contact between supervisor and student during the project is by arrangement.

*content:* Projects may comprise some or all of literature reviews, field trials, laboratory experiments, seminars and written assignments. Topics for projects may be chosen from any of the subjects included in the course.

**7382 Project F (ANR)(One Semester)**

*points value:* 12 *duration:* semester 1 or 2

*assumed knowledge:* Students may be required to take certain subjects in preparation for the project.

*contact hours:* Formal contact between supervisor and student during the projects is by arrangement.

*content:* projects may comprise some or all of literature reviews, field trials, laboratory experiments, seminars and written assignments. Topics for projects may be chosen from any of the subjects included in the course.

**7188 Project G (ANR)**

**3661 Project G (ANR)(Mid-year Intake)**

*points value:* 21 *duration:* full year

*assumed knowledge:* Students may be required to take certain subjects in preparation for the project.

*contact hours:* Formal contact between supervisor and student during the project is by arrangement.

*content:* Projects may comprise some or all of literature reviews, field trials, laboratory experiments, seminars and written assignments. Topics for projects may be chosen from any of the subjects included in the course.

**8200 Natural Resources Project I**

*points value:* 4 *duration:* full year

*availability:* internal and external

*content:* Projects may comprise experiments, surveys, literature reviews, seminars and assignments leading to a written report. Proposals will be individually assessed so that they complement the academic and practical background of each student and his/her course work.

*assessment:* to be advised

**6846 Natural Resources Project II**

*points value:* 12                      *duration:* full year

*availability:* internal and external.

*content:* Projects may comprise experiments, surveys, literature reviews, seminars and assignments leading to a written report. Proposals will be individually assessed so that they complement the academic and practical background of each student and his/her course work.

*assessment:* to be advised

## Regulations

### Of Awards in the Faculty of Architecture and Urban Design

- 1 In the Faculty of Architecture and Urban Design there shall be the following awards:
    - Ordinary degree of Bachelor of Design Studies\* (formerly Bachelor of Architectural Studies)
    - Ordinary degree of Bachelor of Architecture
    - Ordinary degree of Bachelor of Landscape Architecture\*
    - Honours degree of Bachelor of Design Studies\*
    - Honours degree of Bachelor of Architecture
    - Honours degree of Bachelor of Landscape Architecture\*
    - Graduate Certificate in Design Studies\*
    - Graduate Certificate in Design Studies (Landscape)\*
    - Graduate Diploma in Design Studies\*
    - Graduate Diploma in Design Studies (Landscape)\*
    - Master of Architecture
    - Master of Building Science
    - Master of Design Studies\*
    - Master of Design Studies (Landscape)\*
    - Master of Urban Design
  - 2 The courses for the awards listed in Regulation 1 shall be governed by the General Course Rules and Specific Course Rules that the Council shall prescribe from time to time.
  - 3 The syllabuses of subjects shall be specified by the Council.
- notes (not forming part of the Regulations)
- 1 Council has delegated the power to approve minor changes to the General Course Rules to the Deputy Vice-Chancellor (Academic).
  - 2 Council has delegated the power to approve minor changes to the Specific Course Rules to the Deans of Faculties.
  - 3 Council has delegated the power to specify syllabuses to the Head of each department or centre concerned, such syllabuses to be subject to approval by the Faculty or by the Dean on behalf of the Faculty. The Head of department or centre may approve minor changes to any previously approved syllabus.

Regulations effective from 1 August 1994.

\*Awaiting approval and confirmation.

## Bachelor of Design Studies (formerly Bachelor of Architectural Studies)

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar.

As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

### Specific Course Rules

#### Aims and objectives

The Bachelor of Design Studies (B.Des.St.) is a first undergraduate degree in architectural and landscape studies open to applicants with matriculation or Higher School Entry qualifications or mature students who apply for Special Entry. It is intended for two groups of students:

- (1) People wishing to develop the intellectual skills and knowledge involved in combining critical thinking with creative activity and have an interest in the design of the built environment as a context within which to develop these skills. In this respect, the degree serves a similar purpose to other first degrees but is unique in that the selected context of the built environment involves aspects of the arts and the sciences, writing and graphics, design and analysis, and management and engineering.
- (2) People wishing to work in the field of architecture and landscape design, particularly those wishing to become professional architects or landscape architects, who are attracted to a program which emphasises the development of skills in combining critical thinking with creative activity. Second degrees, the Bachelor of Architecture and the Bachelor of Landscape Architecture, lead after necessary practical experience and examinations to registration as architects or landscape architects respectively.

The work of the degree will engage the synthesis of critical thought and creative action manifested in architecture and landscape design. Graduates of the degree should:

- be able to form and express deep criticism of architectural and landscape design objects from a broad perspective;
- be able to generate and present relevant proposals for intervention in situations in the built environment; and
- be able to combine criticism and proposal generation into a working process of design.

Half of the course comprises core or mandatory stream subjects in each year. The remainder are chosen by each student from subjects in the Department of Architecture and certain other Departments in the University. The Ordinary degree may be completed in three years and students can also apply for entry to an additional Honours year.

Students who have completed at least one year of the degree may apply for admission to Law Studies in their second year. Such students, if accepted, can complete both their B.Des.St. and LL.B. degrees in a total of five years of full time study by taking some overload.

#### Educational objectives

The curriculum and teaching of the degree have both substantive and instrumental objectives.

Substantive objectives pertain to knowledge of the nature of creative action and critical thinking and to the disciplines of architecture and landscape architecture. Instrumental objectives pertain to skills and techniques relevant to critical thinking, creative action and to practice within the architecture and landscape architecture disciplines.

#### Substantive objectives

##### Critical thinking

To present coherent intellectual structures within which observation, analysis, understanding and judgement of situations, texts and objects can be made. To demonstrate the relevance of these structures.

##### Creative action

To present current knowledge of the act of designing, from both theoretical and practical perspectives. To demonstrate its application to the management of design processes.

##### Architecture and Landscape Architecture

To present accounts of the built and human modified environments, the processes of its production, and the positions, values and preferences that influence its forms and patterns. To demonstrate the relevance of these accounts.

## Instrumental objectives

Finding, ordering, sifting, filtering, organising information

Intelligent use of library resources and research of library material. Information acquisition, collation and management from libraries and other sources.

Visualising, representing and manipulating spatial objects

Perceiving 3D objects.

Drawing and model making using hand and computer techniques.

Writing

Designing, outlining, organising, and refining thought expressed with the written word, using hand and computer techniques.

Speaking

Designing, outlining, organising, and refining thought expressed with the spoken word.

Computing

Computational techniques using algorithms and data relationships.

Working in groups

Acting as both a leader and a member of a group of individuals.

## 1 General

1.1 There shall be an Ordinary and an Honours degree of Bachelor of Design Studies. The Ordinary degree shall be awarded with a major in *either* Architectural Studies *or* Landscape Studies *or* Urban Design Studies.

1.2 A graduate of the University or of another educational institution who wishes to proceed to the degree of Bachelor of Design Studies may do so under the requirements of these Specific Course Rules.

1.3 A candidate who has completed subjects under any repealed regulations for the Bachelor of Architectural Studies shall have status in equivalent subjects under the Specific Course Rules.

## 2 Approval of course of study at enrolment

2.1 Each student's course of study shall be approved by the Dean of the Faculty (or nominee) at enrolment each year.

## 3 Duration of Course

3.1 The course of study for the Ordinary degree shall extend over three years of full-time study or the equivalent. Students shall pass subjects to the value of at least 24 points at each of the three levels. The point values of the subjects are contained in Specific Course Rules 4.1, 4.2 and 4.3.

## 4 Course of Study/Subjects of study

4.1 To qualify for the Ordinary degree of Bachelor of Design Studies with an Architectural Studies major a candidate shall pass the following subjects to the value of at least 72 points:

### Level I

4168 Built Environments I	3
4348 Design and Form I	3
7006 Construction I	3
8169 Image/Text/Architecture I	3

Level I Electives to the value of 12 points, at least 6 points of which must be taken outside the Faculty of Architecture and Urban Design.

### Level II

3006 Science and the Built Environment II	4
6774 Twentieth Century Architecture and Landscapes II	4
8400 Design and Environments II	4

Level II Electives to the value of 12 points

### Level III

4371 Issues in Urban Sustainability III	6
3468 Building Design Studio III	6

Level III Electives to the value of 12 points

4.2 To qualify for the Ordinary degree of Bachelor of Design Studies with a Landscape Studies major a candidate shall pass the following subjects to the value of at least 72 points:

### Level I

4168 Built Environments I	3
4348 Design and Form I	3
7006 Construction I	3
8169 Image/Text/Architecture I	3

Level I Electives to the value of 12 points, at least 6 points of which must be taken outside the Faculty of Architecture and Urban Design.

**Level II**

3006 Science and the Built Environment II	4
6774 Twentieth Century Architecture and Landscapes II	4
8400 Design and Environments II	4
Level II Electives to the value of 12 points	

**Level III**

6886 Issues in Landscape Sustainability III	6
8650 Landscape Design Studio III	6
Level III Electives to the value of 12 points	

4.3 To qualify for the Ordinary degree of Bachelor of Design Studies with an Urban Design Studies major a candidate shall pass the following subjects to the value of at least 72 points:

**Level I**

4168 Built Environments I	3
4348 Design and Form I	3
7006 Construction I	3
8169 Image/Text/Architecture I	3

Level I Electives to the value of 12 points, at least 6 points of which must be taken outside the Faculty of Architecture and Urban Design.

**Level II**

3006 Science and the Built Environment II	4
6774 Twentieth Century Architecture and Landscapes II	4
8400 Design and Environments II	
Level II Electives to the value of 12 points	

**Level III**

4371 Issues in Urban Sustainability III	6
2067 Urban Design Studio III	6
Level III Electives to the value of 12 points	

4.4 The following subjects have been approved by the Faculty of Architecture and Urban Design as electives towards the Ordinary degree.

**Agricultural and Natural Resource Sciences subjects**

Level I subjects listed in Specific Course Rule 4 of the degree of Bachelor of Agricultural Science. The following subjects have been approved as electives by the Head of the Department of Horticulture, Viticulture and Oenology:

5882 Horticultural Science	
9838 Ornamental Horticulture	
7312 Chemistry I (ANR)	

**Arts subjects**

Level I subjects listed in Specific Course Rule 8.1, Level II subjects listed in Specific Course Rule 8.5, and Level III subjects listed in Specific Course Rule 8.9 of the degree of Bachelor of Arts.

**Design Studies subjects**

Level I, II and III subjects listed below (subject to availability each year):

**Level I**

5468 Art History and Theories IA##	3
8361 Art History and Theories IB#	3
9091 Computer-Aided Design I	3
4280 Special Topic in Design Studies IA	3
1454 Special Topic in Design Studies IB	3

**Level II**

9888 Art History and Theories IIA##	4
9853 Art History and Theories IIB#	4
5094 Asian Architecture and Landscapes II	4
2891 Australian Architecture and Landscapes II	4
1530 Computer-Aided Design II	4
8804 Computer-Aided Design IIA#	4
3602 Computer-Aided Design IIB##	4
4125 Conservation in the Built Environment II#	4
2472 Islamic Architecture and Gardens II##	4
8904 Plants and Design II	4
8221 Special Topic in Design Studies IIA	4
3266 Special Topic in Design Studies IIB	4
1425 Special Topic in Design Studies IIC	4

**Level III**

8149 Asian Architecture and Landscapes III	6
2590 Australian Architecture and Landscapes III	6
2258 Computer-Aided Design IIIA#	6
4903 Computer-Aided Design IIIB##	6
1287 Conservation in the Built Environment III#	6

3547 Critiques, Theories and Architectural History III	6
8660 Islamic Architecture and Gardens III##	6
9218 Plants and Design III	6
2784 Special Topic in Design Studies IIIA	6
8842 Special Topic in Design Studies IIIB	6
7273 Special Topic in Design Studies IIIC	6

### Economics Subjects

Level I, II and III subjects listed below:

#### Level I

9073 Economic History I	3
4309 Economics IA	3
2076 Economics IB	3
7263 Mathematics for Economists I	3
3565 The Australian Economy: Institutions and Policy I	3

#### Level II

5381 Australian Economic History II	4
1802 East Asian Economics II	4
3784 Economic Data Analysis II	4
2744 Industrial Relations II	4
9893 Macroeconomics II	4
3071 Mathematical Economics II	4
8870 Microeconomics II	4
1715 Special Topics II	4

#### Level III

4883 Applied Econometrics III	4
8367 Applied Microeconomics III	4
3195 Development Economics III	4
5284 Business and Government III	4
8771 Econometric Theory III	4
2287 Economics of Law and Politics	4
9029 Environment and Resource Economics III	4
9272 International Economic History III	4
2261 International Economics III	4
5423 Labour Economics III	4
4466 Macroeconomics III	4
3658 Microeconomics Theory III	4
7981 Public Finance III	4
4609 Special Topics III	4

### Engineering subjects

#### Level I

9167 Design Graphics	1.5
2391 Dynamics	1.5
6714 Electrical Systems	1.5
5729 Engineering Computing I	1.5
2853 Engineering Planning and Design I	1.5
4651 Engineering Programming IE	2.5
6581 Statics	1.5

#### Law subjects

##### Level II

6019 Law and Legal Process	6
3731 Contract*	6

##### Level III

8433 Constitutional Law	6
7272 Environmental Planning and Protection Law**	3
9844 Conservation and Heritage Law#	3
7730 Land Use Planning Law##	3
8821 Property	6
9365 Torts	6

\* Available only to students who have gained admission to Law studies through SATAC

\*\* A quota of eight B.Des.St. students will apply

# Available even years only

## Available odd years only

### Mathematical and Computer Sciences subjects

Level I subjects listed in Specific Course Rule 4.1.4, Level II subjects listed in Specific Course Rule 4.2.1, and Level III subjects listed in Specific Course Rule 4.3 of the degree of Bachelor of Science in the Faculty of Mathematical and Computer Sciences.

### Performing Arts subjects

Level I subjects listed in Specific Course Rules, with the exception of Dance subjects, of the degrees in the Faculty of Performing Arts and approved by that Faculty.

### Science subjects

Level I, II and III subjects listed in Specific Course Rule 7 of the degree of Bachelor of Science in the Faculty of Science.

Subjects offered by other faculties but not listed above may be acceptable on application and subject to the recommendation of the Head of the Department of Architecture, the department concerned, and the approval of the Faculty of Architecture and Urban Design.

### Subjects from other Institutions

Such subjects provided by other institutions as may be approved from time to time on the recommendation of the Head of the Department of Architecture.

- 4.5 No candidate will be permitted to count for the degree any subject together with any other subject which, in the opinion of the Faculty contains a substantial amount of the same material; and no subject or portion of a subject may be counted twice towards the degree. No candidate may present the same section of a subject in more than one subject for the degree.
- 4.6 A candidate who has completed subjects under any repealed Specific Course Rules in the Bachelor of Architectural Studies degree prior to semesterisation and amendments of the course in 1989, or in the Bachelor of Architectural Studies course between 1989 to 1996, shall have status in equivalent subjects under these Specific Course Rules.
- 4.7 When in the opinion of the Faculty special circumstances exist for a candidate affected by Specific Course Rules 1.3 and 4.6, the Council on the recommendation of the Faculty in each case may vary any of the provisions of these Specific Course Rules.

## 5 The Honours degree

- 5.1 A candidate who wishes to proceed to the Honours degree must obtain the approval of the Head of the Department of Architecture, normally by 15 December of the year preceding enrolment.
- 5.2 A candidate for the Honours degree of Bachelor of Design Studies shall pass examinations in 2493 Honours Design Studies\* which shall consist of either one topic to the value of 24 points or two topics to the value of up to 12 points each of an Honours subject.
- 5.3 A candidate may, subject to the approval of the Head of the Department of Architecture in each case, include in their Honours year a subject to

the value of 12 points taught in a department in another faculty; such candidates must consult the Head of the Department concerned and must apply in writing to the Faculty Registrar by 15 December of the year preceding the proposed Honours year, seeking the approval of the Head of the Department of Architecture.

- 5.4 The work of the Honours year may not be commenced before a candidate has qualified for the Ordinary degree, or has qualified for a degree regarded by the Faculty of Architecture and Urban Design as equivalent and has completed such prerequisite subjects (if any) as may be prescribed in the syllabuses.
- 5.5 The work of the Honours year must be completed in one year of full-time study, save that on the recommendation of the Head of the Department, the Faculty may permit a candidate to spread the work over two years but not more, under such conditions as the Faculty may determine.
- 5.6 If a candidate is unable to complete the course for the Honours degree within the time allowed, or if the candidate's work is unsatisfactory at any stage of the course, or if the candidate withdraws from the course such fact shall be reported to the Faculty. The Head of the Department of Architecture may permit the candidate to re-enrol for an Honours degree under such conditions (if any) as the Head of the Department of Architecture may determine.
- 5.7 No exemption from any component of the requirements of 5 is permitted.

\* Information on the approved subjects from which the prescribed combination may be chosen shall be advised in the preceding year by the Department of Architecture.

*note:* The subjects to be offered in a particular year will depend upon the availability of staff.

## 6. Review of academic progress

- 6.1 If in the opinion of the Faculty a candidate for the degree is not making satisfactory progress, the Faculty may, with the consent of the Council, terminate the candidature and the candidate shall cease to be enrolled for the degree.

## 7. Assessment and examinations

- 7.1 There shall normally be four classifications of pass in the final assessment of any subject for the Ordinary degree, as follows: Pass with High Distinction, Pass with Distinction, Pass with Credit, Pass. If the Pass classification is in two divisions a pass in the higher division may be prescribed in the syllabuses as a prerequisite for admission to further studies in that subject or to

other subjects. Results in certain subjects as specified in the Specific Course Rules will not be classified.

- 7.2 A candidate shall not be eligible to attend for examination unless the prescribed work has been completed to the satisfaction of the teaching staff concerned.
- 7.3 In determining a candidate's final result in a subject (or part of a subject) the examiners may take into account oral, written, practical and examination work, provided that the candidate has been given adequate notice at the commencement of the teaching of the subject of the way in which work will be taken into account and of its relative importance in the final result.
- 7.4 A candidate who fails a subject or who obtains a lower division pass and who desires to take that subject again shall, unless exempted wholly or partially therefrom by the Head of the Department concerned, again complete the required work in that subject to the satisfaction of the teaching staff concerned.
- 7.5 A candidate may count toward the degree subjects at Level II or Level III with a grade of Conceded Pass, provided that such subjects are not worth more than three points each and that the total value of subjects with Conceded Passes which may be counted toward the degree shall not exceed six points.
- 7.6 A candidate who has twice failed the examination in any elective subject for the Ordinary degree may not enrol for that subject again or for any other elective subject which in the opinion of the Faculty contains a substantial amount of the same material, except by special permission of the Faculty and then only under such conditions as Faculty may prescribe.
- 7.7 There shall be three classifications of Pass in the final assessment of the subject for the Honours degree as follows: First Class, Second Class and Third Class. The Second Class classification shall be divided into two divisions as follows: Division A and Division B.

\* Conceded Passes are not awarded in the core subjects listed in 4.1, 4.2 and 4.3.

## 8. Articulation with other awards

- 8.1 Candidates who have gained a reserved place in Law Studies on the basis of their SACE or equivalent results must, at the first attempt, successfully complete subjects to the value of 24 points at Level I of the B.Des.St. before being eligible to take up their place in Law Studies.

Candidates who have successfully completed subjects to the value of 24 points at Level I of the Bachelor of Design Studies degree are eligible to apply for admission to Law Studies. If admitted, candidates may count certain Law subjects towards both the degree of B.Des.St. and the degree of LL.B. Candidates may apply for admission to Law Studies through the South Australian Tertiary Admission Centre by September of their first year in the B.Des.St. course or in a later year of the course.\*

For candidates who have a reserved place in, or who wish to seek admission to, Law Studies, the following program of study is recommended:

### Level I

Subjects listed in Specific Course Rule 4.1 at Level I of the degree of B.Des.St. to the value of at least 24 points.

### Level II

8400 Design and Environments II  
3006 Science and the Built Environment II  
6774 Twentieth Century Architecture and Landscapes II  
6019 Law and Legal Process  
3731 Contract

### Level III

4371 Issues in Urban Sustainability III  
*or*  
6886 Issues in Landscape Sustainability III  
3468 Building Design Studio III  
*or*  
8650 Landscape Design Studio III  
*or*  
2067 Urban Design Studio III  
9844 Conservation and Heritage Law\*  
7730 Land Use Planning Law\*\*  
8433 Constitutional Law  
8821 Property  
9365 Torts  
7272 Environmental Planning and Protection Law

Any two of the subjects 8433 Constitutional Law, 8821 Property, and 9365 Torts are the equivalent of 12 points at Level III for the degree

of B.Des.St. To complete the LL.B. degree in minimum time students would need to take all these subjects although this involves an overload and is not a requirement of the B.Des.St. degree.

Before enrolment in the Level III subjects of the above scheme, students should consult the Law Course Adviser.

See also the Specific Course Rules of the LL.B. degree and see, in particular, the Introductory Notes to the LL.B. Syllabuses.

\* Available odd years only

\*\* Available even years only

- 8.2 A graduate in another faculty or other educational institution who wishes to qualify for the Ordinary degree of Bachelor of Design Studies in the Faculty and to count towards that degree subjects which have already been presented for another degree may do so providing such a candidate presents a range of subjects which fulfils the requirements of Specific Course Rules 4.1 or 4.2, or 4.3 above, including subjects to the value of 36 points which must include compulsory and elective Level III subjects to the value of at least 24 points which have not been presented for any other degree.

## Syllabuses

### textbooks

Information on appropriate textbooks will be provided by the Department concerned, and at the preliminary lecture in Orientation Week.

### reference books

Although lists of books and journals for reference purposes are regarded as important, details have not been included in this Volume. These will however be issued from time to time by the Department of Architecture.

### communication competence

In the course of essay, tutorial and project work, students are expected to increase their competence in the use of oral, written and visual communication.

### examinations

For each subject students may obtain from the department concerned details of the examination in that subject including the relative weights given to the components (eg such of the following as are relevant: assessments, semester tests, essays or other written or practical work, final written examinations, viva voce examinations).

\* Students may also select elective subjects outside the Faculty of Architecture and Urban Design.

\*\* All students must take at least one Level I subject, or two Level I half-subjects (total 6 points) outside the Faculty of Architecture and Urban Design.

### Level I

#### **5468 Art History and Theories IA**

*level:* I    *points value:* 3    *duration:* semester 2

*availability:* odd years only

*quota:* will apply

*restriction:* 2090 Art History and Theories; or 9888 Art History and Theories IIA

*contact hours:* up to 2 lectures and 1 tutorial hour per week plus occasional excursions

*content:* Impressionism and after: a critical view of European art from the time of Manet to the First World War. This subject introduces students to the most influential ideas and theories in the art of the latter part of the 19th century, a time of renegotiation of the

relationship between artists and the social context within which they work. Included in the study are the major artists and ideas contributing to the development of impressionism, post-impressionism, symbolism, fauvism, cubism, futurism, constructivism, posters and political art, expressionism and dada. The subject aims to stimulate an awareness that familiarity with the history of ideas can aid each person in the expansion, structuring and enrichment of his or her own life. Development of the following skills will be brought into focus: clear-thinking, verbal communication, written communication, interpretation of written and visual material, and ability to work with historical research methods. Guest lecturers and excursions are incorporated in the subject where appropriate. Use is made of a broad range of visual material.

*assessment:* slide test (40%), essays (35%) and tutorial work (25%)

### **8361 Art History and Theories IB**

*level:* 1    *points value:* 3    *duration:* semester 2

*availability:* even years only

*quota:* will apply

*restriction:* 9853 Art History and Theories IIB

*contact hours:* up to 2 lectures and 1 tutorial hour per week plus occasional excursions

*content:* Art history and theories after World War I: modernism and beyond. The subject introduces students to some of the leading ideas and manifestations of visual art from about 1920 to the present day. The term 'visual art' is broadly understood to include film, photography, graphics, posters, performance and the arts of process and idea, as well as painting, sculpture and architecture (although architecture is chiefly dealt with in other subjects). Modernism, abstract expressionism, op, pop and minimalism, art and technology, environments, happenings, performance, body art, conceptual art, process art, video, women's art, murals and photorealism are studied. Guest lecturers and excursions are incorporated in the subject where appropriate. Use is made of a broad range of visual material.

*assessment:* slide test (40%), essays (40%) and tutorial work (20%)

### **4168 Built Environments I**

*level:* 1    *points value:* 3    *duration:* semester 1

*quota:* will apply

*contact hours:* up to 2 lectures and up to 2 tutorial hours a week

*content:* An introduction to the study of built environments, their history and relationship to culture and the natural environment, and to a transdisciplinary, problem-focused approach to built environment decision-making. The subject examines how the processes by which built environments are created and changed influence the products at the levels of global issues, cities, landscapes, buildings and artefacts. Exemplars in the forms of problems, products and processes are considered in the light of models of built environment decision-making. Products cover a range of scales and contexts, including local cases and cases remote in space and time. Emphasis is given to problems and processes of current relevance in Australia. The roles of all main decision-makers are considered, with emphasis on those of architects, landscape architects and related professions. Ethical issues and human requirements of built environments are considered in relation to the limitations imposed by environmental constraints.

*assessment:* examination (40%), assignments (60%)

### **9091 Computer-Aided Design I**

*level:* 1    *points value:* 3    *duration:* semester 1

*quota:* will apply.

*restriction:* 1530 Computer-Aided Design II

*contact hours:* up to 3 hours per week

*content:* The subject (a) develops the skills of using a current computer-aided design (CAD) graphics system for describing the built environment; and (b) examines the nature, assumptions and characteristics of CAD systems, their relationship to computation, abstraction and representation in design, and ways of looking at designs and designing from a CAD viewpoint.

*assessment:* assignments (100%)

### **7006 Construction I**

*level:* 1    *points value:* 3    *duration:* semester 2

*quota:* will apply

*restriction:* 8334 Building Studies IA or 7006 Building Construction I

*contact hours:* up to 2 lectures and up to 2 tutorial hours a week

*content:* An introduction to the vocabulary of the methods, materials and forms of construction in the built environment. The elements of building construction produced by both on-site and industrialised techniques will be discussed and examples investigated. Through simple design examples technical performance requirements will be introduced and assessed.

*assessment:* assignments (100%)

### 4348 Design and Form I

level: I points value: 3 duration: semester 1

quota: will apply

restriction: 8897 Design Studies IA

contact hours: up to 2 lectures and up to 2 tutorial hours a week

content: An introduction to architectural design, discussed and demonstrated as an iterative activity involving both creative action and critical thought. The primary emphasis of the subject is developing concepts and skills for creative action: designing spatial forms as both visual compositions and as a potential setting for human activities, including the concepts of derivation, geometric construction and grammatical rules as well as skills in drawing, model making, writing, group work and computing. The secondary emphasis is critical thought: designs are examined from multiple and often conflicting positions and values. The subject matter is situated within the history of architecture through the use of examples.

assessment: assignments (100%)

### 8169 Image/Text/Architecture I

level: I points value: 3 duration: semester 2

quota: will apply

restriction: 2713 Design Studies IB

contact hours: up to 2 lectures and up to 2 tutorial hours a week

content: A general introduction to architectural thought emphasising major thresholds in Western architectural history. The key issues examined will include: geometric and iconographic order, the status and role of architectural designers and writers, methods of representation and reproduction involved in constructing and propagating architectural ideas, and important historical perspectives that situate 20th-century developments. Practical work includes exercises in typographic design and in writing short analytical texts.

assessment: assignments (100%)

### 4280 Special Topic in Design Studies IA

level: I points value: 3 duration: semester 1

quota: will apply

availability: consult Department of Architecture

contact hours: up to 3 hours of lectures/tutorials and seminars per week

content: Details of this subject will be provided by the Department of Architecture when specialist teaching is available.

assessment: to be advised

### 1454 Special Topic in Design Studies IB

level: I points value: 3 duration: semester 2

quota: will apply

availability: consult Department of Architecture

contact hours: up to 3 hours of lectures/tutorials and seminars per week

content: Details of this subject will be provided by the Department of Architecture when specialist teaching is available.

assessment: to be advised

## Level II

---

### 9888 Art History and Theories IIA

level: II points value: 4 duration: semester 2

quota: will apply

availability: odd years only

restriction: 2090 Art History and Theories; or 5468 Art History and Theories IA

contact hours: up to 2 lectures and 1 tutorial hour per week plus occasional excursions

content: see 5468 Art History and Theories IA

assessment: slide test (40%), essays (35%) and tutorial work (25%)

### 9853 Art History and Theories IIB

level: II points value: 4 duration: semester 2

quota: will apply

availability: even years only

restriction: 2090 Art History and Theories; or 8361 Art History and Theories IB

contact hours: up to 2 lectures and 1 tutorial hour per week plus occasional excursions

content: see 8361 Art History and Theories IB

assessment: slide test (40%), essays (40%), and tutorial work (20%)

### 5094 Asian Architecture and Landscapes II

level: II points value: 4 duration: semester 2

quota: will apply

restriction: 3700 Asian Architecture I or 8149 Asian Architecture III or 8149 Asian Architecture and Landscapes III or 5094 History and Theories of Architecture IIC or 5094 Asian Architecture II

contact hours: 2 lectures and up to 2 tutorial hours a week

*content:* A topic or topics in Asian architectural history and landscape studies will be offered as the vehicle for a study of the problems of inter-cultural understanding. The nature of built objects, the modes and means of transmitting architectural knowledge, the relation of architecture to myths, rituals, cosmologies will be discussed in detail. Primary sources in translation will be introduced whenever possible.

*assessment:* assignments (100%)

### **2891 Australian Architecture and Landscapes II**

*level:* II *points value:* 4 *duration:* semester 1 or 2

*quota:* will apply

*availability:* consult Department of Architecture

*restriction:* 8329 History and Theories of Architecture I or 2006 History and Theories of Architecture IB or 2006 Australian Architecture I or 2590 Australian Architecture and Landscapes III or 9951 History and Theories of Architecture IIB or 2891 Australian Architecture II

*contact hours:* 2 lectures and 1 tutorial a week

*content:* A general introduction to the study of Australian architecture since 1788, with special attention to conceptual issues concerned with the characterisation of 'Australian' architecture and landscape architecture. The limitations of the formal analysis of built objects, periodisation and stylistic taxonomy will be discussed with reference to selected buildings, places, parks and landscapes in Adelaide and elsewhere, both professionally designed and otherwise. Australian architectural and landscape architectural discourse will be analysed in relation to wider patterns of cultural value. Reference to the wider international context will be made as appropriate.

*assessment:* tutorial papers (40%), final essay (60%)

### **1530 Computer-Aided Design II**

*level:* II *points value:* 4 *duration:* semester 1

*quota:* will apply

*restriction:* 9091 Computer-Aided Design I, 1530 Computer Methods in Architecture II or IIB or 3148 Computer Methods in Architecture IIIS or 3148 Computer-Aided Design IIIS or 2258 Computer Methods in Architecture IIIA or 4903 Computer Methods in Architecture IIIB

*contact hours:* up to 4 hours per week

*content:* The subject (a) develops the skills of using a current computer-aided design (CAD) graphics system for describing the built environment; and (b) examines the nature, assumptions and characteristics of CAD

systems, their relationship to computation, abstraction and representation in design, and ways of looking at designs and designing from a CAD viewpoint.

*assessment:* assignments (100%)

### **8804 Computer-Aided Design IIA**

*level:* II *points value:* 4 *duration:* semester 2

*quota:* will apply

*availability:* even years only

*pre-requisite:* 9091 Computer-Aided Design I or 1530 Computer-Aided Design II

*restriction:* 2258 Computer-Aided Design IIIA

*contact hours:* up to 4 hours per week

*content:* The construction of mathematical models in design and their representation and implementation as computer algorithms, with architecture and urban design as context. The subject includes a critical examination of computer hardware, software and operating systems as they relate to design offices.

*assessment:* assignments (100%)

### **3602 Computer-Aided Design IIB**

*level:* II *points value:* 4 *duration:* semester 2

*quota:* will apply

*availability:* odd years only

*pre-requisite:* 9091 Computer-Aided Design I or 1530 Computer-Aided Design II

*restriction:* 4903 Computer-Aided Design IIIB

*contact hours:* up to 4 hours per week

*content:* Theories and models of computer-aided design with architecture and urban design as context. CAD paradigms for design description, generation and evaluation are examined, with selected topics from parametric design, computational design, expert systems, knowledge engineering, simulation and optimisation.

*assessment:* assignments (100%)

### **4125 Conservation in the Built Environment II**

*level:* II *points value:* 4 *duration:* semester 1

*quota:* will apply

*availability:* even years only

*assumed knowledge:* 4168 Built Environments I

*restriction:* 1287 Conservation in the Built Environment III

*contact hours:* up to 4 hours per week

*content:* This subject examines the reasons, the what, where and why of conservation in the built environment. It considers how heritage items are identified, recorded, assessed and protected, and questions the validity of these actions. It also examines the various forms of conservation (preservation, restoration, reconstruction etc) and the uses and misuses of traditional and contemporary materials and construction methods. Urban conservation and the complexities of townscape character are canvassed together with the reuse of old buildings and the effects of current popular industries, such as tourism.

*assessment:* assignments (100%)

### **8400 Design and Environments II**

*level:* II *points value:* 4 *duration:* semester 2

*assumed knowledge:* 4348 Design and Form I, 4168 Built Environments I, 8169 Image/Text/Architecture I

*contact hours:* up to 2 hours of lectures and up to 3 hours of tutorials/seminars/studios per week

*content:* The intersection of theory and practice in architecture and landscape architecture, developed in the context of student design projects. The subject will examine the range of theoretical and ideological discourses which influence approaches to 'place-making' in the urban environment.

*assessment:* assignments and projects (100%)

### **2472 Islamic Architecture and Gardens II**

*level:* II *points value:* 4 *duration:* semester 1 or 2

*quota:* will apply

*availability:* odd years only

*restriction:* 8660 Islamic Architecture and Gardens III

*contact hours:* up to 2 hours of lectures and up to 2 hours of tutorials per week

*content:* An introduction to aspects of the social, cultural and religious content of Islamic architecture and gardens both in traditional and contemporary contexts. Issues concerning the contemporary search for cultural identity will be discussed. The primary focus will be upon the notion of order in space, spatial organisation as revealed in traditional built forms, places and gardens in various parts of the Islamic world and the symbolic significance associated with these forms.

*assessment:* assignments(100%)

### **8904 Plants and Design II**

*level:* II *points value:* 4 *duration:* semester 2

*quota:* will apply

*restriction:* 9218 Plants and Design III

*contact hours:* up to 4 hours of lectures/seminars/studios per week with occasional field study trips

*content:* This subject will examine the palette of vegetation primarily appropriate for Adelaide and South Australia and its use in planting design applications. Attention will be given to the characteristics of and opportunities in indigenous and exotic species, weeds and grasses, trees and plants, Aboriginal and Western medicinal and food harvesting plants, and their relationships to soils, drainage, erosion, pollution and vehicular design issues, revegetation and for particular eco-system creation applications.

*assessment:* assignments and projects (100%)

### **3006 Science and the Built Environment II**

*level:* II *points value:* 4 *duration:* semester 1

*assumed knowledge:* 4168 Built Environments I and 7006 Building Construction I or their equivalents

*restriction:* 9423 Building Studies IIS or 3006 Science in Building Design II

*contact hours:* 2 lectures and up to 4 tutorial hours a week

*content:* Building on knowledge gained in previous subjects, the applicability of science in relation to the design of built environments will be examined. Key topics which introduce environmental monitoring and mathematical modelling will be addressed to represent building structural design and materials science and/or environmental science. Examples of such topics are structural design in deformation, movement of building materials, acoustics and thermal behaviour.

*assessment:* assignments (50%), examination (50%)

### **8221 Special Topic in Design Studies IIA**

*level:* II *points value:* 4 *duration:* semester 1

*quota:* will apply

*availability:* consult Department of Architecture

*contact hours:* up to 4 hours of lectures/seminars/studios per week plus field study trips.

*content:* Details of this subject will be provided by the Department of Architecture when specialist teaching is available.

*assessment:* assignments and projects (100%)

**3266 Special Topic in Design Studies IIB**

level: II points value: 4 duration: semester 2

quota: will apply

availability: consult Department of Architecture

contact hours: up to 4 hours of lectures/seminars/studios per week plus field study trips.

content: Details of this subject will be provided by the Department of Architecture when specialist teaching is available.

assessment: assignments and projects (100%)

**1425 Special Topic in Design Studies IIC**

level: II points value: 4

duration: semester 1 or 2 or Summer

quota: will apply

availability: consult Department of Architecture

contact hours: up to 4 hours of lectures/seminars/studios per week plus field study trips.

content: Details of this subject will be provided by the Department of Architecture when specialist teaching is available.

assessment: assignments and projects (100%)

**6774 Twentieth Century Architecture and Landscapes II**

level: II points value: 4 duration: semester 1

assumed knowledge: 4348 Design and Form I, 4168 Built Environments I and 8169 Image, Text, Architecture I

restriction: 3596 The Design of Houses II.

contact hours: up to 2 hours of lectures and up to 2 hours of tutorials per week

content: A detailed exploration of compositional and theoretical aspects of 20th Century architectural and landscape design. This subject introduces students to a vocabulary for articulating spatial qualities in selected examples of 20th Century architectural and landscape design. It seeks to enhance students' appreciation of the possibilities of appropriating published writings and projects to nurture their own outlooks and abilities. Practical work includes exercises in three-dimensional composition and in writing short analytical texts.

assessment: assignments (100%)

**Level III**

**8149 Asian Architecture and Landscapes III**

level: III points value: 6 duration: semester 1

quota: will apply

restriction: 3700 Asian Architecture I or 5094 History and Theories of Architecture IIC or 5094 Asian Architecture II or 5094 Asian Architecture and Landscapes II or 8149 Asian Architecture III

contact hours: 2 lectures and 3 seminar hours per week

content: see 5094 Asian Architecture and Landscapes II

assessment: assignments (100%)

**2590 Australian Architecture and Landscapes III**

level: III points value: 6 duration: semester 1 or 2

quota: will apply

availability: consult Department of Architecture

restriction: 2006 Australian Architecture I, 2891 Australian Architecture II or 2891 Australian Architecture and Landscapes II.

contact hours: up to 2 hours of lectures and up to 3 hours of tutorials per week

content: see 2891 Australian Architecture and Landscapes II

assessment: tutorial papers (40%) and final essay (60%)

**3468 Building Design Studio III**

level: III points value: 6 duration: semester 2

pre-requisite: 8400 Design and Environments II

assumed knowledge: 4371 Issues in Urban Sustainability III

restriction: 8650 Landscape Design Studio III, 2067 Urban Design Studio III

contact hours: up to 6 hours of lectures/seminars/studios per week

content: In this subject students will apply their skills in formal composition and knowledge of precedent to the design of small buildings. Emphasis will be placed on the use of materials, structure and construction, responses to the local environments, and life-cycle costings.

assessment: assignments and projects (100%)

### **2258 Computer-Aided Design IIIA**

*level:* III *points value:* 6 *duration:* semester 2

*quota:* will apply

*availability:* even years only

*pre-requisite:* 9091 Computer-Aided Design I or 1530 Computer-Aided Design II

*restriction:* 2258 Computer Methods in Architecture IIIA or 8804 Computer-Aided Design IIA

*contact hours:* up to 5 hours per week

*content:* The construction of mathematical models in design and their representation and implementation as computer algorithms, with architecture and urban design as context. The subject includes a critical examination of computer hardware, software and operating systems as they relate to design offices.

*assessment:* assignments (100%)

### **4903 Computer-Aided Design IIIB**

*level:* III *points value:* 6 *duration:* semester 2

*quota:* will apply

*availability:* odd years only

*pre-requisite:* 9091 Computer-Aided Design I or 1530 Computer-Aided Design II

*restriction:* 4903 Computer Methods in Architecture IIIB or 3602 Computer-Aided Design IIB

*contact hours:* up to 5 hours a week

*content:* Advanced theories and models of computer-aided design (CAD), with architecture and urban design as context. CAD paradigms for design description, generation and evaluation are examined, with selected topics from parametric design, computational design, expert systems, knowledge engineering, simulation and optimisation.

*assessment:* assignments (100%)

### **1287 Conservation in the Built Environment III**

*level:* III *points value:* 6 *duration:* semester 1

*quota:* will apply

*availability:* even years only

*assumed knowledge:* 4168 Built Environments I

*restriction:* 4125 Conservation in the Built Environment II

*contact hours:* up to 5 hours per week

*content:* see 4125 Conservation in the Built Environment II

*assessment:* assignments (100%)

### **3547 Critiques, Theories and Architectural History III**

*level:* III *points value:* 6 *duration:* semester 1

*availability:* consult Department of Architecture

*restriction:* 6528 History and Theories of Architecture III or 3547 History and Theories of Architecture IIIB

*contact hours:* up to 2 lectures and 3 seminar hours per week

*content:* A topic will be offered of a specialised nature concerning architectural history. Drawing on the works of prominent writers in modern cultural studies such as Walter Benjamin and Michel Foucault, this subject will focus on developing techniques of historical study and for examining various historical methodologies.

*assessment:* assignments (100%)

### **8660 Islamic Architecture and Gardens III**

*level:* III *points value:* 6 *duration:* semester 1 or 2

*quota:* will apply

*availability:* odd years only

*restriction:* 2472 Islamic Architecture and Gardens II

*contact hours:* up to 2 hours of lectures and up to 3 hours of tutorials per week

*content:* see 2472 Islamic Architecture and Gardens II.

*assessment:* assignments(100%)

### **6886 Issues in Landscape Sustainability III**

*level:* III *points value:* 6 *duration:* semester 1

*pre-requisite:* 8400 Design and Environments II

*restriction:* 4321 Energy, Environment and Buildings III, 2719 Design, Ideologies and Institutions III, 4371 Issues in Urban Sustainability III

*contact hours:* up to 6 hours of lectures/seminars/studios per week

*content:* This subject will centre upon 'place-making' in urban environments. It will focus on the diversity of philosophical positions which inform current approaches to urban ecology understood in its widest sense, including not only the 'environmental', but the resource, cultural, social, political, economic, institutional and professional realms.

The project-based learning program will offer a context in which students will develop knowledge and skills required in the creation of landscapes in 'sustainable' urban environments, and will explore opportunities and constraints affecting the development of such environments.

*assessment:* assignments and projects (100%)

**4371 Issues in Urban Sustainability III**

level: III points value: 6 duration: semester 1  
pre-requisite: 8400 Design and Environments II

restriction: 4321 Energy, Environment and Buildings III, 2719 Design, Ideologies and Institutions III, 6886 Issues in Landscape Sustainability III

contact hours: up to 6 hours of lectures/seminars/studios per week

content: This subject will centre upon 'place-making' in urban environments. It will focus on the diversity of philosophical positions which inform current approaches to urban ecology understood in its widest sense, including not only the 'environmental', but the resource, cultural, social, political, economic, institutional and professional realms.

The project-based learning program will offer a context in which students will develop knowledge and skills required in the creation of buildings in 'sustainable' urban environments, and will explore opportunities and constraints affecting the development of such environments.

assessment: assignments and projects (100%)

**8650 Landscape Design Studio III**

level: III points value: 6 duration: semester 2  
pre-requisite: 8400 Design and Environments II

assumed knowledge: 6886 Issues in Landscape Sustainability III

restriction: 3468 Building Design Studio III, 2067 Urban Design Studio III

contact hours: up to 6 hours of lectures/seminars/studios per week

content: In this subject students will apply their skills in formal composition and knowledge of precedent to the design of a small to medium sized park, allotment or place. Emphasis will be placed on design, use of materials and plants, any installations and their construction, the design's responses to the local environment, and life-cycle costings.

assessment: assignments and projects (100%)

**9218 Plants and Design III**

level: III points value: 6 duration: semester 2  
quota: will apply

restriction: 8904 Plants and Design II

contact hours: up to 6 hours of lectures/seminars/studios per week with occasional field study trips

content: see 8904 Plants and Design II

assessment: assignments and projects (100%)

**2784 Special Topic in Design Studies IIIA**

level: III points value: 6 duration: semester 1  
quota: will apply

availability: consult Department of Architecture

contact hours: up to 5 hours a week

content: see 8221 Special Topic in Design Studies IIA

assessment: assignments and projects (100%)

**8842 Special Topic in Design Studies IIIB**

level: III points value: 6 duration: semester 2  
quota: will apply

availability: consult Department of Architecture

contact hours: up to 5 hours a week

content: see 3266 Special Topic in Design Studies IIB

assessment: assignments and projects (100%)

**7273 Special Topic in Design Studies IIIC**

level: III points value: 6  
duration: semester 1 or 2 or Summer

quota: will apply

availability: consult Department of Architecture

contact hours: up to 6 hours of lectures/seminars/studios per week with occasional field study trips

content: see 1425 Special Topic in Design Studies IIC

assessment: assignments and projects (100%)

**2067 Urban Design Studio III**

level: III points value: 6 duration: semester 2  
pre-requisite: 8400 Design and Environments II

assumed knowledge: 4371 Issues in Urban Sustainability III

restriction: 3468 Building Design Studio III, 8650 Landscape Design Studio III

contact hours: up to 6 hours of lectures/seminars/studios per week

content: In this subject students will apply their skills in formal composition and knowledge of precedent to the design of urban spaces.

assessment: assignments and projects (100%)

## Level IV

---

### 2493 Honours Design Studies

*level:* IV    *points value:* 24    *duration:* full year  
*assumed knowledge:* consult the Head of the Department of Architecture

*contact hours:* Discussions with supervisor, occasional seminars, laboratory sessions as appropriate

*content:* Students will be required to undertake supervised research in one or two advanced topics, thereby developing a thorough understanding of appropriate research techniques. The outcome of this research will be submitted in the form of a substantial essay or research report including a survey of the literature relevant to the topic(s) chosen. The range of topics to be offered in any year will depend on staff availability. Topics which can be expected to be offered from time to time include:

- Architectural and Landscape Architectural History
- Australian Architectural and Landscape Architectural History
- Australian Urban Design History and Practice
- Computer-Aided Design
- Computer Applications in Architecture, Landscape Architecture or Urban Design
- Conservation in the Built Environment
- Criticism and Architecture and Landscape Architecture
- Cross-Cultural Architectural and Landscape Architectural Topics
- Dryland Landscape Design
- Ergonomics
- Heritage Conservation and Cultural Landscapes
- Housing
- Islamic Architecture and Garden Design
- Plants in Design
- Rainfall and Buildings
- Solar Access
- South East Asian Architecture and Landscape Architecture
- Theories in Modern Architecture and Landscape Architecture
- Thermal Design of Buildings
- Tropical Architecture and Landscape Architecture

Urban Design Histories and Theories

Urban Design in Islamic or South East Asian Places

Urban Ecology

Wind and Buildings

Subject to the approval of the Head of the Department of Architecture and with the agreement of the other Department concerned, a subject equivalent to 12 points at Level IV taught in another department may be taken as part of this subject.

*assessment:* progress 30%, final presentation 70%

## Bachelor of Architecture

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar.

As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

### Specific Course Rules

#### Aims and objectives

The Bachelor of Architecture (B.Arch.), open only to graduates, is a second degree in the practice of architecture. Studio-based, it is project-oriented and concerned with the technical and practical matters of practice within a philosophical and theoretical context of professional ethics, aesthetics and style, performance specification and management, and the many other issues that concern practitioners. Entrants to the degree are graduates who have demonstrated abilities to link critical thought and creative action. Graduates of the degree should have:

- acquired knowledge and skills sufficient for early stages of directed activity in an existing architectural practice
- developed intellectual and creative approaches and adaptability to form a basis for continued learning and development throughout professional life

Entrants to the degree come from two main groups:

- Graduates of the B.Arch.St. or B.Des.St. (with an Architectural Studies major) of The University of Adelaide, or an equivalent degree
- Other graduates who have demonstrated capabilities to enter the degree, generally through completing some qualifying studies

#### Educational objectives

The curriculum and teaching of the degree will have both substantive and instrumental objectives. Substantive objectives pertain to knowledge of the nature of architectural practice. Instrumental objectives pertain to skills and techniques relevant to operating as an architect.

#### Substantive objectives

The profession of architecture  
Ethics and the environmental, social and legal responsibilities of the profession of architecture.

#### Architectural services

The recognition of situations where an architect can contribute, the formulation of appropriate strategies, and appropriate pre-design, design, project management and post construction services.

Processes in developing designs, including the development of a brief, and the outline, assessment, detailed design and costing of proposals in conformity with codes and other requirements.

The organisation, management and documentation associated with building construction and the administration of building contracts.

The marketing of architectural services.

The technology of architecture.

Building planning, construction, structure and services as they relate to new buildings and alterations to existing buildings.

The architect in relation to other professions, organisations and the building industry

The relationship of architects to builders, structural and building services engineers, landscape architects, interior designers, urban designers, planners, and others involved in the creation of the built environment.

The relationship of the profession of architecture to statutory authorities and to the building industry.

#### Instrumental objectives

##### Designing

The practice of architectural design, emphasising the pervasion of design from planning to detailing and the interrelationship of aesthetic, economic, environmental, legal, societal and individual reactions, and technical factors, and the nature of design as a group activity.

##### Surveying

Land and building surveying.

## Communicating

The communication and documentation of designs as a part of the individual and group design process and for clients, construction, public presentation and statutory authorities.

The preparation of professional reports.

## Managing

The management and operation of an architectural practice and the activities of an architectural practice.

## 1 General

- 1.1 There shall be an Ordinary and an Honours degree of Bachelor of Architecture. A candidate may obtain either the Ordinary degree or the Honours degree but not both.

## 2 Assessment and examinations

- 2.1 A candidate shall not be eligible to attend for examination unless the prescribed work has been completed to the satisfaction of the teaching staff concerned
- 2.2 In determining a candidate's final result in a subject (or part of a subject) the examiners may take into account oral, written, practical and examination work, provided that the candidate has been given adequate notice at the commencement of the teaching of the subject of the way in which work will be taken into account and of its relative importance in the final result.
- 2.3 There shall normally be four classifications of pass in the final assessment of any subject for the Ordinary degree, as follows: Pass with High Distinction, Pass with Distinction, Pass with Credit, Pass. If the Pass classification be in two divisions a pass in the higher division may be prescribed in the syllabuses as a prerequisite for admission to further studies in that subject or to other subjects. Results in certain subjects as specified in the relevant Specific Course Rules will not be classified.
- 2.4 A candidate who fails a subject or who obtains a lower division pass and who desires to take that subject again shall, unless exempted wholly or partially therefrom by the Head of the department concerned, again complete the required work in that subject to the satisfaction of the teaching staff concerned.

## 3 The Honours degree

- 3.1 There shall be three classifications for the Honours degree as follows: First Class, Second Class and Third Class. The Second Class

classification shall be divided into two divisions as follows: Division A and Division B. A candidate who fails to obtain Honours shall be awarded an Ordinary degree provided all requirements for the Ordinary degree are satisfactorily completed.

## 4 Status, exemption and credit transfer

- 4.1 A candidate who has passed subjects in the Faculty of Architecture and Urban Design or in other faculties of the University or in other educational institutions may on written application to the Registrar be granted such exemption from these Specific Course Rules as the Faculty may determine, save that a candidate shall always be required to satisfy the examiners in all subjects of the final year of the course.
- 4.2 (a) A candidate who has completed subjects under any repealed regulations for the degree of Bachelor of Architecture shall have status in equivalent subjects under these Specific Course Rules; and
- (b) A candidate who first enrolled in the course for the degree of Bachelor of Architecture before 1987 shall satisfy the examiners in all of the Group A, Group B and Group C practice subjects, or the equivalent, listed in Schedule III of the degree which is contained in the University Calendar for 1987, Volume 2, p. 492.

## 5 Admission requirements

- 5.1 Subject to quotas and selection procedures currently operating in the Faculty, and subject to the approval of the Faculty of Architecture and Urban Design (and the Council) where required, an applicant may be considered for admission if one or more of the following prerequisites are satisfied:
- (a) Completion of the degree of Bachelor of Architectural Studies or the Bachelor of Design Studies with an Architectural studies major.
- (b) Completion in The University of Adelaide or another university of a degree which is approved by the Faculty as equivalent for the purpose to the degree of either the Bachelor of Architectural Studies or the Bachelor of Design Studies with an Architectural Studies major.

- (c) Completion in The University of Adelaide of the Graduate Diploma in Design Studies.
- (d) Completion in another institution of the first three years of an approved Architecture course.
- (e) The holding of qualifications which satisfy the Faculty of the candidate's fitness to undertake work for the degree after the completion of qualifying studies as prescribed in Specific Course Rule 6.

## 6 Qualifying studies

- 6.1 An applicant may be selected for admission under Specific Course Rules 5(b) or 5(e) subject to satisfactory completion of such qualifying studies as determined by the Faculty after consideration of advice from the Head of the Department of Architecture.
- 6.2 Qualifying studies will be undertaken preceding the candidate's entry to the Bachelor of Architecture course.
- 6.3 Qualifying studies will normally comprise fulfilment of the requirements of the Graduate Diploma in Design Studies; in unusual cases the Faculty may approve different studies, after consideration of advice from the Head of the Department of Architecture.
- 6.4 Candidates undertaking qualifying studies must successfully complete those studies before they may undertake subjects of the Bachelor of Architecture course.
- 6.5 On the recommendation of the Head of the Department of Architecture a supplementary examination may be offered to a candidate undertaking qualifying studies.
- 6.6 A candidate who fails all or part of the qualifying studies may repeat them in another year only with permission of the Faculty after it has considered advice from the Head of the Department of Architecture.

## 7 The Ordinary degree

### 7.1 Course of study

- (a) The course of study for the Ordinary degree shall normally extend over three years of full-time study. Students shall pass subjects to the value of at least 24 points at each of the three levels. The points values of the subjects are contained in this Specific Course Rule and in the Syllabuses.

- (b) To qualify for the degree a candidate shall undertake the requirements of and satisfy the examiners in the following subjects:

code	subject title	points
<b>Level I</b>		
8448	Architecture IA	6
8711	Architecture IB	6
7540	Architecture IC	6
5951	Architecture ID	6
<b>Level II</b>		
3710	Architecture II	10
5269	Architectural Design Practical Experience	8
9329	Architectural Design Seminar	2
7372	Architectural Management and Practice IIA	2
7441	Architectural Management and Practice IIB	2
<b>Level III</b>		
7444	Architecture IIIA	6
9121	Architecture IIIB	6
8297	Architecture IIIC	12

- (c) A graduate in another faculty or other educational institution who wishes to qualify for the Ordinary degree of Bachelor of Architecture in the Faculty of Architecture and Urban Design and to count towards that degree subjects which have already been presented for another degree may do so provided such a candidate presents a range of subjects which match the objectives and scope of the subjects of that degree, including subjects to the value of 36 points which must include compulsory Level III subjects to the value of at least 24 points which have not been presented for any other degree.

Students with extensive documented practical experience in architecture offices may be given standing in 5269 Architectural Design Practical Experience (8 points) and 9329 Architectural Design Seminar (2 points) within this required 36 points.

## 7.2 Order of subjects

### Entry to Level II:

A candidate may not enrol in Level II subjects unless he or she has passed at least three of 8448 Architecture IA, 8711 Architecture IB, 7540 Architecture IC and 5951 Architecture ID.

### Entry to Level III:

A candidate may not enrol in Level III subjects unless:

- (a) he or she has passed all of the Level I subjects.
- (b) he or she has passed 3710 Architecture II.

## 7.3 Approval of course of study at enrolment

Courses of study must be approved by the Dean of the Faculty (or nominee) at enrolment each year.

## 7.4 Assessment and examinations

In the case of the subject 9329 Architectural Design Seminar no supplementary examinations are granted except in exceptional circumstances as determined by the Head of the Department of Architecture.

The results in the subjects 5269 Architectural Design Practical Experience and 9329 Architectural Design Seminar will not be classified.

## 7.5 Status, exemption and credit transfer

Exemption or status will not be granted in any Level III subject undertaken for the first time.

## 7.6 Students enrolled before 1989

- (a) No candidate will be disadvantaged because of changes in subjects resulting from semesterisation of the academic year.
- (b) Candidates who passed subjects in the course for the degree of Bachelor of Architecture and/or who have been granted status on account of studies passed at another tertiary institution before 1989 will be given credit for those subjects in the 72-point degree structure introduced in 1989.

(c) If as a result of course changes in 1989 a candidate undertakes a subject which contains elements satisfactorily completed in subjects undertaken before 1989, the candidate may apply to the Faculty to be exempted from attendance in any portion of a subject previously passed.

(d) When in the opinion of the Faculty special circumstances exist, the Council on the recommendation of the Faculty in each case may vary any of the provisions of this Clause.

Candidates should consult the Faculty Registrar on the points values of subjects in Schedule III of the degree of Bachelor of Architecture before 1989.

## 7.7 Students enrolled before 1994

No candidate will be disadvantaged because of changes in the syllabuses from 1994.

## 8 The Honours degree

8.1 A candidate who wishes to proceed to the Honours degree must obtain the approval of the Head of the Department of Architecture, normally by 15 December of the year preceding enrolment.

8.2 A candidate for the Honours degree in addition to completing the full course prescribed for the Ordinary degree shall also attend classes regularly and pass examinations in an additional subject 3918 Advanced Studies in Architecture.

8.3 In order to qualify for the award of Honours, a candidate must, in addition to satisfying the examiners in the advanced subject 3918 Advanced Studies in Architecture, also achieve a high classification of pass in the Level III subjects for the Ordinary degree.

8.4 A document setting out guidelines approved by the Faculty which contains requirements for admission and the criteria for the award of the Honours degree is available from the Department of Architecture.

note: The subjects to be offered in a particular year will depend upon the availability of staff.

## Syllabuses

### textbooks

Information on appropriate textbooks will be provided by the Department concerned, and at the preliminary lecture in Orientation Week. Students are expected to have their own copies of books, but are advised to await advice from the lecturer concerned before buying any particular book. Only the prescribed edition of any book should be bought.

### reference books

Although lists of books and journals for reference purposes are regarded as important, details have not been included in this Volume. These will however be issued from time to time by the Department of Architecture.

### examinations

For each subject students may obtain from the department concerned details of the examination in that subject including the relative weights given to the components (eg such of the following as are relevant: assessments, semester tests, essays or other written or practical work, final written examinations, viva voce examinations).

## Bachelor of Architecture 1996

### Level I

code	subject title	points
<i>semester 1</i>		
8448	Architecture IA	6
8711	Architecture IB	6
<i>semester 2</i>		
7540	Architecture IC	6
5951	Architecture ID	6

### Level II

<i>semester 1</i>		
7372	Architectural Management and Practice IIA	2
3710	Architecture II	10
<i>semester 2</i>		
7441	Architectural Management and Practice IIB	2
5269	Architectural Design Practical Experience	8
9329	Architectural Design Seminar	2

### Level III

#### *semester 1*

7444	Architecture IIIA	6
9121	Architecture IIIB	6
3918	Advanced Studies in Architecture (for approved students only)	3

#### *semester 2*

8297	Architecture IIIC	12
------	-------------------	----

### Level I

#### **8448 Architecture IA**

*level:* I      *points value:* 6      *duration:* semester 1

*contact hours:* up to 18 hours average of lectures/tutorials/workshop.

Note: contact hours will vary from week to week.

*content:* A project-based learning program integrating design and the technology and practices of construction, structures, materials and building services, within a theoretical and historical context; taking account of human (physiological, social and cultural) and ecological factors.

Architecture IA will typically be focused on the design of a small public building such as a visitor centre or a cafe, on a significant site in a rural setting. Students will be required to undertake and document a survey of the site, and develop a brief from the client's instructions and other contextual information. Theory and practice relating to the design, construction and structure of small steel-framed buildings will be studied and applied.

Students will be expected to explore a design 'parti' and its sources and precedents, to explain design intentions and communicate the architectural intentions of the building design, and to demonstrate that they understand its potential construction and performance.

There will be an emphasis on the interior design and the performance of the building in relation to ergonomics and daylighting. Skills which will be further developed in the context of design include techniques of two-dimensional representation such as free-hand drawing and drafting, verbal communication and public presentation, graphic analysis and simulation, and model-making.

Lectures given in the subject will complement the design process, addressing the topics outlined above.

*assessment:* assignments (100%)

These may include written, verbal and graphical (2 dimensional and 3 dimensional) communication, as outlined in the detailed assessment information which will be available early in the project. Assessment will be in two equally weighted components\*; to pass the subject a mark of at least 50% must be obtained for each component.

### **8711 Architecture IB**

*level:* I     *points value:* 6     *duration:* semester 1  
*contact hours:* up to 18 hours average of lectures/tutorials/workshops

Contact hours will vary from week to week.

*content:* A project-based learning program integrating design and the technology and practices of construction, structures, materials and building services, within a theoretical and historical context; taking account of human (physiological, social and cultural) and ecological factors.

Architecture IB will typically be focused on the design of a dwelling (or small group of dwellings) on a real site, with a particular owner-occupier as client. Students will be required to develop a brief from the client's instructions. Theory and practice regarding a range of aspects of low-rise domestic construction (including site preparation, footings, light timber framing and masonry construction) will be applied.

Students will be expected to explore a design 'parti' and its sources and precedents, to explain design intentions and communicate the architectural intentions of the building design, and to demonstrate that they understand its potential construction and performance.

There will be an emphasis on the lighting and thermal performance of the building and associated energy use, in the context of the client's requirements.

Lectures given in the subject will complement the design process, addressing the topics outlined above.

*assessment:* assignments (100%)

These may include written, verbal, and graphical (2 dimensional and 3 dimensional) communication, as outlined in the detailed assessment information which will be available early in the project. Assessment will be in two equally weighted components\*; to pass the subject a mark of at least 50% must be obtained for each component.

### **7540 Architecture IC**

*level:* I     *points value:* 6     *duration:* semester 2  
*contact hours:* up to 18 hours average of lectures/tutorials/workshops

Contact hours will vary from week to week.

*content:* A project-based learning program integrating design and the technology and practices of construction, structures, materials and building services, within a theoretical and historical context; taking account of human (physiological, social and cultural) and ecological factors.

Architecture IC will typically be focused on the design of a building alteration and refurbishment, requiring facilities planning, the survey and measuring of an existing building, and the preparation of measured drawings and dilapidation reports. It will also address issues arising in building conservation and the insertion of new buildings into heritage areas. There will be emphasis on structural assessment, materials characteristics and selection, plumbing and electrical services, and lighting.

Lectures given in the subject will complement the design process, addressing the topics outlined above. There will be a field trip of approximately 1 week to visit projects relevant to this and other Architecture I subjects.

*assessment:* assignments (100%)

These may include written, verbal, and graphical (2 dimensional and 3 dimensional) communication, as outlined in the detailed assessment information which will be available early in the project. Assessment will be in two equally weighted components\*; to pass the subject a mark of at least 50% must be obtained for each component.

### **5951 Architecture ID**

*level:* I     *points value:* 6     *duration:* semester 2  
*contact hours:* up to 18 hours average of lectures/tutorials/workshops

Note: contact hours will vary from week to week.

*content:* A project-based learning program integrating design and the technology and practices of construction, structures, materials and building services, within a theoretical and historical context; taking account of human (physiological, social and cultural) and ecological factors.

Architecture ID will typically be focused on the design of a school, child-care centre, nursing home or similar low-rise building where the needs of a particular group of building users must be understood and addressed. The problem will involve site planning and landscape design issues. Theory regarding the design, construction and structure of low-rise concrete (precast and/or in situ) buildings will be studied and applied. There will be emphasis on the acoustic performance of the building and on site infrastructure.

Lectures given in the subject will complement the design process, addressing the topics outlined above.

*assessment:* assignments (100%)

These may include written, verbal, and graphical (2 dimensional and 3 dimensional) communication, as outlined in the detailed assessment information which will be available early in the project. Assessment will be in two equally weighted components\*; to pass the subject a mark of at least 50% must be obtained for each component.

\* components:

Component A will include the realisation and communication of architectural ideas in three dimensions in relation to a design situation.

Component B will include the technical description and justification of architectural designs.

The content of each component for each subject will be specified at the beginning of each subject.

## Level II

---

### 3710 Architecture II

*level:* II    *points value:* 10    *duration:* semester 1

*prerequisite:* see Bachelor of Architecture, Specific Course Rule 7.2

*contact hours:* up to 18 hours average of lectures/tutorials/workshops

*Note:* contact hours will vary from week to week.

*content:* A project-based learning program in which students will develop their abilities to define the problem, bringing together the regulatory, technical, human (including social and cultural) and environmental factors studied in Level I, and other facets of the theory and practice of design in architecture.

Architecture II will typically be focused on the design of a mixed-use commercial multi-storey building located in a central business district and raising significant urban design issues. The project will be taken from early (facilities planning) to late (documentation) stages and beyond to post-occupancy evaluation, and will mirror in an educational setting many of the processes carried out in an architectural office. Other, minor, projects will typically involve the schematic design of a sports hall, warehouse, or similar large-span building and a suburban or rural site. Topics which will be emphasised include urban design; design in relation to fire safety and regulations; mechanical services (including heating, ventilation and air conditioning) electrical services; water supply and drainage; excavation and footings; materials and finishes; repetition of building material and industrialised components; joinery construction.

Lectures given in the subject will complement the design process addressing the topics outlined above.

*assessment:* assignments (100%)

These may include written, verbal, and graphical (2 dimensional and 3 dimensional) communication, as outlined in the detailed assessment information which will be available early in the project. Assessment will be in two equally weighted components\*; to pass the subject a mark of at least 50% must be obtained for each component.

\* components:

Component A will include the realisation and communication of architectural ideas in three dimensions in relation to a design situation.

Component B will include the technical description and justification of architectural design.

### 5269 Architectural Design Practical Experience

*level:* II    *points value:* 8    *duration:* semester 1 or 2

*prerequisite:* 9792 Architectural Design I or 9204 Architectural Design I(P) or 2220 Architectural Design IS or 8448 Architecture IA, 8711 Architecture IB, 7540 Architecture IC and 5951 Architecture ID

*contact hours:* over 20 weeks, 30 hours a week office work (or the equivalent part-time)

*content:* Approved engagement with an architectural office or elsewhere in the building industry or if such work is not available a practical or supervised project related to the practice of architecture.

*assessment:* report, diary and associated documents, submitted by the end of the third week of January in the year following enrolment in this subject

### 9329 Architectural Design Seminar

*level:* II    *points value:* 2    *duration:* semester 1 or 2

*prerequisites:* 9792 Architectural Design I or 9204 Architectural Design I(P) or 2220 Architectural Design IS or 8448 Architecture IA, 8711 Architecture IB, 7540 Architecture IC and 5951 Architecture ID

*contact hours:* 2 hours of seminars a week during semester 1 or 2

*content:* Issues of architectural design and practice, drawing on the concurrent work in practice and/or other supervised approved work being undertaken by students.

*assessment:* seminar papers

### 7372 Architectural Management and Practice IIA

*level:* II    *points value:* 2    *duration:* semester 1

*contact hours:* 3 (sometimes 2) hours of lectures a week

*content:* Topics include organisational theory; principles of law; the general organisation of architectural practice including the management of an office's human, physical and financial resources, the relationship between architects and their clients; consultants and contractors; contract administration; specifications.

*assessment:* examination (100%)

#### **7441 Architectural Management and Practice IIB**

*level:* II *points value:* 2 *duration:* semester 2

*contact hours:* 3 (sometimes 2) hours of lectures/tutorials a week

*content:* Topics include the legal qualifications of an architect; professional organisations; ethics; risk management and professional liability; planning and building law and regulations; problems facing the architect today; estimating and cost control; bills of quantities; the role of the quantity surveyor; project management; the range of services offered by architects. A number of visits to architectural offices will be organised.

A student is expected to be in possession of a current copy of the Building Code of Australia and its associated commentary, as a requirement of this subject.

*assessment:* examination (100%)

### **Level III**

---

#### **7444 Architecture IIIA**

*level:* III *points value:* 6 *duration:* semester 1

*prerequisite:* See Bachelor of Architecture, Specific Course Rule 7.2

*contact hours:* up to 18 hours average of lectures/tutorials/workshops

Note that these contact hours may not be evenly distributed from week to week.

*content:* this subject aims to develop design skills in an holistic sense bringing together regulatory, technical, human (including social and cultural) and environmental factors. The materials will be developed through integrated projects. Lectures given in the subject will complement the design process addressing the topics outlined above.

*assessment:* projects (100%)

#### **9121 Architecture IIIB**

*level:* III *points value:* 6 *duration:* semester 1

*prerequisites:* See Bachelor of Architecture, Specific Course Rule 7.2

*contact hours:* up to 18 hours average of lectures/tutorials/workshops

Note that these contact hours may not be evenly distributed from week to week.

*content:* This subject aims to develop design skills in an holistic sense bringing together regulatory, technical, human (including social and cultural) and environmental factors. The material will be developed through integrated projects. The studio projects will be topics not treated in 7444 Architecture IIIA. Lectures given in the subject will complement the design process addressing the topics outlined above.

*assessment:* projects (100%)

#### **8297 Architecture IIIC**

*level:* III *points value:* 12 *duration:* semester 2

*prerequisites:* See Bachelor of Architecture, Specific Course Rule 7.2

*assumed knowledge:* 7444 Architecture IIIA and 9121 Architecture IIIB

*contact hours:* up to 20 hours a week studio work, with specialist lectures irregularly spaced

*content:* A single project, from a limited selection, which will be of moderate complexity. Responses should demonstrate all phases of architectural designing; sketch plans, technical development including one specialised topic, and a final presentation which should show a thorough integration of all major aspects of the course.

*assessment:* final project (100%)

#### **3918 Advanced Studies in Architecture**

*level:* III *points value:* 3 *duration:* semester 1

Students wishing to take Advanced Studies in Architecture on a part time basis should consult the Faculty Registrar.

*prerequisite:* admission will be selective, based on prior results. Selection guidelines available in the Department of Architecture.

*contact hours:* 1 two hour tutorial/seminar weekly

*content:* Students will be required to undertake supervised research into a particular topic, leading to the presentation of a seminar paper and submission of a final essay or report of the order of 4000 words.

Topics offered for this subject will depend upon staff availability. Examples of topics which can be expected from time to time are:

- Architectural History
- Architectural Theories in Modern Architecture
- Australian Architectural History
- Building Fire Safety Systems
- \*Building Materials and Performance
- Computer-Aided Design
- Computer Applications in Architecture
- Criticism and Architecture
- Conservation in the Built Environment
- \*Daylight Studies
- \*Energy in Buildings
- Ergonomics
- Housing
- Rainfall and Buildings
- Solar Access
- Urban Design
- Wind and Buildings

Those with an asterisk may require experimental work in the Building Science Laboratory.

## Bachelor of Landscape Architecture

(to be offered for the first time in 1997)

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar.

As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

### Specific Course Rules

#### Aims and objectives

Graduates enrolled in the degree of Bachelor of Landscape Architecture, the degree of Master of Landscape Architecture<sup>1</sup>, the degree of Master of Design Studies (Landscape), the Graduate Diploma in Design Studies (Landscape) and Graduate Certificate in Design Studies (Landscape) collectively comprise the Landscape Architecture Program.

The postgraduate Bachelor of Landscape Architecture (B.L.Arch.) is a second degree intended for graduates wishing to practise or participate in the discipline of landscape architecture. Studio-based, it is project-oriented concerned with the technical and practical matters of landscape architecture research and practice within a philosophical and theoretical context of professional ethics, aesthetics and style, performance specification and management, and the many other issues that concern practitioners. Entrants to the degree are graduates who have demonstrated abilities to link critical thought and creative action.

The *Mission* of the Landscape Architecture Program is to be at the forefront of Australian landscape architecture practice that successfully integrates nature and culture together as key constructs for designs and strategies that are innovative, sustainable and culturally attuned.

*Program Objectives* to achieve this *Mission* are to:

- *establish an incremental suite of projects and studio foci that reinforce the Mission,*
- *interlink with and co-operatively involve the participation of the profession and allied disciplines to advance landscape architecture knowledge,*
- *foster reflection-in-action and lifelong learning strategies,*
- *establish a community profile for the discipline through projects, research, exhibitions, conferences, publications, and community participation,*

- *establish a strong and co-operative educational profile with allied disciplines within The University of Adelaide environment.*

Graduates of the Bachelor of Landscape Architecture degree should:

- have acquired knowledge and skills sufficient for early stages of directed activity in an existing landscape architectural practice.
- have developed intellectual and creative approaches and adaptability to form a basis for continued learning and development throughout professional life.

Entrants to the Bachelor of Landscape Architecture degree come from two main groups:

- Graduates of the B.Des.St. with a Landscape major and Grad.Dip.Des.St. (Landscape) of The University of Adelaide, or an equivalent degree.
- Other graduates who have demonstrated capabilities to enter the degree, generally through completing some qualifying studies.

#### Educational objectives

The curriculum and teaching of the Bachelor of Landscape Architecture degree will have both substantive and instrumental objectives. Substantive objectives pertain to knowledge of the nature of landscape architectural practice. Instrumental objectives pertain to skills and techniques relevant to operating as a landscape architect.

#### Substantive objectives

The profession of landscape architecture Ethics and the environmental, social and legal responsibilities of the profession of landscape architecture.

#### Landscape architectural services

The recognition of situations where a landscape architect can contribute, the formulation of appropriate strategies, and appropriate pre-design, design, project management and post construction services.

<sup>1</sup> subject to approval

Processes in developing designs, including the development of a brief, and the outline, assessment, detailed design and costing of proposals in conformity with codes and other requirements.

The organisation, management and documentation associated with construction and the administration of contracts.

The marketing of landscape architectural services.

The technology of landscape architecture.

Site planning, construction, vegetation and habitat provision, water systems and hydrology, structures and services as they relate to new buildings, alterations, and site planning and design interventions.

The landscape architect in relation to other professions, organisations and the building industry

The relationship of landscape architects to builders, structural and building services engineers, architects, interior designers, urban designers, planners, and others included in the creation of the built environment and human-dominated and shaped landscapes.

The relationship of the profession of landscape architecture to statutory authorities and to the design industry.

### Instrumental objectives

#### Designing

The practice of landscape architectural design, emphasising the pervasion of design from planning to detailing and the interrelationship of aesthetic, economic, environmental, legal, societal and individual reactions, and technical factors, and the nature of design as a group activity.

#### Site Planning

The practice of comprehending and taking advantage of variables relevant to site planning including flora, fauna, soils, water systems, energy systems, building materials, human activities and desires, heritage conservation and the poetics of space, site and structure assembly and arrangement, etc.

#### Communication

The communication and documentation of designs as a part of the individual and group processes and for clients, construction, public presentation and statutory authorities.

The preparation of professional reports.

#### Managing

The management and operation of a landscape architectural practice and the activities of a landscape architectural practice.

## 1 General

1.1 A candidate for admission to the course of study for the degree of Bachelor of Landscape Architecture must have obtained:

- (a) the Ordinary and/or Honours degree of Bachelor of Design Studies of The University of Adelaide subject to successful completion of subjects comprising the Landscape Studies major; or
- (b) the Graduate Diploma in Design Studies (Landscape) of The University of Adelaide or an equivalent award from another educational institution accepted by the University for the purpose; or
- (c) the Ordinary and/or Honours degree of Bachelor of Architecture of The University of Adelaide or an equivalent award from another educational institution accepted by the University for the purpose; or
- (d) the Ordinary and/or Honours degree of Bachelor of Landscape Architecture or Bachelor of Architecture or an equivalent award from another educational institution accepted by the University for the purpose.

1.2 Subject to the approval of the Faculty, the Head of Department may in special cases and subject to such conditions (if any) as the Head of Department may see fit to impose in each case, accept as a candidate for the Bachelor of Landscape Architecture an applicant who does not hold the qualifications specified in 1.1 above but who has given evidence satisfactory to the Head of Department of fitness to undertake work for the Bachelor of Landscape Architecture.

1.3 A candidate accepted under 1.1 and 1.2 above may be required to satisfactorily complete such preliminary work or qualifying studies as the Head of Department may determine.

1.2 Subject to the approval of the Faculty, the Head of Department may in special cases and subject to such conditions (if any) as the Head of Department may see fit to impose in each case, accept as a candidate for the Bachelor of Landscape Architecture an applicant who does not hold the qualifications specified in 1.1 above but who has given evidence satisfactory to the Head of Department of fitness to undertake work for the Bachelor of Landscape Architecture.

1.3 A candidate accepted under 1.1 and 1.2 above may be required to satisfactorily complete such preliminary work or qualifying studies as the Head of Department may determine.

## 2 Status, exemption and credit transfer

- 2.1 A candidate who has passed postgraduate level subjects in the Faculty or in other faculties of the University or in other educational institutions, or Level IV subjects in a Bachelor of Landscape Architecture course of another educational institution, may on written application to the Dean be granted such exemption from these Specific Course Rules as the Faculty may determine.

## 3 Approval of course of study at enrolment

- 3.1 Each student's course of study shall be approved by the Dean of the Faculty (or nominee) at enrolment each year.

## 4 Duration of course

- 4.1 The course of study for the degree shall extend over two years of full-time study or the equivalent. Students shall pass subjects to the value of at least 24 points at each of the two levels. The point values of the subjects are contained in Specific Course Rule 6.1.

## 5 Qualifying Studies

- 5.1 A candidate may be selected for admission to the Bachelor of Landscape Architecture course under 1.1 or 1.2 subject to satisfactory completion of such qualifying studies as determined by the Faculty after consideration of advice from the Head of Department.
- 5.2 Qualifying studies will normally be undertaken on a full-time basis extending over a full year or on a part-time basis extending over two years preceding the candidate's entry to the Bachelor of Landscape Architecture and comprises subjects to the value of at least 24 points.
- 5.3 Qualifying studies will normally be those specified in Specific Course Rules 5.2 and 5.4 of the Graduate Diploma in Design Studies (Landscape); in unusual cases the Faculty may approve different studies, after consideration of advice from the Head of Department.
- 5.4 Approved electives will normally be selected from a list available from the Faculty Registrar; in unusual cases the Head of Department may approve different studies upon application by a candidate. In considering an application for elective choices the Head of Department shall have regard to the candidate's previous academic and practical experience.

- 5.5 Candidates undertaking qualifying studies must successfully complete those studies before they may undertake subjects of the Bachelor of Landscape Architecture.

- 5.6 On the recommendation of the Head of Department, a supplementary examination may be offered to a candidate undertaking qualifying studies.

- 5.7 A candidate who fails all or part of the qualifying studies may repeat them in another year only with the permission of the Faculty after it has considered advice from the Head of Department.

## 6 Courses of study/Subjects of Study

- 6.1 To qualify for the Ordinary degree of Bachelor of Landscape Architecture a candidate shall pass the following subjects to the value of at least 48 points:

### Level I

5688	Landscape Architecture Studio IA	6
6763	Landscape Architecture Studio IB	6
8024	Landscape Architecture Studio IC	6
1624	Landscape Architecture Studio ID	6

### Level II

9261	Landscape Architecture Studio II	6
2507	Landscape Architecture Seminar II	3
6817	Landscape Architecture Practice II	3
7625	Landscape Architecture Project II	12

- 6.2 A candidate who wishes to proceed to the Honours degree of Bachelor of Landscape Architecture must obtain the approval of the Head of Department, normally by December 15 of the year preceding enrolment.
- 6.3 A document setting out guidelines approved by the Faculty which contains requirements for admission and the criteria for the award of the Honours degrees is available from the Faculty Registrar.
- 6.4 A candidate for the Honours degree of Bachelor of Landscape Architecture in addition to completing the full course prescribed for the Ordinary degree shall also pass an additional subject 9186 Advanced Studies in Landscape Architecture II.
- 6.5 A candidate who fails to obtain Honours shall be awarded an Ordinary degree of Bachelor of Landscape Architecture provided all requirements for the Ordinary degree are satisfactorily completed.

## **7 Review of academic progress**

- 7.1** If in the opinion of the Faculty a candidate for the Bachelor of Landscape Architecture is not making satisfactory progress, the Faculty may, with the consent of the Council, terminate the candidature and the candidate shall cease to be enrolled for the degree.

## **8 Assessment and examinations**

- 8.1** There shall normally be four classifications of pass in the final assessment of any subject for the Ordinary degree, as follows: Pass with High Distinction, Pass with Distinction, Pass with Credit, Pass. If the Pass classification be in two divisions a pass in the higher division may be prescribed in the syllabuses as a prerequisite for admission to further studies in that subject or to other subjects. Results in certain subjects as specified in the relevant Specific Course Rules will not be classified.
- 8.2** A candidate shall not be eligible to attend for examination unless the prescribed work has been completed to the satisfaction of the teaching staff concerned.
- 8.3** In determining a candidate's final result in a subject (or part of a subject) the examiners may take into account oral, written, practical and examination work, provided that the candidate has been given adequate notice at the commencement of the teaching of the subject of the way in which work will be taken into account and of its relative importance in the final result.
- 8.4** A candidate who fails a subject or who obtains a lower division pass and who desires to take that subject again shall, unless exempted wholly or partially therefrom by the Head of the Department concerned, again complete the required work in that subject to the satisfaction of the teaching staff concerned.

## Syllabuses

### textbooks

Information on appropriate textbooks will be provided by the Department concerned, and at the preliminary lecture in Orientation Week. Students are expected to have their own copies of books, but are advised to await advice from the lecturer concerned before buying any particular book. Only the prescribed edition of any book should be bought.

### reference books

Although lists of books and journals for reference purposes are regarded as important, details have not been included in this Volume. These will however be issued from time to time by the Department of Architecture.

### examinations

For each subject students may obtain from the department concerned details of the examination in that subject including the relative weights given to the components (eg such of the following as are relevant: assessments, semester tests, essays or other written or practical work, final written examinations, *viva voce* examinations).

## Bachelor of Landscape Architecture 1997

### Level I

code	subject title	points
<i>semester 1</i>		
5688	Landscape Architecture Studio IA	6
6763	Landscape Architecture Studio IB	6
<i>semester 2</i>		
8024	Landscape Architecture Studio IC	6
1624	Landscape Architecture Studio ID	6

### Level II

<i>semester 1</i>		
9261	Landscape Architecture Studio II	6
2507	Landscape Architecture Seminar II	3
6817	Landscape Architecture Practice II	3
<i>semester 2</i>		
7625	Landscape Architecture Project II	12
9185	Advanced Studies in Landscape Architecture II (for approved students only)	3

### Level I

#### 5688 Landscape Architecture Studio IA

*level:* I *points value:* 6 *duration:* semester 1 or 2

*availability:* not offered in 1996

*assumed knowledge:* Design at undergraduate degree level.

*contact hours:* between 16 to 18 hours average of lectures/tutorials/workshops/field trips

Note: contact hours will vary from week to week.

*content:* This subject will typically address a small to medium sized landscape design and planning topic in a rural setting possessing high aesthetic and ecological qualities and experiencing human development pressures. The subject will explore the role and opportunities for landscape design and planning interventions and strategies in a precinct or region of high scenic and biological values and human pressures caused either by mining, recreation, transportation, commercial, tourist and or pastoral/agricultural activities.

A project-based learning program integrating design and the avenues of landscape inquiry and expression (structures, materials, plants, languages, information technologies, etc.) and the practices of landscape design, planning and management within a theoretical and historical context; taking account of human (physiological, social and cultural) and ecological (faunal, floral, soil, water, etc.) factors.

Students will be expected to explore a design 'parti' or approach and its sources and precedents, to explain design and planning intentions and to communicate the design and/or plan. Scope of classes will cover design theory, social, cultural and natural resource analysis, data collection and synthesis, conceptual and site planning and design, design development, and methods of inquiry to varying degrees depending on the area and topic of study. Lectures and workshops in the subject will complement the design, planning and investigation processes, addressing the topics outlined above. In groups and/or individually students will typically work on project topics which benefit the community and/or heighten the profile of landscape architecture and public awareness of critical landscape issues.

*assessment:* assignments and projects (100%). These may include written, verbal, and graphic (2 and 3 dimensional) communication, as outlined in the subject guide which will be available early in the subject/project.

### **6763 Landscape Architecture Studio IB**

*level:* I    *points value:* 6    *duration:* semester 1 or 2

*availability:* not offered in 1996

*assumed knowledge:* Design at undergraduate degree level.

*contact hours:* between 16 to 18 hours average of lectures/tutorials/workshops/field trips

Note: contact hours will vary from week to week.

*content:* This subject will typically address a medium to large sized landscape design and planning topic in a rural-urban fringe setting possessing high aesthetic and ecological qualities and experiencing human development pressures. The subject will explore the role and opportunity for landscape design in devising strategic frameworks that conserve landscape qualities and ensure a sensitive stewardship of its resources while accommodating appropriate levels of human occupancy, resources harvesting and developments.

A project-based learning program integrating design and the avenues of landscape inquiry and expression (structures, materials, plants, languages, information technologies, etc.) and the practices of landscape design, planning and management within a theoretical and historical context; taking account of human (physiological, social and cultural) and ecological (faunal, floral, soil, water, etc.) factors.

Students will be expected to explore a design 'parti' or approach and its sources and precedents, to explain design and planning intentions and to communicate the design and/or plan. Scope of classes will cover design theory, social, cultural and natural resource analysis, data collection and synthesis, conceptual and site planning and design, design development, and methods of inquiry to varying degrees depending on the area and topic of study. Lectures and workshops in the subject will complement the design, planning and investigation processes, addressing the topics outlined above. In groups and/or individually students will typically work on project topics which benefit the community and/or heighten the profile of landscape architecture and public awareness of critical landscape issues.

*assessment:* assignments and projects (100%). These may include written, verbal, and graphic (2 and 3 dimensional) communication, as outlined in the subject guide which will be available early in the subject/project.

### **8024 Landscape Architecture Studio IC**

*level:* I    *points value:* 6    *duration:* semester 1 or 2

*availability:* not offered in 1996

*assumed knowledge:* Design at undergraduate degree level.

*contact hours:* between 16 to 18 hours average of lectures/tutorials/workshops/field trips

Note: contact hours will vary from week to week.

*content:* This subject will typically address a small to medium sized landscape design and planning topic in an urban setting possessing strong cultural traditions and patterns. The subject will explore the role and contribution of landscape design in our cultural environments, and the nexus between culture and nature in an urban context.

A project-based learning program integrating design and the avenues of landscape inquiry and expression (structures, materials, plants, languages, information technologies, etc.) and the practices of landscape design, planning and management within a theoretical and historical context; taking account of human (physiological, social and cultural) and ecological (faunal, floral, soil, water, etc.) factors.

Students will be expected to explore a design 'parti' or approach and its sources and precedents, to explain design and planning intentions and to communicate the design and/or plan. Scope of classes will cover design theory, social, cultural and natural resource analysis, data collection and synthesis, conceptual and site planning and design, design development, and methods of inquiry to varying degrees depending on the area and topic of study. Lectures and workshops in the subject will complement the design, planning and investigation processes, addressing the topics outlined above. In groups and/or individually students will typically work on project topics which benefit the community and/or heighten the profile of landscape architecture and public awareness of critical landscape issues.

*assessment:* assignments and projects (100%). These may include written, verbal, and graphic (2 and 3 dimensional) communication, as outlined in the subject guide which will be available early in the subject/project.

### **1624 Landscape Architecture Studio ID**

*level:* I    *points value:* 6    *duration:* semester 1 or 2

*availability:* not offered in 1996

*assumed knowledge:* Design at undergraduate degree level.

*contact hours:* between 16 to 18 hours average of lectures/tutorials/workshops/field trips

Note: contact hours will vary from week to week.

*content:* This subject will typically address a medium to large sized landscape design and planning topic in a rural setting possessing particular cultural constraints, relationships and nuances to landscapes. The subject will explore the relationship of culture, and cultures, to landscapes; the manner in which a culture and cultural

group has established and continues to influence a set of physiological relationships and physical patterns in the environment and landscape within which it resides.

A project-based learning program integrating design and the avenues of landscape inquiry and expression (structures, materials, plants, languages, information technologies, etc.) and the practices of landscape design, planning and management within a theoretical and historical context; taking account of human (physiological, social and cultural) and ecological (faunal, floral, soil, water, etc.) factors.

Students will be expected to explore a design 'parti' or approach and its sources and precedents, to explain design and planning intentions and to communicate the design and/or plan. Scope of classes will cover design theory, social, cultural and natural resource analysis, data collection and synthesis, conceptual and site planning and design, design development, and methods of inquiry to varying degrees depending on the area and topic of study. Lectures and workshops in the subject will complement the design, planning and investigation processes, addressing the topics outlined above. In groups and/or individually students will typically work on project topics which benefit the community and/or heighten the profile of landscape architecture and public awareness of critical landscape issues.

*assessment:* assignments and projects (100%). These may include written, verbal, and graphic (2 and 3 dimensional) communication, as outlined in the subject guide which will be available early in the subject/project.

---

## Level II

### 9261 Landscape Architecture Studio II

*level:* II *points value:* 6 *duration:* semester 1 or 2  
*availability:* not offered in 1996

*prerequisites:* three of the following subjects: 5688 Architecture Studio IA, 6763 Landscape Architecture Studio IB, 8024 Landscape Architecture Studio IC or 1624 Landscape Architecture Studio ID.

*assumed knowledge:* Design at undergraduate degree level.

*contact hours:* between 16 to 18 hours average of lectures/tutorials/workshops/field trips

*Note:* contact hours will vary from week to week.

*content:* This subject will typically address a medium to large sized landscape design and planning topic in a rural and or urban setting that will be dependent upon the use and application of information technologies and geographic information systems. The subject will

explore the position of both nature and culture using creative information technology.

A project-based learning program integrating design and the avenues of landscape inquiry and expression (structures, materials, plants, languages, information technologies, etc.) and the practices of landscape design, planning and management within a theoretical and historical context; taking account of human (physiological, social and cultural) and ecological (faunal, floral, soil, water, etc.) factors.

Students will be expected to explore a design 'parti' or approach and its sources and precedents, to explain design and planning intentions and to communicate the design and/or plan. Scope of classes will cover design theory, social, cultural and natural resource analysis, data collection and synthesis, conceptual and site planning and design, design development, and methods of inquiry to varying degrees depending on the area and topic of study. Lectures and workshops in the subject will complement the design, planning and investigation processes, addressing the topics outlined above. In groups and/or individually students will typically work on project topics which benefit the community and/or heighten the profile of landscape architecture and public awareness of critical landscape issues.

*assessment:* assignments and projects (100%). These may include written, verbal, and graphic (2 and 3 dimensional) communication, as outlined in the subject guide which will be available early in the subject/project.

### 2507 Landscape Architecture Seminar II

*level:* II *points value:* 3 *duration:* semester 1 or 2  
*availability:* not offered in 1996

*assumed knowledge:* Design at undergraduate degree level.

*contact hours:* between 2 to 3 hours average of lectures/tutorials/workshops/field trips.

*Note:* contact hours will vary from week to week.

*content:* This subject will address contemporary issues of landscape architecture design, planning and practice. The subject will explore the role of landscape architecture in the design and planning disciplines and traditions; review and critique contemporary dialogues, designs, theories and philosophies in landscape architecture; and, consider and debate potential future directions, contributions and technologies for the landscape architecture profession.

*assessment:* projects and seminar papers (100%)

**6817 Landscape Architecture Practice II**

*level:* II *points value:* 3 *duration:* semester 1 or 2

*availability:* not offered in 1996

*assumed knowledge:* Design at undergraduate degree level.

*contact hours:* between 2 to 3 hours average of lectures/tutorials/workshops/field trips.

Note: contact hours will vary from week to week.

*content:* This subject will address the frameworks for and ethical structures of landscape architecture professional practice. The subject will explore professional practice ethics and traditions; organisational and management practices including topics of professional liability, law, indemnity, professional registration, contract administration, project management, relationships with allied professionals and clients, and contemporary professional and practice expectations in Australia, and overseas if appropriate.

*assessment:* work diaries, seminar papers, projects, examinations (100%).

**7625 Landscape Architecture Project II**

*level:* II *points value:* 12 *duration:* semester 1 or 2

*availability:* not offered in 1996

*prerequisites:* 5688 Landscape Architecture Studio IA, 6763 Landscape Architecture Studio IB, 8024 Landscape Architecture Studio IC, 1624 Landscape Architecture Studio ID, and 9261 Landscape Architecture Studio II

*assumed knowledge:* Design at undergraduate degree level.

*contact hours:* between 16 to 18 hours average of lectures/tutorials/workshops/field trips.

Note: contact hours will vary from week to week.

*content:* This subject comprises an individual culminating design, planning and/or research project that principally addresses either nature and/or culture in urban and/or rural settings and which permits the exposition of the major aspects of the course and a student's particular interests.

The project will be of a moderate complexity, and often drawn from a limited selection or from an identified region. Responses should demonstrate competency in most phases of landscape architecture thought and practice, including a final presentation which should display a thorough integration of all major aspects of the Program and its Mission Statement and Program Objectives.

*assessment:* final project (100%)

**9186 Advanced Studies in Landscape Architecture II**

*level:* II *points value:* 3

*duration:* semester 1 or 2 or Summer Semester

*availability:* not offered in 1996

*prerequisites:* 5688 Landscape Architecture Studio IA, 6763 Architecture Studio IB, 8024 Landscape Architecture Studio IC and 1624 Landscape Architecture Studio ID

*restriction:* Enrolment subject to application to the Head of Department and contingent upon prior results.

*assumed knowledge:* Design at undergraduate degree level.

*contact hours:* one 2 hour tutorial/seminar weekly.

*content:* Students will be required to undertake supervised research and/or design exploration into a particular topic, leading to the presentation of a seminar paper and/or exhibition, and submission of a final essay or report of between 3000 to 5000 words.

Topics offered for this subject will depend upon staff availability. Examples of topics which can be expected from time to time include: Appropriate Technology and Energy Topics, Computer-Aided Design, Criticism and Landscape Architecture, Cultural Design Topics, Dryland Management, Ecological Restoration, Environmental Planning, Environmental Psychology, Ethno-Ecological Design Topics, Heritage Conservation, Landscape Design History, Landscape Architectural Theory, Landscape Planning, Rural Land Design Topics, Sustainable Design Applications, Urban Design, Urban Ecology, Urban Stormwater Management.

*assessment:* presentation, seminar paper, exhibition, and/or final essay or report (100%).

## Graduate Certificate in Design Studies

### Graduate Certificate in Design Studies (Landscape)

## Graduate Diploma in Design Studies

### Graduate Diploma in Design Studies (Landscape)

The above awards have been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar.

As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

## Specific Course Rules

---

### 1 Admission requirements

- 1.1** An applicant for admission to the course of study for the Graduate Certificate in Design Studies or the Graduate Certificate in Design Studies (Landscape) must have obtained:
- (a) the Ordinary or Honours degree of Bachelor of Design Studies of The University of Adelaide; or
  - (b) an Ordinary or Honours degree of The University of Adelaide or an equivalent award from another educational institution accepted by the University for that purpose, subject to the approval of the Head of the Department of Architecture.
- 1.2** An applicant for admission to the course of study for the Graduate Diploma in Design Studies must have obtained:
- (a) the Graduate Certificate in Design Studies of The University of Adelaide or an equivalent award from another educational institution accepted by the University for the purpose; or
  - (b) the Ordinary or Honours degree of Bachelor of Design Studies of The University of Adelaide; or
  - (c) an Ordinary or Honours degree of The University of Adelaide or an equivalent award from another educational institution accepted by the University for that purpose, subject to the approval of the Head of the Department of Architecture.
- 1.3** An applicant for admission to the course of study for the Graduate Diploma in Design Studies (Landscape) must have obtained:
- (a) the Graduate Certificate in Design Studies (Landscape) of The University of Adelaide or an equivalent award from another educational institution accepted by the University for the purpose; or
  - (b) the Ordinary or Honours degree of Bachelor of Design Studies of The University of Adelaide; or
  - (c) an Ordinary or Honours degree of The University of Adelaide or an equivalent award from another educational institution accepted by the University for that purpose, subject to the approval of the Head of the Department of Architecture.
- 1.4** Subject to the approval of the Faculty, the Head of the Department of Architecture may in special cases and subject to such conditions (if any) as the Head of the Department of Architecture may see fit to impose in each case, accept as a candidate for the Graduate Certificate in Design Studies or Graduate Certificate in Design Studies (Landscape), or Graduate Diploma in Design Studies or Graduate Diploma in Design Studies (Landscape), an applicant who does not hold the qualifications specified in 1.1, 1.2 or 1.3 above but who has given evidence satisfactory to the Head of the Department of Architecture of fitness to undertake work for the Graduate Certificate in Design Studies or Graduate Certificate in Design Studies (Landscape) or Graduate Diploma in Design Studies or Graduate Diploma in Design Studies (Landscape).

## 2 Status, exemption and credit transfer

2.1 A candidate who has passed postgraduate level subjects in the Faculty or in other faculties of the University or in other educational institutions may on written application to the Faculty Registrar be granted such exemption from Specific Course Rules 5.3 and 5.4 as the Faculty may determine.

2.2 Candidates who have previously completed the requirements of the Graduate Certificate in Design Studies shall receive full status towards the Graduate Diploma in Design Studies for studies undertaken in the Graduate Certificate.

2.3 Candidates who have previously completed the requirements of the Graduate Certificate in Design Studies (Landscape) shall receive full status towards the Graduate Diploma in Design Studies (Landscape) for studies undertaken in the Graduate Certificate.

2.4 No candidate may be granted more than 12 points of status towards the Graduate Diploma in Design Studies or the Graduate Diploma in Design Studies (Landscape).

## 3 Approval of course of study at enrolment

3.1 Each student's course of study shall be approved by the Dean of the Faculty (or nominee) at enrolment each year.

## 4 Duration of course

4.1 Except with the permission of the Faculty, the course for the Graduate Certificate in Design Studies or the Graduate Certificate in Design Studies (Landscape) shall be completed in not less than one semester and not more than one year of full-time study and in not less than one year and not more than two years of part-time study.

4.2 Except with the permission of the Faculty, the course for the Graduate Diploma in Design Studies or the Graduate Diploma in Design Studies (Landscape) shall be completed in not less than one semester and not more than one year of full-time study and in not less than one year and not more than two years of part-time study.

## 5 Course of study/Subjects of study

5.1 To qualify for the Graduate Certificate in Design Studies a candidate shall pass any combination

of the subjects listed in Rule 5.3 to the value of at least 12 points.

5.2 To qualify for the Graduate Certificate in Design Studies (Landscape) a candidate shall pass any combination of the subjects listed in Rule 5.4 to the value of at least 12 points.

5.3 To qualify for the Graduate Diploma in Design Studies a candidate shall pass the following subjects to the value of at least 24 points:

8490 Issues in Urban Sustainability IV 3

9554 Twentieth Century Architecture and Landscapes IV 3

9452 Design Communications IV 3

7902 Building Technology IV 3

2026 Building Design Studio IV 6

6284 Design and Environments IV 6

5.4 To qualify for the Graduate Diploma in Design Studies (Landscape) a candidate shall pass the following subjects to the value of at least 24 points:

6233 Issues in Landscape Sustainability IV 3

9554 Twentieth Century Architecture and Landscapes IV 3

9452 Design Communications IV 3

9414 Landscape Technology IV 3

7213 Special Topic (Landscape) IVA 6

6567 Special Topic (Landscape) IVB 6

7819 Landscape Design Studio IV 6

6284 Design and Environments IV 6

5.5 Subject substitutions will normally be selected from a list available from the Faculty Registrar; in unusual cases the Head of the Department of Architecture may approve different studies upon application by a candidate. In considering an application for a subject substitution the Head of the Department of Architecture shall have regard to the candidate's previous academic and practical experience.

## 6 Review of academic progress

6.1 If in the opinion of the Faculty a candidate for the Graduate Certificate or Graduate Diploma is not making satisfactory progress, the Faculty may, with the consent of the Council, terminate the candidature and the candidate shall cease to be enrolled for the Graduate Certificate or Graduate Diploma awards.

## **7 Assessment and examinations**

- 7.1** There shall normally be four classifications of pass in the final assessment of any subject for the Graduate Certificate and Graduate Diploma awards, as follows: Pass with High Distinction, Pass with Distinction, Pass with Credit, Pass. If the Pass classification is in two divisions a pass in the higher division may be prescribed in the syllabuses as a prerequisite for admission to further studies in that subject or to other subjects. Results in certain subjects as specified in the Specific Course Rules will not be classified.
- 7.2** A candidate shall not be eligible to attend for examination unless the prescribed work has been completed to the satisfaction of the teaching staff concerned.
- 7.3** In determining a candidate's final result in a subject (or part of a subject) the examiners may take into account oral, written, practical and examination work, provided that the candidate has been given adequate notice at the commencement of the teaching of the subject of the way in which work will be taken into account and of its relative importance in the final result.
- 7.4** A candidate who fails a subject or who obtains a lower division pass and who desires to take that subject again shall, unless exempted wholly or partially therefrom by the Head of the Department concerned, again complete the required work in that subject to the satisfaction of the teaching staff concerned.

## **8 Articulation with other awards**

- 8.1** A candidate who holds a Graduate Certificate in Design Studies of The University of Adelaide shall surrender it before being admitted to the Graduate Diploma in Design Studies.
- 8.2** A candidate who holds a Graduate Certificate in Design Studies (Landscape) of The University of Adelaide shall surrender it before being admitted to the Graduate Diploma in Design Studies (Landscape).

## Syllabuses

### textbooks

Information on appropriate textbooks will be provided by the Department concerned, and at the preliminary lecture in Orientation Week. Students are expected to have their own copies of books, but are advised to await advice from the lecturer concerned before buying any particular book. Only the prescribed edition of any book should be bought.

### reference books

Although lists of books and journals for reference purposes are regarded as important, details have not been included in this Volume. These will however be issued from time to time by the Department of Architecture. It is hoped that all books and journals set for reference will be available to be consulted in the Barr Smith Library, or in the case of standard professional references and trade literature, in the Department of Architecture.

### examinations

For each subject students may obtain from the department concerned details of the examination in that subject including the relative weights given to the components (eg such of the following as are relevant: assessments, semester tests, essays or other written or practical work, final written examinations, viva voce examinations).

### Graduate Certificate in Design Studies 1996 Graduate Diploma in Design Studies 1996

code	subject title	points
<i>semester 1</i>		
8490	Issues in Urban Sustainability IV	3
9554	Twentieth Century Architecture and Landscapes IV	3
9452	Design Communications IV	3
7902	Building Technology IV	3
<i>semester 2</i>		
2026	Building Design Studio IV	6
6284	Design and Environments IV	6

### Graduate Certificate in Design Studies (Landscape) 1996 Graduate Diploma in Design Studies (Landscape) 1996

code	subject title	points
<i>semester 1</i>		
8490	Issues in Landscape Sustainability IV	3
9554	Twentieth Century Architecture and Landscapes IV	3
9452	Design Communications IV	3
9414	Landscape Technology IV	3
7213	Special Topic (Landscape) IVA	6
<i>semester 2</i>		
7819	Landscape Design Studio IV	6
6284	Design and Environments IV	6
6567	Special Topic (Landscape) IVB	6

### 2026 Building Design Studio IV

*level:* IV *points value:* 6 *duration:* semester 2

*quota:* will apply

*assumed knowledge:* 4371 Issues in Urban Sustainability III or 6886 Issues in Landscape Sustainability III

*restriction:* 8650 Landscape Design Studio III

*contact hours:* up to 6 hours of lectures/seminars/studios per week

*content:* In this subject students will apply their skills in formal composition and knowledge of precedent to the design of small building on a rural site. Emphasis will be placed on the use of materials, the building's structure and construction, its responses to the local environment, and its life-cycle costings.

*assessment:* assignments and projects (100%)

### 7902 Building Technology IV

*level:* IV *points value:* 3 *duration:* semester 1 or 2

*quota:* will apply

*contact hours:* up to 2 hours of lectures and up to 2 hours of tutorials per week

*content:* An introduction to the vocabulary of the methods, building materials and forms of construction in the built environment. The elements of building

construction produced by both on-site and industrialised techniques will be discussed and examples investigated. Through simple design examples technical performance requirements will be introduced and assessed.

*assessment:* assignments (100%)

### **6284 Design and Environments IV**

*level:* IV *points value:* 6 *duration:* semester 2

*quota:* will apply

*contact hours:* up to 2 hours of lectures and up to 3 hours of tutorials/seminars/studios per week

*content:* The intersection of theory and practice in architecture and landscape architecture, developed in the context of student design projects. The subject will examine the range of theoretical and ideological discourses which influence approaches to 'place-making' in the urban environment.

The projects will offer a context in which students will explore cultural, historical, social and ethnographic issues, while developing a vocabulary of approaches, morphologies and typologies. Students will develop representational skills in various media.

*assessment:* assignments and projects (100%)

### **9452 Design Communications IV**

*level:* IV *points value:* 3 *duration:* semester 1

*quota:* will apply

*contact hours:* up to 3 hours of lectures and/or 2 hours of tutorials per week

*content:* The representation and communication of design in writing, drawing and modelling including computer techniques.

*assessment:* assignments (100%)

### **6233 Issues in Landscape Sustainability IV**

*level:* IV *points value:* 3 *duration:* semester 1 or 2

*quota:* will apply

*restriction:* 8490 Issues in Urban Sustainability IV

*contact hours:* up to 4 hours of lectures/seminars/studios per week

*content:* This subject will centre upon 'place-making' in urban environments. It will focus on the diversity of philosophical positions which inform current approaches to urban ecology understood in its widest sense, including not only the 'environmental', but the cultural, social, political, economic, institutional and professional realms.

The project-based learning program will offer a context in which students will develop knowledge and skills required in the creation of landscapes in

'sustainable' urban environments, and will explore opportunities and constraints affecting the development of such environments.

*assessment:* assignments and projects (100%)

### **8490 Issues in Urban Sustainability IV**

*level:* IV *points value:* 3 *duration:* semester 1 or 2

*quota:* will apply

*restriction:* 6233 Issues in Landscape Sustainability IV

*contact hours:* up to 4 hours of lectures/ seminars/studios per week.

Note: contact hours will vary from week to week.

*content:* This subject will centre upon 'place-making' in urban environments. It will focus on the diversity of philosophical positions which inform current approaches to urban ecology understood in its widest sense, including not only the 'environmental', but the cultural, social, political, economics, institutional and professional realms.

The project-based learning program will offer a context in which students will develop knowledge and skills required in the creation of buildings in 'sustainable' urban environments, and explore opportunities and constraints affecting the development of such environments.

*assessment:* assignments and projects (100%)

### **7819 Landscape Design Studio IV**

*level:* IV *points value:* 6 *duration:* semester 2

*quota:* will apply

*assumed knowledge:* 4371 Issues in Urban Sustainability III or 6886 Issues in Landscape Sustainability III

*restriction:* 3468 Building Design Studio III

*contact hours:* up to 6 hours of lectures/seminars/studios per week

*content:* In this subject students will apply their skills in formal composition and knowledge of precedent to the design of a small to medium sized park, allotment or place. Emphasis will be placed on design, use of materials and plants, any installations and their construction, the design's responses to the local environment, and life-cycle costings.

*assessment:* assignments and projects (100%)

### **9414 Landscape Technology IV**

*level:* IV *points value:* 3 *duration:* semester 1 or 2

*quota:* will apply

*contact hours:* up to 2 hours of lectures and up to 2 hours of tutorials per week

*content:* This subject will introduce students to the principles of landscape construction through an examination of the properties and use of landscape materials, site-scale manipulation of land, and landscape structures. The subject examines the opportunities and limitations in landscape construction technology and potential sustainable uses and applications. Exemplars in the forms of problems, products and processes are considered in conjunction with a set of case studies. Particular emphasis will be upon landscape materials (timber, concrete, stone, brick, asphalt, crushed rock, etc.) and their use, site-scale manipulation (site survey, hydrology and drainage issues, and issues associated with site engineering), and structures (simple building construction and building material selection and application).

*assessment:* assignments (100%)

### **7213 Special Topic (Landscape) IVA**

*level:* IV *points value:* 6 *duration:* semester 1

*quota:* will apply

*contact hours:* up to 5 hours of lectures/seminars/studios per week plus field study trips.

*content:* Details of this subject will be provided by the Department of Architecture when specialist teaching is available.

*assessment:* assignments and projects (100%)

### **6567 Special Topic (Landscape) IVB**

*level:* IV *points value:* 6 *duration:* semester 2

*quota:* will apply

*contact hours:* up to 5 hours of lectures/seminars/studios per week plus field study trips.

*content:* Details of this subject will be provided by the Department of Architecture when specialist teaching is available.

*assessment:* assignments and projects (100%)

### **9554 Twentieth Century Architecture and Landscapes IV**

*level:* IV *points value:* 3 *duration:* semester 1

*quota:* will apply

*contact hours:* up to 2 hours of lectures and up to 2 hours of tutorials per week

*content:* A detailed exploration of compositional and theoretical aspects of 20th Century architectural and landscape design. This subject introduces students to a vocabulary of articulating spatial qualities in selected examples of 20th Century architectural and landscape

design. It seeks to enhance students' appreciation of the possibilities of appropriating published writing and projects to nurture their own outlooks and abilities. Practical work includes exercises in three-dimensional composition and in writing short analytical texts.

*assessment:* assignments (100%)

**Master of Architecture**  
**Master of Building Science**  
**Master of Design Studies**  
**Master of Design Studies (Landscape)**  
**Master of Urban Design**

The above awards have been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar.

As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

## Specific Course Rules

---

### 1 Qualification requirements

#### 1.1 Master of Architecture

To qualify for the degree a candidate shall prepare a thesis, embodying the results of original research or investigation made into a field of study on an aspect or aspects of architectural design, building practice and/or the architectural profession. The field of study shall be approved in advance by the Faculty and prepared under the guidance of and in regular consultation with a supervisor or supervisors appointed by the Faculty.

#### 1.2 Master of Building Science

To qualify for the degree the candidate shall prepare a thesis, embodying the results of original research or investigation made into a field of study relating to the built environment in general or architecture in particular. The field of study shall be concerned with scientific and/or technical aspects of the built environment, and shall be approved in advance by the Faculty and prepared under the guidance of and in regular consultation with a supervisor or supervisors appointed by the Faculty.

#### 1.3 Master of Design Studies

To qualify for the degree the candidate shall prepare a thesis, embodying the results of original research or investigation made into a field of study relating to the built environment in general and/or design or architecture in particular. The field of study shall be concerned with a cultural, historical, philosophical and/or theoretical aspect or aspects of the built environment, and shall be approved in advance

by the Faculty and prepared under the guidance of and in regular consultation with a supervisor or supervisors appointed by the Faculty.

#### 1.4 Master of Design Studies (Landscape)

To qualify for the degree the candidate shall prepare a thesis, embodying the results of original research or investigation made into a field of study on an aspect or aspects relevant to the discipline of landscape architecture which has been approved in advance by the Faculty and prepared upon the guidance of and in regular consultation with a supervisor or supervisors appointed by the Faculty.

#### 1.5 Master of Urban Design

To qualify for the degree a candidate shall prepare a thesis, embodying the results of original research or investigation made into a field of study which has been approved in advance by the Faculty and prepared under the guidance of and in regular consultation with a supervisor or supervisors appointed by the Faculty.

### 2 Admission requirements

#### Master of Architecture

2.1 The Faculty of Architecture and Urban Design may accept as a candidate for the degree of Master of Architecture any person who:

- (a) has become entitled to receive the Honours degree of Bachelor of Architecture of The University of Adelaide; or

- (b) has obtained in another university or tertiary institution qualifications which in the opinion of the Faculty of Architecture and Urban Design are at least equivalent to those of the Honours degree of Bachelor of Architecture.
- 2.2 Subject to the approval of the Board of Graduate Studies acting with the authority wittingly devolved to it by Council the Faculty may in special cases and subject to such conditions as it may see fit to impose in each case, accept as a candidate for the degree a person who does not meet the requirements specified in Specific Course Rule 2.1 if it is satisfied that he or she is likely to be able satisfactorily to undertake work for the degree.
- 2.3 (a) Subject to the approval of the Council, the Faculty may accept as a probationary candidate for the degree an applicant with an unusual background or whose academic record does not clearly indicate fitness to undertake the degree. The Faculty may impose special conditions on a probationary candidature.
- (b) The performance of each probationary candidate shall be reviewed by the Faculty after such period as the Faculty prescribes or allows (not exceeding twelve months) and, subject to the approval of the Council, the candidature shall be either confirmed or terminated.

#### **Master of Building Science and Master of Design Studies**

- 2.4 The Faculty of Architecture and Urban Design may accept as a candidate for the degrees of Master of Building Science or Master of Design Studies any person who:
- (a) has become entitled to receive the Honours degree of Bachelor of Architectural Studies or the Honours degree of Bachelor of Design Studies or the Honours degree of Bachelor of Architecture of The University of Adelaide; or
- (b) has obtained in another university or tertiary institution qualifications which, in the opinion of the Faculty of Architecture and Urban Design, are at least equivalent to those of the Honours degree of Bachelor of Architectural Studies or Honours degree of Bachelor of Design Studies.
- 2.5 Subject to the approval of the Board of Graduate Studies acting with the authority wittingly

devolved to it by Council the Faculty may in special cases and subject to such conditions as it may see fit to impose in each case, accept as a candidate for the degree a person who does not meet the requirements specified in Specific Course Rule 2.4 if it is satisfied that he or she is likely to be able satisfactorily to undertake work for the degree.

- 2.6 (a) Subject to the approval of the Council, Faculty may accept as a probationary candidate for the degree an applicant with an unusual background or whose academic record does not clearly indicate fitness to undertake the degree. The Faculty may impose special conditions on a probationary candidature.
- (b) The performance of each probationary candidate shall be reviewed by the Faculty after such period as the Faculty prescribes or allows (not exceeding twelve months) and, subject to the approval of the Council, the candidature shall be either confirmed or terminated.

#### **Master of Design Studies (Landscape) and Master of Urban Design**

- 2.7 The Faculty of Architecture and Urban Design may accept as a candidate for the degrees of Master of Design Studies (Landscape) or Master of Urban Design any person who has become entitled to receive an Honours degree of The University of Adelaide or other qualifications accepted by the University as equivalent to an Honours degree.
- 2.8 Subject to the approval of the Board of Graduate Studies acting with the authority wittingly devolved to it by Council the Faculty may in special cases and subject to such conditions as it may see fit to impose in each case, accept as a candidate for the degree a person who does not meet the requirements specified in Specific Course Rule 2.7 if it is satisfied that he or she is likely to be able satisfactorily to undertake work for the degree.
- 2.9 (a) Subject to the approval of the Council, the Faculty may accept as a probationary candidate for the degree an applicant with an unusual background or whose academic record does not clearly indicate fitness to undertake the degree. The Faculty may impose special conditions on a probationary candidature.
- (b) The performance of each probationary candidate shall be reviewed by the Faculty after such period as the Faculty prescribes

or allows (not exceeding twelve months) and, subject to the approval of the Council, the candidature shall be either confirmed or terminated.

### 3 General

- 3.1** The Head of the Department of Architecture shall advise the Faculty whether suitable facilities and staff are available to assist and supervise the research of the applicant before the candidature and proposed topic of research are approved by the Faculty.
- 3.2** In cases where the proposed research calls for skills or qualifications not yet possessed by the candidate, the Faculty may on the recommendation of the Head of the Department of Architecture require the candidate to spend a period of time, the length of which shall be prescribed by the Faculty on the recommendation of the Head of the Department, either on supervised study or on research under a supervisor or supervisors appointed by the Faculty, and/or to undertake and pass at an acceptable standard examinations in courses related to the research topic.
- 3.3** There shall in each case be adequate and regular contact between the candidate and regular supervisor(s). The candidate may, with prior permission of Faculty and subject to such conditions as may be determined in each case, conduct research in an organisation other than the University provided
- that such research is closely related to the thesis;
  - that the supervisor has access to all the candidate's external research work; and
  - that the publication of results will not thereby be prejudiced. Any candidate given such permission shall be available for seminars and other discussions as required by the supervisor(s) or the Head of the Department of Architecture.
- 3.4** (a) Unless the Faculty approves in advance an extension of time in a particular case, the thesis shall be submitted:
- in the case of a full-time candidate, not earlier than one year and not later than three years from the date at which the candidature was accepted by the Faculty; or
  - in the case of a part-time candidate, not earlier than two years and not later than five years from the date at

which the candidature was accepted by the Faculty.

- Three months before the intended date of submission the candidate shall notify the Faculty in writing of the candidate's intention to submit the thesis, and shall at the same time submit the proposed title and a one-page summary of the thesis.
- 3.5** The candidate shall lodge with the Registrar three copies of the thesis prepared in accordance with directions given to candidates from time to time. Refer to the Guidelines on Higher Degrees by Research and Specifications for Thesis in this volume.
- 3.6** (a) The Faculty shall appoint at least two examiners of the thesis of whom at least one shall be external. The examiners may recommend to the Faculty that the thesis:
- be accepted; or
  - be accepted subject to minor corrections; or
  - be accepted subject to the candidate's passing such examination(s) as determined by the Faculty in the field of study immediately relevant to the subject of the thesis; or
  - be returned to the candidate for revision and resubmission (within such period of time as the Faculty may allow); or
  - be rejected.
- (b) The examiners of a thesis resubmitted following recommendation (iv) may recommend only (i), (ii) or (v).
- 3.7** (a) If in the opinion of the Faculty a candidate for the degree is not making satisfactory progress, the Faculty may, with the consent of the Council, withdraw its approval of the candidature and the candidate shall cease to be enrolled for the degree.
- (b) Before making a recommendation for termination of candidature to the Council the Faculty shall notify the candidate of its intention so to do and shall permit the candidate to offer within one month written explanation for the lack of satisfactory progress. If notwithstanding any submission made by the candidate, the Faculty decides to recommend termination of the candidature, the

candidate shall be informed accordingly and shall have the right to appeal within one month to the Council, and any such appeal shall be considered by the Council at the same time as it considers the Faculty's recommendation.

**3.8** A candidate for the degree of Doctor of Philosophy whose work is considered by the Faculty, after report by the examiners appointed to make recommendations on it, to be not of sufficient merit to qualify for that degree but of sufficient merit to qualify for the degree of Master of Architecture, the degree of Master of Building Science, the degree of Master of Design Studies, the degree of Master of Design Studies (Landscape) or the degree of Master of Urban Design may be admitted to the degree of Master of Architecture, the degree of Master of Building Science, the degree of Master of Design Studies, the degree of Master of Design Studies (Landscape) or the degree of Master of Urban Design provided that the candidate is otherwise qualified to become a candidate for the degree.

**3.9** When the Faculty is satisfied that a candidate has complied with the requirements and conditions of the Specific Course Rules and that the thesis is acceptable, the Faculty shall recommend to the Council that the candidate be admitted to the degree of Master of Architecture, the degree of Master of Building Science, the degree of Master of Design Studies, the degree of Master of Design Studies (Landscape) or the degree of Master of Urban Design, as appropriate.

#### Of Awards in the Faculty of Arts

1 In the Faculty of Arts there shall be the following awards:

Associate Diploma in Labour Studies  
Ordinary degree of Bachelor of Arts  
Ordinary degree of Bachelor of Arts  
(Asian Studies)\*  
Ordinary degree of Bachelor of Arts  
(Australian Studies)\*  
Ordinary degree of Bachelor of Arts  
(Cultural Studies)\*  
Ordinary degree of Bachelor of Arts  
(European Studies)\*  
Ordinary degree of Bachelor of Arts  
(International Studies)\*  
Ordinary degree of Bachelor of Labour  
Studies  
Ordinary degree of Bachelor of Social  
Sciences\*  
Honours degree of Bachelor of Arts  
Honours degree of Bachelor of Arts  
(Asian Studies)\*  
Honours degree of Bachelor of Arts  
(Australian Studies)\*  
Honours degree of Bachelor of Arts  
(Cultural Studies)\*  
Honours degree of Bachelor of Arts  
(European Studies)\*  
Honours degree of Bachelor of Arts  
(International Studies)\*  
Honours degree of Bachelor of Labour  
Studies  
Honours degree of Bachelor of Social  
Sciences\*  
Graduate Certificate in Australian Studies  
Graduate Certificate in Cognitive Studies\*  
Graduate Certificate in Educational  
Administration  
Graduate Certificate in Educational Studies  
Graduate Certificate in Environmental  
Management

Graduate Certificate in Environmental  
Policy, Planning and Management  
Graduate Certificate in Historical Studies\*  
Graduate Certificate in Language Education  
Graduate Certificate in Logic\*  
Graduate Diploma in Anthropology  
Graduate Diploma in Applied Geographic  
Information Systems and Remote Sensing  
Graduate Diploma in Applied Historical  
Studies\*  
Graduate Diploma in Archaeology  
Graduate Diploma in Chinese Studies  
Graduate Diploma in Cognitive Science\*  
Graduate Diploma in Education  
Graduate Diploma in Educational  
Administration  
Graduate Diploma in Environmental Studies  
Graduate Diploma in Japanese Studies  
Graduate Diploma in Labour Studies  
Graduate Diploma in Logic\*  
Graduate Diploma in Women's Studies  
Bachelor of Education (In-Service)  
Bachelor of Educational Studies  
Master of Arts  
Master of Arts (Applied Historical Studies)\*  
Master of Arts (Geographic Information  
Systems and Remote Sensing)  
Master of Arts (Population and Human  
Resources)  
Master of Arts (Women's Studies)  
Master of Cognitive Science  
Master of Education  
Master of Educational Administration  
Master of Educational Studies  
Master of Environmental Studies  
Master of Logic\*  
Master of Psychology (Clinical)\*  
(previously Master of Applied Psychology)

2 The courses for the awards listed in Regulation 1 shall be governed by the General Course Rules and Specific Course Rules that the Council shall prescribe from time to time.

3 The syllabuses of subjects shall be specified by the Council.

\* Awaiting approval and confirmation.

Regulations effective from 1 August 1994.

Regulations amended 23 February 1995.

notes not forming part of the Regulations

- 1 Council has delegated the power to approve minor changes to the General Course Rules to the Deputy Vice-Chancellor (Academic).
- 2 Council has delegated the power to approve minor changes to the Specific Course Rules to the Deans of Faculties.
- 3 Council has delegated the power to specify syllabuses to the Head of each department or centre concerned, such syllabuses to be subject to approval by the Faculty or by the Dean on behalf of the Faculty. The Head of department or centre may approve minor changes to any previously approved syllabus.
- 4 The Faculty also offers a Doctor of Letters (D. Litt.). Higher doctorates are governed by their own sets of Regulations as printed in this volume of the Calendar.

# Associate Diploma in Labour Studies

## Introductory remarks

This course is designed for trade unionists and other people interested in work and trade unions in Australian society. This course provides students with the information and skills required to participate in debates on issues of concern to the labour movement. It aims to develop a systematic understanding of working life and the political, economic and industrial forces in society which condition the working environment.

Applications for admission to this course shall be made through the South Australian Tertiary Admissions Centre (SATAC) on the appropriate form by the required date. Successful applicants to the course may defer their studies to the following year. Selection for the Associate Diploma will be based on evidence of relevant work experience, previous relevant study or ability to benefit from the course.

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar.

As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

## Specific Course Rules

### 1 Admission requirements

- 1.1 Subject to the approval of the Council, the Faculty may accept as candidates for the Associate Diploma in Labour Studies applicants who have given satisfactory evidence to the Faculty of fitness to undertake work for the Associate Diploma.

### 2 Status, exemption and credit transfer

- 2.1 No student may be granted more than 24 points of status toward the Associate Diploma for other studies undertaken in the University or other institution.

### 3 Approval of course of study at enrolment

- 3.1 Each student's course of study shall be approved by the Faculty at enrolment each year.

### 4 Duration of course

- 4.1 To qualify for the Associate Diploma a student shall satisfactorily complete a course of two years of full-time study or the part-time equivalent. The course shall be available in both the internal and external mode.

### 5 Qualification requirements

- 5.1 A candidate shall present passes in all six core subjects, the Practical Project and in three of the elective subjects available. Students may study

the subjects in any order provided any prerequisite requirements of individual subjects are met. In special circumstances, a candidate may, with the approval of the Head of the Centre for Labour Studies, present passes in subjects in other awards to a maximum of twelve points towards the requirement of elective subjects.

### 6 Course of study / Subjects of study

The subjects listed below are available both internally and externally.

#### 6.1 Core subjects

All students are required to take the following subjects:

8687 Work Studies I	4
4354 Work Studies II	4
1790 Union Studies I*	4
5713 Union Studies II*	4
6494 Political Economy I	4
8833 Political Economy II	4

#### 6.2 Elective subjects

Students may choose any three semester subjects from the following:

7644 Trade Unions and the Third World*	4
3369 Australian Labour History	4
7870 Occupational Health and Safety: Union Perspectives*	4

8844 Gender, Work and Society	4
9846 Trade Unions: an International Comparison*	4
6305 Work, Race and Culture*	4
9881 Issues in Labour Studies*	4
6552 Labour, Culture and the Media	4
7497 Trade Union Organisation and Management Skills *	4
3939 Information Technology for Unions	4

**6.3 Practical Project**

The Practical Project is a compulsory subject:

8196 Practical Project	12
------------------------	----

\* Not offered in 1996

**7 Review of academic progress**

- 7.1 A student who fails a subject and desires to take the subject again shall again attend lectures and satisfactorily do such written and practical work as the teaching staff concerned may prescribe.
- 7.2 A student who has twice failed a subject may not enrol for that subject again except by special permission to be obtained in writing from the Faculty and then only under such conditions as may be prescribed.
- 7.3 For the purposes of this clause a student who is refused permission to be assessed, by examination or otherwise, or who does not, without a reason accepted by the Head of Centre for Labour Studies as adequate, attend all or part of a final examination (or supplementary examination if granted) after having enrolled for at least two thirds of the normal period during which the subject is taught, shall be deemed to have failed the subject.

**8 Assessment and examinations**

There shall be one of two systems of classification of pass in individual subjects for the Associate Diploma: either Non-Graded Pass; or Pass with High Distinction, Pass with Distinction, Pass with Credit, Pass Division I, Pass Division II, Unclassified Pass and Fail.

**9 Articulation with other awards**

**9.1** Students who complete 36 points, plus a pass classification of Division I or better for the Practical project, in this award are eligible to apply for entry to the Bachelor of Labour Studies course, and if successful, on gaining entry, receive full status for the work they have undertaken in the Associate Diploma in Labour Studies.

**9.2** Students who have been admitted to the award of Associate Diploma in Labour Studies who subsequently successfully complete the requirements of the Bachelor of Labour Studies must surrender their first award before being admitted to the degree of Bachelor of Labour Studies.

**Syllabuses**

*syllabus details:* see Bachelor of Labour Studies below

## Bachelor of Arts and Bachelor of Social Sciences Degrees

### Bachelor of Arts

### Bachelor of Arts (Asian Studies)

### Bachelor of Arts (Australian Studies)

### Bachelor of Arts (Cultural Studies)

### Bachelor of Arts (European Studies)

### Bachelor of Arts (International Studies)

NOTE: Previous studies in the Bachelor of Arts under former Specific Course Rules and Regulations and Schedules

Students who commenced their course of study towards the Bachelor of Arts under previous Specific Course Rules in 1995 or Regulations and Schedules in 1994 or earlier are subject to the following provisions:

Students who commenced their studies towards the Bachelor of Arts in previous years will normally complete their course of study under the provisions of the Specific Course Rules as published in 1995.

On application to the Faculty, continuing students will be permitted to complete their studies under the current Specific Course Rules *as they pertain to the Bachelor of Arts award only (Rule 7.1)*, with such modifications as the Faculty may deem necessary to ensure that subjects validly passed under previous Specific Course Rules or Regulations and Schedules may be counted under the current Rules.

The above awards have been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar. As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

## Specific Course Rules

### 1 General

1.1 On satisfying the admission requirements for entry to undergraduate studies in the Faculty of Arts, students will enrol in a course of study in the Humanities and Social Sciences to allow them to qualify for one of the following degrees:

Ordinary degree of Bachelor of Arts

Ordinary degree of Bachelor of Arts  
(Asian Studies)

Ordinary degree of Bachelor of Arts  
(Australian Studies)

Ordinary degree of Bachelor of Arts  
(Cultural Studies)

Ordinary degree of Bachelor of Arts  
(European Studies)

Ordinary degree of Bachelor of Arts  
(International Studies)

Ordinary degree of Bachelor of Social  
Sciences

Graduates who have qualified for one of the above degrees and who wish to obtain a subsequent but different degree must apply for entry to a new course of study leading to the subsequent degree and, if successful, will be subject to the rules applying to Status, Exemption and Credit Transfer outlined in Rule 4, below, or those outlined in the Specific Course Rules for the Bachelor of Social Sciences.

1.2 The course of study for the Ordinary degree shall extend over three full-time academic years or the part-time equivalent.

### 2 Admission requirements

The admission requirements for this course of study are those outlined in the Rules made by Council pursuant to Chapter IX of the University Statutes - Of Admission and Enrolment.

### 3 Assessment and examinations

There shall be four classifications of pass in any subject for the degree: Pass with High Distinction, Pass with Distinction, Pass with Credit, and Pass.

In some subjects a pass may be recorded in two divisions. For such subjects a pass in the higher division may be prescribed in the syllabuses as a prerequisite for admission either to further courses in that subject or to other subjects.

There shall also be a classification of Conceded Pass. A student may present for the Ordinary degree only a limited number of subjects for which a Conceded Pass has been obtained, as specified in 7.7.1 of these specific course rules.

#### **4 Status, exemption and credit transfer**

Exemption from the requirements of an undergraduate degree in the Faculty of Arts in lieu of studies towards combined degree programs such as the Bachelor of Laws/Bachelor of Arts is covered *solely* under the provisions of Rule 5, studies conceded in lieu of combined degree programs, below.

##### **4.1 Status for Bachelor degree level studies**

###### **4.1.1 Status on Account of Previous Studies in any Academic Discipline**

Persons who have previously passed subjects in Bachelor degree awards or equivalent in The University of Adelaide or other recognised university in any academic discipline who wish to count towards their degree such subjects may on written application to the Faculty be granted such status as the Faculty shall determine subject to the following conditions:

- 4.1.1.1 Students may present for the degree such subjects to a maximum aggregate points value of 12 points at Level I in lieu of the requirements of clause 7.1.1 (b) (or equivalent for the named degrees), and 8 points at Level II in lieu of 7.1.1 (e) (or equivalent for the named degrees);

###### **4.1.2 Status on Account of Studies in the Humanities and Social Sciences**

Persons who have previously passed subjects offered in Bachelor degree awards or equivalent in The University of Adelaide or other recognised university in the Humanities and Social Sciences who wish to count towards their degree such subjects may, on written application to the Faculty Registrar, be granted status towards such specific degree requirements as the Faculty shall determine subject to the following conditions:

- 4.1.2.1 Status on account of completed degrees

- 4.1.2.1.1 Except with the permission of the Faculty, students may present for the degree such subjects to a maximum aggregate points value of 24 points at Level I; or

- 4.1.2.1.2 Such subjects to a maximum aggregate points value of 18 points at Level I and 8 points at Level II.

- 4.1.2.2 Status on account of incomplete degree studies.

For subjects passed in a course of study not yet completed other than those undertaken in an undergraduate award in the Faculty of Arts at The University of Adelaide pursuant to these Specific Course Rules:

- 4.1.2.2.1 Except with the permission of the Faculty, students may present for the degree such subjects to the maximum aggregate points outlined in 4.1.2.1, above; and in addition

- 4.1.2.2.2 Such subjects in fields of study recognised as major sequences by the Faculty of Arts, or in the area of Law Studies, determined on a subject-by-subject basis, to an additional value of 6 points at Level I (if required) and 8 points at Level II.

##### **4.2 Status for the Diploma of Associate of The University of Adelaide**

Students who have qualified for a Diploma of Associate of The University of Adelaide (AUA) may be granted such status in an undergraduate Faculty of Arts course as the Faculty shall in each case determine; provided that if status for the degree be granted for more than 18 points presented for the diploma, the student shall surrender the diploma before being admitted to the degree.

##### **4.3 Status for the Associate Diploma in Liberal Studies of The University of Adelaide**

Students who have qualified for the Associate Diploma in Liberal Studies may be granted up to 48 points of status in the course for the degree of Bachelor of Arts provided that if status of more than 24 points is granted, the student shall surrender the Associate Diploma before being admitted to the degree.

Students who hold the Associate Diploma in Liberal Studies may be granted status on a subject-by-subject basis up to a maximum of 48 points in any other undergraduate degree offered by the Faculty of Arts provided that if status of more than 24 points is granted, the student shall surrender the Associate Diploma before being admitted to the degree.

#### 4.4 Status for prior Technical and Further Education (TAFE) studies

Students who hold a completed Associate Diploma from an Institute of Technical and Further Education (TAFE) may, on application to the Faculty, be granted up to a maximum 6 points at Level I in lieu of the requirements of clause 8.1.1 (b) (or equivalent for the named degrees) on account of the final year of study in the Associate Diploma.

#### 4.5 Status for prior non-Award studies

Subject to Faculty approval, students who have completed Non-Award subjects from any recognised higher education institution may apply for status on account of such subjects towards their degree, and, if successful, will be subject to the same limits and conditions outlined in 4.1, above.

### 5 Status granted in double degree programs

5.1 A student of the Faculty of Arts who is able to gain entry to another undergraduate degree program in the University (with the exception of the Bachelor of Laws) and who studies that degree concurrently with studies in Arts in order to complete a double degree program will have the following status granted in lieu of the successful completion of their other degree:

12 points at Level I; and

8 points at Level II (not forming part of the major sequence)

5.2 A student of the Faculty of Arts who is able to gain entry to Law Studies and who undertakes Law Studies concurrently with studies in Arts in order to complete a double degree program will be granted status in:

The Bachelor of Arts

The Bachelor of Arts (Australian Studies)

The Bachelor of Arts (Cultural Studies)

The Bachelor of Arts  
(International Studies)

up to and including the following limits on account of their Law Studies:

on completion of the Level I compulsory subjects 6019 Law and Legal Process and 3731 Contract;

8 points at Level II (not forming part of the major sequence); and

on completion of 12 points of other compulsory subjects listed in Rule 3.2.1 of the Specific Course Rules of the Bachelor of Laws:

12 points at Level III (not forming part of the major sequence)

5.3 A student of the Faculty of Arts who is able to gain entry to Law Studies and who undertakes Law Studies concurrently with studies in Arts in order to complete a double degree program will be granted status in:

The Bachelor of Arts (Asian Studies)

The Bachelor of Arts (European Studies)

up to and including the following limits on account of their Law Studies:

on completion of the Level I compulsory subjects 6019 Law and Legal Process and 3731 Contract:

8 points at Level II (not forming part of the major sequence); and

on completion of one other 6 point compulsory subject listed in Rule 3.2.1 of the Specific Course Rules of the Bachelor of Laws:

6 points at Level III (not forming part of the major sequence)

5.4 Students who gain exemption from part of the requirements of their undergraduate degree under this rule are not eligible to apply for status on account of the studies taken into consideration under the provisions of Rule 4.

### 6 Approval of course of study at enrolment

6.1 Each student's course of study shall be approved by the Faculty at enrolment each year.

### 7 Qualification requirements

#### 7.1 Bachelor of Arts

7.1.1 To qualify for the Ordinary degree of Bachelor of Arts a student shall present subjects to the value of 72 points which satisfy the following requirements:

##### Level I

(a) A student shall present passes in Level I subjects to the value of 12 points chosen from those listed in Rule 8.1, Arts Subjects;

(b) A student shall present passes in further Level I subjects to the value of 12 points chosen from those listed in 8.1, Arts Subjects, 8.2, Design Studies Subjects, 8.3 Mathematical and Computer Sciences Subjects and 8.4, Science Subjects, and other subjects offered in the University at Level I available to them;

**Level II**

- (c) A student shall present passes in Level II subjects to the value of 8 points chosen from those listed in 8.5, Arts Subjects, being the Level II component of a major sequence (see (h), below);
- (d) A student shall present passes in further Level II subjects to the value of 8 points chosen from those listed in 8.5, Arts Subjects, below;
- (e) A student shall present passes in further Level II subjects to the value of 8 points chosen from those listed in 8.5, Arts Subjects, 8.6, Design Studies Subjects, 8.7 Mathematical and Computer Sciences Subjects and 8.8, Science Subjects, and other subjects offered in the University at Level II available to them;

**Level III**

- (f) A student shall present passes in Level III subjects to the value of 12 points chosen from those listed in 8.9, Arts Subjects and 8.10 Mathematical and Computer Sciences Subjects, being the Level III component of a major sequence (see (h), below);
- (g) A student shall present passes in further Level III subjects to the value of 12 points chosen from those listed in 8.9, Arts Subjects.

**Level II and III - Major Sequence**

- (h) As part of the requirements of (c) and (f), above, 8 points of subjects presented at Level II and 12 points of subjects presented at Level III must form a major sequence and be chosen from one of the following disciplinary and interdisciplinary areas recognised by the Faculty of Arts:

Ancient Greek  
 Anthropology  
 Asian Studies  
 Australian Studies  
 Chinese  
 Classical Studies  
 Cultural Studies  
 Drama Studies  
 Economics  
 English

European Studies  
 French Studies  
 Geography  
 German Studies  
 History  
 Indonesian  
 International Studies  
 Italian  
 Japanese  
 Labour Studies  
 Latin  
 Linguistics  
 Mathematical and Computer Sciences  
 Modern Greek  
 Music Studies  
 Philosophy  
 Politics  
 Psychology  
 Spanish and Portuguese  
 Vietnamese  
 Women's Studies

Subjects forming part of the above major sequences are identified in Rule 8, Course of study/ Subjects of study, below.

- 7.1.2 In all cases, a student may substitute an appropriate subject chosen from Level II to fulfil the requirements of Level I, or from Level III to fulfil the requirements of Level I or II.
- 7.1.3 A student shall complete a Library Skills Workbook, except when an exemption is granted therefrom by the Faculty.
- 7.1.4 A student may present passes in Level I and Level II Labour Studies (Arts) subjects to a combined maximum of 12 points and Level III Labour Studies (Arts) subjects to a maximum of 12 points.

**7.2 Bachelor of Arts (Asian Studies)**

- 7.2.1 To qualify for the Ordinary degree of Bachelor of Arts (Asian Studies) a student shall present subjects to the value of 72 points which satisfy the following requirements:

**Level I**

- (a) A student shall present passes in Level I subjects to the value of 6 points chosen from those listed in 8.1 Arts Subjects;

- (b) A student shall present a pass in a Level I subject in an Asian language chosen from Chinese, Indonesian, Japanese or Vietnamese to the value of 6 points (unless exempted by the Centre for Asian Studies, in which case a student shall present 6 points in other approved Asian Studies subjects);
- (c) A student shall present passes in further Level I subjects to the value of 12 points chosen from those listed in 8.1, Arts Subjects; 8.2, Design Studies Subjects; 8.3, Mathematical and Computer Sciences Subjects; 8.4, Science Subjects and other subjects offered in the University at Level I available to them.

#### Level II

- (c) A student shall present passes in Level II Asian Studies subjects\* to the value of 12 points
- (d) A Student shall present a pass in the compulsory subject 1827 Asian Studies II (4 points);

#### Level III

- (e) A student shall present passes in Level III Asian Studies subjects\* to the value of 12 points;

#### Level II and III - Major Sequence in an Asian Language

- (f) In addition to the above, a student shall present passes in subjects in an Asian language chosen from Chinese, Japanese, Vietnamese or Indonesian to the value of 8 points at Level II and 12 points at Level III;

7.2.2 In all cases, a student may substitute an appropriate subject chosen from Level II to fulfil the requirements of Level I, or from Level III to fulfil the requirements of Level I or II.

7.2.3 A student shall complete a Library Skills Workbook, except when an exemption is granted therefrom by the Faculty.

7.2.4 A student may present passes in Level I and Level II Labour Studies (Arts) subjects to a combined maximum of 12 points.

### 7.3 Bachelor of Arts (Australian Studies)

7.3.1 To qualify for the Ordinary degree of Bachelor of Arts (Australian Studies) a student shall present subjects to the value of 72 points which satisfy the following requirements:

#### Level I

- (a) A student shall present passes in Level I subjects to the value of 12 points chosen from those listed in 8.1, Arts Subjects;
- (b) A student shall present passes in further Level I subjects to the value of 12 points chosen from those listed in 8.1, Arts Subjects, 8.2, Design Studies Subjects, 8.3 Mathematical and Computer Sciences Subjects and 8.4, Science Subjects, and other subjects offered in the University at Level I available to them;

#### Level II

- (c) A student shall present passes in Level II Australian Studies subjects\* to the value of 12 points;
- (d) A student shall present a pass in the compulsory subject 3262 Australian Studies II (4 points);
- (d) A student shall present passes in further Level II subjects to the value of 8 points chosen from those listed in 8.5, Arts Subjects, 8.6, Design Studies Subjects, 8.7 Mathematical and Computer Sciences Subjects and 8.8, Science Subjects, and other subjects offered in the University at Level II available to them;

#### Level III

- (f) A student shall present passes in Level III Australian Studies subjects\* to the value of 18 points;
- (e) A student shall present passes in further Level III subjects listed in clause 8.9, Arts subjects, to the value of not less than 6 points.

7.3.2 In all cases, a student may substitute an appropriate subject chosen from Level II to fulfil the requirements of Level I, or from Level III to fulfil the requirements of Level I or II.

7.3.3 A student shall complete a Library Skills Workbook, except when an exemption is granted therefrom by the Faculty.

7.3.4 A student may present passes in Level I and Level II Labour Studies (Arts) subjects to a combined maximum of 12 points.

\* Subject list available from the Faculty of Arts office at time of enrolment

**7.4 Bachelor of Arts (Cultural Studies)**

7.4.1 To qualify for the Ordinary degree of Bachelor of Arts (Cultural Studies) a student shall present subjects to the value of 72 points which satisfy the following *requirements*:

**Level I**

- (a) A student shall present passes in Level I subjects to the value of 12 points chosen from those listed in 8.1, Arts Subjects;
- (b) A student shall present passes in further Level I subjects to the value of 12 points chosen from those listed in 8.1, Arts Subjects, 8.2, Design Studies Subjects, 8.3 Mathematical and Computer Sciences Subjects and 8.4, Science Subjects, and other subjects offered in the University at Level I available to them;

**Level II**

- (c) A student shall present passes in Level II Cultural Studies subjects\* to the value of 12 points;
- (d) A student shall present a pass in the compulsory subject 8675 Cultural Studies II (4 points);
- (d) A student shall present passes in further Level II subjects to the value of 8 points chosen from those listed in 8.5, Arts Subjects, 8.6, Design Studies Subjects, 8.7 Mathematical and Computer Sciences Subjects and 8.8, Science Subjects, and other subjects offered in the University at Level II available to them;

**Level III**

- (f) A student shall present passes in Level III Cultural Studies subjects \* to the value of 18 points;
- (e) A student shall present passes in further Level III subjects listed in clause 8.9, Arts subjects, to the value of not less than 6 points.

7.4.2 In all cases, a student may substitute an appropriate subject chosen from Level II to fulfil the requirements of Level I, or from Level III to fulfil the requirements of Level I or II.

7.4.3 A student shall complete a Library Skills Workbook, except when an exemption is granted therefrom by the Faculty.

7.4.4 A student may present passes in Level I and Level II Labour Studies (Arts) subjects to a combined maximum of 12 points.

**7.5 Bachelor of Arts (European Studies)**

7.5.1 To qualify for the Ordinary degree of Bachelor of Arts (European Studies) a student shall present subjects to the value of 72 points which satisfy the following *requirements*:

**Level I**

- (a) A student shall present passes in Level I subjects to the value of 6 points chosen from those listed in 8.1, Arts Subjects;
- (b) A student shall present a pass in a Level I subject in a European language other than English chosen from Ancient Greek, French, German, Italian, Latin, Modern Greek, Spanish or Portuguese to the value of 6 points;
- (c) A student shall present passes in further Level I subjects to the value of 12 points chosen from those listed in 8.1, Arts Subjects, 8.2, Design Studies Subjects, 8.3 Mathematical and Computer Sciences Subjects and 8.4, Science Subjects, and other subjects offered in the University at Level I available to them;

**Level II**

- (d) A student shall present passes in Level II European Studies subjects\* to the value of 12 points;
- (e) A Student shall present a pass in the compulsory subject 2157 European Studies II (4 points);

**Level III**

- (f) A student shall present passes in Level III European Studies subjects\* to the value of 12 points;

**Level II and III - Major Sequence in a European Language**

- (g) In addition to the above, a student shall present passes in subjects in a European language other than English chosen from Ancient Greek, French, German, Italian, Latin, Modern Greek, Spanish or Portuguese to the value of 8 points at Level II and 12 points at Level III;

7.5.2 In all cases, a student may substitute an appropriate subject chosen from Level II to fulfil the requirements of Level I, or from Level III to fulfil the requirements of Level I or II.

\* Subject list available from the Faculty of Arts office at time of enrolment

- 7.5.3 A student shall complete a Library Skills Workbook, except when an exemption is granted therefrom by the Faculty.
- 7.5.4 A student may present passes in Level I and Level II Labour Studies (Arts) subjects to a combined maximum of 12 points.

## 7.6 Bachelor of Arts (International Studies)

- 7.6.1 To qualify for the Ordinary degree of Bachelor of Arts (International Studies) a student shall present subjects to the value of 72 points which satisfy the following *requirements*:

### Level I

- (a) A student shall present passes in Level I subjects to the value of 12 points chosen from those listed in 8.1, Arts Subjects;
- (b) A student shall present passes in further Level I subjects to the value of 12 points chosen from those listed in 8.1, Design Studies Arts Subjects, 8.2, Subjects, 8.3 Mathematical and Computer Sciences Subjects and 8.4, Science Subjects, and other subjects offered in the University at Level I available to them;

### Level II

- (c) A student shall present passes in Level II International Studies subjects\* to the value of 12 points;
- (d) A student shall present a pass in the compulsory subject 5455 International Studies II (4 points);
- (d) A student shall present passes in further Level II subjects to the value of 8 points chosen from those listed in 8.5, Arts Subjects, 8.6, Design Studies Subjects, 8.7, Mathematical and Computer Sciences Subjects and 8.8, Science Subjects, and other subjects offered in the University at Level II available to them;

### Level III

- (f) A student shall present passes in Level III International Studies subjects\* to the value of 18 points;
- (e) A student shall present passes in further Level III subjects listed in clause 8.9, Arts subjects, to the value of not less than 6 points.
- 7.6.2 In all cases, a student may substitute an appropriate subject chosen from Level II to fulfil the requirements of Level I, or from Level III to fulfil the requirements of Level I or II.

- 7.6.3 A student shall complete a Library Skills Workbook, except when an exemption is granted therefrom by the Faculty.
- 7.6.4 A student may present passes in Level I and Level II Labour Studies (Arts) subjects to a combined maximum of 12 points.

## 7.7 All Degrees

- 7.7.1 A student may present for the degree conceded passes in Level I and Level II subjects provided that the points value of any individual subject for which a conceded pass is presented does not exceed 3 points, and the aggregate points value does not exceed 6 points. Note that conceded passes are not awarded for Arts subjects listed in clauses 8.1 and 8.4.
- 7.7.2 A student may not present for the degree subjects in the same discipline which exceed the following limits:
- 7.7.2.1 at Level I: subjects to the value of 12 points
- 7.7.2.2 at Level II: subjects to the value of 16 points

For the purpose of this clause, 'disciplines' shall be equivalent to the areas of study outlined in 7.1.1, (h), above.

- 7.7.3 A student will not be permitted to present for the degree any subject together with any other subject which, in the opinion of the Faculty contains a substantial amount of the same material.
- 7.7.4 A student will not be permitted to count a subject twice for the degree, nor, in the case of subjects available at two levels, any subject taken at both levels.
- 7.7.5 Except by permission of the Faculty a student shall not proceed to a subject for which the student has not completed the prerequisite subjects prescribed in the syllabuses.
- 7.7.6 Students wishing to study any subject which is determined by the Faculty to be surplus to the requirements of their degree as outlined in Rule 7 must do so on a Non-Award basis as outlined in General Course Rule 1.4.13

\* Subject list available from the Faculty of Arts office at time of enrolment

**8 Courses of study/Subjects of study**

notes: Unless otherwise indicated in the Syllabuses, subjects will not normally be available to students with exemption from lectures.

# subject to staffing

**8.10 Mathematical And Computer Science subjects**

All full-year and semester subjects listed under Specific Course Rule 4.3 of the B.Sc. degree in the Faculty of Mathematical and Computer Sciences and taught in that Faculty.

**9 Cross-institutional study**

9.1 With prior approval of the Faculty, students may study subjects offered by other universities not offered by the Faculty of Arts as Cross-Institutional students, subject to the following provisions:

9.1.1 Enrolment in such subjects must be approved in advance by the Faculty;

9.1.2 Students will be given permission to count cross-institutional subjects towards such requirements of their degree as the Faculty may determine;

9.1.3 Except by special permission of the Faculty, the following limits shall apply:

9.1.3.1 at Level I

12 points for cross-institutional studies in any discipline in lieu of the requirements of clause 7.1.1 (b) or equivalent for the named degrees;

9.1.3.2 at Level II

8 points for cross-institutional studies in any discipline in lieu of the requirements of clause 7.1.1 (e) or equivalent for

the named degrees;

9.1.3.3 at Level III

6 points for cross-institutional studies in the Humanities and Social Sciences.

9.1.4 Flinders University Language Outreach subjects and international exchange subjects approved by the Faculty shall be exempt from the provisions of this rule.

9.1.5 Students undertaking cross-institutional studies must abide by any rules and regulations the host institution shall prescribe

9.1.6 On completion of any cross-institutional subject, the student shall be responsible for ensuring that an official transcript or result notice is forwarded to the Faculty.

**10 International exchanges**

With prior approval of the Faculty, students may count studies completed while on International Exchange programs formalised through the University's Office of International Programs towards their undergraduate degree subject to the following provisions:

10.1 Except by special permission of the Faculty, the following limits shall apply:

at Levels II and III combined:

students shall be able to count a maximum of 24 points in total for studies completed while on International Exchange

in any discipline in lieu of the requirements of clause 7.1.1 (subclauses c-h) or the equivalent for the named degrees;

10.2 On the approval by the Faculty of Arts of an approved program of study at the host university, students will be permitted to enrol in one or more of the following subjects to the total value of 24 points:

9004 International Exchange 1 (Arts) 12

3091 International Exchange 2 (Arts) 12

2774 International Exchange Full (Arts) 24

prior to the International Exchange commencing.

The Faculty shall record on the student's file which requirements of the degree (including level) will be fulfilled by the student successfully completing the approved program of study;

**10.3** On completion of the International Exchange, the student shall be responsible for ensuring that an official transcript or result notice for the studies undertaken is forwarded to the Faculty Office. Where the agreed program of study has been successfully completed, the grade of Satisfactory will be recorded for the International Exchange subject or subjects enrolled in;

**10.4** Students shall seek Faculty approval for alterations to the program of study while on exchange necessitated by alterations to subject availability at the host institution;

**10.5** Where students undertake a program of study at the host institution not approved by the Faculty, or study a subject or subjects which constitutes a change to the program of study not approved by the Faculty, the Faculty shall reserve the right to determine that proportion of the requirements of the students degree which have been fulfilled by undertaking such studies on the student's return.

## **11 Unacceptable combinations of subjects**

Where a subject has listed a subject or set of subjects as a Restriction, that subject cannot be presented for the degree in addition to any subject listed as a Restriction.

## **12 Repeating subjects**

**12.1** A student who fails to pass in a subject and who desires to take the subject again shall again attend lectures and do practical work in the subject to the satisfaction of the Department, unless exempted therefrom by the Faculty of Arts.

**12.2** A student who has twice failed to pass the examination in any subject or division of a subject may not enrol for that subject again except by special permission of the Faculty and then only under such conditions as the Faculty may prescribe.

## **13 Attendance requirement**

**13.1** A student shall not be eligible to present for assessment, by examination or otherwise, unless the student has regularly attended the prescribed classes and has done written and laboratory or other practical work, where required, to the satisfaction of the Department concerned.

**13.2** For the purposes of this clause a student who is refused permission to be assessed, by examination or otherwise, or who does not, without a reason accepted by the Head of the relevant Department as adequate, attend all or part of a final examination (or supplementary examination if granted) after having enrolled for at least two thirds of the normal period during which the subject is taught, shall be deemed to have failed the subject.

# Bachelor of Social Sciences

## Specific Course Rules

### 1 General

1.1 On satisfying the admission requirements for entry to undergraduate studies in the Faculty of Arts, students will enrol in a course of study in the Humanities and Social Sciences (see the Specific Course Rules for the Bachelor of Arts). On completing the relevant degree requirements outlined below, this course of study will allow them to qualify for the Ordinary degree of Bachelor of Social Sciences.

Graduates who have qualified for the Bachelor of Social Sciences and who wish to obtain a subsequent but different undergraduate degree in the Faculty of Arts must apply for entry to a new course of study leading to the subsequent degree and, if successful, will be subject to the rules applying to Status, Exemption and Credit Transfer outlined the Specific Course Rules for the Bachelor of Arts.

1.2 The course of study for the Ordinary degree shall extend over three full-time academic years or the part-time equivalent.

### 2 Admission requirements

The admission requirements for the course of study leading to the Bachelor of Social Sciences are those outlined in the Rules made by Council pursuant to Chapter IX of the University Statutes - Of Admission and Enrolment.

### 3 Assessment and examinations

There shall be four classifications of pass in any subject for the degree: Pass with High Distinction, Pass with Distinction, Pass with Credit, and Pass.

In some subjects a pass may be recorded in two divisions. For such subjects a pass in the higher division may be prescribed in the syllabuses as a prerequisite for admission either to further courses in that subject or to other subjects.

There shall also be a classification of Conceded Pass. A student may present for the Ordinary degree only a limited number of subjects for which a Conceded Pass has been obtained, as specified in the relevant schedule made under these regulations.

### 4 Status, exemption and credit transfer

Exemption from the requirements of the Bachelor of Social Sciences in lieu of studies towards combined degree programs such as the Bachelor of Laws/Bachelor of Social Sciences is covered *solely* under the provisions of Rule 5, Studies conceded in lieu of combined degree programs, below.

#### 4.1 Status for Bachelor degree level studies

##### 4.1.1 Status on Account of Previous Studies in any Academic Discipline

Persons who have previously passed subjects in Bachelor degree courses or equivalent in The University of Adelaide or other recognised university in any academic discipline who wish to count towards their degree such subjects may on written application to the Faculty be granted such status as the Faculty shall determine subject to the following conditions:

4.1.1.1 Students may present for the degree such subjects to a maximum aggregate points value of 12 points at Level I in lieu of the requirements of clause 7.1 (b), and 8 points at Level II in lieu of 7.1 (f);

##### 4.1.2 Status on account of studies in the Social Sciences

Persons who have previously passed subjects offered in Bachelor degree courses or equivalent in The University of Adelaide or other recognised university in the Social Sciences who wish to count towards their degree such subjects may, on written application to the Faculty Registrar, be granted status towards such specific degree requirements as the Faculty shall determine subject to the following conditions:

##### 4.1.2.1 Status on account of completed degrees

4.1.2.1.1 Except with the permission of the Faculty, students may present for the degree such subjects to a maximum aggregate points value of 24 points at Level I; or

4.1.2.1.2 Such subjects to a maximum aggregate points value of 18 points at Level I and 8 points at Level II.

#### 4.1.2.2 Status on account of incomplete degree studies

For subjects passed in a course of study not yet completed other than those undertaken in an undergraduate award in the Faculty of Arts at The University of Adelaide pursuant to these Specific Course Rules:

4.1.2.2.1 Except with the permission of the Faculty, students may present for the degree such subjects to the maximum aggregate points outlined in 4.1.2.1, above; and in addition

4.1.2.2.2 Such subjects in fields of study recognised as major sequences in the Social Sciences, or in the area of Law Studies, determined on a subject-by-subject basis, to an additional value of 6 points at Level I (if required) and 8 points at Level II.

#### 4.2 Status for the Diploma of Associate of The University of Adelaide

Students who have qualified for a Diploma of associate of The University of Adelaide (AUA) may be granted such status in an undergraduate Faculty of Arts course as the Faculty shall in each case determine; provided that if status for the degree be granted for more than 18 points presented for the diploma, the student shall surrender the diploma before being admitted to the degree.

#### 4.3 Status for the Associate Diploma in Liberal Studies of The University of Adelaide

Students who have qualified for the Associate Diploma in Liberal Studies may be granted up to 48 points of status in the course for the degree of Bachelor of Arts provided that if status of more than 24 points is granted, the student shall surrender the Associate Diploma before being admitted to the degree.

Students who have qualified for the Associate Diploma in Liberal Studies may be granted status on a subject-by-subject basis up to a maximum of 48 points in any other undergraduate degree offered by the Faculty of Arts provided that if status of more than 24 points is granted, the student shall surrender the Associate Diploma before being admitted to the degree.

#### 4.4 Status for prior Technical and Further Education) TAFE studies

Students who have qualified for an Associate Diploma from an Institute of Technical and Further Education (TAFE) may, on application

to the Faculty, be granted up to a maximum 6 points at Level I in lieu of the requirements of clause 7.1 (b) (or equivalent for the named degrees) on account of the final year of study in the Associate Diploma.

#### 4.5 Status for prior non-Award studies

Subject to Faculty approval, students who have completed Non-Award subjects from any recognised higher education institution may apply for status on account of such subjects towards their degree, and, if successful, will be subject to the same limits and conditions outlined in 4.1, above.

### 5 Studies conceded in lieu of combined degree programs

5.1 A student of the Faculty of Arts who is able to gain entry to another undergraduate degree program in the University (with the exception of the Bachelor of Laws) and who studies that degree concurrently with the Bachelor of Social Sciences in order to complete a combined degree program will have the following status granted in lieu of the successful completion of their other degree:

12 points at Level I; and

8 points at Level II (not forming part of the major sequence)

5.2 A student of the Faculty of Arts who is able to gain entry to Law Studies and who undertakes Law Studies concurrently with studies in Arts in order to complete a combined degree program will be granted status in the Bachelor of Social Sciences up to and including the following limits on account of their Law Studies:

on completion of the Level I compulsory subjects 6019 Law and Legal Process and 3731 Contract:

8 points at Level II (not forming part of the major sequence); and

on completion of 12 points of other compulsory subjects listed in Rule 3.2.1 of the Specific Course Rules of the Bachelor of Laws:

12 points at Level III (not forming part of the major sequence)

5.3 Students who gain exemption from part of the requirements of their undergraduate degree under this rule are not eligible to apply for status on account of the studies taken into consideration under the provisions of Rule 4.

## 6 Approval of course of study at enrolment

Each student's course of study shall be approved by the Faculty at enrolment each year.

## 7 Qualification requirements

7.1 To qualify for the Ordinary degree of Bachelor of Social Sciences a student shall present subjects to the value of 72 points which satisfy the following requirements:

### Level I

- (a) A student shall present passes in Level I subjects to the value of 12 points chosen from those listed in Rule 8.1, Social Sciences Subjects\*;
- (b) A student shall present passes in further Level I subjects to the value of 12 points chosen from those listed in Rules 8.1, Social Sciences Subjects\*, 8.2, Science Subjects, 8.3, Architectural Studies Subjects and 8.4, Other Arts Subjects, and other subjects offered in the University at Level I available to them;

### Level II

- (c) A student shall present passes in Level II subjects to the value of 8 points chosen from those listed in Rule 8.5, Social Sciences Subjects\*, being the Level II component of a major sequence (see (i), below);
- (d) A student shall present passes in another Level II subject to the value of 4 points chosen from those listed in Rules 8.5, Social Sciences Subjects, and 8.6, Science subjects\*, below;
- (e) A Student shall present a pass in the compulsory subject 6204 Issues and Techniques in the Social Sciences II (4 points);
- (f) A student shall present passes in further Level II subjects to the value of 8 points chosen from those listed in Rules 8.5, Social Sciences Subjects, 8.6, Science Subjects, 8.7, Architectural Studies Subjects and 8.8, Other Arts Subjects, and other subjects offered in the University at Level II available to them;

### Level III

- (g) A student shall present passes in Level III subjects to the value of 12 points chosen from those listed in Rule 8.9, Social

Sciences Subjects\*, being the Level III component of a major sequence (see (i), below);

- (h) A student shall present passes in further Level III subjects to the value of 12 points chosen from those listed in Rules 8.9, Social Sciences Subjects\* and 8.10 Science Subjects.

### Level II and III - Major Sequence

- (i) As part of the requirements of (c) and (g), above, 8 points of subjects presented at Level II and 12 points of subjects presented at Level III must form a major sequence and be chosen from one of the following disciplinary and interdisciplinary areas recognised by the Faculty of Arts:

Anthropology  
Asian Studies  
Cultural Studies  
Economics  
Geography  
History  
International Studies  
Labour Studies  
Linguistics  
Politics  
Psychology  
Women's Studies

Subjects forming part of the above major sequences are identified in Rule 8, Course of study/ Subjects of study, below.

- 7.2 In all cases, a student may substitute an appropriate subject chosen from Level II to fulfil the requirements of Level I, or from Level III to fulfil the requirements of Level I or II.
- 7.3 A student shall complete a Library Skills Workbook, except when an exemption is granted therefrom by the Faculty.
- 7.4 A student may present passes in Level I and Level II Labour Studies (Arts) subjects to a combined maximum of 12 points and Level III Labour Studies (Arts) subjects to a maximum of 12 points.
- 7.5 A student may present for the degree conceded passes in Level I and Level II subjects provided that the points value of any individual subject for which a conceded pass is presented does not

exceed 3 points, and the aggregate points value does not exceed 6 points. Note that conceded passes are not awarded for Social Sciences subjects listed in clauses 8.1 and 8.5.

**7.6** A student may not present for the degree subjects in the same discipline which exceed the following limits:

**7.6.1** at Level I: subjects to the value of 12 points

**7.6.2** at Level II: subjects to the value of 16 points

For the purpose of this clause, 'disciplines' shall be equivalent to the areas of study outlined in 7.1, (i), above.

**7.7** A student will not be permitted to present for the degree any subject together with any other subject which, in the opinion of the Faculty contains a substantial amount of the same material.

**7.8** A student will not be permitted to count a subject twice for the degree, nor, in the case of subjects available at two levels, any subject taken at both levels.

**7.9** Except by permission of the Faculty a student shall not proceed to a subject for which the student has not completed the prerequisite subjects prescribed in the syllabuses.

## **8 Course of study/Subjects of study**

Full subject listings available from the Faculty of Arts office at the time of enrolment.

## **9 Cross-institutional study**

**9.1** With prior approval of the Faculty, students may study subjects offered by other universities not offered by the Faculty of Arts as Cross-Institutional students, subject to the following provisions:

**9.1.1** Enrolment in such subjects must be approved in advance by the Faculty;

**9.1.2** Students will be given permission to count cross-institutional subjects towards such requirements of their degree as the Faculty may determine;

**9.1.3** Except by special permission of the Faculty, the following limits shall apply:

**9.1.3.1** at Level I

12 points for cross-institutional studies in any discipline in lieu of the requirements of Rule 7.1 (b);

**9.1.3.2** at Level II

8 points for cross-institutional studies in any discipline in lieu of the requirements of Rule 7.1 (f);

**9.1.3.3** at Level III

6 points for cross-institutional studies in the Social Sciences.

**9.1.4** Flinders University Language Outreach subjects and international exchange subjects approved by the Faculty shall be exempt from the provisions of this rule.

**9.1.5** Students undertaking cross-institutional studies must abide by any rules and regulations the host institution shall prescribe

**9.1.6** On completion of any cross-institutional subject, the student shall be responsible for ensuring that an official transcript or result notice is forwarded to the Faculty.

## **10 International exchanges**

With prior approval of the Faculty, students may count studies completed while on International Exchange programs formalised through the University's Office of International Programs towards their undergraduate degree subject to the following provisions:

**10.1** Except by special permission of the Faculty, the following limits shall apply:

at Levels II and III combined:

students shall be able to count a maximum of 24 points in total for studies completed while on International Exchange

in any discipline in lieu of the requirements of Rule 7.1 (subclauses c-i);

**10.2** On the approval by the Faculty of Arts of an approved program of study at the host university, students will be permitted to enrol in one or more of the following subjects to the total value of 24 points:

9004 International Exchange 1 (Arts)	12
3091 International Exchange 2 (Arts)	12
2774 International Exchange Full (Arts)	24

prior to the International Exchange commencing.

The Faculty shall record on the student's file which requirements of the degree (including level) will be fulfilled by the student successfully completing the approved program of study;

**10.3** On completion of the International Exchange, the student shall be responsible for ensuring that an official transcript or result notice for the studies undertaken is forwarded to the Faculty Office. Where the agreed program of study has been successfully completed, the grade of Satisfactory will be recorded for the

International Exchange subject or subjects enrolled in;

**10.4** Students shall seek Faculty approval for alterations to the program of study while on exchange necessitated by alterations to subject availability at the host institution;

**10.5** Where students undertake a program of study at the host institution not approved by the Faculty, or study a subject or subjects which constitutes a change to the program of study not approved by the Faculty, the Faculty shall reserve the right to determine that proportion of the requirements of the students degree which have been fulfilled by undertaking such studies on the student's return.

## **11 Unacceptable combinations of subjects**

Where a subject has listed a subject or set of subjects as a Restriction, that subject cannot be presented for the degree in addition to any subject listed as a Restriction.

## **12 Repeating subjects**

**12.1** A student who fails to pass in a subject and who desires to take the subject again shall again attend lectures and do practical work in the subject to the satisfaction of the Department, unless exempted therefrom by the Faculty of Arts.

**12.2** A student who has twice failed to pass the examination in any subject or division of a subject may not enrol for that subject again except by special permission of the Faculty and then only under such conditions as the Faculty may prescribe.

## **13 Attendance requirement**

**13.1** A student shall not be eligible to present for assessment, by examination or otherwise, unless the student has regularly attended the prescribed classes and has done written and laboratory or other practical work, where required, to the satisfaction of the Department concerned.

**13.2** For the purposes of this clause a student who is refused permission to be assessed, by examination or otherwise, or who does not, without a reason accepted by the Head of the relevant Department as adequate, attend all or part of a final examination (or supplementary examination if granted) after having enrolled for at least two thirds of the normal period during which the subject is taught, shall be deemed to have failed the subject.

\* subject list available from Faculty of Arts office at time of enrolment

## Syllabuses

---

### textbooks

Information on appropriate textbooks will be provided by the Department concerned, and at the preliminary lecture in Orientation Week.

In general, students are expected to have their own copies of textbooks, but they are advised to await advice from the lecturer concerned before buying any particular book. Only the prescribed edition of any textbook should be bought.

### reference books

Although lists of books and journals for reference purposes are regarded as important, details have not been included in this Volume. These will however be issued from time to time by the departments concerned. It is hoped that all books and journals set for reference will be available to be consulted in the Barr Smith Library.

### prerequisites

Students are reminded that in order to proceed to the second level in any subject in the Faculty of Arts they must, in the case of any Level I year subject or prerequisite subject in which the pass list is published in two divisions, pass at Division I level or higher, unless special permission is obtained in writing from the Registrar.

### examinations

For each subject students may obtain from the department concerned details of the examination in that subject including the relative weights given to the components (eg. such of the following as are relevant: assessments, semester test, essays or other written or practical work, final written exams, viva voce exams

## Anthropology

### Level I

---

#### 7419 Introduction to Social Anthropology I

level: I    points value: 6    duration: full year

quota: may apply

restriction: 9457 Anthropology I

contact hours: 2 lectures and 1 tutorial a week

content: Level I Anthropology is an introduction to social and cultural anthropology. The subject focuses on the following features of the approach to

Anthropology in this Department. The first is the ethnographic method which consists of the description and analysis of human social life based upon extensive field research. The second is the comparative perspective through which both the similarities and differences between human societies are central to anthropological knowledge. The third considers the meaningful constitution of social life through symbols and the power that characterises relations among people, between societies and states in the post-colonial world and between anthropologists and those among whom they conduct fieldwork. Fourth, and most importantly, is the reflexive character of anthropological knowledge. Anthropological knowledge of other modes of social life and meaning ultimately leads to critical knowledge of our own society. These themes are developed through examinations of a variety of ethnographic studies chosen to illustrate these analytic perspectives in anthropology.

assessment: tutorial papers, essays and optional exam

### Level II

---

prerequisites: 7419 Introduction to Social Anthropology I. Subject to the approval of the Head of the Department, Level I subjects from Asian Studies, Geography, History, Philosophy, Politics and Sociology (Flinders) may be used as prerequisites.

requirements: Students intending to proceed to Level III subjects in Anthropology must complete satisfactorily two semesters of Level II subjects in Anthropology. Those students planning to proceed to an Honours year in Anthropology must have satisfactorily completed five semesters of Anthropology at Level II/III at least two semesters of which must be at Level III.

#### 3974 Aboriginal Land Tenure and Sacred Sites In Australia II

level: II    points value: 4    availability: semester 2

prerequisites: Level I Anthropology or alternative approved by the Department

contact hours: 2 lectures and 1 tutorial per week

content: The subject begins by examining classical Aboriginal land tenure systems. This includes the variety of ways land is held as symbolic and economic property, the way access to it and use of its resources are governed, how a kinship-based social organisation is meshed with local organisation and how the principles of succession to customary title in land are

reflected in the disposal of estates of extinct groups and in land tenure disputes. The complex nature of traditional interests in sacred sites is also explored. We then look at how Aboriginal people present claims based on their traditions in the present context of government organisations, tribunals and courts. We discuss the relationship between Aboriginal law, customary law and Australian law, in the context of land ownership. Finally we explore the way anthropologists act professionally as go-betweens in this situation, researching land and sacred sites claim and acting as expert witnesses.

*assessment:* essays, papers, tutorial participation

### **8195 Aborigines and the State II**

*level:* II *points value:* 4

*availability:* not offered in 1996

*prerequisites:* Level I Anthropology or alternative approved by the Department

*contact hours:* 2 lectures and 1 tutorial a week

*content:* This subject focuses on the seemingly inexorable encapsulation of the Aboriginal people of Australia within the wider nation state. That is, it views the process whereby Aborigines have been transformed from autonomous hunter-gatherers into dependent Fourth World peoples. After briefly surveying the history of and Aboriginal reaction to the European colonisation of Australia, attention is devoted to a range of contemporary issues, in both remote and urban environments. The goal is to place such phenomena as Aboriginal Land Rights, community development programs, alcohol abuse, and high arrest and incarceration rates in their broader socio-politico-economic context.

*assessment:* essays, papers, tutorial participation

### **4832 Anthropology of Ritual, Performance and Art II**

*level:* II *points value:* 4

*availability:* not offered in 1996

*prerequisites:* Level I Anthropology or alternative approved by Department

*contact hours:* 3 hours per week

*content:* The subject focuses on ritual, cultural performance and art in a broad range of cultural settings and religious traditions. The subject locates anthropological approaches to ritual, performance and art within Western traditions. A central concern is how the ritual performance and arts of other cultures have been constructed, appropriated and simulated in

Western practice. Shifts in the anthropological agenda, the production of ethnographic texts as well as other domains (which range from Western art and ethnographic film-making to Museums and tourism) are examined.

Students may concentrate their research over the semester on material which reflects their focal interests in this subject.

*assessment:* tutorial, workshop papers/participation, essay

### **3664 Contemporary Communities and Social Movements II**

*level:* II *points value:* 4

*duration:* not offered in 1996

*prerequisites:* Level I Anthropology or alternative approved by the Department

*restrictions:* 9729 Anthropology IIA (1987 or 1986); 6376/8047 Communities, Boundaries and Symbols

*contact hours:* 2 lectures and 1 tutorial per week

*content:* This subject examines the social organisation of community experience and the character of social movements in contemporary, postmodern society. A number of sociologists have argued that, by comparison with the situation several decades ago, the members of advanced capitalist societies are relatively unattached to the community settings in which they work and live. They are more involved in the consumption of global culture courtesy of the mass media; and if they are politically inclined their interests lie in mass movements rather than regionally-bounded and class-based collectivities. Social anthropologists who have conducted extensive ethnographic research are generally inclined to challenge such broadly-based arguments. For in such European settings as France, Ireland, Italy and Spain, it is clear that in both rural and urban milieux, residents remain profoundly attached to the social relations, the political processes and the cultural aesthetics characteristic of face-to-face communities, whilst recognising too that the rate of current change is exceptional. Having reviewed initially the arguments of select postmodern theorists, this subject will examine in detail several outstanding studies of contemporary European communities. We will then turn to rival perspectives on the emergence of such social movements as environmentalism, feminism and anti-racism, before concluding the semester with an anthropologically-informed critique of postmodern perspectives on global culture.

*assessment:* essays and tutorial papers

**8604 Depicting Aboriginal Cosmology II***level:* II *points value:* 4 *duration:* semester 1*availability:* subject to staff availability*prerequisites:* Level I Anthropology or alternative approved by the Department*restrictions:* 9817/9009 Pre-Colonial Aboriginal Society*contact hours:* 3 hours per week

*content:* Indigenous Australian religious beliefs and practices have long fascinated social scientists and the wider public. In this course we explore the construction and analyses of traditional Aboriginal knowledge concerning the Dreaming, spirit conception and attachments to country, and rites associated with initiation, sorcery and the increase of plant and animal life. Along the way attention is paid to how the depictions have been used to do such disparate things as inform and substantiate theories of humankind, legitimise racism and critique the Western treatment of the environment. We round out the semester with an examination of the way facets of Aboriginal religion are commodified, contrived as sites of Black-White interaction and constituted as spaces and vehicles of resistance to domination.

*assessment:* book review, essays and tutorial participation**7471 Ethnic Identity and Ethnic Conflict II***level:* II *points value:* 4 *duration:* semester 2*prerequisites:* Level I Anthropology or alternative approved by the Department*contact hours:* 2 lectures and 1 tutorial per week

*content:* This subject will explore the creation, reproduction and transformation of ethnic identity in a variety of contexts, with particular attention to the interplay between the instrumental concerns of self-interest and that of emotional commitment. Insofar as identity and passion are socially constituted this will provide students with one avenue into the perennial problem of the relationship between the individual and society. An important aspect of this relationship, and thus a part of our survey, will be the expressions of ethnicity—as-nationalism. Students will be free to explore these issues in a variety of settings. Lecture material will be drawn primarily from Australia, North America, South Asia, Africa and Britain. This material will explore the crystallisation of ethnic identity through a controlled comparison of the situations, as each developed over time, in Western 'egalitarian society' and South Asian 'hierarchical society'. This will involve a survey of Australian ethnography in ways which permit comparisons with

material from another allegedly 'melting pot' situation, viz USA, and with the contrasting case of a tragic contemporary conflict, between Sinhalese and Tamils in Sri Lanka.

*assessment:* essays, papers, tutorial participation**1241 Ethnographic Experiences: the Shaping of Knowledge II***level:* II *points value:* 4*availability:* not offered in 1996*prerequisites:* Level I Anthropology or alternative approved by the Department*contact hours:* 3 hours per week lectures, tutorials and workshops

*content:* Anthropology's uniqueness in social enquiry rests in ethnographic fieldwork. This subject focuses on the relations and methods of producing anthropological knowledge. The subject begins by focusing on the evocation of time, place and relationships in the work of a number of ethnographers. This provides a framework through which to explore how fieldwork has become the significant defining feature of Anthropology. From there students are introduced to some of the salient methods used by fieldworkers and to the social, political and ethical issues entailed by ethnographic practise. The subject ends by showing how a critical consideration of these issues fosters a new understanding of fieldwork and anthropology. Although this subject can be taken on its own, it has been designed to complement Ethnographic Texts: Portrayals of Other and Self. For those students who chose to enrol in both it may be possible to offer an assignment program which builds from this subject to the other.

*assessment:* essays (70%), tutorial/workshop (30%)**8145 Ethnographic Texts: Portrayals of Other and Self II***level:* II *points value:* 4*availability:* not offered in 1996 or 1997*prerequisites:* Level I Anthropology or alternative approved by the Department*contact hours:* 3 hours per week, lectures, tutorials and workshops

*content:* Ethnographic texts are a culmination of anthropological practice. This subject explores the relationship between fieldwork and the production of texts as well as the narrative techniques employed in portraying ethnographic others. This subject begins by contrasting modernist (eg Evans-Pritchard) and

post-modernist (eg Clifford) anthropology. This enables a critical reflection upon the personal, social and political nature of fieldwork relationships which shapes how we understand other cultures. The aim of the subject is to work toward a new conceptualisation of ethnographic practice and the construction of texts.

*assessment:* essays, papers, tutorial participation

#### **9465 Healing, Ritual and Power II**

*level:* II *points value:* 4

*availability:* not offered in 1996

*prerequisites:* Level I Anthropology or alternative approved by the Department

*contact hours:* 2 lectures and 1 tutorial per week

*content:* This subject examines the cognitive, structural and organisational processes by which the secularly marginal and powerless come to be seen as possessing extraordinary ritual power to afflict or cure. The subject explores particularly, though not exclusively, how women in a variety of contrasting cultural and historical contexts, through such phenomena as shamanism, spirit affliction and witch beliefs, become ritually empowered, and the various hypotheses which have been advanced to account for this.

*assessment:* essays, papers, tutorial participation

#### **4604 Media Analysis II**

*level:* II *points value:* 4 *duration:* semester 2

*quota:* may apply

*prerequisites:* A pass in any first year subject from the departments of Anthropology, Asian Studies, Classics, Economics, English, French, German, History, Philosophy and Politics.

*contact hours:* 3 hours per week

*content:* The media has become a dominant form of mythologising and story telling in Western societies, an important site for the production of social knowledge and social imagining. This subject examines the relationship between discourse, knowledge and power in media at a number of strategic points in the production and reception of media texts, in particular in the relationship between producers and audiences in a variety of different contexts and through important political issues. Significant media genres and products are analysed for the ways in which they create and reproduce social knowledge but also for the factors which produce constraints on their possible range of meanings. Major stories and representations in the media are examined both in terms of creativity and imagination for the power entailed and reproduced in them. Topics include: television genres, feature films (including sci-fi) news and current affairs; talk shows

and talkback; media ownership; morality and ethics; technology; advertising campaigns and political broadcasts; comedy and reflexivity; entertainment and persuasion; fashion/style; the internet and interactive computer programs.

*assessment:* essay, tutorial/workshop exercises

#### **9643 Media and Culture II**

*level:* II *points value:* 4 *duration:* semester 1

*quota:* may apply

*prerequisites:* a Pass in any first year subject from the departments of Anthropology, Asian Studies, Classics, Economics, English, French, German, History, Philosophy or Politics

*contact hours:* 3 hours per week

*content:* This subject explores the relationship between the media and cultural processes. It considers the ways in which the media produces and reproduces culture through the generation and consumption of media messages. The subject examines contemporary approaches to the analysis of media via case studies in the study of a wide range of media products. Issues of power and the process of representation are explored as central dimensions of the social and political character of the media.

*assessment:* essays, tutorial/workshop

#### **2615 Peasantry and Peasant Rebellions II**

*level:* II *points value:* 4

*availability:* not offered in 1996

*prerequisites:* Level I Anthropology or alternative approved by the Department

*restriction:* 9729 Anthropology IIA in 1987 or 5404 Anthropology IIIB in 1988

*contact hours:* 2 lectures and 1 tutorial a week

*content:* To those of us who have been nurtured in an urban environment the world of peasants can be as fascinating as complex and bewildering. In exploring this world, the subject will concentrate on various forms of peasant resistance to dominating 'others'. As such the concepts of hegemony, resistance and class consciousness will be central themes around which the exploration of peasant society will proceed. This will mean an attentiveness to the relationship between political economy, symbolic form and rebellious practice, as well as social transformations over time. It will be possible for students to use a variety of ethnographic settings to review these themes, whether old societies or new states. The lecture material will be drawn largely from Latin America, Southeast Asia and India, but eighteenth century France, medieval Europe,

China and Russia will also be among domains which provide excellent material for the issues posed by this course.

*assessment:* essays, tutorial participation

### **8417 Regional Cults II**

*level:* II *points value:* 4

*availability:* not offered in 1996

*quota:* may apply

*prerequisites:* Level I Anthropology or alternative approved by the Department

*contact hours:* 2 lectures and 1 tutorial a week

*content:* Throughout the world, cults organised around shrines, tombs and sacred places, attract large numbers of people who may visit cult centres to obtain cures, to make vows, to perform penances or to gratify their curiosity. In this subject, a number of regional cults will be examined. Attention will be given to their historical origins, development and transformation. The organisation of the cult centres, their staffing, and the structure and symbolic form of their rituals will be considered. The discussion will then proceed to an examination of the factors governing the structure, intensity and extent of the ritual fields of the cults. The meaning of the act of pilgrimage and the organisation of pilgrimages will then be explored. Finally, the various secular and cultural effects of the cults will be considered. Ethnographical material will be drawn from Europe, Africa, Asia, and Latin America.

*assessment:* essays, tutorial participation

### **4287 The Anthropology of Political Discourse II**

*level:* II *points value:* 4 *duration:* semester 2

*quota:* may apply

*prerequisites:* Level I Anthropology or alternative approved by the Department

*contact hours:* 1 two hour lecture and 1 tutorial a week

*content:* The aim of this subject is to examine the relationship between discourse and power in contemporary society. Discourses of race, gender, class and the like exercise exceptional influence over the ways in which we construct, interpret and converse about the social worlds of which we are constant members. Yet this influence is frequently a subtle and not immediately perceptible one. Moreover, the ability to change these discourses and to impose them on others is most unequally distributed both at the societal level and in micro-settings. We shall begin this subject by closely examining the seminal influence of Michel Foucault in providing over an extended period a

wholly original, postmodern approach to the analysis of discourse. We then turn to the ways in which anthropologists have modified Foucault's perspective in order to explore the dynamics of discourse and power in particular social contexts. Finally we shall consider how the discourse of science in postmodern society has become the focus of contentious anthropological and sociological debate.

*assessment:* essays, tutorial papers

### **3895 Theories of Practice II**

*level:* II *points value:* 4 *duration:* semester 1

*quota:* may apply

*prerequisites:* Level I Anthropology or alternative approved by the Department

*contact hours:* 2 lectures and 1 tutorial a week

*content:* Living, loving, laughing, dying, comprise the events of everyday life which anthropologists observe. This subject examines the work of those anthropologists who have sought to demonstrate how the major encompassing structures of society and culture are reproduced in the often trivial taken-for-granted practices of everyday life. Initially, the theories of practice implicit in the major theoretical perspectives of the last thirty years will be considered. This will provide a prelude to an understanding of the pioneering work of Pierre Bourdieu. The significance of such concepts as symbolic violence, symbolic power and the embodiment of practices will be related to an understanding of such matters as marriage, kinship, gender and identity.

*assessment:* essays, tutorial participation

### **6914 Towards an Anthropology of Australian Society II**

*level:* II *points value:* 4 *duration:* semester 2

*prerequisites:* Level I Anthropology or alternative approved by the Department

*contact hours:* 3 hours per week

*content:* Anthropology provides an exciting challenge to our understanding of the familiar. This subject critically examines what, for many, is an apparently familiar field Australian culture and society. At the same time this subject provides a context in which to examine critically dominant anthropological agendas, research methods and modes of presentation. By engaging in apparently familiar fields this subject addresses questions which underpin the location and future of anthropological research in Australia. Central questions are: why, beyond work focused on Aboriginal cultures, has so little ethnographic research been done in Australia? What is the value of

anthropological perspectives? How can anthropological research in Australia profitably proceed? Students may concentrate their research over the semester.

*assessment:* research papers, class participation

### Level III

---

*prerequisites:* 2 semesters of Level II semester subjects in Anthropology

*requirements:* Those students planning to proceed to an Honours year in Anthropology must have satisfactorily completed five semesters of Anthropology at Level II/III at least two semesters of which must be at Level III.

#### 4834 Aboriginal Land Tenure and Sacred Sites In Australia III

*level:* II *points value:* 6 *availability:* semester 2

*prerequisites:* Level I Anthropology or alternative approved by the Department and at least two Level II Anthropology subjects

*contact hours:* 2 lectures and 1 tutorial per week

*content:* The subject begins by examining classical Aboriginal land tenure systems. This includes the variety of ways land is held as symbolic and economic property, the way access to it and use of its resources are governed, how a kinship-based social organisation is meshed with local organisation and how the principles of succession to customary title in land are reflected in the disposal of estates of extinct groups and in land tenure disputes. The complex nature of traditional interests in sacred sites is also explored. We then look at how Aboriginal people present claims based on their traditions in the present context of government organisations, tribunals and courts. We discuss the relationship between Aboriginal law, customary law and Australian law, in the context of land ownership. Finally we explore the way anthropologists act professionally as go-betweens in this situation, researching land and sacred sites claim and acting as expert witnesses.

*assessment:* essays, papers, tutorial participation

#### 5437 Aborigines and the State III

*level:* III *points value:* 6

*availability:* not offered in 1996

*prerequisites:* Level I Anthropology or alternative approved by Department and at least 2 Level II Anthropology subjects

*contact hours:* 2 lectures and 1 tutorial a week

*content:* This subject focuses on the seemingly inexorable encapsulation of the Aboriginal people of Australia within the wider nation state. That is, it views the process whereby Aborigines have been transformed from autonomous hunter-gatherers into dependent Fourth World peoples. After briefly surveying the history of and Aboriginal reaction to the European colonisation of Australia, attention is devoted to a range of contemporary issues in both remote and urban environments. The goal is to place such phenomena as Aboriginal Land Rights, community development programs, alcohol abuse, and high arrest and incarceration rates in their broader socio-political-economic context.

*assessment:* essays, papers, tutorial participation

#### 1687 Anthropology of Ritual, Performance and Art III

*level:* III *points value:* 6

*availability:* not offered in 1996

*prerequisites:* Level I Anthropology or alternative approved by the Department and at least two Level II Anthropology subjects.

*contact hours:* 3 hours per week

*content:* The subject focuses on ritual, cultural performance and art in a broad range of cultural settings and religious traditions. The subject locates anthropological approaches to ritual, performance and art within Western traditions. A central concern is how the ritual performance and arts of other cultures have been constructed, appropriated and simulated in Western practice. Shifts in the anthropological agenda, the production of ethnographic texts as well as other domains of representation (which range from Western art and ethnographic film-making to Museums and tourism) are examined. Students may concentrate their research over the semester on material which reflects their focal interests in this subject.

*assessment:* tutorial, workshop papers/participation, essay

#### 1471 Contemporary Communities and Social Movements III

*level:* III *points value:* 6

*duration:* not offered in 1996

*quota:* may apply

*restriction:* 9729 Anthropology IIA (1987 or 1986) 6376/ 8047 Communities, Boundaries and Symbols

*contact hours:* 2 lectures and 1 tutorial a week

*prerequisites:* Level I Anthropology or alternative approved by the Department and at least two Level II Anthropology subjects.

*content:* This subject examines the social organisation of community experience and the character of social movements in contemporary, postmodern society. A number of sociologists have argued that, by comparison with the situation several decades ago, the members of advanced capitalist societies are relatively unattached to the community settings in which they work and live. They are more involved in the consumption of global culture courtesy of the mass media; and if they are politically inclined their interests lie in mass movements rather than regionally-bounded and class-based collectivities. Social anthropologists who have conducted extensive ethnographic research are generally inclined to challenge such broadly-based arguments. For in such European settings as France, Ireland, Italy and Spain, it is clear that in both rural and urban milieux, residents remain profoundly attached to the social relations, the political processes and the cultural aesthetics characteristic of face-to-face communities, whilst recognising too that the rate of current change is exceptional. Having reviewed initially the arguments of select postmodern theorists, this subject will examine in detail several outstanding studies of contemporary European communities. We will then turn to rival perspectives on the emergence of such social movements as environmentalism, feminism and anti-racism, before concluding the semester with an anthropologically-informed critique of postmodern perspectives on global culture.

*assessment:* essays, tutorial papers

### **7748 Depicting Aboriginal Cosmology III**

*level:* III *points value:* 6 *duration:* semester 1

*availability:* subject to staff availability

*prerequisites:* Level I Anthropology or alternative approved by the Department and at least two Level II Anthropology subjects.

*restrictions:* 9817/ 9009 Pre-Colonial Aboriginal Society

*contact hours:* 3 hours per week

*content:* Indigenous Australian religious beliefs and practices have long fascinated social scientists and the wider public. In this subject we explore the construction and analyses of traditional Aboriginal knowledge concerning the Dreaming, spirit conception and attachments to country, and rites associated with initiation, sorcery and the increase of plant and animal life. Along the way attention is paid to how the depictions have been used to do such disparate things as inform and substantiate theories of humankind, legitimise racism and critique the Western treatment of the environment. We round out the semester with an examination of the way facets of Aboriginal religion are, variously, commodified, contrived as sites of

Black-White interaction and constituted as spaces and vehicles of resistance to domination.

*assessment:* book review, essays and tutorial participation

### **6730 Ethnic Identity and Ethnic Conflict III**

*level:* III *points value:* 6 *duration:* semester 2

*prerequisites:* Level I Anthropology or alternative approved by the Department and at least two Level II Anthropology subjects.

*contact hours:* 2 lectures and 1 tutorial per week

*content:* This subject will explore the creation, reproduction and transformation of ethnic identity in a variety of contexts, with particular attention to the interplay between the instrumental concerns of self-interest and that of emotional commitment. Insofar as identity and passion are socially constituted this will provide students with one avenue into the perennial problem of the relationship between the individual and society. An important aspect of this relationship, and thus a part of our survey, will be the expressions of ethnicity-as-nationalism. Students will be free to explore these issues in a variety of settings. Lecture material will be drawn primarily from Australia, North America, South Asia, Africa and Britain. This material will explore the crystallisation of ethnic identity through a controlled comparison of the situations, as each developed over time, in Western 'egalitarian society' and South Asian 'hierarchical society'. This will involve a survey of Australian ethnography in ways which permit comparisons with material from another allegedly 'melting pot' situation, viz USA, and with the contrasting case of a tragic contemporary conflict, between Sinhalese and Tamils in Sri Lanka.

*assessment:* essays, papers, tutorial participation

### **4318 Ethnographic Experiences: the Shaping of Knowledge III**

*level:* III *points value:* 6

*availability:* not offered in 1996

*prerequisites:* Level I Anthropology or alternative approved by the Department and at least two Level II Anthropology subjects.

*contact hours:* 3 hours per week

*content:* Anthropology's uniqueness in social enquiry rests in ethnographic fieldwork. This subject focuses on the relations and methods of producing anthropological knowledge. The subject begins by focusing on the evocation of time, place and relationships in the work of a number of ethnographers. This provides a framework through

which to explore how fieldwork has become the significant defining feature of Anthropology. From there students are introduced to some of the salient methods used by fieldworkers and to the social, political and ethical issues entailed by ethnographic practise. The subject ends by showing how a critical consideration of these issues fosters a new understanding of fieldwork and anthropology. Although this subject can be taken on its own, it has been designed to complement Ethnographic Texts: Portrayals of Other and Self. For those students who chose to enrol in both it may be possible to offer an assignment program which builds from this subject to the other.

*assessment:* essays (70%), tutorial/workshop (30%)

### **1943 Ethnographic Texts: Portrayals of Other and Self III**

*level:* III *points value:* 6 *duration:* semester 1

*prerequisites:* Level I Anthropology or alternative approved by the Department and at least two Level II Anthropology subjects.

*contact hours:* 4 hours per week (seminars)

*content:* Ethnographic texts are a culmination of anthropological practice. This subject explores the relationship between fieldwork and the production of texts as well as the narrative techniques employed in portraying ethnographic others. This subject begins by contrasting modernist (eg Evans-Pritchard) and post-modernist (eg Clifford) anthropology. This enables a critical reflection upon the personal, social and political nature of fieldwork relationships which shapes how we understand other cultures. The aim of the subject is to work toward a new conceptualisation of ethnographic practice and the construction of texts.

*assessment:* essays, papers

### **4064 Healing, Ritual and Power III**

*level:* III *points value:* 6

*availability:* not offered in 1996

*prerequisites:* Level I Anthropology or alternative approved by the Department and at least two Level II Anthropology subjects.

*contact hours:* 2 lectures and 1 tutorial per fortnight

*content:* This subject examines the cognitive, structural and organisational processes by which the secularly marginal and powerless come to be seen as possessing extraordinary ritual power to afflict or cure. The subject explores particularly, though not exclusively, how women in a variety of contrasting cultural and historical contexts, through such phenomena as shamanism, spirit affliction and witch beliefs, become ritually empowered and the various hypotheses which have been advanced to account for this.

*assessment:* essays, papers, tutorial participation

### **2366 Media Analysis III**

*level:* III *points value:* 6 *duration:* semester 2

*quota:* may apply

*prerequisites:* A pass in any second year subject from the departments of Anthropology, Asian Studies, Classics, Economics, English, French, German, History, Philosophy and Politics.

*contact hours:* 3 hours a week

*content:* The media has become a dominant form of mythologising and story telling in Western societies, an important site for the production of social knowledge and social imaging. This subject examines the relationship between discourse, knowledge and power in media at a number of strategic points in the production and reception of media texts, in particular in the relationship between producers and audiences in a variety of different contexts and through important political issues. Significant media genres and products are analysed for the ways in which they create and reproduce social knowledge but also for the factors which produce constraints on their possible range of meanings. Major stories and representations in the media are examined both in terms of creativity and imagination for the power entailed and reproduced in them. Topics include: television genres, feature films (including sci-fi) news and current affairs; talk shows and talkback; media ownership; morality and ethics; technology; advertising campaigns and political broadcasts; comedy and reflexivity; entertainment and persuasion; fashion/style; the internet and interactive computer programs.

*assessment:* essay, tutorial/workshop exercises

### **1501 Media and Culture III**

*level:* III *points value:* 6 *duration:* semester 1

*prerequisites:* a pass in any second year subject from the departments of Anthropology, Asian Studies, Classics, Economics, English, French, German, History, Philosophy or Politics

*contact hours:* 3 hours per week

*content:* This subject explores the relationship between the media and cultural processes. It considers the ways in which the media produces and reproduces culture through the generation and consumption of media messages. The subject examines contemporary approaches to the analysis of media via case studies in the study of a wide range of media products. Issues of power and the process of representation are explored as central dimensions of the social and political character of the media.

*assessment:* essays; tutorial/workshop

**7802 Peasantry and Peasant Rebellions III***level:* III *points value:* 6*availability:* not offered in 1996*quota:* may apply*prerequisites:* Level I Anthropology or alternative approved by Department and at least two Level II Anthropology subjects*restriction:* 9729 Anthropology IIA in 1987 or 5404 Anthropology IIIB in 1988*contact hours:* 2 lectures and 1 tutorial a week

*content:* To those of us who have been nurtured in an urban environment the world of peasants can be as fascinating as complex and bewildering. ## Honours Level

### 1105 Honours Anthropology

*level:* honours *points value:* 24 *duration:* full year

*prerequisites:* (a) Five semesters (or the equivalent in full year Anthropology subjects) of Anthropology subjects at Level II/III at least two of which must be at Level III; and (b) attain a standard satisfactory to the Head of Anthropology in Level I, II and III subjects. (A student who has attained an average of 70 or higher in the five Anthropology II/III subjects will generally be deemed to have reached this standard). Students who have obtained these qualifications will automatically be accepted to the Honours program by the Head of the Department.

*requirements:* Honours in Anthropology is a full year's course, involving weekly seminars, essays, and a final

dissertation. Students wishing to take Honours should consult the Head of the Department at the beginning of their Level III work. Admission to the program is subject to approval by the Head.

*assessment:* essays and a dissertation

## Asian Studies

The Centre for Asian Studies offers, for the Ordinary degree of Bachelor of Arts, subjects in Chinese, Japanese and Vietnamese language. There are a number of separate subjects in Chinese and Japanese Studies offered by the Centre, which students are expected to combine with their language studies. This is imperative for students who desire to do Joint Honours in Asian Studies combined with another department like Economics, History and so on, or single Honours in Chinese or Japanese Studies. Language Students are advised to check the general and honours handbooks available from the Centre Office well in advance of third year to ensure that they will have sufficient prerequisites for Honours. Non-language students should note that in some cases it is possible to do Joint Honours with the Centre and another department without language.

Please note:

- 1 Students permitted to enrol in a language subject at a particular level are restricted from enrolling in the same language at a lower level unless the change is carried out during the teaching of the subject to enable the student to move to a more appropriate level.
- 2 Students enrolled into language subjects provided for speakers of the language are restricted from enrolling in the non-speakers language subject of the same level.

---

## Level I

### Chinese Language

Students who have completed Chinese in the Year 12 Public Examination at an appropriate standard or have equivalent knowledge of the language may, upon consultation with the Head of the Centre and subject to approval by the Faculty of Arts, enrol directly into the Chinese language subject at the appropriate level.

Students might consider in addition to Chinese I, taking other subjects related to China taught by the Centre and other departments as part of their degree course. In particular the first-year subject Introduction to Chinese Society and Culture I provides an excellent foundation for other Chinese studies.

**7769 Chinese IA**

*level:* I      *points value:* 3      *duration:* semester 1

*quota:* may apply

*restrictions:* see introductory notes; also 5978 Chinese I, 9741 Chinese I (Flinders)

*contact hours:* 5 lectures, 2 hours in the language laboratory per week

*content:* The subject consists of the study of the basic grammar, vocabulary and structures of modern standard Chinese (Mandarin) with special emphasis on the style and usage found in China today. The students will learn around 300 Chinese characters and associated compounds, concentrating on vocabulary which relates to contemporary China.

*assessment:* Regular weekly assignments and tests and final examination

**2126 Chinese IB**

*level:* I      *points value:* 3      *duration:* semester 2

*quota:* may apply

*prerequisites:* 7769 Chinese IA (at Pass I level) or equivalent

*restrictions:* see introductory notes, also 5978 Chinese I, 9741 Chinese I (Flinders)

*contact hours:* 5 hours lectures, 2 hours language laboratory per week

*content:* The subject is the continuation of Chinese IA. It continues instruction and practice in the speaking, understanding, writing and reading of modern standard Chinese. Throughout the subject mastery of conversational skills will be reinforced through oral-aural practice and at the same time increased emphasis will be placed on contemporary texts. By the end of the semester students will know around 600 Chinese characters.

*assessment:* regular weekly assignments and tests and final examination

**3060 Chinese IA (Flinders)**

*level:* I      *points value:* 4.5 units at Flinders

*duration:* semester 1

*quota:* may apply

*restrictions:* 5978 Chinese I, 9741 Chinese I (Flinders)

*contact hours:* 5 hours lectures, 2 hours language laboratory per week

*content:* As for Chinese IA above

*assessment:* regular weekly assignments and tests and final examination

**7608 Chinese IB (Flinders)**

*level:* I      *points value:* 4.5 units at Flinders

*duration:* semester 2

*quota:* may apply

*prerequisites:* 3060 Chinese IA ( at Pass I level) or equivalent

*restrictions:* 5978 Chinese I, 9741 Chinese I (Flinders)

*contact hours:* 5 hours lectures, 2 hours language laboratory per week

*content:* As for Chinese IB above

*assessment:* regular weekly assignments and tests and final examination

**Japanese Language**

Students who have completed Japanese in the Year 12 Public Examination at an appropriate standard or have equivalent knowledge of the language may, upon consultation with the Head of the Centre and subject to the approval of the Faculty of Arts, enrol directly into the Japanese language subject at the appropriate level.

Students might consider in addition to Japanese language taking other subjects related to Japan taught by the Centre and by other departments as part of their degree course. In particular the subject Introduction to Japanese Society and Culture provides an excellent foundation for other Japanese studies.

**2909 Japanese IA**

*level:* I      *points value:* 3      *duration:* semester 1

*quota:* may apply

*restrictions:* see introductory notes, also 2725 Japanese I, 5607 Japanese (Flinders)

*contact hours:* 1 lecture, 4 tutorials and 1 hour language laboratory per week

*content:* This introductory subject is designed to teach the basic grammar and vocabulary of modern spoken Japanese, together with the writing system, *hiragana* and *katakana* and the introduction of basic *kanji*. Emphasis will be placed on promoting students' communication skills in both spoken and written Japanese through practical tutorials.

*assessment:* continuous assessment using small tests and assignments and a final examination

**3902 Japanese IB**

*Level:* 1      *points value:* 3      *duration:* semester 2

*quota:* may apply

*prerequisites:* 2909 Japanese IA (Pass I or better) or equivalent

*restrictions:* see introductory notes, also 2725 Japanese I, 5607 Japanese (Flinders)

*contact hours:* 1 hours lecture, 4 tutorials and 1 hour language laboratory per week

*content:* This subject will enable students to broaden the skills in basic Japanese language acquired in Japanese IA in order to provide a solid foundation at the introductory level in both spoken and written Japanese.

*assessment:* continuous assessments using small tests and assignments and a final examination

### **8956 Japanese IA (Flinders)**

*level:* I                    *points value:* 4.5 units at Flinders

*duration:* semester 1

*quota:* may apply

*restrictions:* see introductory notes, also 2725 Japanese I, 5607 Japanese I (Flinders)

*contact hours:* 1 hour lecture, 4 tutorials and 1 hour language laboratory per week

*content:* as for 2909 Japanese IA above

*assessment:* continuous assessments using small tests and assignments and a final examination

### **7511 Japanese IB (Flinders)**

*level:* I                    *points value:* 4.5 units at Flinders

*duration:* semester 2

*quota:* may apply

*prerequisites:* 8956 Japanese IA (Flinders) (Pass I or better) or equivalent

*restrictions:* see introductory notes, also 2725 Japanese I, 5607 Japanese I (Flinders)

*contact hours:* 1 hour lecture, 4 tutorials and 1 hour language laboratory per week

*content:* as for 3902 Japanese IB above

*assessment:* continuous assessments using small tests and assignments and a final examination

### **Vietnamese Language**

Students who have completed Vietnamese in the Year 12 Public Examination at an appropriate standard or have equivalent knowledge of the language may, upon consultation with the Head of the Centre and subject to approval by the Faculty of Arts, enrol directly into Vietnamese language subject at the appropriate level.

### **5469 Vietnamese IA**

*level:* I                    *points value:* 3                    *duration:* semester 1

*quota:* may apply

*restrictions:* see introductory notes, also 4034 Vietnamese I

*contact hours:* 5 lectures and 1 hour in the language laboratory per week

*content:* This subject aims to provide the students with a basic foundation in the grammar and vocabulary of spoken and written Vietnamese. Emphasis will be placed on promoting students' communication skills in both spoken and written Vietnamese through practical tutorials in informal situations. A series of planned oral and written activities based on everyday situations in which both grammatical structures and colloquial Vietnamese are practised.

*assessment:* attendance and exercises during semester, class tests, final oral examination and final written examination. Students are required to pass in each component of the assessment.

### **5074 Vietnamese IB**

*level:* I                    *points value:* 3                    *duration:* semester 2

*quota:* may apply

*prerequisites:* 5469 Vietnamese IA (at Pass I level) or equivalent

*restrictions:* see introductory notes, also 4034 Vietnamese I

*contact hours:* 5 lectures and 1 hour in the language laboratory per week

*content:* This subject continues to provide the students with the opportunity to increase their knowledge of the grammar and vocabulary of spoken and written Vietnamese. Through language acquisition sessions students will have the opportunity to extend their ability to use the spoken and written language to perform a limited range of communicative tasks within a number of familiar and everyday contexts.

*assessment:* attendance and exercises during semester, class tests, final oral examination and final written examination. Students are required to pass in each component of the assessment.

### **8343 Introduction to Chinese Society and Culture I**

*level:* I                    *points value:* 3                    *duration:* semester 1

*contact hours:* 2 lectures and 1 tutorial per week

*content:* The subject is designed to introduce Chinese society and culture both to students of Chinese language and non-language students. Its approach is thematic and covers both the modern and pre-modern periods. The introduction will be made through i) Chinese literary and historical writings in translation; ii) contemporary Western scholarship; iii) newspaper and other media reportage; iv) film.

Through such media, historical and contemporary socio-political contexts will be discussed. Themes will include China's religious, intellectual and cultural heritage, political and economic institutions, women, marriage and family and the nature of the Chinese language. The approach of the subject is interdisciplinary, and will serve as a good introduction both for students of Chinese language, politics, economy and history and also for students majoring in history, politics or anthropology.

*assessment:* by essays and tutorial papers

### 3601 Introduction to Japanese Society and Culture

*level:* I    *points value:* 3    *duration:* semester 2

*contact hours:* 2 lectures and 1 tutorial per week

*content:* The subject is designed to introduce Japanese society and culture both to students of Japanese language and non-language students. The introduction will be made through i) Japanese literary works; ii) ethnographic writings; iii) newspaper; iv) scholarly works; v) films.

Through such media, historical and contemporary socio-political contexts will be discussed. Themes to be discussed will include gender, social class, labour relations, religion, politics and Japan and the world. The approach of the subject is interdisciplinary, and will serve as a good introduction both for students of Japanese language, literature and culture and also for students majoring in the social sciences.

*assessment:* written work, participation and exam

## Level II

### 4323 Chinese IIA

*level:* II    *points value:* 4    *duration:* semester 1

*prerequisites:* 2126 Chinese IB (Pass I) or equivalent

*restrictions:* see introductory notes, also 1736 Chinese II, 6269 Chinese II (Flinders), 1013 Chinese for Chinese Speakers II

*contact hours:* 5 lectures and 2 hours in the language laboratory per week

*content:* The subject consists of tuition in speaking, listening to, writing and reading modern standard Chinese. IIA extends students' knowledge of basic grammar, vocabulary and structures found in the spoken and written form of Chinese today. The main emphasis is on building up students' communicative skills in both speaking reading through learning activities in class. It is anticipated that by the end of the subjects the student will know between 800 and 900 Chinese characters and associated compounds related to contemporary China.

*assessment:* regular weekly assignments and tests, mid-term and oral tests and final examination

### 3139 Chinese IIB

*level:* II    *points value:* 4    *duration:* semester 2

*prerequisites:* 4323 Chinese IIA (at Pass I level) or alternative approved by the Centre

*restrictions:* see introductory notes, also 1736 Chinese II, 6269 Chinese II (Flinders), 1013 Chinese for Chinese Speakers II

*contact hours:* 5 lectures per week

*content:* This subject consists of tuition in the speaking listening, writing and reading of modern standard Chinese. The main emphasis is on building up vocabulary and reading experience as a basis for studying contemporary Chinese society and culture. It is anticipated that by the end of the subject, the student will know between 1100 and 1300 Chinese characters.

*assessment:* regular weekly assignments and tests, mid-term and oral tests and final examination

### 8704 Chinese IIA (Flinders)

*level:* II    *points value:* 6 units at Flinders

*duration:* semester 1

*prerequisites:* 2126 Chinese IB (at Pass I level) or equivalent

*restrictions:* see introductory notes, also 1736 Chinese II, 6269 Chinese II (Flinders), 1013 Chinese for Chinese Speakers II

*contact hours:* 5 lectures and 1 hour in the language laboratory per week

*content:* The subject consists of tuition in speaking, listening to, writing and reading modern standard Chinese. IIA extends students' knowledge of basic grammar, vocabulary and structures found in the spoken and written form of Chinese today. The main emphasis is on building up students' communicative skills in both speaking reading through learning activities in class. It is anticipated that by the end of the subjects the student will know between 800 and 900 Chinese characters and associated compounds related to contemporary China.

*assessment:* regular weekly assignments and tests, mid-term and oral tests and final examination

### 4297 Chinese IIB (Flinders)

*level:* II    *points value:* 6 units at Flinders

*duration:* semester 2

*prerequisites:* 4323 Chinese IIA (at Pass I level) or alternative approved by the Centre

*restrictions:* see introductory notes, also 1736 Chinese II, 6269 Chinese II (Flinders), 1013 Chinese for Chinese Speakers II

*contact hours:* 5 lectures per week

*content:* This subject consists of tuition in the speaking listening, writing and reading of modern standard Chinese. The main emphasis is on building up vocabulary and reading experience as a basis for studying contemporary Chinese society and culture. It is anticipated that by the end of the subject, the student will know between 1100 and 1300 Chinese characters.

*assessment:* regular weekly assignments and tests, mid-term and oral tests and final examination

### **8068 Chinese for Chinese Speakers IIA**

*level:* II    *points value:* 4    *duration:* semester 1

*restrictions:* see introductory notes, also 1736 Chinese II, 6269 Chinese II (Flinders), 1013 Chinese for Chinese Speakers II

*contact hours:* 2 lectures and 1 conversation tutorial per week

*content:* The subject is designed for students who speak Chinese at home and have studied Chinese in primary/secondary schools overseas in China, Taiwan, Hong Kong, Singapore and Malaysia and for those who have acquired an equivalent standard of linguistic skills in Chinese. It aims to extend students' linguistic skills and knowledge of modern standard Mandarin Chinese. It consists of tuition in oral, reading, writing and translation practice. The emphasis is on improving the students' pronunciation through the mastery of the Pinyin phonetic system

*assessment:* a combination of continuous assessment and tests.

### **3332 Chinese for Chinese Speakers IIB**

*level:* II    *points value:* 4    *duration:* semester 2

*prerequisites:* 8068 Chinese for Chinese Speakers IIA (Pass I) or equivalent approved by the Department

*restrictions:* see introductory notes, also 1736 Chinese II, 6269 Chinese II (Flinders), 1013 Chinese for Chinese Speakers II

*contact hours:* 2 lectures and 1 conversation tutorial per week

*content:* The subject assumes knowledge and linguistic skills equivalent to Chinese for Chinese Speakers IIA (Pass I and above). It consists of tuition in oral, reading, writing and translation practice. Students will be taught the basic skills in writing academic essays.

*assessment:* a combination of continuous assessment and tests.

### **4216 Chinese Politics II: the Rise and Decline of Chinese Communism 1921–1990**

*level:* II    *points value:* 4    *duration:* semester 1

*availability:* subject to staffing

*prerequisites:* any first-year Asian Studies, Politics or History subject or any first-year subject approved by the Head of Department

*restriction:* 7501 Chinese Politics before 1989, or 4216 and 1954 Chinese Politics II/III before 1992

*contact hours:* 2 lectures and 1 tutorial a week

*content:* This subject focuses on the rise of communism in China with emphasis on the political, social, economic and cultural life since 1949. It includes (a) a study of the struggles waged by the Chinese Communist Party to gain power (b) an analysis of the thought of Mao Zedong and its impact on the course of the communist-led Chinese revolution, (c) an examination of the changes in the Chinese economy, political system, society and culture in the post-Mao era.

*assessment:* tutorial papers, essays.

### **1802 East Asian Economies II**

*level:* II    *points value:* 4    *duration:* semester 1

*prerequisite:* 8461 Economics I or 2250 Social Economics I (alternative Level I subjects may be approved as prerequisites by the Lecturer-in-Charge)

*contact hours:* 2 one hour lectures and 1 one hour tutorial a week

*content:* The subject is designed to introduce students to the nature and structure of East Asian economies. It will examine the mechanisms which shape their economic activity and the role of historical and cultural factors in the development of their economic institutions. The contribution of these institutions to economic growth will be closely examined.

*assessment:* a combination of tutorial papers, essays and 3 hour final exam

### **3623 Foundations of Chinese Thought II**

*level:* II    *points value:* 4    *duration:* semester 2

*prerequisites:* any Level I subject

*contact hours:* 2 lectures and 1 tutorial per week

*content:* This is an introductory subject on the formative period in Chinese philosophical and religious thought. It covers the period from early Confucian and Daoist thought to the Chan (Zen) transformation of Buddhism in China. The subject will look at the representative schools, their main thinkers and writings, and the ideas they developed. The

importance of this formative period in Chinese thought is reflected in its subsequent influence on Chinese philosophy, religion, politics, law, art, aesthetics and literature. Much of this legacy was also shared by Japan, Korea and Vietnam. An understanding of the foundations of Chinese thought helps us to make explicit and self-conscious some of the radically different assumptions of our own intellectual traditions. It also provides background knowledge crucial to an informed understanding of many developments in modern and contemporary China.

*assessment:* tutorial presentation, two tutorial papers and one major essay to a total of 2500 words.

### 3232 Japanese IIA

*level:* II    *points value:* 4    *duration:* semester 1  
*quota:* may apply

*prerequisites:* 2725 Japanese I, 5607 Japanese I(Flinders) (Pass I or better) or equivalent approved by the Department, 3902 Japanese IB, 7511 Japanese IB (Flinders)

*restrictions:* see introductory notes, also 1408 Japanese II, 8385 Japanese II (Flinders)

*contact hours:* 1 lecture, 4 tutorials and 1 hour language laboratory per week

*content:* This subject consolidates a foundation in the basic grammar and vocabulary of modern Japanese. Throughout the subject, conversational skills will be reinforced and at the same time increased emphasis will be placed on developing reading and writing skills using a substantial number of characters and their combinations.

*assessment:* combination of work done during semester, class tests and final examination

### 4273 Japanese IIB

*level:* II    *points value:* 4    *duration:* semester 2  
*quota:* may apply

*prerequisites:* 3232 Japanese IIA (Pass I or better) or equivalent approved by the Department

*restrictions:* see introductory notes, also 1408 Japanese II, 8385 Japanese II (Flinders)

*contact hours:* 1 lecture, 4 tutorials and 1 hour language laboratory per week

*content:* This subject continues instruction and practice in the four skills of reading, writing, listening and speaking through aural-oral practice. Conversational competence will be reinforced and literacy skills will also be emphasised through the use of original texts.

*assessment:* combination of work done during semester, class tests and final examination

### 4007 Japanese IIA (Flinders)

*level:* II    *points value:* 6 units at Flinders  
*duration:* semester 1

*quota:* may apply

*prerequisites:* 2725 Japanese I, 5607 Japanese I(Flinders) (Pass I or better) or equivalent approved by the Department, 3902 Japanese IB, 7511 Japanese IB (Flinders)

*restrictions:* see introductory notes, also 1408 Japanese II, 8385 Japanese II (Flinders)

*contact hours:* 1 lecture, 4 tutorials and 1 hour language laboratory per week

*content:* As for 3232 Japanese IIA above

*assessment:* combination of work done during semester, class tests and final examination

### 7999 Japanese IIB (Flinders)

*level:* II    *points value:* 6 units at Flinders  
*duration:* semester 2

*quota:* may apply

*prerequisites:* 3232 Japanese IIA (Pass I or better) or equivalent approved by the Department

*restrictions:* see introductory notes, also 1408 Japanese II, 8385 Japanese II (Flinders)

*contact hours:* 1 lecture, 4 tutorials and 1 hour language laboratory per week

*content:* As for 4273 Japanese IIB above

*assessment:* combination of work done during semester, class tests and final examination

### 4846 Japanese History II: Empire of Disillusion

*level:* II    *points value:* 4    *duration:* semester 2  
*prerequisites:* any subject at Level I in Asian Studies, History, Politics, or any Level I subject approved by the Head

*contact hours:* 1 lecture and 1 two hour workshop a week

*content:* This subject concentrates on prewar and early wartime Japan, the period from 1900 to the mid-1930s. It is a social history course, a history 'from below', that seeks to view imperial Japan through the eyes of the marginalised - those who took an oppositional stance toward the state in various types of political discourse; and those who were often, if not always, non-discursive (women, outcastes, tenant farmers, rank-and-file unionists etc). Since those who have been termed 'fascists' (the young officers) also sought to change the configurations of power in the 1930's, they too will be among the political activists discussed. The focus on the subject is thus on those who had cause to

see the early 20th century as an age of disillusionment, since for them the Meiji Revolution's promise of 'enlightenment' and freedom had not been fulfilled.

*assessment:* presentation and verbal participation (15%); written workshop paper (25%); two journals (20%); research essay 2500 words (40%).

### **2701 Japanese History II: The Age of the Sword**

*level:* II    *points value:* 4    *duration:* semester 1

*prerequisites:* Any subject at Level I in Asian Studies, History or Politics or any Level I subject approved by the Head

*restriction:* 2503 Traditional Japan III: Shogun, 'Barbarians' and Townspeople; 2701 Traditional Japan: Shogun, 'Barbarians' and Townspeople; 2503 Japanese History: the Age of the Sword III

*contact hours:* 1 lecture and 1 two hour workshop per week

*content:* This subject takes a thematic approach to Japanese society and culture between the 13th and 19th centuries. It focuses on both 'high' and popular culture and is an intellectual history in which ideas at all levels of society amongst samurai, priests, townspeople and peasants are discussed against the background of the specific historical context.

Central themes are Japanese feudalism (the rise of the samurai to ascendancy) and the philosophical basis of bushido or 'the way of the warrior'; the arrival of western missionaries and traders in the sixteenth century, resulting in a religious and secular conflict which culminated in the banning and suppression of Christianity 100 years later; and the ascension of the Tokugawa family to central shogunal hegemony in the 17th century. The organisational structure of the new political order will be discussed, and ideological orthodoxy considered in relation to heterodox opinion and rebellion both among samurai and commoners. Some attention will also be paid to cultural developments in arts and letters: the relative atrophy of samurai culture (the Zen arts) compared to the new flourishing, largely merchant culture in Tokugawa (Kabuki and bunraku theatre, new forms of literature, woodblock prints etc).

*assessment:* presentation and verbal participation (15%); written workshop paper (25%); two journals (20%); research essay 2,500 words (40%)

### **6118 Japanese History II: The Era of Revolution**

*level:* II    *points value:* 4

*availability:* not offered in 1996

*restriction:* 2958 Japanese History: the Era of Revolution III; 6118 Japanese History: Meiji State II; 2958 Japanese History: Meiji State III

*prerequisites:* any subject at Level I in Asian Studies, History, Politics, or any Level I subject approved by the Head

*contact hours:* 1 lecture and 1 two hour workshop a week

*content:* This subject examines Japan's transition from the traditional, 'feudal' condition of the Tokugawa shogunate to its emergence as a modern capitalist and imperialist power after the Meiji Restoration or Revolution of 1868. The character of the revolutionary era (c1850-1912) is examined with particular reference to the main theoretical models by which it has been interpreted. The process of Japan's incorporation into the world order, the political, social and economic dislocations that ensued, and the construction of a modernising state are all examined.

The subject looks at both the nature of Meiji 'success' and the costs it entailed: both the social costs exacted from the classes which bore the heaviest burdens and enjoyed least the benefits of modernisation, and the political costs in the narrowly based, authoritarian, imperial state whose formula of domestic repression and imperial expansion contained the seeds of subsequent disaster. Attention will be paid to both ideological orthodoxy and dissent: the construction of the emperor-system ideology and attempts to oppose it.

*assessment:* presentation and verbal participation (15%); written workshop papers (25%); two journals (20%); research essay, 2,500- words (40%)

### **7402 Japanese Society II: Development and the Environment**

*level:* II    *points value:* 4    *duration:* semester 2

*availability:* subject to staffing

*prerequisites:* any Level I subject in Asian Studies, History, Politics or Anthropology, or any other Level I subject approved by the Head

*contact hours:* 1 lecture and 1 two hour workshop per week. Students should bear in mind that when films are shown the workshop time might extend into the next hour.

*content:* The subject examines social transformations in rural Japan in the postwar period from the perspective of the sociology of development and the environment. It analyses how postwar socio-political structures formed the foundation for Japan's rapid economic growth, and how this in turn affected the rural areas of Japan. The core question asked in the course is why rural areas in Japan have been enmeshed in social problems leading to an ever-increasing

dependence on the centre. Among the issues examined are the decline of agriculture, environmental problems, problems arising from resorts and developmental projects, and the breakdown of the family and local community. The relevance of these issues in the context of Australia-Japan relations will also be examined.

*assessment:* essays and workshop participation

### 5391 Perceiving China: Themes in Chinese Studies II

*level:* II *points value:* 4

*availability:* not offered in 1996

*prerequisites:* Introduction to Chinese Society and Culture I or any Level I subject approved by the Head.

*contact hours:* 2 lectures and 1 tutorial per week

*content:* This year this subject will cover a wide spectrum of key works illustrating scholarship and paradigms for the construction of knowledge concerning twentieth century China. It will treat of the main four western historiographical paradigms explaining Chinese recent past: the response to the West model found in the work of John K. Fairbank; the modernisation theory model; sympathetic leftist work coming first from the Vietnam war experience as found in the 'Concerned Asian Scholars' journal; and the 'China-centred' paradigm expressed best in the writings of social historians. The subject will also give space to Marxist interpretations with their heavy emphasis on imperialism and their grounding in communist theory. Important anti-communist exposes will also be explored.

Special concentration will be given to feminist interpretations of history and their significance in exposing gender and power structures in the struggle for equality of women. Recent initial efforts to construct Chinese ecological and scientific history, including disease history, will be studied.

Finally the subject will pay particular attention to the extraordinary rich sources of recent biographical writings and gulag prison literature, both of which reveal a great deal about the experiences of the ordinary Chinese people this century.

The subject aims to introduce students to works of academics, journalists, and travellers whose works have played a major influence on structuring of knowledge about China both in Chinese studies and in the wider community. While students will be expected to familiarise themselves with a general knowledge of the entire course lecture material, provision will be made for in depth exploration of one area of interest if requested.

*assessment:* tutorial discussion paper; essay; final take-home assessment

### 8578 Political Economy of Postwar Japan (1) II

*level:* II *points value:* 4 *duration:* semester 2

*availability:* subject to staffing

*prerequisites:* any level I subject in Asian Studies, History, Politics or any first year subject approved by the Head

*contact hours:* 2 lectures and 1 tutorial per week

*content:* This subject is designed as a sociological introduction to the contemporary Japanese society. Emphasis is on examining the character of the socio-political order in contemporary Japan. It is intended to provide an appreciation of the social institutional basis of politics and economy. Basic themes are community, the individual, authority, democracy, historical continuity and change in an East Asian society. Readings are selected as much as possible from first-hand observations based on field work by social scientists in order to provide students a 'grounded' description of key aspects of Japanese society. Lectures, on the other hand, will provide broader contexts and a guide to contending interpretations of the socio-political order in Japan from a perspective of comparative sociology. Topics covered include: (a) an introduction to sociological issues, the prewar society, the socio-political reforms in the occupation period; (b) electoral politics, bureaucracy, business elite, policy making, the police, social control, the citizens' movement; (c) family, transformation of the village, company, work life, urban life, education, social mobility; (d) popular culture, mass media, the position of women and minorities, nationalism, internationalisation.

*assessment:* participation, two tutorial papers and one major essay

### 5400 Political Economy of Postwar Japan (2) II

*level:* II *points value:* 4 *duration:* semester 1

*prerequisites:* one Social Science subject or lecturer's permission

*contact hours:* 1 lecture and 1 two hour workshop per week

*content:* This is a subject on the political sociology of economic life in postwar Japan. As reflected in the currency of the term 'Japanisation', the organisation of Japanese industry is increasingly seen as a model of efficient economy even for advanced countries. However, opinions are widely divided as to whether it is a democratic model. With these issues in mind, this course examines the character of social organisation and politics of Japanese industry in the postwar period at both macro and micro levels. Topics covered may vary somewhat from year to year: (a) historical

heritage: Tokugawa Meiji, the prewar Showa, occupational reforms; (b) postwar Japan: industrial policy, employment system, labour unions, industrial relations, work organisation, work ethic, regionalism, industrial dualism, small firm sector, subcontracting system; (c) transformation: industrial restructuring, Japanese multinationals, foreign workers in Japan, Japanese transplant factories in the West, post-Fordism.

*assessment:* participation, two tutorial papers and one major essay

### **2629 Politics and Foreign Policy in Contemp. Japan II**

*level:* II    *points value:* 4    *duration:* semester 1

*prerequisites:* any Level I subject in Asian Studies, History, Economics or Politics or any other Level I subject approved by the Head

*contact hours:* 2 lectures and 1 tutorial

*content:* The subject focuses on the postwar Japanese political experience and examines issues in Japan's security policy and foreign relations. The subject aims to provide students with an appreciation of the workings of the Japanese political system and its foreign relations. Additionally it will aim at assisting students to apply concepts and methods (especially those of political science and international relations) to a particular country. Topics include the institutional basis of the postwar political system, the party system, electoral politics, Parliament and the electoral process, regional politics, defence and security, Japan and the United States, Japan in the Asia Pacific region, Japan and international organisations (GATT, WTO, UN), Japan and Australia and Japan's foreign economic aid policy.

*assessment:* assessment will consist of four parts: tutorial presentation, participation, semester essay and final examination

### **5091 The Chinese Economy: Growth, Development and Trade II**

*level:* II    *points value:* 4    *duration:* semester 2

*prerequisites:* any subject at Level I in Asian Studies, History, Economics or Politics, or any Level I subject approved by the Head

*contact hours:* 2 lectures and 1 tutorial a week

*content:* This subject examines economic growth and development in Chinese society. It aims to provide analytical insights into the processes of economic growth and their relationship to political, social and cultural change. It concentrates on the modern and contemporary period. The subject complements other subjects on Chinese politics, Chinese History and Asian economic growth.

The subject begins with an overview of long-term issues in economic development in China, concentrating on the relationship between economic growth, resource endowment, technological change and social and cultural development. Questions considered include why China achieved a high level of development in early times and why this was followed by a period of relative stability. The subject then examines the impact of imperialism on the Chinese economy, the relationship between the Chinese revolution and economic change, and China's economic development since 1949. In the latter part of the course, issues such as the relationship between planned economic development and the market, the nature of the 'Maoist' alternative, China's interaction with the world economy, the implications of economic reform, and the role of the 'greater Chinese world' of Hong Kong and Taiwan receive special emphasis. Overall, students will gain insights into general issues of economic growth and development and knowledge of specific processes within China.

*assessment:* three tutorial papers; one essay.

### **6014 Traditional China II: Formative Era and Middle Empire**

*level:* II    *points value:* 4    *duration:* semester 1

*prerequisites:* any subject at Level I in Asian Studies, History or Politics, or any Level I subject approved by the Head

*restrictions:* 9981 Society and Culture in Traditional China I and 8055 Society and Culture in Traditional China II (before 1989).

*contact hours:* 2 lectures and 1 tutorial a week

*content:* This subject introduces the salient aspects of Chinese society and culture from the early formative stages of Chinese civilisation up until the end of the Tang Dynasty. It first considers the key environmental and cultural features of Chinese society. It then looks at how the Chinese Empire was united and at the philosophical, political and economic factors which contributed to that unity. In doing so the subject addresses questions about the relationship between the philosophies and social structure of the early empire and about the economic, administrative and technological foundations of political unity. The subject does not assume any knowledge of Chinese and provides a foundation for further study of later periods of Chinese history. It is also a useful companion course for Chinese language studies.

*assessment:* tutorial papers, essays

### **8155 Traditional China II: Prosperity to Decline**

*level:* II    *points value:* 4

*availability:* not offered in 1996

*prerequisites:* any subject at Level I in Asian Studies, History or Politics, or any Level I subject approved by the Head

*restrictions:* 9981 Society and Culture in Traditional China I and 8055 Society and Culture in Traditional China II (before 1989).

*assumed knowledge:* 6014 Traditional China II: Formative Era and Middle Empire

*contact hours:* 2 lectures and 1 tutorial a week

*content:* This subject analyses the new elements in the social, political, economic and cultural life of post-Tang China. It discusses how political/ideological factors interacted with socio-economic factors to sustain the imperial system. It also examines how the system failed to respond to new challenges in early-modern times and what role foreign elements played in the breakdown of the old order. The subject assumes some knowledge of the society and culture of China before the Song Dynasty. Students are therefore advised to take this subject as a sequel to Society and Culture in Traditional China: the Formative Era and the Middle Empire. The subject provides useful background knowledge for the study of the Chinese language and modern Chinese history.

*assessment:* a combination of tutorial papers and essays

### **3184 Vietnamese IIA**

*level:* II    *points value:* 4    *duration:* semester 1

*quota:* may apply

*prerequisites:* 5074 Vietnamese IB (at Pass I or better) or equivalent

*restrictions:* see introductory notes, also 5199 Vietnamese II

*contact hours:* 5 lectures and 1 hour language laboratory per week

*content:* This subject consolidates students' knowledge of the grammar and vocabulary of Vietnamese as well as extending their speaking and writing skills in the language. A series of planned oral and written language activities with emphasis on the phonological syntactical structure and lexical items will be presented to students in relevant contexts and used by them to perform communicative tasks. Emphasis will be on contemporary texts and materials.

*assessment:* attendance and work during semester, class tests, final examination. Students are required to pass in each component of the assessment.

### **4208 Vietnamese IIB**

*level:* II    *points value:* 4    *duration:* semester 2

*quota:* may apply

*prerequisites:* 3184 Vietnamese IIA (at Pass I or better) or alternative approved by the Centre.

*restrictions:* see introductory notes, also 5199 Vietnamese II

*contact hours:* 5 lectures and 1 hour language laboratory per week

*content:* This subject continues to provide students with an opportunity to build on their existing abilities in using Vietnamese both in the written and oral forms. Throughout the subject, mastery of conversational skills will be reinforced through oral-aural practice to be presented in relevant contexts and at the same time increased emphasis will be placed on contemporary texts.

*assessment:* attendance and work during semester, class tests, final examination. Students are required to pass in each component of the assessment.

## **Level III**

---

### **5610 Chinese IIIA**

*level:* III    *points value:* 6    *duration:* semester 1

*prerequisites:* 3139 Chinese IIB, 4297 Chinese IIB (Flinders), 3332 Chinese for Chinese Speakers IIB (at Pass I level or better) or equivalent

*restrictions:* see introductory notes, also 6140 Chinese III

*contact hours:* 4 lectures and 1 conversational tutorial

*content:* This subjects aims to consolidate and extend the language skills developed at second year level by means of further oral, reading, writing and translation practice. The emphasis is on the application of the student's language training to the study of Chinese source materials reflecting contemporary Chinese culture and society. It is expected that by the end of the semester students should be able to read original texts in modern Chinese using reference materials, should have an active vocabulary of around 1700 Chinese characters and should be able to discuss the content of the materials studied in Chinese.

*assessment:* combination of oral tests, translations, composition and short essays on the background to the materials studies and examination.

### **6872 Chinese IIIB**

*level:* III    *points value:* 6    *duration:* semester 2

*prerequisites:* 5610 Chinese IIIA (at Pass I level or better) or equivalent

*restrictions:* see introductory notes, also 6140 Chinese III

*contact hours:* 4 lectures and 1 conversational tutorial

*content:* This subject aims to consolidate and extend the language skills developed in Chinese IIIA by means of further oral, reading, writing and translation practice. The emphasis is on the application of the student's language training to the study of Chinese source materials reflecting contemporary Chinese culture and society. It is expected that by the end of the semester students will have extended their linguistics skills and gained further training in reading modern literary and journalistic styles. The texts studied will include: contemporary short stories, documentary materials and selected texts dealing with topics related to Chinese society and culture. By the end of the semester students should be able to read original texts in modern Chinese with the aid of reference materials, should have an active vocabulary of around 2000 Chinese characters and should be able to discuss the content of the materials studied in Chinese.

*assessment:* combination of oral tests, translations, composition and short essays on the background to the materials studies and examination.

#### **4981 Chinese for Chinese Speakers IIIA**

*level:* III *points value:* 6 *duration:* semester 1

*prerequisites:* 3332 Chinese for Chinese Speakers IIB (Pass I level or better) or equivalent

*restrictions:* see introductory notes, also 6140 Chinese III

*contact hours:* 2 lectures and 1 conversation tutorial per week

*content:* this subjects aims to consolidate and extend the language skills developed in Chinese for Chinese Speakers IIB by means of further oral, reading, writing and translation practice. The emphasis will be on the application of the student's language training to the study of Chinese source materials reflecting contemporary Chinese culture and society. The texts studied will include: contemporary short stories, documentary materials and selected texts dealing with topics related to Chinese society and culture. An introductory program in Classical Chinese will form part of the texts studied. The subject also introduces the Wade-Giles system or romanisation.

*assessment:* combination of oral tests, translations, composition and short essays on the background to the materials studies and examination.

#### **7989 Chinese for Chinese Speakers IIIB**

*level:* III *points value:* 6 *duration:* semester 2

*prerequisites:* 4981 Chinese for Chinese Speakers IIIA (Pass I) or equivalent approved by Department.

*restrictions:* see introductory notes, also 6140 Chinese III

*contact hours:* 2 lectures and 1 conversation tutorial per week

*content:* This subject aims to consolidate and extend the language skills developed in Chinese for Chinese Speakers IIIA by means of further oral, reading, writing and translation practice. The emphasis will be on the application of the student's language training to the study of Chinese source materials reflecting contemporary Chinese culture and society. The texts studied will include: contemporary short stories, documentary materials and selected texts dealing with topics related to Chinese society and culture. An introductory program in Classical Chinese will form part of the texts studied.

*assessment:* combination of oral tests, translations, composition and short essays on the background to the materials studies and examination.

#### **1954 Chinese Politics III: the Rise and Decline of Chinese Communism 1921-1990**

*level:* III *points value:* 6 *duration:* semester 1

*prerequisites:* any second year subject in Asian Studies, Politics or History or any second year subject approved by the Head

*restriction:* 7501 Chinese Politics before 1989 or 4216 and 1954 Chinese Politics II/III before 1992

*contact hours:* 2 lectures and 1 tutorial a week

*content:* This subject focuses on the rise of communism in China with emphasis on political, social, economic and cultural life since 1949. It includes (a) a study of the struggles waged by the Chinese Communist Party to gain power (b) an analysis of the thought of Mao Zedong and its impact on the course of the communist-led Chinese revolution, (c) an examination of the changes in the Chinese economy, political system, society and culture in the post-Mao.

*assessment:* tutorial papers, essays.

#### **6179 Foundations of Chinese Thought III**

*level:* III *points value:* 6 *duration:* semester 2

*prerequisites:* any Level II subject

*contact hours:* 2 lectures and 1 tutorial per week

*content:* This is an introductory subject on the formative period in Chinese philosophical and religious thought. It covers the period from early Confucian and Daoist thought to the Chan (Zen) transformation of Buddhism in China. The subject will look at the representative schools, their main thinkers and writings, and the ideas they developed. The

importance of this formative period in Chinese thought is reflected in its subsequent influence on Chinese philosophy, religion, politics, law, art, aesthetics and literature. Much of this legacy was also shared by Japan, Korea and Vietnam. An understanding of the foundations of Chinese thought helps us to make explicit and self-conscious some of the radically different assumptions of our own intellectual traditions. It also provides background knowledge crucial to an informed understanding of many developments in modern and contemporary China.

*assessment:* tutorial presentation, two tutorial papers and one major essay to a total of 3500 words.

### 6644 Japanese IIIA

*level:* III *points value:* 6 *duration:* semester 1

*prerequisites:* 1408 Japanese II, 8385 Japanese II (Flinders) (Pass I or better), 4273 Japanese IIB (Pass I or better) or equivalent approved by Department

*restrictions:* see introductory notes, also 7615 Japanese III

*contact hours:* 5 lectures and 1 hour language laboratory per week

*content:* This subject consolidates the language skills of intermediate level Japanese. It deals with materials regarding social issues arising from Australia-Japan relations. Emphasis is placed on building vocabulary in the related areas and widening the understanding grammatical structures so that student are able to express their ideas both in speech and writing.

*assessment:* continuous assessment and examination

### 2814 Japanese IIIB

*level:* III *points value:* 6 *duration:* semester 2

*prerequisites:* 6644 Japanese IIIA (Pass I) or equivalent approved by Department

*restrictions:* see introductory notes, also 7615 Japanese III

*contact hours:* 5 lectures and 1 hour language laboratory per week

*content:* This subject develops the language skills of Japanese at an advanced level. It deals with social issues in Australia-Japan relations and various current issues in Japan. Emphasis is placed on building reading and speaking skills in the related areas.

*assessment:* continuous assessment and examination

### 6659 Japanese History III: Empire of Disillusion

*level:* III *points value:* 6 *duration:* semester 2

*prerequisites:* Any subject at Level II in Asian Studies, History, Politics, or any Level II subject approved by the Head

*contact hours:* 1 lecture and 1 two hour workshop a week

*content:* This subject concentrates on prewar and early wartime Japan, the period from 1900 to the mid-1930s. It is a social history course, a history 'from below', that seeks to view imperial Japan through the eyes of the marginalised - those who took an oppositional stance toward the state in various types of political discourse; and those who were often, if not always, non-discursive (women, outcastes, tenant farmers, rank-and-file unionists etc). Since those who have been termed 'fascists' (the young officers) also sought to change the configurations of power in the 1930's, they too will be among the political activists discussed. The focus on the subject is thus on those who had cause to see the early 20th century as an age of disillusionment, since for them the Meiji Revolution's promise of 'enlightenment' and freedom had not been fulfilled.

*assessment:* presentation and verbal participation (15%); written workshop paper (25%); two journals (20%); research essay 3500 words (40%).

### 2503 Japanese History III: The Age of the Sword

*level:* III *points value:* 6 *duration:* semester 1

*contact hours:* 1 lecture, and 1 two hour workshop per week

*restrictions:* 2701 Japanese History: The Age of the Sword II; 2701 Traditional Japan II; 2503 Traditional Japan III

*prerequisites:* subjects in Asian Studies, History, Politics, Geography or Anthropology to the value of at least 8 points

*content:* This subject takes a thematic approach to Japanese society and culture, between the 13th and 19th centuries. It focuses on both 'high' and popular culture and is an intellectual history in which ideas at all levels of society amongst samurai, priests, townspeople and peasants are discussed against the background of the specific historical context.

Central themes are Japanese feudalism (the rise of the samurai to ascendancy) and the philosophical basis of bushido or 'the way of the warrior'; the arrival of western missionaries and traders in a religious and secular conflict which culminated in the banning and suppression of Christianity 100 years later; and the ascension of the Tokugawa family to central shogunal hegemony in the 17th century. The organisational structure of the political order will be discussed, and ideological orthodoxy considered in relation to heterodox opinion and rebellion both among samurai and commoners. Some attention will also be paid to cultural developments in arts and letters: the relative atrophy of samurai culture (the Zen arts) compared to the new and flourishing, largely merchant culture Tokugawa (Kabuki and bunraku theatre, new forms of literature, woodblock prints etc).

*assessment:* presentation and verbal participation (15%); written workshop paper (25%); two journals (20%); research essay 3,500 words (40%)

### **2958 Japanese History III: The Era of Revolution**

*level:* III *points value:* 6

*availability:* not offered in 1996

*prerequisites:* any subject at Level II in Asian Studies, History, Politics, or any Level II subject approved by the Head

*restriction:* 6118 Japanese History: Meiji State II; 2958 Japanese History: Meiji State III

*contact hours:* 1 lecture and 1 two hour workshop a week

*content:* The subject examines Japan's transition from the traditional 'feudal' condition of the Tokugawa shogunate to its emergence as a modern capitalist power, after the Meiji Restoration or Revolution of 1868. The character of the Revolutionary era (c1850–1912) is examined with particular reference to the main theoretical models by which it has been interpreted. The process of Japan's incorporation in the world economy, the political, social and economic dislocations which led to the Restoration, and the subsequent construction of a modernising state are all examined.

The subject looks at both the nature of the Meiji success and the costs it entailed both the social costs exacted from the classes which bore the heaviest burdens and enjoyed least the benefits of modernisation, and the political costs in the narrowly based, authoritarian, imperial state whose formula of domestic repression and imperial expansion contained the seeds of subsequent disaster. Attention will be paid to both ideological and orthodoxy and dissent: the construction of the emperor system ideology and attempts to oppose it.

*assessment:* presentation and verbal participation (15%); written workshop paper (25%), two journals (20%); research essay 3500 words (40%)

### **8455 Japanese Society III: Development and the Environment**

*level:* III *points value:* 6 *duration:* semester 2

*availability:* subject to staffing

*prerequisites:* any Level II subject in Asian Studies, History, Politics or Anthropology, or any other Level II subject approved by the head

*contact hours:* 1 lecture and 1 two hour workshop per week

*content:* The subject examines social transformations in rural Japan in the postwar period from the

perspective of the sociology of development and the environment. It analyses how postwar socio-political structures formed the foundation for Japan's rapid economic growth, and how this in turn affected the rural areas of Japan. The core question asked in the course is why rural areas in Japan have been enmeshed in social problems leading to an ever-increasing dependence on the centre. Among the issues examined are the decline of agriculture, environmental problems, problems arising from resorts and developmental projects, and the breakdown of the family and local community. The relevance of these issues in the context of Australia-Japan relations will also be examined.

*assessment:* essays and workshop participation

### **1529 Perceiving China - Themes in Chinese Studies III**

*level:* III *points value:* 6

*availability:* not offered in 1996

*prerequisites:* any Level II subject in Asian Studies, Politics or History approved by the Head.

*contact hours:* 2 lectures and 1 tutorial per week

*content:* This year this subject will cover a wide spectrum of key works illustrating scholarship and paradigms for the construction of knowledge concerning twentieth century China. It will treat of the main four western historiographical paradigms explaining Chinese recent past: the response to the West model found in the work of John K. Fairbank; the modernisation theory model; sympathetic leftist work coming first from the Vietnam war experience as found in the 'Concerned Asian Scholars' journal; and the 'China-centred' paradigm expressed best in the writings of social historians. The subject will also give space to Marxist interpretations with their heavy emphasis on imperialism and their grounding in communist theory. Important anti-communist exposes will also be explored.

Special concentration will be given to feminist interpretations of history and their significance in exposing gender and power structures in the struggle for equality of women. Recent initial efforts to construct Chinese ecological and scientific history, including disease history, will be studied.

Finally the course will pay particular attention to the extraordinary rich sources of recent biographical writings and gulag prison literature, both of which reveal a great deal about the experiences of the ordinary Chinese people this century.

The course aims to introduce students to works of academics, journalists, and travellers whose works have played a major influence on structuring of knowledge about China both in Chinese studies and in the wider community. While students will be expected

to familiarise themselves with a general knowledge of the entire subject lecture material, provision will be made for in depth exploration of one area of interest if requested.

*assessment:* tutorial discussion paper; essay ; final take home assessment.

### 9803 Political Economy of Postwar Japan (1) III

*level:* III *points value:* 6 *duration:* semester 2  
*availability:* subject to staffing

*prerequisites:* any Level II subject in Asian Studies, History or Politics or alternative approved by the Head

*contact hours:* 2 lectures and 1 tutorial per week

*content:* This subject is designed as a sociological introduction to the contemporary Japanese society. Emphasis is on examining the character of the socio-political order in contemporary Japan. It is intended to provide an appreciation of the social institutional basis of politics and economy. Basic themes are community, the individual, authority, democracy, historical continuity and change in an East Asian society. Readings are selected as much as possible from first-hand observations based on field work by social scientists in order to provide students a 'grounded' description of key aspects of Japanese society. Lectures, on the other hand, will provide broader contexts and a guide to contending interpretations of the socio-political order in Japan from a perspective of comparative sociology. Topics covered include: (a) an introduction to sociological issues, the prewar society, the socio-political reforms in the occupation periods; (b) electoral politics, bureaucracy, business elite, policy making, the police, social control, the citizens' movement; (c) family, transformation of the village, company, work life, urban life, education, social mobility; (d) popular culture, mass media, the position of women and minorities, nationalism, internationalisation.

*assessment:* participation, two tutorial papers and one major essay

### 6510 Political Economy of Postwar Japan (2) III

*level:* III *points value:* 6 *duration:* semester 1

*prerequisites:* one social science subject or approval of Head of department.

*restriction:* 8065 or 2371 Japanese Political Economy 1945–1991 (Part Two) II and III

*contact hours:* 1 lecture and 1 x 2 hour workshop per week

*content:* This is a subject on the political sociology of economic life in postwar Japan. As reflected in the

currency of the term 'Japanisation', the organisation of Japanese industry is increasingly seen as a model of efficient economy even for advanced countries. However, opinions are widely divided as to whether it is a democratic model. With these issues in mind, this course examines the character of social organisation and politics of Japanese industry in the postwar period at both macro and micro levels. Topics covered may vary somewhat from year to year; (a) Historical heritage: Tokugawa Meiji, the prewar Showa, occupational reforms; (b) Postwar Japan: industrial policy, employment system, labour unions, industrial relations, work organisation, work ethic, regionalism, industrial dualism, small firm sector, subcontracting system; (c) Transformation: industrial restructuring, Japanese multinationals, foreign workers in Japan, Japanese transplant factories in the West, post-Fordism.

*assessment:* participation, two tutorial papers and one major essay

### 8100 Politics and Foreign Policy in Contemporary Japan III

*level:* III *points value:* 6 *duration:* semester 1

*prerequisites:* any Level II subject in Asian Studies, History, Economics or Politics or any other Level II subject approved by the Head

*contact hours:* 2 lectures and 1 tutorial

*content:* The subject focuses on the postwar Japanese political experience and examines issues in Japan's security policy and foreign relations. The subject aims to provide students with an appreciation of the workings of the Japanese political system and its foreign relations. Additionally it will aim at assisting students to apply concepts and methods (especially those of political science and international relations) to a particular country. Topics include the institutional basis of the postwar political system, the party system, electoral politics, parliament and the electoral process, regional politics, defence and security, Japan and the United States, Japan in the Asia Pacific region, Japan and international organisations (GATT, WTO, UN), Japan and Australia and Japan's foreign economic aid policy.

*assessment:* assessment will consist of four parts: tutorial presentation, participation, semester essay and final examination

### 7043 The Chinese Economy: Growth, Development and Trade III

*level:* III *points value:* 6 *duration:* semester 2

*prerequisites:* Any subject at Level 2 in Asian Studies, History, Economics or Politics, or any Level I subject approved by the Head

*contact hours:* 2 lectures and 1 tutorial a week

*content:* This subject examines economic growth and development in Chinese society. It aims to provide analytical insights into the processes of economic growth and their relationship to political, social and cultural change. It concentrates on the modern and contemporary period. The subject complements other subjects on Chinese politics, Chinese History and Asian economic growth.

The subject begins with an overview of long-term issues in economic development in China, concentrating on the relationship between economic growth, resource endowment, technological change and social and cultural development. Questions considered include why China achieved a high level of development in early times and why this was followed by a period of relative stability. The subject then examines the impact of imperialism on the Chinese economy, the relationship between the Chinese revolution and economic change, and China's economic development since 1949. In the latter part of the course, issues such as the relationship between planned economic development and the market, the nature of the 'Maoist' alternative, China's interaction with the world economy, the implications of economic reform, and the role of the 'greater Chinese world' of Hong Kong and Taiwan receive special emphasis. Overall, students will gain insights into general issues of economic growth and development and knowledge of specific processes within China.

*assessment:* three tutorial papers; one essay

### **6114 Traditional China III: Formative Era and Middle Empire**

*level:* III *points value:* 6 *duration:* semester 1

*prerequisites:* subjects at Level II to the value of 8 points or alternative approved by the Head of Department

*restriction:* 9981 Society and Culture in Traditional China I and 8055 Society and Culture in Traditional China II before 1989

*contact hours:* 2 lectures and 1 tutorial a week

*content:* This subject introduces the salient aspects of Chinese society and culture from the early formative stages of Chinese civilisation up until the end of the Tang Dynasty. It first considers the key environmental and cultural features of Chinese society. It then looks at how the Chinese Empire was united and at the philosophical, political and economic factors which contributed to that unity. In doing so the subject addresses questions about the relationship between the philosophies and social structure of the early empire and about the economic, administrative and technological foundations of political unity. The

course does not assume any knowledge of Chinese and provides a foundation for further study of later periods of Chinese history. It is also a useful companion course for Chinese language studies.

*assessment:* tutorial papers and essays

### **3409 Traditional China III: Prosperity to Decline**

*level:* III

*points value:* 6

*availability:* not offered in 1996

*prerequisites:* subjects at Level II to the value of 8 points or alternative approved by the Head of Department

*restriction:* 9981 Society and Culture in Traditional China I and 8055 Society and Culture in Traditional China II before 1989

*assumed knowledge:* 6014 Traditional China II, 6114 Traditional China III: Formative Era and Middle Empire

*contact hours:* 2 lectures and 1 tutorial a week

*content:* This subject analyses the new elements in the social, political, economic and cultural life of post-Tang China. It discusses how political/ideological factors interacted with socio-economic factors to sustain the imperial system. It also examines how the system failed to respond to new challenges in early-modern times and what role foreign elements played in the breakdown of the old order. The subject assumes some knowledge of the society and culture of China before the Song Dynasty. Students are therefore advised to take this subject as a sequel to Society and Culture in Traditional China: the Formative Era and the Middle Empire. The subject provides useful background knowledge for the study of the Chinese language and modern Chinese history.

*assessment:* tutorial papers and essays

### **4248 Vietnamese IIIA**

*level:* III *points value:* 6 *duration:* semester 1

*quota:* may apply

*prerequisites:* 4208 Vietnamese IIB (Pass I or better) or equivalent

*restrictions:* see introductory notes, also 8277 vietnamese III

*contact hours:* 5 lectures and 1 hour language laboratory per week

*content:* This subject aims to consolidate and extend the language skills already attained by means of reading, writing and oral-aural practice based on relevant topics. The emphasis is on communicative competence in Vietnamese. It is expected that by the

end of the subject students will have consolidated their linguistic skills, gained experience of reading and analysing some selected literary texts as well as documentary materials, eg. documents, newspaper articles written in Vietnamese 'chu quoc ngu'. Students are also expected to be familiar with the cultural and social background of the texts studied. It is proposed to assess the cultural and literary aspects of the subject by essays or seminar papers.

*assessment:* attendance and oral/written exercises during semester, class tests, essay/seminar paper and final examination. Students are required to pass in each component of the assessment.

### 5145 Vietnamese IIIB

*level:* III *points value:* 6 *duration:* semester 2

*quota:* may apply

*prerequisites:* 4248 Vietnamese IIIA (Pass I or better) or equivalent

*restrictions:* see introductory notes, also 8277 vietnamese III

*contact hours:* 5 lectures and 1 hour language laboratory per week

*content:* This subject aims to consolidate and further extend students' linguistic skills through reading, writing and oral-aural practice based on topics presented in relevant contexts. It continues to place emphasis on communicative competence and advanced writing and reading activities, based on selected modern texts and documentary materials. It is expected that by the end of this subject students will be able to analyse the literary, cultural and social background of the texts studied in depth. The cultural and literary aspects of the course will be assessed by essays or seminar papers.

*assessment:* attendance and oral/written exercises during semester, class tests, essay/seminar paper and final examination. Students are required to pass in each component of the assessment.

## Honours Level

### Joint Honours in Asian Studies

Arrangements are possible for joint honours combining study in the Centre with study in another department.

*prerequisites:* Unless special permission is granted by the Honours Committee, students must satisfy one of the two types of prerequisites: Type I: (a) the completion of Chinese or Japanese IIIB with a high credit or above; (b) at least two non-language semester subjects at second or third-year levels offered in Asian Studies with the standard of a high credit or above, and

(c) acceptance as a Joint Honours candidate within the Department which is jointly participating in the student's Honours program.

Type II: (a) Four non-language semester subjects at second and third-year levels offered in Asian Studies with the standard of a high credit or above, and (b) acceptance as a Joint Honours candidate with the Department which is jointly participating in the student's Honours program. Students wishing to take this option are advised to consult the Honours Convenor of the Centre and the relevant Department as early as possible so that adequate arrangements for entry can be made.

*content:* The nature of the Honours work undertaken shall be defined in consultation between the Head of the Departments concerned, the Head of the Centre and the student, and requires the approval of the Faculty of Arts.

### 3025 Honours in Chinese Studies

*level:* honours *points value:* 24 *duration:* full year

*note:* Students wishing to take Honours in Chinese Studies should consult the Honours Convenor early in their B.A. course and should plan their B.A. program carefully. They are encouraged to stream their courses so that their language study is combined with: (a) a variety of Chinese Studies courses; and (b) a sequence of subjects in one discipline (eg History, Politics, Economics, etc).

*prerequisites:* (a) Chinese IIIB with a high credit or above and (b) three full-year subjects or equivalent (two of which must be at second or third-year level and at credit standard or higher) from a specified range of subjects listed in the Centre's Honours Handbook. Students wishing to take Honours but without prerequisites are advised to consult the Honours Convenor as soon as possible. Entry to the Honours course is subject to the approval of the Honours Committee of the Centre.

*requirements:* Honours work includes course work and thesis. Further details are to be found in the Centre's Honours Handbook.

### 1509 Honours in Japanese Studies

*level:* honours *points value:* 24 *duration:* full year

*note:* Students wishing to take Honours in Japanese Studies should consult the Honours Convenor early in their B.A. course and should plan their B.A. program carefully. They are encouraged to stream their courses so that their language study is combined with: (a) a variety of Japanese Studies courses; and (b) a sequence of subjects in one discipline (eg History, Politics, Economics, etc).

*prerequisites:* (a) Japanese IIIB with a high credit or above and (b) three full-year subjects or equivalent (two of which must be at second or third-year level and at a high credit standard or above) from a specified

range of subjects listed in the Centre's Honours Handbook. Students wishing to take Honours but without prerequisites are advised to consult the Honours Convenor as soon as possible. Entry to the Honours course is subject to the approval of the Honours Committee of the Centre.

*requirements:* Honours work includes course work and thesis. Further details are to be found in the Centre's Honours Handbook.

## Australian Studies

### 3262 Australian Studies II

*level:* II    *points value:* 4    *duration:* semester 2

*prerequisites:* minimum 6 points in any discipline at level I

*contact hours:* to be advised

*content:* to be advised

*assessment:* to be advised

## Classics

The Classics Department offers, for the ordinary degree of Bachelor of Arts, subjects in classical languages and civilisation. Classical texts are studied in translation in all subjects other than language subjects. Some knowledge of an ancient language is however required of Honours students. Latin 1 and Ancient Greek 1 do not assume any prior language knowledge. Students who have completed Latin or Ancient Greek at Year 12 Level to an appropriate standard may, upon consultation with the Head of Department, and subject to approval by the Faculty of Arts, enrol directly into Latin 2 or Ancient Greek 2.

---

### Level I

---

#### 5714 Ancient Greek 1

*level:* I    *points value:* 6    *duration:* full year

*restriction:* not available to students with exemption from tutorials; or to students who have reached a level of satisfactory achievement in SACE stage 2 Ancient Greek or equivalent

*contact hours:* 4 tutorials a week

*content:* complete survey of grammar and syntax, with translation from English into Greek. A selection of passages from various authors is to be studied by students so as to understand the meaning, background and style.

*assessment:* 1 grammar and translation exam at the end of the first semester; 9 vocabulary tests and a final exam at the end of year in translation and knowledge of grammar

#### 1014 Classical Studies I

*level:* I    *points value:* 6    *duration:* full year

*restriction:* not available to students with exemption from lectures

*contact hours:* 2 lectures and 1 tutorial a week

*content:* the subject forms an introduction to the Greek world and is concerned with the literature, history and society of Ancient Greece. Homer, Hesiod, and Herodotus are studied in the first semester, the plays in the second semester. As an example of the method adopted, the treatment of epic is as follows: there is one lecture a week and a tutorial on epic literature, combining a broader survey with detailed study of the *Iliad* and the *Odyssey*. The tutorial, for which preparatory reading is set, is connected with the literary lectures. A second lecture a week covers archaeological, historical, and social topics, which are particularly relevant to the essays.

*assessment:* 2 three hour exams, 1 essay and 5 tutorial papers

#### 2346 Latin 1

*level:* I    *points value:* 6    *duration:* full year

*restriction:* not available to students with exemption from tutorials; or to students who have reached a level of satisfactory achievement in SACE stage 2 Latin or equivalent

*contact hours:* 3 tutorials a week

*content:* complete survey of grammar and syntax, with translation from English into Latin. A selection of passages from various authors is to be studied by students so as to understand background and style.

*assessment:* a grammar and translation exam at the end of the first semester; vocabulary test and a final exam at the end of the year in translation and knowledge of grammar

---

### Level II

---

#### 8996 Ancient Greek 2

*level:* II    *points value:* 8    *duration:* full year

*prerequisites:* 5714 Ancient Greek I (Pass Division I) or equivalent, or satisfactory achievement in SACE stage 2 Ancient Greek or equivalent

*restriction:* not available to students with exemption from tutorials; or to students who have completed 7773 Ancient Greek IIA or equivalent before 1993

*contact hours:* 3 tutorials a week

*content:* one hour a week will be devoted to unseen translation and study of grammar and syntax. One hour will be spent on a discussion text: text will be

translated beforehand and discussed in class, with attention given to literary analysis, as well as narrative content. One hour will be spent on a preparation text, prepared beforehand and translated in class. There is also a text to be read before the start of the first semester for examination in Orientation Week.

*assessment:* The preparation texts will be assessed by means of an examination at the end of each semester; passages will be set for translation and short passages set for grammatical analysis. A critical paper will be set on each discussion text. There will also be examinations to test unseen translation ability. Short grammar tests will be held during the year. The Vacation Reading examination will involve translation only.

### 7175 Ancient Greek 2S

*level:* II     *points value:* 8     *duration:* full year

*prerequisites:* acceptance for Honours

*restriction:* not available to students with exemption from tutorials; or to students who have reached a level of satisfactory achievement in SACE stage 2 Ancient Greek or equivalent

*contact hours:* 4 tutorials a week

*content:* complete survey of grammar and syntax, with translation from English into Greek. A selection of passages from various authors to be studied by students so as to understand the meaning, background and style.

*assessment:* a grammar and translation exam at the end of the first semester; 9 vocabulary tests and a final examination at the end of year in translation and knowledge of grammar

### 6455 Ancient Philosophy II

*level:* II     *points value:* 4     *duration:* semester 2

*prerequisites:* any Level I subject or half-subject

*restriction:* not available to students with exemption from lectures and not available to students who have completed 4083 Ancient Philosophy. Further information is available from the departmental office.

*contact hours:* 2 lectures and 1 tutorial a week

*content:* the aim of the subject is to introduce some of the main ideas of the philosophers considered, and to relate the philosophies to the Greek society in which they arose and the Roman society in which some of them flourished. The main topics considered are: (1) Early philosophers: the Sophistic Movement, including Socrates; (2) Classical Greek philosophers: Plato and Aristotle; (3) Philosophies of the Hellenistic and Roman periods; Stoicism and Epicureanism.

*assessment:* 1 three hour exam and 4 tutorial papers

### 6761 Classical Mythology II

*level:* II     *points value:* 4     *duration:* semester 1

*prerequisites:* any Level I subject or half-subject

*restriction:* not available to students with exemption from lectures and not available to students who have completed 1951 Classical Mythology before 1996

*contact hours:* 2 lectures and 1 tutorial a week

*content:* the subject examines some of the functions of myth in Greek and Roman society. For illustrative purposes, some attention is paid to myths in other cultures, but the subject is mainly concerned with the Greek and Roman material that deals with the Olympian goddesses, Apollo, Dionysus, Creation, the Golden Age, the Heroes, Foundation Legends, and the Underworld. The relationship between myth and early philosophy and historiography will be considered, and the role of myth today.

*assessment:* 1 two and a half hour exam, 2 tutorial papers, 1 short essay

### 7275 Early Greek Archaeology II

*level:* II     *points value:* 4

*availability:* not offered in 1996

*prerequisites:* any Level I subject or half-subject

*restriction:* not available with exemption from lectures and not available to students who have completed any previous Classical or Greek Archaeology, Art or Architecture course offered by The University of Adelaide

*contact hours:* 2 lectures and 1 tutorial a week

*content:* the aim of this subject is to study Greek Archaeology with an emphasis upon its art and architecture. The subject begins with the Mycenaean and continues until the end of the Archaic period (c. 480 B.C.).

*assessment:* 1 two hour exam, 1 slide test, 2 tutorial papers, 1 short essay

### 9343 Early Medieval West: A.D. 200–800) II

*level:* II     *points value:* 4

*availability:* not offered in 1996

*prerequisites:* any Level I subject or half-subject

*restriction:* not available with exemption from lectures and not available to students who are enrolled in or have completed 2467 Medieval Europe II or 8335 Medieval Europe III or have completed 4884 Medieval Europe II or 9693 Medieval Europe III before 1990

*contact hours:* 2 lectures and 1 tutorial a week

*content:* this subject examines a period of transformation, from the barbarian invasions of the old

Roman Empire to the 'new' Roman Empire of Western Europe. The intellectual and religious tensions within this period will be studied especially the role of the Church in the society as well as its material culture and socio-economic and political structures. Regions surveyed will include the Frankish, Anglo-Saxon, and Lombardic Italian kingdoms.

*assessment:* 2 tutorial papers, 1 short essay, 1 two hour exam

### 7033 Early Roman Archaeology II

*level:* II *points value:* 4 *duration:* semester 1

*prerequisites:* any Level I subject or half-subject

*restriction:* not available with exemption from lectures and not available to students who have completed any previous Roman Archaeology, Art or Architecture course offered by The University of Adelaide

*contact hours:* 2 lectures and 1 tutorial a week

*content:* this subject covers the contribution of archaeology to the understanding of Roman material culture from the Etruscan period to the Flavians. It deals with architecture, sculpture, painting and minor arts and looks at the ways in which these can be used as evidence of cultural change.

*assessment:* 1 two hour exam, 1 slide test, 2 tutorial papers, 1 short essay

### 7230 Greek and Roman Drama II

*level:* II *points value:* 4

*availability:* not offered in 1996

*prerequisites:* any Level I subject or half-subject

*restriction:* not available to students with exemption from tutorials

*contact hours:* 1 lecture, 1 seminar and 1 tutorial per week

*content:* this subject provides a systematic study of some of the major areas of Greek and Roman drama. It traces the origins and development of drama within its historic context and considers the work of the major tragic and comic writers, including Aeschylus, Sophocles, Euripides, Aristophanes, Menander, Plautus, Terence and Seneca. The subject will not require knowledge of any ancient language. It will build upon material studied in Classical Studies I but will not duplicate it and will be available to students who have not done any previous work in the Classics.

*assessment:* 1 seminar presentation, 2 tutorial papers, 1 short essay, 1 three hour exam

### 2304 Greek History: Archaic and Classical II

*level:* II *points value:* 4 *duration:* semester 1

*prerequisites:* any Level I subject or half-subject

*restriction:* not available with exemption from lectures and not available to students who have completed any early Greek history subject before 1996. Further information is available from the departmental office.

*contact hours:* 1 tutorial and 2 lectures a week

*content:* this subject covers a period of ancient Greek History when the city-state developed and reached its culmination in the civilisation of classical Athens. The subject begins in c.750 BC and ends in 404 BC.

*assessment:* 2 tutorial papers, 1 short essay, 1 three hour exam

### 5394 Greek History to Alexander the Great II

*level:* II *points value:* 4 *duration:* semester 2

*prerequisites:* any Level I subject or half-subject

*restriction:* not available with exemption from lectures and not available to students who have completed any later Greek history subject before 1996. Further information is available from the departmental office.

*contact hours:* 1 tutorial and 2 lectures a week

*content:* this subject covers a period when the self-governing political systems of ancient Greece yielded to the domination of Macedonia and when Alexander the Great spread Hellenistic culture over the eastern world from Ionia to Afghanistan and from Russia to Egypt. It begins in 404 BC and ends in 323 BC

*assessment:* 2 tutorial papers, 1 short essay, 1 three hour exam

### 3591 Later Greek Archaeology II

*level:* II *points value:* 4

*availability:* not offered in 1996

*prerequisites:* any Level I subject or half-subject

*restriction:* not available with exemption from lectures and not available to students who have completed any previous Classical or Greek Archaeology, Art or Architecture course offered by The University of Adelaide

*contact hours:* 2 lectures and 1 tutorial a week

*content:* this subject continues the study of Greek archaeology from the Classical period to the Hellenistic period in the Eastern Mediterranean world.

*assessment:* 1 two hour exam, 1 slide test, 2 tutorial papers, 1 short essay

### 2759 Later Roman Archaeology II

*level:* II *points value:* 4 *duration:* semester 2

*prerequisites:* any Level I subject or half-subject

*restriction:* not available with exemption from lectures

and not available to students who have completed any Roman Archaeology, Art or Architecture course offered by The University of Adelaide

*contact hours:* 2 lectures and 1 tutorial a week

*content:* this subject continues the survey of the contribution of archaeology to the modern understanding of Roman material culture in the Later Empire.

*assessment:* 1 two hour exam, 1 slide test, 2 tutorial papers, 1 short essay

### 7937 Latin 2

*level:* II    *points value:* 8    *duration:* full year

*prerequisites:* 2346 Latin 1 (Pass Division 1) or equivalent, or satisfactory achievement in SACE stage 2 Latin or equivalent

*restriction:* not available to students with exemption from tutorials or to students who have completed 6048 Latin IIA or equivalent before 1993

*contact hours:* 3 tutorials a week

*content:* one hour a week will be devoted to unseen translation and study of grammar and syntax. One hour will be spent on a discussion text: text will be translated beforehand and discussed in class, with attention given to literary analysis, as well as narrative content. One hour will be spent on a preparation text, prepared beforehand and translated in class. There is also a text to be read before the start of the first semester for examination in Orientation Week.

*assessment:* the preparation texts will be assessed by means of an examination at the end of each semester: passages will be set for translation and short passages set for grammatical analysis. A critical paper will be set on each discussion text. There will also be examinations to test unseen translation ability. Short grammar tests will be held during the year. The Vacation Reading examination will involve translation only.

### 3630 Latin 2S

*level:* II    *points value:* 8    *duration:* full year

*prerequisites:* acceptance for Honours

*restriction:* not available to students with exemption from tutorials or to students who have reached a level of satisfactory achievement in SACE Stage 2 Latin or equivalent

*contact hours:* 3 tutorials a week

*content:* complete survey of grammar and syntax, with translation from English into Latin. A selection of passages from various authors to be studied by students so as to understand the meaning, background and style.

*assessment:* 1 grammar and translation exam at the end of the first semester; 1 vocabulary test and final exam at the end of year in translation and knowledge of grammar

### 9437 Roman Imperial History A.D. 14–192 II

*level:* II    *points value:* 4

*availability:* not offered in 1996

*prerequisites:* any Level I subject or half-subject

8739 Roman Republican History is not essential but would be helpful.

*restriction:* not available to students with exemption from lectures and not available to students who have completed any Roman Imperial History subject before 1996

*contact hours:* 2 lectures and 1 tutorial a week

*content:* this subject covers the political and social history of Rome from Tiberius to Commodus. The last four weeks of the semester will be devoted to a special topic: slavery and the Roman family.

*assessment:* 1 two and a half hour exam, 2 tutorial papers, 1 short essay

### 8739 Roman Republican History 133 B.C.–A.D. 14 II

*level:* II    *points value:* 4

*availability:* not offered in 1996

*prerequisites:* any Level I subject or half-subject

*restriction:* not available with exemption from lectures and not available to students who have completed any Roman Republican history subject before 1996. Further information is available from the Departmental Office.

*contact hours:* 1 tutorial and 2 lectures a week

*content:* this subject considers the fall of the Roman Republic and the transition from Republican government to Imperial rule.

*assessment:* 2 tutorial papers, 1 short essay, 1 three hour exam

### 5970 The World of Early Byzantium A.D. 325–740 II

*level:* II    *points value:* 4    *duration:* semester 1

*prerequisites:* any Level I subject or half-subject

*restriction:* not available with exemption from lectures and not available to students who did 2628 Late Roman and Byzantine Studies II or 1300 Late Roman and Byzantine Studies II before 1993

*contact hours:* 2 lectures and 1 tutorial a week

*content:* this subject explores the world of early Byzantium through the primary sources. The lectures will trace the military and political history of this turbulent period after the split of the Roman empire into East and West, including the reigns of Constantine the Great, Julian the Apostate and Justinian and Theodora. Emphasis will be given to the religion and spirituality of early Byzantium, its art and architecture, thought, literary achievement and social and economic life. The development of Christianity will be described and analysed, the growth of the ascetic tradition, the rise of Islam, iconoclasm, and the synthesis of east and west which determined the nature of Eastern Christianity.

*assessment:* 2 tutorial papers, 1 short essay, 1 three hour exam

### **3134 The World of Late Byzantium A.D. 741–1453 II**

*level:* II    *points value:* 4    *duration:* semester 2

*prerequisites:* any Level I subject or half–subject

*restriction:* not available with exemption from lectures and not available to students who did 2628 Late Roman and Byzantine Studies II or 1300 Late Roman and Byzantine Studies II before 1993

*contact hours:* 2 lectures and 1 tutorial per week

*content:* this subject explores the world of later Byzantium through the primary sources. The lectures will trace the military and political history of the period including the reigns of the Macedonian and Paleologic emperors, and their struggles against invaders such as the Seljuk and Altonian Turks and the Western Crusaders. Emphasis will be given to the religion and spirituality of later Byzantium, its art and architecture, thought, literary achievement and social and economic life. The relationship between church and emperor will be considered and also the conflict between Eastern and Western Christianity.

*assessment:* 2 tutorial papers, 1 short essay, 1 three hour exam

### **1677 The Writer in Greek and Roman Society II**

*level:* II    *points value:* 4

*availability:* not offered in 1996

*prerequisites:* any Level I subject or half–subject

*restriction:* not available with exemption from lectures and not available to students who have completed 2036 Roman Literature II or 4571 Roman Literature III

*contact hours:* 2 lectures and 1 tutorial per week

*content:* this subject provides a systematic study in translation of some of the major areas of Greek and Roman literature. It traces the origins and development of the genres and considers them within their historical and social context. The subject will not require any knowledge of an ancient language.

*assessment:* 2 tutorial papers, 1 short essay, 1 three hour exam

## **Level III**

---

### **5944 Ancient Greek 3**

*level:* III    *points value:* 12    *duration:* full year

*prerequisites:* 8996 Ancient Greek 2 (Pass Div I) or equivalent

*restriction:* not available to students with exemption from tutorials

*contact hours:* 3 tutorials a week

*content:* one hour a week will be devoted to unseen translation and study of grammar and syntax. One hour a week will be spent on a discussion text: text will be translated beforehand and discussed in class, with attention given to literary analysis, as well as narrative content. One hour will be spent on the preparation text, prepared beforehand and translated in class. The remaining hour will be spent on grammar work, including translation into Greek. There is also a text to be read before the start of the first semester for examination in Orientation Week. Three books of Homer are to be read privately during the year.

*assessment:* the preparation texts will be assessed by means of an examination at the end of each semester; passages will be set for translation and short passages set for grammatical analysis. A critical paper will be set on each discussion text. There will also be examinations to test unseen translation ability and the ability to translate into Greek. Short grammar tests will be held during the year. The Vacation Reading examination will involve translation only. The Homer reading will also be examined.

### **3943 Ancient Greek 3S**

*level:* III    *points value:* 12    *duration:* full year

*prerequisites:* Acceptance for Honours and 7175 Ancient Greek 2S (Pass Div I) or equivalent

*restriction:* not available to students with exemption from tutorials

*contact hours:* 3 tutorials a week

*content:* one hour a week will be devoted to unseen translation and study of grammar and syntax. One hour will be spent on a discussion text: text will be

translated beforehand and discussed in class, with attention given to literary analysis, as well as narrative content. One hour will be spent on a preparation text, prepared beforehand and translated in class. There is also a text to be read before the start of the first semester, for examination in Orientation Week.

*assessment:* the preparation texts will be assessed by means of an examination at the end of each semester; passages will be set for translation and short passages set for grammatical analysis. A critical paper will be set on each discussion text. There will also be examinations to test unseen translation ability. Short grammar tests will be held during the year. The Vacation Reading examination will involve translation only.

### 6113 Ancient Philosophy III

*level:* III *points value:* 6 *duration:* semester 2

*prerequisites:* any Level II subject or half-subject

*restriction:* not available to students with exemption from lectures and not available to students who have completed 4083 Ancient Philosophy. Further information is available from the departmental office.

*content:* the aim of the subject is to introduce some of the main ideas of the philosophers considered, and to relate the philosophies to the Greek society in which they arose and the Roman society in which some of them flourished. The main topics considered are: (1) Early philosophers: the Sophistic movement, including Socrates; (2) Classical Greek philosophers: Plato and Aristotle; (3) Philosophies of the Hellenistic and Roman periods; Stoicism and Epicureanism.

*assessment:* 1 three hour exam, 4 tutorial papers, 1 long essay

### 2344 Archaeological Field Methods (A) III

*level:* III *points value:* 6 *duration:* semester 1

*prerequisites:* Archaeological Field Methods III is for students who have already successfully completed at least 8 points value of Archaeology/Art and Architecture subjects at The University of Adelaide (or the equivalent at Flinders University), and are intending to take Honours (Classical Studies) at The University of Adelaide or are on an Honours track in Archaeology at Flinders university.

*restriction:* for practical reasons, a quota of twenty students enrolled at third and Honours/Graduate Diploma level (combined) will apply. Honours students from either Adelaide universities who have already undertaken the Graduate Diploma in Archaeology will not be eligible for this subject. Students who have taken this option at third year level will not be able to take it in their Honours work.

*contact hours:* Up to 35 hours of practical sessions, including at least one full day's fieldwork at the end of the semester. N.B: these sessions, normally of four hour duration, begin mid-semester and are held at Flinders campus on either Monday or Friday mornings. In conjunction with the second semester course run by Flinders, students will be expected to undertake subject fieldwork during the mid-year vacation.

*content:* the subject will introduce students to the processes of archaeological excavation and recording, with an emphasis on contemporary methods of recording both sites and artefacts. course work includes understanding and creating Harris matrices, illustrating and cataloguing artefacts, basic surveying techniques and interpreting archaeological data. Case studies include excavation reports of classical archaeological sites.

*assessment:* to be announced

### 3906 Archaeological Theory and Method (A) III

*level:* III *points value:* 6 *duration:* semester 1

*prerequisites:* Archaeological Theory and Method III is for students who have already successfully completed at least 8 points value of Archaeology/Art and Architecture subjects at The University of Adelaide (or the equivalent at Flinders University) and are intending to take Honours (Classical Studies) at The University of Adelaide or are on an Honours track in Archaeology at Flinders university. N.B: students taking Honours (Classical Studies) at The University of Adelaide may, with the permission of the department, take this subject in their fourth year as a 'special option', provided they have not previously completed it.

*restriction:* , a quota of twenty students enrolled at third and Honours/Graduate Diploma level (combined) will apply. Honours students from either Adelaide universities who have already undertaken the Graduate Diploma in Archaeology will not be eligible for this subject.

*contact hours:* twelve weekly sessions of one and a half hours.

*content:* the subject examines the history of and current issues within archaeology as a methodological discipline. Lectures and seminars cover the history of classical archaeology, twentieth century archaeological research in the Old World and developments in the interpretation of ancient cultures, using classical examples.

*assessment:* to be announced

### 3644 Classical Mythology III

level: III points value: 6 duration: semester 1

prerequisites: any Level II subject or half-subject

restriction: not available with exemption from lectures and not available to students who have completed 1951 Classical Mythology before 1996

contact hours: 2 lectures and 1 tutorial a week

content: the subject examines some of the functions of myth in Greek and Roman society. For illustrative purposes, some attention is paid to myths in other cultures, but the course is mainly concerned with the Greek and Roman material that deals with the Olympian goddesses, Apollo, Dionysus, Creation, the Golden Age, the Heroes, Foundation Legends, and the Underworld. The relationship between myth and early philosophy and historiography will be considered, and the role of myth today.

assessment: 1 two and a half hour exam, 2 tutorial papers, 1 short essay, 1 long essay

### 1193 Early Greek Archaeology III

level: III points value: 6

availability: not offered in 1996

prerequisites: any Level II subject or half-subject

restriction: not available with exemption from lectures and not available to students who have completed any previous Classical or Greek Archaeology, Art or Architecture course offered by The University of Adelaide

contact hours: 2 lectures and 1 tutorial a week

content: the aim of this subject is to study Greek archaeology, with an emphasis upon its art and architecture. The subject begins with the Mycenaeans, and continues until the end of the Archaic period (c.480 B.C.).

assessment: 1 two hour exam, 1 slide test, 1 seminar paper, 1 short essay and 1 long essay

### 1763 Early Medieval West (A.D. 200 – 800) III

level: III points value: 6

availability: not offered in 1996

prerequisites: any Level II subject or half-subject

restriction: not available to students with exemption from lectures and not available to students who are enrolled in or have completed 2467 Medieval Europe II or 8335 Medieval Europe III or have completed 4884 Medieval Europe II or 9693 Medieval Europe III before 1993

contact hours: 2 lectures and 1 tutorial a week

content: this subject examines a period of transformation from the barbarian invasions of the old Roman Empire to the 'new' Roman Empire of Western Europe. The intellectual and religious tensions within this period will be studied especially the role of the Church in society as well as its material culture and socio-economic and political structures. Regions surveyed will include the Frankish, Anglo-Saxon, and Lombardic Italian Kingdoms.

assessment: 2 tutorial papers, 1 short essay, 1 long essay, 1 two hour exam

### 2613 Early Roman Archaeology III

level: III points value: 6 duration: semester 1

prerequisites: any Level II subject or half-subject

restriction: not available with exemption from lectures and not available to students who have completed any previous Roman Archaeology, Art or Architecture subject offered by The University of Adelaide

contact hours: 2 lectures and 1 tutorial a week

content: this subject covers the contribution of archaeology to the understanding of Roman material culture from the Etruscan period to the Flavians. It deals with architecture, sculpture, painting and minor arts and looks at the ways in which these can be used as evidence of cultural change.

assessment: 1 two hour exam, 1 slide test, 1 seminar paper, 1 short essay, 1 long essay

### 6180 Greek and Roman Drama III

level: III points value: 6

availability: not offered in 1996

prerequisites: any Level II subject or half-subject

restriction: not available to students with exemption from tutorials

contact hours: 1 lecture, 1 seminar and 1 tutorial per week

content: this course provides a systematic study of some of the major areas of Greek and Roman drama. It traces the origins and development of drama within its historic context and considers the work of the major tragic and comic writers, including Aeschylus, Sophocles, Euripides, Aristophanes, Menander, Plautus, Terence and Seneca. The course will not require knowledge of any ancient language. It will build upon material studied in Classical Studies I but will not duplicate it and will be available to students who have not done any previous work in the Classics.

assessment: 1 seminar presentation, 2 tutorial papers, 1 short essay, 1 long essay, 1 three hour exam

**5818 Greek History: Archaic and Classical III**

level: III points value: 6 duration: semester 1

prerequisites: any Level II subject or half-subject

restriction: not available with exemption from lectures and not available to students who have completed any early Greek history subject before 1996. Further information is available from the departmental office.

contact hours: 1 tutorial and 2 lectures a week

content: this subject covers a period of ancient Greek history when the city-state developed and reached its culmination in the civilisation of classical Athens. The course begins in c.750 B.C. and ends in 404 B.C.

assessment: 2 tutorial papers, 1 short essay, 1 long essay, 1 three hour exam

**3548 Greek History to Alexander the Great III**

level: III points value: 6 duration: semester 2

prerequisites: any Level II subject or half-subject

restriction: not available with exemption from lectures and not available to students who have completed any later Greek history subject before 1996. Further information is available from the departmental office.

contact hours: 1 tutorial and 2 lectures a week

content: This subject covers a period when the self-governing political systems of ancient Greece yielded to the domination of Macedonia and when Alexander the Great spread Hellenistic culture over the eastern world from Ionia to Afghanistan and from Russia to Egypt. It begins in 404 B.C. and ends in 323 B.C.

assessment: 2 tutorial papers, 1 short essay, 1 long essay, 1 three hour exam

**2029 Later Greek Archaeology III**

level: III points value: 6

availability: not offered in 1996

prerequisites: any Level II subject

restriction: not available with exemption from lectures and not available to students who have completed any previous Classical or Greek Archaeology, Art or Architecture course offered by The University of Adelaide

contact hours: 2 lectures and 1 tutorial a week

content: this subject continues the study of Greek archaeology from the Classical period to the Hellenistic period in the Eastern Mediterranean world.

assessment: 1 two hour exam, 1 slide test, 2 tutorial papers, 1 short essay, 1 long essay

**6278 Later Roman Archaeology III**

level: III points value: 6 duration: semester 2

prerequisites: any Level II subject or half-subject

restriction: not available with exemption from lectures and not available to students who have completed any Roman Archaeology, Art or Architecture course offered by The University of Adelaide

contact hours: 2 lectures and 1 tutorial a week

content: this subject continues the survey of the contribution of archaeology to the modern understanding of Roman material culture in the later Empire.

assessment: 1 two hour exam, 1 slide test, 1 seminar paper, 1 short essay, 1 long essay

**4232 Latin 3**

level: III points value: 12 duration: full year

prerequisite: 7937 Latin 2 (Pass Div I) or equivalent

restriction: not available to students with exemption from tutorials

contact hours: 3 tutorials a week

content: one hour a week will be spent on a discussion text: text will be translated beforehand and discussed in class, with attention given to literary analysis, as well as narrative content. One hour will be spent on the preparation text, prepared beforehand and translated in class. The remaining hour will be spent on grammar work, including translation into Latin. There is also a text to be read before the start of the first semester for examination in Orientation Week. Three books of Virgil's *Aeneid*, are to be read privately during the year.

assessment: the preparation text will be assessed by means of an examination at the end of each semester; passages will be set for translation and short passages set for grammatical analysis. A critical paper will be set on each discussion text. There will also be examinations to test unseen translation ability and the ability to translate into Latin. Short grammar tests will be held during the year. The Vacation Reading examination will involve translation only. The Virgil reading will also be examined.

**3454 Latin 3S**

level: III points value: 12 duration: full year

prerequisites: acceptance for Honours and 3630 Latin 2S (Pass Division I) or equivalent

restriction: not available to students with exemption from tutorials

content: one hour a week will be devoted to unseen translation and study of grammar and syntax. One hour a week will be spent on a discussion text: text will be

translated beforehand and discussed in class, with attention given to literary analysis, as well as narrative content. One hour will be spent on a preparation text, prepared beforehand and translated in class. There is also a text to be read before the start of the first semester, for examination in Orientation Week.

*assessment:* the preparation texts will be assessed by means of an examination at the end of each semester; passages will be set for translation and short passages set for grammatical analysis. A critical paper will be set on each discussion text. There will also be examinations to test unseen translation ability. Short grammar tests will be held during the year. The Vacation reading examination will involve translation only.

### **5830 Roman Imperial History A.D. 14–192 III**

*level:* III *points value:* 6

*availability:* not offered in 1996

*prerequisites:* any Level II subject or half subject

2706/3189 Roman Republic History is not essential but would be helpful.

*restriction:* not available to students with exemption from lectures and not available to students who have completed any Roman Imperial History subject before 1996

*contact hours:* 2 lectures and 1 tutorial a week

*content:* this subject covers the political and social history of Rome from Tiberius to Commodus. The last four weeks of the Semester will be devoted to a special topic: slavery and the Roman family.

*assessment:* 1 two and a half hour exam, 2 tutorial papers, 1 short essay, 1 long essay

### **3189 Roman Republican History 133 B.C.–A.D. 14 III**

*level:* III *points value:* 6

*availability:* not offered in 1996

*prerequisites:* any Level II subject or half-subject

*restriction:* not available with exemption from lectures and not available to students who have completed any Roman Republican history subject before 1996.

*contact hours:* 1 tutorial and 2 lectures a week

*content:* this subject considers the fall of the Roman Republic and the transition from Republican government to Imperial rule.

*assessment:* 2 tutorial papers, 1 short essay, 1 long essay, 1 three hour exam

### **3136 The World of Early Byzantium A.D. 325–740 III**

*level:* III *points value:* 6 *duration:* semester 1

*prerequisites:* any Level II subject or half-subject

*restriction:* not available with exemption from lectures and not available to students who have completed 2628 Late Roman and Byzantine Studies II or 1300 Late Roman and Byzantine Studies III before 1993

*contact hours:* 2 lectures and 1 tutorial a week

*content:* this subject explores the world of early Byzantium through the primary sources. The lectures will trace the military and political history of this turbulent period after the split of the Roman empire into East and West, including the reigns of Constantine the Great, Julian the Apostate and Justinian and Theodora. Emphasis will be given to the religion and spirituality of early Byzantium, its art and architecture, thought, literary achievement and social and economic life. The development of Christianity will be described and analysed, the growth of the ascetic tradition, the rise of Islam, iconoclasm and the synthesis of east and west which determined the nature of Eastern Christianity.

*assessment:* 2 tutorial papers, 1 short essay, 1 long essay, 1 three hour exam

### **5235 The World of Late Byzantium A.D. 741–1453 III**

*level:* III *points value:* 6 *duration:* semester 2

*prerequisites:* any Level II subject or half-subject

*restriction:* not available with exemption from lectures and not available to students who have completed 2628 Late Roman and Byzantine Studies II or 1300 Late Roman and Byzantine Studies III

*contact hours:* 2 lectures and 1 tutorial a week

*content:* this subject explores the world of later Byzantium through the primary sources. The lectures will trace the military and political history of the period including the reigns of the Macedonian and Paleologic emperors and their struggles against invaders such as the Seljuk and Altonian Turks and the Western Crusaders. Emphasis will be given to the religion and spirituality of later Byzantium, its art and architecture, thought, literary achievement and social and economic life. The relationship between church and emperor will be considered and also the conflict between Eastern and Western Christianity.

*assessment:* 2 tutorial papers, 1 short essay, 1 long essay, 1 three hour exam

## 2138 The Writer in Greek and Roman Society III

level: III points value: 6

availability: not offered in 1996

prerequisites: any Level I subject or half-subject

restriction: not available with exemption from lectures and not available to those who have completed 2036 Roman Literature II or 4571 Roman Literature III before 1993

contact hours: 2 lectures and 1 tutorial per week

content: this subject provides systematic study in translation of some of the major areas of Greek and Roman literature. It traces the origins and development of the genres and considers them within their historic and social context. The subject will not require any knowledge of an ancient language.

assessment: 2 tutorial papers, 1 short essay, 1 long essay, 1 three hour exam

## Honours Level

### 4210 Honours Classical Studies

level: honours points value: 24 duration: full year

prerequisites: Normally an acceptable standard in 1014 Classical Studies I and at least four semester subjects taught in the Classics Department, of which at least two must be at Level III; and preferably in at least one of 5944 Greek III, 3943 Greek IIIS, 4232 Latin III, 3454 Latin IIIS. Students without any of these language qualifications may be required to take additional language work during their honours year. For further information, see the Head of Department.

restriction: not available to students with exemption from tutorials

assumed knowledge: Students wishing to take an Honours degree in Classical Studies should consult the Head of the Classics Department, if possible before beginning studies at Level II.

content and assessment: (a) the study of three Greek or Latin texts in the original language; candidates must offer one of the texts for examination at the beginning of the first semester, (b) a common course, (c) special topics chosen in accordance with the interests of the candidates, (d) a dissertation in semester 2.

The exact arrangement of the subject may be varied by the Head of the Department in accordance with the interests of the students and the availability of specialised teaching.

## Joint Honours

Arrangements are possible for joint honours combining study in the Department of Classics with study in another Department in the Faculty of Arts.

Interested students should consult the Head of Department.

### 8302 Honours Greek and/or Latin

level: honours points value: 24 duration: full year

prerequisites: for Greek: 5944 Greek III; for Latin: 4232 Latin III; for Greek and Latin: 5944 Greek III and 4232 Latin III

restriction: not available to students with exemption from tutorials

assumed knowledge: Students wishing to take an Honours degree in Greek and/or Latin should consult the Head of Department, if possible before beginning studies at Level II.

content and assessment: (a) the study of six Greek or six Latin or three Greek and three Latin texts in the original language, chosen with reference to the interests of the candidates. Two of the texts must be offered for examination at the beginning of the first semester. Unseen translation will also be tested by examination. (b) the study of Greek and/or Latin literature through essays together with the study of other material in accordance with the interests of candidates. When students take Honours in both Latin and Greek, including the long essay (see section c), the need to study such other material may be relaxed. (c) unless determined otherwise in consultation with candidates, a special topic chosen from the field of Greek and/or Latin literature in accordance with the interests of the candidates. The topic will be the subject of dissertation to be written during semester 2. Topics which, while not purely literary, depend on the interpretation of ancient literature, may be approved.

The exact arrangement of the course may be varied by the Head of the Department in accordance with the interests of the students and the availability of specialised teaching. If the long essay is not included, the work of Sections A and B will be expanded to take its place.

## Cultural Studies

### 8675 Cultural Studies II

level: II points value: 4 duration: semester 2

prerequisites: minimum 6 points in any discipline at level I

contact hours: 3 hours per week

content: this subject introduces students to methodologies and theoretical frameworks used in cultural studies through a detailed examination of a

number of aspects of contemporary Australian culture. Topics to be examined will vary from year to year according to the availability of staff but may include home life; work; leisure; consumption; cityscape; landscape; nation/ethnicity/race/language; the politics of discourse, sexualities, global/local; postcoloniality.

*assessment:* book review (1000 words), tutorial presentation and paper (1000 words), essay (3000-4000 words) OR optional take-away exam.

### Drama for the degree of Bachelor of Arts

Currently there are five subjects offered, two at Level I (4429 Foundations of Modern Theatre and 1631 History of European Theatre), one at Level II (8018 Contemporary Australian Drama) and two at Level III (4608 Writing for Performance IIIA and 7846 Writing for Performance IIIB).

A quota applies to all Level I Drama subjects. All potential Level I students are required to fill out an application form available from the Drama Department.

Studies for Honours Drama, the M.A. (Course work) and (Research) and Ph.D. are also available. Interested students are required to consult with the Postgraduate Coordinator (Drama) by September of the year previous to that in which they wish to begin those studies.

For full information on Drama subjects and teaching arrangements, students should obtain the Drama Department Handbook which is available at the office of the Drama Department, 8th floor, Schulz Building.

---

## Level I

### 4429 Foundations of Modern Theatre I

*level:* I     *points value:* 3     *duration:* semester 2

*quota:* will apply—see Department of Drama. An application form must be filled out.

*restriction:* visiting students and miscellaneous enrolments

*contact hours:* 2 one hour lectures, 1 two hour workshop

*content:* The aim of this subject is to examine the immediate cultural forces that have shaped the development of Modern European theatre and to study selected works of the playwrights Büchner, Gogol, Ibsen, Chekhov and Strindberg. Students are expected to understand the theatrical movements of the Nineteenth Century evolving from romanticism to realism and symbolism, to be able to cite and explain evidence from the set playscripts to substantiate the changes and to relate them to the actual staging of the plays and the perceived function of drama in the

society of the time. Insights into performance elements are expected, as follows: the nature and development of character and character relationships; the nature and use of language; the patterns of dialogue; the style and function of scenery and associated staging devices (such as music); scenario and scene structure in script development. A capacity to crystallise the theme of each play and to relate that theme to a contemporary context is also expected.

*assessment:* 1 seminar presentation, summary, essay of 1,500–2,000 (30%), presentation (20%), seminar contribution (20%), final paper (30%)

### 1631 History of European Theatre I

*level:* I     *points value:* 3     *duration:* semester 1

*quota:* will apply - see Department of Drama. An application form must be filled out.

*contact hours:* 2 one hour lectures, 1 two hour workshop/tutorials, 1 one hour film/video viewing

*content:* This subject is an overview of the history of European theatre from the earliest times to the nineteenth century. In each period the focus is on three main areas: The Content (Script); Production and Acting Methods and Styles; Performing Areas (Stages, Theatres); Audiences (including the social and/or religious background). Practical workshops will be conducted in voice and speech and acting styles.

*assessment:* short essay (750 words) (10%), tutorial paper (15%), research paper (25%), rehearsed performance (30%), coverage test (10%), participation (10%)

---

## Level II

### 8018 Contemporary Australian Drama II

*level:* II     *points value:* 4     *duration:* semester 2

*prerequisites:* 2 subjects in Drama at level I, one of which must be either History or European Theatre I or Foundations of Modern Theatre I

*contact hours:* 5 hours per week (2 one hour, 1 two hour, and 1 one hour tutorial)

*content:* Australian drama, including silent and sound film, radio and TV, leading up to World War II and then to the present the key plays and the playwrights, new wave realism, the APG and Nimrod, present day drama, focusing on violence, corruption, domestic disruption and the force of comedy in contemporary life; Williamson, Hibberd, Nowra, Sewell, Hewett, Radic, de Groen, Davis, Bora and Maris.

*assessment:* continuous, based upon research exercises, written and oral reports, an essay (or equivalent) in review of a contemporary work, personal contribution and group presentation

**8222 Themes in Australian Drama II***level:* II *points value:* 4*availability:* not available in 1996*prerequisites:* 2 subjects in Drama at Level I, one of which must be History of European Theatre or Foundations of Modern Theatre, and lecturers' approval*contact hours:* 4 hours per week (2 one hour and 1 two hour tutorials)*content:* Predominant themes in Australian drama from the first settlers to the 1930's focusing on migration, bushrangers, the struggle for existence, theatre, promoters, Aboriginal drama, multicultural influences, the changing perspective on men and women, the evolution of the concept 'Australian', the impact of war, mateship and independence, the relevant plays and playwrights.*assessment:* continuous, based upon a major research exercise, written and oral reports, team presentation and personal contributions**Level III****4608 Writing for Performance IIIA***level:* III *points value:* 6 *duration:* semester 2*prerequisites:* 7846 Writing for Performance IIIB*contact hours:* 4 hours per week*content:* The creative writer and the playscript structure, character, dialogue, theme, attitude and scenario focuses on the use of language, gesture and the medium of drama to communicate feeling and intention to encourage the student's potential.*assessment:* weekly writing assignments (35%), draft of 30 minute script (50%), participation (15%)**7846 Writing for Performance IIIB***level:* III *points value:* 6 *duration:* semester 1*prerequisites:* 4 full-semester units, 2 at Level I and 2 at Level II*quota:* will apply - some written work must be submitted; approval of lecturer required*contact hours:* 4 hours per week (2 x 2 hour lecture/workshops)*content:* Specific research exercises and theoretical studies to encourage greater insight into trends in contemporary drama and script writing practice. The group constitute themselves a theatre laboratory in which to try out the range of original ideas developed in 5073 Writing for Performance III.*assessment:* 2 seminar reports (20%); workshop (20%); adaptation (20%); final presentation (40%)**Economics for the Bachelor of Arts degrees and the Bachelor of Social Sciences degree**

Arts students may take any subject offered by the Department of Economics at Level I, II and III, subject to prerequisites as required. For syllabus details, see section under the Bachelor of Economics degree.

Students intending to take any sequence of Economics subjects from Level I upwards are encouraged to consult with the Economics for Arts Student Course Adviser in the Department of Economics. The subject 2250 Social Economics I (no longer offered), if passed at Credit level or above, will be accepted as a prerequisite subject in place of 4309 Economics IA and 2076 Economics IB.

The Economics subjects available to B.A. students are listed below. Syllabuses are provided under the degree of B.Ec. in the Faculty of Economics and Commerce. Depending on staff availability, some subjects may not be taught in any given year.

**Level I**

9101 Business Data Analysis I

9073 Economic History I

### English Language and Literature

The Department of English offers one full-year subject at Level I, and a wide variety of semester subjects at Levels II and III. The Level I subject 1278 English I is offered for both day and evening students, and serves as a prerequisite for Level II or III units. No quota is applied for entry at Level I. The English I Handbook, available from the English Office, gives detailed course, teaching and assessment information and should be obtained by all prospective students.

The subjects offered at Level II and III will only be offered as staffing and enrolments permit, either in 1996 or in subsequent years. Where the same subjects are offered at both second and third year level, students at the higher level will be required to undertake additional work.

For full information on English subjects offered at second and third year levels, teaching arrangements, methods of assessment and details of set texts and editions, students should obtain copies of subject handouts from the English office.

All subjects at all levels are usually taught by means of lectures and tutorials/seminars, and are not normally available to students with exemption from lectures.

---

### Level I

---

#### 1278 English I

*level:* I    *points value:* 6    *duration:* full year

*assumed knowledge:* although there are no prerequisites, the ability to write clear, correct English is assumed.

*contact hours:* 2 lectures and 1 tutorial a week

*content:* An introduction to some characteristic features of literature and language and also to the critical vocabularies used to describe them. Classes will be taught by relating some major English literary texts of the 16th century onwards to 20th century language and literature from both the Old World and the New. Two six week blocks of options are offered

within the subject, enabling students to exercise some choice in selection of texts studied.

*assessment:* essays, exam

---

### Level II

---

#### 8401 Australian Cultural Studies II

*level:* II    *points value:* 4    *duration:* semester 1

*prerequisite:* 1278 English I or equivalent

*contact hours:* 1 lecture and 1 two hour seminar per week

*content:* This subject introduces students to cultural studies theory in conjunction with the study of some specific examples of contemporary popular culture. The areas of Australian culture examined include popular fiction, film and television, as well as everyday life. Films to be discussed will probably include *Crocodile Dundee* and *Strictly Ballroom*. Television programs will be selected from material being shown while the subject is running.

*assessment:* essays and take-home exam

#### 6557 Contemporary Australian Writing: New Directions 1973 to the Present II

*level:* II    *points value:* 4    *duration:* semester 2

*prerequisite:* 1278 English I or equivalent

*contact hours:* 1 lecture and 1 seminar a week

*content:* An exploration of the new diversity in Australian writing since the 1970s, when the production of Australian literature increased dramatically.

*assessment:* seminar paper, and take home exam

#### 2424 Drama Since 1900 II

*level:* II    *points value:* 4

*availability:* not offered in 1996

*prerequisites:* 1278 English I or equivalent

*restriction:* 7946 Modern Drama from Europe, America and Britain; TEN 305 Modern Drama

*contact hours:* 1 one hour lecture and 1 two hour seminar per week

*content:* This subject will consider the development of dramatic literature in the twentieth century, with particular reference to expressionism, epic, the absurd, and varieties of realism. Special attention will be paid to shifting views of comedy and tragedy within this period and to the relationship between idea and form.

*assessment:* 1 essay of 3,000 words (50%), 1 essay of 3,500 words (50%)

**9679 Early Middle English II**

level: II points value: 4

availability: not offered in 1996

prerequisites: 6034 English Before 1066 II

restriction: 2874 Old and Middle English; AE87 Old and Middle English II

contact hours: two 1.5 hour seminars per week

content: A study of the language and literature of England in the two hundred years following the Norman conquest.

assessment: essays and classwork (50%), exam (50%)

**2985 Embodiment: Early Modern Cultural Studies II**

level: II points value: 4 duration: semester 2

prerequisites: 1278 English I or equivalent

contact hours: 1 lecture and 1 two hour seminar per week

content: The aim of the subject is to historicise our deployment of contemporary models of embodiment, especially dualities of mind/body, private/public, self/other and gendered identity. The subject will focus on three related aspects of embodiment in early modern culture: 1. The King's "two bodies" and the social order; 2. The "one sex" body and technologies of the self, particularly gender and "interiority"; 3. Discourses of the monstrous and grotesque: mother, native, other, examining the representation of plural, racially marked and "barbaric" bodies.

assessment: one seminar paper and two essays

**6034 English before 1066 II**

level: II points value: 4

availability: not offered in 1996

restriction: 1278 English I or its equivalent

contact hours: two 1.5 hour seminars per week

content: An introduction to Old English language and literature and to Anglo-Saxon culture and society.

assessment: essays and classwork (50%), exam (50%)

**3112 Fiction and Drama in England from 1850 to 1910 II**

level: II points value: 4

availability: not offered in 1996

prerequisites: 1278 English I or its equivalent

restriction: 3317 Major English Texts II in 1988 or earlier

contact hours: 2 lectures and 1 tutorial a week

content: This subject will deal with some representative English novels from the mid nineteenth century to the early twentieth century. It will also look at some of the new drama including European drama that emerged from the late 1880s onwards.

assessment: essays and exam

**4915 Gender and Narrative II**

level: II points value: 4 duration: semester 1

prerequisite: 1278 English I or its equivalent

contact hours: 1 lecture and 1 seminar a week

content: With attention to a selection of texts from the fifteenth century to the present day, this subject will consider a range of issues concerning gender and its cultural representation, and introduce some of the concerns and practices of feminist criticism.

assessment: essays and exam

**1318 Gender/Nation: Australian Literature 1880-1914 II**

level: II points value: 4

availability: not offered in 1996

contact hours: 1 lecture and 1 two hour seminar each week

content: This subject examines a diverse range of texts from one of Australian literature's most lively and interesting periods, including short stories, comic writing, popular verse, gothic fiction, romance of various sorts, and drama. Particular attention will be given to analysing the conflict and overlap between three discourses: (i) the masculinism often associated with the Bulletin; (ii) first-wave feminism which is a component of much women's writing during these years (and which is represented in some men's writing); and (iii) the nationalism (and sometimes anti-nationalism) that was also a prominent feature in Australian literature around the turn of the century.

assessment: essays and exams

**7012 Major English Texts 1650-1800 II**

level: II points value: 4 duration: semester 2

prerequisites: 1278 English I

restriction: 7179 Major English Texts I in 1988 or earlier

contact hours: 2 lectures and 1 tutorial a week

content: Major English literary texts in poetry, prose and drama from Milton to Sterne.

assessment: essays and exam

**1635 Medieval English Literature II**

level: II points value: 4

availability: not offered in 1996

prerequisites: 1278 English I or its equivalent

contact hours: two 1.5 hour seminars per week

content: A study of some major English texts, authors, and genres of the period 1350–1450.

assessment: essays and exams

**7946 Modern Drama from Europe, America and Britain II**

level: II points value: 4 duration: semester 1

prerequisites: 1278 English I or its equivalent

restriction: TEN 305 Modern Drama

contact hours: 1 one hour lecture and 1 two hour seminar a week

content: This subject will examine a range of dramatic texts from Europe, America and Britain, beginning with the emergence of modern drama at the close of the nineteenth century and then focusing on a number of key texts in the twentieth century. Although the theatrical (performance) text will be considered, the major emphasis will be on the written (dramatic) text.

assessment: essays and exam

**5720 Modernist Literature II**

level: II points value: 4

availability: not offered in 1996

prerequisites: 1278 English I or its equivalent

restriction: 5313 Modernist Literature (1987, 1988)

contact hours: 2 lectures and 1 tutorial a week

content: A detailed study of the works of T. S. Eliot and James Joyce.

assessment: essays

**7792 New Literature in English: Africa II**

level: II points value: 4 duration: semester 1

prerequisites: 1278 English I or equivalent

restriction: Ten 301 New Literature in English: Africa

contact hours: two 1.5 hour seminars per week

content: This subject will consider a range of African writers from the colonial and post-colonial periods. Topics include colonialism and its effects, race relations, traditional and contemporary values, women's experiences in a changing socio-cultural context, corruption and power, the individual and the community and the role of the writer in colonial and post-colonial Africa.

assessment: seminar paper of approx 2,000 words (30%), essay 1 of approx 2,500 words (30%), essay 2 of approx 3,000 words (40%)

Students will be required to deliver one seminar paper of twenty minutes duration, and two further papers. The seminar paper is to be written up as a formal essay and submitted for assessment no later than two weeks after the seminar presentation.

**2542 Popular Genres II**

level: II points value: 4 duration: semester 1

prerequisites: English I or its equivalent

contact hours: 2 lectures and 1 tutorial per week

content: This subject will study the history of such popular genres as science fiction, fantasy and detective fiction, the problem of defining them and the values promoted by them, some sub-genres and modes, illustrated by leading examples, particularly drawn from Australian literature. The work of some important or seminal writers as well as recent examples will be included. Although literary texts have been chosen for particular study rather than, for instance, films, various media will be considered. The subject will include relevant socio-cultural and larger issues, where appropriate.

assessment: essays and classwork (50%), exam (50%)

**8777 Questions of Post-Modernism II**

level: II points value: 4

availability: not offered in 1996

prerequisites: 1278 English I or its equivalent

contact hours: 1 three hour seminar

content: The subject will examine available definitions of Postmodernism and the debates surrounding them. While the focus will be on questions of literary representation, the subject will consider their intersection with wider cultural practices, for example post-colonial and feminist issues. The subject examines prose fiction, drama and poetry. Students will be encouraged to read beyond the select list.

assessment: essays and classwork

**2554 Romanticism II**

level: II points value: 4 duration: semester 1

prerequisites: 1278 English I or its equivalent

restriction: 3627 Romanticism; 7299 or 5925 Romantic Poets

contact hours: one hour lecture and a two hour seminar per week

content: A close reading of a selection of the poetry of

Blake, Byron, Coleridge, Keats and Wordsworth. This reading will be supplemented by a study of the ideological background of the Romantic period, particularly as put forward in the prose writings of the poets.

*assessment:* 4 assignments (50%), final exam (50%)

### 1323 The Centre and the Australian Imagination II

*level:* II *points value:* 4 *duration:* semester 2

*availability:* subject to staffing

*restriction:* 1694 Australian Literary Studies (1982–88) or equivalent

*contact hours:* 3 hours

*content:* Early colonial attitudes towards the interior of the Australian continent have been undergoing a transformation. In both a literal and a metaphorical sense the 'centre' has been accepted by and assimilated into the Australian imagination. This subject will attempt to construct charts and maps by which this change can be followed and understood and it will draw its evidence from a range of cultural artefacts including works of literature, paintings, social attitudes and cultural myths.

*assessment:* essays and exam

### 7371 Twentieth Century American Literature II

*level:* II *points value:* 4 *duration:* semester 2

*prerequisite:* 1278 English I or its equivalent

*restriction:* 6214 American Studies prior to 1988

*contact hours:* 1 lecture and 1 two hour seminar a week

*content:* Study of selected fiction, film and poetry produced in the USA since 1900. The emphasis will be on the shift from modernism to postmodernism.

*assessment:* tutorial assignments, essays, and exam

### 1362 Victorian Literature II

*level:* II *points value:* 4 *duration:* semester 2

*prerequisites:* 1278 English I or equivalent

*contact hours:* 1 one hour lecture and 1 two seminar per week

*content:* This subject will consider the work of some important Victorian novelists and poets, with particular reference to the nature and modes of their responses to a changing social scene and to an evolving climate of ideas. Issues to be considered include the impact of industrialism, the changing face of rural England, the situation of women in Victorian society, and varieties of faith and doubt.

*assessment:* 1 essay of 3,000 words (50%), 1 essay of 3,500 words (50%)

### 1549 Women's Writing: The Nineteenth Century II

*level:* II *points value:* 4 *duration:* semester 2

*prerequisites:* 1278 English I or its equivalent

*contact hours:* 2 lectures and 1 tutorial a week

*content:* This subject will consider the rise of the woman writer in the nineteenth century and the development of a female literary tradition. It will look at questions which arise out of the adoption of a woman-centred perspective for the writer and the critic. Texts both central to and outside the British female tradition will be considered, with reference to historical context and contemporary feminist literary theory. Special attention will be given to problems of language and subjectivity, the construction of sexuality and sexual differences, and ways in which gender affects writing and reading.

*assessment:* essays and exam

## Level III

### 1407 Advanced Middle English III

*level:* III *points value:* 6

*availability:* not offered in 1996

*prerequisites:* 2874 Old and Middle English or 6034 or 1807 English Before 1066, II or III

*restriction:* 5999 Advanced Old and Middle English

*contact hours:* one 1.5 hour seminar a week

*content:* A study of three major texts in Middle English.

*assessment:* essays during semester (50%), exam (50%)

### 1725 Advanced Old English III

*level:* III *points value:* 6

*availability:* not offered in 1996

*prerequisites:* 2874 Old and Middle English or 6034 or 1807 English Before 1066, II or III

*restriction:* 5999 Advanced Old and Middle English

*contact hours:* one 1.5 hour seminar a week

*content:* Old English homiletic prose (Aelfric, Wulfstan, Blickling); Old English religious, elegiac, and miscellaneous poetry.

*assessment:* essays during semester (50%), exam (50%)

**1834 Australian Cultural Studies III**

*level:* III *points value:* 6 *duration:* semester 1

*prerequisite:* 1278 English I or equivalent

*contact hours:* 1 lecture and 1 two hour seminar per week

*content:* This subject introduces students to cultural studies theory in conjunction with the study of some specific examples of contemporary popular culture. The areas of Australian culture examined include popular fiction, film and television, as well as everyday life. Films to be discussed will probably include *Crocodile Dundee* and *Strictly Ballroom*. Television programs will be selected from material being shown while the subject is running.

*assessment:* essays and take home exam

**1815 Contemporary Australian Writing: New Directions 1973 to the Present III**

*level:* III *points value:* 6 *duration:* semester 2

*prerequisite:* 1278 English I or equivalent

*contact hours:* 1 lecture and 1 seminar a week

*content:* An exploration of the new diversity in Australian writing since the 1970s, when the production of Australian literature increased dramatically.

*assessment:* seminar papers, essay, take home exam

**9498 Drama Since 1900 III**

*level:* III *points value:* 6

*availability:* not offered in 1996

*prerequisites:* 1278 English I or equivalent

*restriction:* 7451 Modern Drama, TEN 305 Modern Drama

*contact hours:* 1 one hour lecture and 1 two hour seminar per week

*content:* This subject will consider the development of dramatic literature in the twentieth century, with particular reference to expressionism, epic, the absurd, and varieties of realism. Special attention will be paid to shifting views of comedy and tragedy within this period and to the relationship between idea and form.

*assessment:* 1 essay of 2,000 words (25%); 2 essays of 3,000–3,500 words (37.5% each)

**8741 Early Middle English III**

*level:* III *points value:* 6

*availability:* not offered in 1996

*prerequisites:* 6034 or 1807 English Before 1066, II or III

*restriction:* 2874 Old and Middle English; AE87 Old and Middle English II

*contact hours:* two 1.5 hour seminars per week

*content:* A study of the language and literatures of England in the two hundred years following the Norman conquest.

*assessment:* essays and classwork (50%), exam (50%)

**9291 Embodiment: Early Modern Cultural Studies III**

*level:* III *points value:* 6 *duration:* semester 2

*prerequisites:* 1278 English I or equivalent

*contact hours:* 1 lecture and 1 two hour seminar per week

*content:* The aim of the subject is to historicise our development of contemporary models of embodiment, especially dualities of mind/body, private/public, self/other and gendered identity. The subject will focus on three related aspects of embodiment in early modern culture: 1. The King's "two bodies" and the social order; 2. The "one sex" body and technologies of the self, particularly gender and "interiority"; 3. Discourses of the monstrous and grotesque: mother, native, other, examining the representation of plural, racially marked and "barbaric" bodies.

*assessment:* one seminar paper and two essays

**1807 English Before 1066 III**

*level:* III *points value:* 6

*availability:* not offered in 1996

*prerequisite:* 1278 English I or equivalent

*restriction:* 2874 Old and Middle English, AE87 Old and Middle English II

*contact hours:* two 1.5 hour seminars per week

*content:* An introduction to Old English language and literature and to Anglo-Saxon culture and society.

*assessment:* essays and classwork (50%), exam (50%)

**8082 Fiction and Drama in England from 1850 to 1910 III**

*level:* III *points value:* 6

*availability:* not offered in 1996

*prerequisites:* 1278 English I or its equivalent

*restriction:* 3317 Major English Texts II in 1988 or earlier

*contact hours:* 2 lectures and 1 tutorial a week

*content:* This subject will deal with some representative English novels from the mid nineteenth

century to the early twentieth century. It will also look at some of the new drama including European drama that emerged from the late 1880s onwards.

*assessment:* essays and exam

### 4382 Gender and Narrative III

*level:* III *points value:* 6 *duration:* semester 1

*prerequisite:* 1278 English I or its equivalent

*contact hours:* 1 lecture and 1 seminar a week

*content:* With attention to a selection of texts from the fifteenth century to the present day, this subject will consider a range of issues concerning gender and its cultural representation, and introduce some of the concerns and practices of feminist criticism.

*assessment:* essays and exam

### 1276 Gender/Nation: Australian Literature 1880–1914 III

*level:* III *points value:* 6

*availability:* not offered in 1996

*contact hours:* 1 lecture and 1 two hour seminar each week

*content:* This subject examines a diverse range of texts from one of Australian literature's most lively and interesting periods, including short stories, comic writing, popular verse, gothic fiction, romance of various sorts, and drama. Particular attention will be given to analysing the conflict and overlap between three discourses: (i) the masculinism often associated with the Bulletin; (ii) first-wave feminism which is a component of much women's writing during these years (and which is represented in some men's writing); and (iii) the nationalism (and sometimes anti-nationalism) that was also a prominent feature in Australian literature around the turn of the century.

*assessment:* essays and exam

### 5363 Major English Texts 1650–1800 III

*level:* III *points value:* 6 *duration:* semester 2

*prerequisites:* 1278 English I

*restriction:* 7179 Major English Texts II in 1988 or earlier

*contact hours:* 2 lectures and 1 tutorial a week

*content:* Major English literary texts in poetry, prose and drama from Milton to Sterne.

*assessment:* essays and exam

### 3234 Medieval English Literature III

*level:* III *points value:* 6

*availability:* not offered in 1996

*prerequisites:* 1278 English I or its equivalent

*contact hours:* two 1.5 hour seminars per week

*content:* A study of some major English texts, authors, and genres of the period 1350–1450.

*assessment:* essays and exam

### 7451 Modern Drama from Europe, America and Britain III

*level:* III *points value:* 6 *duration:* semester 1

*prerequisites:* 1278 English I or its equivalent

*restriction:* TEN 305 Modern Drama

*contact hours:* 1 one hour lecture and 1 two hour seminar a week

*content:* This subject will examine a range of dramatic texts from Europe, America and Britain, beginning with the emergence of modern drama at the close of the nineteenth century and then focusing on a number of key texts in the twentieth century. Although the theatrical (performance) text will be considered, the major emphasis will be on the written (dramatic) text.

*assessment:* essays and exam

### 3046 Modernist Literature III

*level:* III *points value:* 6

*availability:* not offered in 1996

*prerequisites:* 1278 English I or its equivalent

*restriction:* 5313 Modernist Literature (1987, 1988)

*contact hours:* 2 lectures and 1 tutorial a week

*content:* A detailed study of the works of T. S. Eliot and James Joyce.

*assessment:* essays

### 2473 New Literature in English: Africa III

*level:* III *points value:* 6 *duration:* semester 1

*prerequisites:* 1278 English I or equivalent

*restriction:* TEN 301 New Literature in English: Africa

*contact hours:* two 1.5 hour seminars per week

*content:* This subject will consider a range of African writers from the colonial and post-colonial periods. Topics include colonialism and its effects, race relations, traditional and contemporary values, women's experiences in a changing socio-cultural context, corruption and power, the individual and the

community and the role of the writer in colonial and post-colonial Africa.

*assessment:* seminar paper of approx 2,500 words (30%), essay 1 of approx 3,000 words (30%), essay 2 of approx 3,500 words (40%). Students will be required to deliver one seminar paper of twenty minutes duration, and two further papers. The seminar paper is to be written up as a formal essay and submitted for assessment no later than two weeks after the seminar presentation.

### 7070 Popular Genres III

*level:* III *points value:* 6 *duration:* semester 1

*prerequisites:* English I or its equivalent

*contact hours:* 2 lectures and 1 tutorial per week

*content:* This subject will study the history of such popular genres as fantasy, science fiction and detective fiction, the problem of defining them and the values promoted by them, some sub-genres and modes, illustrated by leading examples, particularly drawn from Australian literature. The work of some important or seminal writers as well as recent examples will be included. Although literary texts have been chosen for particular study rather than, for instance, films, various media will be considered. The subject will include relevant socio-cultural and larger issues, where appropriate.

*assessment:* essays and classwork (50%), exam (50%)

### 5496 Questions of Post-Modernism III

*level:* III *points value:* 6

*availability:* not offered in 1996

*prerequisites:* 1278 English I

*contact hours:* 1 three hour seminar per week

*content:* The course will examine available definitions of Postmodernism and the debates surrounding them. While the focus will be on questions of literary representation, the course will consider their intersection with wider cultural practices, for example post-colonial and feminist issues. The course examines prose fiction, drama and poetry. Students will be encouraged to read beyond the select list

*assessment:* essays and classwork

### 9326 Romanticism III

*level:* III *points value:* 6 *duration:* semester 1

*prerequisites:* 1278 English I or its equivalent

*restriction:* 3627 Romanticism; 7299 or 5925 Romantic Poets

*contact hours:* 1 one hour lecture and 1 two hour seminar per week

*content:* A close reading of a selection of the poetry of Blake, Byron, Coleridge, Keats and Wordsworth. This reading will be supplemented by a study of the ideological background of the Romantic period, particularly as put forward in the prose writings of the poets.

*assessment:* 4 assignments (50%); final exam (50%)

### 1154 The Centre and the Australian Imagination III

*level:* III *points value:* 6

*duration:* semester 2, subject to staffing

*prerequisites:* 1278 English I or its equivalent

*restriction:* 1694 Australian Literary Studies (1982-88) or equivalent

*contact hours:* 3 hours

*content:* Early colonial attitudes towards the interior of the Australian continent have been undergoing a transformation. In both a literal and a metaphorical sense the 'centre' has been accepted by and assimilated into the Australian imagination. This subject will attempt to construct charts and maps by which this change can be followed and understood and it will draw its evidence from a range of cultural artefacts including works of literature, paintings, social attitudes and cultural myths.

*assessment:* essays and exam

### 4596 Twentieth Century American Literature III

*level:* III *points value:* 6 *duration:* semester 2

*prerequisite:* 1278 English I or its equivalent

*restriction:* 6214 American Studies prior to 1988

*contact hours:* 1 lecture and 1 two hour seminar per week

*content:* Study of selected fiction, film and poetry produced in the USA since 1900. The emphasis will be on the shift from modernism to postmodernism.

Third year students will be required to do additional reading, leading to a more substantial tutorial report and final essay than would be expected of Level II students. This will usually entail in-depth study of a single writer or film-maker chosen in consultation with the tutor.

*assessment:* tutorial assignments and essays

**2257 Victorian Literature III**

*level:* III *points value:* 6 *duration:* semester 2

*prerequisites:* 1278 English I or equivalent

*contact hours:* 1 one hour lecture and 1 two hour seminar per week

*content:* This subject will consider the work of some important Victorian novelists and poets, with particular reference to the nature and modes of their responses to a changing social scene and to an evolving climate of ideas. Issues to be considered include the impact of industrialism, the changing face of rural England, the situation of women in Victorian society, and varieties of faith and doubt.

*assessment:* 1 essay of 2,000 words (25%), 2 essays of 3,000–3,500 words (37.5% each)

**5687 Women's Writing: The Nineteenth Century III**

*level:* III *points value:* 6 *duration:* semester 2

*prerequisites:* 1278 English I or its equivalent

*contact hours:* 2 lectures and 1 tutorial a week

*content:* This subject will consider the rise of the woman writer in the nineteenth century and the development of a female literary tradition. It will look at questions which arise out of the adoption of a woman-centred perspective for the writer and the critic. The subject is concerned with questions of gender and representation. Texts both central to and outside the British female tradition will be considered, with reference to historical context and contemporary feminist literary theory. Special attention will be given to problems of language and subjectivity, the construction of sexuality and sexual differences, and ways in which gender affects writing and reading.

*assessment:* essays and exam

---

**Honours Level**

---

**9639 Honours English Language and Literature**

*level:* Honours *points value:* 24 *duration:* full year

*note:* Students wishing to take Honours English are advised to consult the Head of Department before beginning third year courses to ensure that they meet the prerequisites.

*prerequisite:* Students wishing to take Honours English must have passed 1278 English I and the equivalent of at least five one-semester subjects offered by the Department. (A full-year subject taken in 1988 or earlier is equivalent to two one-semester subjects.) A minimum of Credit standard will be required in at least four of these subjects, and at least two Credit standards

must have been achieved at third-year level. Minimum requirement = 30 points.

The prerequisites for a Joint Honours degree in English and some other subject may be varied from those listed above at the discretion of the respective departmental Heads.

The English Department has a Departmental Honours Sub-Committee which will consider each application to study Honours English. Admission to Honours is always at the discretion of the Head of Department acting on the advice of the Honours Sub-Committee. In extraordinary cases a student who has not met the above prerequisites, but who for other reasons can satisfy the Departmental Honours Sub-Committee and the Head that she or he is qualified to undertake Honours English, may be accepted into Honours.

In general, it is expected that by the end of their Honours year students will be familiar with major aspects of English Literature. The choice of subjects taken by students in their Honours year must be approved by the Head of Department. All students must therefore consult with the Head or his or her Deputy before finalising enrolment.

*requirements:* the work for the Honours year consists of taking a common subject (Literary Theory), two other subjects, and the writing of a short Honours Thesis. A list of subjects offered for 1996 will be available from the Department late in 1994, and students should consult the Departmental Honours Handbook. Students should note that the availability of these subjects will depend on a sufficient number of people electing to take them.

The Honours year is considered a year of full-time study, and regular attendance at classes is required.

*assessment:* details of the assessment procedures to be followed are set out in the Honours Handbook. Assessment as at present envisaged will be by thesis, end of year examination (including a *viva voce* examination) and/or work presented throughout the year.

**European Studies****2157 European Studies II**

*level:* II *points value:* 4 *duration:* semester 1

*prerequisites:* 6 points in Humanities/Social Sciences at Level I. (Note: Students who want to take out the named degree will need to do a European language at Level I).

*restrictions:* not available to students with exemption from lectures

*contact hours:* 3 hours per week

*content:* this introduction to European Studies is designed to give students an overview of some of the most important cultural, philosophical and political institutions, movements and ideas developed in Europe from Ancient Greece to the present: the idea of Europe itself and of empire, utopia, the enlightenment, revolution. The subject will deal with the forces driving people and states towards unity and towards diversity in Europe over many centuries. The subject will be taught by people from a range of relevant disciplines, dealing with cultural, historical, language, literary and political studies. Classes will be a combination of lectures, seminars, tutorials and some prescribed film viewing.

*assessment:* continuous: 2 tutorial papers, one of 800 words and another 1200 words (2 x 20%) multiple choice test (20%), essay 2500 words (40%)

### French Studies

There are ten subjects in French for the Ordinary degree of Bachelor of Arts: 8768 French IM: Intermediate French, 2224 French IA - Beginners' French, 4242 French I, 5691 French II: Language and Culture, 3440 French IIA: Language and Culture, 3475 French Studies II (pre 1789), 5245 French Studies II (post 1789), 4304 French III: Language and Culture, 2648 French Studies III S1, and 6175 French Studies III S2. 2224 French IA - Beginners' French assumes little or no previous knowledge of the language and is a first-year subject for the degree of B.A. The aim of the course is to provide a basic working knowledge of the written and spoken language to those students who have done little or no French at school and who wish to study the language at University, either for cultural reasons, or for more practical reasons, such as to acquire a reading knowledge of French for Honours or postgraduate work in another discipline. 8768 French IM: Intermediate French is a first-year subject designed for students whose knowledge of French is intermediate between zero (or negligible) knowledge and advanced knowledge of French. Students for whom this subject is intended include the following: students who have studied French at school to year 10 or Year 11, but who have not matriculated in French; students with a score of less than 14/20 at matriculation French; students who have passed Matriculation French in the accelerated course; students who matriculated in French 10 years ago or more. No subject is a prerequisite to 4242 French I, but a knowledge of French at the standard of SACE stage 2 is assumed and students are advised to attempt the course only if they have reached a scaled score of 14 or higher in that examination or possess some other equivalent qualification.

5691 French II: Language and Culture is the subject which will normally be taken in second year by

students who have passed in 4242 French I at Pass: Division I standard or higher as well as by students who have obtained a credit or higher in 8768 French IM: Intermediate French. 3440 French IIA: Language and Culture will be taken by students who have passed in 2224 French IA: Beginners' French at Pass: Division I standard or higher as well as by students who have passed 8768 French IM: Intermediate French or those who have passed in 4242 French I at Division II standard. Students who pass 5691 French II: Language and Culture or 3440 French IIA: Language and Culture will be qualified to enter 4304 French III: Language and Culture in the following year.

3475 French Studies II (pre 1789) and 5245 French Studies II (post 1789) may be taken as additional subjects to 5691 French II: Language and Culture, and may be taken either in Levels II or III, the only prerequisite being a pass in 4242 French I at Pass: Division I standard or higher or a credit or higher in 8768 French IM: Intermediate French. 3475 French Studies II (pre 1789) and 5245 French Studies II (post 1789) may also be taken by students who have already passed in 3440 French IIA: Language and Culture. 3475 French Studies II (pre 1789) and 5245 French Studies II (post 1789) do not by themselves normally qualify for admission to 4304 French III: Language and Culture, for which a pass in 5691 French II: Language and Culture or 3440 French IIA: Language and Culture is required. However, in special cases, and with the permission of the Department, students who have taken and passed in 3475 French Studies II (pre 1789) and 5245 French Studies II (post 1789) only may be admitted to 4304 French III: Language and Culture.

4304 French III: Language and Culture is the normal subject to be taken by students in third year. 2648 French Studies III S1 and 6175 French Studies III S2 may also be taken as additional subjects to 4304 French III: Language and Culture, and will normally be taken at Level III, the prerequisite being a pass in any one of the subjects 5691 French II: Language and Culture, 3440 French IIA: Language and Culture or 3475 French Studies II (pre 1789) or 5245 French Studies II (post 1789). Lectures on literature and civilisation, particularly in second and third year courses, are mainly given in French.

All exercises set during the year form an integral part of the courses, and students may be refused permission to sit for the annual examination if their performance of the exercises has been unsatisfactory.

### Subjects available at Level I

There are three subjects available at Level I: 4242 French I, 8768 French IM: Intermediate French and 2224 French IA - Beginners' French. Students will be given assistance at enrolment to determine in which of these three subjects they will enrol.

## Level I

---

### 4242 French I

*level:* I     *points value:* 6     *duration:* full year

*prerequisites:* SACE Stage 2 French with a scaled score of 14/20 or higher or an equivalent qualification acceptable to the Department

*contact hours:* 2 lectures (civilisation/literature and language), 2 hours of tutorials (oral and written expression) and 2 hours of programmed independent study (including computer and audio-visual materials) per week.

*content:* This subject consolidates the language skills of French matriculants and develops reading and research skills in the areas of literature and civilisation. Students will acquire knowledge of current issues in French society, as well as an overview of important moments in French cultural history.

*assessment:* continuous assessment, tests, essays, and language exam

### 8768 French IM: Intermediate French

*level:* I     *points value:* 6     *duration:* full year

*assumed knowledge:* SACE Stage 1 French or equivalent acceptable to the Department

*restriction:* 4242 French I, 2224 French IA

*contact hours:* semester 1: 4 hours of language classes per week; semester 2: 3 hours of language classes and 1 lecture per week on French texts

*content:* This subject is designed for students whose knowledge of French is intermediate between zero (or negligible) knowledge and advanced knowledge of French. Students for whom this subject is intended include the following: students who have studied French at school to year 10 or Year 11, but who have not matriculated in French; students with a score of less than 14/20 at matriculation French; students who have passed Matriculation French in the accelerated course; students who matriculated in French 10 years ago or more.

This subject provides intensive language training in the four basic skills- reading, listening, writing, speaking. Students will also be introduced to various aspects of French society and culture.

*assessment:* continuous assessment; tests; essays; language exam

### 2224 French IA – Beginners' French

*level:* I     *points value:* 6     *duration:* full year

*restriction:* not open to Matriculants in French

*contact hours:* 4 hours of language classes and 1 hour

of programmed, independent study in the language laboratory each week. In semester 2, an additional hour devoted to reading.

*content:* This subject introduces students to the language and civilisation of contemporary France. In addition to intensive language training in the four basic skills – listening, speaking, reading and writing – various aspects of French society and culture will be introduced through the study of documents ranging from newspaper articles to short texts. The emphasis throughout will be on communicative skills, both oral and written.

*assessment:* continuous assessment, tests, final written exams

### Subjects available at Level II and Level III for 1996

The following subjects are offered at Level II: 5691 French II, 3440 French IIA, 3475 French Studies II (pre 1789) and 5245 French Studies II (post 1789); and the following are offered at Level III: 4304 French III, 2648 French Studies IIIS1 and 6175 French Studies IIIS2:

5691 French II, 3440 French IIA and 4304 French III each consist of two components:

- (a) a language component, consisting of training in the speaking and writing of French (including translation from English into French) and conducted for 3 hours per week throughout the year (except for 3440 French IIA which is 4 hours per week).
- (b) a literature and civilisation component which involves four texts per semester (or equivalent) and two contact hours per week.

3475 French Studies II (pre 1789), 5245 French Studies II (post 1789), 2648 French Studies IIIS1 and 6175 French Studies III S2, each constitute independent one-semester units. Each unit involves 3 hours of classes per week.

## Level II

---

### 5691 French II: Language and Culture

*level:* II     *points value:* 8     *duration:* full year

*prerequisites:* 4242 French I (Pass Div I) or 8768 French IM: Intermediate French (Credit)

*restriction:* 4242 French I (Pass Div II), 8768 French IM: Intermediate French (Pass)

*contact hours:* 2 lectures (literature 1, language 1), 2 tutorials (literature 1, language 1) and 1 hour in the language laboratory per week.

*content:* Training in the speaking and writing of French

including grammar exercises, comprehension, composition and translation, based on contemporary French material. A reading course based on a wide range of texts.

*assessment:* continuous assessment and an exam comprising 1 three hour language paper and an oral interview; reading course: tutorial papers and essays

#### **3440 French IIA: Language and Culture**

*level:* II    *points value:* 8    *duration:* full year

*prerequisites:* 2224 French IA: Beginners' French (Pass Div I); 8768 French IM: Intermediate French (Pass), 4242 French I (Pass Div II).

*restriction:* 4242 French I (Pass Div I) or 2224 French IA: Beginners' French (Pass Div II), 8768 French IM: Intermediate French (Credit)

*contact hours:* 2 lectures (language and literature), 3 tutorials (language) and 1 hour in language laboratory per week.

*content:* Consolidation of written language skills with exercises – composition, comprehension skills, translation – leading to essay writing. Reinforcement of oral/aural skills through intensive audio-visual based tutorials. A core subject on French culture and literature in common with French I.

*assessment:* continuous language assessment including written assignments, oral and written class tests, essays; language exam at the end of year

#### **3475 French Studies II (pre 1789)**

*level:* II    *points value:* 4    *duration:* semester 1

*prerequisites:* 4242 French I (Pass Division I); or 8768 French IM: Intermediate French (Credit) or 3440 French IIA: Language and Culture

*restriction:* not normally to be taken in same Calendar year as 3440 French IIA: Language and Culture.

*contact hours:* 1 lecture and 2 tutorials

*content:* Literary movements in France: an overview of the pre-revolutionary period.

*assessment:* tutorial papers and essays as required, oral interview

#### **5245 French Studies II (post 1789)**

*level:* II    *points value:* 4    *duration:* semester 2

*prerequisites:* 4242 French I (Pass Division I); or 8768 French IM: Intermediate French (Credit) or 3440 French IIA: Language and Culture

*restriction:* not normally to be taken in same Calendar year as 3440 French IIA: Language and Culture.

*contact hours:* 1 lecture and 2 tutorials

*content:* Literary movements in France: an overview of the post-revolutionary period.

*assessment:* tutorial papers and essays as required, oral interview

#### **4304 French III: Language and Culture**

*level:* III    *points value:* 12    *duration:* full year

*prerequisites:* 5691 French II or 3440 French IIA: Language and Culture

*restriction:* 3475 French Studies II (pre 1789) and 5245 French Studies II (post 1789) alone do not normally qualify for entry to 4304 French III: Language and Culture (special circumstances may be considered).

*contact hours:* 2 lectures (literature 1, language 1), 1 tutorial, 1 laboratory session per week

*content:* Advanced prose work (translation from English to French), written expression, stylistics, grammar exercises and translation from French to English. Comprehension exercises and dictations, using the Language Laboratory. Oral expression tutorials.

*assessment:* continuous assessment and an exam comprising 1 three hour language paper and an oral interview; reading course: tutorial papers, tests and essays as required

#### **2648 French Studies III S1**

*level:* III    *points value:* 6    *duration:* semester 1

*prerequisites:* 5691 French II or 3475 French Studies II (pre 1789) or 5245 French Studies II (post 1789) or 3440 French IIA: Language and Culture (Credit)

*contact hours:* 1 lecture and 2 tutorials a week

*content:* Core subject on critical approaches to literature

*assessment:* tutorial papers and essays as required

#### **6175 French Studies III S2**

*level:* III    *points value:* 6    *duration:* semester 2

*prerequisites:* 5691 French II or 3475 French Studies II (pre 1789) or 5245 French Studies II (post 1789) or 3440 French IIA: Language and Culture (Credit)

*contact hours:* 1 lecture and 2 tutorials a week

*content:* Core subject on French cinema studies.

*assessment:* tutorial papers, tests and essays as required.

## Honours Level

### 4360 Honours French Language and Culture

*level:* honours *points value:* 24 *duration:* full year

*note:* Students intending to take Honours should consult the Head of Department before the beginning of their studies at Level II. It is also possible to take a combined Honours degree, consisting of French and another subject. For this also, students should consult the Head of Department before the beginning of their Level II studies.

*prerequisites:* Honours students will normally be required (i) to take the courses 5691 French II or 3440 French IIA: Language and Culture, followed by 4304 French III; (ii) in addition, to complete 1 of the following units: 3475 French Studies II (pre 1789), 5245 French Studies II (post 1789), 2648 French Studies III S1, 6175 French Studies III S2 before entry to the Honours year; (iii) to devote their honours year entirely to advanced courses and exercises (including a 12,000 word thesis or equivalent additional coursework) in literature and language. However, the Department may vary the prerequisites in (ii) above where the applicant for Honours has demonstrated a high level of ability.

Before entering the final year of Honours, students must have qualified for the Ordinary degree of B.A., ie have passed in nine subjects or completed 72 points from the subjects offered by the Faculty of Arts, or for some other degree deemed by the Faculty to be sufficient preparation. To avoid completing more than nine subjects or 72 points in qualifying for entry to combined honours, students may arrange with the departments concerned to take appropriate combined subjects at Level II and Level III.

*note:* A joint Honours program is offered with the Department of French at Flinders University.

*content:* The Honours year content will consist of the following:

- 1 Language: Two hours per week will be devoted to advanced writing skills and oral/aural proficiency.
- 2 Cultural studies: (3 hours per week). For 1996, the semester 1 and 2 courses are those prescribed for French Studies III S1 and III S2, assessed at a higher level. Alternative courses of study may be offered on the Flinders campus. For the full range of courses, consult the departmental handbook. Students who choose not to prepare a thesis will be required to complete equivalent additional coursework.

*assessment:* Continuous assessment of language and cultural studies; and either a 12,000 word thesis in French or continuous assessment based on equivalent additional coursework.

The marks obtained for essays in both the third and fourth years may be considered with the final examination results in determining the student's classification.

## French Studies/German Studies

### 9891 Outsiders in 20th Century European Fiction II

*level:* II *points value:* 4 *duration:* semester 2

*prerequisites:* a pass in a Level I Arts subject

*restrictions:* enrolment in a French or German Level II or III subject in which the student has chosen this subject as an option

*contact hours:* 2 lectures and 1 tutorial per week

*content:* the theme of being an outsider is a major one in twentieth century European fiction and this subject aims to discuss some major texts which have outsiders as their focus. Such characters experience isolation, sometimes forced on them and sometimes willed by them. Family, community, society, law and the state may be involved in the process of isolation. Individuals may be outsiders by reason of such characteristics as their particular skills (or lack of them), their beliefs, memberships of a group, nationality, class, gender or race. Conflicts and experiences in the lives of fictional individuals in 20th century Europe are treated in fiction in ways that reflect and illuminate the experiences of many real people. For instance, the writings of such authors as Franz Kafka, Jaroslav Hasek, Thomas Mann, Albert Camus, Jean Paul Sartre, Simone de Beauvoir, Bunter Grass and Christa Wolf offer examples which can be discussed, analysed and enjoyed.

*assessment:* tutorial presentation (25%), a context examination (35%), and a long essay (40%).

### 8848 Outsiders in 20th Century European Fiction III

*level:* III *points value:* 6 *duration:* semester 2

*prerequisites:* a pass in a Level II Arts subject

*restrictions:* enrolment in a French or German Level II or III subject in which the student has chosen this subject as an option

*contact hours:* 2 lectures and 1 tutorial per week

*content:* as for 9891 above

*assessment:* tutorial presentation (25%), a context examination (35%), and a long essay (40%). Level III students would be required to write more and to perform at a higher level than Level II students.

## Geography

The Geography course structure concentrates on two broad and overlapping themes: the understanding of spatial patterns in society, and the interaction of human society with the natural environment. Each or both of these may be followed through a first, second and third level progression of subjects. A range of subjects, some taught in collaboration with the Department of Geology and Geophysics, and the Faculty of Agricultural and Natural Resource Sciences are available in some aspects of systematic physical geography.

As well as contributing to the students' general academic training, the Department also teaches a variety of practical skills appropriate to applied geographical analysis and useful in the workforce or further research (eg. field techniques, social survey methods, computer mapping, remote sensing). Hence many Geography subjects involve practicals and field work.

Students who wish to specialise in Geography for academic or vocational reasons, or who are considering Honours in Geography, are strongly advised to enrol for at least Geography I at Level I, and to include in their course structure, as appropriate, some or all of the following subjects which provide basic techniques, skills and concepts: at Level II, 5581 Geographical Analysis of Population II, 4166 Spatial Information Analysis II; and at Level III, 9923 Geographical Information Systems, 7198 Remote Sensing III(A).

The Department caters for students who wish to specialise in Geography at each level, and those (whether from Arts or from several other Faculties) who simply wish to select some Geography subjects for inclusion in their degrees. An interdisciplinary approach is characteristic of Geography, and students who wish to design a course structure to meet their particular needs will find that many Geography subjects fit well into a broadly based degree.

More detailed information about the Department and its courses, including guidance on the selection of suitable sequences, is given in the Departmental Handbook, available from the Geography Office.

### Level I

The full-year subject 6396 introduces both of the two main themes developed in the majority of the Department's Level II subjects, and gives the necessary grounding in concepts and techniques. For students whose interests are restricted to only one of these themes, the single-semester subjects 8215 People and Social Environments (first semester) and 9939 People and Physical Environments: (second semester) are provided. Together these two semester subjects equate exactly to 6396 People and Environments.

Grounding in aspects of systematic physical geography is provided in a further single-semester subject, 3482 Introduction to Physical Geography I (first semester). This may be taken either alone or together with any other Level I Geography subject. The student may take Level I geography subjects up to a maximum value of 9 points.

### 6396 People and Environments I

*level:* I      *points value:* 6      *duration:* full year

*restriction:* 8215 People and Social Environments; 9939 People and Physical Environments; 7613 Geography IA: Society and Space; 4823 Geography IB: Society and the Physical Environment; 9198 (or AJ1H) Physical Geography IH; 7636 (or AJ2H) Human Geography IH.

*contact hours:* 2 lectures and 3 hours of tutorials and practical work a week plus 2 days of field work

*content:* Semester 1: People and Social Environments - an introduction to the geographical study of a range of demographic, social and economic issues. Australia is the initial focus for examining the processes of population change, including fertility, mortality and migration. Elements of Australia's social environment are then addressed, particularly questions of equity and access to services, the spatial distribution of social phenomena and patterns of inequality. The next major section focuses on less developed countries, both in general and with case studies from Indonesia, to compare and contrast the population dynamics and social patterns observed in Australia. Issues raised relate to both rural and urban environments and include poverty, health, employment and the meaning of 'sustainable development'.

Semester 2: People and Physical Environments - emphasises the relationship between people and the physical environment in Australia. One theme concerns ecosystems and biodiversity and the changing impact of humans over time. A second broad area addresses the role of water in the environment, the nature of the resource, water quality and salinity problems. Climatic phenomena, climate change and atmospheric pollution are major topics, together with human impact on and adjustment to climatic processes. Current issues and management options in a number of areas are discussed, including forestry, national parks and arid environments.

*assessment:* coursework (50%), exams (50%)

### 8215 People and Social Environments

*level:* I      *points value:* 3      *duration:* semester 1

*restriction:* 7613 Geography IA: Society and Space; 7636 (or AJ2H) Human Geography IH; 9587 (or AJOI) Geography I

*contact hours:* 2 lectures and 3 hours of tutorials and practical work a week, plus 1 day of field work

*content:* Identical with that contained in the People and Social Environments segment of 6396 People and Environments I described above.

*assessment:* coursework (50%), exam (50%)

### **9939 People and Physical Environments**

*level:* I    *points value:* 3    *duration:* semester 2

*restrictions:* 6396 People and Environments; 9587 (or AJOI) Geography I; 4823 Geography IB: Society and the Physical Environment; 9198 (or AJIH) Physical Geography IH

*contact hours:* 2 lectures and 3 hours of tutorials and practical work a week, plus 1 day of field work

*content:* Identical with that contained in the People and Physical Environments segment of 6396 People and Environments I described above.

*assessment:* coursework (50%), exam (50%)

### **3482 Introduction to Physical Geography I**

*level:* I    *points value:* 3    *duration:* semester 1

*restriction:* 5683 Earth Science I

*contact hours:* 3 lectures, and equivalent of 3 hours of practical/tutorial/field work per week

*content:* This subject is concerned with the dynamics of the earth's crust, atmosphere, hydrosphere and biosphere; origin of Earth's major relief; evolution of landscapes; world climates; climatic influences on landscapes; climatic change over the last two million years; river systems, coastal zones and other erosional and depositional environments; soil variation and development; vegetation patterns; ecosystem processes. We emphasise the interaction and interrelationships of various facets of the Earth's surface through time. We are concerned to examine how the present landscapes and systems came into being. We consider that the natural world is fascinating on its own account, and that human impacts (eg. soil degradation, air and water pollution) are better understood if energy and time perspectives are clear.

*assessment:* 1 written exam plus essays, tutorial and practical exercises, and field excursion

## **Level II**

Six subjects are normally offered. Any combination of these subjects may be taken, and none is compulsory. Students wishing to specialise in the spatial patterns in society theme may take 5581 Geographical Analysis of Population II together with 8673 Economic Geography II and/or 9030 Social Geography II. Those interested in the human/environment interaction theme may enrol in

Physical and Biotic Environments II and/or Geography of Soil Resources II, while 4532 Australian Landscape Evolution (II(A)) provides an option in systematic physical geography 4166 Spatial Information Analysis II involves both major themes.

Students wishing to obtain the broadest available core of concepts, skills and techniques for Level III Geography and Honours work should combine 5581 Geographical Analysis of Population II and 5063 Physical and Biotic Environments II; while 4166 Spatial Information Analysis II adds further depth in analytical techniques.

For further guidance on choosing subject combinations, students are referred to the Geography Department Handbook.

The Department's policy on assessment is that examinations should account for not more than 60% and not less than 40% of marks, with coursework making up the balance. The exact proportions are decided by discussion with the class at the commencement of teaching.

### **4532 Australian Landscape Evolution II(A)**

*level:* II    *points value:* 4    *duration:* semester 2

*prerequisite:* Level 1 Geography subjects to the value of at least six points including 3482 Introduction to Physical Geography I

*restriction:* 9835 Landscape Evolution in Australia II; 7242 Australian Landscape Evolution IIIS; 7300 Evolution of Australian Landforms III

*contact hours:* 2 lectures, and equivalent of 3 hours practical work per week, plus field work

*content:* This subject is concerned with the development of the Australian land surface. Various models of landscape evolution are analysed and matched against the realities resulting from the interplay of internal and external forces through time. Various types of planation surface (epigene, etched, exhumed) are identified in the landscape, and the implications of the widely preserved Mesozoic, early Cainozoic and later Cainozoic surfaces and cycles are discussed. The viability of denudation chronology as a framework for geomorphological studies is examined, as is the significance of forms related to late Cainozoic climatic changes.

### **8673 Economic Geography II**

*level:* II    *points value:* 4    *duration:* semester 2

*prerequisites:* 9587 Geography I, or Level I Geography subjects to the value of at least six points; or their equivalent prior to 1989; or any other subject(s) approved by the Head of Department.

*contact hours:* 2 lectures and 2 hour tutorial/practical session a week

*content:* This subject is concerned with the forces and processes which influence the spatial organisation of economic activity. Though the space-economy is clearly an interacting system, the course proceeds from a consideration of the agricultural sector, to that of service activity, then to manufacturing. Lecture topics include: How farmers make decisions about what to grow and how to grow it; how government policy affects farmers; the problems of risk and uncertainty; the concept of economic rent and land use patterns; urbanisation of the countryside; where the jobs are - growth in importance of the service sector - consumer and producer services; the importance of the manufacturing sector and explanations for its regional growth or decline.

*assessment:* practical exercises, tutorial work, an essay, and a written examination.

### 5581 Geographical Analysis of Population II

*level:* II *points value:* 4 *duration:* semester 1

*prerequisites:* 9587 Geography I, or Level I Geography subjects to the value of at least six points including 7613 Geography IA: Society and Space; or their equivalent prior to 1989; or any other subject(s) approved by the Head of Department

*contact hours:* 2 lectures and one 2-hour practical or tutorial session per week, plus 3 days compulsory field work

*content:* The human population, its distribution and change constitutes one of the most basic of all geographical variables. This subject covers both static and dynamic aspects of population geography, from spatial and ecological perspectives, and considers the implications of population change for public policy. Static aspects include population distribution, density, and population/resource balance. The dynamic aspects include fertility and mortality over space and time, and the links between social, economic and demographic change. Particular emphasis is placed on migration as a spatial process, covering both migration theory and models, and empirical studies of migration impact, with particular reference to Australia.

The practical work is an important part of the course and covers introduction to computer handling of census and survey population data using package programs, field data collection using social survey techniques, hypothesis testing and report writing; and an introduction to population projection methods.

*assessment:* Field camp report, practical and tutorial exercises, written examination.

### 5262 Geography of Soil Resources II

*level:* II *points value:* 4 *duration:* semester 2

*prerequisites:* 9587 Geography I, or Level I Geography subjects to the value of at least 6 points including 4823 Geography IB: Society and the Physical Environment

*contact hours:* 2 lectures and a 2-hour laboratory or workshop session per week, 4 days compulsory fieldwork

*content:* This subject is taught jointly by the Departments of Geography and Soil Science. It seeks to give a basic understanding of the nature, formation and classification of soils, seen as the fundamental resource for agricultural/pastoral settlement and ultimately for human survival. The subject covers five main topics: the nature, formation and classification of soils; soil as a resource; farmer decision-making and sustainability of production systems; soil resource deterioration and destruction; diffusion of new soil management practices and barriers to innovation adoption. The subject provides a useful preparation for several Level III Geography subjects including Environment and Development in South East Asia III, Rural Social Geography III, Remote Sensing III(A), and Environmental Change III. Regional examples are taken from Australia and SE Asia.

*assessment:* laboratory exercises, field exercises, short essay and written examination.

### 5603 Physical and Biotic Environments II

*level:* II *points value:* 4 *duration:* semester 1

*prerequisites:* 9587 Geography I, or Level I Geography subjects to the value of at least 6 points including 3482 Introduction to Physical Geography I or 4823 Geography IB

*restriction:* 3502 Applied Physical Geography

*contact hours:* 2 lectures and 1 three hour practical per week, 5-7 days fieldwork

*content:* This subject provides an introduction to the role of water, soils, plants, and animals in explaining the environment around us. Accordingly, the themes addressed in this course include the operation of the water cycle, land-runoff interactions, erosion and sedimentation, water quality, groundwater processes, karst geomorphology, the coastal environment, properties of soils, the structure and dynamics of populations and ecosystems, environmental gradients, the adaptation of species to environments, and biological invasions. An overlying theme will be the role of humans in altering the natural environment. The material presented in lectures will be supported by compulsory weekly practical exercises and several field trips.

*assessment:* practical and field work reports, written examination.

**9030 Social Geography II***level:* II *points value:* 4*availability:* not offered in 1996*prerequisites:* 9587 Geography I, or Level I Geography subjects to the value of at least six points including Geography IA: Society and Space; or any other subject(s) approved by the Head of Department*restriction:* 3265 Social Geography*content:* This subject is concerned with the spatial patterns and processes that derive from the social organisation of human society. It examines the way human groups occupy territorial space, create and change settlement patterns, and evolve patterns of social interaction. It deals with the local impact of national and international forces on settlement and interaction systems. It considers the major settings of countryside and city, and the interaction between urban and rural, primarily in the context of Western societies.*assessment:* practical and tutorial assignments, one major essay, written examination**4166 Spatial Information Analysis II***level:* II *points value:* 4 *duration:* semester 2*prerequisites:* 9587 Geography I, or level I Geography subjects to the value of at least six points; or any other subject(s) approved by the Head of Department*contact hours:* 2 lectures, 1 tutorial and 2 hours of practical work per week*content:* This subject aims to provide a basic introduction to geographical research methods and techniques of spatial analysis. It is intended to provide a basic training in analytical methods for most level III subjects in geography and to act as an essential basis for most fields of study at Honours level. The content of the subject will involve an introduction to research design within the context of a multivariate geographical database. It will include consideration of the characteristics of geographical data, strategies for spatial sampling, methods of description and comparison of these data sets, the identification and measurement of their inter-relationships and the analysis of trends and patterns in the data. The practical component of the subject will involve both traditional and computer-based data handling.*assessment:* practical exercises, tutorial work, written examination.**Level III**

Entry to Level III Geography subjects normally requires Level II Geography subjects to the value of at least eight points. A maximum of ten Level III subjects is offered (not all are available in any one year). There is much overlap in philosophy and approach across the various Level III subjects, but broadly the three subjects Cities and Housing, Regional Development, and Rural Social Geography cluster in the spatial patterns in society theme, while Aboriginal Australia, Environmental Change, and Environment and Development in South East Asia represent the human/environment interaction theme. Two subjects Remote Sensing and Geographical Information Systems span equally over both themes. The subjects 5722 Structural Geomorphology III(A) or 7300 Australian Landscape Evolution III(A) provide options in systematic physical geography.

The Department's policy on assessment is that examinations should account for not more than 60% and not less than 40% of marks, with coursework making up the balance. The exact proportions are decided by discussion with the class at the commencement of teaching.

**4840 Aboriginal Australia III***level:* III *points value:* 6 *duration:* semester 2*prerequisites:* Level II Geography subjects to the value of at least eight points; or their equivalent before 1989 (9509 Geography IIA, 9671 Geography IIB, or their equivalent half-subjects); or any other subject(s) approved by the Head of Department*contact hours:* 2 lectures and 1 hour of tutorial/practical work a week, plus 1 week of field work*content:* The aim of this course is to provide some understanding of the Aboriginal situation through geography's spatial perspective. The subject attempts a reconstruction of traditional Aboriginal geographic, demographic and social patterns and then explores the disruption and transformation of these following contact and interaction with non-Aboriginal influences. Processes in the social and geographical dislocation of communities and their spatial relocation through both forced and voluntary migration are studied, along with the various policies and practices that influenced governments' treatment of Aboriginal people. Conflicts and accommodations are discussed in relation to present day issues such as land rights, self determination, community development and political activity.*assessment:* 1 field work or practical report; 2 tutorial papers; 1 exam

### **7300 Australian Landscape Evolution III(A)**

level: III *points value:* 6

*availability:* not offered in 1996

*prerequisite:* 4556 Structural Geomorphology IIA

*restriction:* 9835 Landscape Evolution in Australia II; 7242 Australian Landscape Evolution IIIS; 7300 Evolution of Australian Landforms III

*contact hours:* 2 lectures, and equivalent of 3 hours practical work per week, plus field work

*content:* This subject is concerned with the development of the Australian land surface. Various models of landscape evolution are analysed and matched against the realities resulting from the interplay of internal and external forces through time. Various types of planation surface (epigene, etched, exhumed) are identified in the landscape, and the implications of the widely preserved Mesozoic, early Cainozoic and later Cainozoic surfaces and cycles are discussed. The viability of denudation chronology as a framework for geomorphological studies is examined, as is the significance of forms related to late Cainozoic climatic changes.

*assessment:* written exam, essays, tutorial papers, practical exercises, field work

### **6159 Cities and Housing III**

level: III *points value:* 6 *duration:* semester 1

*prerequisites:* Level II Geography subjects to the value of at least eight points; or their equivalent before 1989 (9509 Geography IIA, 9671 Geography IIB, or their equivalent half-subjects); or any other subject(s) approved by the Head of Department

*restriction:* 8388 Equity in Cities: A Comparative Perspective

*assumed knowledge:* 8673 Economic Geography II; or 9030 Social Geography II; or 5581 Geographical Analysis of Population II

*contact hours:* 2 lectures and 1 hour of tutorial/practical work a week plus 5 days field work

*content:* This subject studies the role of economic restructuring in transforming urban space in a range of western cities (Australian, North American, British, and European). Key features of labour and housing markets, and the provision of services in cities are also examined; and relevant aspects of urban and housing policy are treated in an introductory way. Themes include the characterisation of structural change and how that is reshaping urban regions viz. deindustrialisation, 'flexible' production systems, the global integration of capital, the new international division of labour. The effects of these processes within the built environment are variously reflected in the decline of inner area manufacturing, the rise of

'post-Fordist' processing zones and 'first order' centres of international finance, downtown devitalisation, gentrification and displacement, the formation of new consumption landscapes.

The geography of housing is examined at some length including the residential property market and differences between the public and private sectors, rental tenure and owner-occupation. Government policy with respect to housing, infrastructure, and service provision within cities forms a related theme. There will be case studies of inter city policy, the Urban Aid Program, and the treatment of 'housing stress' in the UK; HUD assisted programs in the US; national urban policy in the Netherlands; urban consolidation and Better Cities in Australia.

*assessment:* essay or project, tutorial participation, and exam

### **1514 Environment and Development in South East Asia III**

level: III *points value:* 6 *duration:* semester 2

*prerequisites:* Level II Geography subjects to the value of at least eight points; or their equivalent prior to 1989 (9509 Geography IIA, 9671 Geography IIB, or their equivalent half-subjects); or any other subject(s) approved by the Head of Department

*assumed knowledge:* 9587 Geography I, or equivalent

*contact hours:* 2 lectures and 1 hour of tutorials a week. Non-compulsory field work in Indonesia may be taken dependant on resources.

*content:* The subject examines aspects of the physical and human environments of insular and mainland Southeast Asia, noting both historical patterns of change and current ecological and social issues. While the emphasis is on the present, the modern situation will be placed in context through an exploration of its historical roots. Major topics will include: assessing Southeast Asian environments-tools and techniques; the great age of clearance in Southeast Asia; access to and management of forest resources; land degradation and changes in upland and lowland agriculture; population growth, migration and colonisation; urban and industrial environments; the nature and measurement of development; Australia and Southeast Asia.

*assessment:* tutorial papers, essay or field report, examination.

### **6177 Environmental Change III**

level: III *points value:* 6 *duration:* semester 2

*prerequisites:* Level II Geography subjects to the value of at least 8 points including 5603 Physical and Biotic Environments II; or any other subject(s) approved by the Head of Department

*contact hours:* two lectures, 3 hours of seminar or practical work a week, and seven days fieldwork

*content:* The theme of this subject is the non-static nature of the environment. Factors which have contributed to the shaping of the present environment are explored, including geological, climatic and anthropogenic factors. The interaction of humans with the environment will be addressed at a global scale and changes in geomorphology, climate and atmosphere, hydrology, soils, vegetation and fauna will be examined. Environmental changes which have taken place in Australia over the last two centuries will be explored via a number of case studies of the arid region, temperate lands, the coastal zone, forested areas and the alpine region.

*assessment:* seminar and practical exercises, one essay, field work report, and examination.

### 9923 Geographical Information Systems III

*level:* III *points value:* 6 *duration:* semester 1

*prerequisites:* Level II Geography subjects to the value of at least eight points preferably including 5581 Geographical Analysis of Population II; or their equivalent prior to 1989 (9509 Geography IIA, 9671 Geography IIB, or their equivalent half-subjects); or any other subject(s) approved by the Head of Department

*contact hours:* 2 lectures and 3 hours of practical work a week

*content:* Geographical information systems are essentially computer data banks containing spatially located information about human and natural aspects of the earth's surface, together with the facility to manipulate and analyse these data.

The subject aims to introduce students to the concepts and theory implicit in geographical information systems, and to the practical use of such systems with the aid of computers. It deals with the problems involved in the construction and use of large geographic databases, including measurement, and the retrieval and analysis of spatial data. It deals also with the representation of graphic and cartographic data as the main means of communicating spatial relationships, including the study of the logic involved in such communication. The practical work teaches basic skills in handling the contents of geographical information systems with the use of computers. This includes means of establishing a spatial database, retrieving and analysing such data and producing literary, graphic and cartographic output.

*assessment:* coursework and written examination.

### 1150 Regional Development III

*level:* III *points value:* 6 *duration:* semester 1

*prerequisites:* Level II Geography subjects to the value of at least eight points; or their equivalent prior to 1989 (9509 Geography IIA, 9671 Geography IIB, or their equivalent half-subjects); or any other subject(s) approved by the Head of Department

*restriction:* 4030 Economic Geography III; 2951 Regional Economic Analysis and Development

*contact hours:* 2 lectures and 2 hour tutorial/practical work per week

Field work to be determined.

*content:* This subject is concerned with the nature and processes of regional development, and thus with the problems of restructuring, uneven development and spatial inequality. Variation in economic welfare will be of central concern. However, not all aspects of the 'good life' are dependent upon economic 'progress' and perhaps some are inversely related. Topics to be covered include: the nature of regions; the relationship between economic growth and development; sustainable development; the nature of regional problems and problem regions; explanation for regional development and uneven development; stage models; the role of technology in regional development; orthodox regional equilibrium theory; dualism; linkages economic base, input-output, cumulative causation, centre-periphery, growth poles; critiques of orthodox equilibrium theory; dependency; the rise of flexible production systems and the emergence of new industrial regions.

*assessment:* coursework and written examination.

### 7198 Remote Sensing III(A)

*level:* III *points value:* 6 *duration:* semester 2

*prerequisites:* Level II Geography subjects to the value of at least eight points (preferably including 5603 Physical and Biotic Environments); or their equivalent prior to 1989 (9509 Geography IIA, 9671 Geography IIB, or their equivalent half-subjects); or any other subject(s) approved by the Head of Department

*restriction:* 4962 Remote Sensing Techniques

*contact hours:* 2 lectures, and 3 hours of practical/tutorial work a week, plus 4 days of field work

*content:* Remote Sensing is concerned with interpretation of detailed information about the earth's surface gathered by space and airborne platforms using various scanning systems. This subject examines both the principles and applications of remote sensing. The principles of remote sensing include the interaction of electromagnetic radiation with the Earth's surface and

the measurement of this radiation by a range of sensors. The subject focuses on the spectral aspects of earth objects: rocks, soils, vegetation and water and the way spectral data can be used to identify and characterise those objects and monitor changes over time. This data base is relevant to geological, botanical and soil-science inventorisation and environmental science. Information is extracted using digital image processing which includes correction, enhancement and classification of the digital data. (Workshops are used to give 'hands-on' experience with the basics of digital image processing and application to specific projects.) Applications of remote sensing to geological mapping and oil pollution will be discussed.

Additional applications of remote sensing to geographic studies and environmental science including mapping and monitoring of the atmosphere, the ocean, rangelands, agricultural regions, wilderness, forestry and water resources will be discussed.

*assessment:* coursework and examination.

### 1453 Rural Social Geography III

*level:* III *points value:* 6 *duration:* semester 2

*prerequisites:* Level II Geography subjects to the value of at least eight points; or their equivalent prior to 1989 (9509 Geography IIA, 9671 Geography IIB, or their equivalent half-subjects); or any other subject(s) approved by the Head of Department

*restriction:* 7068 Rural Social Geography in 1988 or earlier

*assumed knowledge:* 5581 Geographical Analysis of Population II or 3265 Social Geography II

*contact hours:* 2 lectures and 2 hours of tutorial/practical work a week plus 5 days of compulsory fieldwork in the mid-semester break.\*

*content:* The subject is concerned with spatial aspects of rural society in Western countries, and the way this society is adjusting to the profound technological and socio-economic changes taking place in rural areas. The major focus is on rural communities and local social networks (identification, mapping, processes and effects of change, and community-related rural problems and planning measures). Some major problems covered include rural demographic change, accessibility, mobility, rural poverty, the changing role of rural women, rural settlement planning policies and readjustment of rural society to economic crises. Land use and agricultural change receive attention as background variables, but most attention is devoted to rural people rather than farming systems. The course emphasises practical and applied work, and a field camp is held in the mid-semester break.

*assessment:* field camp report, tutorial work, examination.

\* Students unable to attend the field camp should not enrol in this subject

### 5722 Structural Geomorphology III(A)

*level:* III *points value:* 6 *duration:* semester 1

*prerequisites:* Level II Geography subjects to the value of at least 8 points; or their equivalent before 1989 (9509 Geography IIA, 9671 Geography IIB or their equivalent half subjects); or any other subjects approved by the Head of Department

*restriction:* 8159 Landforms and Geology IIS; 6722 Structural Geomorphology IIIS

*contact hours:* 2 lectures, and equivalent of 3 hours practical work per week, plus fieldwork

*content:* The form of the land surface varies with the structure of the underlying crust, with the processes responsible for shaping the surface and with variations in structure and process in time. This subject is concerned primarily with the first of these variables. Topics considered include the earth's major relief, volcanoes, and the effects of joints, faults, folds and rock type on landform development. Examples are taken from a global canvas but particular attention is devoted to the Mount Lofty Ranges, the Flinders Ranges and Eyre Peninsula, each of which not only illustrates aspects of structural geomorphology but also offers opportunities for considering the total development of landforms and the methods used to analyse and explain geomorphological problems.

*assessment:* written exam, essays and tutorial papers, practical exercises, field work, and possibly a *viva voce* examination.

## Honours Level

---

### 3178 Honours Geography

*level:* honours *points value:* 24 *duration:* full year

*prerequisites:* Normally Level III Geography subjects to the value of at least 12 points, with a credit or above in at least two Level III subjects, will be expected. Admission to the program is not automatic, and is subject to approval by the Head

*content:* The subject consists of three parts. First there is a core topic in methodology which is compulsory. Second, students are expected to select two elective topics. Details of the Honours electives available in 1996 will be found in the Handbook. Third, all students must undertake a thesis on an approved topic.

*assessment:* thesis (60%), coursework (40%). The actual method of assessment within each course will be decided after discussion with the students concerned.

## German Studies

More detailed information on course aims and the options available may be found in the Departmental Handbook. Students are requested to collect their copy of the year's Departmental Handbook from the Secretary's office.

Students may be required to attend tutorials at times additional to those published in the calendar.

Students may wish to supplement their academic course—work by joining the German Students' Club, the Adelaide German Club, the Goethe Society, and by additional independent work in the Language Laboratory.

*assessment:* Grades of Pass, Credit, Distinction and High Distinction are awarded to students on satisfactory performance in both language and literature/culture sections of their courses and a reasonable balance of achievement in these different fields is required. Literature and other cultural/background topics are assessed largely on the basis of essays on topics of the student's own, guided choice and to a lesser extent by written tests. Language is assessed by weekly exercises and term tests. Essays and term tests that have been failed can usually be redeemed according to guidelines set out in detail in the Departmental Handbook.

*note:* Evening classes (in addition to day classes) are offered in German I, II and III in 3-yearly cycles as staff and student numbers allow. In 1996 German III will be offered in the day and the evening.

All courses are offered only as staff and student numbers allow.

### Level I

#### 8431 German I

*level:* I     *points value:* 6     *duration:* full year

*restriction:* 5723 German IA: Beginners' German

*assumed knowledge:* at least Year 11 German in SA schools or its equivalent

*contact hours:* 3 lectures and 2 tutorials a week

*content:* The aim of German I is to introduce students to the life and language of German-speaking countries, to make them more skilled at speaking and writing the language and more informed about contemporary German culture. In the first semester all students will take the course: Germany, Austria and Switzerland from 1945 to 1996. Four out of five hours are devoted to practical language instruction in formal language classes and small tutorial groups. In both semesters students will be required to participate in two continuous tutorial hours of Intensive Conversation. In second semester all students will do the course

Introduction to German Cultural Studies: Media, Literature, Film. Students with outstanding qualifications in language may, with the permission of the Department, take the language components of the course at a more advanced level. Further information on subject content can be obtained from the Department of German Studies.

*assessment:* Language: weekly exercises, end of semester tests, tutorial participation. Other: essays and, where appropriate, end of semester tests or working papers. All grades of pass require a reasonable balance of achievement in all areas of the course.

#### 5723 German IA: Beginner's German

*level:* I     *points value:* 6     *duration:* full year

*restriction:* 8431 German I; 1316 German for Reading and Research I; except with departmental permission: South Australian Matriculation in German or its equivalent

*contact hours:* 6 hours of lectures a week in semester 1, 5 hours of lectures and 1 tutorial in semester 2

*content:* With no previous knowledge of German assumed, special emphasis will be placed on speaking and comprehension, then on reading, writing and grammar. It is expected that each student will spend at least two hours of private study in the language Laboratory each week, reviewing work done in class and preparing lessons. Aspects of German culture will be a component of language instruction throughout the year. Literature will be introduced at the beginning of the second semester. This involves one lecture in English per week and a weekly tutorial in German. Successful completion of this course with a Division 1 pass admits students to 1214 German IIA, from which they may proceed to all third year course in German.

*assessment:* regular and frequent written exercises, end of semester tests and tutorial participation.

#### 5396 German I (Flinders) Part 1

*level:* 1     *duration:* semester 1

*points value:* 4.5 units towards Flinders University Courses

*restrictions:* 8431 German I; 6806 German I (Flinders)

*assumed knowledge:* at least Year 11 German in SA schools or its equivalent

*contact hours:* 3 lectures and 2 tutorials per week

*content:* This subject is offered to students enrolled in courses at Flinders University of South Australia only; it is taught on the Flinders University campus. For information on enrolment procedures, students should contact the Faculty of Arts office of The University of Adelaide or the School of Humanities at Flinders University. Information on the subject content can be obtained from the Department of German Studies.

**9815 German I (Flinders) Part 2**

*level:* I *duration:* semester 2

*points value:* 4.5 towards Flinders University Courses

*prerequisites:* a grade of PI or better in 5396 German I (Flinders) Part I or its equivalent

*restrictions:* 8431 German I; 6806 German I (Flinders)

*contact hours:* 3 lectures and 2 tutorials per week

*content:* This subject is offered to students enrolled in courses at Flinders University of South Australia only; it is taught on the Flinders University campus. For information on enrolment procedures, students should contact the Faculty of Arts office of The University of Adelaide or the School of Humanities at Flinders University. Information on the subject content can be obtained from the Department of German Studies.

**1051 Beginners' German IA (Flinders) Part I**

*level:* I *duration:* semester 1

*points value:* 4.5 units towards Flinders University Courses

*restriction:* 5723 German IA; 4698 Beginners German IA

*contact hours:* 5 hours of lectures per week

*content:* This subject is offered to students enrolled in courses at Flinders University of South Australia only; it is taught on the Flinders University campus. For information on enrolment procedures, students should contact the Faculty of Arts office of The University of Adelaide or the School of Humanities at Flinders University. Information on the subject content can be obtained from the Department of German Studies.

**8952 Beginners' German IA (Flinders) Part 2**

*level:* I *duration:* semester 2

*points value:* 4.5 units towards Flinders University Courses

*restriction:* 5723 German IA; 4698 Beginners German IA

*contact hours:* 5 hours of lectures per week

*content:* This subject is offered to students enrolled in courses at Flinders University of South Australia only; it is taught on the Flinders University campus. For information on enrolment procedures, students should contact the Faculty of Arts office of The University of Adelaide or the School of Humanities at Flinders University. Information on the subject content can be obtained from the Department of German Studies.

**Level II**

**8706 German II: Language, Literature and Culture**

*level:* II *points value:* 8 *duration:* full year

*prerequisites:* 8431 German I (Pass Div I); 5723 German IA: Beginner's German (Pass Div I)

*restriction:* 1214 German IIA; no part of this subject may be counted toward any other subject in the German Department.

*contact hours:* 3 lectures and 1 tutorial a week

*content:* Like all subjects in German at second and third year level, this subject offers a balance between practical language instruction and studying the social, literary and political culture of German-speaking countries in the past and present, with particular emphasis on the last 250 years, from the eighteenth century Enlightenment to the present. Language instruction consists of one formal hour per week, one weekly tutorial in small groups and, in both semesters, students are required to participate in one session of two continuous hours of Intensive Conversation. In Semester 1, all students will take the Core Course: Studies in German Literature and Cultural Background 1750-1848. In Semester 2, all students will choose one of the following options: (1) Three Critics of West German Society 1949-1996: Böll, Grass, Enzensberger; (2) The GDR - Forty Years of Socialist German Culture; (3) Alexander von Humboldt: Travels in South America.

Students with outstanding qualifications in language may, with the permission of the Department, take the language components of the course at a more advanced level.

*assessment:* Language: weekly exercises, end of semester tests, tutorial participation. Other: essays and, where appropriate, end of semester tests. All grades of pass require a reasonable balance of achievement in all areas of the course.

**1214 German IIA: Language, Literature and Culture**

*level:* II *points value:* 8 *duration:* full year

*prerequisites:* 5723 German IA: Beginners' German (Pass Div I)

*restriction:* 8706 German II; no part of this subject may be counted toward any other subject in the German Department.

*contact hours:* 3 lectures and 2 tutorials a week

*content:* German IIA offers a balance between practical language instruction and teaching a critical appreciation of literature, culture and society in

German-speaking countries. German IIA students will do the 'background' course and options and language classes with German I, but they will have one tutorial specific to their needs.

Language instruction consists of two formal hours per week, two weekly tutorials in small groups, and, in both semesters, students are required to participate in one session of two continuous hours of Intensive Conversation.

*assessment:* Language: weekly exercises, semester tests, tutorial participation. Other: essays and, where appropriate, end of semester tests or working papers. All grades of pass require a reasonable balance of achievement in all areas of the course.

### 1245 German IIB: Language, Literature and Culture

*level:* II      *points value:* 8      *duration:* full year

*prerequisites:* 8431 German I (Pass Div I) or 5723 German IA (Pass Div I)

*restriction:* No part of this subject may be counted toward any other subject in the German Department.

*contact hours:* 3 lectures and 1 tutorial a week

*content:* Like all subjects in German at second and third year level, German II offers a balance between practical language instruction and studying the social, literary and political culture of German-speaking countries in the past and present, with particular emphasis on the last 250 years, from the eighteenth century Enlightenment to the present. Options are available on a three-yearly cycle, so apart from the those being offered in 1996, you will, in future years, have the opportunity to choose options dealing with such topics as childhood in literature, film and television, medieval studies and language-oriented topics such as teaching methodology for German, history of the German language and stylistics. Language instruction consists of one formal hour per week, one weekly tutorial in a small group and, in both semesters, students are required to participate in one session of two continuous hours of Intensive Conversation. In semester 1, all students will choose one of the two options: (1) German Culture in Eastern Europe in the 18th Century: The Example of Königsberg; (2) An option offered by the new lecturer. For semester 2, all students will choose one of the following options: (1) Three Critics of West German Society 1949-1996: Böll, Grass, Enzensberger; (2) The GDR - Forty Years of Socialist German Culture; (3) Alexander von Humboldt: Travels in South America.

Students with outstanding qualifications in language may, with the permission of the Department, take the language components of the course at a more advanced level.

*assessment:* Language: weekly exercises, end of semester tests, tutorial participation. Other: essays and, where appropriate, end of semester tests or working papers. All grades of pass require a reasonable balance of achievement in all areas of the course.

### 7831 German II (Flinders) Part 1

*level:* II      *duration:* semester 1

*points value:* 6 units towards Flinders University courses

*prerequisites:* a grade of PI or better in 9815 German I (Flinders) Part 2 or its equivalent

*restriction:* 8706 German II; 1214 German IIA

*contact hours:* 3 lectures and 1 tutorial per week

*content:* This subject is offered to students enrolled in courses at Flinders University of South Australia only; it is taught on the Flinders University campus. For information on enrolment procedures, students should contact the Faculty of Arts office of The University of Adelaide or the School of Humanities at Flinders University. Information on the subject content can be obtained from the Department of German Studies.

### 7586 German II (Flinders) Part 2

*level:* II      *duration:* semester 2

*points value:* 6 units towards Flinders University courses

*prerequisites:* a grade of P or better in 7831 German II (Flinders) Part 1 or its equivalent

*restriction:* 8706 German II; 1214 German IIA

*contact hours:* 3 lectures and 1 tutorial per week

*content:* This subject is offered to students enrolled in courses at Flinders University of South Australia only; it is taught on the Flinders University campus. For information on enrolment procedures, students should contact the Faculty of Arts office of The University of Adelaide or the School of Humanities at Flinders University. Information on the subject content can be obtained from the Department of German Studies.

## Level III

### 8877 German III: Language, Literature and Culture

*level:* III      *points value:* 12      *duration:* full year

*prerequisites:* 8706 German II or 1214 German IIA or 1245 German IIB

*restriction:* No part of this subject may be counted toward any other subject in the German Department.

*contact hours:* 3 lectures and 1 tutorial a week

*content:* Like all subjects in German at second and third year level, German II offers a balance between practical language instruction and studying the social, literary and political culture of German-speaking countries in the past and present, with particular emphasis on the last 250 years, from the eighteenth century Enlightenment to the present. Options are available on a three-yearly cycle, so apart from the those being offered in 1996, you will, in future years, have the opportunity to choose options dealing with such topics as childhood in literature, film and television, medieval studies and language-oriented topics such as teaching methodology for German, history of the German language and stylistics. Language instruction consists of one formal hour per week, one weekly tutorial in small groups and, in both semesters, students are required to participate in one session of two continuous hours of Intensive Conversation.

In semester 1, all students will take the core subject: Studies in German Literature and Cultural Background 1750-1848. For semester 2, all students will choose one of the following options: (1) Three Critics of West German Society 1949-1996: Böll, Grass, Enzensberger; (2) The GDR - Forty Years of Socialist German Culture; (3) Alexander von Humboldt: Travels in South America.

*assessment:* Language: weekly exercises, end of semester tests, tutorial participation. Other: essays and, where appropriate, end of semester tests or working papers. Where students in German III take subject components also available to second year students, an appropriately higher level of achievement is required and additional work must be completed.

### **2572 German IIIA: Language, Literature and Culture**

*level:* III    *points value:* 6    *duration:* full year

*prerequisites:* 1214 German IIA

*restriction:* 8706 German II; 1245 German IIB; 8877 German III; German IIB

No part of this subject may be counted towards any other subject in the German Department.

*contact hours:* 3 lectures and 1 tutorial per week

*content:* This subject follows on from 1214 German IIA. Students will do the language section of the subject with German II and the core subject and options with German III. Language instruction consists of one formal hour per week, one weekly tutorial in small groups and, in both semesters, students are required to participate in one session of two continuous hours of intensive conversation. In semester 1, students will take the core subject: Studies in German Literature

and Cultural Background 1750-1848. In semester 2, students will choose one of the following options: (1) Three Critics of West German Society 1949-1996: Böll, Grass, Enzensberger; (2) The GDR - Forty Years of Socialist German Culture; (3) Alexander von Humboldt: Travels in South America.

*assessment:* Language: regular written exercises, end of semester tests, tutorial participation. Other: essays and/or end of semester tests or working papers. All grades of pass require a reasonable balance of achievement in all aspects of the course.

### **4959 German IIIB: Language, Literature and Culture**

*level:* III    *points value:* 12    *duration:* full year

*prerequisites:* 8706 German II or 1214 German IIA or 1245 German IIB

*restriction:* No part of this subject may be counted toward any other subject in the German Department.

*contact hours:* 3 lectures and 1 tutorial a week

*content:* Like all subjects in German at second and third year level, this subject offers a balance between practical language instruction and studying the social, literary and political culture of German-speaking countries in the past and present, with particular emphasis on the last 250 years, from the eighteenth century Enlightenment to the present. Language instruction consists of one formal hour per week, one weekly tutorial in small groups and, in both semesters, students are required to participate in one session of two continuous hours of Intensive Conversation. In Semester 1, all students will choose one of the two options: (1) German Culture in Eastern Europe in the 18th Century: The Example of Königsberg; (2) Studies in Austrian Literature. In semester 2, all students will choose one of the following options: (1) Three Critics of West German Society 1949-1996: Böll, Grass, Enzensberger; (2) The GDR - Forty Years of Socialist German Culture; (3) Alexander von Humboldt: Travels in South America.

*assessment:* Language: weekly exercises, end of semester tests, tutorial participation. Other: essays and, where appropriate, end of semester tests or working papers. All grades of pass require a reasonable balance of achievement in all areas of the course. Where students in German IIIB take course components also available to second year students, an appropriately higher level of achievement is required and additional work must be completed.

**5977 German III (Flinders) Part 1**

*level:* III *duration:* semester 1  
*points value:* 6 units towards Flinders University courses

*prerequisites:* a grade of P or better in 7586 German II (Flinders) Part II or its equivalent

*restriction:* 8877 German III; 2572 German IIIA

*contact hours:* 3 lectures and 1 tutorial per week

*content:* This subject is offered to students enrolled in courses at Flinders University of South Australia only; it is taught on the Flinders University campus. For information on enrolment procedures, students should contact the Faculty of Arts office of The University of Adelaide or the School of Humanities at Flinders University. Information

**1665 German III (Flinders) Part 2**

*level:* III *duration:* semester 2  
*points value:* 6 units towards Flinders University courses *prerequisites:* a grade of P or better in 5977 German III (Flinders) Part I or its equivalent

*restriction:* 8877 German III; 2572 German IIIA

*contact hours:* 3 lectures and 1 tutorial per week

*content:* This subject is offered to students enrolled in courses at Flinders University of South Australia only; it is taught on the Flinders University campus. For information on enrolment procedures, students should contact the Faculty of Arts office of The University of Adelaide or the School of Humanities at Flinders University. Information

---

**Honours Level**

---

**1261 Honours German Language and Literature**

*level:* honours *points value:* 24 *duration:* full year

*note:* Students may obtain the permission of the Faculty of Arts to combine German with another subject for the Honours degree. They should consult the Honours Coordinator as soon as possible, so that a suitably modified course can be arranged. Where the

subjects taken for the Ordinary degree of B.A. need to be chosen to satisfy the prerequisites of more than one Department, a student may arrange with the Departments to take appropriate combined subjects, so as to avoid doing more than nine (or 72 points) subjects to qualify for entry to combined honours.

*prerequisites:* Before entering the final Honours year, candidates for the Honours degree in German must have qualified for the Ordinary degree of B.A., or some other degree deemed by the Faculty to be sufficient preparation, and should normally have passed 8431 German I or 5723 German IA; 8706 German II or 1214 German IIA; 1245 German IIB, 8877 German III, and 4959 German IIIB, or equivalent, at appropriately high standard. However, the Department reserves the right to vary these prerequisites where it is satisfied as to the academic merit of an applicant. Note that the prerequisite concerning second- and third-year subjects may be fulfilled by taking approved combined subjects which include parts of these. See Schedules—Degree of B.A. Schedule III: The Honours Degree.

*requirements:* During the final year, students will write a dissertation on some aspect of German Studies. Choice of subject should be made not later than the middle of the second semester in the preceding year. Students must also attend advanced courses in language, together with two options. Both thesis topics and options should be chosen in consultation with the Honours Coordinator.

**History**

For full information on History subjects, methods of assessment and teaching arrangements, students should obtain a copy of the History Department handbook. This can be obtained from the History Office.

Details of the subjects listed below may be subject to changes up to the enrolment period, depending on the availability of staff and resources.

---

**Level I**

---

**7695 Australian History I**

*level:* I *points value:* 6 *duration:* full year

*contact hours:* 3 hours per week or equivalent

*content:* The subject surveys Australia from pre-European times until the present with an emphasis on social history, and some attention to South Australia. The subject offers a sustained argument about the interaction between tradition and environment and how Australians came to be as they are. It emphasises research skills and the use of primary sources.

*assessment:* 2 short essays (total 30%), 1 long essay based on primary sources (40%), 2 tutorial presentations (total 30%)

### **7071 Colonial Australia I**

*level:* I *points value:* 3

*availability:* not offered in 1996

*contact hours:* 2 lectures and 1 tutorial a week

*content:* This subject examines Australian history to 1900 by a detailed study of five specific themes based on the texts listed below.

*assessment:* There are no long essays in this subject. Two thirds of the final mark will be based on written tutorial papers and the remaining third on a three hour examination at the end of the semester.

### **4378 Europe: Medieval and Renaissance I**

*level:* I *points value:* 3 *duration:* semester 1

*contact hours:* 3 hours of lectures and tutorials per week

*content:* A study of the major political, social, economic, religious and cultural developments of the High Middle Ages and the Renaissance.

*assessment:* 1 x 2000 word essay (50%) and 1 x 3 hour exam (50%); compulsory attendance and participation at tutorials

### **1668 Europe: Reformation to Revolution I**

*level:* I *points value:* 3 *duration:* semester 2

*contact hours:* 3 hours of lectures and tutorials per week

*content:* A chronological and thematic survey of Western Europe from the period of the Northern Renaissance to the French Revolution. Topics and themes to be considered in detail will include the Reformation and Counter Reformation, the spread of Protestantism, the political and social impact of the Reformation, The Wars of Religion in France, the Thirty Years' War, the emergence of the nation states, the development of the great powers, the Enlightenment, the collapse of the old order.

*assessment:* 1 x 2000 word essay (50%) and 1 x 3 hour exam (50%)

### **8534 Problems and Perspectives in Modern European History I**

*level:* I *points value:* 6 *duration:* full year

*restriction:* 5511 Problems and Perspectives in Modern European History prior to 1989

*contact hours:* 3 hours per week or equivalent

*content:* An analysis of the past 250 years of European history is essential in order to understand the political, social and economic changes which are taking place around us. The creation of a truly free market within the European Economic Community in 1992, the reunification of Germany in 1990, the collapse of communism in Eastern Europe in 1989 and in the Soviet Union in 1991 can best be understood by seeing these events in the context of European history and as a continuation of powerful forces of change which were set in motion by the French Revolution, industrialisation, the two World Wars and the impact of ideas about liberty, democracy, and nationalism.

The subject will deal with a number of topics from the Enlightenment up to the post-war period including: the American Revolution and the French Revolution and their impacts, the Napoleonic Empire, the Revolution of 1848, the Franco-Prussian War and the unification of Germany, the First World War, the Russian Revolutions of 1917, the Great Depression and the rise of Hitler, the Second World War, the Cold War and the division of Europe in the post-war period. In addition to the regular lectures and tutorials there will be 'workshop lectures' in essay writing and research skills.

*assessment:* assessment is based upon satisfactory tutorial attendance and participation, tutorial papers, an essay, and an end-of-year examination.

### **6675 The Renaissance, 1350–1500 I**

*level:* I *points value:* 3

*availability:* not offered in 1996

*restriction:* 8257 Europe in Transition 1350–1700 in 1989; 6050 Europe in Transition or H101 Renaissance, Reformation and Revolution 1350–1650 prior to 1989

*content:* A study of the major political, social, economic, religious and cultural developments of the Renaissance. The subject begins with a brief survey of medieval society.

*assessment:* essay and exam

### **5374 The Twentieth Century: Asia, America and Australasia**

*level:* I *points value:* 6

*availability:* not offered in 1996

*contact hours:* 3 hours per week

*content:* This subject builds upon a student's general knowledge of Europe and Australia to account for the shifting centre of world power to the Asia Pacific region in the twentieth century. It deals broadly with the struggle for hegemony in the Pacific region, and its themes range over war and responses to it in Asia, Australia and America, migration and ethnic and racial

conflict, comparative social development and the emergence of industrialised states. Specific topics will deal, for example, with the emergence of the United States as a world power, racial exclusivity in Australia and America, the rise of Japan and the road to Pearl Harbour, the Vietnam War in its Australian and American context and the East Asian 'economic miracle'. In so doing, 20th Century Inc. provides an introduction to a wide variety of subjects offered throughout the Faculty at Level II and III in the areas of Asian, American, Australian, Cultural and International Studies.

*assessment:* essay and/or exam

## Level II

### 3083 Asia Today II

*level:* II *points value:* 4 *duration:* semester 1

*prerequisites:* History I or Politics I subjects or any Social Science subjects in Asian Studies I to the value of 6 points or any other subject approved by the Head of Department.

*contact hours:* 3 hours per week or equivalent

*content:* A subject on the extraordinary changes in East and Southeast Asia in the 1980s and 1990s from the complex base of post WWII revolutions and Cold War Politics to dramatic economic shifts making southern China and Southeast Asia the fastest growing economy in the world with important consequences for Australia. It will examine the social, economic and political origins of the modern condition in the region; the social and political revolutions in China, Japan, Korea, Indonesia and Vietnam and transfer of power in former colonies; the struggles for new directions in social and political; and the crisis in economic management in the 1970s to the growth patterns of the past decade.

*assessment:* two essays, or one examination and one essay

### 5405 Britain (A): Uniting the Kingdoms

*level:* II *points value:* 4 *duration:* semester 1

*prerequisites:* History I or Politics I subjects to the value of 6 points or any other subjects approved by the Head of Department

*restrictions:* 5028/2095 England Under the Stuarts, 5097 The English Revolution (Prior to 1989), 3235/4779 The English Revolution 1529-1760.

*contact hours:* 3 hours of lectures and tutorials per week

*content:* A study of state and society in England from the Reformation to the union with Scotland in 1707.

Some attention will be given to relations between England and the other kingdoms of The British Isles leading to the emergence of the British state.

*assessment:* essays and exams

### 5585 Britain (B): Aristocracy to Democracy

*level:* II *points value:* 4 *duration:* semester 2

*prerequisites:* History I or Politics I subject or any Social Science subjects in Asian Studies I to the value of 6 points or any other subject approved by the Head of Department

*contact hours:* 3 hours per week or equivalent

*content:* This subject will examine government and society in Britain from the Glorious Revolution of 1688 to the Second Reform Act of 1867. It will concentrate on three main themes: aristocracy in government and society, the rise of the middle classes, and Britain's emergence as the world's most powerful nation.

*assessment:* essays and exam

### 6796 China: From Empire to Communist Power II

*level:* II *points value:* 8 *duration:* full year

*prerequisites:* History I, Politics I subjects or any Social Science subjects in Asian Studies I to the value of 6 points or any other subject approved by the Head of Department

*contact hours:* 3 hours per week or equivalent

*content:* This subject will examine the transformation of China from empire to modern Communist power. The emphasis will be placed on the structure and function of traditional Chinese society, the impact of the West, the process of agrarian revolution, the impact of imperialism and the rise of modern Chinese nationalism, social and economic change, the socialist revolution and the reconstruction of Chinese society.

*assessment:* Details are outlined in the History Department Handbook.

### 9430 Culture and Society in Renaissance Italy II

*level:* II *points value:* 4

*availability:* not offered in 1996

*quota:* may apply

*prerequisites:* History I or Politics I subject or any Social Science subjects in Asian Studies I to the value of 6 points or any other subject approved by the Head of Department

*contact hours:* 2 lectures and 1 tutorial a week

*content:* This subject examines the Italian renaissance of the fourteenth and fifteenth centuries. The first half of the subject focuses on the 'crisis' of the fourteenth century and its impact on the demographic, social, economic, political, religious, and cultural history of Italy. The second half of the subject focuses on the resolution of this 'crisis' in the fifteenth century, the changes in intellectual and moral values, and the exceptional achievements in art and literature.

*assessment:* 1 x 2 hour exam (50%); 1 x 2500 word essay (50%); plus tutorial papers and participation (non-graded).

### **6360 Enter the Dragon: Chinese Business in Asia II**

*level:* II    *points value:* 4    *duration:* semester 2

*contact hours:* 3 hours per week or equivalent

*content:* This subject provides a general survey of Chinese business in Asia outside Mainland China. It covers the Chinese in Southeast Asia and the Chinese in Hong Kong, Macao and Taiwan. With growing importance of the ethnic Chinese role in the fast economic development in East and Southeast Asia, it is timely to examine the Chinese business in a broader historical perspective. This subject examines the origins and changes of Chinese business since the second half of the 19th century to the present. It explores into the ideology, structure and typology of Chinese business in Asia. It attempts to answer questions such as what are the characteristics of Chinese business? what accounts for the success of Overseas Chinese in business? To what extent does Chinese business differ from Western or Australian business?

*assessment:* by essay and examination.

### **8034 Europe at War IIA: 1914–1945**

*level:* II    *points value:* 4    *duration:* semester 1

*prerequisites:* History I or Politics I subject or any Social Science subjects in Asian Studies I to the value of 6 points or any other subject approved by the Head of Department

*contact hours:* 2 lectures and 1 tutorial per week

*content:* A study of some principal aspects of the European conflicts of 1914–1918 (the Great War, or First World War) and 1939–1945 (the Second World War). Among the issues considered will be the origins of war, issues of strategy, the conduct of military and naval operations, and political and social developments in wartime.

### **9108 Everyman and Everywoman in Pre-Industrial Europe II**

*level:* II

*points value:* 8

*availability:* not offered in 1996

*prerequisites:* History I or Politics I subject or any Social Science subjects in Asian Studies I to the value of 6 points or any other subject approved by the Head of Department

*restriction:* 2851 Everyman in Pre-Industrial Europe prior to 1989

*contact hours:* 2 lectures and 1 tutorial a week

*content:* This subject covers the basic conditions of life (food, housing, disease, hygiene, work, play, demography, and climate) and attitudes (family, sex, religion, children, the old, and death).

*assessment:* semester 1: tutorial papers (20%); take home exam (30%); semester 2: research project (50%)

### **3463 Everyman and Everywoman in Pre-Industrial Europe II(A)**

*level:* II    *points value:* 4    *duration:* semester 2

*prerequisites:* History I, Politics I subjects or any Social Science subjects in Asian Studies I to the value of 6 points or any other subject approved by the Head of Department

*restriction:* 2851 Everyman in Pre-Industrial Europe prior to 1989

*contact hours:* 2 lectures and 1 seminar a week

*content:* This subject covers the basic conditions of life (food, housing, clothing, disease, hygiene, work, play, demography, and climate) and attitudes (family, women, sex, religion, children, the old, and death).

*assessment:* essay (50%), take home exam (50%)

### **1740 Fascism and National Socialism II**

*level:* II    *points value:* 4    *duration:* semester 2

*prerequisites:* History I or Politics I subject or any Social Science subjects in Asian Studies I to the value of 6 points or any other subject approved by the Head of Department

*restriction:* 3549 Fascism and National Socialism prior to 1989.

*contact hours:* 3 hours per week or equivalent

*content:* Right wing ideologies of the twentieth century and the movements or parties that claimed to be based on them provide the focus of this subject. Broadly it covers the period 1900-1945. There will be some discussion of the intellectual and cultural origins of fascism and current analyses of political, changes in

post-communist Europe. Major themes to be covered in lectures and tutorials include political, social and cultural dislocation following World War One and the breakup of the Habsburg Empire; Italian fascism, its appeal and its leader; the distinguishing features of National Socialism in Germany; social and cultural life in Nazi Germany; debates surrounding the nature of right-wing movements in other European countries; and degrees of cooperation, collaboration and resistance in occupied Europe.

*assessment:* by short tutorial papers, research essay and tutorial attendance and participation.

#### **4243 German Europe II**

*level:* II *points value:* 4

*availability:* not offered in 1996

*prerequisites:* History I or Politics I subject or any Social Science subjects in Asian Studies I to the value of 6 points or any other subject approved by the Head of Department

*contact hours:* 3 hours of lectures/seminars plus 1 film per week

*content:* The aim of the subject is to provide a survey of German history from the French Revolution in late 18th century to the recent reunification of Germany in 1990. Note that this is not a course dealing exclusively with the history of 'Germany'. We will cover the multiplicity of states of German Europe which eventually unified to form the German Empire (or Reich) in 1871, as well as the Austrian Empire and those parts of Poland, Hungary, and Czechoslovakia which have come under German or Austrian control at various times. There will be three strands to the course lectures, tutorials and films. The series of lectures will provide a chronological analysis and discussion of German history during this period and will also include a presentation of some aspect of German art, music, or literature at least once a week. At the weekly film sessions I will show a number of documentaries, feature films and videos which illustrate aspects of German politics, history and culture.

*assessment:* film review and essay

#### **3851 Greece and the Balkans II**

*level:* II *points value:* 4 *duration:* semester 2

*contact hours:* 3 hours per week or equivalent

*prerequisites:* History I or Politics I subject or any Social Science subjects in Asian Studies I to the value of 6 points or any other subject approved by the Head of Department.

*content:* Irredentist (national expansionary) wars: Greece's "Great Idea" and the Macedonian Struggle of Greece, Bulgaria, Serbia and the Ottoman Empire; the

rise of nationalist leaders: the case of Venizelos and the bourgeoisie. The Balkan Wars (1912-1913) and the seeds of disaster. The Balkans and World War I: Greece's involvement and the National Schism. The Great Catastrophe and the ethnic cleansing in Turkey; the failure of the Great Idea. Greek refugees and the Settlement Commission of the League of Nations. The instability of the Inter-war years: the upheavals of Greek politics (dictatorships (republican and monarchical), the impact of the Great Depression, the rise of fascist ideas). World War II and the Balks: the Italian, German and Bulgarian invasions and occupations; the rise of Resistance movements and the struggle for the loyalty of the people. (Communism v Capitalism?) The impact of the Cold War and the Civil War in Greece (1944-1949). Mass emigration from Greece; American penetration; the Junta and seven years dictatorship. The Cyprus Question and Greek/Turkish relations. Greece, the European Community/Union and the Balkan conflict: the disintegration of Yugoslavia.

*assessment:* essay; tutorial; exam

#### **8861 Greece and the Ottomans II**

*level:* II *points value:* 4 *duration:* semester 1

*prerequisites:* History I or Politics I subjects or any Social Science subjects in Asian Studies I to the value of 6 points or any other subject approved by the Head of Department

*contact hours:* 3 per week or equivalent

*content:* This subject begins with the decline of the Byzantine Empire and the rise of Neo-Hellenism together with the emergence of Balkan States. The impact of the Turkish Ottoman Empire on the peoples of the Balkans and particularly on Hellenism will be analysed. Hellenism's revival in the eighteenth century consequent to a declining Ottoman Empire is examined in connection with Western Imperialist penetration of the region along with the influence of the Enlightenment. This will be followed by an analysis of the Greek Revolution (1821) that laid the pattern of change in the nineteenth century - irredentist (expansionary nationalist) dreams, failures to modernise, foreign interventions, mass migrations, civil conflict. Emphasis will be placed on Greece's "Great Idea" (irredentist ambitions) and her relations to a declining Ottoman Empire attempting to implement reforms and both subject increasingly to Great Power/capitalist intervention.

*assessment:* essay; tutorial; exam

#### **8251 Imperial Russia II**

*level:* II *points value:* 4 *duration:* semester 1

*contact hours:* 3 hours per week

*content:* Tsars and Tsaritsas; the peasants in serfdom and emancipation; the nobility: aristocracy and gentry and the fight against modernity; Russian industrialisation and the rise of the proletariat; educating Russian's; the professional elite and the erosion of imperial political culture; the road to revolution; the 1905 revolution and the establishment of the Duma system; the collapse of Tsardom.

*assessment:* 2000 word research essay (60%); tutorials/seminars (10%); examination at the end of the semester (30%)

#### **4241 Modern America: from Civil War to Empire II**

*level:* II *points value:* 4

*availability:* not offered in 1996

*prerequisites:* History I or Politics I subject or any Social Science subjects in Asian Studies I to the value of 6 points or any other subject approved by the Head of Department.

*restriction:* H717: Social History of the United States in the Nineteenth and Twentieth Centuries (1983)

*contact hours:* 2 lectures and 1 tutorial a week

*content:* This subject aims to analyse the rise of the American Empire from the Civil War to World War I. The prime focus will be on the structural changes in American society as it underwent enormous transformation within the historical framework of wars, rapid industrialisation, depression and the rise of American world influence. The main historical topics and events to be examined include brief surveys of pre-Civil War America; the background to the Civil War; the Civil War and Reconstruction; the industrialisation of America and the impact of urbanisation and immigration, and the nature of 20th century American society as it emerges in the World War I era.

*assessment:* 1 essay, tutorial performance, and an exam

#### **8731 Modern America: World War I to Imperial Decline II**

*level:* II *points value:* 4 *duration:* semester 2

*prerequisites:* History I or Politics I subject or any Social Science subjects in Asian Studies I to the value of 6 points or any other subject approved by the Head of Department.

*restriction:* H717: Social History of the United States in the Nineteenth and Twentieth Centuries (1983)

*contact hours:* 3 hours per week or equivalent

*content:* This subject aims to analyse the rise and fall of the American empire from World War I to the present. The prime focus will be on the structural changes in American society as it underwent enormous transformation within the historical framework of

wars, rapid industrialisation, depression and the rise and decline of American world influence. The main historical topics and events to be examined include the industrialisation of America; the impact of urbanisation and immigration; and the nature of 20th century American society as it emerges in the World War I era. After examining the dramatic events of World War I, the Great Depression, World War II and the Cold War, the final section of the subject will examine the decline of the American economy and the decreasing influence of America as a world superpower.

*assessment:* 1 essay, tutorial performance, exam

#### **3677 Modern France: from Revolution to Resistance II**

*level:* II *points value:* 4 *duration:* semester 1

*prerequisites:* History I or Politics I subjects or any Social Science subjects in Asian Studies I to the value of 6 points or any other subject approved by the Head of Department

*restriction:* 5101/6104 Modern France 1848-1918; 9093/9568 France 1848-1945

*contact hours:* 3 hours per week or equivalent

*content:* This subject addresses key themes in the history of modern Europe with the primary focus on France from the Revolution of 1848 to the end of the Second World War. For the period 1848-1918 lectures and tutorials will cover a range of topics including the revolution and the development of democracy; music and literature in the late nineteenth and early twentieth centuries; nationalism; anti-Semitism; French feminism and socialism. For the later period special emphasis will be placed on the cultural and political impact of World War One and the German occupation, collaboration and resistance in the Second World War.

*assessment:* by short tutorial papers, research essay and tutorial attendance and participation.

#### **8009 Responses to War II (A)**

*level:* II *points value:* 8 *duration:* full year

*restriction:* 6748 Responses to War II

*prerequisites:* History I or Politics I subjects or any Social Science subjects in Asian Studies I to the value of six points or any other subject approved by the Head of Department

*contact hours:* attendance at one of the two lecture/film sessions each week is recommended

*content:* The aim of the subject is to examine a selection of the extraordinary variety of responses to war from the ancient world to the present. These include the responses of actual participants in fighting (such as Grimmelshausen, Clausewitz, Tolstoy, Remarque, Hitler, Orwell, Böll, Stone), contemporary civilian eyewitnesses (Callot, Voltaire, Goya,

Nightingale, Dunant, Kipling, Brittain, Hersey, Herr), and those who were just influenced generally by the wars of their time (Shakespeare, Grotius, Knox, Beethoven, Zola, Picasso, Kubrick, Baez). The underlying assumption of the course is that the experience of war, whether directly or indirectly, has had a profound impact on the way many individuals think and that this change in thinking has been reflected in their work in such diverse media as novels, plays, art, music, political philosophy, and film making. When the study of war is approached from this direction the emphasis turns from the military leaders and the outcome of battles to the subjective experience of participants, eyewitnesses and, very importantly, victims. Such a study tells us something about war which traditional military history does not - namely its effect on ordinary individuals who are caught up in an historical event often beyond their comprehension and certainly beyond their control. It also tells us something important about the human condition, how individuals cope with extreme situations and how this experience influences their later thinking and creative work.

*assessment:* film reviews; tutorial papers; an essay, and an end of year examination.

### 2192 Russia in Crisis and Revolution 1890-1991 II

*level:* II    *points value:* 4    *duration:* semester 2

*prerequisites:* History I or Politics I subjects or any Social Science subjects in Asian Studies I to the value of 6 points or any other subject approved by the Head of Department

*restriction:* 3194/6379 Russia in Crisis

*contact hours:* 3 hours per week or equivalent

*content:* This subject will be of topical rather than chronological character. It is framed around an analytic structure that will focus students attention on the socio-economic and political processes that contributed to the collapse of the Soviet Union in 1991. The elements of the subject are: Liberalism vs Marxism; The Revolutionary and the Counter-revolutionary Traditions; The culture of Russian Industrialism: The Russian form of Capitalism, NEP, The system of the 'plan'; The true dissenters: Russian culture under Soviet rule; Schauma and revolution, Revolution as evil? Leninism and Stalinism; War and Peace: The impact of war and the threat of war on Soviet politics; The Soviet Union in its golden age, 1955-1968; Political corruption, economic stagnation and society's silent revolt, 1969-1985; Gorbachev and the collapse of the USSR, 1985-1991.

*assessment:* a major research paper 3000 words (50%); exam (40%); tutorial performance (10%)

### 1185 South Australia: A Utopian Experiment? II

*level:* II    *points value:* 8    *duration:* full year

*prerequisites:* History I or Politics I subjects or any Social Science subjects in Asian Studies I to the value of 6 points or any other subject approved by the Head of Department

*restriction:* 2482/7976: South Australian History

*contact hours:* 3 hours per week or equivalent

*content:* A chronological and thematic study of 19th and 20th century South Australian history from the initial planning of the colony pre 1836 to the end of the so-called Dunstan decade. Topics and themes to be studied in depth will include:

Colonial South Australia Planning, settlement, the expanding frontier, religion and education, liberalism and the growth of responsible government, the impact of migration, the economy.

20th Century South Australia The impact of Federation and World War I, centralisation vs decentralisation, social and economic stresses between the wars, World War II, the problems of industrialisation and urbanisation, post-war migration, conservatism vs political and social reform.

Field work, involving the study of local South Australian Communities, is a compulsory element of this subject.

*assessment:* 1 x three hour exam (30%); 2 essays of 3,000 words (40%); 1 x research/field work assignment (20%); tutorial participation (10%)

### 4695 South Australian Aboriginal History II

*level:* II    *points value:* 4    *duration:* semester 1

*prerequisites:* History I or Politics I subjects or any Social Science subjects in Asian Studies I to the value of 6 points or any other subject approved by the Head of Department

*contact hours:* 2 lectures; 1 tutorial per week

*content:* A history of Aboriginal/European relations in South Australia from settlement to the passage of the Aborigines Act in 1911. Issues addressed will include aboriginal culture, responses to colonisation, Aborigines and the economy, administration, missions, religious and scientific constructions of Aboriginality, legal status and 'White Australia'. There will be a particular focus on the theme of 'representations of Aboriginality'.

*assessment:* tutorials and essays

**8027 Southeast Asia: After the Revolution II**

level: II points value: 4

availability: not offered in 1996

*prerequisites:* History I or Politics I subjects or any Social Science subjects in Asian Studies I to the value of 6 points or any other subject approved by the Head of Department

*contact hours:* 3 hours per week or equivalent

*content:* The aim of this subject is to examine the last fifty years of Southeast Asian history. In 1996 it will be fifty years since Indonesia and Vietnam declared themselves republics, nearly fifty since Burma and the Philippines got independence and twenty since the fall of the Saigon Government. With the end of the Cold War and Great Power politics it is appropriate to re-examine the history of the region, in the year of anniversaries.

*assessment:* 2 essays; or 1 exam and 1 essay

**1873 The Making of Modern Indonesia II**

level: II points value: 4 duration: semester 1

*prerequisites:* History I or Politics I subjects or any Social Science subjects in Asian Studies I to the value of 6 points or any other subject approved by the Head of Department

*restriction:* 1928/1640 Nationalism and Revolution in South-East Asia (A)

*contact hours:* 3 hours per week or equivalent

*content:* This subject provides an introductory analysis of modern Indonesian history, primarily during the twentieth century. It covers the period of the consolidation of Dutch colonial rule in Indonesia in the early decades of this century, and makes an assessment of the impact of colonialism. The course then proceeds to a discussion of World War II, the Japanese occupation of Indonesia and the subsequent revolution which resulted in the establishment of the Indonesian Republic. It concludes with an analysis of political, social and economic developments in the second half of the twentieth century. This includes discussion of the Sukarno years, the military takeover in the mid-1960's and the Suharto regime which has ruled Indonesia since then,

*assessment:* short tutorial papers (30%); choice of essay or exam (70%).

**6083 Working Lives in Victorian Britain II**

level: II points value: 4 duration: semester 1

*restrictions:* 4912/3707 Work in Industrial Britain

*contact hours:* 3 hours per week or equivalent content: This subject will examine what the people of

nineteenth-century Britain thought about work and how they did it. It will ask how, and to what extent, industrialisation changed the nature and rewards of work. It will also ask whether these changes had different effects on men, women and children, who gained and who lost, and how they responded. It will look at artistic and literary images of work and ask how far they correspond to reality.

*assessment:* essays and examination

**Level III**

---

**8172 Asia Today III**

level: III points value: 6 duration: semester 1

*prerequisites:* History II or Politics II subjects or any Social Science subjects in Asian Studies II to the value of 8 points or any other subject approved by the Head of Department.

*contact hours:* 3 contact hours per week or equivalent

*content:* A subject on the extraordinary changes in East and Southeast Asia in the 1980s and 1990s from the complex base of post WWII revolutions and Cold War Politics to dramatic economic shifts making southern China and Southeast Asia the fastest growing economy in the world with important consequences for Australia. It will examine the social, economic and political origins of the modern condition in the region; the social and political revolutions in China, Japan, Korea, Indonesia and Vietnam and transfer of power in former colonies; the struggles for new directions in social and political; and the crisis in economic management in the 1970s to the growth patterns of the past decade.

*assessment:* 2 essays; or 1 exam and 1 essay

**2037 Britain (A): Uniting the Kingdoms III**

level: III points value: 6 duration: semester 1

*prerequisites:* History II, Politics II subjects or any Social Science subjects in Asian Studies II to the value of 8 points or any other subject approved by the Head of Department

*restrictions:* 5028/2095 England Under the Stuarts, 5097 The English Revolution (Prior to 1989), 3235/4779 The English revolution 1529-1760.

*contact hours:* 3 hours of lectures and tutorials per week

*content:* A study of state and society in England from the Reformation to the union with Scotland in 1707. Some attention will be given to relations between England and the other kingdoms of The British Isles leading to the emergence of the British state.

*assessment:* exam (50%); essay (50%)

**3314 Britain (B): Aristocracy to Democracy III**

*level:* III    *points value:* 6    *duration:* semester 2

*prerequisites:* History II or Politics II subjects or any Social Science subjects in Asian Studies II to the value of 8 points or any other subject approved by the Head of Department

*contact hours:* 3 hours per week or equivalent

*content:* This subject will examine government and society in Britain from the Glorious Revolution of 1688 to the Second Reform Act of 1867. It will concentrate on three main themes: aristocracy in government and society, the rise of the middle classes, and Britain's emergence as the world's most powerful nation.

*assessment:* essays and exam

**2794 China: From Empire to Communist Power III**

*level:* III    *points value:* 12    *duration:* full year

*prerequisites:* History II or Politics II subjects or any Social Science subjects in Asian Studies II to the value of 8 points or any other subject approved by the Head of Department

*contact hours:* 3 hours per week or equivalent

*content:* This subject will examine the transformation of China from empire to modern Communist power. The emphasis will be placed on the structure and function of traditional Chinese society, the impact of the West, the process of agrarian revolution, the impact of imperialism and the rise of modern Chinese nationalism, social and economic change, the socialist revolution and the reconstruction of Chinese society.

*assessment:* Details are outlined in the History Department Handbook.

**8985 Culture and Society in Renaissance Italy III**

*level:* III    *points value:* 6

*availability:* not offered in 1996

*prerequisites:* History II, Politics II or any Social Science subjects in Asian Studies II to the value of 8 points or any other subject approved by the Head of Department

*contact hours:* 2 lectures and 1 tutorial a week

*content:* This subject examines the Italian renaissance of the fourteenth and fifteenth centuries. The first half of the subject focuses on the 'crisis' of the fourteenth century and its impact on the demographic, social, economic, political, religious, and cultural history of Italy. The second half of the subject focuses on the

resolution of this 'crisis' in the fifteenth century, the changes in intellectual and moral values, and the exceptional achievements in art and literature.

*assessment:* 1 x 2 hour exam (50%); 1 x 3500 word essay (50%); plus tutorial papers and participation (non-graded).

**1706 Enter the Dragon: Chinese Business in Asia III**

*level:* III    *points value:* 6    *duration:* semester 2

*contact hours:* 3 hours per week or equivalent

*content:* This subject provides a general survey of Chinese business in Asia outside Mainland China. It covers the Chinese in Southeast Asia, and the Chinese in Hong Kong, Macao and Taiwan. With growing importance of the ethnic Chinese role in the fast economic development in East and Southeast Asia, it is timely to examine Chinese business in a broader historical perspective. This subject examines the origins and changes of the Chinese business since the second half of the 19th century to the present. It explores into the ideology, structure and typology of Chinese business in Asia. It attempts to answer questions such as what are the characteristics of Chinese business? what accounts for the success of Overseas Chinese in business? To what extent does Chinese business differ from Western or Australian business?

*assessment:* by essay and examination

**2386 Europe at War IIIA: 1914–1945**

*level:* III    *points value:* 6    *duration:* semester 1

*prerequisites:* History II or Politics II subjects to the value of 8 points or any other subject approved by Head of Department

*contact hours:* 2 lectures and 1 tutorial per week

*content:* A study of some principal aspects of the European conflicts of 1914–1918 (the Great War, or First World War) and 1939–1945 (the Second World War). Among the issues considered will be the origins of war, issues of strategy, the conduct of military and naval operations, and political and social developments in wartime.

**5954 Everyman and Everywoman in Pre-Industrial Europe III**

*level:* III    *points value:* 12

*availability:* not offered in 1996

*prerequisites:* History II or Politics II subject or any Social Science subjects to the value of 8 points or any other subject approved by the Head of Department

*restriction:* 2851 Everyman in Pre-Industrial Europe prior to 1989

*contact hours:* 2 lectures and 1 tutorial a week

*content:* This subject covers the basic conditions of life (food, housing, disease, hygiene, work, play, demography, and climate) and attitudes (family, sex, religion, children, the old, and death).

*assessment:* semester 1: essay paper (20%), take home exam (30%); semester 2: research project (50%)

### **5961 Everyman and Everywoman in Pre-Industrial Europe III(A)**

*level:* III *points value:* 6 *duration:* semester 2

*prerequisites:* History II or Politics II subjects or any Social Science subjects in Asian Studies II to the value of 8 points or any other subject approved by the Head of Department

*restriction:* 2851 Everyman in Pre-Industrial Europe prior to 1989

*contact hours:* 2 lectures and 1 seminar a week

*content:* This subject covers the basic conditions of life (food, housing, clothing, disease, hygiene, work, play, demography, and climate) and attitudes (family, women, sex, religion, children, the old, and death).

*assessment:* essay (50%), take-home exam (50%)

### **3877 Fascism and National Socialism III**

*level:* III *points value:* 6 *duration:* semester 2

*prerequisites:* History II, Politics II subjects or any Social Science subject in Asian Studies II to the value of 8 points or any other subject approved by the Head of Department

*restriction:* 3549 Fascism and National Socialism prior to 1989.

*contact hours:* 3 hours per week or equivalent

*content:* Right wing ideologies of the twentieth century and the movements or parties that claimed to be based on them provide the focus of this subject. Broadly it covers the period 1900-1945. There will be some discussion of the intellectual and cultural origins of fascism and current analyses of political change in post-communist Europe. Major themes to be covered in lectures and tutorials include political, social and cultural dislocation following World War One and the breakup of the Habsburg Empire; Italian fascism, its appeal and its leader; distinguishing features of National Socialism in Germany; social and cultural life in Nazi Germany; debates surrounding the nature of right-wing movements in other European countries; and degrees of cooperation, collaboration and resistance in occupied Europe.

*assessment:* by short tutorial papers, research essay and tutorial attendance and participation.

### **6966 German Europe III**

*level:* III

*points value:* 6

*availability:* not offered in 1996

*prerequisites:* History II or Politics II subjects or any Social Science subjects in Asian Studies II to the value of 8 points or any other subject approved by the Head of Department

*contact hours:* 3 hours of lectures/seminars plus 1 film a week

*content:* The aim of the subject is to provide a survey of German history from the French Revolution in late 18th century to the recent reunification of Germany in 1990. Note that this is not a course dealing exclusively with the history of 'Germany'. We will cover the multiplicity of states of German Europe which eventually unified to form the German Empire (or Reich) in 1871, as well as the Austrian Empire and those parts of Poland, Hungary, and Czechoslovakia which have come under German or Austrian control at various times. There will be three strands to the course lectures, tutorials and films. The series of lectures will provide a chronological analysis and discussion of German history during this period and will also include a presentation of some aspect of German art, music, or literature at least once a week. At the weekly film sessions I will show a number of documentaries, feature films and videos which illustrate aspects of German politics, history and culture.

*assessment:* film review and essays

### **5024 Greece and the Balkans III**

*level:* III *points value:* 6 *duration:* semester 2

*prerequisites:* History II or Politics II subjects or any Social Science subjects in Asian Studies II to the value of 8 points or any other subject approved by the Head of Department

*contact hours:* 3 hours per week or equivalent

*content:* Irredentist (national expansionary) wars: Greece's "Great Idea" and the Macedonian Struggle of Greece, Bulgaria, Serbia and the Ottoman Empire; the rise of nationalist leaders: the case of Venizelos and the bourgeoisie. The Balkan Wars (1912-1913) and the seeds of disaster. The Balkans and World War I: Greece's involvement and the National Schism. The Great Catastrophe and the ethnic cleansing in Turkey; the failure of the Great Idea. Greek refugees and the Settlement Commission of the League of nations. The instability of the Inter-war years: the upheavals of Greek politics (dictatorships (republican and monarchical), the impact of the Great Depression, the rise of fascist ideas). World War II and the Balks: the Italian, German and Bulgarian invasions and occupations; the rise of Resistance movements and the struggle for the loyalty of the people. (Communism v Capitalism?) The impact of the Cold War and the Civil

War in Greece (1944-1949). Mass emigration from Greece; American penetration; the Junta and seven years dictatorship. The Cyprus Question and Greek/Turkish relations. Greece, the European Community/Union and the Balkan conflict: the disintegration of Yugoslavia.

*assessment:* essay; tutorial; exam

### 9826 Greece and the Ottomans III

*level:* III *points value:* 6 *duration:* semester 1

*prerequisites:* History II or Politics II subjects or any Social Science subjects in Asian Studies II to the value of 8 points or any other subject approved by the Head of Department

*contact hours:* 3 hours per week or equivalent

*content:* This subject begins with the decline of the Byzantine Empire and the rise of Neo-Hellenism together with the emergence of Balkan States. The impact of the Turkish Ottoman Empire on the peoples of the Balkans and particularly on Hellenism will be analysed. Hellenism's revival in the eighteenth century consequent to a declining Ottoman Empire is examined in connection with Western Imperialist penetration of the region along with the influence of the Enlightenment. This will be followed by an analysis of the Greek Revolution (1821) that laid the pattern of change in the nineteenth century - irredentist (expansionary nationalist) dreams, failures to modernise, foreign interventions, mass migrations, civil conflict. Emphasis will be placed on Greece's "Great Idea" (irredentist ambitions) and her relations to a declining Ottoman Empire attempting to implement reforms and both subject increasingly to Great Power/capitalist intervention.

*assessment:* essay; tutorial; exam

### 5158 Imperial Russia III

*level:* III *points value:* 6 *duration:* semester 1

*contact hours:* 3 hours per week

*content:* Tsars and Tsaritsas, the peasants in serfdom and emancipation; the nobility: aristocracy and gentry and the fight against modernity; Russian industrialisation and the rise of the proletariat; educating Russian's; the professional elite and the erosion of imperial political culture; the road to revolution; the 1905 revolution and the establishment of the Duma system; the collapse of Tsardom.

*assessment:* 3000 word research essay (60%); tutorials/seminars (10%); examination at the end of the semester (30%)

### 2321 Modern America: From Civil War to Empire III

*level:* III

*points value:* 6

*availability:* not offered in 1996

*prerequisites:* History II or Politics II subjects or any Social Science subjects in Asian Studies II the value of 8 points or any other subject approved by the Head of Department

*restriction:* H717: Social History of the United States in the Nineteenth and Twentieth Centuries (1983)

*contact hours:* 2 lectures and 1 tutorial a week

*content:* This subject aims to analyse the rise of the American Empire from the Civil War to World War I. The prime focus will be on the structural changes in American society as it underwent enormous transformation within the historical framework of wars, rapid industrialisation, depression and the rise of American world influence. The main historical topics and events to be examined include brief surveys of pre-Civil War America; the background to the Civil War; the Civil War and Reconstruction; the industrialisation of America and the impact of urbanisation and immigration, and the nature of 20th century American society as it emerges in the World War I era.

*assessment:* 1 essay, tutorial performance, exam

### 2955 Modern America: World War I to Imperial Decline III

*level:* III *points value:* 6 *duration:* semester 2

*prerequisites:* History II or Politics II subjects or any Social Science subjects in Asian Studies II to the value 8 points or any other subject approved by the Head of Department

*restriction:* H717: Social History of the United States in the Nineteenth and Twentieth Centuries (1983)

*contact hours:* 3 hours per week or equivalent

*content:* This subject aims to analyse the rise and fall of the American empire from World War I to the present. The prime focus will be on the structural changes in American society as it underwent enormous transformation within the historical framework of wars, rapid industrialisation, depression and the rise and decline of American world influence. The main historical topics and events to be examined include the industrialisation of America; the impact of urbanisation and immigration; and the nature of 20th century American society as it emerges in the World War I era. After examining the dramatic events of World War I, the Great Depression, World War II and the Cold War, the final section of the subject will examine the decline

of the American economy and the decreasing influence of America as a world superpower.

*assessment:* 1 essay, tutorial performance, exam

#### **4455 Modern France: From Revolution to Resistance III**

*level:* III *points value:* 6 *duration:* semester 1

*prerequisites:* History II or Politics II subjects or any Social Science subjects in Asian Studies II to the value of 8 points or any other subject approved by the Head of Department

*restriction:* 5101/6104 Modern France 1848-1918; 9093/9568 France 1848-1945

*contact hours:* 3 hours per week or equivalent

*content:* This subject addresses key themes in the history of modern Europe with the primary focus on France from the Revolution of 1848 to the end of the Second World War. For the period of 1848-1918 lectures and tutorials will cover a range of topics including the revolution and the development of democracy; music and literature in the late nineteenth and early twentieth centuries; nationalism; anti-Semitism; French feminism and socialism. For the later period special emphasis will be placed on the cultural and political impact of World War One and the German occupation, collaboration and resistance in the Second World War.

Field work, involving the study of local South Australian Communities, is a compulsory element of this subject.

*assessment:* 1 x three hour exam (30%), 2 essays of 4,000 words (40%), 1 x research/field work assignment (20%); tutorial participation (10%)

### **6253 South Australian Aboriginal History III**

*level:* III *points value:* 6 *duration:* semester 1

*prerequisites:* History II or Politics II subjects or any Social Science subjects in Asian Studies II to the value of 8 points or any other subject approved by the Head of Department

*contact hours:* 2 lectures; 1 tutorial per week

*content:* A history of Aboriginal/European relations in South Australia from settlement to the passage of the Aborigines Act in 1911. Issues addressed will include aboriginal culture, responses to colonisation, Aborigines and the economy, administration, missions, religious and scientific constructions of Aboriginality, legal status and 'White Australia'. There will be a particular focus on the theme of 'representations of Aboriginality'.

*assessment:* tutorials and essays

### **2769 Southeast Asia: After the Revolution III**

*level:* III *points value:* 6

*availability:* not offered in 1996

*prerequisites:* History II or Politics II subjects or any Social Science subjects in Asian Studies II to the value of 8 points or any other subject approved by the Head of Department

*contact hours:* 3 hours per week or equivalent

*content:* The aim of this subject is to examine the last fifty years of Southeast Asian history. In 1996 it will be

fifty years since Indonesia and Vietnam declared themselves republics, nearly fifty since Burma and the Philippines got independence and twenty since the fall of the Saigon Government. With the end of the Cold War and Great Power politics it is appropriate to re-examine the history of the region, in the year of anniversaries.

*assessment:* 2 essays; or 1 exam and 1 essay

### **5884 The Making of Modern Indonesia III**

*level:* III *points value:* 6 *duration:* semester 1

*prerequisites:* History II or Politics II subjects or any Social Science subjects in Asian Studies II to the value of 8 points or any other subject approved by the Head of Department

*restriction:* 1928/1640 Nationalism and Revolution in South-East Asia (A)

*contact hours:* 3 hours per week or equivalent

*content:* This subject provides an introductory analysis of modern Indonesian history, primarily during the twentieth century. It covers the period of the consolidation of Dutch colonial rule in Indonesia in the early decades of this century, and makes an assessment of the impact of colonialism. The course then proceeds to a discussion of World War II, the Japanese occupation of Indonesia and the subsequent revolution which resulted in the establishment of the Indonesian Republic.

It concludes with an analysis of political, social and economic developments in the second half of the twentieth century. This includes discussion of the Sukarno years, the military takeover in the mid-1960's and the Suharto regime which has ruled Indonesia since then.

*assessment:* short tutorial papers (30%); choice of essay or exam (70%).

### **9724 Working Lives in Victorian Britain III**

*level:* III *points value:* 6 *duration:* semester 1

*restrictions:* 4912/3707 Work in Industrial Britain

*contact hours:* 3 hours per week or equivalent

*content:* This subject will examine what the people of nineteenth-century Britain thought about work and how they did it. It will ask how, and to what extent, industrialisation changed the nature and rewards of work. It will also ask whether these changes had different effects on men, women and children, who gained and who lost, and how they responded. It will look at artistic and literary images of work and ask how far they corresponded to reality.

*assessment:* essays and exam

## Honours Level

### 8717 Honours History

*level:* honours *points value:* 24 *duration:* full year

*prerequisites:* Students wishing to enrol for the B.A. (Honours) in History must have completed a minimum of three full-year (six one-semester History subjects, including at least one full-year) or two semester subjects at level 3. Passes at a good credit standard on at least two full year (or four semester) History (or in some cases, related) subjects are the minimum qualification for entering the Final Honours year. Application forms for admission to Honours and a detailed brochure on the course are available from the History Office; students with questions about the course or their eligibility for it should consult the Honours Coordinator.

Honours work includes the writing of a thesis, a common course on the principles and practice of historical research and writing, and a special subject. Students may choose their special subject from a list published in the Honours handbook.

### International Studies

#### 5455 International Studies II

*level:* II *points value:* 4 *duration:* semester 1

*prerequisites:* 6 points in Humanities/Social Sciences at Level I

*restrictions:* not available to students with exemption from lectures

*contact hours:* 3 hours per week

*content:* this will be a semester length subject offered in first semester 1996. The lectures, two per week, will be given by specialists in different disciplines explaining the key theoretical concepts and methodologies used in their field to explain international phenomena. The course will be administered by Dr. Bob Catley. Lectures will cover: international politics, international trade theory, international labour studies, international law, feminist theory, international history, international culture, global environment, post-colonialism, international organisations, globalisation, Asian Studies and languages.

*assessment:* to be advised

### Labour Studies

For descriptions of the Labour Studies subjects available in the Bachelor of Arts please refer to the corresponding subject descriptions in the Syllabuses for the Bachelor of Labour Studies.

## Language Studies

### Centre for Asian Studies

#### Chinese

The Centre for Asian studies at The University of Adelaide offers subjects in Chinese at Levels I, II and III as well as Honours in Chinese Studies. At first year level Chinese IA is offered to students with no prior knowledge of Chinese. Students who have a knowledge of Chinese at Year 12 level or at a higher standard may be permitted to enrol directly into a higher level. Subjects involve grammar, tuition in speaking, reading and writing, and in later years literary and cultural studies. Quotas may apply in some Chinese language subjects.

Students are expected to combine with their study of the language some of the separate courses in Chinese Studies listed above under Asian Studies, particularly if there is a possibility that they might want to do Honours.

The subjects available at undergraduate level are:

#### Level I

7769 Chinese IA

2126 Chinese IB

3060 Chinese IA (Flinders)

7608 Chinese IB (Flinders)

#### Level II

4323 Chinese IIA

3139 Chinese IIB

8704 Chinese IIA (Flinders)

4297 Chinese IIB (Flinders)

8068 Chinese for Chinese Speakers IIA

3332 Chinese for Chinese Speakers IIB

#### Level III

5610 Chinese IIIA

6872 Chinese IIIB

4941 Chinese for Chinese Speakers IIIA

7989 Chinese for Chinese Speakers IIIB

#### Honours

3025 Honours in Chinese Studies

For detailed information on these subjects, see the relevant syllabuses in the Asian Studies section of the Calendar.

## Japanese

The Centre for Asian Studies offers Japanese at Levels I, II and III as well as Honours in Japanese Studies. Japanese IA is available to students with no prior knowledge of Japanese. Students who have a knowledge of Japanese at Year 12 level or at a higher standard may be permitted to enrol directly into a higher level. Subjects involve grammar and vocabulary of modern spoken Japanese plus learning of the writing system and, in later years, literary and cultural studies. Quotas may apply in some Japanese language subjects.

Students are expected to combine with their study of the language some of the separate courses in Japanese Studies listed above under Asian Studies, particularly if there is a possibility that they might want to do Honours.

The subjects available at undergraduate level are:

### Level I

2909 Japanese IA

3902 Japanese IB

8956 Japanese IA (Flinders)

7511 Japanese IB (Flinders)

### Level II

3232 Japanese IIA

4273 Japanese IIB

4007 Japanese IIA (Flinders)

7999 Japanese IIB (Flinders)

### Level III

6644 Japanese IIIA

2814 Japanese IIIB

### Honours

1509 Honours in Japanese Studies.

For detailed information on these subjects, see the relevant syllabuses in the Asian Studies section of the Calendar.

## Vietnamese

The Centre for Asian Studies offers Vietnamese at Levels I, II and III. Vietnamese IA is available to students with no prior knowledge of Vietnamese. Students who have a knowledge of Vietnamese at Year 12 level or a higher standard may be permitted to enrol directly into a higher level. Subjects involve grammar and vocabulary of modern spoken Vietnamese and learning the writing system.

The subjects available at undergraduate level are:

### Level I

5469 Vietnamese IA

5074 Vietnamese IB

### Level II

3184 Vietnamese IIA

4208 Vietnamese IIB

### Level III

4248 Vietnamese IIIA

5145 Vietnamese IIIB

For detailed information on these subjects, see the relevant syllabuses in the Asian Studies section of the Calendar.

## Department of Classics

### Latin

#### Ancient Greek

The Department of Classics offers Latin and Ancient Greek at Levels I, II and III as well as Honours in the languages. First year subjects are available both for students with no prior knowledge of Latin or Ancient Greek or for students with Year 12 standard in the languages. Studies include grammar, composition and vocabulary translation.

The subjects available at undergraduate level are:

### Level I

5714 Ancient Greek 1

2346 Latin 1

### Level II

8996 Ancient Greek 2

7175 Ancient Greek 2S

7937 Latin 2

3630 Latin 2S

### Level III

5944 Ancient Greek 3

3943 Ancient Greek 3S

4232 Latin 3

3454 Latin 3S

### Honours

8302 Honours Greek and/or Latin.

For detailed information on these subjects, see the relevant syllabuses in the Classics section of the Calendar.

## Department of French

### French

The Department of French offers subjects at Levels I, II and III as well as Honours in French. At first year level the Department has three streams: French IA for beginners, French IM for intermediate level students, and French I for students with Year 12 French or equivalent. At first level, as well as in later year courses, subjects contain both a language and a cultural component; the active use of spoken and written French is an integral part of both components.

The subjects available at undergraduate level are:

#### Level I

4242 French I

2224 French IA Beginners' French

8768 French IM: Intermediate French

#### Level II

5691 French II: Language and Culture

3440 French IIA: Language and Culture

5245 French Studies II(S1)

3475 French Studies II(S2)

#### Level III

4304 French III: Language and Culture

2648 French Studies III(S1)

6175 French Studies III(S2)

#### Honours

4360 Honours French Language and Culture

For detailed information on these subjects, see the relevant syllabuses in the French Language and Literature section of the Calendar.

## Department of German

### German

The Department of German offers subjects at levels I, II and III as well as Honours in German. At first year level the Department has two streams: German IA for students with no prior knowledge of German, and German I for students with Year 11 German or equivalent. All subjects in the Department include language, literature, and cultural components.

The subjects available at undergraduate level are:

#### Level I

8431 German I.

5723 German IA: Beginners' German

5396 German I (Flinders) Part I

9815 German I (Flinders) Part II

1051 Beginners' German IA (Flinders) Part I

8952 Beginners' German IA (Flinders) Part II

#### Level II

8706 German II: Language, Literature and Culture

1214 German IIA: Language, Literature and Culture

1245 German IIB: Language, Literature and Culture

7831 German II (Flinders) Part I

7586 German II (Flinders) Part II

#### Level III

8877 German III: Language, Literature and Culture

2572 German IIIA: Language, Literature and Culture

4959 German IIIB: Language, Literature and Culture

5977 German III (Flinders) Part I

1665 German III (Flinders) Part II

#### Honours

1261 Honours German Language and Literature

For detailed information on these subjects, see the relevant syllabuses in the German Language and Literature section of the Calendar.

## Languages available on The Adelaide University campus but offered by other Institutions

---

### Italian Language and Literature

#### Flinders University

##### Italian

The Flinders University teaches Italian at The University of Adelaide for students enrolled in Adelaide courses. Adelaide students may enrol in Italian subjects and count them towards their Adelaide degrees.

In 1996, Italian is available at Levels I, II and III at The University of Adelaide campus. Details of the subjects offered are given below.

There are some further Italian subjects that are only taught at the Flinders University. Students wanting to take such subjects can only do so by attending lectures at Flinders University. Cross-institutional approval will need to be obtained from the Faculty of Arts office at The University of Adelaide. For details on these subjects consult Vol. II of the Calendar of Flinders University.

Enrolments in Italian subjects will take place where the subjects are taught. Thus, in 1996, Adelaide students taking Italian will be able to enrol at The University of Adelaide. Information on enrolment procedures is

available from the Faculty of Education, Humanities, Law and Theology, Flinders University, or from the Faculty of Arts, University of Adelaide.

### **3447 Beginners Italian Part I - ITAL 1101**

*level:* I     *points value:* 3     *duration:* semester I

*contact hours:* 5 hours per week

*prerequisite:* None

No prior knowledge of Italian is assumed

Students who have completed Year 12 (SACE) Italian or its equivalent should enrol in ITAL 1111. Students who have studied Italian to Year 11, but not beyond, must consult the Director of Studies in Italian. Normally such students will enrol in ITAL 1111.

The topic, which aims to have students communicating on simple every-day subjects by the end of the semester, consists of an intensive introduction to the basic elements of Italian phonology and grammar, and emphasises the comprehension and use of both spoken and written Italian. The programme, which presupposes regular attendance at all scheduled sessions, includes lectures and tutorials using audio-visual programmes. Computer-assisted learning is also available.

Some classes throughout the semester are devoted to an introduction to contemporary Italy.

### **5804 Beginners Italian Part II - ITAL 1102**

*level:* I     *points value:* 3     *duration:* semester 2

*contact hours:* 4 hours per week

*prerequisite:* A grade of P2 or better in ITAL 1101, or its equivalent standard

Knowledge of Italian equivalent to that covered in ITAL 1101 is assumed. The topic develops further the basic comprehension skills acquired in first semester and extends the students' proficiency in both spoken and written Italian. The programme, which presupposes regular attendance at all scheduled sessions, includes lectures and tutorials using audio-visual programmes. Computer-assisted learning is also available.

Some classes are devoted to Italian civilisation.

### **7154 Italian I Part I - ITAL 1111**

*level:* I     *points value:* 3     *duration:* semester 1

*contact hours:* 5 hours per week

*prerequisite:* Year 12 (SACE) standard in Italian or an equivalent knowledge of the language. Students with little or no previous knowledge of the language should enrol in ITAL 1101. Students who do not have the

above pre-requisite but whose knowledge of the Italian language is not beyond Year 11 standard must consult the Director of Studies in Italian before enrolling. Normally these students will enrol in ITAL 1111 and will follow a first-year programme suitably adjusted to their needs.

The language component (3-4 hours per week) consolidates and extends the students' comprehension and communication skills, both spoken and written, through a thorough revision of the basic structures of the Italian language in the context of conversation practice, composition, drills, and translation to and from Italian.

The cultural component (1-2 hours per week) includes an introduction to contemporary Italy and the study of selected texts.

### **9667 Italian I Part II - ITAL 1112**

*level:* I     *points value:* 3     *duration:* semester 2

*contact hours:* 4 hours per week

*prerequisite:* A grade of P2 or better in ITAL 1111, or its equivalent standard

The language component (2-3 hours per week) continues the development, from ITAL 1111, of comprehension and communication skills, both spoken and written, through the progressive study of more advanced grammatical structures in the context of conversation practice, composition, drills, and translation to and from Italian.

The cultural component (1-2 hours per week) consists of the study of contemporary literary texts.

### **6219 Italian IIB Part I - ITAL 2101**

*level:* II     *points value:* 4     *duration:* semester 1

*contact hours:* 5 hours per week

*prerequisite:* A grade of P2 or better in ITAL 1001 or ITAL 1400

The language component consolidates and extends the students' comprehension and communication skills, both spoken and written, through a thorough revision of the basic structures of the Italian language in the context of conversation practice, composition, drills, and translation to and from Italian.

The cultural component consists of 1) the study of the changing role of women in modern Italian society; 2) the study of a selection of modern and contemporary Italian texts dealing with issues related to modern Italian society, with an emphasis on the changing role of women.

**9937 Italian IIB Part II - ITAL 2102**

level: II points value: 4 duration: semester 2

contact hours: 5 hours per week

prerequisite: A grade of P2 or better in ITAL 2101

The language component continues the development, from ITAL 2101, of comprehension and communication skills, both spoken and written, through the progressive study of more advanced grammatical structures in the context of conversation practice, composition, drills, and translation to and from Italian.

The cultural component consists of a survey of Italian lyric poetry from its origins in the 13th century to the Romantic poets of the early 19th century. This will include close textual study of a selection of poems by the major lyric poets.

**2949 Italian II Part I - ITAL 2111**

level: II points value: 4 duration: semester 1

contact hours: 4-5 hours per week

prerequisite: A grade of P2 or better in ITAL 1002 or ITAL 1010 and 1011 or ITAL 1402 or ITAL 1410

The language component is designed to strengthen and extend the students' proficiency in the four macro skills (written and oral comprehension and communication). Lessons will include: advanced Italian grammar, particularly syntax; the study - for comprehension, translation and analysis - of selected passages of Italian prose; and written and oral practice using language material chosen for its notional-functional objectives.

The cultural component consists of 1) the study, in the first part of the semester, of the changing role of women in modern Italian society; 2) a survey, in the second part of the semester, of the changes that have occurred in Italian society since 1945. Two short modern novels will be read.

**5118 Italian II Part II - ITAL 2112**

level: II points value: 4 duration: semester 2

contact hours: 4-5 hours per week

prerequisite: A grade of P2 or better in ITAL 2111

The language component is designed to extend the students' proficiency beyond that achieved in ITAL 2111 in the four macro skills (written and oral comprehension and communication). Lessons will include: advanced Italian grammar, particularly syntax; the study - for comprehension, translation and analysis - of selected passages of Italian prose; and written and oral practice using language material chosen for its notional-functional objectives.

The cultural component consists of a survey of Italian lyric poetry from its origins in the 13th century to the Romantic poets of the early 19th century. This will include close textual study of a selection of poems by the major lyric poets.

**8705 Italian III Part I - ITAL 3111**

level: III points value: 6 duration: semester 1

contact hours: 4-6 hours per week, according to the Section chosen

prerequisite: A grade of P2 or better in ITAL 2010 and 2011 or ITAL 2410 and 2411

The language component is designed to strengthen and extend the students' proficiency in the four macro skills (written and oral comprehension and communication). Lessons will include advanced Italian grammar, particularly syntax, commensurate with this level. The topic is conducted through the study of appropriate written and oral texts illustrating contemporary spoken and written Italian.

For the cultural component students have a choice of one of two monographs: *either*

*THE ITALIANS IN AUSTRALIA (to be offered on the Flinders University campus with appropriate extension for Adelaide University students).* A study of the history of Italian migration to Australia with special reference to South Australia and a study of the Italian language in Australia. *or*

*CONTEMPORARY NARRATIVE (to be offered on the Adelaide University campus).* A study of two recent Italian novels set in the context of the political events that occurred in Europe in the middle of the century. In their different narrative ways the two authors examine the public and private attitudes and reactions that arose in relation to the advent of Fascism in Spain and Portugal and to the Nazi persecution of the Jews.

**2908 Italian III Part II - ITAL 3112**

level: III points value: 6 duration: semester 2

contact hours: 4-6 hours per week, according to the Section chosen

prerequisite: A grade of P2 or better in ITAL 3111

The language component is designed to strengthen and extend further the students' proficiency in the four macro skills (written and oral comprehension and communication). Lessons will include advanced Italian grammar, particularly syntax, commensurate with this level. The topic is conducted through the study of appropriate written and oral texts illustrating contemporary spoken and written Italian.

For the cultural component students have a choice of one of three monographs. Students may choose any ONE of the following:

1) DANTE ALIGHIERI: *LA DIVINA COMMEDIA - INFERNO* (to be offered on the Adelaide University campus). A comprehensive study of Dante's *Inferno* as poetic narrative, with particular attention to the poet's stylistic, historical and political concerns. Students enrolled at The University of Adelaide will also study Dante's *Vita nuova*.

2) THE THEATRE IN ITALY (to be offered on the Adelaide University campus). A study of the history of the theatre in Italy. This includes the detailed study of at least three plays (Machiavelli's *La mandragola*, Goldoni's *La locandiera* and Pirandello's *Così è (se vi pare)*) and three 19th century operas.

3) THE DEVELOPMENT OF PIRANDELLO'S THEATRE (to be offered on the Flinders University campus with appropriate extension for Adelaide University students). A comprehensive study of the theoretical and practical issues that lead to Pirandello's maturity in stage production.

#### 4059 Italian IIIB Part I - ITAL 3101

level: III points value: 6 duration: semester I  
contact hours: 4-6 hours per week, according to the Section chosen

prerequisite: A grade of P2 or better in ITAL 2000 and 2011 or ITAL 2400 and 2411

The language component is designed to strengthen and extend the students' proficiency in the four macro skills (written and oral comprehension and communication). Lessons will include: advanced Italian grammar, particularly syntax; the study of selected passages of Italian prose; and written and oral practice using language material chosen for its notional-functional objectives. For the cultural component students have a choice of one of two monographs:

either

THE ITALIANS IN AUSTRALIA (to be offered on the Flinders University campus with appropriate extension for Adelaide University students)

or

CONTEMPORARY NARRATIVE (to be offered on the Adelaide University campus)

For details of the monographs see ITAL 3111.

#### 1729 Italian IIIB Part II - ITAL 3102

level: III points value: 6 duration: semester 2  
contact hours: 4-6 hours per week, according to the Section chosen

prerequisite: A grade of P2 or better in ITAL 3101

The language component is designed to strengthen and extend the students' proficiency in the four macro skills (written and oral comprehension and communication). Lessons will aim to improve proficiency beyond that achieved in ITAL 3101 and will include further work in these areas: advanced Italian grammar, particularly syntax; the study of selected passages of Italian prose; and written and oral practice using language material chosen for its notional-functional objectives. For the cultural component students have a choice of one of three monographs. Students may choose any ONE of the following:

1) DANTE ALIGHIERI: *LA DIVINA COMMEDIA - INFERNO* (to be offered on the Adelaide University campus)

2) THE THEATRE IN ITALY (to be offered on the Adelaide University campus)

3) THE DEVELOPMENT OF PIRANDELLO'S THEATRE (to be offered on the Flinders University campus with appropriate extension for Adelaide University students)

For details of the monographs see ITAL 3112.

### Modern Greek: Language, Culture and Literature

#### Flinders University - School of Languages

The Flinders University teaches Modern Greek at The University of Adelaide for students enrolled in Adelaide courses. Adelaide students may enrol in Modern Greek subjects and count them towards their Adelaide degree.

In 1996, Modern Greek will be available at The University of Adelaide at Level I, Level II and Level III; details of the subjects to be offered are given below. There will be no need to travel to Flinders University for the subjects taught on the Adelaide campus.

In 1996, the Flinders University Modern Greek sequence will be available at all three levels. Students will be able to enrol in the following semester-long subjects:

#### Level I

- 3101 Beginners' Modern Greek I (SI) MGRE 1001
- 1580 Beginners' Modern Greek I (S2) MGRE 1001
- 4162 Intermediate Modern Greek I (SI) MGRE 1011
- 7667 Intermediate Modern Greek I (S2) MGRE 1012

#### Level II

- 6046 Intermediate Modern Greek II (SI) MGRE 2001
- 2696 Intermediate Modern Greek II (S2) MGRE 2002
- 1847 Modern Greek Advanced IIA (SI) MGRE 2011
- 9067 Modern Greek Advanced IIA (S2) MGRE 2012

### Level III

2212 Modern Greek Advanced III (SI) MGRE 3001

4316 Modern Greek Advanced III (S2) MGRE 3002

9698 Modern Greek Advanced IIIA (SI) MGRE 3011

1289 Modern Greek Advanced IIIA (S2) MGRE 3012

For details on all subjects please contact the Modern Greek office at 201 2016 room 215 Humanities Building, Flinders University; or at 303 3017 room 135 Napier Building, University of Adelaide.

Information on enrolment procedures is available from the Faculty of Arts, University of Adelaide or at the Modern Greek office above.

### 3101 Beginners' Modern Greek I (SI) MGRE 1001

level: I points value: 3 duration: Semester 1

contact hours: lectures and tutorials (4 hours per week)

*language level:* This topic is designed for students who have had no formal instruction in the language (ie. basic grammar, reading and writing) at any school level. For those who have had some, see under 1580 MGRE 1002 below.

*structure and content:* There are two interconnected study components in this topic: (a)*Greek language* (two hours per week, plus special tutorials with a computer language program): systematic introduction to the language through class interaction for gradually improving communication skills; all grammar explanations in English. Regular class assessment; (b) *Greek Culture and Society* (two hours per week): lectures and class discussion on "what is Greek culture?" as viewed by Europeans and by Greeks in Greece and Australia. Assessment is based on a class project.

### 1580 Beginners' Modern Greek I (S2) MGRE 1002

level: I points value: 3 duration: semester 2

contact hours: lectures and tutorials (4 hours per week)

*prerequisites:* 3101 MGRE 1001 (or equivalent); or consent of the topic convenor.

*language level:* This topic is designed for those students who have had the equivalent of 3101 MGRE 1001 language instruction (basic grammar, reading and writing) at school.

*structure and content:* There are two interconnected study components in this topic: (a)*Greek language, structure and development* (two hours per week, plus special tutorials with a computer-language program): this includes a review of the fundamental aspects of Greek grammar and introduces the student to the

writing of simple passages; further class interaction for the improvement of communication skills. Regular class assessment; (b)*Greek Culture and Society* (two hours per week, lectures, discussion, demonstrations): Aspects of Greek culture, from antiquity to the present, are discussed; these include: dance and music, theatre and ritual, cinema and contemporary culture. Invited guests provide expert insights to some cultural areas. For assessment students choose a topic for further research.

### 4162 Intermediate Modern Greek I (SI) MGRE 1011

level: I points value: 3 duration: semester 1

contact hours: lectures and tutorials (4 hours per week)

*language level:* This topic is designed for students who have had the equivalent of 1580 MGRE 1002 formal language instruction (ie. grammar, reading and writing) in an Australian high school or abroad.

*structure and content:* There are two interconnected study components in this topic: (a)*Greek language, structure and development* (two hours per week, including tutorials in the computer laboratory): language workshops for gradually improving conversation and composition skills based on a variety of contemporary themes: Greek culture and its multiple contexts; culture and the media; youth issues in Greece and Australia. Regular class assessment; (b) *Greek Culture and Society* (two hours per week, lectures and class discussion): 'Culture' is discussed from the perspectives of cultural anthropology, literary studies, linguistics and history. Issues to be discussed include: Greek cultural continuity from antiquity to the present; traditional vs modern culture; cultural identity in Greece and Australia. Assessment is based on a class project.

### 7667 Intermediate Modern Greek I (S2) MGRE 1012

level: I points value: 3 duration: semester 2

contact hours: lectures and tutorials (4 hours per week)

*prerequisites:* 4162 MGRE 1011 (or equivalent); or consent of the topic convenor. *language level:* This topic is designed for students who have had the equivalent of 4162 MGRE 1011 formal language instruction (ie. grammar, reading and writing) in an Australian high school or abroad.

*structure and content:* There are two interconnected study components in this topic: (a)*Greek language, structure and development* (two hours per week, plus special tutorials in computer language lab): language workshops for gradually improving sentence structure, paragraph connection, and cohesion in expression based on contemporary issues; research and

bibliography techniques. Regular class assessment.; (b)*Greek Culture, Literature and Society* (two hours per week, lectures, demonstrations, discussion): Aspects of Greek culture, from antiquity to the present, are discussed and analysed; these include: folklore and contemporary culture, dance and music, theatre and ritual, language and literature, philosophy and politics. Guest-lectures provide expert insights to selected cultural areas. Assessment is based on individual research projects.

**6046 Intermediate Modern Greek II (SI)  
MGRE 2001**

*level:* II *points value:* 4 *duration:* semester 1  
*contact hours:* lectures and tutorials (4 hours per week)  
*prerequisites:* 1580 MGRE 1002 (or equivalent); or consent of the topic convenor.

*content:* the contents of this topic are similar to 4162 MGRE 1011. However, the students have an extra hour per week to work on a computer-based language program and are assessed accordingly.

**2696 Intermediate Modern Greek II (S2)  
MGRE 2002**

*level:* II *points value:* 4 *duration:* semester 2  
*contact hours:* lectures and tutorials (4 hours per week)  
*prerequisites:* 6046 MGRE 2001 (or equivalent); or consent of the topic convenor.

*content:* The contents of this topic are similar to 7667 MGRE 1012. However, the students have an extra hour per week to work on a computer-based language program and are assessed accordingly.

**1847 Modern Greek Advanced IIA (SI)  
MGRE 2011**

*level:* II *points value:* 4 *duration:* semester 1  
*contact hours:* lectures and tutorials (4 hours per week)  
*prerequisites:* 7667 MGRE 1012 (or equivalent); or consent of the topic convenor.

*language level:* This topic is designed for students who have had the equivalent of 7667 MGRE 1012 formal language instruction (ie. grammar, reading and writing) in an Australian high school or abroad.

*structure and content:* There are two interconnected study components in this topic: (a) *Greek culture, literature and society* (two hours per week): lectures and tutorials on a range of contemporary issues as reflected in short stories, poetry, essays, films; for example: Greek cultural continuity and the "classical heritage" in literature; "traditional vs modern" ways of life; youth and the "generation gap." Assessment is

based on individual research presentations and essays; (b) *Greek language, conversation and composition* (two hours per week): language workshops for improving essay writing based on a range of contemporary issues: ecology, urban living, comparison of Greek vs. Australian-Greek cultural contexts. Assessment is based on individual compositions and class presentations.

**9067 Modern Greek Advanced IIA (S2)  
MGRE 2012**

*level:* II *points value:* 4 *duration:* semester 2  
*contact hours:* lectures and tutorials (4 hours per week)  
*prerequisites:* 1847 MGRE 2011 (or equivalent); or consent of the topic convenor.

*structure and content:* There are two interconnected study components in this topic: (a) *Greek culture, literature and society* (two hours per week): a study and discussion of a range of texts and films in their cultural and historical context. Issues to be examined include: men and women and their place in today's society; the Greek "migration experience"; history and cultural diversity. Assessment is based on individual research presentations and essays; (b) *Greek language, conversation and composition* (two hours per week): developing further compositional and critical skills through examination of a range of contemporary issues: mass culture and the media; environment and technology; Europe and Greece. Assessment is based on individual compositions and class presentations.

**2212 Modern Greek Advanced III (SI)  
MGRE 3001**

*level:* III *points value:* 6 *duration:* semester 1  
*contact hours:* lectures and tutorials (4 hours per week)  
*prerequisites:* 2696 MGRE 2002 (or equivalent)

*content:* The contents of this topic are similar to 1847 MGRE 2011. However, an extra assignment is included in the assessment.

**4316 Modern Greek Advanced III (S2)  
MGRE 3002**

*level:* III *points value:* 6 *duration:* semester 2  
*contact hours:* lectures and tutorials (4 hours per week)  
*prerequisites:* 2212 MGRE 3001 (or equivalent)

*content:* The contents of this topic are similar to 9067 MGRE 2012. However, an extra assignment is included in the assessment.

**9698 Modern Greek Advanced IIIA (SI)  
MGRE 3011**

*level:* III *points value:* 6 *duration:* semester 1

*contact hours:* lectures and tutorials (4 hours per week)

*prerequisites:* 9067 MGRE 2012 (or equivalent); or 4316 MGRE 3002 (or equivalent).

*structure and content:* (a) *Greek 20th century writers and European literary movements* : a study and discussion of narrative techniques and expression in relation to tradition and modernism, the fictional writer and history. Writers to be studied may include: Theotokas, Kazantzakis, Karapanou, Tachtsis, Hatzis, Fakinou, et al. Assessment is based on individual presentations and essays on chosen research themes; (b) *Greek language and the professions* : workshops for developing writing skills for professional purposes (business letters, resume, applications, reports, etc.) Regular assignments for each type of professional text for assessment.

**1289 Modern Greek Advanced IIIA (S2)  
MGRE 3012**

*level:* III *points value:* 6 *duration:* semester 2

*contact hours:* lectures and tutorials (4 hours per week)

*prerequisites:* 9698 MGRE 3011 (or equivalent)

*structure and content:* (a) *Greek 20th century writers and European literary movements* : a study and discussion of poetic expression in Post-War II Greek literature in relation to tradition and modernism. Poets may include: Cavafy, Seferis, Elytis, Ritsos, Engonopoulos, Vacalo, et al. Assessment is based on individual presentations and essays on chosen research themes; (b) *Greek language and the professions* : workshops on translation techniques for professional purposes. Texts include: newspaper articles, social services leaflets, business reports, etc. Regular group and individual assignments for every type of text for assessment.

**Spanish and Portuguese Language and Literature**

**Flinders University - School of Languages,  
Department of Spanish and Portuguese**

**Spanish**

The Flinders University teaches Spanish at The University of Adelaide for students enrolled in Adelaide courses who may enrol in Spanish subjects and count them towards their Adelaide degrees.

Spanish is available at The University of Adelaide at Levels I, II and III for beginners and at Levels I and II for advanced students; details of the topics offered are given below. This means that Adelaide students can

complete a three year sequence in Spanish at beginners Level at The University of Adelaide without the need to travel to Flinders University.

There are, however, some Spanish topics that are only taught at Flinders University, such as Spanish for Science and Medical Students and Spanish III Advanced. Students wishing to take such topics can only do so by attending lectures at Flinders University. For details on these topics, consult Vol. II of the Calendar of Flinders University.

Enrolments in Spanish topics will take place where the topics are taught. Thus, University of Adelaide students taking Spanish at Levels I, II and III will be able to enrol at The University of Adelaide. Information on enrolment procedures is available from the School of Languages, Flinders University, or from the Faculty of Arts, University of Adelaide.

*note:* It is important to note that students enrolling in or withdrawing from any of these subjects must complete forms for both Adelaide and Flinders Universities.

**Level I**

**7369 Spanish IB Part I - SPAN 1101**

*level:* I *points value:* 3 *duration:* semester 1

*pre-requisite:* no prior knowledge of the language is assumed.

*contact hours:* 4 hours per week, plus 1 hour language laboratory.

*content:* this topic is specifically for those who want to approach the Spanish language for the first time. It uses the latest communicative approaches to language by stressing involvement in two sorts of activities: those relating directly to students, their interests and lives, and those relating to the world of Spain and Latin America. The primary goal is to teach students to interact in Spanish as naturally and as spontaneously as possible.

*assessment:* There will be 3 tests involving aural comprehension, vocabulary, grammar and essay writing in Spanish. One exam, with the same format as the tests but longer in duration, will be held at the end of the Semester. Oral proficiency will be tested in one exam also held at the end of the Semester.

**8527 Spanish IB Part II - SPAN 1102**

*level:* I *points value:* 3 *duration:* semester 2

*prerequisite:* Successful completion of SPAN 1101 Part I or consent of the topic convenor.

*contact hours:* 4 hours per week, plus 1 hour language laboratory.

---

**Level II**

---

*content:* this topic is for those who have completed SPAN 1101 Part I or have an equivalent introduction to the language. It uses the latest communicative approaches to language by stressing involvement in two sorts of activities: those relating directly to students, their interests and lives, and those relating to the world of Spain and Latin America. The primary goal is to teach students to interact in Spanish as naturally and as spontaneously as possible.

*assessment:* There will be 4 tests involving aural comprehension, vocabulary, grammar and essay writing in Spanish. One exam, with the same format as the tests but longer in duration, will be held at the end of the Semester. Oral proficiency will be tested in one exam also held at the end of the Semester.

**9564 Spanish IA Part I - SPAN 1111**

*level:* I     *points value:* 3     *duration:* semester 1

*prerequisites:* Year 12 (SACE) standard in Spanish, an equivalent knowledge of the language or consent of the Director of Studies.

*contact hours:* 5 hours

*content:* This topic is specifically for native speakers of Spanish and students who have sufficient knowledge of the language. It is designed to consolidate students' language skills through grammar and composition exercises. It also further develops the aural/oral communication skills of the student through continuous oral practice in the classroom and language and computer laboratory exercises. The readings and cultural component will focus on contemporary issues pertaining to the Spanish-speaking countries.

*assessment:* continuous assessment, tests, final written exam and communicative skills exam.

**7449 Spanish IA Part II - SPAN 1112**

*level:* I     *points value:* 3     *duration:* semester 2

*contact hours:* 5 hours per week

*prerequisites:* SPAN 1111 Spanish IA Part I or consent of the Director of Studies.

*content:* this topic is for those who have completed SPAN 1111. It is designed to continue the development of students' language skills, both spoken and written, initiated in SPAN 1111, through grammar exercises, composition and aural/oral practice. The literary readings and cultural component will continue to focus on contemporary issues pertaining to the Spanish-speaking countries.

*assessment:* continuous assessment, tests, final written exam and communicative skills exam.

**2402 Spanish IIB Part I - SPAN 2101**

*level:* I     *points value:* 4     *duration:* semester 1

*prerequisite:* SPAN 1102, Spanish IB Part II.

*contact hours:* 5 hours per week

*content:* This topic is for those who have completed SPAN 1102. It consolidates and extends the language work done in SPAN 1102 and provides further practice through grammar and composition exercises. It also offers further aural/oral practice in the classroom and language and computer laboratory exercises. The readings and cultural component will focus on contemporary issues pertaining to the Spanish-speaking countries.

*assessment:* continuous assessment, tests, final written exam and communicative skills exam.

**2173 Spanish IIB Part II - SPAN 2102**

*level:* II     *points value:* 4     *duration:* semester 2

*contact hours:* Language: 5 hours per week.

*prerequisites:* SPAN 2101 Spanish IIB, Part I.

*content:* This topic is for those who have completed SPAN 2101. It consolidates and extends the language work done in SPAN 2101 and provides further practice through grammar and composition exercises. It also further develops the aural/oral communication skills of the student through continuous oral practice in the classroom and language and computer laboratory exercises. The readings and cultural component will continue to focus on contemporary issues pertaining to the Spanish-speaking countries.

*assessment:* continuous assessment, tests, final written exam and communicative skills exam.

**8694 Spanish IIA Part I - SPAN 2111**

*level:* II     *points value:* 6     *duration:* semester 1

*contact hours:* 4/5 hours per week

*prerequisites:* SPAN 1112 Spanish IA Part II

*content:* The topic will consolidate and extend the work done in Spanish IA and provide further practice through grammar exercises, composition in Spanish and the development of aural/oral communication skills through conversation classes and other means.

*assessment:* continuous assessment, tests, final written exam and communication skills exam.

**7452 Spanish IIA Part II - SPAN 2112**

*level:* II *points value:* 6 *duration:* semester 2

*contact hours:* 3/4 hours per week

*prerequisites:* SPAN 2111 Spanish IIA Part I

*content:* In this topic a selection of novels by contemporary Spanish and Latin American writers will be studied. Emphasis will be placed on the close reading of texts. The novels, set in the context of the political, social and cultural developments of the country and period, will be analysed in class.

*assessment:* continuous assessment, tests, final written exam and communication skills exam.

*contact hours:* 4 hours per week

*prerequisites:* None

*contents:* the goals of this course are to familiarise students with the basic structures of Portuguese and to encourage students to feel free to interact in Portuguese as naturally and as spontaneously as possible and to establish a minimal level of skills in aural comprehension and conversation.

*assessment:* written exams (50%), oral assessment

---

**Level III**

---

**6280 Spanish IIIB Part I Language - SPAN 3101**

*level:* III *points value:* 6 *duration:* semester 1

*contact hours:* 4/5 hours per week

*prerequisites:* SPAN 2102 Spanish IIB Part II

*content:* The topic will consolidate and extend the work done in Spanish IIB and provide further practice through grammar exercises, composition in Spanish and the development of aural/oral communication skills through conversation classes and other means.

*assessment:* continuous assessment, tests, essays, exams and oral exam.

**1696 Spanish IIIB Part II Literature - SPAN 3102**

*level:* III *points value:* 6 *duration:* semester 2

*contact hours:* 4/5 hours per week

*prerequisites:* SPAN 2102 Spanish IIB Part II

*content:* In this topic a selection of novels by contemporary Spanish and Latin American writers will be studied. Emphasis will be placed on the close reading of texts. The novels, set in the context of the political, social and cultural developments of the country and period, will be analysed in class. In addition to the above, Adelaide students need to complete a cultural component. The content of this section varies. In 1996 students will be able to choose SPAN 2502 Introduction to Latin America in Semester I or SPAN 2504 Language, Culture and Society in Spain and Latin America in Semester II.

*assessment:* continuous assessment, tests, essays, exams and oral exam.

**2755 Beginners Portuguese Part II - PORT 2102**

*level:* I/II *points value:* 4 *duration:* semester 2

*contact hours:* 4 hours per week

*prerequisite:* A satisfactory standard in Port 2101 Part I or consent of Topic Coordinator.

*content:* This topic is for those students who have completed PORT 2101 or have had an equivalent introduction to the language. It uses the latest communicative approaches and aims to develop further the students' skills in both spoken and written Portuguese. This topic will also focus on relevant aspects of culture, history, traditions, sports and the arts, giving special emphasis to the literatures of the different Portuguese speaking countries.

*assessment:* written exams (50%), oral assessment (50%)

**2693 Advanced Portuguese Part I - PORT 3101**

*level:* II/III *points value:* 4 *duration:* semester 1

*contact hours:* 3 hours per week

*prerequisite:* A satisfactory standard in PORT 2102 or consent of Topic Coordinator.

*content:* This topic provides the student with advanced training in oral, aural and written Portuguese as well as a more sophisticated treatment of the cultures and customs of the Portuguese speaking peoples. Classes will include the extensive use of music, role playing and videos and written materials reflecting the diverse aspects of every day life.

*assessment:* periodic tests on aural comprehension and writing skills, as well as an oral exam and an aural and written exam at the end of the semester.

**7445 Advanced Portuguese Part II - PORT 3102**

*level:* II/III *points value:* 4 *duration:* semester 2

*contact hours:* 3 hours per week

*prerequisite:* A satisfactory standard in PORT 3101 or consent of Topic Coordinator.

**3034 Beginners Portuguese Part I - PORT 2101**

*level:* I/II *points value:* 4 *duration:* semester 1

*content:* This topic will continue to provide the students with advanced training in oral, aural and written Portuguese as well as a more sophisticated treatment of the cultures and customs of the Portuguese speaking peoples. Classes will include the extensive use of music, role playing and videos and written materials reflecting the diverse aspects of every day life. Literary texts by a representative selection of writers from the Portuguese speaking countries will be studied.

*assessment:* periodic tests on aural comprehension and writing skills, as well as an oral exam and an aural and written exam at the end of the semester.

## Cognates

### 6994 Introduction to Latin America - SPAN 2502

*level:* II/III *points value:* 4 *duration:* semester 1  
*contact hours:* 2-3 hours per week

*prerequisite:* a grade Pass or better in any first year course of the Faculty of Arts.

*content:* This topic will introduce the student to the major social, political and economic issues facing Latin America today, employing a multi-disciplinary approach, videos and class discussions. Contemporary issues involving governance, economic development, social change, human rights and ethnicity issues will be covered.

*assessment:* quizzes, tests and an essay.

### 3144 Language, Culture and Society in Spain and Latin America - SPAN 2603

*level:* IV/III *points value:* 4 *duration:* semester 2  
*contact hours:* 2 hours per week

*prerequisites:* SPAN 1102 Spanish IB Part II or equivalent

*content:* This topic will study the use of language in relation to the cultures and societies of the Spanish-speaking countries.

Aspects of communicative behaviour, cultural differences, paralinguistics and stylistic elements will be examined. Particular attention will be given to the expressive rules of culture and social interaction.

*assessment:* 1 oral presentation and one essay at the end of the first part (Spain); 1 essay at the end of the second part (Latin America).

## Arabic Language and Culture Sydney/Adelaide Universities

Since 1990, the South Australian Institute of Languages has been able to negotiate the teaching of University of Sydney Arabic Language and Culture

subjects on The University of Adelaide campus. Arabic subjects are able to be counted towards the Bachelor of Arts.

The studies in Arabic offered aim to build and develop proficiency in Modern Standard Arabic (ie the Arabic of contemporary literature, press and educated speech throughout the Arab world) with due attention to the four skills of reading, writing, comprehension and speech, using the audio-lingual approach as much as possible. These subjects are expected to enable the student to read material in modern literary Arabic, comprehend educated speech, and write and converse in Arabic on a reasonable range of familiar topics.

Interested students should contact the South Australian Institute of Languages (SAIL) for further information about Arabic Studies and enrolment procedures.

### 4991 Arabic IB

*level:* I *points value:* 6 *duration:* full year

*availability:* in 1996 Beginners' Arabic could be offered subject to high student demand and formal approval.

*contact hours:* 5 hours per week (4 hours language, 1 hour culture)

*content:* This subject for beginners starts with the Arabic alphabet and aims at equipping the student with essentials of Arabic morphology and syntax and the principles Arabic compositions. At the end of the year the diligent student should be able to read samples of Modern Standard Arabic, eg from the press, a play or a short story and comprehend and reply to some spoken formal Arabic. The history and culture hour will be conducted in English in the form of lectures and discussion. Later in the year, it is hoped to use Arabic occasionally in this hour, within the range of vocabulary and structures familiar to the students.

*assessment:* continuous language assessment through exercises and regular homework (50%); final language exam (25%); 2 essays on Arab culture (25%)

### 6879 Introduction to Contemporary Arab Culture

*level:* I *points value:* 3 *duration:* semester 1

*contact hours:* 1 two hour lecture and 1 one hour tutorial a week

*content:* An introduction to the social, economic, political, religious and artistic aspects of contemporary Arab Culture. The subject will discuss the current forces influencing contemporary Arab societies, Islam and modernity, social structure and hierarchy, family and community, the role of women in the society, trade and economic issues, art and architecture, East-West relationships and the search for cultural identity.

*assessment:* to be advised

### 7750 Arabic IIB

level: II

points value: 6

availability: not offered in 1996

prerequisites: Arabic IB

*contact hours:* 5 hours per week: 2 hours practical language skills (continuing with volume II of the same text book); 1 hour introductory translation skills from and into Arabic (material from current Arabic writing e.g. the press, to be used); 1 hour contemporary Arabic: the Essay; 1 hour contemporary Arabic: the Short Story.

*content:* This subject follows on from Arabic IB offered in 1994. In the 2 hours on practical language skills, essentially the same approach of Arabic IB will be followed, with more developed dialogues, exercises, drills and composition assignments, and more scope for guided topical conversation. In the translation hour more emphasis will be given to Arabic into English translation; the selections of passages will represent contemporary Arabic writing on current affairs, general knowledge, community and business matters. The Contemporary Literature hours, using special Readers with glossaries and questions, introduce the students to authentic modern Arabic writing. Students will be required to write short essays in Arabic on aspects covered in the course. Continuous assessment applies to all sections of the course, including regular language and translation exercises. Further details, including reading lists of Arabic literature in English translation and on the modern Arab World will be available.

*assessment:* examination (or equivalent) on practical language skills: (20%); examination on Contemporary Literature: (20%); continuous assessment on translation: (20%); continuous assessment of practical language skills: (20%); continuous assessment on literature: (20%)

### 8914 Arabic IIIB

level: III

points value: 12

duration: full year

prerequisites: Arabic IIIB

*contact hours:* 4 hours plus 1 hour language lab per week; 2 semesters

*content:* This subject builds upon Arabic IIB. It aims to develop further proficiency in Modern Standard Arabic following essentially the same approach already established. More emphasis will be placed on samples of contemporary Arabic literature and the Arabic press as well as on translation skills from and into Arabic. Two hours per week will be devoted to language skills using the integrated audio-lingual approach, one hour per week to literature both prose and poetry and one hour per week to practical translation skills.

*assessment:* continuous assessment based on regular assignments and classroom tests (50%); final examination (50%)

### Russian Language Melbourne/Flinders Universities

In 1989, new arrangements for the teaching of languages resulted in the University of Melbourne subject 176-102 Russian IA (beginners' Russian) being taught (through Flinders University of South Australia) on The University of Adelaide campus. The subject could be counted towards the B.A. degrees of both The University of Adelaide and the Flinders University.

In 1996 Flinders University will host Russian IIIA (Advanced Russian) and this subject will be taught on The University of Adelaide campus.

### 3306 Russian I

level: I

points value: 6

*availability:* In 1996 a Beginners' Russian subject could be offered subject to high student demand and formal approval.

*contact hours:* 5 hours per week

*content:* A beginners' course covering all areas of the language, including oral, but concentrating on the grammatical structure

*assessment:* Class work, both oral and written, as well as regular assignments, are taken into account. In each semester there will be at least one 1 hour test (in the first semester usually two), and a 15 minute oral exam. At the end of the year one 3 hour paper. Extra assessment, including one 1 hour test.

This subject is for students with no previous knowledge of Russian. It aims to acquaint the student with all the basic structures of Russian and provide them with a basic active vocabulary of around 1300 words and a further 2000 passive words. Within the range of these the student should be able to read, write and conduct conversation.

### 4015 Russian II (Intermediate Russian)

level: II

points value: 8

*availability:* not offered in 1996

*prerequisites:* Russian I

*contact hours:* 5 hours per week; 2 semesters.

*content:* The course aims to complete all the basic grammar and consolidate previous knowledge. In effect this means for most students revision of all the grammar with the addition of some finer points.

Attention is given to the practical study of Russian Word Formation as a means of expanding vocabulary in a structured way. In the second semester translation is treated more formally especially from English into Russian, the aim being to direct attention to methods of expressing the specific things in Russian, this being the same procedure as used in speech. The dictionary use involved is also most useful at this stage in the building-up of vocabulary.

*assessment:* continuous assessment throughout the year. In each semester at least 1 hour written test (in the first semester usually two) and a 15 minute oral exam and one 3 hour examination at the end of the year; regular assignments.

#### 4465 Russian III (Advanced Russian)

*level:* III *points value:* 12 *duration:* full year

*prerequisites:* Russian II; or equivalent approved by the Head of Department, Melbourne University

*contact hours:* 5 hours per week; 2 hours advanced grammar, including translation in both directions, 1 hour composition; 2 hours study of literary texts

*content:* This course aims to provide the student with solid competence in all areas of language use. Also an understanding of the language used in literature along with basic literary criticism.

*assessment:* 1 one hour test on language at the end of first semester; 2 three hour papers, one on language, one on literature at the end of the year

Continuous assessment throughout the year consists of regular language assignments and short essays on the literature.

### Indonesian Language

#### Level I

---

#### 7049 Indonesian Introductory, Part I

*level:* I *points value:* 3 *duration:* semester I

*contact hours:* 5 hours per week

*content:* This subject is concerned with developing a preliminary communicative ability in a number of everyday situations and to develop a knowledge and understanding of modes of Indonesian interaction in different social contexts.

*assessment:* continuous written and end of semester written and oral tests. The Culture and Society component will be assessed by film reviews.

#### 5492 Indonesian Introductory, Part II

*level:* I *points value:* 3 *duration:* semester 2

*contact hours:* 5 hours per week

*content:* This subject is concerned with developing a preliminary communicative ability in an number of everyday situations and to develop a knowledge and understanding of modes of Indonesian interaction in different social contexts.

*assessment:* continuous written and end of semester written and oral tests. The Culture and Society component will be assessed by film reviews.

#### 5957 Indonesian Introductory A, Part I

*level:* I *points value:* 3 *duration:* semester I

*prerequisites:* SACE Stage 2 Indonesian with 15 or better, or permission of Convenor

*contact hours:* 4 hours per week

*content:* The subject aims to develop listening, speaking and writing skills in Indonesian and to extend students' understanding of the structure of Indonesian through exercises in grammar and translation

*assessment:* written and oral tests

#### 7336 Indonesian Introductory A, Part II

*level:* I *points value:* 3 *duration:* semester 2

*prerequisites:* 5957 Indonesian, Introductory A, Part I, with a grade of Pass I or better

*contact hours:* 4 hours per week

*content:* The subject aims to develop listening, speaking and writing skills in Indonesian and to extend students' understanding of the structure of Indonesian through exercises in grammar and translation

*assessment:* written and oral tests

#### Level II

---

#### 9193 Indonesian, Intermediate, Part I

*level:* II *points value:* 4 *duration:* semester I

*prerequisites:* 5957 Indonesian, Introductory Part II, with a grade of Pass I or better

*contact hours:* 5 hours per week

*content:* The subject aims to develop communicative skills and to extend students' understanding of language structure in modern Indonesian. Two hours per week are devoted to translation and grammar. Three hours per week are devoted to small group tutorials which aim to develop speaking, listening and writing skills in Indonesian.

*assessment:* written and oral tests

### 5346 Indonesian, Intermediate, Part II

level: II points value: 4 duration: semester 2

prerequisites: Indonesian, Intermediate, Part I, with a grade of Pass I or better

contact hours: 5 hours per week

content: The subject aims to develop communicative skills and to extend students' understanding of language structure in modern Indonesian. Two hours per week are devoted to translation and grammar. Three hours per week are devoted to small group tutorials which aim to develop speaking, listening and writing skills in Indonesian.

assessment: written and oral tests

## Linguistics

### Level II

---

#### 9744 Computer Assisted Language Learning II

level: II points value: 4 duration: semester 1 or 2

quota: will apply

assumed knowledge: an understanding of Windows and MS-DOS

prerequisites: any Level I language (other than English) subject

contact hours: 3 hours per week

content: The subject offers an introduction to the use of computers in language learning. Topics in the subject include: the role of the word processor, applications for tutorial programs, text reconstruction, authoring and internet resources for language teaching. The course offers a balance in practical computing skills and a critical understanding of the features of second language acquisition which come into play in using computers in language learning. The course is suitable for students thinking of pursuing a career of teaching Western European languages. Students are advised to see the lecturer in advance of the course if they wish to prepare materials using the following languages: Amharic, Arabic, Croatian, Czech, Greek, Hebrew, Lithuanian, Persian, Polish, Portuguese, Romanian, Russian, Serbian, Slovak or Slovenian.

The subject is taught using the MS-DOS platform. Some reference will be made to the Macintosh platform.

assessment: Computing: weekly exercises and semester test 30%; Other: essays and project 70%

### 7892 Foundations of Linguistics II

level: II points value: 8 duration: full year

quota: will apply

prerequisites: a pass in English I or any other language other than English subject at Level I to the value of 6 points or alternative approved by the Professor of Linguistics

contact hours: 1 two hour lecture per week and 1 tutorial per fortnight

content: No previous knowledge of linguistics is assumed. The course will give students an overview of the field of modern linguistics, basic skills in linguistics and sociolinguistic analysis and an understanding of the educational, political and social aspects of language issues in Australia. The course is divided into two main parts, an introduction to modern linguistics in the first semester and language issues in Australia in the second.

assessment: practicals (20%), project or essay (30%), exam (50%)

### Level III

---

#### 1577 Computer Assisted Language Learning III

level: III points value: 6 duration: semester 1 or 2

prerequisites: any Level I language (other than English) subject

contact hours: 3 hours per week

content: The subject offers an introduction to the use of computers in language learning. Topics in the subject include: the role of the word processor, applications for tutorial programs, text reconstruction, authoring and internet resources for language teaching. The course offers a balance in practical computing skills and a critical understanding of the features of second language acquisition which come into play in using computers in language learning. The course is suitable for students thinking of pursuing a career of teaching Western European languages. Students are advised to see the lecturer in advance of the course if they wish to prepare materials using the following languages: Amharic, Arabic, Croatian, Czech, Greek, Hebrew, Lithuanian, Persian, Polish, Portuguese, Romanian, Russian, Serbian, Slovak or Slovenian.

The subject is taught using the MS-DOS platform. Some reference will be made to the Macintosh platform.

assessment: Computing: weekly exercises and semester test 30%; Other: essays and project 70%

**4829 Computer Assisted Language Learning: Project III**

*level:* III *points value:* 6 *duration:* semester 1 and 2  
*quota:* will apply

*prerequisites:* 9744 Computer Assisted Language Learning II

*corequisites:* 1577 Computer Assisted Language Learning III

*assumed knowledge:* Knowledge of a computer language or ability to prepare hypercard stacks and the like

*contact hours:* one hour tutorial and one hour practical per week

*content:* students in this subject are expected to be, or wish to be, language teachers. It is designed to offer students the opportunity to develop the skills and knowledge gained in CALL II into a major project. Contact hours will largely be of the tutorial and practical format where students present work for critical evaluation by others and undertake self-directed reading to inform their project. The project may be in any negotiated area of computer assisted language learning. Typical areas might be those of the preparation of materials using hypermedia or a research project in the area of CALL and pedagogy.

*assessment:* project work 100%

**4914 Foundations of Linguistics III**

*level:* III *points value:* 12 *duration:* full year  
*quota:* will apply

*prerequisites:* a pass in subjects in English II or Level II languages other than English to the value of 8 points or alternative approved by the Professor of Linguistics

*contact hours:* 1 two hour lecture per week and 1 tutorial per fortnight

*content:* No previous knowledge of linguistics is assumed. The course will give students an overview of the field of modern linguistics, basic skills in linguistics and sociolinguistic analysis and an understanding of the educational, political and social aspects of language issues in Australia. The course is divided into two main parts, an introduction to modern linguistics in the first semester and language issues in Australia in the second.

*assessment:* practicals (20%), project or essay (30%), exam (50%)

**5222 Language and Environment III**

*level:* III *points value:* 6 *duration:* semester 2

*prerequisites:* 7892/4914 Foundation of Linguistics II/III

*contact hours:* 1 lecture and 1 tutorial per week

*content:* This subject examines both the central role of human languages in the perceptions of environmental matters (language of ecology) and the nature of the environment in which such languages can survive (ecology of language). Students will learn to apply available linguistic techniques and methods to the analysis of environmental discourse and will learn about the interdependencies between linguistic and cultural diversity. A wide range of primary English language documents will be analysed and contrasted with environmental discourse in languages other than English. Students will find out about the rapidly growing ecolinguistic literature published around the world. Topics for discussion include: Ecospeak, environmental metaphors, upgrading environmental terminology, cross-cultural discourse about environmental issues.

*assessment:* 1 essay 50%; 1 practical assignment 30%; 1 tutorial presentation 20%

**6549 Language Maintenance and Language Planning III**

*level:* III *points value:* 6 *duration:* semester 1

*prerequisites:* Foundations of Linguistics II

*contact hours:* 1 lecture per week and 1 tutorial per week

*content:* Students will be familiarised with the ecology and sociology of language approaches to language maintenance as well as the technical linguistic apparatus needed in the area of language engineering. Particular attention will be given to language planning in Australia and neighbouring countries. At the end of this course students will have an understanding of the wider ramifications of language planning and maintenance as well as skills in the area of micro language engineering

*assessment:* essay (30%), tutorial presentation or practical work (20%), exam (50%)

**8262 Language, Cognition and Reality III**

*level:* III *points value:* 6 *duration:* semester 2

*prerequisites:* Foundation of Linguistics II

*contact hours:* 1 lecture per week and 1 tutorial per week

*content:* This subject is concerned with the role the lexical and grammatical structures of languages play in shaping their users' perceptions of reality. It will begin with the classical Sapir-Whorf hypothesis of linguistic relativity and consider more recent findings in the area of categorisation, environmental discourse and political rhetoric. Particular attention will be paid to the role of linguistic and conceptual diversity in the 21st century.

*assessment:* essay (30%), tutorial presentation (20%), exam (50%)

## Mathematics

### 4425 Quantitative Methods Using Computers I

*level:* I    *points value:* 3    *duration:* semester I

*assumed knowledge:* no mathematical or computing knowledge assumed.

*restriction:* a Level I subject designed for Arts students, not to be counted towards any degree with either Mathematics I or IM.

*contact hours:* 2 lectures and one 2 hour practical per week.

*content:* This subject will introduce students to some of the ways the computer is used in the acquisition, production and presentation of information. The course will introduce students to word processing, spreadsheets, electronic mail and databases. The first half of the course will include a hands-on introduction to word processing and the use of electronic mail for the transfer of information, including bibliographic searches, and communication between staff and students. The second half of the course will consider spreadsheets and concentrate on two of their many uses: the analysis and presentation of numerical information by graphs, tables and charts, and the creation and manipulation of databases.

**NOTE:** This subject does not assume material from any of the PES Matriculation Mathematics subjects, nor any prior computer experience.

*assessment:* to be determined, in consultation with students, at the beginning of lectures.

### 4357 Mathematics IH

*syllabus details:* see B.Sc. in Faculty of Mathematical and Computer Sciences.

## Miscellaneous Arts subjects

### Level I

---

#### 1316 German for Reading and Research I

*level:* I    *points value:* 3    *duration:* full year

*assumed knowledge:* no familiarity with language concepts or any previous knowledge of German

*contact hours:* 2 lectures a week

*content:* The aim is to provide the specific skills necessary for accurate comprehension of written German in any subject area. There is thus no emphasis on the spoken language and the accent is on recognising forms and structures of language so as to be able to use the dictionary effectively. Students will first be taught the basics of German grammar and

pronunciation and given guidance in the use of suitable dictionaries and language reference works. This will be accompanied by translation work at an appropriate level. Students will then work on translating texts in their own subject area. Work outside class times involves preparing passages for translation.

*assessment:* by course work and end of semester tests. A detailed assessment plan will be circulated at commencement

### Level II

---

#### 4916 History and Development of Mass Communications II

*level:* II    *points value:* 4

*availability:* not offered in 1996

*quota:* will apply

*prerequisites:* a pass in any first year subject from the departments of English, German Studies, History, Politics, Anthropology, French Studies, Psychology, Classics, Philosophy

*contact hours:* 3 hours a week

*content:* This subject will trace the growth of mass communications in both print and electronic media, including the impact of new technologies. Illustrative examples will be derived from Australian, American and European sources. A number of important general themes will be discussed including censorship, freedom of information, satellite broadcasting, television violence etc

*assessment:* take-home exam of 2,000 words (60%); media file (3 exercises of 600 words each) (40%)

### Level III

---

#### 7329 Industry Practicum III (Arts)

*level:* III    *points value:* 0    *duration:* semester 2

*restriction:* This subject is available only to selected intending Honours students under the CEED Program.

*contact hours:* 13 hours lecture/tutorial

*content:* This subject provides students with the skills and preparation to undertake an industry related research project.

#### 7853 History and Development of Mass Communications III

*level:* III    *points value:* 6

*availability:* not offered in 1996

*quota:* will apply

*prerequisites:* any Level II pass from the departments of German Studies, Politics, English, History, French Studies, Anthropology, Psychology, Classics, Philosophy

*content:* This subject will trace the growth of mass communications in both print and electronic media, including the impact of new technologies. Illustrative examples will be derived from Australian, American and European sources. A number of important general themes will be discussed including censorship, freedom of information, satellite broadcasting, television violence etc

*assessment:* take home exam 3000 words (60%), media file—3 exercises of 750 words each (40%)

### Music studies for the degree of Bachelor of Arts

The Department of Music Studies offers subjects in Music from the Bachelor of Music. No subjects involving practical work are available in the Bachelor of Arts, but students may apply for admission to ensemble activities and instrumental or vocal studies as single study subjects.

All students should complete the six point group of subjects offered at Level I. Students in Level II and III may select from a variety of subjects, of which only Music Theory II is compulsory for all students.

For syllabuses of those subjects which are not provided below see under the Faculty of Performing Arts.

#### Level I

- 1268 Introduction to Music Literature I
- 1423 Introduction to Ethnomusicology I
- 3379 Introduction to Music History I
- 9461 Music Theory I (Arts)

#### Level II

- 8285 Australian Music II
- 5355 Early Twentieth Century Modernism II
- 1685 Ethnomusicology II
- 5384 Music Since the 1940's II
- 2225 Music Theory II (Arts)
- 9879 Musicology II

#### Level III

note: Music Theory II is a prerequisite for all Level III subjects.

- 3408 American Pathfinders in Music III\*
- 5915 Australian Music III
- 2645 Analysis Workshop III\*

- 3392 Chinese Music III\*
- 3122 Composition in Australia III
- 8945 Diaghilev's 'Ballets Russes' III
- 6989 Ethnomusicology IIIA
- 5638 Ethnomusicology IIIB
- 1492 Ethnomusicology IIIC
- 8661 Harmony Workshop III\*
- 1516 Japanese Music III\*
- 4851 Music Theory III
- 9189 Musicology IIIA
- 1256 Musicology IIIB
- 4127 Musicology IIIC
- 3771 Orchestration Workshop III
- 7140 Wagner III

\* May not be offered in 1996. Check the Music Studies Department at time of enrolment

### Honours Level

#### 1760 Honours Ethnomusicology (B.A.)

*level:* Honours *points value:* 24 *duration:* full year  
*see:* 1750 Honours Ethnomusicology

#### 5276 Honours Musicology (B.A.)

*level:* Honours *points value:* 24 *duration:* full year  
*see:* 9916 Honours Musicology

### Philosophy

There are semester subjects offered in philosophy at all three levels. Level I are offered both in the day and the evening.

As a general rule the Department requires two Level I subjects before proceeding to Level II subjects, the exception being Logic II which requires Logic I. Normally two Level II subjects are required before proceeding to Level III and this is normally recommended. See the details of Level II and of Level III subjects for exceptions to the normal requirement.

Note: all subjects are offered subject to availability of staff.

#### 6001 Argument and Critical Thinking I

*level:* I *points value:* 3 *duration:* semester 2  
*quota:* may apply  
*contact hours:* 2 lecture and 1 tutorial a week

*content:* The course explains and discusses the following notions as they apply to the analysis of written and spoken argument: truth, valid, sound, necessary, contingent, impossible, definition, circular, inconsistency, Venn diagrams, structure of arguments, opinion, belief, point of view, legal reasoning, induction, explanation, science and pseudoscience.

*assessment:* exam, essays

### 7743 Logic I

*level:* I    *points value:* 3    *duration:* semester 1

*quota:* may apply

*prerequisites:* There are no prerequisites, but students who are not competent in English are unlikely to benefit from the course.

*restriction:* 7743 Logic IH, 3037 Logic II, 4259 Logic IIIA

*contact hours:* 2 lectures and 1 tutorial a week

*content:* An introduction to modern formal logic.

*assessment:* exams

---

## Level I

---

### 9014 Philosophy IA: Introduction to Metaphysics

*level:* I    *points value:* 3    *duration:* semester 2

*quota:* may apply

*restriction:* 9014 Philosophy IHA

*contact hours:* 2 lectures and 1 tutorial a week

*content:* Beginning with an introduction to philosophy through a short study of some of Plato's dialogues, the course examines dualist and materialist theories of the relation between minds and bodies; the existence of God and the nature of knowledge.

*assessment:* essay, exam, and tutorial participation

### 5704 Philosophy IB: Morality, Society and the Individual

*level:* I    *points value:* 3    *duration:* semester 1

*quota:* may apply

*restriction:* 5704 Philosophy IHB

*contact hours:* 2 lectures and 1 tutorial a week

*content:* Ethics: Is there a rational basis for morality, whether in terms of self-interest, the will of God, the demands of society, or the greatest happiness of the greatest number? Our Place in Nature: Does sociobiology throw light on human nature, and what moral and political implications does it have? Animal

Rights. Problems of Freedom: Is there a conflict between human freedom and a law-governed nature? Is there a conflict between liberty and state authority?

*assessment:* essay, exam, and tutorial participation

---

## Level II

---

### 8606 Cognitive Science: Minds, Brains and Computers II

*level:* II    *points value:* 4    *duration:* semester 1

*quota:* may apply

*prerequisites:* passes in Level I Philosophy, Psychology, Computer Science or Mathematics subjects of at least 6 points value, at least 3 points of which are at Pass Div I level or better; or any alternative approved by the Head of Department

*contact hours:* 2 lectures and 1 tutorial a week

*content:* This subject provides an introduction to the philosophical foundations of Cognitive Science, which is a relatively new interdisciplinary field of study that embraces aspects of philosophy, psychology, computer science and neuroscience. Topics to be discussed will include some of the following: the nature of commonsense psychology and its relevance to a mature theory of mind; the computer as a model of the mind; classical and connectionist computational theories of cognition; computational models of consciousness.

*assessment:* essays and tutorial participation

### 4549 Issues in Philosophy of Language II

*level:* II    *points value:* 4

*availability:* not offered in 1996

*quota:* may apply

*prerequisites:* either (a) Passes in Level I Philosophy subjects to the value of 6 points, with a Pass Div I in 3 of those points, or (b) a pass in either 1938 Issues in the Contemporary Philosophy of Mind III, or (c) any other subject(s) approved by the Head of Department

*contact hours:* 2 lectures and 1 tutorial a week

*content:* This course will examine some central issues in the contemporary philosophy of language. These will include: the nature of a theory of meaning; theories of truth and reference; thought and meaning; the relation of language and reality. The course will be particularly concerned with the possibilities for naturalised theories of meaning.

*assessment:* tutorial participation, one 2500 word essay, and take home exam.

**1938 Issues in the Contemporary Philosophy of Mind II***level:* II    *points value:* 4    *duration:* semester 2*quota:* may apply*prerequisites:* either (a) Passes in Level I Philosophy subjects to the value of 6 points, with a Pass Div I in 3 of those points, or (b) a pass in either 8606 Cognitive Science: Minds, Brains and Computers II or 5086 Cognitive Science: Minds, Brains and Computers III, or (c) passes in any other subject(s) approved by the Head of Department*contact hours:* 2 lectures and 1 tutorial a week*content:* This subject examines some central issues in the contemporary philosophy of mind, and is organised around three topics: (1) Mental Content: What is the nature of mental representation and how can it be explained? (2) Consciousness: Is it possible to provide a naturalistic explanation of our conscious experience? (3) The Self: What is the nature of the self and how is it constructed?*assessment:* essays and tutorial participation**3037 Logic II***level:* II    *points value:* 4    *duration:* semester 1*quota:* may apply*prerequisites:* at least a Pass Div I in any of: 7743 Logic I, 8575 Discrete Mathematics or 9276 Computer Science I, or with the permission of the Head of the Department, an equivalent background. Students without Logic I must consult the course coordinator before lectures begin, for preliminary reading. Such students, having passed Logic II, are not permitted subsequently to take Logic I.*restriction:* 9286 Logic II, 4259 Logic IIIA*contact hours:* 2 lectures and 1 tutorial a week*content:* Standard first-order logic and its meta-theory, topics from the philosophy of logic.*assessment:* exam, essay. Attendance at lectures and tutorials is required. Students who do not prepare tutorial exercises in writing may be deemed not to have attended.**6007 Modern Classical Philosophers II***level:* II    *points value:* 4    *duration:* semester 1*quota:* may apply*prerequisites:* either (a) Passes in Level I Philosophy subjects to the value of 6 points, with a Pass Div I in 3 of those points, or (b) any other subject(s) approved by the Head of Department*restriction:* 4937 Philosophy II except with the permission of Department*contact hours:* 2 lectures and 1 tutorial a week*content:* A study of the work of four or five of the following philosophers: Descartes, Locke, Berkeley, Hume, Kant.*assessment:* 3 essays totalling 6,000 words**7457 Moral, Political and Legal Philosophy II***level:* II    *points value:* 4    *duration:* semester 2*quota:* may apply*prerequisites:* either (a) Passes in Level I Philosophy subjects to the value of 6 points, with a Pass Div I in 3 of those points, or (b) any other subject(s) approved by the Head of Department, or (c) a pass in any two of 7427 History of Political Thought (A) II, or 6148 History of Political Thought (B) II; or a pass in 8044 History of Political Thought, or 7233 Problems of Political Philosophy or 1867 Justice, Law and the State*contact hours:* 2 lectures and 1 tutorial a week*content:* Morality: subjective, objective or relative? Conceptions of democracy. Feminism and Liberalism. Punishment. The nature of law and of judicial decision. Considerable attention will be given to Mill's contribution to some of these topics.*assessment:* essays and tutorial contribution**3538 Moral Problems II***level:* II    *points value:* 4    *duration:* semester 1*quota:* may apply*prerequisites:* either (a) Passes in Level I Philosophy subjects to the value of 6 points, with a Pass Div I in 3 of those points, or (b) any other subject(s) approved by the Head of Department*restriction:* 8438 Practical Ethics except with the permission of Department*contact hours:* 2 lectures and 1 tutorial a week*content:* Practical ethics. A philosophical examination of arguments concerning some contemporary moral controversies. Problems discussed will include abortion, euthanasia, invitrofertilisation, genetic engineering, pornography and censorship, environmental ethics, sexual morality, and others.*assessment:* essays**9946 Philosophy of Religion II***level:* II    *points value:* 4    *duration:* semester 1*quota:* may apply

*prerequisites:* either (a) Passes in Level I Philosophy subjects to the value of 6 points, with a Pass Div I in 3 of those points, or (b) any other subject(s) approved by the Head of Department

*restriction:* 5525 Philosophy of Religion except with the permission of Department

*contact hours:* 2 lectures and 1 tutorial a week

*content:* Miracles, The Cosmological Argument, Religious Experience, Faith and Knowledge, God and Evil.

*assessment:* 3 essays and tutorial contribution

### **5902 Theory of Knowledge II**

*level:* II *points value:* 4 *duration:* semester 2

*prerequisites:* passes in 6 points of level 1 Philosophy subjects

*restriction:* 7594/6570 Knowledge and Language II and III

*contact hours:* 2 lectures and 1 tutorial per week

*content:* a study of topics in epistemology

*assessment:* essays: total 6,000 words

---

## **Level III**

---

### **5086 Cognitive Science: Minds, Brains and Computers III**

*level:* III *points value:* 6 *duration:* semester 1

*prerequisites:* either (a) Passes in Level II Philosophy subjects to the value of 8 points, or (b) a credit in a Level II Philosophy subject to the value of 4 points, or (c) passes in Level II Psychology, Computer Science or Mathematics subjects of at least 8 points value, or (d) any other subject(s) approved by the Head of Department

*contact hours:* 2 lectures and 1 tutorial a week

*content:* This subject provides an introduction to the philosophical foundations of Cognitive Science, which is a relatively new interdisciplinary field of study that embraces aspects of philosophy, psychology, computer science and neuroscience. Topics to be discussed will include some of the following: the nature of commonsense psychology and its relevance to a mature theory of mind; the computer as a model of the mind; classical and connectionist computational theories of cognition; computational models of consciousness.

*assessment:* essays, tutorial participation

### **2915 Issues in Philosophy of Language III**

*level:* III

*points value:* 6

*availability:* not offered in 1996

*prerequisites:* either (a) Passes in Level I Philosophy subjects to the value of 6 points, with a Pass Div I in 3 of those points, or (b) a pass in either 1938 Issues in the Contemporary Philosophy of Mind III, or (c) any other subject(s) approved by the Head of Department

*contact hours:* 2 lectures and 1 tutorial a week

*content:* This course will examine some central issues in the contemporary philosophy of language. These will include: the nature of a theory of meaning; theories of truth and reference; thought and meaning; the relation of language and reality. The course will be particularly concerned with the possibilities for naturalised theories of meaning.

*assessment:* tutorial participation, two 3500-4000 word essays

### **3679 Issues in the Contemporary Philosophy of Mind III**

*level:* III *points value:* 6 *duration:* semester 2

*quota:* may apply

*prerequisites:* either (a) Passes in Level II Philosophy subjects to the value of 8 points, or (b) a credit in a Level II Philosophy subject to the value of 4 points, or (c) a pass in 5086 Cognitive Science: Minds, Brains and Computers III, or (d) passes in any other subject(s) approved by the Head of Department

*contact hours:* 2 lectures and 1 tutorial a week

*content:* This subject examines some central issues in the contemporary philosophy of mind, and is organised around three topics: (1) Mental Content: What is the nature of mental representation and how can it be explained? (2) Consciousness: Is it possible to provide a naturalistic explanation of our conscious experience? (3) The Self: What is the nature of the self and how is it constructed?

*assessment:* essays, tutorial participation

### **4259 Logic IIIA**

*level:* III *points value:* 6 *duration:* semester 2

*prerequisites:* 3037 Logic II or 5780 Logic III or, with the permission of the Head of Department, an equivalent background.

Students without a pass in Logic II must consult the course coordinator before lectures begin for preliminary reading. Students who pass Logic IIIA are not permitted to take Logic I.

*restriction:* Logic III before 1989.

*contact hours:* 2 lectures and 1 tutorial a week

*content:* Infinite sets, computability, first-order logic, non-classical logic, philosophical aspects of logic, mathematics and computing.

*assessment:* essay, exam

### 5192 Metaphysics III

*level:* III *points value:* 6

*availability:* not offered in 1996

*quota:* may apply

*prerequisites:* either (a) Passes in Level II Philosophy subjects to the value of 8 points, or (b) a credit in a Level II philosophy subject to the value of 4 points; or (c) any other subject(s) approved by the Head of Department

*contact hours:* 2 lectures and 1 tutorial a week

*content:* the course will include a study of the problem of universals and related questions, and will have a substantial historical content.

*assessment:* essays (total 9,000 words)

### 8737 Modern Classical Philosophers III

*level:* III *points value:* 6 *duration:* semester 1

*quota:* may apply

*prerequisites:* either (a) Passes in Level II Philosophy subjects to the value of 8 points, or (b) a credit in a Level II philosophy subject to the value of 4 points, or (c) any other subject(s) approved by the Head of the Department

*contact hours:* 2 lectures and 1 tutorial a week

*content:* a study of the work of four or five the following philosophers: Descartes, Locke, Berkeley, Hume and Kant.

*assessment:* essays totalling 9,000 words

### 2305 Moral, Political and Legal Philosophy III

*level:* III *points value:* 6 *duration:* semester 2

*quota:* may apply

*prerequisites:* either (a) Passes in Level II Philosophy subjects to the value of 8 points, or (b) a credit in a Level II Philosophy subject to the value of 4 points, or (c) any other subject(s) approved by the Head of Department, or (d) a pass in any two of 7427 History of Political Thought (A) II, or 6148 History of Political Thought (B) II; or a pass in 8044 History of Political Thought, or 7233 Problems of Political Philosophy

*contact hours:* 2 lectures and 1 tutorial a week

*content:* Morality; subjective, objective or relative? Conceptions of democracy. Feminism and Liberalism. Punishment. The nature of law and of judicial decision. Considerable attention will be given to Mill's contributions to some of these topics.

*assessment:* essays, tutorial contribution

### 1237 Moral Problems III

*level:* III *points value:* 6 *duration:* semester 1

*quota:* may apply

*prerequisites:* either (a) Passes in Level II Philosophy subjects to the value of 8 points, or (b) a credit in a Level II Philosophy subject to the value of 4 points, or (c) any other subject(s) approved by the Head of Department

*restriction:* 8438 Practical Ethics except with the permission of Department

*contact hours:* 2 lectures and 1 tutorial a week

*content:* practical ethics. A philosophical examination of arguments concerning some contemporary moral controversies. Problems discussed will include abortion, euthanasia, invitrofertilsation, genetic engineering, pornography and censorship, environmental ethics, sexual morality, and others.

*assessment:* essays

### 7173 Philosophy of Religion III

*level:* III *points value:* 6 *duration:* semester 1

*prerequisites:* either (a) Passes in Level II Philosophy subjects to the value of 8 points, or (b) a credit in a Level II Philosophy subject to the value of 4 points, or (c) any other subject(s) approved by the Head of Department

*restriction:* 5525 Philosophy of Religion except with the permission of Department

*contact hours:* 2 lectures and 1 tutorial a week

*content:* Miracles, The Cosmological Argument; Religious Experience, Faith and Knowledge, God and Evil.

*assessment:* essays and tutorial contribution

### 1415 Theory of Knowledge III

*level:* III *points value:* 6 *duration:* semester 2

*prerequisites:* passes in 6 points of level 1 Philosophy subjects

*restriction:* 7594/6570 Knowledge and Language II and III

*contact hours:* 2 lectures and 1 tutorial per week

*content:* a study of topics in epistemology

*assessment:* essays: total 9,000 words

## Cross Listed Subjects

The Philosophy Department wishes to inform students that in addition to these subjects, the Department cross-lists two subjects from other Adelaide Departments (Foundations of Chinese Thought 11/111, Asian Studies, and Ancient Philosophy 11/111, Classics), and two subjects from Flinders Philosophy (PHIL 2326 Gender and Power, and PHIL 2310 Aesthetics). All these subjects may be taken as part of a Philosophy major and count toward the minimum 24 point requirement for entry into the Honours program. (However, for a restriction see below under Honours Philosophy).

## Other Adelaide departments:

3623/6179 Foundations of Chinese Thought 11/111 (for details see Asian Studies)

6455/6113 Ancient Philosophy 11/111 (for details see Classics)

Flinders Philosophy subjects (students wishing to take these subjects should consult the Head of Philosophy, Flinders University):

PHIL 2326 Gender and Power

PHIL 2310 Aesthetics

## Honours Level

---

### 3315 Honours Philosophy

*level:* honours *points value:* 24 *duration:* full year

*prerequisites:* Except with the permission of the Department, students wishing to enrol in Philosophy Honours must have completed a minimum of 24 points of Philosophy subjects, including 12 points at Level III, at an average of 75% or more (or an average of 70% or more prior to 1994). (Logic IIIA may be counted as a 6 point Level III subject for this purpose).

In the event that a student is taking one or two of Foundations of Chinese Thought III and Ancient Philosophy III, then the entry requirement, that a student shall obtain an average of at least 75% in two designated third year Philosophy subjects, is interpreted to mean that at least one of those two designated subjects shall be a subject taught in a Philosophy Department, and the student must have at least 75% in that subject, as well as an average of 75% in both subjects.

There is no logic prerequisite for the Honours year, but Honours courses occasionally require a knowledge of logic to at least Level I. Prospective Honours students are therefore encouraged to take 7743 Logic I. Prospective honours students are advised that at least one honours option must be in a metaphysics/

epistemology area, and at least one in a moral/social area; so that students should have included at least 4 points from each area in second or third year subjects as preparation. This should be discussed with the Honours coordinator in third year. Honours Philosophy is organised jointly with the Philosophy Department at Flinders University and some courses will be offered by that Department.

*requirements:* Courses and texts will be decided at the beginning of each year. Prospective Honours students should consult with the Head of the Department before the end of January.

*assessment:* normally a thesis and one or two essays for each of the four subjects taken

## Physics for the degree of Bachelor of Arts

### 2934 Physics, Ideas and Society I

*level:* I *points value:* 3 *duration:* semester 2

*contact hours:* 2 lectures and 1 tutorial a week

*content:* This subject is non-mathematical in character and no previous knowledge of physics is assumed. It is intended primarily for students of the humanities and social sciences and is taught in the style of those disciplines. 2934 Physics, Ideas and Society I is designed to provide an understanding of some of the principal currents of thought in physics and of the scientific background to some of the philosophical, political and social issues that confront society.

Topics to be selected from the following: Physics and its Laws; The Fundamental constituents of Matter; People and Energy; Space, Time and Relativity; The Realm of the Atom; The Universe.

*assessment:* essays, tutorial work

## Politics

The subjects in Politics listed below will only be offered as staff and enrolments permit either in 1996 or in later years. Quotas may be imposed in some options.

Where the same options are offered at more than one level, either at first and second year or at second and third year level, students undertaking such options at the higher level will be required to undertake additional work in those options. Please note that the Calendar generally only lists some of the Politics subjects that will be offered in subsequent years, since many subjects are only offered in alternate years. A more detailed listing of subjects can be found in the Politics Department Handbook available from the Politics Office, fourth floor, Napier Building. It is also advisable to check the Politics Departmental Handbook to make sure that there have been no late changes made to subjects and their availability.

## Level I

### 9155 An Introduction to Political Sociology I

level: I points value: 3

availability: not offered in 1996

quota: may apply

restriction: 5993 Political Sociology prior to 1989. Not available to students with exemption from lectures.

contact hours: 2 lectures and 1 tutorial a week

content: Sociological approaches to politics: Marx, Durkheim and Weber. The political framework of society—types of political system; the social framework of politics — ethnicity, regionalism, religion; elites and classes; the formation of political commitments — culture and socialisation; the political aspects of social change.

assessment: compulsory essay; remainder of assessment by choice from exams; research projects, coursework

### 3291 Australian Politics I

level: I points value: 6 duration: full year

quota: may apply

restriction: P712 Liberal Democracy in Australia or 5270 Australian Politics prior to 1989. Not available to students with exemption from lectures.

contact hours: 2 lectures and 1 tutorial a week

content: The subject will focus on the nature of the Australian political system in its social, cultural and economic context. It covers recent issues and students will be introduced to relevant theoretical debates in a range of areas. Topics covered include: national identity, political culture, governmentality, political parties, pressure groups, trade unions, business organisations, environmental issues, the media, class, gender, race and the impact of economic globalisation.

assessment: coursework and/or optional exam

### 1965 Introduction to International Politics I

level: I points value: 3 duration: semester 2

quota: may apply

restriction: Not available to students with exemption from lectures.

contact hours: 2 lectures and 1 tutorial a week

content: This subject will provide an introduction to the study of International Politics. It will start with the origins of the interstate system in the sixteenth century and continue with an examination of European imperialism, balance of power, collective security,

international organisations, the cold war and theories about these phenomena. It will conclude with an investigation into the world system after the collapse of the Soviet empire with particular reference to the east and southeast Asia region and Australia's relations with it.

assessment: continuous.

### 8605 Introduction to Political Thought (A) I

level: I points value: 3

availability: not offered in 1996

quota: may apply

restriction: not available to students with exemption from lectures

contact hours: 2 lectures and 1 tutorial a week

content: Political thinking is a medium of thought and communication distinct from the everyday politics of parties, parliaments, bureaucracies and organised interests. Distinct, but not isolated: political thinkers have created the very words we use to order, appraise, censure and direct political action. Politics is not simply a method of allocating power and distributing wealth, but also a tradition of enquiry about personal relationships, moral values, cultural forms and the purposes of communal life. Political thinking inevitably draws into question the conditions of social existence and aims of social action. This separation of 'theory and practice' appears to some as a dilemma to solve. To others, 'alien thought' is the uniquely human capacity for intellectual self-consciousness and moral reproach. Students will be introduced to this enquiry by reading selected texts from classic and modern political literature.

assessment: 2 essays of 1,500 words each and one final exam

### 1867 Justice, Law and the State I

level: I points value: 6 duration: full year

quota: may apply

restriction: not available to students with exemptions from lectures

contact hours: 2 lectures and 1 tutorial a week

content: The aim of this subject is twofold, to introduce students to the major debates in political theory on the nature of justice, law and the state and then to explore moral and legal issues in which the state plays a crucial role. Topics to be dealt with in the subject include: revenge and retribution, Just war doctrine, war crimes trials, the nature of law, historical roots of the modern legal and political system, rule of law and the law state, the Marxist critique of the Law State, feminist critiques

of law and state, Aboriginal people and the law, the politics of prisons, nihilism, legitimations of dictatorship, terrorism and the state, human rights and social justice, justice and identity, international justice.

*assessment:* tutorial participation (25%), 2 minor essays (25%), 2 major essays (50%)

One may do an exam instead of a major essay.

### **2657 Political Development in Australia I**

*level:* I *points value:* 6

*availability:* not offered in 1996

*quota:* may apply

*restriction:* not available to students with exemption from lectures

*contact hours:* 2 lectures and 1 tutorial a week

*content:* A study of political development in Australia since 1890. Although primary emphasis will be given to national politics, attention will also be directed to significant features of state politics in South Australia.

*assessment:* 2 tutorial papers, 2 essays, and 3 hour final exam

### **6843 Political History of South Australia (1893–1982) I**

*level:* I *points value:* 3

*availability:* not offered in 1996

*quota:* may apply

*restriction:* 2657 Political Development in Australia I or 2650 Political Development in Australia II. Not available to students with exemptions from lectures.

*contact hours:* 2 lectures and 1 tutorial a week

*content:* A study of the political history of South Australia from the Kingston Government (1893–1899) to the coming to office of the Bannon Government in 1982.

*assessment:* 1 tutorial paper, 1 essay and 3 hour final exam

### **2659 Politics and Society in Western Europe I**

*level:* I *points value:* 3 *duration:* semester 1

*quota:* may apply

*contact hours:* 2 lectures and 1 tutorial a week

*content:* This subject will examine some key features of the political systems of Western European countries and will study their historical context and the ways in which these arise from the social patterns within them. Topics to be covered will include: National integrity: the rise of nationalism, ethnic minorities,

sub-nationalism, immigrants, supra-nationalism, European unity. Political Systems: dictatorship and democracy, presidents and parliaments, elections, party systems, centralism and localism. Social and economic structure: elites and classes, patterns of industrial development and control. All the countries of Western Europe will be covered but there will be some emphasis given to members of the EU and attention will be given to its development towards a unified entity.

*assessment:* essays, projects, optional exam

### **7248 Women in Australian Political Development I**

*level:* I *points value:* 3

*availability:* not offered in 1996

*quota:* may apply

*restriction:* not available to students with exemption from lectures

*contact hours:* 2 lectures and 1 tutorial a week

*content:* This subject investigates the development of law and of political institutions in Australia with a focus on the connections between 'public' and 'private' politics. The influence of gender in legislative, administrative and judicial spheres is examined, and the effect of political, economic, and legal processes on the exercise of women's citizenship and everyday life.

Students will have the opportunity for a biographical approach to consider difference, and the range of topics for specialisation includes constitutional change and the home, legislation and family, education and the state, war and waged work, policy and reproduction, and domestic and international law.

The aim is to develop research skills needed to identify and examine evidence about the political and legal history of Australian women, to contribute to the analysis of relationships between self and state, and to increase our understanding of Australian political development.

*assessment:* tutorial and conference participation (40%), minor essay (20%), major essay (40%)

## **Level II**

note: Additional information will be available in the Politics Departmental Handbook.

### **5289 Anarchism and Libertarianism II**

*level:* II *points value:* 4 *duration:* semester 1

*quota:* may apply

*prerequisites:* for Level II students a Pass in any Level

I Politics, History, Philosophy, Geography, Anthropology or Asian Studies subject or any other subject approved by the Head of Department (which has a minimum combination of 6 points first year)

*restriction:* not available to students with exemption from lectures

*contact hours:* 2 lectures and 1 tutorial a week

*content:* The subject will study the emergence and development of anarchism as a political theory of the community. Its grounds for opposing liberal-democracy, capitalism and Marxism will be examined. The tradition of libertarianism with its emphasis on the minimal state and competitive individualism will also be examined.

Topics to be covered: Anarchism and Liberalism; the Problem of Authority; Autonomy and Community; Co-operation versus Competition; Anarchist Theories of Property; the State and Political Power; Anarchism and Marxism; Anarchy and Utopia; Violence and Pacifism; the Spanish Experience; Anarchism and the Russian Revolution; Anarchism and Ecology; Anarchism, Art and Architecture; the Libertarians and the Free Individual; the Market and the Individual; Liberty, the State and the New Right.

*assessment:* essays, tutorial papers

#### 5849 A Survey of Feminist Thinkers II

*level:* II    *points value:* 4    *duration:* semester 2

*quota:* may apply

*prerequisites:* for Level II students a Pass in any Level I Politics, History, Philosophy, Geography, Law, Anthropology or Asian Studies subject or any other subject approved by the Head of Department (which has a minimum combination of 6 points first year).

*restriction:* 5930 Women and Politics prior to 1989. Not available to students with exemption from lectures.

*contact hours:* 2 lectures and 1 tutorial a week

*content:* A great deal can be learnt from studying feminist approaches to politics and social relations. The whole meaning of 'politics' is reopened for debate. This subject offers students the opportunity to engage with feminist writers from the eighteenth century to today, with a specific focus upon contributions to political theory. A thematic approach will be blended with and worked across an historical overview of feminist traditions, leading up to and including feminist contributions to postcolonial and postmodern debates. We will consider feminist thinking about such topics as sex, birth, the state, religion, violence, and representations, cultural and political. We will ask how politics and political theory are recast if feminist contributions become central.

*assessment:* essay, tutorial papers

#### 8089 Comparative Politics (A) II

*level:* II    *points value:* 4

*availability:* not offered in 1996

*quota:* may apply

*prerequisites:* for Level II students a Pass in any Level I Politics, History, Philosophy, Geography, Law, Anthropology or Asian Studies subject or any other subject approved by the Head of Department (which has a minimum combination of 6 points first year).

*restriction:* Not available to students with exemption from lectures.

*contact hours:* 2 lectures and 1 tutorial a week

*content:* This subject studies the rise of environmental concern in Europe, USA, Japan and Australia and the response of government, business, trade unions and international conferences to the challenge entailed. For further information consult Departmental Handbook.

*assessment:* essays and/or an optional exam

#### 8363 Comparative Politics (B) II

*level:* II    *points value:* 4

*availability:* not offered in 1996

*quota:* may apply

*prerequisites:* for Level II students a Pass in any Level I Politics, History, Philosophy, Geography, Law, Anthropology or Asian Studies subject or any other subject approved by the Head of Department (which has a minimum combination of 6 points first year).

*restriction:* 9987 State, Society and Political Regimes prior to 1989. Not available to students with exemption from lectures.

*contact hours:* 2 lectures and 1 tutorial a week

*content:* A comparative study of the political responses to the 1972–1993 recession in Britain, France, Germany, Japan, the United States of America and Australia.

*assessment:* essays and/or an optional exam

#### 3456 Culture and Imperialism II

*level:* II    *points value:* 4    *duration:* semester 1

*quota:* may apply

*prerequisites:* for Level II students a Pass in any Level I Politics, Labour Studies, History, Philosophy, Geography, Law, Anthropology, Economics or Asian Studies subject or any other subject approved by the head of Department (which has a minimum combination of 6 points first year).

*restriction:* Not available to students with exemption from lectures.

*contact hours:* 2 lectures and 1 tutorial a week

*content:* This subject will aim at a study of the postcolonial world and of the effects of imperialism upon the development of culture and ideology. A key theoretical perspective will be that deriving from works of Edward Said, in particular, *Orientalism* and *Culture and Imperialism*. The subject will be wide ranging in its scope and will take examples from both the developed, as well as the developing world. However, a prime area of study will be the countries of the African continent.

*assessment:* Assessment will be by coursework and tutorial participation.

#### **7427 History of Political Thought (A) II**

*level:* II     *points value:* 4     *duration:* semester 1

*quota:* may apply

*prerequisites:* any two Level I Politics semester subjects, or any other combination of subjects approved by Department

*restriction:* 8044 History of Political Thought prior to 1989. Not available to students with exemption from lectures.

*contact hours:* 2 lectures and 1 tutorial a week

*content:* The subject examines the recurring ideas and problems of Western political thought, from the classical Greek schools to the rise of 'modern' political theory in the thought of Machiavelli. Major themes: 1. the relationship between philosophy and politics, the aims of political community and the nature of 'the good life'; 2. foundations of justice and law in nature and convention; 3. Judeo-Christian concepts of sovereignty and secular order; 4. Machiavellian and Renaissance conceptions of the state

*assessment:* 2 essays (80%), tutorial work (20%)

#### **6148 History of Political Thought (B) II**

*level:* II     *points value:* 4

*availability:* not offered in 1996

*quota:* may apply

*prerequisites:* any two Level I Politics semester subjects, or any other combination of subjects approved by Department

*restriction:* 8044 History of Political Thought prior to 1989. Not available to students with exemption from lectures.

*contact hours:* 2 lectures and 1 tutorial a week

*content:* The subject will examine important political thinkers from the seventeenth to the nineteenth century. Theories of the state of nature, the social contract, political obligation, natural and civil rights, democracy and revolution, socialism, utilitarianism

and liberalism will be examined.

*assessment:* 2 essays (80%), tutorial work (20%)

#### **2935 International Politics II**

*level:* II     *points value:* 8     *duration:* full year

*quota:* may apply

*prerequisites:* for Level II students a Pass in any Level I Politics, History, Philosophy, Geography, Anthropology or Asian Studies subject or any other subject approved by the Head of Department (which has a minimum combination of 6 points first year).

*restriction:* not available to students with exemption from lectures

*contact hours:* 2 lectures and 1 tutorial a week

*content:* The subject will provide a survey of the history of the international political system; an examination of theories about it; an account of the rise and fall of the Cold War; an analysis of the structure of power in the post Cold War World; international relations in the Asia-Pacific region; the United Nations system; globalisation, environmentalism and human rights; feminist theories of international relations; and a history of Australia's external relations.

*assessment:* consult course handouts

#### **5060 Marx and His Successors II**

*level:* II     *points value:* 4     *duration:* semester 2

*availability:* subject to availability of staff

*quota:* may apply

*prerequisites:* any Level I Politics, History or Philosophy subject or alternative approved by Department

*restriction:* 6443 Radical Tradition or P706 Marxism-Leninism prior to 1989. Not available to students with exemption from lectures.

*contact hours:* 2 lectures and 1 tutorial a week

*content:* The subject will study the development of Marxism as a tradition of radical criticism of capitalism and capitalist society. It will also examine the social, economic and political alternatives it offers. The major emphasis will be on gaining an understanding and appreciation of the ideas of Marx and Engels, although latterly, some consideration will be given to major contributors to the Marxist tradition such as Lenin, Gramsci and Sartre, who have helped to shape or, it can be argued, revise the nature of modern Marxism. Consideration will also be given to the relevance of Marxism in the aftermath of the collapse of communism in Eastern Europe and the Soviet Union.

*assessment:* essays, tutorial papers

**2650 Political Development in Australia II**level: II points value: 8

availability: not offered in 1996

quota: may apply

*prerequisites:* for Level II students a Pass in any Level I Politics, History, Philosophy, Geography, Anthropology or Asian Studies subject or any other subject approved by the Head of Department (which has a minimum combination of 6 points first year)

*restriction:* not available to students with exemption from lectures; 2657 Political Development in Australia I.

*contact hours:* 2 lectures and 1 tutorial a week

*content:* A study of political development in Australia since 1890. Although primary emphasis will be given to national politics, attention will also be directed to significant features of state politics in South Australia.

*assessment:* 2 tutorial papers, 2 essays, 1 three hour final exam

**3841 Politics and Ideology II**level: II points value: 4

availability: not offered in 1996

quota: may apply

*restriction:* not available to students with exemption from lectures

*prerequisites:* for Level II students a Pass in any Level I Politics, History, Philosophy, Anthropology or Asian Studies subject or any other subject approved by the Head of Department which has a minimum contribution of 6 points first year

*contact hours:* 2 lectures and 1 tutorial a week

*content:* This is not a course about 'isms' e.g. liberalism, marxism. Rather, the subject analyses a wide range of theories of ideology and discourse, drawing on political theory and cultural studies approaches. Theorists to be discussed include Marx, Foucault, Habermas, Baudrillard, Lyotard and a range of relevant feminist theorists. The subject will also touch on some relevant aspects of media theory and analyses of new information technologies. The subject centres around the contentious issue of the relationship between knowledge/ideas/meaning and society. The political content of differing perspectives on this relationship will be emphasised, particularly their implications for social analysis and strategies for change.

*assessment:* essays and tutorial contribution

**7756 Politics and Society in Western Europe II**level: II points value: 4 duration: semester 1

quota: may apply

*restriction:* not available to students with exemption from lectures

*prerequisites:* a Pass in any Level I Politics, History, Anthropology, French, German, Economics, Geography, Spanish or Italian

*contact hours:* 2 lectures and 1 tutorial a week

*content:* This subject will examine some key features of the political systems of Western European countries and will study their historical context and the ways in which these arise from the social patterns within them. Topics to be covered will include: National Integrity: the rise of nationalism, ethnic minorities, sub-nationalism, immigrants, supra-nationalism, European unity. Political Systems: dictatorships and democracy, presidents and parliaments, elections, party systems, centralism, and localism. Social and economic structure: elites and classes, patterns of industrial development and control. All the countries of Western Europe will be covered but there will be some emphasis given to members of the EU and attention will be given to its development towards a unified entity.

*assessment:* essays, projects, optional exam

**3352 Private and Public Policy in South Australia II**level: II points value: 4

availability: not offered in 1996

quota: may apply

*prerequisites:* a Pass in any Level I Politics, History, Philosophy, Geography, Law, Anthropology, Economics or Asian Studies subject or any other subject approved by the Head of Department (which has a minimum combination of 6 points first year)

*restrictions:* not available to students with exemption from lectures.

*contact hours:* 2 lectures and 1 tutorial a week

*content:* This subject can be conceptualised as two tales of one city. In this subject students will explore both private and public sector issues in South Australia. It is anticipated that by broadening the scope from just the public arena to include the private sphere that students will be able to draw parallels and make contrasts between policy making in the private and public arenas.

The subject will provide an introduction to the public policy methods of analysis and then apply them to issues in the public and private spheres in South Australia. Students will be expected to research policy issues in the private and public spheres, and to develop a project on an issue of their choice. It should be noted that this subject aims to develop students' research skills.

*assessment:* consult course handouts

### 5353 Problems of Political Philosophy II

*level:* II    *points value:* 8    *duration:* full year

*availability:* subject to availability of staff

*quota:* may apply

*prerequisites:* for Level II students a Pass in any Level I Politics, History, Philosophy, Anthropology or Asian Studies subject or any other subject approved by the Head of Department which has a minimum contribution of 6 points first year

*content:* This subject will examine a number of key concepts which are of central importance to any theoretical discussion of Politics. In the main the approach will be through a consideration of the work and ideas of major thinkers in the history of political and social thought, although important secondary material will also be used. The emphasis throughout will be on conceptual issues rather than historical traditions. It will be the aim of the subject to promote discussion about the issues raised.

*assessment:* either 3 tutorial papers (10%) and 3 essays (70%) or 3 tutorial papers (10%) and 4 essays (70%).

### 1280 Public Policy in Australia II

*level:* II    *points value:* 8    *duration:* full year

*quota:* may apply

*prerequisites:* for Level II students a pass in any Level I Politics, History, Philosophy, Geography, Law, Anthropology, Asian Studies, Public Health I subject or any other subject approved by the Head of Department (which has a minimum combination of 6 points first year).

*restriction:* not available to students with exemption from lectures

*content:* This subject will examine the current issues in Australian public policy with the aim of enhancing students knowledge and understanding of the origins, processes and outcomes of public policy making.

The subject will examine public policy through exploring the theoretical distinctions between the public (government, the public service, the judiciary etc.) the private (private enterprise, the market, the

family) and the personal (sexuality). The subject will explore the blurring lines between these three realms and situate these spheres within contemporary debate over the tensions between modernism and post-modernism. The subject will also examine various approaches to public policy and discuss the utility of concepts such as class, power, the state, the mixed economy, privatisation, deregulation, etc. The subject will then move from general theoretical concerns to specific policy areas, such as environment policy, health policy, Aboriginal policy, women's policy, cultural and media policy, economic policy, and with such issues as euthanasia, domestic violence, childrens' rights, urban planning, woodchipping and so on.

*assessment:* consult Departmental Handbook

### 3109 Sociology of Power II

*level:* II    *points value:* 4    *duration:* semester 2

*quota:* may apply

*prerequisites:* for Level II students a Pass in any Level I Politics, History, Philosophy, Geography, Anthropology or Asian Studies subject or any other subject approved by the Head of Department (which has a minimum combination of 6 points first year)

*restriction:* 5993 Political Sociology or 6685 Political Sociology IIIH before 1990. Not available to students with exemption from lectures.

*contact hours:* 2 lectures and 1 tutorial a week

*content:* This subject will examine the central concept of political power, and the ways in which it interacts with social structures. Firstly, the methodology of the identification of power will be dealt with, since this has an important bearing on assumptions about the distribution of power. Next, a range of theories about the distribution of power will be covered, including constitutionalism, pluralism, corporatism, elitism, ideological dominance. The role of a number of key institutions will be examined, including the bureaucracy, the military, political parties, the press, trade unions and business.

Illustrative material will be drawn from a wide range of international sources but a major focus will be the application of the theories to Australia.

*assessment:* essays, tutorial contribution and optional exam

**5850 The Landscape of Australian Politics II***level:* II *points value:* 4 *duration:* semester 1*quota:* may apply*prerequisites:* a Pass in any Level I Politics, History, Philosophy, Geography, Law, Anthropology, Economics or Asian Studies subject or any other subject approved by the Head of Department (which has a minimum combination of 6 points first year)*restriction:* 3563 Landscape of Australian Politics I. Not available to students with exemption from lectures*contact hours:* 2 lectures and 1 tutorial per week*content:* In this subject students will explore relations between land, law and politics in Australia. The subject provides an introduction to Aboriginal political thought and to the legal, political and cultural dimensions of landscape in contemporary Australia.*assessment:* minor essay of 1,500 words (20%), tutorial and conference participation (40%), major essay of 3,500 words (40%)**1886 The Political Economy of the 'Global Village' II***level:* II *points value:* 4 *duration:* semester 1*quota:* may apply*prerequisites:* for Level II students a Pass in any Level I Politics, Labour Studies, History, Philosophy, Geography, Law, Anthropology, Economics or Asian Studies subject or any other subject approved by the head of Department (which has a minimum combination of 6 points first year).*restriction:* Not available to students with exemption from lectures.*contact hours:* 2 lectures and 1 tutorial a week*content:* This subject explores a contemporary paradox. It is inescapably evident that international trends are drawing separate national economies such as Australia's ever more tightly into a single global market. At the same time we are witnessing the unprecedented assertion of separate identity by hitherto suppressed and marginalised ethnic groups, regions, communities, genders and subjects. In studying this apparent contradiction we will examine the forces which are driving globalisation, including the media, information technology, environmental changes, multinational enterprises, and travel. We will consider whether increasing globalisation is leading to a diminishing role for national governments and whether more global forms of government are inevitable. The social impact on local communities—especially on marginal groups such as indigenous peoples and women—of global economic pressures to restructure, or undertake structural adjustment will also be explored. We will also look at prominent examples of

the assertion of local identity and culture. Violent localism will be explored.

The Internet will be both a central metaphor and a point of reference for work in the subject, fusing as it does the global and the local. The simultaneous use of the Internet a channel of discourse and tool of empowerment for the culturally marginal and a global information source will be explored in practical tutorial sessions. Students will be encouraged to utilise Internet resources in conducting research for their major essays.

*assessment:* Assessment will be by coursework and tutorial participation. Tutorial participation (20%), first essay (30%), second essay (50%).**1480 The Politics of Trade and Development (A) II***level:* II *points value:* 4*availability:* not offered in 1996*prerequisites:* a pass in any Level I Politics, History, Philosophy, Geography, Law, Anthropology, Economics or Asian Studies subject or any other subject approved by the head of Department (which has a minimum combination of 6 points first year)*restriction:* not available to students with exemption from lectures*contact hours:* 3 lectures and 1 tutorial per week*content:* American and Canadian firms have lost market shares in a number of industries in recent years. The problem is compounded by a proven severe economic recession. As a consequence, millions of jobs have been destroyed and the economy of numerous communities has been severely undermined. This subject seeks to understand the decline of North American economic domination by examining ways that the governments in other countries cope with industrial change. This will permit us to explore answers to questions of how North American competitiveness can be developed in the light of the predicted global economic impact of the European Economic Community in 1992. Some counter-measures are already under way and thus the United States-Canada free-trade agreement warrants close attention.

The first part of the subject is devoted to the larger theoretical and epistemological issues raised by the industry policy debate. The second part has an expressly practical objective: to come to some agreement about the virtues of a particular policy option for both the United States and Canada. Finally, the subject will also allow us to canvas options for a more competitive industrial strategy for Australia.

*assessment:* tutorial participation (20%), first essay (30%), second essay (50%)

### 9333 The Politics of Trade and Development (B) II

level: II points value: 4 duration: semester 2

*prerequisites:* a Pass in any Level I Politics, History, Philosophy, Geography, Law, Anthropology, Economics or Asian Studies subject or any other subject approved by the Head of Department (which has a minimum combination of 6 points first year)

*restriction:* not available to students with exemption from lectures

*contact hours:* 2 lectures and 1 tutorial per week

*content:* In considering the politics of the newly independent states of Africa and the South Pacific, two features stand out: the speed and spread of change (often sudden and unexpected) and the wide scope for comparative analysis. Change does not imply development: traditional concepts of political science do not necessarily carry the same meaning. The 'developed' political process based on a multi-party system as an essential feature of constitutional democracy had been, in some African states, viewed as incompatible with African needs and aspirations: thus, the rise of the 'democratic one-party state'. However, the 1990's have renewed debates about governance and politics in Africa. Initial theoretical and empirical-based interpretations have proven vulnerable in the face of change. This subject will attempt to expose students to some major patterns of contemporary politics in both East Africa and the South Pacific.

*assessment:* tutorial participation (20%) first essay (30%), second essay (50%)

### 4646 Third World Political Economy II

level: II points value: 8

*availability:* not offered in 1996

*quota:* may apply

*prerequisites:* for Level II students a Pass in any Level I Anthropology, Asian Studies, Economics, Geography, History, Philosophy or Politics subject or any other subject approved by the Head of Department

*restriction:* not available to students with exemption from lectures

*contact hours:* 2 lectures and 1 tutorial a week

*content:* The core question this subject addresses is why poor people in the Third World stay poor, powerless and hungry. As much as possible, it attempts to take a 'poor peasant's eye-view' of mass movements (such as the overthrow of Marcos in the Philippines), famines (such as those which have racked north Africa), poverty (such as that which grips India's Untouchables), the systematic abuse of human rights (almost everywhere) and similar issues. The subject begins by taking a critical survey of traditional

approaches to the study of development. Although readings on specific cases come from Asia, Africa and Latin America the heaviest emphasis is placed on the rich monographic literature available for south and southeast Asia. Among the historical issues to be considered will be the penetration of traditional social forms by colonisation, the role of colonial violence, and the impact of industrial agriculture. In the second section the subject examines contemporary issues in the Third World, such as the changing role of women, ultra-poverty and famine, the political economy of the Green Revolution, torture and repression, the impact of development policies on indigenous peoples and tropical rain forests and whether the emergence of the Newly Industrialised Countries (NIC's) heralds the 'end of the Third World'. The final section of the subject is devoted to a significant piece of individual research. It should be stressed that this subject aims at the development of research skills.

*assessment:* tutorial papers, tutorial contributions, 2 essays and a research paper. The weighting of these components will be discussed in the first tutorial meeting.

### 6103 Women and Policy II

level: II points value: 4 duration: semester 1

*quota:* may apply

*prerequisites:* for Level II students a Pass in any Level I Politics, History, Philosophy, Geography, Anthropology or Asian Studies subject or any other subject approved by the Head of Department (which has a minimum combination of 6 points first year).

*restriction:* 5930 Women and Politics before 1989. Not available to students with exemption from lectures.

*contact hours:* 2 lectures and 1 tutorial a week

*content:* The subject offers a new way to think about policy formulation. Instead of thinking of policy as a response to a problem which exists 'out there', it argues that 'problems' assume a particular shape, take on a particular understanding through the lens of the policy community. It follows that the ways in which a 'problem' is understood affects the shape of the policies designed to address it. Applying this approach to a range of policy areas, we will ask how 'problems' are perceived in these areas and with what effects for which groups of women. The subject begins by asking what kind of a problem women's inequality has been perceived to be and with what policy effects. We proceed to examine antidiscrimination, welfare, education, prostitution, pornography, and sexual harassment policy among others. Considering how these policies take shape will change your way of thinking about policy making in general.

*assessment:* essay and tutorial papers

**1652 Women, Power and Politics II***level:* II *points value:* 4*availability:* not offered in 1996*quota:* may apply*prerequisites:* for Level II students a Pass in any Level I Politics, History, Philosophy, Geography, Anthropology or Asian Studies subject or any other subject approved by the Head of Department (which has a minimum combination of 6 points first year).*restriction:* not available to students with exemption from lectures*contact hours:* 2 lectures and 1 tutorial a week*content:* The subject looks at attempts by women in several countries, including Australia, Canada, and America, to increase women's social power and influence. Specifically it will focus upon attempts by groups of women in these countries to claim that women constitute a separate political category which needs to be recognised. By examining responses to those claims we will be able to say something about the workings of political processes in contests for political power. The subject will offer insights into the problems women encounter in those contests. A few political demands will provide a focus for the analysis: affirmative action, abortion on demand, comparable worth, child care, among others.*assessment:* essays and tutorial papers

---

**Level III**

---

*note:* Additional information will be available in the Politics Departmental Handbook.**5446 Anarchism and Libertarianism III***level:* III *points value:* 6 *duration:* semester 1*quota:* may apply*prerequisites:* for Level III students a pass in any Level II Politics, History, Philosophy, Geography, Anthropology or Asian Studies subject or any other subject approved by the Head of Department (which has a minimum combination of 8 points second year)*restriction:* not available to students with exemption from lectures*contact hours:* 2 lectures and 1 tutorial a week*content:* The subject will study the emergence and development of anarchism as a political theory of the community. Its grounds for opposing liberal-democracy, capitalism and Marxism will be examined. The tradition of libertarianism with its emphasis on the minimal state and competitive

individualism will also be examined. Topics to be covered: Anarchism and Liberalism; the Problem of Authority; Autonomy and Community; Co-operation versus Competition; Anarchist Theories of Property; the State and Political Power; Anarchism and Marxism; Anarchy and Utopia; Violence and Pacifism; the Spanish Experience; Anarchism and the Russian Revolution; Anarchism and Ecology; Anarchism, Art and Architecture; the Libertarians and the Free Individual; the Market and the Individual; Liberty, the State and the New Right.

*assessment:* essays, tutorial papers**3466 A Survey of Feminist Thinkers III***level:* III *points value:* 6 *duration:* semester 2*quota:* may apply*prerequisites:* for Level III students a pass in any Level II Politics, History, Philosophy, Geography, Anthropology or Asian Studies subject or any other subject approved by the Head of Department (which has a minimum combination of 8 points second year)*restriction:* 5930 Women and Politics prior to 1989. Not available to students with exemption from lectures.*contact hours:* 2 lectures and 1 tutorial a week*content:* A great deal can be learnt from studying feminist approaches to politics and social relations. The whole meaning of 'politics' is reopened for debate. This subject offers students the opportunity to engage with feminist writers from the eighteenth century to today, with a specific focus upon contributions to political theory. A thematic approach will be blended with and worked across an historical overview of feminist traditions, leading up to and including feminist contributions to postcolonial and postmodern debates. We will consider feminist thinking about such topics as sex, birth, the state, religion, violence, and representations, cultural and political. We will ask how politics and political theory are recast if feminist contributions become central.*assessment:* essays, tutorial papers**7160 Comparative Politics (A) III***level:* III *points value:* 6*availability:* not offered in 1996*quota:* may apply*prerequisites:* for Level III students a pass in any Level II Politics, History, Philosophy, Geography, Anthropology or Asian Studies subject or any other subject approved by the Head of Department (which has a minimum combination of 8 points second year)

*restriction:* Not available to students with exemption from lectures.

*contact hours:* 2 lectures and 1 tutorial a week

*content:* This subject studies the rise of environmental concern in Europe, USA, Japan and Australia and the response of government, business, trade unions and international conferences to the challenge entailed. For further information consult Departmental Handbook.

*assessment:* essays and/or optional exam

### 1738 Comparative Politics (B) III

*level:* III *points value:* 6

*availability:* not offered in 1996

*quota:* may apply

*prerequisites:* for Level III students a pass in any Level II Politics, History, Philosophy, Geography, Anthropology or Asian Studies subject or any other subject approved by the Head of Department (which has a minimum combination of 8 points second year)

*restriction:* 9987 State, Society and Political Regimes prior to 1989.

*contact hours:* 2 lectures and 1 tutorial a week

*content:* A comparative study of the political responses to the 1972–1993 recession in Britain, France, Germany, Japan, the United States of America and Australia.

*assessment:* essays and/or optional exam

### 4641 Culture and Imperialism III

*level:* II *points value:* 6 *duration:* semester 1

*quota:* may apply

*prerequisites:* for Level III students a Pass in any Level II Politics, Labour Studies, History, Philosophy, Geography, Law, Anthropology, Economics or Asian Studies subject or any other subject approved by the head of Department (which has a minimum combination of 8 points second year).

*restriction:* Not available to students with exemption from lectures.

*contact hours:* 2 lectures and 1 tutorial a week

*content:* This subject will aim at a study of the postcolonial world and of the effects of imperialism upon the development of culture and ideology. A key theoretical perspective will be that deriving from works of Edward Said, in particular, *Orientalism* and *Culture and Imperialism*. The subject will be wide ranging in its scope and will take examples from both the developed, as well as the developing world. However, a prime area of study will be the countries of the African continent.

*assessment:* Assessment will be by coursework and tutorial participation.

### 6795 History of Political Thought (A) III

*level:* III *points value:* 6 *duration:* semester 1

*quota:* may apply

*prerequisites:* any two Level II Politics semester subjects, or any other combination of subjects approved by Department

*restriction:* 8044 History of Political Thought prior to 1989. Not available to students with exemption from lectures.

*contact hours:* 2 lectures and 1 tutorial a week

*content:* The subject examines the recurring ideas and problems of Western political thought, from the classical Greek schools to the rise of 'modern' political theory in the thought of Machiavelli. Major themes: 1. the relationship between philosophy and politics, the aims of political community and the nature of 'the good life'; 2. foundations of justice and law in nature and convention; 3. Judeo-Christian concepts of sovereignty and secular order; 4. Machiavellian and Renaissance conceptions of the state;

*assessment:* two essays (80%), tutorial work (20%)

### 8369 History of Political Thought (B) III

*level:* III *points value:* 6

*availability:* not offered in 1996

*quota:* may apply

*prerequisites:* any Level II Politics semester subjects, or any other combination of subjects approved by the department

*restrictions:* 8044 History of Political Thought before 1989 or 6148 History of Political Thought (B) prior to 1994. Not available to students with exemption from lectures.

*contact hours:* 2 lectures and 1 tutorial a week

*content:* The subject will examine important political thinkers from the seventeenth to the nineteenth century. Theories of the state of nature, the social contract, political obligation, natural and civil rights, democracy and revolution, socialism, utilitarianism, and liberalism will be examined.

*assessment:* 2 essays (80%), tutorial work (20%)

### 9287 International Politics III

*level:* III *points value:* 12 *duration:* full year

*quota:* may apply

*prerequisites:* for Level III students a pass in any Level II Politics, History, Philosophy, Geography, Anthropology or Asian Studies subject or any other subject approved by the Head of Department (which has a minimum combination of 8 points second year)

*restriction:* not available to students with exemption from lectures

*contact hours:* 2 lectures and 1 tutorial a week

*content:* The subject will provide a survey of the history of the international political system; an examination of theories about it; an account of the rise and fall of the Cold War; an analysis of the structure of power in the post Cold War World; international relations in the Asia-Pacific region; the United Nations system; globalisation, environmentalism and human rights; feminist theories of international relations; and a history of Australia's external relations.

*assessment:* consult course handouts

### **5002 Marx and His Successors III**

*level:* III *points value:* 6 *duration:* semester 2

*availability:* subject to availability of staff

*quota:* may apply

*prerequisites:* any Level II Politics, History or Philosophy subject or alternative approved by Department

*restriction:* 6443 Radical Tradition or P706 Marxism-Leninism prior to 1989. Not available to students with exemption from lectures.

*contact hours:* 2 lectures and 1 tutorial a week

*content:* The subject will study the development of Marxism as a tradition of radical criticism of capitalism and capitalist society. It will also examine the social, economic and political alternatives it offers. The major emphasis will be on gaining an understanding and appreciation of the ideas of Marx and Engels, although latterly some consideration will be given to major contributors to the Marxist tradition such as Lenin, Gramsci and Sartre, who have helped to shape – or, it can be argued, revise – the nature of modern Marxism. Consideration will also be given to the relevance of Marxism in the aftermath of the collapse of communism in Eastern Europe and the Soviet Union.

*assessment:* essays and tutorial papers

### **6686 Politics and Ideology III**

*level:* III *points value:* 6

*availability:* not offered in 1996

*quota:* may apply

*prerequisites:* for Level III students a pass in any Level II Politics, History, Philosophy, Anthropology or Asian Studies subject or any other subject approved by the Head of Department which has a minimum contribution of 8 points second year

*contact hours:* 2 lectures and 1 tutorial a week

*content:* This is not a course about 'isms' e.g. liberalism, marxism. Rather, the subject analyses a wide range of theories of ideology and discourse, drawing on political theory and cultural studies approaches. Theorists to be discussed include Marx, Foucault, Habermas, Baudrillard, Lyotard and a range of relevant feminist theorists. The subject will also touch on some relevant aspects of media theory and analyses of new information technologies. The subject centres around the contentious issue of the relationship between knowledge/ideas/meaning and society. The political content of differing perspectives on this relationship will be emphasised, particularly their implications for social analysis and strategies for change.

*assessment:* essays and tutorial contribution

### **9990 Private and Public Policy in South Australia III**

*level:* III *points value:* 6

*availability:* not offered in 1996

*quota:* may apply

*prerequisites:* A pass in any Level II Politics, History, Philosophy, Geography, Law, Anthropology, Economics or Asian Studies subject or any other subject approved by the Head of Department (which has a minimum combination of 8 points second year)

*restriction:* not available to students with exemption from lectures

*contact hours:* 2 lectures and 1 tutorial a week

*content:* This subject can be conceptualised as two tales of one city. In this subject students will explore both private and public sector issues in South Australia. It is anticipated that by broadening the scope from just the public arena to include the private sphere that students will be able to draw parallels and make contrasts between policy making in the private and public arenas. The subject will provide an introduction to the public policy methods of analysis and then apply them to issues in the public and private spheres in South Australia. Students will be expected to research policy issues in the private and public spheres, and to develop a project on an issue of their choice. It should be noted that this subject aims to develop students' research skills.

*assessment:* consult course handouts

### **6643 Problems of Political Philosophy III**

*level:* III *points value:* 12 *duration:* full year

*availability:* subject to availability of staff

*quota:* may apply

*prerequisites:* for Level III students a pass in any Level II Politics, History, Philosophy, Anthropology or Asian Studies subject or any other subject approved by the Head of Department which has a minimum contribution of 8 points second year

*content:* This subject will examine a number of key concepts which are of central importance to any theoretical discussion of Politics. In the main the approach will be through a consideration of the work and ideas of major thinkers in the history of political and social thought, although important secondary material will also be used. The emphasis throughout will be on conceptual issues rather than historical traditions. It will be the aim of the subject to promote discussion about the issues raised.

*assessment:* either 3 tutorial papers (10%) and 3 essays (70%) or 3 tutorial papers (10%) and 4 essays (70%).

### **9796 Public Policy in Australia III**

*level:* III *points value:* 12 *duration:* full year

*prerequisites:* for Level III students a pass in any Level II Politics, History, Philosophy, Geography, Anthropology, Asian Studies, Public Health II subject or any other subject approved by the Head of Department (which has a minimum combination of 8 points second year)

*restriction:* not available to students with exemption from lectures

*contact hours:* 2 lectures and 1 tutorial a week

*content:* This subject will examine the current issues in Australian public policy with the aim of enhancing students' knowledge and understanding of the origins, processes and outcomes of public policy making.

The subject will examine public policy through exploring the theoretical distinctions between the public (government, the public service, the judiciary etc.) the private (private enterprise, the market, the family) and the personal (sexuality). The subject will explore the blurring lines between these three realms and situate these spheres within contemporary debate over the tensions between modernism and post-modernism. The subject will also examine various approaches to public policy and discuss the utility of concepts such as class, power, the state, the mixed economy, privatisation, deregulation, etc. The subject will then move from general theoretical concerns to specific policy areas, such as environment policy, health policy, Aboriginal policy, women's policy, cultural and media policy, economic policy, and with such issues as euthanasia, domestic violence, children's rights, urban planning, woodchipping and so on.

*assessment:* consult Departmental Handbook

### **2584 Sociology of Power III**

*level:* III *points value:* 6 *duration:* semester 2

*quota:* may apply

*prerequisites:* for Level III students a pass in any Level II Politics, History, Philosophy, Geography, Anthropology or Asian Studies subject or any other subject approved by the Head of Department (which has a minimum combination of 8 points second year)

*restriction:* 5993 Political Sociology or 6685 Political Sociology IIIH prior to 1990. Not available to students with exemption from lectures.

*contact hours:* 2 lectures and 1 tutorial a week

*content:* This subject will examine the central concept of political power, and the ways in which it interacts with social structures: Firstly, the methodology of the identification of power will be dealt with, since this has an important bearing on assumptions about the distribution of power. Next, a range of theories about the distribution of power will be covered, including constitutionalism, pluralism, corporatism, elitism, ideological dominance. The role of a number of key institutions will be examined, including the bureaucracy, the military, political parties, the press, trade unions and business. Illustrative material will be drawn from a wide range of international sources but a major focus will be the application of the theories to Australia.

*assessment:* essays, tutorial contribution and optional exam

### **4009 South Australian Parliamentary Internships**

*level:* III *points value:* 6 *duration:* semester 2

*quota:* may apply

*prerequisites:* Completion of 16 points at level II or alternative approved by the Head of Department.

*restriction:* not available to students with exemption from lectures

*content:* This course offers students the opportunity to work within the S.A. Parliament. Students will be located in the office of a Member of Parliament and will work on a major research topic. The first half of the course deals with a study of the parliament and its place in the broader political system. This is followed by a placement with an MP while students work on a specific research project.

*assessment:* One short written essay and one major research paper.

**5589 The Landscape of Australian Politics III**

*level:* III *points value:* 6 *duration:* semester 1

*prerequisites:* a Pass in any Level II Politics, History, Philosophy, Geography, Law, Anthropology, Economics or Asian Studies subject or any other subject approved by the Head of Department (which has a minimum combination of 8 points first year)

*restriction:* 3563 Landscape of Australian Politics I. Not available to students with exemption from lectures

*contact hours:* 2 lectures and 1 tutorial per week

*content:* In this subject students will explore relations between land, law and politics in Australia. The subject provides an introduction to Aboriginal political thought and to the legal, political and cultural dimensions of landscape in contemporary Australia.

*assessment:* minor essay of 2,000 words (20%), tutorial and conference participation (40%), major essay of 4,000 words (40%)

**2979 The Political Economy of the 'Global Village' III**

*level:* III *points value:* 6 *duration:* semester 1

*quota:* may apply

*prerequisites:* for Level III students a Pass in any Level II Politics, Labour Studies, History, Philosophy, Geography, Law, Anthropology, Economics or Asian Studies subject or any other subject approved by the head of Department (which has a minimum combination of 8 points second year).

*restriction:* Not available to students with exemption from lectures.

*contact hours:* 2 lectures and 1 tutorial a week

*content:* This subject explores a contemporary paradox. It is inescapably evident that international trends are drawing separate national economies such as Australia's ever more tightly into a single global market. At the same time we are witnessing the unprecedented assertion of separate identity by hitherto suppressed and marginalised ethnic groups, regions, communities, genders and subjects. In studying this apparent contradiction we will examine the forces which are driving globalisation, including the media, information technology, environmental changes, multinational enterprises, and travel. We will consider whether increasing globalisation is leading to a diminishing role for national governments and whether more global forms of government are inevitable. The social impact on local communities—especially on marginal groups such as indigenous peoples and women—of global economic pressures to restructure, or undertake structural adjustment will also be explored. We will also look at prominent examples of the assertion of local identity and culture. Violent localism will be explored.

The Internet will be both a central metaphor and a point of reference for work in the subject, fusing as it does the global and the local. The simultaneous use of the Internet a channel of discourse and tool of empowerment for the culturally marginal and a global information source will be explored in practical tutorial sessions. Students will be encouraged to utilise Internet resources in conducting research for their major essays.

*assessment:* Assessment will be by coursework and tutorial participation. Tutorial participation (20%), first essay (30%), second essay (50%).

**8203 The Politics of Trade and Development (A) III**

*level:* III *points value:* 6

*availability:* not offered in 1996

*prerequisites:* a pass in any Level II Politics, History, Philosophy, Geography, Law, Anthropology, Economics or Asian Studies subject or any other subject approved by the head of Department (which has a minimum combination of 8 points first year)

*restriction:* not available to students with exemption from lectures

*contact hours:* 2 lectures and 1 tutorial per week

*content:* American and Canadian firms have lost market shares in a number of industries in recent years. The problem is compounded by severe economic recession. As a consequence, millions of jobs have been destroyed and the economy of numerous communities has been severely undermined. This subject seeks to understand the decline of North American economic domination by examining ways that the governments in other countries cope with industrial change. This will permit us to explore answers to questions of how North American competitiveness can be developed in the light of the predicted global economic impact of the European Economic Community in 1992. Some counter-measures are already under way and thus the United States-Canada free-trade agreement warrants close attention.

The first part of the subject is devoted to the larger theoretical and epistemological issues raised by the industry policy debate. The second part has an expressly practical objective: to come to some agreement about the virtues of a particular policy option for both the United States and Canada. Finally, the subject will also allow us to canvas options for a more competitive industrial strategy for Australia.

*assessment:* tutorial participation (20%), first essay (30%), second essay (50%)

### 5386 The Politics of Trade and Development (B) III

level: III points value: 6 duration: semester 2

*prerequisites:* a pass in any Level II Politics, History, Philosophy, Geography, Law, Anthropology, Economics or Asian Studies subject or any other subject approved by the head of Department (which has a minimum combination of 8 points second year)

*restriction:* not available to students with exemption from lectures

*content:* In considering the politics of the newly independent states of Africa and the South Pacific, two features stand out: the speed and spread of change (often sudden and unexpected) and the wide scope for comparative analysis. Change does not imply development: traditional concepts of political science do not necessarily carry the same meaning. The 'developed' political process based on a multi-party system as an essential feature of constitutional democracy had been, in some African states, viewed as incompatible with African needs and aspirations: thus, the rise of the 'democratic one-party state'. However, the 1990's have renewed debates about governance and politics in Africa. Initial theoretical and empirical-based interpretations have proven vulnerable in the face of change. This subject will attempt to expose students to some major patterns of contemporary politics in both East Africa and the South Pacific.

*assessment:* tutorial participation (20%), first essay (30%), second essay (50%)

### 4192 Third World Political Economy III

level: III points value: 12

*availability:* not offered in 1996

*quota:* may apply

*prerequisites:* for Level III students a pass in any Level II Anthropology, Asian Studies, Economics, Geography, History, Philosophy or Politics subject or any other subject approved by the Head of Department  
*restriction:* not available to students with exemption from lectures

*contact hours:* 2 lectures and 1 tutorial a week

*content:* The core question this subject addresses is why poor people in the Third World stay poor, powerless and hungry. As much as possible, it attempts to take a 'poor peasant's eye-view' of mass movements (such as the overthrow of Marcos in the Philippines), famines (such as those which have racked north Africa), poverty (such as that which grips India's Untouchables), the systematic abuse of human rights (almost everywhere) and similar issues. The subject begins by taking a critical survey of traditional approaches to the study of development. Although

readings on specific cases come from Asia, Africa and Latin America the heaviest emphasis is placed on the rich monographic literature available for south and southeast Asia. Among the historical issues to be considered will be the penetration of traditional social forms by colonisation, the role of colonial violence, and the impact of industrial agriculture. In the second section the subject examines contemporary issues in the Third World, such as the changing role of women, ultra-poverty and famine, the political economy of the Green Revolution, torture and repression, the impact of development policies on indigenous peoples and tropical rain forests and whether the emergence of the Newly Industrialised Countries (NICs) heralds the 'end of the Third World'. The final section of the subject is devoted to a significant piece of individual research. It should be stressed that this subject aims at the development of research skills.

*assessment:* tutorial papers, tutorial contributions, 2 essays and a research paper. The weighting of these components will be discussed in the first tutorial meeting.

### 8382 Women and Policy III

level: III points value: 6 duration: semester 1

*quota:* may apply

*prerequisites:* for Level III students a pass in any Level II Politics, History, Philosophy, Geography, Anthropology or Asian Studies subject or any other subject approved by the Head of Department (which has a minimum combination of 8 points second year)

*restriction:* 5930 Women and Politics prior to 1989. Not available to students with exemption from lectures.

*contact hours:* 2 lectures and 1 tutorial a week

*content:* The subject offers a new way to think about policy formulation. Instead of thinking of policy as a response to a problem which exists 'out there', it argues that 'problems' assume a particular shape, take on a particular understanding through the lens of the policy community. It follows that the ways in which a 'problem' is understood affects the shape of the policies designed to address it. Applying this approach to a range of policy areas, we will ask how 'problems' are perceived in these areas and with what effects for which groups of women. The subject begins by asking what kind of a problem women's inequality has been perceived to be and with what policy effects. We proceed to examine antidiscrimination, welfare, education, prostitution, pornography, and sexual harassment policy among others. Considering how these policies take shape will change your way of thinking about policy making in general.

*assessment:* essay and tutorial papers

**4683 Women, Power and Politics III***level:* III *points value:* 6*availability:* not offered in 1996*quota:* may apply

*prerequisites:* for Level III students a pass in any Level II Politics, History, Philosophy, Geography, Anthropology or Asian Studies subject or any other subject approved by the Head of Department (which has a minimum combination of 8 points second year)

*restriction:* not available to students with exemption from lectures

*contact hours:* 2 lectures and 1 tutorial a week

*content:* The subject looks at attempts by women in several countries, including Australia, Canada, and America, to increase women's social power and influence. Specifically it will focus upon attempts by groups of women in these countries to claim that women constitute a separate political category which needs to be recognised. By examining responses to those claims we will be able to say something about the workings of political processes in contests for political power. The subject will offer insights into the problems women encounter in those contests. A few political demands will provide a focus for the analysis: affirmative action, abortion on demand, comparable worth, child care, among others.

*assessment:* essays and tutorial papers

---

**Honours Level**

---

**5442 Honours Politics***level:* Honours *points value:* 24 *duration:* full year*quota:* will apply

*prerequisites:* The normal requirement is for four year length subjects in Politics, that is eight semester length subjects in the new system. However, with the permission of the Head of the Department or the Honours Convenor, one of the four, or two semesters of the eight, may be offered in cognate disciplines, that is Asian Studies, Anthropology, History, Geography and Economics, or such disciplines as the Department of Politics shall deem to be acceptable. At least two semesters must be taken within the Politics department at third year level.

Students wishing to enter honours should have achieved at least two credit results with marks of 70% or above in year length subjects, or four credits in semester length subjects with marks of 70% or above, or some combination thereof, during their three undergraduate years. One credit in a year length subject, or two credits in semester length subjects, at least, must have been obtained in a Politics option or

options at a third year level, with marks of 70% or above. Other cases may be considered, and students admitted, at the discretion of the Honours Committee of Politics.

There is a preliminary Honours meeting in late October or early November of each year where applications will be available. Please check Departmental Noticeboard for date of meeting, which will also be announced in lectures.

**Psychology**

A four-year sequence of study in Psychology is available which has been accredited by the Australian Psychological Society as meeting the requirements for Associate Membership of the Society, and which is accepted by the SA. Psychological Board as fulfilling its requirements with respect to formal study in Psychology specified in the Psychological Practices Act and associated Guidelines.

The sequence consists of 5104 Psychology I; 3149 Psychology II; a range of third-year psychology subjects including 3170 Psychological Research Methodology III to a total value of at least 12 points; and Honours Psychology.

*note:* Except for that in relation to Psychology I, the syllabus entries omit reference to Assumed knowledge as this, in the case of all other Psychology subjects, is the same as the specified prerequisite.

---

**Level I**

---

**5104 Psychology I***level:* I *points value:* 6 *duration:* full year*quota:* will apply

*assumed knowledge:* qualification for entry into Year 12 Mathematics IS and satisfactory achievement at Year 12 level in a literary subject using English

*contact hours:* 3 lectures, and on average 1 tutorial and 1 hour of practical work a week

*content:* This subject aims to provide an introductory overview of contemporary psychology by considering a representative range of psychological topics of current interest and to equip students for further study of psychology. The topics that may be covered include innate behaviour, conditioning, intelligence, personality, cognitive psychology, developmental psychology, language, social psychology, abnormal psychology, the biological bases of behaviour and elementary descriptive and inferential statistics.

*assessment:* end of semester exams

Marks will also be awarded for other assignments to be completed.

## Level II

---

### 3149 Psychology II

level: I      points value: 8      duration: full year

quota: may apply

prerequisites: 5104 Psychology I.

contact hours: 3 lectures and 1 tutorial/seminar a week, plus practical work involving analysis and report writing in student's own time

content: The subject is oriented towards the controlled study of human and animal behaviour, both individual and social, and is concerned also with the possibilities for the wider application of contemporary psychological theories. Specialised seminar sequences allow some choice of additional topics.

assessment: marks in a range of assessable products including end of semester examinations, seminar work and practical reports are combined to produce the final score for the subject.

## Level III

---

At the third year level, one subject (3170) will be offered in Psychological Research Methodology (4 points), and a set of subjects (2 points each) to cover a range of topics in Psychology which are organised into the following two groups. The range of subjects to be offered in any year will be subject to the availability of staff and other necessary resources.

Group A: 7324 Studies in Personality III, 5673 The Philosophy and Psychology of Consciousness III, 8659 Social Psychology, 8779 Metapsychology III, 3650 Applied Behaviour Change and Training III.

Group B: 2196 Environmental Psychology III, 2921 Psychology of Language in Thought and Action III, 7196 Intelligence III, 8267 Animal Behaviour III, 4770 Neuroscience in Psychology III.

To qualify for entry into Honours Psychology, it will be necessary to complete the subject Psychological Research Methodology and 4 other subjects in psychology from the list above, with at least one subject chosen from each group, to provide a total value of 12 points. Students wishing to complete a substantial proportion of their study at the third year level in psychology (to the value of 8 points or more) are advised to undertake the subject Psychological Research Methodology, since the majority of the practicals assume competence in statistical analysis and in the use of the computer-based statistical package at the level provided in that subject. A similar assumption about familiarity with statistical procedures and methodological issues may be made in the presentation of the other material.

All Level III subjects have associated practical work assignments which contribute 25% of the final mark. In the case of Psychological Research Methodology, this consists of workshops and a substantial exercise in statistical computing.

Details about the practical work, including formal contact time, are included in the Third Year Psychology Handbook. It is not possible to stipulate formal contact hours for practical work in the syllabus entries below since this varies among the different practical exercises; in some cases the data-gathering, and in all cases the statistical analyses and the preparation of the reports, are completed in the students' own time. It is assumed that students will either be concurrently enrolled in Psychological Research Methodology, or have completed it (or some equivalent) previously: where this is not the case students may need to devote additional time to develop competence in the statistical techniques employed.

### 8267 Animal Behaviour III

level: III      points value: 2      duration: semester 1

quota: may apply

prerequisites: 3149 Psychology II; or other subjects approved by the Head of Department

restriction: 3609 Animal Behaviour prior to 1989

contact hours: 1 lecture a week, plus 4 tutorials and practical work

content: This subject will proceed from the point reached in the Psychology II section devoted to the topic. The central theme will be the behaviour of mammals and its evolution. Primates will receive particular attention but other species, notably the carnivora and ungulates, will also be treated. Play behaviour, domestication, behaviour in captivity and man-animal contacts will be emphasised. Extensive use will be made of film and it is hoped to organise visits to animal instrumentalities in the Adelaide area.

Approximately 12 film screenings will be arranged in association with the course and a film program will be available from the Departmental Office during Orientation Week.

assessment: final exam and the report of a practical exercise to be conducted in the Adelaide Zoological Gardens

### 3650 Applied Behaviour Change and Training III

level: III      points value: 2      duration: semester 2

quota: may apply

prerequisites: 3149 Psychology II

contact hours: 1 lecture per week, 4 tutorials and practical work

*content:* This course of lectures is concerned with changing existing behaviours and training new skills in applied settings. The first part of the course reviews the evidence concerning the effectiveness of psychotherapy and behaviour modification and their application to work behaviours in organisations. Particular emphasis is placed on the implications of this evidence for the design and evaluation of behaviour change programs in applied settings. The second part of the course is concerned with the principles and practice of training new work and social skills and with teaching work related information to adults in applied settings.

*assessment:* final exam and the report of a practical exercise

### **2196 Environmental Psychology III**

*level:* III *points value:* 2 *duration:* semester 1

*quota:* may apply

*prerequisites:* 3149 Psychology II

*restriction:* 2766 Environmental Psychology prior to 1989

*contact hours:* 1 lecture a week, plus 4 tutorials and practical work

*content:* An introduction to environmental psychology including methods, perception and cognition, stressors, personal space and territoriality, aesthetics, and human-environment interactions.

*assessment:* final exam and the report of a practical exercise

### **7196 Intelligence III**

*level:* III *points value:* 2 *duration:* semester 2

*quota:* may apply

*prerequisites:* 3149 Psychology II

*restriction:* 1508 Intelligence prior to 1989

*contact hours:* 1 lecture a week, plus 4 tutorials and practical work

*content:* This subject reviews recent cognitive analytical approaches to the study of individual differences in intelligence, comparing the psychometric paradigm with various information processing models. Particular emphasis is given to the consequences of mental retardation, brain damage, and ageing for intellectual functioning.

*assessment:* final exam and the report of a practical exercise

### **8779 Metapsychology III**

*level:* III *points value:* 2 *duration:* semester 1

*quota:* may apply

*prerequisites:* 3149 Psychology II

*contact hours:* 1 lecture and 4 tutorials a week, and 3 practical briefing sessions

*content:* This subject will treat the psychological enterprise as the object of study, that is the network of individuals, groups and institutions involved in the production, dissemination and application of psychological knowledge claims. Findings from philosophy, history, sociology and psychology itself will be considered in an attempt to extend the understanding of the enterprise. The aim of the course is not to provide final answers, but to assist participants to develop a more critical perspective to the discipline.

*assessment:* final exam, report of a practical exercise

### **4770 Neuroscience in Psychology III**

*level:* III *points value:* 2 *duration:* semester 2

*quota:* may apply

*prerequisites:* 3149 Psychology II

*restriction:* 8743 Physiological Psychology prior to 1989

*contact hours:* 1 lecture a week, plus 4 tutorials and practical work

*content:* This subject seeks to expose further some of the difficulties of understanding Psychology in brain terms, and to develop an impression of what, in principle, can be achieved by an interchange of ideas between the two disciplines, Psychology and Neuroscience: examining, on the one hand, emotion as a representative psychological construct, and on the other, what can be understood of the brain's functional organisation.

The subject consists, essentially, of three principal components: theoretical contemplations of the 'structure' of emotion, and its functional relevance in psychological explanation; research approaches in its various aspects; and the implications of physiological perspectives in a consideration of emotion.

*assessment:* final exam, report of a practical exercise

### **3170 Psychological Research Methodology III**

*level:* III *points value:* 4 *duration:* full year

*quota:* may apply

*prerequisites:* 3149 Psychology II

*restriction:* 1759 Methodology and Statistics prior to 1989

*contact hours:* 2 lectures and up to 1 tutorial a week, plus practical work

*content:* This subject will add to the range of statistical significance tests taught in Psychology I and Psychology II a number of more complex techniques. These will include multiple regression, multifactor analysis of variance, planned and post-hoc contrasts, trend analysis and analysis of covariance. Students will be introduced to the use of statistical software (specifically SPSS) on the University's computers, and will carry out a range of practical exercises in this area.

A wide range of issues relating to research design will be covered in lectures and tutorials. Topics dealt with will range from the general (eg. the various concepts of reliability and validity, the logic of inference from data obtained in different ways, the use of quasi experimentation and unobtrusive measures) to the highly specific (eg. the consideration of the inferences that have been made by specific researchers using particular research designs in particular areas of psychological interest).

*assessment:* 2 final exam papers (one at the end of each semester), and exercises in statistics and statistical computing

### **2921 Psychology of Language in Thought and Action III**

*level:* III    *points value:* 2    *duration:* semester 1

*quota:* may apply

*prerequisites:* 3149 Psychology II

*contact hours:* 1 lecture per week plus 4 tutorials and practical work

Pragmatic and figurative aspects of language have been neglected in traditional approaches to language operating within formalist or objectivist frameworks. However, analyses of these aspects are playing an increasingly important role in psychology, linguistics, and artificial intelligence in attempts to understand cognitive processes as well as natural language use. Similar analyses are also being employed in current debates on the nature of psychology as a scientific discipline and on the present and future orientation of particular fields, such as social psychology and personality theory. The aim of this option is to present a critical review of recent approaches to pragmatic and figurative aspects of language use, and to provide a practical introduction to some of the principal methods of analysis which have been developed to study them.

*assessment:* final exam and the report of a practical exercise

### **8659 Social Psychology III**

*level:* III    *points value:* 2    *duration:* semester 1

*quota:* may apply

*prerequisites:* 3149 Psychology II

*restrictions:* 6423 Social Psychology and Intergroup Relations III; 4553 Cognition and Affect in Social Relationships III; 8659 Social Psychology and Intergroup Relations III; 8659 Social Psychology III.

*contact hours:* 1 lecture a week plus 4 tutorials and practical work

*content:* An expanding body of research in contemporary social psychology has been the study of social cognition. This tradition concerns itself with the way in which individuals and groups attend to, process, interpret, mentally represent and understand complex social information. While this field borrows models and concepts from cognitive psychology, the study of social objects is markedly different from the study of non-social objects. The acquisition and processing of social knowledge requires the consideration of a range of affective, social, cultural and symbolic influences. Concepts predominant within social cognition research include attribution theory and the concepts of schema, script and prototype. These will be considered along with less mainstream approaches, such as the French tradition of research in social representations theory. A practical exercise will be conducted to illustrate some of the processes central to the study of social cognition.

*assessment:* final exam and report of the practical exercise

### **7324 Studies in Personality III**

*level:* III    *points value:* 2    *duration:* semester 2

*quota:* may apply

*prerequisites:* 3149 Psychology II

*restriction:* 5202 Personality prior to 1989

*contact hours:* 1 lecture a week, plus 4 tutorials and practical work

*content:* The study of personality as a sociocultural product; interactional concepts of personality; discursive construction of identity, self, the subject and subjection; discourse analysis in studies of the person; poststructuralist, social constructionist and narrative perspectives.

*assessment:* final exam and the report of a practical exercise

### **5673 The Philosophy and Psychology of Consciousness III**

*level:* III    *points value:* 2    *duration:* semester 2

*quota:* may apply

*prerequisites:* 3149 Psychology II

*restriction:* 1967 The Philosophy and Psychology of Consciousness prior to 1989

*contact hours:* 1 lecture a week, plus 4 tutorials and practical work

*content:* This subject examines the place in Psychology of the phenomena associated with such terms as 'consciousness', 'awareness' and 'experience'. Lectures and tutorials deal with the place of these types of concept in an overall scientific program, considering relevant issues at levels ranging from the philosophical to the physiological. Specific topics covered include the mind-body problem, the feasibility of a reductionist approach, the place of phenomenology and existentialism, and the suggestions of physiologists on the nature of the mechanisms that might underlie consciousness.

*assessment:* final exam and the report of a practical exercise

## Honours Level

### 4702 Honours Psychology

*level:* Honours *points value:* 24 *duration:* full year  
*quota:* will apply

*prerequisites:* students wishing to enrol in 4702 Honours Psychology must have reached a satisfactory standard in 5104 Psychology I, 3149 Psychology II, and third-year psychology subjects with a total of at least 12 points value, including the subject 3170 Psychological Research Methodology III; or an equivalent sequence of subjects from other degree courses deemed acceptable by the Head of the Department. The entry standard normally requires an overall Credit or Distinction in two of the first, second or third-year assessments of psychology subjects, and, in any case, at least a good pass (60% or better) on average for level III subjects. Academic achievement is the only criterion for entry to the course. No more than six places in the course are available for students who have degrees from Universities outside South Australia. Intending applicants seeking further information should obtain the Honours Introductory Booklet from the Department.

*content:* Honours Psychology is a full year's course of lectures and discussions on advanced topics. It also involves a dissertation embodying the results of a research investigation carried out under supervision of a member of the staff of the Department or other person nominated by the Department for the purpose.

*assessment:* achievement in the examinations of six half-semester topics provides 60% of the assessment of the course, and an empirical research thesis provides the remaining 40%.

## Social sciences

### 6204 Issues and Techniques in the Social Sciences II

*level:* II

*points value:* 4

*duration:* to be advised

*prerequisites:* minimum 6 points in any discipline at level I

*contact hours:* to be advised

*content:* to be advised

*assessment:* to be advised

## Women's Studies

The Department of Women's Studies offers a three year sequence of study for the B.A. and an Honours year. Honours coursework and supervision is available.

The Women's Studies Unit at Flinders University offers several topics at undergraduate level. Students wishing to study topics at Flinders University for credit to their Adelaide degrees need to obtain approval in writing in advance from the Registrar of The University of Adelaide and must also comply with the enrolment procedure at Flinders University. The same procedures apply for students seeking enrolment in relevant subjects offered by the University of South Australia.

## Level I

### 8066 Introduction to Gender Studies I

*level:* I *points value:* 3 *duration:* semester 1

*restriction:* Women's Studies I

*contact hours:* 1 two hour lecture and 1 one hour tutorial a week

*content:* This subject aims to examine a number of the concepts which are employed in analysis of gender inequality. Topics will vary but may include discussion of debates around the place of Women's Studies, sexuality, the relation of race and gender, the concept 'woman', and the role of men.

*assessment:* tutorial presentation, participation and report (30%), tutorial paper of 1,000 words (30%), essay of 2,000 words (40%). Attendance at lectures and tutorials is compulsory.

### 2901 Women's Health Issues I

*level:* I *points value:* 3 *duration:* semester 2

*contact hours:* 1 two hour lecture and 1 one hour tutorial a week

*content:* This subject will provide an introduction to the physical and social issues of women's health. It

addresses a relatively new interdisciplinary field of study and covers aspects of physiology, social psychology and sociology as well as physical activity and leisure. The subject explores some of the gender differences in wellbeing that relate to 'biology', 'social roles', 'lifecycle', 'lifestyle' and the status of women. Practical applications of the principles of good health will be incorporated into the program.

*assessment:* tutorial participation and presentation of paper - 2,000 words (50%), journal (30%), essay (20%). Attendance at lectures and tutorials is compulsory.

## Level II

### 4040 First Wave Feminism in Australia II

*level:* II *points value:* 6

*availability:* not offered in 1996

*prerequisites:* any Arts Level I subjects to the value of 6 points or by permission of Head of Department.

*contact hours:* 2 hour lecture and one tutorial a week

*content:* Beginning with an examination of the campaigns for female suffrage in Australia in the late nineteenth and early twentieth centuries, this subject will consider the activities and concerns of first-wave feminism, locating them in their specific economic, cultural and political contexts. Central issues to be discussed are sex and work. Tutorials will discuss literary works written during the period, parliamentary enquiries and debates, as well as secondary texts.

*assessment:* 1 seminar paper of no more than 1,000 words (30%), and one 3,000 word essay (70%)

### 9959 Gender Divisions in Some Western Societies Since 1700 II

*level:* II *points value:* 4 *duration:* semester 2

*prerequisites:* any Arts Level I subjects to the value of 6 points or by permission of Head of Department

*contact hours:* 2 one hour lectures and 1 tutorial a week

*content:* A survey of Australian feminist history set in a context of recent debates in feminist history. Topics include Aboriginal women, pre-industrial society, industrial revolution and gender divisions, pioneer women, women's separate sphere, first-wave feminism sexuality, the birth rate, women's paid and unpaid work the depression and the world wars.

*assessment:* 4,000 word essay; 1,000 word seminar paper, seminar participation and report

### 5943 Gender, 'The Body' and Health II

*level:* II *points value:* 4 *duration:* semester 1

*prerequisites:* any Arts Level I subjects to the value of 6 points or by permission of Head of Department  
*contact hours:* 3 hours per week

*content:* This subject will explore the social and historical location of understandings of 'the body', gender and health. In particular it will investigate the role that the concept of biology and biological difference play in the construction of gender, and of health/illness. The subject will draw on historical and contemporary instances to explore the plausibility of materialist, socio-biological, social constructionist, Foucauldian and post-modern theories of embodiment and its relationship to gender.

Topics will include the exploration of changing understandings of reproduction, the immune system, biological rhythms and psychosomosis and in doing so will focus on contemporary diseases which may include repetition injury, infertility, impotence, cancer, obesity, anxiety disorders, osteoporosis.

The subject will draw centrally from feminist scholarship, sociology, anthropology and the history and philosophy of science.

*assessment:* short essay (1,000 words) 25%; seminar preparation, attendance, participation and presentation (1,000 words) 35%; major essay (2,000 words) 40%

### 8800 Perspectives on Sexualities II

*level:* II *points value:* 4 *duration:* semester 2

*prerequisites:* any Arts Level I subjects to the value of 6 points or by permission of Head of Department

*contact hours:* 3 hours per week

*content:* This subject will explore the ways in which sexuality is socially and culturally constructed. It will investigate how, on the one hand, sexuality is a category through which social and cultural life is organised which needs to be studied separately and how, on the other hand, the category of sexuality is always in interaction with other categories such as gender and race in the complex regimes of contemporary life. Topics will include: sexuality in the workplace, sexual violence, identity politics, representations of sexuality in the media, prostitution, pornography, abortion and HIV/AIDS. The subject will draw centrally from feminist scholarship, sociology, anthropology and the history and philosophy of science.

*assessment:* short essay (1,000 words) 25%; seminar preparation and paper (1,000 words) 25%; major essay (2,000 words) 40%; attendance and participation 10%

**5913 Power and Difference: Post-Colonial Perspectives II***level:* II *points value:* 4*availability:* not offered in 1996*prerequisite:* any Arts Level I subjects to the value of 6 points or by permission of Head of Department.*restrictions:* 3708 Power and Difference II*contact hours:* 3 hours per week

*content:* Students will consider feminist, postmodern and postcolonial perspectives on the construction of race, class and gender differences with specific (but not exclusive) reference to Australian culture. With reference to the work of French feminist, psychoanalytic, Foucauldian and deconstructive criticism students will examine the role of high and mass cultural materials (novels and art forms, histories, journalism, travellers' tales, the tabloid press, film, cartoons and newspapers) in constructing networks of power/knowledge through representations of difference and marginality. The subject will examine the possibilities for maintaining and resisting dominant power relations in the operations of language, social institutions and practices, and in everyday life experiences. It will also consider reading and viewing practices in order to understand how readers are positioned by the texts and how to read 'otherwise'.

*assessment:* short applied analysis 1500 words (20%), seminar presentation and paper (20%), essay 3,000 words (60%)

**6857 Popular Culture, Women and Representation II***level:* II *points value:* 4 *duration:* semester 1*prerequisites:* any Arts Level I subjects to the value of 6 points or by permission of Head of Department*restrictions:* 4700 Women and the Media II*contact hours:* 2 hour lecture and 1 hour tutorial per week

*content:* Students will examine a variety of approaches to popular culture and analyse the constructions of masculinity and femininity in the popular media. The focus will be on visual media, particularly on television soaps and sitcoms, film and film theory, although it may also include an analysis of newspapers, advertisements, women's magazines, romance fiction, and the like. The subject will consider contemporary debates concerning women's role in the production and consumption of popular culture, the significance of spectator positions and the dynamics of pleasure and desire in the maintenance of gender representations in the media.

*assessment:* short applied analysis 1,000 words (20%), seminar presentation and paper of 1,000 words (20%), essay of 3,000 words (60%)

**1846 Women and Work II***level:* II *points value:* 4 *duration:* semester 1*prerequisites:* any Arts Level I subjects to the value of 6 points or by permission of Head of Department*contact hours:* 2 lectures and 1 tutorial a week

*content:* This unit looks at women's paid and unpaid work, and the social, economic and cultural context in which it is carried out. The sexual division of labour, gender inequalities and sexual harassment in the paid workforce, unionism and economic policies are some of the topics covered with regard to paid labour. In dealing with unpaid 'private' labour, issues relating to parenting, childcare, emotional labour and domestic work will be considered. We look at the links between paid work and unpaid family work and examine alternative arrangements. We will analyse both theoretical frameworks of analysis and empirical case studies, and make connections between Australian women's diverse experiences, and those of women in other industrialised and in developing countries.

*assessment:* 1 essay of 2,500 words (30%), 1 short paper of 1,000 words (15%), tutorial participation (20%) work journal on readings (35%)

**Level III****9904 Feminist Thought III***level:* III *points value:* 6 *duration:* semester 1*prerequisites:* Women's Studies subjects at Level II to the value of 8 points or by permission of the Head of Department*restriction:* 3466 Survey of Feminist Thinkers (pre-1992)*contact hours:* 3 hours per week

*content:* This unit introduces students to a range of feminist positions. Topics include: mainstream conceptions of women's social position; Liberal feminism; Marxist feminism; Radical feminism; Socialist feminism; Psychoanalysis and feminism; Postmodernism/ Poststructuralism and the significance of race within feminism, amongst others.

*assessment:* participation/review (20%); tutorial paper (30%); major essay (50%)

**3308 First Wave Feminism in Australia III***level:* III *points value:* 6*availability:* not offered in 1996

*prerequisites:* any Level II Women's Studies subjects to the value of 8 points or by permission of Head of Department.

*restrictions:* 6778 Australian Feminism in Context 1880-1914 II; 8339 Australian Feminism in Context 1880-1914 III

*contact hours:* 2 hour lecture and 1 tutorial per week

*content:* Beginning with an examination of the campaigns for female suffrage in Australia in the late nineteenth and early twentieth centuries, this subject will consider the activities and concerns of first-wave feminism, locating them in their specific economic, cultural and political contexts. Central issues to be discussed are sex and work. Tutorials will discuss literary works written during the period, parliamentary enquiries and debates, as well as secondary texts.

*assessment:* 1 seminar paper of no more than 1,000 words (30%), and 1 x 5,000 word essay (70%)

### **2345 Gender Divisions in some Western Societies since 1700 III**

*level:* III *points value:* 6 *duration:* semester 2

*prerequisites:* Women's Studies or History subjects at Level II to the value of 8 points or by permission of Head of Department.

*restriction:* 1489 History IIIB Women in History; 9959 Gender Divisions in Some Western Societies II

Students may not take this subject if they have taken the same subject at Level II.

*contact hours:* 1 one hour lecture and 1 two-hour seminar a week

*content:* A survey of Australian feminist history set in a context of recent debates in feminist history. Topics include Aboriginal women, pre-industrial society, industrial revolution and gender divisions, pioneer women, women's separate sphere, first-wave feminism sexuality, the birth rate, women's paid and unpaid work the depression and the world wars.

*assessment:* 5,000 word essay, 1,000 word seminar paper, seminar participation reports

### **3377 Gendered Spaces, Gendered Development III**

*level:* III *points value:* 6 *duration:* semester 2

*prerequisites:* (a) 2 Geography subjects at Level II to the value of 6 points; or (b) 2 Women's Studies subjects at Level II to the value of 8 points; or a combination of (a) and (b)

*contact hours:* 1 three hour seminar a week

*content:* In this subject we aim to develop an understanding of how gender is constituted by social and environmental processes. This involves describing and analysing the manifestations of gender divisions and power relations in our own environment, ie homes, cities and countryside. We look at geographical variations in gender relations in Australia, in other Western industrialised countries, and in developing countries and examine how they influence, and are structured by, development processes, global economic structuring, and environmental change.

*assessment:* 1 essay of 2,500 words (25%), seminar work and presentations (35%), project work and report of 2,500 words (40%)

Seminar work includes keeping a work journal on readings and preparing a tutorial discussion.

### **7378 Gender, 'The Body' and Health III**

*level:* III *points value:* 6 *duration:* semester 1

*prerequisites:* any Level II Women's Studies subject to the value of eight points or the permission of the Head of Department

*contact hours:* 3 hours per week

*content:* The subject will explore the social and historical location of understandings of 'the body', gender and health. In particular it will investigate the role that the concept of biology and biological difference play in the construction of gender and of health/illness. The subject will draw on historical and contemporary instances to explore the plausibility of materialist, socio-biological, social constructionist, Foucauldian and post-modern theories of embodiment and its relationship to gender. Topics will include the exploration of changing understandings of reproduction, the immune system, biological rhythms and psychosomosis and in doing so will focus on contemporary diseases which may include repetition injury, infertility, impotence, cancer, obesity, anxiety disorders, osteoporosis. The subject will draw centrally from feminist scholarship, sociology, anthropology and the history and philosophy of science.

*assessment:* short essay (1,500 words) 25%; seminar preparation, attendance and participation and presentation (2,000 words) 35%; major essay (3,000 words) 40%

### **5869 Perspectives on Sexualities III**

*level:* III *points value:* 6 *duration:* semester 2

*prerequisites:* any Level II Women's Studies subjects to the value of eight points or the permission of the Head of Department

*contact hours:* 3 hours per week

*content:* This subject will explore the ways in which sexuality is socially and culturally constructed. It will investigate how, on the one hand, sexuality is a category through which social and cultural life is organised which needs to be studied separately and how, on the other hand, the category of sexuality is always in interaction with other categories such as gender and race in the complex regimes of contemporary life. Topics will include: sexuality in the workplace, sexual violence, identity politics, representations of sexuality in the media, prostitution, pornography, abortion and HIV/AIDS. The subject will draw centrally from feminist scholarship, sociology, anthropology and the history and philosophy of science.

*assessment:* short essay (1,500 words) 25%; seminar presentation and paper (1,500 words) 25%; major essay (about 3,000 words) 40%; attendance and participation 10%

### 8613 Popular Culture, Women and Representation III

*level:* III *points value:* 6 *duration:* semester 1

*prerequisites:* Women's Studies or Media Studies subjects at second year level to the value of 8 points

*restrictions:* 4700 Women and the Media II; 9670 Women and the Media III

*contact hours:* 2 hour lecture and 1 hour tutorial per week

*content:* Students will examine a variety of approaches to popular culture and analyse the constructions of masculinity and femininity in the popular media. The focus will be on visual media, particularly on television soaps and sitcoms, film and film theory, although it may also include an analysis of newspapers, advertisements, women's magazines, romance fiction, and the like. The subject will consider contemporary debates concerning women's role in the production and consumption of popular culture, the significance of spectator positions and the dynamics of pleasure and desire in the maintenance of gender representations in the media.

*assessment:* short applied analysis 1,500 words (20%), seminar presentation and paper of 1,000 words (20%), essay of 4,000 words (60%)

### 1892 Power and Difference: Post-Colonial Perspectives III

*level:* III *points value:* 6

*availability* not offered in 1996

*prerequisites:* Women's Studies, Media Studies or Politics subjects at second year level to the value of 8 points

*restrictions:* 3708 Power and Difference II

*contact hours:* 3 hours per week

*content:* Students will consider feminist, postmodern and postcolonial perspectives on the construction of race, class and gender differences with specific (but not exclusive) reference to Australian culture. With reference to the work of French feminist, psychoanalytic, Foucauldian and deconstructive criticism students will examine the role of high and mass cultural materials (novels and art forms, histories, journalism, travellers' tales, the tabloid press, film, cartoons and newspapers) in constructing networks of power/knowledge through representations of difference and marginality. The subject will examine the possibilities for maintaining and resisting dominant power relations in the operations of language, social institutions and practices, and in everyday life experiences. It will also consider reading and viewing practices in order to understand how readers are positioned by the texts and how to read 'otherwise'.

*assessment:* short applied analysis 1,500 words (20%), seminar presentation and paper (20%), essay 4,000 words (60%)

### 7692 Women and Work III

*level:* III *points value:* 6 *duration:* semester 1

*prerequisites:* Women's Studies subjects at Level II to the value of 8 points or by permission of the Head of Department

*restriction:* 1846 Women and Work II

*contact hours:* 2 lectures and 1 tutorial a week

*content:* The unit includes an examination of both women's waged and non-waged work in Australia. The sexual division of labour, inequalities in the paid workforce, the transition from education to work, unionism and policies relating to waged work are some of the topics covered with regard to paid labour. In dealing with 'private' labour, issues relating to mothering, domestic work, child-care, balancing the double load, sexuality and 'emotional labour' will be considered. The unit also deals with part-time and outwork. Analysis of skills, work preferences and career options will be undertaken.

*assessment:* tutorial presentation and participation, tutorial paper of 1,000 words, major essay/project of 3,000 words

## Honours

*prerequisites:* to be eligible for the Honours year students need to have taken at least five one semester Women's Studies subjects at undergraduate level, two of which can be taken as appropriate and related subjects in other departments with the approval of the Head of the Department, with at least two subjects assessed at least credit standard at third level. Minimum requirement – 24 points.

*requirements:* The work of the Honours year consists of taking a core subject (a theory/research subject) and one elective subject and writing an Honours thesis. A list of subjects to be offered is available from the Head of the Department. Students from allied Arts Departments may enrol for joint Honours program with the approval of the respective Heads of Department/Postgraduate Coordinators. Some subjects will be offered through a collaborative arrangement with the Women's Studies Unit at Flinders University. Students may choose electives from the postgraduate subjects available through the Department, or appropriate postgraduate subjects available at another tertiary institution in South Australia.

Students who wish to do Honours should consult with the Honours Convenor about their eligibility and their plans for the Honours program.

*assessment:* Honours will be assessed on thesis (50%), core (theory/research) subject, (25%), and elective (25%)

## Honours Level

---

### 8829 Honours Women's Studies

*level:* honours *points value:* 24 *duration:* full year

*requirements:* Honours work includes an elective subject, a theory core and a thesis. Arrangements are possible for joint honours. Enquiries should be addressed to the Head of Department.

# Bachelor of Labour Studies

## Introductory remarks

This course aims to provide students with the information and skills to discuss substantial issues of political, social, economic and industrial concern to the Australian workforce, and to take an informed part in the formulation of policies and decision-making that concern them as members of the workforce.

Applications for admission to this course shall be made through the South Australian Tertiary Admissions Centre (SATAC) on the appropriate form by the required date. Successful applicants to the course may defer their studies to the following year.

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar.

As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

## Specific Course Rules

### 1 General

- 1.1 A student may gain an Ordinary degree of Bachelor of Labour Studies, an Honours degree of Bachelor of Labour Studies, or both.

### 2 Admission requirements

- 2.1 The admission requirements for this course are those outlined in the Rules made by Council pursuant to Chapter IX of the University Statutes — Of Admission and Enrolment. (Please refer to the General Course Rules in this Volume of the Calendar.)

### 3 Status, exemption and credit transfer

- 3.1 By permission of the Head of the Centre for Labour Studies, students may gain status towards the degree for studies undertaken in other Faculties or universities.
- 3.2 Students who are admitted to the course for the degree of Bachelor of Labour Studies on the basis of studies undertaken in the Associate Diploma in Labour Studies shall be granted full status for their studies in the Associate Diploma.
- 3.3 Students seeking status for work undertaken in other awards will not be granted more than 36 points of status at Levels I and/or II towards the degree.

### 4 Approval of course of study at enrolment

- 4.1 Each student's course of study shall be approved by the Faculty at enrolment each year.

### 5 Duration of course

- 5.1 To qualify for the Bachelor degree a student shall satisfactorily complete a course of three years of full-time study or the part-time equivalent. The course shall be available in both the internal and external mode.

### 6 Qualification requirements

To qualify for the degree of Bachelor of Labour Studies a candidate shall present subjects to the value of 72 points as follows:

#### 6.1 Levels I and II

- 6.1.1 Students shall successfully complete the following subjects to the value of 48 points: all six Work Studies, Union Studies and Political Economy core subjects to the value of 24 points; elective subjects to the value of twelve points and the Practical Project.
- 6.1.2 In special circumstances, a candidate may, with the approval of the Head of the Centre for Labour Studies, present passes in subjects not listed in Rule 6.1.1, above, to a maximum of twelve points in lieu of the elective subjects.

#### 6.2 Level III

- 6.2.1 Except with the permission of the Head of the Centre for Labour Studies, a student shall present passes in at least 36 points of subjects listed in Rule 6.1, above, including a pass in 8196 Practical Project (PI or better), before enrolling in any Level III subject.
- 6.2.2 Students shall successfully complete four Level III subjects to the value of 24 points.

6.2.3 Selected students may undertake the Level III subject 7329 Industry Practicum in preparation for an industry-based Honours project under the Co-operative Education for Enterprise Development (CEED) Program. The subject will not count toward the degree. Details of the program are available from the Head of Department.

## 7 Course of study / Subjects of study

### 7.1 Levels I and II

#### 7.1.1 Core subjects

All students shall complete the following:

8687 Work Studies I	4
4354 Work Studies II	4
1790 Union Studies I*	4
5713 Union Studies II*	4
6494 Political Economy I	4
8833 Political Economy II	4

#### 7.1.2 Elective subjects

Students shall complete subjects to the value of 12 points chosen from the following:

7644 Trade Unions and the Third World*	4
3369 Australian Labour History	4
7870 Occupational Health and Safety: Union Perspectives*	4
8844 Gender, Work and Society	4
9846 Trade Unions: an International Comparison*	4
6305 Work, Race and Culture*	4
6552 Labour, Culture and the Media	4
9881 Issues in Labour Studies*	4
7497 Trade Union Organisation and Management Skills*	4
3939 Information Technology for Unions	4

#### 7.1.3 Practical Project

All students shall complete the Practical Project as follows:

8196 Practical Project	12
------------------------	----

### 7.2 Level III

All students shall complete Level III subjects to the value of 24 points chosen from the following:

7975 Political Economy IIIA: Theoretical Perspectives	6
---	---

7380 Political Economy IIIB: The State and Public Policy	6
--	---

6840 Union Studies IIIA: Comparative Theory	6
---	---

7295 Union Studies IIIB Systems and Strategies	6

## 8 Review of academic progress

8.1 A student who fails a subject and desires to take the subject again shall again attend lectures and satisfactorily do such written and practical work as the teaching staff concerned may prescribe.

8.2 A student who has twice failed a subject may not enrol for that subject again except by special permission to be obtained in writing from the Faculty and then only under such conditions as may be prescribed.

8.3 For the purposes of this clause a student who is refused permission to be assessed, by examination or otherwise, or who does not, without a reason accepted by the Head of Centre for Labour Studies as adequate, attend all or part of a final examination (or supplementary examination if granted) after having enrolled for at least two thirds of the normal period during which the subject is taught, shall be deemed to have failed the subject.

## 9 Assessment and examinations

9.1 There shall be two systems of classification of pass in subjects for the degree: either Non-Graded Pass; or Pass with High Distinction, Pass with Distinction, Pass with Credit, Pass Division I, Pass Division II, Unclassified Pass and Fail.

## 10 Articulation with other awards

10.1 Students who have completed 36 points or more, plus a pass of a classification of Division I or better in the Practical Project, in the Associate Diploma in Labour Studies offered by the University or the former City Campus of the South Australian College of Advanced Education are eligible to apply for entry to the course for the degree of Bachelor of Labour Studies course, and if successful, on gaining entry, receive full status for the work they have undertaken in the Associate Diploma in Labour Studies.

**10.2** Students who have been admitted to the award of Associate Diploma in Labour Studies offered by the University or the former City Campus of the South Australian College of Advanced Education who subsequently successfully complete the requirements of the Bachelor of Labour Studies must surrender their first award before being admitted to the degree of Bachelor of Labour Studies.

## Syllabuses

### core subjects

#### Level I/II

#### 6494 Political Economy I

level: VII points value: 4 duration: semester 1

contact hours: 1 three hour class per week

*content:* Australia's political economy, particularly as it has developed since European settlement. The international and domestic economic and political forces which have shaped contemporary Australian society are considered. The economic, social, political and gender structures which have been laid down by successive periods in the evolution of Australian society are noted and analysed. Comparisons are also made, where appropriate, to developments taking place elsewhere. The subject addresses such questions as: What are the most significant characteristics of contemporary Australia's political economy and what has produced them? And in a rapidly changing international environment, how is Australia's political economy being affected?

*assessment:* internal: essays and tutorial papers; external: essays and other written work

#### 8833 Political Economy II

level: VII points value: 4 duration: semester 2

*prerequisites:* 6494 Political Economy I

*contact hours:* 1 three hour class per week

*content:* Australia's economy in historical perspective; Australia's balance of payments crisis and terms of trade; Foreign debt; Australia and international capitalism; Rising inequality; the growth of the rich and the poor; Casino capitalism: the deregulation of the finance sector; The economics of the environment; The crisis of productive investment in the Australian economy; the attack on the public sector; The economic role of the government and the state; Current government economic policies; Alternative economic policies.

*assessment:* internal: essays and tutorial papers; external: essays and other written work

#### 1790 Union Studies I

level: VII points value: 4

*availability:* not offered in 1996

*contact hours:* 1 three hour class per week

*content:* Membership: collective survey of individuals' links with unions, discussion of diversity in unions, etc; History: the history of workers' organisations, union traditions of militancy, social and political policies, etc; The Working Class: composition of unions in the total work-force, gender balance and union density; Organisation: internal structures and resources of unions, shop stewards, representative democracy and registration; Peak Councils: trades and labour councils, industry federations, ACTU Executive and Congress; Employers: associations SA Employers' Federation, Chambers of Commerce and Manufacturers, NFF, BCA, CAI; Blue Collar unions: study of craft or manual unions, including the part played by women in these unions; White Collar unions: study of public sector or services unions, including the part played by women in these unions; Wages: federal awards, national wage cases, allowances, superannuation, enterprise bargaining, industrial awards and the restructure; Conditions: hours, leave, preference, grievance procedures, appeals, managerial prerogative, child care, etc; Jurisdiction: State awards, dual registration, 'industry' rule, reinstatement provisions, etc; Women in Unions: equal pay for work of equal value, equal employment opportunity, affirmative action; Health and Safety: legislation and education, powers of union safety officers, workers' compensation, RSI, etc; Radical Policies: militancy and political ideology in the union movement, communism, socialism, feminism.

*assessment:* internal: essays and tutorial papers; external: essays and other written work

#### 5713 Union Studies II

level: I/II points value: 4

*availability:* not offered in 1996

*prerequisites:* 1790 Union Studies I

*contact hours:* 1 three hour class per week

*content:* Models of industrial relations: Industrial Conflict: Collective Bargaining: Arbitration: Wages Strategies: Industry Planning: Tripartism: Anti-union Laws: Social Democracy: unions and the ALP, industrial and political wings of the labour movement; the limits and possibilities of trade union action in capitalist society; unions and social, political, economic and environmental change on a world scale; Comparative Industrial Relations: Future prospects: Union Amalgamation: Unions and the Media: Equal Pay and comparable worth: Aboriginal people in the Australian Labour Movement: Unions and political action.

*assessment:* essays and other written work

**8687 Work Studies I**

level: I/II points value: 4 duration: semester 1

contact hours: 1 three hour class per week

content: The nature and history of work in society from an historical and sociological perspective; paid and unpaid work in terms of its meaning, the way it is organised and managed, and its relationship to technology.

assessment: essays and other written work

**4354 Work Studies II**

level: I/II points value: 4 duration: semester 2

prerequisites: 8687 Work Studies I

contact hours: 1 three hour class per week

content: The centrality of work in the organisation and dynamic operation of our society with particular focus on the role of the worker. This perspective will require a consideration of the significance that attaches to the human, conscious and purposeful elements of work as well as give due weight to the class, status, race, gender etc of the individual. Some consideration will be given to ways of implementing changes at the work place so that the human consciousness of workers is enhanced, not retarded, by work.

assessment: internal: essays and tutorial papers; external: essays and other written work

**electives****Levels I/II****3369 Australian Labour History**

level: I/II points value: 4 duration: semester 2

content: A history of work and unionism, of workers' attitudes, of their families' experience and of their involvement in political activity.

Chronology and themes: The origins of the Australian workers: convicts and free labour; bushrangers and diggers;; the nineteenth century long boom; depression and drought in the 1980s; the emergence of unions; the great strikes 1890-4; the ALP's foundations, nature and performance; the foundations and effects of the arbitration network; World War I, syndicalism, bolshevism and the middle classes; our two greatest strike waves; the 1930's slump; Labour in charge in the 1940s; the Communist Party of Australia; the 'Ming' dynasty; 1970-92 — sea changes in the labour movement; women and labour; race ethnicity and work.

assessment: essays and other written work

**8844 Gender, Work and Society**

level: I/II points value: 4 duration: semester 2

contact hours: 1 three hour class per week

content: Sexual inequalities in capitalist society; social patterns of sexual oppression; sexual inequalities in the Australian economy and workforce; gender and economic policies; the politics of gender in the workplace; women and trade unions; strategies for achieving sexual equality.

assessment: internal: essays and tutorial papers; external: essays and other written work

**3939 Information Technology for Unions**

level: I/II points value: 4 duration: semester 1

quota: may apply

contact hours: 1 three hour class per week

content: Industrial Relations information sources; computer communications and computer conferencing; processing text files; file management in databases; spreadsheets; generating reports; charts and integrated software.

assessment: essays and tutorial papers

**9881 Issues in Labour Studies**

level: I/II points value: 4

availability: not offered in 1996

assessment: internal: essays and tutorial papers

content: This unit will enable Labour Studies staff to develop studies around expertise which becomes available from time to time through specialist scholars, visiting Research Fellows, etc., or around special labour issues as they arise.

assessment: internal: essays and tutorial papers; external: essays and other written work

**6552 Labour, Culture and the Media**

level: I/II points value: 4 duration: semester 1

contact hours: 2 hour lecture; 1 hour tutorial per week

content: Labour, culture and the media will develop students' understanding of the role of culture in symbolising and communicating the aims and ideals of the labour movement and will equip students to critically analyse cultural and media constructions of the notions of work and the "worker" in Australian society. The course will explore examples of cooperation between artists and other cultural workers and unions in Australia and overseas from the nineteenth century through to the present day. Key events and texts from the 1890's, the 1930s, the Cold War, the 1960s and the present will be examined to assess the contribution of art and culture to expressing

and promoting union views and concerns. The role of both the mass and alternative media in representing and challenging these views will also be considered. Industrial issues arising from the current expansion in the culture and media industries will be discussed, as will the effectiveness of unions' use of their own media, mass media and campaign work in attempting to promote their concerns. Students will assess the range of strategies available to the labour movement to raise issues and conduct debates within the public domain and learn practical skills in media analysis.

*assessment:* essay, text analysis and journal

### **7870 Occupational Health and Safety: Union Perspectives**

*level:* I/II *points value:* 4

*availability:* not offered in 1996

*contact hours:* 1 three hour class per week

*content:* Health hazards at work basic data: types of hazards (physical, chemical, noise, radiation); types of health problems (lung disease, stress, repetitive strain injury), high risk industries and occupations (asbestos, coal mining), high risk workers (women, migrants); Health hazards at work, an analysis: history of health hazards and responses, health hazards and the labour process, the political economy of health hazards, the role of the State, the politics of setting safety standards; Approaches to occupational health and safety: blaming the victim (worker) or the work-place, dealing with effects or causes, focus on injury, or occupational hygiene, rehabilitation, stress management, work reorganisation, ergonomics, union perspectives; Legislation: the 1972 Robens Report (UK), 1972 Act (SA), compensation law, employer's liability 'duty of care', common law claims, recent state legislation and its implications; Current policies: the Accord, National Occupational Health and Safety Commission, responses from government, management and unions; Guidelines to current practice: whose prerogative management or worker?, health and safety officers/representatives, work-place committees, worker health centre, strategies for worker's consultation.

*assessment:* internal: essays and tutorial papers; external: essays and other written work

### **7644 Trade Unions and the Third World**

*level:* I/II *points value:* 4

*availability:* not offered in 1996

*contact hours:* 1 three hour class per week

*content:* The dimensions of Third World problems and their historical significance: the meaning of

development; profile of a Third World country; an outline of contemporary relations between developed and underdeveloped countries; The origins of current international inequalities: the development of capitalism, colonialism, imperialism and neo-colonialism; the 'development of underdevelopment'; Current mechanisms by which inequalities are maintained: trade and transfer pricing; aid programs; the trade in arms; the use of political power internationally; Contemporary issues: problems of debt; Latin American and US policy; socialism and the Third World; transnational corporations; Issues for the Australian Labor movement: free trade or protectionism; relations with Third World unions; labour relations in ASEAN states.

*assessment:* internal: essays and tutorial papers; external: essays and other written work

### **9846 Trade Unions: an International Comparison**

*level:* I/II *points value:* 4

*availability:* not offered in 1996

*contact hours:* 1 three hour class per week

*content:* Theoretical and historical framework: Differing views as to the nature of trade unions; their economic and political roles and their historical evolution, differing views on the role of the state in industrial relations, the political economy of post-war capitalist Europe, the political economy of post-war North America, the political economy of post-war Japan, post-war socialist Europe, trade unions and social democratic political parties, trade unions and socialism, the response of trade unions to economic recession; Case Studies: British trade unions since World War II, French trade unions, West German trade unions, Scandinavian trade unions, Italian trade unions, North American trade unions, Japanese trade unions, Eastern European trade unions.

*assessment:* internal: essays and tutorial papers; external: essays and other written work

### **7497 Trade Union Organisation and Management Skills**

*level:* I/II *points value:* 4

*availability:* not offered in 1996

*contact hours:* 1 three hour class per week

*content:* Communication Skills: traditional methods of communication within union structures, strategies to improve communication within union structures, personal communication skills, media skills, campaigning, evaluation of case studies; Organisational management: Traditional methods of

management of union organisations, components of managing an organisation, assertive planning versus emergency/crisis management, alternative theories of management and evaluation of their relevance to union organisation, coordinating a team of people, planning and implementing priorities, recognising and resolving problems and conflict, maintaining high morale, good and bad models of union management through case studies.

*assessment:* internal: essays and tutorial papers; external: essays and other written work

### 6305 Work, Race and Culture

*level:* VII *points value:* 4

*availability:* not offered in 1996

*contact hours:* 1 three hour class per week

*content:* Problems of Race: an introduction to the history of migration to Australia from the deep past to the present, the conquest of black Australia by the white invaders, the nature of race and the political issue of racism, Australian and Anglo-racism unions and Australian working class culture, Blacks and the law, politics and the land, the 'land rights' campaign, Aborigines and capitalism mining development, black deaths in custody; Immigrant Workers: the history of modern migration to Australia, migrant workers, migrants and politics, the Fitzgerald report, multiculturalism, the Blainey Debate, Asian immigration, a divided working class?

*assessment:* internal: essays and tutorial papers; external: essays and other written work

## Practical Project

### Levels I/II

#### 8196 Practical Project

*level:* I/II *points value:* 12 *duration:* full year

*contact hours:* regular individual tuition as required

*content:* At the commencement of the practical project the student is required to determine the content, direction, focus and style of the research. This is done by consultation with the lecturer, reflection on the topic, examination of the dimensions of the issue and drafting of a detailed outline of the approach to be taken. After consultation, the student will gather appropriate data, formulate a plan for systematic working of the data and examine any relevant literature on the matter in focus. The student, in consultation with the lecturer, will work a draft of the project into a coherent presentation of the topic. This will be done in a style appropriate to the individual topic. The end

product will be worked into a form suitable for simple publication.

*assessment:* practical research project

### Level III

#### 7975 Political Economy IIIA: Theoretical Perspectives

*level:* III *points value:* 6 *duration:* semester 1

*contact hours:* one 3 hour class per week

*content:* The major organising theories influencing political and economic life in the postwar era:

Social democracy: the nature of the Australian economy in the 40s; European social democracy and its transmission to Australia; changes from Chifley to Whitlam; the Keynesian crisis – the collapse of the Keynesian consensus in the 70s/80s; the attempts by the left to revive its potency by use of the Swedish model. Economic Rationalism: Neo-classical economics; the emergence of monetarism; the international variants – Thatcher, Reagan, NZ; the attack on the role of the state; the privatisation push. Socialism; the origins and nature of socialism; the development of socialism in Europe and Asia; post-war socialism; the impact on world political alignments; the history of Australian socialism; the collapse of Eastern European socialism; what went wrong? The impact on the Australian and other socialist movements.

#### 7380 Political Economy IIIB: the State and Public Policy

*level:* III *points value:* 6 *duration:* semester 2

*contact hours:* one 3 hour class per week

*content:* The role of the state in a capitalist economy; the public sector and the state process; the policy making process in Australia – the major actors and institutions; the involvement of trade unions in Australian public policy making; women and public policies; macroeconomic government strategies; government budgetary policies on taxation; government budgetary expenditures; monetary policy; trade and industry policy; labour market, wages and other work-related policies; the size and role of the public sector.

#### 8640 Union Studies IIIA: Comparative Theory

*level:* III *points value:* 6 *duration:* semester 1

*contact hours:* one 3 hour class per week

*content:* Theories about industrial relations and unions are explored with a focus upon the explanations for

current union decline and prospects for unions in the future. The implications of unitarist, pluralist, marxist, feminist and post-modernist theories and critiques are explored. Experience in unionism in the U.S. and England is investigated with a particular focus on union survival, democracy, organising and the situation of women and other under-organised and under-represented groups.

**7295 Union Studies IIB: Systems and Strategies**

*level:* III *points value:* 6 *duration:* semester 2  
*contact hours:* one 3 hour class per week

*content:* Approaches to the study of trade unions and industrial relations; theoretical frameworks for the explanation of industrial disputation and the repertoire of roles played by employers, managers, workers and their unions; the legal framework for the regulation of industrial relations and for safety and equity in employment; the relationship between the industrial relations strategy of the trade union movement and the economic development strategy of the government.

**3894 Work Studies IIIA: Nature and Organisation of Work**

*level:* III *points value:* 6  
*availability:* not offered in 1996  
*contact hours:* one 3 hour class per week

*content:* Ideologies of work: history of work, case study of work and dominant social ideas, industrial societies and work, advanced capitalism and work, an outline of the social-psychology of modern work, good and bad work in modern debates and likely or possible futures; Labour process: the 'labour process' theory of Marx and Braverman, debates on labour process about deskilling/degradation, control and resistance, legitimation and consent, subjectivity and the labour process, international perspectives (UK, USA, Japan, Australia), the labour process in non-capitalist societies; Work and Technology: technology and the labour process, history of work and technology, mass production to post-Fordism, technology and class formation, technology and the future of work; Politics of the workplace — management and worker initiatives: history of management strategies (traditional, Taylorist, human relations), quality of work life, 'new' management, Japanisation, the 'new right', worker initiatives of control, cooperatives, self-management, worker ownership, political intervention.

**3778 Work Studies IIB: Work and the Law**

*level:* III *points value:* 6  
*availability:* not offered in 1996  
*contact hours:* one 3 hour class per week

*content:* Legal regulation and coercion: the framework of law in society, history of laws regulating work and labour, the contract of employment, Australian labour law, British connections, Australian industrial law, Constitution and jurisdictions, hiring and firing, modern regulatory law of occupational health and safety, compensation, equal employment, new directions in industrial law, democracy and the law.

## Bachelor of Arts (Honours)

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar.

As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

### Specific Course Rules

#### 1 General

A student may gain one or more of the following degrees:

Honours degree of Bachelor of Arts

Honours degree of Bachelor of Arts  
(Asian Studies)

Honours degree of Bachelor of Arts  
(Australian Studies)

Honours degree of Bachelor of Arts  
(Cultural Studies)

Honours degree of Bachelor of Arts  
(European Studies)

Honours degree of Bachelor of Arts  
(International Studies)

#### 2 Admission requirements

- 2.1 Students for the Honours degree shall not begin their Honours work until they have qualified for an Ordinary degree of the Faculty of Arts, or some other degree deemed by the Faculty to be appropriate preparation, and have completed a major sequence relevant to the appropriate Honours degree syllabus, or equivalent acceptable to the Department or Award Committee concerned, in their undergraduate degree.
- 2.2 Students wishing to take Honours must obtain the approval of the Head of the Department or Departments, or of the Award Committee for named degrees concerned.
- 2.3 A student may not enrol a second time for Honours in the same degree and Department if the student (i) has already qualified for Honours in that Department; or (ii) has presented for examination in that Department but has failed to obtain Honours; or (iii) withdraws from the course, unless the Faculty under Rule 7, below permits the student to re-enrol.

- 2.4 No graduate who has obtained an Honours degree in a subject or field of study in another Department or equivalent may obtain the Honours degree of Bachelor of Arts in a corresponding subject, field of study, or Department of the Faculty of Arts.

#### 3 Approval of course of study at enrolment

Each student's course of study shall be approved by the Faculty at enrolment each year.

#### 4 Duration of the Award

The work of the Honours year must be completed in one full year of full-time study, save that on the recommendation of the Head of the Department or Departments concerned, or the Award Committee concerned the Faculty may permit a student to spread the work over two years, but not more, under such conditions as it may determine.

#### 5 Qualification requirements

- 5.1 A student may proceed to the Honours degree in one of the subjects listed in Rule 6, below, comprising course work and a dissertation, or, if being supervised by more than one Department, a combination of those subjects. A combination requires Faculty approval on the recommendation of the Departments concerned and shall include such work as shall be deemed by the Faculty to be equivalent to a single subject of a points value of 24 points.
- 5.2 The course of study and dissertation topic for the Honours year for students must be approved by the Head of the Department or Departments concerned before enrolment.
- 5.3 A student may, subject to the approval of the Faculty in each case, proceed to the Honours degree in a subject taught in a Department in

another Faculty. Such students must consult the Head of the Department concerned who must seek the approval of the Faculty of Arts.

5.4 A student wishing to proceed to Honours in subjects within the Faculty of Mathematical and Computer Sciences is referred to the Specific Course Rules for the Honours Degree of the degree of Bachelor of Science in the Faculty of Mathematical and Computer Sciences.

## 6 Course of study / Subjects of study

A student may proceed to the Honours degree in one of the following subjects or certain approved combinations of the following subjects, provided that the student has obtained, before enrolment, the approval of the Head of the Department concerned:

code	subject title	points
8302	Honours Ancient Greek and/or Latin	24
1105	Honours Anthropology	24
3025	Honours in Chinese Studies	24
4210	Honours Classical Studies	24
7711	Honours Economics	24
9639	Honours English Language and Literature	24
1760	Honours Ethnomusicology (B.A.)	24
4360	Honours French Language and Culture	24
3178	Honours Geography	24
1261	Honours German Language and Literature	24
8717	Honours History	24
1509	Honours in Japanese Studies	24
2373	Honours Labour Studies	24
5276	Honours Musicology (B.A.)	24
3315	Honours Philosophy	24
5442	Honours Politics	24
4702	Honours Psychology	24
8829	Honours Women's Studies	24

A student may proceed to the Honours degree in one of the following subjects or certain approved combinations of the following subjects, provided that the student has obtained, before enrolment, the approval of the Award Committee concerned:

7247	Honours Asian Studies	24
6617	Honours Australian Studies	24

9831	Honours Cultural Studies	24
1743	Honours European Studies	24
6168	Honours International Studies	24

Students who have been granted permission to study an honours program supervised by two Departments will be advised of the appropriate subject title and code at the time of enrolment.

## 7 Review of academic progress

A student who is unable to complete the course for the Honours degree within the time allowed, or whose work is unsatisfactory at any stage of the course, or who withdraws from the course shall be reported to the Faculty which may permit the student to re-enrol for the Honours degree under such conditions (if any) as it may determine.

## 8 Assessment and examinations

8.1 Except by permission of the Faculty a student shall take the whole of the final examination (if any) for the Honours degree at the one annual examination.

8.2 The names of the students who qualify for the Honours degree shall be published within the following classes and divisions:

First Class

Second Class      Division A

Division B

Third Class

## Bachelor of Labour Studies (Honours)

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar.

As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

### Specific Course Rules

#### 1 General

- 1.1 A student may gain an Ordinary degree of Bachelor of Labour Studies, an Honours degree of Bachelor of Labour Studies, or both.

#### 2 Admission requirements

- 2.1 Students wishing to take Honours must have completed the degree of Bachelor of Labour Studies degree or equivalent as acceptable to the University. Admission to Honours is at the discretion of the Head of the Centre for Labour Studies acting on the advice of the Staff Committee of the Centre for Labour Studies.

#### 3 Approval of course of study at enrolment

- 3.1 Each student's course of study shall be approved by the Faculty at enrolment each year.

#### 4 Duration of course

- 4.1 The work of the Honours year must be completed in one year of full-time study, save that on the recommendation of the Head of the Centre for Labour Studies, the Faculty may permit a student to spread the work over two years, but not more, under such conditions as it may determine.

#### 5 Qualification requirements

- 5.1 Honours in Labour Studies is a full-year course (or two year part-time course), involving weekly seminars, essays and a dissertation.
- 5.2 The choice of subjects and dissertation topic by students must be approved by the Head of the Centre for Labour Studies before enrolment.
- 5.3 Arrangements are possible for joint honours combining study in the Centre for Labour Studies with study in other Departments.

#### 6 Course of study / Subjects of study

- 6.1 All students shall enrol in the subject:  
2373 Honours Labour Studies

#### 7 Review of academic progress

- 7.1 A student who is unable to complete the course for the Honours degree within the time allowed, or whose work is unsatisfactory at any stage of the course, or who withdraws from the course shall be reported to the Faculty which may permit the student to re-enrol for the Honours degree under such conditions (if any) as it may determine.
- 7.2 A student may not enrol a second time for the Honours degree of Bachelor of Labour Studies if the student:
- has already qualified for Honours in Labour Studies;
  - has presented for but has failed to obtain the Honours degree of Bachelor of Labour Studies; or
  - withdraws from the course, unless the Faculty under 7.1, above, permits the student to re-enrol.

#### 8 Assessment and examinations

- 8.1 The names of the students who qualify for the Honours degree shall be published within the following classes and divisions:

First Class

Second Class

Third Class

Division A

Division B

# Bachelor of Social Sciences (Honours)

For details of Bachelor of Social Sciences (Honours) consult Faculty of Arts office.

# Graduate Certificate in Australian Studies

## Introductory remarks

This course is designed to equip students with appropriate theoretical and methodological tools to become critical and successful practitioners in the inter-disciplinary study of Australian society. The course can also equip teachers with sufficient background to teach successfully the compulsory Stage 1 SACE subject Australian Studies.

Applications for admission to this course shall be made through the South Australian Tertiary Admissions Centre (SATAC) on the appropriate form by the required date. Successful applicants to the course may defer their studies to the following year.

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar.

As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

## Specific Course Rules

### 1 Admission requirements

- 1.1** An applicant for admission to the course of study for the Graduate Certificate in Australian Studies shall have qualified for a degree of the University or for a degree of another institution accepted for the purpose by the University. Students would normally be expected to have passed a second or third year level subject in an aspect of Australian studies in their undergraduate degree.
- 1.2** Subject to the approval of the Council the Faculty may, in special cases and subject to such conditions (if any) as it may see fit to impose in each case, accept as a student for the Graduate Certificate a person who does not hold a degree of a tertiary institution but has given evidence satisfactory to the Faculty of fitness to undertake work for the Graduate Certificate.

### 2 Status, exemption and credit transfer

Except by the special permission of the Head of the Department of Education, no student may gain status towards the Graduate Certificate for other studies undertaken in the University or other institutions.

### 3 Approval of course of study at enrolment

Each student's course of study shall be approved by the Faculty at enrolment each year.

### 4 Duration of course

Except with the special permission of the Faculty, the course for the Graduate Certificate shall be completed in one semester of full-time study or not more than two years of part-time study.

### 5 Qualification requirements

To qualify for the Graduate Certificate, a candidate shall satisfactorily complete subjects with a minimum aggregate of twelve points, including the compulsory subject 6310 Issues for Australians and two elective subjects.

### 6 Course of study

#### 6.1 Compulsory subject

All candidates shall satisfactorily complete:

code	subject title	points
6310	Issues for Australians IV	4

#### 6.2 Elective subjects

Candidates shall satisfactorily complete subjects to the value of eight points from the following or from Level IV subjects chosen in consultation with the Course Coordinator:

Anthropology		
5011	Aborigines and the State IV*	4
5069	Towards an Anthropology of Australian Society IV	4

<b>Education</b>		<b>Women's Studies</b>		
4562	Current Issues in Australian Education	4	5014 Australian Feminism in Context IV*	4
8832	Education in Multilingual Settings	4	8991 Power Relations in Australian Society IV*	4
8989	Higher Education in Australia	4	5756 Power and Difference: Postcolonial Perspectives PG*	6
5093	Gender, Education and Social Change	4	* not offered in 1996	
8900	Schools as Cultural Systems	4		
7611	Secondary Education in Australia	4		
9217	Teaching the Australian Studies Curriculum	4		
5803	Youth Arts in Australia: A Context for Arts in Ed.	4		
<b>English</b>		<b>7 Review of academic progress</b>		
9455	Australian Cultural Studies IV	4	7.1	A student who fails a subject and desires to take the subject again shall again attend lectures and satisfactorily do such written and practical work as the teaching staff concerned may prescribe.
5745	Australian Responses to Modernism IV*	4	7.2	A student who has twice failed a subject may not enrol for that subject again except by special permission to be obtained in writing from the Faculty and then only under such conditions as may be prescribed.
7491	Contemporary Australian Writing 1973 to the Present IV	4	7.3	For the purposes of this clause a student who is refused permission to be assessed, by examination or otherwise, or who does not, without a reason accepted by the Head of the Department of Education as adequate, attend all or part of a final examination (or supplementary examination if granted) after having enrolled for at least two thirds of the normal period during which the subject is taught, shall be deemed to have failed the subject.
1077	Gender and Nation in Australian Literature 1880 - 1914 IV*	4		
<b>Environmental Studies</b>		<b>8 Assessment and examinations</b>		
3687	Australian Environmental Issues*	6	There shall be two systems of classification of pass in subjects for the Graduate Certificate: either Non-Graded Pass, or Pass with High Distinction, Pass with Distinction, Pass with Credit, and Pass.

<b>Politics</b>				
4197	Public Policy in Australia IV*	4		

## Syllabuses

### General stream

#### 6310 Issues for Australians IV

level: IV points value: 4 duration: semester 1  
 contact hours: 2 hours per week

*content:* A seminar-based, one semester subject investigating issues in the field of Australian Studies with a particular focus on Australian culture. The subject will address a range of areas such as Aboriginal writing, media ownership and control, Australian film and television, tourism and culture, and landscape and culture.

*assessment:* essays and papers equivalent to 8,000 words

### Anthropology

#### 5010 Aborigines and the State IV

level: IV points value: 4  
 availability: not offered in 1996

*restriction:* 8195/5437 Aborigines and the State II/III  
 contact hours: 2 lectures and 1 tutorial per week

*content:* This subject focuses on the seemingly inexorable encapsulation of the Aboriginal people of Australia within the wider nation state. That is, it views the process whereby Aborigines have been transformed from autonomous hunter-gatherers into, and maintained as, dependent Fourth World peoples. After briefly surveying the history of and Aboriginal reaction to the European colonisation of Australia, attention is devoted to a range of contemporary issues in both remote and urban environments. Here the thrust is to place such phenomena as Aboriginal Land Rights, community development programs, alcohol abuse, and high arrest and incarceration rates in their broader socio-politico-economic context.

*assessment:* essays and papers equivalent to 8,000 words

#### 5069 Towards an Anthropology of Australian Society IV

level: IV points value: 4 duration: semester 2  
*restriction:* 6914/1709 Towards an Anthropology of Australian Society II/III  
 contact hours: 3 hours per week

*content:* Anthropology provides an exciting challenge to our understanding of the familiar. This subject critically examines what for many is an apparently familiar field Australian culture and society. At the

same time this subject provides a context in which to critically examine dominant anthropological agendas, research methods and modes of presentation. By engaging in apparently familiar fields this subject addresses questions which underpin the location and future of anthropological research in Australia. Central questions are: why, beyond work focused on Aboriginal cultures, has so little ethnographic research been done in Australia; what is the value of ethnographic perspectives; what is the relationship between 'texts', as cultural products, and everyday life; how can cultural research in Australia profitably proceed.

*assessment:* essays and papers equivalent to 8,000 words

### Education

For syllabus details of elective Education subjects listed in 6.2, see Master of Education

### English

#### 9455 Australian Cultural Studies IV

level: IV points value: 4 duration: semester 1  
 contact hours: 1 lecture and 1 two hour seminar a week

*content:* This subject introduces students to cultural studies theory in conjunction with the study of some specific examples of contemporary popular culture. The areas of Australian culture examined include popular fiction, film, television, as well as what *Myths of Oz* calls 'lived texts'. Films to be discussed include *Crocodile Dundee* and *Strictly Ballroom*. Television programs will be selected from material being shown while the subject is running.

*assessment:* essays and take-home examination

#### 7491 Contemporary Australian Writing 1973 to the Present IV

level: IV points value: 4 duration: semester 2  
*restriction:* 6557/1815 Contemporary Australian Fiction: New Directions 1970-1990 II/III  
 contact hours: 1 three hour seminar a week

*content:* An exploration of the new diversity in Australian fiction since the 1970s, when the production of Australian literature increased dramatically.

*assessment:* essays and papers equivalent to 8,000 words

**1077 Gender and Nation in Australian Literature 1880–1914 IV**

level: IV points value: 4

availability: not offered in 1996

restriction: 1318/1276 Gender and Nation in Australian Literature 1880–1914 II and III

contact hours: 1 lecture and 1 two hour seminar a week

content: This subject examines a diverse range of texts from one of Australian literature's most lively and interesting periods, including short stories, comic writing, popular verse, gothic fiction, romance of various sorts, and drama. Particular attention will be given to analysing the conflict and overlap between three discourses: (i) the masculinism often associated with the Bulletin; (ii) first-wave feminism which is a component of much women's writing during these years (and which is represented in some men's writing); and (iii) the nationalism (and sometimes anti-nationalism) that was also a prominent feature in Australian literature around the turn of the century.

assessment: essays and papers equivalent to 8,000 words

**5745 Australian Responses to Modernism IV**

level: IV points value: 4

availability: not offered in 1996

quota: may apply

restriction: English Honours Special: Australian Responses to Modernism

contact hours: 1 two hour seminar per week

content: This subject examines a diverse range of Australian Literature from the 1920s to the 1960s, focusing particularly on its relationship to modernism. We will discuss ways in which Australian writers have drawn on aspects of modernist practice, and also the considerable and varied opposition to modernism in Australia. There will be a particular focus on the way in which these responses to modernism relate to questions of class, race and gender.

assessment: essays and papers equivalent to 8,000 words

**Environmental Studies**

**3687 Australian Environmental Issues**

level: postgraduate points value: 6

availability: not offered in 1996

restrictions: 9183 Environmental Issues in South Australia

content: This subject deals with selected environmental issues within the historical and political context of Australia since European settlement. The environmental issues dealt with in the subject are selected on the basis of their Australian or regional significance, but the subject may also select some issues on the basis of public controversy or local interest. The subject provides a background to various issues together with strategies for dealing with them, particularly legislative strategies.

assessment: to be advised

**Geography**

**9736 Community and Identity in Aboriginal Australia IV**

level: IV points value: 4

availability: not offered in 1996

restriction: Geography Honours Special: Community and Identity in Aboriginal Australia

contact hours: 1 two hour seminar a week

content: Given the diversity of the Aboriginal population and the complexity of the so-called Aboriginal 'problem', there are numerous areas which invite research. To prepare for this students are directed to an examination in depth of such essential areas of concern as Aboriginal conceptions of community and identity, which are essential to an understanding of Aboriginal Australia. Students need also to work towards defining the spatial, social, economic and political boundaries involved in the cultural expression and in the dynamics and conflicts of social interaction and political functioning. The questions motivating the study should include those which ask what are, and what should be, the position of Aboriginal people in Australian society.

assessment: essays and papers equivalent to 8,000 words

**7866 Aboriginal Australia IV**

level: IV points value: 4

availability: not offered in 1996

restriction: 5191 Aboriginal Australia, 9917 Community Aspects of the Social Environment

contact hours: 2 lectures, 2 tutorials and practical work a week, plus 1 week of fieldwork

content: This subject attempts a reconstruction of Aboriginal land use, art and landscape, gender relationships and population patterns. The changes which occurred following European settlement are

then analysed and the various conflicts and accommodations are discussed in relation to present day issues such as land rights, mining, national parks and tourism.

*assessment:* essays and papers to the equivalent of 8,000 words

## History

### 4661 South Australian History IV

*level:* IV *points value:* 4

*availability:* not offered in 1996

*restriction:* 2482/7976 South Australian History II/III

*contact hours:* 3 hour lecture/seminar per week

*content:* A chronological and thematic study of 19th and 20th century South Australian history from the initial planning of the colony pre 1836 to the end of the so-called Dunstan decade. Topics and themes to be studied in depth will include: Colonial South Australia Planning, settlement, the expanding frontier, religion and education, liberalism and the growth of responsible government, the impact of migration, the economy. 20th Century South Australia The impact of Federation and World War I, centralisation vs decentralisation, social and economic stresses between the wars, World War II, the problems of industrialism and urbanisation, post-war migration, conservation vs political and social reform.

*assessment:* essays and papers equivalent to 8,000 words

### 7947 Australian Urban History IV

*level:* IV *points value:* 4:

*availability:* not offered in 1996

*quota:* may apply

*restriction:* 8243/2905 Australian Urban History II/III; Urban History: Europe 100–1900 in 1989; Urban History prior to 1989

*contact hours:* 3 hours per week

*content:* A study of urbanisation in Australia and of selected themes in the social history of Australian cities in the nineteenth and twentieth centuries. These include gender and class, immigrants and ethnicity, growing up in the city, life and death in the suburbs, down and out in Sydney, Adelaide and Melbourne, and the nature of urban suburban cultures. Students may develop research projects on any of these themes with a particular accent on South Australia.

*assessment:* 1 seminar paper, a research project, and exam

## Labour Studies

### 8886 Political Economy IVA: Theoretical Perspectives

*syllabus details:* see Graduate Diploma in Labour Studies

### 5099 Political Economy IVB: The State and Public Policy

*syllabus details:* see Graduate Diploma in Labour Studies

## Politics

### 4197 Public Policy in Australia IV

*level:* IV *points value:* 4

*availability:* not offered in 1996

*restriction:* 1280 Public Policy in Australia II; 9796 Public Policy in Australia III; Politics Honours Special: Public Policy in Australia

*contact hours:* 2 two hour seminars per week

*content:* This course will look at public policy issues in South Australia. The thinking behind the course is that there are many issues in South Australia worthy of analysis and this would be an opportune moment for students to examine aspects of their own political and policy environment. The methodology used will be to use policy analysis and political theory to examine issues in South Australia. As public policy is a sub-discipline of politics this methodology will involve the examination of case studies with reference to theoretical concerns in policy analysis (eg the policy process) and political theory which involve such concepts as social stratification, social and political power, the mixed economy, the role of the state, etc. As there is limited academic literature dealing with South Australia students will be expected to research their own topic and will be rewarded for their research efforts as well as for the cogency of their arguments and handling of the academic literature. There are many issues which students can explore some of which are: SA Inc. (including State Bank Beneficial Finance Group, SAFA, SGIC), the Multi Function Polis, Business and the State (for example, see the Redcliff's controversy, Roxby Downs), Environment and Heritage (the Adelaide Hills Face, Flinders Ranges Wilpena Pound, Marinas, Facadism, the Adelaide Plan), Art and Culture (The Festival of Arts), Urban and Regional Development (transportation, the Adelaide Plan and 2020 Plan), and Social Issues (childcare, unemployment, domestic violence). In the first few seminars I will introduce the broad theoretical

framework of public policy and policy analysis and show how to approach the case study material and then students will be expected to present seminars on their chosen topics.

*assessment:* essays and papers equivalent to 8,000 words

## Women's Studies

### 8991 Power Relations in Australian Society IV

*level:* IV *points value:* 4

*availability:* not offered in 1996

*restrictions:* 7047/8325 Power Relations in Australian Society II/III

*contact hours:* I lecture and I two hour seminar per week

*content:* This subject aims to examine the social and economic factors that are responsible for the development of the present position of women in Australian society. Topics examined include Aboriginal Australia, immigration and multiculturalism, pioneering and rural life, 19th century industrialisation, urbanisation, political and social movement, Australian and international relations, economic cycles, boom and bust, power in Australia today in the family, the economy, the media and political parties.

*assessment:* essays and papers to the equivalent of 8,000 words

### 5756 Power and Difference: Postcolonial Perspectives PG

*level:* IV/V *points value:* 6

*availability:* not offered in 1996

*restrictions:* 3708/9279 Power and Difference

*prerequisites:* 5528 Theories of Feminism or permission of Head of Department

*contact hours:* 3 hours per week

*content:* Students will consider feminist, postmodern and postcolonial perspectives on constructions of race, class and gender differences with specific (but not exclusive) reference to Australian culture (19th and 20th century). With reference to the work of postcolonial, French feminist, psychoanalytic, Foucauldian and deconstructive critics students will examine the role of high and mass cultural materials (novels and art forms, histories, journalism, traveller's tales, the tabloid press, film, cartoons, photography,

newspapers and the like) in constructing networks of knowledge and power through representations of difference/marginality. The subject will examine the possibilities for maintaining and resisting dominant power relations in the operations of language, social institutions and everyday life experiences. It will also consider reading and viewing practices to understand how readers are positioned by texts and how to read 'otherwise'.

*assessment:* short applied analysis of 1,500 words (20%); seminar presentation/paper of 1,000 words (20%); project research paper of 4,000 words (60%)

## Graduate Certificate in Cognitive Science

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar.

As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

### Specific Course Rules

#### 1 Admission requirements

- 1.1** An applicant for admission to the course of study for the Graduate Certificate in Cognitive Science shall have qualified for a degree of the University incorporating major studies in one or more of the following disciplines: philosophy, psychology, linguistics, computer science, neurophysiology, neuroanatomy, mathematics; or for a degree of another institution accepted for the purpose by the University.
- 1.2** Subject to the approval of the Council the Faculty may, in special cases and subject to such conditions (if any) as it may see fit to impose in each case, accept as a student for the Graduate Certificate a person who does not hold a degree of a tertiary institution but has given evidence satisfactory to the Faculty of fitness to undertake work for the Graduate Certificate.

#### 2 Status, exemption and credit transfer

Except by the special permission of the Head of the Department of Philosophy, no student may gain status towards the Graduate Certificate for other studies undertaken in the University or other institutions.

#### 3 Approval of course of study at enrolment

Each student's course of study shall be approved by the Faculty at enrolment each year.

#### 4 Duration of the Award

To qualify for the Graduate Certificate a student shall satisfactorily complete a course of one semester of full-time study or the part-time equivalent.

#### 5 Qualification requirements

Students of the Graduate Certificate shall complete 12 points of subjects as outlined in Rule 6, see below.

#### 6 Course of study / Subjects of study

Students for the Graduate Certificate shall complete subjects to the value of 12 points as follows:

##### 6.1 Core Subject

All students shall complete the following subject:

1207 Cognitive Science: Minds, Brains and Computers IV 4

(Students who are exempted from studying the subject 1207 Cognitive Science: Minds, Brains and Computers IV due to having previously completed either 8606 Cognitive Science: Minds, Brains and Computers II or 5086 Cognitive Science: Minds, Brains and Computers III or its equivalent will be required to present a further 4 point elective subject listed in 6.1.2 in lieu of this requirement.)

##### 6.2 Elective Subjects

All students shall complete elective subjects to an aggregate value of 8 points chosen from the following six groups of subjects, with no more than 4 points of subjects being presented from any one group:

##### Group A Philosophy Subjects

6655 Issues in the Contemporary Philosophy of Mind IV 4

3390 Logic IV 4

##### Group B Psychology Subjects

4308 Intelligence IV 2

5296 Neuroscience in Psychology IV 2

2960 Philosophy and Psychology of Consciousness IV 2

9292 Psychology of Language in Thought and Action IV 2

##### Group C Computer Science Subjects

8352 Artificial Intelligence IV 2

1777 Knowledge Representation IV 2

2340 Advanced Artificial Intelligence IV A  
(Computer Vision) 2

5042 Advanced Artificial Intelligence IV B  
(Machine Learning) 2

**Group D Linguistics Subjects**

4594 Foundations of Linguistic Theory IV 4

3355 Language, Cognition and Reality IV 6

**Group E Histology and Anatomy Subjects**

1678 Head and Neck and Neuroanatomy IV 6

**Group F Physiology Subjects**

3155 Neurobiology IV 2

The availability of some of the above elective subjects varies from year to year. Students should contact the relevant department(s) for information about subject availability over the projected period of their study programme.

Many of these elective subjects have had their normal pre-requisites waived for the purposes of this graduate programme in Cognitive Science. However, students enrolling in these subjects are expected to do sufficient background reading to attain a basic understanding of the subject area. Prospective students should contact subject coordinators for information about appropriate background reading.

**7 Academic progress**

7.1 A student who fails a subject and desires to take the subject again shall again attend lectures and satisfactorily do such written and practical work as the teaching staff concerned may prescribe.

7.2 A student who has twice failed a subject may not enrol for that subject again except by special permission to be obtained in writing from the Faculty and then only under such conditions as may be prescribed.

**8 Assessment and examinations**

8.1 There shall be four classifications of pass in any subject for the Graduate Certificate: Pass with High Distinction, Pass with Distinction, Pass with Credit, and Pass.

8.2 For the purposes of this clause a student who is refused permission to be assessed, by examination or otherwise, or who does not, without a reason accepted by the Head of the relevant Department as adequate, attend all or part of a final examination (or supplementary examination if granted) after having enrolled for at least two thirds of the normal period during which the subject is taught, shall be deemed to have failed the subject.

**9 Articulation with other awards**

9.1 Students who complete this course are also eligible to apply for entry to the Graduate Diploma in Cognitive Science course, and if successful, on gaining entry, may apply for status for the work they have undertaken in the Graduate Certificate.

9.2 Students who have conferred upon them the award of Graduate Certificate in Cognitive Science who subsequently successfully complete the requirements of the Graduate Diploma and gain 6 or more points of status for their first award must surrender their Graduate Certificate before being admitted to the Graduate Diploma.

**Syllabuses**

*syllabus details:* see Master of Cognitive Science

# Graduate Certificate in Educational Administration

## Introductory remarks

This course is designed to cater both for people aspiring to leadership positions in education and for those who currently occupy such positions and wish to refine their professional practice.

Applications for admission to this course shall be made through the South Australian Tertiary Admissions Centre (SATAC) on the appropriate form by the required date. Successful applicants to the course may defer their studies to the following year.

This award has been developed within the framework of the General Course Rules printed at the end of the External Studies Handbook.

As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

## Specific Course Rules

### 1 Admission requirements

1.1 An applicant for admission to the course of study for the Graduate Certificate in Educational Administration shall have qualified for:

- (a) a degree of the University and have completed a Graduate Diploma in Education, or have qualified for qualifications of other institutions accepted as equivalent by the University, and have completed at least two years of teaching experience; or
- (b) have qualified for a three year Diploma of Teaching from an institution accepted for the purpose by the University and have completed at least two years of teaching experience.

1.2 Subject to the approval of the Council the Faculty may, in special cases and subject to such conditions (if any) as it may see fit to impose in each case, accept as a student for the Graduate Certificate a person who does not hold a degree of a tertiary institution but has given evidence satisfactory to the Faculty of fitness to undertake work for the Graduate Certificate.

### 2 Status, exemption and credit transfer

2.1 Except by the special permission of the Head of the Department of Education, no student may gain status towards the Graduate Certificate for other studies undertaken in the University or other institutions.

### 3 Approval of course of study at enrolment

3.1 Each student's course of study shall be approved by the Faculty at enrolment each year.

### 4 Duration of course

4.1 Except with the special permission of the Faculty the course for the Graduate Certificate must be completed in one semester of full-time study or in not more than two years of part-time study. The course is available in both internal and external modes of delivery.

### 5 Qualification requirements

5.1 To qualify for the Graduate Certificate, a candidate shall satisfactorily complete Educational Administration subjects to an aggregate of twelve points.

### 6 Course of study / Subjects of study

6.1 Students shall present Educational Administration subjects to a total value of 12 points from the following:

code	subject title	points
3809	Approaches to Educational Research***	4
6257	Curriculum Change, Innovation and Leadership*	4
5093	Gender, Education and Social Change***	4
4562	Current Issues in Australian Education***	4

4387 Philosophy, Education and Administration*	4
5017 Foundations of Administrative Practice I**	4
4993 Foundations of Administrative Practice II**	4
1043 Policy Analysis for Education (Ed.Admin.)*	4
9537 Society, Education and its Administration*	4
5899 Law and Education*	4
1898 Multicultural Society and Educational Policy	4
5240 Educational Administration (Directed Study)*	2

\*Available in external mode only

\*\*Not offered in 1996

\*\*\*Available in internal mode only

## 7 Review of academic progress

- 7.1 A student who fails a subject and desires to take the subject again shall again attend lectures and satisfactorily do such written and practical work as the teaching staff concerned may prescribe.
- 7.2 A student who has twice failed a subject may not enrol for that subject again except by special permission to be obtained in writing from the Faculty and then only under such conditions as may be prescribed.
- 7.3 For the purposes of this clause a student who is refused permission to be assessed, by examination or otherwise, or who does not, without a reason accepted by the Head of Education as adequate, attend all or part of a final examination (or supplementary examination if granted) after having enrolled for at least two thirds of the normal period during which the subject is taught, shall be deemed to have failed the subject.

## 8 Assessment and examinations

There shall be two types of classifications of pass in any subject for the Graduate Certificate: Non-Graded Pass; or Pass with High Distinction, Pass with Distinction, Pass with Credit, and Pass.

## 9 Articulation with other awards

- 9.1 Students who complete the Graduate Certificate are eligible to apply for entry to the Master of Educational Administration course, and if successful, on gaining entry, receive status for the studies they have undertaken in the Graduate Certificate.
- 9.2 Students who have conferred upon them the award of Graduate Certificate in Educational Administration who subsequently successfully complete the requirements of the Master of Educational Administration must surrender their first award before being admitted to the degree of Master of Educational Administration.
- 9.3 Students of the former Graduate Diploma in Educational Administration who have not completed the full requirements for the Graduate Diploma but who have completed at least 12 points toward this award may apply to the University for conferral of the Graduate Certificate in Educational Administration. Such students, if later successful in gaining entry to the Master of Educational Administration, will gain status for any subjects passed in excess of those used to gain the Graduate Certificate.

## Syllabuses

*syllabus details:* see Master of Educational Administration and Master of Educational Studies

# Graduate Certificate in Educational Studies

*note:* This award does not qualify the candidate for registration as a teacher. For the purposes of professional registration, a candidate must complete the Graduate Diploma in Education.

Applications for admission to this course shall be made through the South Australian Tertiary Admissions Centre (SATAC) on the appropriate form by the required date. Successful applicants to the course may defer their studies to the following year.

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar.

As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

## Specific Course Rules

### 1 Admission requirements

- 1.1 An applicant for admission to the course of study for the Graduate Certificate in Educational Studies shall have qualified for a degree of the University or for a degree of another institution accepted for the purpose by the University.
- 1.2 Subject to the approval of the Council the Faculty may, in special cases and subject to such conditions (if any) as it may see fit to impose in each case, accept as a student for the Graduate Certificate a person who does not hold a degree of a tertiary institution but has given evidence satisfactory to the Faculty of fitness to undertake work for the Graduate Certificate.

### 2 Status, exemption and credit transfer

- 2.1 Except by the special permission of the Head of the Department of Education, no student may gain status towards the Graduate Certificate for other studies undertaken in the University or other institutions.

### 3 Approval of course of study at enrolment

- 3.1 Each student's course of study shall be approved by the Faculty at enrolment each year.

### 4 Duration of course

- 4.1 The course is offered on a part-time basis only. Except with the special permission of the Faculty the course for the Graduate Certificate must be completed in one year of part-time study or not more than four years of part-time study.

### 5 Qualification requirements

- 5.1 To qualify for the Graduate Certificate, a candidate shall satisfactorily complete the six points of teacher-Learner Relationship subjects, 4 Points of Australian Educational Issues subjects and the subject 5221 Educational Projects to an aggregate of twelve points.

### 6 Course of study / Subjects of study

The subjects of the Graduate Certificate in Education are the following:

#### 6.1 Teacher-Learner Relationship subjects

1852 Adolescence - Learning and Development	2
7432 Curriculum in its Context	2
7296 The Teacher as Communicator	2

#### 6.2 Australian Educational Issues subjects

4666 Australian Educational Issues Part I	2
3785 Australian Educational Issues Part II	2

#### 6.3 Educational Projects

5221 Educational Projects	2
---------------------------	---

### 8 Review of academic progress

- 8.1 A student who fails a subject and desires to take the subject again shall again attend lectures and satisfactorily do such written and practical work as the teaching staff concerned may prescribe.
- 8.2 A student who has twice failed a subject may not enrol for that subject again except by special permission to be obtained in writing from the Faculty and then only under such conditions as may be prescribed.

- 8.3** For the purposes of this clause a student who is refused permission to be assessed, by examination or otherwise, or who does not, without a reason accepted by the Head of the Department of Education as adequate, attend all or part of a final examination (or supplementary examination if granted) after having enrolled for at least two thirds of the normal period during which the subject is taught, shall be deemed to have failed the subject.

## Syllabuses

---

*syllabus details:* see Graduate Diploma of Education

### **9 Assessment and examinations**

- 9.1** There shall be two types of classifications of pass in any subject for the Graduate Certificate: Non-Graded Pass; or Pass with High Distinction, Pass with Distinction, Pass with Credit, and Pass.

### **10 Articulation with other awards**

- 10.1** Students who complete the award of Graduate Certificate in Educational Studies are eligible to apply for entry to the Graduate Diploma in Education course, and if successful, on gaining entry, receive full status for the work they have undertaken in the Graduate Certificate.
- 10.2** Students who have conferred upon them the award of Graduate Certificate in Educational Studies who subsequently successfully complete the requirements of the Graduate Diploma in Education must surrender their first award before being admitted to the Graduate Diploma in Education.
- 10.3** Notwithstanding the above Rules a candidate who has been enrolled for the degree of Graduate Diploma in Education and who has completed the work prescribed herein for the Graduate Certificate in Educational Studies and who has not been awarded the Graduate Diploma shall, on written application to the Registrar, be awarded the Graduate Certificate.

# Graduate Certificate in Environmental Management

note: This course is available only to fellows sponsored by the United Nations Environment Program.

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar.

As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

## Specific Course Rules

### 1 Admission requirements

- 1.1 An applicant for admission to the course of study for the Graduate Certificate in Environmental Management shall have qualified for a degree of the University or for a degree of another university or institution accepted for the purpose by the University; and have at least two years' professional experience in environmental management or other cognate areas.
- 1.2 Subject to the approval of the Council the Faculty may, in special cases and subject to such conditions (if any) as it may see fit to impose in each case, accept as a student for the Graduate Certificate a person who does not hold a degree of a tertiary institution but has given evidence satisfactory to the Faculty of fitness to undertake work for the Graduate Certificate.

### 2 Status, exemption and credit transfer

- 2.1 Except by the special permission of the Director of the Mawson Graduate Centre for Environmental Studies, no student may gain status towards the Graduate Certificate for other studies undertaken in the University or other institutions.

### 3 Approval of course of study at enrolment

- 3.1 Each student's course of study shall be approved by the Faculty at enrolment each year.

### 4 Duration of course

- 4.1 Except with special permission of the Faculty the course for the Graduate Certificate shall be completed in one semester of full-time study.

### 5 Qualification requirements

- 5.1 All students shall complete the compulsory subjects 8558 Principles of Sustainable Environmental Management (UNEP) and 9705 Special Project (UNEP), together with elective subjects to a total value of 12 points.
- 5.2 No student will be permitted to count for the Graduate Certificate any subject that, in the opinion of the Faculty, contains substantially the same material as any other subject which he or she has already presented for another qualification.
- 5.3 A student who fulfils the requirements outlined in 5.1 and 5.2 will be awarded the Graduate Certificate in Environmental Management jointly by the United Nations Environmental Program and The University of Adelaide.

### 6 Course of study / Subjects of study

- 6.1 A student may proceed to qualify for the Graduate Certificate by satisfactorily completing subjects with a minimum aggregate of twelve points from the following:

#### (a) compulsory subjects

All students shall satisfactorily complete the following subjects:

8558 Principles of Sustainable Environmental Management (UNEP)	5
9705 Special Project (UNEP)	3

#### (b) elective subjects

Students shall satisfactorily complete subjects to the value of 4 points from the following:

1402 Environment and Development (UNEP)	2
---	---

3759	Environmental Engineering (UNEP)	2
2568	Management of Freshwater, Marine and Terrestrial Ecosystems (UNEP)	2
9044	Environmental Law (UNEP)	2
8495	Special Tools in Environmental Management (UNEP)	2
6887	Soil and Land Management (UNEP)	2

6.2 Students who wish to enrol in a subject for which they do not have the necessary preliminary knowledge may be required to undertake such bridging studies prior to the commencement of the subject as the Faculty may deem necessary.

### 7 Review of academic progress

7.1 A student who fails a subject and desires to take the subject again shall again attend lectures and satisfactorily do such written and practical work as the teaching staff concerned may prescribe.

7.2 A student who has twice failed a subject may not enrol for that subject again except by special permission to be obtained in writing from the Faculty and then only under such conditions as may be prescribed.

7.3 For the purposes of this clause a student who is refused permission to be assessed, by examination or otherwise, or who does not, without a reason accepted by the Director of the Mawson Graduate Centre for Environmental Studies as adequate, attend all or part of a final examination (or supplementary examination if granted) after having enrolled for at least two thirds of the normal period during which the subject is taught, shall be deemed to have failed the subject.

### 8 Assessment and examinations

8.1 A student who satisfactorily completes the requirements of a subject for the Graduate Certificate shall be awarded a non-graded pass.

## Syllabuses

---

### compulsory subjects

#### 8558 Principles of Sustainable Environmental Management (UNEP)

*points value:* 5                      *duration:* semester 1

*contact hours:* to be advised

*content:* The aim of this subject is to suggest how our natural resources may be managed on a more integrated and sustainable basis by careful evaluation of both the beneficial and the adverse effect of various forms of human interaction with local, regional and global natural systems. Throughout the course we emphasise the need for careful identification of the causes and consequences (both short-term and long-term) of a broad range of local, regional and global environmental problems in developing and in industrial countries. Correct diagnosis of the causes of environmental degradation is a prerequisite to identifying appropriate methods of rehabilitation, restoration and future prevention. We stress that although there are many existing models of environmental management, not all of them are based on appropriate principles of integrated and sustainable management of our natural resources.

*assessment:* to be advised

#### 9705 Special Project (UNEP)

*points value* 3                      *duration:* semester 1

*contact hours:* to be advised

*content:* Participants are required to carry out a problem analysis and problem solving study dealing with an environmental topic specific to their home country or sub-region. The study has to be embedded into the context of integrated environmental management for sustainable development so as to bring out its future global significance

*assessment:* Three bound copies of the report on the Special Project are to be produced. Assessment of performance during the training course will include quality of both the written Report and the oral presentation. (Failure in this component of the course will lead to non-award of Certificate.)

### elective subjects

#### 1402 Environment and Development (UNEP)

*points value:* 2                      *duration:* semester 1

*contact hours:* to be advised

*content:* Agenda 21: Population, environment and carrying capacity; women, development technology and sustainable development; urban and regional planning.

*assessment:* to be advised

#### 3759 Environmental Engineering (UNEP)

*points value:* 2                      *duration:* semester: 1

*contact hours:* to be advised

*content:* Water resources management; engineering and water quality; integrated catchment management; wastewater treatment; air and water pollution monitoring and prevention; clean technology and hazardous waste management.

*assessment:* to be advised

#### 9044 Environmental Law (UNEP)

*points value:* 2                      *duration:* semester: 1

*contact hours:* to be advised

*content:* Law and sustainable development; environmental conflict resolution; international convention for the protection of the environment.

*assessment:* to be advised

#### 2568 Management of Freshwater, Marine and Terrestrial Ecosystems (UNEP)

*points value:* 2                      *duration:* semester 1

*contact hours:* to be advised

*content:* Management of Freshwater, Marine and Terrestrial Ecosystems; inland water ecosystems; marine and coastal environments; terrestrial ecosystems; maintenance of biodiversity; ecological sustainable development.

*assessment:* to be advised

**6887 Soil and Land Management (UNEP)**

*points value* 2 *duration* semester 1

*contact hours:* to be advised

*content:* Soil and land management; maintenance and enhancement of soil productivity; soil conservation, landcare and national soil policies; rangeland management; sustainable agriculture.

*assessment:* to be advised

**8495 Special Tools in Environmental Management (UNEP)**

*points value:* 2 *duration:* semester 1

*contact hours:* to be advised

*content:* Environmental impact assessment; environmental auditing and natural resources accounting; remote sensing and environmental monitoring; geographic information systems and environmental planning.

*assessment:* to be advised

# Graduate Certificate in Environmental Policy, Planning and Management

note: Postgraduate tuition fees apply to this course.

## Introductory remarks

The Graduate Certificate is designed for environmental managers who wish to enhance their knowledge and skills in the area of environmental policy development and planning.

Applications for admission to this course shall be made in writing directly to the Director of the Mawson Graduate Centre for Environmental Studies. Preference will be given in the selection process to applicants with professional environmental management experience. Successful applicants to the course may defer their studies to the following year.

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar.

As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

## Specific Course Rules

### 1 Admission requirements

- 1.1 An applicant for admission to the course of study for the Graduate Certificate in Environmental Policy, Planning and Management shall have qualified for a degree of the University or for a degree of another institution accepted for the purpose by the University.
- 1.2 Subject to the approval of the Council the Faculty may, in special cases and subject to such conditions (if any) as it may see fit to impose in each case, accept as a student for the Graduate Certificate a person who does not hold a degree of a tertiary institution but has given evidence satisfactory to the Faculty of fitness to undertake work for the Graduate Certificate.

### 2 Status, exemption and credit transfer

- 2.1 Except by the special permission of the Director of the Mawson Graduate Centre for Environmental Studies, no student may gain status towards the Graduate Certificate for other studies undertaken in the University or other institutions.

### 3 Approval of course of study at enrolment

- 3.1 Each student's course of study shall be approved by the Faculty at enrolment each year.

### 4 Duration of course

- 4.1 Except with the special permission of the Faculty, to qualify for the Graduate Certificate a student shall satisfactorily complete a course of one semester of full-time study or not more than four consecutive semesters of part-time study.
- 4.2 Part-time students shall take the subject 9865 Environmental Policy and Planning Project in their final semester.

### 5 Qualification requirements

- 5.1 The course of study for the Graduate Certificate shall be made up of the compulsory subject Environmental Policy and Planning Project, together with three elective subjects.

### 6 Course of study / Subjects of study

All students shall satisfactorily complete the compulsory subject:

code	subject title	points
9865	Environmental Policy and Planning Project	3
Students shall complete elective subjects to the value of 9 points taken from the following:		
2438	Conservation in Human-Dominated Landscapes	3
6339	Ecosystem Patterns and Processes	3

7766 Ecotourism: Opportunities and Impacts	3
1716 Educating for the Environment	3
9474 Environmental Hazards	3
8865 Environmental Impact Assessment (Env St)	3
5140 Environmental Policy	3
3216 Environmental Systems Management	3
6631 Managing Coastal Environments	3
7007 Principles of Environmental Earth Science	3
9873 Special Topic in Environmental Management*	3
2667 Special Topic in Environmental Planning*	3
7888 Special Topic in Environmental Policy*	3
9873 Special Topic in Environmental Science*	3
2743 The Global Commons	3
2124 Urban Environments**	3
3208 Women and Environments	3

## Syllabuses

### 9865 Environmental Policy and Planning Project

*points value:* 3      *duration:* semester 1 & 2

*contact hours:* 1 one hour workshop per week

*content:* This subject will require students to compete a policy or planning document relevant to a selected environmental management issue.

*assessment:* to be advised

For details of the other syllabuses for this course, please refer to the Master of Environmental Studies.

\*Availability to be advised

\*\*Not available in 1996

## 7 Review of academic progress

- 7.1 A student who fails a subject and desires to take the subject again shall again attend lectures and satisfactorily do such written and practical work as the teaching staff concerned may prescribe.
- 7.2 A student who has twice failed a subject may not enrol for that subject again except by special permission to be obtained in writing from the Faculty and then only under such conditions as may be prescribed.
- 7.3 For the purposes of this clause a student who is refused permission to be assessed, by examination or otherwise, or who does not, without a reason accepted by the Director of the Mawson Graduate Centre of Environmental Studies as adequate, attend all or part of a final examination (or supplementary examination if granted) after having enrolled for at least two thirds of the normal period during which the subject is taught, shall be deemed to have failed the subject.

## 8 Assessment and examinations

- 8.1 There shall be four classifications of pass in any subject for the Graduate Certificate: Pass with High Distinction, Pass with Distinction, Pass with Credit, and Pass.

## Graduate Certificate in Historical Studies

Applications for admission to this course shall be made through the South Australian Tertiary Admissions Centre (SATAC) on the appropriate form by the required date. Successful applicants may defer their studies for one year.

This award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar. As all students must comply with the General Course Rules as well as the Specific Course Rules below, they are advised to refer to them to understand their rights and responsibilities regarding course matters.

### Specific Course Rules

#### 1 Admission requirements

1.1 An applicant for admission to the course of study for the Graduate Certificate in Historical Studies shall have qualified for a degree of the University or for a degree of another institution accepted for the purpose by the University.

1.2 Subject to the approval of the Council the Faculty may, in special cases and subject to such conditions (if any) as it may see fit to impose in each case, accept as a student for the Graduate Certificate a person who does not hold a degree of a tertiary institution but has given evidence satisfactory to the Faculty of fitness to undertake work for the Graduate Certificate.

#### 2 Status, exemption and credit transfer

Except by the special permission of the Head of the Department of History, no student may gain status towards the Graduate Certificate for other studies undertaken in the University or other institutions.

#### 3 Approval of course of study at enrolment

Each student's course of study shall be approved by the Faculty at enrolment each year.

#### 4 Duration of the Award

Except with the special permission of the Head of Department of History, the course for the Graduate Certificate shall be completed in one semester of full-time study or not more than three semesters of part-time study.

#### 5 Qualification requirements

Students of the Graduate Certificate shall complete 12 points of subjects as outlined in Rule 6, see below.

#### 6 Course of study / Subjects of study

Students for the Graduate Certificate students shall complete subjects to the value of 12 points chosen from the following:

Full-year and semester length Level III History subjects listed in Rule 8.9 of the Specific Course Rules of the Bachelor of Arts (see page 219), to be taken as:

2215 History IV (Full Year)	12
6493 History IV A	6
4782 History IV B	6
<i>or</i>	
7877 Individual Historical Study (Full Year)	12
8834 Individual Historical Study A	6
3499 Individual Historical study B	6

#### 7 Academic progress

7.1 A student who fails a subject and desires to take the subject again shall again attend lectures and satisfactorily do such written and practical work as the teaching staff concerned may prescribe.

7.2 A student who has twice failed a subject may not enrol for that subject again except by special permission to be obtained in writing from the Faculty and then only under such conditions as may be prescribed.

#### 8 Assessment and examinations

8.1 There shall be four classifications of pass in any subject for the Graduate Certificate: Pass with High Distinction, Pass with Distinction, Pass with Credit, and Pass.

8.2 For the purposes of this clause a student who is refused permission to be assessed, by examination or otherwise, or who does not, without a reason accepted by the Head of the

Department of History as adequate, attend all or part of a final examination (or supplementary examination if granted) after having enrolled for at least two thirds of the normal period during which the subject is taught, shall be deemed to have failed the subject.

**9 Articulation with other awards**

**9.1** Students who complete this course are also eligible to apply for entry to the Graduate Diploma in Applied Historical Studies course, and if successful, on gaining entry, may apply for status for the work they have undertaken in the Graduate Certificate.

**9.2** Students who have conferred upon them the award of Graduate Certificate in Historical Studies who subsequently successfully complete the requirements of the Graduate Diploma and gain 6 or more points of status for their first award must surrender their Graduate Certificate before being admitted to the Graduate Diploma.

## Graduate Certificate in Language Education

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar.

As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

### Specific Course Rules

#### Advanced French

(not offered in 1996)

note: The language of instruction in all of the subjects for the Graduate Certificate in Language Education (Advanced French) will be French.

#### 1 Admission requirements

- 1.1 An applicant for admission to the course of study for the Graduate Certificate shall have qualified for a degree of the University and a Graduate Diploma in Education of the University, or hold qualifications from another institution accepted by the University for the purpose.
- 1.2 Subject to the approval of the Council the Faculty may, in special cases and subject to such conditions (if any) as it may see fit to impose in each case, accept as a student for the Graduate Certificate a person who does not hold a degree of a tertiary institution but has given evidence satisfactory to the Faculty of fitness to undertake work for the Graduate Certificate.

#### 2 Status, exemption and credit transfer

- 2.1 Except by the special permission of the Head of the Department of French Studies, no student may gain status towards the Graduate Certificate for other studies undertaken in the University or other institutions.

#### 3 Approval of course of study at enrolment

- 3.1 Each student's course of study shall be approved by the Faculty at enrolment each year.

#### 4 Duration of course

- 4.1 Except with the special permission of the Faculty, the course for the Graduate Certificate shall be completed in one semester of full-time study or not more than two years of part-time study.

#### 5 Qualification requirements

- 5.1 All students shall take subjects to the value of 12 points, comprising the compulsory subjects 1526 Aspects of Culture and Society in French-Speaking Countries (4 points) and 1373 Issues in Second Language Learning and Curriculum (4 points) together with an elective subject to the value of 4 points.
- 5.2 The Faculty may, on the recommendation of the Department of French, require suitably qualified native-speaking candidates to take the 1133 Special Project in French Teaching or French Culture as an alternative to the subject 2171 Advanced Language: Written and Oral Proficiency.

#### 6 Course of study / Subjects of study

##### 6.1 Compulsory subjects

All students shall take the following subjects:

code	subject title	points
1526	Aspects of Culture and Society in French Speaking Countries	4
1373	Issues in Second Language Learning and Curriculum	4

##### 6.2 Elective subject

Candidates shall take (subject to the approval of the Faculty as outlined in 5.2 above):

*either*

2171	Advanced Language: Written and Oral Proficiency	4
------	---	---

*or*

1133	Special Project in French Teaching or French Culture	4
------	--	---

Additional subjects may be offered at the discretion of the Council.

## 7 Review of academic progress

- 7.1 A student who fails a subject and desires to take the subject again shall again attend lectures and satisfactorily do such written and practical work as the teaching staff concerned may prescribe.
- 7.2 A student who has twice failed a subject may not enrol for that subject again except by special permission to be obtained in writing from the Faculty and then only under such conditions as may be prescribed.
- 7.3 For the purposes of this clause a student who is refused permission to be assessed, by examination or otherwise, or who does not, without a reason accepted by the Head of the Department of French Studies as adequate, attend all or part of a final examination (or supplementary examination if granted) after having enrolled for at least two thirds of the normal period during which the subject is taught, shall be deemed to have failed the subject.

## 8 Assessment and examinations

- 8.1 There shall be two systems of classification of pass in any subject for the Graduate Certificate: Non-Graded Pass; or Pass with High Distinction, Pass with Distinction, Pass with Credit, and Pass.

## Syllabuses

---

The Department of French, in cooperation with the Department of French at Flinders, offers a Graduate Certificate in Language Education. The aim of the course is to enable practising teachers of French to enhance their language skills and to further their professional development.

### 1526 Aspects of Culture and Society in French Speaking Countries

*points value:* 4    *availability:* not be offered in 1996

*contact hours:* 2 weeks of intensive study during school vacations

*Aim:* To explore central cultural and social issues in France and French speaking countries today. It will focus on five themes: (1) La Vème république; (2) Les médias en France; (3) L'immigration; (4) L'Europe; (5) La francophonie. Films and novels, the press and television will be discussed in relation to these aspects.

*assessment:* assignment(s) (60%) examination (40%)

### 1373 Issues in Second Language Learning and Curriculum

*points value:* 4    *availability:* not be offered in 1996

*contact hours:* 2 weeks of intensive study during school vacation

*Aims:* (1) To examine current research in second language acquisition; (2) To examine curriculum design for language teaching; (3) To develop practical strategies and resources for teaching French.

It will focus on language use in the classroom and different types of interaction; it will include the principles and practice of syllabus and program design; the development and use of resources for teaching French; procedures for monitoring and assessing students progress. This subject will be offered as a common component with the Graduate Certificate in Language Education (Applied Linguistics) and will involve French staff for the language specific issues.

*assessment:* a portfolio which includes reports on the topics covered in the course (100%)

### 2171 Advanced Language: Written and Oral Proficiency

*points value:* 4    *availability:* not be offered in 1996

*contact hours:* 2 lectures a week

*Aim:* To develop communicative competence in the form of general linguistic proficiency.

Participants who complete the course successfully may expect to be able to operate more effectively in the four skills (reading, listening, speaking and writing) and in particular to integrate them as in real life. These skills are not developed in isolation but in the context of those issues which are of most importance in understanding contemporary French-speaking societies. The issues are closely coordinated in a rational framework corresponding to the recommendations of En fin de Compte. This course book was awarded the National Prize for excellence in all foreign language teaching in the UK in 1990.

*assessment:* active classroom participation, 10 assignments of 500 words, 30 minute oral examination

### 1133 Special Project in French Teaching or French Culture

*points value:* 4    *availability:* not be offered in 1996

*contact hours:* 1 hour a week

*content:* The Special Project is an alternative to 2171 Advanced Language: Written and Oral Proficiency and replaces this subject for students with advanced language skills. It consists of an individual project on some aspect of French culture relevant to the secondary syllabus. It may be based on the student's own teaching needs or experience and could involve the preparation of a monograph which would be of use to other teachers with their classes. The project will be done under a supervisor and the discussion will be conducted in French.

For those who would prefer to do their Special Project on issues in language learning and curriculum, they are advised to join the Classroom Research Subject in Applied Linguistics which will be offered by The University of Adelaide.

*assessment:* extended essay of 6,000 words (100%)

## Advanced German

(not offered in 1996)

note: The language of instruction in all of the subjects for the Graduate Certificate in Language Education (Advanced German) will be German.

### 1 Admission requirements

- 1.1** An applicant for admission to the course of study for the Graduate Certificate shall have qualified for a degree of the University and a Graduate Diploma in Education of the University, or hold qualifications from another institution accepted by the University for the purpose.
- 1.2** Subject to the approval of the Council the Faculty may, in special cases and subject to such conditions (if any) as it may see fit to impose in each case, accept as a student for the Graduate Certificate a person who does not hold a degree of a tertiary institution but has given evidence satisfactory to the Faculty of fitness to undertake work for the Graduate Certificate.

### 2 Status, exemption and credit transfer

- 2.1** Except by the special permission of the Head of the Department of German Studies, no student may gain status towards the Graduate Certificate for other studies undertaken in the University or other institutions.

### 3 Approval of course of study at enrolment

- 3.1** Each student's course of study shall be approved by the Faculty at enrolment each year.

### 4 Duration of course

- 4.1** Except with the special permission of the Faculty, the course for the Graduate Certificate shall be completed in one semester of full-time study or not more than two years of part-time study.

### 5 Qualification requirements

- 5.1** All students shall complete subjects to the value of twelve points comprising the compulsory subjects 8060 Survey of German-Speaking Countries Today (three points) and 3333 Strategies and Materials in Teaching German (four points) together with five points of elective subjects.
- 5.2** The Faculty may, on the recommendation of the Department of German, require suitably qualified native-speaking candidates to take the 5647 Special Project in German Teaching as an alternative to the subjects 2626 Advanced Language (German) and 8589 German Conversation Tutorial.

## 6 Course of study / Subjects of study

### 6.1 Compulsory subject

All candidates shall take the following subjects:

code	subject title	points
8060	Survey of German-Speaking Countries Today	3
3333	Strategies and Materials in Teaching German	4

### 6.2 Elective subjects

Candidates shall take (subject to the approval of the Faculty, as outlined in 5.2 above):

*either*

2626	Advanced Language (German)	3
8589	German Conversation Tutorial	2

*or*

5647	Special Project in German Teaching	5
------	------------------------------------	---

Additional subjects may be offered at the discretion of the Council.

### 7 Review of academic progress

- 7.1** A student who fails a subject and desires to take the subject again shall again attend lectures and satisfactorily do such written and practical work as the teaching staff concerned may prescribe.
- 7.2** A student who has twice failed a subject may not enrol for that subject again except by special permission to be obtained in writing from the Faculty and then only under such conditions as may be prescribed.
- 7.3** For the purposes of this clause a student who is refused permission to be assessed, by examination or otherwise, or who does not, without a reason accepted by the Head of the Department of German Studies as adequate, attend all or part of a final examination (or supplementary examination if granted) after having enrolled for at least two thirds of the normal period during which the subject is taught, shall be deemed to have failed the subject.

### 8 Assessment and examinations

- 8.1** There shall be two systems of classification of pass in any subject for the Graduate Certificate: Non-Graded Pass; or Pass with High Distinction, Pass with Distinction, Pass with Credit, and Pass.

## Syllabuses

note: All subjects are offered only as staff and student numbers allow.

### 8060 Survey of German-Speaking Countries Today

*points value:* 3      *availability:* not offered in 1996

*contact hours:* 2 lectures a week

*content:* The aim of this subject is to treat many of the central social, cultural and political issues in German-speaking countries today. The unification of the two Germanies will be the major object of study, with comparisons with and contrasts to Austria and Switzerland. Topics surveyed will include the importance of the European Community, the changing relationships of the Western countries to Central and Eastern Europe and major political parties. There will also be discussion of the revolution in and disappearance of the GDR, of problems encountered by individuals when they try to enjoy their guaranteed freedoms, and of the difficulties caused by and for ethnic German migrants, asylum-seekers, and other outsider groups. The particular concerns of women, environmentalists and the need to develop and adapt educational systems will also be discussed. The survey will use material from newspapers, journals, radio and television to illustrate and inform the discussion.

*assessment:* essay (60%); semester work (40%)

### 3333 Strategies and Materials in Teaching German

*points value:* 4      *availability:* not offered in 1996

*contact hours:* 2 lectures a week

*content:* This subject deals with language teaching methodology in a very practical sense. It will concentrate on the practical aspects of teaching German as a foreign language in a school setting:

ways of establishing the needs of learners; analysing and evaluating existing materials (ie the textbooks most widely used in SA); criteria for the development of new materials; preparing exercises for specific communicative needs.

The course will rely heavily on the experience and contributions of the participants, because improving our language teaching methods is as much a cooperative exercise as language learning itself.

*assessment:* essay (60%); semester work (40%)

### 2626 Advanced Language (German)

*points value:* 3      *availability:* not offered in 1996

*contact hours:* 2 lectures a week

*content:* The aim of this course is to upgrade existing language skills by written and oral work in modern German at an advanced level. The course will emphasise linguistic problems encountered in the classroom situation and recent changes in usage in German. The alternative to this subject for students already having substantially these skills is the Special Project.

*assessment:* examination (50%); classwork (50%)

### 8589 German Conversation Tutorial

*points value:* 2      *availability:* not offered in 1996

*contact hours:* 1 tutorial a week

*content:* The aim of this subject is to upgrade existing fluency and conversational skills in modern everyday German by intensive oral work in small groups. Special attention will be given to topics of current cultural, political and social interest and to recent changes in spoken German idioms. The alternative to this subject for students already having substantially these skills is the Special Project.

*assessment:* participation (100%)

### 5647 Special Project in German Teaching

*points value:* 5      *availability:* not offered in 1996

*contact hours:* 1 hour a week average

*content:* The Special Project is an alternative to both 2626 Advanced Language and 8589 German Conversation Tutorial and replaces these subjects for those students who already have substantially those language skills. It consists of an individual project embodying research into some aspect of German Language Teaching Methodology, or a related field acceptable to the Department, and may be based on the student's own teaching experience. A supervisor will be assigned to the project and individual guidance sessions will take place on a regular basis. Supervision will be conducted in German.

*assessment:* extended essay of 6,000 words (100%)

**Applied Linguistics**

(not offered in 1996)

**1 Admission requirements**

- 1.1** An applicant for admission to the course of study for the Graduate Certificate shall have qualified for a degree of the University and a Graduate Diploma in Education of the University, or hold qualifications from another institution accepted by the University for the purpose.
- 1.2** Subject to the approval of the Council the Faculty may, in special cases and subject to such conditions (if any) as it may see fit to impose in each case, accept as a student for the Graduate Certificate a person who does not hold a degree of a tertiary institution but has given evidence satisfactory to the Faculty of fitness to undertake work for the Graduate Certificate.

**2 Status, exemption and credit transfer**

- 2.1** Except by the special permission of the Professor of Linguistics, no student may gain status towards the Graduate Certificate for other studies undertaken in the University or other institutions.

**3 Approval of course of study at enrolment**

- 3.1** Each student's course of study shall be approved by the Faculty at enrolment each year.

**4 Duration of course**

- 4.1** Except with the special permission of the Faculty, the course for the Graduate Certificate shall be completed in one semester of full-time study or not more than two years of part-time study.

**5 Qualification requirements**

- 5.1** To qualify for the Graduate Certificate, a candidate shall satisfactorily complete the subjects outlined in 6 below, with an aggregate points value of twelve points.

**6 Course of study**

note: All subjects are offered subject to enrolments and the availability of staff and resources.

The subjects of the Graduate Certificate in Language Education (Applied Linguistics) are the following:

code	subject title	points
q	Language and Learning**	4
6555	Language Awareness**	4
4017	Practical Linguistic Analysis**	2
5959	Language Teaching**	2

Additional subjects may be offered at the discretion of the Council.

\*\* not offered in 1996

**7 Review of academic progress**

- 7.1** A student who fails a subject and desires to take the subject again shall again attend lectures and satisfactorily do such written and practical work as the teaching staff concerned may prescribe.
- 7.2** A student who has twice failed a subject may not enrol for that subject again except by special permission to be obtained in writing from the Faculty and then only under such conditions as may be prescribed.
- 7.3** For the purposes of this clause a student who is refused permission to be assessed, by examination or otherwise, or who does not, without a reason accepted by the Professor of Linguistics as adequate, attend all or part of a final examination (or supplementary examination if granted) after having enrolled for at least two thirds of the normal period during which the subject is taught, shall be deemed to have failed the subject.

**8 Assessment and examinations**

- 8.1** There shall be two systems of classification of pass in any subject for the Graduate Certificate: Non-Graded Pass; or Pass with High Distinction, Pass with Distinction, Pass with Credit, and Pass.

## Syllabuses

### 1138 Language and Learning (Applied Linguistics)

*points value:* 4      *availability:* not offered in 1996

*contact hours:* 1 lecture a week and 1 tutorial a week

*content:* The aim of this subject is to introduce current research in second language acquisition. The course will include: introduction to the nature and functions of language; research on language development; the role of instruction; language learning strategies; contrastive linguistics, error analysis and interlanguage approaches to second language studies.

*assessment:* essay of 4,000 words (60%); assignments (40%)

### 6555 Language Awareness

*points value:* 4      *availability:* not offered in 1996

*contact hours:* 1 lecture a week and 1 tutorial a week

*content:* The aim of this subject is to alert students to the social, political and psychological context of a range of languages other than English. Particular emphasis will be placed on official language policies in Australia and their implications for language teaching.

*assessment:* essay of 4,000 words (60%); assignments (40%)

### 4017 Practical Linguistic Analysis

*points value:* 2      *availability:* not offered in 1996

*contact hours:* 1 lecture per fortnight and 1 practical per week

*content:* This subject aims at providing students with the essence of traditional school grammar and practical skills in linguistic analysis and error analysis.

*assessment:* essay of 4,000 words (60%); assignments (40%)

### 5959 Language Teaching

*points value:* 2      *availability:* not offered in 1996

*contact hours:* 1 lecture a week and 1 tutorial a week

*content:* This unit will familiarise learners with a number of methods and techniques used in the second language classroom. It will address the technological resources currently available and show how they can be integrated with the learning process.

*assessment:* research report (60%); assignments (40%)

## Graduate Certificate in Logic

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar.

As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

### Specific Course Rules

#### 1 Admission requirements

1.1 An applicant for admission to the course of study for the Graduate Certificate in Logic shall have qualified for a degree of the University or for a degree of another institution accepted for the purpose by the University, which includes a pass in Logic I or an equivalent subject.

1.2 Subject to the approval of the Council the Faculty may, in special cases and subject to such conditions (if any) as it may see fit to impose in each case, accept as a student for the Graduate Certificate a person who does not hold a degree of a tertiary institution but has given evidence satisfactory to the Faculty of fitness to undertake work for the Graduate Certificate.

#### 2 Status, exemption and credit transfer

Except by the special permission of the Head of the Department of Philosophy, no student may gain status towards the Graduate Certificate for other studies undertaken in the University or other institutions.

#### 3 Approval of course of study at enrolment

Each student's course of study shall be approved by the Faculty at enrolment each year.

#### 4 Duration of the Award

To qualify for the Graduate Certificate a student shall satisfactorily complete a course of one semester of full-time study or the part-time equivalent.

#### 5 Qualification requirements

Students of the Graduate Diploma shall complete 12 points of subjects as outlined in Rule 6, see below.

#### 6 Course of study / Subjects of study

Students for the Graduate Diploma students shall complete subjects to the value of 12 points as follows:

##### 6.1 Core Subjects

All students shall complete the following subject:

3402 Advanced Logic A (PG) 6

(Students who are exempted from studying the subject 3402 Advanced Logic A (PG) due to having previously completed 4259 Logic IIIA or its equivalent will be required to present a further 6 points of elective subjects listed in 6.1.2 in lieu of this requirement.)

##### 6.2 Elective Subjects

All students shall complete elective subjects to an aggregate value of 6 points chosen from the following:

2614 Advanced Logic B (PG) 2

7665 Argument (PG) 4

1619 Artificial Intelligence (PG) 2

1998 Intermediate Logic (PG) 4

2254 Knowledge Representation (PG) 2

##### Flinders University Subjects:

COMP 3007 Artificial Intelligence 2

COMP 3009 Computational Logic 2

PHIL 2080 Logic, Reasoning and Argumentation 4

#### 7 Academic progress

7.1 A student who fails a subject and desires to take the subject again shall again attend lectures and satisfactorily do such written and practical work as the teaching staff concerned may prescribe.

- 7.2** A student who has twice failed a subject may not enrol for that subject again except by special permission to be obtained in writing from the Faculty and then only under such conditions as may be prescribed.

**8 Assessment and examinations**

- 8.1** There shall be four classifications of pass in any subject for the Graduate Diploma: Pass with High Distinction, Pass with Distinction, Pass with Credit, and Pass.

- 8.2** For the purposes of this clause a student who is refused permission to be assessed, by examination or otherwise, or who does not, without a reason accepted by the Head of the relevant Department as adequate, attend all or part of a final examination (or supplementary examination if granted) after having enrolled for at least two thirds of the normal period during which the subject is taught, shall be deemed to have failed the subject.

**9 Articulation with other awards**

- 9.1** Students who complete this course are also eligible to apply for entry to the Graduate Diploma in Logic course, and if successful, on gaining entry, may apply for status for the work they have undertaken in the Graduate Certificate.

- 9.2** Students who have conferred upon them the award of Graduate Certificate in Logic who subsequently successfully complete the requirements of the Graduate Diploma and gain 6 or more points of status for their first award must surrender their Graduate Certificate before being admitted to the Graduate Diploma.

**Syllabuses**

*syllabus details: see Master of Logic*

# Graduate Diploma in Anthropology

## Introductory remarks

This course aims to introduce graduate students from a variety of disciplines to the application of anthropological theory and methods to issues which are both of relevance to the wider community and of current relevance in the discipline of Anthropology. Its ethnographic material will be drawn from Australia, Asia and the Pacific, and will seek to focus on relevant problems drawn from these regions. The course is specifically directed towards those whose work and interests require them to be aware of how cultures create views of the world and how such views produce taken-for-granted and unreflected-upon responses to issues of current public concern, for example ethnicity, gender, multiculturalism, the environment and development.

Applications for admission to this course shall be made through the South Australian Tertiary Admissions Centre (SATAC) on the appropriate form by the required date. Successful applicants to the course may not defer their studies to the following year.

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar.

As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

## Specific Course Rules

### 1 Admission requirements

- 1.1 An applicant for admission to the course of study for the Graduate Diploma in Anthropology shall have qualified for a degree of the University or for a degree of another institution accepted for the purpose by the University.
- 1.2 Subject to the approval of the Council the Faculty may, in special cases and subject to such conditions (if any) as it may see fit to impose in each case, accept as a student for the Graduate Diploma a person who does not hold a degree of a tertiary institution but has given evidence satisfactory to the Faculty of fitness to undertake work for the Graduate Diploma.

### 2 Status, exemption and credit transfer

- 2.1 Except by the special permission of the Head of the Department of Anthropology, no student may gain status towards the Graduate Diploma for other studies undertaken in the University or other institutions.

### 3 Approval of course of study at enrolment

- 3.1 Each student's course of study shall be approved by the Faculty at enrolment each year.

### 4 Duration of course

- 4.1 Except with the special permission of the Faculty, the course for the Graduate Diploma shall be completed in one year of full-time study or not more than two years of part-time study.

### 5 Qualification requirements

- 5.1 The course of study for the Graduate Diploma in Anthropology shall consist of two parts, each consisting of three subjects, the six subjects having an aggregate value of 24 points.
- 5.2 Unless the Faculty or its nominee decides otherwise, full-time candidates shall complete three subjects for Part I in the first semester. Part-time candidates shall complete Part I in the first year of candidature.
- 5.3 Unless the Faculty or its nominee decides otherwise, full-time candidates shall complete the three subjects for Part II in the second semester. Part-time candidates shall complete Part II in the second year of their candidature.

### 6 Course of study / Subjects of study

- 6.1 The course of study for the Graduate Diploma in Anthropology shall consist of two parts, each consisting of three subjects, the six subjects having an aggregate value of 24 points.

**Part I**

3358	Current Issues in Anthropology Theory (Grad Dip)	4
2925	Fieldwork and the Production of Ethnographic Texts (Grad Dip)	4
5597	Individual Project (Ethnographic) (Grad Dip)	4

**Part II**

4510	Anthropological Issues in Asia and the Pacific (Grad Dip)	4
9725	Anthropology and the State (Grad Dip)	4
9320	Individual Project (Theory) (Grad Dip)	4

**7 Review of academic progress**

- 7.1 A student who fails a subject and desires to take the subject again shall again attend lectures and satisfactorily do such written and practical work as the teaching staff concerned may prescribe.
- 7.2 A student who has twice failed a subject may not enrol for that subject again except by special permission to be obtained in writing from the Faculty and then only under such conditions as may be prescribed.
- 7.3 For the purposes of this clause a student who is refused permission to be assessed after having enrolled for at least two thirds of the normal period during which the subject is taught shall be deemed to have failed the subject.

**8 Assessment and examinations**

- 8.1 There shall be four classifications of pass in any subject for the Graduate Diploma: Pass with High Distinction, Pass with Distinction, Pass with Credit, and Pass.

## Syllabuses

### 3358 Current Issues in Anthropological Theory

*points value:* 4                      *duration:* semester 1

*quota:* may apply

*restriction:* 1105 Honours Anthropology

*contact hours:* 3 hours a week

*content:* This subject introduces students to a number of key theoretical issues in Anthropology which are the focus of current debate. Structuralism is first considered. This provides a foundation for the consideration of developments from structuralism and reactions to it. Late structuralism is exemplified by the work of Sahlins and through his work and the work of Bourdieu, the concept of cultural logic and its reproduction in the practices of everyday life is explored. Concepts of identity, self and other and their embodiment, form the basis of an exploration of ethnicity, gender, kinship and related issues. Power and knowledge in their different manifestations in discourse are explored through the work of Foucault. Finally the post modern influence on theorisation and the development of critical theory in anthropology is considered.

*assessment:* oral seminar presentation on selected topic which is written up (1,000 words) and submitted for assessment (33%); and essay of 2,000 words based on library research deriving from themes and issues raised in the seminar (67%)

### 2925 Fieldwork and the Production of Ethnographic Texts

*points value:* 4                      *duration:* semester 1

*quota:* may apply

*restriction:* 1105 Honours Anthropology

*contact hours:* 3 hours a week

*content:* This subject explores the fieldwork experience and the construction of ethnographic texts. The subject traces the different conceptions of fieldwork which have developed within anthropology from the late 19th century. Anthropologists first saw their task as scientific observation. Later, emphasis was placed on fieldwork as involving empathic understanding. More recently this has given way to a view of fieldwork as involving a dialogic and interpretive understanding. These changes in the conceptualisation of fieldwork have been paralleled by experimentation and change in the conceptualisation of the process of writing and constructing an ethnographic text. Exploring these themes enables a critical reflection upon the personal, social and political nature of fieldwork relationships

which shapes how we understand other cultures. The aim of this subject is to work towards a new conceptualisation of ethnographic practice and the construction of text.

*assessment:* oral seminar presentation on selected topic which is written up (1,000 words) and submitted for assessment (33%), and essay of 2,000 words based on library research deriving from themes and issues raised in the seminar (67%)

### 5597 Individual Project: Ethnographic

*points value:* 4                      *duration:* semester 1

*quota:* may apply

*restriction:* 1105 Honours Anthropology

*contact hours:* to be negotiated with supervisors

*content:* This subject allows students to develop knowledge of an ethnographic area and to demonstrate research skills in the preparation and presentation of a research paper. The research topic will be chosen out in consultation between student and supervisor and other staff of the Discipline. Students will be expected to meet regularly with their supervisors to discuss their research and they will be expected to present a seminar paper on their special topic.

*assessment:* annotated bibliography for project selected in consultation with supervisor (25%), and an essay of 6,000 words based upon library research in which student explores ethnographic and theoretical issues in anthropology (75%)

### 9320 Individual Project: Theory

*points value:* 4                      *duration:* semester 2

*quota:* may apply

*restriction:* 1105 Honours Anthropology

*contact hours:* to be negotiated with supervisors

*content:* This subject allows students to acquire master of a particular theoretical field through the analysis of ethnography. They may utilise in their analysis the material brought together in their ethnographic project. Students will be expected to demonstrate skills in the application of theory to the analysis of ethnographic data. The research topic will be chosen in consultation between student and supervisor and other staff of the Discipline. Students will be expected to meet regularly with their supervisors to discuss their research and they will be expected to present a seminar paper on their special topic.

*assessment:* annotated bibliography for project selected in consultation with supervisor (25%), and essay of 6,000 words based upon library research in which student explores ethnographic and theoretical issues in anthropology (75%)

**9725 Anthropology and the State**

*points value:* 4 *duration:* semester 2

*quota:* may apply

*restriction:* 1105 Honours Anthropology

*contact hours:* 3 seminar hours per week

*content:* This subject explores a number of themes which are concerned with the way in which individuals, communities and groups relate to the state. Issues which will be explored include colonialism and imperialism, neo-colonialism and the way in which the state comes to encompass formally independent cultures and societies. The maintenance and production of identities and the development of community boundaries in resistance to encompassment by the state will be considered. Urbanism and urbanisation and the development of class cultures will form the basis for the exploration of consumerism in late capitalism and its effects on the structuring of perceptions of the state.

*assessment:* oral seminar presentation of selected topic which is written up (1,000 words) and submitted for assessment (33%), and essay (2,000 words) based on library research deriving from themes and issues raised in the seminar (67%)

**4510 Anthropological Issues in Asia and the Pacific**

*points value:* 4 *duration:* semester 2

*quota:* may apply

*restriction:* 1105 Honours Anthropology

*contact hours:* 3 seminar hours per week

*content:* This subject critically explores social, political and cultural aspects of the Asia-Pacific region. It will examine anthropologically a range of issues which are both transnational in scope but particularly topical to the region and the nation-state it encompasses: the concept of 'traditional' and its relation to peasants and indigenous peoples; the expansion of capitalism and the transformation of society; nationalist consciousness and the production of a 'community'; religious fundamentalism; environment and development; the distribution and access to resources and tourism.

*assessment:* oral seminar presentation on selected topic which is written up (1,000 words) and submitted for assessment (33%), and essay 2,000 words based on library research deriving from themes and issues raised in the seminar (67%)

# Graduate Diploma in Applied Geographic Information Systems and Remote Sensing

note: Postgraduate tuition fees may apply to this course.

## Introductory remarks

This course is designed for graduates who wish to develop knowledge in the area of collection and analysis of geographic information, which involves one of the most rapidly evolving applications of computer technology today. Techniques learned can be applied to such fields as natural resource management, environmental monitoring and impact assessment, geology, biology, urban and regional planning, landscape architecture, public health and safety, transportation and mobility.

Applications for admission to this course shall be made in writing to the Head of the Department of Geography. Successful applicants to the course may defer their studies to the following year.

This award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar. As all students must comply with the General Course Rules as well as the Specific Course Rules below, they are advised to refer to them to understand their rights and responsibilities regarding course matters.

## Specific Course Rules

### 1 Admission requirements

- 1.1 An applicant for admission to the course of study for the Graduate Diploma in Applied Geographic Information Systems and Remote Sensing shall have qualified for a degree of the University or for a degree of another institution accepted for the purpose by the University.
- 1.2 Subject to the approval of the Council the Faculty may, in special cases and subject to such conditions (if any) as it may see fit to impose in each case, accept as a student for the Graduate Diploma a person who does not hold a degree of a tertiary institution but has given evidence satisfactory to the Faculty of fitness to undertake work for the Graduate Diploma.

### 2 Status, exemption and credit transfer

- 2.1 Except by the special permission of the Head of the Department of Geography, no student may gain status towards the Graduate Diploma for other studies undertaken in the University or other institutions.

### 3 Approval of course of study at enrolment

- 3.1 Each student's course of study shall be approved by the Faculty at enrolment each year.

### 4 Duration of course

- 4.1 Except with the special permission of the Faculty, the course for the Graduate Diploma shall be completed in one year of full-time study or not more than three years of part-time study.

### 5 Qualification requirements

- 5.1 Students of the Graduate Diploma shall complete 8 core subjects with an aggregate points value of 24 points

### 6 Course of study / Subjects of study

- 6.1 Students of the Graduate Diploma shall complete all the following core subjects:

code	subject title	points
9330	Introduction to G. I. S.	3
2887	Introduction to Remote Sensing	3
3983	Digital Image Analysis	3
3132	Technical Issues in Geographic Information Systems and Remote Sensing	3
2523	Field Sampling Techniques	3
6478	Project Planning and System Evaluation	3
7002	Applied Spatial Information Systems A	3
1719	Applied Spatial Information Systems B	3

## **7 Review of academic progress**

- 7.1** A student who fails a subject and desires to take the subject again shall again attend lectures and satisfactorily do such written and practical work as the teaching staff concerned may prescribe.
- 7.2** A student who has twice failed a subject may not enrol for that subject again except by special permission to be obtained in writing from the Faculty and then only under such conditions as may be prescribed.
- 7.3** For the purposes of this clause a student who is refused permission to be assessed, by examination or otherwise, or who does not, without a reason accepted by the Head of the Department of Geography as adequate, attend all or part of a final examination (or supplementary examination if granted) after having enrolled for at least two thirds of the normal period during which the subject is taught, shall be deemed to have failed the subject.

## **8 Assessment and examinations**

- 8.1** There shall be four classifications of pass in any subject for the Graduate Diploma; Pass with High Distinction, Pass with Distinction, Pass with Credit, and Pass.

## **9 Articulation with other awards**

- 9.1** Students who complete the award of Graduate Diploma in Applied Geographic Information Systems and Remote Sensing are eligible to apply for entry to the degree of Master of Arts (Geographic Information Systems and Remote Sensing) course, and if successful, on gaining entry, receive full status for the work they have undertaken in the Graduate Diploma.
- 9.2** Students who have been admitted to the award of Graduate Diploma in Applied Geographic Information Systems and Remote Sensing who subsequently successfully complete the requirements for the degree of the Master of Arts (Geographic Information Systems and Remote Sensing) must surrender their first award before being admitted to the Masters degree.
- 9.3** Notwithstanding the above Rules a candidate who has been enrolled for the degree of Master of Arts (Geographic Information Systems and Remote Sensing) and who has completed the work prescribed herein for the Graduate Diploma and who has not been awarded the Master's degree shall, on written application to the Registrar, be awarded the Graduate Diploma.

- 9.4** Students who have completed the award of Graduate Diploma in Remote Sensing are eligible to apply for entry to the Graduate Diploma in Applied Geographic Information Systems and Remote Sensing course. Such students will receive status to the value of 18 points, and will be required to undertake the subjects 6478 Project Planning and System Evaluation and 3132 Technical Issues in Geographic Information Systems and Remote Sensing. Such students shall surrender the award of Graduate Diploma in Remote Sensing before being awarded the Graduate Diploma in Applied Geographic Information Systems and Remote Sensing.

## Syllabuses

### 7002 Applied Spatial Information Systems A

level: postgraduate points value: 3

duration: semester 2

quota: will apply

prerequisites: 6478 Project Planning and System Evaluation

contact hours: 42

content: This subject is run as a seminar/workshop series covering a wide range of applications of GIS to environmental management problems; the topics will be selected each year to suit individual students' backgrounds and course requirements and to cover a representative range of application issues. Students will be required to present a seminar on a topic which may complement but must not duplicate work covered in any other elective subject presented by the student.

assessment: major seminar paper

### 1719 Applied Spatial Information Systems B

level: postgraduate points value: 3

duration: semester 2

quota: will apply

prerequisites: 7002 Applied Spatial Information Systems A

contact hours: 42

content: This subject will consist of a minor project on a topic nominated by the student that involves the application of Remote Sensing and Geographic Information Systems to an environmental management problem.

assessment: project report

### 3983 Digital Image Analysis

level: postgraduate points value: 3

duration: semester 1

quota: will apply

prerequisites: 2887 Introduction to Remote Sensing

contact hours: 42

content: This subject is concerned with analysis of digital remote sensing data collected by airborne and satellite sensors. It includes image correction for geometric and radiometric distortion, image enhancement, core statistical concepts in remote sensing and image classification.

assessment: essay workshop report (60%); examination (40%)

### 2523 Field Sampling Techniques

level: postgraduate points value: 3

duration: semester 2

quota: will apply

prerequisites: 3132 Technical Issues in G.I.S and Remote Sensing

contact hours: 42

content: This subject is concerned with appropriate environmental sampling strategies in different landscapes to link with remote sensing data collected by airborne and satellite sensors. It also includes radiometric data sampling strategies, multi-layer sampling, calibration techniques, field checking using GPS and incorporation of ancillary data through raster and vector GIS.

assessment: essay workshop report (60%); examination (40%)

### 9330 Introduction to G.I.S.

level: postgraduate points value: 3

duration: semester 1

quota: will apply

contact hours: 42

content: This course is concerned with the identification and description of the hardware and software components of a GIS; database models; data capture; nature and characteristics of spatial data; vector and raster GISs; data analysis; geographic modelling; data integration.

assessment: essay workshop report (60%); exam (40%)

### 2887 Introduction to Remote Sensing

level: postgraduate points value: 3

duration: semester 1

quota: will apply

prerequisites: 9330 Introduction to G.I.S.

contact hours: 42

content: This subject is concerned with the physical background to remote sensing techniques and their application. The nature and interaction of electromagnetic radiation with the atmosphere and earth materials are studied. In addition, the airborne and satellite payloads of past, current and future programs and the characteristics of the most commonly used sensors are investigated.

assessment: essay workshop report (60%); exam (40%)

**6478 Project Planning and System Evaluation**

*level:* postgraduate *points value:* 3

*duration:* semester 2

*quota:* will apply

*prerequisites:* 2523 Field Sampling Techniques

*contact hours:* 42

*content:* This subject covers the issues that need to be considered when proposing and implementing a new GIS. Topics covered will include project analysis; project design; cost benefit analysis; hardware software selection; geographic analysing; data exchange problems; legal issues; management problems; system evaluation.

*assessment:* essay and workshop report (60%); examination (40%)

**3132 Technical Issues in G.I.S. and Remote Sensing**

*level:* postgraduate *points value:* 3

*duration:* semester 1

*quota:* will apply

*prerequisites:* 7330 Introduction to Geographic Information Systems, 2887 Introduction to Remote Sensing, 3983 Digital Image Analysis

*contact hours:* 42

*content:* This subject deals with GIS algorithms, data structures, error analysis, co-ordinate systems and projections, data storage, map accuracy and data quality, field checking, integration of GIS and remote sensing.

*assessment:* essay workshop report (60%); examination (40%)

# Graduate Diploma in Applied Historical Studies

Applications for admission to this course shall be made through the South Australian Tertiary Admissions Centre (SATAC) on the appropriate form by the required date. Successful applicants may defer their studies for one year.

This award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar. As all students must comply with the General Course Rules as well as the Specific Course Rules below, they are advised to refer to them to understand their rights and responsibilities regarding course matters.

Syllabuses of subjects for the Graduate Diploma in Applied Historical Studies are published immediately after the Specific Course Rules for the degree of Master of Arts (Applied Historical) Studies.

## Specific Course Rules

### 1 Admission requirements

1.1 An applicant for admission to the course of study for the Graduate Diploma in Applied Historical Studies shall have qualified for a degree of the University or for a degree of another institution accepted for the purpose by the University.

1.2 Subject to the approval of the Council the Faculty may, in special cases and subject to such conditions (if any) as it may see fit to impose in each case, accept as a student for the Graduate Diploma a person who does not hold a degree of a tertiary institution but has given evidence satisfactory to the Faculty of fitness to undertake work for the Graduate Diploma.

### 2 Status, exemption and credit transfer

2.1 Except by the special permission of the Head of the Department of History, no student may gain status for the subjects:

6132 Heritage and History I

5935 Heritage and History II

2850 Practical History Workshop I

1303 Practical History Workshop II

for other studies undertaken in the University or other institutions.

2.2 No student may be granted more than 12 points of status toward the Graduate Diploma.

2.3 Status will not be granted for elective subjects for Level III History subjects offered by The University of Adelaide's Department of History.

### 3 Approval of course of study at enrolment

Each student's course of study shall be approved by the Faculty at enrolment each year.

Except with the special permission of the Head of Department of History, the course for the Graduate Diploma shall be completed in one year of full-time study or not more than two years of continuous part-time study.

### 5 Qualification requirements

Students of the Graduate Diploma shall complete 24 points of subjects including the core subject 6132 Heritage and History I, as outlined in Rule 6, see below.

### 6 Course of study / Subjects of study

Students for the Graduate Diploma shall complete subjects to the value of 24 points as follows:

6.1 all students shall complete the core subject:

code	subject title	points
6132	Heritage and History I	6

6.2 all students shall complete either:

2850	Practical History Workshop I	6
------	------------------------------	---

or

5935	Heritage and History II	6
------	-------------------------	---

6.3 In addition, students shall complete elective subjects to the value of 12 points chosen from the following:

1303	Practical History Workshop II	6
------	-------------------------------	---

The subject listed in clause 6.2, above, not already passed

and,

With the approval of the Head of Department of History, other Level III subjects in History or related disciplines, to be taken as:

3621 Applied Historical Studies Elective IV	12
7102 Applied Historical Studies Elective IV A	6
8714 Applied Historical Studies Elective IV B	6

**7 Academic progress**

- 7.1 A student who fails a subject and desires to take the subject again shall again attend lectures and satisfactorily do such written and practical work as the teaching staff concerned may prescribe.
- 7.2 A student who has twice failed a subject may not enrol for that subject again except by special permission to be obtained in writing from the Faculty and then only under such conditions as may be prescribed.

**8 Assessment and examinations**

- 8.1 There shall be four classifications of pass in any subject for the Graduate Diploma: Pass with High Distinction, Pass with Distinction, Pass with Credit, and Pass.
- 8.2 For the purposes of this clause a student who is refused permission to be assessed, by examination or otherwise, or who does not, without a reason accepted by the Head of the Department of History as adequate, attend all or part of a final examination (or supplementary examination if granted) after having enrolled for at least two thirds of the normal period during which the subject is taught, shall be deemed to have failed the subject.

**9 Articulation with other awards**

- 9.1 Students who receive a credit average or better in this course are eligible to apply for entry to the Master of Arts (Applied Historical Studies) course, and if successful, on gaining entry, receive full status for the work they have undertaken in the Graduate Diploma.
- 9.2 Students who have conferred upon them the award of Graduate Certificate in Historical Studies who subsequently successfully complete the requirements of the Graduate Diploma and gain 6 or more points of status for their first award must surrender their Graduate Certificate before being admitted to the Graduate Diploma.

**9.3** Notwithstanding the above Rules a student who has been enrolled for the Graduate Diploma in Applied Historical Studies and who has completed the work prescribed for the Graduate Certificate in Historical Studies and who has not been awarded the Graduate Diploma shall, on written application to the Registrar, be awarded the Graduate Certificate.

**Syllabuses**

*syllabus details:* see Master of Applied Historical Studies

# Graduate Diploma in Archaeology

## Introductory remarks

This course is intended to provide graduates, usually of disciplines related to Archaeology such as Classical Studies, Visual Arts and Aboriginal Studies, but also of other disciplines, with a strong background in archaeological theory and practice.

Applications for admission to this course shall be directly to the Department of Classics on the appropriate form by the required date. Successful applicants to the course may not defer their studies to the following year.

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar.

As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

## Specific Course Rules

### 1 Admission requirements

- 1.1 An applicant for admission to the course of study for the Graduate Diploma in Archaeology shall have qualified for a degree of the University or for a degree of another institution accepted for the purpose by the University.
- 1.2 Subject to the approval of the Council the Faculty may, in special cases and subject to such conditions (if any) as it may see fit to impose in each case, accept as a student for the Graduate Diploma a person who does not hold a degree of a tertiary institution but has given evidence satisfactory to the Faculty of fitness to undertake work for the Graduate Diploma.

### 2 Status, exemption and credit transfer

- 2.1 No student may be granted more than 12 points of status toward the Graduate Diploma for other studies undertaken in the University or other institutions.

### 3 Approval of course of study at enrolment

- 3.1 Each student's course of study shall be approved by the Faculty at enrolment each year.

### 4 Duration of course

- 4.1 Except with the special permission of the Faculty, the course for the Graduate Diploma shall be completed in one year of full-time study or not more than three years of part-time study.

### 5 Qualification requirements

- 5.1 To complete the requirements for the Graduate Diploma, students must satisfactorily complete 24 points of subjects comprising 16 points of compulsory subjects and 8 points of electives.

### 6 Course of study

Students shall complete satisfactorily the compulsory subjects and two subjects chosen from the electives, as follows:

#### 6.1 Compulsory subjects

code	subject title	points
5710	Archaeological Theory and Method (A)	2
VAAA8201	Archaeological Theory and Method (B)	2
1046	Archaeological Field Methods (A)	2
VAAA7205	Archaeological Field Methods (B)	2
9702	Research Project (full-time)	8

#### 6.2 Elective subjects

Students must complete two subjects from those listed below.

The subjects are offered at either The University of Adelaide or The Flinders University of South Australia. Students taking subjects at both The University of Adelaide and the Flinders University of South Australia must comply with the enrolment procedures of both institutions.

**The University of Adelaide**

6924 Early Roman Archaeology IV	4
4513 Later Roman Archaeology IV	4
1108 Early Greek Archaeology IV*	4
5163 Later Greek Archaeology IV*	4

**Flinders University**

ARCH 3001 Rock Art and Archaeology
ARCH 3002 North American Archaeology A
ARCH 3003 Early Celtic Art and Archaeology
ARCH 3004 Historical Archaeology
ARCH 3005 Maritime Archaeology
ARCH 3006 North American Archaeology B
ARCH 3007 Gender and Archaeology
ARCH 3008 Modern Material Culture

\* not offered in 1996

**7 Review of academic progress**

- 7.1 A student who fails a subject and desires to take the subject again shall again attend lectures and satisfactorily do such written and practical work as the teaching staff concerned may prescribe.
- 7.2 A student who has twice failed a subject may not enrol for that subject again except by special permission to be obtained in writing from the Faculty and then only under such conditions as may be prescribed.
- 7.3 For the purposes of this clause a student who is refused permission to be assessed, by examination or otherwise, or who does not, without a reason accepted by the Head of the Department of Classics as adequate, attend all or part of a final examination (or supplementary examination if granted) after having enrolled for at least two thirds of the normal period during which the subject is taught, shall be deemed to have failed the subject.

**8 Assessment and examinations**

- 8.1 There shall be four classifications of pass in any subject for the Graduate Diploma: Pass with High Distinction, Pass with Distinction, Pass with Credit, and Pass.

## Syllabuses

### compulsory subjects

#### 5710 Archaeological Theory and Method (A)

*points value:* 2                      *duration:* semester 1

*contact hours:* 12 weekly sessions of 1.5 hours each  
*content:* This course is the first half of the core course which is a compulsory subject for students of the Graduate Diploma of Archaeology. The second half called Archaeological Theory and Method B is offered by The Flinders University of South Australia. A lecture/seminar is offered each week dealing with topics in the history of and current issues within archaeology.

#### VAAA8201 Archaeological Theory and Method (B)

*points value:* 2                      *duration:* semester 2

*contact hours:* 12 weekly sessions of 1.5 hours each  
*content:* This course will examine the major issues in modern archaeological methodology and interpretations. This subject represents the second half of the core course taught on The Flinders University campus.

#### 1046 Archaeological Field Methods (A)

*points value:* 2                      *duration:* semester 1

*restriction:* not available to students with exemption from fieldwork

*contact hours:* up to 35 hours of practical sessions, including at least one full day's fieldwork towards the end of the semester

*content:* This subject is the first half of the compulsory core practical course, the second half of which is offered by Flinders University. It introduces students to archaeological field methods such as excavation and surveying, artefact processing, drawing and interpretation. Other special subjects may be included when available (for example, C<sup>14</sup> or TL dating, conservation and artefact repair/storage). In conjunction with the second semester course run by Flinders, students will be expected to undertake fieldwork during the mid-year vacation.

*assessment:* 1 short seminar paper of 1,000 words delivered in session, and project work of a maximum of 2,000 words related to the mid-year fieldwork

#### VAAA7205 Archaeological Field Methods (B)

*points value:* 2                      *duration:* semester 2

*contact hours:* 5 days over the mid-year break and up to 5 hours taught in semester 2

*content:* This subject comprises the second half of the compulsory core practical course, taught at The Flinders University.

#### 9702 Research Project (Full-time)

*points value:* 8                      *duration:* full year

*content:* This will normally take the form of an essay which provides evidence of the writer's ability to synthesise and assess critically the major issues involved in the chosen area; in some circumstances, the essay may make an original contribution to knowledge in a particular limited area of study. The essay will normally be related to one of the topics dealt with in the core subject. Note that both the full and part-time research project must be completed within one year.

*assessment:* 8,000–10,000 word essay

### elective subjects

#### The University of Adelaide subjects

##### 1108 Early Greek Archaeology IV

*points value:* 4                      *availability:* not offered in 1996

*contact hours:* 2 lectures and 1 tutorial a week

*restriction:* not available with exemption from lectures and not available to students who have completed any previous Greek Archaeology, Art or Architecture course at The University of Adelaide

*content:* this subject covers the contribution of archaeology to the modern understanding of Greek material culture - including art and architecture - down to the end of the sixth century B.C. As well as looking at specific sites, such as Mycenae, Lefkandi, Olympia and Delphi, the course looks at the major Greek stylistic developments of the period, and problems in their dating, identification and interpretation.

*assessment:* 2 essays and a slide test

### 5163 Later Greek Archaeology IV

*points value:* 4      *availability:* not offered in 1996

*contact hours:* 2 lectures and 1 tutorial a week

*restriction:* not available with exemption from lectures and not available to students who have completed any previous Greek Archaeology, Art or Architecture course at The University of Adelaide.

*content:* This subject continues the study of the archaeology of Greece from the early Classical period through the Hellenistic period in the eastern Mediterranean

*assessment:* 2 essays and a slide test

### 6924 Early Roman Archaeology IV

*points value:* 4      *duration:* semester 1

*contact hours:* 2 lectures and 1 seminar a week

*restriction:* not available with exemption from lectures and not available to students who have completed any previous Roman Archaeology, Art or Architecture course at The University of Adelaide

*content:* this subject covers the contribution of archaeology to the modern understanding of Roman material culture down to the first century A.D., including art and architecture. As well as looking at specific sites, such as Pompeii and Herculaneum, the course looks at the ways in which Roman art can be used as evidence of cultural change and identity.

*assessment:* 2 essays and a slide test

### 4513 Later Roman Archaeology IV

*points value:* 4      *duration:* semester 2

*restriction:* not available with exemption from lectures and not available to students who have completed any previous Roman Archaeology, Art or Architecture course at The University of Adelaide

*contact hours:* 2 lectures and 1 seminar a week

*content:* this subject covers the contribution of archaeology to the modern understanding of Roman material culture in the Later Empire. Lectures and tutorials will concentrate upon specific regional studies, such as Roman Britain, Gaul and Syria.

*assessment:* 2 essays and a slide test

### Flinders University subjects

These subjects are offered by The Flinders University of South Australia. Diploma students enrolled at The University of Adelaide wishing to take any of these subjects (within the limits indicated in the Schedules) will be granted appropriate credit towards their Adelaide award.

Students taking any of the subjects must comply with the enrolment procedures of The Flinders University. Details of those procedures are available from the School of Humanities, Flinders University. Not all subjects are offered every year.

ARCH 3001 Rock Art and Archaeology

ARCH 3002 North American Archaeology A

ARCH 3003 Early Celtic Art and Archaeology

ARCH 3004 Historical Archaeology

ARCH 3005 Maritime Archaeology

ARCH 3006 North American Archaeology

ARCH 3007 Gender and Archaeology

ARCH 3008 Modern Material Culture

*note:* not all courses on offer every year

Details about these Flinders University subjects, including information on their content, assessment and reading lists, are available in the Calendar of The Flinders University, Vol. II.

# Graduate Diploma in Chinese Studies

note: Postgraduate fees apply to this course.

## Introductory remarks

The course is of value to graduates (particularly those with a background in the Social Sciences) wishing to pursue interests which involve, or careers which necessitate, a knowledge of Chinese Studies.

The three components of the course are Chinese language (available from beginner's to advanced levels), a range of Social Sciences subjects related to the history, politics, economics, philosophy and literature of China, and an opportunity for students to undertake a research project in a field of Chinese study of particular interest to them which can be supervised by the Centre for Asian Studies or other University Departments.

Applications for admission to this course shall be made through the South Australian Tertiary Admissions Centre (SATAC) on the appropriate form by the required date. Successful applicants to the course may defer their studies through the SATAC system for a period of one year.

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar.

As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

## Specific Course Rules

### 1 Admission requirements

- 1.1 An applicant for admission to the course of study for the Graduate Diploma in Chinese Studies shall have qualified for a degree of the University or for a degree of another institution accepted for the purpose by the University.
- 1.2 Subject to the approval of the Council the Faculty may, in special cases and subject to such conditions (if any) as it may see fit to impose in each case, accept as a student for the Graduate Diploma a person who does not hold a degree of a tertiary institution but has given evidence satisfactory to the Faculty of fitness to undertake work for the Graduate Diploma.

### 2 Status, exemption and credit transfer

- 2.1 Except by the special permission of the Head of the Centre for Asian Studies, no student may gain status for the Chinese Language subject, or for the research subject 4682 Special Topic in Chinese Studies for other studies undertaken in the University or other institutions.
- 2.2 No student may be granted more than 12 points of status toward the Graduate Diploma.
- 2.3 Status will not be granted for elective subjects for Level III Asian Studies subjects undertaken in The University of Adelaide's Bachelor of Arts degree.

### 3 Approval of course of study at enrolment

- 3.1 Each student's course of study shall be approved by the Faculty at enrolment each year.

### 4 Duration of course

- 4.1 To qualify for the Graduate Diploma a student shall satisfactorily complete a course of one year of full-time study or the part-time equivalent.

### 5 Qualification requirements

- 5.1 The course of study for the Graduate Diploma in Chinese Studies shall be made up of a Chinese Language subject, the research subject 4682 Special Topic in Chinese Studies, and elective subjects to the total value of twenty-four points (or if the Language subjects 4323 Chinese IIA and 3139 Chinese IIB are chosen, twenty-six points).

### 6 Course of study / Subjects of study

#### 6.1 Chinese Language subject

- All students shall satisfactorily complete either:
- |  |   |
|--|---|
| 6604 Advanced Chinese (Graduate Diploma) | 6 |
| <i>or two of the following:</i>          |   |
| 7769 Chinese IA                          | 3 |
| 2126 Chinese IB                          | 3 |

4323 Chinese IIA	4
3139 Chinese IIIB	4
5610 Chinese IIIA	6
6872 Chinese IIIB	6

Students will be assigned the language subject appropriate to their level of competence after consultation with the Head of the Centre for Asian Studies. Part-time students undertaking a Chinese language subject must be enrolled in at least one other subject in the same calendar year.

**6.2 Research subject**

All students shall satisfactorily complete

4682 Special Topic in Chinese Studies IV	6
--	---

**6.3 Electives**

Students shall complete elective subjects to the value of six or twelve points, depending on the Language subject they have undertaken (students of 5610 Chinese IIIA and 6872 Chinese IIIB take six points of elective subjects, students of other Chinese Language subjects take twelve points of elective subjects) taken from the following:

*semester subjects*

1954 Chinese Politics III: the Rise and Decline of Chinese Communism 1921-1990	6
3409 Traditional China III: Prosperity to Decline*	6
1802 East Asian Economies	4
6114 Traditional China III: Formative Era to Middle Empire	6
6179 Foundations of Chinese Thought III	6
6125 The Chinese Economy: Growth, Development and Trade III	6
1529 Perceiving China: Themes in Chinese Studies III*	6

*full year subjects*

2794 China: from Empire to Communist Power III	12
--	----

\*not available in 1996

**7.3** For the purposes of this clause a student who is refused permission to be assessed, by examination or otherwise, or who does not, without a reason accepted by the Head of the Centre for Asian Studies as adequate, attend all or part of a final examination (or supplementary examination if granted) after having enrolled for at least two thirds of the normal period during which the subject is taught, shall be deemed to have failed the subject.

**8 Assessment and examinations**

**8.1** There shall be four classifications of pass in any subject for the Graduate Diploma: Pass with High Distinction, Pass with Distinction, Pass with Credit, and Pass.

**7 Review of academic progress**

**7.1** A student who fails a subject and desires to take the subject again shall again attend lectures and satisfactorily do such written and practical work as the teaching staff concerned may prescribe.

**7.2** A student who has twice failed a subject may not enrol for that subject again except by special permission to be obtained in writing from the Faculty and then only under such conditions as may be prescribed.

## Syllabuses

### Chinese Language subjects

#### 6604 Advanced Chinese (Graduate Diploma)

*level:* IV *points value:* 6 *duration:* semester 1

*prerequisite:* Credit or higher in Chinese III or equivalent

*contact hours:* 1.5 hours per week

*content:* This subject is designed for students who have completed Chinese III or are fluent native speakers. It aims to advance proficiency in literary Chinese. The emphasis is on the study of traditional Chinese texts.

*assessment:* exam (60%), translation (20%), participation (20%)

#### 7769 Chinese IA

#### 2126 Chinese IB

*syllabus details:* see B.A

#### 4323 Chinese IIA

#### 3139 Chinese IIB

*syllabus details:* see B.A

#### 5610 Chinese IIIA

#### 6872 Chinese IIIB

*syllabus details:* see B.A

### research subject

#### 4682 Special Topic in Chinese Studies IV

*level:* IV *points value:* 6 *duration:* semester 1 or 2

*content:* The Special Topic in Chinese Studies consists of a research essay of 7,000 words in the candidate's area of interest as approved by the Head of Centre. Alternatively, an annotated translation or other equivalent piece of work may be submitted with the approval of the Head of Centre. The subject is conducted by weekly supervision by a supervisor appointed by the Head of Centre.

*assessment:* The research essay will be marked by two examiners in the Centre.

### elective subjects

#### 1954 Chinese Politics III: the Rise and Decline of Chinese Communism 1921-1990

#### 3409 Traditional China III: Prosperity to Decline

#### 1802 East Asian Economies II

#### 6114 Traditional China III: Formative Era and Middle Empire

#### 2794 China: From Empire to Communist Power III

#### 6179 Foundations of Chinese Thought III

#### 7043 The Chinese Economy: Growth, Development and Trade III

#### 1529 Perceiving China: Themes in Chinese Studies III\*

*syllabus details:* for syllabus details of the above elective subjects, please refer to the Bachelor of Arts

\* not offered in 1996

## Graduate Diploma in Cognitive Science

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar.

As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

### Specific Course Rules

#### 1 Admission requirements

1.1 An applicant for admission to the course of study for the Graduate Diploma in Cognitive Science shall have qualified for a degree of the University incorporating major studies in one or more of the following disciplines: philosophy, psychology, linguistics, computer science, neurophysiology, neuroanatomy, mathematics; or have qualified for the Graduate Certificate in Cognitive Science, or for a degree of another institution accepted for the purpose by the University.

1.2 Subject to the approval of the Council the Faculty may, in special cases and subject to such conditions (if any) as it may see fit to impose in each case, accept as a student for the Graduate Diploma a person who does not hold a degree of a tertiary institution but has given evidence satisfactory to the Faculty of fitness to undertake work for the Graduate Diploma.

#### 2 Status, exemption and credit transfer

2.1 Except by the special permission of the Head of the Department of Philosophy, no student may gain status for the subject:

3275 Advanced Cognitive Science IV

for other studies undertaken in the University or other institutions.

2.2 No student may be granted more than 12 points of status toward the Graduate Diploma.

#### 3 Approval of course of study at enrolment

Each student's course of study shall be approved by the Faculty at enrolment each year.

#### 4 Duration of the Award

To qualify for the Graduate Diploma a student shall satisfactorily complete a course of one year of full-time study or the part-time equivalent.

#### 5 Qualification requirements

Students of the Graduate Diploma shall complete 24 points of subjects, as outlined in Rule 6, see below.

#### 6 Course of study / Subjects of study

Students for the Graduate Diploma shall complete subjects to the value of 24 points as follows:

##### 6.1.1 Core Subjects

All students shall complete the following two subjects:

1207 Cognitive Science: Minds, Brains and Computers IV 4

3275 Advanced Cognitive Science IV 4

(Students who are exempted from studying the subject 1207 Cognitive Science: Minds, Brains and Computers IV due to having previously completed either 8606 Cognitive Science: Minds, Brains and Computers II or 5086 Cognitive Science: Minds, Brains and Computers III, or equivalent, will be required to present a further 4 point elective subject listed in 6.1.2 in lieu of this requirement.)

##### 6.1.2 Elective Subjects

All students shall complete elective subjects to an aggregate value of 16 points chosen from the following six groups of subjects, with no more than 8 points of subjects being presented from any one group:

**Group A Philosophy Subjects**

6655 Issues in the Contemporary Philosophy of Mind IV	4
3390 Logic IV	4

**Group B Psychology Subjects**

4308 Intelligence IV	2
5296 Neuroscience in Psychology IV	2
2960 Philosophy and Psychology of Consciousness IV	2
9292 Psychology of Language in Thought and Action IV	2

**Group C Computer Science Subjects**

8352 Artificial Intelligence IV	2
1777 Knowledge Representation IV	2
2340 Advanced Artificial Intelligence IV A (Computer Vision)	2
5042 Advanced Artificial Intelligence IV B (Machine Learning)	2

**Group D Linguistics Subjects**

4594 Foundations of Linguistic Theory IV	4
3355 Language, Cognition and Reality IV	6

**Group E Histology and Anatomy Subjects**

1678 Head and Neck and Neuroanatomy IV	6
--	---

**Group F Physiology Subjects**

3155 Neurobiology IV	2
----------------------	---

The availability of some of the above elective subjects varies from year to year. Students should contact the relevant department(s) for information about subject availability over the projected period of their study programme.

Many of these elective subjects have had their normal pre-requisites waived for the purposes of this graduate programme in Cognitive Science. However, students enrolling in these subjects are expected to do sufficient background reading to attain a basic understanding of the subject area. Prospective students should contact subject coordinators for information about appropriate background reading.

**7 Academic progress**

7.1 A student who fails a subject and desires to take the subject again shall again attend lectures and satisfactorily do such written and practical work as the teaching staff concerned may prescribe.

7.2 A student who has twice failed a subject may not enrol for that subject again except by special permission to be obtained in writing from the Faculty and then only under such conditions as may be prescribed.

**8 Assessment and examinations**

8.1 There shall be four classifications of pass in any subject for the Graduate Diploma: Pass with High Distinction, Pass with Distinction, Pass with Credit, and Pass.

8.2 For the purposes of this clause a student who is refused permission to be assessed, by examination or otherwise, or who does not, without a reason accepted by the Head of the relevant Department as adequate, attend all or part of a final examination (or supplementary examination if granted) after having enrolled for at least two thirds of the normal period during which the subject is taught, shall be deemed to have failed the subject.

**9 Articulation with other awards**

9.1 Students who receive a credit average or better in this course are eligible to apply for entry to the Master of Cognitive Science course, and if successful, on gaining entry, receive full status for the work they have undertaken in the Graduate Diploma.

9.2 Students who have conferred upon them the award of Graduate Certificate in Cognitive Science who subsequently successfully complete the requirements of the Graduate Diploma and gain 6 or more points of status for their first award must surrender their Graduate Certificate before being admitted to the Graduate Diploma.

9.3 Notwithstanding the above Rules a student who has been enrolled for the degree of Graduate Diploma in Cognitive Science and who has completed the work prescribed for the Graduate Certificate in Cognitive Science and who has not been awarded the Graduate Diploma shall, on written application to the Registrar, be awarded the Graduate Certificate.

**Syllabuses**

*syllabus details:* see Master of Cognitive Science

# Graduate Diploma in Education

## Introductory remarks

This course realises the aim of training intending secondary school teachers through the systematic study of various issues in Education. Studies are undertaken in areas such as behavioural management, adolescence, learning and motivation, the teacher as communicator and curriculum and pedagogical studies in the Australian context, and draw upon contributions from the disciplines of History, Philosophy, Psychology and Sociology. The experiential component of the course incorporates some ten weeks of supervised teaching in schools.

Applications for admission to this course shall be made through the South Australian Tertiary Admissions Centre (SATAC) on the appropriate form by the required date. Successful applicants to the course may not defer their studies to the following year.

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar.

As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

As the course has undergone several structural changes in recent years, part-time students who commenced their course before 1995 will have suitable transitional arrangements determined for them at the time of enrolment.

## Specific Course Rules

### 1 Admission requirements

- 1.1 An applicant for admission to the course of study for the Graduate Diploma in Education shall have qualified for a degree of the University or for a degree of another institution accepted for the purpose by the University.

### 2 Status, exemption and credit transfer

- 2.1 No student may be granted more than twelve points of status toward the Graduate Diploma for other studies undertaken in the University or other institutions.
- 2.2 A candidate who after enrolment, has had practical teaching experience may, apply in writing to the Department of Education for status in one or both of the subjects 5705 Teaching Practice I and 9636 Teaching Practice II. Such an application should be accompanied by a statement giving full details of teaching practice including dates, names and addresses of schools, and names of head teachers. The Department reserves the right to seek information on the candidate's competence as a teacher in the process of determining whether status should be granted.

### 3 Approval of course of study at enrolment

- 3.1 Each student's course of study shall be approved by the Faculty at enrolment each year.

### 4 Duration of course

- 4.1 To qualify for the Graduate Diploma a student shall satisfactorily complete a course of one year of full-time study or up to six years of part-time study.

### 5 Qualification requirements

- 5.1 Students must successfully complete subjects to the value of 24 points comprising 6 points of Teaching Practice Subjects, 6 points of Curriculum and Methodology Subjects and 12 points of Education Studies Subjects.

### 6 Course of study / Subjects of study

#### 6.1 Teaching practice

Teaching Practice subjects to the value of 6 points

code	subject title	points
5705	Teaching Practice Part I	3
9636	Teaching Practice Part II	3

**6.2 Curriculum and Methodology**

Curriculum and Methodology subjects to a value of six points taken from:

**Social and Cultural Studies**

6059 Social, Cultural and Australian Studies 2

The subjects appearing below in this section must be taken in conjunction with 6059 Social, Cultural and Australian Studies

4134 Accounting Curriculum and Methodology	2
1478 Classical Studies Curriculum and Methodology	2
4397 Economics Curriculum and Methodology	2
3494 Geography Curriculum and Methodology	2
6149 History Curriculum and Methodology	2
2309 Legal Studies Curriculum and Methodology	2
1464 Business Studies Curriculum and Methodology	2

**English**

4721 General English Curriculum and Methodology	2
3439 Senior English Curriculum and Methodology	2

**Performing Arts**

9469 Classroom Music Curriculum and Methodology	3
6384 Instrumental Music Curriculum and Methodology	3
7178 Dance Curriculum and Methodology I	3
7153 Dance Curriculum and Methodology II	3
3378 General Drama Curriculum and Methodology	2
5781 Senior Drama Curriculum and Methodology	2
2274 Art and Design Curriculum and Methodology	2

**Languages other than English**

3363 Modern Language Curriculum and Methodology	2
---	---

The subjects appearing below in this section must be taken in conjunction with 3363 Modern Language Curriculum and Methodology

7374 Chinese Curriculum and Methodology	2
6728 French Curriculum and Methodology	2
2735 German Curriculum and Methodology	2
7815 Italian Curriculum and Methodology	2
1701 Japanese Curriculum and Methodology	2
3323 Spanish Curriculum and Methodology	2
3574 Vietnamese Curriculum and Methodology	2
8396 Other Languages Curriculum and Methodology	2

**Mathematics**

9856 Junior Mathematics Curriculum and Methodology	2
(9856 Junior Mathematics Curriculum and Methodology is a corequisite for Senior Mathematics)	
4212 Information Technology Curriculum and Methodology	2
2640 Senior Mathematics Curriculum and Methodology	2

**Science**

2459 Junior Science Curriculum and Methodology	2
(2459 Junior Science Curriculum and Methodology is a corequisite for the subjects listed in the Science section below)	
4855 Biology Curriculum and Methodology	2
2918 Chemistry Curriculum and Methodology	2
8634 Geology Curriculum and Methodology	2
2598 Physics Curriculum and Methodology	2

**Agricultural Science**

5259 Agricultural Science Curriculum and Methodology	2
--	---

**General**

3779 Curriculum and Methodology for the Adult Learner	2
9063 Introduction to Curriculum Design and Evaluation	2
8345 Practical Curriculum Design	2
6797 Practical Curriculum Evaluation	2
6210 Extended Specialist Curriculum	2

### 6.3 Education Studies

Education Studies subjects to a total value of 12 points as follows

1852 Adolescence: Learning and Development	2
7432 Curriculum in its Context	2
7296 The Teacher as Communicator	2
4666 Australian Educational Issues Part 1	2
3785 Australian Educational Issues Part 2	2
5221 Educational Projects	2

(The first three of the above subjects comprise the Teacher Learner Relationship).

### 7 Review of academic progress

7.1 A student who fails a subject and desires to take the subject again shall again attend lectures and satisfactorily do such written and practical work as the teaching staff concerned may prescribe.

7.2 A student who has twice failed a subject may not enrol for that subject again except by special permission to be obtained in writing from the Faculty and then only under such conditions as may be prescribed.

7.3 For the purposes of this clause a student who is refused permission to sit for an examination, or who does not, without a reason accepted by the Head of the Department of Education as adequate, attend all or part of a final examination (or supplementary examination if granted) after having enrolled for at least two thirds of the normal period during which the subject is taught, shall be deemed to have failed the examination.

### 8 Assessment and examinations

8.1 There shall be one of two systems of classification of pass in individual subjects for the Graduate Diploma: either Non-Graded Pass, or Pass with High Distinction, Pass with Distinction, Pass with Credit, and Pass.

### 9 Articulation with other awards

9.1 Students who complete the award of Graduate Certificate in Educational Studies are eligible to apply for entry to the Graduate Diploma in Education course, and if successful, on gaining entry, receive full status for the work they have undertaken in the Graduate Certificate.

9.2 Students who have been admitted to the award of Graduate Certificate in Educational Studies who subsequently successfully complete the requirements of the Graduate Diploma in

Education must surrender their first award before being admitted to the Graduate Diploma in Education.

9.3 Notwithstanding the above Rules a candidate who has been enrolled for the degree of Graduate Diploma in Education and who has completed the work prescribed herein for the Graduate Certificate in Educational Studies and who has not been awarded the Graduate Diploma shall, on written application to the Registrar, be awarded the Graduate Certificate.

## Syllabuses

### course requirements

The course for the Graduate Diploma is a composite course of full-time study lasting for one year and requiring the whole of a candidate's time to be devoted to it. The work consists of reading, attendance at a number of tutorial and seminar classes each week, such practical and written exercises as may be prescribed, visits to schools and other institutions, periods of supervised teaching practice, and attendance at lecture courses.

Part-time students may also enrol. While the major focus of the course has been on the preparation of secondary teachers, those involved, or intending to be involved, in higher, adult or tertiary education will find a degree of flexibility in the course which should cater for many of their needs. The part-time course may be completed over two to six years.

### Teaching Practice subjects

#### 5705 Teaching Practice Part I

*points value:* 3                      *duration:* semester 1 or 2

*restriction:* may not be taken without Curriculum and Methodology subjects

*requirements:* Students will undertake one block of supervised teaching practice. Students who successfully complete the subject are given a non-graded pass.

#### 9636 Teaching Practice Part II

*points value:* 3                      *duration:* semester 1 or 2

*restriction:* may not be taken without Curriculum and Methodology subjects

*requirements:* Students will undertake one block of supervised teaching practice. Students who successfully complete the subject are given a non-graded pass.

### Curriculum and Methodology subjects

*duration:* full year

*requirements:* Students are required to complete curriculum and methodology subjects to a total of 6 points. Each subject consists of weekly lectures and/or seminars. Students should take note of both the conditions attached to particular subjects and the prerequisites laid down for them. The Head of the Department may dispense with any of the conditions in any particular case.

*assessment:* generally by projects, assignments and participation in seminars

*options: note:* The availability of subjects depends on the availability of staff and facilities.

#### 6059 Social, Cultural and Australian Studies

*points value:* 2                      *duration:* full year

*prerequisites:* a Pass at Level III in Anthropology, Classical Studies, Economics, Geography, History, Law, Politics or any other approved subject

#### 4134 Accounting Curriculum and Methodology

*points value:* 2                      *duration:* full year

*prerequisites:* a Pass in one Accounting subject at Level III

*restriction:* may not be taken without 6059 Social, Cultural and Australian Studies

#### 1478 Classical Studies Curriculum and Methodology

*points value:* 2                      *duration:* full year

*prerequisites:* a Pass in Level III in Classical Studies, Ancient History, Latin or Greek

*restriction:* may not be taken without 6059 Social, Cultural and Australian Studies

#### 4397 Economics Curriculum and Methodology

*points value:* 2                      *duration:* full year

*prerequisites:* a Pass in one Economics subject at Level III

*restriction:* may not be taken without 6059 Social, Cultural and Australian Studies

#### 3494 Geography Curriculum and Methodology

*points value:* 2                      *duration:* full year

*prerequisites:* a Pass in one Geography subject at Level III

*restriction:* may not be taken without 6059 Social, Cultural and Australian Studies

#### 6149 History Curriculum and Methodology

*points value:* 2                      *duration:* full year

*prerequisites:* a Pass in one History subject at Level III

*restriction:* may not be taken without 6059 Social, Cultural and Australian Studies

**2309 Legal Studies Curriculum and Methodology**

*points value:* 2                      *duration:* full year  
*prerequisites:* pass in Law subjects approved by the Head of Department

*restriction:* may not be taken without 6059 Social, Cultural and Australian Studies

**1464 Business Studies Curriculum and Methodology**

*points value:* 2                      *duration:* full year  
*prerequisites:* a pass in one Business subject at level III

*restriction:* may not be take without 6059 Social, Cultural and Australian Studies

**4721 General English Curriculum and Methodology**

*points value:* 2                      *duration:* full year  
*prerequisites:* a Pass in one English subject at Level III or other qualification accepted by the lecturer in charge and the Head of Department

In certain circumstances, students with Level II English subjects may be accepted.

**3439 Senior English Curriculum and Methodology**

*points value:* 2                      *duration:* full year  
*prerequisites:* a Pass in one English subject at Level III or equivalent

*restriction:* may not be taken without 4721 General English Curriculum and Methodology

**9469 Classroom Music Curriculum and Methodology**

*points value:* 3                      *duration:* full year  
*prerequisites:* a degree in Music or a pass in one Music subject at Level III

**6384 Instrumental Music Curriculum and Methodology**

*points value:* 3                      *duration:* full year  
*prerequisites:* a degree in Music, or a Pass at Level III in one Music subject, plus recognised instrumental qualifications

**7178 Dance Curriculum and Methodology I**

*points value:* 3                      *availability:* not offered in 1996  
*prerequisites:* a degree in dance

**7153 Dance Curriculum and Methodology II**

*points value:* 3                      *availability:* not offered in 1996  
*prerequisites:* a degree in dance

**3378 General Drama Curriculum and Methodology**

*points value:* 2                      *duration:* full year  
*prerequisites:* a Pass in a Drama subject at Level III

**5781 Senior Drama Curriculum and Methodology**

*points value:* 2                      *duration:* full year  
*prerequisites:* a degree in Drama or Level III drama subject *and* proven practical experience

*restriction:* may not be taken without 3378 General Drama Curriculum Methodology

*restriction:* may not be taken without 9469 Classroom Music Curriculum and Methodology

**2274 Art Design Curriculum and Methodology**

*points:* 2                              *duration:* full year  
*prerequisites:* as approved by Head of Department

**3363 Modern Language Curriculum and Methodology**

*points value:* 2                      *duration:* full year  
*prerequisites:* a Pass in one subject in a language other than English at Level II

**9063 Introduction to Curriculum Design and Evaluation**

*points value:* 2                      *duration:* full year

**8345 Practical Curriculum Design**

*points value:* 2                      *duration:* full year

*prerequisites:* Introduction to Curriculum Design and Evaluation

**6797 Practical Curriculum Evaluation**

*points value:* 2                      *duration:* full year

*prerequisites:* Introduction to Curriculum Design and Evaluation

**6210 Extended Specialist Curriculum**

*points value:* 2                      *duration:* full year

*prerequisites:* Honours degree

**Education Studies Subjects**

**1852 Adolescence: Learning and Development**

*points value:* 2                      *duration:* full year

*content:* The course considers aspects of student's learning; classroom/behaviour management and human development with particular reference to the adolescent area.

*assessment:* includes practical exercises, case studies, group presentations, written assignments and reports.

**7432 Curriculum in its Context**

*points value:* 2                      *duration:* full year

*contact hours:* 2 hours per week for 13 weeks

*content:* This subject introduces students to curriculum theory, the context of State and National curricula, education and the law, the statutory constraints impacting upon teachers and current developments in education.

*assessment:* students will critique a current issue in education or outline the conceptual bases of their main teaching subject.

**7296 The Teacher as Communicator**

*points value:* 2                      *duration:* full year

*contact hours:* 2 hours per week for 13 weeks

*content:* This subject focuses on the practical demands of communication in schools and includes listening skills, language use, assertiveness and conflict resolution.

*assessment:* will include practical exercises, group discussion, workshop presentation and a written assignment.

**4666 Australian Educational Issues Part 1**

*points value:* 2                      *duration:* full year

*contact hours:* 2 hours per week for 13 weeks

*content:* This subject seeks to analyse some contemporary issues in Australian education from sociological and historical perspectives.

*assessment:* an essay of 1500 words is required in order to satisfy the requirements of the historical and sociological aspects of the course

**3785 Australian Educational Issues Part 2**

*points value:* 2                      *duration:* semester 2

*contact hours:* 2 hours per week

*content:* This subject consists of a number of options of which students take 2. Options offered vary from year to year and will be announced at the beginning of the second semester.

*assessment:* will involve an essay/assignment of approximately 3,000 words

**5221 Educational Projects**

*points value:* 2                      *duration:* semester 2

*contact hours:* approximately 25 hours in all, at times to be arranged

*content:* This subject provides Graduate Diploma in Education students with the opportunity, in the final six weeks of the second Semester, to undertake an educational project under the supervision of staff. Working normally in groups, each student will become involved in a practical activity or experience which is designed to synthesise and consolidate the various strands of the course and be school based where appropriate. The types of projects available will include research projects, case study experiences and projects enabling students to extend and work out the practical implications of a chosen option.

*assessment:* will involve a presentation to the whole group, together with a written review, essay or journal.

# Graduate Diploma in Environmental Studies

## Introductory remarks

This course is designed to provide graduates in any relevant discipline with a theoretical framework for the analysis of environmental problems; an opportunity to acquire knowledge of, and skills in, those environmental subject areas which they consider particularly relevant to their own personal aspirations and/or professional development, and supervised experience in the design and execution of environmental research projects.

Applications for admission to this course shall be made through the South Australian Tertiary Admissions Centre (SATAC) on the appropriate form by the required date. Except by the special permission of the Director of the Mawson Graduate Centre for Environmental Studies, students may not defer their studies.

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar.

As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

As the course has undergone several structural changes in recent years, continuing students who commenced their course before 1995 will have suitable transitional arrangements determined for them at the time of enrolment. Such students will be required to complete the subject 9791 Environmental Politics, Philosophy and Ethics.

Syllabuses of subjects for the Graduate Diploma in Environmental Studies are published immediately after the Specific Course Rules for the degree of Master of Environmental Studies.

## Specific Course Rules

### 1 Admission requirements

- 1.1 An applicant for admission to the course of study for the Graduate Diploma in Environmental Studies shall have qualified for a degree of the University or for a degree of another institution accepted for the purpose by the University.
- 1.2 Subject to the approval of the Council the Faculty may, in special cases and subject to such conditions (if any) as it may see fit to impose in each case, accept as a student for the Graduate Diploma a person who does not hold a degree of a tertiary institution but has given evidence satisfactory to the Faculty of fitness to undertake work for the Graduate Diploma.

### 2 Status, exemption and credit transfer

- 2.1 Except by the special permission of the Director of the Mawson Graduate Centre for Environmental Studies, no student may gain status towards the Graduate Diploma for other studies undertaken in the University or other institutions.

### 3 Approval of course of study at enrolment

- 3.1 Each student's course of study shall be approved by the Faculty at enrolment each year.

### 4 Duration of course

- 4.1 Except with the special permission of the Faculty, the course for the Graduate Diploma shall be completed in one year of full-time study or not more than three years of continuous part-time study.

### 5 Qualification requirements

- 5.1 Students of the Graduate Diploma shall complete the full-year (6 point) subject 9791 Environmental Politics, Philosophy and Ethics, one semester-length (3 point) subject chosen from each of the four groups of subjects: Environmental Science Group; Global Issues and Environmental Management Group; Environmental Policy and Law Group; and Environmental Assessment and Planning together with two semester-length (3 point) subjects chosen from these groups and/or the list of Elective Subjects, in consultation with the Director of the Centre.

### 6 Course of study / Subjects of study

- 6.1 Students for the Graduate Diploma shall complete the full-year subject:

code	subject title	points
9791	Environmental Politics, Philosophy and Ethics	6

- 6.2** Students shall complete one semester-length subject chosen from each of the following four groups of subjects, in consultation with the Director of the Centre.

**Environmental Science Group**

6339 Ecosystem Patterns and Processes	3
7007 Principles of Environmental Earth Science	3
8594 Special Topic in Environmental Science*	3

**Environmental Management Group**

2438 Conservation in Human-Dominated Landscapes	3
3216 Environmental Systems Management	3
6631 Managing Coastal Environments	3
9873 Special Topic in Environmental Management*	3

**Environmental Policy Group**

5140 Environmental Policy	3
5013 International Environmental Diplomacy	3
7888 Special Topic in Environmental Policy*	3
2743 The Global Commons	3
2124 Urban Environments**	3

**Environmental Assessment and Planning Group**

7766 Ecotourism: Opportunities and Impacts	3
9474 Environmental Hazards	3
8865 Environmental Impact Assessment (Env St)	3
2667 Special Topic in Environmental Planning*	3

- 6.3** Students shall complete two semester-length subjects chosen from:

(a) elective subjects chosen from the following:

7620 Business and the Environment	3
3953 Conservation and Heritage Law (Env St)	3
1716 Educating for the Environment *	3
2290 Environmental Economics	3
5614 Environmental Linguistics	3
3099 Environmental Planning and Protection Law (Env St)	3
8831 Environments of Inland Waters	3

5752 Heritage Conservation Theory	3
3990 Land Use Planning Law (Env St)	3
4358 Population and the Environment (Env St)	3
2267 Special Topic in Environmental Studies*	3
3208 Women and Environments	3

and

(b) Subjects listed in clause 6.2 above, not already offered to fulfill the requirements of clause 6.2

and

(c) Subject to the approval of the Director of the Mawson Graduate Centre for Environmental Studies, environmental studies or related subjects at appropriate levels offered by other faculties.

\* Availability to be advised

\*\* Not available in 1996

**7 Review of academic progress**

**7.1** A student who fails a subject and desires to take the subject again shall again attend lectures and satisfactorily do such written and practical work as the teaching staff concerned may prescribe.

**7.2** A student who has twice failed a subject may not enrol for that subject again except by special permission to be obtained in writing from the Faculty and then only under such conditions as may be prescribed.

**7.3** For the purposes of this clause a student who is refused permission to be assessed, by examination or otherwise, or who does not, without a reason accepted by the Director of the Mawson Graduate Centre for Environmental Studies as adequate, attend all or part of a final examination (or supplementary examination if granted) after having enrolled for at least two thirds of the normal period during which the subject is taught, shall be deemed to have failed the subject.

**8 Assessment and examinations**

**8.1** There shall be four classifications of pass in any subject for the Graduate Diploma: Pass with High Distinction, Pass with Distinction, Pass with Credit, and Pass.

**9 Articulation with other awards**

**9.1** Students who receive a credit average or better in this course are eligible to apply for entry to the

degree of Master of Environmental Studies course, and if successful, on gaining entry, receive full status for the work they have undertaken in the Graduate Diploma.

## Syllabuses

syllabus details: see Master of Environmental Studies

- 9.2** Students who have conferred upon them the award of Graduate Diploma in Environmental Studies who subsequently successfully complete the requirements for the degree of Master of Environmental Studies must surrender their first award before being admitted to the Masters degree.
- 9.3** Notwithstanding the above Rules a student who has been enrolled for the degree of Master of Environmental Studies and who has completed the work prescribed herein for the Graduate Diploma and who has not been awarded the Master's degree shall, on written application to the Registrar, be awarded the Graduate Diploma.

# Graduate Diploma in Japanese Studies

note: Postgraduate fees apply to this course.

## Introductory remarks

The course is of value to graduates (particularly those with a background in the Social Sciences) wishing to pursue interests which involve, or careers which necessitate, a knowledge of Japanese Studies. The three components of the course are Japanese language (available from beginner's to advanced levels), a range of Social Sciences subjects related to the history, politics, economics, philosophy and literature of Japan, and an opportunity for students to undertake a research project in a field of Japanese study of particular interest to them which can be supervised by the Centre for Asian Studies or other University Departments.

Applications for admission to this course shall be made through the South Australian Tertiary Admissions Centre (SATAC) on the appropriate form by the required date. Successful applicants to the course may defer their studies through the SATAC system for a period of one year.

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar.

As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

## Specific Course Rules

### 1 Admission requirements

- 1.1 An applicant for admission to the course of study for the Graduate Diploma in Japanese Studies shall have qualified for a degree of the University or for a degree of another institution accepted for the purpose by the University.
- 1.2 Subject to the approval of the Council the Faculty may, in special cases and subject to such conditions (if any) as it may see fit to impose in each case, accept as a student for the Graduate Diploma a person who does not hold a degree of a tertiary institution but has given evidence satisfactory to the Faculty of fitness to undertake work for the Graduate Diploma.

### 2 Status, exemption and credit transfer

- 2.1 Except by the special permission of the Head of the Centre for Asian Studies, no student may gain status for the Japanese Language subject, or for the research subject 2732 Special Topic in Japanese Studies for other studies undertaken in the University or other institutions.
- 2.2 No student may be granted more than twelve points of status toward the Graduate Diploma.
- 2.3 Status will not be granted for elective subjects for Level III Asian Studies subjects undertaken in The University of Adelaide's Bachelor of Arts degree.

### 3 Approval of course of study at enrolment

- 3.1 Each student's course of study shall be approved by the Faculty at enrolment each year.

### 4 Duration of course

- 4.1 To qualify for the Graduate Diploma a student shall satisfactorily complete a course of one year of full-time study or the part-time equivalent.

### 5 Qualification requirements

- 5.1 The course of study for the Graduate Diploma in Japanese Studies shall be made up of a Japanese Language subject, the research subject 2732 Special Topic in Japanese Studies, and elective subjects to the total value of twenty-four points (or if the Language subjects 3232 Japanese IIA and 4273 Japanese IIB are chosen, twenty-six points).

### 6 Course of study / Subjects of study

#### 6.1 Japanese Language subject

- All students shall satisfactorily complete either:
- 5314 Advanced Japanese (Graduate Diploma) 6
- or one of the following:
- |                  |   |
|------------------|---|
| 2909 Japanese IA | 3 |
| 3902 Japanese IB | 3 |

3232 Japanese IIA	4
4273 Japanese IIB	4
6644 Japanese IIIA	6
2814 Japanese IIIB	6

Students will be assigned the language subject appropriate to their level of competence after consultation with the Head of the Centre for Asian Studies.

Part-time students undertaking a Japanese Language subject must be enrolled in at least one other subject in the same calendar year.

## 6.2 Research subject

All students shall satisfactorily complete:

2732 Special Topic in Japanese Studies IV	6
---	---

## 6.3 Electives

Students shall complete elective subjects to the value of six or twelve points, depending on the Language subject they have undertaken (students of Japanese Level III take six points of elective subjects, students of other Japanese Language subjects take twelve points of elective subjects) taken from the following etc:

1802 East Asian Economies	4
6659 Japanese History III: Empire of Disillusion	6
2958 Japanese History III: The Era of Revolution*	6
8455 Japanese Society III	6
9803 Political Economy of Postwar Japan (1) III	6
6510 Political Economy of Postwar Japan (2) III	6
2503 Japanese History III: the Age of the Sword	6
8100 Politics and Foreign Policy in Contemporary Japan III	6

\* not offered in 1996

## 7 Review of academic progress

- 7.1 A student who fails a subject and desires to take the subject again shall again attend lectures and satisfactorily do such written and practical work as the teaching staff concerned may prescribe.
- 7.2 A student who has twice failed a subject may not enrol for that subject again except by special permission to be obtained in writing from the

Faculty and then only under such conditions as may be prescribed.

- 7.3 For the purposes of this clause a student who is refused permission to be assessed, by examination or otherwise, or who does not, without a reason accepted by the Head of the Centre for Asian Studies as adequate, attend all or part of a final examination (or supplementary examination if granted) after having enrolled for at least two thirds of the normal period during which the subject is taught, shall be deemed to have failed the subject.

## 8 Assessment and examinations

- 8.1 There shall be four classifications of pass in any subject for the Graduate Diploma; Pass with High Distinction, Pass with Distinction, Pass with Credit, and Pass.

## Syllabuses

---

### Japanese Language subjects

#### 5314 Advanced Japanese (Graduate Diploma)

*level:* IV *points value:* 6 *duration:* semester 1

*prerequisites:* Credit or higher in Japanese II or equivalent

*contact hours:* 1.5 hours per week

*content* This subject is designed for students who have completed level III Japanese or are fluent native speakers. It aims to advance proficiency in literary Japanese.

#### 2909 Japanese IA

#### 3902 Japanese IB

*syllabus details:* see B.A.

#### 3232 Japanese IIA

#### 4273 Japanese IIB

*syllabus details:* see B.A.

#### 6644 Japanese IIIA

#### 2814 Japanese IIIB

*syllabus details:* see B.A.

### Research Subject

#### 2732 Special Topic in Japanese Studies IV

*level:* IV *points value:* 6 *duration:* semester 1 or 2

*prerequisites:* Credit or higher in Japanese II or equivalent

*contact hours:* 1 hour per week

*content:* This Special Topic in Japanese Studies consists of a research essay of 7,000 words in the candidate's area of interest as approved by the Head of the Centre. Alternatively, an annotated translation or other equivalent piece of work may be submitted with the approval of the Head of the Centre. The subject is conducted by weekly supervision by a supervisor appointed by the Head of the Centre.

*assessment:* The research essay will be marked by two examiners in the Centre.

### elective subjects

#### 1802 East Asian Economies II

#### 6659 Japanese History III: Empire of Disillusion

#### 2503 Japanese History III: the Age of the Sword

#### 8455 Japanese Society III: Development and the Environment

#### 9803 Political Economy of Postwar Japan (1) III

#### 6510 Political Economy of Postwar Japan (2) III

#### 8100 Politics and Foreign Policy in Contemporary Japan III

*syllabus details:* For syllabus details of the above elective subjects, please refer to the Bachelor of Arts.

# Graduate Diploma in Labour Studies

## Introductory remarks

A graduate of this course will show an understanding of the range and depth of practical and theoretical literature in the field; relationships between the workforce and society at large; the nature and extent of the political, social and cultural diversity of the workforce; the formal and informal political and social structures that surround the labour process; and the development, current shape and likely future configuration of social structures relevant to labour issues.

Applicants for admission to this course shall be made through the South Australian Tertiary Admissions Centre (SATAC) on the appropriate form by the required date.

Successful applicants to the course may defer their studies to the following year.

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar.

As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

## Specific Course Rules

### 1 Admission requirements

- 1.1 An applicant for admission to the course of study for the Graduate Diploma in Labour Studies shall have qualified for a degree of the University or for a degree of another institution accepted for the purpose by the University.
- 1.2 Subject to the approval of the Council the Faculty may, in special cases and subject to such conditions (if any) as it may see fit to impose in each case, accept as a student for the Graduate Diploma a person who does not hold a degree of a tertiary institution but has given evidence satisfactory to the Faculty of fitness to undertake work for the Graduate Diploma.

### 2 Status, exemption and credit transfer

- 2.1 Except by the special permission of the Head of the Centre for Labour Studies, no student may gain status towards the Graduate Diploma for other studies undertaken in the University or other institutions.

### 3 Approval of course of study at enrolment

- 3.1 Each student's course of study shall be approved by the Faculty at enrolment each year.

### 4 Duration of course

- 4.1 To qualify for the Graduate Diploma a student shall satisfactorily complete a course of one year of full-time study or the part-time equivalent.

The course may be offered both by internal and external modes or a combination of modes of delivery.

### 5 Qualification requirements

- 5.1 Students shall complete subjects to the value of 24 points chosen from the available 6-point coursework subjects and, if desired, the 12-point Individual Research Project (Grad.Dip.) (see Articulation with other awards, below).

### 6 Course of study

Students shall complete subjects to an aggregate points value of 24 points chosen from the following:

#### 6.1 Coursework subject

9231	Work Studies IVA: The Nature and Organisation of Work*	6
1836	Work Studies IVB: Work and the Law*	6
9927	Union Studies IVA: Comparative Theory	6
8621	Union Studies IVB: Systems and Strategies	6
8886	Political Economy IVA: Theoretical Perspectives	6
5009	Political Economy IVB: The State and Public Policy	6

\*not available in 1996

**6.2 Research subject**

5290 Individual Research Project  
(Grad.Dip.)

12

**7 Review of academic progress**

- 7.1 A student who fails a subject and desires to take the subject again shall again attend lectures and satisfactorily do such written and practical work as the teaching staff concerned may prescribe.
- 7.2 A student who has twice failed a subject may not enrol for that subject again except by special permission to be obtained in writing from the Faculty and then only under such conditions as may be prescribed.
- 7.3 For the purposes of this clause a student who is refused permission to be assessed, by examination or otherwise, or who does not, without a reason accepted by the Head of the Centre for Labour Studies as adequate, attend all or part of a final examination (or supplementary examination if granted) after having enrolled for at least two thirds of the normal period during which the subject is taught, shall be deemed to have failed the subject.

**8 Assessment and examinations**

- 8.1 There shall be four classifications of pass at in any subject for the Graduate Diploma; Pass with High Distinction, Pass with Distinction, Pass with Credit, and Pass.

**9 Articulation with other awards**

- 9.1 Candidates successfully completing the award incorporating the subject Individual Research Project (Grad.Dip.) in their program of studies are eligible to apply for entry to the Master of Arts course in Labour Studies.

## Syllabuses

**8886 Political Economy IVA: Theoretical Perspectives**

level: IV points value: 6 duration: semester 1

restrictions 1310 Political Economy III; 4211 Political Economy III (B.A.); 7975 Political Economy IIIA; 7588 Political Economy IIIA (B.A.)

content: The major organising theories influencing political and economic life in the postwar era:

Social democracy: the nature of the Australian economy in the 40s; European social democracy and its transmission to Australia; changes from Chifley to Whitlam; the Keynesian crisis – the collapse of the Keynesian consensus in the 70s/80s; the attempts by the left to revive its potency by use of the Swedish model. Economic Rationalism: Neo-classical economics; the emergence of monetarism; the international variants – Thatcher, Reagan, NZ; the attack on the role of the state; the privatisation push. Socialism; the origins and nature of socialism; the development of socialism in Europe and Asia; post-war socialism; the impact on world political alignments; the history of Australian socialism; the collapse of Eastern European socialism; what went wrong? The impact on the Australian and other socialist movements.

**5099 Political Economy IVB: The State and Public Policy**

level: IV points value: 6 duration: semester 2

restrictions: 7380 Political Economy; 3294; Political Economy IIIB (B.A.); 1310 Political Economy III; 4211 Political Economy III (B.A.)

content: The role of the state in a capitalist economy; the public sector and the state process; the policy making process in Australia – the major actors and institutions; the involvement of trade unions in Australian public policy making; women and public policies; macroeconomic government strategies; government budgetary policies on taxation; government budgetary expenditures; monetary policy; trade and industry policy; labour market, wages and other work-related policies; the size and role of the public sector.

level: IV points value: 6

availability: not offered in 1996

restrictions: 2407 Work Studies III; 5465 Work Studies III; 3894 Work Studies IIIA; 9278 Work Studies IIIA (B.A.)

content: Ideologies of work: history of work, case study of work and dominant social ideas, industrial societies and work, advanced capitalism and work, an outline of the social-psychology of modern work, good and bad work in modern debates and likely or possible futures; Labour process: the 'labour process' theory of Marx and Braverman, debates on labour process about deskilling/degradation, control and resistance, legitimisation and consent, subjectivity and the labour process, international perspectives (UK, USA, Japan, Australia), the labour process in non-capitalist societies; Work and Technology: technology and the labour process, history of work and technology, mass production to post-Fordism, technology and class formation, technology and the future of work; Politics of the workplace – management and worker initiatives: history of management strategies (traditional, Taylorist, human relations), quality of work life, 'new' management, Japanisation, the 'new right', worker initiatives of control, cooperatives, self-management, worker ownership, political intervention.

**1836 Work Studies IVB: Work and the Law**

level: IV points value: 6

availability: not offered in 1996

restrictions: 3778 Work Studies IIIB; 9278 Work Studies IIIB (B.A.); 2407 Work Studies III; 5465 Work Studies (B.A.)

content: Legal regulation and coercion: the framework of law in society, history of laws regulating work and labour, the contract of employment, Australian labour law, British connections, Australian industrial law, Constitution and jurisdictions, hiring and firing, modern regulatory law of occupational health and safety, compensation, equal employment, new directions in industrial law, democracy and the law.

**9927 Union Studies IVA: Comparative Theory**

level: IV points value: 6 duration: semester 1

restrictions: 8640 Union studies IIIA; 1247 Union Studies IIIA (B.A.); 7612 Union Studies III; 2264 Union Studies III (B.A.)

content: Theories about industrial relations and unions are explored with a focus upon the explanations for current union decline and prospects for unions in the future. The implications of unitarist, pluralist, marxist, feminist and post-modernist theories and critiques are explored. Experience in unionism in the U.S. and England is investigated with a particular focus on union survival, democracy, organising and the situation of women and other under-organised and under-represented groups.

**8621 Union Studies IVB: Systems and Strategies**

*level:* IV    *points value:* 6    *duration:* semester 2

*restrictions:* 7295 Union Studies IIIB; 1749 Union Studies IIIB (B.A.); 7612 Union Studies III; 2264 Union Studies III (B.A.)

*content:* Approaches to the study of trade unions and industrial relations; theoretical frameworks for the explanation of industrial disputation and the repertoire of roles played by employers, managers, workers and their unions; the legal framework for the regulation of industrial relations and for safety and equity in employment, the relationship between the industrial relations strategy of the trade union movement and the economic development strategy of the government.

**5290 Individual Research Project (Grad Dip)**

*level:* IV    *points value:* 12    *duration:* full year

*content:* This subject allows the student to develop an area of specialisation related to a selected area of Labour Studies and to demonstrate research skills in the preparation, development and presentation of an extended research paper. Research at an individual level will be directed by and carried out in consultation with a supervisor. Appropriate areas of study will be decided in consultation between the student and the Labour Studies course staff. Students doing an individual project may be required to attend several seminars to discuss work in progress.

# Graduate Diploma in Logic

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar.

As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

## Specific Course Rules

### 1 Admission requirements

- 1.1 An applicant for admission to the course of study for the Graduate Diploma in Logic shall have qualified for a degree of the University incorporating studies deemed equivalent to the Graduate Certificate in Logic or have qualified for the Graduate Certificate in Logic, or for a degree of another institution accepted for the purpose by the University.
- 1.2 Subject to the approval of the Council the Faculty may, in special cases and subject to such conditions (if any) as it may see fit to impose in each case, accept as a student for the Graduate Diploma a person who does not hold a degree of a tertiary institution but has given evidence satisfactory to the Faculty of fitness to undertake work for the Graduate Diploma.

### 2 Status, exemption and credit transfer

- 2.1 Except by the special permission of the Head of the Department of Philosophy, no student may gain status for the subject:  
3402 Advanced Logic A (PG)  
for other studies undertaken in the University or other institutions.
- 2.2 No student may be granted more than 12 points of status toward the Graduate Diploma.

### 3 Approval of course of study at enrolment

Each student's course of study shall be approved by the Faculty at enrolment each year.

### 4 Duration of the Award

To qualify for the Graduate Diploma a student shall satisfactorily complete a course of one year of full-time study or the part-time equivalent.

### 5 Qualification requirements

Students of the Graduate Diploma shall complete 24 points of subjects including the core subject 3402 Advanced Logic A (PG), 7665 Argument (PG) and 3890 Major Project in Logic, as outlined in Rule 6, see below.

### 6 Course of study / Subjects of study

Students for the Graduate Diploma students shall complete subjects to the value of 24 points as follows:

#### 6.1 Core Subjects

All students shall complete the following subjects:

3402 Advanced Logic A (PG)	6
7665 Argument (PG)	4

(Students who are exempted from studying the subject 3402 Advanced Logic A (PG) due to having previously completed 4259 Logic IIIA or its equivalent will be required to present a further 6 points of elective subjects listed in 6.1.2 in lieu of this requirement.)

#### 6.2 Elective Subjects

All students shall complete elective subjects to an aggregate value of 8 points chosen from the following:

2614 Advanced Logic B (PG)	2
1619 Artificial Intelligence (PG)	2
9669 Graduate Topic in Logic A	2
5048 Graduate Topic in Logic B	2
7889 Graduate Topic in Logic C	2
2043 Graduate Topic in Logic D	2
1998 Intermediate Logic (PG)	4
2254 Knowledge Representation (PG)	2

**Flinders University Subjects:**

COMP 3007 Artificial Intelligence	2
COMP 3009 Computational Logic	2
PHIL 2080 Logic, Reasoning and Argumentation	4

and, subject to the approval of the Department, students may be able to pursue in lieu of 2 elective points further studies towards the requirements of the Project in Logic outlined in 6.1.3, below. Such students will enrol in the following subject:

2637 Supplementary Major Project in Logic	2
3890 Major Project in Logic	

**6.3 Project in Logic**

All students shall enrol in:

3890 Major Project in Logic	6
-----------------------------	---

**7 Academic progress**

7.1 A student who fails a subject and desires to take the subject again shall again attend lectures and satisfactorily do such written and practical work as the teaching staff concerned may prescribe.

7.2 A student who has twice failed a subject may not enrol for that subject again except by special permission to be obtained in writing from the Faculty and then only under such conditions as may be prescribed.

**8 Assessment and examinations**

8.1 There shall be four classifications of pass in any subject for the Graduate Diploma: Pass with High Distinction, Pass with Distinction, Pass with Credit, and Pass.

8.2 For the purposes of this clause a student who is refused permission to be assessed, by examination or otherwise, or who does not, without a reason accepted by the Head of the relevant Department as adequate, attend all or part of a final examination (or supplementary examination if granted) after having enrolled for at least two thirds of the normal period during which the subject is taught, shall be deemed to have failed the subject.

**9 Articulation with other awards**

9.1 Students who receive a credit average or better in this course are eligible to apply for entry to the Master of Logic course, and if successful, on gaining entry, receive full status for the work they have undertaken in the Graduate Diploma.

9.2 Students who have conferred upon them the award of Graduate Certificate in Logic who subsequently successfully complete the requirements of the Graduate Diploma and gain 6 or more points of status for their first award must surrender their Graduate Certificate before being admitted to the Graduate Diploma.

9.3 Notwithstanding the above Rules a student who has been enrolled for the degree of Graduate Diploma in Logic and who has completed the work prescribed for the Graduate Certificate in Logic and who has not been awarded the Graduate Diploma shall, on written application to the Registrar, be awarded the Graduate Certificate.

**Syllabuses**

*syllabus details:* see Master of Logic

# Graduate Diploma in Women's Studies

## Introductory remarks

This course provides graduates with an opportunity to investigate attitudes towards women in society at large and in their personal and professional lives. The course provides the opportunity to study various aspects of the lives of women in our culture, as well as providing students with an analysis of current sociological, political, psychological and cultural theories about the status of women.

Applications for admission to this course shall be made through the South Australian Tertiary Admissions Centre (SATAC) on the appropriate form by the required date. Successful applicants to the course may defer their studies to the following year.

As the course underwent a major structural change in 1994, continuing students who commenced their course before 1995 will have had suitable transitional arrangements determined for them at the time of enrolment. Such students may still be required to complete one of two Transition Subjects.

As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

## Specific Course Rules

### 1 Admission requirements

- 1.1 An applicant for admission to the course of study for the Graduate Diploma in Women's Studies shall have qualified for a degree of the University or for a degree of another institution accepted for the purpose by the University.
- 1.2 Subject to the approval of the Council the Faculty may, in special cases and subject to such conditions (if any) as it may see fit to impose in each case, accept as a student for the Graduate Diploma a person who does not hold a degree of a tertiary institution but has given evidence satisfactory to the Faculty of fitness to undertake work for the Graduate Diploma.

### 2 Status, exemption and credit transfer

- 2.1 Except by the special permission of the Head of the Department of Women's Studies, no student may gain status for the 7428 Research Project (F/T) or 3613 Research Project (P/T) or 2972 Research Project (P/T)(Mid Year Intake) for other studies undertaken in the University or other institutions.
- 2.2 No student may be granted more than twelve points of status toward the Graduate Diploma.

### 3 Approval of course of study at enrolment

- 3.1 Each student's course of study shall be approved by the Faculty at enrolment each year.

### 4 Duration of course

- 4.1 To qualify for the Graduate Diploma a student shall satisfactorily complete a course of one year of full-time study or the part-time equivalent. The course shall be available in both the internal and external mode.

### 5 Qualification requirements

- 5.1 The course of study for the Graduate Diploma in Women's Studies shall be made up subjects with an aggregate points value of 24 points. Unless exempted therefrom by the Faculty, every student shall complete the core pre-requisite 6-point subject 5528 Theories of Feminism and three elective subjects to the value of 18 points.
- 5.2 Students must enrol in 5528 Theories of Feminism in their first semester of study.
- 5.3 Students intending to use the Graduate Diploma to satisfy the entry requirements of and subsequently apply for entry to the Master of Arts (Women's Studies) course will include either of the subjects 7428 Research Project (F/T) or 3613 Research Project (P/T) or 2972 Research Project (P/T)(Mid Year Intake) as one of their electives. Students enrolling in one of the Research Project subjects must have completed the 0-point subject 5620 Research Induction in a previous semester.

**6 Course of study / Subjects of study**

**6.1 All students shall complete the core prerequisite subject:**

code	subject title	points
5528	Theories of Feminism	6

**6.2 All students shall take 18 points of elective subjects taken from:**

**6.2.1 Coursework subjects**

3612	Autobiographical Writings***	6
9410	Australian Feminist History: a Survey*	6
9912	Contemporary Issues in Feminism**	6
7373	Development and Gender Perspectives**	6
5133	Environmental Feminism**	6
4434	Exploring Sexualities	6
2381	First Wave Feminism in Australia***	6
2360	Gender Relations and Social Policy**	6
7266	Personal and Professional Development(PG)*	6
4588	Popular Culture, Women and Representation PG**	6
5756	Power and Difference: Post Colonial Perspectives PG***	6
3326	Twentieth Century Women Writers***	6
3530	Women's Health: Social, Economic and Cultural Issues***	6
9008	Women's Studies Special Topic**	6
3045	Women, Work and Economics	6

\*Available in external mode only

\*\*Available in internal mode only

\*\*\*Not available in 1996

Unmarked subjects are available in both internal and external modes.

**6.2.2 Research subjects**

7428	Research Project (F/T)#	6
<i>together with</i>		
5620	Research Induction#	0
<i>or</i>		
3613	Research Project (P/T)#	6
<i>together with</i>		
5620	Research Induction#	0
<i>or</i>		
2972	Research Project (P/T) (Mid Year Intake)#	6

*together with*

5620 Research Induction# 0

# Students enrol for these subjects externally. After receiving materials, local students meet with their supervisor in person

**6.3 Transition subjects**

Students who commenced the course prior to 1995 may be required by the Faculty to complete one transition subject taken from the following:

8268	Transition Subject 2	2
6958	Transition Subject 4	4

**7 Review of academic progress**

**7.1** A student who fails a subject and desires to take the subject again shall again attend lectures and satisfactorily do such written and practical work as the teaching staff concerned may prescribe. Students who fail either of the Research Project subjects at the first attempt will be counselled to substitute a coursework subject to complete the requirements of the award.

**7.2** A student who has twice failed a subject may not enrol for that subject again except by special permission to be obtained in writing from the Faculty and then only under such conditions as may be prescribed.

**7.3** For the purposes of this clause a student who is refused permission to be assessed, by examination or otherwise, or who does not, without a reason accepted by the Head of the Department of Women's Studies as adequate, attend all or part of a final examination (or supplementary examination if granted) after having enrolled for at least two thirds of the normal period during which the subject is taught, shall be deemed to have failed the subject.

**8 Assessment and examinations**

**8.1** There shall be four classifications of pass in any subject for the Graduate Diploma; Pass with High Distinction, Pass with Distinction, Pass with Credit, and Pass.

**9 Articulation with other awards**

**9.1** Students who complete this award incorporating a Research Project at credit level or higher are eligible to apply for entry to the Master of Arts (Women's Studies) course, and if successful, on gaining entry, receive status for the elective component of the Masters course for the work they have undertaken in the Graduate Diploma.

9.2 Students who have conferred upon them the award of Graduate Diploma in Women's Studies who subsequently successfully complete the requirements of the Master of Arts (Women's Studies) must surrender their first award before being admitted to the degree of Master of Arts (Women's Studies).

9.3 Students enrolled in other awards wishing to take subjects in the Graduate Diploma may, with the permission of the Head of Department of Women's Studies, take those subjects without having completed the prerequisite subject 5528 Theories of Feminism.

## Syllabuses

---

### core subject

#### 5528 Theories of Feminism

*level:* IV *points value:* 6 *duration:* semester 1

*availability:* this subject is available in both internal and external mode

*prerequisites:* Please refer to the Specific Course Rules above.

*restriction:* 1780 History of Feminist Thought, 6359 Feminist Theory, 9904 Feminist Thought III

*contact hours:* 3 hours per week

*content:* This subject introduces students to a range of feminist positions. Topics include: mainstream views of women's social position; Liberal feminism; Marxist feminism; Radical feminism; Socialist feminism; Psychoanalysis and feminism; Post-modernism/post-structuralism and the significance of race within feminism, amongst others.

*assessment:* internal: 1 essay of 4,500 words (60%); seminar paper 2,500 words (30%); participation (10%)  
external: workbook/journal (50%), essay 4,500 words (50%)

### research subjects

Please note that students intending to apply for the degree of Master of Arts (Women's Studies) must have completed 7428 Research Project (Full-time) or 3613 Research Project (Part-time), 2972 Research Project (P/T)(Mid Year Intake) and 5620 Research Induction.

#### 5620 Research Induction

*level:* IV *points value:* 0 *duration:* semester 1

*availability:* this subject is available in both internal and external mode

*contact hours:* 2 hours per fortnight

*content:* This subject will provide practical skills to enable the student to develop a research topic and discuss the proposal with a possible supervisor. It will assist students in developing a research proposal practicing research skills and beginning bibliographic research. It will include library workshops to develop students' familiarity with recent bibliographic services available through CD ROM as well as indices, abstracts and other reference material.

*assessment:* by attendance

#### 7428 Research Project (Full-time)

*level:* IV *points value:* 6 *duration:* semester 1 or 2

*availability:* this subject is available in both internal and external mode

*prerequisites:* 5528 Theories of Feminism; 5620 Research Induction

*restriction:* 6751 Individual Project GD; 3838 Individual Project GD; 5630 Individual Project MA; 2752 Individual Project MA

*contact hours:* to be negotiated with supervisor

*content:* This unit allows the student to develop an area of specialisation related to a selected area of women's studies and to demonstrate research skills in the design, completion and presentation of a report of this research in a form similar to a short honours thesis. Each student will work individually with a supervisor. Appropriate areas of study will be determined by the students background and skills and the availability of an appropriate supervisor.

*assessment:* internal and external: paper of 7,000-8,000 words (two copies)

#### 3613 Research Project (Part-time)

*level:* IV *points value:* 6 *duration:* full year

*availability:* this subject is available in both internal and external mode

*prerequisites:* 5528 Theories of Feminism; 5620 Research Induction

*restriction:* 6751 Individual Project G.D.; 3838 Individual Project G.D.; 5630 Individual Project M.A.; 2752 Individual Project M.A.

*contact hours:* to be negotiated with supervisor

*content:* This unit allows the student to develop an area of specialisation related to a selected area of women's studies and to demonstrate research skills in the design, completion of a report of this research in a form similar to a short honours thesis. Each student will work individually with a supervisor. Appropriate areas of study will be determined by the students background and skills and the availability of an appropriate supervisor.

*assessment:* internal and external: paper of 7000-8000 words (two copies)

**2972 Research Project  
(Part-time)(Mid Year Intake)**

*level:* IV *points value:* 6 *duration:* semester 1 and 2  
*availability:* this subject is available in both internal and external mode

*prerequisites:* 5528 Theories of Feminism; 5620 Research Induction

*restriction:* 6751 Individual Project G.D.; 3838 Individual Project G.D.; 5630 Individual Project M.A.; 2752 Individual Project M.A.

*contact hours:* to be negotiated with supervisor

*content:* This unit allows the student to develop an area of specialisation related to a selected area of women's studies and to demonstrate research skills in the design, completion of a report of this research in a form similar to a short honours thesis. Each student will work individually with a supervisor. Appropriate areas of study will be determined by the students background and skills and the availability of an appropriate supervisor.

*assessment:* internal and external: paper of 7000-8000 words (two copies)

**elective subjects****9410 Australian Feminist History: a Survey**

*level:* IV *points value:* 6 *duration:* semester 2  
*availability:* this subject is available in external mode only

*prerequisites:* 5528 Theories of Feminism or permission of Head of Department

*restriction:* 9959 Gender Divisions in Some Western Societies Since 1700 II, 2345 Gender Divisions in Some Western Societies Since 1700 III, 1489 History IIIB (Women in History)

*content:* A survey of Australian feminist history set in a context of recent debates in feminist history. Topics include Aboriginal women, pre-industrial society, industrial revolution and gender divisions, pioneer women, women's separate sphere, first-wave feminism, sexuality, the birth rate, women's paid and unpaid work, the depression and the world wars.

*assessment:* internal: one 4,000 word essay or oral history project; one 1,500 word seminar paper/research; seminar presentation and participation  
external: workbook and journal (50%); major essay (4,000 words) (50%)

**3612 Autobiographical Writings**

*level:* IV *points value:* 6

*availability:* not offered in 1996

*restriction:* 7116/6566 Autobiography and Creative Writing

*prerequisites:* 5528 Theories of Feminism or permission of Head of Department

*contact hours:* 3 hours per week

*content:* In this subject students will read autobiographies and autobiographical fiction written by women from various cultures and career backgrounds and explore the similarities and differences of life experiences. The subject will explore current narrative theories of self-presentation in relation to the autobiographical text. Students will also engage in creative writing activities.

*assessment:* seminar paper and projects of the equivalent of 8,000 words

**9912 Contemporary Issues in Feminism**

*level:* IV *points value:* 6 *duration:* semester 2

*availability:* this subject is available in internal mode only

*restriction:* 7818/2476 Feminist Questions

*contact hours:* 2 hours per week

*content:* This subject aims to embrace and develop students' understanding of contemporary feminist issues in relation to a number of social and political analyses. The students will be able to relate feminist questions to existing political philosophies.

*assessment:* one 6000 word essay

**7373 Development and Gender Perspectives**

*level:* IV *points value:* 6 *duration:* semester 2

*availability:* this subject is available in internal mode only

*contact hours:* 3 hours per week

*content:* This topic has three components. Firstly, it will examine how Western representations of the 'Third World' in popular culture and scholarly writing have contributed to the construction of the power relations in which the West occupies a position of cultural, economic and/or political dominance. Students will analyse and deconstruct representations of the Third World generally, and Third World women in particular, in images (visual arts, photography, film) and popular writing (travel writing, newspapers, fiction etc.). The second component of this topic involves surveying and analysing the most important theoretical

perspectives on development, both mainstream and feminist, including modernisation, dependency, postmodern and postcolonial perspectives. Thirdly, students will then explore issues of gender representation in statistics and policy documents of major development institutions (eg. World Bank, United Nations, non-governmental organisations), examine the impact of development programs on gender relations and evaluate WID programs. Case studies will be used where appropriate and students will be able to focus their assignments on specific development issues, such as environmental sustainability, international migration, economic restructuring, poverty, political participation, etc.

assessment: short essay (1000 words) 20%; Major essay (2000-3000) 40%; Policy analysis (2000 words) 30%; Seminar participation and presentation 10%.

### 5133 Environmental Feminism

level: IV points value: 6 duration: semester 1

availability: this subject is available in the internal mode only

contact hours: 3 hours of lectures, seminars and tutorials a week

content: This subject explores the interface between environmental studies and women's studies. In particular, the subject is concerned with the development of environmental feminism as a theoretical discourse and a political practice. Introductory sessions examine Western concepts of the society/environment relation from a range of feminist perspectives (liberal, Marxist, socialist, radical and ecofeminist). This introduction is followed by a series of sessions dealing with feminist theory and practice relevant to the analysis of women's environmental perception, behaviour and agency. The theme of these sessions is 'many women, many environments'. In the context of 'many women' they deal with the effects of class, ethnicity, sexuality and ableness on women's environmental relations. In the context of 'many environments', they explore women's environmental relations in situations ranging from Western cities and suburbs to the dwindling pockets of tropical rainforest in the Third World. The concluding sessions of the subject consider feminist critiques of science and technology, particularly as these critiques relate to the scientific production of environmentally damaging technologies, and to the use of scientific modelling and managerial techniques to understand and control the environment.

assessment: to be advised

### 4434 Exploring Sexualities

level: IV points value: 6 duration: semester 2

availability: this subject is available in both internal and external mode

prerequisites: 5528 Theories of Feminism or permission of Head of Department

restriction: 6873/9996 Female Sexuality

contact hours: 3 hours per week

content: In this subject, students will examine the cultural factors which have influenced the construction of sexualities in western society, past and present; explore contemporary theoretical perspectives from semiotics, psychoanalysis, cultural and queer theory, and French theory as they theorise sexuality, subjectivity and the body; and consider how feminine positions are maintained and challenged in culture through the dynamics of female desire.

assessment: (internal and external) research paper of 4,000 words, journal and 2 journal progress reports of 1,500 words, minor paper of 2,000 words

### 2381 First Wave Feminism in Australia (PG)

level: IV points value: 6

availability: not offered in 1996

restriction: 6778/8339/5014 Australian Feminism in Context II/III/IV

contact hours: 2 lectures and 1 tutorial per week

content: Beginning with an examination of the campaigns for female suffrage in Australia in the late nineteenth and early twentieth centuries, this subject will consider the activities and concerns of first-wave feminism, locating them in their specific economic, cultural and political context. Central issues to be discussed are sex and work. Tutorials will discuss literary works written during the period, parliamentary enquiries and debates, as well as secondary texts.

assessment: essays and papers to the equivalent of 7,000 words

### 2360 Gender Relations and Social Policy

level: IV points value: 6 duration: semester 2

availability: this subject is available in internal mode only

prerequisites: 5528 Theories of Feminism or permission of Head of Department

restriction: 8382 Women and Policy III; 1102/1260 Women and Social Policy

contact hours: 3 hours per week

*content:* This subject examines the role of the state and social policies in Australia in order to investigate the ways in which they structure and maintain gender roles. Policies such as those emanating from government and unions, for example, and power relationships between makers, deliverers and recipients of policies will be considered. Topics include law, welfare, housing, economic policy, etc.

*assessment:* internal: seminar paper of 2,000 words (30%); participation (10%); essay/project of 4,000 words (60%); external: journal of 3,500 words (40%); essay/project of 4,000 words (60%)

### **7266 Personal and Professional Development (PG)**

*level:* IV *points value:* 6 *duration:* semester 1  
*availability:* this subject is available in external mode only

*prerequisites:* 5528 Theories of Feminism or permission of Head of Department

*restriction:* 3955 Personal and Professional Development (Grad Dip), 9247 Personal and Professional Development

*contact hours:* 3 hours per week

*content:* This subject is concerned with understanding the position of women in the workplace (paid and unpaid) in particular, the policies and practices which effect women in their various professions. It begins with a self-focus, followed by the development of professional awareness and competencies, management skills and practice in the workplace, and developing alternative models. It also includes a section on research from a feminist perspective.

*assessment:* internal: seminar paper and projects equivalent to 7,000 words; external: seminar paper and projects equivalent to 7,000 words plus contract

### **4588 Popular Culture, Women and Representation PG**

*level:* IV *points value:* 6 *duration:* semester 1  
*availability:* This subject is available only in the internal mode.

*prerequisites:* 5528 Theories of Feminism or permission of Head of Department

*restriction:* 4700/9670 Women and the Media II/III or 6193/6182 Women and Popular Culture.

*contact hours:* 3 hours per week

*content:* Students will examine a variety of approaches to popular culture and analyse the constructions of masculinity and femininity the popular media. The focus will be on visual media, particularly on soaps and

sit coms, film and film theory, although it may also include an analysis of newspapers, advertisements, women's magazines, romance fiction and the like. The subject will consider contemporary debates concerning women's role in the production and consumption of popular culture, the significance of spectator positions, and the dynamic of pleasure and desire in the maintenance of gender representations in the media.

*assessment:* short applied analysis of 1,500 word (20%), a project/research paper of 4,000 words (60%); seminar presentation paper of 1,000 (20%)

### **5756 Power and Difference: Postcolonial Perspectives PG**

*level:* IV

*points value:* 6

*availability:* not offered in 1996

*restrictions:* 3708/9279 Power and Difference

*prerequisites:* 5528 Theories of Feminism or permission of Head of Department

*contact hours:* 3 hours per week

*content:* Students will consider feminist, postmodern and postcolonial perspectives on constructions of race, class and gender differences with specific (but not exclusive) reference to Australian culture (19th and 20th century). With reference to the work of postcolonial, French feminist, psychoanalytic, Foucauldian and deconstructive critics students will examine the role of high and mass cultural materials (novels and art forms, histories, journalism, traveller's tales, the tabloid press, film, cartoons, photography, newspapers and the like) in constructing networks of knowledge and power through representations of difference/marginality. The subject will examine the possibilities for maintaining and resisting dominant power relations in the operations of language, social institutions and everyday life experiences. It will also consider reading and viewing practices to understand how readers are positioned by texts and how to read 'otherwise'.

*assessment:* short applied analysis of 1,500 words (20%); seminar presentation/paper of 1,000 words (20%); project research paper of 4,000 words (60%)

### **3326 Twentieth Century Women Writers**

*level:* IV

*points value:* 6

*availability:* not offered in 1996

*prerequisites:* 5528 Theories of Feminism or permission of Head of Department

*restriction:* 1549/5687 Women's Writing the Nineteenth Century II/III; 6312/4617 Women Writers and the Literary Tradition

*contact hours:* 3 hours per week

*content:* In this subject, students will study representative female novelists, poets and prose writers of the nineteenth and twentieth centuries in terms of historical and social backgrounds, the texts themselves and their critical reputations. Students will also examine feminist critical theories of writing and difference, modernist and post-modernist understanding of identity, subjectivity, the author and author function in criticism, and French feminist perspectives on *écriture féminine*.

*assessment:* 1 research paper of 4,000 words each; 3 critical applications of 1,000 words each

### **3045 Women, Work and Economics**

*level:* IV *points value:* 6 *duration:* semester 1

*availability:* this subject is available in both internal and external mode

*prerequisites:* 5528 Theories of Feminism or permission of Head of Department

*restriction:* 3465 Women and Labour (Grad. Dip.); 6750 Women and Labour, 1846/7692 Women and Work

*contact hours:* 3 hours per week

*content:* This subject examines competing definitions of work in relation to women in the light of theoretical approaches ranging from neo-classical to post-modern. Special attention will be given to contemporary debates, eg on the public/private split, on difference and on sexuality at work, and to 'race'/ethnicity which cuts across class and gender structures. Students are able to investigate the effects of government policies on the sexual divisions of labour. This can include policies in the Australian context regarding equal employment opportunity, equal pay, taxation, child care, award restructuring and enterprise bargaining, which may be compared and contrasted with experiences in other countries. Women's work will be placed within the wider context of economic and social change in Australia, and of global economic restructuring.

*assessment:* internal: tutorial presentation and participation; seminar paper of 2,000 words, research essay/project of 4,000 words; external: journal exercises; essay/project of 4,000 words

### **3530 Women's Health: Social, Economic and Cultural Issues**

*level:* IV *points value:* 6

*availability:* not offered in 1996

*prerequisites:* 5528 Theories of Feminism or permission of Head of Department

*restriction:* 8402 Women's Health and Lifestyle; 3150/9926 Women's Health and Leisure

*contact hours:* 3 hours per week

*content:* This course will develop issues of women's health and will focus on a holistic approach to health and well-being and examine the 'medicalisation' of women's health, women's leisure, policies and economic implications. It will also address strategies for change both at the individual level and the wider population. Cultural differences will be examined. There will also be an emphasis on the importance of maintaining regular physical activity as an ongoing component of women's health throughout their lives.

*assessment:* seminar paper and projects plus contract weekly entries (6-8,000 words)

### **9008 Women's Studies: Special Topic**

*level:* IV *points value:* 6 *duration:* semester 1 or 2

*availability:* this subject is available in internal mode only

*prerequisites:* 5528 Theories of Feminism or permission of Head of Department

*contact hours:* to be negotiated

*content:* The content of this topic will be decided by the availability of specialist scholars, visiting research fellows etc., the department will set up the special seminar accordingly, depending on the expertise and specialisation in the area of women's studies.

*assessment:* short applied analysis of 1,500 words (20%); seminar presentation paper of 1,000 words (20%); project research paper of 4,000 words (60%)

### **8268 Transition Subject 2**

*level:* IV *points value:* 2 *duration:* semester 1 or 2

*prerequisites:* 5528 Theories of Feminism or permission of Head of Department

*contact hours:* 1 hour per week or equivalent

*content:* This subject is designed for students transferring from the past to the present Graduate Diploma and Master of Arts (coursework) awards. It requires the student to complete the equivalent research and study of one third of a full subject. Content and assessment to be negotiated directly with lecturer concerned in consultation with the Postgraduate Coordinator.

*assessment:* essay of 2,000 words or equivalent

**6958 Transition Subject 4**

*level:* IV *points value:* 4 *duration:* semester 1 or 2

*prerequisites:* 5528 Theories of Feminism or permission of Head of Department

*contact hours:* 2 hours per week or equivalent

*content:* This subject is designed for students transferring from the past to the present Graduate Diploma and Master of Arts (coursework) awards. It requires the student to complete the equivalent research and study of two thirds of a full subject. Content and assessment to be negotiated directly with lecturer concerned in consultation with the Postgraduate Coordinator.

*assessment:* essay of 4,000 words or equivalent

## Bachelor of Educational Studies

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar.

As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

### Specific Course Rules

#### 1 Admission requirements

- 1.1 An applicant for admission to the course for the degree shall have qualified for a degree of the University or for a degree of another institution accepted for the purpose by the University and have qualified for the Graduate Diploma in Education of the University or for a qualification accepted by the University as equivalent.
- 1.2 Subject to the approval of the Council the Faculty may, in special cases and subject to such conditions (if any) as it may see fit to impose in each case, accept as a student for the degree a person who does not hold the qualifications outlined in clause 1.1, above, but has given evidence satisfactory to the Faculty of fitness to undertake work for the degree.

#### 2 Status, exemption and credit transfer

- 2.1 With special permission of the Faculty, candidates may be permitted to take subjects at another institution for credit to this degree.
- 2.2 Candidates may also be granted credit toward the degree on account of work already completed at The University of Adelaide or at another institution. Credit towards the B.Ed.St. may be granted:
  - (a) to a maximum of twelve points for Graduate Diplomas, or
  - (b) to a maximum of eight points for Graduate Certificates without surrendering the award, or

- (c) to a maximum of twelve points for Graduate Certificates upon surrender of the award.
- (d) The minimum number of points which must be taken at Adelaide in order to satisfy the requirements of the degree is twelve.

#### 3 Approval of course of study at enrolment

- 3.1 Each student's course of study shall be approved by the Faculty at enrolment each year.

#### 4 Duration of course

- 4.1 To qualify for the degree, a candidate shall satisfactorily complete a course of full-time study extending over at least one year, or of part-time study extending over at least two years.

#### 5 Qualification requirements

- 5.1 To qualify for the degree of Bachelor of Educational Studies, a candidate shall present subjects to a value of 24 points in one of the four available fields listed in clauses 6.1, 6.2, 6.3 and 6.4, below.
- 5.2 Within the appropriate field, students shall present Education subjects to a value of at least eight points and not more than sixteen points.
- 5.3 As far as possible the course of study for each individual student will be structured on an individual basis. A student may, with the approval of the Head of the Department of Education, present an alternative course of study to that outlined in 5.1 and 5.2. above.

## 6 Course of study / Subjects of study

### 6.1 Bachelor of Educational Studies in the field of Australian Studies:

#### 6.1.1 Education subjects

code	subject title	points
8989	Higher Education in Australia	4
1898	Multicultural Society and Educational Policy	4
7611	Secondary Education in Australia	4
9217	Teaching the Australian Studies Curriculum	4
5803	Youth Arts in Australia: a Context for Arts in Education	4

#### 6.1.2 Specialist subjects

Any approved subject, or component of a subject in the area of Australian Studies offered by the Departments of Anthropology, English, Geography, History and Politics, and not previously passed by the student.

### 6.2 Bachelor of Educational Studies in the field of Languages

#### 6.2.1 Education subjects

8832	Education in Multilingual Settings	4
1898	Multicultural Society and Educational Policy	4
5456	Theories of Psychology in Education	4

#### 6.2.2 Specialist subjects

Any approved subject, or component of a subject offered by the Centre of Asian Studies, the Department of French Studies or the Department of German Studies.

### 6.3 Bachelor of Educational Studies in the field of Mathematics

#### 6.3.1 Education Subjects

8713	Introduction to Statistics in Educational Research	4
2051	Mathematics Education	4

#### 6.3.2 Specialist subjects

- (a) Any other appropriate M.Ed. coursework subject approved by the Head of Department.
- (b) Any approved subject or component of a subject offered by the Faculty of Mathematical and Computer Sciences, not previously passed by the student.

### 6.4 Bachelor of Educational Studies in the field of Science and Environmental Studies

#### 6.4.1 Education subjects

1595	Making Sense of the Scientific World	4
2502	Scientific Revolutions and Education	4
8671	The Nature of Science and Science Curricula	4
5456	Theories of Psychology in Education	4

#### 6.4.2 Specialist subjects

- (a) Any approved subject or component of a subject offered by the Faculty of Science, not previously passed by the student.
- (b) Any approved subjects offered by the Mawson Graduate Centre for Environmental Studies.

## 7 Review of academic progress

7.1 A student who fails a subject and desires to take the subject again shall again attend lectures and satisfactorily do such written and practical work as the teaching staff concerned may prescribe.

7.2 A student who has twice failed a subject may not enrol for that subject again except by special permission to be obtained in writing from the Faculty and then only under such conditions as may be prescribed.

7.3 For the purposes of this clause a student who is refused permission to be assessed, by examination or otherwise, or who does not, without a reason accepted by the Head of Education as adequate, attend all or part of a final examination (or supplementary examination if granted) after having enrolled for at least two thirds of the normal period during which the subject is taught, shall be deemed to have failed the subject.

## 8 Assessment and examinations

8.1 There shall be four classifications of pass in any subject for the degree: Pass with High Distinction, Pass with Distinction, Pass with Credit, and Pass.

## 9 Articulation with other awards

9.1 Students who successfully complete the Bachelor of Educational Studies are eligible to apply for entry to the Master of Educational Studies course and, if successful in gaining entry, receive status towards the degree of Master of Educational Studies.

9.2 A student who holds the degree Bachelor of Educational Studies of The University of Adelaide who gains eight or more points of status for their qualification in the Master of Educational Studies shall surrender that degree before being admitted to the degree of Master of Educational Studies.

## Syllabuses

*Syllabus details:* for syllabus descriptions of B.Ed. Studies subjects please refer to M.Ed Studies listing.

*(Note: This table contains mirrored text from the reverse side of the page and is therefore illegible.)*

# Master of Arts

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar.

As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

## Specific Course Rules

### 1 Admission requirements

**1.1** The Faculty of Arts may accept as a candidate for the degree of Master of Arts any person who:

- (a) is recommended by a Department or Departments within the Faculty able and willing to provide supervision and facilities for the candidate's work towards the degree; and
- (b) has obtained an Honours degree, or other qualification accepted by the University as equivalent to an Honours degree, in a subject or subjects to which the candidate's proposed field of study relates.

**1.2** Subject to the approval of the Board of Graduate Studies acting with authority wittingly devolved to it by Council, the Faculty may, in special cases and subject to such conditions (if any) as it may see fit to impose in each case, accept as a candidate for the degree a person who does not hold the qualification specified in clause 1.1 above, but who has given evidence satisfactory to the Faculty of their fitness to undertake work for the degree.

**1.3** Before deciding such a person's fitness the Faculty may, if it so desires, require them to complete prescribed preliminary work and thereafter, or alternatively to complete a prescribed course of study and pass a qualifying examination of honours standard.

**1.4** The form and assessment of any preliminary work and/or of any course of study shall be proposed by the department or departments concerned and approved by the Faculty. In any qualifying examination at least two examiners, approved by the Faculty for the purpose, must contribute to the assessment of the candidate's performance.

### 2 Duration of course

**2.1** Unless the Faculty expressly approves an extension of time in a particular case, the work for the degree shall be completed and the thesis or dissertation submitted:

- (a) in the case of a full-time candidate, not less than one year nor more than three years from the date at which candidature was accepted by the Faculty; or
- (b) in the case of a part-time candidate, not less than one year nor more than five years from the date at which candidature was accepted by the Faculty.

### 3 Qualification requirements

**3.1** Every candidate shall either:

- (a) present a thesis; or
- (b) pursue a course of advanced study, which may include practical exercises and present a thesis or dissertation.

**3.2** The subject of any thesis or dissertation shall be approved by the Department or Departments concerned and by the Faculty.

### 4 Assessment and examinations

**4.1** The content and method of assessment of any course of advanced study, shall be approved by the department or departments concerned and by the Faculty. Assessment shall in every case be by not less than two examiners of whom at least one shall be external to the University. The names of the examiners and the relative weighting of any course work and the thesis or dissertation in the overall assessment shall be proposed by the department or departments concerned and approved by the Faculty.

**4.2** On completion of work for the degree the candidate shall:

- (a) inform the Head or Heads of the Department or Departments in which the candidate's work has been done, and the candidate's supervisor or supervisors of their intention to submit their thesis or dissertation. The Head or Heads shall forthwith propose the names of examiners for approval by the Faculty;
  - (b) lodge with the Registrar three copies of the thesis or dissertation prepared in accordance with directions given to candidates from time to time.
- 4.3 The examiners of the thesis or dissertation may recommend that it either
- (a) be accepted, with or without conditions; or
  - (b) be accepted, with or without conditions subject to satisfactory performance in an examination, either written or oral or both, in the field of study immediately relevant to the subject of the thesis or dissertation; or
  - (c) be not accepted, but that the candidate be allowed to re-submit it after revision; or
  - (d) be rejected.
- 4.4 The examiners of a thesis or dissertation re-submitted following recommendation 5.3(c) above may recommend only 5.3(a), (b) or (d).

### Notes by Departments

The attention of candidates is directed to 'Notes and Instructions to candidates for higher degrees' which gives general advice to candidates and sets out the specifications for theses. (*see* Table of Contents)

### Anthropology

- 1 Master of Arts Qualifying  
This course will be open to students with no previous training in Anthropology or closely related disciplines and to students holding a degree not considered by the Discipline to be equivalent to Bachelor of Arts Honours. Students will do the Bachelor of Arts Honours course work and must produce a 15,000-word qualifying essay.
- 2 Master of Arts Program  
Potential candidates for the degree of Master of Arts in Anthropology are advised to consult the Head of the Discipline. Candidates should have a good Honours degree or equivalent in Anthropology or a closely related social science

discipline. They must present a thesis, on a subject approved by the Faculty of Arts, of approximately 30,000 to 40,000 words.

### Asian Studies

#### 1 Master of Arts Qualifying

The program is intended to supplement the present honours programs in Chinese and Japanese studies. It is aimed at, for example, overseas students whose first language is Chinese or Japanese or students who can demonstrate considerable fluency in Chinese or Japanese but lack training in relevant social science disciplines or history.

A student in the Master's Qualifying program will essentially do the work of an honours student. This will entail successful completion of:

- the methodology component and
- directed readings, leading to the submission of the honours thesis.

The only difference with the honours course concerns the advanced textual readings component of the core reading course. Given a Master's Qualifying student's established fluency in Chinese or Japanese, in lieu of the advanced readings, the student will be expected to complete two one-semester lecture subjects concerning the relevant area or country of specialisation at third-year level, with marks of credit or above.

This substitution is designed to enhance a student's command of method and analytical skills and to ensure that the student possesses writing skills adequate to postgraduate work.

#### 2 Master of Arts Program

Potential candidates for the degree of Master of Arts in the Centre for Asian Studies are advised to consult the Head of the Centre. Candidates should have a good Honours degree or equivalent in Asian Studies or a closely related social science discipline and must be qualified to conduct research using original language sources. They must present a thesis, on a subject approved by the Faculty of Arts, of approximately 30,000 to 40,000 words.

### Classics

Candidates for the degree of Master of Arts in Classics must present a thesis on a subject, and in a form, approved by the Faculty of Arts. The length of the thesis should be about 40,000 words.

The Department may also require candidates to present themselves for examination in a portion of work chosen with reference to the subject area of the thesis. Such an examination must be passed to the satisfaction of the Head of the Department, but will not form part of the assessment for the award of the degree. If the degree is in Classical Studies additional language work may be included in the examinable work specified above.

The qualifications required of applicants to be admitted as candidates for the degree are set out in the regulations of the degree of Master of Arts. In general, a candidate should have obtained a good Honours degree in Greek and/or Latin or Classical Studies.

The degree is intended to be obtained normally by one year of full-time or two years of part-time study. Work towards the degree is pursued under a supervisor or supervisors appointed by the Faculty, and consists largely of preparatory reading, until the candidate is ready to begin writing the thesis. The thesis itself, though of an advanced standard, is not intended necessarily to contain material that is a new contribution to knowledge.

Potential candidates should consult the Head of the Department of Classics in the first instance.

### **English Language and Literature**

Candidates for the degree of Master of Arts in English Language and Literature are advised to consult the Head of the Department. It is advisable that the length of the Master of Arts thesis should not exceed 50,000 words.

### **French Language and Literature**

Candidates for the degree of Master of Arts in French Language and Literature are advised to consult the Head of the Department at the earliest opportunity.

Candidates who seek to qualify under Specific Course Rule 1.2 are normally required to have already passed at a good standard in French I, II and III, or their equivalents, and, then, to take the fourth-year Honours course in French Language and Literature. At the end of one year, if full-time, or at the end of two years, if part-time, they will be required to pass, at a satisfactory standard, the following examinations: the thesis and the three papers required for Honours in French Language and Literature.

### **Geography**

Candidates for the degree of Master of Arts in Geography are advised to obtain the Departmental Postgraduate Handbook and to consult the Head of the Department. Candidates should have at least a Class IIA Honours degree or equivalent in Geography, or, with the permission of the Head, in an associated

discipline. Persons whose qualifications are in a discipline other than Geography may be required to complete prescribed supplementary work in Geography to the satisfaction of the Head.

### **German Language and Literature**

Candidates for the degree of Master of Arts in German Language and Literature are advised to consult the Head of the Department.

### **History**

Candidates for the degree of Master of Arts in History are advised to consult the Head of the Department.

### **Labour Studies**

Candidates for the degree of Master of Arts in Labour Studies are advised to consult the Postgraduate Coordinator at the earliest opportunity.

### **Linguistics**

Candidates in the Master of Arts in Linguistics are advised to consult the Professor of Linguistics at the earliest opportunity.

### **Music**

Candidates will be expected to undertake a composite master's degree course comprising:

#### **Musicology:**

- (a) the presentation of a thesis or a scholastic and performing edition of a major musical work or collection of musical works involving palaeographic skills, a substantial editorial introduction and commentaries;
- (b) four seminars listed under the Master of Music Degree (Musicology).

The degree of Master of Arts in Music is also available in Ethnomusicology, and Music in Education.

### **Philosophy**

Candidates for the degree of Master of Arts in Philosophy are advised to consult the Head of the Department within the first month of the academic year where possible about the subject and the course of reading for their thesis.

### **Politics**

Candidates for the degree of Master of Arts in Politics are advised to consult the Postgraduate Coordinator at the earliest opportunity.

## **Psychology**

Candidates for the degree of Master of Arts in Psychology are advised to consult the Head of the Department.

The qualifications required of applicants to be admitted as candidates for the degree are set out in the regulations of the degree of Master of Arts. In general, a candidate should have obtained a good Honours degree in Psychology or the Diploma in Applied Psychology of the University. In considering the equivalence of other qualifications, the Department will seek specific evidence of research competence as well as coursework, of an appropriate extent and quality. Where this does not obtain, some preliminary work may be prescribed.

Candidates who are required to pass a qualifying examination of Honours standard under Specific Course Rule 1.3 are required to pass, at an acceptable standard, the required number of papers set at the Honours examination and to complete an independent research investigation.

Candidates enrolled for the degree of Master of Arts in Psychology will normally write a thesis reporting an independent research investigation on a topic approved by the Faculty, which will be examined by two external examiners appointed by the Faculty. Candidates may, however, propose subjects of study which include examinable exercises in association with a research thesis, as permitted by the procedures specified in Specific Course Rule 3.1(b). Such non-thesis components as are proposed to the Faculty will normally constitute 30% of the work for the degree.

After one year of satisfactory progress, candidates may apply to transfer to the degree of Doctor of Philosophy.

## **Women's Studies**

Candidates for the degree of Master of Arts (Women's Studies) are advised to contact the Head of Department. Candidates intending to enrol for the degree of Master of Arts in another Department of Faculty of Arts may, with the agreement of that Department, be jointly supervised by a member of staff from the Department of Women's Studies and by a member of staff in another Department. Prerequisites are those of the Department in which the candidate is enrolling, but candidates should usually have undertaken some Women's Studies coursework as part of their Honours work. It is possible to combine Honours work in a Department in the Faculty of Arts with work in the Department of Women's Studies.

note For the purpose of the degree of Master of Arts regulations the Discipline of Anthropology and the Centre for Asian Studies and the Department of Women's Studies are deemed to be departments.

## Master of Arts (Applied Historical Studies)

Applications for admission to this course shall be made through the South Australian Tertiary Admissions Centre (SATAC) on the appropriate form by the required date. Successful applicants to the course may not defer their studies to the following year.

This award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar. As all students must comply with the General Course Rules as well as the Specific Course Rules below, they are advised to refer to them to understand their rights and responsibilities regarding course matters.

### Specific Course Rules

#### 1 Admission requirements

1.1 An applicant for admission to the course of study for the Master of Arts (Applied Historical Studies) degree must have qualified for an Honours degree from a University at First Class or IIA standard in History or other appropriate field of study, or the Graduate Diploma in Applied Historical Studies at an academic standard acceptable to the Department, or other qualification accepted for the purpose by the University.

1.2 Subject to the approval of the Council the Faculty may, in special cases and subject to such conditions (if any) as it may see fit to impose in each case, accept as a student for the degree a person who does not hold a degree of a tertiary institution but has given evidence satisfactory to the Faculty of fitness to undertake work for the Masters degree.

#### 2 Status, exemption and credit transfer

2.1 Except by the special permission of the Head of the Department of History, no student may gain status towards the Thesis component of the course for other studies undertaken in the University or other institutions.

2.2 Students of the Masters degree who have successfully completed the Graduate Diploma in Applied Historical Studies will be awarded status for any subjects completed in the Graduate Diploma which form part of the requirements of Rule 6.1, below. Students who are granted status to the value of 18 or more points for their Graduate Diploma studies under this provision will be required to surrender their Graduate Diploma before being admitted to the Masters degree (see 9.2, below).

#### 3 Approval of course of study at enrolment

Each student's course of study shall be approved by the Faculty at enrolment each year.

#### 4 Duration of the Award

To qualify for the degree a student shall satisfactorily complete a course of one-and-a-half years of full-time study or the part-time equivalent.

#### 5 Qualification requirements

The course of study for the degree of Master of Arts (Applied Historical Studies) shall be made up of two parts with an aggregate points value of 36 points, consisting of coursework subjects to the value of 24 points and a 12 point Thesis.

#### 6 Course of study / Subjects of study

All students shall satisfactorily complete the following two parts:

##### 6.1 Coursework Subjects

All students shall satisfactorily complete the following:

6132 Heritage and History I	6
5935 Heritage and History II	6
2850 Practical History Workshop I	6
1303 Practical History Workshop II	6

##### 6.2 Thesis/Special Research Project

All students shall complete one 12-point thesis (up to 30,000 words) taken from the following: **Semester-long thesis:**

5505 Thesis (Applied Historical Studies) FT	12
---	----

or

**Full-year thesis:**

7368 Thesis (Applied Historical Studies ) PT 12

**7 Academic progress**

- 7.1 A student who fails a subject and desires to take the subject again shall again attend lectures and satisfactorily do such written and practical work as the teaching staff concerned may prescribe.
- 7.2 A student who has twice failed a subject may not enrol for that subject again except by special permission to be obtained in writing from the Faculty and then only under such conditions as may be prescribed.

**8 Assessment and examinations**

- 8.1 There shall be four classifications of pass in any subject for the Masters degree: Pass with High Distinction, Pass with Distinction, Pass with Credit, and Pass.
- 8.2 For the purposes of this clause a student who is refused permission to be assessed, by examination or otherwise, or who does not, without a reason accepted by the Head of the Department of History as adequate, attend all or part of a final examination (or supplementary examination if granted) after having enrolled for at least two thirds of the normal period during which the subject is taught, shall be deemed to have failed the subject.
- 8.3 On completion of the thesis the student shall lodge with the Registrar three copies of the thesis prepared in accordance with directions given to students from time to time.
- 8.4 The Faculty shall appoint two examiners for the thesis, one of whom, shall be associated with the teaching of the course and one of whom shall be external both to the teaching of the course and to the Department.

**9 Articulation with other awards**

- 9.1 Students who complete the Graduate Diploma in Applied Historical Studies incorporating a Research Project at credit level or higher are eligible to apply for the Master of Arts (Applied Historical Studies) course, and if successful, on gaining entry, receive status for appropriate elective components for the work they have passed in the Graduate Diploma.

9.2 Students who have conferred upon them the award of Graduate Diploma in Applied Historical Studies who subsequently successfully complete the requirements of the Master of Arts (Applied Historical Studies) and who have been granted 18 or more points of status on behalf of their Graduate Diploma must surrender their first award before being admitted to the degree of Master of Arts (Applied Historical Studies).

9.3 Notwithstanding the above Rules a student who has been enrolled for the degree of Master of Arts (Applied Historical Studies )and who has completed the work prescribed for the Graduate Diploma in Applied Historical Studies and who has not been awarded the Masters degree shall, on written application to the Registrar, be awarded the Graduate Diploma.

## Syllabuses

### 3621 Applied Historical Studies Elective IV

level: 4      points: 12      duration: full year

restrictions: Subject by same name at Level II or III

contact hours: 2 hours of lectures and 1 hour tutorial a week

content: To be selected with the approval of the Subject Coordinator from any of the full year subjects listed as current in History, Anthropology, Architecture, Geography, Politics or other approved by the Subject Coordinator

assessment: as for selected subject with additional requirements as stipulated by the Subject Coordinator

### 7102 Applied Historical Studies Elective IV A

level: 4      points: 6      duration: semester 1 or 2

restrictions: Subject by same name at Level II or III

contact hours: 2 hours of lectures and 1 hour tutorial a week

content: To be selected with the approval of the Subject Coordinator from any of the semester length subjects listed as current in History, Anthropology, Architecture, Geography, Politics or other approved by the Subject Coordinator

assessment: as for selected subject with additional requirements as stipulated by the Subject Coordinator

### 8714 Applied Historical Studies Elective IV B

level: 4      points: 6      duration: semester 1 or 2

restrictions: Subject by same name at Level II or III

contact hours: 2 hours of lectures and 1 hour tutorial a week

content: To be selected with the approval of the Subject Coordinator from any of the semester length subjects listed as current in History, Anthropology, Architecture, Geography, Politics or other approved by the Subject Coordinator

assessment: as for selected subject with additional requirements as stipulated by the Subject Coordinator

### 6132 Heritage and History I

level: P      points: 6      duration: semester 1

contact hours: 4 hours, including workshops, a week

content: Heritage and History I will be a seminar subject which provides an overview of the rise, current situation, problems and opportunities of public history and the heritage industry. Topics to be covered include

social uses of the past, relations between 'academic' and 'professional' history, heritage and public policy, the historian as expert, history and conservation, historical buildings, sites and precincts, popular history, historical museums, history and/in the media, history and cultural identity, varieties of historical writing. There will be a program of assigned readings for each week, together with lectures and guest speakers

assessment: essays and workshop participation

### 5935 Heritage and History II

level: P      points: 6      duration: semester 2

prerequisites: 6132 Heritage and History I

contact hours: 4 hours, including workshops, a week

content: Heritage and History I will be a seminar subject which provides an overview of the rise, current situation, problems and opportunities of public history and the heritage industry. Topics to be covered include social uses of the past, relations between 'academic' and 'professional' history, heritage and public policy, the historian as expert, history and conservation, historical buildings, sites and precincts, popular history, historical museums, history and/in the media, history and cultural identity, varieties of historical writing. There will be a program of assigned readings for each week, together with lectures and guest speakers

assessment: essays and workshop participation

### 2850 Practical History Workshop I

level: P      points: 6      duration: semester 1

contact hours: 4 hours, including workshops, a week

content: Practical History Workshop I will provide an introduction to methods and techniques of research and presentation for the applied historian. The first (seven week) unit 'Research Methodology' to be taken by all candidates will include sessions on bibliography, interview techniques, archives and manuscripts, computers and the historian, historical writing and editing. The remaining three more specialised units will vary according to the availability of expertise and student demand, but could include some or all of the following: Built Environment and the Historian, Local History, Regional History, Business History, Family History, Aboriginal History, History and Tourism, Archives and Records Management, Museums and curatorial Skills.

assessment: essays and workshop participation

**1303 Practical History Workshop II**

*level:* P *points value:* 6 *duration:* semester 2

*prerequisites:* Practical History Workshop I

*contact hours:* 4 hours, including workshops, a week

*content:* Practical History Workshop II will provide an introduction to methods and techniques of research and presentation for the applied historian. Units will vary according to the availability of expertise and student demand, but could include some or all of the following: Built Environment and the Historian, Local History, Regional History, Business History, Family History, Aboriginal History, History and Tourism, Archives and Records Management, Museums and curatorial Skills.

*assessment:* essays and workshop participation

**2515 Special Research Project Full-Time**

*level:* V *points value:* 12 *duration:* semester 1 or 2

*prerequisites:* Students would normally be expected to complete the coursework component of the course before commencing the Special Research Project

*contact hours:* 2 hours of individual consultation

*content:* Special Research Project for private or public client developed in consultation with, and approved by, the subject convenor

*assessment:* either a thesis/report or up to 30,000 words or equivalent of comparable substance

**5854 Special Research Project Part-Time**

*level:* V *points value:* 12 *duration:* full year

*prerequisites:* Students would normally be expected to complete the coursework component of the course before commencing the Special Research Project

*contact hours:* 2 hours of individual consultation

*content:* Special Research Project for private or public client developed in consultation with, and approved by, the subject convenor

*assessment:* either a thesis/report or up to 30,000 words or equivalent of comparable substance

# Master of Arts (Geographic Information Systems and Remote Sensing)

note: Postgraduate tuition fees apply to this course.

This course is designed for graduates who wish to develop knowledge in the area of collection and analysis of geographic information, which involves one of the most rapidly evolving applications of computer technology today. Techniques learned can be applied to such fields as natural resource management, environmental monitoring and impact assessment, geology, biology, urban and regional planning, landscape architecture, public health and safety, transportation and mobility.

Applications for admission to this course shall be made in writing to the Head of the Department of Geography. Successful applicants to the course may defer their studies to the following year.

This award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar. As all students must comply with the General Course Rules as well as the Specific Course Rules below, they are advised to refer to them to understand their rights and responsibilities regarding course matters.

## Specific Course Rules

### 1 Admission requirements

- 1.1 An applicant for admission to the course of study for the Master of Arts (Geographic Information Systems and Remote Sensing) shall have qualified for a degree of the University in an appropriate field of study or for a degree of another institution accepted for the purpose by the University.
- 1.2 Subject to the approval of the Council the Faculty may, in special cases and subject to such conditions (if any) as it may see fit to impose in each case, accept as a student for the Graduate Diploma a person who does not hold a degree of a tertiary institution but has given evidence satisfactory to the Faculty of fitness to undertake work for the Graduate Diploma.
- 1.3 Before deciding the applicant's fitness the Faculty may require the person to complete prescribed preliminary work, which may include courses of study, and to undertake qualifying examinations. The form and assessment of any preliminary work or course of study shall be proposed by the Department of Geography and approved by the Faculty. In any qualifying examination at least two examiners, approved by the Faculty for the purpose, must contribute to the assessment of the applicant's performance.

### 2 Status, exemption and credit transfer

- 2.1 Students holding a Graduate Diploma will be granted status in the award as outlined in section 9. Except by the special permission of the Head

of the Department of Geography, no student may gain status towards the Masters degree for other studies undertaken in in the University or other institutions.

- 2.2 Except by the special permission of the Head of the Department of Geography, no student may gain status for the Part II of the degree for other studies undertaken in in the University or other institutions.

### 3 Approval of course of study at enrolment

- 3.1 Each student's course of study shall be approved by the Faculty at enrolment each year.

### 4 Duration of course

- 4.1 Except with the special permission of the Faculty, the course for the Masters degree shall be completed in two years of full-time study or not more than six years of part-time study. A student shall not be enrolled for the thesis for less than one year, nor more than three years, without special permission of the Faculty.

### 5 Qualification requirements

- 5.1 The work required to qualify for the degree shall be in two Parts, each comprising 24 points worth of study, and no student, unless exempted, may proceed to Part II unless he or she has passed Part I at the level specified in the Schedules.
- 5.2 Part I shall consist of 24 points of coursework.

**5.3** For Part II a student shall undertake a research project, and present a satisfactory thesis, on a topic approved by the Faculty. The Faculty shall appoint one or more supervisors to guide the student's research.

## **6 Course of study / Subjects of study**

### **6.1 Part I**

The coursework for Part I comprises the same subjects as for the Graduate Diploma in Applied Geographic Information Systems and Remote Sensing. For details please refer to the Specific Course Rules for the Graduate Diploma in this Volume of the Calendar.

### **6.2 Part II**

A student shall present a satisfactory thesis of a maximum length of approximately 40,000 words on a topic approved by the Faculty of Arts.

## **7 Review of academic progress**

**7.1** If in the opinion of the Faculty a student of the degree is not making satisfactory progress the Faculty may with the consent of the Council withdraw its approval of candidature and the student shall thereupon cease to be enrolled for the degree.

## **8 Assessment and examinations**

**8.1** There shall be four classifications of pass in any subject for Part I of the degree: Pass with High Distinction, Pass with Distinction, Pass with Credit, and Pass.

**8.2** (a) On completion of work for the degree the student shall lodge with the Registrar three copies of the thesis prepared in accordance with directions given to students from time to time.

(b) The Faculty shall appoint two examiners for the thesis, one of whom shall be external to the University.

(c) The examiners may recommend that the thesis either:

(i) be accepted, with or without conditions, or

(ii) be accepted, with or without conditions subject to satisfactory performance in an examination, either written or oral or both, in the field of study immediately relevant to the subject of the thesis, or

(iii) be not accepted, but that the student be allowed to re-submit it after revision, or

(iv) be rejected.

## **9 Articulation with other awards**

**9.1** Students who complete the award of Graduate Diploma in Applied Geographic Information Systems and Remote Sensing are eligible to apply for entry to the Master of Arts (Geographic Information Systems and Remote Sensing) course, and if successful, on gaining entry, receive full status for the work they have undertaken in the Graduate Diploma.

**9.2** Students who have completed the award of Graduate Diploma in Remote Sensing are eligible to apply for entry to the Master of Arts (Geographic Information Systems and Remote Sensing) course. Such students will receive status to the value of 18 points, and unless given exemption by the Department of Geography, will be required to undertake the subjects 6478 Project Planning and System Evaluation and 3132 Technical Issues in Geographic Information Systems and Remote Sensing.

**9.3** Students who have conferred upon them the award of Graduate Diploma in Applied Geographic Information Systems and Remote Sensing or Graduate Diploma in Remote Sensing who subsequently successfully complete the requirements of the Master of Arts (Geographic Information Systems and Remote Sensing) must surrender their first award before being admitted to the Masters degree.

**9.4** Notwithstanding the above Rules a candidate who has been enrolled for the degree of Master of Arts (Geographic Information Systems and Remote Sensing) and who has completed the work prescribed herein for the Graduate Diploma and who has not been awarded the Master's degree shall, on written application to the Registrar, be awarded the Graduate Diploma.

# Master of Arts (Population and Human Resources)

## Introductory remarks

The University of Adelaide and Flinders University of South Australia jointly offer subjects for the Master of Arts in Population and Human Resources. Teaching of the subjects is divided between Flinders and Adelaide Universities. However, students should enrol at The University of Adelaide.

Applications for admission to this course shall be made in writing to the Head of the Department of Geography. Successful applicants to the course may defer their studies to the following year.

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar.

As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

## Specific Course Rules

### 1 Admission requirements

- 1.1 An applicant for admission to the course of study for the degree of Master of Arts (Population and Human Resources) shall have qualified for an Honours degree of The University of Adelaide in an appropriate field of study, or to a qualification of another institution deemed by the University to be equivalent.
- 1.2 Subject to the approval of the Council the Faculty may, in special cases and subject to such conditions (if any) as it may see fit to impose in each case, accept as a student for the Masters degree a person who does not hold the qualifications outlined in 1.1, above, but has given evidence satisfactory to the Faculty of fitness to undertake work for the degree.

### 2 Status, exemption and credit transfer

- 2.1 No student may be granted more than 24 points of status toward the Masters degree for other studies undertaken in the University or other institutions.

### 3 Approval of course of study at enrolment

- 3.1 Each student's course of study shall be approved by the Faculty at enrolment each year.

### 4 Duration of course

- 4.1 Except with the special permission of the Faculty, the course for the Masters degree shall be completed in two years of full-time study or not more than four years of part-time study.

### 5 Qualification requirements

- 5.1 The course of study for the degree of Master of Arts (Population and Human Resources) shall be made up of core academic and professional development subjects, research, and elective subjects to the value of 48 points.
- 5.2 The Faculty shall appoint one or more supervisors to guide the research of a student enrolled for the thesis.

### 6 Course of study / Subjects of study

#### 6.1 Core subjects

All students shall satisfactorily complete the following subjects:

##### 6.1.1 Academic subjects

code	subject title	points
4428	Human Resource Development	4
1556	Population Data Analysis	4
3790	Population Studies	4

##### 6.1.2 Professional development subjects

2924	Computer Applications in Population Studies	4
9048	Population Studies Seminar	4

#### 6.2 Research subjects

Students shall satisfactorily complete *either*:

##### 6.2.1 Research Thesis

8586	Thesis (M.A. Population and Human Resources)	24
1876	Thesis (M.A. Population and Human Resources Part-time)	

or

6.2.2 Research project

4193 Research Project (M.A. Population and Human Resources)	12
1065 Research Project (M.A. Population and Human Resources Part-time)	
<i>and</i>	
Professional development subject	
8533 Research Design and Methodology	4
9055 Research Design and Methodology (Part-time)	

6.3 Elective subjects

Students who intend to undertake research solely by Thesis as in option 6.2.1, above, shall complete Elective subjects to the value of 4 points; and students who intend to undertake research by Research Project as in option 6.2.2, above, shall complete Elective subjects to the value of 12 points; taken from the following:

5678 Ageing of Populations: Causes and Consequences	4
1762 Applied Demography	4
4024 Demography of the Family*	4
2757 Population and the Environment	4
1613 Population Management and Operations Research*	4
4904 Population and Mobility*	4
9979 Regional Development and Planning*	4
1745 Urbanisation and Development*	4
7149 Women's Health and Child Survival	4

\*These subjects are not offered in 1996.

7 Review of academic progress

- 7.1 A student who fails a subject and desires to take the subject again shall again attend lectures and satisfactorily do such written and practical work as the teaching staff concerned may prescribe.
- 7.2 A student who has twice failed a subject may not enrol for that subject again except by special permission to be obtained in writing from the Faculty and then only under such conditions as may be prescribed.
- 7.3 For the purposes of this clause a student who is refused permission to be assessed, by examination or otherwise, or who does not, without a reason accepted by the Head of the Department of Geography as adequate, attend all or part of a final examination (or supplementary examination if granted) after having enrolled for

at least two thirds of the normal period during which the subject is taught, shall be deemed to have failed the subject.

- 7.4 If in the opinion of the Faculty of Arts a student for the degree is not making satisfactory progress, the Faculty may, with the consent of the Council, terminate the candidature and the student shall cease to be enrolled for the degree.

8 Assessment and examinations

- 8.1 There shall be four classifications of pass in any subject for the Masters degree: Pass with High Distinction, Pass with Distinction, Pass with Credit, and Pass.

## Syllabuses

The University of Adelaide and Flinders University of South Australia jointly offer subjects for the Master of Arts in Population and Human Resources. Teaching of the subjects is divided between Flinders and Adelaide Universities. However, students should enrol at The University of Adelaide.

### compulsory core subjects

#### Academic subjects

##### 4428 Human Resource Development

*points:* 4 *duration:* semester 2

*contact hours:* 3 hours per week

*content:* An examination of human resource issues and planning with special reference to Indonesia and the Asia-Pacific Region. The topic includes analysis of labour force and labour markets in developing countries, an introduction and critical evaluation of major approaches to manpower planning and educational planning, policies and planning of health and nutritional improvement, inter-relationships between education, health and population, and policies and planning for population distribution and mobility. The topic provides an overview to analysis and issues, and deals with selected case studies in the Asia-Pacific region on all those subjects.

*assessment:* examination; major essay; minor essay; tutorial papers and presentations

##### 1556 Population Data Analysis

*points:* 4 *duration:* semester 1

*contact hours:* 4 hours per week

*content:* The subject aims to give students a working knowledge of a range of the basic techniques required in the analysis of population change and distribution, and of population development interrelationships. It will impart practical skills in analysis and interpretation of population data and trends, focusing particularly on analysis of fertility, migration and labour force data, and on projections. It will also highlight the major variables of interest in the study of population and development, critically examining and providing students with practical experience in applying various techniques to testing major theories in this field.

*assessment:* workshop; project; examination

##### 3790 Population Studies

*points:* 4 *duration:* semester 1

*contact hours:* 3 hours per week

*content:* The subject aims to give students a background in the major concepts, theories and approaches to demography. It introduces students to major world demographic patterns and then takes each major demographic process in turn and examines the major methods of measurement which are used for that process, the major patterns of that process in more developed and less developed countries, differentials between groups with respect to the process and major explanations of changes in that process. This approach is applied to consideration of mortality, fertility, internal migration, international migration, urbanisation, ageing, labour force and human resource issues.

*assessment:* examination, essay and written tutorial paper, review of journal article.

#### Professional development subjects

##### 9048 Population Studies Seminar

*points:* 4 *duration:* semester 1 or 2

*content:* The objective of this subject is to familiarise students with current issues in Population Studies and Human Resources, both applied and policy oriented, and in research approaches. Students are required to attend and participate in a weekly postgraduate seminar and present, at the appropriate time, a report on their thesis or project in Population Studies.

*assessment:* non-graded pass for participation and seminar presentation.

##### 2924 Computer Applications in Population Studies

*points:* 4 *duration:* semester 1

*content:* This subject is offered to complement the core topic Population Data Analysis as a cognate and to provide students undertaking thesis work with a working knowledge of the use of the computer and SPSS. Students are introduced to the use of both the micro and mainframe computer to carry out exercises in the Population Data Analysis course. This course also demonstrates the use of a range of software packages, eg Microsoft Word, graphic packages, population estimation and analysis programs.

*assessment:* satisfactory completion of workshops

## elective subjects

### 5678 Ageing of Populations: Causes and Consequences

points value: 4 duration: semester 1

contact hours: 3 hours

*content:* This subject aims firstly to give students a thorough background in contemporary patterns and levels of growth of the older population in both Less Developed and More Developed countries. It examines the causes of the current and impending rapid growth of the aged and the complex interface between ageing of populations and economic development and social change in relation to the changing relationships between generations. The changing characteristics of the elderly in LDCs and MDCs are explored. The implications of ageing for provision of health services, providing economic support for the aged, housing and other areas of public policy are discussed in relation to both LDCs and MDCs. Changing patterns of behaviour of the elderly with respect to housing, permanent and temporary migration and health are also examined.

*assessment:* essay; book review; seminar; examination

### 1762 Applied Demography

points value: 4 duration: semester 2

*content:* This course provides students with the theoretical basis, methodological skills and concepts to apply demographic knowledge to real world social planning and business problems. The basis of all planning in the public and private sectors is an understanding of the people for which they are providing goods and services to. However, the incorporation of demographic elements into planning and policy making is lacking in Australia. The course involves a strong methodological component and addresses particularly the issue of anticipating population change and the whole area of population projection. Another focus will be the use of small area demographic data for planning the spatial distribution of goods and services. In addition, the use of demography in human resource planning, corporate planning and site location. Full consideration is made of appropriate data sources and computer software.

*assessment:* examination; project; essay; seminar participation

### 4024 Demography of the Family

points value: 4 availability: not offered in 1996

contact hours: 2 lectures and tutorial/seminar per week

*content:* This topic examines basic theories in social demography with emphasis on the demography of the

family. Lectures will examine the social determinants of family formation patterns such as marriage, childbearing and family planning and labour force participation. Comparisons of trends and patterns in developing and developed countries will be made with a focus on Australia and the Asia-Pacific region. Various analytical approaches to the study of family formation and dissolution patterns will also be discussed and applied.

*assessment:* major project; essays and seminar presentation

### 2757 Population and the Environment

points value: 4 duration: semester 2

contact hours: 2x4 hours per week

*content:* The topic introduces basic concepts and analysis of ecosystems and key interrelationships between population and environment within the context of development issues and policies. It deals with resource depletion and management, land use and agricultural systems related to population pressure, population mobility, urbanisation and the environment and integrated approaches to population-environment planning.

*assessment:* essays; tutorial papers; major project

### 1613 Population Management and Operations Research

points value: 4 availability: not offered in 1996

*content:* This subject is designed particularly for students with a professional background or specialised interest in the management of population programs including family planning and health. The major components of the course include population policies, population programs and projects, project management including its substantive and financial aspects, and management information systems. The course will also include a review of case studies from both developed and developing countries.

### 4904 Population Mobility

points value: 4 availability: not offered in 1996

*content:* The topic aims firstly to cover in depth the major conceptual and measurement issues related to population movement in developing and developed societies. It deals with the major theories of population movement, its causes and consequences for social and economic change. Finally there is a consideration of planning and policy issues related to population movement, especially in developing countries.

*assessment:* 2 major essays, written and verbal tutorial work and an exam

### **9979 Regional Development and Planning**

*points value:* 4      *availability:* not offered in 1996

*content:* This topic may include a study of the significance of the region and spatial analysis in development theory and practice, an examination of theories of regional development, case studies of particular regions, and a study of regional development policies. Particular emphasis may be given to the problems of low income regions in developing countries, and to the role of migration in regional development.

*assessment:* paper of 1,500 words; major report and essay

### **1745 Urbanisation and Development**

*points value:* 4      *availability:* not offered in 1996

*contact hours:* 2–3 hours per week

*content:* An examination of the relationships between urbanisation and development with particular reference to Southmost Asia. The topic includes study of the causes of urbanisation, the relationships between urbanisation and development, the problems produced by urbanisation and urbanisation policies.

*assessment:* critique of 1,000 words and exam

### **7149 Women's Health and Child Survival**

*points value:* 4      *duration:* semester 2

*content:* This subject is designed particularly for students with a professional background or specialised interest in the issues of women's health and child survival. The course will mainly comprise: (1) status of women's health in developing and developed countries and factors affecting them, giving particular attention to women's reproductive health, sexually transmitted diseases, and ante- and post-partum health care; and (2) child survival issues focussing on the Mosely-Chen framework for child survival analysis. Measurement and estimation of maternal, infant and child mortality will also be discussed.

## **Research**

### **4193 Research Project (M.A. Pop and Hum. Resources)**

*points value:* 12      *duration:* semester 1 or 2

and

### **1065 Research Project (Pop. and Hum Res. P/T)**

*points value:* 12      *duration:* full year

*content:* A report on a research task of 12,000 to 15,000 words, written under the supervision of a member of staff with expertise in the field of study. The project

will enable students to develop areas of interest relating to the theoretical and research literature in Population Studies and Human Resources. The research task may involve a literature review, a study of a particular problem through collection and evaluation of research materials and/or the analysis of a data set.

*assessment:* graded pass

### **8533 Research Design and Methodology**

*points value:* 4      *duration:* semester 1 or 2

and

### **9055 Research Design and Methodology (P/T)**

*points value:* 4      *duration:* full year

*content:* This topic is offered to students as preparation for the MA Coursework Project (4193 and 1065). The emphasis is on research design and methodology, and includes a module on language skills and research report writing. Students will be required to prepare a research proposal using an appropriate research design, methodology and data analysis techniques.

*assessment:* research proposal (100%) non-graded pass

### **8586 Thesis (M.A.(Pop. and Human Resources))**

and

### **1876 Thesis (M.A.(Pop. and Human Resources)(P/T))**

*points value:* 24      *duration:* full year

*content:* A thesis of approximately 24,000 words written under the supervision of two staff members. The thesis should deal with a specific topic in the field of Population Studies chosen in consultation with supervisors at the end of the student's second semester of study. The thesis should give evidence of the student's ability to collect and evaluate information, construct, test and defend arguments or hypotheses, and critically examine theories in the area of enquiry.

*assessment:* graded pass

## Master of Arts (Women's Studies)

### Introductory remarks

This course is a joint award offered by The University of Adelaide and Flinders University. It provides graduates with an opportunity to investigate at an advanced level attitudes towards women in society at large and in their personal and professional lives. The course provides the opportunity to study various aspects of the lives of women in our culture, as well as providing students with an analysis of current sociological, political, psychological and cultural theories about the status of women. In 1996 there will be no new external intake.

Applications for admission to this course shall be made through the South Australian Tertiary Admissions Centre (SATAC) on the appropriate form by the required date. Successful applicants to the course may not defer their studies to the following year.

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar.

As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

This course underwent major structural changes in 1994. Students who commenced the degree of Master of Arts (Women's Studies) offered by The University of Adelaide or the City Campus of the former South Australian College of Advanced Education prior to 1995 will have suitable transition arrangements made for them at the time of enrolment.

### Specific Course Rules

---

#### 1 Admission requirements

- 1.1 An applicant for admission to the course of study for the degree of Master of Arts (Women's Studies) must have qualified for an Honours degree from a University at First Class or IIA standard in Women's Studies or other appropriate field of study, or other qualification accepted for the purpose by the University, or a Graduate Diploma in Women's Studies which includes a research component graded at credit level or higher.
- 1.2 Subject to the approval of the Council the Faculty may, in special cases and subject to such conditions (if any) as it may see fit to impose in each case, accept as a student for the Master's degree a person who does not hold a degree of a tertiary institution but has given evidence satisfactory to the Faculty of fitness to undertake work for the Master's degree.

#### 2 Status, exemption and credit transfer

- 2.1 Except by the special permission of the Head of the Department of Women's Studies, no student may gain status towards the Core subject 8412 Feminist Research Strategies or the Thesis for other studies undertaken in the University or other institutions.

- 2.2 No student may be granted more than six points of status toward the Master's degree.

#### 3 Approval of course of study at enrolment

- 3.1 Each student's course of study shall be approved by the Faculty at enrolment each year.

#### 4 Duration of course

- 4.1 To qualify for the Master's degree a student shall satisfactorily complete a course of one and a half years of full-time study or the part-time equivalent.

#### 5 Qualification requirements

- 5.1 The course of study for the degree of Master of Arts (Women's Studies) shall be made up of three parts with an aggregate points value of 36 points. This course is normally offered in internal and external modes of delivery or a combination of both. Unless exempted therefrom by the Faculty, every student for the degree shall complete all parts. An overall pass in each part is necessary to qualify for the award

## 6 Course of study

All students shall satisfactorily complete the following three parts:

### 6.1 Part I: Core subject

All students shall satisfactorily complete the twelve point compulsory Core subject 8412 Feminist Research Strategies.

### 6.2 Part II: Elective subject

All students shall complete one six point elective subject taken from the following:

#### 6.2.1 University of Adelaide Coursework subjects

9410 Australian Feminist History: a Survey*	6
3612 Autobiographical Writings***	6
9912 Contemporary Issues in Feminism**	6
7373 Development and Gender Perspectives**	6
4434 Exploring Sexualities	6
5133 Environmental Feminism**	6
2381 First Wave Feminism in Australia***	6
2360 Gender Relations and Social Policy**	6
7266 Personal and Professional Development (PG)*	6
4588 Popular Culture, Women and Representation PG**	6
5756 Power and Difference: Post Colonial Perspectives***	6
5528 Theories of Feminism	6
3326 Twentieth Century Women Writers***	6
3530 Women's Health: Social, Economic and Cultural Issues***	6
9008 Women's Studies Special Topic**	6
3045 Women, Work and Economics	6

\*Available in External mode only

\*\*Available in Internal mode only

\*\*\*Not available in 1996

Unmarked subjects are available in both internal and external modes.

#### 6.2.2 Coursework subjects offered by other institutions

With the permission of the Head of the Department of Women's Studies, students may study as their elective an approved Women's Studies subject at an appropriate level offered by another institution. In addition to enrolling appropriately for their studies at The University

of Adelaide, students undertaking this option must also comply with the enrolment procedures of the other institution.

### 6.3 Part III: Thesis

All students shall complete an eighteen point Thesis (approximately 20,000-24,000 words). Students continuing in the Master of Arts (Women's Studies) two-year course formerly offered by the City Campus of the South Australian College of Advanced Education will, with the permission of the Head of the Department of Women's Studies, be able to undertake a 9 or 12-point thesis component if this is needed to fulfil the requirements of their qualification.

## 7 Review of academic progress

**7.1** A student who fails a subject and desires to take the subject again shall again attend lectures and satisfactorily do such written and practical work as the teaching staff concerned may prescribe.

**7.2** A student who has twice failed a subject may not enrol for that subject again except by special permission to be obtained in writing from the Faculty and then only under such conditions as may be prescribed.

**7.3** For the purposes of this clause a student who is refused permission to be assessed, by examination or otherwise, or who does not, without a reason accepted by the Head of the Department of Women's Studies as adequate, attend all or part of a final examination (or supplementary examination if granted) after having enrolled for at least two thirds of the normal period during which the subject is taught, shall be deemed to have failed the subject.

## 8 Assessment and examinations

**8.1** There shall be four classifications of pass in any subject for the Master's degree: Pass with High Distinction, Pass with Distinction, Pass with Credit, and Pass.

**8.2** On completion of the thesis the student shall lodge with the Registrar three copies of the thesis prepared in accordance with directions given to students from time to time.

**8.3** The Faculty shall appoint two examiners for the thesis, one of whom shall be associated with the teaching of the course and one of whom shall be external both to the teaching of the course and to the Department.

**9 Articulation with other awards**

- 9.1** Students who complete the Graduate Diploma in Women's Studies incorporating a Research Project at credit level or higher are eligible to apply for the degree of Master of Arts (Women's Studies), and if successful, on gaining entry, receive status for the elective component for the work they have undertaken in the Graduate Diploma.
- 9.2** Students who have conferred upon them the award of Graduate Diploma in Women's Studies who subsequently successfully complete the requirements for the degree of Master of Arts (Women's Studies) must surrender their first award before being admitted to the degree of Master of Arts (Women's Studies).

## Syllabuses

---

### core subject

#### 8412 Feminist Research Strategies

*points value:* 12

*duration:* full year

*availability:* this subject is available in internal mode only

*restrictions:* 8001 Research Strategies

*contact hours:* 2.5 hours per week

*content:* Students will become familiar with the range of methods and procedures employed in current feminist research and acquire the knowledge and skills to initiate a successful research project. They will consider arguments for and against a specifically feminist methodology, examine the relations between feminist theory and feminist research, investigate the uses of qualitative and quantitative models, and consider philosophical, ethical and ideological assumptions underlying various modes of research.

*assessment:* bibliography (with annotations) of 1,500 words, 2 critical review essays of 1,500 and 3,000 words respectively, thesis proposal of 1,500 words

### Theses

Normally an 18 point thesis of between 20,000-24,000 words is required. Students enrol for these subjects externally. After receiving materials, local students meet with their supervisor in person.

#### 5365 Thesis 18 (Part Time)

Smaller theses are available for students who enrolled in M.A. prior to 1995, subject to the approval of the Department of Women's Studies.

#### Theses of 9 points - 12000 words:

1370 Thesis 9 (Full Time)

8487 Thesis 9 (Part Time)

1291 Thesis 9 (Part Time) (mid year intake)

#### Theses of 12 points - 15000 to 18000 words:

4598 Thesis 12 (Full Time)

6613 Thesis 12 (Part Time)

### Elective Subjects

#### 9410 Australian Feminist History: A Survey

*level:* V *points value:* 6 *duration:* semester 2

*availability:* external mode only

*restriction:* 9959/2345 Gender Divisions in Some Western Societies Since 1700 II/III; 4272/8226 Women in History; 1489 History IIIB (Women in History)

*syllabus details:* see Grad. Dip. Women's Studies

#### 3612 Autobiographical Writings

*level:* V *points value:* 6

*availability:* not offered in 1996

*level:* V *points value:* 6 *duration:* semester 2

*syllabus details:* see Grad.Dip. Women's Studies

#### 7373 Development and Gender Perspectives

*level:* V *points value:* 6 *duration:* semester 2

*availability:* internal mode only

*syllabus details:* see Grad.Dip. Women's Studies

#### 5133 Environmental Feminism

*level:* V *points value:* 6 *duration:* semester 1

*availability:* internal mode only

*syllabus details:* see Grad.Dip. Women's Studies

#### 4434 Exploring Sexualities

*level:* V *points value:* 6 *duration:* semester 2

*availability:* offered in both internal and external modes

*syllabus details:* see Grad.Dip. Women's Studies

#### 2381 First Wave Feminism in Australia (PG)

*level:* V *points value:* 6

*availability:* not offered in 1996

*syllabus details:* see Grad.Dip. Women's Studies

**2360 Gender Relations and Social Policy**

level: V points value: 6 duration: semester 2

availability: this subject is available in internal mode only

restriction: 8382 Women and Policy III; 1102/1260 Women and Social Policy

contact hours: 3 hours per week

syllabus details: see Grad. Dip. Women's Studies

**7266 Personal and Professional Development (PG)**

level: V points value: 6 duration: semester 1

availability: this subject is available in external mode only

syllabus details: see Grad.Dip. Women's Studies

**4588 Popular Culture, Women and Representation PG**

level: V points value: 6 duration: semester 1

availability: this subject is available in internal mode only

syllabus details: see Grad.Dip. Women's Studies

**5756 Power and Difference: Postcolonial Perspectives PG**

level: V points value: 6

availability: not offered in 1996

syllabus details: see Grad.Dip. Women's Studies

**5528 Theories of Feminism**

level: V points value: 6 duration: semester 1

syllabus details: see Grad.Dip. Women's Studies

**3326 Twentieth Century Women Writers**

level: V points value: 6

availability: not offered in 1996

syllabus details: see Grad.Dip. Women's Studies

**3530 Women's Health: Social, Economic and Cultural Issues**

level: V points value: 6

availability: not offered in 1996

syllabus details: see Grad.Dip. Women's Studies

**9008 Women's Studies: Special Topic**

level: V points value: 6 duration: semester 1 or 2

availability: this subject is available in internal mode only

syllabus details: see Grad.Dip. Women's Studies

**3045 Women, Work and Economics**

level: V points value: 6 duration: semester 1

syllabus details: see Grad.Dip. Women's Studies

**4029 Transition Subject 4.5**

level: V points value: 4.5 duration: semester 1 or 2

contact hours: 2 hours per week or equivalent

content: This subject is designed for students transferring from the past to the present Graduate Diploma and Master of Arts (Coursework) awards. It requires the student to complete the equivalent research and study of three quarters of a full subject. Content and assessment to be negotiated directly with lecturer concerned in consultation with the Postgraduate Coordinator.

assessment: essay of 4,500 words or equivalent

**7716 Transition Subject 3**

level: V points value: 3 duration: semester 1 or 2

contact hours: 1.5 hours per week or equivalent

content: This subject is designed for students transferring from the past to the present Graduate Diploma and Master of Arts (Coursework) awards. It requires the student to complete the equivalent research and study of one half of a full subject. Content and assessment to be negotiated directly with lecturer concerned in consultation with the Postgraduate Coordinator.

assessment: essay of 3,000 words or equivalent

**6172 Transition Subject 1.5**

level: V points value: 1.5 duration: semester 1 or 2

contact hours: 1 hour per week or equivalent

content: This subject is designed for students transferring from the past to the present Graduate Diploma and Master of Arts (Coursework) awards. It requires the student to complete the equivalent research and study of one quarter of a full subject. Content and assessment to be negotiated directly with lecturer concerned in consultation with the Postgraduate Coordinator.

assessment: essay of 1,500 words or equivalent

### Flinders University subjects

*availability:* For details on the availability of the following subjects, please telephone the Women's Studies office at The Flinders University of South Australia (08) 201 3437.

#### WMST 9005 Critique and Construct in Feminist Knowledge

*points value:* 4.5 *duration:* semester 1

*contact hours:* 4 hours of lecture and tutorials a fortnight

*content:* To explore theoretical debates surrounding the concept of 'feminist knowledge' and its relationship to other disciplines.

*assessment:* 1 essay of 6,000 words

#### WMST 9006 Theories of Race and Gender

*points value:* 4.5

*contact hours:* 4 hours of lectures and tutorials a fortnight

*content:* To explore debates from 18th century to the present about the relationship between race and gender. The topic will explore the impact of major theories of race to question their significance.

*assessment:* one 6,000 word essay

#### SOCI 9011 Family, State and Social Policy

*points value:* 4.5

*restriction:* Women and Social Policy 1102/1260

*content:* This topic explores the range of policy issues which arise from the extension of the state's authority to encompass the family and the lives of women and children.

*assessment:* one 6,000 word essay

#### WMST 9007 Reading Topic

*points value:* 4.5 *duration:* semester 1

#### WMST 9002 Women's Studies History

*points value:* 4.5 *duration:* semester 2

*restriction:* cannot be taken by students who are also taking Women in History

*assessment:* one 6,000 word essay

#### WMST 9003 Women's Studies Theories

*points value:* 4.5 *duration:* semester 1

*content:* To familiarise students with the range of contemporary debates about feminist theory drawn from Australian and overseas feminist journals. Each year the topic will focus on particular issues in contemporary feminist theory.

*assessment:* one 6,000 word essay

#### WMST 9004 Women's Studies Cultural Texts

*points value:* 4.5 *duration:* semester 2

*availability:* see Flinders University Calendar

*restriction:* cannot be taken by students who are also taking Semiotics and Gender Representation

*content:* To investigate a range of cultural texts from the popular media through film and the arts with attention to some Australian materials. The investigation will be guided by feminist questions about the position of women as cultural producers and representations of gender experience in various media.

*assessment:* one 6,000 word essay

#### WMST 9001 Women's Studies: Introduction

*points value:* 4.5 *duration:* semester 1

*prerequisites:* admission to Program

*syllabus details:* see Flinders University Calendar

## Master of Cognitive Science

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar.

As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

### Specific Course Rules

#### 1 Admission requirements

- 1.1 An applicant for admission to the course of study for the Master of Cognitive Science degree must have qualified for an Honours degree from the University at First Class or IIA standard in the field of Cognitive Science or other appropriate field of study in Departments of the Faculty of Arts or the Faculty of Mathematical and Computer Sciences, or the Graduate Diploma in Cognitive Science, or other qualification accepted for the purpose by the University.
- 1.2 Subject to the approval of the Council the Faculty may, in special cases and subject to such conditions (if any) as it may see fit to impose in each case, accept as a student for the degree a person who does not hold a degree of a tertiary institution but has given evidence satisfactory to the Faculty of fitness to undertake work for the Masters degree.

#### 2 Status, exemption and credit transfer

- 2.1 Except by the special permission of the Head of the Department Philosophy, no student may gain status towards the Thesis component of the course for other studies undertaken in the University or other institutions.
- 2.2 Students of the Masters degree who have successfully completed the Graduate Diploma in Cognitive Science will be awarded status for any subjects completed in the Graduate Diploma of Cognitive Science which form part of the requirements of Rule 6.1, below. Students who apply for and are granted status to the value of 18 or more points for their Graduate Diploma studies under this provision will be required to surrender their Graduate Diploma before being admitted to the Masters degree (see 9.2, below).

#### 3 Approval of course of study at enrolment

Each student's course of study shall be approved by the Faculty at enrolment each year.

#### 4 Duration of the Award

To qualify for the degree a student shall satisfactorily complete a course of two years of full-time study or the part-time equivalent.

#### 5 Qualification requirements

The course of study for the degree of Master of Cognitive Science shall be made up of two parts with an aggregate points value of 48 points, consisting of coursework subjects to the value of 28 points and a 20 point Thesis.

#### 6 Course of study / Subjects of study

All students shall satisfactorily complete the following two parts:

##### 6.1 Coursework Subjects

All students shall satisfactorily complete 28 points of coursework subjects as follows:

##### 6.1.1 Core Subjects

All students shall complete the following two subjects:

3275 Cognitive Science: Minds, Brains and Computers IV	4
1207 Advanced Cognitive Science IV	4

(Students who are exempted from studying the subject 1207 Cognitive Science: Minds, Brains and Computers IV due to having previously completed either 8606 Cognitive Science: Minds, Brains and Computers II or 5086 Cognitive Science: Minds, Brains and Computers III or its equivalent will be required to present a further 4 point elective subject listed in 6.1.2 in lieu of this requirement.)

### 6.1.2 Elective Subjects

All students shall complete elective subjects to an aggregate value of 20 points chosen from the following six groups of subjects, with no more than 8 points of subjects being presented from any one group:

#### Group A Philosophy Subjects

6655 Issues in the Contemporary Philosophy of Mind IV	4
3390 Logic IV	4

#### Group B Psychology Subjects

4308 Intelligence IV	2
5296 Neuroscience in Psychology IV	2
2960 Philosophy and Psychology of Consciousness IV	2
9292 Psychology of Language in Thought and Action IV	2

#### Group C Computer Science Subjects

8352 Artificial Intelligence IV	2
1777 Knowledge Representation IV	2
2340 Advanced Artificial Intelligence IV A (Computer Vision)	2
5042 Advanced Artificial Intelligence IV B (Machine Learning)	2

#### Group D Linguistics Subjects

4594 Foundations of Linguistic Theory IV	4
3355 Language, Cognition and Reality IV	6

#### Group E Histology and Anatomy Subjects

1678 Head and Neck and Neuroanatomy IV	6
--	---

#### Group F Physiology Subjects

3155 Neurobiology IV	2
----------------------	---

The availability of some of the above elective subjects varies from year to year. Students should contact the relevant department(s) for information about subject availability over the projected period of their study programme.

Many of these elective subjects have had their normal pre-requisites waived for the purposes of this graduate programme in Cognitive Science. However, students enrolling in these subjects are expected to do sufficient background reading to attain a basic understanding of the subject area. Prospective students should contact subject coordinators for information about appropriate background reading.

### 6.2 Thesis

All students shall complete:

4353 Thesis (Cognitive Science)	20
or	
5577 Thesis (Cognitive Science) (Mid-Year Intake)	20

### 7 Academic progress

- 7.1** A student who fails a subject and desires to take the subject again shall again attend lectures and satisfactorily do such written and practical work as the teaching staff concerned may prescribe.
- 7.2** A student who has twice failed a subject may not enrol for that subject again except by special permission to be obtained in writing from the Faculty and then only under such conditions as may be prescribed.

### 8 Assessment and examinations

- 8.1** There shall be four classifications of pass in any subject for the Masters degree: Pass with High Distinction, Pass with Distinction, Pass with Credit, and Pass.
- 8.2** For the purposes of this clause a student who is refused permission to be assessed, by examination or otherwise, or who does not, without a reason accepted by the Head of the relevant Department as adequate, attend all or part of a final examination (or supplementary examination if granted) after having enrolled for at least two thirds of the normal period during which the subject is taught, shall be deemed to have failed the subject.
- 8.3** On completion of the thesis the student shall lodge with the Registrar three copies of the thesis prepared in accordance with directions given to students from time to time.
- 8.4** The Faculty shall appoint two examiners for the thesis, one of whom, shall be associated with the teaching of the course and one of whom shall be external both to the teaching of the course and to the relevant Department.

### 9 Articulation with other awards

- 9.1** Students who complete the Graduate Diploma in Cognitive Science at credit level or higher are eligible to apply for the Master of Cognitive Science course, and if successful, on gaining entry, receive status for the work they have undertaken in the Graduate Diploma.

- 9.2 Students who have conferred upon them the award of Graduate Diploma in Cognitive Science who subsequently successfully complete the requirements of the Master of Cognitive Science and who have been granted 18 or more points of status on behalf of their Graduate Diploma must surrender their first award before being admitted to the degree of Master of Cognitive Science.
- 9.3 Notwithstanding the above Rules a student who has been enrolled for the degree of Master of Cognitive Science and who has completed the work prescribed for the Graduate Diploma in Cognitive Science and who has not been awarded the Masters degree shall, on written application to the Registrar, be awarded the Graduate Diploma.

## Syllabuses

### core subjects

#### 1207 Cognitive Science: Minds, Brains and Computers IV

level: IV points value: 4 duration: semester 1

subject quota: may apply

restrictions: 8606/5086 Cognitive Science: Minds Brains and Computer II/III

contact hours: 2 hours lectures and I hour tutorial a week

*content:* This subject provides an introduction to the philosophical foundations of Cognitive Science, which is a relatively new interdisciplinary field of study that embraces aspects of philosophy, psychology, computer science and neuroscience. Topics to be discussed will include some of the following: the nature of commonsense psychology and its relevance to a mature theory of mind; the computer as a model of the mind; classical and connectionist computational theories of cognition; computational models of consciousness.

*assessment:* essays and tutorial participation

#### 3275 Advanced Cognitive Science IV

level: IV points value: 4 duration: semester 2

subject quota: may apply

*prerequisite:* 8606 Cognitive Science: Minds, Brains and computers II, 5086 Cognitive Science: Minds, Brains and computers III or 1207 Cognitive Science: Minds, Brains and computers IV

contact hours: 2 hours lectures a week

*content:* This subject builds on the material presented in 1207 Cognitive Science: Minds, Brains and Computers IV. The subject will be particularly concerned with classical and connectionist computational models of cognition

*assessment:* essays

### elective subjects

#### Group A philosophy subjects

##### 6655 Issues in the Contemporary Philosophy of Mind IV

level: IV points value: 4 duration: semester 2

subject quota: may apply

restrictions: 1938/3679 Issues in the contemporary Philosophy of Mind II/III

*contact hours:* 2 hours lectures and one hour tutorial a week

*content:* This subject examines some central issues in the contemporary philosophy of mind, and is organised around three topics: (1) Mental Content: What is the nature of mental representation and how can it be explained? (2) Consciousness: Is it possible to provide a naturalistic explanation of our conscious experience? (3) The Self: What is the nature of the self and how is it constructed?

*assessment:* essays and tutorial participation

#### 3390 Logic IV

level: IV points value: 4 duration: semester I

subject quota: may apply

*assumed knowledge:* while there is no formal prerequisite, students are expected to do sufficient background reading to attain a basic understanding of the subject area. Prospective students should contact the course coordinator for information about appropriate background reading.

restrictions: 9286 Logic II, 4259 Logic IIIA, 3037 Logic II

contact hours: 2 hours lectures and I hour tutorial a week

*content:* Standard first-order logic and its meta-theory, topics from the philosophy of logic.

*assessment:* exam, essay. Attendance at lectures and tutorials is required. Students who do not prepare tutorial exercises in writing may be deemed not to have attended.

#### Group B psychology subjects

##### 4308 Intelligence IV

level: IV points value: 2 duration: semester 2

subject quota: may apply

*assumed knowledge:* while there is no formal prerequisite, students are expected to do sufficient background reading to attain a basic understanding of the subject area. Prospective students should contact the course coordinator for information about appropriate background reading.

restrictions: 1508 Intelligence, prior to 1989, 7196 Intelligence III

contact hours: 1 hour lecture a week, 4 tutorials and practical work

*content:* This subject reviews recent cognitive analytical approaches to the study of individual differences in intelligence, comparing the psychometric paradigm with various information processing models. Particular emphasis is given to the consequences of mental retardation, brain damage, and ageing for intellectual functioning.

*assessment:* final exam and the report of a practical exercise

### **5296 Neuroscience in Psychology IV**

*level:* IV *points value:* 2 *duration:* semester 2

*subject quota:* may apply

*assumed knowledge:* while there is no formal prerequisite, students are expected to do sufficient background reading to attain a basic understanding of the subject area. Prospective students should contact the course coordinator for information about appropriate background reading.

*restrictions:* 8743 Physiological Psychology prior to 1989, 4770 Neuroscience in Psychology III

*contact hours:* 1 hour lecture a week, 4 tutorials and practical work

*content:* This subject seeks to expose further some of the difficulties of understanding Psychology in brain terms, and to develop an impression of what, in principle, can be achieved by an interchange of ideas between the two disciplines, Psychology and Neuroscience: examining, on the one hand, emotion as a representative psychological construct, and on the other, what can be understood of the brain's functional organisation.

The subject consists, essentially, of three principal components: theoretical contemplations of the 'structure' of emotion, and its functional relevance in psychological explanation; research approaches in its various aspects; and the implications of physiological perspectives in a consideration of emotion.

*assessment:* final exam, report of a practical exercise

### **2960 Philosophy and Psychology of Consciousness IV**

*level:* IV *points value:* 2 *duration:* semester 2

*subject quota:* may apply

*assumed knowledge:* while there is no formal prerequisite, students are expected to do sufficient background reading to attain a basic understanding of the subject area. Prospective students should contact the course coordinator for information about appropriate background reading.

*restrictions:* 1967 The Philosophy and Psychology of Consciousness prior to 1989, 5673 Philosophy and Psychology of Consciousness III

*contact hours:* 1 hour lecture a week, 4 tutorials and practical work

*content:* This subject examines the place in Psychology of the phenomena associated with such terms as 'consciousness', 'awareness' and 'experience'. Lectures and tutorials deal with the place of these types of concept in an overall scientific program, considering relevant issues at levels ranging from the philosophical to the physiological. Specific topics covered include the mind-body problem, the feasibility of a reductionist approach, the place of phenomenology and existentialism, and the suggestions of physiologists on the nature of the mechanisms that might underlie consciousness.

*assessment:* final exam and the report of a practical exercise

### **9292 Psychology of Language in Thought and Action IV**

*level:* IV *points value:* 2 *duration:* semester 1

*subject quota:* may apply

*assumed knowledge:* while there is no formal prerequisite, students are expected to do sufficient background reading to attain a basic understanding of the subject area. Prospective students should contact the course coordinator for information about appropriate background reading.

*restrictions:* 2921 Psychology of Language in Thought and Action III

*contact hours:* 1 hour lecture a week, 4 tutorials and practical work

*content:* Pragmatic and figurative aspects of language have been neglected in traditional approaches to language operating within formalist or objectivist frameworks. However, analyses of these aspects are playing an increasingly important role in psychology, linguistics, and artificial intelligence in attempts to understand cognitive processes as well as natural language use. Similar analyses are also being employed in current debates on the nature of psychology as a scientific discipline and on the present and future orientation of particular field, such as social psychology and personality theory. The aim of this option is to present a critical review of recent approaches to pragmatic and figurative aspects of language use, and to provide a practical introduction to some of the principal methods of analysis which have been developed to study them.

*assessment:* final exam and the report of a practical exercise

**Group C computer science subjects****8352 Artificial Intelligence IV**

level: IV points value: 2 duration: semester 1

subject quota: may apply

*assumed knowledge:* While there is no formal prerequisite, students are expected to do sufficient background reading to attain a basic understanding of the subject area. Prospective students should contact the course coordinator for information about appropriate background reading.

*restrictions:* 6378 Artificial Intelligence III

*contact hours:* 2 hours lecture and 2 hours of practical work a week, plus one tutorial every 3 weeks

*content:* AI methodology and fundamentals; description matching and goal-reduction; ANALOGY; and/or trees; exploiting natural constraints: Waltz algorithm; search: hill-climbing, beam, best-first, A\*; minimax procedure and alpha-beta pruning for game-playing; learning: parameter-adjustment and Winston near-miss/reinforcement procedure; means-end analysis and GPS; rule-based systems: forward- and backward- chaining, MYCIN, Xcon; generate and test paradigm with Dendral. Representation issues: inheritance, demons, defaults, perspectives, frames, primitives; aspects of Prolog; neural networks: recurrent backpropagation technique.

*assessment:* 2 hour exam, practicals and exercises

**1777 Knowledge Representation IV**

level: IV points value: 2 duration: semester 2

availability: may not be offered in 1996

subject quota: may apply

*prerequisites:* 6378 Artificial Intelligence III or 8352 Artificial Intelligence IV

*restrictions:* 3007 Knowledge Representation III

*contact hours:* 2 hours lectures and 2 hours of practical work a week plus one tutorial every 3 weeks

*content:* Issues in knowledge representation, the frame problem, the qualification problem, predicate logic as knowledge representation, the closed world assumption, inheritance hierarchies, theorem proving, resolution, natural deduction, logic programming, introduction to nonmonotonic reasoning, logics for nonmonotonic reasoning, statistical reasoning, Bayes' theorem, Bayesian Networks, Dempster-Shafer Theory, fuzzy logic.

*assessment:* 2 hour exam, practicals and exercises

**2340 Advanced Artificial Intelligence IVA (Comp. Vision)**

level: IV points value: 2 duration: semester 1

duration: contact Department of Computer Science

subject quota: may apply

*assumed knowledge:* First year, and preferably, second year mathematics

*restrictions:* 5689 Advanced Artificial Intelligence A (Computer Vision)

*contact hours:* contact Department of Computer Science

*content:* This subject aims to convey the nature and difficulty of many of the problems in vision, and to explain a variety of techniques to overcome them. Emphasis is placed on aspects of 3-D vision and the gaining of practical experience in image-processing via a TV-camera facility. Various models of vision are considered, primarily those in the early phase of processing. These models include: the detection of contrast edges in intensity image arrays and the accumulation of edge data to form lines; the use of a stereo image pair to derive depth information; the exploitation of image shading (or intensity variation) to obtain surface normal data; motion detection in time-varying imagery; lightness computation; Marr's theory as a framework for visual information processing; generalised cylinders and their role in the recognition of objects depicted in images; scene analysis and the interpretation of line-drawings of polyhedra.

*assessment:* practical assignments

**5042 Advanced Artificial Intelligence IVB (Machine Learning)**

level: IV points value: 2

availability: not offered in 1996

subject quota: may apply

*prerequisite:* 6378 Artificial Intelligence III OR 8352 Artificial Intelligence IV

*restrictions:* 2651 Advanced Artificial Intelligence B (Advanced Artificial Intelligence and Machine Learning)

*contact hours:* contact Department of Computer Science

*content:* This subject concentrates on various issues involving AI and machine learning. In particular we examine inductive learning - learning from examples, explanation based learning; abduction, genetic algorithms and classifier systems; program synthesis. Other issues covered include: conceptual structures, abduction, natural language and dialogue management and computational design.

*assessment:* practical assignments, term paper, exam

## Group D linguistics subjects

### 4594 Foundations of Linguistic Theory IV

level: IV points value: 4 duration: semester 1

subject quota: may apply

restrictions: 7892/4914 Foundations of Linguistics II/III

contact hours: 2 hours lectures a week and one hour tutorial a fortnight

content: No previous knowledge of linguistics is assumed. The course will give students an overview of the field of modern linguistics and basic skills in linguistics and sociolinguistic analysis

assessment: practical exercises, project or essay and exam

### 3355 Language, Cognition and Reality IV

level: IV points value: 6 duration: semester 2

subject quota: may apply

restrictions: 8262 Language, Cognition and Reality

contact hours: 1 hour lecture and 1 tutorial a week

content: This subject is concerned with the role the lexical and grammatical structures of languages play in shaping their users' perceptions of reality. It will begin with the classical Sapir-Whorf hypothesis of linguistic relativity and consider more recent findings in the area of categorisation, environmental discourse and political rhetoric. Particular attention will be paid to the role of linguistic and conceptual diversity in the 21st century.

assessment: essay, tutorial presentation and exam

## Group E histology and anatomy subjects

### 1678 Head and Neck and Neuroanatomy IV

level: IV points value: 6 duration: full year

assumed knowledge: While there is no formal prerequisite, students are expected to do sufficient background reading to attain a basic understanding of the subject area. Prospective students should contact the course coordinator for information about appropriate background reading.

restrictions: 9646 Head and Neck and Neuroanatomy

contact hours: 2 hours lectures and 2 hours tutorial/practical work

content: The major part of the subject deals with the regional gross anatomy of the head, neck and vertebral region, and the functional anatomy of the central nervous system. Additionally students undertake an in-depth study of special topics, involving reading, practical work and essays, in the areas of comparative anatomy of the skull and of the central nervous system, and functional anatomy of the vertebral column.

assessment: end of semester examinations and essays

## Group F physiology subjects

### 3155 Neurobiology IV

level: IV points value: 2 duration: semester 2

subject quota: may apply

restrictions: 4632 neurobiology III, 8546 Neurobiology

assumed knowledge: While there is no formal prerequisite, students are expected to do sufficient background reading to attain a basic understanding of the subject area. Prospective students should contact the course coordinator for information about appropriate background reading.

contact hours: 2 hours lectures a week

content: This subject will acquaint students with current views on the function of the nervous system, and the methods used for investigating its function. Particular attention will be paid to the role of sensory systems in the control of movements.

assessment: final written examination

# Master of Education

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar.

As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

## Specific Course Rules

### 1 Admission requirements

1.1 An applicant for admission to the degree of Master of Education shall:

- (a) have qualified for at least a Class II honours degree of the University or of another University accepted for the purpose by the University, and have qualified for the Graduate Diploma in Education of the University or for a qualification accepted by the University as equivalent; or
- (b) have passed subjects equivalent to at least 24 points from the subjects listed under Rule 6 for the degree of Master of Educational Studies; or
- (c) have qualified for the degree of Master of Educational Studies of the University.

1.2 Subject to the approval of the Council the Faculty may, in special cases and subject to such conditions or preliminary work (if any) as it may see fit to impose in each case, accept as a student for the Master's degree a person who does not hold a degree of a tertiary institution but has given evidence satisfactory to the Faculty of fitness to undertake work for the master's degree.

### 2 Status, exemption and credit transfer

2.1 With the permission of the Head of the Department of Education, students may be granted up to a maximum of eight points worth of coursework status for other studies undertaken in the University or other institutions.

2.2 In addition, students who have previously successfully completed the subject 3809 Approaches to Educational Research offered by the Department of Education will receive status for this subject in the Masters degree.

### 3 Approval of course of study at enrolment

3.1 Each student's course of study shall be approved by the Faculty at enrolment each year.

### 4 Duration of course

4.1 Except with the special permission of the Faculty, the Coursework/Research Induction component of the Masters degree shall be completed in one semester of full-time study or not more than three semesters of part-time study.

4.2 Except with the special permission of the Faculty, the Research component of the Masters degree shall be completed in not less than one year of full-time study or not more than three years of part-time study.

### 5 Qualification requirements

5.1 All students shall satisfactorily complete a coursework component to the value of eight points, the research induction subject 3809 Approaches to Educational Research, and a thesis.

5.2 The thesis component shall not be commenced until the other components of the course are completed. Normally, the subject 3809 Approaches to Educational Research shall be studied in the semester prior to the commencement of the thesis.

### 6 Course of study / Subjects of study

All students shall satisfactorily complete:

#### 6.1 Coursework subjects

6.1.1 Students shall take eight points of coursework from coursework subjects listed in Specific Course Rule 6.1 for the degree of Master of Educational Studies, with the exception of 3809 Approaches to Educational Research, to a maximum value of eight points; and coursework

subjects listed in Specific Course Rule 6.1 for the Master of Educational Administration (in addition to those listed in Specific Course Rule 6.1) to a maximum value of four points.

- 6.1.2 Students who will be undertaking research in an area requiring a knowledge of statistics will be encouraged to undertake the subject 8713 Introduction to Statistics in Educational Research as part of their coursework component.

## 6.2 Research Induction

All students shall complete the four point subject:

3809 Approaches to Educational Research

## 6.3 Thesis

All students shall carry out research work and present a satisfactory thesis on a subject approved by the Faculty. The Faculty shall appoint a supervisor or supervisors to guide the student.

## 7 Review of academic progress

- 7.1 A student who fails a subject and desires to take the subject again shall again attend lectures and satisfactorily do such written and practical work as the teaching staff concerned may prescribe.
- 7.2 A student who has twice failed a subject may not enrol for that subject again except by special permission to be obtained in writing from the Faculty and then only under such conditions as may be prescribed.
- 7.3 For the purposes of this clause a student who is refused permission to be assessed, by examination or otherwise, or who does not, without a reason accepted by the Head of the Department of Education as adequate, attend all or part of a final examination (or supplementary examination if granted) after having enrolled for at least two thirds of the normal period during which the subject is taught, shall be deemed to have failed the subject.

## 8 Assessment and examinations

- 8.1 There shall be four classifications of pass at the final examination in any subject: Pass with High Distinction, Pass with Distinction, Pass with Credit, and Pass.
- 8.2 On completion of work the student shall lodge with the Registrar three copies of the thesis prepared in accordance with directions given to students from time to time.

- 8.3 The Department shall appoint at least two examiners of the thesis, of whom at least one shall be an external examiner.

- 8.4 At the discretion of the examiners a student may be examined orally on the student's thesis and may also be required to pass a written examination connected with the subject of the thesis.

- 8.5 The examiners may recommend:

- (a) that the thesis be accepted as satisfactory for the purposes of 5 above; or
- (b) that the thesis be accepted as satisfactory for the purposes of 5 above after minor amendments have been made to the thesis; or
- (c) that the thesis be returned to the student for revision and re submission; or
- (d) that the thesis be not accepted.

## 9 Articulation with other awards

- 9.1 A student who holds the degree of Master of Educational Studies of The University of Adelaide and is granted 12 points of status shall surrender that degree before being admitted to the degree of Master of Education.

## Syllabuses

---

### course requirements

Subjects for this degree usually take the form of weekly two-hour seminars. Reading lists for each subject will be given in the Departmental Handbook.

### assessment

Assessment in each subject usually includes a combination of three or more of the following: seminar papers, seminar participation, essays, minor research project, book reviews and an examination.

For details of the subjects for this course, please refer to the Master of Educational Studies

# Master of Educational Administration

## Introductory remarks

This advanced course is designed for people who want to improve their capacities for administrative practice in educational settings or who wish to undertake studies preparatory to an administrative career in an educational setting.

Applications for entry to this course shall be made in writing direct to the Head of the Department of Education.

The above award has been developed within the framework of the General Course Rules printed at the end of the External Studies Handbook.

As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

## Specific Course Rules

### 1 Admission requirements

- 1.1 An applicant for admission to the degree of Master of Educational Administration course shall possess at least two years professional experience in education, in addition to either:
- a degree of the University or of another institution accepted for the purpose by the University, together with a Graduate Diploma in Education or other qualification in Education accepted for the purpose by the University; or
  - a Diploma in Teaching and a further qualification in Education of an institution or institutions accepted for the purpose by the University.
- 1.2 Subject to the approval of the Council the Faculty may, in special cases and subject to such conditions (if any) as it may see fit to impose in each case, accept as a student for the Masters degree a person who does not hold a degree of a tertiary institution but has given evidence satisfactory to the Faculty of fitness to undertake work for the Masters degree.
- 1.3 Applicants shall normally be enrolled initially in the Graduate Certificate in Educational Administration, on successful completion of which, they may transfer to the Masters degree.
- ### 2 Status, exemption and credit transfer
- 2.1 Students who have qualified for the Graduate Certificate in Educational Administration shall receive status to the value of twelve points of coursework for their previous studies.

2.2 Except by the special permission of the Head of the Department of Education, no student may gain status for the Research Project component of the course for other studies undertaken in the University or other institutions.

2.3 No student may be granted more than sixteen points of status toward the Masters degree.

### 3 Approval of course of study at enrolment

3.1 Each student's course of study shall be approved by the Faculty at enrolment each year.

### 4 Duration of course

4.1 Except with the permission of the Faculty, the studies for the degree shall be completed in not less than one and a half years of full-time study or no more than four and a half years of part-time study. The course is available in both internal and external modes of delivery.

### 5 Qualification requirements

5.1 All students shall complete coursework subjects and a research component to the total value of 36 points. The research component may be either an eight point Special Project or a Minor Project worth four points.

5.2 All students shall complete the coursework component of the course before proceeding to the Special Project.

**6 Course of study / Subjects of study**

**6.1 Coursework**

All students shall present passes in subjects to the value of 28 points chosen from the following:

6.1.1 Educational Administration subjects listed below to a maximum of 28 points:

code	subject title	points
3809	Approaches to Educational Research***	4
6257	Curriculum Change, Innovation and Leadership*	4
4562	Current Issues in Australian Education***	4
5240	Educational Administration (Directed Study)*	2
5093	Gender, Education and Social Change***	4
5017	Foundations of Administrative Practice I**	4
4993	Foundations of Administrative Practice II**	4
5899	Law and Education*	4
1898	Multicultural Society and Educational Policy	4
4387	Philosophy, Education and Administration*	4
1043	Policy Analysis for Education (Ed. Admin.)*	4
9537	Society, Education and its Administration*	4

\* Available in external mode only

\*\* Not offered in 1996

\*\*\* Available in internal mode only

6.1.2 Subjects (other than those listed in 6.1.1, above) to the value of 8 points from those listed in Rule 6 for the Master of Educational Studies.

**6.2 Special Project**

All students shall take one of the following:

3161	Special Project A	8
5835	Special Project B	8
3297	Special Project C	8
2104	Minor Project	4

The topic of the Project must be approved by the Department which shall appoint a supervisor to guide the research or independent study.

**7 Review of academic progress**

7.1 A student who fails a subject and desires to take the subject again shall again attend lectures and satisfactorily do such written and practical work as the teaching staff concerned may prescribe.

7.2 A student who has twice failed a subject may not enrol for that subject again except by special permission to be obtained in writing from the Faculty and then only under such conditions as may be prescribed.

7.3 For the purposes of this clause a student who is refused permission to be assessed, by examination or otherwise, or who does not, without a reason accepted by the Head of the Department of Education as adequate, attend all or part of a final examination (or supplementary examination if granted) after having enrolled for at least two thirds of the normal period during which the subject is taught, shall be deemed to have failed the subject.

**8 Assessment and examinations**

8.1 There shall be four classifications of pass at the final examination in any subject for the Masters degree: Pass with High Distinction, Pass with Distinction, Pass with Credit, and Pass.

**9 Articulation with other awards**

9.1 Students who have previously completed the Graduate Certificate in Educational Administration shall receive twelve points of status for the studies they have undertaken in the Graduate Certificate.

9.2 Students who have been awarded the Graduate Certificate in Educational Administration and subsequently successfully complete the requirements for the degree of Master of Educational Administration must surrender their first award before being admitted to the Master's degree.

9.3 Students who have previously completed the former Graduate Diploma in Educational Administration shall receive twelve points of status for the studies they have undertaken in the Graduate Diploma. Such students will not be required to surrender their Graduate Diploma before being admitted to the Master's degree.

## Syllabuses

### 3809 Approaches to Educational Research

points value: 4

duration: semester 1

availability: Internal mode only

contact hours: 1 two hour seminar a week

*content:* This subject is designed to provide students with an overview of research approaches used by staff within the Department of Education. In addition to considering various theoretical frameworks and methodological approaches, there will be a focus on practical aspects of setting up research projects through the stages of formulating a proposal, preparing a budget, collecting and analysing data, writing up results and formally presenting the thesis.

*assessment:* seminar participation and either development of a research proposal and concise outline, or an essay on a methodological approach or theoretical issue in educational research.

### 6257 Curriculum Change, Innovation and Leadership

points value: 4

duration: semester 1 or 2

availability: external mode only

*content:* The aim of this subject is to enable students to appraise critically a range of theories and practices in curriculum change and to begin to develop a rationale for administering recurrent curriculum development in their educational institutions. It will provide opportunities for students:

- 1 to apply an understanding of effective group leadership skills to review and plan for on-going curriculum renewal;
- 2 to examine the strategies and factors that facilitate or impede planned change in education;
- 3 to understand the technological, political and cultural considerations relating to the process of on-going curriculum renewal;
- 4 to appreciate the role of critical self-reflection in contributing to the continuous review and maintenance of the curriculum.

*assessment:* 2 written assignments of 3,000 words

### 5240 Educational Administration (Directed Study)

points value: 2

duration: semester 1 or 2

availability: external mode

*contact hours:* This subject involves an individualised program of negotiated study (external mode)

*content:* This subject consists of a work related project involving the theory and practice of educational administration. The program of study is negotiated on an individual basis and the student is assigned a supervisor. This subject is available to students who commenced their studies under a different course structure or who have transferred from another institution.

*assessment:* This may vary depending on the nature of the negotiated study.

### 5017 Foundations of Administrative Practice I

points value: 4

availability: not offered in 1996

*assumed knowledge:* Pre-Service Teacher Education

*restriction:* may not be taken with 9632 Foundation of Administrative Practice

*content:* This subject aims to provide a critical introduction to the formal knowledge base in educational administration. Particular attention is given to discriminating between, making sense of, and evaluating different and competing perspectives. Other purposes are: (1) to provide a basis for critical reflection on the informal knowledge and knowledge-in-use which informs personal and systemic administrative practice; and (2) to assist aspiring and practising administrators to develop a sound basis for problem solving and decision making and a set of satisfying and appropriate administrative practices. Topics of study include: the nature of good educational settings; perspectives on educational organisation and administration; the nature of administrative work; organisational culture and leadership in education.

*assessment:* a reading log; and one essay of 3,000 words on a negotiated topic

### 4993 Foundations of Administrative Practice II

points value: 4

availability: not offered in 1996

*prerequisites:* 5017 Foundations of Administrative Practice

*assumed knowledge:* Pre-Service Teacher Education

*restriction:* may not be taken with 9632 Foundations of Administrative Practice

*content:* Part II of this subject shares the aims of Part I. Particular emphasis is placed upon the evaluation of various perspectives in educational administration. In addition Part II aims to identify principles appropriate to the guidance of administration in educational institutions, and to explore ethical and gender issues in educational administration. Topics include: aspects of

organisational behaviour (such as communication and conflict management); organisational politics and power in education; ethics and educational administration; principles for administering educational institutions; gender relations in educational administration; and the state, education corporate management.

*assessment:* a reading log; and 1 essay of 4,000 words on a negotiated topic

### 5093 Gender, Education and Social Change

*points value:* 4 *duration:* semester 1

*availability:* Internal mode only

*restrictions:* 3487 Class, Gender and Schooling in Australia

*contact hours:* 2 hours per week

*content:* This subject analyses the ways in which formal education has contributed to the definition and transmission, or transformation, of gender roles and gender identity in Australia and other western societies since the eighteenth century. It aims to provide a crucial historical perspective to current issues in our education system concerning the nature of femininity and masculinity and the relations between the sexes. Recent historical research and theoretical scholarship have reassessed the changes in women's education since the nineteenth century and the related changes in their social roles. Very recently, the implications of our understanding of masculinity have begun to be investigated. The varying religious ideals of womanhood and manhood pursued in church school will be pursued as well as the changing gender assumptions embodied in the policies and organisation of the state education system. The importance of sport in inculcating a particular model of masculinity, and in altering traditional conceptions of femininity, will be among topics studied. The question of whether middle class norms of masculinity and femininity have differed from working class will be explored for its implications for schooling.

*assessment:* 2 essays of approximately 3,000 words; seminar participation

### 5899 Law and Education

*points value:* 4 *duration:* semester 2

*availability:* external mode only subject to availability of staff

*assumed knowledge:* Pre-Service Teacher Education

*content:* This subject examines the nexus between education and the law in Australia, and concentrates on the significance of the legal context within which professional educators and educational administrators

must operate. Basic legal principles are examined and pertinent court cases are analysed. The content includes: what is law? an overview of the Australian legal system; sources and classifications of law and their relevance for education; educational law in socio-historical context; jurisprudential issues of law and morality; critical legal studies and their significance for education.

*assessment:* 1 essay of 2,000 words (33 1/3%); and 1 essay of 4,000 words (66 2/3%)

### 4387 Philosophy, Education and Administration

*points value:* 4 *duration:* semester 2

*availability:* external mode only

*content:* This subject will look at recent developments in education and administration within the tradition of empiricism and analytic philosophy. After discussing the educational ideas of Dewey, Hirst and Peters, and the philosophical system of logical positivism, the subject will examine the development of these ideas by the Theory Movement and in more recent neo-pragmatist approaches. The dispute between the neo-pragmatists, on the one hand, and liberals and conservatives, on the other, will be discussed. The scope and limits of scientific methods in education and educational administration is the underlying concern of the subject.

*assessment:* a 2,000 word essay; 4,000 word essay

### 1043 Policy Analysis for Education (Ed. Admin.)

*points value:* 4 *duration:* semester 1 or 2

*availability:* external mode only

*content:* This subject aims to enable students to formulate policies for education, examine them critically and assess their effectiveness for future policy design.

(1) Students will examine the values and social theories underlying current policies in education; (2) Students will gain an understanding of the political, economic and cultural contexts in which educational policies are constructed; (3) Students will be introduced to theories in policy science; (4) Students will gain practical experience in the use of techniques for formulating and monitoring policies in education; (5) Students will examine the impact of policies within their own institutions.

*assessment:* two papers on topics to be negotiated and presented to the class and each summarised in 1,000 words (33 1/3%); and one major paper of 4,000 words (66 2/3%)

**9537 Society, Education and its Administration***points value:* 4      *duration:* semester 1 or 2*availability:* external mode only*restriction:* may not be presented with 1812 Theory of Educational Administration I*content:* The focus of this subject is on the relationship between theory and practice. The course examines contemporary hermeneutic and humanist approaches, critical theories, and post-modernist conceptions of education and its administration. Humanist and radical critiques of scientific views of teachers and administrators will be considered. Particular attention will be paid to the development of critical theories of education by theorists such as Gibson, Carr and Giroux, to the development of critical theories of administration by Foster, Alvesson and Pusey, and to the development of post-modernist understanding by, among others, Giroux and Kenway.*assessment:* 1 essay of 2,000 words, and 1 essay of 4,000 words**1898 Multicultural Society and Educational Policy***points value:* 4      *duration:* semester 1 or 2*availability:* semester 1 - external only; semester 2 - internal only*quota:* may apply*contact hours:* 2 hours per week (also available in the external mode)*content:* The theoretical framework of this subject is provided by humanist sociology. This is extended to social systems and developed in relation to ethnically plural societies. The key concepts are those of core values of different cultures, and personal cultural systems that individuals construct from the group values that are provided for them in society. Alternative orientations to cultural and structural pluralism are examined with special reference to curriculum and school organisations. Future cultural outcomes are then related to educational policy.*assessment:* 2 essays of 3,000 words and seminar paper**Research Component subjects****2104 Minor Project***points value:* 4      *duration:* semester 1 or 2*contact hours:* This subject is taught as a self-directed study under supervision*content:* This subject consists of a survey and review of the literature relating to some aspect of the theory and practice of education arising out of one of the earlier Masters course work subjects completed. Students will present a topic proposal which will be discussed with a supervisor who will recommend appropriate reading. Progress will be monitored through regular discussions between the supervisor and the student.*assessment:* literature review of 6,000 words**3161 Special Project A (Full-time)***points value:* 8      *duration:* semester 1 or 2*requirements:* This may take the form of an essay which provides evidence of the writer's ability to group, synthesise and critically assess the major issues involved in the area treated or of a minor research project which makes an original contribution to knowledge in a particular limited area. The total length should not exceed 15,000 words.**5835 Special Project B (Part-time)***points value:* 8      *duration:* full year*requirements:* see above**3297 Special Project C (Part-time)***points value:* 8      *duration:* full year*duration:* semester 2 of one year and semester 1 of following year*requirements:* see above

note: students must re-enrol in February

## Master of Educational Studies

Applications for admission to this course shall be made in writing to the Head of the Department of Education.

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar.

As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

### Specific Course Rules

#### 1 Admission requirements

1.1 An applicant for admission to the course of study for the degree of Master of Educational Studies shall:

- (a) have qualified for a degree of the University or for a degree of another institution accepted for the purpose by the University and have qualified for the Graduate Diploma in Education of the University or for an award accepted by the University as equivalent; or
- (b) have qualified for the Bachelor of Education or Bachelor of Educational Studies of the University or of another institution accepted for the purpose by the University.
- (c) Subject to the approval of the Council the Faculty may, in special cases and subject to such conditions or preliminary work (if any) as it may see fit to impose in each case, accept as a student for the Masters degree a person who does not hold a degree of a tertiary institution but has given evidence satisfactory to the Faculty of fitness to undertake work for the Masters degree.

#### 2 Status, exemption and credit transfer

- 2.1 Status for studies undertaken in the Department of Education in The University of Adelaide
- 2.2 Credit towards the degree of Master of Education may be granted up to a maximum of 24 points for the Bachelor of Educational Studies (upon surrender of the award); up to a maximum of eight points for completed Graduate Certificates (other than the Graduate Certificate in Educational Studies), without surrendering the award; or up to a maximum of twelve points for Graduate Certificates (other than the Graduate Certificate in Educational Studies), upon surrendering the award.

#### 2.3 Status for other studies undertaken

- 2.3.1 With special permission of the Faculty, Students may be permitted to take subjects at another institution for credit towards the Adelaide degree. Students may also be granted credit toward the Adelaide degree on account of work already completed at another institution.
- 2.3.2 A maximum of twelve points of status may be granted for work completed at another institution. Not more than four points of such status may be counted towards the required coursework subject Concentration outlined in 5.2 below.

#### 3 Approval of course of study at enrolment

- 3.1 Each student's course of study shall be approved by the Faculty at enrolment each year.

#### 4 Duration of course

- 4.1 To qualify for the Masters degree a student shall satisfactorily complete a course of one-and-a-half years of full-time study or the part-time equivalent.

#### 5 Qualification requirements

- 5.1 A student shall present subjects incorporating: a Concentration of coursework subjects in a particular field of study to the value of at least twelve points; a research component being either a Special Project or Minor Project to the value of eight or four points respectively; and other coursework elective subjects to a total value of 36 points.
- 5.2 A concentration of coursework subjects shall be subjects to the value of at least twelve points taken from:
  - (a) one of the Groups A to J in 6, below; *or*
  - (b) from Group C (Educational Psychology) combined with one of the Groups D to J (Curriculum Studies); *or*

(c) from Group Q (General Studies in Curriculum) combined with one of the Groups D to J (Curriculum Studies).

5.3 As an alternative to a Concentration, a student may, with the approval of the Head of the Department of Education, undertake subjects from at least three groups, provided that subjects to the value of at least eight points are taken from one of these groups.

## 6 Course of study / Subjects of study

6.1 All students shall undertake a Concentration of subjects as outlined in 5.2 above, to the value of twelve points taken from the following:

code	subject title	points
<b>A History and Philosophy of Education</b>		
5093	Gender, Education and Social Change	4
8989	Higher Education in Australia	4

### **6.2 Research component**

All students shall take one of the following:

- 2104 Minor Project 4  
3161 Special Project A (full time) 8  
5835 Special Project B (part time) 8  
3297 Special Project C (part time) 8

### **6.3 Elective subjects**

- 6.3.1 To complete the required total value of 36 points, students may, in addition to their required concentration and the research component, choose additional subjects from those listed in 6.1.
- 6.3.2 Students may also include one subject from those offered for the degree of Master of Educational Administration, and not also listed in 6.1.
- 6.3.3 Students may include subjects worth up to eight points offered by other institutions, provided that they are approved by the Head of the Department.

## **7 Review of academic progress**

- 7.1 A student who fails a subject and desires to take the subject again shall again attend lectures and satisfactorily do such written and practical work as the teaching staff concerned may prescribe.
- 7.2 A student who has twice failed a subject may not enrol for that subject again except by special permission to be obtained in writing from the Faculty and then only under such conditions as may be prescribed.
- 7.3 For the purposes of this clause a student who is refused permission to be assessed, by examination or otherwise, or who does not, without a reason accepted by the Head of the Department of Education as adequate, attend all or part of a final examination (or supplementary examination if granted) after having enrolled for at least two thirds of the normal period during which the subject is taught, shall be deemed to have failed the subject.

## **8 Assessment and examinations**

- 8.1 There shall be four classifications of pass at the final examination in any subject for the Graduate Diploma; Pass with High Distinction, Pass with Distinction, Pass with Credit, and Pass.

## **9 Articulation with other awards**

- 9.1 A student who is granted status of twelve points towards the Master's degree on account of a Graduate Certificate of The University of Adelaide shall surrender that Graduate Certificate before being admitted to the degree of Master of Educational Studies.
- 9.2 A student who is granted status of twelve or more points towards their Master's degree on account of a Bachelor of Education or Bachelor of Educational Studies of The University of Adelaide shall surrender the Bachelor's degree before being admitted to the degree of Master of Educational Studies.
- 9.3 Students who successfully complete the degree of Master of Educational Studies are eligible to apply for entry to the degree of Master of Education course and, if successful in gaining entry, receive eight points of status towards the Master of Education course, or twelve points if they have included the subject 3809 Approaches to Educational Research in their original degree.

## Syllabuses

### coursework

The syllabuses for the coursework component of the degree of Master of Educational Studies are published above, immediately after the schedules of the degree of Master of Education.

#### 1964 Adult Psychology and Education

*points value:* 4      *availability:* not offered in 1996

*quota:* may apply

*contact hours:* 2 hours of seminars a week

*content:* An introduction to the concepts of life-span developmental psychology with the emphasis on the implications for adult educators.

*assessment:* essay, seminar paper and reviews

#### 3809 Approaches to Educational Research

*points value:* 4      *duration:* semester 1

*contact hours:* 1 two hour seminar a week

*content:* This subject is designed to provide students with an overview of research approaches used by staff within the Department of Education. In addition to considering various theoretical frameworks and methodological approaches, there will be a focus on practical aspects of setting up research projects through the stages of formulating a proposal, preparing a budget, collecting and analysing data, writing up results and formally presenting the thesis.

*assessment:* seminar participation and either development of a research proposal and concise outline, or an essay on a methodological approach or theoretical issue in educational research.

#### 3360 Counselling in Education

*points value:* 4      *duration:* semester 2

*contact hours:* 2 hours per week

*content:* This unit will not constitute professional preparation for school counsellors, but is intended for teachers who have undertaken, or are likely to undertake, administrative or pastoral roles which involve counselling. It will include an introduction to counselling theory, an examination of organisational structures in education, family dynamics, the roles of designated school counsellors and some common psychological and social problems relevant to school children (e.g. Attention Deficit Disorder and other learning and development difficulties, child abuse, domestic and school violence, drug and alcohol abuse).

*assessment:* paper of c.2,000 words on an aspect of counselling in schools (50%) and counselling skills practical (50%)

#### 4562 Current Issues in Australian Education

*points value:* 4

*duration:* semester 2

*contact hours:* 2 hours per week

*content:* This subject, presented through seminars, will focus on current policy and curriculum issues in education at the State and National levels. Although topics will change in response to shifts in the socio-political sphere, issues such as teacher appraisal, the National Curriculum debate, social justice policies, SACE and assessment, multi-cultural education, the governance of schools, market-driving education and teacher registration and regulation could be among the topics. As a result of the course, teachers will be able to understand further the issues shaping their work context.

*assessment:* essay of 3,000 words (50%); policy critique of 3,000 words (50%)

#### 6257 Curriculum Change, Innovation and Leadership

*points value:* 4

*duration:* semester 1 or 2

*availability:* external mode only

*syllabus details:* see Master of Educational Administration

#### 8832 Education in Multilingual Settings

*points value:* 4

*duration:* semester 1

*contact hours:* 2 hours a week

*content:* The subject will consider basic concepts from the sociology of language in the work of scholars such as Haugen and Fishman. Attention will be focused on recent studies of bilingualism and biliteracy within their regional contexts, with special reference to the 'lesser used' languages of Europe, Asia, North America and the USSR. Scholars whose research will be considered include Lambert, Giles, Clyne, Cummins, Skutnabb-Kangas, Paulston and Andersson. Emphasis will be placed on the role of the school in helping to maintain and/or acquire bilingualism and early biliteracy, especially through Australian educational systems.

*assessment:* 2 essays of 3,000 words, plus a seminar paper

#### 8333 English in Education and Contemporary Culture

*points value:* 4

*duration:* semester 2

*quota:* may apply

*prerequisites:* Pass in English III or other qualification accepted by the Department of Education

*contact hours:* 2 hours of seminars a week

*content:* The role and status of English in Education is examined in relation to a number of theoretical studies of language development. Prospective students should consult the Head of Department.

*assessment:* essay and seminar paper

### **5093 Gender, Education and Social Change**

*points value:* 4                      *duration:* semester 1

*restrictions:* 3487 Class, Gender and Schooling in Australia

*contact hours:* 2 hours per week

*content:* This subject analyses the ways in which formal education has contributed to the definition and transmission, or transformation, of gender roles and gender identity in Australia and other western societies since the eighteenth century. It aims to provide a crucial historical perspective to current issues in our education system concerning the nature of femininity and masculinity and the relations between the sexes. Recent historical research and theoretical scholarship have reassessed the changes in women's education since the nineteenth century and the related changes in their social roles. Very recently, the implications of our understanding of masculinity have begun to be investigated. The varying religious ideals of womanhood and manhood pursued in church school will be pursued as well as the changing gender assumptions embodied in the policies and organisation of the state education system. The importance of sport in inculcating a particular model of masculinity, and in altering traditional conceptions of femininity, will be among topics studied. The question of whether middle class norms of masculinity and femininity have differed from working class will be explored for its implications for schooling.

*assessment:* 2 essays of approximately 3,000 words; seminar participation

### **8989 Higher Education in Australia**

*points value:* 4                      *duration:* semester 1

*prerequisite:* Previous study of 9876 would be advantageous.

*quota:* may apply

*contact hours:* 2 hours of seminars a week

*content:* This subject is an historical study of higher educational institutions in Australia, the government policies and organisations concerned with higher education, and local and international influences on their development. Some prior knowledge of Australian educational history is desirable (preliminary

reading will be advised for those without it). The course will begin with an overview of the European academic tradition, and the nature of English and Scottish universities in the early nineteenth century. The foundation of the first Australian institutions of higher education will be analysed, and twentieth century changes and developments will be related to changes in knowledge, higher education and the professions in America and Europe.

Higher technical education and teacher education outside universities will be examined. The shift from a Euro-centric curriculum, the growing importance of research, and the increasing politicisation of higher education, will be studied. The role of higher education in shaping and selecting elites, together with issues of access and opportunity, will be among the themes pursued in assessing the significance of higher education in Australian society.

Particular attention will be given to South Australia, and students will have the opportunity to pursue in depth a topic of their own choice, for the research essay component of the assessment.

*assessment:* two essays and seminar contribution

### **7079 Honours English A (Education)**

*points value:* 4                      *availability:* not offered in 1996

*prerequisites:* English III or other qualification in English accepted by the Departments of Education and English

*contact hours:* 2 hours of seminars a week

*content:* Prospective students should consult with the Education English course coordinator before enrolling. One paper, not already passed, from the Honours topics offered by the Department of English.

*assessment:* essays

### **4198 Honours English B (Education)**

*points value:* 4                      *availability:* not offered in 1996

*prerequisites:* English III or other qualification in English accepted by the Departments of Education and English

*contact hours:* 2 hours of seminars a week

*content:* Prospective students should consult with the of Education English course coordinator before enrolling. One paper, not already passed, from the Honours topics offered by the Department of English.

*assessment:* essays

**5105 Honours Mathematics (Education)**

*points value:* 8 *duration:* full year

*prerequisites:* a qualification in Mathematics acceptable to Department of Education and the relevant department in Faculty of Mathematical Sciences

Prospective students should consult with the Education Mathematics course coordinator before enrolling.

*restriction:* A candidate shall not present this subject for the degree unless 2051 Education Mathematics is also presented.

*contact hours:* 2 hours of seminars a week

*content:* Three options not already passed, from those offered in Honours Pure Mathematics, Honours Applied Mathematics, Honours Statistics, Honours Computer Science and Honours Mathematical Physics.

*assessment:* see relevant Mathematics option

**8713 Introduction to Statistics in Educational Research**

*points value:* 4 *duration:* semester 1

*quota:* may apply

*contact hours:* 2 hours of seminars a week

*content:* This subject will provide students with an introduction to the use of statistics in educational research. Emphasis will be placed on students achieving an understanding of the statistical procedures considered so that they can think critically about suitable procedures for the collection and analysis of data, and about the educational usefulness of calculated statistics. Students will gain experience with using the SPSSX package on the Arts Faculty's computer suite.

*assessment:* course work assessments plus examination. A pass, but no higher grade, may be obtained on coursework assessments only.

**6310 Issues for Australians IV**

*points value:* 4 *duration:* semester 1

*contact hours:* 2 hour seminars a week

*content:* The subject aims to introduce students to the analysis of contemporary issues. Current debates, concerns and theoretical perspectives will be canvassed by academics from various disciplines. The subject will address a range of areas such as Australian literature and media, tourism, identity, and environment.

*assessment:* two minor papers of 1,500 words each; major paper of 5,000 words

**5899 Law and Education**

*points value:* 4 *duration:* semester 2

*availability:* external mode only

*syllabus details:* see Master of Educational Administration

**1595 Making Sense of the Scientific World**

*points value:* 4 *duration:* semester 2

*contact hours:* 2 hours a week

*content:* Much recent research in science education has focused on how untutored students view aspects of the world, and how these views change after teaching. This subject will examine some of this research, and its implications for teaching.

- 1 Research studies which have used different methodologies to identify students' beliefs on selected scientific topics will be examined.
- 2 Each student will nominate a science topic of personal interest and will select and use an appropriate methodology to identify students' views. In most cases it is expected that this will be a near replicate of another study.
- 3 Where students' views differ from those of scientists, change is required, but this proves to be quite difficult. Different methodologies and suggested requirements for effecting this change have been proposed and tested by several authors. Some of these will be critically examined.

While this subject is aimed at students with a science background, others may enrol with permission.

*assessment:* a paper describing the individual project, plus a 3,000 word essay

**2051 Mathematics Education**

*points value:* 4 *availability:* not offered in 1996

*prerequisites:* Pass in a third year Mathematics subject, or other qualification accepted by the Department of Education

*contact hours:* 2 hours of seminars a week

*content:* A study of current research and theory in mathematics education.

*assessment:* essays and assignments as appropriate for gauging each student's progress in the knowledge and understanding of the subject matter

**1898 Multicultural Society and Educational Policy**

*points value:* 4 *duration:* semester 1 or 2

*availability:* semester 1 - external only; semester 2 - internal only

*quota:* may apply

*contact hours:* 2 hours per week (also available in the external mode)

*content:* The theoretical framework of this subject is provided by humanist sociology. This is extended to social systems and developed in relation to ethnically plural societies. The key concepts are those of core values of different cultures, and personal cultural systems that individuals construct from the group values that are provided for them in society. Alternative orientations to cultural and structural pluralism are examined with special reference to curriculum and school organisations. Future cultural outcomes are then related to educational policy.

*assessment:* 2 essays of 3,000 words and seminar paper

### **8566 Personal Factors in Education**

*points value:* 4                      *duration:* semester 1

*quota:* may apply

*contact hours:* 2 hours a week

*content:* This subject considers various teacher and student personality characteristics and their implications for learning. The effects of anxiety on learning, and the issue of gender and classroom performance are also examined.

*assessment:* essay (70%) and seminar paper (30%); or essay (30%) and seminar paper (70%) (to be decided by the student)

### **4387 Philosophy, Education and Administration**

*points value:* 4                      *duration:* semester 2

*availability:* external mode only

*syllabus details:* see Master of Educational Administration

### **1043 Policy Analysis for Education (Ed. Admin.)**

*points value:* 4                      *duration:* semester 1 or 2

*availability:* external mode only

*syllabus details:* see Master of Educational Administration

### **7721 Progressive Educational Theory and Practice**

*points value:* 4                      *duration:* semester 2

*restriction:* may not be taken with 1611 Public and Progressive School Traditions

*contact hours:* 1 two hour seminar a week

*content:* This subject examines those theories of the child and of learning, and the experimental forms of schooling based upon them since the late eighteenth century, which put forward new and unorthodox educational ideals, and came to be called the progressive education movement. Starting with Rousseau, the subject will examine Pestalozzi's child-centred theory, Froebel's theories and creation of the kindergarten, Cecil Reddie and John Badley and their pioneering progressive secondary schools in England, John Dewey and early twentieth century American progressive education, Rudolf Steiner and the Waldorf Schools, Maria Montessori and early childhood education, A S Neil and libertarian and Freudian influences on schooling, and Kurt Hahn and Outward Bound education. Australian progressive schools founded since World War I will also be examined, and the influence of progressive educational ideas on Australian government and independent schools.

*assessment:* two essays, seminar contribution

### **8900 Schools as Cultural Systems**

*points value:* 4                      *duration:* semester 2

*quota:* may apply

*contact hours:* 2 hours of seminars a week

*content:* Humanistic sociology of culture is developed in relation to schools that are viewed as distinct cultural systems in society. Various types of schools are examined and members of the systems concerned are studied by the juxtaposition of the humanistic sociological and structural functional approaches in sociology.

*assessment:* essays

### **2502 Scientific Revolutions and Education**

*points value:* 4                      *availability:* not offered in 1996

*prerequisites:* Science qualifications or permission of the Head of the Department of Education

*contact hours:* 2 hours of seminars a week

*content:* The subject involves a critical analysis of the work of Thomas Kuhn. Case-histories are then studied to illustrate the application of different aspects of Kuhn's theory to various branches of science. The educational consequences of Kuhn's thesis are examined and conclusions drawn in regard to its relativistic and prescriptive qualities.

*assessment:* essays

**7611 Secondary Education in Australia**

*points value:* 4      *availability:* not offered in 1996

*restriction:* may not be taken if 1611 Public and Progressive School Traditions has already been passed

*contact hours:* 2 hour seminar a week

*content:* This subject is an historical analysis of secondary schooling and school systems in Australia: private venture schools, church schools, state schools and education policies, and changes in the secondary curriculum. The influence of theory and overseas practice upon the development of Australian secondary education will be examined, with particular attention to English, Scottish, Catholic (especially Irish) and German Lutheran traditions. The changing social and economic functions of secondary education as it became universal will be considered. Some basic knowledge of the history of Australian education will be assumed.

*assessment:* two essays, research project and seminar contribution

**9537 Society, Education and its Administration**

*points value:* 4      *duration:* semester 1 or 2

*availability:* external mode only

*syllabus details:* see Master of Educational Administration

**9217 Teaching The Australian Studies Curriculum**

*points value:* 4      *duration:* semester 2

*contact hours:* 2 hour seminar per week

*content:* This course aims to introduce students to the major issues in teaching Australian Studies at the senior secondary level. The course is intended to equip teachers of the new SACE course in Australian Studies with the appropriate theoretical and methodological tools to become critical and successful practitioners in the inter-disciplinary study of Australian society. The main reference point for the course will be the SSABSA subject framework for Australian Studies, but students will also examine a set of questions relating to the nature of interdisciplinary studies, the content of Australian Studies courses and appropriate methodologies.

*assessment:* a curriculum project based on SACE and a major essay outside the SACE parameters

**9876 The Idea of Liberal Education**

*points value:* 4      *availability:* not offered in 1996

*restriction:* may not be taken with 2995 Education in Renaissance Italy and England

*contact hours:* 2 hour seminar a week

*content:* The idea of liberal education, which derives from the classical civilisation of Greece and Rome, returned to the centre of western educational thought and aims during the Renaissance. It remained the basis of secondary and university education until the mid-nineteenth century, and still underlies much of the rationale of the humanities curriculum. With the broadening of access to extended education so that it is no longer the preserve of an elite, the intellectual, moral and aesthetic values embraced by the term 'liberal education' now increasingly compete with instrumental concepts of education as vocational training or state indoctrination.

This subject will examine the idea of liberal education historically from its re-emergence in Renaissance Italy, pursuing it in the context of British secondary and university education up until the nineteenth century, and concluding with a consideration of how it has been transplanted and adapted in the United States, where it constitutes the predominant rationale for undergraduate education. The subject stands alone, but is also intended to serve as background to the subjects Higher Education in Australia and Secondary Education in Australia.

*assessment:* essays and seminar contribution

**8671 The Nature of Science and Science Curricula**

*points value:* 4      *availability:* not offered in 1996

*quota:* may apply

*assumed knowledge:* While the subject is aimed at students with a science background, others may enrol with permission.

*contact hours:* 2 hours of seminars a week

*content:* Many school science courses expressly intend students to develop an understanding of scientific method. What is this scientific method? What, if anything, is unique to science and scientists? Commonly held views of science and scientists will be identified and alternative views examined. Relationships between existing science courses and particular notions will be explored.

*assessment:* essays

**5456 Theories of Psychology in Education**

*points value:* 4      *availability:* not offered in 1996

*quota:* may apply

*contact hours:* 2 hours of seminars a week

*content:* This subject will be concerned with selected psychological theories of demonstrable consequence to education. A critical examination will be made of these theories, their educational interpretations and the research they have generated.

The course necessitates consulting articles from several journals of psychology and education. These, together with relevant books, will be detailed as the course progresses.

*assessment:* essays

**3469 Women, Work and Education**

*points value:* 4      *availability:* not offered in 1996

*quota:* may apply

*contact hours:* 2 hours of seminars a week

*content:* This subject is a comparative study of women in England, in the United States and in Australia, in the recent past. It is intended to examine the impact of industrialisation on women's work and women's family role and the changing nature of the sexual division of labour. The place of educational institutions in maintaining or challenging that division will be critically examined.

*assessment:* essays

**5803 Youth Arts in Australia: A Context for Arts in Education**

*points value:* 4      *duration:* semester 2

*content:* The course aims to introduce students to youth arts as an enterprise with which schools and young people are closely involved. Attention will be given to the nature of the arts, art education and the Australian cultural context from both an historical and contemporary perspective. Analyses of arts funding policies will also be undertaken. Students will consider the arts as presented to youth, and the artistic expressions of young people, as a focus. The disciplines of dance, drama, visual arts, music and literature as presented in school curricula will be examined. The transformations by young people of these several modes into their own forms of artistic expression will be highlighted.

*assessment:* essay of 3,000 words (60%); class presentation of 1,500 words (20%); minor case study of 1,500 words (20%)

**Research Component subjects:**

**candidates take either**

**2104 Minor Project**

*points value:* 4      *duration:* semester 1 or 2

*contact hours:* This subject is taught as a self-directed study under supervision.

*content:* This subject consists of a survey and review of the literature relating to some aspect of the theory and practice of education arising out of one of the earlier Masters course work subjects completed. Students will present a topic proposal which will be discussed with a supervisor who will recommend appropriate reading. Progress will be monitored through regular discussions between the supervisor and the student.

*assessment:* literature review of 6,000 words

**or**

**3161 Special Project A (Full-time)**

*points value:* 8      *duration:* semester 1 or 2

*requirements:* This may take the form of an essay which provides evidence of the writer's ability to group, synthesise and critically assess the major issues involved in the area treated or of a minor research project which makes an original contribution to knowledge in a particular limited area. The total length should not exceed 15,000 words.

**or**

**5835 Special Project B (Part-time)**

*points value:* 8      *duration:* full year

*requirements:* see above

**or**

**3297 Special Project C (Part-time)**

*points value:* 8      *duration:* full year

*duration:* semester 2 of one year and semester 1 of following year

*requirements:* see above

*note:* students must re-enrol in February

# Master of Environmental Studies

## Introductory remarks

This course is designed to provide graduates in any relevant discipline with a theoretical framework for the analysis of environmental problems; an opportunity to acquire knowledge of, and skills in, those environmental subject areas which they consider particularly relevant to their own personal aspirations and/or professional development, and supervised experience in the design and execution of environmental research projects.

Applications for admission to this course shall be made through the South Australian Tertiary Admissions Centre (SATAC) on the appropriate form, by the required date. Except by the special permission of the Director of the Mawson Graduate Centre for Environmental Studies, students may not defer their studies.

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar.

As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

## Specific Course Rules

### 1 Admission requirements

- 1.1 An applicant for admission to the course of study for the degree of Master of Environmental Studies must have obtained an Honours degree, or other qualification accepted by the University as equivalent to the Honours degree, or the Graduate Diploma in Environmental Studies.
- 1.2 Subject to the approval of the Council the Faculty may, in special cases and subject to such conditions (if any) as it may see fit to impose in each case, accept as a student for the Master's degree a person who does not hold a degree of a tertiary institution but has given evidence satisfactory to the Faculty of fitness to undertake work for the Master's degree.

### 2 Status, exemption and credit transfer

- 2.1 Students who have previously completed the requirements of the Graduate Diploma in Environmental Studies shall receive full status for Part I of the degree as outlined in 5 and 6 below.
- 2.2 No student may be granted more than 24 points of status toward the Masters degree.

### 3 Approval of course of study at enrolment

- 3.1 Each student's course of study shall be approved by the Faculty at enrolment each year.

### 4 Duration of course

- 4.1 Except with the permission of the Faculty, the course for the degree shall be completed in two years of full-time study or not more than five years of part-time study.

### 5 Qualification requirements

- 5.1 The course of study for the degree of Master of Environmental Studies shall be made up of two parts. Unless exempted therefrom by the Faculty, every student for the degree shall complete both Part I and Part II. Part I consists of the coursework component of the degree, Part II of further coursework and the research component.

### 6 Course of study / Subjects of study

Students shall complete both Part I and Part II as follows:

#### 6.1 Part I

- 6.1.1 Students shall complete the full-year subject:

9791 Environmental Politics, Philosophy and Ethics 6

- 6.1.2 Students shall complete one semester-length subject chosen from each of the following four groups of subjects, in consultation with the Director of the Centre:

code	subject title	points
<b>Environmental Science Group</b>		
6339	Ecosystem Patterns and Processes	3
7007	Principles of Environmental Earth Science	3
8594	Special Topic in Environmental Science*	3
<b>Environmental Management Group</b>		
2438	Conservation in Human-Dominated Landscapes	3
3216	Environmental Systems Management	3
6631	Managing Coastal Environments	3
8594	Special Topic in Environmental Management*	3
<b>Environmental Policy Group</b>		
5140	Environmental Policy	3
5013	International Environmental Diplomacy	3
7888	Special Topic in Environmental Policy*	3
2743	The Global Commons	3
2124	Urban Environments**	3
<b>Environmental Assessment and Planning Group</b>		
7766	Ecotourism: Opportunities and Impacts	3
9474	Environmental Hazards	3
8865	Environmental Impact Assessment (Env St)	3
2667	Special Topic in Environmental Planning*	3

6.1.3 Students shall complete two semester-length subjects chosen from:

- (a) elective subjects chosen from the following:
- |      |  |   |
|------|--|---|
| 7620 | Business and the Environment                       | 3 |
| 3953 | Conservation and Heritage Law (Env St)             | 3 |
| 1716 | Educating for the Environment                      | 3 |
| 2290 | Environmental Economics                            | 3 |
| 5614 | Environmental Linguistics                          | 3 |
| 3099 | Environmental Planning and Protection Law (Env St) | 3 |
| 8831 | Environments of Inland Waters                      | 3 |

- |      |   |   |
|------|---|---|
| 5752 | Heritage Conservation Theory                | 3 |
| 3990 | Land Use Planning Law (Env St)              | 3 |
| 4358 | Population and the Environment (Env St)     | 3 |
| 2267 | Specialist Topic in Environmental Studies * | 3 |
| 3208 | Women and Environments                      | 3 |

and

(b) subjects listed in 6.2 above, not already offered to fulfil the requirements of 6.2

and

(c) subject to the approval of the Director of the Mawson Graduate Centre for Environmental Studies or related subjects at appropriate levels offered by other faculties.

\*Availability to be advised

\*\*Not available in 1996

## 6.2 Part II

Unless exempted by the Faculty, every student for the Master's degree shall complete:

- (a) the full-year (six point) subject 3687 Australian Environmental Issues;
- (b) two semester-length or equivalent (three point) subjects chosen from any of those listed for Part I of the course (Rule 6.1) which have not already been presented; and
- (c) the full-year (twelve point) subject 8245 Environmental Research Project.

## 7 Review of academic progress

- 7.1 A student who fails a subject and desires to take the subject again shall again attend lectures and satisfactorily do such written and practical work as the teaching staff concerned may prescribe.
- 7.2 A student who has twice failed a subject may not enrol for that subject again except by special permission to be obtained in writing from the Faculty and then only under such conditions as may be prescribed.
- 7.3 For the purposes of this clause a student who is refused permission to be assessed, by examination or otherwise, or who does not, without a reason accepted by the Director of the Mawson Graduate Centre as adequate, attend all or part of a final examination (or supplementary examination if granted) after having enrolled for at least two thirds of the normal period during which the subject is taught, shall be deemed to have failed the subject.

## **8 Assessment and examinations**

- 8.1** There shall be four classifications of pass in any subject for the Masters degree: Pass with High Distinction, Pass with Distinction, Pass with Credit, and Pass.
- 8.2** On completion of the research project the student shall lodge with the Director of the Centre three copies of the research project report prepared in accordance with directions given to students from time to time.

## **9 Articulation with other awards**

- 9.1** Students who gain entry to the degree of Master of Environmental Studies on the basis of the completed Graduate Diploma in Environmental Studies shall receive full status for the work they have undertaken in the Graduate Diploma.
- 9.2** Students who have conferred upon them the award of Graduate Diploma in Environmental Studies who subsequently successfully complete the requirements for the degree of Master of Environmental Studies must surrender their first award before being admitted to the Master's degree.
- 9.3** Notwithstanding the above Rules a student who has been enrolled for the degree of Master of Environmental Studies and who has completed the work prescribed for the Graduate Diploma and who has not been awarded the Master's degree shall, on written application to the Registrar, be awarded the Graduate Diploma.
- 9.4** Students enrolled in the Master's degree will be required to complete the degree before enrolling for the degree of Doctor of Philosophy.

## Syllabuses

### 3687 Australian Environmental Issues

*points value:* 6 *duration:* full year

*restrictions:* 9183 Environmental Issues in South Australia

*contact hours:* 1 three hour workshop per week plus field work.

*content:* This subject deals with selected environmental issues within the historical and political context of Australia since European settlement. The environmental issues dealt with in the subject are selected on the basis of their Australian or regional significance, but the subject may also select some issues on the basis of public controversy or local interest. The subject provides a background to various issues together with strategies for dealing with them, particularly legislative strategies.

*assessment:* to be advised

### 7620 Business and the Environment

*points value:* 3 *duration:* semester 2

*quota:* will apply

*contact hours:* 1 three hour workshop per week

*content:* This subject considers the political dimension of the conflict between business and environmental concern in Australia. Environmental concern is experienced as a threat to many sections of private business. Major business organisations, such as the Business Council of Australia (BCA) have funded research on what they think business's response to environmental problems should be. Both the BCA and the Confederation of Australian Industry (CAI) have taken part in extended negotiations with environmentalists and government officials over drafting major national 'statements' on the environment such as the National Conservation Strategy for Australia (circa 1983) and the proposals on Ecologically Sustainable Development (1990–2). At other times business has campaigned strongly against expressions of environmental concern, as in the case of mining Coronation Hill, building a pulp mill at Wesley Vale or increasing the areas of land held in national parks or included on the National Estate Register. This subject examines some of the ways in which business has mobilised against environmental concern and the sources of power claimed and deployed in the struggle to get governments to accept the business perspective. To this end the major debates over the interpretation of business power will be considered along with a series of examples of conflicts and negotiations over environmental issues.

*assessment:* to be advised

### 3953 Conservation and Heritage Law (Env.St.)

*points value:* 3 *duration:* semester 2

*quota:* will apply

*restrictions:* 9844 Conservation and Heritage Law

*prerequisites:* 3099 Environmental Planning and Protection Law (Env.St.)

*contact hours:* 1 one hour lecture plus one 2 hour seminar per week

*content:* The subject will commence with a brief overview of systems for the allocation of resource tenures, focusing on arid lands, surface and underground waters, and minerals and petroleum. The capacity of these traditional tenurial systems to address conservation objectives will be considered.

There then follows a detailed examination of specific conservation measures, including those relating to national parks; wildlife protection; marine parks; identification and protection of the national estate; and world heritage classification and protection. In addition, measures to achieve conservation objectives on private lands will be considered, including heritage agreements; vegetation clearance controls and the British system of national parks. This section of the subject concludes with an examination of measures designed to identify and protect items of the built and cultural heritage (including Aboriginal culture).

The final section of the subject provides an historical account of the emergence of international environmental organisations and the development of international environmental law and policy. Whilst emphasis will be placed upon conservation and heritage measures (world heritage, wildlife protection, wetlands protection and Antarctica), some attention will be directed also to environmental protection measures, particularly with respect to pollution of the high seas and protection of the atmosphere from acid rain, ozone depletion and the greenhouse effect.

*assessment:* to be advised

### 2438 Conservation in Human-dominated Landscapes

*points value:* 3 *duration:* semester 2

*prerequisites:* 6339 Ecosystem Patterns and Processes or equivalent

*contact hours:* 2 hours of lectures and a 3 hour laboratory session a week, plus a compulsory one week field camp

*content:* This subject examines the problems of nature conservation in human-dominated landscapes where native vegetation persists as isolated islands of remnant

natural land within a sea of exotic vegetation and human constructions. The subject will consider strategies for conserving remnant natural land both within and outside nature reserve systems. It will also examine the nature conservation function of the rural and urban land that surrounds remnant natural land and provides human-modified and human-constructed habitats for a wide variety of native species.

*assessment:* to be advised

### 6339 Ecosystem Patterns and Processes

*points value:* 3

*duration:* semester 1

*contact hours:* 2 hours of lectures and a 3 hours of laboratory session a week plus a compulsory one week field camp

*content:* The subject is concerned with the processes that determine the biophysical character of natural ecosystems in the human-dominated landscapes of South Australia's agricultural provinces. Here, native forest and woodland communities are now confined to isolated patches of remnant natural land scattered within a matrix of settled (urban/rural) land. On this remnant natural land, natural ecosystem processes have been extensively modified by fragmentation of the pre-European native vegetation cover and other forms of human-induced disturbance.

Introductory lectures examine the historical development of the modern concepts necessary for understanding the geographic diversity of biological communities and their environmental relations. This introduction is followed by a series of lectures on climate and soil as the main physical environmental factors affecting plant growth and, thus, the vegetation attributes of Australia's native forest and woodland communities. The structure, composition and functioning of these ecosystems are then discussed. The final lectures of the subject examine disturbance, both natural and human-induced, in relation to vegetation dynamics and the regeneration strategies of plants and animals.

*assessment:* to be advised

### 7766 Ecotourism: Opportunities and Impacts

*points value:* 3

*duration:* semester 2

*contact hours:* 1 three hour workshop per week plus field work

*quota:* will apply

*content:* This subject examines ecotourism from an environmental management perspective rather than a tourism industry perspective. The subject will focus on the identification of ecotourism opportunities in natural

environments (particularly the arid/ semi-arid environments of South Australia), the assessment of the potential impacts of ecotourism activities in these environments and the development of strategies to manage these impacts so that activities will be ecologically sustainable.

*assessment:* to be advised

### 1716 Educating for the Environment

*points value:* 3

*duration:* semester 2

*contact hours:* 1 three hour workshop per week, plus field work

*content:* Educating for the environment adds to the generally accepted purposes of education, the development of an environmental consciousness among learners in order to change values, attitudes, actions and behaviours in ways that will help in saving our environment and creating an improved future world.

The first objective of this subject will be to identify the principles on which the development of this environmental consciousness should be based and document its spread in formal educational systems. The problem of incorporating Environmental Education in to conventional models of curriculum development will also be considered.

The second objective will be to consider how educational processes in both formal and informal spheres of education reflect the principles on which environmentalism is based: an active, committed, less hierarchical system of education.

The third objective is to examine educational practices in formal institutions at all levels and in informal situations including business, union, community and other organisations.

In pursuing each of these objectives, examples from Australia, from other countries and international initiatives will be studied.

*assessment:* to be advised

### 2290 Environmental Economics

*points value:* 3

*duration:* semester 1

*contact hours:* 2 hours per week

*content:* The subject will consider the following topics: Economics as the science of choice; Human satisfaction and demand; Production and supply; The interplay of supply and demand and the notion of the market; Failure of the market externalities, information deficiencies; Time in economies. Problems of inter-generational allocation; Benefit/cost analysis and social decision making; Taxes, subsidies and bans as remedies for market failure; Income distribution effects of environmental policy and its remedies;

Global economic issues: resource depletion, irreversibility, extinction, etc.; No growth economics: limits to growth; Sustainable development.

Overall the object is not to produce instant economists, but rather, to enable the students to converse with economists and know when economists are up to no good! To this end the course will attempt to outline basic neo-classical micro-economic analyses, but always critically.

*assessment:* to be advised

#### 9474 Environmental Hazards

*points value:* 3

*duration:* semester 2

*contact hours:* 1 three hour seminar/workshop per week, plus field work

*content:* The subject gives an introduction to the description, classification and human perception of environmental hazards. It covers rapid onset events such as earthquakes, storms and cyclones, flooding, volcanic activity, together with human induced events such as explosions, oil and chemical spills, nuclear accidents and major transport disasters. The subject also covers risk assessment, adjustment to hazards, disaster preparedness and planning. The course uses Australian and/or local examples where appropriate.

*assessment:* to be advised

#### 8865 Environmental Impact Assessment (Env.St.)

*points value:* 3

*duration:* semester 2

*quota:* will apply

*restrictions:* 1183 Environmental Impact Assessment Practice

*contact hours:* 1 three hour workshop per week

*content:* The subject introduces the methodology of environmental impact assessment (EIA) and examines the development of EIA overseas. The subject then focuses on EIA in Australia and, in particular, draws on case studies of EIA in South Australia. Different levels of EIA are examined alongside the responsibilities for decision-making. A number of major projects with environmental impact statements (EISs) are critically examined together with the EIS process in South Australia. This includes discussion of recent changes to the legislation.

*assessment:* to be advised

#### 5614 Environmental Linguistics

*points value:* 3

*duration:* semester 2

*quota:* will apply

*restrictions:* 2267 Specialist Topic in Environmental Studies (1994)

*contact hours:* 1 three hour workshop per week

*content:* The subject explores the role of language in human perceptions of the environment. It will address both the question what principled limitations are imposed by the grammar and lexicon of selected languages and the ways in which a language such as English can be used to create different discourses on environmental topics. Some of the topics to be discussed will include: ecospeak; linguistic and natural classes; environmental metaphors; upgrading environmental terminology; environmental disclosure in non-European languages.

*assessment:* to be advised

#### 3099 Environmental Planning and Protection Law (Env.St.)

*points value:* 3

*duration:* semester 1

*quota:* will apply

*restrictions:* 7272 Environmental Planning and Protection Law

*prerequisites:* 2594 Bridging Environmental Law

*contact hours:* 2 one hour lectures per week, plus fortnightly tutorials

*content:* The subject examines regulatory mechanisms that address environmental problems and focuses particularly upon the regulation of development. An introductory section examines the nature of environmental problems in Australia and the general structure of environmental law. Specific topics addressed subsequently are constitutional responsibilities and powers with respect to environmental planning and protection; land-use planning systems; environmental impact assessment; and legislation to promote development.

A further section of the subject, which will vary in content from year to year, examines more recent forms of environmental regulation, to be selected from the following topics: pollution controls (air, water, noise); waste disposal (solid and hazardous wastes); regulation of hazardous substances (pesticides, environmental contaminants, radioactive substances, lead, asbestos); regulation of human-ingested products (food additives, therapeutic substances). Finally, a section on environmental litigation will examine tortious actions, criminal and civil enforcement of environmental statutory appeal legislation and statutory appeal procedure. The role of courts and resolution of environmental disputes will also be discussed.

*assessment:* to be advised

**5140 Environmental Policy***points value:* 3*duration:* semester 2*quota:* will apply*restrictions:* 7735 Environmental Policymaking*contact hours:* 1 three hour seminar workshop per week

*content:* This subject will analyse and differentiate between the environmental policy processes of social movements, interest and pressure groups, formal organisations, informal networks, institutions (including the Parliament and the Cabinet), political parties, bureaucracies and corporations. Also, the role of the mass media, the intelligentsia (including Universities), scientists, the education and legal systems (including numerous quasi-adversarial systems) will be discussed. Finally, the role of the individual will be focused upon.

*assessment:* to be advised**9791 Environmental Politics, Philosophy and Ethics***points value:* 6*duration:* full year*contact hours:* 1 three hour seminar/workshop per week

*content:* The aim of this subject is to set the scientific, political and social set of ideas called environmentalism within the mainstream of Western thought and culture. It provides a description of modern environmentalism and justifications for many of the policies and practices for which it argues. Western attitudes to our environment have been formed by exploitative rather than stewardship religious views, reductionist rather than holistic scientific methods, anthropocentric rather than ecocentric philosophical attitudes and exploitative rather than conservative economic theories and practices. The way that each of these is currently changing will be described. Particular aspects of modern environmental movements, including Deep (or Transpersonal) Ecology; Ecofeminism; Ecosocialism; Social Ecology and varieties of Green Politics will be examined. A particular feature of this subject will be the practical investigation of the ethical and political dilemmas raised by a variety of issues such as the promotion of genetic engineering, ecotourism, non-violent direct action, and practical community politics.

*assessment:* to be advised**8245 Environmental Research Project***points value:* 12*duration:* full year*restrictions:* 2989 Minor Dissertation (Env.St.) 4520 Minor Dissertation*contact hours:* to be advised

*content:* This subject is the research component of the M.Env.St. course. To successfully complete the subject students must attend a series of workshops on environmental research methodology during the first semester, submit a satisfactory proposal for a research project and a satisfactory research plan early in the first semester, provide a satisfactory account of progress made in the research project by mid-year, and submit a satisfactory dissertation on the methodology and results of the research project by the end of the year.

*assessment:* to be advised, but primarily based on a 15,000 word thesis**3216 Environmental Systems Management***points value:* 3*duration:* semester 2*contact hours:* 1 three hour seminar/workshop per week

*content:* This subject examines some of the ways in which human societies have sought to modify and manipulate their natural environment from the time of prehistoric hunter-gatherers and the inception of plant and animal domestication until the present day. The aim of the subject is to suggest how our global physical and biological resources may be managed on a more sustainable basis by careful evaluation of both the beneficial and the adverse effects of various forms of human interaction with local, regional and global natural systems. Topics considered include deforestation, biodiversity and global carbon storage; land degradation and desertification; salinisation and integrated catchment management; soil, water and air pollution; plant and animal extinctions; global warming and climatic change; management of toxic wastes; ozone depletion; disease; international waters; UNEP, UNDP and the Global Environment Facility; the International Geosphere-Biosphere Program; and environmental management in Australia.

*assessment:* to be advised**8831 Environments of Inland Waters***points value:* 3*duration:* semester 1*quota:* will apply*prerequisites:* 6339 Ecosystem Patterns and Processes, or equivalent

*contact hours:* 40 hours lectures plus laboratory and fieldwork over a four-week period

*content:* This subject offers students the choice of either a one-week module dealing with the ecology of floodplain rivers plus a two-week module dealing with the ecology of lakes, reservoirs and wetlands, or a second two-week module dealing with water resources management and conservation, plus the one-week module.

*assessment:* to be advised

### **5752 Heritage Conservation Theory**

*points value:* 3 *duration:* semester 1

*contact hours:* 1 three hour seminar/workshop per week

*content:* Conservation is the general term applied to the management of both cultural and natural heritage property. With relation to the built environment conservation covers the preservation restoration, maintenance and adaptation of both building and urban areas. The practice of conservation requires specialised knowledge of theoretical and technical skills beyond practitioners' usual sphere of responsibility. Students are required to select a specific topic which may include a practical/technical, theoretical/philosophical, investigatory/historical or regulatory aspect. Students may elect to do a topic related to the natural environment or Aboriginal heritage. In all cases, studies must be approached from a philosophical viewpoint which first argues the rationale of conservation both in general terms and as related to their specific topic.

*assessment:* to be advised

### **5013 International Environmental Diplomacy**

*points value:* 3 *duration:* semester 1

*contact hours:* to be advised

*content:* This subject examines the way national governments and international organisations have responded to environmental issues such as transboundary air and water pollution, conservation of migratory species, the Enhanced Greenhouse Effect, ozone depletion, Antarctica, toxic and nuclear wastes, and others which cross or lie entirely outside national borders.

The negotiations leading to and subsequent working of conventions and other international agreements such as the Rio Earth Charter, the World Heritage Convention, the Law of the Sea Convention, the Tropical Forest Action Plan, the Antarctic Treaty System and others will be examined. The environmental work and influences of major international organisations such as

the World Bank, GATT, FAO, UNEP and UNESCO and non-governmental organisations such as Greenpeace, IUCN, WWF will be discussed.

*assessment:* to be advised

### **3990 Land Use Planning Law (Env.St.)**

*points value:* 3 *duration:* semester 2

*restrictions:* 7225 Land-Use Planning Law, 7730 Land Use Planning Law

*prerequisites:* 3099 Environmental Planning and Protection Law (Env.St.), or equivalent

*contact hours:* 1 two hour lecture per week, plus fortnightly tutorials

*content:* The focus of this subject is upon the control of land development under the South Australian planning system, and then considers the nature of the planning provisions under the Planning Act 1982 and of controls imposed thereunder. It examines the powers and procedures of local government. Thereafter the subject considers the methods of dealing with selected planning issues, including shopping housing segregation and aesthetics. The subject then considers the role of appeal tribunals and public participation procedures; alternative modes of planning; control of government development, particularly transport; and responsibility for housing. The subject concentrates upon legal analysis of planning problems.

*assessment:* to be advised

### **6631 Managing Coastal Environments**

*points value:* 3 *duration:* semester 1

*contact hours:* 1 three hour workshop per week, plus field work.

*content:* This subject examines selected strategies for managing coastal environments from around the world, although the main focus is the Australian coast. Where appropriate, local examples are used and followed up with local coastal fieldwork. The subject provides an overview of various coastal processes as a background to an understanding of coastal management issues. A major focus of the subject is on recent coastal management initiatives in Australia by both the Commonwealth Government and State Governments.

*assessment:* to be advised

### **4358 Population and the Environment (Env.St.)**

*points value:* 3 *duration:* semester 2

*restrictions:* 2757 Population and the Environment

*contact hours:* one 2x4 hour workshop per week

*content:* The subject introduces basic concepts and analysis of ecosystems and key interrelationships between population and environment within the context of development issues and policies. It deals with resource depletion and management, land use and agricultural systems related to population pressure, population mobility, urbanisation and the environment and integrated approaches to population–environment planning.

*assessment:* to be advised

### **7007 Principles of Environmental Earth Science**

*points value:* 3                      *duration:* semester 2

*contact hours:* 1 three hour seminar/workshop per week

*content:* This subject deals with the evolution and characteristics of the earth's major terrestrial and marine environments, and with the natural processes which gave rise to these environments. It also aims to provide a general overview of the global and regional environmental fluctuations resulting from interactions between the geosphere, biosphere and atmosphere from the time of the earliest recognisable human societies onwards. Particular attention is focused on the ways in which human activities have accelerated or modified natural processes and interactions, often to the detriment of both human societies and their environment. Topics considered include evolution of the Australian landscape; climatic change and climatic variability; ocean–atmosphere interactions; historic floods and droughts; human impact on climate; desert expansion, contraction and desertification; biogeochemical cycles and the global carbon budget; vegetation changes and biological extinctions; soil development, changing land use and land degradation; geological fluctuations in atmospheric composition and temperature; natural hazards; sea level fluctuations; the global energy budget; the hydrological cycle, response of rivers and lakes to environmental change; and the Gaia hypothesis.

*assessment:* to be advised

### **9873 Special Topic in Environmental Management**

*points value:* 3                      *duration:* semester 1 or 2

*availability:* subject to staffing

*contact hours:* 1 three hour workshop per week

*content:* Details of this subject will be provided in the prospectus for the Mawson Graduate Centre when specialist teaching is available.

*assessment:* to be advised

### **2667 Special Topic in Environmental Planning**

*points value:* 3                      *duration:* semester 1 or 2

*availability:* subject to staffing

*contact hours:* 1 three hour workshop per week

*content:* Details of this subject will be provided in the prospectus for the Mawson Graduate Centre when specialist teaching is available.

*assessment:* to be advised

### **7888 Special Topic in Environmental Policy**

*points value:* 3                      *duration:* semester 1 or 2

*availability:* subject to staffing

*contact hours:* 1 three hour workshop per week

*content:* Details of this subject will be provided in the prospectus for the Mawson Graduate Centre when specialist teaching is available.

*assessment:* to be advised

### **8594 Special Topic in Environmental Science**

*points value:* 3                      *duration:* semester 1 or 2

*availability:* subject to staffing

*contact hours:* 1 three hour workshop per week

*content:* Details of this subject will be provided in the prospectus for the Mawson Graduate Centre when specialist teaching is available.

*assessment:* to be advised

### **2267 Specialist Topic in Environmental Studies**

*points value:* 3                      *duration:* semester 2

*availability:* to be advised

*contact hours:* to be advised

*content:* Details of this subject will be provided in the Mawson Graduate Centre for Environmental Studies prospectus when specialist teaching is available.

*assessment:* to be advised

### **2743 The Global Commons**

*points value:* 3                      *duration:* semester 2

*contact hours:* 1 three hour seminar/workshop per week

*content:* This subject examines those environmental issues which transcend national boundaries and which affect the whole earth or a significant part of it. The scientific evidence on the issue, the legal, political and

economic means which have been or might be used to prevent or abate the problem will all be examined.

The topics concerned include:

- the atmosphere and its pollution: the Enhanced Greenhouse Effect, ozone depletion, acidification;
- the hydrosphere and its exploitation: marine pollution, enclosed seas, shared river basins;
- conservation of the biosphere: retaining genetic diversity, preserving the forests, special topics such as world fisheries, migratory species, whales, etc;
- global energy supplies and use including the special topics of radiation and nuclear wastes.

Each of these will be examined from a variety of national and international perspectives. The particular pressures that national sovereignty and national inequalities have on causing and ensuring the continuance of these environmental issues will be examined.

*assessment:* to be advised

### 2124 Urban Environments

*points value:* 3      *availability:* not offered in 1996

*restrictions:* 2267 Specialist Topic in Environmental Studies, as offered in 1992

*contact hours:* 1 three hour workshop per week, plus field work and supervised group-project work

*content:* This subject concentrates on people and urban environments. It is divided into two major parts. First, the political and social theory literature which pertains to urban environments will be examined. There is a heavy emphasis on politics and social equity in urban environments. Secondly, certain urban environmental issues will be focused upon to bring this theory to life. Some of these issues will include: housing, transport, 'lifestyle', urban planning, domestic arrangements, 'amenity' provision, and local government.

*assessment:* to be advised

### 3208 Women and Environments

*points value:* 3

*duration:* semester 1

*quota:* will apply

*contact hours:* 3 hours of lectures, seminars and tutorials per week

*content:* This subject explores the interface between environmental studies and women's studies. In particular, the subject is concerned with the development of environmental feminism as a theoretical discourse and a political practice. Introductory sessions examine Western concepts of the society/environment relation from a range of feminist perspectives (liberal, marxist, socialist, radical, and ecofeminist). This introduction is followed by a series of sessions dealing with feminist theory and practice relevant to the analysis of women's environmental perception, behaviour and agency. The theme of these sessions is 'many women, many environments'. In the context of 'many women' they deal with the effects of class, ethnicity, sexuality and ableness on women's environmental relations. In the context of 'many environments', they explore women's environmental relations in situations ranging from Western cities and suburbs to the dwindling pockets of tropical rainforest in the Third World. The concluding sessions of the subject consider feminist critiques of science and technology, particularly as these critiques relate to the scientific production of environmentally damaging technologies, and to the use of scientific modelling and managerial techniques to understand and control the environment.

*assessment:* to be advised

# Master of Logic

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar.

As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

## Specific Course Rules

### 1 Admission requirements

- 1.1 An applicant for admission to the course of study for the Master of Logic degree must have qualified for an Honours degree from the University at First Class or IIA standard in the field of Logic or other appropriate field of study in Departments of the Faculty of Arts or the Faculty of Mathematical and Computer Sciences, or the Graduate Diploma in Logic, or other qualification accepted for the purpose by the University.
- 1.2 Subject to the approval of the Council the Faculty may, in special cases and subject to such conditions (if any) as it may see fit to impose in each case, accept as a student for the degree a person who does not hold a degree of a tertiary institution but has given evidence satisfactory to the Faculty of fitness to undertake work for the Masters degree.

### 2 Status, exemption and credit transfer

- 2.1 Except by the special permission of the Head of the Department of Philosophy, no student may gain status towards the Thesis component of the course for other studies undertaken in the University or other institutions.
- 2.2 Students of the Masters degree who have successfully completed the Graduate Diploma in Logic will be awarded status for any subjects completed in the Graduate Diploma of Logic which form part of the requirements of Rule 6.1, below. Students who apply for and are granted status to the value of 18 or more points for their Graduate Diploma studies under this provision will be required to surrender their Graduate Diploma before being admitted to the Masters degree (see 9.2, below).

### 3 Approval of course of study at enrolment

Each student's course of study shall be approved by the Faculty at enrolment each year.

### 4 Duration of the Award

To qualify for the degree a student shall satisfactorily complete a course of two years of full-time study or the part-time equivalent.

### 5 Qualification requirements

The course of study for the degree of Master of Logic shall be made up of two parts with an aggregate points value of 48 points, consisting of coursework subjects to the value of 28 points and a 20 point Thesis.

### 6 Course of study / Subjects of study

All students shall satisfactorily complete the following two parts:

#### 6.1 Coursework Subjects

##### 6.1.1 Core Subjects

All students shall complete the following subject:

3402 Advanced Logic A (PG)	6
7665 Argument (PG)	4

(Students who are exempted from studying the subject 2614 Advanced Logic A (PG) due to having previously completed 4259 Logic IIIA or its equivalent will be required to present a further 6 points of elective subjects listed in 6.1.2 in lieu of this requirement.)

6.1.2 Elective Subjects

All students shall complete elective subjects to an aggregate value of 12 points chosen from the following:

2614	Advanced Logic B (PG)	2
1619	Artificial Intelligence (PG)	2
9669	Graduate Topic in Logic A	2
5048	Graduate Topic in Logic B	2
7889	Graduate Topic in Logic C	2
2043	Graduate Topic in Logic D	2
1998	Intermediate Logic (PG)	
2254	Knowledge Representation (PG)	2

**Flinders University Subjects:**

COMP 3007	Artificial Intelligence	2
COMP 3009	Computational Logic	2
PHIL 2080	Logic, Reasoning and Argumentation	4

and, subject to the approval of the Department, students may be able to pursue in lieu of 2 elective points further studies towards the requirements of the Project in Logic outlined in 6.1.3, below. Such students will enrol in the following subject:

2637	Supplementary Major Project in Logic	2
3890	Major Project in Logic	

6.1.3 Project in Logic

All students shall enrol in:		
3890	Major Project in Logic	6

6.2 Thesis

All students shall complete:		
6383	Thesis (Logic)	20
<i>or</i>		
8081	Thesis (Logic) Mid-Year Intake	20

7 Academic progress

7.1 A student who fails a subject and desires to take the subject again shall again attend lectures and satisfactorily do such written and practical work as the teaching staff concerned may prescribe.

7.2 A student who has twice failed a subject may not enrol for that subject again except by special permission to be obtained in writing from the Faculty and then only under such conditions as may be prescribed.

8 Assessment and examinations

8.1 There shall be four classifications of pass in any subject for the Masters degree: Pass with High Distinction, Pass with Distinction, Pass with Credit, and Pass.

8.2 For the purposes of this clause a student who is refused permission to be assessed, by examination or otherwise, or who does not, without a reason accepted by the Head of the relevant Department as adequate, attend all or part of a final examination (or supplementary examination if granted) after having enrolled for at least two thirds of the normal period during which the subject is taught, shall be deemed to have failed the subject.

8.3 On completion of the thesis the student shall lodge with the Registrar three copies of the thesis prepared in accordance with directions given to students from time to time.

8.4 The Faculty shall appoint two examiners for the thesis, one of whom, shall be associated with the teaching of the course and one of whom shall be external both to the teaching of the course and to the relevant Department.

9 Articulation with other awards

9.1 Students who complete the Graduate Diploma in Logic at credit level or higher are eligible to apply for the Master of Logic course, and if successful, on gaining entry, receive status for the work they have undertaken in the Graduate Diploma.

9.2 Students who have conferred upon them the award of Graduate Diploma in Logic who subsequently successfully complete the requirements of the Master of Logic and who have been granted 18 or more points of status on behalf of their Graduate Diploma must surrender their first award before being admitted to the degree of Master of Logic.

9.3 Notwithstanding the above Rules a student who has been enrolled for the degree of Master of Logic and who has completed the work prescribed for the Graduate Diploma in Logic and who has not been awarded the Masters degree shall, on written application to the Registrar, be awarded the Graduate Diploma.

## Syllabuses

### 3402 Advanced Logic A (PG) (see 4259 Logic 111A)

*points value:* 6                      *duration:* semester 2

*prerequisites:* 3037 Logic 2 or 1998 Intermediate Logic (PG) or 5780 Logic 111 or 2614 Advanced Logic B, or, with permission, an equivalent standard.

*contact hours:* 2 lectures and 1 tutorial weekly.

*content:* infinite sets, semantics of first order logic, computability, non-classical logic, inconsistent mathematics, philosophical aspects of logic, mathematics and computing.

*assessment:* examination and essay.

### 2614 Advanced Logic B (PG)

*points value:* 2                      *duration:* semester 2

*prerequisites:* either 9786 Mathematics 1 (Pass Div 1) or 9595 Mathematics 1M (Pass Div 1) or 3037 Logic 11 or 1998 Intermediate Logic (PG).

*contact hours:* 2 weekly lectures and 1 tutorial every 3 weeks.

*content:* propositional logic, first order theories, interpretations and models, Godel's completeness theorem for predicate logic. Computability: Turing machines, recursive functions and the halting problem. Undecidability of the predicate calculus. Godel's theorem for elementary number theory.

*assessment:* 2 hour exam and a small percentage may be allocated for class exercises

### 7665 Argument (PG)

*points value:* 4                      *duration:* semester 2

*contact hours:* 2 lectures and 1 tutorial weekly.

*content:* a course in applied logic: truth, validity, soundness, necessity, contingency, impossibility, definition, circularity, Venn diagrams, structure of arguments, legal reasoning, opinion, fallacies, induction, explanation, science and pseudoscience.

*assessment:* examination and essays.

### 1619 Artificial Intelligence (PG)

*points value:* 2                      *duration:* semester 1

*prerequisites:* none, but students must consult with the degree coordinator over assumed knowledge.

*contact hours:* 2 lectures and 2 hours practical work per week, plus a tutorial every 3 weeks.

*content:* AI methodology and fundamentals, description, matching and goal reduction, ANALOGY, and/or trees, exploiting natural constraints, Waltz algorithm, search, hill climbing, beam, best-first, A\*, minimax procedure and alpha-beta pruning for game-playing, learning, parameter-adjustment and Winston near-miss/reinforcement procedure, means-end analysis and GPS, rule-based systems, forward- and backward-chaining, MYCIN, Xcon, generate and test paradigm with Dendral. Representation issues: inheritance, demons, defaults, perspectives, frames, primitives, aspects of Prolog, neural networks, recurrent backpropagation technique.

*assessment:* 2 hour exam, practicals and exercises.

### 5048 Graduate Topic in Logic B

*points value:* 2                      *duration:* semester 1

*prerequisites:* 3402 Advanced Logic A or 4259 Logic 111A

*contact hours:* 2 hour seminar weekly.

*content:* a selection of advanced topics in non-classical logic.

*assessment:* examination.

### 7889 Graduate Topic in Logic C

*points value:* 2                      *duration:* semester 2

*prerequisites:* 3402 Advanced Logic A or 4259 Logic 111A

*contact hours:* 2 hour seminar weekly.

*content:* a selection of advanced topics in category theory.

*assessment:* examination

### 2043 Graduate Topic in Logic D

*points value:* 2                      *duration:* not available in 1996.

*prerequisites:* 3402 Advanced Logic A or 4259 Logic 111A

*contact hours:* 2 hour seminar weekly.

*content:* a selection of advanced topics in semantics.

*assessment:* examination.

### 1998 Intermediate Logic (PG)

*points value:* 4                      *duration:* semester 1

*prerequisites:* Logic 1 or, with permission, an equivalent.

*contact hours:* 2 lectures and 1 tutorial weekly.

*content:* proof theory and introduction to semantics of first order logic with identity, alternative notations and alternative logics, many-valued logics, modal logic, introduction to philosophical aspects of logics.

*assessment:* examination and essay.

### **2254 Knowledge Representation (PG)**

*points value:* 2                      *duration:* semester 2

*prerequisites:* 6378 Artificial Intelligence 111 or 8352 Artificial Intelligence IV .

*contact hours:* 2 lectures and 2 hours practicals per week plus a tutorial every 3 weeks.

*content:* issues in knowledge representation, the frame problem, the qualification problem, predicate logic as knowledge representation, the closed world assumption, inheritance hierarchies, theorem proving, resolution, natural deduction, logic programming, introduction to nonmonotonic reasoning, statistical reasoning, Bayes Theorem, Bayesian networks, Dempster-Shaffer theory, fuzzy logic.

*assessment:* 2 hour exam, practicals and exercises.

### **9669 Graduate Topic in Logic A**

*points value:* 2                      *availability:* not offered in 1996

*prerequisites:* 3402 Advanced Logic A or 4259 Logic 111A.

*contact hours:* 2 hour seminar weekly

*content:* a selection of advanced topics in classical logic.

*assessment:* examination or essay

### **3890 Major Project in Logic**

*points value:* 6                      *duration:* full year

*prerequisites:* 3402 Advanced Logic A or 4259 Logic 111A

*contact hours:* supervision as appropriate.

*content:* this subject is intended as a research project which may be taken as the last subject for the Grad Dip Log.

*assessment:* project.

### **2637 Supplementary Major Project in Logic**

*points value:* 2                      *duration:* full year

*prerequisites:* 3402 Advanced Logic A or 4259 Logic 111A

*contact hours:* supervision as appropriate.

*content:* this subject is intended as a supplementary subject to extend the Major Project in Logic.

*assessment:* project.

### **6383 Thesis (Logic)**

*points value:* 20                      *duration:* full year

*prerequisites:* the Graduate Diploma of Logic or an equivalent.

*contact hours:* supervision as appropriate.

*content:* this subject is required as part of the Master of Logic.

*assessment:* thesis.

### **8081 Thesis (Logic)(mid Year Intake)**

*points value:* 20                      *duration:* semester 1 or 2

*details:* as for Thesis (Logic).

## **Flinders University Subjects**

These subjects are offered by The Flinders University of South Australia. Students enrolled at The University of Adelaide, in the Graduate Certificate, Graduate Diploma or Masters course in Logic, wishing to take these subjects (within the limits indicated in the Schedules) will be granted appropriate credit towards their Adelaide award.

Students taking any of the subjects must comply with the enrolment procedures of The Flinders University. Details of those procedure are available from the Flinders University Enrolments Officer. Having completed a subject (s) students should present a copy of their official results from Flinders University to the Faculty of Arts so that status can be awarded in their Adelaide degree.

### **COMP 3007 Artificial Intelligence**

*points value:* 2                      *duration:* semester 2

*prerequisites:* none, but students must consult with the degree coordinator over assumed knowledge,

Exclusions: 8352 Artificial Intelligence IV or 6378 Artificial Intelligence.

*contact hours:* 2 lectures and one tutorial weekly.

*content:* topics chosen from: methodologies of AI, philosophical issues, cognition and perception, knowledge representation methods, automated inference, rule-based systems, search methods, machine learning, knowledge engineering, computer vision, natural language understanding, game playing. PROLOG will be the major vehicle for assignments.

*assessment:* to be advised

### **COMP 3009 Computational Logic**

*points value:* 2                      *duration:* semester 1

*prerequisites:* none, but students must consult with the degree coordinator over assumed knowledge.

**contact hours:** 2 lectures and one tutorial weekly.

**content:** a study of the language and methods of logic, conceived as providing natural tools for writing and evaluating computer programs. Topics include concepts of propositional and predicate logic, theories with equality, and modal logic as applied to artificial intelligence. A major emphasis will be the way research into automated theorem proving has spawned the PROLOG language and the logic programming paradigm.

**assessment:** examination.

### **PHIL 2080    Logic, Reasoning and Argumentation**

**points value :** 4                      **duration:** semester 2

**contact hours:** 2 hours lectures and one hour tutorial per week.

**content:** a study of propositional and predicate logic, emphasising its role in analytical problems, including those involving in heterogeneous (spatial and verbal) forms.

**assessment:** to be advised

## Master of Psychology (Clinical)

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar.

As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

### Specific Course Rules

#### 1 Admission requirements

1.1 An applicant for admission to the course of study for the degree of Master of Psychology (Clinical) shall have qualified for an Honours degree of Bachelor, with Honours in Psychology, of The University of Adelaide or for an Honours degree of another institution accepted for the purpose by the University.

1.2 Subject to the approval of the Council the Faculty may, in special cases and subject to such conditions (if any) as it may see fit to impose in each case, accept as a student for the Master's degree a person who does not hold a degree of a tertiary institution but has given evidence satisfactory to the Faculty of fitness to undertake work for the Master's degree.

#### 2 Status, exemption and credit transfer

2.1 The Faculty of Arts may grant such status for other studies undertaken in the University or other institutions in any subject as it may determine up to a maximum of three subjects, provided that any such subject has not been presented for another degree.

2.2 Except by the special permission of the Head of the Department of Psychology, no student may gain status for the subject 1681 Research Project in Applied Psychology for other studies undertaken in the University or other institutions.

#### 3 Approval of course of study at enrolment

3.1 Each student's course of study shall be approved by the Faculty at enrolment each year.

#### 4 Duration of course

4.1 Except with the permission of the Faculty, the subjects of study and the dissertation shall be completed in not more than two years of full-time study or four years of part-time study.

4.2 A student whose work on the dissertation is interrupted for a reason acceptable to the Dean may be granted an intermission of candidature by the Dean on behalf of the Faculty. If such an application is approved the maximum period specified in clause 4.1 will be adjusted accordingly by adding the length of the intermission.

#### 5 Qualification requirements

5.1 Unless exempted therefrom by the Faculty all students will satisfactorily complete Compulsory Subjects to the value of 24.5 points, one Optional subject to the value of 2.5 points, three eighteen-week periods (of 5 half-days per week or the equivalent) of placement in different institutions or organisations offering psychological services approved by the Head of the Department of Psychology, and a Research Dissertation.

5.2 In the normal pattern of study, students enrolled on a full-time basis will complete the compulsory subjects in the first year\* together with one placement, and one of the optional subjects together with two more placements in the second year. The research project for the dissertation may be commenced in the first year or early in the second year; students may wish to consider linking the project to one of the placements.

\*Except that two core subjects will be offered in the second year.

#### 6 Course of study / Subjects of study

Unless exempted therefrom by the Faculty of Arts, every student for the degree shall satisfactorily complete the following four components:

**6.1 Compulsory subjects**

All students shall complete the following compulsory subjects:

code	subject title	points
8903	Abnormal Clinical Psychology*	2.5
6335	Adult Clinical Psychology*	5
9842	Applied Methodology (M)*	2.5
9645	Child Clinical Psychology*	2.5
6328	Health Psychology	2.5
1224	Psychological Assessment (M)*	5
6934	Work with Human Systems: Theory, Practice and Ethics*	2.5

**6.2 Optional subject**

At least three of the following subjects will be offered in the second year of the course. All students must undertake one subject chosen from the following:

3220	Disability: Vocational Training and Assessment (M)	2.5
3372	Health Psychophysiology	2.5
6789	Ergonomics (M)	2.5
9575	Psychology of Unemployment (M)	2.5
3179	Rehabilitation Psychology (M)	2.5

**6.3 Three placements, as follows:**

7221	Placement II (M)	4
3481	Placement III (M)	4
4647	Professional Skills Workshop and Placement I	4

**6.4 Research Project**

1681 Research Project in Applied Psychology 9

\*Not offered in 1996

**7 Review of academic progress**

- 7.1** A student who fails a subject and desires to take the subject again shall again attend lectures and satisfactorily do such written and practical work as the teaching staff concerned may prescribe.
- 7.2** A student who has twice failed a subject may not enrol for that subject again except by special permission to be obtained in writing from the Faculty and then only under such conditions as may be prescribed.
- 7.3** For the purposes of this clause a student who is refused permission to be assessed, by examination or otherwise, or who does not, without a reason accepted by the Head of the

Department of Psychology as adequate, attend all or part of a final examination (or supplementary examination if granted) after having enrolled for at least two thirds of the normal period during which the subject is taught, shall be deemed to have failed the subject.

- 7.4** If in the opinion of the Faculty of Arts a student for the degree is not making satisfactory progress, the Faculty may, with the consent of the Council, terminate the candidature and the student shall cease to be enrolled for the degree.

**8 Assessment and examinations**

- 8.1** There shall be one of two systems of classification of pass in individual subjects for the Master's degree: either Satisfactory; or Pass with High Distinction, Pass with Distinction, Pass with Credit, and Pass.
- 8.2** On completion of the Research Project the student shall lodge with the Department three copies of the dissertation prepared in accordance with directions given to students from time to time. No dissertation or material presented for any other degree within this or any other institution shall be submitted.
- 8.3** Two examiners will be appointed by the Departmental Committee, on the advice of the Subject Coordinators' Sub-Committee. One examiner will normally be internal to the Department but not the student's supervisor. The second examiner will have appropriate experience and will normally be external to the University.
- 8.4** If there is disagreement over the examination, a third examiner, normally external to the University, shall be appointed by the Departmental Committee.
- 8.5** The examiners may recommend:
- that the dissertation be accepted as satisfactory for the purposes of clause 5 of the Specific Course Rules; or
  - that the dissertation be accepted as satisfactory for the purposes of clause 5 of the Specific Course Rules after minor amendments have been made to the dissertation; or
  - that the dissertation be graded unsatisfactory and returned to the student for revision and re submission.

## Syllabuses

---

The course is designed to run in two-year cycles, with most of the compulsory subjects to be offered in the first year of the cycle and the optional subjects in the second. The compulsory subjects 1224 Psychological Assessment (M), and 6335 Adult Clinical Psychology (M) each involve a series of weekly three hour sessions of formal class contact for twenty-four weeks in two semesters. The other compulsory subjects and the optional subjects in the second year of the cycle each involve a series of weekly three hour sessions of formal class contact for twelve weeks in one semester. The formal sessions of class contact, in addition to material presented by lecture, may include activities such as practical exercises, demonstrations, and tutorial discussion.

Attendance for at least 80% of the sessions in any subject will be expected.

### prerequisites

There are no prerequisites for any subject in addition to those required for entry to the course.

### quota

Currently 10 FTE students for the complete M.Psych.(Clin.) course.

### textbooks

Detailed reading lists are provided with the syllabus entries in the course handbook available from the Department at enrolment.

### assessment

The assessment for each subject is given in the specific subject entries below; these may include examinations, essays, practical exercises, case reports, or a blend of these.

### 8903 Abnormal Clinical Psychology

*points value:* 2.5      *availability:* not offered in 1996

*restriction:* 5261 Abnormal Psychology (M)

*contact hours:* weekly three-hour sessions for 12 weeks

*content:* The aim of the subject is to introduce the students to psychiatric diagnostic categories in current use particularly those in the DSM IV Manual of Mental Disorders, to be familiar with their application and to be proficient in applying them.

The subject also aims to provide a critical analysis of psychiatric and psychological diagnostic and will explore alternatives to formal diagnosis.

*assessment:* examination (60%) on all lectures (the form of which will be discussed at the Preliminary Meeting) and 2 set exercises

### 6335 Adult Clinical Psychology

*points value:* 5      *availability:* not offered in 1996

*restrictions:* 4918 Behaviour Management; 3343 Behaviour Management (M); 3061 Comparative Approaches to Clinical Practice

*contact hours:* weekly three-hour sessions for 24 weeks plus practical work in the students' own time

*course aims:* To introduce students to the behavioural assessment and treatment of the major problems found in adult clinical populations; to analyse the presenting psychological problem competently; to offer psychiatric advice based on DSM IV, and to know where this might be appropriate; to implement a behaviourally-based intervention program the elements of which will be research based; to have a clear understanding of the conceptual difficulties involved in making a diagnosis for psychological problems.

*assessment:* class exercises and assignments (50%); essay exam (50%)

### 9842 Applied Methodology (M)

*points value:* 2.5      *availability:* not offered in 1996

*restriction:* 1286 Applied Methodology

*contact hours:* weekly three-hour sessions for 24 weeks

*content:* Topics may include: multivariate statistical techniques and their applications; sample surveys; questionnaires and their interpretation; linguistic and content analysis of interview and literary data; meta-analysis; single-case studies. The use of computers in the storage and analysis of data and the evaluation of effectiveness will be an integral part of the course.

*assessment:* class exercises (60%); compulsory assignment (40%)

### 9645 Child Clinical Psychology

*points value:* 2.5      *availability:* not offered in 1996

*restriction:* 8769 Child Development

*contact hours:* weekly three-hour sessions for 12 weeks

*course aims:* To have an understanding of the basic developmental issues in intervention with children's problems; to be able to analyse problems which are presented by children and their families; to be able to give appropriate consideration to environmental influences on children's problems; to be able to formulate an appropriate treatment/intervention strategy for a range of psychological difficulties commonly encountered in children.

*assessment:* class exercises and assignments

### **3220 Disability: Vocational Training and Assessment (M)**

*points value:* 2.5                      *duration:* semester 1

*restriction:* 3709 Disability: Vocational Training and Assessment

*contact hours:* weekly three-hour sessions for 12 weeks

*content:* Topics include work and the concept of normalisation, models of vocational training and current services, employment options, assessment for training, learning deficits and technical aids, skill training techniques, measuring performance, managing behaviour problems, placement procedures and staff training.

*assessment:* seminar assignments and practical exercises throughout, these being completed in the candidate's own time, and a written examination at the conclusion

### **6789 Ergonomics (M)**

*points value:* 2.5                      *duration:* semester 1

*contact hours:* weekly three-hour sessions for 12 weeks

*content:* This subject assumes no previous knowledge of ergonomics and aims to introduce those taking it to the application of scientific knowledge in the interests of workable environments. Topics may include: seating, controls displays and control display relationships, ergonomics and disability, ergonomics and personal computers and the electronic office, ergonomics and cognitive overload, ergonomics and environmental psychology.

*assessment:* exam

### **3372 Health Psychophysiology**

*level:* 6    *points value:* 2.5    *duration:* semester 1

*prerequisites:* completion of first year Master of Psychology (Clinical)

*contact hours:* 3 hours per week

*content:* This topic has been devised to complement topics taught in health and clinical psychology following a biopsychosocial model of intervention and assessment. Topics will include an understanding of the basics of human physiology with emphasis on the role of the CNS and the functioning of the cardiovascular and digestive systems. The measurement and assessment of physiological systems in psychological disorders will be covered. The syllabus will examine the following factors: Perspectives on Health and illness; the body's physical systems, central nervous system, endocrine system, the digestive system, the respiratory system, the cardiovascular system, the immune system; stress, illness and coping; measuring the body's responses; psychological aspects of CHD, cancer, AIDS, stroke, chronic health conditions.

*assessment:* two assignments and essay examination

### **6328 Health Psychology**

*points value:* 2.5                      *duration:* semester 1

*restriction:* 1937 Health and Community Psychology; 9740 Health and Community Psychology (M)

*contact hours:* weekly three-hour sessions for 12 weeks

*course aims:* To have an understanding of the environmental influences on the psychological and physical health of individuals and populations; to be able to analyse and design intervention strategies for a selected range of health-related psychological problems; to be able to evaluate critically the psychological literature relating to health psychology and behavioural medicine; to have an understanding of key issues in current health psychology and their relevance to clinical practice.

*assessment:* class exercises; assignment; essay exam

### **7221 Placement II (M)**

*points value:* 4                      *duration:* semester 1 or 2

*restriction:* 1107 Placement II

*contact hours:* 5 half-days per week

*content:* Placements are arranged with various agencies in South Australia. Placements are undertaken to enable candidates to gain a broad range of experience in areas such as providing psychological services to children, adults, maladjusted people, clients with cognitive deficits etc.

*assessment:* see Course Handbook

**3481 Placement III (M)**

*points value:* 4                      *duration:* semester 1 or 2

*restriction:* 5287 Placement III

*contact hours:* 5 half-days per week

*content:* Placements are arranged with various agencies in South Australia. Placements are undertaken to enable candidates to gain a broad range of experience in areas such as providing psychological services to children, adults, maladjusted people, clients with cognitive deficits etc.

*assessment:* see Course Handbook

**4647 Professional Skills Workshop and Placement I**

*points value:* 4                      *availability:* not offered in 1996

*restriction:* 5623 Placement I

*contact hours:* 5 half-days per week

*content:* Candidates are required to participate in a week-long workshop arranged during the mid-year break to provide preliminary training in interviewing and counselling skills prior to beginning the field placement. Placements are undertaken to enable candidates to gain a broad range of experience in areas such as providing psychological services to children, adults, maladjusted people, clients with cognitive deficits and so on.

*assessment:* see Course Handbook

**1224 Psychological Assessment (M)**

*points value:* 5                      *availability:* not offered in 1996

*restriction:* 6382 Psychological Assessment

*contact hours:* weekly three-hour periods of lectures, demonstrations and practical exercises for 24 weeks

*content:* The subject examines the theoretical background to objective mental tests and techniques, and aims to provide a basic practical familiarity with these.

Standardised procedures to be studied include means for evaluating the effectiveness of organisations and systems of communication, together with tests of ability, aptitude, attitude and personality, suited to a wide range of ages. Discussion will also focus on both normal and abnormal responding. Particular emphasis will be given to the role of testing in decision making, treatment and training. Other topics to be discussed include the selection and use of a range of materials appropriate to different areas of assessment; test standards; techniques and requirements for test development; contemporary issues in psychological assessment.

*assessment:* Assessment will consist of practical exercises throughout, these being completed in the candidate's own time.

**9575 Psychology of Unemployment (M)**

*points value:* 2.5                      *duration:* semester 1

*restriction:* 1382 Psychology of Unemployment

*contact hours:* weekly three-hour sessions for 12 weeks

*content:* The subject covers the following topics: the psychological and social significance of unemployment; unemployment in the 1930s and currently; youth unemployment compared with job loss in middle-age; methods of studying the psychological impact of unemployment (anecdotal, cross-sectional, retrospective, longitudinal); psychological theories and evidence; policy, community and counselling implications.

*assessment:* exam

**3179 Rehabilitation Psychology (M)**

*points value:* 2.5                      *duration:* semester 1

*restriction:* 3371 Rehabilitation Psychology

*contact hours:* weekly three-hour sessions for 12 weeks

*content:* Topics will include the psychological aspects of different types of disability and social problems, including cognitive, physical and personality aspects of handicapping conditions; the use of generic services; assessment and training principles and practice, including the use of individual rehabilitation plans, maintenance and generalisation of skills, staff training, and program evaluation.

*assessment:* seminar assignments, practical exercises and essays

**1681 Research Project in Applied Psychology**

*points value:* 9                      *duration:* full year

*content:* A research project on a topic of relevance to applied psychology to be pursued under the control of the Psychology Department and under the guidance of one or more supervisors appointed by the Faculty of Arts (at least one of whom shall be a member of the Psychology Department).

*assessment:* Dissertation will be examined as specified by Specific Course Rule 8 of the degree.

### 6934 Work with Human Systems: Theory, Practice and Ethics

*points value:* 2.5      *availability:* not offered in 1996

*restriction:* 5817 Working with Human Systems: Theory and Practice (M)

*contact hours:* weekly three-hour session for 12 weeks

*content:* The course overall seeks to develop a post-structuralist frame-work for clinical and psychological practice. A second emphasis is on the development of a contextual approach to: (1) ethical practice; (2) service delivery; (3) the assessment of human problems in the family and community setting. The course is comprised of three overlapping sections: (1) the development of a theory and ethic of practice visit, social constructivist 'critical' and post-structuralist theory; (2) community based practice; interdisciplinary communication and collaboration; (3) problem evaluation, preventative and interventive approaches to problem dissolution.

Topics will cover: (1) Professional Ethics; (2) Constructivism, Social Constructivism, Maturana's Ontology, Feminist Critiques, Post-Structuralist Theory and Deconstruction (eg Derrida, Foucault, Althusser), Cybernetics (Bateson); (3) Implications of the above for (i) standard approaches to psychological practice and diagnosis, (ii) ethical practice; (4) Critical Theory, Social Justice; (5) Interdisciplinary communication and collaboration; (6) Community-based approaches to practice; (7) Family Therapy Models; (8) The Bower Place Model.

*assessment:* assignment

## Doctor of Letters

### Regulations

- 1
  - (a) The Faculty of Arts may accept as a candidate for the degree of Doctor of Letters a person who has qualified for any degree in The University of Adelaide.
  - (b) On the recommendation of the Faculty of Arts, the Board of Graduate Studies acting with authority wittingly devolved to it by Council may accept as a candidate for the degree a person who (i) has obtained in another university or institution of higher education a qualification accepted for the purpose by the University as equivalent to a degree of the University and (ii) has, or has had, a substantial association with the University.
  - (c) No person may be admitted to the degree of Doctor of Letters before the expiration of five years from the date on which he obtained the qualification prescribed in (a) or (b)(i) above.
- 2
  - (a) A person who desires to become a candidate for the degree shall give notice of his intended candidature in writing to the Registrar and with such notice shall furnish particulars of his scholarly achievements and of the work which he proposes to submit for the degree.
  - (b) The Faculty of Arts shall examine the information submitted and decide whether or not to allow the applicant to proceed.
  - (c) If the Faculty accepts the candidature it shall nominate examiners, of whom two at least shall be external examiners.
- 3
  - (a) To qualify for the degree the candidate shall furnish satisfactory evidence that he has made an original and substantial contribution of distinguished merit to the knowledge or understanding of any subject with which the Faculty is directly concerned.
  - (b) The degree shall be awarded primarily on a consideration of such of his published works as a candidate may submit for examination, but the examiners may take into account any unpublished original work that he may submit in support of his candidature.
  - (c) The candidate in submitting his work shall, where applicable, state generally in a preface and specifically in notes the main sources from which his information is derived and the extent to which he has availed himself of the work of others, especially where joint publications are concerned. He may also signify in general terms the portions of his work which he claims as original.
  - (d) The candidate shall indicate what part, if any, of his works has already been submitted for a degree in this or any other university.
- 4 The candidate shall lodge with the Registrar three copies of the works submitted for the degree, any unpublished work being prepared in accordance with the directions given in sub-paragraph (b) of clause 2B of Chapter XXV of the Statutes. If the work is accepted for the degree the Registrar will transmit two of the copies to the University Library.
- 5 A candidate who complies with the foregoing conditions and satisfies the examiners may, on the recommendation of the Faculty of Arts, be admitted to the degree of Doctor of Letters.
- 6 Notwithstanding anything contained in the preceding regulations, the Faculty may recommend the award of the degree to any person who is not a member of the staff of the University. Any such recommendation must be accompanied by evidence that the person for whom the award is proposed has made an original and substantial contribution of distinguished merit to the knowledge or understanding of a subject with which the Faculty is directly concerned, of a standard not less than that required by regulation 3.

Regulations allowed 16 December, 1971.

Amended 15 January, 1976: 6. 21 Feb. 1991: 1(b).

# Faculty of Dentistry

## Regulations

### Of Awards in the Faculty of Dentistry

- 1 In the Faculty of Dentistry there shall be the following awards:

- Diploma in Dental Therapy
- Ordinary degree of Bachelor of Dental Surgery
- Honours degree of Bachelor of Science in Dentistry
- Graduate Certificate in Dentistry\*
- Graduate Diploma in Clinical Dentistry
- Graduate Diploma in Forensic Odontology
- Master of Dental Surgery
- Master of Science in Dentistry

Doctor of Dental Science

- 2 The courses for the awards listed in Regulation 1 shall be governed by the General Course Rules and Specific Course Rules that the Council shall prescribe from time to time.
- 3 The syllabuses of subjects shall be specified by the Council.

Regulations effective from 1 August 1994.

\*Awaiting approval and confirmation.

note (not forming part of the Regulations)

- 1 Council has delegated the power to approve minor changes to the General Course Rules to the Deputy Vice-Chancellor (Academic).
- 2 Council has delegated the power to approve minor changes to the Specific Course Rules to the Deans of Faculties.
- 3 Council has delegated the power to specify syllabuses to the Head of each department or centre concerned, such syllabuses to be subject to approval by the Faculty or by the Dean on behalf of the Faculty. The Head of department or centre and the Principal of the School of Dental Therapy may approve minor changes to any previously approved syllabus.
- 4 The Faculty also offers a Doctor of Dental Science (D.D.Sc.). Higher doctorates are governed by their own sets of Regulations as printed in this volume of the Calendar.

## Diploma in Dental Therapy

The Diploma in Dental Therapy may not be offered in 1996.

For syllabus entries in the course, refer to *The University Calendar Volume II: Handbook of Courses, 1994*.

## Bachelor of Dental Surgery

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar.

As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

### Changes to the degree of Bachelor of Dental Surgery course

In 1992 Council approved changes to the principles and general structure of the Bachelor of Dental Surgery as well as a new curriculum to be phased in commencing 1993 for the first year and 1994 to 1997 for second and subsequent years.

Repeating students will need to have discussions with the Dean and negotiate study for their repeating year.

## Specific Course Rules

### 1 Assessment and examinations

- 1.1 A candidate shall not be eligible to attend for examination unless the prescribed work has been completed to the satisfaction of the academic staff concerned.
- 1.2 In determining a candidate's final result in a stream (or part of a stream) the examiners may take into account oral, written, clinical, practical and examination work, provided that the candidate has been given adequate notice at the commencement of the teaching of the stream of the way in which work will be taken into account and of its relative importance in the final result.
- 1.3 There shall be four classifications of pass in the final assessment of any stream for the Ordinary degree, as follows: Pass with High Distinction, Pass with Distinction, Pass with Credit, Pass.
- 1.4 (a) A candidate who fails a stream shall, unless exempted wholly or partially therefrom by the Head of the Department concerned, again complete the required work in that stream to the satisfaction of the teaching staff concerned. Such a candidate may be required to attend concurrently such lectures, clinical practice, laboratory and other practical work as the Faculty may prescribe, in other streams of annual examination.

- (b) Except in the case of the First Annual Examination, a candidate who is exempted from part of any stream shall not be granted a classified pass in that stream.

- 1.5 A candidate who has twice failed the examination in any stream for the Ordinary degree may not enrol for that stream again or for any other stream which in the opinion of the Faculty contains a substantial amount of the same material, except by special permission of the Faculty and then only under such conditions as Faculty may prescribe.

### 2 Course of study

#### 2.1 Duration of course

The course of study for the degrees of Bachelor of Dental Surgery, unless otherwise approved by the Council on the recommendation of the Faculty, shall extend over five years of full-time study.

A candidate may interrupt his or her studies for the course:

- (a) for the purpose of proceeding to the Honours degree of Bachelor of Science in Dentistry; or

- (b) for such period and on such conditions as may in each case be determined by the Faculty.

Students wishing to interrupt their studies in accordance with 1.2 above must apply through the Registrar for permission and obtain beforehand the approval of the Dean on behalf of the Faculty for leave of absence for a defined period.

A student who leaves the course without approval or who extends leave of absence beyond the time period approved by the Dean shall be deemed to have withdrawn his or her candidature for the degree but shall be permitted to reapply for admission to the course in accordance with the procedures in operation at the time.

Students who have interrupted their studies in the prescribed subjects may be required to resume at such a point in the course and/or to undertake such additional or special program of study as the Dean of the Faculty deems appropriate.

## 2.2 Approval of enrolment

The following students must have their courses approved by the Dean or nominee at the time of enrolment in the year concerned:

- (a) students who have been granted or are seeking status or exemption from these Rules under section 1.4.20 of the General Course Rules.
- (b) students who are repeating a stream or streams; such students may be required to resume at a point in the course and/or undertake such additional or special program of study as the Dean of Faculty deems appropriate.
- (c) students who have obtained permission from the Faculty to intermit their course, either to proceed to the Honours degree of Bachelor of Dental Surgery in Dentistry, or for other reasons approved in each case.

## 2.3 Lectures, practical work, clinical instruction

The course for the degree of Bachelor of Dental Surgery shall extend over five years. To qualify for the degree a candidate shall regularly attend lectures, tutorials and clinical practice, do written and laboratory or other practical work to the satisfaction of the academic staff concerned, and pass the prescribed examinations. Students shall attend at clinics of the South Australian

Dental Service and other teaching hospitals and health centres as required for their clinical instruction.

### 2.3.1 Old curriculum

#### **First Year: not offered in 1993 and subsequent years**

During the first year every student shall attend courses of instruction in: (a) Behavioural Science, (b) Biology, (c) Organic Chemistry, (d) Genetics, (e) Anatomy and Histology, (f) Medical Physics, (g) Dental Science.

#### **Second Year: not offered in 1994 and subsequent years**

During the second year every student shall attend courses of instruction in: (a) Regional Anatomy, (b) Systematic Histology and Embryology, (c) Biochemistry, (d) Human Physiology, (e) Dental Science, (f) Conservative Dentistry and (g) Dental Care.

#### **Third Year: not offered in 1995 and subsequent years**

During the third year every student shall attend courses of instruction in: (a) Human Physiology and Occlusion, (b) Pharmacology and Therapeutics, (c) General Pathology, (d) Microbiology and Immunology, (e) Oral Pathology, (f) Removable Prosthodontics, (g) Conservative Dentistry, (h) Dental Materials Science, (i) Orthodontics, (j) Pain Control, (k) Oral Diagnosis and Dental Radiology and (l) Periodontology

#### **Fourth Year: not offered in 1996 and subsequent years**

During the fourth year every student shall attend courses of instruction in: (a) General Medicine, (b) General Surgery, (c) Paediatric Dentistry, (d) Orthodontics, (e) Periodontology, (f) Endodontics, (g) Oral Pathology, (h) Oral Diagnosis and Dental Radiology, (i) Oral Surgery, (j) Removable Prosthodontics, (k) Conservative Dentistry and (l) Crown and Bridge Prosthodontics.

#### **Fifth Year: not offered in 1997 and subsequent years**

During the fifth year every student will continue instruction in: (a) Oral Diagnosis and Dental Radiology, (b) Crown and Bridge Prosthodontics, (c) Removable Prosthodontics, (d) Endodontics, (e) Paediatric Dentistry and Orthodontics, (f) Oral Surgery, (g) Pain Control,

(h) Oral Medicine and Applied Oral Pathology, (i) General Dental Practice, (j) Community Dentistry and (k) undertake theoretical, clinical and research electives to broaden their experience in preferred areas.

### 2.3.2 New curriculum

#### First Year: offered in 1993 and subsequent years

During the first year every student shall attend courses of instruction in: (a) Human Biology, (b) General Studies, (c) Dental and Health Science, (d) Dental Clinical Practice.

#### Second Year: offered in 1994 and subsequent years

During the second year every student shall attend courses of instruction in: (a) Structure and Function of the Body, (b) General Studies, (c) Dental and Health Science, (d) Dental Clinical Practice.

#### Third Year: offered in 1995 and subsequent years

During the third year every student shall attend courses of instruction in: (a) Diseases and Disorders of the Body, (b) Dental and Health Science, (c) Dental Clinical Practice.

#### Fourth Year: offered in 1996 and subsequent years

During the fourth year every student shall attend courses of instruction in: (a) Electives, (b) Dental and Health Science, (c) Dental Clinical Practice.

#### Fifth Year: offered in 1997 and subsequent years

During the fifth year every student shall attend courses of instruction in: (a) Electives, (b) Dental and Health Science, (c) Dental Clinical Practice.

## 3 Subjects of study

### 3.1 Old curriculum

#### 3.1.1 5770 First Annual Examination

At the First Annual Examination the candidate shall satisfy the examiners in each of the following subjects (see new curriculum — the following subjects are not offered in 1996):

- 9931 Anatomy and Histology ID
- 8715 Behavioural Science ID
- 7393 Biology ID
- 3311 Dental Science I

- 6424 Genetics ID
- 3117 Medical Physics I
- 9089 Organic Chemistry ID

#### 3.1.2 6626 Second Annual Examination

At the Second Annual Examination the candidate shall satisfy the examiners in each of the following (*see new curriculum — the following are not offered in 1996*):

- 5065 Biochemistry IID
- 3187 Conservative Dentistry II
- 2812 Dental Care II
- 3188 Dental Science II
- 3860 Human Physiology IID
- 2237 Regional Anatomy II
- 5764 Systematic Histology and Embryology II

#### 3.1.3 9494 Third Annual Examination

At the Third Annual Examination the candidate shall satisfy the examiners in each of the following subjects (*see new curriculum — the following subjects are not offered in 1996*):

- 4554 Conservative Dentistry III
- 6704 Dental Materials Science III
- 1583 General Pathology IIID
- 3606 Human Physiology and Occlusion IIID
- 2490 Microbiology and Immunology IIID
- 2583 Oral Diagnosis and Dental Radiology III
- 7094 Oral Pathology III
- 9412 Orthodontics III
- 9958 Pain Control III
- 3485 Periodontology III
- 3164 Pharmacology and Therapeutics III
- 3937 Removable Prosthodontics III

#### 3.1.4 9097 Fourth Annual Examination

At the Fourth Annual Examination the candidate shall satisfy the examiners in each of the following subjects: (*see new curriculum — the following subjects are not offered in 1996*):

- 6541 Conservative Dentistry IV
- 7133 General Medicine IV
- 3717 General Surgery IV
- 9697 Oral Diagnosis and Dental Radiology IV
- 9389 Oral Pathology IV
- 5462 Oral Surgery IV

- 5586 Orthodontics IV
- 6274 Paediatric Dentistry IV
- 6982 Periodontology IV
- 5376 Removable Prosthodontics IV

3.1.5 6753 Fifth Annual (Final) Examination

At the Fifth Annual Examination the candidate shall satisfy the examiners in each of the following subjects:

- 5472 Community Dentistry V
- 2548 Electives V
- 4110 General Dental Practice V
- 9776 Oral Diagnosis and Dental Radiology V
- 7629 Oral Medicine and Applied Oral Pathology V
- 9391 Oral Surgery V
- 1422 Paediatric Dentistry and Orthodontics V
- 7647 Pain Control V
- 5263 Removable Prosthodontics V

**3.2 New curriculum**

3.2.1 5770 First Annual Examination

*from 1993*

At the First Annual Examination the candidate shall satisfy the examiners in each of the following streams:

- 7713 Dental and Health Science I
- 2839 Dental Clinical Practice I
- 8471 General Studies ID
- 6700 Human Biology ID

3.2.2 6626 Second Annual Examination

*from 1994*

At the Second Annual Examination the candidate shall satisfy the examiners in each of the following streams:

- 1145 Dental and Health Science II
- 1421 Dental Clinical Practice II
- 5453 General Studies IID
- 3567 Structure and Function of the Body IID

3.2.3 9494 Third Annual Examination

*from 1995*

At the Third Annual Examination the candidate shall satisfy the examiners in each of the following streams:

- 7413 Dental and Health Science III
- 4450 Dental Clinical Practice III
- 9310 Diseases and Disorders of the Body IIID

3.2.4 9097 Fourth Annual Examination

*from 1996*

At the Fourth Annual Examination the candidate shall satisfy the examiners in each of the following streams:

- 1448 Dental and Health Science IV
- 4978 Dental Clinical Practice IV
- 7571 Dental Selectives IV

3.2.5 6753 Fifth Annual (Final) Examination

*from 1997*

At the Fifth Annual Examination the candidate shall satisfy the examiners in each of the following streams:

- 9983 Dental and Health Science V
- 7137 Dental Clinical Practice V
- 5181 Dental Selectives V

**3.3 General**

A candidate shall complete each annual examination before entering upon the work of the following year's course of study provided that:

- (a) A candidate shall enrol in all clinical streams of the year undertaken and shall enrol in any other streams that the Faculty mandates. Except by permission of Faculty the candidate may not enrol concurrently for any additional streams from the following year.
- (b) A candidate may begin the first semester's work in the following year's course of study pending the result of any supplementary examination for which the candidate has been permitted to present.
- (c) A candidate shall not be re-examined at a supplementary examination in any stream previously passed at the annual examination. A supplementary examination shall not be awarded on academic grounds in any stream where the student obtained an aggregate score of 35% or less.
- (d) The annual examination at the end of the fifth year shall be known as the Final Examination. In exceptional circumstances a candidate's results in the

Final Examination may be withheld if the candidate's performance in the required clinical work is considered unsatisfactory by the Board of Examiners. In such a case, the candidate will be required to complete satisfactorily such additional work as the Head of the Department may recommend to the Board of Examiners.

#### **4 Rules for the admission of dental students to the practice of the South Australian Dental Service and other teaching hospitals and health centres**

- 4.1** Each dental student of The University of Adelaide shall attend clinics of the South Australian Dental Service, or other teaching hospitals or health centres, as directed by the Dean of the Faculty of Dentistry; and each student shall be admitted to the practice of the South Australian Dental Service or other teaching hospitals or health centres under the disciplinary control of the Chief Executive Officer, in the case of the former, or the Medical Superintendent or Director, in the case of the latter, whilst in attendance.
- 4.2** No student may introduce visitors into any of the said clinics, hospitals or health centres without permission of the above designated officers.
- 4.3** Students shall conduct themselves with propriety and discharge the duties assigned, and pay for or replace any article damaged, lost or destroyed by them together; and make good any loss sustained by their negligence.
- 4.4** Each student shall at all times be under the direction and supervision of a duly appointed member of the teaching staff of The University of Adelaide, or a person who has been granted appropriate University status, and shall carry out such work as shall be allotted
- 4.5** No student shall administer treatment to any patient without the approval of an appointed teacher.
- 4.6** Except in the performance of the associated clinical duties, no student may disclose any information whatsoever concerning a patient without the permission of both the patient and the Senior Dental or Medical Officer in charge.
- 4.7** No student shall publish a report on any case without the written permission of the Chief Executive Officer in the case of the South Australian Dental Service, or the Medical Superintendent or Director in the case of

teaching hospitals or health centres, and the Senior Dental or Medical Officer under whose care the patient is or has been.

- 4.8** No student shall communicate directly to the press, radio or television any matter concerning the clinical practice of the institution to which that student is attached
- 4.9** Students shall pay such fees as are laid down by the South Australian Dental Service in consultation with the Dean, Faculty of Dentistry; no student shall be admitted to clinics until such fees are paid.
- 4.10** Misconduct or infringement of any of these rules, may lead to temporary suspension by the Chief Executive Officer, South Australian Dental Service, or the Medical Superintendent or Director, other teaching hospitals or health centres. In the case of such temporary suspension, written notice shall immediately be given to the Dean of the Faculty of Dentistry.

## Syllabuses

---

### textbooks

Information on appropriate textbooks will be provided by the Department and at the preliminary lecture in Orientation Week.

In general, students are expected to have their own copies of textbooks; but they are advised to await advice from the lecturer concerned before buying any particular book. Only the prescribed edition of any textbook should be bought.

### reference books

Although lists of books and journals for reference purposes are regarded as important, details have not been included in this Volume. These will however be issued from time to time by the departments. It is hoped that all books and journals set for reference will be available to be consulted in the Barr Smith Library.

### examinations

For each stream students may obtain from the department, details of the examination in that stream including the relative weights given to the components (eg such of the following as are relevant: assessments, term or mid-year tests, essays or other written or practical work, final written examinations, viva voce examinations).

### proficiency in English and assumed knowledge

Experience has shown that students who do not have a good ability to communicate in spoken and written English and do not have a background in Year 12 PES Physics and Chemistry will have difficulties with the course. Proficiency in English and a background knowledge of Year 12 PES Physics and Chemistry are assumed.

## 5770 First Annual Examination

---

### 9931 Anatomy and Histology ID

*old curriculum subject not offered in 1996*

### 8715 Behavioural Science ID

*old curriculum subject not offered in 1996*

### 7393 Biology ID

*old curriculum subject not offered in 1996*

### 3311 Dental Science I

*old curriculum subject not offered in 1996*

### 6424 Genetics ID

*old curriculum subject not offered in 1996*

### 3117 Medical Physics I

*old curriculum subject not offered in 1996*

### 9089 Organic Chemistry ID

*old curriculum subject not offered in 1996*

### 7713 Dental and Health Science I

*new curriculum*

*level: I      points value: 7      duration: full year*

*corequisites: 2839 Dental Clinical Practice I*

*contact hours: 7 hours per week, including class meetings, learning laboratories and tutorials*

*content:* This stream aims to emphasise the scientific basis of dentistry; to highlight new developments and to outline important ethical issues in the health professions; to describe the normal appearance of the oral soft tissues, the morphology and development of the teeth and main features of the masticatory system as a basis for the study of oral health and disease; to discuss the aetiology and prevention of the common dental diseases at both the individual and the community level; to introduce students to behavioural sciences and psychology applied to dentistry; to provide exposure to career roles and begin an examination of contexts in which a dentist works. A number of problem-based dental learning packages are provided in this stream to give a context to student learning.

Topics include: history and philosophy of dentistry; culture, health and disease; nature and distribution of dental diseases; preventative dentistry; oral surface features; morphology of the teeth; tooth emergence and calcification; introduction to dental occlusion, radiographic anatomy; pain, fear and anxiety in dentistry; management and motivation of dental patients; dentist-patient communication; behavioural consequences of oral diseases; community dental health issues; dental education and the shaping of the professional; the professional environment; the dentist's role - past and present; career planning; adaptation to change and the possible future for dentistry.

*assessment:* Assignments, short tests, trial test, practical exercise, short answer problem based examination, interview.

*prescribed texts:* Townsend GC & Winning T *Dental and Health Science I manual* Department of Dentistry Locker D *An introduction to behavioural science and dentistry* (Tavistock/Routledge); Harris NO & Christen AG *Primary preventive dentistry* 4th edn (Appleton and Lange);

### 2839 Dental Clinical Practice I

*new curriculum*

*level:* I      *points value:* 7      *duration:* full year

*corequisites:* 7713 Dental and Health Science I

*contact hours:* 7 hours per week including clinical and practical sessions

*content:* This stream aims to give students a broad understanding of dentistry at clinical ancillary, technical and office management levels. Skills will be developed in various technical and clinical areas.

*Topics include:* clinical examinations; records and recording; operative hazards; instruments, sterilisation and maintenance; infection and moisture control; dental impressions; mouthguards; dental radiology; diagnostic procedures; preventive dentistry: fluoride sealants, diet and plaque control; manipulation and assessment of commonly used dental materials; introduction to periodontics; prophylaxis and simple scaling; minimal intervention dentistry.

*assessment:* Assignments, Clinical and Laboratory assessment, workbooks and examination each semester. More details will be given in the Clinical Practice Workbook.

*prescribed texts:* Harris NO & Christen AG *Primary preventative dentistry* 4th edn (Appleton and Lange); Hirsch R & Roberts-Thomson K *Clinical Practice I workbook* Department of Dentistry

### 8471 General Studies ID

*new curriculum*

*level:* I      *points value:* 3      *duration:* full year

*corequisites:* 7713 Dental and Health Science I

*contact hours:* 3 hours per week

*content:* This stream includes a number of units that will be made available to students during both the first and second years of the course.

*Aspects of basic physics:* this unit covers the aspects of basic physics forming the prerequisite knowledge for the major streams in the BDS course.

*Aspects of basic chemistry:* this unit covers the aspects of basic chemistry forming the prerequisite knowledge for the major streams in the BDS course.

*Biostatistics:* this unit aims to provide students with an appreciation of the nature and scope of statistics applied to biological problems (biostatistics) as well as

a working knowledge of basic statistics, including presentation, interpretation and analysis of data.

*Computing:* this unit aims to provide students with a basic understanding of computers and computing with particular reference to the needs of dental students and dentists.

*Communication and learning:* this unit introduces students to the educational philosophy of the BDS course and emphasises the needs to be proficient in communication skills.

*Research methodology:* this unit aims to give students an appreciation of research methodology and to develop the skills needed to access and assimilate scientific literature effectively, particularly literature relating to dental science.

*Social context of dentistry:* this unit emphasises the importance of social sciences in dentistry.

*Topics include:* Australian communities, social and health service provision, professions and occupations.

*assessment:* Students will be advised of the combination of assessment modes at the beginning of the stream. Students will be required to demonstrate proficiency in each unit. An assessment of English communication proficiency is included in the Communication and learning unit.

*prescribed texts:* to be advised

### 6700 Human Biology ID

*new curriculum*

*level:* I      *points value:* 7      *duration:* full year

*contact hours:* 7 hours per week, including class meetings, practical sessions, research-based laboratory sessions and tutorials

*content:* This stream aims to provide an overview of the biology of the human species including an evolutionary perspective of the vertebrate, especially the human, masticatory system, to provide students with a basic knowledge of classical and molecular genetics and to indicate where this knowledge is applicable to dentistry, to provide an introduction to the anatomy of the human body at the gross and histological levels, and to provide an integrated coverage of the anatomy and physiology of selected body systems.

*Topics include:* human evolution including evolution of head form, human adaptability, introduction to the human body and its organisation, general cytology and tissue histology, heredity and variation, genes and chromosomes, linkage, molecular organisation of chromosomes, genetic structure and variation of human populations, gene manipulation, structure and function of the skeletal and neuromuscular systems, and sense organs.

*assessment:* see First Year Mouth Book

*prescribed texts:* Totoro GJ & Grabowski SR *Principles of anatomy and physiology* 8th edn (Harper and Rowe); Junqueira LC, Carneiro J & Kelly RO *Basic histology* 8th edn (Lange); Hartl DL *Genetics* 3rd edn (Jones and Bartlett); Sherwood LS *Human Physiology: From Cells to Systems* (West)

## 6626 Second Annual Examination

### 5065 Biochemistry IID

*old curriculum subject not offered in 1996*

### 3187 Conservative Dentistry II

*old curriculum subject not offered in 1996*

### 2812 Dental Care II

*old curriculum subject not offered in 1996*

### 3188 Dental Science II

*old curriculum subject not offered in 1996*

### 3860 Human Physiology IID

*old curriculum subject not offered in 1996*

### 2237 Regional Anatomy II

*old curriculum subject not offered in 1996*

### 5764 Systematic Histology and Embryology II

*old curriculum subject not offered in 1996*

### 1145 Dental and Health Science II

*new curriculum*

*level:* II *points value:* 7 *duration:* full year

*prerequisites:* 7713 Dental and Health Science I

*corequisites:* 1421 Dental Clinical Practice II

*contact hours:* 7 hours per week including class meetings, learning laboratories and tutorials

*content:* This stream aims to provide students with a detailed understanding of the embryology and histology of the dento-facial structures; to provide a basic understanding of the biochemistry of the human body with particular reference to the oral cavity; to develop an appreciation of the scientific aspects of clinical dentistry including functioning of the masticatory system and the importance of occlusion in all branches of dentistry; to develop further appreciation of behavioural science in dentistry.

Topics include: embryology of face; odontogenesis including enamel and dentine formation; histology of the oral tissues; the structural basis of biochemistry;

principles of nutrition; molecular organisation - including bioenergetics and the principles of metabolism; the integration and control of metabolism; hormones and growth factors; the biochemistry of soft tissues - including blood, epithelium and connective tissue; the biochemistry of calcified tissues - bone, dentine, cementum and enamel; the oral environment - including saliva, gingival crevicular fluid and dental plaque; development of occlusion; occlusal variation; orofacial sensation; masticatory function; aspects of behavioural science. A number of problem-based dental learning packages are provided in this stream to give a context to student learning.

*assessment:* 2 quizzes worth 30%, tutorial performance 15%, examination 40% and a project 15%

*prescribed texts:* Ten Cate AR *Oral Histology* (Mosby); Cole AS & Eastoe JE *Biochemistry and oral biology* (Wright); Champe and Harvey, *Lippincott's Illustrated Reviews Biochemistry* 2nd Ed., JB Lippincott Co 1994; Lehninger, Nelson and Cox (1993) *Principles of Biochemistry*, 2nd Ed. Worth, New York.

### 1421 Dental Clinical Practice II

*new curriculum*

*level:* II *points value:* 7 *duration:* full year

*prerequisites:* 2839 Dental Clinical Practice I

*corequisites:* 1148 Dental and Health Science II

*contact hours:* 8 hours per week including clinical, practical and resource sessions

*content:* This subject builds upon 2839 Dental Clinical Practice I with regard to the acquisition and consolidation of dental clinical skills. Experience will be gained in patient management emphasising communication and behaviour management, clinical examination procedures and diagnostic methods before working with selected patients of the SA Dental Service.

Topics include: clinical assessment and recording of dental health data; diagnosis; introductory treatment planning obtaining intra-oral radiographs; preventative regimes; basic restorative dentistry; properties of commonly used dental materials; introduction to management of emergencies; introduction to gingival and periodontal conditions; introduction to local anaesthesia.

*assessment:* participants are assessed practically (both in the laboratory and clinic) and academically (by assignments and examinations). More details will be given in the Dental Clinical Practice Manual

*prescribed texts:* Hörsted-Bindslev P & Mjör I *Modern concepts in operative dentistry* (Munksgaard)

Other texts to be advised.

**5453 General Studies IID***new curriculum*

level: II    points value: 3    duration: full year

prerequisites: 8471 General Studies ID

contact hours: 3 hours per week

content: as for 8471 General Studies ID

The units in this stream are available to students during both the first and second years of the course.

assessment: to be advised

prescribed texts: to be advised

**3567 Structure and Function of the Body IID***new curriculum*

level: II    points value: 7    duration: full year

prerequisites: 6700 Human Biology ID

contact hours: 7 hours per week, including class meeting, practical sessions, research-based laboratory sessions and tutorials

content: This stream aims to provide: an integrated coverage of the anatomy and physiology of selected body systems; a detailed description of the gross topographical anatomy of the head and neck emphasising aspects of functional and clinical importance; a description of the anatomy of the central nervous system.

Topics include: structure and function of the alimentary, cardiovascular, respiratory, lymphoid, endocrine and renal systems; detailed osteology of the skull; applied anatomy of face and scalp, infratemporal region, temporomandibular joints, pterygopalatine fossa, submandibular region, pharynx, larynx, cranial nerves; sensory and motor pathways in the central nervous system; autonomic nervous system; blood supply of the brain; anatomy related to local anaesthesia in dentistry.

assessment: Students will be advised of the combination of assessment modes at the beginning of the stream, including case scenarios and problem-based learning.

prescribed texts: Sherwood L *Human Physiology: From Cells to Systems* (West); Junqueira LC, Carneiro J & Kelly RO *Basic Histology* 8th edn (Lange); Johnson DR & Moore WJ *Anatomy for dental students* 2nd edn (OUP)**9494 Third Annual Examination****4554 Conservative Dentistry III***old curriculum subject not available in 1996***6704 Dental Materials Science III***old curriculum subject not available in 1996***1583 General Pathology IIID***old curriculum subject not available in 1996***3606 Human Physiology and Occlusion IIID***old curriculum subject not available in 1996***2490 Microbiology and Immunology IIID***old curriculum subject not available in 1996***2583 Oral Diagnosis and Dental Radiology III***old curriculum subject not available in 1996***7094 Oral Pathology III***old curriculum subject not available in 1996***9412 Orthodontics III***old curriculum subject not available in 1996***9958 Pain Control III***old curriculum subject not available in 1996***3485 Periodontology III***old curriculum subject not available in 1996***3164 Pharmacology and Therapeutics III***old curriculum subject not available in 1996***3937 Removable Prosthodontics III***old curriculum subject not available in 1996***7413 Dental and Health Science III***new curriculum*

level: III    points value: 6    duration: full year

prerequisites: 1145 Dental and Health Science II

corequisites: 4450 Dental Clinical Practice III

contact hours: 7 hours per week (approx)

*content:* This stream aims to: describe the normal functioning of the masticatory system, the importance of occlusion and the characteristics of an optimal occlusion, describe the morphological and functional changes that occur in the masticatory system as a result of normal growth and ageing, and the adaptability of the system to these changes; emphasise the importance of occlusion in all branches of dentistry and consider the methods available for diagnosis and treatment of disorders of the masticatory system; consider the causes and effects of disease and stress on the masticatory system; describe human growth and development with particular emphasis on aspects relevant to dentistry; provide an introduction to aspects of orthodontic examination diagnosis and treatment. A number of problem-based dental learning packages are provided in this stream to give a context to student learning.

Topics include: orofacial sensation, jaw muscles and receptors; jaw reflexes, mastication and swallowing, temporomandibular joint function and loading, parafunction, occlusal therapy, concepts of physical growth and development, methods for studying growth, factors affecting growth, development of the skull, factors affecting normal dento-facial growth, indices of maturation, facial aesthetics, normal changes in dental arch form, aetiology of orthodontic problems.

*assessment:* short tests, general review, practical exercises, problem-based written examination.

*prescribed text:* Mohl ND et al (1988) *A textbook of occlusion* (Quintessence), Proffit WR (1993) *Contemporary orthodontics* (Mosby).

#### **4450 Dental Clinical Practice III**

*new curriculum*

*level:* III *points value:* 12 *duration:* full year

*prerequisites:* 1421 Dental Clinical Practice II; 1145 Dental and Health Science II; 3567 Structure and Function of the Body II

*corequisites:* 7413 Dental and Health Science III

*contact hours:* 14 hours per week, including class meetings, laboratory sessions and clinic sessions

*content:* This stream builds upon Dental Clinical Practice II with regard to the consolidation of preventative, periodontal and restorative clinical skills, through manikin exercises and by provision of treatment for selected patients of the South Australian Dental Service. The pain control component of the stream covers local anaesthetic techniques. The stream includes a laboratory program in removable prosthodontics and in cast gold restorations. Clinical experience will be gained in removable prosthodontics and anterior endodontics.

Topics include: Patient assessment for local anaesthesia, pharmacological aspects of local anaesthesia, basic principles of local anaesthesia; more advanced restorative dentistry; treatment planning principles of preparation for indirect gold, resin and porcelain restorations; laboratory stages of cast gold restorations; bonding systems; philosophies and practices of removable partial denture prosthodontics; periodontics aetiology and treatment; pulpal, periapical and periradicular pathology; dental materials.

*assessment:* see Third Year Mouth Book

*prescribed texts:* see Third Year Mouth Book, other texts to be advised

#### **9310 Diseases and Disorders of the Body IIID**

*new curriculum*

*level:* III *points value:* 6 *duration:* full year

*prerequisites:* 3567 Structure and Function of the Body II

*contact hours:* 5 hours per week

*content:* This stream introduces students to pathology, microbiology, immunology and oral pathology in the context of human disease. The course aims to provide students with a detailed understanding of core pathological and immunological reactions that can occur and how such processes relate to clinical disease; to provide students with detailed knowledge of the structure and biology of bacteria, viruses and fungi and how these organisms relate to human disease states and processes; to provide a detailed understanding of the normal oral microflora and its relationship to oral health and specific dental diseases such as caries and periodontal disease; to provide a detailed understanding of the processes of neoplasia and hyperplasia generally and in relation to the mouth.

Topics include: cell injury, acute and chronic inflammation, healing, the cellular composition and function of the normal immune system, immune system reactivity, immunological hypersensitivities; microbial physiology, metabolism and genetics; principles and practice of disinfection and sterilisation, antibiotic therapy, infection control; host-parasite relationships including mechanism of pathogenicity; bacterial, viral and fungal diseases of relevance in dentistry; the oral microbiota and its relation to caries and periodontal diseases; hyperplasia and oral hyperplastic lesions, HIV/AIDS, neoplasia and oral neoplasia.

*assessment:* There is 7 hours of assessment in this subject. The format and timing of assessments is advised at the beginning of the course.

*prescribed texts:* Slots, Taubman (1992) *Contemporary Oral Microbiology and Immunology*; Marsh, Martin (1990) *Oral Microbiology* 3rd edn, or Schuster (1990) *Oral Microbiology and Infectious Diseases* 3rd edn; Regezi and Sciubba *Oral Pathology: Clinical-Pathologic Correlations* 2nd edn (W.B. Saunders); Lakhan, Dilly, Findlayson *Basic Pathology* 1993

## 9097 Fourth annual examination

### 7133 General Medicine IV

*old curriculum subject not available in 1996*

*old curriculum subject not available in 1996*

### 5376 Removable Prosthodontics IV

*old curriculum subject not available in 1996*

### 1448 Dental and Health Science IV

*new curriculum*

*level:* IV *points value:* 8 *duration:* full year

*availability:* available from 1996 and subsequent years

*prerequisites:* 7413 Dental and Health Science III

*corequisites:* 4978 Dental Clinical Practice IV

*contact hours:* to be determined

*content:* This stream builds upon 7413 Dental and Health Science III. Interdisciplinary seminars, focusing on and reinforcing contextually relevant material from throughout the course will be presented

*assessment:* to be advised

*prescribed texts:* to be advised

### 4978 Dental Clinical Practice IV

*new curriculum*

*level:* IV *points value:* 12 *duration:* full year

*availability:* available from 1996 and subsequent years

*prerequisites:* 4450 Dental Clinical Practice III

*corequisites:* 1448 Dental and Health Science IV

*contact hours:* to be determined

*content:* This stream builds upon previous years with regard to the acquisition and consolidation of dental clinical skills.

*assessment:* to be advised

*prescribed texts:* to be advised

### 7571 Dental Selectives IV

*new curriculum*

*level:* IV *points value:* 4 *duration:* full year

*availability:* available from 1996 and subsequent years

*prerequisites:* 9494 Third Annual Examination

*contact hours:* to be determined

*content:* The program is designed to give students the opportunity to explore aspects of the course in more detail or gain additional experience in certain areas or take part in one or more activities not included in other parts of the course. This might include coursework from appropriate courses, supervised research projects, additional experience in advanced aspects of a clinical speciality or exchange visits to other dental schools. Students are strongly advised to discuss their proposed elective program with the coordinator as soon as possible.

*assessment:* to be based on the assessment provided by supervisors and on a presentation of work carried out during the elective program held during November

*prescribed texts:* to be advised

**6753 Fifth Annual Examination**

---

**5472 Community Dentistry V**

*old curriculum subject not available in 1997 and subsequent years*

*level: V duration: semester 1*

*contact hours: maximum of 1 weekly lecture plus 1 weekly 2 hour seminar or 3 hour workshop*

*content: Lectures, seminars and workshops cover demography and dental epidemiology; prevention of dental diseases; social impact of dental disease; delivery of dental services; planning and evaluating dental services; financing dental care; dental services for special groups; and future practice of dentistry.*

*assessment: continuous assessment; written assignment; one 1.5 hour final written exam (if needed)*

*prescribed texts: Striffler DF et al Dentistry, dental practice and the community 3rd edn (WB Saunders)*

**9983 Dental and Health Science V**

*new curriculum*

*level: V points value: 8 duration: full year*

*availability: available from 1997 and subsequent years*

*prerequisites: 1448 Dental and Health Science IV*

*corequisites: 7137 Dental Clinical Practice V*

*contact hours: to be determined*

*content: This stream builds upon 1448 Dental and Health Science IV. Interdisciplinary seminars, focusing on and reinforcing contextually relevant material from throughout the course will be presented*

*assessment: to be advised*

*prescribed texts: to be advised*

**7137 Dental Clinical Practice V**

*new curriculum*

*level: V points value: 12 duration: full year*

*availability: available from 1997 and subsequent years*

*prerequisites: 4978 Dental Clinical Practice IV*

*corequisites: 9983 Dental and Health Science V*

*contact hours: to be determined*

*content: This stream builds upon previous years with regard to the acquisition and consolidation of dental clinical skills.*

*assessment: to be advised*

*prescribed texts: to be advised*

**5181 Dental Selectives V**

*new curriculum*

*level: V points value: 4 duration: full year*

*availability: available from 1997 and subsequent years*

*prerequisites: 7571 Dental Selectives IV*

*contact hours: to be determined*

*content: see 7571 Dental Selectives IV*

*assessment: to be advised*

*prescribed texts: to be advised*

**2548 Electives V**

*old curriculum subject not available in 1997 and subsequent years*

*level: V duration: semester 2B*

*contact hours: approx 18 hours per week*

*content: The elective program is designed to give students the opportunity to take part in one or more activities not included in other parts of the course. This might include coursework from other appropriate courses, supervised research projects, additional experience in advanced aspects of a clinical specialty or exchange visits to other dental schools.*

Students are strongly advised to discuss their proposed elective program with the coordinator as soon as possible.

*assessment: Final assessment will be based on the assessment provided by supervisors and on a presentation of work carried out during the elective program held during November.*

**4110 General Dental Practice V**

*old curriculum subject not available in 1997 and subsequent years*

*level: V duration: full year*

*contact hours: 2 weekly seminars in semester 2 and 14 hours of practicals a week*

*content: Clinical experience of the comprehensive management of patients, based on the co-ordination of skills from individual disciplines. Seminars and clinical tutorials explore a wide range of topics relating to general practice. Emphasis is placed on treatment planning, reviews of completed treatments and prognosis.*

*assessment: continuing clinical assessment and final examination consisting of clinical presentation and viva voce exam. An endodontics essay and other assignments may be required*

**9776 Oral Diagnosis and Dental Radiology V**

*old curriculum subject not available in 1997 and subsequent years*

*level: V* *duration: full year*

*contact hours:* 1 one hour weekly seminar in Oral Diagnosis and 12 hours of seminars in Dental Radiology, 3.5 hours of practicals per week in Oral Diagnosis plus 12 hours of practicals per year in Dental Radiology

*content:* Oral Diagnosis: This component continues from the fourth year with increasing emphasis on the development of treatment planning and communication skills. Students will be encouraged to consider the prognosis for their treatment management decisions.

Dental Radiology: Students attend the Dental Radiology unit for a series of sessions gaining expertise in extra-oral radiography. Material from the previous years is reinforced

*assessment:* continuing clinical assessment with final examination consisting of written, practical, or *viva voce* exams. Case presentation or essay assignments may be required. The radiology log book is continued and may be recalled for assessment.

*prescribed texts:* A list of the texts required will be made available at the commencement of the year.

**7629 Oral Medicine and Applied Oral Pathology V**

*old curriculum subject not available in 1997 and subsequent years*

*level: V* *duration: semester 1*

*corequisites:* 9391 Oral Surgery V

*contact hours:* 18 lectures and practicals during Oral Surgery clinics

*content:* Clinical application of oral pathology is covered including the principles of diagnosis of systemic and local diseases affecting the oral cavity. Instruction is given in the use of clinical and laboratory diagnostic procedures. Methods of treatment of oral disease are considered and emphasis is placed on interactions between dental treatment and medical conditions.

*assessment:* final written examination

*prescribed texts:* see 7094 Oral Pathology III plus Little JW & Falace DA *Dental management of the medically compromised patient* (Mosby)

**9391 Oral Surgery V**

*old curriculum subject not available in 1997 and subsequent years*

*level: V* *duration: full year*

*prerequisites:* 9097 Fourth Annual Examination

*contact hours:* 30 lectures and 60 hours of practicals

*content:* The fourth year lecture series is followed and expanded in lecture and clinical tuition. Major aspects of oral surgery including dento-alveolar surgery, maxillo-facial injuries, preprosthetic surgery, orthognathic surgery, temporomandibular joint surgery and aspects of cleft surgery and head and neck oncology are covered

Clinical practice includes patient assessment, diagnosis, selection of appropriate analgesia/anaesthesia, routine exodontia, minor oral surgery and elective oral surgery on outpatients at the Royal Adelaide Hospital.

*assessment:* written examination at the end of semester 1, continuous clinical assessment and final assessment of the clinical component at the completion of the course

*prescribed texts:* to be advised

**1422 Paediatric Dentistry and Orthodontics V**

*old curriculum subject not available in 1997 and subsequent years*

*level: V* *duration: semester 1*

*prerequisites:* 6274 Children's Dentistry IV, 5586 Orthodontics IV

*contact hours:* 1 lecture; 3.25 hours of practicals a week, except for rosters to other areas; 9 hours of tutorials; 10 hours of fieldwork; 15 hours of orthodontic appliance fabrication technique; 1 seminar a week for semester 1

*content:* Lectures cover the topics of soft tissue anomalies in children, anomalies of tooth formation and developmental defects in teeth, occlusal sealants, topical fluorides, relative analgesia and general anaesthesia for children, stainless steel crowns, space-maintainers, handicapped children, child abuse, recall systems, referring of patients, growth and development of the cranio-facial complex, and the recognition, diagnosis and treatment of malocclusion and associated anomalies of the jaws. Also diagnosis and orthodontic treatment planning seminars and student debates are presented. Operative techniques in stainless steel crowns, fixed and removable space maintainers and removable orthodontic appliances will be completed before commencement of clinical

practice. Dental care will be provided to preschool and primary school children including orthodontic consultations, a case presentation and the fabrication and insertion of simple orthodontic appliances.

**assessment:** continuous clinical assessment (55%); written examination (15%); reports on field trips (10%); orthodontic presentation; debates and practical assessment (15%); operative and orthodontic technique exercises (5%)

**prescribed texts:** As for 6274 Children's Dentistry IV and 5586 Orthodontics IV

### 7647 Pain Control V

*old curriculum subject not available in 1997 and subsequent years*

**level:** V **duration:** semester 1

**prerequisites:** 9097 Fourth Annual Examination

**corequisites:** 9391 Oral Surgery V

**contact hours:** 13 hours of lectures and seminars plus practical experience during the Oral Surgery roster

**content:** A fully integrated course encompassing the theoretical and practical tuition necessary for the student to become competent in the essential aspects of the management of apprehension and pain in all dental procedures.

**assessment:** to be advised

**prescribed texts:** Malamed SF Sedation: a guide to patient management 2nd edn (Mosby); Malamed SF Handbook of local anaesthesia 2nd edn (Mosby)

### 5263 Removable Prosthodontics V

*old curriculum subject not available in 1997 and subsequent years*

**level:** V **duration:** semester 1

**prerequisites:** 5376 Removable Prosthodontics IV

**contact hours:** 1 one hour seminar and 1 three hour practical a week

**content:** A series of seminars on selected topics and continuation of clinical practice in removable prosthodontics.

**assessment:** assignments (30%); seminars (20%); continuous clinical assessment (50%)

**prescribed texts:** As for 4450 Dental Clinical Practice III

## Bachelor of Science in Dentistry (Honours)

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar.

As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

### Specific Course Rules

#### 1 Admission requirements

1.1 Before entering upon the course of study for the degree a candidate must:

- (a) have completed the prerequisite work, or work accepted by the Faculty of Dentistry as appropriate for the proposed course of study; and
- (b) be deemed by the Head of the Department concerned to be a suitable candidate for advanced work.

#### 2 Duration of course

2.1 To qualify for the degree a candidate shall undertake advanced study extending over one academic year as a full-time candidate, or with the approval of the Faculty of Dentistry, over a period of not more than two academic years as a half-time candidate and satisfy the examiners at the first attempt.

#### 3 Assessment and examinations

3.1 A candidate shall not be eligible to attend for examination unless the prescribed work has been completed to the satisfaction of the teaching staff concerned

3.2 The names of the candidates who qualify for the degree shall be published within the following classes and divisions in each subject:

First Class

Second Class      Division A  
   Division B

Third Class

3.3 The examination for the degree may consist of such written, oral and practical examinations as may be required. Assessments of any essays submitted by the candidate, practical work completed during the course, and the report on a research investigation may be taken into account.

#### 4 Course of study

4.1 A course of study for the degree may be undertaken in one of the following:

1739 Honours Anatomy and Histology

6777 Honours Biochemistry

2190 Honours Dentistry

7599 Honours Genetics

7751 Honours Materials Science

1551 Honours Pathology

3950 Honours Pharmacology

6740 Honours Physiology

#### 4.2 Assumed knowledge

All courses of study assume a pass in the Third Annual Examination for the degree of Bachelor of Dental Surgery; or an Ordinary degree in another field of study that the Faculty deems equivalent.

Honours Genetics specifically assumes a pass in the subject Genetics II as prescribed for the degree of Bachelor of Science.

#### 4.3 A course of study will consist of such of the following as may be required:

- (a) reading in selected fields and submissions of essays;
- (b) attendance at lectures;
- (c) practical work; and
- (d) the undertaking of a research investigation on a topic assigned early in the course.

## Syllabuses

---

Intending candidates should consult the Head of the appropriate Department prior to commencement of the program for details of required reading and of assessment.

### **2190 Honours Dentistry**

Candidates may, with the approval of the Head of the Department, enrol in the Honours Dentistry program after they have successfully completed the third year of the Ordinary degree of Bachelor of Dental Surgery, or after they have obtained the Ordinary degree of Bachelor of Dental Surgery or equivalent. Under certain circumstances, candidates who have obtained an ordinary degree in another Faculty may be admitted to an Honours program in Dentistry.

Candidates may choose as their principal area of study one of the disciplines of the current research thrust of the Department of Dentistry. Candidates will be required to undertake on a full time basis for one year (unless in half-time if approved by the Head of the Department and Faculty), a course of study which may include essays, seminars, laboratory work, clinical work and a research project under the supervision of a member of the Department. A candidate may be required to undertake such formal courses of study in related subjects as are deemed desirable. Prospective candidates are advised to consult the Head of the Department and staff members in the year preceding the honours year to discuss the area of proposed study

### **1739 Honours Anatomy and Histology**

### **6777 Honours Biochemistry**

### **2190 Honours Dentistry**

### **7599 Honours Genetics**

### **7751 Honours Materials Science**

### **1551 Honours Pathology**

### **3950 Honours Pharmacology**

### **6740 Honours Physiology**

# Graduate Certificate in Dentistry

note: Postgraduate tuition fees may apply to this course.

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar.

As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

## Specific Course Rules

### 1 Admission requirements

1.1 The Faculty of Dentistry may accept as a candidate for the Graduate Certificate any person who:

- (a) has qualified in The University of Adelaide for the degree of Bachelor of Dental Surgery;
- (b) has qualified in another university for a degree or degrees in dentistry which the Faculty regards as equivalent for the purpose to the qualification specified in Specific Course Rule 1.1(a) hereof.

1.2 With the approval of Council, the Faculty may accept as a candidate for the Graduate Certificate a person who does not hold a degree of a University but holds a dental qualification which involved a course of study acceptable to the Faculty and whom Faculty considers to be a suitable candidate for advanced work in clinical dentistry.

### 2 Duration of course

2.1 To qualify for the Graduate Certificate, a candidate shall:

- (a) complete satisfactorily an approved course of study extending over a period of not more than three years as a part-time candidate; and
- (b) pass such written, oral, clinical and practical examinations as may be required by the Faculty.

2.2 The programme of study, examination and such other work as may be required and the period of study for each candidate shall be specified by the Head of Department and approved by the Faculty.

2.3 Unless the Faculty, on the advice of the Head of the Department, approves an extension of time in a particular case, the work for the Graduate Certificate shall be completed within the period of study approved for the particular candidate under Specific Course Rule 2.1.

### 3 Review of academic progress

3.1 A candidate's progress may be reviewed at any time by the Head of Department. If, in the opinion of the Department a candidate is not making satisfactory progress the Faculty may, with the consent of Council, terminate the candidature.

### 4 Assessment and examinations

- 4.1 A candidate shall not be eligible to present for examination unless the required course of study has been completed to the satisfaction of the Head of the Department.
- 4.2 The Faculty shall appoint examiners for written, oral, clinical and other assessments.
- 4.3 There shall be two types of classifications of pass in any subject for the Graduate Certificate: Non Graded Pass; or Pass with High Distinction, Pass with Distinction, Pass with credit and Pass

### 5 General

5.1 To qualify for the Graduate Certificate, a candidate shall satisfactorily complete Graduate Certificate in Dentistry subjects to an aggregate of 12 points.

**6 Course of study/Subjects of study**

6.1 All students shall satisfactorily complete the compulsory subject

1089 Contemporary Dental Practice \* 6

Students shall complete elective subjects to the value of six points taken from the following

8187 Advanced Restorative Dentistry 2

2866 Endodontics C 2

6003 Periodontics C 2

7596 Preventive Dentistry C 2

4877 Removable Prosthetics (full) 2

6605 Removable Prosthetics (partial) 2

Other subjects as they become available.

\* Available in External Mode only.

**7 Articulation with other awards**

Students who complete the Graduate Certificate are eligible to apply for entry to the Diploma in Clinical Dentistry course and if successful on gaining entry, receive status for studies they have undertaken in the Graduate Certificate.

## Syllabuses

### 8187 Advanced Restorative Dentistry

level: postgraduate *points value: 2*

duration: open learning

contact hours: open learning

*content:* This module covers recent trends in crown and bridge work and the dental materials related to the area. Topics covered include diagnosis and treatment planning for crown and bridge work, design of preparations, occlusion, impression materials, recording inter-maxillary relationships, fabrication and cementation of temporary restorations and selection and manipulation of crown and bridge cements.

*assessment:* seminar performance and clinical work

### 1089 Contemporary Dental Practice

level: postgraduate *points value: 6*

duration: open learning

contact hours: open learning

*content:* an external study mode module which aims to review and update current concepts in:

Advanced Restorative; Basic Restorative; Behavioural Science; Community Dentistry; Dental Materials; Endodontics; Implants; Infection Control; Oral Medicine; Oral Pathology; Oral Surgery; Orthodontics, Pain Control; Pedodontics; Periodontics; Pharmacology; Preventive Dentistry; Radiology; Removable Prosthodontics; TMJ Dysfunction.

*assessment:* multiple choice examination and/or project.

### 2866 Endodontics C

level: postgraduate *points value: 2*

duration: open learning

contact hours: open learning

*content:* This module covers the diagnosis of pulpal and periapical conditions, emergency treatment procedures, vital pulp therapy and non vital pulp therapy. Areas covered include consideration of microbiological and immunological aspects, instrumentation, medication and root filling techniques. Periapical surgery management of traumatic injuries bleaching and apification will also be included.

*assessment:* seminar performance and clinical work

### 6003 Periodontics C

level: postgraduate *points value: 2*

duration: open learning

contact hours: open learning

*content:* This module covers the aetiology and epidemiology of periodontal disease and clinical management of patients with periodontal disease. Areas covered include examination procedures and recording of data, clinical diagnosis and classification, dental education and motivation, treatment planning, periodontal treatment and assessment.

*assessment:* seminar performance and clinical work

### 7596 Preventive Dentistry C

level: postgraduate *points value: 2*

duration: open learning

contact hours: open learning

*content:* This module covers the assessment of oral disease and related problems, identification of prevention and control measures, selection of appropriate measures and evaluation of the results.

*assessment:* seminar performance and clinical work

### 4877 Removable Prosthodontics Full

level: postgraduate *points value: 2*

duration: open learning

contact hours: open learning

*content:* This subject covers at an advanced level the management of edentulous patients. Students will undertake diagnosis and treatment planning for complete and immediate dentures.

*assessment:* seminar performance and clinical work

### 6605 Removable Prosthodontics Partial

level: postgraduate *points value: 2*

duration: open learning

contact hours: open learning

*content:* This subject covers at an advanced level the management of partially edentulous patients. Students will undertake diagnosis and treatment planning for removable partial dentures.

*assessment:* seminar performance and clinical work

# Graduate Diploma in Clinical Dentistry

note: Postgraduate tuition fees may apply to this course.

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar.

As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

## Specific Course Rules

### 1 Admission requirements

1.1 The Faculty of Dentistry may accept as a candidate for the Graduate Diploma any person who:

- (a) has qualified in The University of Adelaide for the degree of Bachelor of Dental Surgery;
- (b) has qualified in another university for a degree or degrees in dentistry which the Faculty regards as equivalent for the purpose to the qualification specified in Specific Course Rule 1.1(a) hereof.

1.2 With the approval of Council, the Faculty may accept as a candidate for the Graduate Diploma a person who does not hold a degree of a University but holds a dental qualification which involved a course of study acceptable to the Faculty and whom Faculty considers to be a suitable candidate for advanced work in clinical dentistry.

### 2 Duration of course

2.1 To qualify for the Graduate Diploma, a candidate shall:

- (a) complete satisfactorily an approved course of study extending over at least one year as a full-time student, or with approval of Faculty, over a period of not more than three years as a part-time candidate; and
- (b) pass such written, oral, clinical and practical examinations, and submit such reports as may be required by the Faculty.

2.2 The program of study, examination, reports and such other work as may be required and the period of study for each candidate shall be specified by the Head of Department and approved by the Faculty.

2.3 Unless the Faculty, on the advice of the Head of the Department, approve an extension of time in a particular case, the work for the Graduate Diploma shall be completed within the period of study approved for the particular candidate under Specific Course Rule 2.1.

### 3 Review of academic progress

3.1 A candidate's progress may be reviewed at any time by the Head of Department. If, in the opinion of the Department a candidate is not making satisfactory progress the Faculty may, with the consent of Council, terminate the candidature.

### 4 Assessment and examinations

4.1 A candidate shall not be eligible to present for examination unless the required course of study has been completed to the satisfaction of the Head of the Department.

4.2 The Faculty shall appoint examiners for written, oral, clinical and other assessments.

### 5 General

5.1 A candidate who complies with the foregoing conditions and satisfies the examiners and the Faculty shall be awarded the Graduate Diploma of Clinical Dentistry.

### 6 Course of study

6.1 The course of study shall be in four sections.

#### 6.1.1 Coursework

The formal course will consist of lectures, guided reading and tutorials concerned with specified clinical disciplines and related subjects, and supervised clinical and/or laboratory practice.

6.1.2 Major Clinical subject

Lectures/tutorials, clinical and laboratory work in one of the subjects taken at an advanced level.

6.1.3 Critical Survey of Research Literature (related to a specific subject).

6.1.4 Introduction to Research Methodology (scientific method, basic statistics, etc).

6.2 Course work may be in one of the following clinical disciplines

7700 Community and Preventive Dentistry\*

8016 Conservative Dentistry\*

7712 Endodontics\*

9648 General Dental Practice

9435 Paediatric Dentistry\*

3882 Removable Prosthodontics\*

Other clinical subjects may be considered from time to time.

\* Not available in 1996

# Graduate Diploma in Forensic Odontology

note: Postgraduate tuition fees may apply to this course.

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar.

As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

## Specific Course Rules

### 1 Admission requirements

- 1.1 An applicant for admission to the course of study for the Graduate Diploma shall have qualified for the degree of Bachelor of Dental Surgery in The University of Adelaide, or hold qualifications in Dentistry from another institution accepted for the purpose by the University.
- 1.2 Subject to the approval of the Council, the Faculty may accept as a candidate an applicant who does not satisfy the requirements of Specific Course Rule 1.1 above but who have given evidence satisfactory to the Faculty of fitness to undertake advanced work in dentistry.

### 2 General

- 2.1 For each candidate, the Faculty shall appoint a supervisor or supervisors for guidance.
- 2.2 A candidate for the diploma shall regularly attend lectures and tutorials, do such written, clinical and other practical work, and pass such examinations, as may be required by the Head of the Department of Dentistry.
- 2.3 Students shall at all times be under the direction and supervision of a member of the teaching staff, duly appointed by the Chairman or the Director of the Forensic Odontology Unit, and shall carry out such work as shall be allocated

### 3 Duration of course

- 3.1 To qualify for the Diploma a candidate shall satisfactorily complete a course of full-time study extending over one year, or of part-time study extending over at least two years. Except with special permission of the Faculty, the course for the Graduate Diploma shall be completed in not more than three years.

### 4 Assessment and examinations

- 4.1 The Faculty may appoint a Board of Examiners to carry out or supervise the examination of candidates for the Graduate Diploma in accordance with the schedules and syllabuses.
- 4.2 A candidate shall not be eligible to attend for examination unless the prescribed course of study has been completed to the satisfaction of the Head of the Department.

### 5 Qualification requirements

- 5.1 To qualify for the diploma a candidate shall pass the following subjects
  - 3914 Anatomy and Forensic Anthropology
  - 4660 Basic and Applied Dental Sciences
  - 6760 Casework in Forensic Odontology
  - 9472 Oral and Forensic Pathology
  - 8843 Principles and Methods of Forensic Odontology
  - 5305 Research Methods and Ethics

### 6 Review of academic progress

- 6.1 If in the opinion of the Faculty a candidate is not making satisfactory progress, the Faculty may, with the consent of Council, terminate the candidature.

## Syllabuses

### 3914 Anatomy and Forensic Anthropology

level: postgraduate

point value: 4

duration: full year

contact hours: 2 hour seminar per week

*content:* The scope and history of physical anthropology generally and in South Australia. Osteology of the skull. Comparative anatomy and evolution of head form and the masticatory system. Principles and methodology for study of human growth and development. Craniofacial growth and development and normal age changes. Human and dental genetics. Craniofacial malformations and paleopathology. Somatometry, craniometry and cephalometry with emphasis on new imaging techniques. Osteology of race. Disaster victim identification including cultural factors, management and international protocol.

*assessment:* to be advised

### 4660 Basic and Applied Dental Sciences

level: postgraduate

points value: 2

duration: semester 2

*prerequisites:* 5305 Research Methods and Ethics

contact hours: 2 hours per week

*syllabus details:* see Master of Dental Surgery

### 6760 Casework in Forensic Odontology

level: postgraduate

points value: 8

duration: full year

contact hours: Students will receive supervision as required.

*content:* The subject will require students to participate in routine casework undertaken by the Forensic Odontology Unit including attendance at Coroner's mortuary and Courts of Law. Students will undertake a small research project in an approved topic.

*assessment:* to be advised

### 9472 Oral and Forensic Pathology

level: postgraduate

points value: 4

duration: full year

contact hours: 2 hour seminar per week

*content:* This subject introduces general principles of forensic pathology. Emphasis is given to diagnosis and time of death, rigor mortis, time since death, age at death. Methods of forensic pathology examinations and identification of the dead are introduced including medical identification, injuries, serology and DNA identification. Age determination by dental methods and dental histopathology.

*assessment:* to be advised

### 8843 Principles and Methods of Forensic Odontology

level: postgraduate

points value: 4

duration: full year

contact hours: 2 hour seminar per week

*content:* History and role of forensic odontology in community dentistry. Legal systems and role and jurisdiction of courts of law. The coronial system and practice of the Coroner's Office. Expert evidence. Methods of investigation of civil and criminal matters. Relationship of police to forensic odontology. Preservation and recovery of dental evidence from scene. Forensic dental photography. Principles and techniques of video and computer imaging in cranio facial superimposition. Procedures for investigation of bitemarks.

*assessment:* to be advised

### 5305 Research Methods and Ethics

level: postgraduate

points value: 2

duration: semester 1

contact hours: 2 hours per week

*syllabus details:* see Master of Dental Surgery

# Master of Dental Surgery

note: Postgraduate tuition fees may apply to this course.

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar.

As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

## Specific Course Rules

### 1 Admission requirements

- 1.1 (a) The Faculty of Dentistry may accept as a candidate for the degree any person who:
  - (b) has qualified in The University of Adelaide for the degree of Bachelor of Dental Surgery and who has acquired at least one year of relevant practical experience since qualifying for that degree or who has qualified for an appropriate higher degree or diploma.
  - (c) has qualified in another university for a degree or degrees in dentistry which the Faculty regards as equivalent to the qualifications specified in Specific Course Rule 1.1(a) hereof.
- 1.2 With the approval of the Board of Graduate Studies, acting with authority wittingly devolved to it by Council, the Faculty may accept as a candidate for the degree a person who does not hold a degree of a university but holds a dental qualification which involved a course of study acceptable to the Faculty and whom Faculty considers to be a suitable candidate for advanced work.
- 1.3 A candidate shall not be admitted to the degree before the expiration of two calendar years from the date of his admission to candidature.
- 1.4 A person who wishes to become a candidate for the degree shall apply to the Registrar indicating in general terms the subject and outline of the proposed course of study for examination and of the proposed research project.

### 2 Supervision

- 2.1 For each candidate, the Faculty shall appoint a supervisor or supervisors for guidance.

### 3 Duration of course

- 3.1 To qualify for the degree a candidate shall satisfactorily complete a course of study and a research project on a subject approved by the Faculty of Dentistry.
- 3.2 Unless the Faculty expressly approve an extension of time in a particular case, the work for the degree shall be completed and the research report submitted:
  - (a) in the case of a full-time candidate, in not less than two and not more than three calendar years from the date of admission to candidature; or
  - (b) in the case of a half-time candidate, who is able to devote at least half of the time to the approved program of work for the degree as prescribed in Specific Course Rules 1.1 and 1.2, in not less than four and not more than six calendar years from the date of admission to candidature.

### 4 Review of academic progress

- 4.1 A candidate's progress shall be reviewed by the Master's Examination Committee at the end of the first year of the course or after two years in the case of a half-time candidate. If, in the opinion of the Committee, a candidate is not making satisfactory progress the Faculty may, with the consent of the Council, terminate the candidature.

### 5 Assessment and examinations

- 5.1 On completion of their work candidates shall lodge with the Registrar three copies of the research report which shall be prepared in accordance with directions given from time to time. Refer to the Guidelines on Higher Degrees by Research and Specifications for Thesis in this volume.

**5.2** The Faculty shall appoint examiners of the research report at least one of whom shall be an external examiner.

**5.3** The examiners may recommend that a candidate be examined orally or otherwise on the subject of the research report and the general field of knowledge in which it falls.

**5.4** For each candidate the Faculty shall appoint a Master's Examination Committee which shall:

- (a) recommend the appointment of examiners under Specific Course Rule 5.2;
- (b) consider the reports of the examiners of the research report and the results of any examination; and
- (c) recommend the appointment of examiners to examine a candidate under Specific Course Rule 5.3 if it concurs with a recommendation by the examiners under that Rule.

**5.5** The Master's Examination Committee may recommend to Faculty through the Higher Degrees and Scholarships Committee that the candidate:

- (a) be awarded the degree;
- (b) be awarded the degree subject to such minor amendments of the research report as the examiners may have suggested;
- (c) be not awarded the degree but be allowed to revise and resubmit the research report within such period as the Faculty may allow; or
- (d) be not awarded the degree.

## **6 General**

**6.1** A candidate who complies with the following conditions and satisfies the Examination Committee shall, on the recommendation of the Faculty, be awarded the degree of Master of Dental Surgery.

## **7 Subjects of study and research projects**

**7.1** Candidates shall satisfactorily complete:

- (a) the following subjects:

code	subject title	points
5305	Research Methods and Ethics	2
4660	Basic and Applied Dental Sciences	2

- (b) and two (or for the orthodontics program, three) of the following subjects in the same field of study unless the Faculty specially approves otherwise:

8881	Advanced Dentistry VI	12
9323	Advanced Dentistry VII	16
3813	Combined Prosthodontics VI	12
4685	Combined Prosthodontics VII	16
4870	Community and Preventive Dentistry VI	12
8786	Community and Preventive Dentistry VII	16
8652	Conservative Dentistry VI	12
6212	Conservative Dentistry VII	16
3804	Dental Radiology VI	12
2961	Dental Radiology VII	16
9642	Endodontics VI	12
9130	Endodontics VII	16
6699	Forensic Odontology VI	12
5299	Forensic Odontology VII	16
8003	General Dental Practice VII	16
4759	Gerodontics VI	12
8813	Gerodontics VII	16
1597	Oral and Maxillofacial Surgery VI	12
1449	Oral and Maxillofacial Surgery VII	16
1055	Oral Pathology VI	12
4133	Oral Pathology VII	16
1764	Orthodontics VI	12
6708	Orthodontics VII	16
6303	Orthodontics VIII	24
4871	Paediatric Dentistry VI	12
6968	Paediatric Dentistry VII	16
4989	Periodontics VI	12
3123	Periodontics VII	16
1924	Prosthodontics VI	12
5321	Prosthodontics VII	16
7749	Tropical Oral Pathology VI	12
8547	Tropical Oral Pathology VII	16

## Syllabuses

### 8881 Advanced Dentistry VI

*points value:* 12                      *duration:* full year

*corequisites:* 5305 Research Methods and Ethics, 4660 Basic and Applied Dental Sciences

*contact hours:* 10 hours per week

*content:* Advanced Dentistry serves as a mechanism for students to enrol in postgraduate dentistry courses for which there are not yet prescribed courses.

*assessment:* Assessment for each module will be arranged in consultation with the coordinator.

### 9323 Advanced Dentistry VII

*points value:* 16                      *duration:* full year

*availability:* not offered in 1996

*prerequisites:* 8881 Advanced Dentistry VI

*contact hours:* 10 hours per week

*content:* as for 8881 Advanced Dentistry VI

*assessment:* as for 8881 Advanced Dentistry VI

### 4660 Basic and Applied Dental Sciences

*points value:* 2                      *duration:* semester 2

*prerequisites:* 5305 Research Methods and Ethics

*contact hours:* 2 hours per week

*content:* The course of seminars aims to provide postgraduate students with a broad appreciation of current knowledge in the basic and applied dental sciences, and to enable them to become acquainted with research programs within the Department of Dentistry.

*assessment:* to be advised

### 3813 Combined Prosthodontics VI

*points value:* 12                      *duration:* full year

*corequisites:* 5305 Research Methods and Ethics, 4660 Basic and Applied Dental Sciences

*contact hours:* 10 hours per week

*content:* Combined Prosthodontics aims to bring together at an advanced level the principles and practices of the disciplines of prosthodontics and conservative dentistry.

*assessment:* Assessment for each module will be arranged in consultation with the coordinator.

### 4685 Combined Prosthodontics VII

*points value:* 16                      *duration:* full year

*availability:* not offered in 1996

*prerequisites:* 3813 Combined Prosthodontics VI

*contact hours:* 10 hours per week

*content:* see 3813 Combined Prosthodontics VI

*assessment:* see 3813 Combined Prosthodontics VI

### 4870 Community and Preventive Dentistry VI

*points value:* 12                      *duration:* full year

*availability:* not offered in 1996

*corequisites:* 5305 Research Methods and Ethics, 4660 Basic and Applied Dental Sciences

*contact hours:* 12 hours per week

*content:* Lectures, seminars and practicals covering the nature and distribution of oral diseases and related problems, their aetiology and prognosis, and clinical interventions that may prevent or control them at an individual or population level.

*assessment:* continuous assessment, assignments and final open book examination

### 8786 Community and Preventive Dentistry VII

*points value:* 16                      *duration:* full year

*availability:* not offered in 1996

*prerequisites:* 4870 Community and Preventive Dentistry VI

*contact hours:* 16 hours per week

*content:* Lectures, seminars and practicals covering the assessment of oral disease and related problems, identification of prevention and control measures, selection and implementation of appropriate measures and evaluation of the results.

*assessment:* continuous assessment, assignments and final open book examination

### 8652 Conservative Dentistry VI

*points value:* 12                      *duration:* full year

*corequisites:* 5305 Research Methods and Ethics, 4660 Basic and Applied Dental Sciences

*contact hours:* 16-20 hours per week

*content:* The course is designed to meet the special needs of individual students in achieving advanced knowledge in research and clinical skills in selected branches of Conservative Dentistry.

*assessment:* seminar performance, essays, research and clinical work

### **6212 Conservative Dentistry VII**

*points value:* 16 *duration:* full year

*prerequisites:* 8652 Conservative Dentistry VI

*contact hours:* as for 8652 Conservative Dentistry VI

*content:* as for 8652 Conservative Dentistry VI

*assessment:* see 8652 Conservative Dentistry VI

### **3804 Dental Radiology VI**

*points value:* 12 *duration:* full year

*availability:* not offered in 1996

*corequisites:* 5305 Research Methods and Ethics, 4660 Basic and Applied Dental Sciences

*contact hours:* 10 hours per week

*content:* The subject comprises advanced aspects of dental radiology, including biological sciences, radiological sciences, radiography and radiology with advanced work being undertaken in the related disciplines of oral pathology, oral diagnosis and oral medicine. Students will attend radiology clinics in the Adelaide Dental Hospital, Royal Adelaide Hospital, Flinders Medical Centre as well as private clinics.

*assessment:* Assessment for each module will be arranged in consultation with the coordinator.

### **2961 Dental Radiology VII**

*points value:* 16 *duration:* full year

*availability:* not offered in 1996

*prerequisites:* 3804 Dental Radiology VI

*contact hours:* 10 hours per week

*content:* As for 3084 Dental Radiology VI

*assessment:* see 3084 Dental Radiology VI

### **9642 Endodontics VI**

*points value:* 12 *duration:* full year

*prerequisites:* successful completion of the primary examinations of the Royal Australasian College of Dental Surgeons (or equivalent)

*corequisites:* 5305 Research Methods and Ethics, 4660 Basic and Applied Dental Sciences

*contact hours:* 12 hours per week

*content:* The program aims at fulfilling the requirements for graduate education as laid down in guidelines published by the Australian Society of Endodontology. The coursework component consists of lectures and seminars in the following areas: endodontology, oral and general pathology, oral microbiology, immunology, lecturing and public speaking, oral surgery, restorative dentistry, periodontology and radiology.

The clinical component provides experience within the discipline of endodontology in the form of technique work on the human skull, clinical practice, observations in private endodontic and oral surgery practices.

*assessment:* Assessment for each module will be arranged in consultation with the coordinator.

### **9130 Endodontics VII**

*points value:* 16 *duration:* full year

*prerequisites:* 9642 Endodontics VI

*contact hours:* 12 hours per week

*content:* As for 9642 Endodontics VI

*assessment:* see 9642 Endodontics VI

### **6699 Forensic Odontology VI**

*points value:* 12 *duration:* full year

*corequisites:* 5305 Research Methods and Ethics, 4660 Basic and Applied Dental Sciences

*contact hours:* 10 hours per week

*content:* This subject covers similar material to that covered in the Graduate Diploma in Forensic Odontology but in greater depth. The student will be required to undertake extra work in one or more of the specialised areas within the field of Forensic Odontology. Details will be determined in consultation with staff.

*assessment:* Assessment will be arranged in consultation with the coordinator.

### **5299 Forensic Odontology VII**

*points value:* 16 *duration:* full year

*availability:* not offered in 1996

*prerequisites:* 6699 Forensic Odontology VI

*contact hours:* 10 hours per week

*content:* as for 6699 Forensic Odontology VI

*assessment:* see 6699 Forensic Odontology VI

**3992 General Dental Practice VI***points value:* 12*availability:* not offered in 1996*corequisites:* 5305 Research Methods and Ethics, 4660 Basic and Applied Dental Sciences*contact hours:* 12 hours per week*content:* Advanced clinical experience of the comprehensive management of patients, based upon the co-ordination of skills from individual disciplines. Seminars and clinical tutorials explore a wide range of topics relating to general practice at the Masters level. Emphasis is placed on treatment planning, reviews of completed treatments and prognosis.*assessment:* to be arranged in consultation with the coordinator**8003 General Dental Practice VII***points value:* 16*duration:* full year*availability:* not offered in 1996*prerequisites:* 3992 General Dental Practice VI*contact hours:* 12 hours per week*content:* as for 3992 General Dental Practice VI*assessment:* see 3992 General Dental Practice VI**4759 Gerodontics VI***points value:* 12*duration:* full year*availability:* not offered in 1996*corequisites:* 5305 Research Methods and Ethics, 4660 Basic and Applied Dental Sciences*contact hours:* 10 hours per week*content:* The subject aims to comprehensively cover all aspects of treatment of the ageing population. This comprises the clinical aspects of managing the aged patient, with emphasis on conservative and prosthetic dentistry. Aspects which affect the aged patient such as medical, sociological, epidemiological factors will also be covered*assessment:* to be arranged in consultation with the coordinator**8813 Gerodontics VII***points value:* 16*duration:* full year*availability:* not offered in 1996*prerequisites:* 4759 Gerodontics VI*contact hours:* 10 hours per week*content:* as for 4759 Gerodontics VI*assessment:* see 4759 Gerodontics VI**1055 Oral Pathology VI***points value:* 12*duration:* full year*corequisites:* 5305 Research Methods and Ethics, 4660 Basic and Applied Dental Sciences*contact hours:* 10 hours per week*content:* This subject deals with the systematic pathology and histopathology of the oral mucosa, the jawbones, the salivary glands, the temporomandibular joint, the maxillary sinus, the teeth, cancer of the oral region and odontogenic tumours at the postgraduate level. During the two year program candidates are involved in both theoretical and practical aspects of general pathology and all facets of diagnostic oral histopathology. A minor research project is undertaken as part of the program. At the completion of the course the student will be a competent diagnostician with comprehensive knowledge of all aspects of diagnostic oral histopathology.*assessment:* to be arranged in consultation with the coordinator**4133 Oral Pathology VII***points value:* 16*duration:* full year*prerequisites:* 1055 Oral Pathology VI*contact hours:* 10 hours per week*content:* As for 1055 Oral Pathology VI*assessment:* see 1055 Oral Pathology VI**1597 Oral and Maxillofacial Surgery VI***points value:* 12*duration:* full year*prerequisites:* successful completion of the Primary Examinations of the Royal Australian College of Dental Surgeons and satisfactory progress with employment at the Royal Adelaide Hospital.*contact hours:* part time course with concurrent appointment as Junior Registrar with the Royal Adelaide Hospital*content:* The course covers all academic and clinical aspects of modern Oral and Maxillofacial Surgery. This includes dento alveolar surgery, maxillofacial injuries, preprosthetic surgery including implants, orthognathic surgery, temporomandibular joint surgery and aspects of cleft surgery and head and neck oncology.*assessment:* continuous assessment (60%); coursework (10%); research (30%)

**1449 Oral and Maxillofacial Surgery VII**

*points value:* 16 *duration:* full year

*prerequisites:* 1597 Oral and Maxillofacial Surgery VI

*corequisites:* selected subjects from second and third years of M.B.B.S. program

*contact hours:* as for 1597 Oral and Maxillofacial Surgery VI

*content:* see 1597 Oral and Maxillofacial Surgery VI

*assessment:* see 1597 Oral and Maxillofacial Surgery VI

**1764 Orthodontics VI**

*points value:* 12 *duration:* full year

*prerequisite:* a minimum of 2 years clinical general practice (or equivalent) experience

*corequisites:* 5305 Research Methods and Ethics, 4660 Basic and Applied Dental Sciences

*contact hours:* 40 hours per week

*content:* Normal growth changes of the body in general, and of the craniofacial complex in particular, with reference to growth of the jaws, eruption of the teeth and development of normal occlusion.

Applied anatomy of the head and neck with special reference to the temporomandibular joint and to the muscles that attach directly and indirectly to the mandible.

The physiology of the stomatognathic system, and in particular the physiology of sucking, mastication, deglutition, respiration and phonation, and the effect that soft tissues have on the developing occlusion.

A study of growth and development, encompassing embryology, histology, genetics, anthropology and oral pathology.

The principles of examination and orthodontic diagnosis on patients, which involves cephalometrics and radiology.

A detailed study of the periodontium and its reaction to orthodontic tooth movement.

The properties and uses of orthodontic materials.

Cleft palate and other dento-facial deformities and their surgical management.

Clinical orthodontic treatment with fixed appliances, including Begg and Edgewise techniques is a major component.

*assessment:* to be arranged in consultation with the coordinator

**6708 Orthodontics VII**

*points value:* 16 *duration:* full year

*prerequisites:* 1764 Orthodontics VI

*contact hours:* 40 hours per week

*content:* see 1764 Orthodontics VI

*assessment:* see 1764 Orthodontics VI

**6303 Orthodontics VIII**

*points value:* 24 *duration:* full year

*prerequisites:* 6708 Orthodontics VII

*contact hours:* 40 hours per week

*content:* see 1764 Orthodontics VI

*assessment:* see 1764 Orthodontics VI

**4871 Paediatric Dentistry VI**

*points value:* 12 *duration:* full year

*corequisites:* 5305 Research Methods and Ethics, 4660 Basic and Applied Dental Sciences

*contact hours:* 10 hours per week

*content:* Specialised treatment of the Paediatric Dental patient requires increased knowledge, understanding and expertise in many of the areas of dentistry, particularly in behaviour modification. Individual preventive programs for all types of child and adolescent patients including the medically compromised patient are a prerequisite for comprehensive dental care of the child and adolescent. Areas of increased expertise would include preventive dentistry, community dentistry, infant oral health care, aesthetic considerations, minor oral surgery procedures, growth and development of the teeth and jaws, interceptive orthodontics including the use of removable appliances, space maintaining and minor fixed appliances, the treatment of severe dental trauma and endodontics in children.

Seminars and clinical tutorials on patients with severe dental and medical problems will be undertaken. The student will also gain experience and improve their skills in teaching and producing audiovisual aids. Selected topics for review are required in addition to the research project. Clinical experience will be provided in The Adelaide Dental Hospital, The Adelaide Medical Centre for Women and Children and The Somerton Park School of Dental Therapy.

*assessment:* students will be advised of assessment format during the course.

**6968 Paediatric Dentistry VII***points value:* 16*duration:* full year*prerequisites:* 4871 Paedodontics VI*contact hours:* 10 hours per week*content:* see 4871 Paedodontics VI*assessment:* see 4871 Paedodontics VI**4989 Periodontics VI***points value:* 12*duration:* full year*prerequisites:* 2 years' clinical experience*corequisites:* 5305 Research Methods and Ethics, 4660 Basic and Applied Dental Sciences*contact hours:* 10 hours per week

*content:* The course covers: (1)the macro and micro anatomical aspects of the alveolus that influence the pathogenesis of alveolar disease. (2)Fundamental biological properties of indigenous bacteria and their role in the etiology of human disease. (3)The epidemiology of the periodontal diseases. (4)The prevalence of physiological and pathological changes in the alveolus of dry skulls (anthropological aspects of periodontal tissues). (5)Concepts of human chronic disease and their relevance to periodontics. (6)Behavioural component of periodontal disease. (7)Environmental component of periodontal disease. (8)Clinical studies and management of periodontal pathoses.

*assessment:* seminar performance, essays, research and clinical work, reviews of current periodontic journals

**3123 Periodontics VII***points value:* 16*duration:* full year*prerequisites:* 4989 Periodontics VI*contact hours:* 10 hours per week*content:* see for 4989 Periodontology VI

*assessment:* seminar performance, essays, research and clinical work, journal reviews

**1924 Prosthodontics VI***points value:* 12*duration:* full year*corequisites:* 5305 Research Methods and Ethics, 4660 Basic and Applied Dental Sciences*contact hours:* 10 hours per week

*content:* The subject considers at an advanced level the management of edentulous patients. Areas covered include diagnosis and treatment planning, principles of complete denture design including retention, support,

stability and tissue preservation, complete denture construction and the planning and construction of immediate dentures.

*assessment:* seminar performance, essays, research and clinical work

**5321 Prosthodontics VII***points value:* 16*duration:* full year*availability:* not offered in 1996*prerequisites:* 1924 Prosthodontics VI*contact hours:* 10 hours per week*content:* see 1924 Prosthodontics VI*assessment:* as for 1924 Prosthodontics VI**5305 Research Methods and Ethics***points value:* 2*duration:* semester 1*contact hours:* 2 hours per week

*content:* This course of seminars provides an appreciation of the scientific method and of ethics as well as practical aspects of biostatistics, experimental design, research methodology, laboratory safety and infection control, use of computers and bibliographic databases, preparation of initial research proposal, evaluation of research papers, scientific writing and presentation of research findings. Where possible, the material presented will be selected to meet the specific requirements of the students enrolled.

*assessment:* Assessment will include a short test in biostatistics and evaluation of a short written critique of a given scientific paper.

**7749 Tropical Oral Pathology VI***points value:* 12*availability:* not offered in 1996*corequisites:* 5305 Research Methods and Ethics, 4660 Basic and Applied Dental Sciences*contact hours:* 10 hours per week

*content:* this subject covers all aspects of oral pathology as described for 1055 Oral Pathology VI and 4133 Oral Pathology VII but with major emphasis on those diseases relevant to tropical regions. The course also includes work related to consideration of climatic, geographical, environmental and social factors impinging on minor research project which has relevance to the tropics is also undertaken.

*assessment:* seminar performance, essays, research and diagnostic histopathology work

**8547 Tropical Oral Pathology VII**

points value: 16

duration: full year

availability: not offered in 1996

prerequisites: 7749 Tropical Oral Pathology VI

contact hours: see 7749 Tropical Oral Pathology VI

content: see 7749 Tropical Oral Pathology VI

assessment: see 7749 Tropical Oral Pathology VI

# Master of Science in Dentistry

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar.

As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

## Specific Course Rules

### 1 Admission requirements

- 1.1** The Faculty of Dentistry may accept as a candidate for the degree any person who:
- has qualified in The University of Adelaide for the degree of Bachelor of Dental Surgery and for the Honours Degree of Bachelor of Science in Dentistry with First or Second Class Honours;
  - has qualified for a degree in Dentistry and whose qualifications are regarded by the Faculty as equivalent to those specified in 1.1(a) hereof; or
  - has qualified for a degree or degrees other than in Dentistry which the Faculty regards as equivalent to the qualifications specified in 1.1(a) hereof.
- 1.2** In exceptional cases and with the approval of the Board of Graduate Studies, acting with authority wittingly devolved to it by Council, Faculty may accept as a candidate for the degree a person who does not hold a degree of a university but who possesses qualifications and experience, in a relevant area, which satisfies Faculty that the person is a suitable candidate for advanced work.
- 1.3** A person who wishes to become a candidate for the degree shall apply to the Registrar indicating in general terms the subject and outline of the proposed research project and where applicable the proposed course of study for examination.

### 2 Supervision

- 2.1** For each candidate, the Faculty shall appoint a supervisor or supervisors for guidance.

### 3 Duration of course and qualification requirements

- 3.1** A candidate shall not be admitted to the degree before the expiration of two calendar years from the date of admission to candidature.
- 3.2** To qualify for the degree, a candidate shall:
- complete satisfactorily, in The University of Adelaide or at an institution approved for the purpose by the Faculty, an approved course of study and research of a minimum duration of two calendar years and a maximum of three calendar years. In the cases of half-time candidates, the requirements will be a minimum of four calendar years and a maximum of six calendar years;
  - perform satisfactorily an original research project which shall comprise the whole or at least the great majority of the course in 3.2(a) hereof;
  - submit a satisfactory thesis on the subject of the research project which contributes to the knowledge of that subject; and
  - pass such examinations as the Master's Examination Committee may determine.
- 3.3** Unless the Faculty expressly approve an extension of time in a particular case, the thesis shall be submitted and the other work for the degree (if any) completed:
- in the case of a full-time candidate, within three calendar years from the date of admission to candidature; or
  - in the case of a half-time candidate, who is able to devote at least half of the time to the approved program of work for the degree as prescribed in 3.3, within six calendar years from the date of admission to candidature.

#### **4 Review of academic progress**

- 4.1 A candidate's progress shall be reviewed by the Master's Examination Committee at the end of the first year of the course or the second year in the case of half-time candidates. If, in the opinion of the Committee, a candidate is not making satisfactory progress the Faculty may, with the consent of the Council, terminate the candidature.

#### **5 Assessment and examinations**

- 5.1 On completion of their work, candidates shall lodge with the Registrar three copies of the thesis which shall be prepared in accordance with directions given from time to time.
- 5.2 The Faculty shall appoint examiners of the thesis at least one of whom shall be an external examiner.
- 5.3 The examiners may recommend that a candidate be examined orally or otherwise on the subject of the thesis and the general field of knowledge in which it falls.
- 5.4 For each candidate the Faculty shall appoint a Master's Examination Committee which shall:
- (a) recommend the appointment of examiners under 5.2;
  - (b) consider the reports of the examiners of the research report and the results of any examination; and
  - (c) recommend the appointment of examiners
    - (i) to examine a candidate under 2.1(d) and
    - (ii) to examine a candidate under 5.3 if it concurs with a recommendation by the examiners under the Rule.
- 5.5 The Master's Examination Committee may recommend to Faculty through the Higher Degrees and Scholarships Committee that the candidate:
- (a) be awarded the degree;
  - (b) be awarded the degree subject to such minor amendments of the thesis as the examiners may have suggested;
  - (c) be not awarded the degree but be allowed to revise and resubmit the thesis within such period as the Faculty may allow; or
  - (d) be not awarded the degree.

#### **6 General**

- 6.1 A candidate who complies with the foregoing conditions and satisfies the Examination Committee shall, on the recommendation of the Faculty, be awarded the degree of Master of Science in Dentistry.

Please note that the above Specific Course Rules are currently under review.

## Doctor of Dental Science

### Regulations

- 1 A person shall not be accepted as a candidate for the degree of Doctor of Dental Science until the expiration of at least four years from admission to the degree of Bachelor of Dental Surgery in The University of Adelaide provided that, in the case of a graduate in dentistry of another university who has been admitted ad eundem gradum in The University of Adelaide, the period of four years shall be reckoned from the date of the first graduation in dentistry.
- 2 Except in special cases approved by the Board of Graduate Studies, acting with authority wittingly devolved to it by Council only persons who have been admitted to the degree of Master of Dental Surgery or Master of Science in Dentistry or Doctor of Philosophy may become candidates for the degree of Doctor of Dental Science.
- 3
  - (a) A person who desires to become a candidate for the degree shall give notice of the intended candidature in writing to the Registrar. At the same time, and in a separate statement, the applicant shall furnish particulars of personal achievements and a summary of the progress of knowledge relevant to the work proposed for the degree, and indicate where it is considered that the work advances dental knowledge or practice.
  - (b) The Faculty of Dentistry shall appoint a committee to investigate the information submitted, including the quality and nature of the work to be submitted, and to advise the Faculty as to whether the Faculty should (i) allow the applicant to proceed, and approve the subject or subjects of the work to be submitted; (ii) advise the applicant to revise the submission; (iii) advise the applicant not to submit the work; or (iv) not allow the applicant to proceed and the Faculty's decision shall be conveyed to the applicant.
  - (c) If the candidature is accepted and the candidate proceeds with the submission, the Faculty shall approve two or more examiners recommended by the committee of whom at least one shall be external to the University.
  - (d) The thesis may be written specially for the degree, or may be an already published work, or may be a series of papers. It shall not be a compilation from books, nor a mere compendium of cases, nor merely observational. On the recommendation of an examiner, a candidate may be required to undergo examination in the subject matter of, or in subjects cognate to, the thesis.
  - (e) In submitting published works, the candidate shall state generally in a preface and specifically in notes, the main sources from which the information was derived and the extent to which the work of others has been included, especially where joint publications are concerned. The candidate may also signify in general terms those parts of the work that are claimed as original. The candidate is also required to indicate what part, if any, of the work has been submitted for a degree in this or any other university.
- 4 To qualify for the degree, the candidate must satisfy the examiners that the thesis makes an original contribution of distinguished merit and advances knowledge in some branch of dental science.
- 5 The candidate shall lodge with the Registrar three copies of the work prepared in accordance with the directions given in sub-paragraph (b) of clause 2B of Chapter XXV of the Statutes. If the work is accepted for the degree the Registrar will transmit two of the copies to the University Library.
- 6 On receipt of the reports of the examiners appointed to adjudicate upon the thesis the Faculty of Dentistry will recommend whether the degree be granted or withheld or delayed.
- 7 Notwithstanding anything contained in the preceding regulations, the Faculty may in exceptional circumstances recommend the award of the degree to any person who is not a member of the staff of the University. Any such recommendation must be accompanied by evidence that the person for whom the award is proposed has made an original and substantial contribution of distinguished merit to some branch of dental science.

Regulations allowed 10 December, 1942

Amended: 16 Mar. 1961: 5; 15 Jan. 1976: 7; 4 Feb. 1982: 5; 1 Mar. 1984: 2, 7

Regulations repealed and substituted 1 Mar. 1989; 21 Feb. 1991: 2

Discussion

As the health care system in the United States continues to evolve, the role of the state will become increasingly important. The state has the power to regulate the health care industry, to provide funding for health care, and to ensure that health care is accessible to all citizens.

The state has a long history of involvement in health care. From the early days of public health to the modern era of health insurance, the state has played a central role in shaping the health care system. The state's involvement in health care is likely to continue to grow in the future.

The state's role in health care is complex and multifaceted. It involves a wide range of activities, from regulation to funding to provision of care. The state's role in health care is likely to continue to evolve in the future.

The state's role in health care is a topic that has received a great deal of attention in recent years. As the health care system continues to evolve, the state's role will become increasingly important.

The state's role in health care is a topic that has received a great deal of attention in recent years. ## Faculty of Economics and Commerce

### Regulations

#### Of Awards in the Faculty of Economics and Commerce

- 1 In the Faculty of Economics and Commerce there shall be the following awards
  - Ordinary degree of Bachelor of Commerce
  - Ordinary degree of Bachelor of Economics
  - Honours degree of Bachelor of Commerce
  - Honours degree of Bachelor of Economics
  - Graduate Certificate in Economics
  - Graduate Certificate in Management
  - Graduate Diploma in Advanced Economics
  - Graduate Diploma in Applied Economics
  - Graduate Diploma in Economics
  - Graduate Diploma in Management
  - Master of Business Administration
  - Master of Commerce
  - Master of Economics
  - Master of Economics (Coursework)\*
  - Master of Management (Leadership and Enterprise Development)
- 2 The courses for the awards listed in Regulation 1 shall be governed by the General Course Rules and Specific Course Rules that the Council shall prescribe from time to time.
- 3 The syllabuses of subjects shall be specified by the Council.

notes not forming part of the Regulations

- 1 Council has delegated the power to approve minor changes to the General Course Rules to the Deputy Vice-Chancellor (Academic).
- 2 Council has delegated the power to approve minor changes to the Specific Course Rules to the Deans of Faculties.
- 3 Council has delegated the power to specify syllabuses to the Head of each department or centre concerned, such syllabuses to be subject to approval by the Faculty or by the Dean on behalf of the Faculty. The Head of department or centre may approve minor changes to any previously approved syllabus.

Regulations effective from 1 August 1994.

Regulations amended 23 February 1995.

\* Awaiting approval and confirmation.

# Bachelor of Economics

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar.

As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

## Specific Course Rules

note: Syllabuses of subjects for the degree of Bachelor of Economics are published below, immediately after these Specific Course Rules. For syllabuses of subjects taught for other degrees and diplomas see the table of subjects at the end of the volume.

### 1 General

- 1.1 There shall be an Ordinary and an Honours degree of Bachelor of Economics. A candidate may obtain either degree or both.

### 2 Assessment and examinations

- 2.1 (a) A candidate shall not be eligible to attend for examination unless the prescribed work has been completed to the satisfaction of the teaching staff concerned.
- (b) For the purposes of these Specific Course Rules a candidate who has failed to comply with the provisions of 2.1 above shall be deemed to have failed the examination.
- 2.2 In determining a candidate's final result in a subject (or part of a subject) the examiners may take into account oral, written, practical and examination work, provided that the candidate has been given adequate notice at the commencement of the teaching of the subject of the way in which work will be taken into account and of its relative importance in the final result.
- 2.3 There shall be four classifications of pass in the final assessment of any subject for the Ordinary degree, as follows: Pass with High Distinction, Pass with Distinction, Pass with Credit, Pass. If the Pass classification be in two divisions, a pass in the higher division may be prescribed in the syllabuses as a prerequisite for admission to further studies in other subjects. A candidate may present, for the ordinary Degree of Bachelor of Economics, a limited number of subjects for which a Conceded Pass has been obtained, as specified in 5.6 below.
- 2.4 A candidate who fails a subject or who obtains a lower division pass and who desires to take that subject again shall, unless exempted wholly or partially therefrom by the head of the department concerned, again complete the

required work in that subject to the satisfaction of the teaching staff concerned.

- 2.5 A candidate who has twice failed the examination in any subject for the Ordinary degree may not enrol for that subject again or for any other subject which in the opinion of the Faculty contains a substantial amount of the same material, except by permission of the Faculty and then only under such conditions as Faculty may prescribe.
- 2.6 There shall be three classifications of Pass in the final assessment of any subject for the Honours degree as follows: First Class, Second Class, Third Class. The Second Class classification shall be divided into two divisions as follows: Division A and Division B.

### 3 Subjects of study

- 3.1 The following may be presented for the Ordinary degree:

(Note that the teaching period of each subject is one semester.)

#### (a) Economics subjects

##### Level I

code	subject title	points
9101	Business Data Analysis I	3
9073	Economic History I	3
4309	Economics IA	3
2076	Economics IB	3
7263	Mathematics for Economists I	3
3565	The Australian Economy: Institutions and Policy I	3

##### Level II

5381	Australian Economic History II	4
1802	East Asian Economics II	4
3784	Economic Data Analysis II	4

2744 Industrial Relations II	4	9046 Aboriginal People and the Law	3
9893 Macroeconomics II	4	3446 Australian Law and Society	3
3071 Mathematical Economics II	4	4398 Australian Legal History	3
8870 Microeconomics II	4	9844 Conservation and Heritage Law	3
1715 Special Topics II*	4	8433 Constitutional Law	6
<b>Level III</b>		8580 Criminal Law	6
4883 Applied Econometrics III	4	7272 Environmental Planning and Protection Law	3
8367 Applied Microeconomics III	4	9622 Income Maintenance	3
5284 Business and Government III	4	7730 Land Use Planning Law	3
3195 Development Economics III	4	3020 Law and Economics	3
8771 Econometric Theory III	4	4771 Media Law	3
2287 Economics of Law and Politics III	4	8821 Property	6
9029 Environment and Resource Economics III	4	9365 Torts	6
9272 International Economic History III	4	<b>3.2</b> A candidate may not present 6362 Commercial Law I(S) for the degree if passed after 3731 Contract.	
2261 International Economics III	4	<b>3.3</b> A candidate may not present 1282 Commercial Law II for the degree if passed after 3225 Associations.	
5423 Labour Economics III*	4	<b>3.4</b> Courses of study must be approved by the Dean (or the Dean's nominee) at enrolment each year.	
4466 Macroeconomics III	4	<b>3.5</b> Candidates who have completed subjects for the degree under previous schedules may continue under the schedules then in force, with such modifications (if any) as shall be prescribed by the Dean.	
3658 Microeconomic Theory III	4	<b>3.6</b> A candidate may not count for the degree any subject together with any other subject which, in the opinion of the Faculty, contains a substantial amount of the same material, and no subject may be counted twice towards the degree. A table of unacceptable combinations of subjects is available from the Faculty Office.	
7981 Public Finance III	4	<b>3.7</b> Except with the permission of the Faculty, a candidate may not enrol in non-Economics subjects at Level II to the value of more than 12 points unless he or she has already passed or is concurrently enrolled in the compulsory Level II subjects 9893 Macroeconomics II, 8870 Microeconomics II and 3784 Economic Data Analysis II (or its equivalents). These non-Economics subjects to the value of not more than 12 points shall not include subjects in which the candidate has previously failed or from which the candidate has withdrawn.	
4609 Special Topics III*	4	<b>3.8</b> Except with the permission of the Faculty, a candidate may not enrol in non-Economics subjects at Level III to the value or more than 8	

\* Not available in 1996

**(b) Commerce subjects**

Subjects listed in the Specific Course Rules of the degree of Bachelor of Commerce

**(c) Arts subjects**

Subjects listed in the Specific Course Rules of the degree of Bachelor of Arts, (which include subjects offered by other Faculties) not listed in (a) or (b) above and excluding 4425 Quantitative Methods Using Computers IH.

**(d) Law subjects**

The Law subjects available within the degree of Bachelor of Arts to students admitted to that degree and/or to the degree of Bachelor of Laws (see note 4 of the Notes (not forming part of the Specific Course Rules) below), namely the Level II subjects 6019 Law and Legal Process and 3731 Contract (each of which counts as 4 points towards the degree of Bachelor of Economics) and the following Level III subjects:

points unless he or she has already passed or is concurrently enrolled in the compulsory Level II subjects 9893 Macroeconomics II, 8870 Microeconomics II and 3784 Economics Data Analysis II (or its equivalents) and has already passed or is concurrently enrolled in Level III Economics subjects to the value of 12 points. These non-Economics subjects to the value of not more than 8 points shall not include subjects in which the candidate has previously failed or from which the candidate has withdrawn.

## The Ordinary degree

### 4 Duration of course

- 4.1 The course of study for the Ordinary degree of Bachelor of Economics shall extend over three years of full-time study or its part-time equivalent. A candidate for the Ordinary degree shall attend lectures and pass examinations in accordance with the provisions of these Specific Course Rules.

### 5 Qualification requirements

- 5.1 To qualify for the Ordinary degree of Bachelor of Economics, candidates must pass subjects with a combined total of not less than 72 points drawn from 3.1 above including:

- (a) not more than 24 points from Level I, including:

4309 Economics IA

2076 Economics IB

9101 Business Data Analysis I *or*

5543 Statistical Practice I

- (b) the following Level II subjects:

9893 Macroeconomics II

8870 Microeconomics II

3784 Economic Data Analysis II *or*

all four of 4523 Applied Statistics II, 4107 Distribution Theory II, 8878 Inference II and 1675 Linear Modules II (from the Faculty of Mathematical and Computer Sciences).

See note (d).

- (c) *either*

- (i) at least 16 points of Level III Economics subjects from those listed in 3.1(a) above with the remaining points from subjects at Level II (or higher) included in 3.1 above; *or*

- (ii) 12 points of Level III Economics subjects, with at least another 12 points of Level III subjects from those listed in 3.1 above. See note (d).

- (d) Included in the 72 points there must be:

- (i) at least one of the following Economic History subjects:

9073 Economic History I

5381 Australian Economic History II

9272 International Economic History III

- (ii) see also note 6.4 (a) below, covering prerequisites for the Bachelor of Economics (Honours) degree.

- 5.2 To qualify for the degree of Bachelor of Economics a student granted status for previous studies must pass subjects taught at The University of Adelaide to the value of at least 22 points.

- 5.3 A candidate for the degree of Bachelor of Economics of the University, who wishes to complete the degree elsewhere, must, unless exempted from the requirement by the Faculty, present subjects taught at The University of Adelaide, having a minimum value of 48 points and including at least 22 points from 5.1 above and also arrange through the Registrar for the proposed scheme of study elsewhere to be approved in advance by the Faculty.

- 5.4 Graduates of The University of Adelaide or of other institutions who wish to proceed to the degree of Bachelor of Economics and to count towards that degree subjects which they have already presented for another qualification may be permitted to do so subject to the following conditions:

- (i) they may present for the degree such subjects to a maximum aggregate value of 24 points;

- (ii) they shall present at least 16 points for subjects at Level III, which have not been presented to any other degree, including at least 12 points for Economics subjects, and

- (iii) they shall present a range of subjects which fulfil the requirements of 5.1 above

- 5.5 In determining a candidate's eligibility for the award of the degree, the Faculty of Economics and Commerce may disallow any subject passed more than 10 years previously.

**5.6** A candidate may present for the Ordinary degree of Bachelor of Economics conceded passes in Level II and Level III subjects provided that the points value for any individual subject for which a conceded pass is presented does not exceed 3 points, and the aggregate value does not exceed 6 points. Conceded passes are not awarded in those subjects listed in 3.1(a) of the Ordinary Degree of Bachelor of Economics.

notes (not forming part of the Specific Course Rules)

- 1 Not all Level II and Level III subjects will be offered every year. Subjects will be offered according to numbers of students enrolled and staff availability. Students can increase their flexibility by taking 8870 Microeconomics II in their second semester concurrently with 2076 Economics IB and 9893 Macroeconomics II in their third semester so that some Level III subjects will be available in their third semester and almost all by their fourth semester.
- 2 Students are advised that a knowledge of mathematics is helpful for economics subjects and is essential for some subjects. Students who are particularly interested in Mathematics, and are intending to apply for Honours, are encouraged to take some subjects in the Faculty of Mathematical and Computer Sciences. (For example: 9786 Mathematics I or 3617 Mathematics IM; 5543 Statistical Practice I instead of 9101 Business Data Analysis I; and the four 2 point subjects, 4523 Statistical Practice II, 4107 Introduction to Mathematical Statistics II, 8878 Theory of Statistics II and 1675 Statistical Modelling and Computation instead of 3784 Economic Data Analysis II.)
- 3 Candidates who were enrolled for the degree prior to 1990 and who planned to present the subject 4367 Applied Economics III (as part of the requirements for the degree under the Schedules then current) but have not yet passed it should apply to the Registrar for permission to present an alternative subject.
- 4 Studies in Law within the Degree of Bachelor of Economics.
  - (1) Candidates who have gained a reserved place in Law Studies on the basis of their SACE Stage 2 or equivalent results must, at the first attempt, successfully complete subjects to the value of 24 points of the B.Ec. before being eligible to take up their place in Law studies.
  - (2) Candidates who have successfully completed subjects to the value of 24 points of the B.Ec. degree may apply for admission to Law Studies. Applications for admission to Law must be made through SATAC by the closing date of the year during which they complete the 24 points. Except with the permission of the Dean of the Faculty of Law or a nominee, 6019 Law and Legal Process must be undertaken concurrently with the Law subject 3731 Contract. These two subjects are prerequisites for each of the third year Law subjects listed in 3.1(d) above. Students will remain candidates for the degree of B.Ec. and may present for the degree of B.Ec. the Law subjects listed in 3.1(d) above. Students must complete all the requirements for the B.Ec. before they can obtain their LL.B. degree.

(3) See also the Specific Course Rules of the LL.B. degree and the Introductory Notes to the LL.B. Syllabuses.

(4) Credit for Law subjects passed prior to 1987.

Candidates who wish to present for the B.Ec degree Law subjects passed prior to 1987 should apply in writing to the Registrar to have their position determined by the Faculty of Economics and Commerce. Such candidates will not be disadvantaged by the transition. However, in accordance with the Specific Course Rules of the degree of Bachelor of Laws, students who have passed 6256 Elements of Law and 2944 Constitutional Law I shall be deemed to have passed 6019 Law and Legal Process.

5 Preparation of Honours under the Co-operative Education for Enterprise Development Program (CEED).

The subject 3611 Industry Practicum (Economics) will be available to selected students who wish to prepare for a specialised Honours program.

3611 Industry Practicum (Economics) is a Level III subject. The subject, which provides the selected intending Honours students with opportunity to work in relevant industry-based projects, and to develop this during the Honours year, does not count towards the degree of Bachelor of Economics. It must be taken over and above a full Level III load of 24 points. Please refer to 3611 Industry Practicum (Economics) in the List of Syllabus Items following.

Further information is available from the Honours Coordinator.

6 Students from other Faculties will be considered for eligibility for the Bachelor of Economics and Bachelor of Commerce degrees in accordance with the Regulations and Specific Course Rules of the Bachelor of Economics and Bachelor of Commerce degrees which are applicable in the year in which the student first enrolls in a subject offered by the Economics or Commerce Departments.

The intent of this provision is to enable students from other Faculties to comply with the compulsory requirements of the Bachelor of Economics and Bachelor of Commerce courses (which are available to them through the Specific Course Rules of their own degrees) and which are detailed in the Specific Course Rules of the Bachelor of Economics and Bachelor of Commerce degrees.

## 6 The Honours degree

**6.1** A candidate for the Honours degree shall attend lectures and pass examinations in accordance with the provisions of these Specific Course Rules.

**6.2** A candidate may, subject to the approval of the Head of the Department concerned, proceed to the Honours degree in the subject 7711 Honours Economics.

**6.3** A candidate may, subject to the approval of the Head of the Department concerned, proceed to the Honours degree taught jointly by the Department of Economics or Commerce and

another department. Candidates must apply in writing to the Registrar for the proposed course of study to be approved in advance by the Faculty.

**6.4 (a)** A candidate preparing for the Honours year taught by the Economics Department must complete the requirements for the Ordinary degree of B.Ec. or its equivalent including 3658 Microeconomic Theory III and 4466 Macroeconomics III or their equivalents (such as the previously offered subject 2100 Economic Theory III) before proceeding to the Honours degree, and must obtain a high standard in subjects presented for the Ordinary degree. Students who have not passed 3071 Mathematical Economics II (or 9786 Mathematics I or 3617 Mathematics IM), and either 8711 Econometric Theory III or 4883 Applied Econometrics III may be required to undertake preliminary work in those areas before proceeding to the Honours Year.

**(b)** A candidate who has satisfied the requirements for admission to Honours as set out in previous schedules is also eligible to apply for admission to the Honours year as above.
