**6.5** The work of the Honours year is normally completed in one year of full-time study, after completion of the Ordinary degree or its equivalent. The Faculty may permit a candidate to spread the work over two years, but not more, under such conditions as it may determine.

**6.6** A candidate who is unable to complete the course for the Honours degree within the time allowed, or whose work is unsatisfactory at any stage of the course, or who withdraws from the course shall be reported to the Faculty, which may permit re-enrolment for an Honours degree under such conditions (if any) as it may determine.

**6.7** A graduate who has obtained the Honours Degree of Bachelor of Arts in Economics may not obtain the Honours degree of Bachelor of Economics.

**6.8** The Honours degree of Bachelor of Economics in association with the Co-operative Education for Enterprise Development Program (CEED). The Honours degree of Bachelor of Economics may be undertaken in conjunction with the CEED program whereby students undertake their projects in association with an external organisation which employs persons trained in

the discipline concerned. Students spend eight weeks in the long vacation period working with the employer organisation and receive some financial recompense. Interested students must apply to the Head of the Economics Department in Semester 1 of the year preceding that in which they plan to take the Honours course. If accepted they will then take the subject 3611 Industry Practicum (Economics) as a preparation during Semester 2 of that year.

## Syllabuses: Department of Economics

For syllabuses of subjects taught by the Department of Commerce see under Bachelor of Commerce.

### textbooks

Information on appropriate textbooks will be provided by the Department concerned, and at the preliminary lecture in Orientation Week.

In general, students are expected to have their own copies of textbooks, but they are advised to wait advice from the lecturer concerned before buying any particular book. Only the prescribed edition of any textbook should be bought.

### reference books

Although lists of books and journals for reference purposes are regarded as important, details have not been included in this volume. These will however be issued from time to time by the departments concerned. It is hoped that all books and journals set for reference will be available to be consulted in the Barr Smith Library.

### assessment

For each subject, students may obtain from the department concerned details of the assessment in that subject including the relative weights given to the components (eg, such of the following as are relevant: semester tests, essays or other written or practical work, final written examinations, *viva voce* examinations).

Changes to the structure of the Bachelor of Economics degree will mean that students beginning their studies in 1993 or later will be unable to complete professional accounting qualifications in this course.

## Level I

### 9101 Business Data Analysis I

note: Replacement for 8179 Economic Statistics I and 7322 Economic Statistics IA

level: I points value: 3 duration: semester 1 or 2

restriction: this subject is not available to students who have already passed 2394 Economic Statistics II or 9514 Economic Statistics IIA; 8179 Economic Statistics I or 7322 Economic Statistics IA. 9101 Business Data Analysis I and 5543 Statistics I (pre-1989 Statistics IH) cannot both be counted toward the degree.

contact hours: 2 one hour lectures and 1 one hour tutorial per week

content: this is an introductory subject for Commerce and Economics students with an emphasis on using a computer package of the kind in general use in the business community. The subject covers collecting and organising data, drawing conclusions and commenting intelligently on the statistical results obtained. Topics include descriptive statistics, tabulation, correlation and simple regression, official statistics, index numbers, business forecasting and an introduction to the use of probability in formal statistical reasoning.

assessment: assessment will be determined finally in consultation with students at or before commencement of lectures.

### 9073 Economic History I

level: I points value: 3 duration: semester 1

contact hours: 2 one hour lectures and 1 one hour tutorial a week

content: a study of selected aspects and episodes in the historical process of industrialisation and its spread over the last two centuries or so from its beginnings in eighteenth century Britain, and of various institutional and other influences shaping the patterns — and problems — of long run economic change in different countries and regions of the world during this period. The subject provides a useful basis for studies in economic history, economic development and Asian economics at Level II or higher.

assessment: tutorial work, essay and final exam; will be finally determined in consultation with students at commencement of the subject.

### 4309 Economics IA

level: I points value: 3 duration: semester 1

note: Students who have passed 6993 Macroeconomics IH or 2740 Microeconomics IH should consult with the faculty course advisers concerning completion of Level I Economics requirements. Students without SACE Stage 2 Mathematics intending to proceed to 9893 Macroeconomics II and/or 8870 Microeconomics II and not planning to take 7263 Mathematics for Economists I should contact the Lecturer-in-charge concerning assumed mathematics background. This subject replaces semester 1 of 8461 Economics I.

restriction: may not be counted with 2740 Microeconomics IH (pre-1985) or 8461 Economics I (pre-1992)

contact hours: 4 hours per week, including lectures, tutorials and/or workshops

*content:* this subject provides an introduction to a core area of economics known as microeconomics. It considers the operation of a market economy and the problem of how best to allocate society's scarce resources. The subject considers the way in which various decision making units in the economy (individual and firms) make their consumption and production decisions and how these decisions are coordinated. The subject considers the laws of supply and demand, and introduces the theory of the firm, and its components, production and cost theories and models of market structure. The various causes of market failure are assessed, and consideration is given to public policies designed to correct this market failure. Finally, the market for factors of production is considered in more detail.

*assessment:* to be determined finally in consultation with students at or before commencement of lectures

### 2076 Economics IB

*level:* I      *points value:* 3      *duration:* semester 2

*note:* Students who have passed 6993 Macroeconomics IH or 2740 Microeconomics IH should consult with the Faculty course advisers concerning completion of Level 1 Economics requirements. Students without SACE Stage 2 Mathematics intending to proceed to 8870 Microeconomics II and/or 9893 Macroeconomics II and not planning to take 7263 Mathematics for Economists I should contact the Lecturer-in-charge concerning assumed mathematics background. This subject replaces semester 2 of 8461 Economics I.

*prerequisite:* 4309 Economics IA. This may be waived with the permission of the Head of Department for students who have previously attempted 4309 Economics IA or its equivalent.

*restriction:* may not be counted with 6993 Macroeconomics IH (pre-1985); or 8461 Economics I (pre-1992)

*contact hours:* 4 hours per week, including lectures, tutorials and/or workshops

*content:* this subject provides an introduction to macroeconomic theory and policy in Australia. A consideration of the nature and measurement of gross domestic product (GDP), a measure of the total output or income of the economy; the determination of the equilibrium level of GDP and the influence of money and banking on the economy form the theoretic basis for an assessment of Australian policy-making. The influence of fiscal, monetary and incomes policies on the macroeconomic policy objectives of economic growth, low inflation, low unemployment and a sustainable balance of payments position are considered.

*assessment:* to be finally determined in consultation with students at or before commencement of lectures

### 7263 Mathematics for Economists I

*level:* I      *points value:* 3      *duration:* semester 1

This subject is intended for students who have not taken mathematics at SACE Stage 2 level, and who wish to obtain a knowledge of mathematical techniques suitable for economic analysis

*prerequisites:* 4309 Economics IA is a prerequisite or concurrent subject.

*restriction:* this is a beginners' subject. Except with the permission of the Dean of the Faculty, it may not be taken by students who have performed satisfactorily in SACE Stage 2 Mathematics (Mathematics IS or Mathematics I and Mathematics II) or the equivalent.

*contact hours:* 5 hours a week including lectures, tutorials and workshops

*content:* introductory algebra, calculus and matrix algebra with applications to economic problems. Emphasis will be placed on the geometric interpretation of functions.

*assessment:* assessment will be finally determined in consultation with students at or before commencement of the subject.

### 3565 The Australian Economy: Institutions and Policy I

*level:* I      *points value:* 3      *duration:* semester 2

*assumed knowledge:* 4309 Economics IA and 2076 Economics IB (taken as concurrent subjects) or Economics at Year 12 level

*restriction:* may not be counted with 2148 Economic Institutions and Policy I

*contact hours:* 2 one hour lectures and 1 one hour tutorial a week

*content:* a study of the nature, role and function of some major institutions influencing the operation of the Australian economy, of various issues of policy which arise in relation to it (eg employment, structural change, foreign investment, finance and banking, industrial relations etc) and of policy formation and implementation. Some consideration of the scope and significance of public provisioning in fields such as health, education, housing and social security will also be included.

*assessment:* tutorial work, essays and final exam; will be finally determined in consultation with students at commencement of the subject.

## Level II

### 5381 Australian Economic History II

level: II points value: 4 duration: semester 2

prerequisites: 4309 Economics IA and 2076 Economics IB

restriction: may not be counted with 1682 Economic History IIA; 5973 Economic History IIIA; or 1682 Economic History A

contact hours: 2 one hour lectures and 1 one hour tutorial a week

content: the subject covers the development of the Australian economy from the late eighteenth century to the present. Emphasis is given to topics which provide relevant background to Australia's recent economic performance and current policy issues. The Australian experience will be compared with aspects of the economic history of other selected countries.

assessment: tutorial work, essay and final exam

### 1802 East Asian Economies II

level: II points value: 4 duration: semester 1

prerequisite: 4309 Economics IA; and 2076 Economics IB; or approval of lecturer in charge

restriction: may not be counted with 9476 East Asian Economies

contact hours: 2 one hour lectures and 1 one hour tutorial per week

content: the subject is designed to introduce students to the nature and structure of the economies of East Asia. It will examine the mechanisms which shape their economic activity and the role of historical and cultural factors in the development of their economic institutions. The contribution of these institutions to economic growth will also be closely examined.

assessment: tutorial papers; essays; final exam

### 3784 Economic Data Analysis II

note: This subject has replaced 7579 Economic Statistics II(S).

level: II points value: 4 duration: semester 1

prerequisites: 4309 Economics IA and 2076 Economics IB (may be taken concurrently) and 9101 Business Data Analysis I (Pass Div I); or 5543 Statistical Practice I; or equivalent

restriction: cannot be counted towards the degree with 4523 Applied Statistics II; 4107 Distribution Theory II; Inference II; and 1675 Linear Models II

assumed knowledge: Mathematics at least to the level of 7263 Mathematics for Economists

contact hours: 2 one hour lectures and 1 one hour tutorial a week

content: the theoretical section of this second subject in statistics and data analysis covers the  $t$ ,  $F$  and Chi-square distributions and their use in statistical inference about means, variances and regression models. It is complemented by a series of applications and practical problems, including individual work by the students applying the techniques they learn to the analysis of their own sets of data. Half of the scheduled non-lecture time will be used for conventional tutorials, the balance for practical sessions in the computer labs, using EXCEL and WORD.

assessment: assessment will be finally determined in consultation with students at or before commencement of the subject.

### 2744 Industrial Relations II

level: II points value: 4 duration: semester 1

prerequisites: 4309 Economics IA and 2076 Economics IB; or approval of the lecturer in charge

restriction: may not be counted with 5426 Industrial Relations II/III

contact hours: 2 one hour lectures and 1 one hour tutorial a week

content: the subject can be conceptually divided into two parts: industrial relations theory and Australian industrial relations practice. The first part will include the following topics: a review of the disparate theories of industrial relations; analysis of the employment relationship; the effort bargain and the ideology of work; industrial conflict and its resolution; the role of the state; the functions of management and unions; direct bargaining and arbitration. Part II will have a policy emphasis covering the development of Australia's industrial relations system; strike patterns; the nature and role of trade unions, employer associations and peak councils; State regulation; the industrial tribunals and the judiciary; the pattern of wage settlement and policy; national, industrial and workplace bargaining; public sector industrial relations; industrial democracy.

assessment: exam and assignments as determined at preliminary lecture

### 9893 Macroeconomics II

level: II points value: 4 duration: semester 1 or 2

prerequisites: 4309 Economics IA; 2076 Economics IB; SACE Stage 2 Mathematics or 7263 Mathematics for Economists I

contact hours: 2 one hour lectures and 1 one hour tutorial a week

*content:* this subject expands the macroeconomic analysis of Level I Economics by introducing the monetary sector and the general level of prices. The subject examines a model of a small open economy. The model is then used to examine questions of macroeconomic policy relevant to the Australian economy.

*assessment:* short tests, essay, and exam

### 3071 Mathematical Economics II

*note:* Students intending to proceed to the Honours degree in Economics will be expected to have successfully completed this subject.

*level:* II *points value:* 4 *duration:* semester 2

*prerequisites:* 4309 Economics IA; 2076 Economics IB (may be taken concurrently) and SACE Stage 2 Mathematics I or 7263 Mathematics for Economists I; or approval of the lecturer in charge

*restrictions:* may not be counted with 7626 Mathematical Economics I; or 8620 Mathematical Economics II/III

*contact hours:* 2 one hour lectures; and 1 one hour tutorial a week

*content:* the subject concentrates on the investigation of economic models using the tools of mathematical analysis. Topics covered include optimisation with and without constraints; linear models; differential and difference equations; matrix algebra and game theory.

*assessment:* assessment will be finally determined in consultation with students at or before commencement of the subject.

### 8870 Microeconomics II

*level:* II *points value:* 4 *duration:* semester 1 or 2

*prerequisites:* 4309 Economics IA and SACE Stage 2 Mathematics I or 7263 Mathematics for Economists I

*contact hours:* 2 one hour lectures and 1 one hour tutorial a week

*content:* this subject builds on the microeconomic principles studied in the Level I Economics subjects and provides an analysis of the way in which the market system functions as a mechanism for coordinating the independent choices of individual economic agents. It develops a basis for evaluating the efficiency and equity implications of competition and other market structures, and a perspective on the appropriate role of government. Included are the study of consumer choice, production and cost, market structure, and market failure.

*assessment:* exam and other assessment as determined at preliminary lecture

### 1715 Special Topics II

*level:* II *points value:* 4

*availability:* not offered in 1996

*prerequisite:* 4309 Economics IA, 2076 Economics IB and permission from the Head of the Department of Economics

*contact hours:* 2 one hour lectures; 1 tutorial a week

*content:* this subject will cover selected topics which are not currently covered elsewhere in the Economics curriculum at Level II. The selection of topics will depend on availability of staff, including visitors, and on their teaching and research interests.

*assessment:* assessment will be a combination of methods including tutorial papers, essays and examinations to be finally determined in consultation with students at or before commencement of the subject.

## Level III

### 4883 Applied Econometrics III

*note:* Students intending to proceed to the Honours degree of Economics or to the degree of Master of Economics will be expected to have successfully completed this subject or 8771 Econometric Theory III.

*level:* III *points value:* 4 *duration:* semester 1

*prerequisites:* 3784 Economic Data Analysis II; or equivalent

*restriction:* may not be counted with 8711 Econometric Theory III

*contact hours:* 2 one hour lectures and 1 one hour tutorial a week

*content:* the subject aims to develop an understanding of standard econometric methods, a capacity to formulate research problems so that they are amenable to quantification and a capacity to assess empirical research in economics critically. Tutorials will involve applications of econometric methods which use packaged programs.

*assessment:* final exam, and a project using the techniques developed

### 8367 Applied Microeconomics III

*level:* III *points value:* 4 *duration:* to be advised

*prerequisites:* 8870 Microeconomics II

*restriction:* may not be counted with 3658 Microeconomic Theory III or with 2100 Economic Theory III

*contact hours:* to be determined

*content:* this subject aims to consolidate and extend students' understanding of microeconomic theory and to practice the art of applying microeconomics to a range of real-world issues. A major part of the assessment will comprise a substantial piece of applied research.

*assessment:* assessment will be finally determined in consultation with students at or before commencement of the subject.

### 5284 Business and Government III

*note:* formerly 5284 Economics of Antitrust and Regulation IIIH

*level:* III *points value:* 4 *duration:* semester 1

*prerequisite:* 8870 Microeconomics II (pre-1989 8870 Microeconomics IIIH).

*restriction:* students who have passed either EE02 Economics II or 8870 Microeconomics IIIH (up to and including 1980) may not enrol for this subject.

*contact hours:* 2 one hour lectures a week and 1 one hour tutorial/seminar/additional lecture a week

*content:* the subject will take as its starting point the existence of market failure due to the presence of all forms of monopoly power (including natural monopoly), and will concentrate on investigating ways in which the actual and potential abuses of such power can be controlled. The aim is to consider the competitive environment within which the modern firm operates, and to use the tools of microeconomic theory to analyse firm behaviour and the ways in which it is regulated. Particular attention will be paid to the policy measures which can be used to try to improve market performance. Throughout the subject there is a heavy emphasis on the application of theory to current important policy issues. Special attention will be devoted to the Trade Practices Act and its enforcement and to specific markets in which a variety of forms of government regulation are employed. Case studies will be used in teaching and assessment, and a major empirically-oriented research project (possibly done on a 'team' basis) will be compulsory.

*assessment:* assessment will be finally determined in consultation with students at or before commencement of the subject.

### 3195 Development Economics III

*level:* III *points value:* 4 *duration:* semester 1

*prerequisites:* 9893 Macroeconomics II (pre 1989 9893 Macroeconomics IIIH) and 8870 Microeconomics II (pre 1989 8870 Microeconomics IIIH)

*restriction:* may not be counted with 3751 Economic Development IIIA or 8167 Economic Development III (pre 1989 8167 Economic Development IIIH)

*contact hours:* 2 one hour lectures and 1 one hour tutorial a week

*content:* the subject is concerned with the economics of development problems of less-developed countries. Topics to be discussed include: the meaning and measurement of underdevelopment; problems of demographic change; industrialisation; trade; foreign aid and investment; poverty and income distribution; agricultural development and relevant growth theories.

*assessment:* final exam and work completed during the subject as determined at the preliminary lecture.

### 8771 Econometric Theory III

*note:* Students intending to proceed to the Honours degree of Economics or to the degree of Master of Economics will be expected to have successfully completed this subject or 4883 Applied Econometrics III.

*level:* III *points value:* 4 *duration:* semester 1

*prerequisites:* 4523 Applied Statistics II, 4107 Distribution Theory II, 8878 Inference II, 1675 Linear Models II or a good standard in 3784 Economic Data Analysis II, 8870 Microeconomics II or 9893 Macroeconomics II, 9876 Mathematics I or 3617 Mathematics IM or 8620 Mathematical Economics II

*restriction:* may not be counted with 4883 Applied Econometrics III; not to be taken if already passed 7739 Econometrics III

*contact hours:* two lectures and one tutorial a week

*content:* this subject deals with the estimation of economic relationships. It includes the following topics: single equation and multiple equation estimation in econometric models, in particular the effects of violation of the classical least squares assumptions; use of distributed lags and dummy variables and the development of multiple equation estimation procedures; the identification problem in multiple equation systems; the application of econometric techniques to applied problems.

*assessment:* Assessment will be finally determined in consultation with students at or before commencement of the subject. It is usually based on one project, a test, and a final exam.

### 2287 Economics of Law and Politics III

*level:* III *points value:* 4 *duration:* semester 2

*prerequisites:* 8870 Microeconomics II, as approved by the coordinator of the award

*contact hours:* 2 one hour lectures and 1 one hour tutorial per week

*content:* this subject will examine the different ways economists and lawyers think about the law, as well as the ways economists analyse political activity. Topics

covered include property, contract, torts, common law, crime and punishment, and international law (including the GATT). There will also be an examination of Coase theory of social cost (with applications to environmental law), of market regulation, and Federal-State relations, among other things.

*assessment:* assessment will be a combination of methods including tutorial papers, essays and examinations to be finally determined in consultation with students at the beginning of semester.

### 9029 Environment and Resource Economics III

*level:* III *points value:* 4 *duration:* semester 2

*pre/corequisites:* 8870 Microeconomics II

*restriction:* may not be counted with 5920 Economics of Resources and the Environment or 2487 Resource and Environmental Economics III

*contact hours:* 2 one hour lectures and 1 one hour tutorial per week

*content:* the subject is concerned with the increasing intersection between environmental and natural resource issues, and economics. The theory of Microeconomics II is extended and applied to issues such as the nature of natural resources and their use, related income distribution issues, specification and measurement of society's objectives and criticisms of traditional economic theory where warranted. This is complemented by policy orientated subject matter, relating to pollution in its various forms, resource measurement and depletion and the role of time in a long run sense (sustainable economic development).

*assessment:* assessment will be a combination of methods including tutorial papers, essays and exams to be finally determined in consultation with students at or before commencement of the subject.

### 3611 Industry Practicum (Economics)

*level:* III *points value:* 0 *duration:* semester 2

*restriction:* This subject is available only to selected intending Honours students under the CEED Program. Refer to Notes (not forming part of the Schedules).

*contact hours:* 13 hours lecture/tutorial

*content:* this subject provides students with the skills and preparation to undertake an industry related research project. Topics include research design and documentation, project planning, time management, costing and budgeting, and quality assurance. An industry-linked project will be commenced.

### 9272 International Economic History III

*level:* III *points value:* 4 *duration:* semester 2

*pre/corequisites:* 8870 Microeconomics II, 9893 Macroeconomics II or approval of the lecturer in charge

*restriction:* may not be counted with 7350 Economic History C or 1258 Economic History III

*contact hours:* 2 one hour lectures and 1 one hour tutorial per week

*content:* the subject surveys the evolution of the international economy in the 20th century. Attention is given to the development of world trade and trade policies, the international monetary system, international capital movements, and aspects of the domestic economic experience of the major world powers, capital movements, the interwar depression and the long boom in the postwar world economy. In addition, an examination is made of selected topics from the historical experience of the major industrial economies of western Europe, Japan, and especially the United States, and which are relevant to an understanding of their current economic problems."

*assessment:* final exam and work completed during the subject as determined to preliminary lecture

### 2261 International Economics III

*level:* III *points value:* 4 *duration:* semester 2

*prerequisites:* 8870 Microeconomics II and 9893 Macroeconomics II or their equivalents

*contact hours:* 2 one hour lectures and 1 one hour tutorial per week

*content:* the subject deals with the theory of international trade focusing on the gains from trade, the pattern of trade, the income distribution consequences of trade, and the relation between trade and growth; the theory and practice of trade policy; the balance of payments; and exchange rate determination and policy. Applications will focus on the economies of Australia and the Asian-Pacific region.

*assessment:* assessment will be finally determined in consultation with students at or before commencement of the subject.

### 5423 Labour Economics III

*level:* III *points value:* 4

*availability:* not offered in 1996

*prerequisites:* 8870 Microeconomics II (pre 1989 8870 Microeconomics IIIH)

*contact hours:* 3 hours per week

*restriction:* may not be counted with 8518 Economics of Labour III

*content:* this subject presents an understanding of how the labour market works and the institutions which are peculiar to it. The topics studied will include the nature of the Australian labour market; factors influencing the relative wage structure; unemployment and the labour force; determinants of the quality and quantity of the work force. The course is taught in a way which is designed to increase students' general skills in analysis, argument, oral and written communication and teamwork.

*assessment:* final exam and work completed during the course as determined in consultation with students at the preliminary lecture

### **4466 Macroeconomics III**

*level:* III *points value:* 4 *duration:* semester 2

*prerequisite:* 9893 Macroeconomics II

*restriction:* may not be counted with 2100 Economic Theory III

*contact hours:* to be determined.

*content:* this subject expands further on the macroeconomic principles of Level II and consists essentially of two components. First, it deals with the main modern controversial macroeconomic issues, such as the role of wealth, expectations, government budget constraints and quantity constraints in macroeconomic analysis and policy formulation. Second, it examines issues and policies which are particularly relevant in an open economy, such as the role of credit, balance of payments, foreign debt, exchange rates, international trade, taxation and public finance issues.

*assessment:* to be finally determined in consultation with students at or before the commencement of the course

### **3658 Microeconomic Theory III**

*level:* III *points value:* 4 *duration:* semester 1

*prerequisite:* 8870 Microeconomics II

*restriction:* may not be counted with 8367 Applied Microeconomics III or with 2100 Economic Theory III

*contact hours:* 2 one hour lectures and 1 one hour tutorial a week

*content:* this subject deals with additions to, and extensions of aspects of theory not covered in 8870 Microeconomics II, including open-economy, general equilibrium analysis and welfare economics, extensions of consumption and production theory and household economics. An effort is made throughout to practice the art of economics while expanding the student's 'toolkit'.

*assessment:* to be determined in consultation with students at commencement of the subject

### **7981 Public Finance III**

*level:* III *points value:* 4 *duration:* semester 1

*prerequisites:* 8870 Microeconomics II (pre-1989 8870 Microeconomics IHH)

*contact hours:* 2 one hour lectures and 1 one hour tutorial a week

*content:* the subject is concerned with the theory and practice of public finance with emphasis on its application in the Australian economy. The public sector will be discussed in its role as a taxing, spending and regulating body. The major sections of the course will cover taxation, public goods, fiscal federalism and public choice theory. Analytical concepts which assist our understanding of the role of government in a market economy will be emphasised.

*assessment:* assessment will be a final exam and work completed during the semester, to be finally determined in consultation with students at or before commencement of the subject.

### **4609 Special Topics III**

*level:* III *points value:* 4

*availability:* not offered in 1996

*prerequisites:* 9893 Macroeconomics II, 8870 Microeconomics II and permission from the Head of the Department of Economics

*contact hours:* 2 one hour lectures and 1 tutorial per week

*content:* this subject will cover selected topics which are not currently covered elsewhere in the Economics curriculum at level III. The selection of topics will depend on availability of staff, including visitors, and on their teaching and research interests.

*assessment:* assessment will be combination of methods including tutorial papers, essays and examinations to be finally determined in consultation with students at or before commencement of the subject.

## **Honours Level**

---

### **7711 Honours Economics**

*note:* Detailed arrangements for classes will depend on enrolments and students are advised to communicate with the Honours convenor before February. Students will be admitted to honours classes only with the approval of the Head or his/her nominee.

Arrangements are possible for joint honours combining study in the Department of Economics with study in another Department

(or Centre). Details are available from the Head of the Department of Economics or the Honours Convenor.

*level:* IV    *points value:* 24    *duration:* full year

*content:* the honours year is currently conducted as a joint program by the Economics Departments of Adelaide and Flinders universities. Part of the course is taught at Flinders University.

*prerequisites:* a candidate preparing for the Honours year taught by the Economics department must complete the requirements for the Ordinary degree of B.Ec. or its equivalent, including 3658 Microeconomic Theory III and 4466 Macroeconomics III or their equivalents before proceeding to the Honours degree, and must obtain a high standard in subjects presented for the Ordinary degree. Usually this would include a credit in each of Macroeconomics III and Microeconomic Theory III.

*assumed knowledge:* since students find it easier to complete the Honours degree with 3071 Mathematical Economics II (or 9786 Mathematics I or 3617 Mathematics IM) and either 8771 Econometric Theory III or 4883 Applied Econometrics III, they may proceed without these subjects or their equivalents only with the approval of the Head of Department or his/her nominee.

*contact hours:* to be advised

*requirements:*

- (a) final honours students are required to undertake a research project and present a thesis of approximately 10,000 words. An absolute upper limit of 12,000 words will apply and theses in excess of this will be penalised and/or returned to be reduced to this length. The thesis will form part of the final honours examination. The thesis counts for 30% of the year's assessment. Students are expected to commence work on the thesis no later than the first week of February, including deciding on the topic, so that a supervisor can be allocated to each student from among the staff available at the two universities. A list of suggested topics is distributed before the end of the previous year.

The thesis is to be completed and presented, typed and bound, towards the end of second semester: the exact date is notified in February. A penalty of twenty percentage points for the first week or part thereof plus ten percentage points for each subsequent week or part thereof is applied to the grade of theses submitted after the notified due date in November unless prior permission for late submission is obtained.

Four copies, typed double space on A4 paper

must be presented. Students will be expected to present themselves for an oral examination on their thesis at a date towards the end of the University's November examination period.

- (b) each student is required to undertake the subjects Microeconomics and Macroeconomics, classes in which are given in first semester.
- (c) each student will select three options from a range of subjects which, subject to the availability of staff and sufficient enrolments, may include the following. Classes in these subjects will take place in semester 1 or 2.
- 4703 Econometrics
  - 8290 Economic Development
  - 3293 Economic Growth and Agriculture
  - 7575 Experimental Economics
  - 1081 History of Economic Thought
  - 5155 Industrial Organisation
  - 6547 International Financial Issues
  - 4724 International Trade
  - 5596 Labour Economics
  - 4802 Long Run Growth
  - 8862 Mathematical Economics
  - 7484 Monetary Economics
  - 2968 Money
  - 3660 Public Economics
  - 5372 Regional Economics
  - 3193 Transport and Urban Economics
- (d) the examination will consist of one paper in each of Microeconomics and Macroeconomics (examined in June), papers in the three optional subjects (held in either semester 1 or 2 in the University's Examination period), and the thesis.

## Bachelor of Commerce

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar.

As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

### Specific Course Rules

note: Syllabuses of subjects for the degree of Bachelor of Commerce are published below, immediately after these Specific Course Rules. For syllabuses of subjects taught for other degrees and diplomas see the table of subjects at the end of the volume.

#### 1 General

- 1.1 There shall be an Ordinary and an Honours degree of Bachelor of Commerce. A candidate may obtain either degree or both.
- 1.2 The degree of Bachelor of Commerce was awarded for the first time in May 1993. Candidates graduating later than May 1993, who were originally enrolled for the degree of Bachelor of Economics, may graduate with the degree of Bachelor of Commerce provided that all requirements for that degree are satisfied.

#### 2 Assessment and examination

- 2.1 A candidate shall not be eligible to attend for examination unless the prescribed work has been completed to the satisfaction of the teaching staff concerned. A candidate who is not eligible to attend for examination shall be deemed to have failed the examination.
- 2.2 In determining a candidate's final result in a subject (or part of a subject) the examiners may take into account oral, written, practical and examination work, provided that the candidate has been given adequate notice at the commencement of the teaching of the subject of the way in which work will be taken into account and of its relative importance in the final result.
- 2.3 There shall be four classifications of pass in each subject for the Ordinary degree, as follows: Pass with High Distinction, Pass with Distinction, Pass with Credit, Pass. If the Pass classification be in two divisions, a pass in the higher division may be prescribed in the syllabuses as a prerequisite for admission to further studies in that subject or to other subjects.
- 2.4 A candidate may present, for the Ordinary degree of Bachelor of Commerce, a limited number of subjects for which a Conceded Pass has been obtained, as specified in 5.6 below.

- 2.5 A candidate who fails a subject or who obtains a lower division pass and who desires to take that subject again shall, unless exempted wholly or partially therefrom by the Head of the department concerned, again complete the required work in that subject to the satisfaction of the teaching staff concerned.
- 2.6 A candidate who has twice failed the examination in any subject for the Ordinary degree may not enrol for that subject again or for any other subject which in the opinion of the Faculty contains a substantial amount of the same material, except by permission of the Faculty and then only under such conditions as Faculty may prescribe.
- 2.7 There shall be three classifications of Pass in the final assessment of any subject for the Honours degree, as follows: First Class, Second Class, Third Class. The Second Class classification shall be divided into two divisions, as follows: Division A and Division B.

#### 3 Subjects of study

- 3.1 The following subjects may be presented for the Ordinary degree:

##### (a) Commerce subjects

##### Level I

code	subject title	points
6362	Commercial Law I(S)	3
4359	Financial Accounting IA	3
3086	Financial Accounting IB	3
2499	Information Systems I	3

##### Level II

4190	Business Finance II	4
1282	Commercial Law II	4

7651 Financial Accounting II	4
2663 Information Systems II	4
1383 Management Accounting II	4
4807 Management and Organisations II	4
5312 Marketing II	4
<b>Level III</b>	
4196 Accounting Theory III	4
7440 Auditing III	4
5177 Business Finance III	4
5685 Corporate Accounting III	4
5473 Income Tax Law III	4
5427 Information Systems III	4
9790 Management Accounting IIIB	4
9759 Management and Organisations III	4
9885 Marketing III	4

**(b) Economics subjects**

Subjects listed in the Specific Course Rules of the degree of Bachelor of Economics. Some Economics subjects are compulsory for the Bachelor of Commerce Degree.

**(c) Arts subjects**

Subjects listed in the Specific Course Rules of the degree of Bachelor of Arts, excluding 4425 Quantitative Methods Using Computers IH.

**(d) Law subjects**

The Law subjects available within the degree of Bachelor of Arts to students admitted to that degree and/or the degree of Bachelor of Laws (see note 2 of the notes (not forming part of the Specific Course Rules below), namely the Level II subjects 6019 Law and Legal Process and 3731 Contract (each of which counts as 4 points towards the degree of Bachelor of Commerce) and the following Level III subjects:

9046 Aboriginal People and the Law	3
3446 Australian Law and Society	3
4398 Australian Legal History	3
9844 Conservation and Heritage Law	3
8433 Constitutional Law	6
8580 Criminal Law	6

7272 Environmental Planning and Protection Law	3
9622 Income Maintenance	3
7730 Land Use Planning Law	3
3020 Law and Economics	3
4771 Media Law	3
8821 Property	6
9365 Torts	6

**3.2** A candidate may not present both 2100 Economic Theory III and 4367 Applied Economics III for the degree.

**3.3** A candidate may not present 6362 Commercial Law I(S) for the degree if passed after 3731 Contract.

**3.4** A candidate may not present 1282 Commercial Law II for the degree if passed after 3225 Associations.

**3.5** Courses of study must be approved by the Dean (or the Dean's nominee) at enrolment each year.

**3.6** Candidates who have completed subjects for the degree under previous schedules may continue under the schedules then in force, with such modifications (if any) as shall be prescribed by the Dean.

**3.7** A candidate may not count for the degree any subject together with any other subject which, in the opinion of the Faculty, contains a substantial amount of the same material and no subject may be counted twice towards the degree. A table of unacceptable combinations of subjects is available from the Faculty Office.

## The ordinary degree

### 4 Duration of course

**4.1** The course of study for the Ordinary degree of Bachelor of Commerce shall extend over three years of full-time study or its part-time equivalent. A candidate for the Ordinary degree shall attend lectures and pass examinations in accordance with the Specific Course Rules.

### 5 Qualification requirements

**5.1** To qualify for the Ordinary degree of Bachelor of Commerce, candidates must pass subjects with a combined total of not less than 72 points drawn from 3.1 above including:

- (a) not more than 24 points at Level I, including 4359 Financial Accounting IA;

3086 Financial Accounting IB; 4309 Economics IA; 2076 Economics IB and 9101 Business Data Analysis I or 5543 Statistical Practice I

- (b) at least 8 points Level II Commerce subjects
  - (c) 12 points of Level III Commerce subjects
  - (d) *either*
    - (i) A further 4 points for Level III Economics or Commerce subjects, *or*
    - (ii) a further 12 points for any Level III subject in 3.1 above.
- 5.2** To qualify for the degree of Bachelor of Commerce a student granted status for previous studies must pass subjects taught at The University of Adelaide to the value of at least 22 points. These must include twelve points of Level III Commerce subjects. However, this requirement may be waived in special circumstances approved by the Faculty.
- 5.3** A candidate for the degree of Bachelor of Commerce of the University, who wishes to complete the degree elsewhere, must, unless exempted from the requirement by the Faculty, present subjects taught at The University of Adelaide having a minimum value of 48 points and including at least 22 points from 5.1 above and also arrange through the Registrar for the proposed scheme of study elsewhere to be approved in advance by the Faculty.
- 5.4** Graduates of The University of Adelaide or of other institutions, who wish to proceed to the degree of Bachelor of Commerce and to count towards that degree subjects which they have already presented for another qualification may be permitted to do so subject to the following conditions:
- (i) they may present for the degree such subjects to a maximum aggregate value of 24 points. No such subject(s) may be presented in lieu of 8 points Level II Commerce subjects and 12 points Level III Commerce subjects;
  - (ii) they shall present at least 16 points for subjects at Level III, which have not been presented to any other degree, and
  - (iii) they shall present a range of subjects which fulfil the requirements of 5.1 above.
- 5.5** In determining a candidate's eligibility for the award of the degree, the Faculty of Economics and Commerce may disallow any subject passed more than 10 years previously.

- 5.6** A candidate may present for the Ordinary degree of Bachelor of Commerce conceded passes in Level II and Level III subjects provided that the points value for any individual subject for which a conceded pass is presented does not exceed 3 points, and the aggregate value does not exceed 6 points. Conceded passes are not awarded for those subjects listed in 3.1(a) of the Ordinary degree of Bachelor of Commerce.

notes (not forming part of the Specific Course Rules)

- 1 Students are advised that a knowledge of mathematics is helpful for commerce and economics subjects and is essential for some subjects.
- 2 Studies in Law within the degree of Bachelor of Commerce
  - (1) Candidates who have gained a reserved place in Law studies on the basis of their SACE or equivalent results must, at the first attempt, successfully complete subjects to the value of 24 points of the B.Com. before being eligible to take up their place in Law studies.
  - (2) Candidates who have successfully completed subjects to the value of 24 points of the B.Com. degree may apply for admission to Law Studies. Applications for admission to Law must be made through SATAC by the closing date of the year during which the 24 points are completed. Except with the permission of the Dean of the Faculty of Law or a nominee, 6019 Law and Legal Process must be undertaken concurrently with the Law subject 3731 Contract. These two subjects are prerequisites for each of the third year Law subjects listed in 3.1(d) above. Students will remain candidates for the degree of B.Com. and may present for the degree of B.Com. the Law subjects listed in 3.1(d) above. Students must complete all the requirements for the B.Com. before they can obtain their LL.B. degree.
  - (3) See also the Specific Course Rules of the LL.B. degree and the Introductory Notes to the LL.B. Syllabuses.
  - (4) Candidates who wish to present for the B.Com. degree Law subjects passed prior to 1987 should apply in writing to the Registrar to have their position determined by the Faculty of Economics and Commerce. Such candidates will not be disadvantaged by the transition. However, in accordance with the Specific Course Rules of the degree of Bachelor of Laws, students who have passed 6256 Elements of Law and 2944 Constitutional Law I shall be deemed to have passed 6019 Law and Legal Process.
- 3 Preparation for Honours under the Co-operative Education for Enterprise Development Program (CEED). The subject 8151 Industry Practicum (Commerce) will be available to selected students who wish to prepare for a specialised Honours program. 8151 Industry Practicum (Commerce) is a Level III subject. The subject, which provides the selected

intending Honours student with opportunity to work in relevant industry-based projects, and to develop this during the Honours year, does not count towards the degree of Bachelor of Commerce. It must be taken over and above a full Level III load of 24 points. Please refer to 8151 Industry Practicum (Commerce) in the List of syllabus items following.

Further information is available from the Honours Coordinator.

- 4 Students from other Faculties will be considered for eligibility for the Bachelor of Economics and Bachelor of Commerce degrees in accordance with the Regulations and Specific Course Rules of the Bachelor of Economics and Bachelor of Commerce degrees which are applicable in the year in which the student first enrolls in a subject offered by the Economics or Commerce Departments.

The intent of this provision is to enable students from other Faculties to comply with the compulsory requirements of the Bachelor of Economics and Bachelor of Commerce courses (which are available to them through the Specific Course Rules of their own degrees) and which are detailed in the Specific Course Rules of the Bachelor of Economics and Bachelor of Commerce degrees.

## 6 The Honours degree

- 6.1 A candidate for the Honours degree shall attend lectures and pass examinations in accordance with the provisions of these Specific Course Rules.
- 6.2 A candidate may, subject to the approval of the Head of the Department of Commerce, proceed to the Honours degree in the following subject:  
6473 Honours Commerce
- 6.3 A candidate may, subject to the approval of the Head of the Departments concerned, proceed to the Honours degree taught jointly by the Departments of Commerce and another department. Candidates must apply in writing to the Registrar for the proposed course of study to be approved in advance by the Faculty.
- 6.4 (a) A candidate preparing for the Honours year taught by the Commerce Department must complete the requirements for the Ordinary degree of Bachelor of Commerce before proceeding with the Honours year, and must obtain a high standard in subjects presented for the Ordinary degree (or their equivalent elsewhere).
- (b) A candidate who has satisfied the requirements for admission to Honours as set out in previous schedules is also eligible to apply for admission to the Honours year as above.

6.5 The work of the Honours year is normally completed in one year of full-time study. The Faculty may permit a candidate to spread the work over two years, but not more, under such conditions as it may determine.

6.6 A candidate who is unable to complete the course for the Honours degree within the time allowed, or whose work is unsatisfactory at any stage of the course, or who withdraws from the course shall be reported to the Faculty, which may permit re-enrolment for an Honours degree under such conditions (if any) as it may determine.

## Syllabuses: Department of Commerce

For syllabuses of subjects taught by the Department of Economics, see under Bachelor of Economics.

### textbooks

Information on appropriate textbooks will be provided by the department concerned, and at the preliminary lecture in Orientation Week.

In general students are expected to have their own copies of textbooks, but they are advised to wait advice from the Lecturer concerned before buying any particular book. Only the prescribed edition of any textbook should be bought.

### reference books

Although lists of books and journals for reference purposes are regarded as important, details have not been included in this Volume. These will however be issued from time to time by the departments concerned. It is hoped that all books and journals set for reference will be available to be consulted in the Barr Smith Library.

### assessment

For each subject students may obtain from the department concerned details of the examination in that subject including the relative weights given to the components (eg, such of the following as are relevant: assessments, semester tests, essays or other written or practical work, final written examinations, *viva voce* examinations).

## Level I

### 6362 Commercial Law I(S)

level: I points value: 3 duration: semester 2

quota: may apply

restriction: not to be counted with previously offered 3349 Commercial Law I

contact hours: 2 one hour lectures each week and 1 hour tutorial

content: an introduction to the legal system and legal reasoning, including an examination of the sources of law in Australia (the system of courts and legislative authorities), and of the rules of statutory interpretation. An examination of the general principles of the law of torts and the law of contract including intention to create legal relations, intention to be bound, consideration, privacy, terms of a contract, enforceability of contracts, mistake, duress, undue influence, unconscionable contracts, misrepresentation, illegality, discharge of contract and remedies for breach

of contract. An examination of the law of agency. An examination of consumer protection legislation applying in South Australia.

assessment: assessment will be by examination and assignments, as determined at the preliminary lecture.

### 4359 Financial Accounting IA

level: I points value: 3 duration: semester 1

quota: may apply

restriction: not to be counted with previously offered 3049 Accounting I

contact hours: 2 one hour lectures and 1 one hour tutorial class a week and 1 one hour workshop a fortnight

content: introduction to financial accounting including the principles of double-entry bookkeeping and preparation of financial statements. Topics include worksheets, perpetual and periodic inventory systems, LIFO and FIFO, specialised journals and ledgers, subsidiary ledgers, bills receivable and payable, and bad debts.

assessment: assessment will be by examination and assignments, as determined at the preliminary lecture.

### 3086 Financial Accounting IB

level: I points value: 3 duration: semester 2

quota: may apply

restriction: not to be counted with previously offered 3049 Accounting I

assumed knowledge: A knowledge of the material in Financial Accounting IA is assumed.

contact hours: 2 one hour lectures and 1 one hour tutorial class a week and 1 one hour workshop a fortnight

content: topics may include: Accounting for the acquisition and disposal of non-current assets, accounting for investments, accounting for non-current liabilities, accounting for partnerships and companies, price level accounting, assumptions underlying accounting procedures and the analysis and interpretation of financial statements (including cash flow statements).

assessment: assessment will be by examination and assignments, as determined at the preliminary lecture.

**2499 Information Systems I**

level: I points value: 3 duration: semester 1

quota: may apply

restriction: not to be counted with 9894 Computer Literacy I

assumed knowledge: a knowledge of basic accounting concepts and procedures will be assumed. Students who do not have this basic knowledge are advised to consider enrolling concurrently in 4359 Financial Accounting IA.

contact hours: 2 one hour lectures and 1 one hour tutorial each week

content: introduction to information systems and their role in organisations; computer hardware (PC and multi-user), system and application software, data and people; end-user application software (word processing, spreadsheets and graphics, database management, accounting packages); principles of application development (systems analysis, design and programming); networking and data communication; trends, issues and concerns.

assessment: assessment will be by examination and assignments, as determined at the preliminary lecture.

---

**Level II**

---

**4190 Business Finance II**

level: II points value: 4 duration: semester 2

prerequisite: 4359 Financial Accounting IA and 3086 Financial Accounting IB (previously offered as 3049 Accounting I); 4309 Economics IA and 2076 Economics IB (previously offered as 8461 Economics I); and 9101 Business Data Analysis I (replacement for 8179 Economic Statistics I and 7322 Economic Statistics IA)

corequisite: 2499 Information Systems I unless passed previously

restriction: not to be counted with previously offered 9743 Accounting II or 6801 Business Finance

contact hours: 2 one hour lectures and 1 one hour tutorial a week

content: the financial decisions of the firm are analysed. Topics include a consideration of the goals of the firm and the investor, discounted cash flow models, the capital asset pricing models, capital budgeting, risk, working capital management, debt and equity financing, sources of corporate finance, and the dividend decision.

assessment: assessment will be by examination and assignments, as determined at the preliminary lecture.

**1282 Commercial Law II**

level: II points value: 4 duration: semester 1

prerequisite: 6362 Commercial Law I(S)

restriction: not to be counted with previously offered 3349 Commercial Law I

contact hours: 2 one hour lectures each week and 1 two hour tutorial each fortnight

content: an examination of the law of partnerships and trusts. An introduction to corporations law in Australia including an examination of the following topics: the constitutional background and history of companies legislation, the concept of corporate personality, the distinguishing features of different types of companies, memorandum and articles of association, authority of agents to bind the company, pre-incorporation contracts, company capital, management of the company, company accounts, auditors' and directors' duties, corporate ethics and social responsibilities, controlling shareholders duties and the position of minorities, schemes of arrangement or compromise, voluntary administration, receivers, winding up of companies, securities and takeover law.

assessment: assessment will be by examination and assignments, as determined at the preliminary lecture.

**7651 Financial Accounting II**

level: II points value: 4 duration: semester 1

prerequisite: 4359 Financial Accounting IA and 3086 Financial Accounting IB (previously offered as 3049 Accounting I)

restriction: not to be counted with previously offered 9714 Accounting III or 6110 Financial Accounting III

contact hours: 1 two hour lecture and 1 one hour tutorial a week

content: topics to be covered may include problems and alternative procedures for accounting for intangibles, revaluations, leases, superannuation, income tax, government and discussion of the conceptual framework and standard setting.

assessment: assessment will be by examination and assignments, as determined at the preliminary lecture.

**2663 Information Systems II**

level: II points value: 4 duration: semester 2

prerequisite: 2499 Information Systems I

contact hours: 2 one hour lectures and 1 one hour tutorial each week

content: development of information systems including analysis, evaluation, design, implementation, management and user responsibilities; database concepts, architectures, design and administration; object - oriented concepts; data quality and controls; prototyping.

*assessment:* assessment will be by examination and assignments, as determined at the preliminary lecture.

### 1383 Management Accounting II

*level:* II *points value:* 4 *duration:* semester 2

*prerequisite:* 4359 Financial Accounting IA

*restrictions:* not to be counted with the previously offered 5741 Management Accounting IIIA, 2364 Managerial Cost Accounting or 9743 Accounting II. May be counted at Level III for students enrolled prior to 1996

*contact hours:* 2 one hour lectures and 1 one hour tutorial each week

*content:* an introduction to management accounting concepts and techniques. The subject covers both traditional and new approaches to management accounting. Topics include cost terms and concepts; job, process and hybrid costing systems; cost behaviour and estimation; cost-volume-profit analysis; budgeting, standard costing systems; responsibility accounting; investment centres and transfer pricing; relevant costs and benefits for decision making; cost analysis and pricing decisions. New approaches include: cost management systems, the concepts of activity based costing, activity management, performance measures, strategic management accounting, inventory management, cost of quality, life cycle costing and target costing.

*assessment:* examination and work completed during the subject as determined at the preliminary lecture.

### 4807 Management and Organisations II

*level:* II *points value:* 4 *duration:* semester 2

*prerequisites:* 2076 Economics IB (Division II)

*contact hours:* 2 one hour lectures and 1 one hour tutorial each week

*content:* an introductory course which examines some of the major contemporary issues surrounding work, employment and the management of people. The four broad areas which are covered comprise: the role of the individual; the nature of work group activities; organisational processes; and the influence of environmental and cultural forces on work. Topics include motivation, perception, stress, communication, group dynamics, power and politics, culture, gender and the changing experience of employment.

*assessment:* assessment will be by examination and assignments, as determined at the preliminary lecture.

### 5312 Marketing II

*level:* II *points value:* 4 *duration:* semester 1

*prerequisite:* 4309 Economics IA and 2076 Economics IB (previously offered as 8461 Economics I)

*contact hours:* 2 one hour lectures and 1 one hour tutorial each week

*content:* the nature and purpose of marketing; market analysis; segmentation; targeting and positioning; the marketing mix, product/service decisions; pricing decisions; distribution decisions; marketing communication, marketing planning and strategies.

*assessment:* assessment will be by examination and assignments, as determined at the preliminary lecture.

## Level III

### 4196 Accounting Theory III

*level:* III *points value:* 4 *duration:* semester 1

*prerequisite:* 7651 Financial Accounting II

*contact hours:* two 1.5 hours lectures per week

*content:* topics may include theory development in accounting, the nature and role of accounting theory, the development of a conceptual framework, normative accounting theories including alternative accounting systems, positive accounting theory including agency and contracting cost theory, accounting choice and economic consequences.

*assessment:* assessment will be by examination and assignments, as determined at the preliminary lecture.

### 7440 Auditing III

*level:* III *points value:* 4 *duration:* semester 2

*prerequisite:* 7651 Financial Accounting II

*restriction:* not to be counted with previously offered 9714 Accounting III

*contact hours:* 2 one hour lectures and 1 one hour tutorial per week

*content:* the course aims to provide an introduction to basic auditing techniques and underlying assumptions, to develop an understanding of the legal and professional environment in which auditors work and to examine some contemporary audit issues and problems. Teaching includes a course of lectures, a course of guided reading and tutorial questions and weekly working papers. Examples will be drawn from Level I, II and III Accounting subjects, as well as from Business Finance, Commercial Law and Income Tax.

*assessment:* a one three hour exam at the end of the semester and weekly working papers. Students will need to submit a minimum number of working papers in order to be allowed to sit for the end of semester examination.

### 5177 Business Finance III

*level:* III *points value:* 4 *duration:* semester 1

*prerequisites:* 4190 Business Finance II, 8870 Microeconomics II and 3784 Economic Data Analysis

II or 8623 Introductory Econometrics. *contact hours*: 2 one hour lectures and 1 one hour tutorial per week

*content*: this subject further develops finance theory and examines contemporary issues in finance. Topics include financial management, capital structure theory and management, introduction to futures and options, taxation, corporate acquisitions and restructuring, and an introduction to international financial management.

*assessment*: assessment will be by examination and assignments.

### 5685 Corporate Accounting III

*level*: III *points value*: 4 *duration*: semester 1  
*prerequisite*: 7651 Financial Accounting II

*corequisite*: 1282 Commercial Law II or both 6019 Law and Legal Process, and 3731 Contract, unless passed previously

*assumed knowledge*: a basic knowledge of computerised spread sheets is assumed.

*contact hours*: 2 one hour lectures and 1 one hour tutorial a week

*content*: topics to be covered may include company formations, reconstructions, accounts of liquidators and receivers; amalgamations and takeovers; inter-corporate investments and consolidated accounts; joint ventures.

*assessment*: assessment will be by one three hour examination plus work completed during the subject, as determined at the preliminary lecture.

### 5473 Income Tax Law III

*level*: III *points value*: 4 *duration*: semester 2  
*prerequisite*: 1282 Commercial Law II; or 3349 Commercial Law I

*restriction*: not to be counted with previously offered 8761 Income Tax or 2014 Taxation (Law)

*contact hours*: 2 one hour lectures plus such additional lectures as may be advised by the lecturer and 1 one hour tutorial a week

*content*: this subject provides an introduction to and overview of fundamental concepts of income tax law. Topics include jurisdiction to tax, assessable income and capital gains, exempt income, allowable deductions, tax accounting, tax entities, anti-avoidance and tax administration.

*assessment*: assessment will be by examination and assignments, as determined at the preliminary lecture.

### 8151 Industry Practicum (Commerce)

*level*: III *points value*: 0 *duration*: semester 2

*restriction*: this subject is available only to selected intending Honours students under the CEED

Program—refer to Notes (not forming part of the Schedules).

*contact hours*: 13 hours lectures/tutorials

*content*: This subject provides students with the skills and preparation to undertake an industry related research project. Topics include research design and documentation, project planning, time management, costing and budgeting, and quality assurance. An industry-linked project will be commenced.

### 5427 Information Systems III

*level*: III *points value*: 4 *duration*: semester 1

*prerequisite*: 2663 Information Systems II or 2499 Information Systems I (Credit)

*assumed knowledge*: systems development management and database design as taught in 2663 Information Systems II.

*restriction*: not to be counted with previously offered 9955 Computerised Accounting and Systems III

*contact hours*: 2 one hour lectures and 1 one hour tutorial a week

*content*: The management of information systems (in particular, transaction processing and executive information systems) including planning for technological change, the implementation and control of change, the need for standards, support and training; end-user application development with object oriented concepts; data communication issues including standards, distributed data processing, client/server computing, electronic data interchange, access to external information; manufacturing information systems including materials requirements planning, inventory and costing.

*assessment*: assessment will be by examination and assignments, as determined at the preliminary lecture.

### 9790 Management Accounting IIIB

*level*: III *points value*: 4

*availability*: not offered in 1996

*prerequisite*: 9101 Business Data Analysis I or equivalent and 1383 Management Accounting II

*contact hours*: two 1.5 hour seminars per week

*content*: forecasting in accounting; profit, costs, cash, share prices. Planning and control; design of information systems; participation, motivation, performance evaluation and other group problems. The management of information gathering and dissemination systems, including the evaluation of data and reports.

*assessment*: assessment will be by examination and assignments, as determined at the preliminary lecture.

### 9759 Management and Organisations III

level: III points value: 4 duration: semester 1

prerequisite: 4807 Management and Organisations II

contact hours: 2 one hour lectures and 1 one hour tutorial per week

**content:** the subject provides a critical analysis of contemporary theories and models for understanding change. It demystifies some of the new approaches which have emerged internationally, and examines management theory and the future development of organisations. Empirical material is used to highlight some of the major contemporary issues which surround the introduction of new production and service concepts such as Just-in-Time production techniques, new technology, Best Practice strategies, cellular manufacture and Total Quality Management. The integration of management theories with processes of organisational adaptation is central to the objective of providing an innovative course on management and organisational change.

**assessment:** assessment will be by examination and assignments, as determined at the preliminary lecture.

### 9885 Marketing III

level: III points value: 4 duration: semester 2

prerequisite: 5312 Marketing II

contact hours: 2 one hour lectures and 1 one hour tutorial per week

**content:** consumer behaviour and decision processes and their implications for marketing strategy; marketing communication.

**assessment:** assessment will be by examination and assignments, as determined at the preliminary lecture.

## Honours Level

### 6473 Honours Commerce

**note:** Detailed arrangements for classes will depend on enrolments, and students are advised to communicate with the Head of the Department of Commerce well before the beginning of the academic year. Students will be admitted to Honours classes only with the approval of the Head.

level: IV points value: 24 duration: full year

**requirements:** Honours students are required to undertake a research project and present a thesis of approximately 10,000 words. An absolute upper limit of 12,000 words will apply and theses in excess of this will be penalised and/or returned to be reduced to this length. The thesis will form part of the Honours examination. Depending on the topic chosen, a supervisor will be allocated to each student. Late in the

first semester students will be expected to outline their thesis objective and proposed approach to a meeting of a small number of staff.

The thesis counts for 50% of the year's assessment. The thesis is to be completed and presented by the end of lectures of the second semester. Four copies, typed double spaced on A4 paper and bound must be presented. Students will be expected to present themselves for an oral examination on their thesis at a date towards the end of the University's November examination period.

Each student is required to undertake four modules which will take place in first semester. Three modules are as follows:

Research Methodology

Quantitative Methods in Business

Contemporary Theoretical issues in Commerce

The Fourth module will be in the discipline area of the student's thesis topic and may include:

Advanced Accounting Theory

Advanced Finance Theory

Information Theory

Management and Organisation Theory

Strategic Marketing

Management Accounting Theory

Issues in Tax and Commercial Law

## Graduate Certificate in Economics

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar.

As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

### Specific Course Rules

#### 1 Admission requirements

- 1.1 Except as provided in 1.2 below, an applicant for admission to the course for the Graduate Certificate shall have qualified for a degree of the University or a degree of another institution accepted by the Faculty for the purpose as equivalent to a degree of this University.
- 1.2 Subject to the approval of the Council, the Faculty may, in special cases and subject to such conditions (if any) as it may see fit to impose in each case, accept as a candidate for the Graduate Certificate a person who does not hold a degree of a tertiary institution but has given evidence satisfactory to the Faculty of fitness to undertake work for the Graduate Certificate.
- 1.3 The Faculty may require an applicant to complete such additional preliminary work as it may prescribe before he or she is accepted as a candidate for the Graduate Certificate.

#### 2 Qualification requirements

- 2.1 To qualify for the Graduate Certificate a candidate shall complete satisfactorily a course of full-time study extending over at least one semester or of part-time study extending over at least two semesters. A candidate shall take not more than six consecutive semesters to complete the requirements of the Certificate.

#### 3 General

- 3.1 Candidates are strongly recommended to ensure that a knowledge of SACE Stage 2 Mathematics or its equivalent is acquired before enrolling for the Graduate Certificate in Economics.
- 3.2 Candidates intending to continue on to a Graduate Diploma or Master's degree are advised strongly to consult the subject requirements for those courses to ensure they complete the compulsory subjects satisfactorily.

- 3.3 Candidates currently enrolled for the Graduate Diploma in Economics will proceed under the Regulations and Schedules in force at the date of enrolment.

#### 4 Assessment and examinations

- 4.1 There shall be four classifications of pass in the final assessment of any subject for the Graduate Certificate as follows: Pass with High Distinction, Pass with Distinction, Pass with Credit, Pass. If the Pass classification be in two divisions, a pass in the higher division may be prescribed in the syllabuses as a prerequisite for admission to further studies in that subject or to other subjects.
- 4.2 A candidate for the Graduate Certificate in Economics shall attend regularly lectures and tutorials, do written work as may be prescribed, and pass examinations in accordance with the provisions of the Specific Course Rules.
- 4.3
  - (a) A candidate shall not be eligible to attend for examination unless the prescribed work has been completed to the satisfaction of the teaching staff concerned.
  - (b) A candidate who fails a subject and desires to take the subject again shall again attend lectures and satisfactorily do such written and practical work as the lecturer concerned may prescribe.
  - (c) A candidate who has twice failed the examination in any subject for the Graduate Certificate or for any other subject which in the opinion of the Faculty contains a substantial amount of the same material, may not enrol for that subject except by permission of the Faculty and then only under such conditions as Faculty may prescribe.
  - (d) For the purpose of this Specific Course Rule a candidate who is refused permission to sit for an examination under

4.3(a), or who does not, without a reason accepted by the Head of the Department of Economics as adequate, attend all or part of a final examination (or supplementary examination if granted) after having enrolled for at least two thirds of the normal period during which the subject is taught (usually 9 weeks), shall be deemed to have failed the examination.

## 5 Subjects of study

5.1 (a) To qualify for the Graduate Certificate in Economics the candidate shall satisfactorily complete four one-semester subjects (a minimum of twelve points) which shall comprise lectures and tutorials in any of the following subjects not previously completed:

8917 Macroeconomics IID	3
2419 Microeconomics IID	3
4116 Macroeconomics IIID	3
4999 Applied Microeconomics IIID	3
7869 Microeconomic Theory IIID	3
9390 Business Data Analysis ID	3
6435 Economic Data Analysis IID**	3
9549 Mathematical Economics IID**	3
1371 Applied Econometrics IIID**	3
4687 Econometric Theory IIID**	3
9640 Australian Economic History IID	3
7669 Business and Government IIID	3
6807 Development Economics IIID	3
6611 East Asian Economies IID	3
1457 Economics of Law and Politics IIID	3
9869 Environmental and Resource Economics IIID	3
5791 Industrial Relations IID	3
6160 International Economic History IIID	3
1656 International Economics IIID	3
4587 Public Finance IIID	3
5302 Special Topics IID	3
2821 Special Topics IIID	3

\*\*These subjects are available for students with some mathematical and statistical background. Check the prerequisites for each subject in the Syllabuses.

(b) A candidate may, with the permission of the Head of Department, substitute one four point subject drawn from clauses 5.1(a), 5.1(c) or 5.1(d) of the Specific Course Rules of the Graduate Diploma in Advanced Economics.

5.2 The syllabus entries for all subjects are to be found in the syllabuses of the B.Ec. degree by removing the D from the subject name: eg., for Applied Econometrics IIID see the syllabus for Applied Econometrics III in the syllabuses for the degree of Bachelor of Economics. Please note that the prerequisites as stated do not necessarily apply to students enrolled in the Graduate Certificate; approval to enrol in subjects must be obtained from the coordinator of the award. Candidates wishing to enrol in subjects under 5.1(b) above must also obtain permission from the Honours Coordinator.

5.3 No candidate will be permitted to count for the Graduate Certificate in Economics any subject that in the opinion of the Faculty contains substantially the same material as any other subject which he or she has presented already for another qualification.

## 6 Status, exemption and credit transfer

6.1 A candidate who has passed subjects in other educational institutions and who has not presented these subjects towards an award may, on written application to the Dean be granted such exemption from the requirements of these rules as the Faculty shall determine. Status may be granted for a maximum of 3 points under 5.1 of the Specific Course Rules.

# Graduate Certificate in Management

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar.

As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

## Specific Course Rules

note: Syllabuses of subjects for the degree of Graduate Certificate in Management are published below, immediately after these Specific Course Rules.

### 1 Admission requirements

1.1 The Faculty of Economics and Commerce may accept as a candidate for the Graduate Certificate any person who has qualified for a degree of The University of Adelaide or of another educational institution accepted by the Faculty for the purpose and who has had at least two years of work experience in business, public service or other field of employment approved by the Faculty.

1.2 Subject to the approval of the Council the Faculty may, in special cases and subject to such conditions (if any) as it may see fit to impose in each case, accept as a candidate for the Graduate Certificate a person who does not hold a degree but who has had not less than two years of executive or professional experience in business, public service or other field of employment approved by the Faculty and who has given evidence satisfactory to the Faculty of fitness to undertake work for the Graduate Certificate.\*

\*Intending applicants for admission to the course should seek the advice of the Director of the Graduate School of Management as to the suitability of prior work experience.

1.3 A person who holds the Diploma in Business Management, the Graduate Diploma in Management, the degree of Master of Business Management, or the degree of Master of Business Administration of The University of Adelaide or equivalent qualifications in business management or administration shall not be eligible for the award of the Graduate Certificate in Management.

### 2 Duration of course

2.1 The course of study for the Graduate Certificate in Management shall extend over a minimum of one semester in the case of a full-time candidate and two semesters for a part-time candidate.

2.2 Except with the permission of the Faculty, the requirements of the Graduate Certificate shall be completed by full-time candidates within one half year and by part-time candidates in one year.

### 3 Assessment and examinations

3.1 The Faculty shall appoint a Committee to conduct examinations and other assessments.

3.2 There shall be four classifications of pass in the final assessment of any subject for the Graduate Certificate as follows: Pass with High Distinction, Pass with Distinction, Pass with Credit, Pass. If the Pass classification be in two divisions, a pass in the higher division may be prescribed in the syllabuses as a prerequisite for admission to further studies in that subject or to other subjects.

3.3 A candidate who has not regularly attended the prescribed classes and has not completed satisfactorily such written and practical work as may be required shall not be permitted to present for examination or final assessment in any subject.

3.4 If in the opinion of the Faculty a candidate for the Graduate Certificate is not making satisfactory progress, the Faculty may, with the consent of the Council, terminate the candidature and the candidate shall cease to be enrolled for the Graduate Certificate.

### 4 Subjects of study

4.1 Unless exempted therefrom by the Faculty, every candidate for the Graduate Certificate must pass not less than three subjects drawn from Section 4.1 (a) Compulsory core subjects and not more than one subject drawn from Section 4.1 (c) Elective subjects of the Specific Course Rules for the degree of Master of

Business Administration to a combined total of 12 points as approved by the Director (or nominee) of the Graduate School of Management.

- 4.1 (a) 4061 Human Resource Management (C)
- 6811 Managerial Accounting (C)
- 4865 Marketing Principles (C)
- 4026 Organisational Behaviour (C)

## 5 General

- 5.1 No candidate will be permitted to count for the Certificate any subject that, in the opinion of the Faculty, contains substantially the same material as any other subject which he or she has already presented for another qualification.
- 5.2 The Faculty may grant status as it may determine for students who have passed subjects in graduate management degree courses or their equivalent.

## Syllabuses

### 4061 Human Resource Management (C)

points value: 3 duration: semester 2

contact hours: 3 hours per week

*content:* this subject takes a general management or strategic approach to the management of the workforce. It will examine factors external to the organisation which shape decisions about the management of people and the policy choices available to managers in particular enterprises. The outcomes of these decisions and their relationship to organisational objectives will be a theme of the course.

*assessment:* written assignments; case studies; presentations

### 6811 Managerial Accounting (C)

points value: 3 duration: semester 1 or 2

contact hours: 3 hours per week

*content:* topics covered include: the nature of accounting concepts, financial accounting reports, issues in external financial reporting and interpreting and using financial statements

*assessment:* written assignments; class tests; examination

### 4865 Marketing Principles (C)

points value: 3 duration: semester 2

contact hours: 3 hours per week

*content:* this subject introduces both the overall purpose of marketing and the fundamentals of each major marketing task. These include customer analysis, market evaluation, some analysis of buyer behaviour and the role of market information, together with the specific marketing responsibilities in product, pricing, distribution and marketplace decisions.

*assessment:* written assignments; presentation; examination

### 4026 Organisational Behaviour (C)

points value: 3 duration: semesters 1 or 2

contact hours: 3 hours per week

*content:* this subject is designed to give the student both a knowledge and experiential base for understanding organisational behaviour and organisation theory. These skills will be acquired through participation in an organisational simulation, lecture/discussion, experiential exercises, journal writing, consultations with the Professor and group presentation/projects.

*assessment:* written assignments; examinations

## Graduate Diploma in Applied Economics

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar.

As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

### Specific Course Rules

- 1 Admission requirements**
  - 1.1 An applicant for admission to the course for the Graduate Diploma shall have qualified for a degree of the University or a degree of another institution accepted by the Faculty for the purpose as equivalent to a degree of this University and have obtained the approval of the Department of Economics. The degree must not contain a major in Economics
  - 1.2 Subject to the approval of the Council the Faculty may, in special cases and subject to such conditions (if any) as it may see fit to impose in each case, accept as a candidate for the Graduate Diploma a person who does not hold a degree of a tertiary institution but has given evidence satisfactory to the Faculty of fitness to undertake work for the Graduate Diploma. Normally that would involve completing satisfactorily the requirements for the Graduate Certificate in Economics.
  - 1.3 Candidates are strongly recommended to ensure that a knowledge of SACE Stage Mathematics or its equivalent is acquired before enrolling for the Graduate Diploma in Applied Economics.
- 2 General**
  - 2.1 Candidates intending to continue on to a Master's degree are advised strongly to consult the subject requirements for such courses to ensure they complete the compulsory subjects satisfactorily.
  - 2.2 Candidates currently enrolled for the Graduate Diploma in Economics will proceed under the Regulations and Schedules in force at the date of enrolment.
  - 2.3 No candidate will be permitted to count for the Graduate Diploma in Applied Economics any subject that in the opinion of the Faculty contains substantially the same material as any other subject which he or she has presented already for another qualification, other than the Graduate Certificate in Economics and then only upon its surrender.
- 2.4 A candidate holding a Graduate Certificate in Economics may use the Certificate to help fulfil the requirements for the Graduate Diploma upon surrender of the Graduate Certificate.
- 3 Duration of course**
  - 3.1 To qualify for the Graduate Diploma a candidate shall complete satisfactorily a course of full-time study extending over at least two semesters or of part-time study extending over at least four semesters.
- 4 Assessment and examinations**
  - 4.1 There shall be four classifications of pass in the final assessment of any subject for the Graduate Diploma as follows: Pass with High Distinction, Pass with Distinction, Pass with Credit, Pass. If the Pass classification be in two divisions, a pass in the higher division may be prescribed in the syllabuses as a prerequisite for admission to further studies in that subject or to other subjects.
  - 4.2 A candidate for the Graduate Diploma in Applied Economics shall attend regularly lectures and tutorials, do written work as may be prescribed, and pass examinations in accordance with the provisions of these Specific Course Rules.
  - 4.3
    - (a) A candidate shall not be eligible to attend for examination unless the prescribed work has been completed to the satisfaction of the teaching staff concerned.
    - (b) A candidate who fails a subject and desires to take the subject again shall again attend lectures and satisfactorily do such written and practical work as the lecturer concerned may prescribe.
    - (c) A candidate who has failed twice the examination in any subject or division of a subject may not enrol for that subject again except by special permission to be obtained in writing from the Registrar and then only under such conditions as may be prescribed.

- (d) For the purpose of this Specific Course Rule a candidate who is refused permission to sit for an examination under 4.3(a) above or who does not, without a reason accepted by the Head of the Department of Economics as adequate, attend all or part of a final examination (or supplementary examination if granted) after having been enrolled for at least two thirds of the normal period during which the subject is taught (usually 9 weeks), shall be deemed to have failed the examination.

4680 Economics of Law and Politics IIID	3
9869 Environment and Resource Economics IIID	3
5791 Industrial Relations IIID	3
6160 International Economic History IIID	3
1656 International Economics IIID	3
9549 Mathematical Economics IID*	3
4587 Public Finance IIID	3

\*These subjects are available for students with some mathematical and statistical background. Check the prerequisites for each subject in the Syllabuses.

## 5 Subjects of study

- 5.1 To qualify for the Graduate Diploma in Applied Economics the candidate shall complete satisfactorily eight semester subjects (a minimum of 24 points) which shall comprise lectures and tutorials in:

- (a) the following four compulsory core subjects (12 points):

8917 Macroeconomics IID 3

2419 Microeconomics IID 3

4116 Macroeconomics IIID 3

and either

4999 Applied Microeconomics IIID 3

or

7869 Microeconomic Theory IIID 3

- (b) one of the following quantitative subjects (3 points):

1371 Applied Econometrics IIID\* 3

9390 Business Data Analysis ID 3

6435 Economic Data Analysis IID\* 3

9549 Mathematical Economics IID\* 3

4687 Econometric Theory IIID\* 3

Students who have wholly or partially satisfied either 5.1(a) above and/or clause 5.1(b) shall be required to select sufficient subjects from clause 5.1(c) below.

- (c) at least three subjects chosen from the following list (a minimum of 9 points):

1371 Applied Econometrics IIID\* 3

9640 Australian Economic History IIID 3

7669 Business and Government IIID 3

6807 Development Economics IIID 3

6611 East Asian Economics IID 3

4687 Econometric Theory IIID\* 3

6435 Economic Data Analysis IID\* 3

- (d) A candidate may substitute one or more 4 point subjects drawn from clauses 5.1(a), 5.1(c) or 5.1(d) of the Specific Course Rules of the Graduate Diploma in Advanced Economics for the corresponding 3-point level III subjects listed above.

- (e) The subject submitted under 5.1(b) cannot also be submitted under 5.1(c).

- 5.2 The syllabus entries for all subjects are found in the syllabuses of the degree of Bachelor of Economics by removing the D from the subject name: eg., for Applied Econometrics IIID see the syllabus for Applied Econometrics III in the syllabuses for degree of Bachelor of Economics. Please note that the prerequisites as stated do not necessarily apply to students enrolled in the Graduate Diploma; approval to enrol in subjects must be obtained from the coordinator of the award. Candidates wishing to enrol in subjects under 5.1(d) above must also obtain permission from the Honours Coordinator.

- 5.3 The number of subjects to be offered in any semester will be dependent upon staff availability and student demand.

## 6 Status, exemption and credit transfer

- 6.1 A candidate who has passed subjects in other educational institutions and who has not presented these subjects towards an award may, on written application to the Dean, be granted such exemption from the requirements of these regulations as the Faculty shall determine. Status may be granted for a maximum of 6 points under 5.1 of the Specific Course Rules.

## Graduate Diploma in Advanced Economics

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar.

As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

### Specific Course Rules

note: Syllabuses of subjects for the degree of Graduate Diploma in Advanced Economics are published below, immediately after these

#### 1 Admission requirements

- 1.1 An applicant for admission to the course for the Graduate Diploma shall have qualified for a degree of the University or a degree of another institution accepted by the Faculty for the purpose as equivalent to a degree of this University and have obtained the approval of the Department of Economics. The degree must contain a major in Economics at Level III.
- 1.2 Subject to the approval of the Faculty, the Council may, in special cases and subject to such conditions (if any) as it may see fit to impose in each case, accept as a candidate for the Graduate Diploma a person who does not satisfy the requirements of 1.1 above but who has given evidence satisfactory to the Faculty of fitness to undertake work for the Graduate Diploma.
- 1.3 The Faculty may require an applicant to complete such additional preliminary work as it may prescribe before he or she is accepted as a candidate for the Graduate Diploma.

#### 2 Duration of course

- 2.1 To qualify for the Graduate Diploma in Advanced Economics a candidate shall satisfactorily complete a course of full-time study extending over at least two semesters or of part-time study extending over at least four semesters.

#### 3 General

- 3.1 Candidates currently enrolled in the Graduate Diploma in Economics will proceed under the Regulations and Schedules in force at the time of enrolment.
- 3.2 Candidates intending to continue on to a Master's degree are advised strongly to consult the subject requirements for the Master's degree to ensure they complete the compulsory subjects satisfactorily.

#### 4 Assessment and examinations

- 4.1 There shall be four classifications of pass in the final assessment of any subject for the Graduate Diploma as follows: Pass with High Distinction, Pass with Distinction, Pass with Credit, Pass. If the Pass classification be in two divisions, a pass in the higher division may be prescribed in the syllabuses as a prerequisite for admission to further studies in that subject or to other subjects.
- 4.2 A candidate for the Graduate Diploma in Advanced Economics shall regularly attend lectures and tutorials, do written work as may be prescribed, and pass examinations in accordance with the provisions of these Specific Course Rules.
  - (a) A candidate shall not be eligible to attend for examination unless the prescribed work has been completed to the satisfaction of the teaching staff concerned.
  - (b) A candidate who fails a subject and desires to take the subject again shall attend again lectures and satisfactorily do such written and practical work as the lecturer concerned may prescribe.
  - (c) A candidate who has twice failed the examination in any subject or division of a subject may not enrol for that subject again except by special permission to be obtained in writing from the Registrar and then only under such conditions as may be prescribed.
  - (d) For the purpose of this Specific Course Rule a candidate who is refused permission to sit for an examination under 4.3(a) above, or who does not, without a reason accepted by the Head of the Department as adequate, attend all or part of a final examination (or supplementary examination if granted) after having

enrolled for at least two thirds of the normal period during which the subject is taught (usually 9 weeks), shall be deemed to have failed the examination.

## 5 Subjects of study

5.1 To qualify for the Graduate Diploma in Advanced Economics the candidate shall complete satisfactorily six semester subjects (24 points) which shall comprise lectures and tutorials in:

(a) the following two compulsory core subjects (8 points):

7264 Macroeconomics A (H)	4
3711 Microeconomics A (H)	4

(b) One of the following quantitative subjects (four points):

9952 Applied Econometrics IIIA	4
7589 Econometric Theory IIIA	4
2341 Econometrics (H)	4

(c) at least two subjects chosen from the list (a minimum of 8 points) including the presentation of a research essay in at least one of the subjects:

2341 Econometrics (H)*	4
9712 Economic Development (H)	4
7446 Economic Growth and Agriculture (H)	4
8336 Economics of Public Policy (H)	4
5605 Environment and Development (H)**	4
2936 Experimental Economics (H)**	4
5454 History of Economic Thought (H)**	4
2683 Industrial Organisation (H)	4
6677 International Banking and Finance (H)**	4
6747 International Financial Issues (H)	4
6692 International Trade (H)	4
4054 Labour Economics (H)**	4
6670 Long Run Growth (H)**	4
2275 Mathematical Economics (H)	4
4761 Monetary Economics (H)**	4
3393 Money (H)**	4
8053 Public Economics (H)	4

5706 Regional Economics (H)**	4
3782 Socialist Economies in Transition (H)**	4
3634 Special Topics (H)	4
1294 Transport and Urban Economics (H)**	4

(d) one other subject from those listed above in 5.1(c) or from the following (4 points):

9952 Applied Econometrics IIIA *	4
9145 Business and Government IIIA	4
8263 Development Economics IIIA	4
7589 Econometric Theory IIIA*	4
4188 Economics of Law and Politics IIIA	4
5415 Environment and Resource Economics IIIA	4
1252 International Economic History IIIA	4
4913 International Economics IIIA	4
3464 Labour Economics IIIA	4
5653 Microeconomic Theory IIIA	4
1093 Public Finance IIIA	4

\*Not available if taken under 5.1(b) above.

\*\* Not available in 1996

5.2 The syllabus entries for subjects are found in the syllabuses of the degree of Bachelor of Economics by removing the A from the subject name: eg, for Applied Econometrics IIIA see the syllabus for 4883 Applied Econometrics III in the syllabuses for the degree of Bachelor of Economics. Please note that the prerequisites as stated do not necessarily apply to students enrolled in the Graduate Diploma; approval to enrol in subjects must be obtained from the coordinator of the award.

5.3 The number of subjects to be offered in any semester will be dependent upon the availability of staff and student demand.

5.4 In special circumstances, candidates may be given permission to substitute another subject for subjects specified in 5.1 above.

5.5 No candidate will be permitted to count for the Graduate Diploma in Advanced Economics any subject that in the opinion of the Faculty contains substantially the same material as any other subject which he or she has presented already for another qualification, other than for

the Graduate Certificate in Economics and then only upon its surrender.

**5.6** A candidate holding a Graduate Certificate in Economics may use the Certificate to help fulfil the requirements for the Graduate Diploma upon surrender of the Graduate Certificate.

**6 Status, exemption and credit transfer**

**6.1** A candidate who has passed subjects in other educational institutions and who has not presented these subjects towards an award may, on written application to the Dean, be granted such exemption from the requirements of these Specific Course Rules as the Faculty shall determine. Status may be granted for a maximum of 8 points under 5.1(a) and 5.1(b) above.

## Syllabuses

### textbooks

Information on appropriate textbooks will be provided by the department concerned, and at the preliminary lecture in Orientation Week.

In general students are expected to have their own copies of textbooks, but they are advised to wait advice from the Lecturer concerned before buying any particular book. Only the prescribed edition of any textbook should be bought.

### reference books

Although lists of books and journals for reference purposes are regarded as important, details have not been included in this Volume. These will however be issued from time to time by the departments concerned. It is hoped that all books and journals set for reference will be available to be consulted in the Barr Smith Library.

### assessment

For each subject students may obtain from the Lecturer concerned details of the assessment in that subject including the relative weights given to the components (eg, such of the following as are relevant: semester tests, essays or other written or practical work, final written examinations, *viva voce* examinations).

### prerequisites for quantitative and optional subjects

The prerequisites for these subjects must be approved by the Coordinator of the Graduate Diploma in Applied Economics.

### compulsory core subjects

#### 7264 Macroeconomics A (H)

*points value:* 4                      *duration:* semester 1

*assumed knowledge:* a knowledge equivalent to an undergraduate major in Economics

*prerequisite:* 4466 Macroeconomics III and 3658 Microeconomic Theory III or their equivalents

*contact hours:* 2 one hour lectures a week

*content:* introduction to an advanced treatment of major recent developments in macroeconomic theory and policy. Topics include advanced treatment of the neo Classical synthesis, and developments in Neo Keynesian, Neo Classical and Post Keynesian approaches to macroeconomics. Policy evaluation is treated in the context of small open economy macroeconomic models.

*assessment:* final exam

#### 3711 Microeconomics A (H)

*points value:* 4                      *duration:* semester 1

*prerequisite:* 3658 Microeconomic Theory III or its equivalent

*assumed knowledge:* a knowledge equivalent to an undergraduate major in Economics

*contact hours:* 2 one hour lectures a week

*content:* an advanced treatment of consumer theory, the theory of the firm including strategic behaviour, general equilibrium and welfare.

*assessment:* final exam

### quantitative subject

#### 2341 Econometrics (H)

*points value:* 4                      *duration:* to be advised

*prerequisite:* as approved by the coordinator of the award

*contact hours:* 1 two hour lecture a week

*content:* the subject is concerned with practical problems of modelling economic time series for the purposes of testing theories and for policy and forecasting. The development will be information, most theorems will not be proven and mathematical arguments will, for the most part, be presented in intuitive fashion. The course will cover: analysis of economic time series in the time domain using the methods of Box and Jenkins; the relationship between time series analysis ARMA models and structural econometric models.

*assessment:* assessment will be finally determined in consultation with students at the beginning of semester. It is usually based on one research project and a final examination.

### optional subjects

#### 9712 Economic Development (H)

*points value:* 4                      *duration:* to be advised

*assumed knowledge:* a knowledge equivalent to an undergraduate major in Economics

*prerequisite:* as approved by the coordinator of the award

*contact hours:* 1 two hour lecture a week

*content:* the subject is concerned with the economic structure and functioning of less-developed countries and with theories of economic growth. The course will emphasise selected topics, which may vary from year to year.

*assessment:* assessment will be finally determined in consultation with students at the beginning of semester. It is usually based on one research project and a final examination.

#### **7446 Economic Growth and Agriculture (H)**

*points value:* 4                      *duration:* to be advised

*prerequisite:* as approved by the coordinator of the award

*assumed knowledge:* a knowledge equivalent to an undergraduate major in Economics

*contact hours:* 2 one hour lectures a week

*content:* this is the course on the nature, causes and effects of inter- and intra-sectoral structural changes that occur to production, consumption and trade in growing economies. While there will be some emphasis on the agricultural sector, the use of an open economy, general equilibrium framework throughout ensures that the analytical methods employed and the policy issues addressed have general applicability.

*assessment:* assessment will be finally determined in consultation with students at the beginning of semester.

#### **8336 Economics of Public Policy (H)**

*level:* Postgraduate                      *points value:* 4

*duration:* to be advised

*prerequisite:* as approved by the coordinator of the award

*restriction:* may not be counted with 9993 Economics of Public Policy

*contact hours:* 2 one hour lectures a week

*content:* this subject presents the theory of economic policy at an advanced level. The welfare economics of policy and the positive economics of policy, and especially their connections, will be highlighted. Topics include the variety of policy and analyses constitutionalism, corporatism, and the economic theory of the state; the Coase theorem; theory of second best; cost-benefit analysis; incentive compatibility; rent-seeking; theories of policy. Illustrations will be drawn from historical experience and contemporary policy issues, both macro- and micro-economic.

*assessment:* assessment will be determined in consultation with students at the beginning of semester. Details to be determined include the relative weights given to the components (eg such of the following as are relevant: semester tests; essays or other written or practical work; final written examinations; *viva voce* examinations).

#### **5454 History of Economic Thought (H)**

*points value:* 4                      *availability:* not offered in 1996

*assumed knowledge:* a knowledge equivalent to an undergraduate major in Economics

*contact hours:* to be advised

*content:* to be advised

*assessment:* Assessment will be determined in consultation with students at the beginning of semester.

#### **2683 Industrial Organisation (H)**

*points value:* 4                      *duration:* to be advised

*assumed knowledge:* a knowledge equivalent to an undergraduate major in Economics

*contact hours:* to be advised

*assessment:* assessment will be determined in consultation with students at the beginning of semester.

#### **6747 International Financial Issues (H)**

*points value:* 4                      *duration:* to be advised

*prerequisite:* as approved by the coordinator of the award

*assumed knowledge:* a knowledge equivalent to an undergraduate major in Economics

*contact hours:* 1 two hour lecture a week

*content:* the subject is concerned with the international monetary system and international financial markets. The topics covered may vary from year to year.

*assessment:* assessment will be determined in consultation with students at the beginning of semester. It is usually based on one research project and a final examination.

#### **6692 International Trade (H)**

*points value:* 4                      *duration:* to be advised

*prerequisite:* as approved by the coordinator of the award

*assumed knowledge:* a knowledge equivalent to an undergraduate major in Economics

*contact hours:* 1 two hour lecture a week

*content:* the subject is concerned with the theory of international trade and commercial policy. The topics covered may vary from year to year.

*assessment:* assessment will be determined in consultation with students at the beginning of semester. It is usually based on one research project and a final examination.

#### 4054 Labour Economics (H)

*points value:* 4      *availability:* not offered in 1996

*prerequisite:* as approved by the coordinator of the award

*assumed knowledge:* a knowledge equivalent an undergraduate major in Economics

*contact hours:* 1 two hour lecture a week

*content:* an advanced treatment of current topics in labour economics.

*assessment:* assessment will be determined in consultation with students at the beginning of semester. It is usually based on one research project and a final examination.

#### 2275 Mathematical Economics (H)

*points value:* 4      *duration:* to be advised

*prerequisite:* as approved by the coordinator of the award

*assumed knowledge:* a knowledge equivalent to an undergraduate major in Economics

*contact hours:* 1 two hour lecture a week

*content:* introduction to and applications of optimal control theory. Introduction to and applications of game theory.

*assessment:* assessment will be determined in consultation with students at the beginning of semester. It is usually based on one research project and a final examination.

#### 8053 Public Economics (H)

*points value:* 4      *duration:* to be advised

*prerequisite:* as approved by the coordinator of the award

*assumed knowledge:* a knowledge equivalent to an undergraduate major in Economics

*contact hours:* 1 two hour lecture a week

*content:* the purpose of this subject is to examine the role of government in a market economy. The subject starts with an overview of economists' perspectives on this issue, then turns to an extensive consideration of the implications of the theory of second best for the formulation of policy. A second topic is a close examination of another issue which is prominent for governments but skated over in most economics courses, namely income distribution in general and poverty in particular. Issues in taxation may be taught as a third topic.

*assessment:* assessment will be determined in consultation with students at the beginning of semester. It is usually based on one research project and a final examination.

#### 3634 Special Topics (H)

*level:* Postgraduate      *points value:* 4

*duration:* to be advised

*prerequisite:* as approved by the coordinator of the award

*contact hours:* 2 one hour lecture and 1 tutorial a week

*content:* this subject will cover selected topics which are not currently covered elsewhere in the Economics curriculum at level IV. The selection of topics will depend on the availability of staff, including visitors, and on their teaching and research interests.

*assessment:* assessment will be determined in consultation with students at the beginning of semester.

## Graduate Diploma in Management

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar.

As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

### Specific Course Rules

#### 1 Admission requirements

1.1 The Faculty of Economics and Commerce may accept as a candidate for the Graduate Diploma any person who has qualified for a degree of The University of Adelaide or of another educational institution accepted by the Faculty for the purpose and who has had not less than two years of executive or professional experience in business, public service or other field of employment approved by the Faculty.

1.2 Subject to the approval of the Council the Faculty may, in special cases and subject to such conditions (if any) as it may see fit to impose in each case, accept as a candidate for the Graduate Diploma a person who does not hold a degree but who has had not less than two years of executive or professional experience in business, public service or other field of employment approved by the Faculty and who has given evidence satisfactory to the Faculty of fitness to undertake work for the Graduate Diploma.\*

\*Intending applicants for admission to the course should seek the advice of the Director of the Graduate School of Management as to the suitability of prior work experience.

1.3 The Faculty of Economics and Commerce may accept as a candidate for the Graduate Diploma any person who holds the Graduate Certificate in Management of The University of Adelaide or of another educational institution accepted by the Faculty for the purpose provided that any person who holds the Graduate Certificate in Management of The University of Adelaide surrenders the Graduate Certificate before being awarded the Graduate Diploma.

#### 2 Duration of course

2.1 The course of study for the Graduate Diploma in Management shall extend over a minimum of two trimesters in the case of full-time study or four trimesters of part-time study. The academic year consists of three 13-week trimesters. Trimester one commences on the first Monday

in February. There is a two-week break after each of the first two trimesters and a break of at least seven weeks after the third trimester.

2.2 Except with the permission of the Faculty, and subject to 2.3 below, the requirements of the Graduate Diploma shall be completed within two years.

2.3 A candidate whose candidature is interrupted may re-enrol only with the approval of the Faculty and under such conditions as the Faculty may impose in each case. Approval must be sought in advance for any proposed interruption.

#### 3 Assessment and examinations

3.1 There shall be four classifications of pass in the final assessment of any subject for the Graduate Diploma as follows: Pass with High Distinction, Pass with Distinction, Pass with Credit, Pass. If the Pass classification be in two divisions, a pass in the higher division may be prescribed in the syllabuses as a prerequisite for admission to further studies in that subject or to other subjects.

3.2 A candidate shall pass in each of the prescribed subjects and shall obtain an overall average equivalent to Pass Division I or better.

3.3 The Faculty of Economics and Commerce shall appoint a Committee to conduct examinations and other assessments.

3.4 A candidate who has not regularly attended the prescribed classes or who has not completed satisfactorily such written and practical work as may be required shall not be permitted to present for examination or final assessment in any subject.

3.5 If in the opinion of the Faculty of Economics and Commerce a candidate for the Graduate Diploma is not making satisfactory progress, the Faculty may, with the consent of the Council, terminate the candidature and the candidate shall cease to be enrolled for the Graduate Diploma.

## 4 Subjects of study

- 4.1 To qualify for the Graduate Diploma in Management candidates must pass not less than six subjects drawn from 4.1(a) compulsory core subjects and not more than two subjects drawn from Rule 4.1(c) elective subjects of the Specific Course Rules for the degree of Master of Business Administration, to a combined total of 24 points, as approved by the Director (or nominee) of the Graduate School of Management.

## 5 General

- 5.1 No candidate will be permitted to count for the Diploma any subject that, in the opinion of the Faculty, contains substantially the same material as any other subject which he or she has already presented for another qualification.
- 5.2 The Faculty may grant status as it may determine for students who have passed subjects in graduate management degree courses or their equivalent.

## Syllabuses

---

### textbooks

Candidates will be advised of prescribed text-books and reference material by the lecturer concerned.

In general students are expected to have their own copies of textbooks, but they are advised to wait advice from the lecturer concerned before buying any particular book. Only the prescribed edition of any textbook should be bought.

### reference books

Although lists of books and journals for reference purposes are regarded as important, details have not been included in this Volume. These will however be issued from time to time by the departments concerned. It is hoped that all books and journals set for reference will be available to be consulted in the Barr Smith Library.

### assessment

For each subject candidates will be supplied by the lecturer concerned with details of the assessment in that subject including the relative weight given to the components (for example, tests, essays or other written or practical work, final written examinations, project reports, *viva voce* tests or examinations).

### timetable

The current course program timetable will be made available to candidates before the commencement of the course.

### Syllabus details

Please refer to the Master of Business Administration

Six subjects must be drawn from Specific Course Rule 4.1(a) compulsory core subjects, and two subjects from Specific Course Rule 4.1(c) elective subjects.

## Master of Business Administration

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar.

As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

### Specific Course Rules

#### 1 Admission requirements

- 1.1 The Faculty of Economics and Commerce may accept as a candidate for the degree any person who has qualified for a degree of The University of Adelaide or of another educational institution accepted by the Faculty for the purpose and who has had at least two years' experience in business, public service or other field of employment approved by the Faculty of Economics and Commerce and who has satisfied such other tests as the Faculty, subject to the approval of the Council, may prescribe.
- 1.2 Subject to the approval of the Board of Graduate Studies, acting with authority wittingly devolved to it by the Council, the Council may, in special cases and subject to such conditions (if any) as it may see fit to impose in each case, accept as a candidate for the degree a person who does not hold a degree but has given evidence satisfactory to the Faculty of fitness to undertake work for the degree.
- 1.3 A candidate who holds the Diploma of Business Management or the Graduate Certificate in Management or the Graduate Diploma in Management from The University of Adelaide shall surrender the Diploma, Certificate or Graduate Diploma before being admitted to the degree.

#### 2 Duration of course

- 2.1 The course of study for the degree of Master of Business Administration shall extend over a minimum of four trimesters in the case of a full-time candidate and eight trimesters for a part-time candidate. The academic year consists of three 13-week trimesters. Trimester one commences on the first Monday in February. There is a two-week break after each of the first two trimesters and a break of at least seven weeks after the third trimester.

- 2.2 Except with the permission of the Faculty, and subject to 2.3 below, the requirements of the degree shall be completed within six years.
- 2.3 A candidate whose candidature is interrupted may re-enrol only with the approval of the Faculty and under such conditions as the Faculty may impose in each case. Approval should be sought in advance for any proposed interruption.

#### 3 Assessment and examinations

- 3.1 There shall be four classifications of pass in the final assessment of any subject for the Master of Business Administration as follows: Pass with High Distinction, Pass with Distinction, Pass with Credit, Pass. If the Pass classification be in two divisions, a pass in the higher division may be prescribed in the syllabuses as a prerequisite for admission to further studies in that subject or to other subjects.
- 3.2 A candidate shall pass in each of the prescribed subjects and shall attain an overall average equivalent to a Pass Division I or better.
- 3.3 The Faculty of Economics and Commerce shall appoint a Committee to conduct examinations and other assessments.
- 3.4 A candidate who has not regularly attended the prescribed classes and has not completed satisfactorily such written and practical work as may be required shall not be permitted to present for examination or final assessment in any subject.
- 3.5 If in the opinion of the Faculty of Economics and Commerce a candidate for the degree is not making satisfactory progress, the Faculty may, with the consent of the Council, terminate the candidature and the candidate shall cease to be enrolled for the degree.

## 4 Subjects of study

4.1 To qualify for the Master of Business Administration, candidates must pass subjects with a combined total of 48 points drawn from the following areas:

- (a) compulsory core subjects  
(nine subjects to a total of 27 points must be taken)
- |                                 |   |
|---------------------------------|---|
| 2697 Economics for Management   | 3 |
| 5356 Human Resource Management  | 3 |
| 1215 Management Control Systems | 3 |
| 1229 Managerial Accounting      | 3 |
| 9684 Managerial Finance         | 3 |
| 2480 Marketing Decision Making  | 3 |
| 9408 Marketing Principles       | 3 |
| 5367 Organisational Behaviour   | 3 |
| 1348 Quantitative Methods       | 3 |
- (b) compulsory Integrative subjects  
(two subjects to a total of 6 points must be taken)
- |                         |   |
|-------------------------|---|
| 6309 Business Policy    | 3 |
| 6055 Corporate Strategy | 3 |
- (c) elective subjects  
(elective subjects to a total of fifteen points must be taken from the list of elective subjects available)
- |   |   |
|---|---|
| 8143 Advanced Managerial Finance                    | 3 |
| 5179 Business in Asia                               | 3 |
| 3564 Business Law                                   | 3 |
| 1985 Industry Economics*                            | 3 |
| 9363 International Business                         | 3 |
| 7587 International Financial Management*            | 3 |
| 1568 International Management Behaviour*            | 3 |
| 6005 International Marketing                        | 3 |
| 2840 Interpersonal Skills                           | 3 |
| 7958 Japanese Government and Business Organisation* | 3 |
| 9699 Management and Information Systems             | 3 |
| 5876 Management of Change                           | 3 |
| 1579 Managing Quality and Productivity              | 3 |

4705 Operations Management (Mgt)	3
2015 Public Sector Management	3
6072 Quantitative Decision Making	3
6461 Services Marketing	3
1923 Supervised Project Work (1) or	6
7938 Supervised Project Work (3)	6
9328 Topics in Business Law	3
4405 Topics in Finance	3
1636 Topics in Management	3
9972 Workplace Relations	3

\* Not available in 1996

4.2 A candidate's program of study must be approved by the Dean (or nominee) at enrolment each year.

4.3 Each candidate will be required to undertake during university vacations such studies as may be prescribed by the Director of the Graduate School of Management.

## 5 Status, exemption and credit transfer

5.1 No candidate will be permitted to count for the Degree any subject that, in the opinion of the Faculty, contains substantially the same material as any other subject which he or she has already presented for another qualification

5.2 Status will only be granted for students who have passed subjects for the Graduate Certificate in Management or the Graduate Diploma in Management or their equivalents. The Faculty may, in appropriate circumstances, allow a candidate to substitute an elective subject (or subjects) for one or more of the compulsory subjects listed in groups(a) and (b) of 4.1 above.

note: not forming part of the Specific Course Rules:

All students enrolled prior to 1996 will be permitted to choose to undertake:

1923 Supervised project Work (1) or

7938 Supervised Project Work (3) or

two electives in lieu of either 1923 or 7938.

Students enrolled prior to 1996 must also, in addition to satisfactorily completing the Supervised project Work or two electives in lieu of the Project, satisfactorily complete 8 Compulsory Core subjects, on Compulsory Integrative subject and five Elective subjects.

This note will be in effect from 1 January 1996 to the end of Trimester 2, 2005.

## Syllabuses

---

### textbooks

Information on appropriate textbooks will be provided by the department concerned.

In general students are expected to have their own copies of textbooks, but they are advised to wait advice from the lecturer concerned before buying any particular book. Only the prescribed edition of any textbook should be bought.

### reference books

Although lists of books and journals for reference purposes are regarded as important, details have not been included in this Volume. These will however be issued from time to time by the departments concerned. It is hoped that all books and journals set for reference will be available to be consulted in the Barr Smith Library.

### assessment

For each subject students may obtain from the lecturer concerned details of the assessment in that subject including the relative weights given to the components (eg, such of the following as are relevant; assessments, semester test, essays or other written or practical work, final written examinations, *viva voce* examinations).

### compulsory core subjects

#### 2697 Economics for Management

*points value:* 3                      *duration:* trimester 1 or 2

*contact hours:* 1 three hour seminar a week

*content:* an introduction to the basic principles of modern economic theory. The first section deals with price-output decisions by firms in markets characterised by perfect competition, monopoly and oligopoly. The second half deals the theory of the determinations of the aggregate level of output and employment and the basis for macroeconomic policy. Topics include inflation, interest rates and foreign trade.

*assessment:* written assignments, examination

#### 5356 Human Resource Management

*points value:* 3                      *duration:* trimester 2 or 3

*prerequisite:* 5367 Organisational Behaviour

*contact hours:* 1 three hour seminar a week

*content:* this subject takes a general management or strategic approach to the management of the workforce. It will examine factors external to the

organisation which shape decisions about the management of people, and the policy choices available to managers in particular enterprises. The outcomes of these decisions and their relationship to organisational objectives will be a theme of the course.

*assessment:* written assignment; case studies; presentations

#### 1215 Management Control Systems

*points value:* 3                      *duration:* trimester 2

*prerequisites:* 1229 Managerial Accounting and 1348 Quantitative Methods

*contact hours:* 1 three hour seminar a week

*content:* an overview of management accounting, cost accounting concepts and systems, accounting and short-run decisions, product cost information, management control and strategic cost management. Some consideration will be given to the behavioural implications of cost control systems.

*assessment:* written assignments; class presentation

#### 1229 Managerial Accounting

*points value:* 3                      *duration:* trimester 1 or 3

*contact hours:* 1 three- hour class a week

*content:* topics covered include: the nature of accounting, basic accounting concepts, financial accounting reports, issues in external financial reporting and interpreting and using financial statements.

*assessment:* written assignments; class test; exam

#### 9684 Managerial Finance

*points value:* 3                      *duration:* trimester 1 or 2

*prerequisite:* 1229 Managerial Accounting

*contact hours:* 1 three- hour class a week

*content:* the subject considers the financial decisions of business enterprises. Topics to be covered include a consideration of the goals of the firm and the investor, valuation models, capital budgeting, risk, capital structure and dividend policy, long term and short term financing sources and policies.

*assessment:* written assignment; class test; exam

#### 2480 Marketing Decision Making

*points value:* 3                      *duration:* trimester 1 or 2

*prerequisite:* 9408 Marketing Principles

*contact hours:* 1 three hour seminar a week

*content:* this subject builds on the appreciation of marketing activities gained in marketing principles through the study of actual work problems encountered by the participants and also by consideration of formal marketing planning. In addition, time is devoted to the implications of company style and structure on practical marketing management and the realisation of marketing objectives and strategies.

*assessment:* case presentations; exam

### **9408 Marketing Principles**

*points value:* 3                      *duration:* trimester 1 or 3

*contact hours:* two 1.5 hour classes a week

*content:* this subject introduces both the overall purpose of marketing and the fundamentals of each major marketing task. These include customer analysis, market evaluation, some analysis of buyer behaviour and the role of market information, together with the specific marketing responsibilities in product, pricing, distribution and marketplace decisions.

*assessment:* written assignment; presentation; exam

### **5367 Organisational Behaviour**

*points value:* 3                      *duration:* trimester 1 or 3

*contact hours:* 1 three hour seminar a week

*content:* this subject is designed to give the student both a knowledge and experiential base for understanding organisational behaviour and organisation theory. These skills will be acquired through participation in an organisational simulation, lecture/ discussion, experiential exercises, journal writing, consultations with the Professor and group presentation/projects.

*assessment:* written assignments; exam

### **1348 Quantitative Methods**

*points value:* 3                      *duration:* trimester 3

*contact hours:* 1 three hour seminar a week

*content:* this subject covers the techniques of business decision-making and forecasting. Topics include basic probability; the normal and student-t distributions, expected values and decision analysis, tests of independence, analysis of variance, regression, and time series. The emphasis is on learning by problem-solving and so a significant amount of class time is devoted to working through problem sets to aid understanding.

*assessment:* short test, assignment, exam

## **compulsory integrative subjects**

### **6309 Business Policy**

*points value:* 3                      *duration:* trimester 2 or 3

*prerequisite:* 1229 Managerial Accounting; 2697 Economics for Management; 9408 Marketing Principles; 5367 Organisational Behaviour

*contact hours:* 1 three hour seminar a week

*content:* Business Policy presents a unified way of thinking about the issues of strategic choice and the management of change. Strategic choice involves searching for a favourable, and sustainable, competitive position in an attractive industry; while the management of change, from a strategic perspective, is concerned with innovation and the transformation of resources and skills into strategic capabilities that provide the basis for sustainable advantages.

*assessment:* group assignment; individual assignments; competitive participation in class discussion

### **6055 Corporate Strategy**

*points value:* 3                      *duration:* trimester 1 or 3

*prerequisite:* all eight compulsory core subjects

*contact hours:* 1 three hour seminar a week

*content:* an integrative study of strategic management, building on the concepts introduced in 6309 Business Policy and on knowledge acquired from previous studies in the disciplinary and functional areas of management. Topics covered include diversification strategies, acquisition and divestiture, strategy implementation, relating corporate structure to strategy, systems and corporate culture, the role of top management and the chief executive.

*assessment:* written analyses; executive summaries; workshop participation; case leadership

## **elective subjects**

### **8143 Advanced Managerial Finance**

*points value:* 3                      *duration:* trimester 3

*prerequisites:* 9684 Managerial Finance

*contact hours:* 1 three-hour seminar a week

*content:* this subject extends the range of topics, complexity of analysis, of the material covered in 9684 Managerial Finance. Topics to be covered include financial analysis, financial planning, current asset management, leasing, futures markets, long term financing, mergers and acquisitions, international finance and risk management.

*assessment:* written analyses; syndicate presentation

### 5179 Business in Asia

points value: 3

duration: trimester 3

contact hours: 1 three hour seminar a week

content: an introduction to the economics, politics, business culture, organisations and practices of Australia's major trading partners in the Asia Pacific region. Five countries will be selected for examination out of Indonesia, Malaysia, Singapore, Taiwan, Thailand, Vietnam, the Philippines, China, Korea and Japan. If time permits, issues of economic development and entrepreneurial activities in the former USSR, USA and overseas Chinese communities will also be discussed.

assessment: presentation; class participation and essay

### 3564 Business Law

points value: 3

duration: trimester 1 or 2

contact hours: 1 three hour seminar a week

content: this subject will provide students with an introduction to the Australian legal system and to a variety of commercial legal topics relevant to managers. Topics canvassed include contract law; partnership and agency law; corporation law with particular focus on director's and manager's duties; the law of trusts from a commercial perspective; the law of torts with a focus upon professional negligence; consumer protection laws; management and occupational health and safety issues; employment contracts and unfair dismissal; intellectual property; business ethics and corporate social responsibility; international business law.

assessment: written assignments; seminar presentations; class participation

### 1985 Industry Economics

points value: 3

availability: not offered in 1996

prerequisite: 2697 Economics for Management

contact hours: 1 three hour seminar a week, with both lectures and student presentations

content: this subject will consider the firm and its competitive environment. Topics covered will include: the concept of competition and the need for government intervention in markets; oligopoly theory and the goals of the firm; the economic definition of markets; market structure concentration, economies of scale, product differentiation; market conduct pricing, output policy, diversification, mergers, advertising, research and development, restrictive trade practices; market performance; trade practices legislation and enforcement in Australia. The course will emphasise the application of economics to sections 45-50 of the Trade Practices Act.

assessment: a final exam and a paper of approx 2;000 words. Class discussion will count for a small amount of the final assessment. The actual weights for each required piece of work will be determined after discussion with the class.

### 9363 International Business

points value: 3

duration: trimester 3

prerequisites: 6309 Business Policy

contact hours: 1 three hour seminar a week

content: this subject builds on participants' knowledge of cross-border business activity by giving more detailed attention to international business competitiveness; the ways in which companies organise themselves for cross-border business and the need to adjust to diverse business environments. International business is looked at from three perspectives: that of public policy makers, that of the CEO of a global business and that of middle managers facing practical problems overseas. The focus is on managing in culturally and competitively diverse markets.

assessment: to be advised

### 7587 International Financial Management

points value: 3

availability: not offered in 1996

prerequisite: 8143 Advanced Managerial Finance

contact hours: 1 three hour seminar a week

content: Examines the international financial and investment environment particularly determination and management of currency exchange rates, foreign exchange markets, foreign exchange risk management, multinational working capital management, overseas investment analysis including ownership options, financing of overseas operations, tax and accounting implications of international investments, treasury management, and international capital markets.

assessment: written assignments; class presentations

### 1568 International Management Behaviour

points value: 3

availability: not offered in 1996

prerequisites: 5356 Human Resource Management

contact hours: 1 three hour seminar each week

content: this subject provides an overview of the cross-cultural and human resource issues associated with managing a multinational corporation. Topics covered include methodological and research issues in international management and the impact of culture on management; international negotiations; managing political risk; international human resource management; organisational structure of the MNC; and

MNC-host government relations. Management practices in various countries will also be examined.

*assessment:* written assignments; class presentations; case study exam

### **6005 International Marketing**

*points value:* 3                      *duration:* trimester 3

*prerequisite:* 9408 Marketing Principles

*contact hours:* 1 three hour seminar a week

*content:* this subject builds on 9408 Marketing Principles through an examination and analysis of exporting by medium and small companies, and international marketing by multinationals with production facilities in more than one country. Major elements are the 'globalisation' of contemporary business, joint ventures and strategic alliances, and Japanese business thinking.

*assessment:* case study analyses; class presentation

### **2840 Interpersonal Skills**

*points value:* 3                      *duration:* trimester 2

*prerequisites:* 5356 Human Resource Management

*contact hours:* 1 three hour seminar a week

*content:* the aim of this subject is to develop practical management and leadership skills, using an approach and methods applicable across a wide range of interpersonal contexts. Course methods will include lecture inputs, case exercises and syndicate analysis and discussion, and will also include experiential learning methods, such as the recording and analysis of video simulations. Topics include impression management, behaviour flexibility, interaction styles, selection interviewing, appraising and counselling, committee and team skills, and presentation skills. The session/s devoted to presentation skills will also contribute towards candidate assessment.

*assessment:* research essay; management assignment

### **7958 Japanese Government and Business Organisation**

*points value:* 3                      *availability:* not offered in 1996

*contact hours:* 1 three hour seminar a week

*prerequisites:* 2697 Economics for Management

*content:* Topics include overviews of competing images of Japan's economic systems and the society; employment systems; how competitive is the economy?—the concept and practice of 'competition'; the role of the State and the forms of economic planning; equality; welfare and social division; and the future prospect.

*assessment:* class presentations; written assignments

### **9699 Management and Information Systems**

*points value:* 3                      *duration:* trimester 1

*contact hours:* 1 three hour seminar a week

*content:* an introduction to methods for analysis, design, management and audit of systems for the provision of management information. Emphasis will be given to systems for improving management performance. The course will not deal with routine data processing methods, except in a management context.

No computer using or programming skills are required.

*assessment:* class presentation; management summaries

### **5876 Management of Change**

*points value:* 3                      *availability:* not offered in 1996

*prerequisite:* 5356 Human Resource Management

*contact hours:* 1 three hour seminar a week

*content:* this subject examines the changing environment in which organisations operate and how managers might utilise this change. The role of the manager in managing change, both planned and unplanned, is a focus of the subject. Theories of change, how individuals are affected by and can influence change will provide the theoretical foundations for this analysis. Students will also develop an understanding of change as it occurs at the individual group and organisational level.

*assessment:* to be advised

### **1579 Managing Quality and Productivity**

*points value:* 3                      *availability:* not offered in 1996

*prerequisite:* 5356 Human Resource Management

*contact hours:* 1 three hour seminar a week

*content:* the subject focuses on the major management and leadership philosophies underlying the practice of total quality management in manufacturing and service organisations. Topics covered include: the history, principles and issues associated with total quality management; the role of standards, quality assurance and benchmarking; quantitative analysis in total quality management; business process analysis and re-engineering; the management of variations; team based approaches to problem solving and quality improvements; and the philosophy of continuous improvement.

*assessment:* written case analyses (50%); syndicate project (40%); syndicate project presentation (10%)

**4705 Operations Management (Mgt)**

*points value:* 3                      *duration:* trimester 2

*contact hours:* 1 three hour seminar a week

*prerequisites:* 1348 Quantitative Methods; 6309 Business Policy

*content:* This subject examines the role of the Operations Manager and addresses both tradition and contemporary issues involved in the effective management of operations. Topics covered include the traditional areas of operations strategy, operations analysis and systems design, the management of materials flow and inventories, production planning and control. Contemporary issues include total quality management and the management of quality, benchmarking, technology, maintenance management, the changing views of workforce management and productivity, the linkages between business strategy, marketing and operations, and operations as a source of competitive advantage.

*assessment:* written case analysis; syndicate projects

**2015 Public Sector Management**

*points value:* 3                      *availability:* not offered in 1996

*contact hours:* 1 three hour seminar a week

*content:* this subject will acquaint students with the special and unique characteristics of management in the public sector, and the key issues facing public sector managers. Topics to be covered may include the interaction of public sector organisations and the political process; the opportunity for strategic planning; the machinery of government; public finance and resource allocation; the management of human resources in the public sector; accountability; service delivery; the organisation of public commercial activities.

*assessment:* to be advised

**6072 Quantitative Decision Making**

*points value:* 3                      *availability:* not offered in 1996

*prerequisite:* 1348 Quantitative Methods

*contact hours:* 1 three hour seminar a week

*content:* this subject provides an introduction to and practice in the use of methods for quantitative decision making such as forecasting and statistical decision analysis, computer simulation, production systems, including TQM and JIT expert systems, non-linear optimisation, and large scale model building.

The elective does not require mathematical or computer programming skills, although some familiarity would be an advantage. It will involve computer use.

*assessment:* to be advised

**6461 Services Marketing**

*points value:* 3                      *availability:* not offered in 1996

*contact hours:* 1 three hour seminar a week

*prerequisites:* 9408 Marketing Principles

*content:* this subject is designed to provide the student with an understanding of the key concepts that lead to the effective marketing of services and to develop skills in preparing a service marketing plan. To accomplish this, the course uses a combination of lectures, class participation, case discussions, and a group project. A major component is the services marketing project which provides students with the opportunity to prepare a marketing plan for a new or existing service.

*assessment:* project, written assignments, class participation, final exam

**1923 Supervised Project Work (1)**

*points value:* 6

*duration:* to be completed consecutively over trimesters 1 & 2

*prerequisite:* all compulsory core subjects

*content:* detailed written instructions on approval of a suitable topic, conduct of the research and preparation of the Report will be issued to all students enrolling in this subject.

**7938 Supervised Project Work (3)**

*points value:* 6                      *availability:* not offered in 1996

*prerequisite:* all compulsory core subjects *content:* Detailed written instructions on approval of a suitable topic, conduct of the research and preparation of the Report will be issued to all students enrolling in this subject.

**9328 Topics in Business Law**

*points value:* 3                      *duration:* not offered in 1996

*prerequisites:* 3564 Business Law

*contact hours:* 1 three hour seminar a week

*content:* this subject covers specific aspects of law affecting management such as the structure of business, franchising, protection of intellectual property, importing and exporting, debt, contracts, sales tax and finance.

*assessment:* to be advised

**4405 Topics in Finance**

*points value:* 3                      *availability:* not offered in 1996

*contact hours:* 1 three hour seminar a week

*prerequisite:* 8143 advanced Managerial Finance

*content:* this subject provides a means of examining topics that are typically related to the teaching and research interest of staff. Students can expect an in-depth analysis of specific topics in finance. Topics offered could include investments, issues in banking and finance, liability management, mergers and takeovers, and the theory of finance.

*assessment:* assignments; case studies; presentations

### **1636 Topics in Management**

*points value:* 3

*duration:* trimester 2

*contact hours:* 1 three hour lecture each week

*content:* this subject provides a means of examining topics that are typically related to the teaching and research interests of staff. Students can expect an in-depth analysis of specific issues designed to broaden understanding of contemporary management. Topics offered could include such issues as impact on recent legislations on organisations, the privatisation of public sector organisations, the impact of the economy on the management of organisations and production management.

*assessment:* to be advised

### **9972 Workplace Relations**

*points value:* 6

*availability:* not offered in 1996

*prerequisite:* 5367 Organisational Behaviour; 5356 Human Resource Management

*contact hours:* 1 three hour seminar a week

*content:* the subject will focus on the management of employment relations at enterprise and workplace levels. A comparative approach will be taken to the study of the workplace. Initial attention will be devoted to discussing theoretical frameworks for examining workplace employers, employees, governments and unions in seeking to shape such relationships. Case studies of particular workplaces will enable students to examine the factors influencing such issues as equity in opportunity and reward; the management of occupational health and safety; work organisation; trade unionism and employee involvement in decision making. Particular attention will be given to the evolution of enterprise based bargaining in Australia.

*assessment:* essay; class presentation; case study analysis

## Master of Economics

The following award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar. As all students must comply with these rules, students are advised to refer to them to gain an understanding of their rights and responsibilities with regard to course matters.

### Specific Course Rules

#### 1 Admission requirements

1.1 The Faculty may accept as a candidate for the degree any graduate who:

- (a) has qualified for the degree Bachelor of Economics with First or Second-class Honours of The University of Adelaide; or
- (b) has qualified for an Honours degree of another university, which degree the Faculty regards as being equivalent to a First or Second-Class Honours degree in Economics of The University of Adelaide; or
- (c) has qualified for the Graduate Diploma in Advanced Economics or the Graduate Diploma in Applied Economics or the Graduate Diploma in Economics of The University of Adelaide, or its equivalent from another University, at a standard deemed by the Faculty to be sufficient for admission to the course for the degree of Master of Economics.

1.2 Subject to the approval of the Board of Graduate Studies, the Faculty may, in special cases and subject to such conditions (if any) as it may see fit to impose in each case, accept as a candidate for the degree a person who, irrespective of whether or not the candidate is a university graduate, has given evidence satisfactory to the Faculty of fitness to undertake work for the degree.

#### 2 Duration of course

- 2.1
- (a) Except by special permission of the Faculty, the work of the degree for a full-time candidate shall be completed in not less than one year and not more than three years from the date of candidature accepted by the Faculty.
  - (b) Except by special permission of the faculty, the work of the degree for a part-time candidate shall be completed in not less than two years and not more than six years from the date of candidature accepted by the Faculty.

#### 3 Qualification requirements

3.1 A candidate may qualify for the degree by satisfactorily completing an approved program of research work on an approved topic and submitting a satisfactory thesis thereon; or

3.2 (a) A person who wishes to become a candidate for the degree shall apply to the Dean indicating in general terms the subject of any research work to be undertaken, and where applicable, his or her proposed course of study for examination.

(b) If a person is accepted as a candidate for the degree, the Faculty shall appoint a supervisor or supervisors to guide that person in his or her work.

3.3 (a) Each candidate shall complete a structured program of activities within the first six months from commencement of candidature.

(b) Such activities will be determined by the Department of Economics. They will include the completion and the presentation of a detailed research proposal and other courses or skills training deemed necessary by the department concerned.

(c) At the completion of the structured program, each candidate shall submit to the Board an outline of the proposed research in such form as the Board may prescribe.

#### 4 Review of academic progress

4.1 A candidate's progress shall be reviewed by the Faculty at the end of each academic year. If in the opinion of the Faculty of Economics and Commerce, a candidate is not making satisfactory progress the Faculty may, with the consent of the Council, withdraw its approval of the candidature and the candidate shall cease to be enrolled for the degree.

## 5 Submission of thesis

5.1 On completion of the work, the candidate shall lodge with the Registrar three copies of the thesis or dissertation prepared in accordance with the directions given to candidates in the leaflet 'Guidelines on Higher Degrees by Research and Specifications for Thesis'. Refer to the Guidelines on Higher Degrees by Research and Specifications for Thesis in this volume.

## 6 Examination of thesis

6.1 The Faculty shall appoint examiners (at least one of whom is external to The University of Adelaide) to report upon the thesis. The examiners shall report to the Faculty and may recommend:

- (a) that the thesis or dissertation be accepted as satisfactory for the purposes of 3.1 and the relevant rules, as appropriate; or
- (b) that the thesis or dissertation be returned to the candidate for revision and resubmission; or
- (c) that the thesis or dissertation be not accepted.

## 7 General

7.1 A candidate for the degree of Doctor of Philosophy whose work is considered by the Faculty to be not of sufficient merit may be awarded the degree of Master of Economics.

## Master of Economics (Coursework)

The following award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar.

As all students must comply with these rules, students are advised to refer to them to gain an understanding of their rights and responsibilities with regard to course matters.

### Specific Course Rules

#### 1 Admission requirements

1.1 The Faculty may accept as a candidate for the degree any graduate who:

- (a) has qualified for the degree Bachelor of Economics with First or Second-Class Honours of The University of Adelaide; or
- (b) has qualified for an Honours degree of another university, which degree the Faculty regards as being equivalent to a First or Second-Class Honours degree in Economics of The University of Adelaide; or
- (c) has qualified for the Graduate Diploma in Advanced Economics or the Graduate Diploma in Applied Economics or the Graduate Diploma in Economics of The University of Adelaide, or its equivalent from another University, at a standard deemed by the Faculty to be sufficient for admission to the course for the degree of Master of Economics.

1.2 Subject to the approval of the Board of Graduate Studies Faculty may, in special cases and subject to such conditions (if any) as it may see fit to impose in each case, accept as a candidate for the degree a person who, irrespective of whether or not the candidate is a university graduate, has given evidence satisfactory to the Faculty of fitness to undertake work for the degree.

#### 2 Qualification requirements

2.1 A candidate may qualify for the degree by.

- (i) passing an examination set after completion of an approved course of postgraduate study; and
- (ii) satisfactorily completing an approved program of research work on an approved topic and submitting a satisfactory dissertation thereon.

2.2 (a) A person who wishes to become a candidate for the degree shall apply to the Dean indicating in general terms the subject of any research work to be undertaken, and where applicable, his or her proposed course of study for examination.

(b) If a person is accepted as a candidate for the degree, the Faculty shall appoint a supervisor to guide that person in his or her work.

#### 3 Review of academic progress

3.1 A candidate's progress shall be reviewed by the Faculty at the end of each examination period and academic year. If in the opinion of the Faculty of Economics and Commerce, a candidate is not making satisfactory progress the Faculty may, with the consent of the Council, withdraw its approval of the candidature and the candidate shall cease to be enrolled for the degree.

#### 4 Assessment and examinations

4.1 On completion of the work, the candidate shall lodge with the Faculty three copies of the thesis or dissertation prepared in accordance with the directions given to candidates in the leaflet 'Guidelines on Higher Degrees by Research and Specifications for Thesis'. Refer to the Guidelines on Higher Degrees by Research and Specifications for Thesis in this volume.

4.2 Results of those who pass in any of the subjects shall be published within the following classifications: High Distinction, Distinction, Credit, Pass.

4.3 To satisfy the coursework component of the degree, a candidate must pass each of the prescribed subjects and obtain an average equivalent to a credit or better.

## 5 Course of study and project work

To qualify for the degree of Master of Economics (Coursework), the candidate shall complete satisfactorily a course of study which shall comprise 36 points as follows:

- 5.1 (a) one subject each from two core fields (each at 4 point value)
- (i) Microeconomics
  - (ii) International and Development Economics
- (b) One of the following quantitative subjects:
- |                                |   |
|--------------------------------|---|
| 9952 Applied Econometrics IIIA | 4 |
| 7589 Econometric Theory IIIA   | 4 |
| 2341 Econometrics (H)          | 4 |
- (c) up to three other subjects as electives.

The core and the elective subjects will be chosen from the following list.\*

\*The precise number of subjects to be offered in any one year will be depend upon staff availability and student demand, and subject to such quotas as may need to be imposed.

2341 Econometrics (H)	4
9712 Economic Development (H)	4
7446 Economic Growth and Agriculture (H)	4
8336 Economics of Public Policy (H)	4
5605 Environment and Development (H)	4
2936 Experimental Economics (H)	4
5454 History of Economic Thought (H)	4
2683 Industrial Organisation (H)	4
6677 International Banking and Finance (H)	4
6747 International Financial Issues (H)	4
6692 International Trade (H)	4
4054 Labour Economics (H)	4
6670 Long Run Growth (H)	4
7264 Macroeconomics A (H)	4
9752 Macroeconomics (M)	4
3711 Microeconomics A (H)	4
9233 Microeconomics (M)	4
2275 Mathematical Economics (H)	4
4761 Monetary Economics (H)	4
3393 Money (H)	4

8053 Public Economics (H)	4
5706 Regional Economics (H)	4
3782 Socialist Economies in Transition (H)	4
3634 Special Topics (H)	4
2652 Trade and Development	4
1294 Transport and Urban Economies (H)	4
(d) Supervised Research Program and Dissertation thereon.	
7845 Master of Economics Dissertation A	20
or	
3224 Master of Economics Dissertation B	16
or	
6799 Master of Economics Dissertation C	12

5.2 No candidate will be permitted to count for the Master of Economics (Coursework) degree any subject that in the opinion of the Faculty contains substantially the same material as any subjects which he or she has already presented for another qualification, other than the Graduate Certificate of Economics or the Graduate Diplomas of Economics and then only upon their surrender.

5.3 Where a candidate has completed coursework which has not been presented for another qualification and which is deemed by the Faculty of Economics and Commerce to be equivalent to the subjects listed under 5.1, status may be granted up to a maximum of four such subjects.

5.4 In special circumstances, candidates may be given permission to substitute another subject for subjects listed in 5.1(a), 5.1(b) and 5.1(c) above.

## 6 General

6.1 A candidate's program of study must be approved by the Dean (or nominee) at enrolment each year.

6.2 Each candidate will be required to undertake during university vacations such studies as may be prescribed.

6.3 A candidate whose candidature is interrupted may re-enrol only with the approval of the Faculty and under such conditions as the Faculty may impose in each case.

## Syllabuses

### 7845 Master of Economics Dissertation A

*duration:* semester 1 or 2

*prerequisites:* as approved by the Postgraduate Coordinator of Economics

*content:* each student is to undertake an individual research project which exhibits original investigation analysis and interpretation. Approximate length of dissertation is 20,000 words

*assessment:* dissertation 100%

### 3224 Master of Economics Dissertation B

*duration:* semester 1 or 2

*prerequisites:* as approved by the Postgraduate Coordinator of Economics

*content:* each student is to undertake an individual research project which exhibits original investigation analysis and interpretation. Approximate length of dissertation is 16,000 words

*assessment:* dissertation 100%

### 6799 Master of Economics Dissertation C

*duration:* semester 1 or 2

*prerequisites:* as approved by the Postgraduate Coordinator of Economics

*content:* each student is to undertake an individual research project which exhibits original investigation analysis and interpretation. Approximate length of dissertation is 12,000 words

*assessment:* dissertation 100%

# Master of Commerce

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar.

As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

## Specific Course Rules

### 1 Admission requirements

- 1.1 A person who wishes to become a candidate for the degree shall apply to the Registrar indicating in general terms the subject of any research work to be undertaken.
- 1.2 The Faculty of Economics and Commerce may accept as a candidate for the degree of Master of Commerce any person who:
  - (a) has qualified for the degree of Bachelor of Commerce with First or Second-Class Honours at The University of Adelaide; or
  - (b) has qualified for another Honours degree which the Faculty regards as being equivalent to a First or Second-Class Honours degree in Commerce of The University of Adelaide.
- 1.3 Subject to the approval of the Board of Graduate Studies acting with authority wittingly devolved to it by Council the Faculty may, in special cases and subject to such conditions (if any) as it may see fit to impose in each case, accept as a candidate for the degree a person who, irrespective of whether or not the candidate is a university graduate, has given evidence satisfactory to the Faculty of fitness to undertake work for the degree.
  - (a) Before deciding such a person's fitness, the Faculty may, if it so desires, require him or her;
    - (i) to complete prescribed preliminary work and thereafter, or alternatively,
    - (ii) to complete a prescribed course of study and pass a qualifying examination of Honours standard.
  - (b) The form and assessment of any preliminary work and/or of any course of study shall be proposed by the Department of Commerce and approved by the Faculty.

### 2 General

- 2.1 Prior to acceptance as a candidate it will be necessary for the faculty to approve the applicant's suggested Supervisor.
- 2.2 The subject of any thesis shall be approved by the Department of Commerce and by the Faculty.

### 3 Qualification requirements

- 3.1 A candidate may qualify for the degree by satisfactorily completing an approved program of research work on an approved topic and submitting a satisfactory thesis thereon.

### 4 Duration of course

- 4.1 Except by special permission of the Faculty the work for the degree for a full-time candidate shall be completed in not less than one year and not more than three years from the date of candidature accepted by the Faculty.
- 4.2 Except by special permission of the Faculty, the work for the degree for a part-time candidate shall be completed in not less than two years and not more than six years from the date of candidature accepted by the Faculty.

### 5 Review of academic progress

- 5.1 A candidate's progress shall be reviewed by the Faculty at the end of each academic year. If, in the opinion of the Faculty of Economics and Commerce, a candidate is not making satisfactory progress the Faculty may, with the consent of the Council, withdraw its approval of his or her candidature and the candidate shall cease to be enrolled for the degree.

### 6 Assessment and examinations

- 6.1 On completion of the work, the candidate shall lodge with the Registrar three copies of the thesis prepared in accordance with the directions

given to candidates in the leaflet 'Guidelines on Higher Degrees by Research and Specifications for Thesis'.

**6.2** Assessment shall in every case be by not less than two examiners, of whom one at least shall be external to the University. The names of the examiners shall be proposed by the Department of Commerce and approved by the Faculty (the supervisor cannot be an examiner). The examiners shall report to the Faculty and may recommend:

- (a) that the thesis be accepted as satisfactory for the purposes of section 2 above; or
- (b) that the thesis be returned to the candidate for revision and resubmission; or
- (c) that the thesis be not accepted.

**6.3** A candidate who complies with all the foregoing conditions shall, on the recommendation of the Faculty of Economics and Commerce, be admitted to the degree of Master of Commerce.

# Master of Management (Leadership and Enterprise Development)

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar.

As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

## Specific Course Rules

### 1 Admission requirements

1.1 The Faculty may accept as a candidate for the degree any graduate who:

(a) has qualified for a degree of the University or for a degree of another institution accepted by the Faculty for the purpose as equivalent to a degree of this University;

(b) has had at least eight years relevant experience in business, public service or other field of employment approved by the Faculty and who has satisfied such other tests as the Faculty may prescribe.

1.2 Subject to the approval of the Board of Graduate Studies acting with authority wittingly devolved to it by Council, the Faculty may, in special cases and subject to such conditions (if any) as it may see fit to impose in each case, accept as a candidate for the degree a person who, irrespective of whether or not the candidate is a university graduate, has given evidence satisfactorily to the Faculty of fitness to undertake work for the degree.

1.3 The Faculty may require an applicant to complete such additional preliminary work as it may prescribe before he or she is accepted as a candidate for the degree.

### 2 Duration of course

2.1 Except by special permission of the Faculty, the work of the degree shall be completed in not less than five trimesters and not more than three years from the date of candidature accepted by the Faculty.

2.2 A candidate whose candidature is interrupted may re-enrol only with the approval of the Faculty and under such conditions as the Faculty may impose in each case.

### 3 Assessment and examinations

3.1 Results of those who pass in any of the subjects, except 2141 Organisational Transformation shall be published within the following classifications: High Distinction, Distinction, Credit, Pass Division 1, and Pass Division 2. Results of those who pass in the subject 2141 Organisational Transformation shall be published as Non-graded Pass.

### 4 Review of academic progress

4.1 A candidate's progress shall be reviewed by the Faculty at the end of each trimester. If in the opinion of the Faculty of Economics and Commerce, a candidate is not making satisfactory progress the Faculty may, with the consent of the Council withdraw its approval of the candidature and the candidate shall cease to be enrolled for the degree.

### 5 Subjects of study

5.1 To qualify for the degree of Master of Management (Leadership and Enterprise Development), the candidate shall complete satisfactorily a course of study which shall involve twelve subjects (48 points) comprising:

7172 Asian Business Development	3
4095 Business Strategy	6
7544 Corporate Best Practice	3
9069 Developing Leadership Skills	2
6834 Developments in International Business	3
2635 Diagnostic Analysis and Development	3
3030 High Performance Management	3
4132 Implementing Strategic Leadership	12
5737 Managing the Change Process	3
2811 Organisational Diagnosis	3

2753 Organisational Leadership 3

2141 Organisational Transformation 4

5.2 No candidate will be permitted to count for the Master of Management degree any subject that in the opinion of the Faculty contains substantially the same material as any subjects which he or she has already presented for another qualification.

5.3 In special circumstances, candidates may be given permission to substitute another subject for subjects listed in 5.1 above.

5.4 A candidate's program of study must be approved by the Dean (or nominee) at enrolment each trimester.

5.5 Each candidate will be required to undertake during University vacations such studies as may be prescribed.

5.6 A candidate who complies with all the foregoing conditions shall, on the recommendation of the Faculty, be admitted to the degree.

## 6 Status, exemption and credit transfer

6.1 A candidate who has passed subjects in other Faculties of the University or in other educational institutions may, on written application to the Faculty, be granted such exemptions from the requirements of these Specific Course Rules as the Faculty shall determine. Status may be granted for a maximum of six points under 5.1 of the Specific Course Rules.

6.2 Where a candidate has completed coursework elsewhere which is deemed by the Faculty to be equivalent to the core subjects listed under 5.1 above, status may be granted up to a maximum of six points.

## Syllabuses

### 7172 Asian Business Development

*points value:* 3      *duration:* consult Department

*prerequisite:* 2635 Diagnostic Analysis and Development

*contact hours:* 26

*content:* this subject will introduce participants to the political, cultural, economic and business characteristics of selected Asian countries. Participants will undertake an organised visit to Asia, be required to identify a business opportunity for their organisation, and to submit a plan to develop this opportunity to achieve a desired outcome.

*assessment:* completion of class project (40%); submission of individual assignment (60%)

### 4095 Business Strategy

*points value:* 6      *duration:* consult Department

*prerequisite:* 7544 Corporate Best Practice

*contact hours:* 78

*content:* building on concepts introduced in previous subjects in this program, this subject focuses on the development of future strategies for an organisation within a global context. The purpose of this subject is to integrate and apply in a broad international context the concepts of leadership and enterprise development previously introduced. In the process a range of analytical tools and techniques will be considered that are useful in strategic planning. The subject will also cover a range of strategic outcomes, their advantages and disadvantages, and consider the difficulties of international expansion.

*assessment:* classroom participation (15%); case study (15%); company-based report (70%)

### 7544 Corporate Best Practice

*points value:* 3      *duration:* consult Department

*prerequisite:* 2635 Diagnostic Analysis and Development

*contact hours:* 39

*content:* participants will examine a range of international companies renowned for their leadership and success in various aspects of business.

*assessment:* completion of a field survey report

### 6834 Developments in International Business

*level:* Postgraduate

*points value:* 3

*duration:* consult Department

*contact hours:* 39

*content:* the 'new competition' — a critical review of management theories: their basis in economics and international competition and the way they have evolved; the current state of strategic management thinking and practice; and the trends and events influencing the international context in which Australian businesses will be competing. Participants will gain an understanding of the necessity of replacing hierarchical, bureaucratic organisations with flexible, responsive structures and the implications of this for business leaders.

*assessment:* class projects (50%); individual assignments (50%)

### 9069 Developing Leadership Skills

*points value:* 2      *duration:* consult Department

*prerequisite:* 2753 Organisational Leadership

*contact hours:* 26

*content:* this subject will involve the development of an objective assessment of participants across a tested range of leadership competencies, with emphasis on leadership strengths. An opportunity profile will be derived which can be used as the basis for further personal development. Through personal experience, participants will also learn how to recognise leadership skills in others in their organisations and develop effective plans to develop such skills further.

*assessment:* submission of a research report

### 2635 Diagnostic Analysis and Development

*points value:* 3      *duration:* consult Department

*prerequisite:* 2811 Organisational Diagnosis

*contact hours:* 39

*content:* this subject is project based. Participants will be required to develop and present a diagnosis of their organisation using the principles and techniques introduced in the Organisational Diagnosis subject.

*assessment:* submission of research report

### 3030 High Performance Management

*points value:* 3      *duration:* consult Department

*prerequisite:* 9069 Developing Leadership Skills

*contact hours:* 39

*content:* this subject will enable participants to gain an understanding of the implications and differences arising in implementing effective leadership. The subject will discuss a range of issues including organisation structure; team based approach to

management; benchmarking; vision lead strategy; the role of leadership in developing high performance outcomes; and likely difficulties encountered in implementing strategy. Case studies of companies who have been successful and unsuccessful in these areas will be examined.

*assessment:* submission of essay (40%); individual projects (60%)

### **4132 Implementing Strategic Leadership**

*points value:* 12      *duration:* consult Department

*prerequisite:* all other subjects for the Master of Management (Leadership and Enterprise Development)

*content:* participants will be required to research, present and submit a strategic business plan for the development of their organisation. This project will proceed under the supervision of a member of the academic staff of the Graduate School of Management. Students will be required to report on progress at small group meetings, and to complete sessions on business research skills and research project management.

*assessment:* submission of a major business project

### **5737 Managing the Change Process**

*points value:* 3      *duration:* consult Department

*prerequisite:* 2141 Organisational Transformation

*contact hours:* 26

*content:* this subject is concerned with the implementation and management of a process of change within an organisation. The subject will cover the management of change at the corporate, divisional and local levels, and derive a set of practical guidelines on the successful management of the change process.

*assessment:* class participation (20%); written case studies (25%); final exam (55%)

### **2811 Organisational Diagnosis**

*level:* Postgraduate      *points value:* 3

*duration:* consult Department

*prerequisite:* 6834 Developments in International Business

*contact hours:* 39

*content:* the internationalisation and increasing competitiveness of most industries and advances in technology means that the operations must be fundamentally redesigned if organisations are to be competitive. This subject gives a detailed and pragmatic account of the principles and techniques used to increase the effectiveness of process flows within a wide range of businesses.

Topics include: principles of re-engineering; just in time inventory control; total quality management; activity-based costing; 'talk a walk' assignment and case studies and diagnostic exercises.

*assessment:* individual assessment of compulsory practical exercises and case studies (60%); a 2 hour final exam (40%)

### **2753 Organisational Leadership**

*level:* Postgraduate      *points value:* 3

*duration:* consult Department

*contact hours:* 39

*content:* this subject is designed to enable managers to derive an objective view of their leadership competencies, based upon the use of a range of psychometric instruments and feedback. This process will focus on skills in the areas of: facilitating; mentoring; influencing; empowering and challenging; deciding; networking and learning. This subject will assist each participant to develop a profile of strengths and opportunities for further personal development.

*assessment:* series of compulsory exercises (40%); a research paper (60%)

### **2141 Organisational Transformation**

*points value:* 4      *duration:* consult Department

*prerequisite:* 2753 Organisational Leadership

*contact hours:* 52

*content:* this subject changes the conventional concepts of leadership in order to enable managers and their organisations to compete effectively in a complex and changing business environment. Participants will examine the critical differences between management and leadership; the invisible practices of exemplary leaders; the differences between incremental and transformational change; strategies for developing and implementing a vision, and building a committed management team.

*assessment:* classroom participation (50%); submission of assignment (50%)

# Faculty of Engineering

## Regulations

### Of Awards in the Faculty of Engineering

- 1 In the Faculty of Engineering there shall be the following awards:

Bachelor of Engineering  
(Chemical Engineering)

Bachelor of Engineering  
(Civil Engineering)

Bachelor of Engineering  
(Civil and Environmental Engineering)

Bachelor of Engineering  
(Computer Systems Engineering)

Bachelor of Engineering  
(Electrical and Electronic Engineering)

Bachelor of Engineering  
(Information Technology and Telecommunications)\*

Bachelor of Engineering  
(Mechanical Engineering)

Graduate Certificate in Business Enterprise\*

Graduate Certificate in Engineering  
(Environmental Engineering)

Graduate Certificate in Engineering  
(Hydrology and Water Resources)

Graduate Certificate in Engineering  
(Signal Processing)

Master of Applied Science

Master of Applied Science  
in Hydrology and Water Resources

Master of Applied Science  
in Materials Welding and Joining

Master of Engineering

Master of Engineering (Information Technology and Telecommunications)\*

Master of Engineering Science

Master of Engineering Science  
in Hydrology and Water Resources

Master of Engineering Science  
in Materials Welding and Joining

Graduate Diploma  
in Computer Systems Engineering

Graduate Diploma in Engineering  
(Environmental Engineering)

Graduate Diploma in Engineering  
(Materials Welding and Joining)

Graduate Diploma in Business Enterprise

- 2 The courses for the awards listed in Regulation 1 shall be governed by the General Course Rules and Specific Course Rules that the Council shall prescribe from time to time.
- 3 The syllabuses of subjects shall be specified by the Council.

Regulations effective from 1 August 1994.

Regulations amended 23 February 1995.

\*Awaiting approval and confirmation.

notes not forming part of the Regulations

- 1 Council has delegated the power to approve minor changes to the General Course Rules to the Deputy Vice-Chancellor (Academic).
- 2 Council has delegated the power to approve minor changes to the Specific Course Rules to the Deans of Faculties.
- 3 Council has delegated the power to specify syllabuses to the Head of each department or centre concerned, such syllabuses to be subject to approval by the Faculty or by the Dean on behalf of the Faculty. The Head of department or centre may approve minor changes to any previously approved syllabus.
- 4 The Faculty also offers a Doctor of Engineering (D.E.). Higher doctorates are governed by their own sets of Regulations as printed in this volume of the Calendar.

## Bachelor of Engineering

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar.

As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

### Specific Course Rules

---

#### 1 General

- 1.1 The degree of Bachelor of Engineering may be awarded in the Pass or Honours grade.
- 1.2 The award of the Honours grade shall be made for meritorious performance in the course with greatest weight given to performance in the later years.
- 1.3 The Honours grade may be awarded in one of the following classifications: First Class, Second Class Division A, Second Class Division B.

#### 2 Qualification requirements

- 2.1 A candidate shall regularly attend lectures and do written, laboratory, and other practical work (where such is required), and pass examinations in the subjects prescribed for one of the following Engineering courses:
  - (a) Chemical Engineering;
  - (b) Civil Engineering;
  - (c) Civil and Environmental Engineering;
  - (d) Computer Systems Engineering;
  - (e) Electrical and Electronic Engineering;
  - (f) Information Technology and Telecommunications
  - (g) Mechanical Engineering.
- 2.2 Before being admitted to the degree a candidate shall also submit satisfactory evidence of completion of a period of practical experience in work approved by the Faculty of Engineering as appropriate to the course which the candidate has followed.

#### 3 Assessment and examinations

- 3.1 A candidate shall not be eligible to attend for examination unless the prescribed work has been completed to the satisfaction of the teaching staff concerned. A candidate who is not eligible to attend for examination shall be deemed to have failed the examination.

- 3.2 In determining a candidate's final result in a subject (or part of a subject) the examiners may take into account oral, written, practical and examination work, provided that the candidate has been given adequate notice of the way in which work will be taken into account and of its relative importance in the final result.
- 3.3 There shall be four classifications of pass at an annual examination in any subject for the degree, as follows: Pass with High Distinction, Pass with Distinction, Pass with Credit, Pass. If the pass list be published in two divisions, a pass in the higher division may be prescribed as a prerequisite for admission to other subjects. There shall also be a classification of Conceded Pass. A candidate may present for the degree subjects for which a conceded pass grade has been awarded within the following limits:
  - (a) subjects at Level II or above with an aggregate points value not exceeding 6 points; and
  - (b) up to two Level I subjects worth 1.5 points taught by departments in the Faculty of Engineering.
- 3.4 A candidate who fails to pass in any subject shall again attend lectures and do practical work in that subject to the satisfaction of the teaching staff concerned, unless exempted by the Faculty of Engineering. Any such exemption shall hold for one academic year only.
- 3.5 No candidate shall be granted exemption from attendance at lectures or practical work in any subject, except upon grounds approved by the Council.
- 3.6 A candidate who has twice failed to pass the examination in any subject or division of a subject may not present again for instruction or examination therein unless the candidate's plan of study is approved by the Dean. If the candidate fails a third time the candidate may not proceed with the subject again except by special permission of the Faculty, and under such conditions as the Faculty may prescribe.

For the purpose of this Rule a candidate who is refused permission to sit for examination in any subject or division of a subject shall be deemed to have failed to pass the examination.

#### 4 Course of study

The courses shall occupy four years of full-time study. Details of these courses are set out in 7–12 below.

#### 5 Completion of subjects

It is not necessary for a candidate to take all the subjects of any one level simultaneously or to complete all the subjects set out for one level before enrolling for any subject of the following level provided that the prerequisite subjects have been passed. However a candidate who desires to take a Level III subject before completing all Level I subjects, or a Level IV subject before completing all Level II subjects, must obtain the permission of the Faculty.

note: Under the terms of Clause 4C of Chapter XXV of the Statutes, the Faculty of Engineering may review the academic progress of any candidate in circumstances where the following conditions apply:

**(a) Candidates not previously enrolled in a different course.**

Candidates who, on account of failure and/or Division II passes (where Division I passes are required) in subjects prescribed for an engineering course, have not completed or will not complete all the subjects prescribed for the first two years of their course for the degree of Bachelor of Engineering by the end of their third year of full-time study for the course (or, in the case of part-time candidates, by the end of an equivalent period).

**(b) Candidates previously enrolled in a different course**

A candidate who transferred from another Faculty will be subject to the same conditions as candidates enrolled in the Faculty for the first time. Any previous studies which are to be counted towards the Engineering degree will be treated as part of the candidate's study for the Engineering course for Clause 4C purposes.

Depending on the circumstances, the Faculty may recommend to the Council that a candidate be refused permission to enrol in the next ensuing academic year or be precluded from taking further studies in the course.

#### 6 Approval of subjects

During the enrolment period before the beginning of each academic year, candidates must obtain the approval of the Dean or nominee of the Faculty of Engineering to enrol for the subjects they wish to study. The Dean or nominee, in exceptional circumstances, may approve minor variations to the subject completion requirements of individual candidates.

notes

1. Cooperative Education for Enterprise Development (CEED) program

All departments in the Faculty participate in the Cooperative Education for Enterprise Development (CEED) Program, whereby students in their third year can apply to work on advertised industry projects. Selected students then undertake a CEED Methodology subject in the second semester of Level III followed by an eight week placement in the client company over the long vacation, before undertaking a significant industry-based project as part of the requirements for level IV.

The Faculty of Engineering has agreed that students selected for the CEED Program may present a pass in the CEED Methodology subject in lieu of a specific Level III subject. This subject varies depending on the course in which the student is enrolled and details may be sought from the Department concerned. Similarly, the CEED project may be presented to satisfy the project requirement of Level IV. In each case, approval for students selected for the CEED program to vary the subject completion requirements of their course may be granted on the recommendation of the relevant Head of Department.

2. A candidate who obtains a Pass division II in 9786 Mathematics I may fulfil the prerequisite requirements for the level II Applied Mathematics subjects by obtaining a Pass Division I in 9595 Mathematics IIM. With the approval of the Dean or nominee, students may be permitted to enrol concurrently in 9595 Mathematics IIM and level II Applied Mathematics subjects. Note that 9595 Mathematics IIM is additional to the other requirements for the engineering degree.

#### 7 Combined Courses

It is possible for students to enhance their engineering qualification by combining studies in Engineering with studies in other Faculties. The current options are:

**1 Bachelor of Engineering and Bachelor of Laws - B.E./LLB**

It is possible for students in the Chemical Engineering course to elect to complete both the Bachelor of Engineering and Bachelor of Laws degrees in a total of six years of full-time study by taking some overload, provided they are accepted into the LLB course. Students wishing to pursue this program of study may apply for admission to the LLB course after they have completed at least one equivalent full-time year of the Chemical Engineering course. For further details, see the Notes entitled "Law studies within the B.E. (Chem) Course" under Section 8 Chemical Engineering.

**2 Bachelor of Engineering and Bachelor of Science - B.E./B.Sc.**

Chemical, Computer Systems and Electrical and Electronic Engineering students may intermit their Engineering studies for a year to undertake additional studies in the Faculty of Science (or in the case of Computer Systems or Electrical and Electronic Engineering students, alternatively in the Faculty of Mathematical and Computer Sciences) in order to qualify for the degree of Bachelor of Science. For further details (including application procedures), see the Notes under Section 8 Chemical Engineering, 11 Computer Systems Engineering and 12 Electrical and Electronic Engineering.

**3 Bachelor of Engineering and Bachelor of Arts - B.E./B.A.**

This is a combined course administered by the Faculty of Engineering and available to students undertaking any of the Engineering courses. Students accepted into the course may qualify for the award of the degrees of Bachelor of Engineering and Bachelor of Arts in five years of combined full-time study in which the requirements of the degrees have been merged. In some cases, students will need to take an overload to complete the two degrees in five years. Students wishing to enrol in this course should apply to the Faculty of Engineering by 30 November of the year preceding their proposed entry. A quota will apply to the course.

Students who commence this course but subsequently do not wish to proceed with both areas of study revert to a single degree program with appropriate credit for subjects completed.

Students may transfer into the combined course after partially completing the requirements of either degree. This may, however, affect the time taken to complete the program. Such students should consult the Associate Dean (Undergraduate Matters) to discuss their course of studies.

**Program of Studies**

The broad requirements of the B.E./B.A. course are given below. The details of a particular student's program will depend upon the student's interests and the Arts subjects chosen. The order of subjects will need to take into

consideration any pre-requisite requirements and candidates will need to discuss their program of studies with both Engineering and Arts Course Advisers.

To qualify for the award of the degrees of B.E. and B.A., candidates are required to complete satisfactorily:

**(i) Engineering Component**

The Engineering component comprises all the requirements of the particular Bachelor of Engineering course except where credit is given for Arts subjects. For details of individual requirements, see the Notes under Sections 8-13 of these Specific Course Rules.

**(ii) Arts Component**

The Arts component comprises a minimum of 32 points of subjects offered by the Faculty of Arts as listed in Sections 8.1, 8.5 and 8.9 of the Specific Course Rules for the degree of Bachelor of Arts, including an approved major sequence.

The major sequence of 26 points should comprise

6 points at level I (one full-year subject or two semester subjects);

8 points at level II (one full-year subject or two semester subjects);

12 points at level III (one full-year subject or two semester subjects)

in an approved discipline offered by the Faculty of Arts.

The remaining 6 points (1 full-year subject or two semester subjects) should be selected from another discipline or disciplines offered by the Faculty of Arts.

**Honours**

In the Engineering component, Honours are awarded for meritorious performance in the course (taken over the Engineering subjects only). In the Arts component, the award of Honours requires one further year of study devoted exclusively to the Honours subject. Students wishing to gain a degree at Honours level in Arts should consult the Faculty of Arts for further details.

**8 Chemical Engineering**

Candidates are required to complete satisfactorily subjects to the value of 24 points at each of Levels I, II, III and IV.

code	subject title	points
------	---------------	--------

**Level I**

6878	Chemistry I	6
9167	Design Graphics	1.5
2391	Dynamics	1.5
6714	Electrical Systems	1.5
5729	Engineering Computing I	1.5
2853	Engineering Planning and Design	1.5
6866	Materials I	1.5
9786	Mathematics I	6
3018	Process Systems	1.5
6581	Statics	1.5

**Level II**

8845	Chemical Engineering Projects II(N)	2
3798	Chemical Engineering Thermodynamics***	2
6283	Chemical Process Principles II	3
9653	Chemistry IIE	8
1016	Differential Equations and Fourier Series E	2
8601	Introductory Process Fluid Mechanics	2
4569	Laplace Transforms and Probability and Statistical Methods	2
7543	Process Heat Transfer	1.5
2879	Stress Analysis C	1.5
2187	Vector Analysis and Complex Analysis	2

**Law subjects\*\*\***

6019	Law and Legal Process	6
3731	Contract	6

note: A candidate who has completed Level II of the Chemical Engineering course and who wishes to qualify for the B.Sc. and B.E. degrees concurrently is recommended to undertake one year of full-time study within the Faculty of Science to qualify for the degree of Bachelor of Science, before proceeding to further studies within the Faculty of Engineering. A student who wishes to do this is required to submit an application for admission to the Science degree course through the South Australian Tertiary Admissions Centre.

**Level III**

3824	Chemical Engineering Projects III	4
5815	Electrical Circuits and Machines	1.5
9816	Fluid and Particle Mechanics	3
8462	Kinetics and Reactor Design	2.5
7738	Materials III(C)	1.5
1345	Mechanism Design	1.5
8310	Process Control and Instrumentation	2.5
8083	Process Design	1
8415	Seminar	1
5578	Separation Processes	2
6020	Special Studies III	1.5
5909	Transport Phenomena	2

**Law subjects\*\*\***

8433	Constitutional Law	6
9365	Torts	6

**Level IV**

2932	Advanced Separation Techniques and Thermal Processes	2
4459	Chemical Engineering Laboratory Projects IV	2
8014	Chemical Engineering Research Project	2
7348	Industrial Economics and Management	2
5058	Plant Design Project	6
1488	Process Dynamics and Control	2

**Law subjects\*\*\***

8821	Property	6
------	----------	---

\*\*\*These subjects are available only to students who have been admitted to the LL.B. course.

**electives\***

Four electives to be selected from the following list (With the approval of the Head of the Department of Chemical Engineering, subjects offered by other departments within the University may be included in the selection of electives):

2098	AI Applications in Engineering Design	2
6238	Advanced Materials Engineering	2
2532	Biochemical Engineering	2
4668	Biomedical Engineering	2

8723	Combustion Processes	2
9988	Environmental Engineering	2
5734	Hydrocarbon Reservoirs	2
9949	Industrial Rheology	2
1532	Minerals Processing	2
6856	Particulate Technology	2
9871	Plant and Safety Engineering	2
3324	Reaction Engineering	2
2088	Special Management Studies	2
1172	Special Studies in Chemical Engineering	2
1872	Thermal Process Synthesis and Integration	2

\*Not all subjects are offered each year. Information as to which subjects are to be offered in a given year will be available at the time of enrolment.

notes

**1 Law Studies within the B.E.(Chem) course**

- (a) Candidates who have gained a reserved place in Law studies on the basis of their SACE or equivalent results must, at the first attempt, successfully complete subjects to the value of 24 points at Level I of the B.E.(Chem) before being eligible to take up their place in Law studies.
- (b) Candidates who have successfully completed subjects to the value of 24 points at Level I of the B.E.(Chem) may apply for admission to Law Studies.
- (c) Candidates admitted under (a) or (b) above may count certain Law subjects towards both the degree of B.E. (Chem) and Law Studies. Candidates must apply for admission through the South Australian Tertiary Admissions Centre by September of their first year in the B.E. (Chem) course.
- (d) For candidates who wish to qualify for both the award of the degree of B.E. (Chem) and the award of the degree of LL.B., the following program of study is recommended:

**First Year**

All Level I subjects in the B.E.(Chem) course (total points: 24)

**Second Year**

6019	Law and Legal Process	6
8845	Chemical Engineering Projects II(N)	2
3798	Chemical Engineering Thermodynamics	2
6283	Chemical Process Principles II	3

3731	Contract	6
1016	Differential Equations and Fourier Series E	2
8601	Introductory Process Fluid Mechanics	2
4569	Laplace Transforms and Probability and Statistical Methods	2
7543	Process Heat Transfer	1.5
2187	Vector Analysis and Complex Analysis	2

**Third Year**

3824	Chemical Engineering Projects III	4
8433	Constitutional Law	6
9816	Fluid and Particle Mechanics	3
8462	Kinetics and Reactor Design	2.5
7738	Materials III(C)	1.5
8310	Process Control and Instrumentation	2.5
5578	Separation Processes	2
6020	Special Studies III	1.5
9365	Torts	6

**Fourth Year**

2932	Advanced Separation Techniques and Thermal Processes	2
4459	Chemical Engineering Laboratory Projects IV	2
8014	Chemical Engineering Research Project	2
9988	Environmental Engineering	2
7348	Industrial Economics and Management	2
5058	Plant Design Project	6
8821	Property	6

*either*

6238 Advanced Materials Engineering 2  
*or*

1488 Process Dynamics and Control 2  
note: To complete the B.E.(Chem) and LL.B. degree courses in minimum time, candidates are required to take all these subjects even though it involves an overload in Second and Third Year.

**Fifth and Sixth Year**

In accordance with LL.B. Specific Course Rules.

- (e) See also the Specific Course Rules of the LL.B. degree and see, in particular, the Introductory notes in the LL.B. Syllabuses.

## 2 Candidates transferring after completing a Science or Mathematical Science degree

A candidate who has completed the academic requirements for the degree of B.Sc. should consult the Head of the Department of Chemical Engineering before preparing an application to the Faculty of Engineering for appropriate status. Normally, acceptable candidates may proceed to the degree of B.E.(Chem.) by completing a further two-year program as specified by the Head of Department.

## 3 Arts Studies Combined with the B.E.(Chem)

To qualify for the award of the degrees of B.E.(Chem) and B.A. candidates are required to complete satisfactorily:

- (i) All the subjects for the Chemical Engineering course with the exception of the following subjects amounting to eight (8) points:
- |      |                                  |     |
|------|----------------------------------|-----|
| 2879 | Stress Analysis C                | 1.5 |
| 5815 | Electrical Circuits and Machines | 1.5 |
| 8415 | Seminar                          | 1   |
|      | Two Electives at Level IV        | 4   |
- (ii) The Arts requirements set out in Section 7 of these Specific Course Rules
- Thus the B.E.(Chem)/B.A. may be completed in five years of full-time study without any overload.

## 9 Civil Engineering

Candidates are required to complete satisfactorily subjects to the value of 24 points at each of Levels I, II, III and IV.

code	subject title	points
<b>Level I</b>		
7422	Chemistry IHE*	3
9167	Design Graphics	1.5
2391	Dynamics	1.5
6714	Electrical Systems	1.5
5729	Engineering Computing I	1.5
2853	Engineering Planning and Design	1.5
6866	Materials I	1.5
9786	Mathematics I	6
5599	Physics IHE*	3
3018	Process Systems	1.5
6581	Statics	1.5

\*With the approval of the Faculty a student may undertake the corresponding first-year science subject in place of this subject.

### Level II

3406	Civil Engineering Construction IIA	2
9290	Design of Structures II	4

1016	Differential Equations and Fourier Series E	2
3290	Geotechnical Engineering II	2
4569	Laplace Transforms and Probability and Statistical Methods	2
4760	Engineering Modelling and Analysis II	2
8077	Strength of Materials IIA	3
2187	Vector Analysis and Complex Analysis	2
5206	Water Engineering and Design II	3

and either

3147	Engineering Geology	2
------	---------------------	---

or, with the approval of the Head of Department,

7678	Transport processes in the Environment	2
------	--	---

note: 3147 Engineering Geology is a compulsory subject which should be taken in either Level II or Level III.

### Level III

4611	Environmental Engineering III	2
3127	Geotechnical Engineering Design III	3
9566	Engineering Management and Planning 2	
7455	Engineering Modelling and Analysis III 2	
4967	Structural Design III (Concrete)	3
6859	Structural Design III (Steel)	3
3718	Structural Mechanics IIIA	3
8227	Water Engineering and Design III	4

and one of the following subjects (or other suitable subjects with the approval of the Head of the Department):

either

3147	Engineering Geology	2
------	---------------------	---

or

7678	Transport Processes in the Environment	2
------	--	---

or

6790	Mechanical Design	2
------	-------------------	---

### Level IV

3797	Civil Engineering Design Project N	6
7185	Civil Engineering Management IV	2
1495	Civil Engineering Research Project N	6

and specialisation subjects to the value of ten points.

The specialisation subjects offered by the Department in any one year will depend on student interest and staff availability, and will be chosen from the following:

Group I: Structural Engineering		
8441	Advanced Steel Design	2
1130	Composite Steel and Concrete Construction	2
8849	Computer Methods of Structural Analysis	2
2414	Design of Concrete Structures	2
6437	Earthquake Engineering	2
4244	Finite Element Methods	2
6853	Special Topics in Structural Engineering IV	2

Group II: Water Engineering		
7643	Advanced Engineering Hydrology	2
9064	Advanced Flood Hydrology	2
7883	Advanced Stochastic Hydrology	2
1768	Advanced Tropical Hydrology	2
4719	Advanced Water Distribution Systems	2
6012	Advanced Water Engineering	2
5980	Advanced Water Resources Management	2
9506	Advanced Water Resources Planning	2
9043	Special Topics in Water Engineering IV	2

Group III: Geotechnical Engineering		
8641	Advanced Foundation Engineering	2
1335	Environmental Geomechanics	2
5175	Numerical Methods in Geomechanics	2
8449	Special Topics in Geotechnical Engineering IV	2

Group IV: Management Engineering		
5534	Advanced Engineering Management	2
9969	Special Topics in Management and Planning IV	2
9309	Systems Planning and Analysis	2

Group V: Environmental Engineering		
6648	Environmental Engineering IVA	2
4788	Environmental Engineering IVB	2
4338	Ground Water Resources and Contamination	2
8907	Special Topics in Environmental Engineering IV	2
8770	Waste Management	2

Group VI: Measurement		
2298	Engineering Surveying	2

Students must take a total of five specialisations, according to subject availability, and should take at least two subjects from the one group. The remaining subjects to make up ten points may be chosen from any of the Groups. In special circumstances other combinations of specialisation subjects may be acceptable, but must be approved by the Head of the Department of Civil and Environmental Engineering. Students may also, with the approval of the Head of Department of Civil and Environmental Engineering, replace one or more Departmental specialisation subjects with appropriate subjects offered by other departments within The University of Adelaide.

note:

**Arts studies combined with the B.E. (Civil)**

To qualify for the award of the degrees of B.E.(Civil) and B.A. candidates are required to complete satisfactorily:

- (i) All subjects for the Civil Engineering course with the exception of the following subjects amounting to seven (7) points:
 

6714	Electrical Systems	1.5
3018	Process Systems	1.5
7678	Transport Processes in the Environment	2
7455	Engineering Modelling and Analysis III	2
- (ii) The Arts requirements set out in Section 7 of these Specific Course Rules

Thus the B.E.(Civil)/B.A. may be completed in five years of full-time study with a 1 point overload.

## 10 Civil and Environmental Engineering

Candidates are required to complete satisfactorily subjects to the value of 24 points at each of Levels I, II, III and IV.

code	subject title	points
<b>Level I</b>		
7422	Chemistry IHE*	3
9167	Design Graphics	1.5
2391	Dynamics	1.5
6714	Electrical Systems	1.5
5729	Engineering Computing I	1.5
2853	Engineering Planning and Design	1.5
6866	Materials I	1.5
9786	Mathematics I	6
5599	Physics IHE*	3
3018	Process Systems	1.5
6581	Statics	1.5

\*With the approval of the Faculty a student may undertake the corresponding first year Science subject in place of this subject.

**Level II**

3406	Civil Engineering Construction IIA	2
1016	Differential Equations and Fourier Series E	2
3147	Engineering Geology	2
8954	Environmental Biology I	3
3290	Geotechnical Engineering II	2
5809	Introduction to Environmental Engineering	1.5
4569	Laplace Transforms and Probability and Statistical Methods	2
4760	Engineering Modelling and Analysis II	2
5740	Plant Ecology E	3
2879	Stress Analysis C	1.5
5206	Water Engineering and Design II	3

**Level III**

5631	Environmental Economics E	4
7606	Environmental Engineering and Design III	3
3127	Geotechnical Engineering Design III	3
9566	Engineering Management and Planning 2	
7455	Engineering Modelling and Analysis III 2	
7678	Transport Processes in the Environment 2	
8227	Water Engineering and Design III 4	
	<i>and either</i>	
1443	Environmental Geology II	4
	<i>or</i>	
9195	Microbiology II	4
	<i>or</i>	
7223	Ecosystem Modelling for Environmental Management	3
	<i>plus</i>	
9142	Introduction to Microbiology	1

**Level IV**

7185	Civil Engineering Management IV	2
6648	Environmental Engineering IVA	2
4788	Environmental Engineering IVB	2
1774	Environmental Engineering Research Project N	6
4659	Environmental Impact Assessment Project	4
1233	Introduction to Environmental Law	2

*and specialisation subjects to the value of six points.*

The specialisation subjects offered by the Department in any one year will depend on student interest and staff availability and will be chosen from the following:

**Water Engineering**

7643	Advanced Engineering Hydrology	2
9064	Advanced Flood Hydrology	2
7883	Advanced Stochastic Hydrology	2
1768	Advanced Tropical Hydrology	2
4719	Advanced Water Distribution Systems	2
6012	Advanced Water Engineering	2
5980	Advanced Water Resources Management	2
9506	Advanced Water Resources Planning	2
9043	Special Topics in Water Engineering IV	2

**Geotechnical Engineering**

8641	Advanced Foundation Engineering	2
1335	Environmental Geomechanics	2
5175	Numerical Methods in Geomechanics	2
8449	Special Topics in Geotechnical Engineering IV	2

**Management Engineering**

5534	Advanced Engineering Management	2
9969	Special Topics in Management and Planning IV	2
9309	Systems Planning and Analysis	2

**Environmental Engineering**

4338	Ground Water Resources and Contamination	2
8907	Special Topics in Environmental Engineering IV	2
1030	Wastewater Engineering*	2
8770	Waste Management	2

\*Offered by the Department of Chemical Engineering.

**Measurement**

2298	Engineering Surveying	2
------	-----------------------	---

Students may, with the approval of the Head of Civil and Environmental Engineering, replace one or more Departmental specialisation subjects with appropriate subjects offered by other departments within The University of Adelaide.

note:

**Arts studies combined with the B.E.(Civil and Environmental)**

To qualify for the award of the degrees of B.E.(Civil and Environmental) and B.A. candidates are required to complete satisfactorily:

- (i) All the subjects for the Civil and Environmental Engineering course with the exception of up to eight (8) points from the following subjects:
  - 6714 Electrical Systems 1.5
  - 6866 Materials 1 1.5
  - 5631 Environmental Economics E 4
  - either
  - 1433 Environmental Geology II 4
  - or
  - 9195 Microbiology II 4
- (ii) The Arts requirements set out in Section 7 of these Specific Course Rules.

Thus the B.E. (Civil and Environmental)B.A. may be completed in five years of full-time study without any overload.

**11 Computer Systems Engineering**

Candidates are required to complete satisfactorily subjects to a total value of 96 points as indicated below:

note: This course has been reviewed and changes are being implemented progressively. Full details of the new course can be obtained from the Department of Electrical and Electronic Engineering.

code	subject title	points
------	---------------	--------

**Level I**

9167	Design Graphics	1.5
2391	Dynamics	1.5
6714	Electrical Systems	1.5
4249	Electrical Systems B	2
2853	Engineering Planning and Design	1.5
1332	Engineering Programming IE	2.5
9663	Logic Design	1.5
3018	Process Systems*	1.5
9786	Mathematics I	6
5945	Physics IE	3
6581	Statics	1.5

\* This subject will be replaced by 4544 Engineering and Society (1.5 points) in 1997

**Level II**

9635	Circuit Analysis E	2
3239	Computer Systems E	2
5132	Data Structures and Algorithms	2

1016	Differential Equations and Fourier Series E	2
2772	Electronics IIE	2
8969	Experimental Electrical Engineering II	2
2733	Fields and Energy Conversion E	2
4569	Laplace Transforms and Probability and Statistical Methods	2

	6218 Machine Dynamics A	1
	1560 Advanced Control	1
<b>E</b>	<b>Project Work</b>	
	<i>compulsory subject</i>	
	2356 Project A	2
	7345 Project B	3
<b>F</b>	<b>Professional Practice</b>	
	<i>compulsory subject</i>	
	6341 Essays and Specialist Lectures	1
	4053 Management	2
	In addition, the subject 7286 Special Studies in Electrical Engineering (1 point) may be taken as an elective.	

\*\*Not all subjects are offered each year. Information as to which subjects are to be offered in a given year will be available from the department at the time of enrolment.

Computer Science subjects

Candidates are also required to pass the following two subjects offered by the Department of Computer Science:

2328 Computer Networks and Applications	2
6263 Software Engineering and Project	3

notes

- 1 A student who has completed Level III of the Computer Systems Engineering course, and who wishes concurrently to qualify for the degrees of B.E. and B.Sc. (in either the Faculty of Science or the Faculty of Mathematical and Computer Sciences), may undertake one year of full-time study (with some overload) in one of those Faculties at this stage before proceeding to further studies within the Faculty of Engineering. A student who wishes to do this is required to submit an application for admission to the Science or Mathematical Sciences degree course through the South Australian Tertiary Admissions Centre. Students are also advised to consult the Associate Dean (Undergraduate Matters) at the end of Level I to plan their course of studies.
- 2 Level III and Level IV subjects previously counted towards a degree of Bachelor of Science in the Faculties of Science or Mathematical and Computer Sciences may not be counted towards the degree of B.E. in Computer Systems Engineering. This may affect the subject choice for the B.Sc. degree.
- 3 See also note 3 under Electrical and Electronic Engineering regarding a major in Computer Science. Because Level III Computer Science subjects required for the B.E. in Computer Systems Engineering may not be presented towards a major in Computer Science, it is very difficult to major in computer science in combination with the B.E.(Comp.Sys.) degree.
- 4 Students wishing to proceed to the double degrees of Bachelor of Engineering and Bachelor of Science majoring in Physics are advised that a knowledge of 6051 Introductory Quantum Mechanics and Applications II is assumed.  
Further, the choice of Level III Physics options is greatly increased by a knowledge of 2656 Classical Mechanics II and 9600 Classical Fields and Mathematical Methods II. For additional details, see the Department of Physics and Mathematics Physics.
- 5 Arts studies combined with the B.E.(Computer Systems)  
To qualify for the award of the degrees of B.E. (Computer Systems) and B.A. candidates are required to complete satisfactorily:
  - (i) All the subjects for the Computer Systems Engineering course

- (ii) The Arts requirements set out in Section 7 of these Specific Course Rules

Thus the B.E.(Computer Systems)/B.A. may be completed in five years of full-time study with some overload.

## 12 Electrical and Electronic Engineering

Candidates are required to complete satisfactorily subjects to the value of 24 points at each of Levels I, II, III and IV.

note: This course has been reviewed and changes are being implemented progressively. Full details of the new course can be obtained from the Department of Electrical and Electronic Engineering.

code	subject title	points
------	---------------	--------

### Level I

9167	Design Graphics	1.5
2391	Dynamics	1.5
6714	Electrical Systems	1.5
4249	Electrical Systems B	2
2853	Engineering Planning and Design	2.5
1332	Engineering Programming IE	1.5
9663	Logic Design	1.5
3018	Process Systems*	1.5
9786	Mathematics I	6
5945	Physics IE	3
6581	Statics	1.5

\* This subject will be replaced by 4544 Engineering and Society (1.5 points) in 1997

### Level II

9635	Circuit Analysis E	2
5132	Data Structures and Algorithms	2
1016	Differential Equations and Fourier Series E	2
2772	Electronics IIE	2
8969	Experimental Electrical Engineering II	2
2733	Fields and Energy Conversion E	2
4569	Laplace Transforms and Probability and Statistical Methods	2
2653	Physics II	8
2187	Vector Analysis and Complex Analysis	2

2430	Programming Paradigms	2
3747	Stress Analysis (E)	1.5

### notes

- 1 A student who has completed Level III of the Electrical and Electronic course, and who wishes concurrently to qualify for the degrees of B.E. and B.Sc. (in either the Faculty of Science or the Faculty of Mathematical and Computer Sciences), may undertake one year of full-time study in one of those Faculties at this stage before proceeding to further studies within the Faculty of Engineering. A student who wishes to do this is required to submit an application for admission to the Science or Mathematical Sciences degree course through the South Australian Tertiary Admissions Centre.
- 2 Students wishing to proceed to the double degrees of Bachelor of Engineering and Bachelor of Science majoring in Physics are advised that the choice of level III Physics options is greatly increased by a knowledge of 2656 Classical Mechanics II and 9600 Classical Fields and Mathematical Methods II. For additional details see the Department of Physics and Mathematical Physics.
- 3 To major in Computer Science in the Faculty of Mathematical and Computer Sciences, a student must present passes (not conceded passes) in 3239 Computer Systems E and subjects offered by the Department of Computer Science at Level II to the value of 6 points and at level III to the value of 10 points. At least one subject must be from Group A below and at least one subject must be from Group B. Students who intend to take 9750 Honours Computer Science are referred to the statement on prerequisites for that subject (found under the Faculty of Mathematical and Computer Sciences).

#### Group A

5141	Computer Architecture
1234	Compiler Construction and Project
2328	Computer Networks and Applications
4468	Operating Systems

#### Group B

9811	Advanced Programming Paradigms
6378	Artificial Intelligence
9820	Numerical Analysis

- 2382 Programming Techniques
  - 1116 Systems Analysis
  - 6263 Software Engineering and Project
- 4 Arts studies combined with the B.E.(Electrical and Electronic)

To qualify for the award of the degrees of B.E. (Electrical and Electronic) and B.A. candidates are required to complete satisfactorily:

- (i) All the subjects for the Electrical and Electronic Engineering course
- (ii) The Arts requirements set out in Section 7 of these Specific Course Rules

Thus the B.E. (Electrical and Electronic)/B.A. may be completed in five years of full-time study with some overload.

**Level IV**

Candidates are required to pass the compulsory subjects in all groups A-F\*\* listed below and a minimum of 5 points of electives.

- A Communications and Signals  
*compulsory subjects*
  - 1312 Communications Systems 2
  - 9913 Signal Processing 1
- elective subjects*
  - 9334 Advanced Communication Theory 1
  - 1008 Advanced Signal Processing 1
  - 8692 Biomedical Signal Processing 1
  - 3471 Circuit Analysis and Synthesis 1
  - 5300 Telecommunications Networks 1
- B Computer Systems Engineering  
*compulsory subjects*
  - 6925 Digital Systems and Microprocessors 1
  - 2592 VLSI Implementations 2
- elective subjects*
  - 4312 Advanced VLSI 1
  - 5497 Digital Computer Hardware Design 1
  - 9416 Real Time Systems 1
  - 4526 VLSI Laboratory 1
- C Electromagnetics  
*compulsory subject*
  - 3846 Electromagnetic Engineering 2

- elective subjects*
  - 5650 Advanced Electromagnetic Engineering 1
  - 9451 Electromagnetic Compatibility 1
  - 1290 Optical Communications 1

- D Industrial Power and Control  
*compulsory subjects*
  - 7027 Control IV 1
  - 2283 Power Electronics 1
  - 6151 Power Systems A 1

- elective subjects*
  - 1560 Advanced Control 1
  - 6218 Machine Dynamics A 1

- E Project Work  
*compulsory subjects*
  - 2356 Project A 2
  - 7345 Project B 3

- F Professional Practice  
*compulsory subjects*
  - 6341 Essays and Specialist Lectures 1
  - 4053 Management 2

In addition, the subjects 4668 Biomedical Engineering (2 points) or 7286 Special Studies in Electrical Engineering (1 point) may be taken as electives.

\*\* Not all subjects are offered each year. Information as to which subjects are to be offered in a given year will be available at the time of enrolment.

**13 Information Technology and Telecommunications**

Candidates are required to complete satisfactorily subjects to the total value of 96 points as indicated below:

code	subject title	points
<b>Level I</b>		
9167	Design Graphics	1.5
6714	Electrical Systems	1.5
4249	Electrical Systems B	2
2835	Engineering Planning and Design	1.5
1332	Engineering Programming IE	2.5
9663	Logic Design	1.5
6866	Materials I*	1.5
9786	Mathematics I	6

plus at least six points of options chosen from:

6362 Commercial Law I(S)	3
4003 Computer Applications I	3
2391 Dynamics	1.5
4359 Financial Accounting IA	3
9134 Mathematical Applications I	3
5945 Physics IE	3
6581 Statics	1.5
5543 Statistics I	3

\* This subject will be replaced by 4544 Engineering and Society (1.5 points) in 1997

**Level II**

3429 Circuit Analysis EE	1.5
1956 Computer Systems	2
5132 Data Structures and Algorithms	2
1016 Differential Equations and Fourier Series E	2
4107 Distribution Theory II	2
9877 Open Systems and Client/Server Computer	2
5891 Professional Engineering Skills	1
2430 Programming Paradigms	2
4614 Signals and Systems II	1.5
2187 Vector Analysis and Complex Analysis	2

plus at least five points of options chosen from:

3169 Database and Information Systems	2
1996 Electronics II EE	1.5
1855 Experimental Electronics (IT&T) II	1.5
3655 Numerical Methods	2
7416 Operations Research II	2

note: Options must be chosen at Levels II and III such that a total of at least 12 points of options are completed by the end of Level III

**Level III**

2328 Computer Networks and Applications	2
6991 Engineering Technology and Systems	2.5
5622 Microprocessor Systems	1.5
2382 Programming Techniques	2
2208 Random Processes	2
2962 Signals and Systems III	2
6263 Software Engineering and Project	3
5300 Telecommunications Networks	1

4986 Telecommunications Theory III	2
------------------------------------	---

plus at least five points of options chosen from:

9811 Advanced Programming Paradigms	2
6378 Artificial Intelligence	2
5141 Computer Architecture	2
2569 Electromagnetics and Optics	1.5
4468 Operating Systems	2
2314 Optimisation III	2
8493 Signal Processing (IT&T)III	1.5

note: Options must be chosen at Levels II and III so that a total of at least 12 points of options are completed by the end of Level III. If the option 4468 Operating Systems is not taken at Level III, it must be taken at Level IV.

**Level IV**

7192 Communications Theory	1
7437 Engineering and Business	3
4274 Project Work	5
8380 Telecommunications Network Theory	1

plus at least 14 points chosen from:

3280 Advanced Computer Architecture C	2.5
1783 Advanced Operating Systems A	2.5
7513 Advanced Operating Systems B	2.5
9811 Advanced Programming Paradigms	2
6378 Artificial Intelligence	2
3908 Communication Network Design	2
5141 Computer Architecture	2
5497 Digital Computer Hardware Design	1
8427 Mathematical Coding and Cryptology	2
4468 Operating Systems	2
1290 Optical Communications	1
8684 Parallel Computation	2.5
9416 Real Time Systems	1
4506 Reliability and Quality Control	2
9913 Signal Processing A	1
7663 Signal Processing B	1
4485 Teletraffic Models	2
9694 Transform Methods and Signal Processing	2

note: If the option 4468 Operating Systems is not taken at Level III, it must be taken at Level IV.

**14 Mechanical Engineering**

Candidates are required to complete satisfactorily subjects to the value of 24 points at each of Levels I, II, III and IV.

code	subject title	points
<b>Level I</b>		
7422	Chemistry IHE*	3
9167	Design Graphics	1.5
2391	Dynamics	1.5
6714	Electrical Systems	1.5
5729	Engineering Computing I	1.5
2853	Engineering Planning and Design	1.5
6866	Materials I	1.5
9786	Mathematics I	6
5599	Physics IHE*	3
3018	Process Systems	1.5
6581	Statics	1.5
*With the approval of the faculty a student may undertake the corresponding first-year Science subject in place of this subject.		
<b>Level II</b>		
2452	Automatic Control I	1.5
1360	Computational and Experimental Techniques I	1.5
7872	Design for Function	1.5
6791	Design Project (Level II) N	1.5
1016	Differential Equations and Fourier Series E	2
5815	Electrical Circuits and Machines	1.5
8781	Fluid Mechanics I	1.5
4103	Machine Dynamics	1.5
6231	Manufacturing Engineering I	1.5
8748	Mechanical Properties of Materials	1.5
7567	Numerical Analysis and Probability and Statistics	2
2137	Stress Analysis and Design	2
1376	Thermodynamics I	1.5
2187	Vector Analysis and Complex Analysis	2
9049	Workshop Practice (Mechanical) N	1
<b>Level III</b>		
5893	Automatic Control II	1.5
5424	Engineering Mathematics III	2
6375	Engineering Communication	1

4066	Computational and Experimental Techniques 2	1.5
8432	Design Project (Level III)	1.5
2046	Design for Manufacture	1.5
7980	Electronics	1.5
5526	Fluid Mechanics 2	1.5
9900	Heat Transfer	1.5
7915	Manufacturing Engineering 2	1.5
8767	Processing and Design of Materials	1.5
4109	Solid Mechanics	1.5
4958	Structural Analysis and Design	1.5
3536	System Design	1.5
9813	Thermodynamics 2	1.5
6602	Vibrations	1.5

**Level IV**

1483	Computational and Experimental Techniques 3	1
6393	Engineering Management	2
5802	Management 1A and 1B	1
4872	Project Level IV	8

**Electives\***

A minimum of 6 selected from the following list. With the approval of the Head of the Department of Mechanical Engineering, subjects offered by other departments within the University may be included in the selection of electives. Of the six electives selected not less than four must be those offered by the Department of Mechanical Engineering.

5962	Advanced Automatic Control	2
9274	Advanced Vibrations	2
6804	Airconditioning	2
4668	Biomedical Engineering**	2
1322	Computational Mathematics**	2
2368	Elasticity**	2
3312	Engineering Acoustics	2
2301	Fracture Mechanics	2
9019	Joining of Materials	2
2742	Mechanical Engineering Elective: Applied Mathematics A**	2
9406	Mechanical Engineering Elective: Applied Mathematics B**	2
4085	Mechanical Engineering Elective A	2
1406	Mechanical Engineering Elective B	2

8404 Special Studies in Mechanical Engineering 2

4012 System Modelling and Simulation 2

\*Not all subjects are offered each year. Information as to which subjects are to be offered in a given year will be available at the time of enrolment.

\*\* Subject not offered by Department of Mechanical Engineering

note:

**Arts studies combined with the B.E.(Mech)**

To qualify for the award of the degrees of B.E.(Mech) and B.A. candidates are required to complete satisfactorily:

- (i) All the subjects for the Mechanical Engineering course, with the exception of the following subjects, amounting to eight (8) points:

Two Electives at level IV with the proviso that the remaining level IV electives must be chosen from subjects taught by the Department of Mechanical Engineering 4

6375 Engineering Communication 1

Three points from any of the following subjects (1.5 points each): 3

3018 Process Systems

2853 Engineering Planning and Design

6791 Design Project (Level II) N

5815 Electrical Circuits and Machines

4958 Structural Analysis and Design

either

7915 Manufacturing Engineering

or

2046 Design for Manufacture

- (ii) The Arts requirements set out in Section 7 of these Specific Course Rules.

Thus the B.E. (Mech)/B.A. may be completed in five years of full-time study without any overload.

**15 Practical experience**

**(a) General**

A total of twelve weeks' practical experience is required and this should be undertaken during the university vacations and normally completed before beginning the work of Level IV of the course.

The Faculty may grant either partial or total exemption from these requirements to a candidate who produces satisfactory evidence of practical experience obtained before their first enrolment in the Faculty; and in special cases, the Faculty may grant dispensation from the requirements.

Credit will not normally be given for periods of less than three consecutive weeks.

A candidate should seek a variety of practical experience appropriate to the candidate's academic level.

Before beginning a period of practical experience, a candidate may ensure that it will be satisfactory to the Faculty by consulting the Head of the department concerned.

Upon completion of each period of practical experience (and no later than the following 31 March) each candidate is required to submit to the Faculty office, on the prescribed form, a statement of practical experience gained, certified by the employer for approval by the Faculty of Engineering.

**(b) Chemical Engineering**

It is desirable that at least half of the total number of weeks specified in clause (a) be spent in an approved chemical factory or research establishment on plant operation or industrial research or development.

**(c) Computer Systems, Electrical and Electronic and Mechanical Engineering**

As part of the total number of weeks specified in clause (a), candidates must complete a program in Workshop Practice. Candidates in Computer Systems Engineering and Electrical and Electronic Engineering may normally satisfy this requirement by completing the subject 1062 Engineering Skills in Level III. Candidates in Mechanical Engineering must complete the subject 6710 Workshop Practice (Mechanical) which will normally occupy a one-week period during a semester break. On the satisfactory completion of 1062 Engineering Skills or 6710 Workshop Practice (Mechanical) as appropriate, candidates will automatically be credited with one week engineering experience towards the 12 week work experience requirement.

**16 Transfers between courses**

The Faculty of Engineering may, subject to such conditions (if any) as it may see fit to impose in each case, permit a student to transfer with status from one Engineering course to another, or from any other course in the University or elsewhere to an Engineering course.

Any student contemplating such transfer should consult the Head of the Engineering Department responsible for the course to which the student wishes to transfer and apply for admission to the course through the South Australian Tertiary Admissions Centre in the appropriate manner.

The Faculty has considered Technical and Further Education courses and how they articulate with the Bachelor of Engineering and a scheme of credit transfer from certain TAFE courses has been developed. Following admission to the Bachelor of Engineering course any student wishing to claim status must apply to the Faculty. Students must apply for admission to the course through the South Australian Tertiary Admissions Centre.

## Syllabuses

---

### prerequisite subject requirements

A student may not normally undertake a subject for which the prerequisite subject requirements have not been satisfied. Although the Faculty of Engineering is reluctant to waive the prerequisite requirements of a subject, it is recognised that there can be situations where it is appropriate. Accordingly, if a student has sound academic reasons for a waiver of the requirement, he or she should apply to the Faculty of Engineering through the Head of the Department which offers the subject concerned.

### textbooks

Information on appropriate textbooks will be provided by the Department concerned, and at the preliminary lecture in Orientation Week.

In general, students are expected to have their own copies of text-books but they are advised to await advice from the lecturer concerned before buying any particular book. Only the prescribed edition of any text-book should be bought.

### reference books

Although lists of books and journals for reference purposes are regarded as important, details have not been included in this Volume. These will however be issued from time to time by the departments concerned. It is hoped that all books and journals set for reference will be available to be consulted in the Barr Smith Library.

### examinations

For each subject students may obtain from the department concerned details of the examination in that subject including the relative weights given to the components (eg such of the following as are relevant: assessments, semester or mid-semester tests, essays or other written or practical work, final written examinations, viva voce examinations).

---

## Level I

---

### 6878 Chemistry I

*syllabus details:* see B.Sc. in the Faculty of Science

### 7422 Chemistry IHE

*level:* I    *points value:* 3    *duration:* semester 1

*assumed knowledge:* Stage 2 Chemistry and Physics

*contact hours:* 3 lectures and 1 tutorial a week; and a minimum of 5, up to a maximum of 10, three hour practical sessions

*content:* An introduction to general chemical ideas, the chemical basis of the properties of materials and the chemical behaviour of important engineering systems. Electronic theories of bonding and the structure of molecules, crystals and metals. The general chemistry of important main group elements and metals. The preparation, chemistry and properties of polymers derived from alkenes, alcohols, acids and amines. Chemical equilibria, electrochemistry and surface chemistry. Rates of chemical reactions.

*assessment:* end of semester exam (80%), laboratory work assessed during the practical classes (20%)

Further details given in the preliminary lecture.

### 6362 Commercial Law I(S)

*syllabus details:* see B.Com. in the Faculty of Economics and Commerce

### 4003 Computer Applications I

*level:* I    *points value:* 3    *duration:* semester 2

*contact hours:* 3 lectures per week, 3 hours practical per week, 1 tutorial per fortnight

*pre-requisites:* SACE Stage 2 mathematics I or equivalent knowledge

*restrictions:* may not be counted together with 4425 Quantitative Methods using Computers I, or 9894 Computer Literacy

*content:* This subject aims to provide students with an understanding of the use of computers as tools, treating computer applications from the user's perspective. It provides a basis for proficiency in use of computer-based tools in technical domains. It also provides a context for design of application software for students continuing in computer science.

*topics covered:* Introduction: brief history of computer applications, overview of computer systems organisation. Operating systems: overview, file systems, command languages, utilities, graphical user interfaces. Document preparation: text editing, word processing, images, revision tracking and version control, hypertext and multimedia. Databases: introduction to database structures, tools, schema, queries, report generation, application-specific databases. Spreadsheets: concepts and techniques, financial applications, graphing. Networks: network physical and logical overview, tools and applications, distributed systems, authentication, security.

Embedded computers: aspects of control, reliability, safety. Future directions: trends and projections.

*assessment:* written examination (50%), practical and tutorial work (50%)

### 9167 Design Graphics

*level:* I *points value:* 1.5 *duration:* semester 1 or 2

*contact hours:* approximately 13 hours of lectures and 39 hours of practice classes in the design office.

*content:* Design methods and the influence of design and computers in manufacturing; the language of drawing including sketching; instrument drawing; orthogonal and axonometric projection; visualisation; dimensioning; tolerancing; manufacturing methods and a brief introduction to CAD.

*assessment:* continuous assessment plus final exam. Full details at beginning of the semester.

### 2391 Dynamics

*level:* I *points value:* 1.5 *duration:* semester 2

*assumed knowledge:* Year 12 Mathematics I and II, and Physics

*contact hours:* Approximately 24 hours of lectures, 12 hours of tutorials

*content:* Kinematics of particles and rigid bodies; rectilinear, and curvilinear motion; motion relative to moving axis. Kinetics of particles and rigid bodies: application of Newton's Laws, and the principles of work, energy, power, and momentum in mechanical systems. Conservation of energy and momentum.

*assessment:* a combination of mid-semester tests, tutorial exercises and final exam

### 6714 Electrical Systems

*level:* I *points value:* 1.5 *duration:* semester 2

*assumed knowledge:* Year 12 Mathematics I and II, and Physics

*contact hours:* approximately 20 hours of lectures, 8 hours of tutorials and 9 hours of practical classes

*content:* Circuit concepts: definitions and conventions, circuit elements and sources, network topology, R, L and C circuit elements. Introduction to steady-state alternating current circuits. Circuit analysis methods. Electrodynamics: basic concepts of energy and force production in magnetic fields. Losses and efficiency. Principles of rotating machines and transformers.

Principles of electronic circuits: representation of diode and transistor action; waveshaping circuits, amplifiers.

*assessment:* a combination of assignments and practical work and final exam (full details at beginning of course)

### 4249 Electrical Systems B

*level:* I *points value:* 2 *duration:* semester 2

*corequisites:* 6714 Electrical Systems

*contact hours:* 2 hours of lectures, 0.5 tutorials per week

*content:* Circuit Theory: Consolidation of alternating current circuit theory. Electronics: Diode equations and circuits. Junction and field effect transistors. Switching operation. Introduction to IC fabrication. Fields and Electrodynamics: Revision of elementary concepts. Dipoles - fields, strengths, torques and forces. Magnetic forces. Magnetic flux and continuity. Faraday's and Ampere's laws, inductance. Dielectric and magnetic media: polarisation, magnetisation and flux density vectors. Induced surface and volume charge, pole and current densities. Energy storage. Basis of lumped circuit theory. Forms of magnetism. Hysteresis and energy dissipation. Actuators and rotating machines. Saturation effects. instruments and standards.

*assessment:* by assignments and examination

### 5729 Engineering Computing I

*level:* I *points value:* 1.5 *duration:* semester 1 or 2

*assumed knowledge:* Year 12 Mathematics I and II, and Physics

*contact hours:* approximately 17 hours of lectures and 15 hours of practical/tutorial classes

*content:* Introductory computing: Introductory Programming(ANSI'C'); introduction to engineering applications-oriented software.

*assessment:* written exam and tests together with performance in the computer-aided teaching suite and in the development and use of software for solving problems relevant to engineering

### 2853 Engineering Planning and Design

*level:* I *points value:* 1.5

*duration:* semester 1, repeated in semester 2

*assumed knowledge:* Year 12 Mathematics I and II, and Physics

*contact hours:* 39 hours of lectures, tutorials and project work

*content:* Introduction to engineering: engineering planning and design methodology: basic systems concepts; creative aspects of design; economic, environmental and social evaluation of engineering projects; decision theory; case studies.

*assessment:* Project (50%), Exam (50%). Full details will be available at the beginning of the subject.

### 1332 Engineering Programming IE

level: I points value: 2.5 duration: semester 1

pre-requisites: SACE Stage 2 Mathematics I and II or equivalent knowledge

restrictions: Cannot be counted together with 5729 Engineering Computing I, 4651 Engineering Programming I, 9276 Computing Science I or 1073 Programming and Applications I

contact hours: 3 lectures per week, 1 practical per week, and 1 tutorial per fortnight

content: Aspects of Unix and applications; algorithm design and problem solving; programming language syntax and semantics; Ada programming; constants, variables, basic types, subtypes, derived types, arrays, records, files, input, output, assignment, selection, repetition, procedures, functions, packages and exceptions; introduction to software engineering; debugging; correctness and complexity of simple algorithms; computability; invariants; termination; computer systems overview.

assessment: written examination and practical work

### 4359 Financial Accounting IA

syllabus details: see B.Com. in the Faculty of Economics and Commerce.

### 9663 Logic Design

level: I points value: 1.5 duration: semester 1

contact hours: 1 lecture and 0.7 practicals per week

content: Logic gates. Boolean algebra. Combinational logic design: Karnaugh Map, Quine-McClusky. Number systems: fixed-point signed and unsigned numbers). Standard combinational logic functions: multiplexers and demultiplexers, adders, coders and decoders. Flip-flops. Synchronous sequential logic design. Standard sequential logic functions: registers, counters, shift registers. Finite state machine design.

assessment: by assignments and examination.

### 6866 Materials I

level: I points value: 1.5

duration: semester 1, repeated in semester 2

assumed knowledge: Year 12 Mathematics I and II, Physics and Chemistry

contact hours: 20 lectures plus 10 hours laboratory

content: The mechanical properties of materials, the distinction between elastic and plastic deformation of crystalline solids, the theoretical strength of crystalline solids, dislocations. Rheological properties of materials, models of viscoelastic behaviour. The

formation of crystalline solids. Direct observation of the microstructure of materials. The Gibbs phase rule and its application to the interpretation of phase diagrams. Phase transformations under equilibrium and non-equilibrium conditions with particular reference to binary systems of special engineering significance. The failure of materials in engineering service. Polymers and composites.

assessment: written exam and performance in laboratory classes

Full details at beginning of course.

### 9134 Mathematical Applications I

syllabus details: see B.Sc. in the Faculty of Mathematical and Computer Sciences

### 9786 Mathematics I

syllabus details: see B.Sc. in the Faculty of Mathematical and Computer Sciences

### 3643 Physics I

syllabus details: see B.Sc. in the Faculty of Science

### 5599 Physics IHE

level: I points value: 3 duration: semester 1

assumed knowledge: A good knowledge of Year 12 Physics and Year 12 Mathematics I and II will be assumed.

corequisites: Students are strongly encouraged to take 9786 Mathematics I in parallel with this course.

contact hours: 3 lectures, 1 tutorial and 3 hours of practical work a week. For the practical work students must provide a bound notebook consisting of alternate lined and graphical pages.

content: The lectures are part of 3643 Physics I and include the following topics: Classical Mechanics (calculus based): vector kinematics, applications of Newton's laws, gravitation, conservative forces, collisions, statics, rotational motion, non-inertial frames of reference. Kinetic Theory and Thermodynamics: gas laws, Maxwell-Boltzmann distribution, mean free path, entropy, black-body radiation. Oscillations: simple harmonic motion, damped, forced and natural oscillations. Waves: superposition, harmonic waves, Doppler effect. Relativity: Einstein's postulates, time dilation, length contraction, Lorentz transformations, velocity addition, relativistic momentum and energy.

assessment: Assessment is based mainly on written examination, but includes assignments and practical work.

**5945 Physics IE**

level: I points value: 3 duration: full year

prerequisite: SACE Stage 2 Mathematics I, Mathematics 2 and Physics

assumed concurrent subject: 9786 Mathematics I

contact hours: 36 lectures, 12 tutorials and about 12 practical sessions of 3 hours

content: Oscillations: simple harmonic motion, damped, forced and natural oscillations. Waves and Optics: superposition, wave equation, Fourier analysis, impedance, sound, decibel scale, interference and diffraction, Doppler effect, electromagnetic waves, speed of light, elements of geometrical and physical optics. Relativity: Einstein's postulates, time dilation, length contraction, Lorentz transformations, velocity addition, relativistic momentum and energy. Quantum Physics: X-rays as waves and photons, Compton effect, pair production, de Broglie waves, uncertainty principle, probability interpretation.

assessment: written examinations, assignments and practical work

**3018 Process Systems**

level: I points value: 1.5 duration: semester 2

assumed knowledge: Year 12 Mathematics I and II, Chemistry and Physics

contact hours: approximately 20 hours of lectures and 10 hours of tutorial and practice classes

content: Introduction to process systems; conservation of mass, energy and momentum; transfer of mass, energy and momentum. Application of basic physico-chemical principles to solving simple engineering problems eg in combustion, energy conversion, electric power generation, fluid flow, heat transfer, and mass transfer.

assessment: written exam and performance in tutorial and practical classes. Full details will be provided at the beginning of the subject.

**6581 Statics**

level: I points value: 1.5 duration: semester 1

appropriate background: Year 12 Mathematics I and II, and Physics

contact hours: up to 21 lectures and 9 tutorials

content: Basic Concepts. Concepts of a force and equilibrium at a point. Moments and rigid body statics. Friction forces. Distributed forces. Geometry including areas, volumes and centroids. Application to determinate Structures. Pin jointed trusses, beams, shear force, bending moments. Cables, Hydrostatics.

assessment: written exam and performance in tutorial work. (full details available at beginning of semester)

**5543 Statistical Practice I**

syllabus details: see B.Sc in the Faculty of Mathematical and Computer Sciences

**Chemical Engineering****Level II****1016 Differential Equations and Fourier Series E**

level: II points value: 2 duration: semester 1

prerequisites: 9786 Mathematics I (Pass Div I) or both 9786 Mathematics I (Pass Div II) and 9595 Mathematics IIM (Pass Div I). With the approval of the Dean or nominee, students may be permitted to enrol concurrently in 9595 Mathematics IIM and level II Applied Mathematics II subjects.

restriction: This subject may not be presented towards a degree together with 7243 Differential Equations II.

contact hours: 2 weekly lectures plus 1 tutorial and 1 hour practical a fortnight

content: Ordinary differential equations: First order, second order, series solutions. Fourier series for functions of arbitrary period, half range expansions, even and odd functions, complex form of Fourier series. Partial differential equations: heat equation, separation of variables, wave equation, Laplace's equation. Applications in boundary value problems.

assessment: final exam. A small percentage will be allocated to class exercises and computing. A satisfactory performance in computing exercises is a necessary prerequisite for a pass in this subject.

**4569 Laplace Transforms and Probability and Statistical Methods**

level: II points value: 2 duration: semester 2

prerequisites: 9786 Mathematics I (Pass Div I) or both 9786 Mathematics I (Pass Div II) and 9595 Mathematics IIM (Pass Div I). With the approval of the Dean or nominee, students may be permitted to enrol concurrently in 9595 Mathematics IIM (provided it is offered) and level II Applied Mathematics II subjects.

contact hours: 2 weekly lectures plus 1 tutorial and a 1-hour practical a fortnight

content: Laplace transforms of derivatives and integrals, applications to differential equations (approximately 9 lectures). Probability and statistical

methods sample mean and variance, random variables, distributions, quality control, fitting straight lines (approximately 17 lectures).

*assessment:* final exam. A small percentage will be allocated to class exercises and computing. A satisfactory performance in computing exercises is a necessary prerequisite for a pass in this subject.

### 2187 Vector Analysis and Complex Analysis

*level:* II *points value:* 2 *duration:* semester 1

*prerequisite:* 9786 Mathematics I (Pass Div I) or both 9786 Mathematics I (Pass Div II) and 9595 Mathematics IIM (Pass Div I). With the approval of the Dean or nominee, students may be permitted to enrol concurrently in 9595 Mathematics IIM and level II Applied Mathematics II subjects.

*corequisite:* 1016 Differential Equations and Fourier Series E.

*restriction:* This subject may not be presented towards a degree together with 6649 Methods in Applied Mathematics II.

*contact hours:* 2 weekly lectures plus 1 tutorial and 1-hour practical a fortnight.

*content:* Gradient, divergence and curl, integral theorems, orthogonal curvilinear coordinates (approximately 17 lectures). Complex analytic functions, complex integrals (approximately 9 lectures).

*assessment:* final exam. A small percentage will be allocated to class exercises and computing. A satisfactory performance in computing exercises is a necessary prerequisite for a pass in this subject.

### 8845 Chemical Engineering Projects II(N)

*level:* II *points value:* 2 *duration:* full year

*corequisites:* 8601 Introductory Process Fluid Mechanics, 6283 Chemical Process Principles II

*contact hours:* 78 hours of practical work

*content:* Fluid mechanics laboratory program plus projects in chemical engineering computing and process design.

*assessment:* assignments and project reports

### 3798 Chemical Engineering Thermodynamics

*level:* II *points value:* 2 *duration:* semester 2

*availability:* only for B.E.(Chemical) students admitted to the LL.B. course

*assumed knowledge:* 3018 Process Systems

*contact hours:* 26 lectures and 26 tutorials

*content:* Conservation of mass and energy; entropy; thermodynamics properties of real gases; multicomponent mixtures; phase equilibrium in mixtures; equilibrium for reacting systems; analysis of power and refrigeration cycles.

*assessment:* a combination of assignments and final exam

### 6283 Chemical Process Principles II

*level:* II *points value:* 3 *duration:* semester 1

*assumed knowledge:* 9786 Mathematics I, 3018 Process Systems

*contact hours:* 39 lectures and 26 tutorials

*content:* Chemical process principles: process calculations (material and energy balance calculations); numerical solution of mass and energy balances (machine methods); equilibrium stage operations.

*assessment:* final exam

### 9653 Chemistry IIE

*syllabus details:* see B.Sc. in Faculty of Science

### 8601 Introductory Process Fluid Mechanics

*level:* II *points value:* 2 *duration:* semester 2

*assumed knowledge:* 9786 Mathematics I, 3018 Process Systems

*contact hours:* 26 lectures and 26 tutorials

*content:* The statics and dynamics of fluids. Considerable emphasis is placed on the solutions of fluid flow problems frequently encountered in the process industries.

*assessment:* principally by exam with up to 20% for class-work

### 7543 Process Heat Transfer

*level:* II *points value:* 1.5 *duration:* semester 2

*assumed knowledge:* 3018 Process Systems

*contact hours:* 24 lectures and 15 tutorials

*content:* The study of heat transfer by conduction, convection and radiation in chemical process systems. The topics include problem solution by analytical as well as numerical methods. Theoretical and practical aspects of design are discussed.

*assessment:* principally by exam with up to 20% for class work

**2879 Stress Analysis (C)**

level: II points value: 1.5 duration: semester 1

contact hours: 20 lectures, 10 tutorials and 9 hours practical work

content: Topics relevant to Chemical and Civil and Environmental Engineering taken from: Mechanical properties of materials, stresses and strains, normal and shear, stress-strain relationships, temperature stresses, elastic theory. Beams; distribution of stress due to bending, moment-curvature relationships. Beams; shear stresses. Beams; composite bending stresses. Beams; deflections of simply supported and encastre beams by integration. Statically indeterminate beams. Combined stresses, failure theories, stress concentration. Experimental stress analysis to illustrate the above.

assessment: exam; satisfactory completion of practical work

---

**Level III**

---

**3824 Chemical Engineering Projects III**

level: III points value: 4 duration: full year

prerequisites: 6283 Chemical Process Principles II; and 8845 Chemical Engineering Projects II(N)

assumed knowledge: 7543 Process Heat Transfer, 6283 Chemical Process Principles II, 8601 Introductory Process Fluid Mechanics

corequisites: 8310 Process Control and Instrumentation, 9816 Fluid and Particle Mechanics, 8462 Kinetics and Reactor Design, 5909 Transport Phenomena

contact hours: 78 hours of practical work, 20 lectures and 20 tutorials

content: A laboratory program illustrating principles of transport theory, fluid mechanics, unit operations, process dynamics and control and kinetics and reactor design; and a lecture course on report writing, project and people management, and data analysis.

assessment: a combination of project reports, assignments and final exam. Details at start of course.

**5815 Electrical Circuits and Machines**

level: III points value: 1.5 duration: semester 1

contact hours: 2 lectures a week, 12 tutorials and 12 hours of practical work

content: Transient and steady state circuit analysis, magnetic circuits, direct current machines, synchronous machines, transformers and induction motor. Practical work in the laboratory is designed to illustrate the subject matter of the lectures.

assessment: principally by written exams, with laboratory work and homework assignments also contributing to the overall result

**9816 Fluid and Particle Mechanics**

level: III points value: 3 duration: semester 1

prerequisite: 8601 Introductory Process Fluid Mechanics

contact hours: 26 lectures and 26 tutorials

content: Description of particulate systems. Multiphase flows: fundamentals and application to design and analysis of physical separation and transport processes.

assessment: a combination of assignments and final exam

**8462 Kinetics and Reactor Design**

level: III points value: 2.5 duration: semester 2

assumed knowledge: Level II Applied Mathematics subjects to the value of 6 points or 5726 Applied Mathematics IIE or 5726 Applied Mathematics IIB, 9653 Chemistry IIE

contact hours: 26 lectures and 26 tutorials

content: The theory of simple and complex chemical kinetic systems and their application to the design of commercial-scale reactors.

assessment: a combination of assignments and final exam

**6020 Special Studies III**

level: III points value: 1.5 duration: semester 1

contact hours: 18 lectures and 9 tutorials

content: A topic from the following: biotechnology, computer-aided design, prediction of thermodynamic properties, design of experiments, synthesis of heat exchanger networks, environmental studies, rheology.

assessment: a combination of assignments and final exam

**7738 Materials III(C)**

level: III points value: 1.5 duration: semester 1

prerequisite: 6866 Materials I

contact hours: 26 lectures, 26 hours combined laboratory/tutorial sessions

content: Mechanical and rheological properties materials. Role of dislocations and imperfections. Case studies in phase transformations. Polymers and composites. Fracture behaviour of materials. Merit indices and material selection. Electrochemical engineering including corrosion and corrosion prevention, electroplating, electromachining, fuel

cells, energy storage and electrochemical synthesis. High temperature oxidation.

*assessment:* a combination of assignments, laboratory work and final exam

### 1345 Mechanism Design

*level:* III *points value:* 1.5 *duration:* semester 2

*contact hours:* 13 lectures and 39 hours in the Design office

*content:* The design process; accuracy of engineering quantities; tolerancing and fits; introduction to reliability and applications of statistics; friction clutches and brakes; power transmission belts gears and chains; bearings hydrodynamic, rolling element and rubbing.

*assessment:* class work (30%); final exam (70%)

### 8310 Process Control and Instrumentation

*level:* III *points value:* 2.5 *duration:* semester 2

*assumed knowledge:* Level II Applied Mathematics subjects to the value of 6 points or 5726 Applied Mathematics IIE or 5726 Applied Mathematics IIB, 6283 Chemical Process Principles II or 9396 Chemical Engineering II.

*contact hours:* 26 lectures and 26 tutorials

*content:* Control: Introduction to linear process control, including analysis of first and second order process systems dynamics and control. Instrumentation: Topics include commonly used primary sensing elements, signal transmission for digital and analogue systems, final control elements.

*assessment:* a combination of assignments and final exam

### 8083 Process Design

*level:* III *points value:* 1 *duration:* semester 2

*prerequisites:* 6283 Chemical Process Principles II; and 8845 Chemical Engineering Projects II(N)

*contact hours:* 39 hours of practical work

*content:* An introductory design project solved using computer aided process design techniques.

*assessment:* project report

### 5578 Separation Processes

*level:* III *points value:* 2 *duration:* semester 2

*assumed knowledge:* 6283 Chemical Process Principles II or 9396 Chemical Engineering II.

*contact hours:* 24 lectures and 15 tutorials.

*content:* Stage-wise and continuous contact processes; single and multi-stage operation; use of reflux; analysis and design. Processes considered include: liquid-liquid extractions, leaching, stripping, gas absorption, and distillation.

*assessment:* a combination of assignments and final exam

### 8415 Seminar

*level:* III *points value:* 1 *duration:* semester 1

*contact hours:* tutorials, (discussion with supervisor)

*content:* A four thousand word essay to be prepared on a topic of general interest. A short public presentation is to be made based on the essay.

*assessment:* essay 50%, presentation 50%

### 5909 Transport Phenomena

*level:* III *points value:* 2 *duration:* semester 1

*assumed knowledge:* Level II Applied Mathematics subjects to the value of 6 points or 5726 Applied Mathematics IIE or 5726 Applied Mathematics IIB

*contact hours:* 26 lectures and 13 tutorials

*content:* An introduction to the transfer of momentum, thermal energy and mass by molecular means using shell balance and conservation equations. Turbulent transport and boundary layer methods are also discussed.

*assessment:* a combination of assignments and final exam

## Level IV

---

All Level I, II and III subjects are to be passed before entering Level IV except by permission of the Head of Chemical Engineering.

### 2932 Advanced Separation Techniques and Thermal Processes

*level:* IV *points value:* 2 *duration:* semester 1

*assumed knowledge:* material contained in subjects in the first three levels of the B.E.(Chem.) course

*prerequisites:* 5578 Separation Processes

*contact hours:* 26 lectures and 13 tutorials

*content:* Application of fundamental principles to the analysis of chemical process unit operations for design and operational management.

*assessment:* principally by exam with up to 20% allowed for class-work

**4459 Chemical Engineering Laboratory Projects IV**

level: IV points value: 2 duration: semester 1

corequisites: 2932 Advanced Separation Techniques and Thermal Processes.

contact hours: 78 hours of practical work

content: A series of projects based on the lecture courses. Emphasis on teamwork and project management. Originality and quality of report writing and presentation are taken into account.

assessment: project reports

**7348 Industrial Economics and Management**

level: IV points value: 2 duration: semester 2

contact hours: 39 lectures and 10 tutorials.

content: The life cycle of a chemical processing system from the research and development behind the initial concept through process design construction and operations management. Topics covered include patents, capital investment evaluation, construction planning and control, cost planning and control, process optimisation, basic management principles and a general treatment of the structure and environment of industry.

assessment: a combination of assignments and final exam

**5058 Plant Design Project**

level: IV points value: 6 duration: semester 2

prerequisites: 8083 Process Design

corequisites: 2932 Advanced Separation Techniques and Thermal Processes

contact hours: 10 lectures, 25 tutorials and 150 hours of practical work.

content: Lectures: Topics comprise sources and estimation of data, costing and economic analysis of alternative proposals, the application of Process Engineering and Operations Research techniques to the selection, sizing, design and optimisation of equipment and processes (including utilities), project scheduling and control, and plant operation and safety considerations. Project: the project involves the economic comparison of alternative processes for the manufacture of a nominated chemical product, the study of a selected process, calculation of material and energy balances, preparation of flow sheets, design of selected plant items, an assessment of factors affecting plant safety, estimation of plant cost and process economics, preparation of a design report and drawing of plant lay-out.

assessment: a combination of assignments and final exam

**1488 Process Dynamics and Control**

level: IV points value: 2 duration: semester 1

assumed knowledge: 8310 Process Control and Instrumentation.

contact hours: 26 lectures and 13 tutorials

content: The principles of process dynamics, stability and design of process control loops, overall plant control, and digital control systems. The theory is developed to a stage where it may be applied to a wide variety of practical problems in design and operation of chemical process plant.

assessment: a combination of assignments and final exam

**8014 Chemical Engineering Research Project**

level: IV points value: 2 duration: full year

contact hours: 150 hours of practical work and seminar

content: Candidates are required to: (1) to complete satisfactorily a research project and submit a written report on a topic specified by the department; (2) present a short seminar on their project results at the end of semester 2.

**Level IV electives**

Four electives to be selected from the following list. Not all these subjects will be offered each year. Information as to which subjects will be offered in a given year will be available from the Department of Chemical Engineering at the time of enrolment. With the approval of the Head of the Department of Chemical Engineering, subjects offered by other departments within the Faculty of Engineering may be included in the selection of electives.

**6238 Advanced Materials Engineering**

level: IV points value: 2 duration: semester 2

assumed knowledge: 6866 Materials I and either 2012 Materials Science and Engineering or 7738 Materials III(C)

contact hours: 26 hours of lectures and 26 hours of practical work

content: The selection and fabrication of materials for engineering applications including corrosive and high temperature environments, structural and low alloy steels, the relation of structural variable sin polymers to their engineering properties, engineering properties of specific polymers. Processing and selection of plastics.

assessment: a combination of assignments, laboratory work and final exam

**2098 AI Applications in Engineering Design**

level: IV points value: 2 duration: semester 1

contact hours: 26 lectures and 13 tutorials

content: The application of artificial intelligence techniques to engineering design. Topics covered include: rule-based systems, forward and backward chaining; list processing; the elements of heuristic search.

assessment: a combination of assignments and final exam

**2532 Biochemical Engineering**

level: IV points value: 2 duration: semester 1

contact hours: 26 lectures and 13 tutorials

content: Fundamentals of microbiology: cells and spores; aseptic technique; the growth curve; metabolism; mutation; identification and enumeration. Enzymes. Kinetics of growth, substrate utilisation and death. Design and analysis of biological reactors. Proteins (molecular genetics and control systems). Product recovery. Bioprocess economics.

assessment: a combination of assignments and final exam

**4668 Biomedical Engineering**

level: IV points value: 2 duration: semester 1

contact hours: 26 lectures and 13 tutorials

content: An introductory course on the application of engineering knowledge and principles in the medical area. Topics include engineering in orthopaedics; biomechanics; tissue and spinal mechanics; materials; lasers, radiography; magnetic resonance imaging; nuclear medicine; medical ultrasound and image processing.

assessment: a combination of assignments and final exam

**8273 Combustion Processes**

level: IV points value: 2 duration: semester 1

assumed knowledge: 8462 Kinetics and Reactor Design

contact hours: 26 lectures and 13 tutorials

content: Basic principles which form the background to combustion phenomena. Topics include explosions in closed vessels, flames and combustion waves, detonation waves in gases, combustion of hydrocarbons, combustion in mixed and condensed phases, high explosives, heating applications, combustion and the environment.

assessment: a combination of assignments and final exam

**9988 Environmental Engineering**

level: IV points value: 2 duration: semester 1

assumed knowledge: 9816 Fluid and Particle Mechanics

contact hours: 26 lectures and 13 tutorials.

content: The study of air and water pollution; pollutant dispersion; control equipment; primary, secondary and tertiary waste-water treatment; landfill and hazardous wastes.

assessment: a combination of assignments and final exam

**5734 Hydrocarbon Reservoirs**

level: IV points value: 2 duration: semester 1

assumed knowledge: 9816 Fluid and Particle Mechanics

contact hours: 26 lectures and 13 tutorials

content: Introduction to broad concepts of petroleum geology, evaluation of the production capabilities of hydrocarbon reservoirs using well log data, geophysical basin characteristics and mathematical and physical models of porosity and permeability.

assessment: a combination of assignments and final exam

**9949 Industrial Rheology**

level: IV points value: 2 duration: semester 1

assumed knowledge: 9816 Fluid and Particle Mechanics and 5909 Transport Phenomena

contact hours: 26 lectures and 13 tutorials

content: Characterisation of fluid flow behaviour with particular emphasis on industrial suspensions, polymers and composites. Applications include the design and optimisation of systems for handling, processing and transporting non-Newtonian fluids.

assessment: a combination of assignments and final exam

**1532 Minerals Processing**

level: IV points value: 2 duration: semester 2

assumed knowledge: 9816 Fluid and Particle Mechanics.

contact hours: 26 lectures and 13 tutorials

content: The application of chemical engineering principles to minerals processing operations, including flotation, size reduction, gravity separation and hydrometallurgy.

assessment: a combination of assignments and final exam

**6856 Particulate Technology**

level: IV points value: 2 duration: semester 1

assumed knowledge: 9816 Fluid and Particle Mechanics.

contact hours: 26 lectures and 13 tutorials

content: A course describing the behaviour of particulate systems. Topics include: particle size distributions; sampling; population balances; kinetics of growth, aggregation and breakage; mixing of particulates and stress distributions in granular solids.

assessment: a combination of assignments and final exam

**9871 Plant and Safety Engineering**

level: IV points value: 2 duration: semester 1

contact hours: 26 lectures and 13 tutorials

content: The course covers the management of safe operation and the care and maintenance of process-plant equipment in an integrated operational context. The studies will include the interpretation of industrial standards and legal requirements, in occupational health and safety, in environmental matters and in hazard and operability studies. Also covered are the techniques and methods for the quantitative assessment of plant reliability and availability and their effects on plant throughput.

assessment: a combination of assignments and final exam

**3324 Reaction Engineering**

level: IV points value: 2 duration: semester 1

assumed knowledge: 8462 Kinetics and Reactor Design and Level II Applied Mathematics subjects to the value of 6 points or 5726 Applied Mathematics IIE

contact hours: 26 lectures and 13 tutorials

content: The study of advanced kinetics and reactor design in chemical processing systems, including temperature and pressure effects in reactors and fundamental design strategies for heterogeneous reactor systems.

assessment: a combination of assignments and final exam

**2088 Special Management Studies**

level: IV points value: 2 duration: semester 1

contact hours: 26 lectures and 13 tutorials

content: A course of lectures on specialist management topics, including quality improvement through the application of statistical methods.

assessment: a combination of assignments and final exam

**1172 Special Studies in Chemical Engineering**

level: IV points value: 2 duration: semester 1 or 2

assumed knowledge: as prescribed by the Head of Chemical Engineering

contact hours: 26 lectures and tutorials

content: Special topics in Chemical Engineering as determined by the Head of the Chemical Engineering Department. This subject may be offered from time to time and will be taught by visiting academic/s. Syllabus details will be published by the Department as the need arises.

assessment: as determined by the Head of the Department of Chemical Engineering

**1872 Thermal Process Synthesis and Integration**

level: IV points value: 2 duration: semester 1

assumed knowledge: 6283 Chemical Process Principles II

contact hours: 26 lectures and 13 tutorials

content: Design and synthesis of HEN (heat exchanger networks) including evolutionary and algorithmic methods. Integration of power, work, separation and energy systems. Flexibility and operability studies; retrofit situations.

assessment: a combination of assignments and final exam

**Civil Engineering****Level II****3406 Civil Engineering Construction IIA**

level: II points value: 2 duration: semester 2

contact hours: 32 hours

content: Topics to be chosen from: The construction industry: its structure, promoters, consultants, contractors, contract systems, contract documents, tendering. Basic construction processes and equipment employed in excavation, open cut, trenching and tunnelling foundations, concreting and steel fabrication and erection, selection of materials. Major fields of civil engineering and building works: bridges, roads, railways, airports, harbour works, water supply works, buildings, and special structures. Construction planning and organisation: application of programming techniques including: Bar charts, critical path method; resource scheduling, site organisation, site personnel communication, cost control, responsibilities. Elements of surveying, including: linear measurement; levelling; theodolite and tacheometry.

assessment: to be advised

### 9290 Design of Structures II

level: II points value: 4 duration: full year

prerequisites: Pass (not Conceded Pass) in 6581 Statics and 9786 Mathematics I (Pass Div I)

corequisites: 8077 Strength of Materials IIA

assumed knowledge: 9786 Mathematics I

contact hours: 64 hours of lectures, tutorials and design work plus practical work/site visits.

content: Introduction to structural engineering, concept of structural form, design criteria and limit states, loads, linear structural systems. Concrete materials, mix design and construction. Reinforced and prestressed concrete in flexure. Structural steel, introduction to structural behaviour, design of axially loaded members, introduction to connection design.

assessment: detailed at start of year

### 1016 Differential Equations and Fourier Series E

syllabus details: see B.E.(Chem.)

### 3147 Engineering Geology

level: II points value: 2 duration: semester 2

restriction: 2136 Geology I and 3732 Geology IHE

contact hours: 20 lectures and ten 3 hour practicals

content: The subject provides the geological background required for Civil Engineering, covering the theory of plate tectonics and its relation to earthquakes; earthquakes and ground stability; gravity and the shape of the earth; geological history; the process of rock weathering and deposition; sediments; sedimentary rocks; crystals and minerals; igneous and metamorphic rocks and processes; economic rocks and minerals; structural geology (folds, fabrics, faults and joints); stress and strain, rock strength, slopes, foundations; excavations; groundwater and hydrogeology. There will be lab-based practicals introducing geological mapping and sedimentary, igneous and metamorphic minerals and rocks and also field-based practicals including visits to civil engineering constructions.

assessment: end of semester theory exam 50%, practical exams, laboratory work and field excursions (attendance and report) comprise a compulsory and non-redeemable component 50%. A minimum of 40% must be obtained in both the theory and practical sections in order to obtain a pass.

### 3290 Geotechnical Engineering II

level: II points value: 2 duration: semester 2

assumed knowledge: 2509 Engineering INA or 6581 Statics; 9786 Mathematics I

contact hours: 32 hours of contact and directed study

content: An introduction to the fundamentals of soil and rock mechanics. The overall objective is to provide an awareness of the types of problems encountered in this field and to cover a number of areas that are fundamental to more advanced study. Topics included are:

The origin and composition of soils; processes that form soils; mineralogy; crystallography. The state of a soil: phase relationships and measurement; soil classification; in situ vertical total and effective stresses;

The behaviour of soils: Strength — Shear strength of sands and clays, Mohr-Coulomb failure criterion, measurement; Compressibility — Introduction to settlement and consolidation; Permeability — Water flow and measurement.

Lateral earth pressure: Rankine states; basic retaining wall design calculations.

Expansive soils: Shrink/swell phenomena; soil suction; measurement; heave calculation; AS2870; basics of residential footing design, cracking and articulation.

Soil improvement: Compaction — concepts, measurement and field techniques; other techniques — briefly.

Site investigations and data collection: Planning site investigations; AS1726; in situ testing.

assessment: exams (70%); exercises (30%)

### 4569 Laplace Transforms and Probability and Statistical Methods

syllabus details: see B.E.(Chem.)

### 2187 Vector Analysis and Complex Analysis

syllabus details: see B.E.(Chem.)

### 4760 Engineering Modelling and Analysis II

level: II points value: 2 duration: semester 2

assumed knowledge: 9786 Mathematics I, 6581 Statics

contact hours: 32 hours of lectures and tutorials plus computer practicals

content: Introduction to numerical methods in engineering: approximations and errors; sorting and searching arrays; linear algebraic equations; roots of equations; curve fitting; numerical differentiation and integration; ordinary differential equations; solution of a broad range of civil engineering numerical problems using one of the programming languages.

assessment: classwork (40%); final exam (60%)

### 8077 Strength of Materials IIA

level: II points value: 3 duration: semester 1

prerequisites: Pass in 6581 Statics (not Conceded Pass) and 9786 Mathematics I

*contact hours:* the equivalent of 48 hours lectures, tutorials and practicals

*content:* Topics to be chosen from: elastic, elastic-plastic; plane stress and strain; constitutive relationships, principal stress and strain; failure criteria; stresses in thick cylinders; bending and shearing stresses in beams, deflections of beams; asymmetric bending; Euler buckling; short and long columns; torsion of solid and hollow circular sections; elastic axis; introduction to statistical indeterminacy and simple redundant structures; work and strain energy concepts.

*assessment:* exam and assignments (relative weighting to be advised)

### 7678 Transport Processes in the Environment

*syllabus details:* see Civil and Environmental Engineering

### 5206 Water Engineering and Design II

*level:* II *points value:* 3 *duration:* semester 1

*assumed knowledge:* 9786 Mathematics I; 6581 Statics and 2391 Dynamics

*contact hours:* 48 hours of lectures, tutorials and design plus practical work.

*content:* An introduction to hydraulic engineering. Description and properties of fluids; hydrostatics; laws of inviscid flow; continuity, energy and momentum equations; dimensional analysis and model theory; steady uniform and non-uniform flows in closed conduits; steady uniform flow in open channels; elements of hydrology.

*assessment:* exams (70%); laboratory work (10%); tutorials (10%); designs (10%)

---

## Level III

---

### 3147 Engineering Geology

*syllabus details:* see B.E.(Civil), Level II

### 4611 Environmental Engineering III

*level:* III *points value:* 2 *duration:* semester 1

*assumed knowledge:* 5206 Water Engineering and Design II

*contact:* 32 hours of lectures and tutorials.

*content:* Basic hydrologic processes in a catchment and their disturbance by human activities. Water pollution: sources and characteristics. Water quality criteria, water and wastewater treatment processes.

*assessment:* exams and assignments. Relative weighting to be announced at the start of the subject.

### 3127 Geotechnical Engineering Design III

*level:* III *points value:* 3 *duration:* full year

*prerequisite:* 3290 Geotechnical Engineering II

*contact hours:* the equivalent of 48 hours of lectures, tutorials, practical work plus directed study

*content:* Analysis and design of shallow foundations — changes in stresses, compressibility, bearing capacity; analysis and design of deep foundations — ultimate capacity of single piles and pile groups; seepage; slope stability; pavement design.

*assessment:* exams (50%) coursework (50%)

### 9566 Engineering Management and Planning

*level:* III *points value:* 2 *duration:* semester 2

*contact:* 32 hours of lectures and tutorials

*content:* Basic economic concepts; Project evaluation including benefit-cost analysis and multi-objective planning; use of mathematical models and optimisation in the planning process; decision analysis; applications to civil engineering practice.

*assessment:* exam (80%); assignments (20%)

### 6790 Mechanical Design

*level:* III *points value:* 2 *duration:* semester 2

*assumed knowledge:* Level I Dynamics

*contact hours:* 40

*content:* Fundamentals of mechanical design covering accuracy of engineering quantities, tolerances and fits, statistical considerations, reliability and failure analysis, brakes and clutches, power transmission components (gears, chains and belts), hydrodynamic bearings, dry rubbing bearings and rolling element bearings.

*assessment:* assignments (30%); exam (70%)

### 7455 Engineering Modelling and Analysis III

*level:* III *points value:* 2 *duration:* semester 1

*prerequisite:* 4760 Numerical and Computing Methods in Engineering II

*assumed knowledge:* 1016 Differential Equations and Fourier Series E; 4569 Laplace Transforms and Probability and Statistical Methods; 4760 Numerical and Computing Methods in Engineering II

*contact hours:* 32 hours of contact and directed study.

*content:* Probabilistic analysis (16 lectures); revision of basic probability concepts; jointly distributed random variables; common distributions including: normal, log-normal, gamma, extreme value distributions; transformations of data; empirical determination of

distributions; parameter estimation; regression and correlation analysis; first order, second moment methods and reliability; Monte Carlo simulation; auto-correlation, cross-correlation, multiple regression; Markov processes; random number generation; Civil Engineering examples, computer session problems. Numerical methods (10 lectures); eigensystems; Fourier transform spectral methods; integration of coupled sets of ordinary differential equations; systems of non-linear equations; finite difference methods. Computing (5 lectures); advanced programming concepts in C, spreadsheet macros, UNIX.

*assessment:* classwork (20%); final exam (80%); successful completion of computer practical sessions

### **4967 Structural Design III (Concrete).**

*level:* III *points value:* 3 *duration:* semester 2

*prerequisites:* 9290 Design of Structures II

*assumed knowledge:* 8077 Strength of Materials IIA

*corequisites:* 3718 Structural Mechanics IIIA

*contact hours:* 48 hours of lectures, design work and tutorials

*content:* Design methodology, preliminary design procedures, simplified methods of analysis of framed buildings and approximate proportioning methods, presentation of design calculations for concrete structures. Application of plasticity concepts to concrete structures. Detailed design procedures for reinforced concrete structures including beams, slab systems and columns. Introduction to prestressed concrete. Students will undertake substantial design projects to apply lecture material.

*assessment:* design projects (30%); exam (50%), classwork (20%)

### **6859 Structural Design III (Steel)**

*level:* III *points value:* 3 *duration:* semester 1

*assumed knowledge:* 9290 Design of Structures II; 8077 Strength of Materials IIA

*corequisites:* 3718 Structural Mechanics IIIA

*contact hours:* 48 hours

*content:* Design methodology, preliminary design procedures, presentation of design calculations, detailed design procedures for steel structures. A major steel structure design project is undertaken.

*assessment:* design projects (75%); exam (25%)

### **3718 Structural Mechanics IIIA**

*level:* III *points value:* 3 *duration:* full year

*prerequisite:* a Pass (not a Conceded Pass) in 8077 Strength of Materials IIA

*contact hours:* 48 hours

*content:* Advanced structural methods of design and analysis using stiffness matrix methods. Virtual work analysis, redundant structures. Plastic methods of analysis.

*assessment:* to be advised

### **7678 Transport Processes in the Environment**

*syllabus details:* see Civil and Environmental Engineering

### **8227 Water Engineering and Design III**

*level:* III *points value:* 4 *duration:* full year

*prerequisite:* 5206 Water Engineering and Design II

*assumed knowledge:* 1016 Differential Equations and Fourier Series E

*contact hours:* 64 hours of lectures, tutorials and design work plus practical work

*content:* Fluid mechanics and hydraulic engineering design. Elements of pipeline and network design, unsteady flow in closed conduits; non-uniform flow in open channels, super and subcritical flows; hydraulic structures and dissipator design; Flow measurement techniques; Elements of hydrodynamics and boundary layer theory; Hydraulic machine basics and selection; Flood routing; Flow in erodible channels, unsteady flow in open channels, rapidly varied flow in open channels, level pool routing, environmental and geomorphological factors affecting river basins

*assessment:* exams (50%); laboratory, design work, quizzes and assignments (50%)

## **Level IV**

---

All Level I, II and III subjects to be passed before entering Level IV except by permission of the Head of Civil and Environmental Engineering.

### **3797 Civil Engineering Design Project N**

*level:* IV *points value:* 6 *duration:* full year

*prerequisites:* except with permission of the Head of Civil and Environmental Engineering all earlier years Civil Engineering subjects.

*contact hours:* approx 120 hours of contact and directed study

*content:* Students will undertake a Civil Engineering Design project that may involve any or all of: feasibility studies, preliminary and detailed design.

*assessment:* evaluation of design project

**1495 Civil Engineering Research Project N**

level: IV points value: 6 duration: full year

*prerequisites:* except with permission of the Head of Civil and Environmental Engineering all earlier years Civil Engineering subjects

*contact hours:* approx 120 hours of research and practical work

*content:* Students work in groups on a research project under the supervision of an academic staff member. They present a short talk, a research seminar and write both a conference paper and a comprehensive research report.

*assessment:* evaluation of research activity and research report, short talk and seminar paper.

**7185 Civil Engineering Management IV**

level: IV points value: 2 duration: semester 1

*prerequisites:* Except with permission of the Head of the Civil and Environmental Engineering Department all earlier years Civil Engineering subjects.

*contact hours:* 26 hours

*content:* A law component including tenders, contracts and their variation; arbitration; quality assurance; professional liability. A management component including group decision making and the individual in the workplace; the importance of communicating and interpersonal skills in an organisation.

*assessment:* to be advised

**Specialisation subjects**

Students must take a total of five specialisations, according to subject availability, and should take at least two subjects from one group. The other three specialisations may be chosen from any others offered by the Department. In special circumstances other combinations of specialisation subjects may be acceptable, but must be approved by the Head of the Department of Civil and Environmental Engineering.

Students may also, with the approval of the Head of the Department of Civil and Environmental Engineering, replace one or more Departmental specialisation subjects with appropriate subjects offered by other departments within The University of Adelaide.

The specialisation subjects offered by the Department in any one year will depend on student interest and staff availability, and will be chosen from the following:

**Group I: Structural Engineering****8441 Advanced Steel Design**

level: IV points value: 2 duration: semester 1

*prerequisites:* all Level III Civil Engineering subjects, except with the permission of the Head of Civil and Environmental Engineering

*contact hours:* 26 hours plus directed study

*content:* Students will carry out a design or a series of designs in which topics not covered in 6859 Structural Design III (Steel) will be emphasised. In particular, (using AS4100 chapter headings): section 4: Compression member design, determining effective length etc; section 5: local web buckling; section 8: combined actions; section 9: connections; section 1: fatigue.

*assessment:* project work (100%)

**1130 Composite Steel and Concrete Construction**

level: IV points value: 2 duration: semester 2

*prerequisites:* except with the permission of the Head of Civil and Environmental Engineering, all earlier years Civil Engineering subjects

*contact hours:* 26 hours of contact plus directed study

*content:* Design of steel beams in building to act compositely with the reinforced concrete slabs they support. Design of composite beams with opening in the webs that are required for services. Design of reinforced concrete slabs to act compositely with profiled steel shuttering. Design of composite beams for bridges. Assessment of the remaining strength and endurance of existing composite bridge beams. The analysis procedures will allow for the effects of creep, shrinkage, thermal gradients, repeated fatigue loads, and the strength and stiffness of the connection between the steel beam and concrete slab that causes the composite action.

*assessment:* Assessment will consist of: building beam design project during first half of semester (30%); bridge beam design project during second half of semester (25%); and an open book exam based on design projects (45%).

**8849 Computer Methods of Structural Analysis**

level: IV points value: 2

*availability:* not offered in 1996

*prerequisites:* except with the permission of the Head of Civil and Environmental Engineering, all earlier years Civil Engineering subjects

*contact hours:* 26 hours of contact plus directed study.

*content:* Selected topics from: Stiffness method of linear analysis of plane and space frameworks. Stiffness matrix assembly and solution for arbitrary assemblages. Computer modelling of real structures will be covered and software will be used to solve simple problems. Introduction to finite element methods of analysis.

*assessment:* to be advised

#### **2414 Design of Concrete Structures**

*level:* IV *points value:* 2 *duration:* semester 2

*prerequisites:* except with the permission of the Head of Civil and Environmental Engineering, all earlier years Civil Engineering subjects

*contact hours:* 26 hours of contact plus directed study

*content:* Topics to be chosen from the following: structural concrete and prestressed concrete; use of equivalent loads and load balancing in designing and repairing concrete structures; hyperstatic effects in prestressed concrete structures; design procedures for partially and fully prestressed structures; practical applications of plasticity theory to the design of concrete structures; creep and shrinkage effects in concrete structures; design of slabs and floor systems; bridge girders; precast construction; pretensioned composite construction.

*assessment:* (40%); tutorial work, (60%) exam

#### **6437 Earthquake Engineering**

*level:* IV *points value:* 2 *duration:* semester 2

*prerequisites:* except with the permission of the Head of Civil and Environmental Engineering, all earlier years Civil Engineering subjects

*contact hours:* 26 hours of contact plus directed study

*content:* The course will cover the basic concepts of analysis of structures subject to earthquake loads. Simple examples will be used to illustrate the concepts. Practical aspects of computer analysis will be emphasised throughout the course with students using 'state-of-the-art' commercial software to solve tutorial problems. Special reference will also be made to the Australian Earthquake Code; its use, background and limitations.

*assessment:* to be advised

#### **4244 Finite Element Methods**

*level:* IV *points value:* 2

*availability:* not offered in 1996

*prerequisites:* except with the permission of the Head of Civil and Environmental Engineering, all earlier years Civil Engineering subjects.

*contact hours:* 26 hours of contact plus directed study.

*content:* The finite element method can be used to analyse linear and nonlinear problems for both static and dynamic loads. Static and dynamic analysis of linear-elastic systems is considered here. The various steps involved in finite element analysis are discussed with particular emphasis on the element stiffness matrix formulation. Special consideration is also given to the steps which require engineering judgment, as opposed to those steps which are performed by the analysis software.

*assessment:* to be advised

#### **6853 Special Topics in Structural Engineering IV**

*level:* IV *points value:* 2 *duration:* semester 1 or 2

*prerequisites:* except with the permission of the Head of Civil and Environmental Engineering, all earlier years Civil Engineering subjects

*contact hours:* 26 hours of contact plus directed study

*content:* Advanced topics in structural engineering.

*assessment:* to be advised

### **Group II: Water Engineering**

#### **7643 Advanced Engineering Hydrology**

*level:* IV *points value:* 2

*availability:* not offered in 1996

*prerequisites:* Except with the permission of the Head of Civil and Environmental Engineering, all earlier years subjects in Civil Engineering or Civil and Environmental Engineering.

*contact hours:* 26 hours of contact plus directed study.

*content:* The main emphasis will be placed on the rainfall runoff process and how processes are modelled for use in flood estimation and in low flow hydrology. Aspects of collection and analysis of both rainfall and streamflow data that impinge on engineering decisions resulting from the collection of the data will be discussed.

*assessment:* end of semester exam and tutorial exercises

#### **9064 Advanced Flood Hydrology**

*syllabus details:* see B.E.(Civil & Env.)

#### **7883 Advanced Stochastic Hydrology**

*syllabus details:* see B.E.(Civil & Env.)

#### **1768 Advanced Tropical Hydrology**

*syllabus details:* see B.E.(Civil & Env.)

**4719 Advanced Water Distribution Systems**

level: IV points value: 2 duration: semester 2

*prerequisites:* Except with the permission of the Head of Civil and Environmental Engineering, all earlier years subjects in Civil Engineering or Civil and Environmental Engineering.

*contact hours:* 26 hours of contact plus directed study

*content:* Water distribution systems analysis. Steady state analysis of pipe networks. Alternative formulations of equations. Computer solution techniques. Optimisation of pipe networks using genetic algorithms. Water hammer analysis. Pump transients. Column separation. Water hammer in hydro-electric plants. Water hammer control methods.

*assessment:* exam (60%); tutorial and project work (40%)

**6012 Advanced Water Engineering**

level: IV points value: 2 duration: semester 2

*prerequisites:* except with the permission of the Head of Civil and Environmental Engineering, all earlier years subjects in Civil Engineering or Civil and Environmental Engineering

*contact hours:* 26 hours of contact plus directed study

*content:* Advanced topics in fluid mechanics, hydraulic engineering and groundwater flow analysis including diffusion and turbulence in open channels, cavitation, valves, porous media flow and unsteady open channel flow.

*assessment:* exam (80%); tutorial and project work (20%)

**5980 Advanced Water Resources Management**

*syllabus details:* see B.E.(Civil & Env.)

**9506 Advanced Water Resources Planning**

*syllabus details:* see B.E.(Civil & Env.)

**9043 Special Topics in Water Engineering IV**

level: IV points value: 2 duration: semester 1 or 2

*prerequisites:* except with the permission of the Head of Civil and Environmental Engineering, all earlier years Civil or Civil and Environmental Engineering subjects

*contact hours:* 26 hours of contact plus directed study

*content:* Advanced topics in water engineering.

*assessment:* to be advised

**Group III: Geotechnical Engineering**

**8641 Advanced Foundation Engineering**

level: IV points value: 2 duration: semester 1

*prerequisites:* except with the permission of the Head of Civil and Environmental Engineering, all earlier years Civil or Civil and Environmental Engineering subjects

*contact hours:* 26 hours of contact plus directed study.

*content:* Advanced topics in the design of shallow and deep foundations, including numerical methods; effect of stiffness of strip and raft foundations on settlement control; design of pile foundations for vertical and/or lateral loading; support of excavations; dewatering; effects of construction on geotechnical performance.

*assessment:* exam (50%) and coursework (50%)

**1335 Environmental Geomechanics**

level: IV points value: 2

*availability:* not offered in 1996

*prerequisites:* except with the permission of the Head of Civil and Environmental Engineering, all earlier years Civil or Civil and Environmental Engineering subjects

*contact hours:* 26 hours of contact plus directed study.

*content:* Application of geomechanics principles to soft clay engineering, site characterisation; earth and rockfill dams; reinforced soil; embankment design; accelerated drainage of soil; filter systems for waste disposal sites (compaction and permeability technology, leachate-soil interaction); synthetic lining systems; design of cut-off walls for waste containment.

**5175 Numerical Methods in Geomechanics**

level: IV points value: 2

*availability:* not offered in 1996

*prerequisites:* Except with the permission of the Head of Civil and Environmental Engineering, all earlier years Civil or Civil and Environmental Engineering subjects.

*contact hours:* 26 hours of contact plus directed study.

*content:* Introduction to analysis of problems in geomechanics using numerical methods; introduction to finite element method; elements of theory of elasticity; finite element solution of problems in geomechanics using elastic theory; finite element analysis of inelastic behaviour.

*assessment:* coursework (100%)

**8449 Special Topics in Geotechnical Engineering IV**

*level:* IV *points value:* 2 *duration:* semester 1 or 2

*prerequisites:* Except with the permission of the Head of Civil and Environmental Engineering, all earlier years Civil or Civil and Environmental Engineering subjects.

*contact hours:* 26 hours of contact plus directed study

*content:* Advanced topics in geotechnical engineering.

*assessment:* to be advised

**Group IV: Management Planning**

**5534 Advanced Engineering Management**

*level:* IV *points value:* 2

*availability:* not offered in 1996

*prerequisites:* except with the permission of the Head of Civil and Environmental Engineering, all earlier years Civil or Civil and Environmental Engineering subjects

*contact hours:* 26 hours of contact plus directed study

*content:* The main emphasis will be placed on the process of how decisions are made by groups and how the individual can affect the process. The use of group assignments and workshop sessions highlight why communication skills and good interpersonal skills are essential in engineering organisation.

*assessment:* to be advised

**9309 Systems Planning and Analysis**

*level:* IV *points value:* 2 *duration:* one semester

*availability:* not offered in 1996

*prerequisites:* except with the permission of the Head of Civil and Environmental Engineering all earlier years Civil Engineering or Civil and Environmental Engineering subjects

*contact hours:* 26 hours of contact plus directed study

*content:* Engineering economics and optimisation techniques applied to civil engineering problems, including water resources planning, environmental engineering and transportation. Techniques discussed will include marginal analysis, linear and non-linear programming and integer programming. A number of case studies will be presented.

*assessment:* to be advised

**9969 Special Topics in Management and Planning IV**

*level:* IV *points value:* 2 *duration:* semester 1 or 2

*prerequisites:* Except with the permission of the Head of Civil and Environmental Engineering all earlier years Civil Engineering or Civil and Environmental Engineering subjects

*contact hours:* 26 hours of contact plus directed study.

*content:* Advanced topics in engineering management and planning.

*assessment:* to be advised

**Group V: Environmental Engineering**

**6648 Environmental Engineering IVA**

*syllabus details:* see Level IV B.E.(Civil & Env.)

**4788 Environmental Engineering IVB**

*syllabus details:* see Level IV B.E.(Civil & Env.)

**4338 Groundwater Resources and Contamination**

*syllabus details:* see Level IV B.E.(Civil & Env.)

**8907 Special Topics in Environmental Engineering IV**

*level:* IV *points value:* 2 *duration:* semester 1 or 2

*prerequisites:* Except with the permission of the Head of Civil and Environmental Engineering all earlier years Civil Engineering or Civil and Environmental Engineering subjects

*contact hours:* 26 hours of contact plus directed study.

*content:* Advanced topics in environmental engineering.

*assessment:* to be advised

**8770 Waste Management**

*syllabus details:* see Level IV B.E.(Civil & Env.)

## Group VI: Measurement

### 2298 Engineering Surveying

level: IV points value: 2

availability: not offered in 1996

*prerequisites:* Except with the permission of the Head of Civil and Environmental Engineering, all earlier years Civil or Civil and Environmental Engineering subjects

*contact hours:* 26 hours plus directed study.

*content:* Advanced elements of surveying.

*assessment:* to be advised

## Civil and Environmental Engineering

### Level II

---

#### 3406 Civil Engineering Construction IIA

*syllabus details:* see B.E.(Civil).

#### 1016 Differential Equations and Fourier Series E

*syllabus details:* see B.E.(Chem.)

#### 3147 Engineering Geology

*syllabus details:* see B.E.(Civil)

#### 8954 Environmental Biology I

*syllabus details:* see B.Sc. in the Faculty of Science

#### 3290 Geotechnical Engineering II

*syllabus details:* see B.E.(Civil)

#### 5809 Introduction to Environmental Engineering

level: II points value: 1.5 duration: semester 1

*contact hours:* 24 hours of lectures and tutorials plus labs or field trips.

*content:* The subject serves as an introduction to the field of environmental engineering and allows the student to gain a preliminary understanding of the requirements of the environmental engineer. The subject covers a range of topics which are selected from: legal requirements and regulations in South Australia relating to the environment; the preparation of Environmental Impact Statements; introduction to pollutants and nutrients in water; the treatment of wastewater and the management of solid and

hazardous wastes; air and noise pollution; environmental audits and methods of cleaner production. The subject includes a number of visits to sites of interest around Adelaide.

*assessment:* tutorials (30%); exam (70%)

#### 4569 Laplace Transforms and Probability and Statistical Methods

*syllabus details:* see B.E.(Chem.)

#### 4760 Engineering Modelling and Analysis II

*syllabus details:* see B.E.(Civil)

#### 5740 Plant Ecology E

level: II points value: 3 duration: semester 2

*contact hours:* 24 lectures and 6 tutorials and a one-week field camp.

*content:* Ecology of resources; production, ecology of plants; population ecology of plants; competition and succession; classification of vegetation; history of vegetation in SA and the effects of human influence.

*assessment:* to be advised

#### 2879 Stress Analysis (C)

*syllabus details:* see B.E.(Chemical)

#### 5206 Water Engineering and Design II

*syllabus details:* see B.E.(Civil)

### Level III

---

#### 7223 Ecosystem Modelling for Environmental Management

level: III points value: 3 duration: summer semester

*contact hours:* 16 lectures; 48 hours of practicals

*content:* The subject comprises a series of lectures, computing workshops and self study exercises covering the design and development of ecosystem models. These exercises will provide the student with a methodology for the development of their own models and discuss the ultimate relationship between the real systems, the models and the data upon which they are based. The objectives of this subject are: (a) to impart knowledge about the different types of models which are used to model ecosystems; (b) to impart knowledge on the basic component or elements of a model; (c) to provide students with a modelling dialectic; (d) to develop skills in producing a schematic diagram of a model; (e) to develop skills in the critical assessment of models with reference to their sensitivity

to underlying assumptions and the value of their output given the nature of the data used to parametrise them; (f) to introduce students to models of vegetation systems and population dynamics in order to develop an understanding the role of models in ecosystem management and conservation.

*assessment:* Assessment comprises a modelling assignment and seminar. Students should use the knowledge and skills obtained during this subject to develop a model of a system of their choice. This model should be based upon information obtained from the literature. Assessment will be based on a written report which outlines the objectives of the model, its structure and the data sources used for parametrisation. Students should undertake a critical analysis of the models performance and limitations.

### 5631 Environmental Economics E

*level:* III *points value:* 4 *duration:* full year

*contact hours:* 39 lectures and 19 tutorials

*content:* Introduction to the principles of microeconomics. The basic economic paradigm: unlimited demands and scarce resources. The free market; market failures; externalities in production and consumption; public goods; monopolies. Economic and social decision-making. Distributional impacts of projects including inter-generational effects. The effects of pollution charges and regulation. Depletion and pricing of non-renewable resources. An economic perspective to global environmental issues. Steady state economics.

*assessment:* exams (80%); assignments (20%)

### 7606 Environmental Engineering and Design III

*level:* III *points value:* 3 *duration:* full year

*assumed knowledge:* 5206 Water Engineering and Design II

*contact hours:* 48 hours of lectures, tutorials, and lab work plus design

*content:* Basic hydrological processes in a catchment and their disturbance by human activities. Water pollutants and their sources. Water quality management in natural water bodies. Water and wastewater treatment processes. Environmental design projects.

*assessment:* exam 50%, assignments and design 50%

### 1443 Environmental Geology II

*syllabus details:* see B.Sc. in the Faculty of Science

### 3127 Geotechnical Engineering Design III

*syllabus details:* see B.E.(Civil)

### 9142 Introduction to Microbiology

*level:* III *points value:* 1 *duration:* semester 1

*assumed knowledge:* 6878 Chemistry I or acceptable equivalent

*contact hours:* 10 lectures; 3 two hour practicals over a 3 week period

*content:* This subject introduces fundamental aspects of bacterial structure, physiology and function. Topics covered include: characteristics and anatomy of bacterial cells; nutrition and design of growth media; energy metabolism; fermentations; factors affecting growth of populations; sterilisation and disinfection; aspects of food microbiology and a study of the interaction of bacteria with surfaces.

*assessment:* 30 minute written exam of the lecture material (50%); written reports of practical work (25%); essay (25%)

### 9566 Engineering Management and Planning

*syllabus details:* see B.E.(Civil)

### 9195 Microbiology II

*syllabus details:* see B.Sc. in the Faculty of Science

### 7455 Engineering Modelling and Analysis III

*syllabus details:* see B.E.(Civil)

### 7678 Transport Processes in the Environment

*level:* III *points value:* 2 *duration:* semester 1

*assumed knowledge:* 3018 Process Systems

*contact hours:* 26 lectures and 13 tutorials

*content:* Introduction and basic concepts. Environmental chemicals and properties. Thermodynamics and phase equilibria. Loss Mechanisms. Inter-media transport. Simple exchange models. Air pollution problems. Nuclear chemistry. Environmental modelling. Plume dispersion. Simple Kinetic models.

*assessment:* exam (80%), assignments (20%)

### 8227 Water Engineering and Design III

*syllabus details:* see Civil Engineering

## Level IV

All Level I, II and III subjects to be passed before entering Level IV except by permission of the Head of Civil and Environmental Engineering.

### 7185 Civil Engineering Management IV

*syllabus details:* see B.E.(Civil)

### 6648 Environmental Engineering IVA

*level:* IV *points value:* 2 *duration:* semester 1

*prerequisites:* Except with the permission of the Head of the Civil and Environmental Engineering Department, all earlier years Civil and Environmental Engineering subjects

*contact hours:* 26 hours of lectures, tutorials/technical projects.

*content:* Topics to be selected from: Sustainability and sustainable development, Greenhouse issues, Environmental Impact Assessment. In addition students will undertake an Environmental Audit of a commercial/industrial facility.

*assessment:* assignments (100%)

### 4788 Environmental Engineering IVB

*level:* IV *points value:* 2 *duration:* semester 2

*prerequisites:* Except with the permission of the Head of Civil and Environmental Engineering, all earlier years Civil and Environmental Engineering subjects

*contact hours:* 26 hours of lectures and tutorials

*content:* Topics to be selected from: Soil transport and erosion process. This incorporates both movement due to wind and rain. The design of sedimentation ponds. Project planning to avoid sediment movement. Rehabilitation of mining sites. Water Quality Processes in rivers, lakes and urban areas. The movement of nutrients and other determinants will be included. Diffusion and dispersion. Modelling processes. Coastal environmental issues.

*assessment:* exams (70%); assignments (30%)

### 1774 Environmental Engineering Research Project N

*level:* IV *points value:* 6 *duration:* full year

*prerequisites:* except with the permission of the Head of Civil and Environmental Engineering, all earlier years Civil and Environmental Engineering subjects

*content:* Students work in groups on a research project under the supervision of an academic staff member. They present a short talk, a research seminar and write both a conference paper and a comprehensive research report.

*assessment:* evaluation of research activity, research report, short talk and seminar paper.

### 4659 Environmental Impact Assessment Project

*level:* IV *points value:* 4 *duration:* full year

*prerequisites:* except with the permission of the Head of Civil and Environmental Engineering, all earlier years Civil and Environmental Engineering subjects

*contact hours:* 120 hours of contact and directed study.

*content:* Students will undertake the environmental assessment of a large-scale realistic engineering project.

*assessment:* evaluation of final environmental impact assessment report

### 1233 Introduction to Environmental Law

*level:* IV *points value:* 2 *duration:* semester 1

*contact hours:* 26 hours of lectures and tutorials

*content:* The course examines regulatory mechanisms that address environmental problems and focuses particularly upon regulation of development. Included are: a general introduction to the law and the legal system; the nature of environmental problems in Australia; constitutional responsibilities and powers with respect to environmental planning and protection; land-use planning and protection systems; environmental impact assessment; regulation of pollution and waste disposal; and environmental litigation.

*assessment:* to be advised

### Specialisation subjects

Students must take specialisation subjects to the value of 6 points. Students may, with approval of the Head of Civil and Environmental Engineering, replace one or more Departmental specialisation subjects with appropriate subjects offered by other departments within The University of Adelaide.

The specialisation subjects offered by the Department in any one year will depend on student interest and staff availability, and will be chosen from the following:

### Water Engineering

#### 7643 Advanced Engineering Hydrology

*syllabus details:* see B.E.(Civil)

#### 9064 Advanced Flood Hydrology

*level:* IV *points value:* 2

*availability:* not offered in 1996

*contact hours:* 26 hours of contact plus guided study

*content:* Theory and practice in the application of a number of computer packages which are widely used to solve problems in engineering flood hydrology.

*assessment:* projects and assignments (100%)

**7883 Advanced Stochastic Hydrology**

level: IV points value: 2

availability: not offered in 1996

contact hours: 26 hours of contact plus directed study

content: Topics selected from: fitting probability distributions; parameter estimation; kriging; characteristics of hydrologic time series; synthetic data generation; ARIMA models; long term persistence; seasonal models; multi-site models; artificial neural networks applied hydrology.

assessment: exam (70%); assignments 30%

**1768 Advanced Tropical Hydrology**

level: IV points value: 2 duration: one semester

availability: not available in 1996

contact hours: 26 hours of contact plus directed study

content: Topics to be selected from: differences between tropical hydrology and humid hydrology; hydrometeorology; hydrological processes; small island hydrology; water balance procedures, groundwater hydrology in the tropics.

assessment: exams (50%); assignments (50%)

**4719 Advanced Water Distribution Systems**

syllabus details: see B.E.(Civil)

**6012 Advanced Water Engineering**

syllabus details: see B.E.(Civil)

**5980 Advanced Water Resources Management**

level: IV points value: 2 duration: semester 1

contact hours: 26 hours of contact plus directed study

content: Topics to be selected from: demands on water resources; demand management; yield assessment of surface and groundwater sources; risk; reliability and sustainability issues; multiobjective evaluation of water resource projects.

assessment: exam (70%); assignments (30%)

**9506 Advanced Water Resources Planning**

level: IV points value: 2

availability: not available in 1996

contact hours: 26 hours of contact plus directed study

content: Topics to be selected from: economic, social and environmental issues in water resources development; use of linear, non-linear and dynamic programming in water resources planning; multipurpose river basin schemes; optimum system

operation; capacity expansion models; water quality issues.

assessment: exam (70%), assignments (30%)

**9043 Special Topics in Water Engineering IV**

syllabus details: see B.E.(Civil)

**Geotechnical Engineering**

**8641 Advanced Foundation Engineering**

syllabus details: see B.E.(Civil)

**1335 Environmental Geomechanics**

syllabus details: see B.E.(Civil)

**5175 Numerical Methods in Geomechanics**

syllabus details: see B.E.(Civil)

**8449 Special Topics in Geotechnical Engineering IV**

syllabus details: see B.E.(Civil)

**Management and Planning**

**5534 Advanced Engineering Management**

syllabus details: see B.E.(Civil)

**9969 Special Topics in Management and Planning IV**

syllabus details: see B.E.(Civil)

**9309 Systems Planning and Analysis**

syllabus details: see B.E.(Civil)

**Environmental Engineering**

**4338 Groundwater Resources and Contamination**

level: IV points value: 2

availability: not available in 1996

contact hours: 26 hours of contact plus directed study

content: Groundwater exploration and well technology; aquifer testing; physical and hydrochemical processes; groundwater yield assessment; groundwater flow and solute transport; groundwater modelling and data requirements.

assessment: exam (70%); assignments (30%)

**8907 Special Topics in Environmental Engineering IV**

*syllabus details:* see B.E.(Civil)

**8770 Waste Management**

*level:* IV *points value:* 2 *duration:* semester 2

*contact hours:* 26 hours of contact plus directed study

*content:* Generation, collection and disposal of solid waste; sanitary landfill; incineration; resource conservation and recovery; fuel recovery. Hazardous waste management; types of hazardous waste; treatment technologies; methods of disposal.

*assessment:* exam (70%); assignments (30%)

**1030 Wastewater Engineering**

*level:* IV *points value:* 2 *duration:* semester 1

*contact hours:* 26 lectures and 13 tutorials

*content:* Characteristics of wastewater; effects of pollutants on the aquatic environment; primary secondary and tertiary treatment methods; sludge disposal.

*assessment:* to be advised

**Measurement****2298 Engineering Surveying**

*syllabus details:* see B.E.(Civil)

**Electrical and Electronic Engineering****Level II****9635 Circuit Analysis E**

*level:* II *points value:* 2 *duration:* full year

*prerequisites:* 6714 Electrical Systems

*assumed knowledge:* 9786 Mathematics I; and 3643 Physics I

*contact hours:* 26 hours of lectures, 8 of tutorials

*content:* Kirchhoff's laws, models and element equations, mesh, nodal and mixed methods of analysis, free and forced response of networks, convolution, network theorems, steady state AC methods, transformers, polyphase systems, resonance and complex frequency, two ports, Laplace and Fourier Transform methods.

*assessment:* Principally by written examinations, with homework assignments also contributing to the overall result.

**2772 Electronics IIE**

*level:* II *points value:* 2 *duration:* full year

*prerequisites:* 6714 Electrical Systems

*assumed knowledge:* 9786 Mathematics I, 3643 Physics I

*contact hours:* 26 hours of lectures, 8 of tutorials

*content:* Outline of semi-conductor theory. Analysis of pn junction and mos devices. Discrete devices, their characteristics and equivalent circuits; rectifiers, limiters, clamps and gates. Single stage amplifiers with resistive and reactive loads. Multistage amplifiers with RC, LC and transformer coupling. High Frequency equivalent circuits and frequency response. Class A, AB and B operation, power amplifiers. Feedback amplifiers. Controlled rectifiers. Operational amplifiers: their internal construction and external characterisation; ideal and non-ideal behaviour; common circuit configuration; application to signal amplification, combination, filtering and shaping, and impedance conversion matching and generation.

*assessment:* principally by written examination, with homework assignments also contributing to the overall result

**2733 Fields and Energy Conversion E**

*level:* II *points value:* 2 *duration:* semester 2

*prerequisites:* 6714 Electrical Systems

*assumed knowledge:* 9876 Mathematics I, 3643 Physics I

*contact hours:* 26 hours of lectures, 8 of tutorials

*content:* Energy Storage and Conversion (16 lectures): Physical aspects; the magnetic circuit; AC excitation of magnetic structures; transformers. Electromechanical energy conversion principles, stored energy; forces and torques of electromagnetic origin. Theory and operation of DC machines. Applied Electromagnetics (10 lectures): Definition of field vectors. The conservation equation. Maxwell's equations. General vector theorems. Constitutive relations. Depolarising and demagnetising factors. Gyromagnetism. Electromagnetic boundary conditions. Energy and power transfer. The Poynting vector. Assumptions implicit in lumped circuit theory.

*assessment:* Principally by written examinations, with homework assignments also contributing to the overall result.

**8969 Experimental Electrical Engineering II**

*level:* II *points value:* 2 *duration:* full year

*pre/corequisites:* 9635 Circuit Analysis E, 2733 Fields; and Energy Conversion E, 2772 Electronics IIE

*contact hours:* 6 lectures, 18 tutorials and 54 hours of practical work.

*content:* Electrical safety: the nature of electric shock, the hazards associated with electrical installations, safe working practices, protective devices, earthing. Experimentation: random and systematic errors, error propagation, precision, accuracy and repeatability, standards and calibration, the design, execution and recording of experiments. Practical considerations: limitations of instruments—frequency, loading and waveform effects, techniques for minimising noise. Practical work: familiarisation with laboratory facilities and instrumentation, common procedures and techniques, specific experiments to augment level II theoretical subjects.

*assessment:* laboratory performance (25%); formal report (15%); exam (60%)

### 2653 Physics II

*syllabus details:* see B.Sc. in Faculty of Science

### 1016 Differential Equations and Fourier Series E

*syllabus details:* see B.E.(Chem.)

### 2187 Vector Analysis and Complex Analysis

*syllabus details:* see B.E.(Chem.)

### 4569 Laplace Transforms and Probability and Statistical Methods

*syllabus details:* see B.E.(Chem.)

### 5132 Data Structures and Algorithms

*level:* II *points value:* 2 *duration:* semester 1

*prerequisites:* 9786 Mathematics I; 4651 Engineering Programming I or equivalents

*contact hours:* 2 lectures and 2 hours of practical work a week, plus 1 tutorial a fortnight.

*content:* Records, sets, general files; program development techniques including basic ideas of correctness; stacks and queues; dynamic storage; pointers; linked lists; representation of stacks and queues, general list operations. Notions of complexity and analysis; notion of abstract data type; sets and sequences as examples; searching and information retrieval — illustrating with a 'table' abstract data type; various representations of a 'table' abstract data type; recursion.

*assessment:* 2 hour written exam and programming exercises

## Level III

### 3239 Computer Systems E

*level:* II *points value:* 2 *duration:* semester 2

*prerequisites:* 6714 Electrical Systems; and 4651 Engineering Programming I

*restriction:* not to be counted with 1956 Computer Systems

*contact hours:* 26 lecture hours, 13 hours of tutorial work and practical work

*content:* Binary numbers and arithmetic. Basic computer systems architecture. Instruction set architecture and assembly language. Memory and memory management. Input/output and I/O devices: disks, tapes, serial and network interfaces. Operating systems and management of resources and processes. High level languages and interaction with instruction set architecture. Standards.

*assessment:* principally by written exam, with credit for attendance at tutorials and practical sessions.

### 3085 Electronics IIIE

*level:* III *points value:* 2 *duration:* full year

*prerequisites:* 9635 Circuit Analysis E, 2772 Electronics IIE, 8969 Experimental Electrical Engineering II

*assumed knowledge:* Level II Applied Mathematics subjects listed in B.E. (Elec.) Specific Course Rules

*contact hours:* 26 hours of lectures, 6 of tutorials

*content:* Electronic logic systems, combinational and sequential, Electron devices as switches. Dynamic models of electron devices. Electron devices in circuits. Design principles including operational amplifiers. Communication system principles. Waveform generation and filtering.

*assessment:* Principally by written examinations, with homework assignments also contributing to the overall result.

### 9133 Energy Conversion E

*level:* III *points value:* 2 *duration:* semester 1

*assumed knowledge:* 9635 Circuit Analysis E, 2733 Fields and Energy Conversion E, Level II Applied Mathematics Subjects listed in B.E.(Elect.) and B.E.(Comp. Sys.) Specific Course Rules

*contact hours:* 26 hours of lectures, 6 of tutorials

*content:* Steady state performance of three phase induction and synchronous machines. Single phase motors. Symmetrical components. Principles of variable-speed drives.

*assessment:* Principally by written examinations, with homework assignments also contributing to the overall result.

**7091 Fields Lines and Guides E**

level: III points value: 2 duration: full year

prerequisites: 2733 Fields and Energy Conversion E

assumed knowledge: 2772 Electronics IIE; 9635 Circuit Analysis E; Level II Applied Mathematics subjects listed in B.E.(Elect.) and B.E. (Comp. Sys.) Specific Course Rules

contact hours: 26 hours of lectures, 6 of tutorials

content: An elementary treatment of transmission lines, plane waves, guided waves and radiation using circuit and field concepts where appropriate. An introduction to waveguides and microwave components.

assessment: principally by written examinations, with homework assignments also contributing to the overall result

**9623 Control IIIE**

level: III points value: 2 duration: full year

prerequisites: 9635 Circuit Analysis E

assumed knowledge: 2772 Electronics IIE; Level II Applied Mathematics subjects listed in B.E.(Elect.) and B.E.(Comp.Sys.) Specific Course Rules

contact hours: 26 hours of lectures, 6 of tutorials

content: Transfer functions; transient and steady state analysis; stability; root locus; Bode and Nyquist plots; series compensation using root locus and frequency response techniques. An introduction to discrete time systems, z transform methods, digital filters.

assessment: principally by written examinations, with homework assignments also contributing to the overall result.

**8366 Electrical Project**

level: III points value: 1 duration: semester 2

pre/corequisite: 3085 Electronics IIIE

assumed knowledge: 2772 Electronics IIE; 9635 Circuit Analysis E; Level II Applied Mathematics subjects listed in B.E.(Elect.) and B.E.(Comp. Sys.) Specific Course Rules

contact hours: 4 hours of tutorials and 24 of practical work

content: Design, construction and testing of an electrical system, written report.

assessment: based on project performance and the written report

**1642 Linear Programming and Numerical Analysis**

level: III points value: 2 duration: semester 2

prerequisites: 9786 Mathematics I (Pass Div I) or both 9786 Mathematics I (Pass Div II) and 9595 Mathematics IIM (Pass Div I). With the approval of the Dean or nominee, students may be permitted to enrol concurrently in 9595 Mathematics IIM (provided it is offered) and level II Applied Mathematics subjects.

restrictions: This subject may not be presented towards a degree together with 7416 Operations Research II.

assumed knowledge: 1016 Differential Equations and Fourier Series E

contact hours: 2 lectures per week; 1 tutorial and 1 hour practical per fortnight

content: Linear programming: simplex algorithm; duality; transportation problems. Numerical analysis: numerical solution of ordinary and partial differential equations.

assessment: final exam. A small percentage will be allocated to class exercises and computing. A satisfactory performance in computing exercises is a necessary prerequisite for a pass in this subject.

**2430 Programming Paradigms**

level: III points value: 2 duration: semester 2

prerequisites: 9786 Mathematics I; 4651 Engineering Programming I or equivalents

assumed knowledge: 5132 Data Structures and Algorithms

contact hours: 2 lectures and 2 hours of practical work a week, plus 1 tutorial a fortnight

content: A study of four major programming approaches: imperative, functional, logic, and object-oriented. Imperative paradigms: object binding, procedural abstraction, parameter passing mechanisms, activation record model. Functional paradigms: values, types, higher-order functions, polymorphism, lazy evaluation. Logic paradigms: Prolog, deductive engines, clauses, rules. Object-oriented paradigms: data abstraction, objects, methods, classes, inheritance, polymorphism.

assessment: 2 hour exam and programming exercises

**9753 Digital Systems**

level: III points value: 2 duration: semester 2

prerequisites: 4651 Engineering Programming I and 6714 Electrical Systems

contact hours: 26 hours of lectures, 7 of tutorials

*content:* Number systems, Binary arithmetic and logical operations, maxterms and minterms, combinational logic, simplification of logic, asynchronous and synchronous sequential circuits analysis and synthesis. Computer architecture-basic concepts. Logic in silicon and introductory VLSI design.

*assessment:* written exam

### **8528 Experimental Electrical Engineering III**

*level:* III *points value:* 3 *duration:* full year

*Pre/corequisites:* 3085 Electronics IIIE; 9133 Energy Conversion E; 7091 Fields Lines and Guides E; 9623 Control IIIE; 9753 Digital Systems; 8969 Experimental Electrical Engineering II

*contact hours:* 4 lectures, 19 tutorials and 114 hours of practical work.

*content:* Data acquisition: transducers, isolation techniques, practical requirements for digital/analogue and analogue/digital conversion. Design considerations: design for testability, high-frequency concepts and techniques, circuit board systems, handling of components; solder, wire-wrap and surface mount techniques. Practical work: Computer based instrumentation, specific experiments to augment level III theoretical subjects.

*assessment:* laboratory performance (45%); formal report (15%); exam (40%)

### **1062 Engineering Skills**

*level:* III *points value:* 1 *duration:* full year

*contact hours:* 7 hours on oral communication skills, 32 hours in workshop sessions.

*content:* Oral skills: small-group sessions on construction, delivery and critique of short oral presentations. Workshop skills: Basic machine tools and processes, fabrication techniques for modern production processes.

*assessment:* oral skills 20% on quality of presentation, workshop skills (80%) on performance in workshop activities and written assignments

### **3747 Stress Analysis (E)**

*level:* III *points value:* 1.5 *duration:* semester 1

*contact hours:* 20 lectures, 10 tutorials and 9 practicals

*content:* Topics taken from: mechanical properties of materials; stresses and strains; normal and shear; stress strain relationships; temperature stresses, elastic theory; beams, distribution of stress due to bending, moment-curvature relationships; beams, shear stresses; beams, composite bending stresses; beams, deflections of simply supported and encastre beams by integration; statically indeterminate beams; combined

stresses; failure theories; stress concentration; experimental stress analysis to illustrate the above. All examples throughout the subject will be relevant to Electrical Engineering.

*assessment:* exam; satisfactory completion of practical work

### **1345 Mechanism Design**

*level:* III *points value:* 1.5 *duration:* semester 2

*contact hours:* 13 lectures and 39 hours in the Design Office

*content:* The design process; accuracy of engineering quantities; tolerancing and fits; introduction to reliability and applications of statistics; friction clutches and brakes; power transmission — belts gears and chains; bearings — hydrodynamic, rolling element and rubbing.

*assessment:* (30%) class work, (70%) final exam

---

## **Level IV**

---

### **A Communications and Signals**

#### **1312 Communication Systems**

*level:* IV *points value:* 2 *duration:* full year

*prerequisites:* 1016 Differential Equations and Fourier Series E; 4567 Laplace Transforms, Probability and Statistical Methods; 3085 Electronics IIIE; 8366 Electrical Project; 8528 Experimental Electrical Engineering III; 8056 Experimental Electrical Engineering IIIC

*contact hours:* 1 lecture per week, 5 tutorials

*content:* Communication theory (18 lectures): signals and spectra; signals and linear systems; random signals and noise; analogue modulation systems; digital modulation systems; information theory and coding. Telecommunications network performance (8 lectures): basic queuing theory; packet switched network theory; delay and traffic load measures; congestion control algorithms; dimensioning of circuit switched networks; grade of service and efficiency measures; alternate routing; instability and control algorithms.

*assessment:* written assessment

#### **9913 Signal Processing**

*level:* IV *points value:* 1 *duration:* semester 1

*prerequisites:* 8528 Experimental Electrical Engineering III or 8056 Experimental Electrical Engineering IIIC; 1016 Differential Equations and Fourier Series E; 4567 Laplace Transforms, Probability and Statistical Methods

*contact hours:* 1 lecture per week, 2 tutorials

*content:* Discrete time signals; digital filters; time and frequency resolution; discrete and fast Fourier transforms and convolution; windows.

*assessment:* written exam

### 9334 Advanced Communication Theory

*level:* IV *points value:* 1 *duration:* semester 2

*pre/corequisites:* 1312 Communication Systems and 9913 Signal Processing

*contact hours:* 13 lectures, 2 tutorials

*content:* Detection of signals in noise, classification of signals and receivers, coherent or synchronous detection, matched filters, minimum mean square error filters, decision theory, estimation theory.

*assessment:* written exam

### 1008 Advanced Signal Processing

*level:* IV *points value:* 1 *duration:* semester 2

*pre/corequisites:* 9913 Signal Processing

*contact hours:* 13 lectures, 2 tutorials

*content:* Orthogonal functions expansion of signals, transforms, sources of orthogonal functions, time-bandwidth product, spectral estimation, adaptive signal processing.

*assessment:* written exam

### 3471 Circuit Analysis and Synthesis

*level:* IV *points value:* 1 *duration:* semester 1

*availability:* not offered in 1996

*assumed knowledge:* 3085 Electronics IIIIE; and 9623 Control IIIIE

*contact hours:* 13 hours of lectures and 2 of tutorials.

*content:* Synthesis of passive and active networks; LC and RC immittances, transfer functions, approximation theory and active RC circuits, digital filters, realisations.

*assessment:* written exam

### 5300 Telecommunication Networks

*level:* IV *points value:* 1 *duration:* semester 2

*assumed knowledge:* 3085 Electronics IIIIE, 9623 Control IIIIE

*contact hours:* 1 lecture per week; 2 tutorials

*content:* Modern network structures (5 lectures): transmission and multiplexing techniques; switching technology; signalling; synchronisation. Broadband networks (3 lectures): architecture; protocols;

broadband switching. Mobile radio (5 lectures): architecture; protocols; signalling future (microcellular, PCS).

*assessment:* written exam

### 8692 Biomedical Signal Processing

*level:* IV *points value:* 1 *duration:* semester 2

*availability:* not offered in 1996

*corequisites:* 9913 Signal Processing

*contact hours:* 1 lecture per week; 2 tutorials

*content:* Bio electric phenomena. Genesis of bio-electric signals: EGG, EMG, EEG etc. Biomedical signal processing techniques. Cardiac acoustics. Heart rate variability. Diagnostic ultrasound. Biomedical imaging: cardiac imaging; computer tomography; magnetic resonance imaging. Current research topics.

*assessment:* written exam and assignments

## B Computer Systems Engineering

### 6925 Digital Systems and Microprocessors

*level:* IV *points value:* 1 *duration:* semester 1

*prerequisite:* 9753 Digital Systems

*corequisites:* 5729 Engineering Computing I or 3239 Computer Systems E

*contact hours:* 1 lecture per week; 2 tutorials

*content:* Digital systems: characteristic equations for digital events; application equations and associated design processes; fast processing techniques; stack base architecture; memory interleaving; cache stores; aspects of MSI and LSI circuits. Microprocessors: interfacing aspects of microprocessors; DMA; interrupts; A/D and D/A interfacing; address decoding; instruction sets; addressing modes.

*assessment:* written exam

### 2592 VLSI Implementations

*level:* IV *points value:* 2 *duration:* full year

*prerequisites:* 9753 Digital Systems

*contact hours:* 1 lecture per week; 4 tutorials

*content:* VLSI systems: semiconductor preparation; processing and properties; MOS technology; electrical parameters; switch and gate logic; design rules and fabrication; delay estimates; floor planning; regularised architectures; introduction to simulation, events suitable for integration; system considerations. Reliability: reliability as a performance characteristic; definitions; types of failure; confidence levels;

probability of survival; mtbf; predictions from life test data; maintenance considerations; parallel and standby redundancy; environmental factors; reliability aspects of integrated circuits; yield factors.

*assessment:* written exam

### **5497 Digital Computer Hardware Design**

*level:* IV *points value:* 1 *duration:* semester 2

*pre/corequisites:* 6925 Digital Systems and Microprocessors

*contact hours:* 13 lectures, 2 tutorials

*content:* Bus design, standard bus systems, multiprocessors, RISC and other architectures, systems integration, HDL and RTL approaches to design and physical realisations, control unit design, fault tolerant architectures, testability.

*assessment:* written exam

### **4526 VLSI Laboratory**

*level:* IV *points value:* 1 *duration:* semester 1

*pre/corequisites:* 6925 Digital Systems and Microprocessors and 2592 VLSI Implementations

*contact hours:* 26 hours of practical work

*content:* Practical work to complement the VLSI lectures. Design exercises and subsystem layout using CAD tools.

*assessment:* project report

### **4312 Advanced VLSI**

*level:* IV *points value:* 1 *duration:* semester 2

*pre/corequisites:* 6925 Digital Systems and Microprocessors; and 2592 VLSI Implementations

*contact hours:* 13 lectures, 2 tutorials

*content:* Emerging technologies, floorplanning, silicon computers, clocking schemes, complexity management, algorithm transformation and mapping, testability.

*assessment:* written exam

### **9416 Real Time Systems**

*level:* IV *points value:* 1 *duration:* semester 2

*contact hours:* 13 lectures, 2 tutorials

*content:* Hard and soft real-time computation systems, scheduling theory and realisations for single-processor, multi-processor and distributed systems.

*assessment:* written exam

## **C Electromagnetics**

### **3846 Electromagnetic Engineering**

*level:* IV *points value:* 2 *duration:* full year

*prerequisites:* 7091 Fields Lines and Guides E

*contact hours:* 26 lectures, 5 tutorials

*content:* Introduction and fundamental concepts: Maxwell's equations, Poynting vector, Lorentz reciprocity theorem, elementary antenna theory. Plane waves in lossless and dissipative media, propagation in waveguides, distributed circuit theory, resonant cavities, strip line systems, microwave devices, radiation analysis of wire type antennas, linear arrays and structures with image planes, impedances of wire type antennas.

*assessment:* written exam

### **5650 Advanced Electromagnetic Engineering**

*level:* IV *points value:* 1 *duration:* semester 2

*pre/corequisites:* 3846 Electromagnetic Engineering

*contact hours:* 13 lectures, 2 tutorials

*content:* Advanced electromagnetic concepts and theorems; gyromagnetism; advanced propagation analysis; reciprocity, orthogonality and normal mode expansions; perturbational and variational techniques; numerical analysis techniques; radiation analysis of aperture type antennas; antennas as scattering systems; broadband antenna systems; antenna synthesis techniques.

*assessment:* written exam

### **9451 Electromagnetic Compatibility**

*level:* IV *points value:* 1 *duration:* semester 1

*prerequisites:* 7091 Fields, Lines and Guides E; and 8258 Experimental Electrical Engineering III or 8056 Experimental Electrical Engineering IIIC; 1312 Communication Systems; and 9913 Signal Processing

*contact hours:* 9 lectures, 4 one hour tutorials, 6 laboratory hours

*content:* Introduction to electromagnetic compatibility; emission and susceptibility aspects; radiated and conducted emissions; international standards. Line and broad band spectra; peak and quasi-peak measurements; requirements for pulsed and continuous wave systems. Compliance testing, pre-production testing; and pre-compliance testing. Elementary theory of radiation; properties of simple antennas; receiving behaviour of antennas. Standard antennas for radiated measurements; line conditioning networks for conducted measurements; probes for close field

measurements. Testing environments. Causes of emission problems, techniques for their cure. Practical exercises in conduct of a pre-compliance test; and in location and cure of an emission problem.

*assessment:* written exam

### 1290 Optical Communications

*level:* IV *points value:* 1 *duration:* semester 2  
*contact hours:* 13 lectures, 2 tutorials

*content:* Electro-optic effects and media; benefits from optical communications; optical signal sources and detectors; light wave propagation; modulation techniques; switching techniques; demodulation and mixing; optical instrumentation.

*assessment:* written exam

## D Industrial Power and Control

### 7027 Control IV

*level:* IV *points value:* 1 *duration:* semester 1  
*assumed knowledge:* 9623 Control III E

*contact hours:* 13 hours of lectures and 2 of tutorials

*content:* Performance specifications for control system design. State equations. Controllability and observability. State feedback. Observers. Discrete equivalents of analogue controllers. Discrete transfer function of zero-order hold and plant. Discrete state equations. State feedback and estimators. Design using computer-aided methods.

*assessment:* written exam

### 2283 Power Electronics

*level:* IV *points value:* 1 *duration:* semester 1  
*contact hours:* 13 lectures, 2 tutorials

*content:* Commutation, voltage controllers, controlled rectifiers; inverters. Applications to the control of electrical machines.

*assessment:* written exam

### 6151 Power Systems A

*level:* IV *points value:* 1 *duration:* semester 1  
*prerequisites:* 9133 Energy Conversion E

*contact hours:* 1 lecture per week; 2 tutorials per week

*content:* Network representation, components of power systems, network analysis and load flow, power and frequency control, voltage and reactive power control, fault calculations.

*assessment:* written exam

### 1560 Advanced Control

*level:* IV *points value:* 1 *duration:* semester 2  
*pre/corequisites:* 7027 Control IV

*contact hours:* 13 lectures, 2 tutorials

*content:* Stochastic processes, stochastic state models, prediction and filtering theory, identification, adaptive control.

*assessment:* written exam

### 6218 Machine Dynamics A

*level:* IV *points value:* 1 *duration:* semester 2  
*prerequisites:* 9133 Energy Conversion E

*contact hours:* 1 lecture per week; 2 tutorials

*content:* The machine as a system element. Analysis by direct and transformed variables, reference frames, the general primitive machine. The machine in state, space: small- and large-signal analysis. Case study — the power station generator: controllers, network interconnection; model reduction; dynamics and transient stability methods.

*assessment:* written exam

## E Project work

### 2356 Project A

*level:* IV *points value:* 2 *duration:* semester 1  
*prerequisites:* all subjects at Level III in the Specific Course Rules for the degree

*assumed knowledge:* Level IV subjects (concurrently)

*contact hours:* 80 hours of practical work.

*content:* Each candidate is required to conduct an investigation involving a theoretical survey and the design, development and testing of hardware and/or software. The results of the investigation are to be presented as a written report, and also as a seminar and demonstration of equipment where appropriate.

*assessment:* based on the performance in the project, the written report and the seminar presentation

### 7345 Project B

*level:* IV *points value:* 3 *duration:* semester 2  
*prerequisites:* all subjects at Level III in the Specific Course Rules for the degree

*assumed knowledge:* Level IV subjects (concurrently)

*contact hours:* 120 hours of practical work

*content:* Each candidate is required to conduct an investigation involving a theoretical survey and the design, development and testing of hardware and/or

software. The results of the investigation are to be presented as a written report, and also as a seminar and demonstration of equipment where appropriate.

*assessment:* based on the performance in the project, the written report and the seminar presentation

### 7286 Special Studies in Electrical Engineering

*level:* IV *points value:* 1 *duration:* semester 1 or 2

*contact hours:* 13 lectures; 2 tutorials

*assumed knowledge:* as prescribed by the Head of Electrical Engineering

*content:* Special topics in Electrical Engineering as determined by the Head of the Electrical Engineering Department. This subject may be offered from time to time and will be taught by visiting academic/s. Syllabus details will be published by the Department as the need arises.

*assessment:* as determined by the Head of the Department of Electrical Engineering

## F Professional Practice

### 4053 Management

*level:* IV *points value:* 2 *duration:* full year

*contact hours:* 26 hours of lectures

*content:* Law for Engineers; Contracts, Product liability, negligence. Industrial property. Personnel and Industrial relations, occupational safety, trade unions, and topics selected from: decision making, management accounting, industrial development, international trade, organisation structures, nature of management, patents, trade practices, banking and finance, market research, advertising, etc

*assessment:* written exam

### 6341 Essays and Specialist Lectures

*level:* IV *points value:* 1 *duration:* full year

*contact hours:* 20 hours of lectures

*content:* Specialist lectures will be given by practising engineers from industry and government establishments on topics such as the operation of power systems, television techniques, telecommunications, signal processing and radar. The subject materials of these lectures will form part of the required background for written assignments.

*assessment:* written assignments involving reports, proposals and commentaries

## Computer Systems Engineering

### Level II

#### 9289 Physics IIE

*level:* II *points value:* 4 *duration:* full year

*assumed knowledge:* 3663 Physics I; 9786 Mathematics I; concurrent 2187 Vector Analysis and Complex Analysis

*contact hours:* 50 hours of lectures, 24 of tutorials and 27 of practical work

*content:* Electromagnetism, electrostatics, electric and magnetic fields in material media, electromagnetic potential. Maxwell's equations. Relativity: space-time structure, four-vectors. Optics: lenses and aberrations, interference, polarisation, crystal optics, instrumentation. Introduction to classical and statistical thermodynamics. Electro-optics and photonics: the physics of the interface between optics and electronics and introduction to quantum and non-linear optics, with the objective of understanding modern devices such as light emitting diodes, semiconductor lasers, optical detectors, optical switching and modulation. Examples drawn from current research topics in optical sensing, computation and image processing.

*assessment:* end of semester written exams; laboratory work; assignments and tests

#### 3239 Computer Systems E

*syllabus details:* see B.E.(Elect.), Level III

The following Level II subjects are common to the course in Electrical and Electronic Engineering:

#### 5132 Data Structures and Algorithms

*syllabus details:* see B.E.(Elect.)

#### 2430 Programming Paradigms

*syllabus details:* see B.E.(Elect.)

#### 9635 Circuit Analysis E

*syllabus details:* see B.E.(Elect.)

#### 2772 Electronics IIE

*syllabus details:* see B.E.(Elect.)

#### 2733 Fields and Energy Conversion E

*syllabus details:* see B.E.(Elect.)

**8969 Experimental Electrical Engineering II***syllabus details:* see B.E.(Elect.)**2187 Vector Analysis and Complex Analysis***syllabus details:* see B.E.(Chem.)**1016 Differential Equations and Fourier Series E***syllabus details:* see B.E.(Chem.)**4569 Laplace Transforms and Probability and Statistical Methods***syllabus details:* see B.E.(Chem.)**Level III****1234 Compiler Construction and Project***level:* III *points value:* 3 *duration:* semester 1*prerequisites:* 3239 Computer Systems E; 5132 Data Structures and Algorithms; either a Pass Div II in 9786 Mathematics I or a Pass Div I in 3617 Mathematics IM*assumed knowledge:* 2430 Programming Paradigms*contact hours:* 2 lectures and 4 hours of practical work a week; 1 tutorial every 3 weeks*content:* The structure of compilers: lexical analysis; syntax analysis (top-down and bottom-up techniques); environmental handling; the handling of context-sensitive and context-free errors; type checking and code generation. Run-time support for ALGOL-like languages, including storage management. BNF languages and grammars. This subject is closely coupled with the writing of a large, compulsory programming project.*assessment:* 2 hour exam; compulsory project**8056 Experimental Electrical Engineering IIIC***level:* III *points value:* 2.5 *duration:* full year*pre/corequisites:* 3085 Electronics IIIE, 9133 Energy Conversion E, 7091 Fields Lines and Guides E, 9623 Control IIIE, 9753 Digital Systems, 8969 Experimental Electrical Engineering II*contact hours:* 4 lectures, 16 tutorials and 96 hours of practical work*content:* Data acquisition: transducers, isolation techniques, practical requirements for digital/analogue and analogue/digital conversion. Design considerations: design for testability, high-frequency concepts and techniques, circuit board systems, handling of components; solder, wire-wrap and surface

mount techniques. Practical work: Computer based instrumentation, specific experiments to augment level III theoretical subjects.

*assessment:* laboratory performance (45%); formal report (15%) exam (40%)**3655 Numerical Methods***level:* II *points value:* 2 *duration:* semester 2*prerequisites:* either a Pass Div I in 9276 Computer Science I, or a Pass Div I in 7780 Computational Methods I, or a Pass Division I in 4651 Engineering Programming I; either a Pass Div II in 9786 Mathematics I, or a Pass Div I in 3617 Mathematics IM*contact hours:* 2 lectures; 2 hours of practical work a week; 1 tutorial a fortnight*content:* Floating point numbers, representation, subtractive cancellation, machine epsilon. Solution of non-linear equations by fixed point iteration methods. Approximation of functions by polynomial and spline functions. Methods of numerical integration, simple and composite rules, Numerical solution of differential equations.*assessment:* 2 hour written exam; programming exercises**4468 Operating Systems***level:* III *points value:* 2 *duration:* semester 2*prerequisites:* 3239 Computer Systems E; either a Pass Div II in 9786 Mathematics I or a Pass Div I in 3617 Mathematics IM*contact hours:* 2 lectures and 2 hours of practical work a week; 1 tutorial every 3 weeks*content:* OS purposes: resource management and the extended virtual computer; historical development. Processes: critical sections and mutual exclusion; semaphores, monitors, classical problems, deadlock, process scheduling. Input and Output: hardware and software control; disks; terminals; clocks. Memory management: multiprocessing needs; swapping; virtual memory; paging and segmentation; page replacement. File system: operations, implementation; performance; protection.*assessment:* 2 hour exam; exercises**2382 Programming Techniques***level:* III *points value:* 2 *duration:* semester 1*prerequisites:* pass in 5132 Data Structures and Algorithms; either a Pass Div II in 9786 Mathematics I or a Pass Div I in 3617 Mathematics IM*restriction:* cannot be counted towards a degree together with 1006 Programming and Data Structures B

*contact hours:* 2 lectures and 2 hours of practical work a week; 1 tutorial every 3 weeks

*content:* Sorting and searching algorithms, emphasising correctness and complexity analysis. File structures. Graphs: construction; traversal; topological sorting; applications. Dynamic storage management. Program development: methods of specification; design, implementation, testing and debugging, case studies.

*assessment:* 2 hour exam; programming exercises

**The following Level III subjects are common to the course in Electrical and Electronic Engineering:**

**3085 Electronics IIIE**

*syllabus details:* see B.E.(Elect.)

**9133 Energy Conversion E**

*syllabus details:* see B.E.(Elect.)

**7091 Fields Lines and Guides E**

*syllabus details:* see B.E.(Elect.)

**9623 Control IIIE**

*syllabus details:* see B.E.(Elect.)

**8366 Electrical Project**

*syllabus details:* see B.E.(Elect.)

**9753 Digital Systems**

*syllabus details:* see B.E.(Elect.)

**1062 Engineering Skills**

*syllabus details:* see B.E.(Elect.)

**3747 Stress Analysis (E)**

*syllabus details:* see B.E.(Elect.)

**1345 Mechanism Design**

*syllabus details:* see B.E.(Elect.)

**Level IV**

All subjects comprising Level IV of the Computer Systems Engineering course are drawn from Level IV subjects in Electrical and Electronic Engineering and Level III subjects in Computer Science, as specified in the Specific Course Rules.

For syllabus details of the Electrical and Electronic Engineering subjects, see under B.E.(Elect.).

The computer science subjects are listed below.

**2328 Computer Networks and Applications**

*level:* III *points value:* 2 *duration:* semester 1

*prerequisites:* 3239 Computer Systems E and 5132 Data Structures and Algorithms; either a Pass Div II in 9786 Mathematics I or a Pass Div I in 3617 Mathematics IM

*contact hours:* 2 lectures and 2 hours of practical work a week; 1 tutorial every 3 weeks

*content:* Overview of digital communications, network topologies and switching techniques; the OSI reference model: detailed discussion of services and protocols of the seven layers; LAN, MAN and WAN technologies: Ethernet, token bus, token ring, FDDI, DQDB, ISDN, B-ISDN and ATM; internetworking: Devices (bridges, routers, gateways) and issues; the Internet and its protocols (IP, TCP, UDP); network applications and their protocols (e.g., SNMP, Telnet, FTP, SMTP, HTTP, NFS).

*assessment:* 2 hour exam; practicals and exercises

**6263 Software Engineering and Project**

*level:* III *points value:* 3 *duration:* semester 2

*prerequisites:* 5132 Data Structures and Algorithms; either a Pass Div II in 9786 Mathematics I or a Pass Div I in 3617 Mathematics IM

*assumed knowledge:* 2382 Programming Techniques

*contact hours:* 2 lectures and 2 hours of practical work a week; 1 tutorial every 3 weeks

*content:* This is a first subject in software engineering and provides an introduction to the production of high quality software solutions to large tasks. Among the topics covered in this subject are the following: models of the software life-cycle; requirements analysis and specification; program design techniques and paradigms, software specification techniques; configuration management and version control; quality assurance, integration and testing; project management; computer-aided software engineering and integrated software engineering environments.

*assessment:* 1 two hour exam; large project

## Information Technology and Telecommunications

### Level II

#### 3429 Circuit Analysis EE

*level:* II *points value:* 1.5

*availability:* not offered in 1996

*assumed knowledge:* Electrical Systems, Electrical Systems B

*contact hours:* 1.5 hours of lectures per week, 0.5 hours of tutorials per week

*content:* Signals and sources. Revision of steady-state a.c. concepts. Three-phase circuits. Response to unit-step forcing functions: natural and forced responses. Systematic analysis of networks: network theorems. Complex frequency and generalised phasors. Frequency response: resonance, scaling, Bode diagrams. Magnetically coupled circuits. Application to circuits of Fourier series and Laplace transform techniques.

*assessment:* assignments and examination

#### 1956 Computer Systems

*level:* II *points value:* 2 *duration:* semester 1

*prerequisites:* a Pass Div I in 9276 Computer Science I as a prerequisite, or 6733 Concepts of Computer Science as a corequisite

*assumed knowledge:* 9786 Mathematics I or 3617 Mathematics IM

*contact hours:* 2 lectures and 2 hours of practical work a week, plus 1 tutorial a fortnight

*content:* instruction sets, assembler programming, running programs, CPU organisation, memory hierarchy, input/output devices, controllers and drivers, buses, networks, operating system services.

*assessment:* 2 hour exam, compulsory practicals, exercises

#### 5132 Data Structures and Algorithms

*syllabus details:* see B.E.(Elec.)

#### 3169 Database and Information Systems

*level:* II *points value:* 2 *duration:* semester 2

*prerequisites:* a Pass Div I in 9276 Computer Science I as a prerequisite, or 6733 Concepts of Computer Science as a corequisite, or, for B.Inf.Sc. students only, 7780 Computational Methods I as a prerequisite

*assumed knowledge:* 9786 Mathematics I or 3617 Mathematics IM

*restriction:* cannot be counted toward a degree together with the previously offered 2687 Databases and Information Systems

*contact hours:* 2 lectures and 2 hours of practical work a week, plus 1 tutorial a fortnight

*content:* This subject is concerned with the construction of relational databases. The representation of data as normalised tables is a major theme. The major vehicle is SQL, 1993 version, with the addition of a significant amount of Cobol to illustrate alternatives. The bridging product ESQL will also be discussed. Topics related to the optimisation of very large databases may be mentioned where relevant and a description will be given of some implementation and operational problems.

*assessment:* 2 hour exam, completion of practical work, submission of written tutorials.

There may be a practical component to the exam.

#### 1016 Differential Equations and Fourier Series E

*syllabus details:* see B.E.(Chem.)

#### 4107 Introduction to Mathematical Statistics II

*syllabus details:* see B.Sc. in the Faculty of Mathematical and Computer Sciences

#### 1996 Electronics IIEE

*level:* II *points value:* 1.5 *duration:* one semester

*availability:* not offered in 1996

*assumed knowledge:* Electrical Systems, Electrical Systems B

*contact hours:* 1.5 hours of lectures per week, 0.5 hours of tutorials per week

*content:* Signals, amplifiers and models. Power supply regulation. Transistor data and h-parameters. Characteristics, modelling and amplifier design using the major transistor families: Field effect transistors: MOSFET, JFET, MESFET types. Bipolar transistors: BJT, BiCMOS. Multistage amplifiers, class A, AB and B operation. Power amplifier design, power DFETs. Operational amplifiers: V to I and impedance converters, nonideal characteristics, current sources, internal structure, basic filter design.

*assessment:* assignments and examination

#### 3655 Numerical Methods

*syllabus details:* see B.E. (Comp.Systems)

**9877 Open Systems and Client/Server Computer**

level: II points value: 2 duration: Semester 2

prerequisites: Pass Div I in 9276 Computer Science I, 4651 Engineering Programming I or 1332 Engineering Programming IE

contact hours: 2 lectures per week, 2 hours practical per week, 1 tutorial per fortnight

content: Topics covered: introduction to C programming, operating systems interfaces, Unix system services and libraries, X-windows, Motif, user interface programming, network services and interfaces, Internet protocols and programming, client/server model, client/server programming

assessment: examination and compulsory practicals

**7416 Operations Research II**

syllabus details: see B.Sc. in the Faculty of Mathematical and Computer Science

**5891 Professional Engineering Skills**

level: II points value: 1

availability: not offered in 1996

contact hours: 1 one hour lecture per week, 0.5 tutorials per week, plus 5 days workshop practice

content: Basic workshop processes. Communication skills: written and oral. Problem solving skills.

assessment: assignments and practical performance

**2430 Programming Paradigms**

syllabus details: see B.E.(Elec.)

**4614 Signals and Systems II**

level: II points value: 1.5

availability: not offered in 1996

assumed knowledge: Electrical Systems, Electrical Systems B

contact hours: 1.5 hours of lectures per week and 0.5 hours of tutorials per week

content: Classification of signals and systems: continuous and discrete, linear time-invariant systems. Representation in terms of impulses, convolution. Causality and stability concepts. Block diagram representation. Fourier Analysis of continuous-time signals and systems: representation of periodic and aperiodic signals. Properties of the Fourier transform; convolution and modulation. Frequency response of first-order and second-order systems. Fourier analysis of discrete-time signals and systems. Analysis of

characterisation of LTI systems using Laplace Transform methods: system transfer functions, pole-zero representation, difference equation characterisation, transfer function of interconnected systems.

assessment: assignments and examination

**2187 Vector Analysis and Complex Analysis**

syllabus details: see B.E.(Chem.)

---

**Level III**

---

**2328 Computer Networks and Applications**

syllabus details: see B.E.(Comp.Sys.)

**6991 Engineering Technology and Systems**

level: III points value: 2.5 duration: full year

availability: not offered in 1996

assumed knowledge: Signals and Systems 2

contact hours: 1 one hour lecture per week and 0.5 hours tutorial per week

content: Case studies of significant advances in engineering technology and the role of engineers as designers and managers. Principles of systems engineering and project management. Leadership and team skills. Group project to exercise planning, organisational and communication skills.

assessment: assignments, project work and examination

**5622 Microprocessor Systems**

level: III points value: 1.5

availability: not offered in 1996

assumed knowledge: Logic Design, Computer Systems

content: Review of computer architecture. Microprocessor systems organisation. Memory types; I/O examples. Motorola 68000 bus interface, address decoding, handshaking, examples. Exceptions and interrupts. Interrupt hardware and service routines. Principles of direct memory access. DMA on the 68000. DMA controllers and programming. Interfacing and programming for real-time systems. Selected topics from: A/D and D/A conversion, bus-oriented system design, microcontrollers, special purpose architectures, coprocessors, software development in high-level languages, debugging tools and techniques.

assessment: assignments, practical work and examination

**2314 Optimisation III**

*syllabus details:* see B.Sc. in the Faculty of Mathematical and Computer Sciences

**2382 Programming Techniques**

*syllabus details:* see B.E.(Comp.Sys.)

**2208 Random Processes III**

*syllabus details:* see B.Sc. in the Faculty of Mathematical and Computer Sciences

**2962 Signals and Systems III**

*level:* III *points value:* 2

*availability:* not offered in 1996

*assumed knowledge:* Signals and Systems 2

*contact hours:* 1 one hour lecture per week and 0.5 hours of tutorials per week

*content:* Analog filter design: frequency and impedance scaling, ideal filter characteristics, frequency transformations (lowpass, bandpass, highpass, bandstop), frequency response characteristics (Butterworth, Chebyshev, elliptic). Active filters: design and synthesis. Switched-capacitor filters. Random signals and systems: revision of probability and probability density functions, functions of random variables. Moments and conditional statistics. Stochastic processes (correlation, covariance, stationarity, ergodicity). Spectral analysis (correlation and spectra, linear systems, factorisation and innovations). Noise (white noise, coloured noise, shot noise, thermal noise). Applications to matched filters, modulation, sampling theory

*assessment:* assignments and examination

**6263 Software Engineering and Project**

*syllabus details:* see B.E.(Comp.Sys.)

---

**Level III or Level IV**

---

**9811 Advanced Programming Paradigms**

*level:* III *points value:* 2 *duration:* semester 2

*prerequisites:* 5132 Data Structures and Algorithms; either a Pass Div II in 9786 Mathematics I or a Pass Div I in 3617 Mathematics IM

*assumed knowledge:* 2430 Programming Paradigms and 2382 Programming Techniques

*contact hours:* 2 lectures and 2 hours of practical work a week, plus 1 tutorial every 3 weeks

*content:* Advanced functional programming in Miranda; the lambda-calculus and combinators; graph-

reduction implementations; stream processing in Scheme (a dialect of Lisp); lazy and strict evaluation; coroutines in functional and imperative paradigms. Parallel programming: shared memory process model; message passing; data parallel programming; parallel functional languages and implicit parallelism.

*assessment:* 2 hour exam, practicals, exercises

**6378 Artificial Intelligence**

*level:* III *points value:* 2 *duration:* semester 1

*prerequisites:* 5132 Data Structures and Algorithms; either a Pass Div II in 9786 Mathematics I or a Pass Div I in 3617 Mathematics IM

*contact hours:* 2 lectures and 2 hours of practical work a week, plus 1 tutorial every 3 weeks

*content:* AI methodology and fundamentals; description matching and goal-reduction; ANALOGY; and/or trees; exploiting natural constraints: Waltz algorithm; search: hill-climbing, beam, best-first, A\*; minimax procedure and alpha-beta pruning for game-playing; learning: parameter-adjustment and Winston near-miss/reinforcement procedure; means-end analysis and GPS; rule-based systems: forward- and backward- chaining, MYCIN, Xcon; generate and test paradigm with Dendral. Representation issues: inheritance, demons, defaults, perspectives, frames, primitives; aspects of Prolog; neural networks: recurrent backpropagation technique.

*assessment:* 2 hour exam, practicals and exercises

**5141 Computer Architecture**

*level:* III *points value:* 2 *duration:* semester 2

*prerequisites:* 1956 Computer Systems and 5132 Data Structures and Algorithms; either a Pass Div II in 9786 Mathematics I or a Pass Div I in 3617 Mathematics IM

*contact hours:* 2 lectures and 2 hours of practical work a week, plus 1 tutorial every 3 weeks

*content:* Fundamentals of computer design; quantifying cost and performance; instruction set architecture; program behaviour and measurement of instruction set use; processor datapaths and control; pipelining, handling pipeline hazards; memory hierarchies and performance; I/O devices, controllers and drivers; I/O and system performance; multiprocessors and special purpose processors.

*assessment:* 2 hour exam, exercises and practicals

**4468 Operating Systems**

*syllabus details:* see B.E.(Comp.Sys.)

## Level IV

---

### 7192 Communications Theory

level: IV points value: 1 duration: semester 1

availability: not offered in 1996

assumed knowledge: Signals and Systems 2, Signals and Systems 3, Electronics 3E

content: The applications of Fourier methods, linear systems theory and random signals to communications systems. Analogue modulation systems: baseband transmission, suppressed carrier, vestigial sideband. Digital modulation systems; Baseband systems, errors due to noise, the receiver filter. Carrier systems: amplitude, phase and frequency shift keying. Pulse code modulation: quantisation noise, transmission bandwidth, bit errors, companding. Information theory; information content, joint and conditional entropy, channel capacity, source coding, channel capacity of continuous channels.

assessment: assignments and examination

### 5497 Digital Computer Hardware Design

syllabus details: see B.E.(Elect.)

### 7437 Engineering and Business

level: IV points value: 3

availability: not offered in 1996

contact hours: 2 hours of lectures per week

content: Law for engineers: contracts, product liability, negligence industrial property. Personnel and industrial relations: occupational safety, trade unions, organisational structures. Design for manufacture: fabrication processes, fault tolerant design, testability. The business environment: elements of management accounting. The professional engineer: responsibilities, ethical issues.

assessment: assignments and examination

### 1290 Optical Communications

syllabus details: see B.E. (Elect.)

### 4274 Project Work

level: IV points value: 5

availability: not offered in 1996

contact hours: 200 hours

content: Each candidate is required to conduct investigations involving theoretical surveys and the design, development and testing of hardware and/or software. The results are presented in written report

form, by seminar and, where appropriate, demonstration of the completed work.

assessment: by performance during the project work, and assessment of written reports and seminar presentations

### 9416 Real Time Systems

syllabus details: see B.E.(Elect.)

### 4506 Reliability and Quality Control

level: IV points value: 2

availability: not offered in 1996

assumed knowledge: Laplace Transforms and Probability and Statistics

contact hours: 1 two hour lecture per week and 0.3 hours tutorial per week

content: Reliability; definitions, types of failure, confidence levels, mtbf concepts, predication of reliability from life test data. Quality control and assurance: definition of quality, data presentation, quality control methods. Total quality management: measurement and audit methods. Quality improvement.

assessment: assignments, project work and examination

### 9913 Signal Processing

syllabus details: see B.E.(Elect.)

### 4485 Teletraffic Models

points value: 2

duration: semester 1

content: Traffic streams. Loss and delay systems. Communications networks. Loss networks. Aim: to introduce students to fundamental methods of the modelling of telecommunication systems. Objectives: on completion of this subject, students should be able to understand how to model traffic streams using stochastic models; and be familiar with basic methods used to analyse traffic congestion and loss in telecommunication networks.

assessment: exam 50%, assignments 50%

**Mechanical Engineering****Level II****1016 Differential Equations and Fourier Series E**

*syllabus details:* see B.E.(Chem.)

**2187 Vector Analysis and Complex Analysis**

*syllabus details:* see B.E.(Chem.)

**7567 Numerical Analysis and Probability and Statistics**

*level:* II *points value:* 2 *duration:* semester 2

*prerequisites:* 9786 Mathematics (Pass Div I) or both 9786 Mathematics I (Pass Div II) and 9595 Mathematics IIM (Pass Div I). With the approval of the Dean or nominee, students may be permitted to enrol concurrently in 9595 Mathematics IIM (provided it is offered) and level II Applied Mathematics subjects

*contact hours:* 2 lectures and 1 tutorial per week; 1 practical per fortnight

*content:* Numerical analysis: numerical solution of ordinary and partial differential equations (14 lectures). Probability and statistical methods sample mean and variance, random variables, distribution, quality control, fitting straight lines (16 lectures).

*assessment:* Class work, plus a final examination.

**1360 Computational and Experimental Techniques I**

*level:* II *points value:* 1.5 *duration:* full year

*contact hours:* 10 lectures, 60 hours computing, laboratory work and report writing

*content:* Lecture series: Laboratory safety, measurement techniques, report writing, introduction to engineering computing, computer hardware, Unix and DOS operating systems, engineering applications software and personal computer based software applications.

Practical sessions: computing workshop sessions will provide experience with using applications software, operating systems and an introduction to personal computer hardware. The experimental program will illustrate principles of Fluid mechanics, Thermodynamics and other aspects of the Mechanical Engineering course.

*assessment:* continuous assessment based on computing assignments and laboratory reports and log book entries

**7872 Design for Function**

*level:* II *points value:* 1.5 *duration:* semester 1

*contact hours:* 13 lectures and 39 hours in the Design Office.

*content:* The design process; sources of design information; accuracy of engineering quantities; introduction to reliability and applications of statistics; tolerancing and fits; friction clutches and brakes; power transmission belts, gears and chains; rubbing, rolling element and hydrodynamic bearing selection and design.

*assessment:* a combination of assignments and final exam

**6791 Design Project (Level II) N**

*level:* II *points value:* 1.5 *duration:* semester 1

*contact hours:* 39 hours in the Design Office

*content:* Group design/build/test project involving: conceptual embodiment and detail design; sources of design information; material selection; fabrication methods; troubleshooting; system development; group dynamics; project organisation.

*assessment:* achievement of design goals; concept report; final report.

**5815 Electrical Circuits and Machines**

*level:* II *points value:* 1.5 *duration:* semester 1

*contact hours:* 26 lectures, 12 tutorials and 12 hours of practical work.

*content:* Transient and steady state circuit analysis, magnetic circuits, direct current machines, synchronous machines, transformers and induction motor. Practical work in the laboratory is designed to illustrate the subject matter of the lectures.

*assessment:* Principally by written examinations, with laboratory work and homework assignments also contributing to the overall result. A satisfactory standard in the laboratory work is required (Regulation 5b).

**8781 Fluid Mechanics I**

*level:* II *points value:* 1.5 *duration:* semester 2

*assumed knowledge:* 3643 Physics I; 9786 Mathematics I

*contact hours:* 26 hours of lectures/tutorials and practical work as part of 1360 Computational and Experimental Techniques I

*content:* Basic fluid mechanics including: kinematics and dynamics of fluid flows; conservation laws applied to fluid flow; Euler, Bernoulli, Navier-Stokes

equations; dimensional analysis; differential and integral flow analysis; flow visualisation.

*assessment:* a combination of assignments and final exam

### 4103 Machine Dynamics

*level:* II *points value:* 1.5 *duration:* semester 2

*contact hours:* 26 hours of lectures and tutorials, laboratory and practical work as part of 1360 Computational and Experimental Techniques 1

*assumed knowledge:* 2391 Dynamics

*content:* Acceleration in mechanisms/linkages; balancing of rotating masses; gear trains; flywheels; crank effort diagrams, force analysis of plane mechanisms; kinematics and dynamics of spur, bevel, helical and worm gearing; balancing of reciprocating masses.

*assessment:* a combination of assignments and final exam

### 6231 Manufacturing Engineering 1

*level:* II *points value:* 1.5 *duration:* semester 2

*contact hours:* 26 lectures

*content:* Manufacturing past, present and future; introduction to the manufacturing function. Introduction to manufacturing processes; economics of machine operations; Theory of manufacturing processes. Design for manufacture.

*assessment:* a combination of assignments and final exam

### 8748 Mechanical Properties of Materials

*level:* II *points value:* 1.5 *duration:* semester 2

*assumed knowledge:* 6866 Materials I

*contact hours:* 26 lectures

*content:* Elastic properties of materials: measurement; atomic basis; selection; and applications. Plastic properties of materials: measurement; atomic basis; dislocations and strengthening; continuum plasticity; selection and applications. Plasticity and fracture at elevated temperatures: creep measurement; atomic basis; thermal activation and diffusion; high temperature materials - selection and applications. Fracture of materials: measurement of toughness and fracture toughness; fatigue fracture; micro-mechanisms of fracture. Surface properties of materials: oxidation; corrosion; friction and wear.

*assessment:* a combination of assignments, laboratory work, and written exam

### 2137 Stress Analysis and Design

*level:* II *points value:* 2 *duration:* semester 1

*assumed knowledge:* Level 1 2391 Dynamics, 6581 Statics

*contact hours:* 26 lectures, 13 3-hour design office/tutorial sessions

*content:* Concepts of stress, transformation of stress and strain, theories of elastic failure, stress concentration and fatigue failure, pure bending, deflection of beams, torsion, buckling of columns, springs, shafts, keys, splints, pins, bolted joints and welded joints.

*assessment:* a combination of assignments and final exam

### 1376 Thermodynamics I

*level:* II *points value:* 1.5 *duration:* semester 1

*assumed knowledge:* 9786 Mathematics I; 5945 Physics IE or 5599 Physics IHE

*contact hours:* 26 hours of lectures/tutorials; laboratory work and one industrial visit as part of 1360 Computational and Experimental Techniques I

*content:* An introduction to mechanical engineering thermodynamics dealing with the application of the first and second laws of thermodynamics to the thermodynamic design and performance analysis of typical thermo-mechanical plant using condensable vapours and gases as the working fluid.

*assessment:* a combination of mid-semester tests, tutorial exercises, and final exam

### 9049 Workshop Practice (Mechanical) N

*level:* II *points value:* 1

*duration:* one week between semester 1 and semester 2 (apply as full year)

*contact hours:* approximately 40 hours

*content:* Hands-on experience with manufacturing processes. Use of milling machines, lathes and NC machines.

### 2452 Automatic Control I

*level:* II *points value:* 1.5 *duration:* semester 2

*contact hours:* 26 hours of lectures and tutorials, laboratory work as part of CET1

*assumed knowledge:* 1016 Differential equations and Fourier Series E

*content:* Overview and history of feedback control; models of dynamic systems, including block diagrams and Laplace transforms; characteristics of dynamic response, including transfer functions and poles and

zeroes; principles of feedback control, including types of control and stability considerations; frequency response design methods; root-locus design method.

Emphasis will be placed on practical problems

*assessment:* Small texts, assignments and final exam.

### Level III

#### 5424 Engineering Mathematics III

*level:* III *points value:* 2 *duration:* semester 1

*assumed knowledge:* 1016 Differential Equations and Fourier Series E; 2187 Vector Analysis and Complex Analysis; 4569 Laplace Transforms and Probability and Statistical Methods; 1642 Linear Programming and Numerical Analysis

*contact hours:* 39 lectures, tutorials/computing practicals

*content:* Material selected from the following topics: advanced topics on differential equations; integral transforms; complex function theory; computational mathematics; robotics; optimisation; calculus of variations; operations research; simple queues.

*assessment:* written exam. A small percentage may be allocated to class and computing exercises

#### 5893 Automatic Control 2

*level:* III *points value:* 1.5 *duration:* semester 2

*assumed knowledge:* Level II Applied Mathematics subjects with an aggregate points value of 8

*contact hours:* 26 lectures and tutorials and laboratory and practical work as part of 4066 Computational and Experimental Techniques II

*content:* Time domain descriptions of dynamic systems; state-space system models; characteristics of dynamic response (poles, zeros, eigenvalues); specification of controller characteristics, controller design using pole placement; observers; observer design; optimal control (introduction); optimal observers (introductions); digital implementation of control systems (introduction). Emphasis will be placed on both practical applications and computer aided control system design.

*assessment:* a combination of assignments and final exam

#### 6375 Engineering Communication

*level:* III *points value:* 1 *duration:* semester 1

*contact hours:* 24 hours of lectures, tutorials and attendance at seminar program

*content:* A seminar on a topic of general interest to be presented and written up in a form suitable for publication. Training will be provided.

*assessment:* seminar and written report

#### 4066 Computational and Experimental Techniques 2

*level:* III *points value:* 1.5 *duration:* full year

*contact hours:* 10 lectures, 60 hours computing, laboratory work and report writing

*content:* Lecture series: Computer hardware, use of X windows, engineering applications software and library routines, high level programming, operating systems, engineering experimentation.

Practical sessions: Computing workshop sessions will provide experience with using application software, operating systems and X windows, high level programming, numerical methods and engineering applications. The experimental program will illustrate principles of Fluid mechanics, Thermodynamics, Vibrations, Automatic Control and other aspects of the Mechanical Engineering course.

*assessment:* continuous assessment based on computing assignments and laboratory reports and log book entries

#### 2046 Design for Manufacture

*level:* III *points value:* 1.5 *duration:* semester 1

*contact hours:* 26 lectures and tutorials

*content:* Quality management; design for quality statistical process control; quality techniques including quality function deployment and failure mode and effect analysis. Computer integrated manufacture including CAD/CAM/CAPP/ATE/

MRPII/FMS. Cost estimation; value analysis; plant layout; and group technology.

*assessment:* a combination of assignments and final exam

#### 4958 Structural Analysis and Design

*level:* III *points value:* 1.5 *duration:* semester 1

*prerequisites:* 6581 Statics, 6953 Stress Analysis, 9786 Mathematics I

*contact hours:* 26 lectures, 13 tutorials and Design work

*content:* Principles of structural design. Characteristics of structural members and materials. Analysis of structures for forces and displacements. Design of steel and concrete structures. Design of beams, columns, ties and struts, bolted and welded connections, slabs and foundations.

*assessment:* exam (70%); tutorials and design projects (30%)

### 3536 System Design

level: III points value: 1.5 duration: semester 1

contact hours: 13 lectures and 39 hours in the Design Office

content: System function analysis; design planning; system optimisation; human factors; risk and safety; product liability; engineering ethics; system reliability and maintainability.

assessment: a combination of assignments and final exam

### 8432 Design Project (Level III)

level: III points value: 1.5 duration: semester 2

contact hours: 39 hours in the Design Office

content: Group design project related to industrial problems which may involve conceptual design, selection of materials, manufacturing processes and systems, assembly methods and project management techniques.

assessment: final group report and exhibition

### 7980 Electronics

level: III points value: 1.5 duration: semester 2

contact hours: 26 lectures, 12 tutorials and 12 hours of practical work

content: Analogue Electronics: Overview of electronic systems; operational amplifier circuits and applications; electronic power supplies; grounding and shielding practices; reliability of electronic systems. Digital Electronics: Selected topics in circuit theory, logical concepts, switching algebra, truth tables, digital circuit elements, counters, memory devices and wave shaping circuits. Microcomputers number systems, microcomputer architecture, programming techniques and applications.

VLSI: MOS transistors, patterning and fabrication, switch logic, gate logic, stick diagrams, electrical parameters, subsystems.

Practical work in the laboratory is designed to illustrate the subject matter of the lectures.

assessment: principally by written examinations, with laboratory work and homework assignments also contributing to the overall result. A satisfactory standard in the laboratory work is required.

### 5526 Fluid Mechanics 2

level: III points value: 1.5 duration: semester 2

assumed knowledge: 8781 Fluid Mechanics 1, Level II Applied Mathematics subjects with an aggregate points value of 8

contact hours: 26 lectures and tutorials and laboratory and practical work as part of 4066 Computational and Experimental Techniques II

content: Potential flow; Integral analysis of fluid flow, flow of inviscid and viscous fluids; laminar and turbulent flow in pipes and boundary layers; forces on bodies, aerofoil theory; incompressible-flow machines.

assessment: a combination of assignments and final exam

### 9900 Heat Transfer

level: III points value: 1.5 duration: semester 2

contact hours: 26 lectures/tutorials and one practical session

content: An introduction to the three modes of heat transfer, ie conduction, convection and radiation. Analytical approaches will be stressed where appropriate, but emphasis will be placed on numerical and empirical techniques. Special topics might include heat exchanger applications, mass transfer, heat transfer enhancement and solar radiation.

assessment: a combination of assignments and final exam

### 7915 Manufacturing Engineering 2

level: III points value: 1.5 duration: semester 1

assumed knowledge: 6231 Manufacturing Engineering I

contact hours: 26 lectures

content: The design and control of advanced manufacturing systems. Techniques for the analysis and operation of manufacturing systems.

assessment: a combination of assignments and final exam

### 8767 Processing and Design of Materials

level: III points value: 1.5 duration: semester 2

contact hours: 26 lectures and 26 hours laboratory/tutorial

assumed knowledge: 8748 Mechanical Properties of Materials or 2810 Materials II

contact hours: 26 hours

content: The four classes materials. Metals and alloys: structures; phase diagrams and their applications; transformations; light alloys; carbon and alloy steels; production, forming and joining. Ceramics: structures; mechanical properties; production, forming and joining. Polymers: the relation between structure and mechanical properties; production, forming and joining. Composites: mechanical properties; production, forming and joining.

assessment: a combination of assignments, laboratory work, and written exam

**4109 Solid Mechanics**

*level:* III *points value:* 1.5 *duration:* semester 1

*contact hours:* 26 lectures and tutorials

*assumed knowledge:* 6953 Stress Analysis, Level II Applied Mathematics subjects with an aggregate points value of 8

*content:* General laws of mechanics and introduction of stress concepts, Cartesian tensor analysis, theory of photoelasticity, three dimensional photoelasticity, strain-gauge and rosette analysis, finite element methods, elementary plasticity, fatigue analysis, creep and viscoelasticity, pressure vessels, thermal stresses, stress waves, contact stresses and residual stresses, elastic foundations.

*assessment:* a combination of assignments and final exam

**9813 Thermodynamics 2**

*level:* III *points value:* 1.5 *duration:* semester 2

*assumed knowledge:* 1376 Thermodynamics 1

*contact hours:* 26 lectures and tutorials, laboratory and practical work as part of 4066 Computational and Experimental Techniques 2

*content:* Power cycles; refrigeration cycles; thermodynamic relations; non-reacting mixtures; psychrometry; combustion; second law analysis.

*assessment:* a combination of assignments and final exam

**6602 Vibrations**

*level:* III *points value:* 1.5 *duration:* semester 1

*assumed knowledge:* Level II Applied Mathematics subjects with an aggregate points value of 8

*contact hours:* 26 lectures and tutorials, laboratory work and practical work as part of 4066 Computational and Experimental Techniques 2

*content:* Fundamentals of vibrations; free vibrations of single degree of freedom systems; forced vibrations; damped vibrations; vibrations isolation; two degree of freedom system; multidegree of freedom systems; determination of natural frequencies and mode shapes; vibrations of continuous systems; vibration measurement and control.

*assessment:* a combination of assignments and final exam

**Level IV****5802 Management 1A and 1B**

*level:* IV *points value:* 1 *duration:* semester 1

*contact hours:* 18 lectures and tutorials; 9 lectures for each part of subject

*content:* Introduction to law for Engineers, contracts, product liability, industrial relations.

*assessment:* final exam

**6393 Engineering Management**

*level:* IV *points value:* 2 *duration:* semester 2

*contact hours:* 26 lectures and 13 tutorials.

*content:* Industrial management: role of management styles; negotiation skills; motivation; interpersonnel skills. Project and organisational management.

*assessment:* a combination of assignments, case study, and a final exam

**1483 Computational and Experimental Techniques 3**

*level:* IV *points value:* 1 *duration:* full year

*contact hours:* 72 hours of laboratory work and report writing

*content:* A series of experiments on aspects of Fluid Mechanics, Thermodynamics, Acoustics, Vibration and Manufacturing with emphasis on the design of experiments, instrumentation, accuracy analysis and effective report writing.

*assessment:* assessment of reports

**4872 Project Level IV**

*level:* IV *points value:* 8

*duration:* full year (at least 360 hours)

*content:* Candidates are required to carry out a project involving both design and research components. The aim of the project is to provide solutions to engineering problems related to industry or to departmental research, with emphasis on project management and effective communication.

*assessment:* based on preliminary report, exhibition and conference for presentation of results and final report

### Level IV electives

note: The subjects listed below are electives, not all of which will be offered each year. Information as to which subjects are to be offered in a given year will be available from the Department of Mechanical Engineering at the time of enrolment.

All candidates are required to select six electives of which not less than four must be subjects offered by the Department of Mechanical Engineering. The choice of electives may, with the approval of the Head of the Department of Mechanical Engineering, include not more than two subjects offered by other departments within the University.

#### 5962 Advanced Automatic Control

level: IV points value: 2 duration: semester 1

assumed knowledge: 5893 Automatic Control.

contact hours: 26 lectures and 13 tutorials, laboratory and practical work as part of 1483 Computational and Experimental Techniques 3

content: Singular value analysis techniques; advanced optimal control and observer design; frequency weighted controller design; H-infinity control; model reduction; implementation of control systems on DSPs; feedforward and adaptive control. Emphasis will be placed on computer aided control system design and advanced problems.

assessment: small tests, assignments and final exam.

#### 9274 Advanced Vibrations

level: IV points value: 2 duration: semester 2

assumed knowledge: Level II Applied Mathematics subjects with an aggregate points value of 8, 6602 Vibrations.

contact hours: 26 lectures and 13 tutorials, laboratory and practical work as part of 1483 Computational and Experimental Techniques 3

content: Advanced multi-degree of freedom system analysis, modal analysis; spectrum analysis machine fault diagnosis; statistical energy analysis; use of vibration; principles of design of vibration equipment; structure borne vibration machinery structures, mobility; reciprocity; finite element analysis, non-linear vibrations.

assessment: a combination of assignments and final exam

#### 6804 Airconditioning

level: IV points value: 2 duration: semester 1

assumed knowledge: 9813 Thermodynamics 2

contact hours: 18 lecture hours plus 3 day professional short course

content: Vapour compression cycles; heat transfer in two-phase flow; types, selection and operation of refrigeration plant; psychrometrics; climatic data and its use; load estimation and analysis; constant and variable air volume systems; human comfort and health; cooling and dehumidifying coils; controls; fans and duct systems; system balancing and stimulation; commissioning; energy efficiency in buildings; system operating costs; contracts

assessment: 1 x 2 hour exam, attendance professional short course

#### 1322 Computational Mathematics III

level: IV points value: 2 duration: semester 1

assumed knowledge: 1016 Differential Equations and Fourier Series E or 5726 Applied Mathematics IIE (formerly IIB).

contact hours: 26 lectures plus 1 tutorial and 2 hours practical per 3 weeks

content: Topics selected from: Inversion of large sparse matrices. Numerical solution of ordinary differential equations, initial value problems, boundary value problems. Partial differential equations; finite differences, methods of lines, finite element, boundary element and spectral methods. Numerical integration. Numerical solution of integral equations. Super computing. Symbolic Computation.

assessment: final exam. A small percentage may be allocated to class/computing exercises

note: subject not offered by Department of Mechanical Engineering

#### 2368 Elasticity III

level: IV points value: 2 duration: semester 1

assumed knowledge: both 1016 Differential Equations and Fourier Series E and 2187 Vector Analysis and Complex Analysis; or 5726 Applied Mathematics IIE (formerly IIB)

contact hours: 26 lectures; 1 tutorial and 2 hours practical per week (offered by Department of Applied Mathematics)

content: Stress vector. Stress tensor. Equations of motion and equilibrium. Symmetry of the stress tensor. Displacement vector. Infinitesimal strain tensor. Cubical dilatation. Compatibility equations for linear strains. Generalised Hooke's law. Stress-strain law for an isotropic material. Physical interpretation of the elastic constants for an isotropic elastic material.

Displacement and traction boundary-value problems. Principle of superposition. Saint Venant's principle. Longitudinal extension of a cylinder. Bending of beams exact and approximate theories. Plane strain, Plane stress. Problems with cylindrical and spherical

symmetry. Elastic waves. Plane waves. Primary and secondary waves. Rayleigh waves. Waves in bars. Free vibrations of elastic materials.

*assessment:* final exam. A small percentage may be allocated to class and/or computing exercises.

*note:* This subject is not offered by Department of Mechanical Engineering.

### 3312 Engineering Acoustics

*level:* IV *points value:* 2 *duration:* semester 2

*assumed knowledge:* Level II Applied Mathematics subjects with an aggregate points value of 8

*contact hours:* 26 lectures and 13 tutorials plus 4 hours practical work as part of 1483 Computational and Experimental Techniques III

*content:* The fundamentals of soundwave description and propagation, the hearing mechanism, acoustic instrumentation, noise criteria, sound source types and radiated sound fields, outdoor sound propagation, sound power measurement techniques, sound in enclosed spaces, sound transmission loss, acoustic enclosures mufflers, vibration reduction for noise control.

*assessment:* a combination of class assignments and final exam

### 2301 Fracture Mechanics

*level:* IV *points value:* 2 *duration:* semester 2

*assumed knowledge:* 6953 Stress Analysis, 4109 Solid Mechanics, 1016 Differential Equations and Fourier Series E.

*contact hours:* 26 lectures and 13 tutorials.

*content:* Fundamentals of fracture mechanics; Stress analysis of cracks. Design philosophy. Fracture toughness. Crack opening displacement measurement; Transition temperature approach to fracture control; Linear elastic fracture mechanics; Elastic-plastic fracture mechanics; Cyclic stress and strain fatigue. Fatigue crack initiation and propagation; Analysis of engineering failures; Fundamental fatigue analysis. Strength of welded structures; fundamentals; Effect of distortion and residual stresses on welded structures; Brittle fracture of welded structures; Application of finite element methods in engineering problems related to welded structures.

*assessment:* final exam (70%); assignments and mid-term exam (30%)

### 9019 Joining of Materials

*level:* IV *points value:* 2 *duration:* semester 1

*availability:* not offered in 1996

*assumed knowledge:* 8748 Mechanical Properties of Materials or 2810 Materials II; and 8767 Processing and Design of Materials or 2079 Materials III(M)

*contact hours:* 26 lectures and 13 laboratory/tutorial hours

*content:* Solid state and fusion welding processes: characteristics and applications; process selection. Heat flow during welding. Electrodes. The metallurgy of welding: weld bead and heat affected zone microstructures and mechanical properties. Defects in welding. Weld cracking. Non-destructive evaluation of weld. Soldering and brazing wettability, process characteristics. Structural adhesives: types and characteristics; performance and cost.

*assessment:* a combination of assignments, laboratory work and written exam

### 4085 Mechanical Engineering Elective A

*level:* IV *points value:* 2 *duration:* semester 1

*assumed knowledge:* to be advised

*contact hours:* 26 lectures and 13 tutorials.

*content:* One Mechanical Engineering topic offered in semester 1 with the approval of the Head of Department of Mechanical Engineering.

*assessment:* a combination of assignments and final exam

### 1406 Mechanical Engineering Elective B

*level:* IV *points value:* 2 *duration:* semester 2

*assumed knowledge:* to be advised

*contact hours:* 26 lectures and 13 tutorials.

*content:* One Mechanical Engineering topic offered in semester 2 with the approval of the Head of Department of Mechanical Engineering.

*assessment:* a combination of assignments and final exam

### 2742 Mechanical Engineering Elective: Applied Mathematics A

*level:* IV *points value:* 2 *duration:* semester 1

*prerequisites:* Level II Applied Mathematics subjects with an aggregate points value of 8

*contact hours:* 26 lectures and tutorials, variable hours of practical work

*content:* One Applied Mathematics Honours topic offered in semester 1 to be selected with the approval of the Heads of the Departments of Mechanical Engineering and Applied Mathematics.

*assessment:* 2 hour exam plus small amount for class exercises and computing exercises

*note:* subject not offered by Department of Mechanical Engineering

#### **9406 Mechanical Engineering Elective: Applied Mathematics B**

*level:* IV *points value:* 2 *duration:* semester 2

*prerequisites:* Level II Applied Mathematics subjects with an aggregate points value of 8

*contact hours:* 26 lectures and tutorials. Practical work: variable.

*content:* One Applied Mathematics Honours topic offered in semester 2 to be selected with the approval of the Heads of the Departments of Mechanical Engineering and Applied Mathematics.

*assessment:* 2-hour exam plus small amount for class exercises and computing exercises

*note:* subject not offered by the Department of Mechanical Engineering

#### **8404 Special Studies in Mechanical Engineering**

*level:* IV *points value:* 2 *duration:* semester 1

*assumed knowledge:* As prescribed by the Head of Mechanical Engineering.

*contact hours:* 26 lectures and 13 tutorials.

*content:* Special topics in Mechanical Engineering as determined by the Head of the Mechanical Engineering Department. This subject may be offered from time to time and will be taught by visiting academic/s. Syllabus details will be published by the Department as the need arises.

*assessment:* as determined by the Head of the Department of Mechanical Engineering

#### **4012 System Modelling and Simulation**

*level:* IV *points value:* 2 *duration:* semester 1

*availability:* not offered in 1996

*contact hours:* 26 lectures and 13 tutorials.

*content:* Introduction to modelling techniques. Concepts of system states: transient and equilibrium. Theory of simulation: generation of random variables and distributions. Modes of simulation: discrete and continuous. Design of systems using simulation techniques. Introduction to simulation packages and their applications eg manufacturing,

telecommunications, transport, biomedical, computer design. Detailed case studies using a single computer simulation package. Analysis and interpretation simulation results.

*assessment:* a combination of assignments and final exams

# Graduate Certificate in Business Enterprise

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar.

As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

## Specific Course Rules

### 1 Admission requirements

1.1 Except as provided for in 1.2 below, a candidate for admission to the course of study for the Graduate Certificate shall:

- (a) have qualified for admission to a degree of the University or for a degree of another institution accepted for the purpose by the University;
- (b) have obtained the approval of the Head of the Department of Mechanical Engineering.

1.2 Subject to the approval of Council the Faculty may, in special cases and subject to such conditions (if any) as it may see fit to impose in each case, accept as a candidate for the Graduate Certificate a person who does not qualify for admission to the course under 1.1. above but has given evidence satisfactory to the Faculty of fitness to undertake work for the Graduate Certificate.

### 2 Duration of course

To qualify for the Graduate Certificate a candidate shall satisfactorily complete a course of full time study extending over at least six months, or part time study extending over at least one year. Except with the permission of the Faculty, the work for the Graduate Certificate shall be completed within two years.

### 3 Assessment and examinations

3.1 Results in subjects for the Graduate Certificate will not be classified but will be graded Satisfactory or Unsatisfactory.

3.2 A candidate shall not be eligible to attend for examinations unless the prescribed work has been completed to the satisfaction of the teaching staff concerned.

3.3 A candidate who fails to pass in a subject and desires to take the subject again shall again undertake study and satisfactorily do such written and practical work as the teaching staff concerned may prescribe, unless specifically

exempted therefrom after written application to the Registrar for such exemption.

3.4 A candidate who has twice failed the examination in any subject or division of a subject may not enrol for the subject again except by special permission to be obtained in writing from the Registrar and then only under such conditions as may be prescribed.

3.5 For the purpose of this Rule, a candidate who is refused permission to sit for examination, or who without a reason accepted by the Head of the Department of Mechanical Engineering fails to attend all or part of a final examination (or supplementary examination if granted) after being enrolled for at least two thirds of the normal period during which the subject is taught, shall be deemed to have failed the examination.

### 4 Course of Study

A candidate for the Graduate Certificate shall regularly undertake study as may be prescribed, and pass examinations in a selection of subjects offered by the Department of Mechanical Engineering or another department of the University where appropriate, to an aggregate value of at least twelve points in accordance with the provisions of this Rule.

### 5 Subjects of Study

The candidate shall complete satisfactorily the following compulsory subjects:

3738 Business Communications	2
6575 Small Business Management	4
7391 Small Business Finance	2
4586 Small Business Practice	2
1929 Small Business Operations	2

### Syllabuses

*Syllabus details:* see Graduate Diploma in Business Enterprise

## Graduate Certificate in Engineering (Environmental Engineering)

note: Postgraduate tuition fees apply to this course.

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar.

As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

### Specific Course Rules

#### 1 Admission requirements

- 1.1 Except as provided in 1.2 below, an applicant for admission to the course of study for the Graduate Certificate shall have qualified for the degree of Bachelor of Engineering of The University of Adelaide or for an award accepted by the Faculty of Engineering as equivalent to that degree for the purpose of this Rule.
- 1.2 Subject to the approval of the Council the Faculty may, in special cases and subject to such conditions (if any) as it may see fit to impose in each case, accept as a candidate for the Graduate Certificate an applicant who does not qualify for admission under 1.1 above but has given evidence satisfactory to the Faculty of fitness to undertake work for the Graduate Certificate.

#### 2 Duration of course

- 2.1 Except with the permission of the Faculty the work for the Graduate Certificate shall be completed in part-time study over not more than two years.

#### 3 Status, exemption and credit transferral

- 3.1 A candidate who desires that examinations passed in the University or elsewhere be counted for the Graduate Certificate in Engineering (Environmental Engineering) may on written application be granted such exemption from the requirements of these Rules as the Faculty may determine. Otherwise no subject counted for any other award shall be counted as part of the requirements for the Graduate Certificate. In any case, if a subject has a Conceded Pass classification for the purpose of another award, any such subject passed with this classification shall not count towards the requirements for the Graduate Certificate.

#### 4 Assessment and examinations

- 4.1 There shall be four classifications of Pass in each subject for the Graduate Certificate: Pass with High Distinction, Pass with Distinction, Pass with Credit, and Pass.
- 4.2 A candidate shall not be eligible to attend for examination unless the prescribed work has been completed to the satisfaction of the teaching staff concerned. A candidate who is not eligible to attend for examination shall be deemed to have failed the examination.
- 4.3 A candidate who fails in a subject and desires to take the subject again shall again attend lectures and satisfactorily do such written and practical work as the teaching staff concerned may prescribe, unless specifically exempted therefrom after written application to the Faculty for such exemption.
- 4.4 A candidate who has twice failed in any subject may not enrol for that subject again except by special permission of the Faculty and then only under such conditions as may be prescribed.

#### 5 General

- 5.1 The foregoing Specific Course Rules notwithstanding, a candidate who has been enrolled for the Graduate Diploma in Engineering (Environmental Engineering), and who as such a candidate has completed the work prescribed herein for the Graduate Certificate and who has not been awarded the Graduate Diploma, shall on written application to the Registrar be awarded the Graduate Certificate, subject to the student discontinuing candidature for the Graduate Diploma.

## 6 Subjects of study

### 6.1 The following shall be subjects for the Graduate Certificate in Engineering (Environmental Engineering):

#### Group A: compulsory subjects

4611 Environmental Engineering III	2
6648 Environmental Engineering IVA	2
4788 Environmental Engineering IVB	2
7678 Transport Processes in the Environment	2

#### Group B: elective subjects

7643 Advanced Engineering Hydrology	2
5534 Advanced Engineering Management	2
9064 Advanced Flood Hydrology	2
7883 Advanced Stochastic Hydrology	2
1768 Advanced Tropical Hydrology	2
4719 Advanced Water Distribution Systems	2
6012 Advanced Water Engineering	2
5980 Advanced Water Resources Management	2
9506 Advanced Water Resources Planning	2
5631 Environmental Economics E	4
4659 Environmental Impact Assessment Project	4
1335 Environmental Geomechanics	2
4338 Groundwater Resources and Contamination	2
1233 Introduction to Environmental Law	2
9969 Special Topics in Management and Planning IV	2
9043 Special Topics in Water Engineering IV	2
9309 Systems Planning and Analysis	2
8770 Waste Management	2
1030 Wastewater Engineering	2

## 7 Course of study

7.1 To qualify for a Graduate Certificate in Engineering (Environmental Engineering) a candidate shall satisfactorily complete all subjects from Group A in 6 above plus subjects from Group B totalling at least 4 points.

7.2 The subjects presented shall not include any which is, in the opinion of the Faculty, substantially equivalent to another subject presented for the Certificate or already counted towards another qualification.

7.3 Should any subject in Group A be covered by 7.2 above then a subject(s) with an equivalent points value from Group B may be substituted with the approval of the Head of Department.

7.4 Candidates wishing to enrol in subjects for which they do not have the necessary preliminary knowledge may be required to take such bridging subjects prior to the commencement of their Certificate studies as may be deemed appropriate by the Head of the Department. No academic credit toward the Certificate will be awarded for such studies.

7.5 To complete a course of study in a subject a candidate shall, unless exempted by the Head of the Department offering the subject:

- regularly attend the prescribed lectures, tutorials, workshops and seminars; and
- undertake such computing work, project work, practical work, field work and case studies, do such reading, written and oral work and pass such examinations as the Head of the Department offering the subject may prescribe.

7.6 Each candidate's course of study must be approved by the Head of the Department at enrolment each year.

## Syllabuses

*syllabus details:* see B.E.(Civil) or B.E.(Civil and Environmental).

## Graduate Certificate in Engineering (Hydrology and Water Resources)

note

- 1 Postgraduate tuition fees apply to this course.
- 2 The course for the Graduate Certificate is a Joint Program of the three participating universities, The University of Adelaide, The Flinders University of South Australia, and the University of South Australia, together with two research centres, the Australian Centre for Water Quality Research and the Centre for Groundwater Studies.  
There is an Hydrology and Water Resources Program Committee comprising a full-time academic representative from each of the three participating universities.  
A Coursework Coordinator, a full-time member of the academic staff, is appointed at each of the three participating universities by the Program Committee.

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar.

As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

### Specific Course Rules

---

#### 1 Admission requirements

- 1.1 Except as provided in 1.2 below, an applicant for admission to the course of study for the Graduate Certificate shall:
  - (a) have qualified in the University for the Honours degree of Bachelor of Engineering, Science, Agricultural Science or Applied Science, or the degree of Bachelor of Engineering in the Honours grade; or
  - (b) have qualified for an award accepted by the Faculty as being equivalent, academically and professionally, to the Honours degree of Bachelor of Engineering, Science, Agricultural Science or Applied Science, or the degree of Bachelor of Engineering in the Honours grade in the University; or
  - (c) have qualified in the University for the Ordinary degree of Bachelor of Engineering, Science, Agricultural Science or Applied Science, or for an award accepted by the Faculty as being equivalent to those degrees, and have in addition successfully undertaken advanced studies and/or work in an appropriate area which is considered by the Faculty to be an adequate preparation for candidature.
- 1.2 Subject to the approval of the Council, the Faculty may, in exceptional circumstances and subject to such conditions (if any) as it may see

fit to impose, accept as a candidate for the Graduate Certificate a person who does not qualify under 1.1 above but has given evidence satisfactory to the Faculty of fitness to undertake work for the Graduate Certificate.

#### 2 Duration of course

- 2.1 Except with the special permission of the Faculty the course for the Graduate Certificate shall be completed in not less than one semester and not more than two semesters of full-time study or not less than two and not more than four semesters of part-time study.

#### 3 Assessment and examinations

- 3.1 There shall be four classifications of pass in each subject for the Graduate Certificate: Pass with High Distinction, Pass with Distinction, Pass with Credit, and Pass.
- 3.2 Except with the permission of the Faculty of Engineering, no candidate may attempt a subject more than twice.

#### 4 General

- 4.1 A candidate may not present for credit towards the Graduate Certificate any subject which has been presented as part of the requirements for any other award of this University or other institution, or which in the opinion of the Faculty is substantially similar to such subject.

## Syllabuses

*syllabus details: see Master of Engineering Science in Hydrology and Water Resources*

- 4.2 Notwithstanding the foregoing Specific Course Rules, a candidate who has been enrolled for the degree of Master of Engineering Science in Hydrology and Water Resources or the degree of Master of Applied Science in Hydrology and Water Resources, who as such a candidate has completed the work prescribed herein for the Graduate Certificate and who has not been awarded the Master degree, shall on written application to the Registrar be awarded the Graduate Certificate, subject to the student discontinuing candidature for the degree of Master of Engineering Science in Hydrology and Water Resources or, as the case may be, Master of Applied Science in Hydrology and Water Resources.'

## 5 Course of study

- 5.1 To qualify for the Graduate Certificate, a student shall satisfactorily complete subjects from 6 below to the value of at least 12.5 points.

## 6 Subjects of study \*\*

- 6.1 The following shall be the subjects for the Graduate Certificate in Engineering (Hydrology and Water Resources).

8095 Computing and Hydraulics	2.5
3040 Hydrogeology	2.5
7783 Surface Hydrology	2.5
7278 Water Quality Fundamentals and Processes	2.5
7103 Water Resources Management	2.5

\*\* With the approval of the Head of the Department of Civil and Environmental Engineering, a limited number of these subjects may be replaced with other suitable subjects offered by The University of Adelaide, Flinders University or the University of South Australia.

## Graduate Certificate in Engineering (Signal Processing)

note: Postgraduate tuition fees apply to this course

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar.

As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

### Specific Course Rules

#### 1 Admission requirements

- 1.1 Except as provided in 1.2 below an applicant for admission to the course of study for the Graduate Certificate shall have qualified for the degree of Bachelor of Engineering of The University of Adelaide or for an award accepted by the Faculty of Engineering as equivalent to that degree for the purpose of this Rule.
- 1.2 Subject to the approval of the Council the Faculty may, in special cases and subject to such conditions (if any) as it may see fit to impose in each case, accept as a candidate for the Graduate Certificate an applicant who does not qualify for admission under 1.1 above but has given evidence satisfactory to the Faculty of fitness to undertake work for the Graduate Certificate.

#### 2 Duration of course

- 2.1 Except with the permission of the Faculty the work for the Graduate Certificate shall be completed in not less than one semester of full-time work and not more than two years.

#### 3 Assessment and examinations

- 3.1 There shall be four classifications of pass in each subject for the Graduate Certificate: Pass with High Distinction, Pass with Distinction, Pass with Credit, and Pass.
- 3.2 A candidate shall not be eligible to attend for examination unless the prescribed work has been completed to the satisfaction of the teaching staff concerned.
- 3.3 A candidate who fails in a subject and desires to take the subject again shall again attend lectures and satisfactorily do such written and practical work as the teaching staff concerned may prescribe, unless specifically exempted therefrom after written application to the Faculty for such exemption.

- 3.4 A candidate who has twice failed any subject may not enrol for that subject again except by special permission of the Faculty and then only under such conditions as may be prescribed.

- 3.5 For the purpose of this Rule a candidate who is refused permission to sit for examination, or who without a reason accepted by the Dean of the Faculty (or nominee) fails to attend all or part of a final examination (or supplementary examination if granted) after remaining enrolled for at least eight teaching weeks of that semester, shall be deemed to have failed the examination.

#### 4 Subjects of study

- 4.1 The following shall be subjects for the Graduate Certificate in Engineering (Signal Processing):

##### Group A: core subjects

6772 Computer Vision	2
9479 Digital Signal Processing Techniques	2
7759 Estimation Theory	2
2425 Multisensor Data Fusion	2
1347 Neural Networks	2
3449 Radar Imaging	2
4370 Wavelet Transforms	2

##### Group B: elective subjects

Other relevant subjects offered for Graduate Diploma and Graduate Certificate courses at The University of Adelaide, The University of South Australia and The Flinders University of South Australia, as may be approved by the Head of the Department of Electrical and Electronic Engineering.

## 5 Course of study

- 5.1 To qualify for a Graduate Certificate in Engineering (Signal Processing) a candidate shall satisfactorily complete subjects from 4 above with an aggregate points value of at least 12, including at least 6 points from Group A.
- 5.2 The subjects presented shall not include any which is, in the opinion of the Faculty, substantially equivalent to another subject presented for the Certificate or already counted towards another qualification.
- 5.3 Candidates wishing to enrol in subjects for which they do not have the necessary preliminary knowledge may be required to take such bridging subjects prior to the commencement of their Certificate studies as may be deemed appropriate by the Head of the Department. No academic credit toward the Certificate will be awarded for such studies.
- 5.4 To complete a course of study in a subject a candidate shall, unless exempted by the Head of the Department offering the subject:
- (a) regularly attend the prescribed lectures, tutorials, workshops and seminars; and
  - (b) undertake such computing work, project work, practical work, field work and case studies, do such reading, written and oral work and pass such examinations as the Head of the Department offering the subject may prescribe.
- 5.5 Each candidate's course of study must be approved by the Head of the Department at enrolment each year.

## Syllabuses

### 6772 Computer Vision

*points value:* 2

*duration:* semester 1

*contact hours:* 14 lecture hours, 4 tutorial hours, 3 practical hours

*content:* Modules of vision in the early phase of processing; detection of contrast edges in intensity image arrays; accumulation of edge data to form lines; the use of a stereo image pair to derive depth information; exploitation of image shading (or intensity variation) to obtain surface normal data; motion detection in time-varying imagery; Marr's theory as a framework for visual information processing; generalised cylinders and their role in the recognition of objects depicted in images; scene analysis and the interpretation of line-drawings of polyhedra. Use of vision packages.

*Aim:* to provide students with a survey of important developments in computer vision and to introduce them to methods for extracting features from images, with emphasis on shape determination.

*Objectives:* at the end of the subject the student should be able to describe the major developments in the field; and to implement a variety of vision systems including edge detectors, stereo matchers, shading analysers, and line-drawing interpreters.

*assessment:* assignment, including practicals 1(00%)

### 9479 Digital Signal Processing Techniques

*points value:* 2

*duration:* semester 1

*contact hours:* 13 lecture hours, 8 tutorial and practical hours

*content:* Review of basic techniques; DSP tools; Signal sampling; spectral analysis; advanced DSP techniques; dedicated DSP processors; radar signal processing; neural network and signal processing.

*Aim:* to provide students with hands on experience in basic digital signal processing techniques, tools and Dedicated Signal Processors (DSP) used for processing sensor signals.

*Objectives:* on completion of this course, the student should be able: to apply basic signal processing techniques such as Fourier transforms, Z transforms, convolution, correlation, and linear predictive coding; to use DSP tools such as Discrete Fourier Transform (DFT), Fast Fourier Transform (FFT), windowing normalisation, spectral estimation, Analogue to Digital Converter (A/D) and to have acquired hands on experience in processing real-world signals; to describe practical application in radar signal processing; to describe the basics of dedicated signal

processor (DSP) chips and their application in fast processing; to apply eigen-space based advanced techniques for high resolution signal processing; to describe neural network applications in signal processing.

*assessment:* assignments (50%); exam (50%)

### 7759 Estimation Theory

*points value:* 2

*duration:* semester 1

*contact hours:* 12 lecture hours, 9 tutorial and practical hours

*content:* Introduction to estimation problems and their application to filtering, smoothing, prediction and identification; a review of important results from probability theory and stochastic processes; brief philosophical history of statistical estimation emphasising the contributions of Gauss, Bayes and Fisher; approaches to estimation problems and their solutions in the Gaussian noise case (least squares, minimum variance, MAP and ML); state-space, ARMAX and finite state Markov models; recursive implementations, -RLS, Kalman Filter.

*Advanced topics:* bounded noise, stochastic embedding, distributed sensors, errors-in-variables, adaptive estimation.

*Aim:* to provide students with an introduction to the principles, philosophical issues and implementation aspects of modern estimation algorithms.

*Objectives:* On completion of the course, the student should be able: to explain the role played by estimation principles in the problems of filtering, prediction, smoothing, identification and tracking; to describe the basic concepts of Bayesian and non-Bayesian strategies; to derive and implement Maximum A Priori (MAP), Maximum Likelihood (ML), Minimum Variance (MV) and Least Square (LS) estimators for various simple situations; to implement recursive estimation algorithms such as Recursive Least Squares (RLS) and the Kalman Filter; to describe more advanced issues such as TLS, non-probabilistic approaches and estimation for large-scale distributed systems.

*assessment:* assignments (100%)

### 2425 Multisensor Data Fusion

*points value:* 2

*duration:* semester 1

*contact hours:* 12 lecture hours, 9 tutorial and practical hours

**content:** Overview of multi-sensor data fusion problems occurring in such areas as tracking and imaging; review of estimation theory and introduction to Dempster/Schaffer Theory; principles of distributed detection and estimation theory and large-scale stochastic systems; centralised and decentralised multi-target multi-sensor tracking algorithms; fusion of multi-resolution image data; hierarchical architectures for data fusion systems.

**Aim:** to provide practising engineers and scientists with an introduction to the theory and practice of data fusion for multi-sensor systems.

**Objectives:** On completion of the course the student should be able: to describe a range of basic principles and fundamental techniques applicable to the diverse range of fusion data problems; to explain large-scale centralised and decentralised estimation theory; to describe the multi-sensor target tracking problem, especially the issues of co-ordinate registration errors and distributed algorithms; to explain the basic principles of image data fusion.

**assessment:** assignments (100%)

### 1347 Neural Networks

**points value:** 2

**duration:** semester 1

**contact hours:** 12 lecture hours, 9 tutorial and practical hours

**content:** Objectives and learning paradigms; neural networks architectures; dynamics; training schedules; validation; preprocessing; application examples; laboratory exercises.

**Aim:** to introduce the principles of artificial neural networks and methodologies for applying neural networks to practical problems.

**Objectives:** at the end of the subject the student should be able: to explain the essential features of the main neural network paradigms; to select suitable candidate neural network architectures and dynamics for specific tasks; to propose parameters for networks in some applications; to apply elementary analytical methods to the design and diagnosis of neural networks performance.

**assessment:** assignments (20%); exam (80%)

### 3449 Radar Imaging

**points value:** 2

**duration:** semester 1

**contact hours:** 12 lecture hours, 9 tutorial and practical hours

**content:** Review the basics of radar and imaging systems; outline design and operation of synthetic aperture radar (SAR); principles of inverse synthetic aperture radar (ISAR); analysis of radar images.

**Aim:** to provide students with an understanding of the principles, technologies and applications of radar imaging systems with particular emphasis on synthetic aperture radar (SAR).

**Objectives:** on completion the student is expected: to describe the physical limitations of imaging systems and explain the characteristics of microwave images; to explain the basic principles of microwave radar and the types of radars needed for surveillance tracking and navigation; to describe the principles of operation and characteristics of spaceborne and airborne synthetic aperture radar systems; to explain how inverse synthetic aperture radar (ISAR) is used to produce images of targets; to obtain the physical characteristics of SAR images from test points; to extract analytical information from SAR images; to explain the difference between active and passive microwave images; to understand the basic principles of radar and the nature of microwave images; to explain the characteristics of microwave images; to describe the principles of imaging systems, especially the limits to resolution and the characteristics of microwave imagery.

**assessment:** assignment (60%); exam (40%)

### 4370 Wavelet Transforms

**points value:** 2

**duration:** semester 1

**contact hours:** 13 lecture hours, 8 tutorial and practical hours

**content:** Orthogonality and Hilbert spaces; review of Fourier transform; continuous wavelet transform; wavelet bases, multiresolution analysis; discrete wavelet transform; implementation aspects; multivariate extension; data compression; audio and video applications; JPEG standard and its wavelet based version.

**Aim:** to present students with theoretical background of wavelet transforms and an overview of their applications in signal processing, in particular for data compression.

**Objectives:** on completion of this course, the student should be able: to describe the basic theory of wavelets and orthogonal functions; to describe the use of wavelet transforms in signal processing and data compression; to explain the advantages and disadvantages of replacing Fourier transform by wavelets; to explain the general structure of the JPEG standard for image communications; implement wavelet transforms in image processing.

**assessment:** assignment (100%)

## Graduate Diploma in Business Enterprise

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar.

As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

### Specific Course Rules

#### 1 Admission requirements

1.1 Except as provided for in 1.2 below, a candidate for admission to the course of study for the Graduate Diploma shall:

- (a) have qualified for admission to a degree of the University or for a degree of another institution accepted for the purpose by the University;
- (b) have obtained the approval of the Head of the Department of Mechanical Engineering.

1.2 Subject to the approval of Council the Faculty may, in special cases and subject to such conditions (if any) as it may see fit to impose in each case, accept as a candidate for the Graduate Diploma a person who does not qualify for admission to the course under 1.1 above but has given evidence satisfactory to the Faculty of fitness to undertake work for the Graduate Diploma.

#### 2 Duration of course

To qualify for the Graduate Diploma a candidate shall satisfactorily complete a course of full time study extending over at least one year or part time study extending over at least two years. Except with the permission of the Faculty, the work for the Graduate Diploma shall be completed within four years.

#### 3 Assessment and examinations

3.1 Results in subjects for the Graduate Diploma will not be classified but will be graded Satisfactory or Unsatisfactory.

3.2 A candidate shall not be eligible to attend for examination unless the prescribed work has been completed to the satisfaction of the teaching staff concerned.

3.3 A candidate who fails to pass in a subject and desires to take the subject again shall again undertake study and satisfactorily do such written and practical work as the teaching staff concerned may prescribe, unless specifically exempted therefrom after written application to the Registrar for such exemption.

3.4 A candidate who has twice failed the examination in any subject or division of a subject may not enrol for the subject again except by special permission to be obtained in writing from the Registrar and then only under such conditions as may be prescribed.

3.5 For the purpose of this Rule, a candidate who is refused permission to sit for examination, or who without a reason accepted by the Head of the Department of Mechanical Engineering fails to attend all or part of a final examination (or supplementary examination if granted) after being enrolled for at least two thirds of the normal period during which the subject is taught, shall be deemed to have failed the examination.

#### 4 Course of Study

4.1 A candidate for the Graduate Diploma shall regularly undertake study as may be prescribed, and pass examinations in a selection of subjects offered by the Department of Mechanical Engineering or another department of the University where appropriate to an aggregate value of at least twelve points in accordance with the provisions of this rule.

4.2 Diploma project: In addition to the course work, each student will be expected to complete a project supervised by a member of the Department of Mechanical Engineering or jointly supervised by a member of that department and a member of such other department as is most closely related to the project work.

**5 Subjects of Study**

The candidate shall complete satisfactorily the following components:

- (a) Coursework comprising the following compulsory subjects to the value of 12 points:
- |                                |   |
|--------------------------------|---|
| 3738 Business Communications   | 2 |
| 7391 Small Business Finance    | 2 |
| 6575 Small Business Management | 4 |
| 1929 Small Business Operations | 2 |
| 4586 Small Business Practice   | 2 |
- (b) 8617 Diploma Project in Business Enterprise 12

**6 Transfer from Graduate Certificate in Business Enterprise**

A candidate who holds the Graduate Certificate in Business Enterprise shall surrender the Graduate Certificate before being admitted to the Graduate Diploma in Business Enterprise.

## Syllabuses

The Graduate Diploma in Business Enterprise is offered by the Department of Mechanical Engineering. The course supports the Graduate Entrepreneurial Initiative of the University whereby graduates, with innovative ideas for a product, process or service, are given support to begin a business enterprise and undertake postgraduate study in the Graduate Diploma to further their marketing, management and technological skills.

The syllabuses of the coursework subjects are given below. The Diploma Project will either relate to the business enterprise which the Graduate Entrepreneurial Initiative is supporting or be industry based. Emphasis will be placed on gaining practical experience and developing the business enterprise involving use of modern research tools.

Graduates seeking support under the Graduate Entrepreneurial Initiative must enrol in the Graduate Diploma in Business Enterprise. Accordingly, graduates should consult the Department of Mechanical Engineering for advice approximately three months before the semester in which they wish to begin their studies. Each candidate's course of study must be approved by the Head of Department or nominee at enrolment.

### **3738 Business Communications**

*points value:* 2 *duration:* semester 1

*contact hours:* 60 hours

*content:* Interpersonal skills. Verbal and non verbal communications. Written documentation. Presentation skills. Research skills. Managing meetings. Technology based communications.

*assessment:* 100% coursework

### **7391 Small Business Finance**

*points value:* 2 *duration:* semester 2

*contact hours:* 60 hours

*content:* Introduction to business financial procedures. Accounting methods, cash flow, balance sheets, budgeting. Risk analysis. Loans and repayments. Depreciation. Venture capital. Project appraisal. Taxation.

*assessment:* 100% coursework

### **6575 Small Business Management**

*points value:* 4 *duration:* full year

*contact hours:* 120 hours

*content:* Overview of small business issues. Setting up a small business. Business responsibilities. Strategic planning. Goal setting. Decision making. Problem solving. Project and Time management. New product and service development.

*assessment:* Coursework assessment 100%

### **1929 Small Business Operations**

*points value:* 2 *duration:* semester 1

*contact hours:* 60 hours

*content:* Business operations and planning. Marketing and sales. Selling strategies. Purchasing. Customer service. Quality systems. International management and markets.

*assessment:* 100% coursework.

### **4586 Small Business Practice**

*points value:* 2 *duration:* semester 2

*contact hours:* 60 hours

*content:* Legal issues. Business ethics. Intellectual property. Safety. Organisational structures. Teamwork. Motivation and leadership. Personnel management. Human resources.

*assessment:* 100% coursework

# Graduate Diploma in Computer Systems Engineering

note: Postgraduate tuition fees apply to this course.

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar.

As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

## Specific Course Rules

### 1 Admission requirements

1.1 Except as provided in 1.2 below an applicant for admission to the course of study for the Graduate Diploma shall either:

- (a) have qualified for the degree of Bachelor of Engineering in Electrical and Electronic Engineering in The University of Adelaide; or
- (b) hold a qualification accepted by the Faculty of Engineering as being equivalent to the degree of Bachelor of Engineering in Electrical and Electronic Engineering in The University of Adelaide.

1.2 Subject to the approval of the Council the Faculty of Engineering may, in special cases and subject to such conditions (if any) as it may see fit to impose in each case, accept as a candidate for the Graduate Diploma an applicant who does not qualify for admission under 1.1 above but has given evidence satisfactory to the Faculty of Engineering of fitness to undertake work for the Graduate Diploma.

### 2 Duration of course

2.1 To qualify for the Graduate Diploma a candidate shall satisfactorily complete a course of full-time study extending over at least one year or its part-time equivalent. Except with the permission of the Faculty of Engineering the work for the Graduate Diploma shall be completed within three years.

### 3 Status, exemption and credit transfer

3.1 Candidates who desire that examinations passed in the University or elsewhere be counted for the Graduate Diploma in Computer Systems Engineering may on written application be

granted such exemption from the requirements of these Specific Course Rules as the Faculty may determine. However no subject counted for any other award of this University or other institution shall be counted as part of the requirements for the Graduate Diploma.

### 4 Assessment and examinations

4.1 There shall be four classifications of pass in each subject for the Graduate Diploma: Pass with High Distinction, Pass with Distinction, Pass with Credit, and Pass. If a subject has a Conceded Pass classification for the purpose of another award, any such subject passed with this classification shall not count towards the requirements for the Graduate Diploma.

4.2 A candidate shall not be eligible to attend for examination unless the prescribed work has been completed to the satisfaction of the teaching staff concerned. A candidate who is not eligible to attend for examination shall be deemed to have failed the examination.

4.3 A candidate who fails (or obtains a conceded pass) in a subject and desires to take the subject again shall again attend lectures and satisfactorily do such written and practical work as the teaching staff concerned may prescribe, unless specifically exempted therefrom after written application to the Faculty for such exemption.

4.4 A candidate who has twice failed or obtained conceded passes in any subject may not enrol for that subject again except by special permission of the Faculty and then only under such conditions as may be prescribed.

## 5 Subjects of study

### 5.1 The following shall be subjects for the Graduate Diploma in Computer Systems Engineering:

#### (a) Group A: compulsory subjects

Electrical and Electronic Engineering	
5411 Microcomputer Systems	2
2266 Digital Computer Architecture and Design	2
3714 Real Time Computer Systems	2
9409 Data Communications	2
7038 Project	2

#### (b) Group B subjects

Computer Science  
Level II and Level III subjects offered by the Department of Computer Science as approved by the Heads of the Departments of Computer Science and Electrical and Electronic Engineering.

#### (c) Group C subjects

Electrical and Electronic Engineering	
3151 Advanced VLSI Systems Design	2
6519 Signal Processing (Telecommunications)	2
7436 Stochastic Processes in Communication Systems	2

#### (d) Group D Subjects

Other relevant subjects offered for awards of the Faculty of Engineering and the Faculty of Mathematical and Computer Sciences, as may be approved by the Head of the Department of Electrical and Electronic Engineering.

### 5.2 Notwithstanding the above, the availability of all subjects is conditional on

- (a) the availability of staff and facilities; and
- (b) sufficient enrolments.

## 6 Course of study

### 6.1 To qualify for the Graduate Diploma in Computer Systems Engineering a candidate shall satisfactorily complete subjects from 5 above with an aggregate points value of at least 24, including 10 points from Group A, 10 points from Group B, and at least 2 points from Group C. The subjects presented shall not include any which is, in the opinion of the Faculty,

substantially equivalent to another subject presented for the a Graduate Diploma or already counted towards another qualification.

### 6.2 Candidates wishing to enrol in subjects for which they do not have the necessary preliminary knowledge may be required to take such bridging subjects prior to the commencement of their Graduate Diploma studies as may be deemed appropriate by the Head of the Department of Electrical and Electronic Engineering. No academic credit toward the Graduate Diploma will be awarded for such studies.

### 6.3 To complete a course of study in a subject a candidate shall, unless exempted by the Head of the Department offering the subject:

- (a) regularly attend the prescribed lectures, tutorials, workshops and seminars; and
- (b) undertake such computing work, project work, practical work, field work and case studies, do such reading, written and oral work and pass such examinations as the Head of the Department offering the subject may prescribe.

### 6.4 Each candidate's course of study must be approved by the Head of the Department of Electrical and Electronic Engineering (or nominee) at enrolment each year.

note: Each year the Department of Electrical and Electronic Engineering shall determine which of the subjects in Groups A and C will be offered and in which semesters they will be offered. The availability of subjects in Group B will be determined by the Department of Computer Science.

## Syllabuses

### 3151 Advanced VLSI Systems Design

*points value:* 2

*duration:* one semester

*assumed knowledge:* 5072 Digital Electronics and Systems, or equivalent

*contact hours:* 16 hours lectures, 4 hours tutorial, 12 hours practical work

*content:* Topics from: Submicron technology, floor planning and chip architecture, algorithm transformation, VLSI design methodologies, clocking of VLSI circuits and systems, testing approaches and fault analysis, very high speed logic, noise analysis, sub-threshold logic, neural network computation blocks, technology trends, design examples.

*assessment:* written exam, assignments and through performance in the practical work

### 9409 Data Communications

*points value:* 2

*duration:* one semester

*assumed knowledge:* 4907 Communications and Signals or equivalent

*contact hours:* 22 hours lectures and 4 hours tutorial

*content:* Topics from: Network architecture, wide area (WAN), local area (LAN), contention bus, token bus, ring networks, protocols, communication layers, transport layers, application layers, broad and integrated networking, high speed LANs, standards.

*assessment:* written exam

### 2266 Digital Computer Architecture and Design

*points value:* 2

*duration:* one semester

*assumed knowledge:* 9753 Digital Systems, 5072 Digital Electronics and Systems or equivalents

*contact hours:* 22 hours lectures and 4 hours tutorial

*content:* Topics from: ASM description and design, register transfer level notation, register transfer level operations, the design of digital architecture, event driven logic, RISC architecture, CISC architecture, special processors, micro-operations, micro-coding, microprogramming, bus operations, processor design, control unit design, instruction format and addressing modes, etc

*assessment:* written exam

### 5411 Microcomputer Systems

*points value:* 2

*duration:* one semester

*assumed knowledge:* 9753 Digital Systems; 5072 Digital Electronics and Systems or equivalents

*contact hours:* 16 hours lectures, 4 hours tutorial, 12 hours practical work

*content:* Topics from: More advanced aspects of microcomputer architecture, addressing modes, DMA, synchronous and asynchronous interfacing, buses (Multibus, VME, IEEE488, Futurbus), interrupt handling, complex instruction sets, reduced instruction sets, multiple processor systems, fault tolerant systems, virtual memory, caches, etc

*assessment:* written exam and through performance in the practical work

### 7038 Project

*points value:* 2

*duration:* one semester

*assumed knowledge:* 9753 Digital Systems; 5072 Digital Electronics and Systems or equivalents and other Graduate Diploma (CSE) topics concurrently

*contact hours:* 80 hours of practical work

*content:* Each candidate is required to conduct theoretical studies and background reading in order to specify a hardware and/or software system to meet a particular need. The system is then to be designed, developed and tested and the results presented as a written report and as a seminar with demonstration.

*assessment:* based on the written report and on the seminar

### 3714 Real Time Computer Systems

*points value:* 2

*duration:* one semester

*assumed knowledge:* 5072 Digital Electronics and Systems or equivalents.

*contact hours:* 22 hours lectures and 4 hours tutorial

*content:* Topics from: an overview of current practices, specification, design and analysis for multi-tasking systems, scheduling in a single processor, multi-processor and distributed systems, operating system Kernels, real time languages, etc

*assessment:* written exam

**6519 Signal Processing  
(Telecommunications)**

*points value:* 2                      *duration:* one semester

*assumed knowledge:* 4907 Communications and Signals or equivalent

*contact hours:* 20 hours lectures and 6 hours tutorials and laboratory

*content:* Topics from: review of sampled data systems, Fourier transforms, spectral analysis, orthogonal transforms and the orthogonality principle, optimal and adaptive filtering and prediction, 2D transforms, filtering and optical signal processing, introduction to neural networks.

*assessment:* written exam

**7436 Stochastic Processes in  
Communication Systems**

*points value:* 2                      *duration:* one semester

*assumed knowledge:* 4907 Communications and Signals or equivalent

*contact hours:* A total of 26 hours of lectures and tutorials.

*content:* Topics from: Fourier transforms and linear systems, random variables, stochastic processes, power spectra of stationary processes, the matched filter, decision theory, linear mean square estimation, recursive linear estimation, normal or Gaussian processes.

*assessment:* written exam

**Other subjects offered by the  
Department of Electrical and Electronic  
Engineering**

*syllabus details:* see Electrical and Electronic Engineering in section on B.E.

**Subjects offered by the Department of  
Computer Science**

*syllabus details:* see Computer Science in section on B.Sc. in the Faculty of Mathematical and Computer Sciences

# Graduate Diploma in Engineering (Environmental Engineering)

note: Postgraduate tuition fees apply to this course.

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar.

As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

## Specific Course Rules

### 1 Admission requirements

1.1 Except as provided in 1.2 below, an applicant for admission to the course of study for the Graduate Diploma shall:

- (a) have qualified for the degree of Bachelor of Engineering of The University of Adelaide ; or
- (b) hold a qualification accepted by the Faculty of Engineering as being equivalent to the degree of Bachelor of Engineering of The University of Adelaide ; or
- (c) have been admitted to the course of study for the Graduate Certificate in Engineering (Environmental Engineering). Subjects passed for the Graduate Certificate will then be counted for the Graduate Diploma.

1.2 Subject to the approval of the Council the Faculty may, in special cases and subject to such conditions (if any) as it may see fit to impose in each case, accept as a candidate for the Graduate Diploma an applicant who does not qualify for admission under 1.1 above but has given evidence satisfactory to the Faculty of fitness to undertake work for the Graduate Diploma.

### 2 Duration of course

2.1 To qualify for the Graduate Diploma a candidate shall satisfactorily complete a course of full-time study extending over at least one year or of part-time study over at least two years. Except with the permission of the Faculty the work for the Graduate Diploma shall be completed within three years.

### 3 Assessment and examinations

3.1 If a subject has a Conceded Pass classification for the purpose of another award, any such subject passed with this classification shall not count towards the requirements for the Graduate Diploma.

3.2 There shall be four classifications of pass in each subject for the Graduate Diploma: Pass with High Distinction, Pass with Distinction, Pass with Credit, and Pass.

3.3 A candidate shall not be eligible to attend for examination unless the prescribed work has been completed to the satisfaction of the teaching staff concerned. A candidate who is not eligible to attend for examination shall be deemed to have failed the examination.

3.4 A candidate who fails in a subject and desires to take the subject again shall again attend lectures and satisfactorily do such written and practical work as the teaching staff concerned may prescribe, unless specifically exempted therefrom after written application to the Faculty for such exemption.

3.5 A candidate who has twice failed in any subject may not enrol for that subject again except by special permission of the Faculty and then only under such conditions as may be prescribed.

### 4 General

4.1 A candidate who holds the Graduate Certificate in Engineering (Environmental Engineering) shall surrender the Graduate Certificate before being awarded the Graduate Diploma.

### 5 Subjects of study

5.1 The following shall be subjects for the Graduate Diploma in Engineering (Environmental Engineering).

#### Group A: compulsory subjects

4611 Environmental Engineering III	2
6648 Environmental Engineering IVA	2
4788 Environmental Engineering IVB	2
7678 Transport Processes in the Environment	2

**Group B: elective subjects**

7643 Advanced Engineering Hydrology	2
5534 Advanced Engineering Management	2
9064 Advanced Flood Hydrology	2
7883 Advanced Stochastic Hydrology	2
1768 Advanced Tropical Hydrology	2
4719 Advanced Water Distribution Systems	2
6012 Advanced Water Engineering	2
5980 Advanced Water Resources Management	2
9506 Advanced Water Resources Planning	2
5631 Environmental Economics E	4
1335 Environmental Geomechanics	2
4659 Environmental Impact Assessment Project	4
4338 Groundwater Resources and Contamination	2
1233 Introduction to Environmental Law	2
9969 Special Topics in Management and Planning IV	2
9043 Special Topics in Water Engineering IV	2
9309 Systems Planning and Analysis	2
1030 Wastewater Engineering	2
8770 Waste Management	2

**6.5** To complete a course of study in a subject a candidate shall, unless exempted by the Head of the Department offering the subject:

- (a) regularly attend the prescribed lectures, tutorials, workshops and seminars; and
- (b) undertake such computing work, project work, practical work, field work and case studies, do such reading, written and oral work and pass such examinations as the Head of the Department offering the subject may prescribe.

**6.6** Each candidate's course of study must be approved by the Head of the Department at enrolment each year.

**Syllabuses**

*syllabus details:* see B.E.(Civil) and B.E.(Civil and Environmental)

**6 Course of study**

- 6.1** To qualify for a Graduate Diploma in Engineering (Environmental Engineering) a candidate shall satisfactorily complete all subjects from Group A in 5 above plus subjects from Group B in 5 above to a value of 16points.
- 6.2** The subjects presented shall not include any which is, in the opinion of the Faculty, substantially equivalent to another subject presented for the Diploma or already counted towards another qualification.
- 6.3** Should any subject in Group A be covered by 6.2 above then a subject(s) with an equivalent points value from Group B may be substituted with the approval of the Head of Department.
- 6.4** Candidates wishing to enrol in subjects for which they do not have the necessary preliminary knowledge may be required to take such bridging subjects prior to the commencement of their Diploma studies as may be deemed appropriate by the Head of the Department. No academic credit toward the Diploma will be awarded for such studies.

# Graduate Diploma in Engineering (Materials Welding and Joining)

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar.

As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

## Specific Course Rules

### 1 Admission requirements

1.1 Except as provided in 1.2 below, an applicant for admission to the course of study for the Graduate Diploma shall:

- (a) have qualified for the degree of Bachelor of Engineering of the University; or
- (b) have qualified for the degree of Bachelor of Science of the University in a discipline accepted for the purpose by the Faculty; or
- (c) hold a qualification accepted by the Faculty of Engineering as equivalent to the degree of Bachelor of Engineering or Bachelor of Science of the University for the purpose of this Rule.

1.2 Subject to the approval of the Council the Faculty may, in special cases and subject to such conditions (if any) as it may see fit to impose in each case, accept as a candidate for the Graduate Diploma an applicant who does not qualify for admission under 1.1 above but has given evidence satisfactory to the Faculty of fitness to undertake work for the Graduate Diploma.

### 2 Duration of course

2.1 To qualify for the Graduate Diploma a candidate shall satisfactorily complete a course of full-time study extending over at least one year or its part-time equivalent. Except with the permission of the Faculty the work for the Graduate Diploma shall be completed within five years.

### 3 Assessment and examinations

3.1 There shall be four classifications of pass in each subject for the Graduate Diploma: Pass with High Distinction, Pass with Distinction, Pass with Credit, and Pass.

3.2 A candidate shall not be eligible to attend for examination unless the prescribed work has been completed to the satisfaction of the teaching staff concerned. A candidate who is not eligible to attend for examination shall be deemed to have failed the examination.

3.3 A candidate who fails in a subject and desires to take the subject again shall again attend lectures and satisfactorily do such written and practical work as the teaching staff concerned may prescribe, unless specifically exempted therefrom after written application to the Faculty for such exemption.

3.4 A candidate who has twice failed in any subject may not enrol for that subject again except by special permission of the Faculty and then only under such conditions as may be prescribed.

3.5 For the purpose of this Rule a candidate who is refused permission to sit for examination, or who without a reason accepted by the Dean of the Faculty (or nominee) fails to attend all or part of a final examination (or supplementary examination if granted) after remaining enrolled for at least eight teaching weeks of that semester, shall be deemed to have failed the examination.

### 4 Subjects of study

4.1 The following shall be the subjects for the Graduate Diploma in Engineering (Materials Welding and Joining):

4582	Arc Welding Processes — Part 1	1.5
8020	Arc Welding Processes — Part 2	1.5
5306	Behaviour of Metals during Welding - Part 1	1.5
6601	Behaviour of Metals during Welding - Part 2	1.5
1311	Case Studies / Seminars	1.5
4089	Construction and Design - Part 1	1.5
8303	Construction and Design - Part 2	1.5
4927	Fabrication/Applications Engineering - Part 1	1.5
7758	Fabrication/Applications Engineering - Part 2	1.5
2790	Joining of Non-metallic and Dissimilar Materials	1.5
1059	Mechanical Testing	1.5

2338	NDT/Metallographic Analysis	1.5
7627	Non-arc Welding Processes - Part 1	1.5
3254	Non-arc Welding Processes - Part 2	1.5
1393	Welding Practical — Part 1	1.5
2587	Welding Practical— Part 2	1.5

## Syllabuses

*syllabus details:* see Master of Engineering Science in Materials Welding and Joining

### 5 Course of study

- 5.1 To qualify for the Graduate Diploma in Engineering (Materials Welding and Joining) a candidate shall satisfactorily complete the subjects from 4 above with an aggregate points value of 24.
- 5.2 To complete a course of study in a subject a candidate shall, unless exempted by the Head of the Department offering the subject:
- regularly attend the prescribed lectures, tutorials, workshops and seminars; and
  - undertake such computing work, project work, practical work and case studies, do such reading, written and oral work and pass such examinations as the Head of the Department offering the subject may prescribe.

# Master of Engineering

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar.

As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

## Specific Course Rules

### 1 Admission requirements

**1.1** Subject to these Specific Course Rules, a person who has been admitted in The University of Adelaide to the degree of Bachelor of Engineering in the Honours grade or Pass grade may proceed to the degree of Master of Engineering: provided that persons who have or have had a substantial association with the University may be accepted as candidates for the degree on such conditions as the Faculty may prescribe.

### 2 Qualification requirements

**2.1** To qualify for the degree a candidate shall:

- (a) submit in writing to the Registrar for approval by the Faculty of Engineering the subject on which the candidate proposes to present a thesis;
- (b) not earlier than one year after the approval of the subject by the Faculty, present a thesis which should be a significant contribution to the practice of engineering.\* The thesis may be:
  - (i) an original design for some engineering work; or
  - (ii) an account, giving evidence of ability on the part of the candidate to cope successfully with engineering difficulties, of some engineering work for the design or construction of which the candidate has been largely responsible; or
  - (iii) an account of some original research, development, inquiry or investigation made by the candidate into some matter involved with engineering;
- (c) if so required by the Faculty, adduce evidence to its satisfaction of the originality of, and the degree of the candidate's responsibility for, the work embodied in the thesis; and

- (d) if so required by the Faculty pass an examination, written or oral or both, in the field of study immediately relevant to the thesis.

**2.2** (a) On completion of the work the candidate shall lodge with the Registrar three copies of the thesis prepared in accordance with directions given to candidates from time to time. Refer to the Guidelines on Higher Degrees by Research and Specifications for Thesis in this volume.

- (b) Unless the Faculty expressly approve an extension of time in a particular case the thesis shall be submitted within four years from the date of approval of the candidate's subject by the Faculty.

- (c) On submission of the thesis the Faculty shall nominate examiners, who may recommend that the thesis:

- (i) be accepted, with or without conditions; or

- (ii) be sent back to the candidate for revision, and re-submission within such time as the Faculty may allow; or

- (iii) be rejected.

**2.3** A candidate who fulfils the requirements of these Rules and satisfies the examiners under 2.1 and 2.2 above may, on the recommendation of the Faculty, be admitted to the degree of Master of Engineering.

note: Contributions should be clearly recognisable as more than competent applications of standard engineering practice and should usually be related to professional work done outside the University. No provision is made for academic supervision.

## Master of Engineering Science

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar.

As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

### Specific Course Rules

#### 1 Admission requirements

1.1 The following may be accepted as a candidate for the degree:

- (a) a person who has qualified in The University of Adelaide for the Honours degree of Bachelor of Engineering or the degree of Bachelor of Engineering in the Honours grade; or
- (b) a person who holds a qualification accepted by the Faculty of Engineering as being equivalent\* to the Honours degree of Bachelor of Engineering or the degree of Bachelor of Engineering in the Honours grade in The University of Adelaide; or
- (c) a person who has qualified in The University of Adelaide for the Ordinary degree of Bachelor of Engineering or the degree of Bachelor of Engineering in the Pass grade or who holds a qualification accepted by the Faculty of Engineering as being equivalent\* to the Ordinary degree of Bachelor of Engineering or the degree of Bachelor of Engineering in the Pass grade in The University of Adelaide, and who has, in addition, successfully undertaken advanced studies and/or work in engineering practice which is considered by the Faculty of Engineering to be an adequate preparation for candidature.

\* Equivalent shall refer to both academic and professional equivalence.

1.2 With the approval of the Board of Graduate Studies acting with authority wittingly devolved to it by Council the Faculty may, in exceptional circumstances and subject to such conditions (if any) as it may see fit to impose in each case, accept as a candidate for the degree a person who does not qualify under 1.1 above, but who has given evidence satisfactory to the Faculty of fitness to undertake work for the degree.

1.3 A candidate may be admitted on probation. The period of probation shall not exceed six months in the case of a full-time candidate nor twelve months in the case of a part-time candidate. At the end of the period each candidate's performance shall be reviewed by the Faculty of Engineering and the candidature confirmed, with or without special conditions, or terminated.

#### 2 Review of academic progress

2.1 A candidate's progress shall be reviewed by the Faculty at the end of each academic year. If, in the opinion of the Faculty of Engineering, a candidate is not making satisfactory progress the Faculty may, with the consent of the Council, terminate the candidature.

#### 3 Qualification requirements

3.1 To qualify for the degree a candidate shall:

- (a) on completion of any preliminary work which may be prescribed in these Rules and after consultation with the Head of the department in which the majority of the candidate's work falls, submit in writing to the Registrar, for approval by the Faculty, the program of study designed to extend over either one calendar year if taken full-time or not less than two and not more than five calendar years if taken part-time;
- (b) undertake the approved program of study under the direction of a supervisor or supervisors who shall be members of the full-time academic staff of the University and appointed by the Faculty, but in special circumstances the Faculty may also appoint an external supervisor;
- (c) pass such examinations on the candidate's course of study as may be required by the Faculty; and/or

- (d) present a thesis embodying the results of the candidate's project work as prescribed in 3.3 below.
- 3.2** (a) Except by permission of the Faculty or as prescribed in the Rules, the whole of the work for the degree must be completed within the University.
- (b) Subject to such conditions as it may determine in each case, the Faculty may permit project work to be undertaken outside the University provided that it can be satisfied:
- (i) that this will result in mutual academic benefit to the candidate and the candidates supervising department;
- (ii) that there will be adequate contact and interaction between the candidate and the candidate's supervising department; and
- (iii) that the supervisor's access to any experimental work, the candidate's availability for seminars and other discussions, and the publication of results will not thereby be prejudiced.
- 3.3** (a) On completion of his or her project work the candidate shall lodge with the Registrar three copies of his or her thesis prepared in accordance with directions given to candidates from time to time.
- (b) Unless the Faculty expressly approves an extension of time in a particular case the thesis shall be submitted within six months of the completion of the candidate's program.
- (c) On submission or re-submission of the thesis the Faculty shall nominate examiners who may recommend that it;
- (i) be accepted, with or without conditions; or
- (ii) be accepted, with or without conditions, subject to satisfactory oral examination; or
- (iii) be sent back to the candidate for revision; or
- (iv) be rejected.
- 3.4** A candidate who fulfils the requirements of these Rules may, on the recommendation of the Faculty, be admitted to the degree of Master of Engineering Science.

#### **4 Preliminary work**

- 4.1** A person whose qualifications have been accepted under either 1.1(a) or 1.1(b) above shall be deemed to have satisfied the requirements of this Rule.
- 4.2** Before being admitted either under 1.1(c) or 1.2 above, a person shall complete the requirements of this Rule by undertaking, and satisfying the examiners in, such courses of study and/or other work as may be prescribed by the Faculty of Engineering.

#### **5 Course of study**

note: Under the Specific Course Rules, a program of study for the degree may comprise any combination of coursework and project work ranging from all coursework to all project work. Currently only three options are offered.

- 5.1** To qualify for the degree, a candidate shall satisfactorily complete a program of study consisting of one of the following approved options:
- (a) An all research work program comprising Supervised Project Work to the value of 24 points.
- (b) A one-third coursework program comprising Supervised Project Work to the value of 16 points and coursework to the value of at least 8 points.
- (c) A two-thirds coursework program comprising Supervised Project Work to the value of 8 points and coursework to the value of at least 16 points.

#### **6 Classification of subjects**

Subjects forming part of any coursework component for the degree shall be classified as follows:

##### **Group A: Postgraduate subjects**

These are subjects offered at a postgraduate level either in the Faculty of Engineering, in another Faculty, or at another Institution. These include postgraduate subjects in the Faculty of Engineering. Honours and approved Postgraduate Diploma subjects in the Faculties of Science and Mathematical and Computer Sciences, and Postgraduate subjects at Flinders University or the University of South Australia.

##### **Group B: Advanced Level subjects**

These are subjects at Level IV in the Faculty of Engineering which have been designated as 'Advanced Level' by the Department concerned.

They are subjects which reach an advanced level of expertise in the subject material.

Subject to the approval of the Faculty, subjects from outside the Faculty of Engineering may also be included in this category.

### Group C: Ordinary Level subjects

These are subjects at either Level III or Level IV in the Faculty of Engineering which are not designated 'Advanced Level', or subjects at Level III in the Faculties of Science and Mathematical and Computer Sciences, or approved final year undergraduate subjects from other Faculties or institutions.

## 7 Coursework requirements

note: This Specific Course Rule sets out the policies for the administration of the degree of Master of Engineering Science with a coursework component. The Faculty may approve minor variations to these requirements in exceptional circumstances.

- 7.1 A candidate seeking to enrol in a program of study with a coursework component shall, after consulting the Head of the department (or nominee) in which the majority of the candidate's work falls, submit the proposed program to the Faculty for approval.
- 7.2 For a one-third coursework degree, the program may not contain more than a total of 6 points of subjects from Groups B and C, whereas a two-thirds coursework degree may not contain more than a total of 8 points of subjects from Groups B and C.
- 7.3 For a one-third coursework degree, the program may not contain more than 6 points of subjects from outside the Faculty of Engineering\*, whereas a two-thirds coursework degree may not contain more than 8 points of subjects from outside the Faculty of Engineering.
- \* For the purposes of this policy, the Faculty of Engineering is deemed to include all Centres and joint ventures of which the Faculty, or its constituent departments, is a formal partner.
- 7.4 A coursework program may contain greater than the minimum number of required points, in which case the determination of whether the coursework requirements have been satisfied or not will include only the best results from eligible subjects amounting to the required number of points.
- 7.5 There shall be four classifications of pass in each subject for the Master of Engineering Science: Pass with High Distinction, Pass with Distinction, Pass with Credit, and Pass. If a

subject has a Conceded Pass classification for the purpose of another award, any such subject passed with this classification shall not count towards the requirements for the degree of Master of Engineering Science.

- 7.6 A subject shall be eligible to be counted for credit towards the coursework requirements of the degree if:
- In Groups A and B the grade obtained is at Pass standard (50%) or higher.
  - In Group C the grade obtained is 60% or higher.
- 7.7 To satisfy the coursework requirements of the degree, a candidate must obtain a weighted average, taken over the best results in eligible subjects which together amount to the required number of points, of at least 55%.
- 7.8 Subjects which have been presented as part of the requirements for any other award of this University or other institution or subjects which in the opinion of the Faculty of Engineering are substantially similar to such subjects, will not be permitted to count for credit towards the coursework requirements of this degree.

## 8 Subjects of study

### 8.1 The following shall be the subjects for the Master of Engineering Science:

#### Group A: Postgraduate subjects

- Department of Electrical and Electronic Engineering
 

3151	Advanced VLSI Systems Design	2
6215	Adaptive Signal Processing	2
6870	Beamforming and Array Processing	2
9409	Data Communications	2
2266	Digital Computer Architecture and Design	2
5411	Microcomputer Systems	2
7529	Network Architecture and Switching	2
3714	Real Time Computer Systems	2
6519	Signal Processing (Telecommunications)	2
7436	Stochastic Processes in Communication Systems	2

(b) Faculty of Mathematical and Computer Sciences	
8427 Mathematical Coding and Cryptology	2
2039 Mathematical Programming III	2
2314 Optimisation III	2
2208 Random Processes III	2
3908 Communication Network Design	2
9694 Transform Methods and Signal Processing	2
4485 Teletraffic Models	2

**Group B: advanced subjects****Chemical**

6238 Advanced Materials Engineering	2
2098 AI Applications in Engineering Design	2
2532 Biochemical Engineering	2
4668 Biomedical Engineering	2
8273 Combustion Processes	2
9988 Environmental Engineering	2
5734 Hydrocarbon Reservoirs	2
9949 Industrial Rheology	2
1532 Minerals Processing	2
6856 Particulate Technology	2
9871 Plant and Safety Engineering	2
3324 Reaction Engineering	2
2088 Special Management Studies	2
1172 Special Studies in Chemical Engineering	2
1872 Thermal Process Synthesis and Integration	2

**Civil and Environmental****Structural Engineering**

8441 Advanced Steel Design	2
1130 Composite Steel and Concrete Construction	2
8849 Computer Methods of Structural Analysis	2
2414 Design of Concrete Structures	2
6437 Earthquake Engineering	2
4244 Finite Element Methods	2
6853 Special Topics in Structural Engineering IV	2

**Water Engineering**

7643 Advanced Engineering Hydrology	2
9064 Advanced Flood Hydrology	2
4719 Advanced Water Distribution Systems	2
6012 Advanced Water Engineering	2
5980 Advanced Water Resources Management	2
9506 Advanced Water Resources Planning	2
7883 Advanced Stochastic Hydrology	2
1768 Advanced Tropical Hydrology	2
9043 Special Topics in Water Engineering IV	2

**Geotechnical Engineering**

8641 Advanced Foundation Engineering	2
1335 Environmental Geomechanics	2
5175 Numerical Methods Geomechanics	2
8449 Special Topics in Geotechnical Engineering IV	2

**Management and Planning**

5534 Advanced Engineering Management	2
9969 Special Topics in Management and Planning IV	2
9309 Systems Planning and Analysis	2

**Environmental Engineering**

6648 Environmental Engineering IVA	2
4788 Environmental Engineering IVB	2
4338 Groundwater Resources and Contamination	2
8907 Special Topics in Environmental Engineering IV	2
8770 Waste Management	2

**Electrical and Electronic****(a) Department of Electrical and Electronic Engineering**

9334 Advanced Communication Theory	1
1560 Advanced Control	1
5650 Advanced Electromagnetic Engineering	1
1008 Advanced Signal Processing	1
4312 Advanced VLSI	1
1290 Optical Communications	1
9416 Real Time Systems	1

- (b) Electrical and Electronic Engineering,  
University of South Australia\*

Communication Systems Theory

Digital Transmission

Error Control Coding

Mobile Communications

Optical Communications

Satellite Communications

Speech Processing

\* Students wishing to enrol in subjects offered by the University of South Australia for presentation to their Adelaide degree will need to obtain permission of the Faculty and must comply with the University of South Australia enrolment procedures.

*Mechanical*

5962	Advanced Automatic Control	2
9274	Advanced Vibrations	2
6804	Airconditioning	2
3312	Engineering Acoustics	2
2301	Fracture Mechanics	2
9019	Joining of Materials	2
4085	Mechanical Engineering Elective A	2
1406	Mechanical Engineering Elective B	1
8404	Special Studies in Mechanical Engineering	2
4012	System Modelling and Simulation	2

**Group C: Ordinary Level subjects**

Level III and IV subjects (if not included above) listed in the Specific Course Rules of degrees in the Faculties of Engineering, Science and Mathematical and Computer Sciences.

Notwithstanding the above, the availability of all subjects is conditional on the availability of staff and facilities and sufficient enrolments.

**Syllabuses**

**textbooks**

Information on appropriate textbooks will be provided by the Department concerned, and at the preliminary lecture in Orientation Week.

In general, students are expected to have their own copies of text-books but they are advised to await advice from the lecturer concerned before buying any particular book. Only the prescribed edition of any text-book should be bought.

**reference books**

Lists of books and journals for reference purposes will be issued from time to time by the department concerned. It is hoped that all books and journals set for reference will be available to be consulted in the Barr Smith Library.

**examinations**

For each subject students may obtain from the department concerned details of the examination in that subject including the relative weights given to the components (eg such of the following as are relevant: assessments, term or mid-year tests, essays or other written or practical work, final written examinations, viva voce examinations).

The postgraduate and advanced level subjects which are offered under Groups A and B may vary from year to year depending on availability of staff and demand for particular subjects. Details of subjects expected to be available each year are obtainable from the Postgraduate Course Advisers in each Department.

For the Syllabuses of Engineering and Mathematical and Computer Sciences subjects that may be counted towards the degree of Master of Engineering Science, see Syllabuses under the degrees of Bachelor of Engineering, Graduate Diploma of Computer Systems Engineering in the Faculty of Engineering and Bachelor of Science, Graduate Certificate in Telecommunications in the Faculty of Mathematical and Computer Sciences. Other subjects may be presented towards the degree with the approval of the Faculty.

For details of subjects offered by the University of South Australia, see the University of South Australia Calendar.

# Master of Engineering Science in Hydrology and Water Resources

note: The course is a Joint Program of the three participating universities, The University of Adelaide, The Flinders University of South Australia, and The University of South Australia, together with two research centres, the Australian Centre for Water Quality Research and the Centre for Groundwater Studies. There is an Hydrology and Water Resources Program Committee comprising a full-time academic representative from each of the three participating universities. A Coursework Coordinator, a full-time member of the academic staff, is appointed at each of the three participating universities by the Program Committee.

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar.

As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

## Specific Course Rules

### 1 Admission requirements

- 1.1 The following may be accepted as a candidate for the degree:
- a person who has qualified in The University of Adelaide for the Honours Degree of Bachelor of Engineering or the Degree of Bachelor of Engineering in the Honours grade; or
  - a person who holds a qualification accepted by the Faculty as equivalent to the Honours Degree of Bachelor of Engineering or the Degree of Bachelor of Engineering in the Honours grade of The University of Adelaide; or
  - a person who has qualified in The University of Adelaide for the Ordinary Degree of Bachelor of Engineering, or who holds a qualification accepted by the Faculty of Engineering as equivalent to the Ordinary Degree of Bachelor of Engineering in The University of Adelaide and who has, in addition, successfully undertaken advanced studies and/or work in an appropriate area which is considered by the Faculty of Engineering to be an adequate preparation for candidature.
- 1.2 With the approval of the Board of Graduate Studies acting with authority wittingly devolved to it by Council the Faculty of Engineering may, in exceptional circumstances and subject to such conditions (if any) as it may see fit to impose in each case, accept as a candidate for the degree a person who does not qualify under 1.1 above but who has given evidence satisfactory to the Faculty of Engineering of fitness to undertake work for the degree.

### 2 Duration of course

- 2.1 Except with the special permission of the Faculty of Engineering the course for the degree shall be completed in not less than one year and not more than two years of full-time study or not less than two and not more than four years of part-time study.

### 3 Status, exemption and credit transfer

- 3.1 A candidate may not present for credit towards the degree any subject that has been presented as part of the requirements for any other award of this University or other institution, or which in the opinion of the Faculty of Engineering is substantially similar to such subject.

### 4 Assessment and examinations

- 4.1 There shall be four classifications of pass in each subject for the degree: Pass with High Distinction, Pass with Distinction, Pass with Credit and Pass. Students shall be required to attain at least a Division I pass in each of the core subjects of the Masters Degree Program, in order to proceed to the elective subjects and supervised research thesis/project phase, unless this requirement is waived by the Faculty of Engineering.
- 4.2 Except with the permission of the Faculty of Engineering, no candidate may attempt a subject more than twice.
- 4.3 Subject to such conditions as it may determine in each case, the Faculty of Engineering may permit the supervised research thesis/project to be undertaken outside The University of Adelaide provided that it can be satisfied that:

- (a) this will result in mutual academic benefit to the candidate and the Faculty of Engineering,
- (b) there will be adequate contact and interaction between the candidate and the candidate's internal supervisor; and
- (c) the supervisor's access to any experimental work, the candidate's availability for seminars and other discussions, and the publication of results will not thereby be prejudiced.

4.4 The research thesis/project shall be supervised by either:

- (a) one or more full-time members of the academic staff of Flinders University, the University of South Australia or The University of Adelaide appointed by the Faculty of Engineering (on the recommendation of the Program Committee), or
- (b) in special circumstances, a suitably qualified person having a close association with the universities appointed by the Board of Graduate Studies on the recommendation of the Faculty of Engineering.

If more than one supervisor is appointed, one of them shall be nominated as the chief supervisor.

4.5 For each student and on the recommendation of the Program Committee the Faculty of Engineering shall appoint

- (a) Two Examiners of the research thesis/project who shall report their findings to the Faculty of Engineering; and
- (b) An Assessment Committee representative of both the coursework teaching staff and the research thesis/project supervisor(s) which, taking account of the candidate's examination results and the report of the Examiners, shall make to the Faculty of Engineering one of the following recommendations:
  - (i) That the degree of Master of Engineering Science in Hydrology and Water Resources be awarded; or
  - (ii) That the degree should be awarded subject to such minor amendments to the research thesis/project as may be specified; or

(iii) That the degree should not be awarded but that the candidate should be permitted to resubmit the research thesis/project or take such further examination as the Faculty of Engineering shall prescribe or both; or

(iv) That the degree should not be awarded but that the candidate be awarded the Graduate Certificate in Engineering (Hydrology and Water Resources); or

(v) That no award be made.

## 5 General

5.1 A candidate who holds the Graduate Certificate in Engineering (Hydrology and Water Resources) shall surrender the Graduate Certificate before being admitted to the degree of Master of Engineering Science in Hydrology and Water Resources.

## 6 Preliminary work

6.1 A person whose qualifications have been accepted under either 1.1(a) or 1.1(b) above shall be deemed to have satisfied the requirements of this Rule.

6.2 Before being admitted either under 1.1(c) or 1.2 above a person shall complete the requirements of this Rule by undertaking, and satisfying the examiners in, such courses of study and/or other work as may be prescribed by the Faculty of Engineering.

## 7 Course of study

7.1 To qualify for the degree, a candidate shall satisfactorily complete a program of study consisting of one of the following options:

(a) A two-thirds coursework program comprising Supervised Project Work to the value of 10 points and coursework to the value of at least 20 points.

(b) A five-sixths coursework program comprising Supervised Project Work to the value of 5 points and coursework to the value of at least 25 points.

**8 Coursework requirements****8.1** The course shall comprise:*either*

(a) compulsory core subjects	15
elective subjects	5
Research Thesis	10

*or*

(b) compulsory core subjects	15
elective subjects	10
Research Project	5

To satisfy the coursework requirements of the Degree, a candidate must attain at least a Division 1 pass in all eligible subjects, which together amount to the required number of points.

**9 Subjects of study****9.1** The following shall be the subjects for the Master of Engineering Science in Hydrology and Water Resources:*compulsory core subjects\*\**

8095 Computing and Hydraulics	2.5
3040 Hydrogeology	2.5
5520 Introductory Unit E	2.5
7783 Surface Hydrology	2.5
7278 Water Quality Fundamentals and Processes	2.5
7103 Water Resources Management	2.5

*elective subjects\*\**

1713 Advanced Water Quality	2.5
8274 Arid Zone Hydrology	2.5
1159 Flood Hydrology	2.5
9230 Groundwater and Solute Transport Modelling	2.5
3336 Irrigation and Drainage	2.5
6343 Physical Hydrology	2.5
8990 Statistical Analysis in Hydrology	2.5
2983 Tropical Hydrology	2.5
2702 Urban Hydrology	2.5
1050 Water Distribution Systems	2.5
3278 Water Resources Planning E	2.5
4618 Water and Wastewater Treatment	2.5

*supervised research thesis/project*

9117 Research Thesis 10

*or*

9388 Research Project 5

In addition students may, as a formal requirement, be requested to present a public seminar on their project.

\*\* With the approval of the Head of the Department of Civil and Environmental Engineering, a limited number of these subjects may be replaced with other suitable subjects offered by The University of Adelaide, The Flinders University of South Australia or the University of South Australia.

## Syllabuses

---

### 5520 Introductory Unit E

*points value:* 2.5

*duration:* semester 1

*contact hours:* 39 hours of lectures/tutorials/practicals

*content:* The goals of this subject are to bring all prospective Master's students to a level starting point, i.e. to ensure that they all grasp the basics of statistics, mathematics and computing relevant to the course; to introduce all students to the campuses and laboratories and staff involved in the Joint Universities Program; to identify any remedial work required at an early stage; and to provide those with an engineering background with an appropriate scientific appreciation and vice versa.

*assessment:* assignments 50%, individual assessment 50%

### 8095 Computing and Hydraulics

*points value:* 2.5

*duration:* semester 1

*contact hours:* 39 hours of lectures/tutorials/practicals

*content:* The basics of hydraulics are introduced; fluid properties; basic equations of fluid mechanics; boundary layer theory; pipeflow; open channel flow; culvert hydraulics and dimensional analysis; Navier-Stokes equations. Computing topics will include personal computers; work stations; UNIX; spreadsheets; Pascal and Fortran Programming; examples of solving hydraulic problems using computers; commercial software packages.

The aim is for students to become proficient in computing techniques applied to solving hydraulic problems. In addition, a further aim is to expose students to intermediate level fluid mechanics and hydraulic techniques.

*assessment:* exam 70%, coursework and computer exercises 30%

### 3040 Hydrogeology

*points value:* 2.5

*duration:* semester 1

*contact hours:* 39 hours of lectures/tutorials/practicals

*content:* This subject examines the nature of groundwater occurrence, flow and distribution under varied geological conditions. Applied aspects include groundwater exploration, drilling, borehole constructions, logging, aquifer testing and resource evaluation. Also considered are thermal, hydrochemical and isotopic processes. The subject concludes with selected aquifer case studies.

The primary goal is to give the student sufficient theoretical and practical grounding to analyse the hydraulic parameters and groundwaters resources of any aquifer situation.

*assessment:* exam 70%, coursework 30% (subject to agreement)

### 7783 Surface Hydrology

*points value:* 2.5

*duration:* semester 1

*contact hours:* 39 hours of lectures/tutorials/practicals

*content:* The fundamental elements of the hydrological cycle will be outlined. Aspects of collection and analysis of both rainfall and streamflow will be discussed. The main emphasis will be placed on the processes that make up the rainfall runoff process and how these are modelled for use in flood estimation and in low flow hydrology.

The goals are to provide the student with an adequate grounding in the fundamental processes of surface hydrology; to equip the student with analytical skills applicable to non-linear processes; and to acquaint the student with the difficulties and practicalities of processes at field-to microscopic scales.

*assessment:* exam (50%); coursework (50%)

### 7278 Water Quality Fundamentals and Processes

*points value:* 2.5

*duration:* semester 1

*contact hours:* 39 hours of lectures/tutorials/practicals

*content:* This subject presents aquatic chemistry and microbiology with emphasis on their application in water and wastewater treatment. Physico-chemical and microbiological fundamentals and processes are examined. The course concludes with sections on water quality improvements and water quality monitoring.

On completion of this subject, the goal is for each student to have a detailed knowledge of water quality parameters, aquatic chemical equilibrium and surface colloid chemistry; an appreciation of key chemical, physical and biological processes determining water quality; and basic practical experience in water quality sampling and analysis.

*assessment:* exam 50%, coursework 50%

### 7103 Water Resources Management

*points value:* 2.5

*duration:* semester 1

*contact hours:* 39 hours of lectures/tutorials/practicals

*prerequisite:* Mathematics to first year University level

*content:* This subject examines issues in the management of water resources. The basic problem of water allocation is viewed in terms of the interaction of demand and supply. Conventional and non-conventional sources of supply are considered, as are the demands placed on water use for various purposes. The use of computer models to assist in water management will be emphasised.

The goals are to acquaint students with the complex technical and socio-economic factors involved in managing water resources.

*assessment:* exam (70%); coursework (30%)

### 1713 Advanced Water Quality

*points value:* 2.5 *duration:* semester 2

*contact hours:* 39 hours of lectures/tutorials/practicals

*prerequisites:* 7278 Water Quality Fundamentals and Processes

*content:* This subject focuses on causes and effects of water pollution from a wide range of sources. Key chemical and biological processes involved are identified. Pollution control strategies are discussed. Selected case histories are used to reinforce the key concepts and issues.

On completion of this subject the student will have: an appreciation of causes and concerns of water pollution; a detailed knowledge of a range of current water quality issues; and the ability to identify and confront the key parameters of a water quality problem.

*assessment:* exam 50%, coursework 50%

### 8274 Arid Zone Hydrology

*points value:* 2.5 *duration:* semester 2

*contact hours:* 39 hours of lectures/tutorials/practicals

*prerequisites:* 3040 Hydrogeology

*content:* This subject will examine hydrological processes within the arid and semi-arid lands, including those regions which are only marginally viable for agriculture. We consider such aspects as the infrequency of rain, flash flood characteristics, natural and induced groundwater recharge, groundwater 'mining', the sustainability of groundwater extraction, water conservation, the salinity problem and other water issues peculiar to deserts. We also emphasise some important differences of methodology and water resources management between arid and wetter environments. The goals are to enable students to identify and develop scarce water resources, and to appreciate the environmental processes which dominate hydrology in arid regions.

*assessment:* exam 60%, coursework 40%

### 1159 Flood Hydrology

*points value:* 2.5

*duration:* semester 2

*contact hours:* 39 hours of lectures/tutorials/practicals

*content:* This topic provides students with instruction and hands-on experience in the use and application of a range of computer packages, widely used to solve problems in engineering flood hydrology.

The aim is to enable students to apply the appropriate software application to any flood scenario.

*assessment:* projects/assignments 100%

### 9230 Groundwater and Solute Transport Modelling

*points value:* 2.5

*duration:* semester 2

*prerequisites:* Hydrological processes, basic mathematics and experience with personal computers

*contact hours:* 39 hours of lectures/tutorials/practicals

*content:* This topic focuses on the application of groundwater flow and solute transport models to field problems. The basic concepts of Finite Difference and Finite Element methods, as applied to groundwater hydrology, are examined. Various groundwater flow and transport models (MODFLOW, AQUIFEM-N and SUTRA) are used to demonstrate the role of models in planning and management.

The goal is to enable students to use internationally recognised computer models and to adapt these models to any stated hydrological conditions.

*assessment:* exam 50%, coursework 50% exam

### 3336 Irrigation and Drainage

*points value:* 2.5

*duration:* semester 2

*contact hours:* 39 hours of lectures/tutorials/practicals

*content:* Develops irrigation and drainage process models based on fundamental concepts and theory presented in core subjects. A wide range of irrigation practices will be reviewed with emphasis placed on techniques and management employed in South Australia's arid and semi-arid (Mediterranean) climate: these include spray, drip, open and tile drains and flood irrigation. The problem of land salinisation and control/disposal of saline drainage waters derived from irrigated land will receive particular attention.

The goals are to give students an understanding of modern irrigation technology to enable them to optimise irrigation water usage, to assess crop water requirements for given soils and climates, and to avoid problems of inadequate drainage.

*assessment:* exam 60%, coursework 40%

### 6343 Physical Hydrology

points value: 2.5 duration: semester 2

contact hours: 39 hours of lectures/tutorials/practicals

prerequisite: some knowledge of partial differential equations is recommended

content: This subject covers the analytical and numerical solution of a range of non-linear processes in hydrology. In particular, we examine non-steady surface flow, infiltration, moisture movement in the unsaturated zone, and a range of hypothetical and real examples of watershed modelling.

The primary goal is to give students a sound understanding of the power and limitations of modelling complex processes.

assessment: exam 70%, coursework 30%

### 8990 Statistical Analysis in Hydrology

points value: 2.5 duration: semester 2

contact hours: 39 hours of lectures/tutorials/practicals

prerequisite: background in mathematics to first year University level

content: This subject gives an introduction to statistics, probability and time series analysis and their application to problems in hydrology. The use of time series models for synthetic data generation will be emphasised. Students will undertake a number of computer based exercises.

The aims are to introduce students to advanced statistical techniques in hydrology.

assessment: exam 70%, coursework 30%

### 2983 Tropical Hydrology

points value: 2.5 duration: semester 2

contact hours: 39 hours of lectures/tutorials/practicals

content: This subject will provide an introduction to the hydrological analyses required for investigations in tropical regions. A study of the hydrological cycle pertaining to the tropical region will be undertaken with a special reference to the unique islands of the regions-coral atolls. Special topics addressing appropriate technology and water resources development in the tropical region will be included.

The goals are to provide the students with the basics of tropical hydrology and the differences which can exist in the study of water of large continents and small islands. On this basis they should be capable of (1) managing and optimising limited island water resources; and (2) managing high flow systems in the humid tropics.

assessment: exam 50%, assignments and tutorials 50%

### 2702 Urban Hydrology

points value: 2.5 duration: semester 2

contact hours: 39 hours of lectures/tutorials/practicals

content: The scope of this subject ranges from stormwater control and use on individual allotments and housing clusters to flood mitigation in urban landscapes. Estimation and control/mitigation of runoff provide the main thread of the subject, but aspects of quality, environmental impact, amenity and stormwater as a resource are given due emphasis.

The goals are to give students sufficient understanding of stormwater processes to design and maintain the most appropriate urban drainage system.

assessment: exam 50%, assignments 50%

### 1050 Water Distribution Systems

points value: 2.5 duration: semester 2

contact hours: 39 hours of lectures/tutorials/practicals

prerequisite: 8095 Computing and Hydraulics

content: Steady state and transient hydraulics of pipe networks. Components of water supply systems. Formulation of steady state equations for analysis of flow in pipe network. Solution techniques. Valves. Pumps. Flow measurement. Pipeline layout and protection. Water hammer analysis of pipe systems. Computer applications. Pipe network optimisation, using genetic algorithms.

The goals are introduce students to water distribution system design techniques and other aspects. Students will achieve a sound understanding of modern analytical techniques.

assessment: exam 70% coursework 30%

### 3278 Water Resources Planning E

points value: 2.5 duration: semester 2

prerequisite: Mathematics to first year University level

contact hours: 39 hours of lectures/tutorials/practicals

content: A multi-objective approach to water resources planning is introduced. Economic, environmental and social factors are considered in this approach. The use of optimisation and modelling techniques in water resources planning is outlined. The need to consider non-structural alternatives is also discussed.

The goals are (1) to make students aware of the need to integrate economic, social and environmental factors into water resources planning; and (2) to explore techniques for simulation and optimisation of complex water systems.

assessment: exam 60%, coursework 40%

**4618 Water and Wastewater Treatment**

points value: 2.5

duration: semester 2

contact hours: 39 hours of lectures/tutorials/practicals

prerequisites: 7278 Water Quality Fundamentals and Processes

content: This subject presents the relevant techniques and standards in the design, maintenance and operation of water and wastewater treatment, and disposal systems in different settings. Salient features of design of facilities are discussed. The course concludes with a discussion of land treatment of wastewaters, groundwater remediation and industrial and hazardous wastewater management.

Goals: on completion of this subject the student will have an awareness of process engineering fundamentals; a detailed knowledge of physical, chemical and biological treatment processes; and the ability to select appropriate treatment options in a range of water and wastewater situations.

assessment: exam 50%, coursework 50%

## Master of Engineering (Information Technology and Telecommunications)

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar.

As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

### Specific Course Rules

#### 1 Admission requirements

- 1.1 The Faculty may accept as a candidate for the degree any person who has completed Level III of either the Bachelor of Engineering in Electrical and Electronic Engineering or the Bachelor of Engineering in Computer Systems Engineering at The University of Adelaide.
- 1.2 The Faculty may accept as a candidate a person who has completed the third year of an undergraduate engineering degree of another institution accepted by the University as equivalent to the Bachelor of Engineering in Electrical and Electronic Engineering or the Bachelor of Engineering in Computer Systems Engineering at The University of Adelaide.
- 1.3 Subject to the approval of Council the Faculty may, in special cases and subject to such conditions (if any) as it may see fit to impose in each case, accept as a candidate for the degree a person who does not hold the qualifications specified in 1.1 or 1.2 above but who has given evidence satisfactory to the Faculty of fitness to undertake work for the degree.
- 1.4 A candidate admitted under 1.3 above may be required to undertake such preliminary work as the Faculty may determine.
- 1.5 Admission to the course of study for the degree of Master of Engineering (Information Technology and Telecommunications) will be based upon a combination of results in university studies, other achievements, and the outcome of an interview at which the applicant's attitude and aptitude for Business and Commerce will be assessed by a panel consisting of representatives of the Australian Information Technology Engineering Centre, the Faculty of Engineering of The University of Adelaide and the other sponsoring institutions.

#### 2 Qualification requirements

- 2.1 To qualify for the degree a candidate shall:
  - (a) Satisfactorily complete any preliminary work which may be prescribed;
  - (b) satisfy examiners in subjects of study as prescribed in these Rules; and
  - (c) present a satisfactory report on a project approved by the Head of Department.

#### 3 Duration of course

- 3.1 Except with the permission of the Faculty, the subjects of study and project report shall be completed in not less than two years of full-time study.

#### 4 Assessment and examinations

- 4.1 If a subject has a Conceded Pass classification for the purpose of another award any such subject passed with this classification shall not count towards the requirements for the degree.
- 4.2 No project report or material presented for any other degree within this or any other institution shall be submitted.
- 4.3 There shall be four classifications of Pass in each subject for the degree: Pass with High Distinction, Pass with Distinction, Pass with Credit and Pass.
- 4.4 A candidate shall not be eligible to attend for examination unless the prescribed work has been completed to the satisfaction of the teaching staff concerned. A candidate who is not eligible to attend for examination shall be deemed to have failed the examination.
- 4.5 A candidate who fails in a subject and desires to take the subject again shall again attend lectures and satisfactorily do such written and practical work as the teaching staff concerned may

prescribe, unless specifically exempted therefrom after written application to the Faculty for exemption.

- 4.6 A candidate who has twice failed in any subject may not enrol for that subject again except by special permission of the Faculty and then only under such conditions as may be prescribed.

## 5 Review of academic progress

- 5.1 If in the opinion of the Faculty a candidate for the degree is not making satisfactory progress, the Faculty may, with the consent of the Council, terminate the candidature and the candidate shall cease to be enrolled for the degree.

## 6 Course of study and project work

- 6.1 The course, which shall normally extend over two years of full-time study, consists of three components:

- (a) Engineering subjects
- (b) Business and Management subjects
- (c) A project

Subjects are divided into two categories: *Core*, which are compulsory; and *Electives*, which may be chosen by the student subject to the approval of the Dean of the Faculty of Engineering (or nominee) and the Program Manager (AITEC). All Business and Management subjects are compulsory.

- 6.2 Each candidate's course of study must be approved by the Dean of the Faculty of Engineering (or nominee) at enrolment each year.
- 6.3 To qualify for the degree a candidate shall satisfactorily complete subjects to the value of at least 24 points at each of the Levels IV and V as set out in 7 below.
- 6.4 Subjects which have been presented as part of the requirements for any other award of The University of Adelaide or other institution or subjects which, in the opinion of the Faculty of Engineering are substantially similar to such subjects, will not be permitted to count for credit towards the coursework requirements of this degree.
- 6.5 If entrants to the course have previously completed any core subjects or subjects which, in the opinion of Faculty of Engineering, are substantially similar to core subjects they will be required to undertake other equivalent subjects. These alternative subjects may be selected from the list of electives or other appropriate subjects with the agreement of the Dean and the Program Manager (AITEC).

- 6.6 Not all electives may be offered in any one year.

- 6.7 To complete a course of study in a subject a candidate shall, unless exempted by the Head of the Department offering the subject:

- (a) regularly attend the prescribed lectures, tutorials, workshops and seminars; and
- (b) undertake such computing work, project work, practical work, field work and case studies, do such reading, written and oral work and pass such examinations as the Head of the Department offering the subject may prescribe.

## 7 Subjects of study

code	subject title	points
<b>Level IV</b>		
<i>semester 1</i>		
<b>core Engineering subjects</b>		
3169	Database and Information Systems	2
9456	Digital Transmission (IT&T)	2
2382	Programming Techniques	2
<b>Business and Management subjects</b>		
3917	Accounting and Cost Control	2
2353	Organisational Behaviour (IT&T)	2
<i>elective</i>		
One elective chosen from the list of electives given below (to the value of 2 points).		
<i>semester 2</i>		
<b>core Engineering subjects</b>		
8922	Computer Networks (IT & T)	2
6263	Software Engineering and Project	3
<b>Business and Management subjects</b>		
9182	Management (IT&T)	2
2276	Project Management	2
<i>project</i>		
2380	Project 1*	1
<i>elective</i>		
One elective chosen from the list of electives given below (to the value of 2 points).		
<b>Level V</b>		
<i>semester 1</i>		
<b>core Engineering subjects</b>		
4065	Mobile Communications (IT&T)	2

**Business and Management subjects**

3748 Operations Management	2
2621 Marketing	2

*project*

3237 Project 2*	4
4221 Project 3*	2

*semester 2*

**core Engineering subjects**

7529 Network Architecture and Switching	2
4468 Operating Systems	2

**Business and Management subjects**

4920 Financial Management (IT&T)	2
1482 Business Strategy (IT&T)	2

*electives*

Two electives chosen from the list given below (to the value of 4 points):

9334 Advanced Communication Theory	1
1008 Advanced Signal Processing	1
6378 Artificial Intelligence	2
2878 Building Graphical User Interfaces	2
5587 Communication Network Design (IT&T)	2
7653 Communications Systems Theory (IT&T)	2
9451 Electromagnetic Compatibility	1
3510 Error Control Coding (IT&T)	2
1519 Information Theory	2
1290 Optical Communications	1
4393 Real Time Systems (IT&T)	2
8198 Reliability Engineering	2
7874 Satellite Communications (IT&T)	2
6519 Signal Processing (Telecommunications)	2
5300 Telecommunications Networks	2
4485 Teletraffic Models	2

Students may, with the agreement of the Dean of the Faculty of Engineering (or nominee) and the Program Manager (AITEC), be permitted to undertake other subjects drawn from existing Level IV, honours and postgraduate subjects in relevant courses, or to enrol in relevant subjects offered by the University of South Australia or the Flinders University of South Australia.

\* note: For the project, students will work in teams each consisting of approximately 4 to 6 students.

A requirement of the project is that students will undertake a period at a client company's premises following Level IV.

## Syllabuses

### 3169 Database and Information Systems

*syllabus details:* see Bachelor of Science and Bachelor of Information Science in the Faculty of Mathematical and Computer Sciences

### 9456 Digital Transmissions (IT&T)

*points value:* 2 *duration:* semester 1

*content:* Baseband pulse transmission systems. Intersymbol interference. Signal regeneration. Measurement techniques. Digital radio systems. Speech coding.

*Aim:* to study the theory and current techniques used for digital transmission in telecommunication networks.

*Objective:* on completion of this subject students should be able to describe the encoding techniques and multiplexing hierarchies used in digital telecommunications networks; to analyse the performance of baseband transmission systems, the properties of line codes, and the effects of noise and intersymbol interference; to apply computer simulation and pseudorandom signal measurement techniques in digital transmission; to select appropriate digital radio modulation methods and carry out performance calculations for digital radio systems; to analyse the performance of selected methods for digital voice encoding.

*assessment:* assignment 50%, exam 50%

### 2382 Programming Techniques

*syllabus details:* see Bachelor of Science and Bachelor of Information Science in the Faculty of Mathematical and Computer Sciences

### 3917 Accounting and Cost Control

*points value:* 2 *duration:* semester 1

*content:* Accounting concepts. Financial accounting reports. Issues in external financial reporting. Interpreting and using financial statements. Management accounting. Cost accounting concepts and systems. Short run decision. Accounting and management control.

*Aim:* to give an understanding of the main conventions of accounting and the role of managers in influencing the key financial factors in organisations.

*Objectives:* on completion of this subject students should understand the methods used to prepare accounting statements; the analysis and interpretation of financial statements; the role of accounting in the evaluation of an organisation's performance; and

accounting methods and control systems available to enable managers to achieve their financial targets.

*assessment:* exam 70% assignments 30%

### 2353 Organisational Behaviour (IT&T)

*points value:* 2 *duration:* semester 1

*content:* The individual, groups; technology, and management in the organisation. Structural influences on behaviour.

*Aim:* to introduce students to human aspects of management and organisations.

*Objectives:* on completion of this subject, students should have an understanding of the characteristics and determinants of individual and group behaviour in the work place; the influence of technology on people at work; job design; working in teams; productivity and motivation; and leadership.

*assessment:* exam 60%, assignments/projects 40%

### 2328 Computer Networks and Applications

*syllabus details:* see Bachelor of Science and Bachelor of Information Science in the Faculty of Mathematical and Computer Sciences

### 6263 Software Engineering and Project

*syllabus details:* see Bachelor of Science and Bachelor of Information Science in the Faculty of Mathematical and Computer Sciences

### 9182 Management (IT&T)

*points value:* 2 *duration:* semester 2

*prerequisite:* 2353 Organisational Behaviour

*content:* The development of management theory. Modern management theory and practice. The management process. The quantitative and behavioural approaches. Human resource management in a technical environment. International management. Management in the future.

*Aim:* to examine the main approaches to understanding the role and activities of management.

*Objectives:* on completion of this subject, students should be able to appreciate the various theories influencing management practice; to understand the modern concepts of management; to be aware of the factors influencing management practice in the modern organisation; and to understand the nature of human resource management.

*assessment:* exam 70%, assignment 30%

### 2276 Project Management

*points value:* 2                      *duration:* semester 2

*prerequisites:* 3917 Accounting and Cost Control, 2353 Organisational Behaviour

*content:* The project and its environment. The project life cycle. Project management functions, tools and techniques. Management and project interface.

*Aim:* to provide an introduction to the project management function in the information technology and telecommunications industry.

*Objectives:* on completion of this subject, students should have an understanding of the distinctive attributes of projects and project management.

*assessment:* exam 70%, assignments and projects 30%

### 2380 Project 1

*points value:* 1                      *duration:* semester 2

*content:* This subject is the first of three related units which comprise the project component of the M.Eng. (IT & T). Project 1 represents the planning and preparation phase. Students are assisted in these tasks by their academic supervisors and by the Program Manager.

Project 2 and 3 are the implementation and completion phases.

Students will work in teams each normally consisting of four to six AITEC students combined, in some instances, with one or two Associate Diploma students from the Regency Institute of TAFE. This will provide an opportunity for students to develop an understanding of the relative roles of the professional and the para-professional in the IT & T industry. The teams will work either at AITEC or the premises of the industry sponsor.

A requirement of the Project is that students will undertake part of the work during a period spent in the sponsor's premises following Level IV.

*Aim:* the first stage of a program designed to enable students to translate engineering and business theory into economically realisable solutions of real life issues for industry.

*Objectives:* on completion of this subject, students should have selected a project to be undertaken for a client organisation; should be familiar with the expectations of the company for which the project is being undertaken; should have completed a comprehensive review of relevant literature; have defined the research to be undertaken; have considered the methodologies to be used; have prepared a project budget; have prepared a schedule of planned activities.

The Project, of which this subject forms the first part, is a vital component of the course and students will not be permitted to progress until they have satisfied their academic supervisors and the Program Manager that they have completed each stage at a satisfactory level.

### 4065 Mobile Communications (IT&T)

*points value:* 2                      *duration:* semester 1

*content:* Mobile radio theory. Cellular design. Third generation systems. Satellite based systems.

*Aim:* to study techniques for systems design and performance analysis of Mobile Communications Systems.

*Objectives:* on completion of this subject, students should be able to describe the mobile radio propagation channel; to design and analyse baseband mobile radio receivers; to design and analyse cellular mobile radio systems; and to describe future generation personal communication systems, including PCNs and mobile satellite systems.

*assessment:* exam 50%, assignments 50%

### 4468 Operating Systems

*syllabus details:* see Bachelor of Science and Bachelor of Information Science in the Faculty of Mathematical and Computer Sciences

### 4920 Financial Management (IT&T)

*points value:* 2                      *duration:* semester 2

*prerequisite:* 3917 Accounting and Cost Control

*content:* The financial objectives of an enterprise. Valuation models. Capital budgeting and project evaluation. Risk. Working capital management. Financing decisions.

*Aim:* to consider the major financial decisions of business enterprises and analytical approaches used in financial management.

*Objectives:* on completion of this subject a student should be able to understand the conceptual framework within which financial decisions are made; to analyse the major financial decisions of organisations; and to derive results and recommendations relating to a wide range of financial decisions.

*assessment:* exam 70%, assignment 30%

### 2621 Marketing

*points value:* 2                      *duration:* semester 1

*content:* Marketing concepts and thinking. Analysis of the business environment. Marketing segmentation and targeting product decisions. Pricing decisions. Distribution management. Advertising and promotion.

Industrial marketing. Services marketing. An introduction to international marketing.

Aim: to provide an introduction to marketing.

Objective: on completion of this subject, students should have an understanding of the thinking and priorities of marketing management; the various marketing functions; and the managerial problems of integrating an organisation's market place activities.

assessment: exam (60%); assignments/presentations (40%)

### 3237 Project 2

points value: 4

duration: semester 1

prerequisites: satisfactory completion of 2380 Project 1 and a placement with the client organisation

content: The subject, Project 2, is the second of three related units which comprise the project component of the M.Eng. (IT&T) program.

Project 2 represents the implementation phase and it incorporates a fifteen week period spent in industry at the sponsoring organisation's premises.

Projects 1 and 3 are the planning and preparation and completion phases. During Project 1, students will have been allocated to a team, normally consisting of four to six AITEC students combined, in some instances, with one or two Associate Diploma students from the Regency Institute of TAFE.

Aim: the second stage of a program designed to enable students to translate engineering and business theory into economically realisable solutions of real life issues for industry.

Objectives: on completion of this subject, the student should have completed data gathering; have critically evaluated the methodologies proposed in project 1; and have gained experience in working in a corporate team environment.

assessment: The Project, of which this subject forms the second part, is a vital component of the course and students will not be permitted to progress until they have satisfied their academic supervisors that they have completed each stage at a satisfactory level.

Students will be required to present the results of their work to date in a form to be specified according to the nature of the project. This will normally be in a written report and a group presentation.

### 7529 Network Architecture and Switching

points value: 2

duration: semester 2

prerequisites: knowledge of applied mathematics and a probability theory

content: Network Architecture. Circuit switched networks. Wide area packet switched networks. Local area packet switched networks. Integrated networks. Broadband networks.

Aim: to provide an overview of practical aspects of Telecommunications Networks with emphasis on circuit switching, POTS, ISDN and broadband networks.

Objectives: on completion of this subject, students should be able to read, with understanding, the literature on telecommunications networking and services and apply overall principles of switch and network architecture.

assessment: assignments 60%, exam 40%

### 3748 Operations Management

points value: 2

duration: semester 1

content: Performance measurement. Production planning and control. Integrating production with other functions of the organisation. New technology and change. New forms of work organisation.

Aim: to provide students with knowledge of the Operations Management Function and techniques involved in planning and controlling the productive activities of the enterprise.

Objectives: on completion of this subject, students should be able to contribute to the development of improved controls of performance of the operations function; to participate in the application of production planning and scheduling techniques; and to undertake project work associated with the introduction of 'minimum inventory' manufacturing methods.

assessment: assignments and project

### 1482 Business strategy (IT&T)

points value: 2

duration: semester 2

prerequisites: 4920 Financial Management (IT&T) and 2621 Marketing

content: The concept of strategic environment and analysis. Analysis of internal strengths and weaknesses. Achieving and maintaining competitive advantage. Strategy formulation. Translating strategies into policies and plans. Strategy implementation. Measurement, control and feedback. Case studies.

Aim: to provide the student with a basic framework for formulating business policies and strategies for an organisation.

Objectives: on completion of this subject, students should appreciate the importance of planning within organisations; the process by which organisational strategies are determined; the process of competitive analysis; and the steps involved in implementing and managing strategies.

assessment: exam 60%, assignments 40%

### 4221 Project 3

points value: 2

duration: semester 1

*prerequisites:* satisfactory completion of Projects 1 and 2 and completion of a placement with a client organisation

*content:* The subject, Project 3, is the third of three related units which comprise the project component of the M.Eng.(IT&T) program.

Project 3 represents the final analysis of results and the preparation of the final report which will be implemented by the client.

Project 1 is the planning and preparation phase of this three subject group; Project 2 is the data gathering and initial analysis phase.

Students will have worked in teams each nominally comprising four to six AITEC students combined, in some instances, with one or two Associate Diploma students from the Regency Institute of TAFE.

*Aim:* the final stage of a program designed to enable students to translate engineering and business theory into economically realisable solutions of real life issues for industry.

*Objectives:* on completion of this subject, students should have prepared and presented a report, as part of a team of four to six AITEC students and possibly one or two TAFE students on a real life issue within a client organisation.

*assessment:* The method in which the final results are to be presented will depend on the project and the needs of the client organisation. Students will discuss these requirements with their academic supervisors and the client throughout the project.

## electives

### 2878 Building Graphical User Interfaces

points value: 2

duration: semester 2

*content:* Graphical user interface principles. User interface infrastructure. GUI standards. Building techniques. Current tools. Research directions.

*Aim:* to consider the problem of building graphical user interfaces from the implementer's perspective.

*Objectives:* on completion of this subject the student should be able to understand the principles of graphical user interfaces; to be aware of, to understand and to apply GUI standards; to build graphical user interfaces using current tools; to understand research directions in GUI.

*assessment:* 2 minor programming assignments (individually) 5% and 20%; and one major programming assignment (groups of two) 75%

### 5587 Communication Network Design (IT&T)

points value: 2

duration: semester 2

*content:* Overview. Network algorithms and shortest path routing. Flow models, optimal routing. Reliability issues in routing.

*Aim:* to present mathematical techniques for the optimal design of telecommunications networks with regard to efficient resource usage and fault tolerance.

*Objectives:* on completion of this subject, students should be able to design efficient and fault tolerant networks.

*assessment:* exam 90%, assignments 10%

### 7653 Communications Systems Theory (IT&T)

points value: 2

duration: semester 2

*content:* Random processes. Detection theory. Detection of known signals. Detection of signals with random parameters. Non-linear systems.

*Aim:* to present aspects of communication theory relating to optimum design of digital communications systems and the analysis of performance of digital and analogue receiver systems.

*Objectives:* on completion of this subject, students should be able to apply statistical detection theory to the analysis of performance and design of pulse communication systems; and to analyse the effects of non-linearities in communications systems.

*assessment:* exam 50%, assignments 50%

### 3510 Error Control Coding (IT&T)

points value: 2

duration: semester 2

*content:* Fundamental properties of codes. Block coding principles. Decoding block codes. Cyclic codes. Convolutional codes. Decoding convolutional codes. Burst error correction. Automatic-repeat-request-schemes. Combined modulation and coding.

*Aim:* to examine the theory of error correcting codes and their applications in error control systems used in digital transmission and computer storage.

*Objectives:* on completion of this subject, students should be able to describe the algebraic structure of block and convolutional codes; to demonstrate an understanding of encoding and decoding procedures for cyclic and convolutional codes; and to identify the appropriate choice of coding or ARQ-error control scheme for various applications.

*assessment:* exam 50%, assignments 50%

**1519 Information Theory***points value:* 2*duration:* semester 2

*prerequisites:* Some basic understanding of probability theory is required for this course. Knowledge in communication theory would be an advantage.

*content:* Introduction: capacity of noiseless channels, Prefix codes, Entropy and Mutual Information, and Data Processing Lemma.

Source coding: data compaction, data compression codes, and Shannon's source coding theorem.

Channel coding: Discrete noisy channels, channel capacity, Shannon's channel coding theorem, random coding bounds, continuous channels, signalling with restricted band width.

Advanced topics: Aim: to provide an introduction into the basic ideas and concepts of information theory and their application to modern information systems engineering; Objectives: on completion of this subject, students should have an understanding of information theory to help them to delve into the large body of literature on the subject as well as an understanding of how the principles of information theory are at work in modern engineering.

*assessment:* assignments 10%, exam 45%, presentation 45%

**4393 Real Time Systems (IT&T)***points value:* 2*duration:* semester 2

*prerequisites:* 5204 Software Engineering and Project; 1956 Computer Systems; and 4468 Operating Systems or equivalents. A knowledge of control systems engineering will also be assumed.

*content:* Characteristics of real-time computing systems. Real-time software concepts. Design issues for real-time computing systems. Real-time programming languages and operating systems. Real-time program development. Real-time hardware development. System integration.

Aim: to present to students the concepts, techniques and software used to develop real-time computing applications.

Objectives: on completion of this subject, students should be able to describe the characteristics of a real-time computing systems; to explain the concept of a real-time virtual machine and employ selected implementations of this concept in a process of real-time computing system design; to perform the conceptual design of a real-time computing system; to design and develop and small real-time computing system; to allocate functions to either hardware or software on the basis of cost/performance criteria; to design, implement, test and document real-time application programs which execute using the facilities of a selected virtual machine; to incorporate program modules for time-critical and special input/output operations; to incorporate special-purpose hardware

modules; and to explain how real-time systems can be made more reliable.

*assessment:* exam 50%, practicals (projects) 50%

**8198 Reliability Engineering***points value:* 2*duration:* semester 2

*content:* The subject is made up of number of sections provided by lecturers drawn from industry, DTAFE and the universities.

Reliability. Physical reliability. Electromagnetic compatibility. Fault tolerant computing.

Aim: to provide an overview of aspects of reliability and other practical problems encountered in electronic systems which must be taken into account for both high quality and safety critical system design.

Objectives: on completion of this subject, students should be able to understand and apply design principles for the development of highly reliable electronic systems.

*assessment:* exam 100%

**7874 Satellite Communications (IT&T)***points value:* 2*duration:* semester 2

*content:* Satellite link models. Link budget calculations. Space segment. Propagation and interference. Modulation for non-linear satellite channels. Combined modulation and coding. Multiple access techniques. Case studies.

Aim: to study techniques for system design and performance analysis of satellite communications systems.

Objectives: on completion of this subject, students should be able to describe the properties of satellite and earth station subsystems; to carry out link-budget performance calculations; to analyse and compare modulation and coding schemes used in satellite systems; to describe typical multiple access techniques used in satellite communications.

*assessment:* exam 50%, assignment 50%

**4485 Teletraffic Models***points value:* 2*duration:* semester 1

*content:* Traffic streams. Loss and delay systems. Communications networks. Loss networks.

Aim: to introduce students to fundamental methods of the modelling of telecommunication systems.

Objectives: on completion of this subject, students should be able to understand how to model traffic streams using stochastic models; and be familiar with basic methods used to analyse traffic congestion and loss in telecommunication networks.

*assessment:* exam 50%, assignments 50%

## Master of Engineering Science in Materials Welding and Joining

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar.

As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

### Specific Course Rules

#### 1 Admission requirements

- 1.1 The following may be accepted as a candidate for the Degree:
- a person who has qualified in The University of Adelaide for the Honours Degree of Bachelor of Engineering or the Degree of Bachelor of Engineering in the Honours Grade; or
  - a person who holds a qualification accepted by the Faculty of Engineering as equivalent to the Honours Degree of Bachelor of Engineering or the Degree of Bachelor of Engineering in the Honours Grade of The University of Adelaide; or
  - a person who has qualified in The University of Adelaide for the Ordinary Degree of Bachelor of Engineering, or who holds a qualification accepted by the Faculty of Engineering as being equivalent to the Ordinary Degree of Bachelor of Engineering of The University of Adelaide and who has, in addition, successfully undertaken advanced studies and/or work in an appropriate area which is considered by the Faculty of Engineering to be adequate preparation for candidature.
- 1.2 With the approval of the Board of Graduate Studies acting with authority wittingly devolved to it by Council the Faculty may, in exceptional circumstances and subject to such conditions (if any) as it may see fit to impose in each case, accept as a candidate for the degree a person who does not qualify for admission under 1.1 above but has given evidence satisfactory to the Faculty of Engineering of fitness to undertake work for the degree.

#### 2 Duration of course

- 2.1 Except with the special permission of the Faculty of Engineering the course for the degree shall be completed in not less than one year and not more than two years of full-time study or not less than two and not more than five years of part-time study.

#### 3 Assessment and examinations

- 3.1 There shall be four classifications of pass in each subject for the degree: Pass with High Distinction, Pass with Distinction, Pass with Credit, and Pass.
- 3.2 A candidate shall not be eligible to attend for examination unless the prescribed work has been completed to the satisfaction of the teaching staff concerned. A candidate who is not eligible to attend for examination shall be deemed to have failed the examination.
- 3.3 A candidate who fails in a subject and desires to take the subject again shall again attend lectures and satisfactorily do such written and practical work as the teaching staff concerned may prescribe, unless specifically exempted therefrom after written application to the Faculty for such exemption.
- 3.4 Except with the permission of the Faculty of Engineering, no candidate may attempt a subject more than twice.
- 3.5 Subject to such conditions as it may determine in each case, the Faculty of Engineering may permit the supervised research thesis/project to be undertaken outside The University of Adelaide provided that it can be satisfied that:
- this will result in mutual academic benefit to the candidate and the Faculty of Engineering,

- (b) there will be adequate contact and interaction between the candidate and the candidate's internal supervisor, and
  - (c) the supervisor's access to any experimental work, the candidate's availability for seminars and other discussions, and the publication of results will not thereby be prejudiced.
- 3.6 The research thesis/project shall be supervised by either:
- (a) a full-time member of the academic staff of The University of Adelaide appointed by the Faculty of Engineering, or
  - (b) in special circumstances a suitably qualified person, having a close association with The University of Adelaide, appointed by the Board of Graduate Studies on the recommendation of the Faculty of Engineering.
- 3.7 For each student, the Faculty of Engineering shall appoint:
- (a) two Examiners of the research thesis/project who shall report their findings to the Faculty of Engineering; and
  - (b) an Assessment Committee representative of both the coursework teaching staff and the research thesis/project supervisor(s) which, taking account of the candidate's examination results and the report of the Examiners, shall make to the Faculty of Engineering one of the following recommendations:
    - (i) That the degree of Master of Engineering Science in Materials Welding and Joining be awarded; or
    - (ii) That the degree should be awarded subject to such minor amendments to the research thesis/project as may be specified; or
    - (iii) That the degree should not be awarded but that the candidate should be permitted to resubmit the research thesis/project or take such further examination as the Faculty of Engineering shall prescribe or both; or
    - (iv) That the degree should not be awarded but that the candidate be awarded the Graduate Diploma in Engineering (Materials Welding and Joining); or
    - (v) That no award be made.

#### 4 General

- 4.1 A candidate who holds the Graduate Diploma in Engineering (Materials Welding and Joining) shall surrender the Graduate Diploma before being admitted to the degree.'

#### 5 Preliminary work

- 5.1 A person whose qualifications have been accepted under either 1.1(a) or 1.1(b) above shall be determined to have satisfied the requirements of this Rule.
- 5.2 Before being admitted either under 1.1(c) or 1.2 above a person shall complete the requirements of this Rule by undertaking, and satisfying the examiners in, such courses of study and/or other work as may be prescribed by the Faculty of Engineering.

#### 6 Course of study

- 6.1 To qualify for the degree, candidates shall satisfactorily complete a two-thirds coursework program of study comprising Supervised Project Work to the value of 12 points and coursework to the value of 24 points.
- 6.2 To complete a course of study in a subject a candidate shall, unless exempted by the Head of the Department offering the subject:
  - (a) regularly attend the prescribed lectures, tutorials, workshops and seminars; and
  - (b) undertake such computing work, project work, practical work and case studies, do such reading, written and oral work and pass such examinations as the Head of the Department offering the subject may prescribe.

#### 7 Subjects of study

- 7.1 The following shall be the subjects for the degree of Master of Engineering Science in Materials Welding and Joining:

code	subject title	points
4582	Arc Welding Processes — Part 1	1.5
8020	Arc Welding Processes — Part 2	1.5
5306	Behaviour of Metals during Welding — Part 1	1.5
6601	Behaviour of Metals during Welding — Part 2	1.5
1311	Case Studies / Seminars	1.5
4089	Construction and Design — Part 1	1.5
8303	Construction and Design — Part 2	1.5

4927 Fabrication/Applications Engineering — Part 1	1.5
7758 Fabrication/Applications Engineering — Part 2	1.5
2790 Joining of Non-metallic and Dissimilar Materials	1.5
1059 Mechanical Testing	1.5
2338 NDT/Metallographic Analysis	1.5
7627 Non-arc Welding Processes — Part 1	1.5
3254 Non-arc Welding Processes — Part 2	1.5
1393 Welding Practical — Part 1	1.5
2587 Welding Practical — Part 2	1.5
8902 Research Thesis/Project	12

note: Each year the Department of Mechanical Engineering shall determine if this course will be offered, and in which semesters individual subjects will be offered.

## Syllabuses

This course is designed to satisfy the requirements of the European Welding Federation for the education of Welding Engineers. Detailed syllabuses are available from the Department of Mechanical Engineering.

# Master of Applied Science

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar.

As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

## Specific Course Rules

### 1 Admission requirements

1.1 The following may be accepted as a candidate for the degree:

- (a) a person who has qualified in The University of Adelaide for the Honours degree of Bachelor of Science, Applied Science or Agricultural Science;
- (b) a person who holds a qualification accepted by the Faculty of Engineering as being equivalent to that of 1.1(a) above; or
- (c) a person who has qualified in The University of Adelaide for the degree of Bachelor of Science, Applied Science or Agricultural Science or who holds another academic qualification accepted by the Faculty of Engineering as being sufficient. Persons admitted under Rule may not be awarded the degree before the expiration of two years from the date of qualification for candidature, and will normally be required to carry out preliminary work at Honours standard as set out in 4 below.\*

\* note

The purpose of this requirement is to allow a candidate who does not have qualifications acceptable under (a) or (b) above to acquire additional competence through study or experience.

1.2 With the approval of the Board of Graduate Studies, acting with authority wittingly devolved to it by Council the Faculty may, in exceptional circumstances and subject to such conditions (if any) as it may see fit to impose in each case, accept as a candidate for the degree a person who does not qualify under 1.1 above but who has given evidence satisfactory to the Faculty of fitness to undertake work for the degree.

1.3 A candidate may be admitted on probation. The period of probation shall not exceed six months in the case of a full-time candidate nor twelve months in the case of a part-time candidate. At

the end of the period each candidate's performance shall be reviewed by the Faculty of Engineering and the candidature confirmed, with or without special conditions, or terminated.

### 2 Review of academic progress

2.1 A candidate's progress shall be reviewed by the Faculty at the end of each academic year. If, in the opinion of the Faculty of Engineering a candidate is not making satisfactory progress the Faculty may, with the consent of the Council, terminate the candidature.

### 3 Qualification requirements

3.1 To qualify for the degree a candidate shall:

- (a) on completion of any preliminary work which may be prescribed in the Specific Course Rules and after consultation with the Head of the Department in which the majority of the work falls, submit in writing to the Registrar, for approval by the Faculty, the program of study as prescribed in the Specific Course Rules and designed to extend over either one calendar year if taken full-time or not less than two and not more than five calendar years if taken part-time;
- (b) undertake the approved program of study under the direction of a supervisor or supervisors who shall be members of the full-time academic staff of the University and appointed by the Faculty, but in special circumstances the Faculty may also appoint an external supervisor;
- (c) pass such examination on the course of study as may be required by the Faculty; and/or
- (d) present a thesis embodying the results of the project as prescribed in 3.3 below.

3.2 (a) Except by permission of the Faculty or as prescribed in these Rules, the whole of the work for the degree must be completed within the University.

(b) Subject to such conditions as it may determine in each case, the Faculty may permit project work to be undertaken outside the University provided that it can be satisfied:

(i) that this will result in mutual academic benefit to the candidate and the supervising department;

(ii) that there will be adequate contact and interaction between the candidate and the candidate's supervising department; and

(iii) that the supervisor's access to any experimental work, the candidate's availability for seminars and other discussions, and the publication of results will not thereby be prejudiced.

3.3 (a) On completion of the project work the candidate shall lodge with the Registrar three copies of the thesis prepared in accordance with directions given to candidates from time to time.

(b) Unless the Faculty expressly approves an extension of time in a particular case the thesis shall be submitted within six months of the completion of the candidate's program.

(c) On submission or re-submission of the thesis the Faculty shall nominate examiners who may recommend that it:

(i) be accepted, with or without conditions; or

(ii) be accepted, with or without conditions, subject to satisfactory oral examination; or

(iii) be sent back to the candidate for revision; or

(iv) be rejected.

3.4 A candidate who fulfils the requirements of these regulations may, on the recommendation of the Faculty, be admitted to the degree of Master of Applied Science.

## 4 Preliminary work

4.1 A person whose qualifications have been accepted under either 1.1(a) or 1.1(b) above, shall be deemed to have satisfied the requirements of this Rule.

4.2 Before being admitted either under 1.1(c) or 1.2 above a person shall complete the requirements of this Rule by undertaking, and satisfying the examiners in, such courses of study and/or other work as may be prescribed by the Faculty of Engineering.

## 5 Course of study

note: Under the Specific Course Rules, a program of study for the degree may comprise any combination of coursework and project work ranging from all coursework to all project work. Currently only three options are offered.

5.1 To qualify for the degree, a candidate shall satisfactorily complete a program of study consisting of one of the following approved options:

(a) An all research work program comprising Supervised Project Work to the value of 24 points.

(b) A one-third coursework program comprising Supervised Project Work to the value of 16 points and coursework to the value of at least 8 points.

(c) A two-thirds coursework program comprising Supervised Project Work to the value of 8 points and coursework to the value of at least 16 points.

## 6 Classification of subjects

6.1 Subjects forming part of any coursework component for the degree shall be classified as follows:

### Group A: Postgraduate subjects

These are subjects offered at a postgraduate level either in the Faculty of Engineering, in another Faculty, or at another Institution. These include postgraduate subjects in the Faculty of Engineering. Honours and approved Postgraduate Diploma subjects in the Faculties of Science and Mathematical and Computer Sciences, and Postgraduate subjects at Flinders University or the University of South Australia.

### Group B: Advanced Level subjects

These are subjects at Level IV in the Faculty of Engineering which have been designated as 'Advanced Level' by the Department concerned. They are subjects which reach an advanced level of expertise in the subject material.

Subject to the approval of the Faculty, subjects from outside the Faculty of Engineering may also be included in this category.

**Group C: Ordinary Level subjects**

These are subjects at either Level III or Level IV in the Faculty of Engineering which are not designated 'Advanced Level', or subjects at Level III in the Faculties of Science and Mathematical and Computer Sciences, or approved final year undergraduate subjects from other Faculties or institutions.

**7 Coursework requirements**

note: This Rule sets out the policies for the administration of the degree of Master of Applied Science with a coursework component. The Faculty may approve minor variations to these requirements in exceptional circumstances.

- 7.1 A candidate seeking to enrol in a program of study with a coursework component shall, after consulting the Head of the department (or nominee) in which the majority of the candidate's work falls, submit the proposed program to the Faculty for approval.
- 7.2 For a one-third coursework degree, the program may not contain more than a total of 6 points of subjects from Groups B and C, whereas a two-thirds coursework degree may not contain more than a total of 8 points of subjects from Groups B and C.
- 7.3 For a one-third coursework degree, the program may not contain more than 6 points of subjects from outside the Faculty of Engineering\*, whereas a two-thirds coursework degree may not contain more than 8 points of subjects from outside the Faculty of Engineering.
- \* For the purposes of this policy, the Faculty of Engineering is deemed to include all Centres and joint ventures of which the Faculty, or its constituent departments, is a formal partner.
- 7.4 A coursework program may contain greater than the minimum number of required points, in which case the determination of whether the coursework requirements have been satisfied or not will include only the best results from eligible subjects amounting to the required number of points.
- 7.5 There shall be four classifications of pass in each subject for the Master of Applied Science: Pass with High Distinction, Pass with Distinction, Pass with Credit, and Pass. If a subject has a Conceded Pass classification for the purpose of another award, any such subject passed with this classification shall not count towards the requirements for the degree of Master of Applied Science.

7.6 A subject shall be eligible to be counted for credit towards the coursework requirements of the degree if:

- (a) In Groups A and B the grade obtained is at Pass standard (50%) or higher.
- (b) In Group C the grade obtained is 60% or higher.

7.7 To satisfy the coursework requirements of the degree, a candidate must obtain a weighted average, taken over the best results in eligible subjects which together amount to the required number of points, of at least 55%.

7.8 Subjects which have been presented as part of the requirements for any other award of this University or other institution or subjects which in the opinion of the Faculty of Engineering are substantially similar to such subjects, will not be permitted to count for credit towards the coursework requirements of this degree.

**8 Subjects of study**

8.1 The subjects for the Master of Applied Science are the same as those for the Master of Engineering Science.

**Syllabuses**

The Syllabuses for the degree of Master of Applied Science are the same as those for the degree of Master of Engineering Science.

## Master of Applied Science in Hydrology and Water Resources

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar.

As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

### Specific Course Rules

#### 1 Admission requirements

- 1.1 The following may be accepted as a candidate for the degree:
- (a) a person who has qualified in The University of Adelaide for the Honours Degree of Bachelor of Science, Agricultural Science or Applied Science; or
  - (b) a person who holds a qualification accepted by the Faculty of Engineering as equivalent to the Honours Degree of Bachelor of Science, Agricultural Science or Applied Science of The University of Adelaide; or
  - (c) a person who has qualified in The University of Adelaide for the Ordinary Degree of Bachelor of Science, Agricultural Science or Applied Science or who holds a qualification accepted by the Faculty of Engineering as equivalent to those degrees of The University of Adelaide and who has, in addition, successfully undertaken advanced studies and/or work in an appropriate area which is considered by the Faculty of Engineering to be an adequate preparation for candidature.
- 1.2 With the approval of the Board of Graduate Studies acting with authority wittingly devolved to it by Council the Faculty of Engineering may, in exceptional circumstances and subject to such conditions (if any) as it may see fit to impose in each case, accept as a candidate for the degree a person who does not qualify under 1.1 above but who has given evidence satisfactory to the Faculty of Engineering of fitness to undertake work for the degree.

#### 2 Duration of course

- 2.1 Except with the special permission of the Faculty of Engineering the course for the degree shall be completed in not less than one year and not more than two years of full-time study or not less than two and not more than four years of part-time study.

#### 3 Status, exemption and credit transfer

- 3.1 A candidate may not present for credit towards the degree any subject that has been presented as part of the requirements for any other award of this University or other institution, or which in the opinion of the Faculty of Engineering is substantially similar to such subject.

#### 4 Assessment and examinations

- 4.1 There shall be four classifications of pass in each subject for the degree: Pass with High Distinction, Pass with Distinction, Pass with Credit and Pass. Students shall be required to attain at least a Division I pass in each of the core subjects of the Masters Degree Program, in order to proceed to the elective subjects and supervised research thesis/project phase, unless this requirement is waived by the Faculty of Engineering.
- 4.2 Except with the permission of the Faculty of Engineering, no candidate may attempt a subject more than twice.
- 4.3 Subject to such conditions as it may determine in each case, the Faculty of Engineering may permit the supervised research thesis/project to be undertaken outside The University of Adelaide provided that it can be satisfied that:
- (a) this will result in mutual academic benefit to the candidate and the Faculty of Engineering,

- (b) there will be adequate contact and interaction between the candidate and the candidate's internal supervisor; and
  - (c) the supervisor's access to any experimental work, the candidate's availability for seminars and other discussions, and the publication of results will not thereby be prejudiced.
- 4.4** The research thesis/project shall be supervised by either:

- (a) one or more full-time members of the academic staff of Flinders University, the University of South Australia or The University of Adelaide appointed by the Faculty of Engineering (on the recommendation of the Program Committee), or
- (b) in special circumstances, a suitably qualified person having a close association with the universities appointed by the Board of Graduate Studies on the recommendation of the Faculty of Engineering.

If more than one supervisor is appointed, one of them shall be nominated as the chief supervisor.

- 4.5** For each student and on the recommendation of the Program Committee the Faculty of Engineering shall appoint

- (a) two Examiners of the research thesis/project who shall report their findings to the Faculty of Engineering; and
- (b) an Assessment Committee representative of both the coursework teaching staff and the research thesis/project supervisor(s) which, taking account of the candidate's examination results and the report of the Examiners, shall make to the Faculty of Engineering one of the following recommendations:
  - (i) That the degree of Master of Applied Science in Hydrology and Water Resources be awarded; or
  - (ii) That the degree should be awarded subject to such minor amendments to the research thesis/project as may be specified; or
  - (iii) That the degree should not be awarded but that the candidate should be permitted to resubmit the research thesis/project or take such further examination as the Faculty of Engineering shall prescribe or both; or

- (iv) That the degree should not be awarded but that the candidate be awarded the Graduate Certificate in Engineering (Hydrology and Water Resources); or
- (v) That no award be made.

## 5 General

- 5.1** A candidate who holds the Graduate Certificate in Engineering (Hydrology and Water Resources) shall surrender the Graduate Certificate before being admitted to the degree of Master of Applied Science in Hydrology and Water Resources.

## 6 Preliminary work

- 6.1** A person whose qualifications have been accepted under either 1.1(a) or 1.1(b) above shall be deemed to have satisfied the requirements of this Rule.
- 6.2** Before being admitted either under 1.1(c) or 1.2 above a person shall complete the requirements of this Rule by undertaking, and satisfying the examiners in, such courses of study and/or other work as may be prescribed by the Faculty of Engineering.

## 7 Course of study

- 7.1** To qualify for the degree, a candidate shall satisfactorily complete a program of study consisting of one of the following options:
- (a) A two-thirds coursework program comprising Supervised Project Work to the value of 10 points and coursework to the value of at least 20 points.
  - (b) A five-sixths coursework program comprising Supervised Project Work to the value of 5 points and coursework to the value of at least 25 points.

## 8 Coursework requirements

- 8.1** The course shall comprise:

*either*

- |                              |    |
|------------------------------|----|
| (a) compulsory core subjects | 15 |
| elective subjects            | 5  |
| Research Thesis              | 10 |

*or*

- |                              |    |
|------------------------------|----|
| (b) compulsory core subjects | 15 |
| elective subjects            | 10 |
| Research Project             | 5  |

To satisfy the coursework requirements of the Degree, a candidate must attain at least a Division 1 pass in all eligible subjects, which together amount to the required number of points.

### 9 Subjects of study

9.1 The subjects for the Master of Applied Science in Hydrology and Water Resources are the same as those for the Master of Engineering Science in Hydrology and Water Resources.

# Master of Applied Science in Materials Welding and Joining

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar.

As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

## Specific Course Rules

### 1 Admission requirements

- 1.1 The following may be accepted as a candidate for the Degree:
- a person who has qualified in The University of Adelaide for the Honours Degree of Bachelor of Science in an appropriate discipline; or
  - a person who holds a qualification accepted by the Faculty of Engineering as equivalent to the Honours Degree of Bachelor of Science of The University of Adelaide; or
  - a person who has qualified in The University of Adelaide for the Ordinary Degree of Bachelor of Science, or who holds a qualification accepted by the Faculty of Engineering as equivalent to the Ordinary Degree of Bachelor of Science of The University of Adelaide and who has, in addition, successfully undertaken advanced studies and/or work in an appropriate area which is considered by the Faculty of Engineering to be adequate preparation for candidature.
- 1.2 With the approval of the Board of Graduate Studies acting with authority wittingly devolved to it by Council the Faculty may, in exceptional circumstances and subject to such conditions (if any) as it may see fit to impose in each case, accept as a candidate for the degree a person who does not qualify for admission under 1.1 above but has given evidence satisfactory to the Faculty of Engineering of fitness to undertake work for the degree.

### 2 Duration of course

- 2.1 Except with the special permission of the Faculty of Engineering the course for the degree shall be completed in not less than one year and not more than two years of full-time study or not less than two and not more than five years of part-time study.

### 3 Assessment and examinations

- 3.1 There shall be four classifications of pass in each subject for the degree: Pass with High Distinction, Pass with Distinction, Pass with Credit, and Pass.
- 3.2 A candidate shall not be eligible to attend for examination unless the prescribed work has been completed to the satisfaction of the teaching staff concerned. A candidate who is not eligible to attend for examination shall be deemed to have failed the examination.
- 3.3 A candidate who fails in a subject and desires to take the subject again shall again attend lectures and satisfactorily do such written and practical work as the teaching staff concerned may prescribe, unless specifically exempted therefrom after written application to the Faculty for such exemption.
- 3.4 Except with the permission of the Faculty of Engineering, no candidate may attempt a subject more than twice.
- 3.5 Subject to such conditions as it may determine in each case, the Faculty of Engineering may permit the supervised research thesis/project to be undertaken outside The University of Adelaide provided that it can be satisfied that:
- this will result in mutual academic benefit to the candidate and the Faculty of Engineering,
  - there will be adequate contact and interaction between the candidate and the candidate's internal supervisor, and
  - the supervisor's access to any experimental work, the candidate's availability for seminars and other discussions, and the publication of results will not thereby be prejudiced.

**3.6** The research thesis/project shall be supervised by either:

- (a) a full-time member of the academic staff of The University of Adelaide appointed by the Faculty of Engineering, or
- (b) in special circumstances a suitably qualified person, having a close association with The University of Adelaide, appointed by the Board of Graduate Studies on the recommendation of the Faculty of Engineering.

**3.7** For each student, the Faculty of Engineering shall appoint:

- (a) Two Examiners of the research thesis/project who shall report their findings to the Faculty of Engineering; and
- (b) An Assessment Committee representative of both the coursework teaching staff and the research thesis/project supervisor(s) which, taking account of the candidate's examination results and the report of the Examiners, shall make to the Faculty of Engineering one of the following recommendations:
  - (i) That the degree of Master of Applied Science in Materials Welding and Joining be awarded; or
  - (ii) That the degree should be awarded subject to such minor amendments to the research thesis/project as may be specified; or
  - (iii) That the degree should not be awarded but the candidate should be permitted to resubmit the research thesis/project or take such further examination as the Faculty of Engineering shall prescribe or both; or
  - (iv) That the degree should not be awarded but that the candidate be awarded the Graduate Diploma in Engineering (Materials Welding and Joining); or
  - (v) That no award be made.

**4 General**

- 4.1** A candidate who holds the Graduate Diploma in Engineering (Materials Welding and Joining) shall surrender the Graduate Diploma before being admitted to the degree.

**5 Preliminary work**

- 5.1** A person whose qualifications have been accepted under either 1.1(a) or 1.1(b) above shall be determined to have satisfied the requirements of this Rule.
- 5.2** Before being admitted either under 1.1(c) or 1.2 above a person shall complete the requirements of this Rule by undertaking, and satisfying the examiners in, such courses of study and/or other work as may be prescribed by the Faculty of Engineering.

**6 Course of study**

- 6.1** To qualify for the degree, candidates shall satisfactorily complete a two-thirds coursework program of study comprising Supervised Project Work to the value of 12 points and coursework to the value of 24 points.
- 6.2** To complete a course of study in a subject a candidate shall, unless exempted by the Head of the Department offering the subject:
- (a) regularly attend the prescribed lectures, tutorials, workshops and seminars; and
  - (b) undertake such computing work, project work, practical work and case studies, do such reading, written and oral work and pass such examinations as the Head of the Department offering the subject may prescribe.

**7 Subjects of study**

- 7.1** The subjects for the degree of Master of Applied Science in Materials Welding and Joining are the same as those for the degree of Master of Engineering Science in Materials Welding and Joining.

**Syllabuses**

*syllabus details: see Master of Engineering Science in Materials Welding and Joining*

# Doctor of Engineering

## Regulations

- 1
  - (a) Subject to these regulations a person who has been admitted in The University of Adelaide to an Honours degree of Bachelor or a degree of Master in Science, Agricultural Science, Applied Science, Engineering or Engineering Science, or to the degree of Doctor of Philosophy in a field of study approved by the Faculty of Engineering, may proceed to the degree of Doctor of Engineering.
  - (b) On the recommendation of the Faculty of Engineering the Council may accept as a candidate for the degree a person who has been admitted to a degree in The University of Adelaide other than one named in section (a) of this regulation, or who is a graduate of another university or institution of higher education recognised by The University of Adelaide and has a substantial association with the University; provided that in each case the graduate concerned has, in the opinion of the Faculty of Engineering, had an adequate engineering training.
  - (c) On the recommendation of the Faculty of Engineering the Board of Graduate Studies, acting with authority wittingly devolved to it by Council may, in special cases, accept as a candidate for the degree a person who does not hold a degree of a university or institution of higher education, provided that in each case the candidate concerned has a substantial association with the University and has, in the opinion of the Faculty of Engineering, adequate engineering credentials.
  - (d) Except where a person has been accepted as a candidate under regulation 1(c), no person shall be accepted as a candidate for the degree of Doctor of Engineering before the expiration of five years from the date of the original graduation.
- 2
  - (a) A person who desires to become a candidate for the degree shall give notice of the intended candidature in writing to the Registrar and with such notice shall furnish particulars of the applicant's engineering achievements and of the work to be submitted for the degree.
  - (b) The Faculty of Engineering shall appoint a committee to examine the information submitted and to advise the Faculty on whether the Faculty should:
    - (i) allow the applicant to proceed, and approve the subject or subjects of the work to be submitted; or
    - (ii) advise the applicant not to submit his work: and the Faculty's decision shall be conveyed to the applicant.
  - (c) If it accepts the candidature and approves the subject or subjects of the work to be submitted the Faculty shall nominate examiners of whom one at least shall be an external examiner.
- 3
  - (a) To qualify for the degree the candidate shall furnish satisfactory evidence that the candidate has made an original contribution of distinguished merit adding to the knowledge, understanding or practice of any subject with which the Faculty is directly concerned.
  - (b) The degree shall be awarded primarily on a consideration of such of published works as the candidate may submit for examination.
  - (c) The candidate in submitting published works shall state generally in a preface and specifically in notes the main sources from which the information is derived and the extent to which the candidate has made use of the work of others, especially where joint publications are concerned. The candidate may also signify in general terms the portions of his work which he claims as original.
  - (d) The candidate is required to indicate what part, if any, of the work has been submitted for a degree in this or any other university.
- 4
 

The candidate shall lodge with the Registrar three copies of the work prepared in accordance with the directions given in sub-paragraph (b) of clause 2B of Chapter XXV of the Statutes. If the work is accepted for the degree the Registrar will transmit two of the copies to the University Library.

- 5 A candidate who complies with the foregoing conditions and satisfies the examiners may, on the recommendation of the Faculty of Engineering, be admitted to the degree of Doctor of Engineering.
- 6 Notwithstanding anything contained in the preceding regulations, the Faculty may recommend the award of the degree to any person who is not a member of the staff of the University. Any such recommendation must be accompanied by evidence that the person for whom the award is proposed has made an original and substantial contribution of distinguished merit to the knowledge or understanding of a subject with which the Faculty is directly concerned, of a standard not less than that required by regulation 3

Regulations allowed 15 January, 1976.

Amended: 4 Feb. 1982: 2, 4 21; Feb. 1991: 1; 13 Feb. 1992: 1(d), 2(a), 3(a), 3(b), 3(c), 3(d).

## Regulations

### Of Awards in the Faculty of Law

1 In the Faculty of Law there shall be the following awards:

Ordinary degree of Bachelor of Laws

Ordinary degree of Bachelor of Laws with Honours

Honours degree of Bachelor of Laws

Graduate Certificate in Mediation (Family)

Graduate Diploma in Corporate and Commercial Law\*

Graduate Diploma in Environmental Law

Graduate Diploma in Taxation Law

Master of Environmental Law

Master of Laws

Master of Laws (Corporate and Commercial)\*

Master of Laws (General Studies)

2 The courses for the awards listed in Regulation 1 shall be governed by the General Course Rules and Specific Course Rules that the Council shall prescribe from time to time.

3 The syllabuses of subjects shall be specified by the Council.

notes not forming part of the Regulations

1 Council has delegated the power to approve minor changes to the General Course Rules to the Deputy Vice-Chancellor (Academic).

2 Council has delegated the power to approve minor changes to the Specific Course Rules to the Deans of Faculties.

3 Council has delegated the power to specify syllabuses to the Head of each department or centre concerned, such syllabuses to be subject to approval by the Faculty or by the Dean on behalf of the Faculty. The Head of department or centre may approve minor changes to any previously approved syllabus.

4 The Faculty also offers a Doctor of Laws (LL.D.). Higher doctorates are governed by their own sets of Regulations as printed in this volume of the Calendar.

Regulations effective from 1 August 1994.

The addition of the Ordinary degree of Bachelor of Laws with Honours effective from 2 August 1994.

Regulations amended 23 February 1995.

\* Awaiting approval and confirmation.

# Bachelor of Laws

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar.

As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

## Specific Course Rules

### 1 General

- 1.1 There shall be an Ordinary degree, which may be awarded with Honours, and an Honours degree of Bachelor of Laws.
- 1.2 The Specific Course Rules
- (a) provide for, or empower the Faculty to provide for, the subject or subjects to be prerequisite for, or concurrent with, any subject, and the lectures, seminars, tutorials, moot court work, examinations, written and other work to be satisfactorily undertaken by candidates; and
  - (b) where a dissertation is required for the Honours degree of Bachelor of Laws, require that a candidate's enrolment for that dissertation be subject to the approval of the Department of Law.
- 1.3
- (a) a candidate who has completed subjects under any repealed regulations for the Bachelor of Laws and the Final Certificate in Law shall have status in the equivalent subjects under the Specific Course Rules;
  - (b) except with the permission of the Faculty of Law, a candidate who first enrolled in the Faculty of Law before 1967, shall, in order to qualify for the degree, in addition to complying with the requirements of Specific Course Rules 6.1 and 6.2, pass in two subjects, other than Science subjects, available for the degree of Bachelor of Arts and approved by the Faculty of Law.

### 2 Admission requirements

- 2.1 Admission as a candidate for the degree is subject to quotas and selection procedures currently operating in the Faculty.

- 2.2 An applicant may be considered for admission as a candidate if one or more of the following conditions have been satisfied:
- (a) completion of a degree of The University of Adelaide in a faculty other than Law;
  - (b) completion in another university of a degree which, in the opinion of the Faculty of Law, is at least equivalent, for this purpose, to a degree in another faculty of the University.
- 2.3 Subject to the approval of the Council, the Faculty of Law may accept as a candidate for the degree a person who does not satisfy one of the conditions in Specific Course Rule 2.2 above but who has completed a non-Law qualification in a tertiary institution and has satisfied the Faculty on fitness to undertake work for the degree.
- 2.4 Except with the permission of the Dean of the Faculty or a nominee, a candidate who first enrolled in a Law subject in 1987 or a subsequent year must undertake 6019 Law and Legal Process and 3731 Contract concurrently, in the first year in which they enrol.
- 2.5 Places offered in 6019 Law and Legal Process may not be deferred. A student may withdraw from 6019 Law and Legal Process and/or 3731 Contract without loss of place only in exceptional circumstances and with special permission of the Faculty. Further, such permission will be given only on the basis of re-enrolment in the following academic year.
- 2.6 A candidate for the LL.B. who enrolls for the first time in and after 1995 is required to notify the Faculty in writing if he or she wishes to take a leave of absence from the course. Except in exceptional circumstances approved by the Faculty such leave will be for no more than two

years during the candidature. Students absent for longer periods may reapply for admission to the course in accordance with procedures in operation at the time.

### 3 Courses of study

3.1 Courses of study must be approved by the Dean of the Faculty or a nominee at enrolment each year.

### 3.2 The Ordinary degree

#### Introductory note to Specific Course Rule 3.2 (not forming part of the Rule).

1 The normal scheme of study recommended for students other than graduates who wish to proceed to the degree of Bachelor of Laws is as follows:

(a) Apply for entry to candidature for one of the following degrees:

Bachelor of Design Studies (B.Des.St.)

Bachelor of Arts (B.A.)

Bachelor of Commerce (B.Com.)

Bachelor of Computer Science (B.Comp.Sc.)

Bachelor of Economics (B.Ec.)

Bachelor of Engineering (Chemical) (B.E.(Chem))

Bachelor of Health Sciences (B.Health Sc.)

Bachelor of Science (B.Sc.)

Bachelor of Science (Mathematical and Computer Sciences) (B.Sc.(Ma.& Comp.Sc.))

On completion of the equivalent of at least one year of full time study (24 points) in one of these degrees apply for entry to Law studies.

(b) A number of places in Law studies are also reserved for school leavers (ie enrolled in SACE Stage 2), on the basis of their SACE aggregate or equivalent.

School leavers who have been offered a reserved place will be required to successfully complete the first year (24 points) of their non law degree course prior to admission to Law studies.

Admission to Law studies entitles candidates to enrol at the appropriate time for all other Law subjects available from the Specific Course Rules of the above degrees. It should be noted that in Science the resultant degree awarded will be the Bachelor of Science (Jurisprudence). Entrants to Science seeking to do Law should ensure their first year enrolment meets the B.Sc. (Jurisprudence) requirement. Candidates admitted to Law studies who include Law

subjects in the non law degree proceed automatically to LLB candidature on completion of the non law degree.

2 Graduates who have not included Law subjects in their undergraduate studies may be selected as candidates for the degree of Bachelor of Laws. For such candidates, the course load for the Bachelor of Laws degree is the equivalent of three and a half years of full-time study, and they may usually complete the degree in three years by taking some overload.

#### 3.2.1 A candidate shall qualify for the degree of Bachelor of Laws if:

(a) the candidate has

(i) qualified for a degree in another Faculty of the University, or

(ii) obtained in another university a degree which, in the opinion of the Faculty of Law, is at least equivalent, for the purpose, to a degree in another Faculty of the University, or

(iii) obtained in another tertiary institution a non-Law qualification at an academic level which has been accepted by Council for the purposes of Specific Course Rule 2.3.

(b) the candidate has passed (while a candidate for the non-Law degree or qualification referred to in sub-clause (a) or otherwise):

(i) all the following compulsory subjects:

6019 Law and Legal Process 6

3731 Contract 6

8433 Constitutional Law 6

8821 Property 6

9365 Torts 6

8480 Trusts 3

8580 Criminal Law 6

3225 Associations 6

8326 Administrative Law 6

4729 Evidence 6

and

(ii) elective subjects with an aggregate points value of 27 from the following:

9046	Aboriginal People and the Law	3
2682	Advanced Contract Law	3
8782	Australian Insolvency Law	3
3446	Australian Law and Society	3
4398	Australian Legal History	3
1298	Capital Gains Tax and the Taxation of Entities	3
6318	Choice of Law: Theory and Practice	3
7015	Comparative Corporate Law	3
9844	Conservation and Heritage Law	3
5626	Consumer Protection and Unfair Trading	3
1901	Criminology	3
7272	Environmental Planning and Protection Law	3
1087	Family Law I	3
3436	Family Law II	3
9854	Feminist Legal Theory (LLB)	3
5258	Financial Transactions	3
2412	Housing Law	3
4691	Human Rights: International and National Perspectives (LLB)	3
9622	Income Maintenance	3
5659	Industrial Property	3
1079	Industrial Relations Law	3
9420	Intellectual Property	3
1101	International Law A (LLB)	3
3207	International Law B (LLB)	3
9425	Jessup Moot	3
8967	Jurisdiction of Australian Courts	3
3863	Jurisprudence I	3
8465	Jurisprudence II	3
6416	Labour Law	3
7730	Land Use Planning Law	3
3020	Law and Economics	3
8729	Law of Restitution	3
4809	Law of the Person	3
4771	Media Law	3

6615	Medical Law and Ethics	3
6400	Minerals and Energy Law	3
3765	Procedures for Settling Civil Disputes	3
7782	Regulation of Competition	3
8600	Securities and Investment Law	3
7522	Selected Issues in Criminal Law and Procedure (LLB)	3
2248	South Australian Parliamentary Internship (Law)	3
9434	Succession	3
3304	Supply of Goods and Services	3
9521	Tax and the Revenue Concept	3

A number of subjects offered in the Law Postgraduate Program will also be made available to LLB students. Details will be published with the timetable.

**3.2.2** A candidate who first enrolled for any subject for the degree of Bachelor of Laws in the Faculty prior to 1987 shall qualify for the degree either by complying with the requirements of 3.2.1 or by passing:

- (a) all of the compulsory subjects referred to in 3.2.1(b)(i) or their equivalent under previous schedules; and
- (b) elective subjects with an aggregate points value of forty-five from those listed in 3.2.1(b)(ii) or those available under previous schedules.

**3.2.3 (a)** A candidate may be awarded the Ordinary degree of Bachelor of Laws with Honours who:

- (i) has completed the subjects required under 3.2.1(b)(i) and (ii) or 3.2.2 above with a final honours average (calculated according to Specific Course Rule 3.3.1(b)) of 71 or more; and
- (ii) has satisfactorily completed, in a subject appropriate to 4th or 5th year required under 3.2.1(b)(i) or (ii) above, a substantial piece of legal writing of at least credit standard approved for the purpose of this clause by the Faculty.

- (b) The Ordinary degree with Honours shall be awarded in the Second Class but the Faculty shall decide whether the degree with Honours is awarded in Division A or Division B.

3.2.4 (a) The Faculty may determine, on such conditions as it considers appropriate, that a pass in a subject offered under previous schedules is to be deemed to be a pass in a subject or subjects referred to in Specific Course Rules 3.2.1 or 3.2.2.

(b) Without limiting the operation of the preceding sub-clause, a candidate who has passed

(i) 6256 Elements of Law (4) and 2944 Constitutional Law I (4), or 1826 Australian Legal System (6), shall be deemed to have passed 6019 Law and Legal Process (6); or

(ii) 8433 Constitutional Law II (6) shall be deemed to have passed 8433 Constitutional Law (6); or

(iii) 7479 Administrative Law I (3) or 6008 Administrative Law II or LL07 Administrative Law shall be deemed to have passed 8326 Administrative Law (6).

(c) A candidate who presents a combination of

(i) 6256 Elements of Law (4) and 1826 Australian Legal System (6) or 6019 Law and Legal Process (6); or

(ii) 2944 Constitutional Law I (4) and 1826 Australian Legal System (6) or 6019 Law and Legal Process (6); or

(iii) 6256 Elements of Law (4), 2944 Constitutional Law I (4) and 8326 Administrative Law (6),

shall be regarded as having completed an unspecified subject with a points value of three for the purposes of Clauses 3.2.1(b)(ii) and 3.2.2(b).

3.2.5 A candidate who first enrolled in the Faculty in any subject for the degree prior to 1982 is not required to pass 3225 Associations provided that the candidate has passed:

(a) (i) LB23 Succession and LB12 Commercial Transactions prior to March 1982; or

(ii) LB23 Succession and LB12 Commercial Transactions and LB13 Consumer Credit after March 1982; and

(b) subjects listed in 3.2.1(b)(ii) with an aggregate value of at least six points more than that specified in 3.2.1(b)(ii) or 3.2.2(b).

3.2.6 A candidate who, prior to March 1980, passed in LL08 Seminar Course A or LL18 Seminar Course B may count either or both of those courses as elective subjects for the purposes of 3.2.1(b)(ii) or 3.2.2(b) with a points value of three and six respectively.

3.2.7 When passed at the times specified, the following subjects shall be regarded as elective subjects for the purposes of 3.2.1(b)(ii) and 3.2.2(b), with the designated points value:

code	subject title	points
9046	Aborigines and the Law, prior to March 1987	4
LB48	Child Welfare, prior to March 1981	3
8406	Child Welfare, after March 1981 and prior to March 1987	2
LL73	Commercial Transactions, prior to March 1981	6
6223	Commercial Transactions, after March 1981 and prior to March 1987	3
LL77	Comparative Law, prior to March 1982	6
2413	Comparative Law, after March 1982 and prior to March 1987	3
3544	Consumer Credit, prior to March 1987	2
LL87	Criminology, prior to March 1980	6
5429	Environmental and Planning Law, prior to March 1990	6
LB17	Family Law, after March 1980 and prior to March 1981	3
LB17	Family Law, after March 1981 and prior to March 1982	4
6729	Insurance, prior to March 1987	2
LL37	International Law, prior to March 1980	6
LB82	International Law I, after March 1980 and prior to March 1981	3
3413	International Law I, after March 1981 and prior to March 1987	4
LB83	International Law II, prior to March 1981	3
8479	Intellectual and Industrial Property, prior to March 1987	3
2681	International Law II, after March 1981 and prior to March 1987	2
LL97	International Trade Law, prior to March 1980	6
5267	International Trade Law, after March 1980 and prior to March 1987	3

- |   |   |     |  |

| 6776 Trade Practices, prior to March 1987                     | 2 | (p) | 5429 Environmental and Planning Law and 9844 Conservation and Heritage Law;  |
- 3.2.8** The Faculty may direct that any elective subject or subjects referred to in 3.2.1(b)(ii) be not offered in a particular year.
- 3.2.9** The points value of each subject shall, except where 3.2.7 applies, be that appearing after the name of the subject in 3.2.1(b).
- 3.2.10** (a) A candidate previously enrolled in the LL.B. who has not completed 6019 Law and Legal Process and 3731 Contract must enrol in these subjects (or either subject if one has been completed) in the year in which they resume their studies. Subject to 3.2.10(b) these subjects must be undertaken before all other subjects referred to in 3.2.1. Their enrolment will be governed by the rules covering new enrolments as to withdrawal from the foundation subjects and leave from candidature.
- (b) A candidate who enrolls in 6019 Law and Legal Process and 3731 Contract may also enrol concurrently in 9365 Torts and 8580 Criminal Law.
- 3.2.11** Unless the Faculty otherwise determines a candidate may not present for the degree any of the following combinations of subjects involving subjects included in Specific Course Rule 3.2.1 and subjects offered under previous schedules:
- |     |  |
|-----|--|
| (a) | 8326 Administrative Law and 6008 Administrative Law II or LL07 Administrative Law;   |
| (b) | 8433 Constitutional Law and 8433 Constitutional Law II or LL32 Constitutional Law II;  |
| (c) | 6019 Law and Legal Process and 1826 Australian Legal System, or 6256 Elements of Law and 2944 Constitutional Law I;                              |
| (d) | 8772 Business Regulation and 6729 Insurance or 6223 Commercial Transactions or 6776 Trade Practices;   |
| (e) | 8406 Child Welfare or 5911 Family Law and LL17 Family Law;   |

- (z) 9521 Tax and the Revenue Concept or 1298 Capital Gains Tax and the Taxation of Entities and 2014 Taxation.

**3.2.12** A candidate for the Honours Degree who has not qualified for that degree may present the subject 9721 Honours Law Dissertation, considered sufficient for the purpose by the Honours Board of Examiners, as an elective subject with a value of nine points for the purposes of 3.2.1(b)(ii) and 3.2.2(b).

**3.2.13** The Faculty may require any candidate to undertake either or both of the subjects 9479 Bridging Law A and 4824 Bridging Law B following admission to candidature. Candidates who are required to undertake a Law Bridging subject must be so advised prior to admission to candidature.

### 3.3 The Honours degree

Introductory note to Specific Course Rule 3.3 (not forming part of the Rule).

A student who wishes to obtain an Honours degree of Bachelor of Laws must complete the subject 9721 Honours Law Dissertation. This subject is normally undertaken in the final year of the LL.B. course. The subject has a points value of 9 and is taken instead of other elective subjects with an equivalent points value.

- 3.3.1** (a) Except with the permission of the Faculty, to be granted only in special circumstances, candidates may not enrol for the Honours dissertation unless they have an honours subject average of at least 70. An honours subject average is the average mark obtained in the best 65% of whatever Law subjects under this Rule a candidate has completed to at least pass level provided that
- (i) a candidate who is seeking to qualify for the Honours degree pursuant to 3.3.4 must (while a candidate for the degree in the non-

Law faculty or otherwise) have completed Law subjects under 3.2.1(b) with an aggregate points value of at least fifty-four; and

- (ii) a candidate who is seeking to qualify for the Honours degree pursuant to 3.3.5 must have completed Law subjects under 3.2.1(b) with an aggregate points value of at least seventy-three.
- (b) In calculating an Honours subject average the following procedure shall be used:
- (i) the aggregate points value of subjects completed to at least pass level is calculated;
  - (ii) subjects are selected for the average in the order of marks gained, highest first, until their combined points value constitutes at least 65% of the aggregate points value of subjects completed;
  - (iii) the last subject selected is given that points value which brings the total points value of subjects selected to exactly 65% of the aggregate points value of subjects completed;
  - (iv) the mark in each subject selected is multiplied by the subject's points value, the marks (so multiplied) are added together, and their sum divided by 65% of the aggregate points value of subjects completed;
  - (v) to the average thus produced the following bonuses are added for distinctions gained by the candidate in subjects completed:
    - for a six-point subject, 0.3
    - for a four-point subject, 0.2
    - for a three-point subject, 0.15
    - for a two-point subject, 0.1
- (c) When the Faculty gives special permission under this clause it shall at the same time settle an honours subject average.
- (d) When a candidate
- (i) is granted status in a subject pursuant to Clause 7 of Statute XXV or General Course Rule 1.4.20; or
  - (ii) is permitted by Faculty to present a subject for the degree pursuant to Specific Course Rule 4,

the Faculty shall determine a mark for the subject which shall be used for the purposes of calculating the candidate's honours subject average.

- 3.3.2** The Department of Law shall determine each year how many candidates otherwise qualified under this schedule its resources allow it to supervise. Candidates shall be accepted for supervision strictly in order of their subject averages. Only candidates accepted for supervision shall be permitted to enrol for the Honours dissertation.
- 3.3.3** In order to be considered for honours supervision in a particular year a candidate who has qualified for the ordinary degree and who, although eligible to do so, did not undertake the subject 9721 Honours Law Dissertation in the year after qualifying for the degree, must notify the Faculty Registrar in writing of the intention to enrol in that subject. The notice must be provided to the Faculty Registrar in December of the year prior to the subject being undertaken.
- 3.3.4** A candidate shall qualify for the Honours degree of Bachelor of Laws if:
- (a) the candidate has
    - (i) qualified for a degree in another Faculty of the University, or
    - (ii) obtained in another university a degree which in the opinion of the Faculty of Law is at least equivalent, for the purpose, to a degree in another Faculty of the University, or
    - (iii) obtained in another tertiary institution a non-Law qualification at an academic level which has been accepted by Council for the purposes of Specific Course Rule 2.3;
  - (b) the candidate has passed (while a candidate for the non-Law degree or qualification referred to in sub-clause (a) or otherwise)
    - (i) the compulsory subjects listed in 3.2.1(b)(i) or their equivalent; and
    - (ii) elective subjects with an aggregate points value of eighteen from those listed in 3.2.1(b)(ii) or those available under previous schedules; and
  - (c) the candidate has satisfactorily completed the subject 9721 Honours Law Dissertation.

**3.3.5** A candidate who first enrolled for any subject or subjects in the Faculty of Law prior to 1987 shall qualify for the Honours degree of Bachelor of Laws either by complying with the requirements of 3.3.4 or by:

- (a) passing all the compulsory subjects listed in 3.2.1(b)(i) or their equivalent and elective subjects with an aggregate points value of thirty-six from those listed in 3.2.1(b)(ii) or those available under previous schedules; and
  - (b) satisfactorily completing the subject 9721 Honours Law Dissertation.
- 3.3.6** Clauses 4, 5, 6, 7, 8, 9, 10 and 11 of Specific Course Rule 3.2 and Specific Course Rule 4 also apply to the Honours degree.

#### 4 Status

In lieu of any of the elective subjects referred to in 3.2.1(b)(ii) a candidate may present a law subject or subjects passed outside the University. Such subjects must be approved and their points value determined by the Faculty in each case.

#### 5 Assessment and examinations

- 5.1** (a) In determining a candidate's final result in a subject, the assessors may take into account the assessments of the candidate's oral, written, practical or examination work in that subject, provided that the candidate has been given notice at the beginning of the subject of the circumstances in which the work may be taken into account and its relative importance in the final result.
- (b) A candidate may be required by the assessors in any subject to do essays or other written work in a satisfactory manner as prerequisite to being assessed in that subject, provided that candidates are given precise information about those requirements at the beginning of the subject.
- 5.2** The Faculty may grant to any student such exemption from Specific Course Rule 5.1, and under such conditions, as it shall decide.
- 5.3** There shall be four classifications of pass in any subject or division of a subject for the Ordinary degree (whether the result be obtained at the first or a subsequent attempt at the assessment tasks required), as follows: Pass with High Distinction, Pass with Distinction, Pass with Credit, Pass.

**6 Qualification requirements**

**6.1** To qualify for the Ordinary degree a candidate shall comply with the relevant provisions of the Specific Course Rules.

**6.2 (a)** To qualify for the Honours degree a candidate shall comply with the relevant provisions of the Specific Course Rules.

**(b)** A candidate who satisfies the requirements of Specific Course Rule 6.2(a) above shall be awarded the Honours degree of Bachelor of Laws, but the Faculty shall decide within which of the following classes and divisions the degree shall be awarded:

- First Class
- Second Class      Division A  
                                 Division B
- Third Class

## Syllabuses

### Introductory notes

note: Syllabuses for subjects for the LL.B. degree, some of which may be offered for non-Law degrees, are given below.

- 1 Each subject for the LL.B. degree has a points value as shown in brackets below. A 3 point subject represents 12.5% of a standard year of full-time study.
- 2 The compulsory subjects \*6019 Law and Legal Process (6) and \*3731 Contract (6) are presented at an academic level appropriate to second year University study. In order to be eligible to enrol in these subjects a student must have satisfactorily completed the equivalent of at least a year of full-time University study. The two subjects must usually be studied concurrently. There is a subject quota for \*6019 Law and Legal Process (6).  
Selection for the quota is based on the overall standard of a student's academic performance at The University of Adelaide or the equivalent. Students selected for the subject quota are automatically permitted to enrol for \*3731 Contract (6). Admission to the subject quota operates effectively as admission to candidature to the LL.B. Places offered in 6019 Law and Legal Process may not be deferred, and students withdrawing from 6019 Law and Legal Process and/or 3731 Contract without special permission of the Faculty must reapply for entry if they wish to resume in a subsequent year.
- 3 The compulsory subjects \*9365 Torts (6), \*8580 Criminal Law (6), \*8821 Property (6) and \*8433 Constitutional Law (6) are presented at an academic level appropriate to third year University study. \*6019 Law and Legal Process (6) and \*3731 Contract (6) are prerequisites for \*8821 Property (6) and \*8433 Constitutional Law (6) and are prerequisites or corequisites for \*9365 Torts (6) and \*8580 Criminal Law (6).
- 4 The compulsory subjects \*6019 Law and Legal Process (6) and \*3731 Contract (6) are prerequisites for all other subjects for the LL.B. degree other than those mentioned above. The other compulsory subjects for the LL.B. degree are:
 

3225 Associations	6
8326 Administrative Law	6
4729 Evidence	6
8480 Trusts	3

In addition to the compulsory subjects, elective subjects with an aggregate points value of 27 must be presented for the degree. The elective subjects are:

*9046 Aboriginal People and the Law	3
2682 Advanced Contract Law	3
8782 Australian Insolvency Law	3
*3446 Australian Law and Society	3
*4398 Australian Legal History	3
1298 Capital Gains Tax and the Taxation of Entities	3
6318 Choice of Law: Theory and Practice	3
7015 Comparative Corporate Law	3
*9844 Conservation and Heritage Law	3
5626 Consumer Protection and Unfair Trading	3
*1901 Criminology	3
*7272 Environmental Planning and Protection Law	3
1087 Family Law I	3
3436 Family Law II	3
9854 Feminist Legal Theory (LLB)	3
5258 Financial Transactions	3
2412 Housing Law	3
4691 Human Rights: International and National Perspectives (LLB)	3
*9622 Income Maintenance	3
5659 Industrial Property	3
1079 Industrial Relations Law	3
9420 Intellectual Property	3
1101 International Law A (LLB)	3
3207 International Law B (LLB)	3
9425 Jessup Moot	3
8967 Jurisdiction of Australian Courts	3
3863 Jurisprudence I	3
8465 Jurisprudence II	3
6416 Labour Law	3
*7730 Land-Use Planning Law	3
*3020 Law and Economics	3
8729 Law of Restitution	3
4809 Law of the Person	3

*4771 Media Law	3
6615 Medical Law and Ethics	3
6400 Minerals and Energy Law	3
3765 Procedures for Settling Civil Disputes	3
7782 Regulation of Competition	3
8600 Securities and Investment Law	3
*7522 Selected Issues in Criminal Law and Procedure (LLB)	3
2248 South Australian Parliamentary Internship (Law)	3
9434 Succession	3
3304 Supply of Goods and Services	3
9521 Tax and the Revenue Concept	3

A number of subjects offered in the Law Postgraduate Program will also be made available to LLB students. Details will be published with the timetable.

- 5 The subjects marked \* in notes 2, 3 and 4 above may be taken by students within non-Law degrees provided they are included in the appropriate Specific Course Rules. The non-Law degrees which allow inclusion of some of these subjects under appropriate conditions are the degrees of B.A., B.Des.St., B.Com., B.Comp.Sc., B.E.(Chem.), B.Ec., B.H.Sc., B.Sc.(Jur.), and B.Sc.(Ma.& Comp.Sc.).
- 6 In any one year the Department of Law offers all compulsory LL.B. subjects and also offers elective subjects with an aggregate points value of at least 54.
- 7 In order to be eligible to obtain the LL.B. degree a candidate must have qualified for a non-Law University degree or equivalent. Candidates who have completed the requirements for a non-Law degree are usually able to complete the LL.B. degree in two further years of study provided that Law subjects with an aggregate points value of at least 24 were presented for the non-Law degree. Graduates who have not previously taken any Law subjects can normally complete the LL.B. degree in three years (with some overload).
- 8 Schemes of study  
The Faculty of Law recommends that candidates for the LL.B. degree take their subjects according to one of the following schemes. (Students undertaking Law studies as part of the B.E. (Chem.) should consult the notes to that degree for the recommended scheme of study.

After completion of the B.E. (Chem.) with Law studies the LL.B. can be completed in 2 further years, following the study pattern for fourth and fifth years in Scheme A below. )

#### **Scheme A**

For students who will commence Law studies after completing the first year of a non-Law degree course other than B.E.(Chem.).

##### *First year*

Appropriate subjects for the first year of the non-Law degree course.

##### *Second year*

6019 Law and Legal Process, 3731 Contract together with sufficient non-Law subjects to make up the second year of the non-Law degree course.

##### *Third year*

8433 Constitutional Law, 9365 Torts and 8821 Property together with sufficient non-Law subjects to make up the third year of the non-Law degree course.

##### *Fourth year*

8480 Trusts, 8580 Criminal Law and either 3225 Associations or 8326 Administrative Law together with elective Law subjects to the value of 12 or 15 points.

##### *Fifth year*

4729 Evidence and either 3225 Associations or 8326 Administrative Law together with elective Law subjects to the value of 12 or 15 points. Candidates for the Honours Degree undertake the Honours Law Dissertation in lieu of elective subjects to the value of 9 points.

#### **Scheme B**

For students who commence Law studies after having qualified for an approved non-Law degree.

##### *First year*

6019 Law and Legal Process, 3731 Contract, 9365 Torts and 8580 Criminal Law.

##### *Second year*

8433 Constitutional Law, 8821 Property and 8326 Administrative Law together with elective subjects to the value of 12 or 15 points.

*Third year*

4729 Evidence, 8480 Trusts and 3225 Associations together with elective subjects to the value of 12 or 15 points. Candidates for the Honours Degree undertake the Honours Law Dissertation in lieu of elective subjects to the value of 9 points.

- 9 Candidates who commence Law studies having completed more than one year of a non-Law degree course and candidates who commenced Law studies prior to 1987 should consult a Law course adviser about an appropriate scheme of study.

**timetable**

Contact hours and teaching methods for each subject are detailed below. During the enrolment period students will be given a Departmental Timetable. This will set out both the period over which each subject is taught and the lecture times. Class lists and information relating to tutorials and small groups for each subject will be posted in the Law School during the enrolment period.

**subjects to be offered in 1996**

Some elective subjects will not be offered, or are unlikely to be offered, in 1996. The exigencies of drawing up a teaching program do not permit a definitive statement of these subjects to be made at the time the University Calendar is printed. For final information on subjects to be offered in 1996, students should consult the Departmental Timetable to be distributed during the Enrolment Period.

**books**

Texts, casebooks, reference books and introductory reading for each compulsory subject are set out below. Students should follow the instructions as to purchase or otherwise. More detailed information as to reading will be provided in Orientation Week lectures, or by means of reading lists as each subject progresses through the academic year.

**assessment procedures**

The Faculty of Law has adopted procedural rules by which all assessment for all LL.B. subjects is determined. A copy of the rules is posted in the Law School. Further copies are available in the Law Library. It is the responsibility of each student to read and understand the Assessment Rules.

**assessment**

At the beginning of each year, a proposed assessment scheme is formulated by the members of staff involved in each subject. The assessment scheme is presented to students for discussion in the Orientation Week lecture for each subject (or an early lecture of the subject). After discussion and, where relevant, amendment, assessment schemes are submitted to Faculty in April/May of each year for approval and authorisation. The authoritative assessment scheme is then adopted by Faculty at its April/May meeting. While proposed assessment schemes will be circulated at the commencement of the academic year, the authoritative statement of assessment schemes will be posted in the Law School in April/May of each year.

It is the responsibility of each student to read and understand the statement of assessment schemes as approved by the Faculty in each of the subjects in which the student is enrolled.

To avoid confusion, in the light of amendments made to proposed assessment schemes, no proposed assessment scheme is included in this Calendar. Students should note, however, that (i) it is usual in each subject to have some form of continuous assessment in addition to an examination at the end of each subject. In each subject it will be indicated whether such assessment is compulsory and whether, and if so how, such assessment may be redeemed; (ii) in most subjects there is a 'primary' examination at the end of the subject. Unless some alternative is provided in the authoritative assessment scheme, the 'primary' examination is compulsory. Further or 'supplementary' assessment after the 'primary' examination period will be granted only on academic, medical or compassionate grounds considered adequate by Faculty.

**bridging subjects**

The subjects 9749 Bridging Law A and 4824 Bridging Law B, each of 6 points, are designed to orientate students admitted to Law who come from other cultures to the legal culture of Anglo-Australian common law. Students who believe they may be eligible for these subjects should contact the Faculty Registrar (Law). The Bridging subjects may only be taken on the direction of the Faculty.

**6019 Law and Legal Process**

*level:* appropriate to 2nd year

*points value:* 6

*duration:* full year

*contact hours:* 2 lectures per week; 1 tutorial per week

*content:* This subject aims to explain the origins and nature of law in society and the institutions through

which it achieves its influence. The emphasis will be upon the role of courts as final arbiters where there are disagreements in society. How do courts resolve these disagreements? By what procedure? In what sense is resolution a matter of applying 'the law'. Case analysis will provide the basis for this explanation.

### 3731 Contract

*level:* appropriate to 2nd year

*points value:* 6

*duration:* full year

*aims:* To acquaint students with the content and application of the common law rules relating to enforceable agreements and to put those rules in their practical and social perspective. Although the subject is not concerned with the various statutory modifications made with respect to different classes of contract (eg employment, land, consumer finance, etc.), which are dealt with in detail in other elective subjects, an understanding of the common law conception of a contract is vital, not just a starting-point, for those statutory models, and also with regard to everyday commercial agreements.

*contact hours:* Intensive teaching in small groups will be used to stimulate more active participation by students and a greater degree of interaction between staff and students. Tuition will be by a combination of lectures and seminars. For seminar purposes the Contract class will be divided into eight groups (subject to enrolments). Instruction in either mode will be for 3 hours per week throughout the academic year.

*content:* The following topics will be covered: Creation and Content of a Contract (formation, privity, agency, terms); Vitiating Factors (uncertainty, informality, misrepresentation, mistake, improper pressure, incapacity); Performance and Discharge of Obligations (performance, breach, frustration, variation and discharge by agreement); Remedies (enforcement, compensation, restitution).

*prescribed texts:* Students should purchase Carter & Harland *Cases and materials on contract law in Australia* 2nd edn (Butterworths, 1993). This is a companion volume to the text cited below. The recommended textbook for the subject is Carter & Harland *Contract law in Australia* 2nd edn (Butterworths, 1991).

### 8433 Constitutional Law

*level:* appropriate to 3rd year

*points value:* 6

*duration:* full year

*prerequisites:* 6019 Law and Legal Process; 3731 Contract

*aims:* To impart an understanding of the chief features of the working of the Commonwealth constitution and to develop acquired skills in working with problems in Australian constitutional law.

*contact hours:* to be advised

Teaching will be a combination of small group teaching, lectures and tutorials.

*content:* The Australian constitutional system. The nature and methods of judicial power in constitutional law. Selected topics, including trade and commerce, corporations, section 92, external affairs. The relationship between the Commonwealth and the States. Human rights.

*prescribed texts:* Students might like to purchase the following texts: Zines *The High Court and the Constitution* 3rd edn (1992); Detmold *The Australian Commonwealth* (1985).

### 8580 Criminal Law

*level:* appropriate to 3rd year

*points value:* 6

*duration:* full year

*prerequisites or corequisites:* 6019 Law and Legal Process; 3731 Contract

*aims:* To provide an account of the elements of the general principles of criminal responsibility and the more serious offences; to promote an understanding of the manner in which case-law is applied and legislation interpreted; to encourage a critical appraisal of the criminal law.

*contact hours:* 2 one hour lectures a week, plus fortnightly one hour tutorials

*content:* The subject will cover the general principles of criminal responsibility; including, but not necessarily confined to, ignorance and mistake of fact, ancillary criminal responsibility, intoxication, insanity and automatism. A detailed examination of some specific offences such as murder, manslaughter, sexual and non-sexual assaults will also be undertaken.

*prescribed texts:* Brett, Waller & Williams *Criminal law text and cases* 7th edn (1993); Brown, Neal, Farrier & Weisbrot *Criminal Laws and Howard's Criminal law* 5th edn (1990), *Criminal Law Consolidation Act (SA)* as amended.

Students should avoid purchasing books until after the Orientation week lecture when latest editions can be advised.

### 8821 Property

*level:* appropriate to 3rd year

*points value:* 6

*duration:* full year

*prerequisites:* 6019 Law and Legal Process; 3731 Contract

*aims:* The principal aim is to acquaint students with the fundamental legal concepts associated with proprietary interests, and to teach students how to apply the relevant laws and concepts to practical situations where such interests are in dispute. The subject

concentrates attention upon the nature of proprietary interests in land and chattels, the means whereby such interests may be acquired, and conflicts between the holders of proprietary interests. The subject aims to present the law of property in both its historical and modern settings. The Torrens System is covered in detail.

*contact hours:* combination of lectures and small groups as appropriate

*content:* The nature of ownership; title to land; title to goods; co-ownership of land and goods; subsidiary interests in land including security, possessory and neighbourhood interests.

*prescribed texts:* Sackville & Neave *Cases and materials on Property Law* 5th edn (Butterworths); Bradbrook, MacCallum & Moore *Australian Real Property Law* (Law Book Co); The & Dwyer *Introduction to Property Law* 2nd edn (Butterworths)

### 9365 Torts

*level:* appropriate to 3rd year

*points value:* 6

*duration:* full year

*prerequisites or corequisites:* 6019 Law and Legal Process; 3731 Contracts

*aims:* To provide a sound working understanding of the law of torts. Torts is a vast subject, and it is quite impossible to cover the whole of it in a one-year university subject. Concentration will be on the most important torts.

*contact hours:* 2 one hour lectures a week, plus fortnightly one hour tutorials

*content:* Scope and purpose of the law of torts. Topics selected from the following: Negligence (duty of care, breach of duty, remoteness of damage, causation, particular duty situations, defences). Assault, battery, false imprisonment. Intentionally causing personal injury. Trespass to land. Nuisance. Trespass to goods. Conversion. Detinue. Vicarious Liability.

*prescribed texts:* Fleming *Law of Torts* 8th edn (Law Book Co, 1992); or Trindade & Cane *Law of Torts in Australia* 2nd edn (OUP 1993) or Baker, *Introduction to Tort*, 2nd edn (Law Book Co, 1996)

*casebooks:* Morison & Sappideen *Cases on Torts* 8th edn (Law Book Co, 1993); or Luntz & Hambly *Torts cases and commentary* 3rd edn (Butterworths, 1992)

Students should avoid purchasing books until after the first lecture in the subject in which further advice will be given.

### 8480 Trusts

*level:* appropriate to 4th year

*points value:* 3

*duration:* one semester

*prerequisites:* 6019 Law and Legal Process; 3731 Contract; 8821 Property

*aims:* To reach an understanding of voluntary dispositions and, within such dispositions, the role of a piece of legal machinery which belongs distinctively to those systems of law derived from English jurisprudence. To appreciate the ways in which the trust is used and for what purposes. To examine the basic rules surrounding its creation and operation. To examine the relationship between the trust and related concepts. To investigate the policies which underline the law and to compare the effect of rules with what appears to be their object. This subject tends to concentrate upon the trust as a concept, rather than becoming involved in a myriad of legal rules.

*contact hours:* 26 lectures and one hour tutorials as arranged

*content:* Historical Introduction. Express Trusts, including validity and constitution of Express Trusts; Formalities; Trusts and Powers. Resulting Trusts. Constructive Trusts.

### 8326 Administrative Law

*level:* appropriate to 4th or 5th year

*points value:* 6

*duration:* full year

*prerequisites:* 6019 Law and Legal Process; 3731 Contract

*aims:* The main aim of the subject is to teach the basic principles governing judicial review of administrative action with special emphasis on the fundamental concepts of jurisdiction, ultra vires, natural justice and abuse of discretionary power. Attention will also be given to the effect upon these principles of recent Federal legislation, in particular the system of review set up by the Administrative Decisions (Judicial Review) Act 1977 (Cth) and the Act creating the Administrative Appeals Tribunal Act (Cth). The subject is of considerable present-day practical importance, its principles carrying over into a number of other specialist legal fields of which Environmental Law, Planning Law and Mining Law are examples.

*contact hours:* 2 one hour lectures a week, plus fortnightly one hour tutorials

*content:* Topics selected from: the historical development and conceptual basis of the subject; the concept and function of judicial review; review distinguished from appeal; void and voidable administrative action; error of law and error of fact; jurisdiction and jurisdictional error of law and fact; natural justice; ultra vires and the abuse of discretionary power including justiciability; judicial control of delegated legislation; administrative law remedies; privative clauses; the special position of the Crown and the question of governmental liability in

contract and tort; extra-judicial review, especially the Administrative Appeals Tribunal and the Ombudsman legislation.

*prescribed texts:* Students should purchase any one of the following: Hotop SD *Principles of Australian Administrative Law* 6th edn; Sykes EJ, Lanham DJ & Tracey RRS *General principles of administrative law* 4th edn; Allars MN *Introduction to administrative law*.

*references:* Aronson M & Franklin N *Review of administrative action*; Hotop SD *Cases and materials on review of administrative action* 2nd edn; Wade HWR *Principles of administrative law* 6th edn; de Smith SA *Judicial review of administrative action* 4th edn; Pearce DC *Commonwealth administrative law* (1986); Craig PP *Administrative law* 2nd edn

Students should avoid purchase until after the first lecture in the subject.

### 3225 Associations

*level:* appropriate to 4th or 5th year

*points value:* 6

*duration:* full year

*prerequisites:* 6019 Law and Legal Process; 3731 Contract

*aims:* To foster a knowledge and understanding of the subject matter, to create an awareness of the practical significance of the different ways in which the law relates to various organisational and legal structures, to encourage the discussion and critical analysis of the approaches of courts and legislatures to the regulation of business and non-profit associations, and to impart a knowledge of the research tools open to a business lawyer and to provide practice in their use.

*contact hours:* 2 one hour lectures a week, plus the equivalent of fortnightly one hour tutorials

*content:* (a) The history and nature of corporate legal personality. (b) Business corporations—types of business corporations; powers of corporations; rights of shareholders; the control and management of corporations; the duties of directors and majority shareholders; the rights of minority shareholders; debt finance; companies in financial crisis. (c) Unincorporated business associations (partnerships)—the nature of partnerships; the relationship of partners inter se; the dissolution of a partnership. (d) Non-profit associations—the relationship of members of unincorporated associations to each other and to third parties; the Associations Incorporation Act.

*prescribed texts:* Students must purchase the following statutes:

*Partnership Act 1891 (SA)* as amended; *Associations Incorporation Act 1956 (SA)* as amended; *Corporations Law* current (Butterworths or CCH edn).

*references:* to be recommended at the Orientation week lecture

### 4729 Evidence

*level:* appropriate to 5th year

*points value:* 6

*duration:* full year

*prerequisites:* 6019 Law and Legal Process; 3731 Contract

*aims:* (a) To explain the theoretical basis of the Law of Evidence; (b) To provide students with the practical skill of applying rules of evidence to various fact situations.

*contact hours:* 1 two hour seminar per week.

*content:* The rules of evidence as applied in South Australian courts and Federal courts sitting in South Australia. Rules of evidence determine the information which will be received by courts in proof of facts, the forms in which such information must be presented, and the use to which such information can be put by the trier of fact.

*prescribed texts:* Students should purchase *Evidence Act (SA)*; *Evidence Act (Cth)*; Ligertwood *Australian Evidence* 2nd edn (Butterworths, 1993); and M<sup>c</sup>Ginley & Waye, *Evidence Handbook* (Law Book Co Ltd 1994).

Seminar guides will be distributed during the year.

### elective subjects

#### (Specific Course Rule 3.2.1 (b)(ii))

Not all elective subjects will be offered in 1996. Students should consult the Departmental notice board. While every effort has been made to offer accurate information on duration and contact hours of subjects staffing considerations may necessitate alterations.

### 9046 Aboriginal People and the Law

*level:* appropriate to 4th or 5th year

*points value:* 3

*duration:* one semester

*prerequisites:* 6019 Law and Legal Process; 3731 Contract

*aims:* to examine the role of law in the context of the historical and contemporary cultural interaction between Aboriginal and non Aboriginal people.

*contact hours:* 2 one hour lectures a week or equivalent

*content:* History of the relationship between Aboriginal and non Aboriginal people including governmental policies towards Aboriginal people: particular issues include Racial Discrimination; Land Rights; Mabo; Native Title Legislation; Aboriginal Customary Law; the Criminal Justice System; Reconciliation; Social Justice.

**2682 Advanced Contract Law**

*level:* appropriate to 4th or 5th year

*points value:* 3

*duration:* one semester

*prerequisites:* 6019 Law and Legal Process; 3731 Contract

*aims:* To build on the knowledge obtained by students in the compulsory Contract subject and to provide those students who have acquired an interest in Contract Law with an opportunity to develop and deepen that interest. The subject also on occasion will provide scope for analysis of the relationship between Contract Law and other areas of law traditionally taught as separate subjects, in particular, Torts and aspects of Restitution.

*contact hours:* 2 seminar hours a week or equivalent, or as advised

*content:* On each occasion offered, the subject will comprise a detailed treatment of two or more topics selected on the basis of importance, complexity, current relevance and staff interest and availability. Topics from which the choice will be made include: (i) function and meaning of unconscionability in contract law; (ii) contract and its relationship to the law of tort; (iii) discharge for breach; (iv) penalties, liquidated damages, planning for non-performance, relief against forfeiture; (v) damages and the relationship between contract and restitution; (vi) frustration and the restitutionary consequences, force majeure clauses; (vii) illegality and public policy; (viii) Government contracts; (ix) construction of contracts, standard form contracts; (x) contract law from a law and economics perspective; (xi) contract law from a feminist perspective; (xii) why and to what extent should the law enforce promises?; (xiii) is there room in contract law for a duty of good faith?; (xiv) specific performance and injunctions; (xv) remedies where a proposed contract fails to materialise; (xvi) the interrelationship of contractual, tortious and statutory remedies for misleading and deceptive conduct. Further topics may be prescribed from time to time.

**8782 Australian Insolvency Law**

*level:* appropriate to 4th or 5th year

*points value:* 3

*duration:* one semester

*prerequisites:* 6019 Law and Legal Process; 3731 Contract

*corequisites:* 3225 Associations

*contact hours:* 2 lectures per week; fortnightly tutorials

*content:* The legal process which accommodate persons or corporations who are insolvent and the consequences for creditors and others who have dealt with or interacted with the insolvent debtor. The content will encompass:

- commencing bankruptcy or winding up proceedings
- consequences of bankruptcy or winding up for the debtor's property, the debtor personally and creditors
- property available for distribution to creditors including property disposed of by the debtor prior to bankruptcy or winding up
- determining the claims of creditors
- director and bankrupt personal liability
- arrangements designed to avoid bankruptcy or winding up.

**3446 Australian Law and Society**

*level:* appropriate to 4th or 5th year

*points value:* 3

*duration:* one semester

*prerequisites:* 6019 Law and Legal Process; 3731 Contract

*assumed knowledge:* first year Law subjects

*contact hours:* 3 per week

*content:* This subject will examine the significance of historical experiences in the evolution and present day working of Australian law. Students will be expected to participate in class discussions. The subject will also emphasis historical research methodology.

Because the subject is a one semester subject, it will focus on topics which provide the best examples of historical development. Such topics could include the following: criminal law and procedure, equity, land law, the status of women including marriage and divorce, the development of corporate and industrial law, the role of justices of the peace and the judiciary in Australian legal system and the development of the legal profession in Australia.

**4398 Australian Legal History**

*level:* appropriate to 4th or 5th year

*points value:* 3

*duration:* one semester

*prerequisites:* 6019 Law and Legal Process; 3731 Contract

*assumed knowledge:* first year Law subjects

*contact hours:* 3 per week

*content:* This subject will examine the historical influences on the evolution of the Australian legal system to federation, with special reference to the continuing effects on the present day ordering of legal activities. Students will be expected to participate in class discussions.

This subject will explore the following topics: The legal and philosophical foundations of the British

empire, the juridical status of Australian settlement, the status of the aboriginal people under European law, the English background to the Australian system, frontier law and other original Australian developments, the move to independent legal institutions and finally the juridical nature of constitution making in Australia. The subject will also introduce students to the sources of legal history generally and Australian legal history in particular, as well as basic historical methodology.

### **1298 Capital Gains Tax and the Taxation of Entities**

*level:* appropriate to 4th or 5th year

*points value:* 3                      *duration:* one semester

*prerequisites:* 9521 Tax and the Revenue Concept

*contact hours:* 2 per week

*content:* This subject will cover the central provision of part III Income Tax Assessment Act 1936, being the Capital Gains Tax provision.

In addition, this subject will deal with tax accounting and income assignments. The subject will also cover the taxation of entities in particular partnerships, companies and trusts. Finally, the subject will deal with tax avoidance.

### **6318 Choice of Law: Theory and Practice**

*level:* appropriate to 4th or 5th year

*points value:* 3                      *duration:* one semester

*prerequisites:* 6019 Law and Legal Process; 3731 Contract

*contact hours:* 2 lectures per week; 1 tutorial per fortnight

*content:* Courts often have to deal with cases which arise wholly or partially from events that occurred outside South Australia or Australia. In such cases a question arises as to whether the case should be decided according to South Australian (or Australian) law. This subject examines the principles (including the constitutional principles) according to which choice of law decisions may be and are made in the context of specific fields of law (eg torts, contracts, personal injury law, property, succession, matrimonial causes and other common problems) involving different States of Australia or other countries.

### **7015 Comparative Corporate Law**

*level:* appropriate to 4th or 5th year

*points value:* 3                      *duration:* one semester

*prerequisites/corequisites:* 3225 Associations or concurrent enrolment in 3225 Associations

*assumed knowledge:* first year Law subjects

*contact hours:* 3 per week

*content:* This subject will examine selected topics in corporate theory and practice from a comparative perspective. The focus will be on Australian corporate law compared to legal systems which have a major impact on international corporate theory and practice, in particular the corporate law of the USA, the UK, Japan and the EC. The topics will be selected from areas of corporate law where interesting comparative work could be pursued. These topics could include the following: Comparative Law Methodology; Corporate Entity Theory; Capital Maintenance and Distributions; Corporate Management; and Corporate Criminal Liability.

### **9844 Conservation and Heritage Law**

*level:* appropriate to 4th or 5th year

*points value:* 3                      *duration:* one semester

*prerequisites:* 7272 Environmental Planning and Protection Law

*aims:* To examine regulatory mechanisms designed to give effect to the goals of identifying and conserving valuable natural resources and items of the built and cultural heritage, both within Australia and internationally; to examine regulation in an interdisciplinary context embracing also political, economic, technical and social considerations; to provide students with an opportunity to undertake a critical appraisal of the adequacy of existing regulatory mechanisms and alternative methods of approach.

*contact hours:* 1 one hour lecture plus 1 two hour seminar per week

*content:* The subject will commence with a brief overview of systems for the allocation of resource tenures, focussing on arid lands, surface and underground waters, and minerals and petroleum. The capacity of these traditional tenurial systems to address conservation objectives will be considered.

There then follows a detailed examination of specific conservation measures, including those relating to national parks; wildlife protection; marine parks; identification and protection of the national estate; world heritage classification and protection; and the protection of biological diversity. In addition, measures to achieve conservation objectives on private lands will be considered, including heritage agreements, vegetation clearance controls, the use of land-use planning controls and the British system of national parks. This section of the subject concludes with an examination of measures designed to identify and protect items of the built and cultural heritage (including Aboriginal culture).

The final section of the subject provides an historical account of the emergence of international environmental organisations and the development of international law and policy concerning conservation and heritage matters particularly through treaties and agreements. Emphasis will be placed upon the protection of biodiversity world heritage, wildlife, wetlands and Antarctica.

### 5626 Consumer Protection and Unfair Trading

*level:* appropriate to 4th or 5th year

*points value:* 3 *duration:* one semester

*prerequisites:* 6019 Law and Legal Process; 3731 Contract

*assumed knowledge:* 3731 Contract

*contact hours:* 2 lectures per week, 1 tutorial fortnightly

*content:* A study of: the regulation of trading practices under national and State laws (particularly advertising); remedies for infringement of the standards for fair trading; small claims procedures; class actions; assistance for consumers; consumer credit.

### 1901 Criminology

*level:* appropriate to 4th or 5th year

*points value:* 3 *duration:* one semester

*prerequisites:* 6019 Law and Legal Process; 3731 Contract

*aims:* The subject provides an introduction to the historical and contemporary perspectives on the causes of crime and criminality. In doing so it particularly focuses on an exploration of the relationship between social, political, and economic institutions and the legal system. The various criminological perspectives are approached in a manner which provides an opportunity for the undertaking of sustained, intensive, intellectual work.

*contact hours:* 2 one hour lectures a week or equivalent, plus fortnightly one hour tutorials

The lectures will not provide a synthesised narrative of the recommended reading material. If lectures are to be of maximum benefit, it is essential that students read the assigned materials beforehand. The tutorial program will endeavour to critically integrate and evaluate areas covered in the suggested readings and the theoretical implications which arise from that material. To this end, the tutorial program will include study tours to prison facilities.

*content:* The subject is interdisciplinary, rather than following a traditional legalistic approach, with

emphasis being placed upon developments in the natural and social sciences which relate to understanding the causes of crime.

The subject concentrates on two main areas of study: (a) the historical development of criminology in the biological, psychological and sociological schools; (b) an examination of the leading contemporary theories of criminogenesis including social interactionism, naturalism, phenomenology, labelling, socialism and the 'new' conflict theorists.

### 7272 Environmental Planning and Protection Law

*level:* appropriate to 4th or 5th year

*points value:* 3 *duration:* one semester

*prerequisites:* 6019 Law and Legal Process and 3731 Contract

*aims:* To introduce students to the regulatory mechanisms designed to give effect to the goals of planning for and protecting environmental quality; to examine environmental regulation in an interdisciplinary context embracing also political, economic, technical and social considerations; to provide students with an opportunity to undertake a critical appraisal of the adequacy of existing regulatory mechanisms and alternative methods of approach.

*contact hours:* one 2 hour lecture a week plus fortnightly seminars

*content:* The subject examines regulatory mechanisms that address environmental problems and focuses particularly upon the regulation of development. An introductory section examines the nature of environmental problems in Australia and the general structure of environmental law. Specific topics addressed subsequently are: constitutional responsibilities and powers with respect to environmental planning and protection; land-use planning systems; environmental impact assessment; and legislation to promote development.

A further section of the subject, which will vary in content from year to year, examines more recent forms of environmental regulation, to be selected from the following topics: pollution controls (air, water, noise); waste disposal (solid and hazardous wastes); regulation of hazardous substances (pesticides, environmental contaminants, radioactive substances, lead, asbestos); regulation of human-ingested products (food additives, therapeutic substances). Finally, a section on environmental litigation will examine tortious actions, criminal and civil enforcement of environmental legislation and statutory appeal procedures. The role of courts and lawyers in the resolution of environmental disputes will also be discussed.

### **1087 Family Law I**

*level:* appropriate to 4th or 5th year

*points value:* 3                      *duration:* one semester

*prerequisites:* 6019 Law and Legal Process; 3731 Contract

*contact hours:* 2 lectures per week; fortnightly tutorials

*content:* Marriage, Divorce, Guardianship and Adoption: Introduction - the historical context of the constitutional context; Marriage in Australia: formation, annulment and dissolution; Guardianship, custody and access; Adoption.

### **3436 Family Law II**

*level:* appropriate to 4th or 5th year

*points value:* 3                      *duration:* one semester

*prerequisites:* 1087 Family Law I

*contact hours:* 2 lectures per week; fortnightly tutorials

*content:* International and Financial Aspects of Family Law: Recognition of Overseas Marriages and Overseas Divorces; Spousal Maintenance and Property Settlements; Financial agreements under the Family Law Act and Injunctions arising out of the marital relationship; Child support; International Child Abduction; International Adoption.

### **9854 Feminist Legal Theory (LLB)**

*level:* appropriate to 4th or 5th year

*points value:* 3                      *duration:* one semester

*prerequisites:* 6019 Law and Legal Process; 3731 Contract

*contact hours:* classes equivalent to 2 one hour lectures, other classes/sessions as resources permit

*aims and content:* The purpose of this subject is to examine the role of the law in constructing and maintaining the inequality of women. It will challenge the claim that the law is impartial, gender-neutral and objective. It will examine various critiques which have been made of the epistemology of law and discuss theoretical perspectives which attempt to uncover the role which the law has played in constructing and maintaining existing gender roles.

### **5258 Financial Transactions**

*level:* appropriate to 4th or 5th year

*points value:* 3                      *duration:* one semester

*prerequisites:* 6019 Law and Legal Process; 3731 Contract

*assumed knowledge:* Completion or concurrent study of 8821 Property and 3225 Associations is advisable,

though not required. Some additional preparation will be necessary for students who have not taken these subjects.

*contact hours:* 2 one hour lectures a week or equivalent plus fortnightly one hour tutorials

*aims:* The basic aim is to provide students with an understanding of major financial transactions, the use of negotiable instruments, the principal ways in which credit is provided, the purposes and forms of security (commercial and consumer), the major rights and obligations under credit/finance contracts, and creditors' remedies (including receivership, company liquidation and bankruptcy).

*content:* Commercial lending and security; finance bills; the content of consumer credit contracts (secured and unsecured); guarantees; lease financing; receivables financing; the principal procedures and rights in bankruptcy/liquidation with particular reference to the position of financiers; letters of credit and performance bonds.

### **2412 Housing Law**

*level:* appropriate to 4th or 5th year

*points value:* 3                      *duration:* one semester

*prerequisites:* 6019 Law and Legal Process; 3731 Contract

*assumed knowledge:* 3731 Contract

*contact hours:* 2 lectures per week; 1 tutorial per fortnight

*content:* A study of: the rights and obligations of parties to a residential tenancy agreement; the rights and obligations of boarders and lodgers and other residential occupants; rights of access to public housing and particular rights and obligations of public housing tenants; rights and obligations of retirement village residents; rights and obligations of residential occupiers of strata title units; access to social security support for housing; housing cooperatives.

### **4691 Human Rights: International and National Perspectives (LLB)**

*level:* appropriate to 4th or 5th year

*points value:* 3                      *duration:* one semester

*prerequisites:* 6019 Law and Legal Process; 3731 Contract

*corequisites:* 9942 International Law; 8433 Constitutional Law

*contact hours:* classes equivalent to 2 one hour lectures; other classes/sessions as resources permit

*aims and content:* The aim of this subject is to have students consider the legal, philosophical and

sociological underpinnings of human rights; students will be encouraged to think critically about the views they hold and the values reflected in the Australian and international legal systems. The subject will focus on the United Nations and its role in formulating, interpreting and monitoring human rights. A further component of the subject will be the protection of human rights in Australia.

### 9622 Income Maintenance

*level:* appropriate to 4th or 5th year

*points value:* 3 *duration:* one semester

*prerequisites:* 6019 Law and Legal Process; 3731 Contract

*aims:* To examine the public and private law provisions for maintaining incomes which have been lost and offering incomes to persons who would otherwise be without them, the circumstances in and extent to which income maintenance is seen as a desirable goal, the relationships between the existing systems, the methods of financing the different forms of provision and the impact of taxation upon them, and proposals for reform of the existing provisions.

*contact hours:* 2 one hour lectures a week or equivalent, plus fortnightly tutorials

*content:* The subject will offer a theoretical framework for analysing the relationship between public, private, industrial and family-based welfare and individual income maintenance schemes from each sector. The class will choose a field for the application of these frameworks from the fields of provision for age, disability and incapacity or provision for children.

*introductory reading:* Titmuss 'The social provision of welfare' in Titmuss *Essays in the Welfare State*; Rein 'Private provision of welfare' in Henderson (ed) *The welfare stakes*

Other reading will be advised during the subject.

### 5659 Industrial Property

*level:* appropriate to 4th or 5th year

*points value:* 3 *duration:* one semester

*prerequisites:* 6019 Law and Legal Process; 3731 Contract

*contact hours:* 2 one hour lectures a week; tutorials if resources permit

*aims:* In conjunction with the subject Intellectual Property, this subject aims, through a treatment of Patent and Trade Mark law, to examine the protection provided by the law in regard to ideas, inventions, information and other forms of protean subject-matter arising from creative effort, whether artistic or otherwise. The subject also aims, in terms of general legal education of students, to explore how the law

deals with a particular problem, and how in solving that problem the law must balance interests and protect investment, while taking into account the public welfare. The subject aims to explore the interrelationship of common law and statute, and how the two systems supplement each other, in regard to the development of legal protection. Students completing this subject should have a basic grounding in the law of the area, its limitations, its policies, and its objectives, including the basic features of the statutory systems of protection and their overlap.

*content:* Consideration of the legal protection afforded to (i) Inventions (ii) Business Reputation. The statutory systems (a) Patent (b) Trade Marks.

### 1079 Industrial Relations Law

*level:* appropriate to 4th or 5th year

*points value:* 3 *duration:* one semester

*prerequisites:* 6019 Law and Legal Process; 3731 Contract

*assumed knowledge:* 8433 Constitutional Law

*contact hours:* to be advised

*content:* This subject will examine the law as it relates to collective work relationships in Australia. The unique development of Australian industrial law provides an opportunity to examine the impact of 'public' interests on the regulation of Australian industry. The system of conciliation and arbitration at both federal and state levels will be examined, including the jurisdictional basis for the exercise of the powers of the Industrial Relations Commission; the processes of conciliation and arbitration and the nature of the powers of the Industrial Relations Commissions; the expanding functions of the Industrial Relations Commissions in the light of Australia's international obligations; the making and enforcement of awards; the system of regulation of enterprise agreements. The subject will also examine the interrelationship of state and federal industrial relations systems, including the resolution of inconsistencies between federal awards and state laws.

### 9420 Intellectual Property

*level:* appropriate to 4th or 5th year

*points value:* 3 *duration:* one semester

*prerequisites:* 6019 Law and Legal Process; 3731 Contract

*aims:* In conjunction with the subject Industrial Property, this subject aims, through a treatment of confidential Information, Copyright and Design law to examine the protection provided by the law in regard to ideas, inventions, information and other forms of protean subject-matter arising from creative effort, whether artistic or otherwise. The subject also aims, in

terms of general legal education of students, to explore how the law deals with a particular problem, and how in solving that problem the law must balance interests and protect investment, while taking into account the public welfare. The subject aims to explore the interrelationship of common law and statute, in regard to the development of legal protection. Students completing this subject should have a basic grounding in the law of the area, its limitations, its policies, and its objectives, including the basic features of the statutory systems of protection and their overlap.

*contact hours:* 2 one hour lectures a week; seminars or tutorials as resources permit

*content:* Consideration of the legal protection afforded to (i) Confidential Information (Family, Government and Trade Secrets) (ii) Literary and Artistic Effort (iii) Industrial Designs (iv) Moral Rights of Authors. The Statutory Systems (a) Copyright (b) Designs.

### **1101 International Law A (LLB)**

*level:* appropriate to 4th or 5th year

*points value:* 3 *duration:* one semester

*prerequisites:* 6019 Law and Legal Process; 3731 Contract

*contact hours:* 2 one hour lectures a week; fortnightly tutorials as required

*content:* The basic subject in public international law should include: nature; history; philosophical underpinnings of international law; sources of international law; law of treaties; the relationship with municipal law; recognition and subjects of international law; acquisition of territory; jurisdiction. Operating concurrently with the lectures a series of tutorials/seminars focussing on a contemporary issue of international law.

### **3207 International Law B (LLB)**

*level:* appropriate to 4th or 5th year

*points value:* 3 *duration:* one semester

*prerequisites:* 6019 Law and Legal Process; 3731 Contract

*contact hours:* 26 hours

*content:* The examination of current international legal issues at an advanced level. Topics covered will be drawn from: Use of Force; Armed Conflict and Humanitarian Law; Law of the Sea; Theories of International Law; International Institutions; International Dispute Resolution; Self Determination and Statehood.

### **9425 Jessup Moot**

*level:* appropriate to 4th or 5th year

*points value:* 3 *duration:* one semester

*quota:* enrolment limited to five students selected to represent the Law School in the Jessup Moot Competition. Team members will be chosen on the basis of competitive try-outs during which they will be required to present a short oral argument which will be judged by two members of the department.

*prerequisites:* 6019 Law and Legal Process; 3731 Contract

*contact hours:* equivalent of 3 hours weekly over the semester

*content:* Students will be required to participate in the preparation of briefs, memorials or other written materials, engage in practice oral arguments and participate as necessary in regional, national and international rounds of the International Law Moot Competition.

### **8967 Jurisdiction of Australian Courts**

*level:* appropriate to 4th or 5th year

*points value:* 3 *duration:* one semester

*prerequisites:* 6019 Law and Legal Process; 3731 Contract

*contact hours:* 2 lectures per week; 1 tutorial per fortnight

*content:* The subject deals with the jurisdiction of Australian Courts over the parties who may appear before them in cases with an interstate or international element. It examines aspects of the constitutional and other bases of Federal, State and cross-vested jurisdiction and service of process, the principle of forum non conveniens, the recognition and enforcement of judgments, the full faith and credit provision of the Constitution.

### **3863 Jurisprudence I**

*level:* appropriate to 4th or 5th year

*points value:* 3 *duration:* one semester

*prerequisites:* 6019 Law and Legal Process; 3731 Contract

*assumed knowledge:* the basic principles of Law

*contact hours:* 2.5 hours per week

*content:* The aim of the subject is to examine the nature of law and legal thought; its practice; its place in the structure of human lives, and in the structure of communities; its relation to other types of thought (to morality, to the physical sciences, to history); its value and its connection to freedom. The subject is

undertaken in seminar classes by Socratic discussions, the point of which is for each participant by reflection on what they already know of law and legal thought to come to a deeper understanding of it. There are no set texts; though the work of most of the major thinkers about law from Plato to Foucault is encountered.

### 8465 Jurisprudence II

*level:* appropriate to 4th or 5th year

*points value:* 3                      *duration:* one semester

*prerequisites:* 3863 Jurisprudence I

*assumed knowledge:* the basic principles of Law

*contact hours:* 2.5 hours per week

*content:* The aim of the subject is as for Jurisprudence I. It is pursued at a more advanced level than in Jurisprudence I.

### 6416 Labour Law

*level:* appropriate to 4th or 5th year

*points value:* 3                      *duration:* one semester

*prerequisites:* 6019 Law and Legal Process; 3731 Contract

*contact hours:* to be advised

*content:* This subject examines individual work relations and the law which governs them in the context of the rapidly changing structures of the modern industrial environment. The subject will focus on the conceptual foundations for the legal regulation of work relationships through an examination of the common law, statute law and international conventions. It will examine the regulation of the formation of work relationships; the rights and duties of the parties in work relationships; and the law governing the breakdown of the work relationship.

### 7730 Land Use Planning Law

*level:* appropriate to 4th or 5th year

*points value:* 3                      *duration:* one semester

*prerequisites:* 6019 Law and Legal Process; 3731 Contract

*aims:* To examine regulatory mechanisms designed to give effect to the goals of planning and controlling the use and development of land, with particular reference to South Australia; to provide an understanding of the role and limits of regulation and the balance between public and private decision-making in relation to land-use.

*contact hours:* 1 one hour lecture plus 1 two hour seminar per week

*content:* The focus of this subject is upon the control of land development under the South Australian planning

system. The subject commences with an examination of the historical evolution of the planning system, and then considers the nature of the planning procedures under the Development Act 1993 and of controls imposed thereunder. It examines the powers and procedures of planning authorities, and, through the seminar program, it considers the methods of dealing with selected planning issues, including shopping, housing segregation and aesthetics. The subject also considers the role of appeal tribunals and public participation procedures; alternative modes of planning; control of government development, particularly transport; and responsibility for housing. The subject concentrates upon legal analysis of planning problems.

### 3020 Law and Economics

*level:* appropriate to 4th or 5th year

*points value:* 3                      *duration:* one semester

*prerequisites:* 6019 Law and Legal Process; 3731 Contract

*assumed knowledge:* 3731 Contract

*contact hours:* 2 lectures per week; 1 tutorial per fortnight

*content:* A study of: the interaction between law and economics with particular attention to the economic theory of law or the influence of the 'Chicago School'; the concept of efficiency and the way in which resolution of disputes can promote efficiency; the role of the market and freedom of contract and interference with the market to promote competition or consumer protection; the limits of commercialisation of human activity.

### 8729 Law of Restitution

*level:* appropriate to 4th or 5th year

*points value:* 3                      *duration:* one semester

*prerequisites:* 6019 Law and Legal Process; 3731 Contract; 9365 Torts

*assumed knowledge:* 3731 Contract; 9365 Torts

*contact hours:* dependent on enrolments

*content:* Concept of restitution; unjust enrichment; unconscionability. Distinction between personal and proprietary claims and classification of restitutionary claim.

Restitutionary claim where plaintiff has conferred benefit in the form of money, property or services on the defendant under mistake, compulsion, necessity or under an ineffective transaction (for example, a contract void for mistake, illegality or incapacity or one which is discharged through frustration or breach).

Restitutionary claim where defendant has acquired from a third party a benefit for which he must account to the plaintiff, for example, subrogation; fraudulent and voidable dispositions of property, voidable preferences and transactions at an under value.

Restitutionary claim where defendant has acquired a benefit through the defendant's wrongful act; for example and especially tort, including waiver of tort; breach of contract.

Defences, especially change of position and estoppel. Bona fide purchase.

#### **4809 Law of the Person**

*level:* appropriate to 4th or 5th year

*points value:* 3                      *duration:* one semester

*prerequisites:* 6019 Law and Legal Process; 3731 Contract

*contact hours:* 2 hours per week

*content:* Law constructs our social, political and physical beings in ways which determine our most basic rights and obligations as legal subjects. This subject aims to develop in students an informed, coherent and critical understanding of the legal construct or fiction of the person and the role of that construct in Western law. It will trace the theme of the legal construction of the person through a number of core and elective subjects of the curriculum in order to show a) how law variously attributes characteristics to its subject and b) how those attributed qualities of the person serve to justify and rationalise the very priorities and forms of law. The subject will also have strong comparative and historical dimensions: it will foster an appreciation of changes in the idea of the legal person across States and cultures, and through time.

#### **4771 Media Law**

*level:* appropriate to 4th or 5th year

*points value:* 3                      *duration:* one semester

*prerequisites:* 6019 Law and Legal Process; 3731 Contract

*contact hours:* lectures and small groups as appropriate

*content:* The legal regulation of the media in Australia, defamation (including criminal defamation), pornography, obscenity, blasphemy, sedition, contempt of Parliaments and the courts, breach of confidence, privacy, copyright, advertising, administrative regulation and broadcasting and television. Freedom of expression and media regulation, national security, freedom of information, monopolisation and trade practices laws.

#### **6615 Medical Law and Ethics**

*level:* appropriate to 4th or 5th year

*points value:* 3                      *duration:* one semester

*prerequisites:* 8821 Property

*assumed knowledge:* 9365 Torts

*contact hours:* 2 hour seminar per week

*content:* The subject considers the principles of law and ethics which apply to such matters as abortion, euthanasia, sterilisation, sexual re-assignment, surrogacy, reproductive technology, medical negligence and medical confidentiality.

#### **6400 Minerals and Energy Law**

*level:* appropriate to 4th or 5th year

*points value:* 3                      *duration:* one semester

*prerequisites:* 8821 Property

*aims:* To examine the law and practice relating to the extraction of minerals and the development and exploitation of energy resources.

*contact hours:* 1 two hour seminar and 1 one hour seminar a week or equivalent, or as advised

*content:* The subject will cover the development of mining legislation in Australia with reference to exploration, extraction, and to the enforcement of mining interests. The law relating to the exploitation of oil and gas resources will be covered with reference to, inter alia, off-shore and on-shore exploration and production, taxation issues, royalties, project financing, joint ventures, Aboriginal land rights and environmental controls. The subject will also deal with the regulation of the electricity industry and alternative energy resources: solar energy, wind energy and geothermal energy. The examination of law and practice relating to these forms of energy will cover existing and proposed technologies, environmental constraints, legal barriers to development, the rights and potential liabilities of consumers and producers and proposals for legislative change.

#### **3765 Procedures for Settling Civil Disputes**

*level:* appropriate to 4th or 5th year

*points value:* 3                      *duration:* one semester

*prerequisites:* 6019 Law and Legal Process; 3731 Contract

*contact hours:* either 2 lectures per week and weekly tutorials; or weekly 2 hour seminars; or a mixture

*content:* A study of: the nature and extent of civil disputes and the needs which exist for their settlement;

the various techniques for settling civil disputes: conciliation; mediation; arbitration; judgment; the settlement of civil disputes at common law, the Forms of Action, the effect of the Judicature Acts and the current system of pleading;

the nature of the present procedure in South Australia for settling civil disputes; its conceptual underpinnings: The object of the process: encouraging settlement or discovering facts? The respective roles of parties (and their legal representatives) and courts: how private are civil disputes? The responsibility for commencing, continuing and conducting proceedings. The role of mediation;

the interlocutory manoeuvres of a civil dispute in South Australia from commencement of proceedings to trial; their effectiveness in encouraging settlements and ensuring efficient determination at trial; the extent to which procedures can be manipulated by parties to obtain their own ends. This section would introduce students to interlocutory injunctions, discovery, inspection, interrogation, admissions, pre-trial conferences, mediation conferences, judgement without trial; a critique of the current system; its relationship to the more informal mediational approach; an introduction to some of the practical techniques of mediation.

### 7782 Regulation of Competition

*level:* appropriate to 4th or 5th year

*points value:* 3 *duration:* one semester

*prerequisites:* 6019 Law and Legal Process; 3731 Contract

*assumed knowledge:* 3731 Contract

*contact hours:* 2 lectures per week; 1 fortnightly tutorial

*content:* A study of: the restrictive trading practices regulated by Part IV of the Trade Practices Act 1974; the regulation of essential services by utilities including communications, telephone, water, gas and electricity; regulation of occupations; mutual recognition of standards for the supply of goods and services.

### 8600 Securities and Investment Law

*level:* appropriate to 4th or 5th year

*points value:* 3 *duration:* one semester

*prerequisites:* 6019 Law and Legal Process; 3731 Contract

*aim:* The aim of the subject is to provide students with an understanding of the operation of the Australian capital markets and investor protection measures in the context of dealings in securities issued by business corporations.

*contact hours:* 2 one hour lectures a week or equivalent

*content:* The topics dealt with will be drawn from the following: (a) types and functions of 'securities'; (b) the structure, role and functions of the Australian Stock Exchange; (c) the duties and functions of securities dealers and investment advisers; (d) the regulation of financial journalists; (e) the regulation of securities transactions including market manipulation and insider trading; (f) the regulation of corporate takeovers.

### 7522 Selected Issues in Criminal Law and Procedure (LLB)

*level:* appropriate to 4th or 5th year

*points value:* 3 *duration:* one semester

*prerequisites:* 6019 Law and Legal Process; 3731 Contract

*contact hours:* 2 one hour lectures a week or equivalent; fortnightly tutorial or equivalent

*content:* The subject will deal with specific issues in criminal law and procedure which will differ from year to year and will be considered in the light of developments in Commonwealth criminal law and of other Australian and overseas jurisdictions.

### 2248 South Australian Parliamentary Internship (Law)

*level:* appropriate to 4th or 5th year

*points value:* 3 *duration:* one semester

*quota:* 10 (including 4009 South Australian Parliamentary Internship)

*prerequisites:* 6019 Law and Legal Process; 3731 Contract

*contact hours:* 3 hours per week

*content:* The South Australian Parliamentary Internship Scheme is designed to complement existing schemes elsewhere in Australia (currently these are operating within the Federal Parliament and all state Parliaments except South Australia and Queensland) and in a number of overseas universities and legislatures. The South Australian Scheme is similar in nature to a program run by the Law School at the ANU. Both these schemes are supported by Quality Audit Funds. Our program brings together the three South Australian Universities as a Consortium to jointly administer the Scheme. At Adelaide, the subject is convened within the Politics Department by Dr Clement Macintyre.

The subject locates students in short term 'Internships' within the Parliament of South Australia. The Internships will enable a small number of undergraduate students to gain a detailed academic introduction to the institution of Parliament and gain some appreciation of its working. It is expected that students will undertake a brief, intensive academic program and then spend some 8 weeks associated with

an MP while they work on a specific research project negotiated by the student and the Member of Parliament.

The place of instruction will be within the Parliament itself, thus enabling students to acquire a feeling for the institution, as well as participate in the daily routine of research and related activities. The academic semester will be divided into two sections. The first of these will be used to orientate the students to the goals of the Internship scheme and provide initial academic study of the Parliament and related public institutions. The second section of the semester will be used for the placements. This period will last for about 8 weeks. In the final week of semester, the group will reconvene to review the project, to report on the papers and to provide some evaluation of the scheme.

Assessment will be based on a short essay, based on the seminars and workshops, and on a final research report. The research report will be due at the end of the program and a copy will go to the academic coordinator who will act as Academic Supervisor, and to the Parliamentary Supervisor (the MP sponsoring the placement).

#### **9434 Succession**

*level:* appropriate to 4th or 5th year

*points value:* 3

*duration:* one semester

*prerequisites:* 6019 Law and Legal Process; 3731 Contract

*aims:* To acquaint students with the basic principles of the devolution and distribution of property upon death of the owner. Death is a major occasion for the transfer of property, and the principles relating to it form an important part of any legal practice. While the subject concentrates upon the rules and practice relating to devolution of property upon death, various aspects of social policy (family maintenance) and cooperative law are considered.

*contact hours:* 2 one hour lectures a week or equivalent plus fortnightly tutorials

*content:* The subject considers the law relating to the following matters (i) will-making (ii) distribution upon intestacy (iii) family provision (iv) the rule against delegation of testamentary power (v) probate and administration (vi) construction of wills.

#### **3304 Supply of Goods and Services**

*level:* appropriate to 4th or 5th year

*points value:* 3

*duration:* one semester

*prerequisites:* 6019 Law and Legal Process; 3731 Contract

*assumed knowledge:* 3731 Contract

*contact hours:* 2 lectures per week; 1 tutorial per fortnight

*content:* A study of: the obligations of suppliers of goods and services; manufacturers' obligations with respect to the supply of goods; remedies of those supplied with defective goods or services; product safety standards; food and health regulation relating to the supply of goods and services.

#### **9521 Tax and the Revenue Concept**

*level:* appropriate to 4th or 5th year

*points value:* 3

*duration:* one semester

*prerequisites:* 6019 Law and Legal Process; 3731 Contract

*contact hours:* 2 hours per week

*content:* This subject will cover the constitutional aspects of taxation and the distinction between capital and income deductions. In addition students will be introduced to Capitals Gains Tax.

#### **9721 Honours Law Dissertation**

*level:* 5th year Honours

*points value:* 9

*duration:* full year

*prerequisites:* see Specific Course Rule III

*requirements:* Candidates for the Honours degree of Bachelor of Laws are required to complete satisfactorily an honours dissertation. The topic of the dissertation must be approved by the Department of Law. The format and presentation of the dissertation must comply with the Honours Guidelines issued by the Department of Law. The dissertation will be assessed in accordance with the procedures set out in the Honours Guidelines.

# Graduate Certificate in Mediation

note: Postgraduate tuition fees may apply to this course.

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar.

As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

## Specific Course Rules

### 1 General

There shall be the following Graduate Certificate in Mediation:

Graduate Certificate in Mediation (Family)

### 2 Admission requirements

2.1 An applicant for admission to the course of study for the Graduate Certificate shall have qualified for a degree of the University or for a qualification from another institution accepted for the purpose by the Faculty of Law.

2.2 Subject to approval by the Council the Faculty may in appropriate cases accept a candidate for a Graduate Certificate in Mediation who does not qualify under 2.1 above but who has given evidence satisfactory to the Faculty of fitness to undertake work for the certificate.

### 3 Course of study

3.1 To complete a course of study, a candidate, unless exempted by the Faculty, shall:

- (a) regularly attend the prescribed lectures, tutorials, workshops and seminars; and
- (b) undertake such computing work, practical work, field work and case studies, do such reading, written and oral work and pass such examinations, as the Faculty may prescribe.

3.2 Each year the Faculty shall determine in which semester/s the subjects for the Graduate Certificate in Mediation shall be offered.

3.3 Notwithstanding the above, the availability of all subjects will be conditional on the availability of staff and facilities.

### 4 Status

A candidate for the Graduate Certificate in Mediation may apply at any time to the Faculty for status and the Faculty may grant such status as it determines on account of work previously undertaken by the candidate.

### 5 Assessment and examinations

There shall be four classifications of pass in any subject of the Certificate as follows: Pass with High Distinction, Pass with Distinction, Pass with Credit, and Pass.

### 6 Duration of Course

Unless the Faculty in any particular case approves an extension of time a candidate for a Certificate shall complete its requirements in not less than six months and not more than eighteen months from the commencement of candidature.

### 7 Qualification requirements

To qualify for the Graduate Certificate in Mediation (Family) the candidate shall complete satisfactorily the following three subjects:

8553 The Mediation Process: Concepts, Strategies and Skills	4
4147 Family Law for Mediators	4
9719 Advanced Family Mediation Theory and Practice	4

note (not forming part of the Specific Course Rules)

The Graduate Certificate in Mediation (Family) is offered cooperatively with the School of Social Work and Social Policy of The University of South Australia. Enrolment in the Certificate is available at either University. Subjects offered to students enrolled at each University will be offered cross-institutionally to students enrolled at the other.

## Syllabuses

### 9719 Advanced Family Mediation Theory and Practice

level: postgraduate

points value: 4 duration: one semester

prerequisites: 4147 Family Law for Mediators and 8553 The Mediation Process: Concepts, Strategies and Skills

contact hours: 40 hours over 5 days

*content:* This subject builds on the introductory subjects and explores the management and resolution of family conflict in different contexts. Special issues including ethical standards and dilemmas; selective screening and preparation for mediation; the relationship between mediation, therapy and advocacy; mediation and abuses of power; social justice and mediation; cross-cultural factors—age, ethnicity, gender, class, disability; balancing power in mediation; mandatory mediation; interdisciplinary practice; language and mediation; the ‘best interests of the child’ in mediation; the involvement of children and adolescents in mediation; the involvement of other professionals or significant others in mediation, dealing with strong emotions; writing agreements; mediation between families and other organisations; and multi-party mediation may be explored.

Use of theoretical input, small group discussion, supervised role plays, video feedback and critique, and critical analysis of case material are a major component of this subject. Specialisation will be possible in choice of reading and written assignment.

### 4147 Family Law for Mediators

level: postgraduate

points value: 4 duration: one semester

*aim:* To familiarise students with the broad principles of family law as they relate to mediation.

*contact hours:* 2 per week for 12 weeks or equivalent

*content:* An overview of legal principles that impinge on family disputes and dispute resolution, including the following: The Family Court and its operation; The Family Law Act and general principles governing the following: (a) Property Settlement; (b) Children’s issues; (c) Injunctive relief; (d) Spousal and child maintenance (including a discussion of the Child Support Assessment Act); (e) Enforcement and contempt provisions; De facto relationships; the Family Relationships Act; the legal and equitable principles governing property settlement;

Associated legal issues including succession, adult guardianship and testamentary issues; Privilege; Ethical issues; Professional negligence; Indemnity and indemnity insurance; Sources of legal information.

### 8553 The Mediation Process: Concepts, Strategies and Skills

level: postgraduate

points value: 4 duration: one semester

contact hours: 40 hours of 5 days

*content:* This subject focuses on conflict theory, principled and positional negotiation, mediation theory and process, and on building participants’ skills as negotiators and mediators. Important concepts and techniques useful for analysing conflict, designing intervention strategies, and moving towards settlement are presented. Participants will identify their own personal responses to conflict; learn alternative strategies available to negotiators and how to choose among those alternatives to achieve a desirable settlement; strategies for gaining trust as a third party neutral; strategies for helping disputing parties to discover areas of mutual interest and possible agreement; strategies for writing agreements; and how to identify and respond to ethical dilemmas. A variety of approaches to mediation will be explored.

A combination of theoretical input, discussion, supervised role plays, analysis of videoed case material, reading and written assignments will be used.

# Graduate Diploma in Corporate and Commercial Law

## Graduate Diploma in Environmental Law

## Graduate Diploma in Taxation Law

note: Postgraduate tuition fees may apply.

The above awards have been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar.

As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

### Specific Course Rules

#### 1 General

There shall be the following Graduate Diplomas:

Graduate Diploma in Corporate and Commercial Law

Graduate Diploma in Environmental Law

Graduate Diploma in Taxation Law

#### 2 Admission requirements

2.1 The Faculty of Law may accept as a candidate for the Graduate Diploma any person who holds or has become entitled to receive:

- (a) an Honours degree of Bachelor of Laws or an Ordinary degree of Bachelor of Laws with Honours of The University of Adelaide;
- (b) an Ordinary degree of Bachelor of Laws of The University of Adelaide which the Faculty judges to have been attained at above-average standard;
- (c) an Ordinary degree of Bachelor of Laws of The University of Adelaide and who has substantial professional experience or other relevant qualifications; or
- (d) a degree in law of another University or tertiary institution which, in the opinion of the Faculty is equivalent to any of the degrees contained in 2.1(a) or (b) above or which, together with any professional or other relevant experience or qualification the person may have, is sufficient to satisfy the Faculty that the person is likely to be able satisfactorily to undertake work for the Graduate Diploma; or

(e) for the Graduate Diploma in Environmental Law, a degree in another discipline from a University or tertiary institution together with substantial relevant experience.

2.2 The Faculty may in appropriate cases accept, subject to the approval of the Board of Graduate Studies acting with authority wittingly devolved to it by Council, a candidate for a Graduate Diploma who does not otherwise qualify under this Rule but has given evidence satisfactory to the Faculty of fitness to undertake work for the Graduate Diploma.

#### 3 Courses of study

3.1 Courses of study must be approved by the Dean of the Faculty or a nominee at enrolment each year.

3.2.1 The subjects for the Graduate Diploma shall be:

- 3604 Capital Gains Tax
- 3639 Choice of Law Theory
- 6085 Company Liquidations (MGD)
- 7498 Company Receiverships
- 6956 Company Takeovers
- 4890 Comparative Company Law
- 8164 Comparative Environmental Law
- 3209 Corporate Finance (MGD)
- 6639 Corporate Management
- 4043 Corporate Taxation
- 3415 Dispute Resolution: Theory and Practice
- 7239 Energy Law

- 9585 Environmental Dispute Resolution (MGD)
- 4396 Environmental Impact Assessment Law
- 9135 Equitable Remedies
- 4663 Income Taxation
- 3419 Insurance Law: General Principles
- 2073 Intellectual Property: General Principles
- 4431 Intellectual Property: Selected Issues
- 3506 International and Transnational Investment (MGD)
- 4469 International Environmental Law
- 7993 International Regulation of Trade
- 4577 International Taxation
- 2464 Judicial Review
- 4558 Land Management Law
- 8423 Land Transactions
- 6368 Landlord and Tenant
- 7426 Legal Aspects of Doing Business Abroad
- 6438 Litigation—Selected Issues
- 2435 Mining Law
- 6723 Planning Law
- 8314 Protection of the Antarctic Environment (MGD)
- 3367 Securities Regulation
- 8021 Statutory Review of Administrative Action (MGD)
- 5968 Taxation Administration
- 6737 Theories of Constitutional Law
- 4498 Water Resources Law (MGD)

A number of subjects offered in the LLB will also be made available to Diploma students. Details will be published with the timetable.

**3.2.2** The subjects for the Graduate Diploma in Environmental Law also shall be:

- 1359 Environmental Law (Research Paper)
- 5624 Law and Aboriginal People
- 8598 Law of Conservation and Heritage
- 7067 Law of Environmental Planning and Protection
- 6942 Law of Land Use Planning
- 4108 Law of Minerals and Energy

**3.3** A candidate proceeding to the award of a Graduate Diploma must, as part of the requirements of 7.1 complete six subjects including for the:

**Graduate Diploma in Corporate and Commercial Law**

At least four subjects from

- 6085 Company Liquidations (MGD)
- 7498 Company Receivership
- 6956 Company Takeovers
- 4890 Comparative Company Law
- 3209 Corporate Finance (MGD)
- 6639 Corporate Management
- 4043 Corporate Taxation
- 7239 Energy Law
- 4663 Income Taxation
- 3419 Insurance Law: General Principles
- 2073 Intellectual Property: General Principles
- 4431 Intellectual Property: Selected Issues
- 3506 International and Transnational Investment (MGD)
- 7993 International Regulation of Trade
- 8423 Land Transactions
- 6368 Landlord and Tenant
- 7426 Legal Aspects of Doing Business Abroad
- 2435 Mining Law
- 3367 Securities Regulation

**Graduate Diploma in Environmental Law**

- (i) 7067 Law of Environmental Planning and Protection, or a subject judged by the Faculty to be substantially similar (unless previously completed, in which case the subject may not be counted for the Graduate Diploma and the candidate must complete 1359 Environmental Law (Research Paper).
- (ii) one semester length or equivalent subject chosen from the lists under Clause 6.2 or 6.3 of the Specific Course Rules for the Graduate Diploma in Environmental Studies or Clause 6.1.2 or 6.1.3 of the Master of Environmental Studies.
- (iii) at least three subjects from those contained in (1) below, and not more than one subject from those referred to in (2) below. \*

- (1) 8164 Comparative Environmental Law
- 7239 Energy Law
- 9585 Environmental Dispute Resolution (MGD)
- 4396 Environmental Impact Assessment Law
- 4469 International Environmental Law
- 4558 Land Management Law
- 2435 Mining Law
- 6723 Planning Law

8314 Protection of the Antarctic Environment (MGD)

4498 Water Resources Law (MGD)

- (2) (a) Any subject listed in 3.2.1 which, in the opinion of the Faculty, is relevant to the candidate's research interests concerning Environmental Law;

- (b) any subject listed in 3.2.2, unless a subject judged by the Faculty to be substantially similar has been previously completed in which case such subject may not be counted for the Graduate Diploma.

\*note: A candidate may not enrol in any of the above subjects unless the candidate is currently enrolled in or has completed 7067 Law of Environmental Planning and Protection or a subject judged by the Faculty to be substantially similar.

### Graduate Diploma in Taxation Law

At least four subjects from those contained in (i) below or not less than three subjects from those contained in (i) below and one subject from those contained in (ii) below:

- (i) 3604 Capital Gains Tax
- 4043 Corporate Taxation
- 4663 Income Taxation
- 4577 International Taxation
- 5968 Taxation Administration
- (ii) 6956 Company Takeovers
- 6639 Corporate Management
- 3506 International and Transnational Investment (MGD)
- 3367 Securities Regulation
- 3415 Dispute Resolution: Theory and Practice

## 4 Status

- 4.1 A student who has completed part of the requirements for the degree of Master of Laws, Master of Environmental Law or Master of Legal Studies in the University may, with the approval of Faculty, be admitted to candidature for the Graduate Diploma, with such credit as the Faculty determines, subject to the student discontinuing candidature for the degree of Master of Laws, Master of Environmental Law or Master of Legal Studies.

- 4.2 (a) A candidate may apply at any time to the Faculty for status, and the Faculty may determine, on such conditions as it considers appropriate, that a pass in a subject, Research Paper or Dissertation offered under the schedules for the degree of Master of Legal Studies prior to March 1988 is deemed to be a pass in a subject referred to in 3.2.1, 3.2.2 and 7.1.

- (b) Without limiting the operation of the preceding sub-clause a candidate who has passed prior to 1988:

- (i) 5275 Advanced Company Law shall be deemed to have passed

7498 Company Receiverships; and

6085 Company Liquidations (MGD)

- (ii) 7785 Advanced Family Law shall be deemed to have passed two unspecified subjects

- (iii) 9692 Advanced Insurance Law shall be deemed to have passed

3419 Insurance Law: General Principles; and one other unspecified subject

- (iv) 9944 Advanced Taxation Law shall be deemed to have passed

4663 Income Taxation; and one other unspecified taxation subject

- (v) 2265 Advanced Taxation Law II shall be deemed to have passed

4043 Corporate Taxation; and

4577 International Taxation

- (vi) 9611 Competition Law shall be deemed to have passed
- 2073 Intellectual Property: General Principles; and one other unspecified subject
- (vii) 8080 Criminal Procedure shall be deemed to have passed two unspecified subjects
- (viii) 7453 Federal Public Law shall be deemed to have passed two unspecified subjects
- (ix) 6380 Advanced Securities and Investment shall be deemed to have passed
- 6956 Company Takeovers; and
- 3367 Securities Regulation
- (x) 1811 Remedies shall be deemed to have passed
- 9135 Equitable Remedies; and one other unspecified subject
- (xi) 8182 Advanced Administrative Law shall be deemed to have passed
- 2464 Judicial Review; and
- 8021 Statutory Review of Administrative Action (MGD)
- (xii) 5167 Current Issues in Criminal Law shall be deemed to have passed
- 4099 Selected Issues in Criminal Law and Procedure (MGD); and one other unspecified subject
- (xiii) 6536 Research Paper A and
- 3432 Research Paper B shall be deemed to have passed one unspecified subject
- (xiv) 7886 M. L. S. Dissertation shall be deemed to have passed two unspecified subjects.

## 5 Assessment and Examinations

There shall be four classifications of pass in each subject of the Diploma as follows: Pass with High Distinction, Pass with Distinction, Pass with Credit, and Pass.

## 6 Duration of course

Unless the Faculty in a particular case expressly approves an extension of time, and subject to 3.1 above and to the section in the General Course Rules on status/exemption and credit transfer, the requirements of the Graduate Diploma shall be completed in not less than one year and not more than three years from the commencement of candidature.

## 7 Qualification requirements

7.1 To qualify for the Graduate Diploma the candidate shall complete satisfactorily six subjects each with a research paper component of 7–8,000 words.

7.2 Notwithstanding the foregoing Specific Course Rules a candidate who has been enrolled for the degree of Master of Legal Studies or Master of Laws (General Studies) or Master in a specialist area of study or Master of Environmental Law, and who as such a candidate has completed the work prescribed herein for the Graduate Diploma and who has not been awarded the Masters degree shall, on written application to the Registrar, be awarded the Graduate Diploma, subject to the student discontinuing candidature for the degree of Master of Laws or Master in a specialist area of study or Master of Environmental Law.

## Syllabuses

*syllabus details:* see Master of Laws

**Master of Laws****Master of Laws (Corporate and Commercial)****Master of Laws (General Studies)****Master of Environmental Law**

note: Postgraduate tuition fees may apply to these courses.

The above awards have been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar.

As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

**Specific Course Rules****1 General**

1.1 There shall be the following Masters degrees:

- Master of Laws
- Master of Laws (General Studies)
- Master of Laws (Corporate and Commercial)
- Master of Environmental Law

**2 Admission requirements**

- 2.1 (a) The Faculty of Law may accept as a candidate for the degree of Master of Laws any person who
- (i) has qualified for the Honours degree of Bachelor of Laws or an Ordinary degree of Bachelor of Laws with Honours of the University; or
  - (ii) holds qualifications which in the opinion of the Faculty are at least equivalent to those of the Honours degree of Bachelor of Laws of the University.
- (b) (i) The Faculty may accept as a probationary candidate for the degree of Master of Laws any other graduate of the University or of another tertiary institution if the qualifications of the candidate are such as to satisfy the Faculty that the candidate is likely to be able satisfactorily to undertake work for the degree.

- (ii) Every probationary candidate shall within such time as the Faculty shall prescribe or allow pass at Honours standard and at the first attempt such assessment as the Faculty may prescribe: should the candidate fail so to complete such assessment the probationary candidature shall lapse, unless the Faculty under such conditions as it thinks fit determines that it be allowed to continue.

- (c) Subject to the approval of the Board of Graduate Studies acting with authority wittingly devolved to it by Council the Faculty may, in special cases and subject to such conditions as it may see fit to impose in each case, accept as a candidate or as a probationary candidate for the degree of Master of Laws, a person who does not hold a University degree, if it is satisfied that the person is likely to be able satisfactorily to undertake work for the degree.

- 2.2 (a) The Faculty may accept as a candidate for the degree of Master of Laws (General Studies) or for a degree of Master of Laws in a specialist area of study or for the degree of Master of Environmental Law any person who has qualified for
- (i) an Honours degree of Bachelor of Laws or an Ordinary degree of Bachelor of Laws with Honours of the University;

- (ii) an Ordinary degree of Bachelor of Laws of the University which the Faculty judges to have been attained at above-average standard;
  - (iii) an Ordinary degree of Bachelor of Laws of the University and who has substantial professional experience or other relevant qualifications; or
  - (iv) a degree in Law of another tertiary institution which, in the opinion of the Faculty is equivalent to any of the degrees contained in 1.2(a)(i) and 1.2(a)(ii) or which, together with any other professional or other relevant experience or qualification the person may have, is sufficient to satisfy the Faculty that the person is likely to be able satisfactorily to undertake work for the degree; or
  - (v) for the degree of Master of Environmental Law, at least a degree in another discipline from a University or tertiary institution together with substantial relevant experience.
- (b) The Faculty may in appropriate cases accept, subject to the approval of the Board of Graduate Studies acting with authority wittingly devolved to it by Council, a candidate for the degree of Master of Laws (General Studies) or a degree of Master of Laws in a specialist area of study or the degree of Master of Environmental Law who does not otherwise qualify under this Specific Course Rule but has given evidence satisfactory to the Faculty of fitness to undertake work for the degree.

### 3 Course of study

- 3.1 Courses of study for candidates proceeding under 7.2.(b) must be approved by the Dean of the Faculty or a nominee at enrolment each year.
- 3.2 Except in special circumstances approved by Faculty, candidature for candidates proceeding under 7.1 shall commence on the approval of the subject of research by Faculty. Candidature for candidates proceeding under 7.2 will commence on the first day of the semester in which the candidate's coursework begins.
- 3.3 (i) The subjects for the degree of Master of Laws (General Studies) or a degree of Master of Laws in a specialist area of study or the degree of Master of Environmental Law shall be:

- 3604 Capital Gains Tax
- 3639 Choice of Law Theory
- 6085 Company Liquidations (MGD)
- 7498 Company Receiverships
- 6956 Company Takeovers
- 4890 Comparative Company Law
- 8164 Comparative Environmental Law
- 3209 Corporate Finance (MGD)
- 6639 Corporate Management
- 4043 Corporate Taxation
- 3415 Dispute Resolution: Theory and Practice
- 7239 Energy Law
- 9585 Environmental Dispute Resolution (MGD)
- 4396 Environmental Impact Assessment Law
- 9135 Equitable Remedies
- 4663 Income Taxation
- 3419 Insurance Law: General Principles
- 2073 Intellectual Property: General Principles
- 4431 Intellectual Property: Selected Issues
- 3506 International and Transnational Investment (MGD)
- 4469 International Environmental Law
- 7993 International Regulation of Trade
- 4577 International Taxation
- 2464 Judicial Review
- 4558 Land Management Law
- 8423 Land Transactions
- 6368 Landlord and Tenant
- 7426 Legal Aspects of Doing Business Abroad
- 6438 Litigation—Selected Issues
- 2435 Mining Law
- 6723 Planning Law
- 8314 Protection on the Antarctic Environment (MGD)
- 3367 Securities Regulation
- 8021 Statutory Review of Administrative Action (MGD)
- 5968 Taxation Administration

6737 Theories of Constitutional Law

4498 Water Resources Law (MGD)

A number of subjects offered in the LLB will also be made available to Masters students. Details will be published with the timetable.

(ii) The subjects for the Master of Environmental Law also shall be:

1359 Environmental Law (Research Paper)

5624 Law and Aboriginal People

8598 Law of Conservation and Heritage

7067 Law of Environmental Planning and Protection

6942 Law of Land Use Planning

4108 Law of Minerals and Energy

3.4 A candidate proceeding to the award of a degree of Master in a specialist area of study must, as part of the requirements of 7.2, complete six subjects including for the:

(a) **Master of Laws (Corporate and Commercial)**

At least five subjects from:

3604 Capital Gains Tax

3639 Choice of Law Theory

6085 Company Liquidations (MGD)

7498 Company Receivership

6956 Company Takeovers

4890 Comparative Company Law

3209 Corporate Finance (MGD)

6639 Corporate Management

4043 Corporate Taxation

7239 Energy Law

9136 Equitable Remedies

4663 Income Taxation

3419 Insurance Law: General Principles

2073 Intellectual Property: General Principles

4431 Intellectual Property: Selected Issues

3506 International and Transnational Investment (MGD)

4577 International Taxation

7993 International Regulation of Trade

8423 Land Transactions

6368 Landlord and Tenant

7426 Legal Aspects of Doing Business Abroad

6438 Litigation - Selected Issues

2435 Mining Law

6723 Planning Law

3367 Securities Regulation

5968 Taxation Administration

and

9127 Dissertation (Corporate and Commercial), or

7008 Dissertation (Corporate and Commercial) (mid-year intake)

(b) **Master of Environmental Law**

(i) 7067 Law of Environmental Planning and Protection, or a subject judged by the Faculty to be substantially similar (unless previously completed, in which case such subject may not be counted for the degree and the candidate must complete 1359 Environmental Law (Research Paper).

(ii) one semester length or equivalent subject chosen from the lists shown under Clause 6.2 or 6.3 of the Specific Course Rules for the Graduate Diploma in Environmental Studies or Clause 6.1.2 or 6.1.3 of the Master of Environmental Studies.

(iii) at least three subjects from those contained in (1), and not more than one subject from those referred to in (2).

(1) 8164 Comparative Environmental Law

7239 Energy Law

9585 Environmental Dispute Resolution (MGD)

4396 Environmental Impact Assessment Law

4469 International Environmental Law

4558 Land Management Law

- 2435 Mining Law
- 6723 Planning Law
- 8314 Protection of the Antarctic Environment (MGD)
- 4498 Water Resources Law (MGD);

- (2) (a) Any subject listed in 3.3(i) which, in the opinion of the Faculty, is relevant to the candidate's research interests concerning Environmental Law.
- (b) Any subject listed in 3.3(ii), unless a subject judged by the Faculty to be substantially similar has been previously completed, in which case such subject may not be counted for the Degree.

- (iv) 8906 Dissertation (Environmental),  
*or*  
5331 Dissertation (Environmental) (mid-year intake)

**3.5** The subject of each thesis and each dissertation shall be approved and a supervisor appointed by the Faculty. A candidate shall lodge with the Faculty Registrar three copies of a thesis, or three copies of a dissertation prepared in accordance with directions given to candidates from time to time.

**4 Status**

- 4.1** (a) A candidate for the degree of Master of Laws (General Studies) or a degree of Master in a specialist area of study or the degree of Master of Environmental Law may apply at any time to the Faculty for status, and the Faculty may grant such status as it determines on account of work previously undertaken by the candidate.
- (b) The Faculty may determine, on such conditions as it considers appropriate, that a pass in a subject, Research Paper or Dissertation offered under the Schedules for the degree of Master of Legal Studies prior to March 1988 is deemed to be a pass in a dissertation or subject or subjects referred to in 7.2 and 7.3.

(c) Without limiting the operation of the preceding sub-clauses a candidate who has passed prior to 1988:

- (i) 5275 Advanced Company Law shall be deemed to have passed
- 7498 Company Receiverships; and
- 6085 Company Liquidations (MGD)
- (ii) 7785 Advanced Family Law shall be deemed to have passed
- two unspecified subjects
- (iii) 9693 Advanced Insurance Law shall be deemed to have passed
- 3419 Insurance Law: General Principles; and one other unspecified subject
- (iv) 9944 Advanced Taxation Law shall be deemed to have passed
- 4663 Income Taxation; and one unspecified taxation subject
- (v) 2265 Advanced Taxation Law II shall be deemed to have passed
- 4043 Corporate Taxation; and
- 4577 International Taxation
- (vi) 9611 Competition Law shall be deemed to have passed
- 2073 Intellectual Property: General Principles; and one other unspecified subject
- (vii) 8080 Criminal Procedure shall be deemed to have passed
- two unspecified subjects
- (viii) 7453 Federal Public Law shall be deemed to have passed
- two unspecified subjects
- (ix) 6380 Advanced Securities and Investment shall be deemed to have passed
- 6956 Company Takeovers; and
- 3367 Securities Regulation

- (x) 1811 Remedies shall be deemed to have passed
- 9135 Equitable Remedies; and one other unspecified subject
- (xi) 8182 Advanced Administrative Law shall be deemed to have passed
- 2464 Judicial Review; and
- 8021 Statutory Review of Administrative Action (MGD)
- (xii) 5167 Current Issues in Criminal Law shall be deemed to have passed
- 4099 Selected Issues in Criminal Law and Procedure (MGD); and one other unspecified subject
- (xiii) 6536 Research Paper A and 3432 Research Paper B shall be deemed to have passed one unspecified subject
- (xiv) 7886 M. L. S. Dissertation shall be deemed to have passed in the same curriculum area
- 7900 Dissertation; or two unspecified subjects.

## 5 Assessment and examinations

- 5.1
- (a) The Faculty shall appoint two persons to examine each thesis, at least one of whom shall be an external examiner.
  - (b) The Faculty shall appoint at least one person to examine each dissertation.
  - (c) The examiners shall report to the Faculty and may recommend
    - (i) that, in the case of candidates proceeding under 7.1 the degree be awarded or, in the case of candidates proceeding under 7.2, a dissertation is satisfactory; or
    - (ii) that the thesis or a dissertation be returned to the candidate for revision and resubmission; or

- (iii) that, in the case of candidates proceeding under 7.1 that the degree be not awarded or, in the case of candidates proceeding under 7.2, that a dissertation is not satisfactory.

## 6 Duration of Course

- 6.1 A candidate may proceed to the degree by either full-time or part-time study.
- 6.2
- (a) Unless the Faculty in any particular case expressly approves an extension of time, a full-time candidate for the degree of Master of Laws by thesis shall submit the thesis within two calendar years, and a part-time or external candidate shall submit a thesis within four calendar years, from the date of the commencement of candidature or probationary candidature. Except with the permission of the Faculty no thesis may be submitted earlier than one calendar year in the case of full-time candidates or earlier than two years in the case of part-time candidates, from the date of commencement of candidature.
  - (b) Unless the Faculty in any particular case approves an extension of time, a candidate for a degree of Master of Laws by coursework or the degree of Master of Environmental Law shall complete the requirements for the degree in not less than fifteen months and not more than four calendar years from the date of the commencement of candidature.

## 7 Qualification requirements

- 7.1 To qualify for the degree of Master of Laws by thesis a candidate shall demonstrate by the submission of a thesis of not more than 70,000 words on a subject approved by the Faculty, an ability to carry out independent research, to marshal logically and appropriately, and to analyse and assess, the material produced by that research, and to express clearly and effectively the conclusions to be drawn from that analysis and assessment. The candidate on submission of the thesis shall adduce sufficient evidence that the thesis, which shall be prepared under the guidance of the supervisor or supervisors appointed by Faculty, is the candidate's own work.
- 7.2 To qualify for the degree of Master of Laws (General Studies) or a degree of Master in a specialist area of study or the degree of Master of Environmental Law a candidate shall:

- (a) complete satisfactorily six subjects listed in clause 3 (each subject containing a research paper component of 7—8,000 words)
- (b) a dissertation (7900 Dissertation or 5360 Dissertation (mid-year intake); or 9127 Dissertation (Corporate and Commercial) or 7008 Dissertation (Corporate and Commercial) (mid-year intake); or 8906 Dissertation (Environmental) or 5331 Dissertation (Environmental) (mid-year intake) which may develop one of the research papers, to a total of no more than 15,000 words.
- (c) otherwise complying with the provisions of the Specific Course Rules.

**7.3** If the Faculty considers, after a final report by the appointed examiners, that a thesis submitted for the degree of Doctor of Laws or Doctor of Philosophy is not sufficiently meritorious to qualify the candidate submitting that thesis for the award of the degree, the Faculty may, if in its opinion the thesis submitted is of a standard sufficient to comply with the relevant requirements for the award of the degree of Master of Laws, recommend that the Master of Laws be awarded.

**7.4** A candidate who holds the degree of Master of Legal Studies and who qualifies for admission to the degree of Master of Laws (General Studies) or a degree of Master of Laws in a specialist area of study or the degree of Master of Environmental Law may not be admitted to the degree without first surrendering the degree of Master of Legal Studies.

**7.5** A graduate who holds one of the Graduate Diplomas in Law must, in order to qualify for the degree of Master of Laws (General Studies) or a degree of Master of Laws in a specialist area of study or the degree of Master of Environmental Law, present at least six subjects which were not presented for the Graduate Diploma unless the candidate surrenders the Graduate Diploma prior to being admitted to the degree.

## Syllabuses

### 3604 Capital Gains Tax

*content:* An examination of Part IIIA of the Income Tax Assessment Act 1936 (Cth.). This subject will deal with the general provisions of Part IIIA of the ITAA. Particular emphasis will be placed on such topics as the definition of what is an asset for the purposes of Part IIIA, assets created by disposal, the situations in which the consideration in respect of disposal or acquisition is deemed to be the market price, and the interrelationship between Part IIIA and the taxation of income. In addition the subject will look at current problems and controversies in relation to Part IIIA.

### 3639 Choice of Law Theory

*content:* This subject will be an examination of choice of law theory at an advanced level. It will include an examination of the choice of law process in the context of tortious actions with extensive analysis of the theory and practice in the United States; the vexed question of choice of law in marital relationships, the meaning of renvoi; characterisation and the incidental question; and the policy of autonomy in choice of law in contract, with particular emphasis on the role of statutory interventions in the choice of law process.

### 6085 Company Liquidations (MGD)

*content:* An examination of the theory and application of the law regulating the winding up and dissolution of business corporations. The subject will cover such matters as: (i) the grounds for winding up a corporation; (ii) who may apply for winding up; (iii) the duties, rights and powers of liquidators; (iv) voluntary winding up; (v) priorities of debts; (vi) property available for distribution. Attention will also be paid to the fairness and efficacy of the current regulatory framework and whether sufficient emphasis is given to corporate rescue as opposed to corporate collapse.

### 7498 Company Receiverships

*content:* An examination of the principal remedy available to a secured creditor under a comprehensive charge over the assets and undertaking of a corporate debtor. Detailed analysis of: (1) events of default under security instruments (2) validity of receiver's appointment (3) effect of receivership on a company, management and employees (4) dealing with charged assets (5) duties, powers, rights and liabilities of receiver (6) receiver's distributions.

### 6956 Company Takeovers

*content:* An examination of the regulation of takeovers under Ch6 of the Corporations Law. Specific topics include: (i) the concept of 'control'; (ii) the mechanics

of regulated takeovers; (iii) exempt transactions; (iv) criminal and civil liability; (v) the roles of the Australian Securities Commission, the Corporations and Securities Panel and the Courts.

### 4890 Comparative Company Law

*content:* An examination of major Australian corporate law concepts compared and contrasted to concepts in selected overseas jurisdictions. The subject aims by this comparison to facilitate a greater understanding of the efficacy of major Australian corporate law concepts. Topics to be considered will be discussed with the class before the commencement of the subject, but such topics could include: (i) the extent to which the law should distinguish between companies according to their size; (ii) corporate capacity; (iii) the role and duties of company directors and controllers; (iv) the powers of minority shareholders; (v) mechanisms providing adequate protection for creditors and employees of companies; (vi) the availability of company information to the public.

### 8164 Comparative Environmental Law

*content:* An examination and evaluation on a comparative basis of the environmental laws of a number of other countries, with particular emphasis upon United States, Canadian and European Community Environmental Law (for the purpose of comparing approaches to environmental management within differing 'federal' systems). Attention will be directed also to environmental law in developing countries, particularly in South East Asian and Pacific regions. In this context, the difficulties of introducing legally enforceable environmental management regimes in lower income countries will be a particular focus.

### 3209 Corporate Finance (MGD)

*content:* An examination of the law and practice relating to the raising of corporate finance including such specific topics as: (i) the use of shares and debentures; (ii) commercial and bank bills; (iii) letters of credits; (iv) limited resource financing; (v) joint venture companies; (vi) the priority of charges. Included in the subject will be a consideration of the lawyer's role in raising finance, relevant aspects of the law of taxation and stamp duties and aspects of international finance.

### 6639 Corporate Management

*content:* An examination at advanced level of the principles of governance, in particular the powers, duties, rights and liabilities of company directors, officers and controllers. The subject will include some discussion of the position in other jurisdictions.

### 4043 Corporate Taxation

*content:* An examination of the law related to the taxation of corporate profits and distributions to shareholders, the taxation of partnerships and the taxation of business operations generally. Major practical problems and overseas approaches and remedies will be considered. Specific examples relating to the taxation of mining and petroleum operations, primary producers, and life insurance and investment companies will be considered as appropriate.

### 3415 Dispute Resolution: Theory and Practice

*content:* This subject will examine a range of dispute resolution methods with special emphasis on: informal processes, in contrast to litigation and adjudication in the formal legal system; cooperative bargaining approaches, comparing them with the competitive approaches often used by legal practitioners; evaluation of claims of benefits and disadvantages made for different dispute resolution processes; use of dispute resolution methods in particular contexts, such as divorce, neighbourhood, industrial, anti-discrimination or commercial disputes; and implications for legal practitioners of the greater emphasis on informal processes.

### 7239 Energy Law

*content:* A detailed consideration of various legal issues of current concern affecting energy law. The types and the nature of the energy resources discussed will include a selection of the following: (a) the private generation of electricity; (b) co-generation facilities; (c) petroleum exploration and production; (d) geothermal energy exploration and production; (e) hydro-electricity; (f) solar energy; (g) wind energy; (h) ocean thermal energy resources. In each case the subject will examine the legal issues arising from the development and exploitation of the resource.

### 9585 Environmental Dispute Resolution (MGD)

*content:* An examination of various ways in which environmental disputes are resolved, including through litigation, Commissions of Inquiry and processes of mediation and negotiation. Considerable emphasis will be placed on practical and procedural aspects, including standing rules, requirements concerning security for costs and undertakings as to damages. Involvement of judges, practitioners and mediators will be procured as far as possible.

### 4396 Environmental Impact Assessment Law

*content:* A detailed examination of environmental impact assessment requirements within Australia, including the Commonwealth procedures. Emphasis will be placed on the possibilities for judicial enforcement of EIA procedures at the initial screening stage, in relation to the adequacy of the EIS, and at the final, decision making stage. Commonwealth-State arrangements for joint EIA will be examined. The topic of EIA in relation to foreign aid will be considered.

### 1359 Environmental Law (Research Paper)

*content:* This subject is intended to serve as an alternative to 7272 Environmental Planning and Protection Law for those candidates who have previously undertaken that subject or one of an equivalent nature. It will involve a seminar program in which the candidate will be required to present a draft research paper prior to its submission in final form. The topic for this paper will be settled in consultation with the course coordinator. The aim of the paper will be to enable the candidate's knowledge of environmental law to be updated where necessary or a particular area of environmental law research to be pursued by the candidate.

### 9135 Equitable Remedies

*content:* An examination of remedies available in equity. General topics will include: (i) the declaration; (ii) the injunction, including an examination of specific problem areas, for example, balance of convenience, quia timet and interlocutory injunctions, damages in lieu; (iii) specific performance; (iv) restitution in contract and in connection with constructive trusts and tracing orders; (v) compensation; (vi) discretions.

### 4663 Income Taxation

*content:* An examination at an advanced level of selected problems and issues in the law related to taxation of income. The subject assumes a basic working knowledge of the principles relating to income taxation and taxation of trusts.

### 3419 Insurance Law: General Principles

*content:* An examination of the basic principles of insurance law. This subject is intended for those who have no working knowledge of insurance law. Specific topics for consideration will include: (i) the nature of an insurable interest; (ii) misrepresentation and non-disclosure in obtaining insurance; (iii) agency in insurance transactions; (iv) insurance policies and claims; (v) quantum recoverable; (vi) double insurance; (vii) contribution and subrogation.

### 2073 Intellectual Property: General Principles

*content:* An examination of certain basic principles and systems for the legal protection of ideas, information, data, creative works and business reputations. The subject is intended for those who have no working knowledge of this area of law. The subject will basically cover: (i) the law of confidential information; (ii) the law of copyright and designs, with emphasis on its nature as a statutory system of protection; (iii) the law of passing-off, with special emphasis on its relationship to aspects of the Trade Practices Act and Trade Marks legislation.

### 4431 Intellectual Property: Selected Issues

*content:* An examination of certain selected topics in the law relating to the legal protection of ideas, information, data, creative works and business reputations. Topics to be considered will be discussed with the class before commencement of the subject but should include some consideration of: (i) the historical development of intellectual property law; (ii) the purposes of legal protection in this area; (iii) the use of criminal law in relation to the protection of intellectual property; (iv) the relationship between the various systems of intellectual property protection; (v) the protection of recent technological advances; (vi) international aspects of intellectual property protection; (vii) judicial trends and policies; (viii) the adequacy of intellectual property protection. Specific types of intellectual property may be chosen to illustrate various of these matters, and students may wish to study particular areas of intellectual property with which they are not previously familiar.

### 3506 International and Transnational Investment (MGD)

*content:* An examination of the regulation of international and transnational investment, including its constitutional and political framework. Specific topics will cover such matters as: (i) foreign investment guidelines; (ii) the Foreign Acquisitions and Takeovers Act; (iii) Securities Regulation in the United States, United Kingdom and European Union; (iv) choice of law and jurisdictional questions; (v) the role of International Agreements and Codes; (vi) the enforceability of contracts and exchange control. Also included will be the consideration of the role of the Treasurer and the Foreign Investment Review Board, special problems relating to the role of State governments and environmental considerations, and relevant aspects of the law of taxation.

### 4469 International Environmental Law

*content:* An examination of the sources and obligations of international law relating to environmental matters and its relationship with municipal law and relevant institutions. The subject will consider present and proposed international conventions relating to the environment both on a global and a regional basis. The extra-territorial application of municipal Environmental Laws also will be addressed. Various international institutions including the United Nations Environment Program, the South Pacific Regional Environmental Program and the World Conservation Union will be examined. The operation of international monetary institutions such as the World Bank and the Asian Development Bank also will be considered in terms of their impact on the environment.

### 7993 International Regulation of Trade

*content:* An examination of the economics of world trade and its international regulation. Specifically, the subject will cover the operation and effectiveness of the Bretton Woods Agreement, the GATT, the IMF, and the World Bank. There will also be an examination of the attempts by the UN and other organisations to monitor and possibly control the activities of multinational corporations. Where relevant there will be an examination of bilateral and multilateral treaties affecting specific industries.

### 4577 International Taxation

*content:* An examination of selected principles and legislative provisions regulating the taxation of foreign source income, the taxation of non-residents, withholding tax, international tax agreements, tax havens, and income tax issues related to international transactions.

### 2464 Judicial Review

*content:* A study at an advanced level of the role of the courts in reviewing decisions by administrative bodies. Consideration of the differences between judicial and non-judicial review and the impact of the processes upon decision-making by administrative bodies. Study of administrative law doctrines: jurisdictional faults—error of fact and law; the ultra vires principle, abuse of discretionary power; the natural justice rule; estoppel; the distinction between void and voidable action; remedies—prerogative writs, injunction, declaration, damages, the use and treatment of privative clauses.

### **4558 Land Management Law**

*content:* An examination of how the principles of sustainable resource use may be applied through the legal system in relation to the management of land. Measures examined include traditional common law doctrines such as the law of waste; soil conservation legislation; the use of tenurial systems especially in the arid zone; vegetation clearance controls; land management agreements; and recent trends in biodiversity protection.

### **8423 Land Transactions**

*content:* An examination at advanced level of certain aspects of the law relating to the creation and transfer of interests in land in Australia and South Australia. In regard to formal dealings, general topics may include such matters as: (i) the contents of leases and leasehold remedies; (ii) the content of the contract for the sale of land; (iii) breach of contract for the sale of land with special attention to termination and remedies; (iv) the effect of the contract for the sale of land; (v) contingent conditions; (vi) the vendor's obligation to disclose matters before entering the contract for the sale of land. Alternatively, the subject may concentrate on informal dealings of all types.

### **6368 Landlord and Tenant**

*content:* A detailed and specialised treatment of the law relating to leasehold estates. The common law which applies to commercial rented premises, the retail tenancies legislation and residential tenancies legislation will be discussed. Consideration will also be given to the legal relationship between the Housing Trust and its tenants. The topics discussed will include: (a) the historical development of landlord-tenant law; (b) the concept of leasehold estates; (c) types of tenancies; (d) agreements for a lease; (e) the distinction between a lease and a licence; (f) boarders and lodgers; (g) express and implied covenants; (h) repairs and substandard housing control; (i) rent control; (j) renewal of leases; (k) determination of tenancies; (l) forfeiture; (m) recovery of possession; (n) remedies.

### **5624 Law and Aboriginal People**

*content:* History of the relationship between Aboriginal and non Aboriginal people including governmental policies towards Aboriginal people: particular issues include Racial Discrimination; Land Rights; Mabo; Native Title Legislation; Aboriginal Customary Law; the Criminal Justice System; Reconciliation; Social Justice.

### **8598 Law of Conservation and Heritage**

*content:* The subject will commence with a brief overview of systems for the allocation of resource

tenures, focussing on arid lands, surface and underground waters, and minerals and petroleum. The capacity of these traditional tenurial systems to address conservation objectives will be considered.

There then follows a detailed examination of specific conservation measures, including those relating to national parks; wildlife protection; marine parks; identification and protection of the national estate; world heritage classification and protection; and the protection of biological diversity. In addition, measures to achieve conservation objectives on private lands will be considered, including heritage agreements, vegetation clearance controls, the use of land-use planning controls and the British system of national parks. This section of the subject concludes with an examination of measures designed to identify and protect items of the built and cultural heritage (including Aboriginal culture).

The final section of the subject provides an historical account of the emergence of international environmental organisations and the development of international law and policy concerning conservation and heritage matters, particularly through treaties and agreements. Emphasis will be placed upon the protection of biodiversity, world heritage, wildlife, wetlands and Antarctica.

### **7067 Law of Environmental Planning and Protection**

*content:* The subject examines regulatory mechanisms that address environmental problems and focuses particularly upon the regulation of development. An introductory section examines the nature of environmental problems in Australia and the general structure of environmental law. Specific topics addressed subsequently are: constitutional responsibilities and powers with respect to environmental planning and protection; land-use planning systems; environmental impact assessment; and legislation to promote development.

A further section of the subject, which will vary in content from year to year, examines more recent forms of environmental regulation, to be selected from the following topics: pollution controls (air, water, noise); waste disposal (solid and hazardous wastes); regulation of hazardous substances (pesticides, environmental contaminants, radioactive substances, lead, asbestos); regulation of human-ingested products (food additives, therapeutic substances). Finally, a section on environmental litigation will examine tortious actions, criminal and civil, enforcement of environmental legislation and statutory appeal procedures. The role of courts and lawyers in the resolution of environmental disputes will also be discussed.

**6942 Law of Land Use Planning**

*content:* The focus of this subject is upon the control of land development under the South Australian planning system. The subject commences with an examination of the historical evolution of the planning system, and then considers the nature of the planning procedures under the Development Act 1993 and of controls imposed thereunder. It examines the powers and procedures of planning authorities and, through the seminar program, it considers the methods of dealing with selected planning issues, including shopping, housing segregation and aesthetics. The subject also considers the role of appeal tribunals and public participation procedures; alternative modes of planning; control of government development, particularly transport; and responsibility for housing. The subject concentrates upon legal analysis of planning problems.

**4108 Law of Minerals and Energy**

*content:* The subject will cover the development of mining legislation in Australia with reference to exploration, extraction, and to the enforcement of mining interests. The law relating to the exploitation of oil and gas resources will be covered with reference to, inter alia, off-shore and on-shore exploration and production, taxation issues, royalties, project financing, joint ventures, Aboriginal land rights and environmental controls. The subject will also deal with the alternative energy resources: solar energy, wind energy and geothermal energy. The examination of law and practice relating to these forms of energy will cover existing and proposed technologies, environmental constraints, legal barriers to development, the rights and potential liabilities of consumers and producers and proposals for legislative change.

**7426 Legal Aspects of Doing Business Abroad**

*content:* An examination of the legal problems involved in doing business with a selected number of Australia's major trading partners. This will include methods of entry into the market via distributorship agreements, licensing agreements, international joint ventures, development agreements, international loan agreements, acquisition of property and local firms. The subject will also examine selected aspects of local law, viz: Securities, Anti-trust, Products Liability, Patent and Trademark and Labour Law.

**6438 Litigation—Selected Issues**

*content:* An examination at an advanced level of aspects of the laws of evidence and procedure in relation to civil and criminal litigation but excluding criminal procedure.

**2435 Mining Law**

*content:* An examination of the law and practice relating to the extraction of serviceable minerals. Jurisdiction over and title to minerals. Mining legislation in South Australia (nature of interests and rights created, procedures for acquisition of tenements, powers and procedures of Wardens' Courts, forfeiture and cancellation of interests). Commercial aspects of mineral development (forward and export sales contracts, status and effect of indentures, foreign investment controls, financing of ventures, taxation of income from operations, and the effect of the Trade Practices Act). The applicability of planning controls. Native rights to control operations. Access to water.

**6723 Planning Law**

*content:* An examination of major issues relating to control of land development, including: (a) the scope of planning law—exemptions and methods of circumvention; (b) planning administration—the role of national, State and local governments, rights of appeal, specialist tribunals, public involvement; (c) techniques of planning—negative and positive planning, controls and guidance, general principles and specific project evaluation; (d) relationship between planning and economic freedom and protection of class interests; (e) relationship between planning and property rights claims to compensation, existing use rights; (f) planning and government agencies: coordination of activities of arms of government. A general familiarity with planning law will be assumed.

**8314 Protection of the Antarctic Environment (MGD)**

*content:* An examination of the various international instruments developed under the 1954 Antarctic Treaty to protect the Antarctic environment and the surrounding southern oceans. Particular emphasis will be given to the Convention for the Conservation of Antarctic Marine Living Resources 1980 and the Madrid Protocol on Antarctic Environmental Protection 1991. The application of Australian Municipal Environmental Law within the Australian Antarctic Territory (AAT) will also be considered, as will the role of non-claimant states in undertaking scientific activities which have an environmental impact.

**3367 Securities Regulation**

*content:* An examination of the regulatory systems for the distribution of, and trading in, corporate securities. Specific topics will be drawn from such matters as: (i) the structure and role of the Australian Stock Exchange; (ii) investment banking and underwriting process; (iii) the structure and powers of the Australian Securities Commission; (iv) the regulation of the distribution of securities; (v) the nature of securities;

(vi) regulation and brokers and dealers; (vii) securities trading offences and civil liability under the law of securities; (viii) the regulation of investment companies.

**8021 Statutory Review of Administrative Action (MGD)**

*content:* An examination of statutory systems for review of administrative action with particular emphasis on the purposes of reforms, the types of review available and the processes by which review is carried out. A study of the Administrative Decisions (Judicial Review) Act 1977 and the Administrative Appeals Tribunal Act 1975. Examination of the role of the Administrative Review Council, the role of national and State ombudsmen and the scope and effect of freedom of information legislation.

**5968 Taxation Administration**

*content:* An examination of the administration of tax collection and procedures for resolving taxation conflicts. Specific topics will include: (i) the Taxation Commissioner's discretionary powers; (ii) assessments; (iii) the conduct of objections and appeals; (iv) administrative law remedies in relation to taxation; (v) legislative controls and penalties; (vi) the use and obtaining of information by taxpayers and the taxation authorities; (vii) the role of tax advisers and agents.

**6737 Theories of Constitutional Law**

*content:* A study of the concepts underlying the constitution with particular emphasis upon the place of the judicial branch of government. An examination of the nature of courts; inherent jurisdiction; the nature of equity and common law; the nature of a cause of action; protection for and independence of judicial officers.

**4498 Water Resources Law (MGD)**

*content:* An examination of the institutional structures for water management in Australia, including the Murray-Darling Basin arrangements; State and Federal Law relating to the allocation of both surface water and groundwater; the regulation of water quality; the common law doctrine of riparian rights; the concept of total catchment management; and a brief overview of river basin management schemes in other countries.

# Doctor of Laws

## Regulations

- 1 Subject to these Specific Course Rules the Council may, on the recommendation of the Faculty of Law, accept as a candidate for the degree of Doctor of Laws any person who, in the opinion of the Faculty of Law, is a fit and proper person to be so accepted.
- 2 To qualify for the degree a candidate may either (a) submit for assessment all or some of his/her scholarly work, including work not previously published; or (b) present a thesis on a subject approved by the Faculty of Law.
- 3 (a) A person who desires to qualify for the degree in accordance with alternative (a) of Regulation 2 shall give notice of his/her intended candidature in writing to the Registrar and with such notice shall furnish particulars of his/her scholarly achievements and of the work which he/she proposes to submit for the degree.
  - (b) The Faculty of Law shall examine the information submitted and shall decide whether to recommend to the Council that the applicant be accepted as a candidate.
- 4 (a) To qualify for the degree according to alternative (a) of Regulation 2 a candidate shall submit work which constitutes an original and substantial contribution of distinguished merit to legal knowledge or understanding.
  - (b) If any of the material submitted represents work carried out conjointly, the candidate shall state the extent to which he/she was responsible for such work.
  - (c) The candidate shall indicate what part, if any, of his/her works has already been presented for a degree in this or any other university.
- 5 A person who desires to qualify for the degree in accordance with alternative (b) of Regulation 2 may be accepted as a candidate if he/she (a) holds or has qualified for the Honours degree of Bachelor of Laws; or (b) holds or has qualified for the degree of Master of Laws: provided that the Faculty of Law may accept in lieu of the foregoing an equivalent qualification obtained in any other university recognised by The University of Adelaide; or (c) has passed an examination approved by the Faculty of Law.
- 6 (a) To qualify for the degree according to alternative (b) of Regulation 2 a candidate shall present a thesis which (i) contains an original and substantial contribution of distinguished merit to legal knowledge or understanding, and (ii) merits publication as a book or monograph (other than as a collection of separate articles), whether or not it has been previously published in full or in part. A thesis previously presented for a degree in this or in any other university may not be submitted under this regulation.
  - (b) A candidate may also present in support of his/her candidature other published books, monographs, or articles. If any of these publications record work carried out conjointly, the candidate shall state the extent to which he/she was responsible for the initiation and presentation of such publications.
  - (c) A candidate proceeding in accordance with alternative (b) of regulation 2 and with this regulation shall not be admitted to the degree until the expiration of the fourth academic year from his/her admission to the degree by virtue of which he/she was accepted as a candidate.
- 7 The candidate shall lodge with the Registrar three copies of the work submitted or of the thesis presented, as the case may be, prepared in accordance with the directions given in subparagraph (b) of clause 2B of Chapter XXV of the Statutes. If the work is accepted for the degree the Registrar will transmit two of the copies to the University Library.
- 8 The Faculty of Law shall nominate examiners. Normally there will be three examiners, two of them external to the University; but exceptions may be made in special cases recommended by the Faculty and approved by the Council.
- 9 The examiners may, if they think fit, examine the candidate either orally or by written questions on the material presented for the degree.
- 10 A candidate who complies with the foregoing conditions and satisfies the examiners may, on the recommendation of the Faculty of Law, be admitted to the degree of Doctor of Laws.

Regulations allowed 15 January, 1976.

Amended: 4 Feb. 1982: 3, 7.

## Faculty of Mathematical and Computer Sciences

### Regulations

#### Of Awards in the Faculty of Mathematical and Computer Sciences

- 1 In the Faculty of Mathematical and Computer Sciences there shall be the following awards:
    - Ordinary degree of Bachelor of Computer Science\*
    - Ordinary degree of Bachelor of Science in the Faculty of Mathematical and Computer Sciences
    - Honours degree of Bachelor of Science in the Faculty of Mathematical and Computer Sciences
    - Graduate Certificate in Mathematics Education
    - Graduate Certificate in Telecommunications
    - Graduate Diploma in Applied Statistics
    - Graduate Diploma in Computer Science
    - Graduate Diploma in Mathematical Science
    - Master of Applied Science (Communications)
    - Master of Computer Science
    - Master of Mathematical Science
    - Master of Science in the Faculty of Mathematical and Computer Sciences
  - 2 The courses for the awards listed in Regulation 1 shall be governed by the General Course Rules and Specific Course Rules that the Council shall prescribe from time to time.
  - 3 The syllabuses of subjects shall be specified by the Council.
- 1 Council has delegated the power to approve minor changes to the General Course Rules to the Deputy Vice-Chancellor (Academic).
  - 2 Council has delegated the power to approve minor changes to the Specific Course Rules to the Deans of Faculties.
  - 3 Council has delegated the power to specify syllabuses to the Head of each department or centre concerned, such syllabuses to be subject to approval by the Faculty or by the Dean on behalf of the Faculty. The Head of department or centre may approve minor changes to any previously approved syllabus.
  - 4 The Faculty also offers a Doctor of Science in the Faculty of Mathematical and Computer Sciences (D.Sc). Higher doctorates are governed by their own sets of Regulations as printed in this volume of the Calendar.

Regulations effective from 1 August 1994.

\* Awaiting approval and confirmation.

# Bachelor of Science in the Faculty of Mathematical and Computer Sciences

## and

# Bachelor of Computer Science

The above awards have been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar.

As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

## Specific Course Rules

### 1 General

- 1.1 There shall be an Ordinary degree of Bachelor of Science and an Ordinary degree of Bachelor of Computer Science in the Faculty of Mathematical and Computer Sciences. A candidate may obtain either degree or both.
- 1.2 There shall be an Honours degree of Bachelor of Science in the Faculty of Mathematical and Computer Sciences. A candidate may obtain either an Ordinary degree of Bachelor of Science or an Honours degree of Bachelor of Science or both.
- 1.3 There shall be an Honours degree of Bachelor of Science in the Faculty of Mathematical Sciences. A candidate may obtain either an Ordinary degree of Bachelor of Computer Science or an Honours degree of Bachelor of Science or both.

### 2 Assessment and examinations

- 2.1 A candidate shall not be eligible to attend for examination unless the prescribed work has been completed to the satisfaction of the teaching staff concerned.
- 2.2 In determining a candidate's final result in a subject (or part of a subject) the examiners may take into account oral, written, practical and other work, provided that the candidate has been given adequate notice at the commencement of the teaching of the subject of the way in which such work will be taken into account and of its relative importance in the final result.
- 2.3 There shall be four classifications of pass in the final assessment of any subject for the Ordinary degree, as follows: Pass with High Distinction, Pass with Distinction, Pass with Credit, Pass. If

the Pass classification be in two divisions, a pass in the higher division may be prescribed in the syllabuses as a prerequisite for admission to further studies in that subject or to other subjects or as assumed knowledge for such studies. There shall also be a classification of Conceded Pass. A candidate may present for the Ordinary degree only a limited number of subjects for which a Conceded Pass has been obtained, as specified in the relevant Rule made under these Specific Course Rules.

- 2.4 A candidate who fails a subject for the Ordinary degree or who obtains a lower division pass and who desires to take that subject again shall, unless exempted wholly or partially therefrom by the Head of the Department concerned, again complete the required work in that subject to the satisfaction of the teaching staff concerned.
  - 2.5 A candidate who has twice failed any subject for the Ordinary degree may not enrol for that subject again or for any other subject which in the opinion of the Faculty contains a substantial amount of the same material, except by permission of the Faculty and then only under such conditions as the Faculty may prescribe.
  - 2.6 There shall be three classifications of Pass in the final assessment of any subject for the Honours degree as follows: First Class, Second Class, Third Class. The Second Class classification shall be divided into two divisions as follows: Division A and Division B.
- ### 3 The Honours degree
- 3.1 If a candidate is unable to complete the course for the Honours degree within the time allowed, or if a candidate's work is unsatisfactory at any

stage of the course, or if a candidate withdraws from the course, such fact shall be reported to the Faculty. The Faculty may permit the candidate to re-enrol for an Honours degree under such conditions (if any) as it may determine.

#### 4 Subjects of study for the Ordinary Degree of Bachelor of Science (Mathematical and Computer Sciences)

notes: Syllabuses of subjects for the degree of B.Sc. in the Faculty of Mathematical and Computer Sciences are published below, immediately after these Specific Course Rules. For syllabuses of subjects taught for other degrees and diplomas see the table of subjects at the end of the volume.

Students are advised that some subjects cannot be counted with others towards the degree of B.Sc. in the Faculty of Mathematical and Computer Sciences. A list of unacceptable combinations is available from the Faculty Office.

Notwithstanding the Specific Course Rules and syllabuses published in this volume, a number of the subjects listed in the course leading to the degree of B.Sc. in the Faculty of Mathematical and Computer Sciences may not be offered in 1996.

The availability of all subjects is conditional upon the availability of staff and facilities.

#### 4.1 Level I subjects

##### 4.1.1 Mathematical and Computer Sciences subjects

code	subject title	points
4003	Computer Applications I	3
9276	Computer Science I	6
9134	Mathematical Applications I	3
9786	Mathematics I	6
3617	Mathematics IM	6
6918	Scientific Computing I	3
5543	Statistical Practice I	3

##### 4.1.2 Miscellaneous (non-Mathematical and Computer Sciences) subjects

6767	English as a Second Language (Ma & Comp Sc)*	3
------	--	---

\*A quota will apply in 1996.

##### 4.1.3 Arts subjects

Level I Arts subjects listed in 7.1 for the degrees of B.A. except 9894 Computer Literacy I, 4425 Quantitative Methods Using Computers I, 9151 New Methods in Arts: Using Personal Computers, any of the Dance subjects and those

subjects listed there which are taught by the Departments of Economics and Commerce.

##### 4.1.4 Economics and Commerce subjects

Subjects listed in 3.1 for the degree of B.Ec. except the subjects 9101 Business Data Analysis I and 7263 Mathematics for Economists I. Subjects listed in 3.1 for the degree of B.Com.

##### 4.1.5 Engineering subjects

9167	Design Graphics	1.5
2391	Dynamics	1.5
6714	Electrical Systems	1.5
2835	Engineering Planning and Design	1.5
6866	Materials I	1.5
3018	Process Systems	1.5
6581	Statics	1.5

Candidates who have been previously enrolled in the Faculty of Engineering are also directed to Specific Course Rule 5.4.

##### 4.1.6 Science subjects

Level I Science subjects listed in 7 of the degree of B.Sc. in the Faculty of Science.

##### 4.1.7 Design Studies subjects

Level I Design Studies subjects listed in 4.5 for the degree of B.Des.St.

#### 4.2 Level II subjects

##### 4.2.1 Mathematical and Computer Sciences subjects

9595	Mathematics IIM	4
	Applied Mathematics	
7243	Differential Equations II	2
3096	Dynamic Modelling II	2
6649	Methods in Applied Mathematics II	2
7416	Operations Research II	2
	Computer Science	
1956	Computer Systems	2
5132	Data Structures and Algorithms	2
3169	Database and Information Systems	2
3655	Numerical Methods	2
2430	Programming Paradigms	2
	Mathematical Physics	
9600	Classical Fields and Mathematical Methods II	2
2656	Classical Mechanics II	2

Pure Mathematics		1733 Hydrodynamics III	2
5807 Algebra II	2	2506 Mathematical Biology III	2
2959 Complex Analysis II	2	2039 Mathematical Programming III	2
1429 Discrete Mathematics II	2	9482 Mathematics of Finance III	2
7389 Real Analysis II	2	2314 Optimisation III	2

#### Statistics

4107 Introduction to Mathematical Statistics II	2	6128 Variational Methods and Optimal Control III	2
---	---	--	---

1675 Statistical Modelling and Computation II	2	Computer Science	
---	---	------------------	--

4523 Statistical Practice II	2	9811 Advanced Programming Paradigms	2
------------------------------	---	-------------------------------------	---

8878 Theory of Statistics II	2	6378 Artificial Intelligence	2
------------------------------	---	------------------------------	---

#### 4.2.2 Arts subjects

Level II Arts subjects listed in 7.5 Schedule II for the degrees of B.A. except any of the Dance subjects.

#### 4.2.3 Economics and Commerce subjects

Subjects listed in 3.1 for the degree of B.Ec. except the subject 3784 Economic Data Analysis II and 3071 Mathematical Economics II. Subjects listed in 3.1 for the degree of B.Com.

#### 4.2.4. Engineering Subjects

Candidates who have been previously enrolled in the Faculty of Engineering are directed to Specific Course Rule 5.4

#### 4.2.5 Law subjects

6019 Law and Legal Process*	4	5141 Computer Architecture	2
3131 Contract*	4	2328 Computer Networks and Applications	2

\* These subjects are only available to students who have been accepted for candidature to the LL.B.

#### 4.2.6 Science subjects

Level II Science subjects listed in 7 for the degree of B.Sc. in the Faculty of Science.

#### 4.3 Level III subjects

9823 Industry Practicum (Maths & Comp. Sc.)	2	5078 Numerical Analysis	2
---	---	-------------------------	---

#### 4.3.1 Mathematical and Computer Sciences subjects

Applied Mathematics		5078 Numerical Analysis	2
4447 Applied Probability III	2	4468 Operating Systems	2
1322 Computational Mathematics III	2	2382 Programming Techniques	2
9787 Differential Equations III	2	6263 Software Engineering and Project	3
2368 Elasticity III	2	1116 Systems Analysis	2

1733 Hydrodynamics III	2	Mathematical Physics	
------------------------	---	----------------------	--

2506 Mathematical Biology III	2	4413 Advanced Dynamics and Relativity	3
-------------------------------	---	---------------------------------------	---

2039 Mathematical Programming III	2	1067 Advanced Quantum Mechanics	2
-----------------------------------	---	---------------------------------	---

9482 Mathematics of Finance III	2	2994 Mathematical Physics	2
---------------------------------	---	---------------------------	---

2314 Optimisation III	2	6978 Quantum Mechanics III	3
-----------------------	---	----------------------------	---

2208 Random Processes III	2	5547 Statistical Mechanics	2
---------------------------	---	----------------------------	---

6128 Variational Methods and Optimal Control III	2	Pure Mathematics	
--	---	------------------	--

Computer Science		6848 Analysis and Topology III	2
------------------	--	--------------------------------	---

9811 Advanced Programming Paradigms	2	4102 Geometry of Surfaces III	2
-------------------------------------	---	-------------------------------	---

6378 Artificial Intelligence	2	1273 Groups III	2
------------------------------	---	-----------------	---

1234 Compiler Construction and Project	3	1845 Integration III	2
--	---	----------------------	---

5141 Computer Architecture	2	5780 Logic III	2
----------------------------	---	----------------	---

2328 Computer Networks and Applications	2	9482 Mathematics of Finance III	2
---	---	---------------------------------	---

3007 Knowledge Representation	2	3401 Number Theory III	2
-------------------------------	---	------------------------	---

9820 Numerical Analysis	2	3786 Projective Geometry III	2
-------------------------	---	------------------------------	---

4468 Operating Systems	2	6508 Rings, Fields and Matrices III	2
------------------------	---	-------------------------------------	---

2382 Programming Techniques	2	3874 Topics in Geometry III	2
-----------------------------	---	-----------------------------	---

6263 Software Engineering and Project	3	Statistics	
---------------------------------------	---	------------	--

1116 Systems Analysis	2	9800 Experimental Design III	2
-----------------------	---	------------------------------	---

#### Mathematical Physics

4413 Advanced Dynamics and Relativity	3	1411 Life Contingencies III	2
---------------------------------------	---	-----------------------------	---

1067 Advanced Quantum Mechanics	2		
---------------------------------	---	--	--

2994 Mathematical Physics	2		
---------------------------	---	--	--

6978 Quantum Mechanics III	3		
----------------------------	---	--	--

5547 Statistical Mechanics	2		
----------------------------	---	--	--

#### Pure Mathematics

6848 Analysis and Topology III	2		
--------------------------------	---	--	--

4102 Geometry of Surfaces III	2		
-------------------------------	---	--	--

1273 Groups III	2		
-----------------	---	--	--

1845 Integration III	2		
----------------------	---	--	--

5780 Logic III	2		
----------------	---	--	--

9482 Mathematics of Finance III	2		
---------------------------------	---	--	--

3401 Number Theory III	2		
------------------------	---	--	--

3786 Projective Geometry III	2		
------------------------------	---	--	--

6508 Rings, Fields and Matrices III	2		
-------------------------------------	---	--	--

3874 Topics in Geometry III	2		
-----------------------------	---	--	--

#### Statistics

9800 Experimental Design III	2		
------------------------------	---	--	--

1411 Life Contingencies III	2		
-----------------------------	---	--	--

8892 Medical Statistics III	2
5030 Multivariate Analysis III	2
8387 Non-parametric Methods III	2
4853 Sampling Theory and Practice III	2
3989 Statistical Modelling III	3
2993 Statistics for Quality Improvement III	2
7113 Theory of Statistics III	3
5675 Time Series III	2

**4.3.2 Arts subjects**

Level III Arts subjects listed in 7.9 for the degrees of B.A. except any of the Dance subjects.

**4.3.3 Economics and Commerce subjects**

Subjects listed in 3.1 for the degree of B.Ec.  
Subjects listed in 3.1 for the degree of B.Com.

**4.3.4 Law subjects**

8433 Constitutional Law	6
8580 Criminal Law	6
8821 Property	6
9365 Torts	6

**4.3.5 Science subjects**

Level III Science subjects listed in 7 Schedule III for the degree of B.Sc. in the Faculty of Science.

**5 General: the Ordinary degree of Bachelor of Science (Mathematical and Computer Sciences)**

5.1 The course of study for the Ordinary degree shall extend over three years of full-time study or the equivalent.

5.2 To qualify for the Ordinary degree a candidate shall, subject to the conditions and modifications specified under 2.3 above, pass subjects from 4 above to the value of at least 72 points which satisfy the following requirements:

- (a) A candidate shall pass in Mathematical and Computer Sciences subjects to the value of at least 36 points, of which subjects to the value of at least 12 points shall be Level III Mathematical and Computer Sciences subjects;
- (b) A candidate shall present either 9786 Mathematics I or both 3617 Mathematics IM and 9595 Mathematics IIM for the degree subject to:
  - (i) A candidate shall obtain a Pass Division I standard or higher in either 9786 Mathematics I or 9595 Mathematics IIM; and

- (ii) A candidate shall not present both 9786 Mathematics I and 9595 Mathematics IIM for the degree.

- (c) A candidate shall pass Level I subjects to the value of at least 21 points;

- (d) A candidate shall pass Level II subjects to the value of at least 20 points;

- (e) A candidate presenting 3617 Mathematics IM and 9595 Mathematics IIM shall present passes in Level II subjects other than 9595 Mathematics IIM to the value of at least 20 points, and may present no more than 24 points at Level I;

- (f) A candidate shall pass Level II and Level III subjects to a minimum value of 44 points, with at least 20 points being Level III subjects.

notes (not forming part of the Specific Course Rules)

A candidate who obtains a Pass Division II in 9786 Mathematics I may fulfill the requirements of 5 for the degree by obtaining a Pass Division I in 9595 Mathematics IIM but Mathematics IIM shall not count toward the degree.

5.3 A candidate may present for the degree subjects passed at the conceded pass level within the following limits: Level II and/or Level III subjects with an aggregate points value of not more than 6 provided that no subject thus presented has a points value of more than 3.

5.4 A candidate who has been previously enrolled in other faculties and who, before enrolling in the Faculty of Mathematical and Computer Sciences, has passed the following subjects may count these subjects as Mathematical and Computer Sciences subjects:

A candidate who has been previously enrolled in the Faculty of Engineering and who has passed the following subjects toward a Bachelor of Engineering degree may present them as Mathematical and Computer Sciences subjects:

code	subject title	points
1016	Differential Equations and Fourier Series E	2
4569	Laplace Transforms and Probability and Statistical Methods	2
1642	Linear Programming and Numerical Analysis	2
7567	Numerical Analysis and Probability and Statistics	2
2187	Vector Analysis and Complex Analysis	2
5729	Engineering Computing I	1.5
1332	Engineering Programming IE	2.5
9663	Logic Design	1.5

In addition, such a candidate may also present Level I and II Engineering subjects which have been passed that are not listed under 4.1 and 4.2 of these Specific Course Rules. These subjects do not count as Mathematical and Computer Sciences subjects.

notes (not forming part of the Specific Course Rules)

This clause enables Engineering students to complete the first three years of their course and to qualify for the B.Sc.(Ma.& Comp.Sc.) within four years, by fulfilling the requirements of 5.8 below. Students wishing to qualify for the B.Sc.(Ma.& Comp.Sc.) in this way must lodge an application with the South Australian Tertiary Admissions Centre (SATAC).

- 5.5 Except with the permission of the Faculty, a candidate may not enrol in subjects to the value of more than 18 points taught by departments outside the Faculty before obtaining at least a Division I pass in 9786 Mathematics I or 3617 Mathematics IM. These subjects to the value of not more than 18 points shall not include subjects in which a candidate has failed or from which a candidate has withdrawn.
- 5.6 A candidate may enrol in no more than 12 Level II points in total offered by the Departments of Economics and Commerce. These subjects to the value of not more than 12 points shall not include subjects in which a candidate has failed or from which a candidate has withdrawn.
- 5.7 Except with the permission of the Faculty, a candidate may not enrol in subjects to the value of more than 50 points taught by departments outside of the Faculty. These subjects shall not include subjects in which a candidate has failed or from which a candidate has withdrawn.
- 5.8 A graduate in another faculty who wishes to qualify for the Ordinary degree of Bachelor of Science in the Faculty of Mathematical and Computer Sciences and to count towards that degree subjects which have already been presented for another degree may do so providing such a candidate presents a range of subjects which fulfils the requirements of 5.2 above, including Level III subjects to the value of at least 24 points which have not been presented for any other degree.
- 5.9 No candidate will be permitted to count for the degree any subject together with any other subject which, in the opinion of the Faculty, contains a substantial amount of the same material; and no subject may be counted twice towards the degree. No candidate may present the same section of a subject in more than one subject for the degree.

5.10 Candidates who commenced their courses of study for the degree prior to 1989 may qualify for the degree by fulfilling the requirements of the regulations and schedules in force prior to 1989, with such modifications as the Faculty may deem necessary to take account of changes to subjects from 1989 onwards. Alternatively, candidates may complete their courses of study under present Specific Course Rules, with such modifications as the Faculty may deem necessary to ensure that subjects validly passed under previous regulations and schedules may be counted under the present Rules. For the purposes of this clause the following equivalences will be used:

subjects in schedules before 1989	equivalent points values
First year subject	6 points at Level I
First year half-subject	3 points at Level I
Second year subject	8 points at Level II
Second year half-subject	4 points at Level II
Third year subject	12 points at Level III
Third year half-subject	6 points at Level III

notes (not forming part of the Specific Course Rules)

- 1 Work required to complete the degree of Bachelor of Science in the Faculty of Mathematical and Computer Sciences.

To qualify for the degree:

- (a) students who have completed at another institution part of the equivalent of the requirements for the Adelaide degree of Bachelor of Science in the Faculty of Mathematical and Computer Sciences will be required as a minimum to complete Level III subjects from 4 with an aggregate points value of 24 including Mathematical and Computer Sciences subjects with an aggregate points value of 12.
- (b) with special permission of the Faculty, a student who has completed most of the subjects for the degree of Bachelor of Science in the Faculty of Mathematical and Computer Sciences at The University of Adelaide including Level III subjects with an aggregate points value of 12 may be permitted to complete the requirements for the degree at another institution.

All applications must be made in writing to the Registrar.

## 6 General: the Honours degree of Bachelor of Science (Mathematical and Computer Sciences)

6.1 A candidate may, subject to the approval of the Head of the Department concerned, proceed to the Honours degree in one of the following subjects, each with the value of twenty-four points:

code	subject title
------	---------------

3152	Honours Applied Mathematics (B.A. or B.Sc.)
------	---

3582	Honours Applied Mathematics (mid-year intake)
------	---

9102	Honours Applied Mathematics and Botany
------	--

5700	Honours Applied Mathematics and Genetics
------	--

9447	Honours Applied Mathematics and Statistics
------	--

5812	Honours Applied Maths and Stats (mid-year intake)
------	---

9401	Honours Applied Mathematics and Zoology
------	---

9750	Honours Computer Science
------	--------------------------

8162	Honours Computer Science (mid-year intake)
------	--

5782	Honours Computer Science and Pure Mathematics
------	---

5724	Honours Mathematical Physics
------	------------------------------

9582	Honours Philosophy and Pure Mathematics
------	---

6676	Honours Pure Mathematics (B.A. or B.Sc.)
------	--

4537	Honours Pure Mathematics (mid-year intake)
------	--

5174	Honours Pure and Applied Mathematics (B.A. or B.Sc.)
------	--

8126	Honours Pure and Applied Maths (mid-year intake)
------	--

2183	Honours Pure Mathematics and Statistics
------	---

6591	Honours Pure Maths/Statistics (mid-year intake)
------	---

1346	Honours Statistics (B.A or B.Sc.)
------	-----------------------------------

9294	Honours Statistics (mid-year intake)
------	--------------------------------------

6.2 A candidate may, subject to the approval of the Faculty in each case, proceed to the Honours degree in a subject taught in a department in

another faculty. Such candidates must consult the Head of the Department concerned and apply in writing to the Registrar for admission to the Honours course.

6.3 The work of the Honours course must be completed in one year of full-time study, save that on the recommendation of the Head of the Department concerned, the Faculty may permit a candidate to spread the work over two years, but no more, under such conditions as it may determine.

6.4 Unless granted permission to spread the work of the Honours course over two years under 6.3, a candidate for the Honours degree in any subject shall not begin Honours work in that subject until he/she has qualified for the Ordinary degree of Bachelor of Arts or Bachelor of Science (Mathematical and Computer Sciences) or Bachelor of Computer Science or Bachelor of Science or such other degree as may be acceptable to the Faculty. A candidate who has been granted permission to spread the work of the Honours course over two years must fulfil the requirements for the Ordinary degree before beginning the work of the second year of the Honours course.

6.5 A graduate who has obtained the Honours degree of Bachelor of Arts may not proceed to the Honours degree of Bachelor of Science in the same subject.

6.6 A graduate who has obtained the Ordinary degree of Bachelor of Arts and has fulfilled the requirements of 6 of the Degree of Bachelor of Science in the Faculty of Mathematical and Computer Sciences shall be awarded the Honours degree of Bachelor of Arts.

6.7 A candidate may not enrol a second time for the Honours course in the same subject if he/she:

- has already qualified for Honours in that subject; or
- has presented himself/herself for examination in that subject but has failed to obtain Honours; or
- has withdrawn from the course unless the Faculty under 3.1 permits re-enrolment.

## 7 Subjects of study for the Ordinary degree of Bachelor of Computer Science

notes: Syllabuses of subjects for the degree of B.Comp.Sc. in the Faculty of Mathematical and Computer Sciences are published below, immediately after these Specific Course Rules. For syllabuses of

subjects taught for other degrees and diplomas see the table of subjects at the end of the volume.

Students are advised that some subjects cannot be counted with others towards the degree of B.Comp.Sc. in the Faculty of Mathematical and Computer Sciences. A list of unacceptable combinations is available from the Faculty Office.

Notwithstanding the Specific Course Rules and syllabuses published in this volume, a number of the subjects listed in the course leading to the degree of B.Comp.Sc. in the Faculty of Mathematical and Computer Sciences may not be offered in 1996.

The availability of all subjects is conditional upon the availability of staff and facilities.

## 7.1 Level I subjects

### 7.1.1 Mathematical and Computer Sciences subjects

code	subject title	points
4003	Computer Applications I	3
9276	Computer Science I	6
6767	English as a Second Language (Ma. & Comp.Sc.)*	3
9134	Mathematical Applications I	3
9786	Mathematics I	6
3617	Mathematics IM	6
6918	Scientific Computing I	3
5543	Statistical Practice I	3

\* A quota will apply in 1996

### 7.1.2 Economics and Commerce subjects

6362	Commercial Law I(S)	3
4309	Economics IA	3
2076	Economics IB	3
4359	Financial Accounting IA	3
3086	Financial Accounting IB	3

## 7.2 Level II subjects

### 7.2.1 Mathematical and Computer Sciences subjects

Applied Mathematics		
7243	Differential Equations II	2
3096	Dynamic Modelling II	2
6649	Methods in Applied Mathematics II	2
7416	Operations Research II	2

Computer Science		
1956	Computer Systems	2
5132	Data Structures and Algorithms	2
3169	Database and Information Systems	2
3655	Numerical Methods	2
9877	Open Systems and Client/Server Computing	2
2430	Programming Paradigms	2
Pure Mathematics		
5807	Algebra II	2
2959	Complex Analysis II	2
1429	Discrete Mathematics II	2
7389	Real Analysis II	2
Statistics		
4107	Introduction to Mathematical Statistics II	2
1675	Statistical Modelling and Computation II	2
4523	Statistical Practice II	2
8878	Theory of Statistics II	2
Other Mathematical and Computer Sciences		
9595	Mathematics IIM	4
7.2.2 Commerce subjects		
4190	Business Finance II	4
1282	Commercial Law II	4
7651	Financial Accounting II	4
4807	Management and Organisations II	4
1383	Management Accounting II	4
5312	Marketing II	4
7.2.3 Law subjects		
3131	Contract*	4
6019	Law and Legal Practice*	4
* These subjects are available only to students who have been accepted for candidature to the degree of Bachelor of Laws.		
7.3 Level III subjects		
1496	Communication Skills	2
9823	Industry Practicum (Mathematical & Computer Sciences)	2

**7.3.1 Mathematical and Computer Sciences subjects**

Applied Mathematics	
4447 Applied Probability III	2
1322 Computational Mathematics III	2
9787 Differential Equations III	2
2368 Elasticity III	2
1733 Hydrodynamics III	2
2506 Mathematical Biology III	2
2039 Mathematical Programming III	2
9482 Mathematics of Finance III	2
2314 Optimisation III	2
2208 Random Processes III	2
6128 Variational Methods and Optimal Control III	2
Computer Science	
9811 Advanced Programming Paradigms	2
6378 Artificial Intelligence	2
1234 Compiler Construction and Project	3
5141 Computer Architecture	2
2328 Computer Networks and Applications	2
3007 Knowledge Representation	2
9820 Numerical Analysis	2
4468 Operating Systems	2
2382 Programming Techniques	2
6263 Software Engineering and Project	3
1116 Systems Analysis	2
Pure Mathematics	
6848 Analysis and Topology III	2
4102 Geometry of Surfaces III	2
1273 Groups III	2
1845 Integration III	2
5780 Logic III	2
9482 Mathematics of Finance III	2
3401 Number Theory III	2
3786 Projective Geometry III	2
6508 Rings, Fields and Matrices III	2
3874 Topics in Geometry III	2

Statistics	
9800 Experimental Design III	2
1411 Life Contingencies III	2
8892 Medical Statistics III	2
5030 Multivariate Analysis III	2
8387 Non-parametric Methods III	2
4853 Sampling Theory and Practice III	2
3989 Statistical Modelling III	3
2993 Statistics for Quality Improvement III	2
7113 Theory of Statistics III	3
5675 Time Series III	2

**7.3.2.Commerce subjects**

4196 Accounting Theory III	4
7440 Auditing III	4
5685 Corporate Accounting III	4
5473 Income Tax Law III	4
9790 Management Accounting IIIB	4
9759 Management and Organisations III	4
9885 Marketing III	4

**7.3.3.Law subjects**

8433 Constitutional Law	6
8580 Criminal Law	6
8821 Property	6
9365 Torts	6

**8 The Ordinary degree of Bachelor of Computer Science**

**8.1** The course of study for the Ordinary degree of B.Comp.Sc. shall extend over three years of full time study or the equivalent.

**8.2** To qualify for the Ordinary degree a candidate shall, subject to 8.4 below, present passes in subjects from 7 to the value of at least 72 points including:

- (a) at least 24 points for Level I subjects;
- (b) at least 20 points for Level II subjects;
- (c) at least 24 points for Level III subjects.

**8.3** The subjects presented must include:

- (a) Either 9786 Mathematics I or both 3617 Mathematics IM and 9595 Mathematics IIM for the degree subject to:
  - (i) A candidate shall obtain a Pass Division I standard or higher in either 9786 Mathematics I or 9595 Mathematics IIM and

- (ii) A candidate shall not present both 9786 Mathematics I and 9595 Mathematics IIM for the degree;
- (b) 9276 Computer Science I;
- (c) All of 5132 Data Structures and Algorithms, 1956 Computer Systems, 2430 Programming Paradigms, and 3169 Database and Information Systems;
- (d) At least 4 points of Level II Mathematical and Computer Sciences subjects in addition to those from (c) and in addition to 9595 Mathematics IIM if presented;
- (e) At least 20 points of Level II subjects other than 9595 Mathematics IIM if 9595 Mathematics IIM is presented;
- (f) All of 1496 Communications Skills, 2382 Programming Techniques, 6263 Software Engineering and Project, 4468 Operating Systems, and 2328 Computer Networks and Applications;
- (g) At least 2 points of Level III Computer Science subjects in addition to those from (f).

notes (not forming part of the Specific Course Rules)

A candidate who obtains a Pass Division II in 9786 Mathematics I may fulfill the requirements of 8 for the degree by obtaining a Pass Division I in 9595 Mathematics IIM but Mathematics IIM shall not count toward the degree.

- 8.4 A candidate may present for the degree subjects passed at the conceded pass level within the following limits: Level II and/or Level III subjects with an aggregate points value of not more than 6 provided that no subject thus presented has a points value of more than 3.
- 8.5 Except with the permission of the Faculty, a candidate may not enrol in subjects to the value of more than 18 points taught by departments outside the Faculty before obtaining at least a Division I pass in 9276 Computer Science I and either 9786 Mathematics I or 3617 Mathematics IM. The subjects to the value of not more than 18 points shall not include subjects in which a candidate has failed or subjects from which a candidate has withdrawn.
- 8.6 A graduate in another faculty who wishes to qualify for the Ordinary degree of Bachelor of Computer Science and to count towards that degree subjects which have already been presented for another degree may do so providing such a candidate presents a range of subjects which fulfils the requirements of 8.2

and 8.3 above, including Level III subjects to the value of at least 24 points which have not been presented for any other degree.

- 8.7 No candidate will be permitted to count for the degree any subject together with any other subject which, in the opinion of the Faculty, contains a substantial amount of the same material; and no subject may be counted twice towards the same degree. No candidate may present the same section of a subject in more than one subject for the degree.

notes (not forming part of the Specific Course Rules)

- 1 Work required to complete the degree of Bachelor of Computer Science.

To qualify for the degree:

- (a) students who have completed at another institution part of the equivalent of the requirements for the Adelaide degree of Bachelor of Computer Science will be required as a minimum to complete Level III subjects from 7 with an aggregate points value of 24 satisfying the requirements of 8.3(f) and 8.3 (g).
- (b) with special permission of the Faculty, a student who has completed most of the subjects for the degree of Bachelor of Computer Science at The University of Adelaide including Level III subjects with an aggregate points value of 12 may be permitted to complete the requirements for the degree at another institution.

All applications must be made in writing to the Registrar.

## Syllabuses

---

### textbooks

Information on appropriate textbooks will be provided by the Department concerned, and at the preliminary lecture in Orientation Week.

In general, students are expected to have their own copies of text-books but they are advised to await advice from the lecturer concerned before buying any particular book. Only the prescribed edition of any text-book should be bought.

### reference books

Although lists of books and journals for reference purposes are regarded as important, details have not been included in this Volume. These will however be issued from time to time by the departments concerned. It is hoped that all books and journals set for reference will be available to be consulted in the Barr Smith Library.

### examinations

For each subject students may obtain from the department concerned details of the examination in that subject including the relative weights given to the components (eg such of the following as are relevant: assessments, semester tests, essays or other written or practical work, final written examinations, *viva voce* examinations).

### 6767 English as a Second Language (Ma. & Comp.Sc.)

level: I points value: 3 duration: semester 1

availability: subject to staff availability

restriction: This subject is available only to students whose native language is not English.

Students eligible to enrol are:

- 1 Students resident in Australia whose admission was based on Year 12 or matriculation studies in a language other than English.
- 2 Students resident in Australia who were eligible to take an ESL unit in Year 11 or Year 12.
- 3 International students from language backgrounds other than English who presented an English language score (IELTS or TOEFL) for admission, or who entered via a Foundation Studies Program.

assumed knowledge: Background suitable for study of all the subjects 9276 Computer Science I, 9134 Mathematical Applications I, 5543 Statistical Practice I

corequisites: at least one of 9276 Computer Science I, 9134 Mathematical Applications I, 5543 Statistical Practice I, or a comparable subject acceptable to the coordinating department.

contact hours: 1 lecture and 2 hours of tutorials per week

content: The subject provides further language development in English as a second language for the purposes of study and communication in the context of Information Science. It introduces basic linguistic principles as tools to assist communication in English as a second language and in cross-cultural settings. Class work is designed to develop the capacity of students for communication (in speaking, listening, writing and reading) relevant to their studies and is closely linked to the language needs of three typical subjects (Computer Science I, Statistics I and Mathematical Applications I). Aspects covered will include: translating between ordinary spoken or written English and the formalism of computing and mathematics; interpreting and answering questions; developing, analysing and communicating arguments.

assessment: approximately 30 % for each of a 2 hour written exam and two major assignments and 10% for tutorial participation and regular weekly work.

### 9823 Industry Practicum (Maths. & Comp. Sc.)

level: III points value: 2 duration: semester 2

restriction: This subject is available only to students who are undertaking a CEED Project in their Honours year.

content: This subject provides students with the research tools required to undertake an industrial related project. Topics include research design and documentation, project planning and time management, costing and budgeting, quality assurance. An industry linked project will be commenced.

### Applied Mathematics and Pure Mathematics

#### Level I

---

### 9134 Mathematical Applications I

level: I points value: 3 duration: semester 2

This subject is especially recommended for students who intend to take studies in any of Statistics, Computer Science or Operations Research at Level II or higher.

*assumed knowledge:* Knowledge such as that obtained by taking 9786 Mathematics I or 3617 Mathematics IM in parallel with this subject; alternatively, a knowledge of 9595 Mathematics IIM.

*contact hours:* 4 lectures, 1 tutorial, and 1 hour computing laboratory session a week

*content:* This subject includes Discrete Mathematics (about sixteen lectures), Probability (about sixteen lectures) and two further topics to be chosen from: Dynamical systems (planetary motion, nonlinear systems, chaos and attractors); applications of mathematical modelling in economic theory, commerce and industry; the use of matrices and probability in game theory; cryptography.

*assessment:* Primarily on a 3 hour exam with a percentage based on class exercises and computing work.

### 9786 Mathematics I

*level:* I    *points value:* 6    *duration:* full year

*prerequisite knowledge:* SACE Stage 2 Mathematics I & II

*contact hours:* 4 lectures and 2 tutorials a week: some tutorials will be computing tutorials using mathematical packages (Matrix and Maple)

*content:* Calculus: Functions of one and more than one variable, differentiation and integration. Taylor series and differential equations. Algebra: Linear equations, matrices, the vector space  $\mathbb{R}^n$ , determinants, convex sets and optimisation, eigenvalues and eigenvectors, linear transformations.

*assessment:* 3 hour exams at the end of each semester

In addition, a small percentage is allocated to weekly assignments.

### 3617 Mathematics IM

*level:* I    *points value:* 6.    *duration:* full year

*prerequisite knowledge:* SACE Stage 2 Mathematics I

*restriction:* Students who have obtained a combined (subject achievement) score of 34 for Mathematics I & II at stage 2 of the SACE (or the equivalent) may not enrol in Mathematics IM.

*contact hours:* 4 lectures and 2 tutorials a week

Some of the tutorial hours will be computing laboratory sessions, using mathematical packages (Matrix and Maple).

*content:* Calculus: Differential and integral calculus with applications; differential equations; functions of two real variables; Algebra: vectors, linear equations and matrices, determinants, eigenvalues; applications

of linear algebra; optimisation.

*assessment:* There will be a three hour exam at the end of each semester. A small percentage will be based on weekly assignments.

### 4357 Mathematics IH

*level:* I    *points value:* 3    *duration:* semester 1

*restriction:* not available for students in the B.Sc.(Ma. & Comp.Sc.) or B.Comp.Sc. courses

*prerequisite knowledge:* SACE Stage 2 Mathematics I

*contact hours:* 4 lectures and 2 tutorials a week

Some tutorials will be computing tutorials using a mathematical package (Matrix).

*content:* Differential and integral calculus, differential equations, vectors, linear equations, matrices and determinants, applications of linear algebra.

*assessment:* 1 three hour final exam

A small percentage will be based on weekly assignments.

### 4425 Quantitative Methods Using Computers I

*level:* I    *points value:* 3    *duration:* semester 1

*assumed knowledge:* no mathematical or computing knowledge assumed.

*restriction:* a Level I subject designed for Arts students, not to be counted towards any degree with either Mathematics I or IM.

*contact hours:* 2 lectures and one 2 hour practical per week.

*content:* This subject will introduce students to some of the ways the computer is used in the acquisition, production and presentation of information. The course will introduce students to word processing, spreadsheets, electronic mail and databases. The first half of the course will include a hands-on introduction to word processing and the use of electronic mail for the transfer of information, including bibliographic searches, and communication between staff and students. The second half of the course will consider spreadsheets and concentrate on two of their many uses: the analysis and presentation of numerical information by graphs, tables and charts, and the creation and manipulation of databases.

NOTE: This subject does not assume material from any of the PES Matriculation Mathematics subjects, nor any prior computer experience.

*assessment:* to be determined, in consultation with students, at the beginning of lectures.

## Level II

---

### 9595 Mathematics IIM

*level:* II *points value:* 4 *duration:* semester 1 or 2

*prerequisites:* 3617 Mathematics IM (Pass Div I); or 9786 Mathematics I (Pass Div II)

*restriction:* Cannot be counted towards a degree together with 9786 Mathematics I. See the Specific Course Rules for the constraints on this subject within the B.Sc.(Ma. & Comp. Sc.) and B.Comp.Sc. degrees.

Except in exceptional circumstances, students will only be eligible to enrol in Mathematics IIM in semester 2 if they have previously attempted the subject. Semester 2 availability will also be dependent on sufficient student numbers.

*contact hours:* 4 lectures and 2 tutorials per week

Some tutorials will be computing tutorials.

*content:* Sequences, Taylor Series, limits, continuity, Rolle's theorem, mean value theorem, mathematical induction, inequalities, the real vector space, linear transformations and orthogonal similarity.

*assessment:* 1 three hour exam plus a small percentage for assignments

## Level III

---

### 9482 Mathematics of Finance III

*level:* III *points value:* 2 *duration:* semester 1

*prerequisite:* 9786 Mathematics I (Pass Div I) or 9595 Mathematics IIM (Pass Div I)

*contact hours:* 2 lectures per week plus 1 hour tutorial and 1 hour practical every 3 weeks

*content:* Difference equations. Theory of interest rates. Annuities. Cash flows. Valuation of securities. Capital gains tax. Consumer credit. Stochastic interest rate models.

*assessment:* one 3 hour exam plus a small percentage for assignments

## Applied Mathematics and Statistics

### Level II

---

### 4569 Laplace Transforms and Probability and Statistical Methods

*syllabus details:* see Bachelor of Engineering

## Combined Honours Courses

---

Combined Honours courses are available in the following six subjects:

### 5174 Honours Pure and Applied Mathematics (B.A. or B.Sc.)

*level:* IV *points value:* 24 *duration:* full year

*content:* Prospective students should consult the two Departments early in the year to obtain advice as to the specific content of the subject.

### 9102 Honours Applied Mathematics and Botany

*level:* IV *points value:* 24 *duration:* full year

*prerequisites:* Level III Applied Mathematics subjects at Credit standard, or better, with an aggregate points value of at least 6; and Level III Botany subjects with an aggregate points value of 6 points.

*assessment:* Assessment will be a mixture of some or all of: thesis, essays and exams

### 5700 Honours Applied Mathematics and Genetics

*level:* IV *points value:* 24 *duration:* full year

*prerequisites:* Level III Applied Mathematics subjects at Credit standard, or better, with an aggregate points value of at least 6; and Level III Genetics subjects with an aggregate points value of 6 points.

*assessment:* Assessment will be a mixture of some or all of: thesis, essays and exams.

### 9447 Honours Applied Mathematics and Statistics

*level:* IV *points:* 24 *duration:* full year

*prerequisite:* Credit standard, or better, in at least 8 points of Applied Mathematics III subjects and 8 points of Statistics III subjects.

*content:* Candidates are required to present a project that will constitute about 20% of the final assessment. The project will involve interdisciplinary work at the interface of Statistics and Applied Mathematics.

The student's project will be jointly supervised by members of both the Statistics and the Applied Mathematics Departments.

The remainder of the course will consist of (at least) eight Honours mathematics and statistics subjects.

Candidates should consult potential supervisors and Heads of both Departments during the final year of the Ordinary Degree course. The honours course commences at the beginning of February.

*assessment:* project 20%, Honours Applied Mathematics and Statistics subjects 80% (assessed by three hour exam).

### 9401 Honours Applied Mathematics and Zoology

*level:* IV *points value:* 24 *duration:* full year

*prerequisites:* Level III Applied Mathematics subjects at Credit standard or better with an aggregate points value of at least 6; and Level III Zoology subjects with an aggregate points value of 6 points.

*assessment:* Assessment will be a mixture of some or all of: thesis, essays and exams.

### 2183 Honours Pure Mathematics and Statistics

*level:* IV *points:* 24 *duration:* full year

*prerequisite:* Credit standard, or better, in at least 8 points of Pure Mathematics III Units and 8 points of Statistics III Units.

*content:* Candidates are required to present a project that will constitute about 20% of the final assessment. The project will involve interdisciplinary work at the interface of Statistics and Pure Mathematics.

The student's project will be jointly supervised by members of both Statistics and Pure Mathematics Departments.

The remainder of the course will consist of (at least) eight Honours mathematics and statistics courses.

Candidates should consult potential supervisors and Heads of both Departments during the final year of the Ordinary Degree course. The honours course commences at the beginning of February.

*assessment:* project 20%, Honours Pure Mathematics and Statistics Units 80% (assessed by three hour exam).

## Applied Mathematics

### Level I

#### 6918 Scientific Computing I

*level:* 1 *points value:* 3 *duration:* semester 1

*prerequisite:* SACE Stage 2 Mathematics 1 or equivalent knowledge

*contact hours:* 3 lectures and 3 hours practical per week

*content:* the course introduces aspects of computing useful in scientific applications. Introduction to Unix, text-editing using 'vi', programming in C, using

Macintosh computers. Spreadsheets (Excel): their use for graphing, data management and solving mathematical problems. Simulation modelling: concepts, Monte Carlo simulation, modelling examples using both spreadsheets and C.

*assessment:* 2 hour exam, projects and exercises

### Level II

Four Level II subjects offered by the Department are available to students. These subjects provide an introduction to the application of mathematics in a number of fields, and also provide a service role to students requiring knowledge of applicable mathematics for other subject areas. Students are advised to consult also the Level III subject offerings to ensure that their subject choices at Level II provide them with suitable assumed knowledge for their future program of study.

Students taking Level II subjects in Applied Mathematics are encouraged to obtain some knowledge of computer programming beforehand, eg via 6918 Scientific Computing I, any of the Level I subjects offered by the Department of Computer Science or via 5729 Engineering Computing I. Students who do not possess such prior computing knowledge should consult the Department to obtain advice about the materials and special assistance which will be made available to enable them to attain an adequate knowledge of computer programming.

The following pairs of subjects cannot both be counted towards a degree:

- 6649 Methods in Applied Mathematics II and 2187 Vector Analysis and Complex Analysis
- 7416 Operations Research II and 1642 Linear Programming and Numerical Analysis
- 7243 Differential Equations II and 1016 Differential Equations and Fourier Series E.

note: the subjects 2187 Vector Analysis and Complex Analysis and 1016 Differential Equations and Fourier Series E are not Mathematical Science subjects. However, students with valid reasons, such as timetable clashes, may apply to the Head of the Department of Applied Mathematics to take 2187 Vector Analysis and Complex Analysis in place of 6649 Methods in Applied Mathematics II and/or 1016 Differential Equations and Fourier Series E instead of 7243 Differential Equations II.

#### 7243 Differential Equations II

*level:* II *points value:* 2 *duration:* semester 1

*prerequisites:* 9786 Mathematics I (Pass Div I) or both 3617 Mathematics IM (Pass Div I) and a corequisite of 9595 Mathematics IIM

note: Students with 9786 Mathematics I (Pass Div II) are permitted to enrol in this subject provided they are concurrently enrolled in 9595 Mathematics IIM.

*contact hours:* 2 lectures per week plus 1 tutorial and 1 hour practical per fortnight

*content:* Ordinary differential equations: First order, second order, series solutions. Fourier series for functions of arbitrary period, half range expansions, even and odd functions, complex form of Fourier series. Partial differential equations: heat equation, separation of variables, wave equation, Laplace's equation. Applications in boundary value problems.

*assessment:* final exam. A small percentage will be allocated to class exercises and computing. A satisfactory performance in computing exercises is necessary for a pass in this subject.

### 1016 Differential Equations and Fourier Series E

*syllabus details:* see Bachelor of Engineering

### 7416 Operations Research II

*level:* II     *points value:* 2     *duration:* semester 2

*prerequisites:* 9786 Mathematics I (Pass Div I); or 9595 Mathematics IIM (Pass Div I)

*assumed knowledge:* A knowledge of Laplace Transforms such as could be obtained from 6649 Methods in Applied Mathematics II.

*contact hours:* 2 lectures per week plus 1 tutorial and 1 hour practical per fortnight

It is recommended that students intending to enrol in this subject take 9134 Mathematical Applications I at Level I.

*content:* Probability and Applications: Formulation and solution of probability problems in applications. Includes topics from: gambler's ruin, dimensioning teletraffic networks, epidemic modelling, economic applications. Linear Programming: Simplex algorithm, phase II and phase I duality theory and complementary slackness, interpretation of dual variables, sensitivity analysis.

*assessment:* final exam

A small percentage will be allocated to class exercises and computing. A satisfactory performance in computing exercises is necessary for a pass in this subject.

### 3096 Dynamic Modelling II

*level:* II (or II/III within B. Inf Sc.)

*points value:* 2     *duration:* semester 2

*prerequisite:* 9786 Mathematics I (Pass Div I) or 9595 Mathematics IIM (Pass Div I)

*assumed knowledge:* 7243 Differential Equations II

*contact hours:* 2 lectures per week plus one tutorial and one hour practical per fortnight

*content:* Dynamical systems in mechanics and biology: state space, equilibria, stability, periodic behaviour, chaos and optimal control. Continuum mechanics: basic laws of continuum mechanics, one-dimensional continuum mechanics in car traffic, morphogenesis, gas dynamics, elasticity, blood flow, introduction to analysis of stress and strain in solid and fluid mechanics.

*assessment:* final exam

A small percentage will be allocated to class exercises and computing. A satisfactory performance in computing exercises is necessary for a pass in this subject.

### 1642 Linear Programming and Numerical Analysis

*syllabus details:* see Bachelor of Engineering

### 2187 Vector Analysis and Complex Analysis

*syllabus details:* see Bachelor of Engineering

### 6649 Methods in Applied Mathematics II

*level:* II (or II/III within B.Inf Sc.)

*points value:* 2     *duration:* semester 1

*prerequisites:* 9786 Mathematics I (Pass Div I) or both 3617 Mathematics IM (Pass Div I) and a corequisite of 9595 Mathematics IIM

*note:* Students with 9786 Mathematics I (Pass Div II) are permitted to enrol in this subject provided they are concurrently enrolled in 9595 Mathematics IIM.

*assumed knowledge:* concurrent (or prior) enrolment in 7243 Differential Equations II

*contact hours:* 2 lectures per week plus 1 tutorial and 1 hour practical per fortnight

*content:* Vector calculus: Vector fields, gradient, divergence and curl. Line, surface and volume integrals, integral theorems of Green, Gauss and Stokes, with applications. Orthogonal curvilinear coordinates. Transforms: Laplace transforms applied to the solution of differential and integral equations, convolutions.

*assessment:* final exam

A small percentage will be allocated to class exercises and computing. A satisfactory performance in computing exercises is necessary for a pass in this subject.

### Level III

The subjects offered by the Department at Level III cover a large range of applications of mathematics, as well as offering an introduction to various more advanced mathematical methods. To qualify for a major in Applied Mathematics, a student must present passes (not Conceded Passes) in Level III subjects offered by the Department of Applied Mathematics to the value of at least ten points.

Knowledge obtained from certain Level II subjects is assumed for each Level III subject. Students who do not have this assumed knowledge as indicated in the syllabus entries should consult the Department of Applied Mathematics before completing their enrolment. Intending honours students are referred to the statement on pre-requisites listed under the subject 3152 Honours Applied Mathematics (B.A. or B.Sc.).

#### 4447 Applied Probability III

*level:* III *points value:* 2 *duration:* semester 1

*prerequisites:* 9786 Mathematics I (Pass Div I); or 9595 Mathematics IIM (Pass Div I)

*assumed knowledge:* 7416 Operations Research II

*contact hours:* 2 lectures per week plus 1 tutorial and two hours practical per 3 weeks

*content:* Markov chains: recurrence and transience, minimality properties, discrete renewal theorem, global and partial balance equations, reversibility. Kolmogorov criterion, potentials.

*assessment:* final exam

A small percentage may be allocated to class and/or computing exercises.

#### 6128 Variational Methods and Optimal Control III

*level:* III *points value:* 2 *duration:* semester 2

*prerequisites:* 9786 Mathematics I (Pass Div I); or 9595 Mathematics IIM (Pass Div I)

*assumed knowledge:* 7243 Differential Equations II or 1016 Differential Equations and Fourier Series E

*contact hours:* 2 lectures per week plus 1 tutorial and 2 hours practical per 3 weeks

*content:* Topics selected from:

- 1 Classical Theory: Euler Lagrange equations, constrained extrema and Lagrange multipliers, in one and several variables. Applications to mechanics. Hamiltonian formulation.
- 2 Optimal Control: Pontryagin maximum principle and applications to optimal control. Bang-Bang controls. Applications to economics.

- 3 Numerical Methods: Introduction to finite element methods for finding approximate solution to partial differential equations.

*assessment:* final exam

A small percentage may be allocated to class and/or computing exercises.

#### 1322 Computational Mathematics III

*level:* III *points value:* 2 *duration:* semester 1

*prerequisites:* 9786 Mathematics I (Pass Div I) or 9595 Mathematics IIM (Pass Div I)

*assumed knowledge:* 7243 Differential Equations II or 1016 Differential Equations and Fourier Series E

*contact hours:* 2 lectures per week plus 1 tutorial and 2 hours practical per 3 weeks

*content:* Topics selected from: Inversion of large sparse matrices. Numerical solution of nonlinear algebraic equations. Numerical solution of ordinary differential equations, initial value problems, boundary value problems. Partial differential equations: finite differences, methods of lines, finite element, boundary element and spectral methods. Numerical integration. Numerical solution of integral equations. Symbolic computation. Super-computing.

*assessment:* final exam

A small percentage may be allocated to class and/or computing exercises.

#### 9787 Differential Equations III

*level:* III *points value:* 2 *duration:* semester 1

*prerequisites:* 9786 Mathematics I (Pass Div I); or 9595 Mathematics IIM (Pass Div I)

*assumed knowledge:* both 7243 Differential Equations II or 1016 Differential Equations and Fourier Series E and 2187 Vector Analysis and Complex Analysis or 6649 Methods in Applied Mathematics II

*contact hours:* 2 lectures per week and 1 tutorial and 2 hours practical per 3 weeks

*content:* A selection of topics from: Existence and uniqueness. Critical points and stability theory. Analysis of linear systems. Sturm-Liouville theory. Eigenfunction expansions. Integral equations. Partial differential equations. Asymptotic expansions.

*assessment:* final exam

A small percentage may be allocated to class and/or computing exercises.

#### 2368 Elasticity III

*level:* III *points value:* 2 *duration:* semester 1

*prerequisites:* 9786 Mathematics I (Pass Div I); or 9595 Mathematics IIM (Pass Div I)

*assumed knowledge:* both 7243 Differential Equations II or 1016 Differential Equations and Fourier Series E and 2187 Vector Analysis and Complex Analysis or 6649 Methods of Applied Mathematics II

*contact hours:* 2 lectures per week and 1 tutorial and 2 hours practical per 3 weeks

*content:* An introduction to metric tensor, analysis of stress and strain, stress-strain relations for elastic materials, plane and three dimensional boundary value problems.

*assessment:* final exam

A small percentage may be allocated to class and/or computing exercises.

### 1733 Hydrodynamics III

*level:* III *points value:* 2 *duration:* semester 2

*prerequisites:* 9786 Mathematics I (Pass Div I); or 9595 Mathematics IIM (Pass Div I)

*assumed knowledge:* Both 7243 Differential Equations II or 1016 Differential Equations and Fourier Series E and 2187 Vector Analysis and Complex Analysis or 6649 Methods of Applied Mathematics II

*contact hours:* 2 lectures per week and 1 tutorial every 3 weeks and 2 hours practical per 3 weeks

*content:* Classical hydrodynamics of an inviscid fluid. Bernoulli theorem. Irrotational flows. Introduction to viscous flows.

*assessment:* final exam

A small percentage may be allocated to class and/or computing exercises.

### 2506 Mathematical Biology III

*level:* III *points value:* 2 *duration:* semester 2

*prerequisites:* 9786 Mathematics I (Pass Div I); or 9595 Mathematics IIM (Pass Div I)

*assumed knowledge:* 7243 Differential Equations II or 1016 Differential Equations and Fourier Series E

*contact hours:* 2 weekly lectures and 1 tutorial and 2 hours practical per 3 weeks

*content:* A survey of applications of mathematics to various biological science problem areas. Topics from: epidemics, genetics, evolution, enzyme kinetics, diffusion, cardiovascular system, compartmental analysis, drug distribution problems, biological fluid dynamics, plant and animal behaviour, pollination ecology, population dynamics, population extinction, community ecology.

*assessment:* final exam

A small percentage may be allocated to class and/or computing exercises.

### 2039 Mathematical Programming III

*level:* III *points value:* 2 *duration:* semester 2

*prerequisites:* 9786 Mathematics I (Pass Div I); or 9595 Mathematics IIM (Pass Div I)

*assumed knowledge:* 1642 Linear Programming and Numerical Analysis or 7416 Operations Research II

*contact hours:* 2 lectures per week and 1 tutorial and 2 hours practical per 3 weeks

*content:* A selection of topics from: advanced linear programming, network theory, integer programming, dynamic programming and applications.

*assessment:* final exam

A small percentage may be allocated to class and/or computing exercises.

### 2314 Optimisation III

*level:* III *points value:* 2 *duration:* semester 1

*prerequisites:* 9786 Mathematics I (Pass Div I); or 9595 Mathematics IIM (Pass Div I)

*assumed knowledge:* 1642 Linear Programming and Numerical Analysis or 7416 Operations Research II

*contact hours:* 2 lectures per week and 1 tutorial and 2 hours practical per 3 weeks

*content:* Single and multi-variable optimisation, search and gradient methods. Kuhn-Tucker theory for constrained optimisation: algorithms and applications.

*assessment:* final exam

A small percentage may be allocated to class and/or computing exercises.

### 2208 Random Processes III

*level:* III *points value:* 2 *duration:* semester 2

*prerequisites:* 9786 Mathematics I (Pass Div I); or 9595 Mathematics IIM (Pass Div I)

*assumed knowledge:* 7416 Operations Research II

*contact hours:* 2 lectures per week and 1 tutorial and 2 hours practical per 3 weeks

*content:* Continuous-time Markov processes. The nonhomogeneous Poisson Process. Reversing Markov processes with examples from queuing theory. Methods of phases. Supplementary variable method. Renewal theory.

*assessment:* final exam

A small percentage may be allocated to class and/or computing exercises.

### 9482 Mathematics of Finance III

*syllabus details:* see Applied and Pure Mathematics Level III

## Honours Level

---

### 3152 Honours Applied Mathematics (B.A. or B.Sc.)

*level:* IV    *points value:* 24    *duration:* full year

Students who are considering taking this subject are advised to see the Head of the Department as soon as possible, preferably before enrolling for their Level III subjects.

All students are required to obtain the approval of the Department of Applied Mathematics before enrolling for 3152 Honours Applied Mathematics (B.A. or B.Sc.).

*prerequisites:* Level III Applied Mathematics subjects with an aggregate points value of at least eight at an average of credit standard or better.

Students with a different background of Level III subjects or third-year subjects may be accepted at the discretion of the Head of the Department of Applied Mathematics.

*content:* The lecture program will be determined from year to year. Students will be required to make a selection from topics offered by the Departments of Applied Mathematics, Pure Mathematics, Statistics, Computer Science, Physics and Mathematical Physics at The University of Adelaide, the Schools of Information Science and Technology and Earth Sciences at The Flinders University of South Australia and such other departments as may be agreed to by the Department of Applied Mathematics. It is possible for students to take some appropriate Level III Applied Mathematics subjects which have not already been taken.

A candidate may apply to the Head of Department for permission, under certain circumstances, to spread the work for the Honours degree over two years.

Each student will be assigned a supervisor who will advise on and approve the choice of lecture program and give guidance in the writing of a project on some topic in Applied Mathematics. Possible topics should be discussed with the staff before the end of the preceding year. Work on the chosen project should begin in the Department in the first week of February and should be completed by the end of the second semester's lecture program.

*assessment:* For topics offered by the Department of Applied Mathematics there will be a three-hour exam at the end of the semester in which the subject is offered (unless other arrangements are notified). The project also contributes to the final result.

### Recommended program for teachers or prospective teachers

The Department of Applied Mathematics offers an optional Recommended Program for Teachers or Prospective Teachers within 3152 Honours Applied Mathematics. The offering of this Program each year depends upon the availability of staff. It normally consists of a selection of options, some of which have been specially designed for the purposes of the Program. Students taking the whole of this Program may be permitted to replace the project normally required by two minor projects on topics appropriate to the Program. The Program is recommended in particular to potential secondary mathematics teacher.

Some options within the Recommended Program for Teachers or Prospective Teachers will be available to suitably qualified secondary mathematics teachers who wish to attend as Visiting Students.

*note:* For other possible Honours combinations, please refer to page 780.

## Computer Science

### Level I

---

#### 9276 Computer Science I

*level:* I    *points value:* 6    *duration:* full year

*assumed knowledge:* SACE Stage 2 Mathematics I

*restriction:* cannot be counted towards a degree together with 1073 Programming and Applications I or 7780 Computational Methods I

*contact hours:* 3 lectures, 1 hour of tutorials and 3 hours of practical work per week

*content:* Introduction to UNIX; introduction to applications: spreadsheets, document preparation; algorithm design and problem solving; syntax; semantics; Ada programming; constants, variables, basic types, subtypes, derived types, arrays, records, files, input, output, assignment, selection, repetition, procedures, functions, packages and exceptions; introduction to software engineering; debugging. Computer Systems: correctness and complexity of simple algorithms; NP-completeness; computability; invariants; termination. CPU, memory, I/O, assembly language, binary data representation, CPU register transfer level model, memory hierarchy, I/O devices, I/O control, operating systems, file systems, resource management, compilers, linkers, loaders, utilities, job control languages.

*assessment:* 2 hour exam at the end of each semester

Students are required to attend a minimum number of practicals and tutorials, and perform satisfactorily in practical tests.

### 4003 Computer Applications I

level: I points value: 3 duration: semester 2

*prerequisites:* SACE Stage 2 Mathematics I or equivalent knowledge

*restrictions:* Cannot be counted towards a degree together with 9894 Computer Literacy I or 4425 Quantitative Methods Using Computers I.

*contact hours:* 3 lectures per week, 3 hours practical per week and 1 tutorial per fortnight

*content:* This subject aims to provide students with an understanding of the use of computers as tools, treating computer applications from the user's perspective. It provides a basis for proficiency in use of computer-based tools in technical domains. It also provides a context for design of application software for students continuing in computer science.

Topics covered - Introduction: brief history of computer applications, overview of computer systems organisation. Operating systems: overview, file systems, command languages, utilities, graphical user interfaces. Document preparation: text editing, work processing, images, revision tracking and version control, hypertext and multimedia. Databases: introduction to database structures, tools, schema, queries, report generation, application-specific databases. Spreadsheets: concepts and techniques, financial applications, graphing. Networks: network physical and logical overview, tools and applications, distributed systems, authentication, security. Embedded computers: aspects of control, reliability, safety. Future directions: trends and projections.

*assessment:* 50% by written examination and 50% for practical and tutorial work

### 9894 Computer Literacy I

level: I points value: 3 duration: semester 2

*restriction:* Not available for students in the B.Sc.(Ma. & Comp.Sc.) or B.Comp.Sc. courses. Cannot be counted towards a degree together with 4003 Computer Applications I.

*contact hours:* 3 lectures and 1 practical per week

*content:* Hardware and Software fundamentals. Essential applications - working with words, calculation, visualisation and simulation, database applications, telecommunication and networking. Mastering computers - graphics, hypermedia, multimedia, artificial intelligence. Systems design and analysis. The information age - OH&S issues, computers at work, computer security and risks, purchasing computers.

*assessment:* 50% formal written and/or practical examination and 50% ongoing assessment of practical and written assignments.

## Level II

It is recommended that students intending to enrol in Level II Computer Science subjects take 9134 Mathematical Applications I and 4003 Computer Applications I at Level I

### 5132 Data Structures and Algorithms

level: II points value: 2 duration: semester 1

*prerequisites:* a Pass Div I in 9276 Computer Science I as a prerequisite, or 9492 Computer Science Concepts as a corequisite

*assumed knowledge:* 9786 Mathematics I or 3617 Mathematics IM

*contact hours:* 2 lectures and 2 hours of practical work a week, plus 1 tutorial a fortnight

*content:* Records, sets, general files; program development techniques including basic ideas of correctness; stacks and queues; dynamic storage; pointers; linked lists; representation of stacks and queues, general list operations.

Notions of complexity and analysis; notion of abstract data type; sets and sequences as examples; searching and information retrieval illustrated with a 'table' abstract data type; various representations of a 'table' abstract data type; recursion.

*assessment:* 2 hour written exam and programming exercises

### 2430 Programming Paradigms

level: II points value: 2 duration: semester 2

*prerequisites:* same as for 5132 Data Structures and Algorithms

*assumed knowledge:* 5132 Data Structures and Algorithms; 9786 Mathematics I or 3617 Mathematics IM

*contact hours:* 2 lectures and 2 hours of practical work a week, plus 1 tutorial a fortnight

*content:* A study of four major programming approaches: imperative, functional, logic, and object-oriented. Imperative paradigms: object binding, procedural abstraction, parameter passing mechanisms, activation record model. Functional paradigms: values, types, higher-order functions, polymorphism, lazy evaluation. Logic paradigms: Prolog, deductive engines, clauses, rules. Object-oriented paradigms: data abstraction objects, methods, classes, inheritance, polymorphism.

*assessment:* 2 hour exam and programming exercises

### 1956 Computer Systems

level: II points value: 2 duration: semester 1

*prerequisites:* a Pass Div I in 9276 Computer Science I as a prerequisite, or 9492 Computer Science Concepts as a corequisite

*assumed knowledge:* 9786 Mathematics I or 3617 Mathematics IM

*contact hours:* 2 lectures and 2 hours of practical work a week, plus 1 tutorial a fortnight

*content:* instruction sets, assembler programming, running programs, CPU organisation, memory hierarchy, input/output devices, controllers and drivers, buses, networks, operating system services.

*assessment:* 2 hour exam, compulsory practicals, exercises

### 3655 Numerical Methods

level: II points value: 2 duration: semester 2

*prerequisites:* either a Pass Div I in 9276 Computer Science I; or a Pass Div I in 7780 Computational Methods I; or 9492 Computer Science Concepts as a corequisite; and either a Pass Div II in 9786 Mathematics I; or a Pass Div I in 3617 Mathematics IM

*contact hours:* 2 lectures and 2 hours of practical work a week, plus 1 tutorial a fortnight

*content:* Floating point numbers; representation, subtractive cancellation, machine epsilon. Solution of non-linear equations by fixed point iteration methods. Approximation of functions by polynomial and spline functions. Methods of numerical integration: simple and composite rules. Numerical solution of differential equations.

*assessment:* 2 hour written exam and programming exercises

### 3169 Database and Information Systems

level: II points value: 2 duration: semester 2

*prerequisites:* a Pass Div I in 9276 Computer Science I as a prerequisite, or 9492 Computer Science Concepts as a corequisite, or, for B.Inf.Sc. students only, 1073 Programming and Applications I as a prerequisite

*assumed knowledge:* 9786 Mathematics I or 3617 Mathematics IM

*restriction:* cannot be counted toward a degree together with the previously offered 2687 Databases and Information Systems

*contact hours:* 2 lectures and 2 hours of practical work a week, plus 1 tutorial a fortnight

*content:* This subject is concerned with the construction of relational databases. The representation of data as normalised tables is a major theme. The major vehicle is SQL, 1993 version, with the addition of a significant amount of Cobol to illustrate alternatives. The bridging product ESQL will also be discussed. Topics related to the optimisation of very large databases may be mentioned where relevant and a description will be given of some implementation and operational problems.

*assessment:* 2 hour exam, completion of practical work, submission of written tutorials.

There may be a practical component to the exam.

## Level III

To major in Computer Science, a student must present passes (not conceded passes) in subjects offered by the Department of Computer Science at Level II to the value of 8 points and at Level III to the value of 10 points. At least one subject must be from Group A below, and at least one subject must be from Group B. Students who intend to take 9750 Honours Computer Science are referred to the statement on pre-requisites for that subject.

### Group A

- 5141 Computer Architecture
- 1234 Compiler Construction and Project
- 2328 Computer Networks and Applications
- 4468 Operating Systems

### Group B

- 9811 Advanced Programming Paradigms
- 6378 Artificial Intelligence
- 9820 Numerical Analysis
- 2382 Programming Techniques
- 1116 Systems Analysis
- 6263 Software Engineering and Project
- 3007 Knowledge Representation

### 6378 Artificial Intelligence

level: III points value: 2 duration: semester 1

*prerequisites:* 5132 Data Structures and Algorithms; either a Pass Div II in 9786 Mathematics I or a Pass Div I in 3617 Mathematics IM

*contact hours:* 2 lectures and 2 hours of practical work a week, plus 1 tutorial every 3 weeks

*content:* AI methodology and fundamentals; description matching and goal-reduction; ANALOGY;

and/or trees; exploiting natural constraints: Waltz algorithm; search: hill-climbing, beam, best-first, A\*; minimax procedure and alpha-beta pruning for game-playing; learning: parameter-adjustment and Winston near-miss/reinforcement procedure; means-end analysis and GPS; rule-based systems: forward- and backward- chaining, MYCIN, Xcon; generate and test paradigm with Dendral. Representation issues: inheritance, demons, defaults, perspectives, frames, primitives; aspects of Prolog; neural networks: recurrent backpropagation technique.

*assessment:* 2 hour exam, practicals and exercises

### 5141 Computer Architecture

*level:* III *points value:* 2 *duration:* semester 2

*prerequisites:* 1956 Computer Systems and 5132 Data Structures and Algorithms; either a Pass Div II in 9786 Mathematics I or a Pass Div I in 3617 Mathematics IM

*contact hours:* 2 lectures and 2 hours of practical work a week, plus 1 tutorial every 3 weeks

*content:* Fundamentals of computer design; quantifying cost and performance; instruction set architecture; program behaviour and measurement of instruction set use; processor datapaths and control; pipelining, handling pipeline hazards; memory hierarchies and performance; I/O devices, controllers and drivers; I/O and system performance; multiprocessors and special purpose processors.

*assessment:* 2 hour exam, exercises and practicals

### 9820 Numerical Analysis

*level:* III *points value:* 2 *duration:* semester 1

*prerequisites:* 3655 Numerical Methods

*contact hours:* 2 lectures and 2 hours of practical work a week, plus 1 tutorial every 3 weeks

*content:* Topics will include computer arithmetic, numerical solution of non-linear equations, numerical solution of systems of linear equations and the computation of eigenvalues and eigenvectors. The course is intended to be an analysis, rather than a methods course. Equipment: Pocket calculator with the elementary functions. Numerical analysis and the third-year applied mathematics subject 1322 Computational Mathematics III do not contain substantial amounts of the same material and may both be presented for the same degree.

*assessment:* 2 hour final exam 90%; exercises 10%

### 6263 Software Engineering and Project

*level:* III *points value:* 3 *duration:* semester 2

*prerequisites:* 5132 Data Structures and Algorithms; either a Pass Div II in 9786 Mathematics I or a Pass Div I in 3617 Mathematics IM

*assumed knowledge:* 2382 Programming Techniques

*contact hours:* 2 lectures and 4 hours practical per week, plus 1 tutorial every 3 weeks

*content:* This is a first course in software engineering and provides an introduction to the production of high quality software solutions to large tasks. Among the topics covered in this course are the following: models of the software life-cycle, requirements analysis and specification, program design techniques and paradigms, software specification techniques, configuration management and version control, quality assurance, integration and testing, project management, computer-aided software engineering and integrated software engineering environments.

*assessment:* The assessment in this course will consist of a two-hour exam and a large project.

### 1234 Compiler Construction and Project

*level:* III *points value:* 3 *duration:* semester 1

*prerequisites:* 1956 Computer Systems, 5132 Data Structures and Algorithms; either a Pass Div II in 9786 Mathematics I or a Pass Div I in 3617 Mathematics IM

*assumed knowledge:* 2430 Programming Paradigms and 2382 Programming Techniques

*contact hours:* 2 lectures and 4 hours of practical work a week, plus 1 tutorial every 3 weeks

*content:* The structure of compilers: lexical analysis, syntax analysis (top-down and bottom-up techniques), environmental handling, the handling of context-sensitive and context-free errors, type checking and code generation. Run-time support for Algol-like languages, including storage management. BNF languages and grammars. This course is closely coupled with the writing of a large, compulsory programming project.

*assessment:* 2 hour exam; compulsory project

### 2328 Computer Networks and Applications

*level:* III *points value:* 2 *duration:* semester 1

*prerequisites:* 1956 Computer Systems and 5132 Data Structures and Algorithms; either a Pass Div II in 9786 Mathematics I or a Pass Div I in 3617 Mathematics IM

*contact hours:* 2 lectures and 2 hours of practical work a week, plus 1 tutorial every 3 weeks

*content:* Introduction to networks and digital communications: Nyquist and Shannon results, modulation and encoding techniques, transmission media, network typologies and switching techniques. The OSI reference model: detailed discussions of services and protocols of the seven layers; LAN, MAN and WAN technologies: ethernet, token bus, token ring, FDDI, DQDB, ISDN and B-ISDN; Internetworking: internetworking devices (bridges, routers, gateways) and issues, overview of the Internet and TCP/IP.

*assessment:* 2 hour exam, practicals and exercises

### 9811 Advanced Programming Paradigms

level: III points value: 2 duration: semester 2

*prerequisites:* 5132 Data Structures and Algorithms; either a Pass Div II in 9786 Mathematics I or a Pass Div I in 3617 Mathematics IM

*assumed knowledge:* 2430 Programming Paradigms and 2382 Programming Techniques

*contact hours:* 2 lectures and 2 hours of practical work a week, plus 1 tutorial every 3 weeks

*content:* A selection of topics from the following: advanced functional programming in Miranda; polymorphic recursive functions; higher-order functions; software prototyping; programming in Scheme (a dialect of Lisp); streams and networks of processes; lazy and strict evaluation; coroutines in functional and imperative paradigms. An introduction to parallel programming: shared memory process model; data parallel programming; distributed memory machines and message passing; performance measurements; parallel functional programming.

*assessment:* 2 hour exam, practicals, exercises

### 3007 Knowledge Representation

level: III points value: 2 duration: semester 2

*prerequisites:* 6378 Artificial Intelligence; either a Pass Div II in 9786 Mathematics I or a Pass Div I in 3617 Mathematics IM

*contact hours:* 2 lectures and 2 hours practical work a week plus 1 tutorial every 3 weeks

*content:* issues in knowledge representation, the frame problem, the qualification problem, predicate logic as knowledge representation, the closed world assumption, inheritance hierarchies, theorem proving, resolution, natural deduction, logic programming, introduction to nonmonotonic reasoning, logics for nonmonotonic reasoning, statistical reasoning, Bayes' theorem, Bayesian Networks, Dempster-Shafer Theory, fuzzy logic.

*assessment:* 2 hour exam, practicals and exercises

### 4468 Operating Systems

level: III points value: 2 duration: semester 2

*prerequisites:* 1956 Computer Systems and 5132 Data Structures and Algorithms. Either a Pass Div II in 9786 Mathematics I or a Pass Div I in 3617 Mathematics IM

*contact hours:* 2 lectures and 2 hours of practical work a week, plus 1 tutorial every 3 weeks

*content:* OS purposes: resource management and the extended virtual computer; historical development. Processes: critical sections and mutual exclusion, semaphores, monitors, classical problems, deadlock;

process scheduling. Input and Output: hardware and software control; disks, terminals, clocks. Memory management: multiprocessing needs; swapping; virtual memory, paging and segmentation; page replacement; File System: operations, implementation, performance, protection.

*assessment:* 2 hour exam and exercises

### 1116 Systems Analysis

level: III points value: 2 duration: semester 2

*prerequisites:* 3169 Database and Information Systems; either a Pass Div II in 9786 Mathematics I or a Pass Div I in 3617 Mathematics IM

*contact hours:* 2 lectures and 2 hours of practical work per week, plus 1 tutorial every 3 weeks

*content:* Systems Analysis concerns designing computer systems that are useful and productive and satisfy the needs of users who are not computer literate. The subject covers the following topics: applying psychological principles to the design of user interfaces, menus and dialogs; using discounted cash flow techniques to test whether a project is financially viable; designing databases that best model real world situations; modelling real world events as database transactions and histories; using design methodologies to decompose large systems into simple parts; techniques for making design decisions that optimise system performance.

The subject includes a practical component, which is given only a broad objective, to build a prototype Oracle database and user interface.

*assessment:* 2 hour exam, completion of practical work, submission of written tutorials

### 2382 Programming Techniques

level: III points value: 2 duration: semester 1

*prerequisites:* a pass in 5132 Data Structures and Algorithms; either a Pass Div II in 9786 Mathematics I or a Pass Div I in 3617 Mathematics IM

*restriction:* cannot be counted towards a degree together with 1006 Programming and Data Structures B

*contact hours:* 2 lectures and 2 hours of practical work a week, plus one tutorial every 3 weeks

*content:* Sorting and searching algorithms, emphasising correctness and complexity analysis. File structures. Graphs: construction, traversal, topological sorting, application. Dynamic storage management. Program development: methods of specification, design, implementation, testing and debugging, case studies.

*assessment:* 2 hour exam and programming exercises

## Honours Level

### 9750 Honours Computer Science

level: IV points value: 24 duration: full year

note: students intending to enrol in Honours Computer Science are advised to consult the Head of the Department of Computer Science, preferably before enrolling for Level III subjects.

*prerequisites:* A student must hold an ordinary degree with a major in Computer Science. Additionally, a student should have passes at a standard satisfactory to the Head of the Department in a suitable collection of Level II and Level III subjects in the Faculty of Mathematical and Computer Sciences. Students with a different background of second-year and third-year courses (or Level II and Level III subjects) may be accepted at the discretion of the Head of the Department.

*assumed knowledge:* The content of various Level II and Level III Computer Science subjects (or second-year subjects and third-year options if completed before 1989) depending on the composition of a particular student's Honours program.

*contact hours:* 8 lectures and 25 hours of practical work a week

*content:* The course will be determined from year to year and will consist mostly of lectures given in the Department of Computer Science. Other courses may be included, subject to the approval of the Head of the Department. Students will be required to undertake a major computing project, under the guidance of a supervisor.

*assessment:* Final assessment is based on performance in six lecture courses, plus a major project which is weighted as four lecture courses.

### 8162 Honours Computer Science (Mid-year Intake)

level: IV points value: 24 duration: full year

*prerequisites:* credit level or better in at least 5 Level III Computer Science subjects

*contact hours:* full time

*content:* Same as for 9750 Honours Computer Science

*assessment:* same as for 9750 Computer Science

### 5782 Honours Computer Science and Pure Mathematics

level: IV points value: 24 duration: full year

*contact hours:* full time

*content:* students will be required to complete a minimum of 10 points of Level IV subjects in Pure Mathematics and 10 points of Level IV subjects in Computer Science. They must also complete a project

supervised within the Pure Mathematics Department in a topic with a significant computing component.

*assessment:* Level IV subjects are assessed by a 3 hour examination together with assignments (counting up to 20% of the final mark). The Project counts 4 points towards the year's work.

## Economics and Commerce for the degree of Bachelor of Science in the Faculty of Mathematical and Computer Sciences

### introductory notes

The Economics and Commerce subjects available to Mathematical and Computer Sciences students are listed below. For syllabuses please see under the degrees of Bachelor of Economics and Bachelor of Commerce in the Faculty of Economics and Commerce.

### Accountancy

To complete the B.Sc. (Mathematical and Computer Sciences) course and accountancy qualifications in minimum time, it is necessary for students to undertake an overloaded program of study. This should be discussed with a Course Adviser of the Faculty of Mathematical and Computer Sciences.

For students wishing to gain accountancy qualifications in a Mathematical and Computer Sciences degree, the recommended choice of subjects is:

### Economics and Commerce

#### First Year

code	subject title	points
4309	Economics IA	3
2076	Economics IB	3
4359	Financial Accounting IA	3
3086	Financial Accounting IB	3
6362	Commercial Law I(S)	3
		<hr/> 15

#### Second Year\*

4190	Business Finance II	4
7651	Financial Accounting II	4
1282	Commercial Law II	4
1383	Management Accounting II	4
		<hr/> 16

\* one of these subjects will need to be taken as a non-award subject

**Third Year**

4196 Accounting Theory III	4
7440 Auditing III	4
5473 Income Tax Law III	4
5685 Corporate Accounting III	4
	<hr/>
	16

**Mathematical and Computer Sciences**

**First Year**

9786 Mathematics I	6
5543 Statistical Practice I	3
4003 Computer Applications I	3
	<hr/>
	12

**Second Year**

Level II Mathematical and Computer Sciences subjects to the value of 12 points

**Third Year**

Level III Mathematical and Computer Sciences subjects to the value of 12 points

**Economics**

The Economics subjects available to Mathematical and Computer Sciences students are listed below. Syllabuses are provided under the Degree of B.Ec. in the Faculty of Economics and Commerce. Depending on staff availability, some subjects may not be taught in any given year.

**Level I**

4309 Economics IA	
2076 Economics IB	
9073 Economic History	
3565 The Australian Economy: Institutions and Policy I	

**Level II**

5381 Australian Economic History II	
1802 East Asian Economies II	
2744 Industrial Relations II	
9893 Macroeconomics II	
8870 Microeconomics II	
1715 Special Topics II	

**Level III**

4883 Applied Econometrics III	
8367 Applied Microeconomics III	

5284 Business and Government III	
3195 Development Economics III	
8771 Econometric Theory III	
2287 Economics of Law and Politics III	
9029 Environment and Resource Economics III	
9272 International Economic History III	
2261 International Economics III	
5423 Labour Economics III	
4466 Macroeconomics III	
3658 Microeconomic Theory III	
7981 Public Finance III	
4609 Special Topics III	

**Commerce**

The Commerce subjects available to Mathematical and Computer Sciences students are listed below. Syllabuses are provided under the degree of B.Com. in the Faculty of Economics and Commerce. Enrolment in Level I subjects is limited by a quota.

**Level I**

4359 Financial Accounting IA	3
3086 Financial Accounting IB	3
6362 Commercial Law I(S)	3
2499 Information Systems I	3

**Level II**

7651 Financial Accounting II	4
1282 Commercial Law II	4
5312 Marketing II	4
4190 Business Finance II	4
2663 Information Systems II	4
4807 Management and Organisations II	4
1383 Management Accounting II	4

**Level III**

5685 Corporate Accounting III	4
5177 Business Finance III	4
9885 Marketing III	4
5247 Information Systems III	4
9790 Management Accounting III B	4
7440 Auditing III	4
5473 Income Tax Law III	4
9759 Management and Organisations III	4
4196 Accounting Theory III	4

### Honours Economics and Commerce

Mathematical and Computer Sciences students may proceed to Honours in either Economics or Commerce, subject to the permission of the Faculty of Mathematical and Computer Sciences and the Faculty of Economics and Commerce. Students interested in this possibility should consult either the Head of the Department of Economics or the Head of the Department of Commerce, whoever is relevant, before enrolling.

### Law

Notes on Law studies within the Degree of Bachelor of Science in the Faculty of Mathematical and Computer Sciences and within the Degree of Bachelor of Computer Science.

- 1 Candidates who have gained a reserved place in Law studies on the basis of their SACE or equivalent results must, at the first attempt, successfully complete subjects to the value of 24 points at Level I of the BSc (Ma. & Comp. Sc.) or B. Comp. Sc. before being eligible to take up their place in Law studies.
- 2 Students who have successfully completed 24 points at Level I of either the B.Sc.(Ma. & Comp.Sc.) degree or the B.Comp.Sc. degree may be eligible for admission to Law studies. Applications for admission to Law studies may be made through SATAC by mid-September of the year during which they complete their Level I subjects. Except with the permission of the Dean of the Faculty of Law or a nominee, 6019 Law and Legal Process must be undertaken concurrently with the Law subject 3731 Contract. These two subjects are pre-requisites for each of the third year Law subjects 8433 Constitutional Law, 8580 Criminal Law, 9365 Torts, 8821 Property. After admission to Law studies students will remain candidates for either the degree of B.Sc.(Ma. & Comp.Sc.) or the degree of B.Comp.Sc. and may present for that degree the subjects: 6019 Law and Legal Process; 3731 Contract; 8433 Constitutional Law; 8580 Criminal Law; 9365 Torts; and 8821 Property. On completion of either the B.Sc.(Ma. & Comp.Sc.) degree or the B.Comp.Sc. degree such students will automatically be eligible to be candidates for the LL.B. degree.
- 3 A scheme of study, for those wishing to complete the B.Sc. degree in the Faculty of Mathematical and Computer Sciences and to then proceed to the LL.B. degree in the minimum time, is as follows:

### First Year

Either 9786 Mathematics I or 3617 Mathematics IM;

9276 Computer Science I;

5543 Statistical Practice I;

and other Level I subjects to the value of 9 points chosen from the Specific Course Rules for the degree of B.Sc.(Ma. & Comp.Sc.).

### Second Year

Level II subjects to the value of 16 points chosen from the Specific Course Rules for the degree of B.Sc.(Ma. & Comp.Sc.);

and 6019 Law and Legal Process and 3731 Contract, each of which counts as 4 points towards the B.Sc.(Ma. & Comp.Sc.) degree.

### Third Year

Level III Mathematical and Computer Sciences subjects to the value of 12 points chosen from the Specific Course Rules for the degree of B.Sc.(Ma. & Comp.Sc.);

and three of 8433 Constitutional Law, 8580 Criminal Law, 9365 Torts and 8821 Property, each of which counts as 6 points towards the B.Sc.(Ma. & Comp.Sc.) degree.

To complete the LL.B. degree in the minimum time students would need to take all these subjects although this does involve an overload and is not a requirement of the B.Sc.(Ma. & Comp.Sc.) degree.

Before enrolment in the Law subjects in the above scheme, students should consult the Law Course Adviser.

- 4 A scheme of study, for those wishing to complete the B.Comp.Sc. degree and to then proceed to the LL.B. degree in the minimum time, is as follows:

### First Year

Either 9786 Mathematics I or 3617 Mathematics IM;

9276 Computer Science I;

and other Level I subjects to the value of 12 points chosen from the Specific Course Rules for the degree of B.Comp.Sc.

### Second Year

Level II subjects to the value of 16 points chosen from the Specific Course Rules for the degree of B.Comp.Sc. which must include:

- 5132 Data Structures and Algorithms;
- 1956 Computer Systems;
- 2430 Programming Paradigms;
- 3169 Database and Information Systems;
- at least 4 points of other Mathematical and Computer Sciences subjects;
- 9595 Mathematics IIM is also required for those who took 3617 Mathematics IM at Level I;
- and 6019 Law and Legal Process and 3731 Contract, each of which counts as 4 points towards the B.Comp.Sc. degree.

### Third Year

Level III subjects to the value of 13 or 14 points as follows:

- 2382 Programming Techniques;
- 6263 Software Engineering and Project;
- 4468 Operating Systems;
- 2328 Computer Networks and Communications;
- and 1 other Computer Science subject;
- 1496 Communications Skills;
- and any three of 8433 Constitutional Law, 8580 Criminal Law, 9365 Torts and 8821 Property, each of which counts as 6 points towards the B.Comp.Sc. degree.

To complete the LL.B. degree in the minimum time students would need to take all these subjects although this does involve an overload and is not a requirement of the B.Comp.Sc. degree.

Before enrolment in the Law subjects in the above scheme, students should consult the Law Course Adviser.

- 5 See also the Specific Course Rules for the LL.B. degree, and see, in particular, the Introductory Notes to the LL.B. Syllabuses.

## Physics and Mathematical Physics

### Introductory notes

- 1 A student may major in Mathematical Physics by presenting passes (not conceded passes) in four or five Level III subjects for a total of at least 10 points: 6978 Quantum Mechanics III, 5547 Statistical Mechanics, 2994 Mathematical Physics, 4413 Advanced Dynamics and Relativity, 1067 Advanced Quantum Mechanics offered by the Department of Physics and Mathematical Physics.

- 2 Students who wish to major in Mathematical Physics are recommended to take the following subjects:

#### Level I

9786 Mathematics I, 3643 Physics I

#### Level II

2656 Classical Mechanics II, 9600 Classical Fields and Mathematical Methods II, together with either the subjects 3418 Electromagnetism and Relativity II and 6051 Introductory Quantum Mechanics and Applications or 2653 Physics II. Students should consult the Course Coordinator in Mathematical Physics for advice concerning their choice of other second year subjects.

#### Level III

To qualify for a major in Mathematical Physics a student must present passes (not Conceded Passes) in Level III Mathematical Physics subjects to the value of at least ten points.

- 3 Students intending to do 5724 Honours Mathematical Physics are advised to take Level III subjects from the Department of Physics and Mathematical Physics and the Departments of Pure and Applied Mathematics, to the value of at least 16 points, chosen in consultation with the Course Coordinator.

### Level II

#### 9600 Classical Fields and Mathematical Methods II

*level:* II    *points value:* 2    *duration:* semester 2

*prerequisites:* 9786 Mathematics I (Pass Div I); or 9595 Mathematics IIM (Pass Div I)

*assumed knowledge:* 3643 Physics I or 5945 Physics IE, 7243 Differential Equations II and either 6649 Methods in Applied Mathematics II and 2959 Complex Analysis II (concurrently); or 2187 Vector Analysis and Complex Analysis.

*contact hours:* 2 weekly lectures and 1 tutorial a fortnight

*content:* Newtonian gravitation, electrostatics, Laplace and Poisson equations, method of images, boundary value problems, use of special functions. Delta-functions, Green's functions, eigenvalue expansions. Fourier transforms. Multiple expansions, spherical harmonics. Heat equation.

*assessment:* class exercises, final 2 hour exam and tests

### 2656 Classical Mechanics II

level: II points value: 2 duration: semester 1

prerequisites: 9786 Mathematics I (Pass Div I) or 9595 Mathematics IIM (Pass Div I)

assumed knowledge: 3643 Physics I

assumed corequisites: 7243 Differential Equations II; and either 6649 Methods in Applied Mathematics II or 2187 Vector Analysis and Complex Analysis.

contact hours: 2 weekly lectures and 1 tutorial a fortnight

content: Newton's Laws, conservation laws. Many particle systems. Rigid bodies, Angular momentum, Moment of inertia tensor, Lagrange's equations, generalised coordinates.

assessment: class exercises and 2 hour final exam and tests

contact hours: 2 weekly lectures and 1 tutorial a fortnight

content: This subject studies advanced topics in quantum mechanics with an emphasis on symmetries and the mathematical structure of the theory. Postulates and formalism. Stern-Gerlach experiment. Angular momentum. Bell's Inequalities. Symmetries, conservation laws, and unitary transformations. Position and momentum representation. Heisenberg and Schroedinger pictures. Annihilation and creation operators: Harmonic oscillator. Feynman path integrals. Parity. Time-reversal. Periodic potentials and Bloch wavefunctions. Coupled oscillators. Density matrix approach. Interaction picture and the Dyson series. Introduction to relativistic quantum mechanics: Klein-Gordon equation, Dirac equation, probability current, electromagnetic coupling.

assessment: one 2 hour examination and class exercise

## Level III

### 4413 Advanced Dynamics and Relativity

level: III points value: 3 duration: semester 2

prerequisites: 3643 Physics I (Pass Div I), and 9786 Mathematics I (Pass Div I) or 9595 Mathematics IIM (Pass Div I)

assumed knowledge: 2656 Classical Mechanics II. 9600 Classical Fields and Mathematical Methods II. 3418 Electromagnetism and Relativity II or 2653 Physics II.

restrictions: cannot be counted with 7099 Advanced Dynamics or 7633 Relativity and Classical Field Theory

contact hours: 3 lectures per week and 1 tutorial per fortnight

content: Variation principles, Lagrange's Equations, Noether's Theorem. Hamilton's Equations, Poisson brackets. Canonical transformations, Hamilton-Jacobi Theory. Special relativity, Tensors, relativistic mechanics. Tensor formulation of electromagnetism. Relativistic action principles for particles and fields. Radiation from relativistic charged particles.

assessment: class exercises and 3 hour examination

### 6978 Quantum Mechanics III

level: III points value: 3 duration: semester 1

prerequisites: 3643 Physics I (Pass Div I), and 9786 Mathematics I (Pass Div I) or 9595 Mathematics IIM (Pass Div I)

assumed knowledge: 6051 Introductory Quantum Mechanics and Applications II or 2653 Physics II

restrictions: cannot be counted with 4964 Quantum Mechanics

contact hours: 3 lectures and approximately 1 tutorial per week

content: This subject introduces concepts essential for the understanding of quantum mechanics and the microscopic structure of matter. Review of principles and postulates of quantum mechanics. Mathematical formalism and Dirac bracket notation. Commuting observables, compatibility, and the Heisenberg uncertainty relations. Unitary transformations. Schroedinger equation and time evolution. Orbital angular momentum, spherical harmonics, and spatial rotations. Angular momentum, addition of angular momenta, and Clebsch-Gordon coefficients. Schroedinger equation in three dimensions. Separability and central forces: spherical square well, hydrogen-like atoms, three-dimensional oscillator. Time-independent approximation methods: perturbation theory, variational methods, WKB approximation. Fine structure of hydrogen atom. Time-dependent approximation methods: Time-dependent perturbation theory, Fermi's golden rule, simulated emission. Scattering from a central potential. Several and many particle systems.

assessment: one 3 hour examination and class exercises

### 1067 Advanced Quantum Mechanics

level: III points value: 2 duration: semester 2

prerequisites: 3643 Physics I (Pass Div I), and 9786 Mathematics I (Pass Div I) or 9595 Mathematics IIM (Pass Div I)

assumed knowledge: 6978 Quantum Mechanics III

## 2994 Mathematical Physics

level: III points value: 2 duration: semester 1  
contact hours: 2 lectures per week and 1 tutorial per fortnight

prerequisites: 9786 Mathematics I (Pass Div I) or 9595 Mathematics IIM (Pass Div I)

assumed knowledge: 9600 Classical Fields and Mathematical Methods II or equivalent

restrictions: cannot be counted with 4324 Mathematical Methods

content: Symmetry groups with applications in classical mechanics, relativity and quantum mechanics. Vector spaces, linear functionals, linear operators, inner product space. Algebras. Grassmann algebra and Lie algebras with applications. Introduction to manifolds and differential geometry. Vector and tensor fields. Covariant derivatives. Banach and Hilbert space, self-adjoint and unitary operators. Hilbert space formulation of quantum mechanics. Equivalence of Heisenberg and Schroedinger picture. Distributions, Fourier transforms, Green's functions for Laplace's equation and the wave equation.

assessment: class exercises and 2 hour examination

## 5547 Statistical Mechanics

level: III points value: 2 duration: semester 1

prerequisites: 9786 Mathematics I (Pass Div I) or 9595 Mathematics IIM (Pass Div I); (3643 Physics I (Pass Div I))

assumed knowledge: 2653 Physics II

contact hours: 2 weekly lectures and 1 tutorial a fortnight

content: An introduction to concepts essential for the understanding of both classical and quantum statistical mechanics. Topics covered include the classical thermodynamic laws and their application, postulates of statistical mechanics, statistical interpretation of thermodynamics. Microcanonical, canonical and grand canonical ensembles. The methods of statistical mechanics are then used to develop the statistics for Bose-Einstein, Fermi-Dirac and photon gases. Selected topics from low temperature physics, electrical and thermal properties of matter and astrophysics will be discussed.

assessment: 1 two hour exam and class exercises

## Honours Level

### 5724 Honours Mathematical Physics

level: IV points value: 24 duration: full year

note: Students who are considering taking this subject are advised to see the Head of the Department of Physics and Mathematical Physics as soon as possible, preferably before enrolling for their third-year course

prerequisites: Students who have reached a satisfactory standard before 1989 in at least four of the third-year Mathematical Physics options 7136, 2543, 7181, 6307, 2965 and other third-year Science or Mathematical Sciences options or after 1988 in at least five of the Level III Mathematical Physics subjects and other Level III Science or Mathematical Sciences subjects, may be permitted to proceed to the Honours course in Mathematical Physics.

content: The lecture program will be determined from year to year. Students will be required to make a selection from subjects offered by the Department of Physics and Mathematical Physics and the Departments of Pure and Applied Mathematics. Honours topics from other Departments in the Faculty of Mathematical and Computer Sciences, and from the Schools of Information Science and Technology at The Flinders University of South Australia may be considered appropriate.

Lectures will be included on the following subjects: general theory of relativity, relativistic quantum mechanics, quantum field theory, many-body theory, statistical mechanics, theoretical nuclear and particle physics.

Each student will be assigned a supervisor who will advise on the choice of lecture program and give guidance in the writing of a project on some topic in mathematical physics, to be approved in advance by the Head of the Department of Physics and Mathematical Physics.

assessment: exams and project

## Pure Mathematics

### Introductory notes

- 1 It is recommended that students intending to obtain a major in Pure Mathematics enrol in all four Pure Mathematics subjects at Level II. Intending Honours students are referred to the statement on pre-requisites listed under the subject 6676 Honours Pure Mathematics.
- 2 For students with special interest in mathematical logic, philosophy courses (with the logic options) are particularly suitable for combining with pure mathematics.

- 3 A student who may wish to become a teacher of mathematics is strongly advised to study some computer science and statistics in addition to mathematics.

## Level II

---

### 5807 Algebra II

*level:* II (or II/III within B.Inf.Sc.)

*points value:* 2                      *duration:* semester 2

*prerequisites:* 9786 Mathematics I (Pass Div I) or 9595 Mathematics IIM (Pass Div I)

*contact hours:* 2 weekly lectures and 1 tutorial a fortnight

*content:* Linear Algebra: Vector spaces over the real and complex numbers, linear transformations, bases, eigen spaces and diagonalisation, inner products, Cauchy-Schwarz inequality and Gram-Schmidt process, adjoint, bilinear forms, the matrix of a form, and the orthogonal and unitary groups.

Group Theory: symmetries and permutations, abstract groups, permutations and matrix groups, cyclic groups and Lagrange's Theorem.

*assessment:* 1.5 hour exam, together with a small percentage for class exercises

### 1429 Discrete Mathematics II

*level:* II    *points value:* 2    *duration:* semester 1

*prerequisites:* 9786 Mathematics I (Pass Div I) or 3617 Mathematics IM (Pass Div I).

*assumed knowledge:* 9786 Mathematics I or knowledge such as that obtainable by taking 9595 Mathematics IIM concurrently

*contact hours:* 2 weekly lectures and 1 tutorial a fortnight

*content:* Permutations and combinations, recurrence relations, generating functions and the inclusion-exclusion principle. Additional topics of special relevance to Computer Science and other mathematical sciences subjects.

*assessment:* one 1.5 hour exam, together with a small percentage for class exercises

### 7389 Real Analysis II

*level:* II (or II/III within B.Inf.Sc.)

*points value:* 2                      *duration:* semester 1

*prerequisites:* 9786 Mathematics I (Pass Div I) or 9595 Mathematics IIM (Pass Div I); (or, exceptionally, with the approval of the Head of Department, 3617 Mathematics IM (Distinction) and concurrent enrolment in 9595 Mathematics IIM)

*assumed knowledge:* 9786 Mathematics I or 9595 Mathematics IIM (or, for exceptional cases as above, knowledge such as that obtained by taking 9595 Mathematics IIM concurrently).

*restriction:* cannot be counted towards the degree together with 2959 Real and Complex Analysis passed before 1993, except under special arrangement with the Head of the Department

*contact hours:* 2 weekly lectures and 1 tutorial a fortnight

*content:* The real numbers, infimum and supremum. Real sequences: convergence, limit properties, subsequences, conditions for convergence, applications. Real series, comparison test, conditional and absolute convergence, power series and Taylor series. Functions of one and several real variables: limit, continuity and extrema; differentiability, gradient, Jacobian matrix, and chain rule; Taylor's theorem; classification of critical points, Lagrange multipliers and applications to extremum problems. Double integrals and their evaluation; line integrals and Green's theorem.

*assessment:* one 1.5 hour exam together with small percentage for class exercises

### 2959 Complex Analysis II

*level:* II    *points value:* 2    *duration:* semester 2

*prerequisites:* 9786 Mathematics I (Pass Div I) or 9595 Mathematics IIM (Pass Div I)

*assumed knowledge:* At least one of the following subjects 7389 Real Analysis II, 7243 Differential Equations II, 6649 Methods in Applied Mathematics II or prescribed preliminary reading

*contact hours:* 2 weekly lectures and 1 tutorial a fortnight

*content:* Basic concepts, analytic functions, Cauchy-Riemann equations. Complex power series. Standard elementary functions. Conformal mapping including bilinear transformations and applications. Cauchy's integral theorem and consequences, including integral formula and power series representations. Residue theorem and applications. Further results on analytic functions.

*assessment:* one 1.5 hour exam together with small percentage for class exercises

## Level III

---

To qualify for a major in Pure Mathematics a student must present passes (not Conceded Passes) in Level III subjects offered by the Department of Pure Mathematics to the value of at least ten points. In addition it is recommended that students take all four Pure Mathematics subjects at Level II. Intending

Honours students are referred to the statement on prerequisites listed under the subject 6676 Honours Pure Mathematics.

Students who do not have the assumed knowledge which is given under the syllabus entries for Level III Pure Mathematics subjects should consult the Department before completing their enrolment.

### 6848 Analysis and Topology III

level: III points value: 2 duration: semester 1  
prerequisites: 9786 Mathematics I (Pass Div I) or 9595 Mathematics IIM (Pass Div I)

assumed knowledge: 8925 Pure Mathematics II or 2959 Real and Complex Analysis or 7389 Real Analysis II

contact hours: 2 weekly lectures and 1 tutorial every 3 weeks

content: Metrics and norms, basic topological concepts in a metric space. Continuity, convergence, completeness. Compactness and uniform convergence. Connectedness. Contraction mappings. Basic concepts of general topology.

assessment: 2 hour exam and a small percentage may be allocated to class exercises

### 3874 Topics in Geometry III

level: III points value: 2 duration: semester 2  
availability: not offered in 1996

prerequisites: 9786 Mathematics I (Pass Div I) or 9595 Mathematics IIM (Pass Div I).

contact hours: 2 weekly lectures and 1 tutorial every three weeks

Some tutorials may be computing tutorials using packages.

content: Topic or topics chosen from: Convexity, fractal geometry, computer graphics, non-Euclidean geometry or other Euclidean geometry.

assessment: 2 hour exam plus a small percentage for class exercises

### 3786 Projective Geometry III

level: III points value: 2 duration: semester 2  
prerequisites: 9786 Mathematics I (Pass Div I) or 9595 Mathematics IIM (Pass Div I).

assumed knowledge: some group theory as would be obtained from the first 12 lectures of 1273 Groups III

contact hours: 2 weekly lectures and 1 tutorial every 3 weeks

content: Euclidean and non-Euclidean geometries. The extended Euclidean plane. An introduction to projective geometries via axiom systems. A study of

incidence theorems. Finite projective geometries. The analytic approach to projective geometries using homogeneous coordinates. Field planes. The automorphism group of a field plane and fundamental theorem. Conics in a projective plane,  $k$ -arcs, ovals and hyperovals in a finite projective plane.

assessment: 2 hour exam and a small percentage may be allocated for class exercises

### 4102 Geometry of Surfaces III

level: III points value: 2 duration: semester 2  
prerequisites: 9786 Mathematics I (Pass Div I) or 9595 Mathematics IIM (Pass Div I).

assumed knowledge: 8925 Pure Mathematics II or both 5807 Algebra II and 7389 Multivariable Calculus II or both 5807 Algebra II and 7389 Real Analysis II.

contact hours: 2 weekly lectures and 1 tutorial every 3 weeks

content: Curves in  $\mathbb{R}^n$ ,  $\mathbb{R}^3$ , Inverse function and implicit function theorem, Surfaces in  $\mathbb{R}^3$ . Multilinear forms and integration on lines, surfaces and volumes in  $\mathbb{R}^3$ . Stokes Theorem, Jacobians and change of variable. Geometry of surfaces, curves on surfaces, curvature, Gaussian curvature, geodesics, the Gauss map and the Gauss-Bonnet theorem.

assessment: 2 hour exam and a small percentage may be allocated for class exercises

### 1273 Groups III

level: III points value: 2 duration: semester 1  
prerequisites: 9786 Mathematics I (Pass Div I) or 9595 Mathematics IIM (Pass Div I)

assumed knowledge: 8925 Pure Mathematics II or 5807 Algebra II

contact hours: 2 weekly lectures and 1 tutorial every 3 weeks

Some tutorials may be computing tutorials using the group theory package Cayley.

content: Permutations, cyclic groups, homomorphisms, normal subgroups and factor groups, isomorphism theorems. Direct products. Groups acting on sets and applications to  $p$ -group conjugacy classes. Finitely generated abelian groups. Sylow's Theorems. Presentation of groups.

assessment: 2 hour exam and a small percentage may be allocated for class exercises and tutorial work

### 1845 Integration III

level: III points value: 2 duration: semester 2  
prerequisites: 9786 Mathematics I (Pass Div I) or 9595 Mathematics IIM (Pass Div I)

assumed knowledge: 6848 Analysis and Topology III

*contact hours:* 2 weekly lectures and 1 tutorial every three weeks

*content:* Countability. Additive set functions,  $\sigma$ -algebras and Lebesgue measure and integral; convergence theorems, Fubini's theorem and change of variable theorem. Applications in probability and analysis.

*assessment:* 2 hour exam and a small percentage may be allocated for class exercises

### 5780 Logic III

*level:* III *points value:* 2 *duration:* semester 2

*prerequisites:* 9786 Mathematics I (Pass Div I) or 9595 Mathematics IIM (Pass Div I).

*contact hours:* 2 weekly lectures and 1 tutorial every 3 weeks

*content:* Propositional calculus, first order theories, interpretations and models. Godel's completeness theorem for predicate calculus. Computability: Turing machines, recursive functions and the halting problem. Undecidability of predicate calculus. Godel's theorem for elementary number theory.

*assessment:* 2 hour exam and a small percentage may be allocated for class exercises

### 3401 Number Theory III

*level:* III *points value:* 2 *duration:* semester 1

*prerequisites:* 9786 Mathematics I (Pass Div I) or 9595 Mathematics IIM (Pass Div I)

*assumed knowledge:* An elementary knowledge of computer programming will be assumed in this subject.

*contact hours:* 2 weekly lectures and 1 tutorial every three weeks

*content:* Divisibility and primes, congruences, arithmetic functions. Primitive roots, quadratic residues. Continued fractions and rational approximation.

*assessment:* 2 hour exam plus a small percentage for class exercises

### 6508 Rings, Fields and Matrices III

*level:* III *points value:* 2 *duration:* semester 2

*prerequisites:* 9786 Mathematics I (Pass Div I) or 9595 Mathematics IIM (Pass Div I).

*assumed knowledge:* 8925 Pure Mathematics II or 5807 Algebra II.

*contact hours:* 2 weekly lectures and 1 tutorial every 3 weeks

*content:* Rings, integral domains, homomorphisms, ideals, subrings. Polynomials. Principal ideal domains, fields, finite fields. Rational, primary rational and Jordan canonical forms for matrices.

*assessment:* 2 hour exam and a small percentage may be allocated for class exercises.

### 9482 Mathematics of Finance III

*syllabus details:* see Applied and Pure Mathematics Level III

---

## Honours Level

---

### 6676 Honours Pure Mathematics (B.A. or B.Sc.)

*level:* IV *points value:* 24 *duration:* full year

*note:* Students are required to consult with the Head of the Department of Pure Mathematics, preferably no later than the end of the year preceding their enrolment, in order to ensure that they have obtained the necessary pre-requisite knowledge at a satisfactory standard, to plan their course of study and discuss their choice of project. All students are required to obtain the approval of the Head of the Department of Pure Mathematics before enrolling for 6676 Honours Pure Mathematics.

*prerequisites:* The normal prerequisites are:

- 6848 Analysis and Topology III and 1273 Groups III; at least 6 Level III Pure Mathematics subjects;
- a knowledge of the material of subjects 6508 Rings, Fields and Matrices and 1845 Integration III;
- Level III Mathematical Sciences to the value of at least eight points by other departments.

Students with a different background of third year or Level III subjects may be accepted at the discretion of the Head of the Department of Pure Mathematics.

*content:* The lecture program will be determined from year to year. Students will be required to make a selection from options offered by the Departments of Pure Mathematics, Applied Mathematics, Computer Science, Statistics, Physics and Mathematical Physics and by the School of Information Science and Technology at The Flinders University of South Australia, including some compulsory options in Algebra and Analysis; options offered by other departments may also be available. Options may include Level III Pure Mathematics subjects under suitable conditions.

Only under exceptional circumstances will the Department recommend to the Faculty that a candidate be permitted to spread the work for the Honours degree over two years.

Each student will be assigned a supervisor who will advise on the choice of lecture program and give guidance in the writing of a project on some topic in mathematics. Work on this project should begin in the Department in the first week of February and should be completed by the end of the second semester's lecture program.

*assessment:* For options given in the Department of Pure Mathematics, there will be a three-hour exam at the end of the semester in which the option is given (unless other arrangements are notified). The project also contributes to the final result.

### Recommended program for teachers or prospective teachers

The Department of Pure Mathematics offers an optional recommended program for teachers or prospective teachers within 6676 Honours Pure Mathematics. The offering of this program each year depends upon the availability of staff. It normally consists of a selection of options, some of which have been specially designed for the purposes of the program. Students taking the whole of this program may be permitted to replace the project normally required by two minor projects on topics appropriate to the program. The program is recommended in particular to potential secondary mathematics teachers.

Some options within the recommended program for teachers or prospective teachers will be available to suitably qualified secondary mathematics teachers who wish to attend as visiting students.

*note:* For other possible Honours combinations, please refer to page 780.

## Statistics

### Level I

#### 5543 Statistical Practice I

*level:* I    *points value:* 3    *duration:* semester 1 & 2

*assumed knowledge:* SACE stage 2 Mathematics I

*restriction:* 5543 Statistical Practice I and 9101 Business Data Analysis I (pre-1992 8179 Economic Statistics I or 7322 Economic Statistics IA) cannot both be counted towards a degree.

*contact hours:* 3 lectures and 2 hours of practical work a week

*content:* This subject is an introduction to the theory and application of statistical methods to experimental data. It is suitable for students who are likely to be users of statistical methods in the future, or who intend to pursue a degree in mathematical sciences. Topics covered include the organisation, description and presentation of data; the design of experiments and surveys; probability and relative frequency; random variables and probability distributions; binomial distributions; continuous distributions; the Normal distribution; the use of inference to draw conclusions from data; tests of significance for means and variances; confidence intervals; goodness of fit tests; the  $t$ ,  $X^2$  and  $F$  distributions; fitting straight lines to data; the method of least squares; regression and analysis of variance.

Students will be introduced to the statistical computer package Minitab which will be used throughout the course.

*assessment:* formal exam (at least 80%); and exercises, practicals and project work (at most 20%)

### Level II

Four Level II subjects are offered by the Department. 4523 Statistical Practice II is a continuation of 5543 Statistical Practice I and has it as a prerequisite. It is a practical course aimed at both those who require a knowledge of statistics in other fields and those who wish to continue with statistics as a discipline. 4107 Introduction to Mathematical Statistics II gives a more mathematical introduction to the subject and accordingly has a prerequisite of 9786 Mathematics I or 3617 Mathematics IM. Students who wish to proceed to Level III Statistics are strongly advised to include all Level II Statistics subjects and at least 6 points of Level II subjects in Pure Mathematics and/or Applied Mathematics.

#### 4523 Statistical Practice II

*level:* II    *points value:* 2    *duration:* semester 1

*prerequisites:* 5543 Statistical Practice I (Pass Div I).

*assumed knowledge:* either 9786 Mathematics I or 3617 Mathematics IM or 4357 Mathematics IH

*contact hours:* 2 lectures and 1 hour of practical work per week

*content:* This course is an extension of Statistical Practice I, providing a broader and deeper understanding of the application of statistical methods to data. Topics covered include randomisation, blocking and the design and analysis of experiments; analysis of variance; elementary factorial designs; linear and multiple regression, regression diagnostics,

the analysis of residuals; the design and analysis of surveys, simple random sampling, the analysis of frequency data; power; elementary distribution-free methods such as the sign test and rank tests.

Students will use the statistical package Minitab throughout the course.

*assessment:* formal exam (at least 80%); and exercises, practicals and project work (at most 20%)

#### **4107 Introduction to Mathematical Statistics II**

*level:* II    *points value:* 2    *duration:* semester 1

*prerequisites:* 5543 Statistical Practice I (Pass Div I); and either 9786 Mathematics I (Pass Div I); or both 3617 Mathematics IM (Pass Div I) and a corequisite of 9595 Mathematics IIM

*restriction:* students with 9786 Mathematics I (Pass Div II) are permitted to enrol in this subject provided they are concurrently enrolled in 9595 Mathematics IIM.

*contact hours:* 2 lectures a week, 1 tutorial a fortnight and occasional practicals

*content:* This subject provides the mathematical and statistical foundation necessary for the further study of statistical modelling and inference. Probability (axiomatic approach): sample spaces, probability measures, counting methods for probability, capture/recapture method, conditional probability, law of total probability, Bayes' Rule, independence. Random variables: the frequency and cumulative distribution functions for discrete random variables, the Bernoulli, binomial, hyper geometric, geometric, negative binomial and Poisson distributions and Poisson processes. The density and cumulative distribution functions for continuous random variables, the uniform, exponential (and relation to Poisson process), gamma and normal distributions, quantiles. Distribution of transformed variables, relationship of uniform to other distributions and simulation. Joint distributions: bivariate discrete and continuous distributions, joint frequency and density functions, marginal and conditional distributions, independent random variables, multinomial and bivariate normal distributions, sums of jointly distributed random variables and convolutions and some multivariate generalisations. Expected values: expected values of discrete and continuous random variables, expectations of functions of random variables, variance and standard deviation, Chebychev's Inequality, covariance and correlation and moment generating functions. There is a textbook for this course.

*assessment:* formal exam (at least 80%); exercises, practicals and project work (at most 20%)

#### **8878 Theory of Statistics II**

*level:* II    *points value:* 2    *duration:* semester 2

*prerequisites:* 5543 Statistical Practice I (Pass Div I) and either 9786 Mathematics I (Pass Div I) or 3617 Mathematics IM (Pass Div I)

*assumed knowledge:* 4107 Introduction to Mathematical Statistics II and 9595 Mathematics IIM (if 3617 Mathematics IM was taken)

*contact hours:* 2 lectures and 1 hour of practical work a week

*content:* Estimation. Properties of estimators: unbiasedness, consistency, efficiency, sufficiency. Method of moments. Maximum likelihood: score, information, large sample properties. Minimum variance bound. Tests of hypotheses. Type I, II errors, significance level, power. Likelihood ratio, and other large-sample equivalents. Interval estimation. Confidence intervals. Pivotal quantity. Intervals based on test procedures. Likelihood intervals.

*assessment:* formal exam (at least 80%); exercises, practicals and project work (at most 20%)

#### **1675 Statistical Modelling and Computation II**

*level:* II    *points value:* 2    *duration:* semester 2

*prerequisites:* 5543 Statistical Practice I (Pass Div I) and either 9786 Mathematics I (Pass Div I) or 3617 Mathematics IM (Pass Div I).

*assumed knowledge:* 4107 Introduction to Mathematical Statistics II and 4523 Statistical Practice II; also 9595 Mathematics IIM (if 3617 Mathematics IM was taken)

*contact hours:* 2 lectures and 1 hour of practical work a week

*content:* Linear subspace definition of linear models in the special case where the variance matrix has the form  $\sigma^2 I$ . Examples from regression and Analysis of Variance. Least Squares estimation of the means, and its equivalence with Best Linear Unbiased Estimation and with Maximum Likelihood Estimation when Normality is assumed. Estimation of  $\sigma^2$ , Hypothesis testing and confidence intervals. A more detailed account of the general theory in the special cases of regression and Analysis of Variance. The S-PLUS package is used for the associated data analysis.

*assessment:* formal exam (at least 80%); exercises, practicals and project work (at most 20%)

### Level III

Assumed knowledge for each of the 10 Level III subjects is:

- (a) All four Level II Statistics subjects listed above (except that 7113 Theory of Statistics III assumes only the two Level II subjects 4107 Introduction to Mathematical Statistics II and 8878 Theory of Statistics II, and that 2993 Statistics for Quality Improvement III assumes 4523 Statistical Practice II only).
- (b) Level II Pure Mathematics and/or Applied Mathematics subjects to the value of six points.

Students wishing to proceed in a major in Statistics need to enrol in the two subjects 3989 Theory of Statistics III and 7113 Statistical Modelling III since these form the basis for all subjects in semester 2.

To qualify for a major in Statistics a student must present passes (not Conceded Passes) in Level III subjects offered by the Department of Statistics to the value of at least ten points.

Students who may wish to proceed to Honours in Statistics are strongly advised to include in their course at least 8 points of Level III subjects in Pure Mathematics and/or Applied Mathematics.

These are guide lines, and students who wish, or who think they may wish to proceed to Honours Statistics are advised to discuss their course program with the Head of the Department of Statistics as early as possible.

Twelve subjects are listed but only six or seven will be taught in any one year. The subjects to be offered in any year will be posted on the Departmental Notice Board adjacent to Room 103 of the Mathematics Building in January.

#### 9800 Experimental Design III

level: III points value: 2

availability: not offered in 1996

prerequisites: 9786 Mathematics I (Pass Div I) or 9595 Mathematics IIM (Pass Div I); 5543 Statistical Practice I (Pass Div I)

assumed knowledge: see initial statement for Level III subjects; in addition, 3989 Statistical Modelling III.

contact hours: 2 lectures and 1 hour of practical work a week

content: Principles of experimental design, including randomisation, replication and blocking. Factorial experiments, confounding and fractional replication. Split plot designs, other multi-stratum experiments and their analysis. Incomplete block designs, canonical

efficiencies and analysis by generalised sweeps. There will be an emphasis on practical aspects of the subject. The statistical package Genstat will be used throughout the course.

assessment: formal exam (at least 80%); and exercises, practicals and project work (at most 20%).

#### 4853 Sampling Theory and Practice III

level: III points value: 2 duration: semester 2

availability: not offered in 1996

prerequisites: 9786 Mathematics I (Pass Div I) or 9595 Mathematics IIM (Pass Div I); 5543 Statistical Practice I (Pass Div I)

assumed knowledge: see initial statement for Level III subjects; in addition 3989 Statistical Modelling III

contact hours: 2 lectures and 1 hour of practical work a week

content: Introduction; Experiments and Surveys; Steps in planning a survey. Statistical characterisations of finite populations; Total, mean, variance, mean square. Randomisation approach to sampling and estimation; Sampling distribution of estimator; Expected values, variances; Generalisation of probability sampling. Prediction approach; Inadequacies of approach; Decomposition of population total; Concomitant variables; Models: regression through the origin; Estimation by least squares; Ratio estimator; Variance formulas. Balance and Robustness; Royal-Herson theorem; Tallis's theorem; Best fit sample. Stratified sampling; Estimation; Allocation; Construction of strata; Stratification on size variables; Post-stratification. Two stage sampling; Estimation; Allocation.

assessment: formal exam (at least 80%) and exercises, practicals and project work (at most 20%).

#### 3989 Statistical Modelling III

level: III points value: 3 duration: semester 1

prerequisites: 9786 Mathematics I (Pass Div I) or 9595 Mathematics IIM (Pass Div I); 5543 Statistical Practice I (Pass Div I)

assumed knowledge: see initial statement for Level III subjects

restrictions: May not be counted together with 2658 Linear Models III or 2251 Inference III

contact hours: 3 lectures/week, 1 practical/week and 1 tutorial/fortnight

content: This subject aims to provide students with further fundamental work on modelling in statistics, continuing on from Statistical Modelling and Computation II. The general linear model. Least

squares estimation: geometry of least squares, orthogonal projection, properties of estimators. Regression: model selection, diagnostics, nonlinear regression. Analysis of variance: designed experiments, fixed and random effects. An introduction to generalised linear models.

*assessment:* at least 80% by written examination and at most 20% for practical and tutorial work

### 7113 Theory of Statistics III

*level:* III *points value:* 3 *duration:* semester 1

*prerequisites:* 9786 Mathematics I (Pass Div I) or 9595 Mathematics IIM (Pass Div I); 5543 Statistical Practice I (Pass Div I)

*assumed knowledge:* 4107 Introduction to Mathematical Statistics II and 8878 Theory of Statistics II

*restrictions:* May not be counted together with 2991 Distribution Theory III or 2251 Inference III

*contact hours:* 3 lectures/week, 1 tutorial/week and 1 practical/fortnight

*content:* This subject aims to provide students with fundamental distribution theory together with the underlying basics in statistical inference. It forms the basis upon which the remaining subjects are built. Calculus of distributions. Moments and cumulants. Moment generating functions. Multivariate distributions: Marginal and conditional distributions, Conditional expectation and variance operators, Change of variable, multivariate normal distribution, Exact distributions arising in Statistics. Convergence results: weak convergence, convergence in distribution, Central Limit Theorem. Statistical Inference. Likelihood, score and information. Estimation and properties of estimators: sufficiency, efficiency, consistency, maximum likelihood estimators, large sample properties. Tests of hypotheses: likelihood ratio, score and Wald tests, large sample properties.

*assessment:* at least 80% by written examination and at most 20% for practical and tutorial work

### 1411 Life Contingencies III

*level:* III *points value:* 2 *duration:* semester 2

*prerequisites:* 9786 Mathematics I (Pass Div I) or 9595 Mathematics IIM (Pass Div I); 5543 Statistical Practice I (Pass Div I)

*assumed knowledge:* see initial statement for Level III subjects.

*contact hours:* 2 lectures and 1 hour of practical work a week

*content:* Life tables and the force of mortality; select, aggregate and ultimate mortality tables; annuities immediate and due, assurances and premiums. Relations between mortality functions; policy values, reserves and mortality profit. Multi-decrement tables and associated single-decrement, combined tables and monetary functions. Both practical and theoretical aspects of the above will be discussed.

*assessment:* formal exam (at least 80%); and exercises, practicals and project work (at most 20%).

### 8892 Medical Statistics III

*level:* III *points value:* 2 *duration:* semester 2

*availability:* not offered in 1996

*prerequisites:* 9786 Mathematics I (Pass Div I) or 9595 Mathematics IIM (Pass Div I); 5543 Statistical Practice I (Pass Div I)

*assumed knowledge:* see initial statement for Level III subjects;

*contact hours:* 2 lectures and 1 hour of practical work a week

*content:* This subject aims to cover the design of clinical trials, statistical issues arising in clinical and epidemiological studies, and statistical methods for the analysis of biostatistical data.

Clinical trials: the study protocol, justification and purposes of randomisation, parallel group designs, ethical considerations, methods of randomising, (including biased coin designs), trial size; alternative trial designs and particularly cross-over, factorial and sequential designs.

Methods for the analysis of biostatistical data: 2 x 2 tables, Fisher's Exact test, Pearson's Chi-squared test, McNemar's test, Simpson's paradox, odds, odds ratio, combining several 2 x 2 tables, the Mantel-Haenszel test; binary logistic regression; survival analysis. Epidemiology: cohort and case-control studies; diagnostic tests and screening; epidemic models.

*assessment:* formal exam (at least 80%); exercises, practicals and project work (at most 20%)

### 5030 Multivariate Analysis III

*level:* III *points value:* 2 *duration:* semester 2

*availability:* not offered in 1996

*prerequisites:* 9786 Mathematics I (Pass Div I) or 9595 Mathematics IIM (Pass Div I); 5543 Statistical Practice I (Pass Div I)

*assumed knowledge:* see initial statement for Level III subjects.

*contact hours:* 2 lectures and 1 hour of practical work a week

*content:* Multivariate analysis: Multinomial regression, maximum likelihood estimators of the regression and variance matrices, the likelihood ratio test for the general linear hypothesis and the moments of its null distribution. Tests for extra variates, sample and population multiple discriminant functions, profile analysis. Multivariate data analysis using the Splus computer program. Tensor product of vector spaces and matrices. Nonlinear regression.

*assessment:* formal exam (at least 80%) and exercises, practicals and project work (at most 20%).

### 8387 Non-parametric Methods III

*level:* III *points value:* 2 *duration:* semester 2

*prerequisites:* 9786 Mathematics I (Pass Div I) or 9595 Mathematics IIM (Pass Div I); 5543 Statistical Practice I (Pass Div I)

*assumed knowledge:* 3989 Statistical Modelling III, 7113 Theory of Statistics III

*contact hours:* 2 lectures and 1 hour of practical work a week

*content:* Rank based non-parametric tests for the comparison of two or more treatments, with and without blocking. Tests of randomness and independence. Exact and asymptotic results under the randomisation model, various population and finite population models. Parallels between non-parametric and parametric methods.

*assessment:* exercises, practicals during the semester, exam at the end of the semester

### 2993 Statistics for Quality Improvement III

*level:* III *points value:* 2 *duration:* semester 1

*prerequisites:* 9786 Mathematics I (Pass Div I) or 9595 Mathematics IIM (Pass Div I); 5543 Statistical Practice I (Pass Div I)

*assumed knowledge:* 4523 Statistical Practice II

*contact hours:* 2 lectures and 1 hour of practical work per week

*content:* The Deming philosophy of quality; design and use of control charts for attributes and variables; process capability; CUSUM charts; the 7 tools of Total Quality Control; industrial experiments, particularly fractional factorial and response surface designs; Taguchi methods; signal/noise ratios; components of variance; measurement error.

*assessment:* formal exam (at least 80%) and exercises, practicals and project work (at most 20%).

### 5675 Time Series III

*level:* III *points value:* 2 *duration:* semester 2

*prerequisites:* 9786 Mathematics I (Pass Div I) or 9595 Mathematics IIM (Pass Div I); 5543 Statistical Practice I (Pass Div I)

*assumed knowledge:* see initial statement for Level III subjects

*contact hours:* 2 lectures and 1 hour of practical work a week

*content:* Stationary processes in discrete time: autocorrelation function, its properties and estimates, linear filters and suppression of noise. Estimation of trend and seasonal components. Autoregressive and Moving Average processes. Identification and invertibility. Box-Jenkins modelling and forecasting, use of MINITAB for estimating Box-Jenkins coefficients.

*assessment:* formal exam (at least 80%) and exercises, practicals and project work (at most 20%)

## Honours Level

### 1346 Honours Statistics (B.A. or B.Sc.)

*level:* IV *points value:* 24 *duration:* full year

*note:* Students are required to consult with the Head of the Department of Statistics preferably no later than the end of the year preceding their enrolment, in order to ensure that they have obtained the necessary proposed pre-requisite knowledge at a satisfactory standard. All students are required to obtain the approval of the Head of the Department of Statistics before enrolling for 1346 Honours Statistics.

*prerequisites:* For students who have completed third year studies before 1989:

- (a) 2403 Mathematical Statistics III;
- (b) a third-year subject offered by another Department in the Faculty of Mathematical and Computer Sciences.

For students who have completed Level III studies after 1988:

- (a) Completion of a major in Statistics at sufficiently high standard;
- (b) Passes at a sufficiently high standard in Level III subjects to the value of at least ten points taught by a Department in the Faculty of Mathematical and Computer Sciences.

Students with a different background of third-year subjects may be accepted at the discretion of the Head of the Department of Statistics.

*content:* The lecture program will be determined from year to year. Students will be required to make a selection from subjects offered by the Department of

Statistics, by other departments of the Faculty of Mathematical and Computer Sciences, by the School of Information Science and Technology at The Flinders University of South Australia and by such other departments as may be agreed to by the Department of Statistics. Some compulsory subjects may be prescribed. Each student will be assigned a supervisor who will advise on the choice of lecture program and give guidance in the writing of a project. Work on this project should begin in the Department in the first week of February and should be completed by the end of the second semester's lecture program.

note: For other possible Honours combinations, please refer to page 780.

# Graduate Certificate in Mathematics Education

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar.

As all students must comply with these rules, students are advised to refer to them to gain an understanding of their rights and responsibilities with regard to course matters.

## Specific Course Rules

### 1 Admission requirements

1.1 An applicant for admission to the course of study for the Graduate Certificate shall:

- (a) have qualified for a degree and a Graduate Diploma in Education of the University or hold qualifications from another institution accepted by the University for the purpose.
- (b) have completed such other work as may be prescribed in the Specific Course Rules.

1.2 Subject to the approval of the Council, the Faculty may, in special cases and subject to such conditions as it may see fit to impose in each case, accept as a candidate for the Certificate an applicant who does not satisfy the requirements of 1.1(a) and 1.1(b) above but who has given evidence satisfactory to the Faculty of fitness to undertake work for the Certificate.

### 2 Qualification requirements

2.1 To qualify for the Certificate a candidate shall satisfactorily complete a course of study and comply with conditions as prescribed in the Specific Course Rules.

### 3 Duration of course

3.1 Except with the special permission of the Faculty the course for the Certificate shall be completed in not more than two years of part-time study.

### 4 Review of Academic Progress

4.1 If in the opinion of the Faculty a candidate for the Certificate is not making satisfactory progress, the Faculty may, with the consent of the Council, terminate the candidature and the candidate shall cease to be enrolled for the Certificate.

### 5 Subjects of study

5.1 The following shall be the subjects for the Graduate Certificate in Mathematics Education.

- (a) core subjects (provisional list)

#### Group A core subjects

code	subject title	points
9143	School Mathematics Curriculum	2
4931	Exploratory Data Analysis	2
3825	Geometry for Teachers	2
1231	Thinking Mathematically	2
7724	Applying Mathematics	2

#### Group B core subjects

8762	Modern Statistics	2
2741	Modelling with Mathematics	2
8575	Discrete Mathematics	2
1707	Mathematics in Education	2

- (b) further subjects

#### Group C subjects

7798	Certificate Project	2
6162	Certificate Project (Full-Year)	2
3923	Minor Certificate Project	1
7843	Certificate Mathematical Studies	2
3404	Directed Reading Studies	2
8289	Minor Directed Reading Studies	1

#### Group D subjects

Any other mathematical sciences or mathematics education subject or other relevant subject offered within The University of Adelaide and approved for the purpose by the Dean (or nominee).

### Group E subjects

Other mathematical sciences or mathematics education subjects which may be offered from time to time by The Flinders University of South Australia and The University of South Australia and are approved for the purpose by the Dean (or nominee).

- 5.2 Each year the Faculty shall determine which of the above subjects will be offered in the following year and in which semesters they will be offered.
- 5.3 Notwithstanding the above, the availability of all subjects is conditional on the availability of staff and facilities.

## 6 Course of study

- 6.1 To qualify for the Certificate a candidate shall satisfactorily complete subjects from 5 above with an aggregate value of at least 12 points satisfying the following requirements:
- Unless otherwise agreed by the Faculty, the subjects presented for the Certificate must include Core subjects with an aggregate value of at least 8 points.
  - The subjects presented for the Certificate shall not include any subject which is, in the opinion of the Faculty, substantially equivalent to another subject presented for the Certificate or already counted towards another qualification gained by the candidate.
- 6.2 Candidates wishing to enrol in subjects for which they do not have the necessary preliminary knowledge may be required to take such bridging studies prior to the commencement of their Certificate studies as may be deemed appropriate by the Dean (or nominee).
- 6.3 To complete a course of study, a candidate, unless exempted by the Faculty, shall:
- regularly attend the prescribed lectures, tutorials, workshops and seminars; and
  - undertake such computing work, practical work, field work and case studies, do such reading, written and oral work and pass such examinations, as the Faculty may prescribe.
- 6.4 The syllabus for each subject for the Certificate shall specify whether passes shall be non-graded or whether there shall be four classifications of pass: Pass with High Distinction, Pass with Distinction, Pass with Credit, and Pass.

- 6.5 Each candidate's course of study must be approved by the Dean (or nominee) at enrolment each year.

The Faculty of Mathematical and Computer Sciences, in co-operation with the Department of Education offers a Graduate Certificate in Mathematics Education. The aim of the course is to enable graduates in teaching to gain professional development in modern mathematics content and processes, in mathematics education and in relevant teaching methodology, within an applied context.

The course is intended for holders of a qualification for teaching at diploma or degree level, or equivalent (for example a three-year degree plus a diploma or a four-year bachelor of education degree). Graduates wishing to enrol should consult The University of Adelaide Liaison Officer, Graduate Certificate in Mathematics Education, through the Office of the Dean in early October of the year before they plan to enrol.

In some cases, students may need to undertake preliminary bridging studies prior to the time of enrolment, to ensure that they have the necessary mathematical background indicated in the syllabuses.

Each student will be assigned a supervisor who will advise, where applicable, on project work, directed reading and selection of subjects. At enrolment time, following consultation between the student and supervisor, each student's program must be formally approved by the Dean or nominee (normally by the Liaison Officer).

The course may be taken in up to two years of part-time study. It consists of subjects with an aggregate value of at least 12 points, not equivalent to subjects already offered by the candidate for another award. These subjects must include core subjects with an aggregate value of at least 8 points. (If subjects equivalent to core subjects have been offered for another award, other subjects may be specified in their place.)

The core subjects are currently offered in a joint program by the South Australian higher education institutions, in association with the Adelaide Consortium for Mathematics Education. A 2 point core subject typically involves 26 to 30 contact hours; some subjects will be based entirely on seminars and workshops while others will involve formal lectures with some associated workshops.

The core subjects are divided into two groups and normally a student's core subjects will all be from the same group. Group A core subjects are intended as a basis for 're-skilling' of teachers who are currently teaching some junior secondary mathematics, or who wish to undertake such teaching, but whose training was in some other area (for example, science). Group

B core subjects are intended for professional development of mathematics specialist teachers who wish to update their background in mathematics relevant to the senior secondary curriculum, in mathematics education and teaching methodology and in the use of modern technology. While the course focuses mainly on these two categories, other applicants (for example, primary teachers) will be accepted if a satisfactory program of study appropriate to their needs is available within the framework of the Certificate.

Students enrolled for the Certificate at The University of Adelaide will usually select their non-core subjects from Group C, which comprises subjects offered at The University of Adelaide. They will normally include a subject whose work requirement consists of a project.

In the course for the Certificate there will be an emphasis on applications, investigations and problem-solving, and all students will take some subjects involving the use of computer packages (though no knowledge of computer programming is required). Project work may involve practical experience in industry, business or a school or tertiary education.

Students who enrol for the degrees of Bachelor of Educational Studies, Master of Educational Studies or Master of Education awards are able to apply for credit to a maximum value of 12 points on account of work completed towards this Graduate Certificate.

## Syllabuses

---

### quota

May apply to course enrolments for students taking Group A core subjects and for those taking Group B core subjects.

### contact hours

The core subjects are currently offered in a joint program by the South Australian higher education institutions. This part of the course may be taught at the campus of another institution.

### prescribed and recommended reading

Prescribed and recommended reading will play an important part in the course.

Information on appropriate textbooks will be provided by the Department concerned, and at the preliminary lecture in Orientation Week.

Reading lists provided for each subject will cover relevant material in books and journal articles and also in packages produced by centres such as the Shell Centre for Mathematics and the Open University.

### assessment and subject requirements

To be determined in consultation with students at or before commencement of study of each subject and confirmed in writing within one week of commencement. Details to be determined include the nature of the requirements for each component and the relative weight given to the components (eg, such of the following as are relevant: seminar papers; seminar or workshop participation; written or practical or computing assignments; essays, reports or book reviews; written or oral exam; project). Passes may be either reported as non-graded passes or classified, as specified in the syllabus for the subject.

## core subjects

### Group A

*focusing on junior secondary mathematics*

---

#### 9143 School Mathematics Curriculum

*points value:* 2                      *duration:* semester 1 or 2

*contact hours:* 2 hours per week for 13 to 15 weeks or equivalent over a shorter period

*content:* The subject aims to develop an awareness of the junior mathematics school curriculum in the context of the overall mathematics curriculum (from Reception to Year 12 and beyond). Issues related to curriculum objectives, and consequent appropriate teaching methodologies, will be investigated, along

with a more detailed analysis of particular areas of the curriculum. Students will be expected to read widely in their areas of interest. Reading lists will be developed by consultation between students and staff.

*assessment:* Assessment will be determined in consultation with students at or before commencement of study of the subject and will be based on practical curriculum development projects of use to students in their work.

#### 4931 Exploratory Data Analysis

*points value:* 2                      *duration:* semester 1 or 2

*contact hours:* 2 hours per week for 13 to 15 weeks or equivalent over a shorter period

*content:* The subject aims to help students gain a practical understanding of the application of exploratory data analysis, within the context of investigations, sufficient for the purposes of teaching at junior secondary level. It introduces the fundamental ideas and nature of statistics: data (sources, types, levels), graphical tools (stem and leaf, box plots), summary statistics. It considers exploratory tools for single and paired, variables (eg, box trace, correlation, scatter plot, resistant line) and concludes with a brief introduction to the nature and philosophy of hypothesis testing.

*assessment:* will be determined in consultation with students at or before commencement of study of the subject and will be based on class work and assignments rather than examination.

#### 3825 Geometry for Teachers

*points value:* 2                      *duration:* semester 1 or 2

*contact hours:* 2 hours per week for 13 to 15 weeks or equivalent over a shorter period

*content:* The subject aims to help students develop skills and understanding in solving a range of elementary geometrical problems and in relating these problems to a variety of problems from outside mathematics, particularly to computer graphics where possible. It provides a practical approach to a selection of topics in two and three dimensional geometry which are relevant to applications and hence to the teaching of geometry. Associated workshops will focus on teaching methodology and also include some historical and cultural background.

*assessment:* to be determined in consultation with students at or before commencement of study of the subject

Assessment to be based on class work and assignments rather than examination.

**Group B**

**1231 Thinking Mathematically**

*points value:* 2                      *duration:* semester 1 or 2

*contact hours:* 2 hours per week for 13 to 15 weeks or equivalent over a shorter period

*content:* The subject focuses on aspects of mathematical thinking relevant to the teaching of secondary mathematics, particularly problem solving (including mathematisation of real life problems). Participants will develop their own skills in this area and gain a background of ideas and experience which will help the teaching of such skills. Background covered will include the relevant ideas of cognitive science and the approaches of mathematical authors such as Polya and Mason. Workshop sessions will provide practical experience using tools from junior secondary mathematics, with applications to class room practice.

*assessment:* to be determined in consultation with students at or before commencement of study of the subject

Assessment to be based on class work and assignments rather than examination.

**7724 Applying Mathematics**

*points value:* 2                      *duration:* semester 1 or 2

*contact hours:* 2 hours per week for 13 to 15 weeks or equivalent over a shorter period

*content:* The aim of the subject is to introduce junior secondary mathematics teachers to the application of mathematical modelling to a broad range of problems. On completion of the subject, participants should have developed: an appreciation of the potential for mathematics as a medium for modelling a large variety of problems; skills in recognising appropriate modelling methods; and mathematical skills in using models to solve a number of problems. The content will be based mainly on material in 'Mathematics at Work'. The emphasis will be on the modelling process and the implementation of models using computer software. Topics will be drawn from the following: financial mathematics (income and tax, budgeting, investment, inflation and insurance, and credit); probability (insurance, games of chance, and simulation); linear programming (models of transportation, depot location and rostering); growth and decay (a discussion of population and radioactive decay).

*assessment:* to be determined in consultation with students at or before commencement of study of the subject

Assessment to be based on assignments and seminar presentation rather than examination.

*assumed knowledge:* These subjects will assume that students have passed at least one first year tertiary level mathematics subject such as Mathematics I or Mathematics IM at The University of Adelaide.

**8762 Modern Statistics**

*points value:* 2                      *duration:* semester 1 or 2

*contact hours:* 2 hours per week for 13 to 15 weeks or equivalent over a shorter period

*content:* The subject aims to help students examine and use modern statistical techniques, within the context of investigations, and would provide suitable preparation for teaching applications of statistics within Year 12 subjects. It introduces data sources types and levels. It considers graphical tools, stem and leaf plots, and summary statistics. The subject considers single and multivariate cases, box trace, correlation, scatterplot, resistant line, least square, regression, time series and smoothing. The subject culminates with an introduction to the nature and philosophy of hypothesis testing using a variety of non-parametric tests to exemplify the concepts involved.

*assessment:* to be determined in consultation with students at or before commencement of study of the subject

Assessment to be based on class work and assignments rather than examination.

**2741 Modelling with Mathematics**

*points value:* 2                      *duration:* semester 1 or 2

*contact hours:* 2 hours per week for 13 to 15 weeks or equivalent over a shorter period

*content:* The subject aims to help students develop the modelling process as well as explore mathematical techniques. It introduces topics via the use of case studies. It considers curve fitting in the context of advertising and sales, administration of drugs, supply and demand, car operating costs, alcohol and accidents and handicapping. The subject considers algebraic equations for rostering, minimisation of materials, annuities, and curve fitting. The subject develops linear programming models for product mix, rostering, portfolio management, transportation and location. It concludes with an introduction to difference and differential equations for compound interest, growth and decay and population models. Workshop topics will include generation of case studies suitable for classroom use.

*assessment:* to be determined in consultation with students at or before commencement of study of the subject

Assessment to be based on class work and assignments rather than examination.

### 8575 Discrete Mathematics

*points value:* 2 *duration:* semester 1 or 2

*contact hours:* 2 hours per week for 13 to 15 weeks or equivalent over a shorter period

*content:* The subject provides an introduction to topics in discrete mathematics relevant to applications, particularly in decision making, computer science and communications. Topics will be chosen from those becoming prominent in early tertiary courses and relevant to enrichment of secondary mathematics studies. A selection of the following will be included: elementary logic and truth tables; counting processes and probabilistic modelling; recurrence and iteration; algorithms and complexity; representation of discrete systems via graphs, networks and groups; applications to encryption and error correcting codes.

*assessment:* To be determined in consultation with students at or before commencement of study of the subject. Assessment to be based on class work and assignments rather than examination.

### 1707 Mathematics in Education

*points value:* 2 *duration:* semester 1 or 2

*contact hours:* 2 hours per week for 13 to 15 weeks or equivalent over a shorter period

*content:* Critical concepts in school mathematics. Samples of current practice in school mathematics. Examination of appropriate methodology arising from considerations of current issues such as alternate modes of evaluation and assessment, calculators and computers, gender, special groups of learners.

*assessment:* to be determined in consultation with students at or before commencement of study of the subject

Assessment to be based on class work and assignments rather than examination.

## further subjects

### Group C

---

Students enrolled at The University of Adelaide will normally select their non-core subjects from this group.

### 7798 Certificate Project

*points value:* 2 *duration:* full year

*requirement:* The student will undertake a project in mathematics or mathematics education with the general guidance of the student's supervisor. The project may, for example, involve an investigation in mathematics or computing, or an applied problem, or a

period of practical experience in business and industry, or in a classroom situation in a school or tertiary institution. The nature and scope of the project will be agreed by student and supervisor before detailed work commences.

*assessment:* to be based on a written report submitted by an agreed date

### 6162 Certificate Project (Full-Year)

*points value:* 2 *duration:* full year

*requirement:* This subject is similar to 7798 Certificate Project except that work on the project is done at a slower pace and extends over a full year.

*assessment:* to be based on a written report submitted by an agreed date

### 3923 Minor Certificate Project

*points value:* 1 *duration:* semester 1 or 2

*requirement:* This subject is similar to 7798 Certificate Project except that the points value and time commitment are less. It is particularly suitable for projects based on a short period of work experience.

*assessment:* to be based on a written report or folio of work submitted by an agreed date

### 7843 Certificate Mathematical Studies

*points value:* 2 *duration:* semester 1 or 2

*contact hours:* 2 hours per week

*prerequisite:* a qualification acceptable to the relevant department in the Faculty of Mathematical Sciences

*content:* One option (not already offered for any award from those offered in Honours Pure Mathematics, Honours Applied Mathematics, Honours Statistics, Honours Computer Science and Honours Mathematical Physics, selected in consultation with the student's supervisor. (Honours options recommended for prospective teachers are particularly suitable for this purpose.)

*assessment:* see Honours Mathematical Sciences syllabuses

### 3404 Directed Reading Studies

*points value:* 2 *duration:* semester 1 or 2

*requirement:* The student will undertake a program of independent study in a clearly defined area, based mainly on reading and also, where available, on attendance at research seminars. The program will be determined in consultation with the student's supervisor (or, where necessary, with another supervisor appointed for the purpose) who will also be available for consultation as necessary.

*assessment:* to be determined in consultation with student based on continuous assessment or on a written report or folio of work to be submitted by an agreed date

### **8289 Minor Directed Reading Studies**

*points value:* 1      *duration:* semester 1 or 2

*requirement:* This subject is similar to 3404 Directed Reading Studies except that the points value and time commitment are less and the scope is accordingly narrower. It can be taken in conjunction with 3923 Minor Certificate Project.

*assessment:* as for 3404 Directed Reading Studies except for scale

### **Group D**

---

For syllabuses of other mathematical sciences or mathematics education subjects or other relevant subjects offered within The University of Adelaide please see the relevant entries elsewhere in this Calendar.

Note that inclusion of such subjects in the Graduate Certificate requires approval by the Dean or nominee (normally the Liaison Officer). Approval will normally be given for inclusion of such a subject provided it is appropriate to the student's background and interests and the aims of the Graduate Certificate and does not significantly overlap other subjects offered for the Graduate Certificate (or for another previous award).

### **Group E**

---

These are subjects in other institutions. No subjects are currently approved for this group, but a particular subject could be approved under special circumstances. Students normally enrol in the institution where the projects and other non-core subjects available are appropriate to their interests and needs.

# Graduate Certificate in Telecommunications

note: Postgraduate tuition fees may apply to this course.

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar.

As all students must comply with these rules, students are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

## Specific Course Rules

### 1 Admission requirements

1.1 Except as provided for in 1.2 an applicant for admission to the course of study for the Graduate Certificate shall:

- (a) have qualified for a degree of the University or for a degree of another institution accepted for the purpose by the University.
- (b) have obtained the approval of the Dean (or nominee) of the Faculty of Mathematical and Computer Sciences.

1.2 Subject to the approval of the Council the Faculty may, in special cases and subject to such conditions (if any) as it may see fit to impose in each case, accept as a candidate for the Certificate a person who does not qualify for admission to the course under 1.1 (a) and 1.1(b) but has given evidence satisfactory to the Faculty of fitness to undertake work for the Certificate.

### 2 Qualification requirements

2.1 To qualify for the Certificate a candidate shall satisfactorily complete a course of full-time study extending over at least one semester or of part-time study extending over at least one year. Except with the permission of the Faculty the work for the Certificate shall be completed within two years.

### 3 Assessment and examinations

3.1 There shall be four classifications of pass in each subject for the Certificate: Pass with High Distinction, Pass with Distinction, Pass with Credit, and Pass.

3.2 A candidate shall not be eligible to attend for examination unless the prescribed work has been completed to the satisfaction of the teaching staff concerned.

3.3 A candidate who fails in a subject and desires to take the subject again shall again attend lectures and satisfactorily do such written and practical work as the teaching staff concerned may prescribe, unless specifically exempted therefrom after written application to the Registrar for such exemption.

3.4 A candidate who has twice failed the examination in any subject or division of a subject may not enrol for that subject again except by special permission to be obtained in writing from the Registrar and then only under such conditions as may be prescribed.

3.5 For the purpose of this Rule a candidate who is refused permission to sit for examination, or who without a reason accepted by the Dean of Mathematical and Computer Sciences (or nominee) fails to attend all or part of a final examination (or supplementary examination if granted) after remaining enrolled for at least eight teaching weeks of that semester, shall be deemed to have failed the examination.

### 4 Subjects of study

4.1 The following shall be the subjects for the Graduate Certificate in Telecommunications.

(a) Group A subjects: Faculty of Mathematical and Computer Sciences

code	subject title	points
3908	Communication Network Design	2
8427	Mathematical Coding and Cryptology	2
2039	Mathematical Programming III	2
2314	Optimisation III	2
2208	Random Processes III	2
4485	Teletraffic Models	2
9694	Transform Methods and Signal Processing	2

- (b) Group B subjects: Electrical and Electronic Engineering Department
- |   |   |
|---|---|
| 7529 Network Architecture and Switching | 2 |
| 1312 Communication Systems              | 2 |
| 9913 Signal Processing                  | 1 |
| 5300 Telecommunication Networks         | 1 |
| 9334 Advanced Communication Theory      | 1 |
| 1008 Advanced Signal Processing         | 1 |
- (c) Group C subjects: Electronic Engineering, University of South Australia
- |  |   |
|--|---|
| 8235 Communications System Theory          | 2 |
| 7532 Digital Transmission                  | 2 |
| 2277 Error Control Coding                  | 2 |
| 2302 Mobile Communications                 | 2 |
| 7156 Network Protocols                     | 2 |
| 2796 Optical Communications (Uni. of S.A.) | 2 |
| 5640 Satellite Communications              | 2 |
| 4327 Speech Processing                     | 2 |
- (d) Group D subjects
- Other relevant subjects or work as may be approved by the Dean of Mathematical and Computer Sciences (or nominee).

4.2 Each year the Faculty shall determine which of the above subjects will be offered in the following year.

4.3 Notwithstanding the above, the availability of all subjects is conditional on the availability of staff and facilities.

## 5 Course of study

The Graduate Certificate in Telecommunications is a collaborative program between the Faculties of Mathematical and Computer Sciences and Engineering and is administered by the Faculty of Mathematical and Computer Sciences.

5.1 To qualify for the certificate a candidate shall satisfactorily complete subjects from 4 with an aggregate points value of at least 12 and satisfy the requirement that the subjects presented shall not include any which is, in the opinion of the Faculty, substantially equivalent to another subject presented for the Certificate or already counted towards another qualification gained by the candidate.

5.2 Candidates wishing to enrol in subjects for which they do not have the necessary preliminary knowledge may be required to take such bridging studies prior to the commencement of their Certificate studies as may be deemed appropriate by the Dean of the Faculty of Mathematical and Computer Sciences (or nominee).

5.3 To complete a course of study, a candidate, unless exempted by the Faculty, shall:

- regularly attend the prescribed lectures, tutorials, workshops and seminars; and
- undertake such computing work, practical work, field work and case studies, do such reading, written and oral work and pass such examinations, as the Faculty may prescribe.

5.4 Each candidate's course of study must be approved by the Dean of the Faculty of Mathematical and Computer Sciences (or nominee) at enrolment each year.

## Syllabuses

The degree draws upon courses on telecommunications given by the Departments of Mathematics and Electrical and Electronic Engineering at The University of Adelaide and by the School of Electronic Engineering at the University of South Australia.

It is designed to broaden the participants' knowledge of telecommunications by utilising the wide spread of knowledge and experience in South Australian universities.

# Graduate Diploma in Applied Statistics

note: Postgraduate tuition fees may apply to this course.

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar.

As all students must comply with these rules, students are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

## Specific Course Rules

### 1 Admission requirements

- 1.1 Except as provided in 1.2 a candidate for admission to the course for the Graduate Diploma shall have qualified for admission to a degree of the University or to a degree of another university accepted for the purpose by the University and have obtained the approval of the Department of Statistics.
- 1.2 Subject to the approval of the Council the Faculty may, in special cases and subject to such conditions (if any) as it may see fit to impose in each case, accept as a candidate for the Graduate Diploma a person who does not hold a degree of a university but has given evidence satisfactory to the Faculty of his fitness to undertake work for the diploma.

### 2 Duration of course

- 2.1 To qualify for the Graduate Diploma a candidate shall satisfactorily complete a course of full-time study extending over at least one year or of part-time study extending over at least two years.

### 3 Assessment and examinations

- 3.1 There shall be four classifications of pass at an annual examination in any subject for the diploma; Pass with High Distinction, Pass with Distinction, Pass with Credit, and Pass.
- 3.2 A candidate who fails to pass in a subject and desires to take the subject again shall again attend lectures and satisfactorily do such written and practical work as the professor or lecturer concerned may prescribe, unless specifically exempted therefrom after written application to the Registrar for such exemption.
- 3.3 A candidate who has twice failed to pass the examination in any subject or division of a subject may not enrol for that subject again except by special permission to be obtained in writing from the Registrar and then only under

such conditions as may be prescribed.

- 3.4 For the purpose of this Rule a candidate who is refused permission to sit for examination, or who fails, without a reason accepted by the Head of the Department of Statistics as adequate, to attend all or part of a final examination (or supplementary examination if granted) after remaining enrolled for at least eight teaching weeks of that semester, shall be deemed to have failed to pass the examination.

### 4 Course of study

- 4.1 A candidate for the Graduate Diploma shall regularly attend lectures and tutorials, do such written work as may be prescribed, and pass examinations in a selection of subjects chosen from the following list, to an aggregate value of at least 16 points, with at most 6 points from Level II:

code	subject title	points
(a)	compulsory subject	
2349	Statistical Software	2
(b)	Level II Statistics subjects	
4107	Introduction to Mathematical Statistics II	2
1675	Statistical Modelling and Computation II	2
4523	Statistical Practice II	2
8878	Theory of Statistics II	2
(c)	Level III Statistics subjects	
9800	Experimental Design III	2
1411	Life Contingencies III	2
8892	Medical Statistics III	2
5030	Multivariate Analysis III	2
8387	Non-parametric Methods III	2
4853	Sampling Theory and Practice III	2

3989 Statistical Modelling III	3
2993 Statistics for Quality Improvement III	2
7113 Theory of Statistics III	3
5675 Time Series III	2

(d) at most two of the Level III Applied Mathematics subjects

4447 Applied Probability III	2
2506 Mathematical Biology III	2
2039 Mathematical Programming III	2
2208 Random Processes III	2

(e) topics taught by the Discipline of Statistics at The Flinders University of South Australia

65303 Applied Statistical Science A
65304 Applied Statistical Science B
65306 Linear Model Theory
65351 Random Variables
65305 Stochastic Process
65307 Theory of Statistical Inference

note: For details of these topics see Volume II of the Calendar of The Flinders University of South Australia. Students wishing to enrol in these subjects for credit to their Adelaide Graduate Diploma in Applied Statistics need to obtain approval in writing from the Registrar in advance and must comply with Flinders University enrolment procedures.

(f) Statistics subjects listed in 8.1 for the degree of Master of Mathematical Science.

(g) Other subjects which may be offered from time to time by the Department of Statistics in The University of Adelaide, the Discipline of Statistics in The Flinders University of South Australia and the Biometry Section, the Waite Campus, The University of Adelaide.

## 4.2 Project

6181 Statistics Project	8
-------------------------	---

In addition to the course work each student will be expected to complete a project chosen in consultation with and supervised by a supervisor from either the Biometry Section, Waite Campus, or the Department of Statistics.

**4.3** On the recommendation of the Head of the Department of Statistics, the Faculty may exempt a candidate from the need to satisfy the pre-requisites prescribed for the course.

## Syllabuses

### textbooks

Information on appropriate textbooks will be provided by the Department concerned, and at the preliminary lecture in Orientation Week.

Students are expected to procure the latest edition of all textbooks prescribed.

### examinations

For each subject students may obtain from the department concerned details of the examination in that subject including the relative weights given to the components (eg such of the following as are relevant: assessments, semester or mid-year tests, essays or other written or practical work, final written examinations, *viva voce* examinations.)

# Graduate Diploma in Computer Science

note: Postgraduate tuition fees may apply to this course.

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar.

As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

## Specific Course Rules

### 1 Admission requirements

- 1.1 Except as provided for in 1.2 a candidate for admission to the course for the Graduate Diploma shall have qualified for admission to a degree of the University or to a degree of another university accepted for the purpose by the University and have obtained the approval of the Department of Computer Science.
- 1.2 Subject to the approval of the Council the Faculty may, in special cases and subject to such conditions (if any) as it may see fit to impose in each case, accept as a candidate for the Graduate Diploma a person who does not hold a degree of a university but has given evidence satisfactory to the Faculty of his fitness to undertake work for the Graduate Diploma.

### 2 Duration of course

- 2.1 To qualify for the Graduate Diploma a candidate shall satisfactorily complete a course of study extending over at least one year.

### 3 Assessment and examinations

- 3.1 There shall be four classifications of pass at an examination in any subject for the Graduate Diploma: Pass with High Distinction, Pass with Distinction, Pass with Credit and Pass.
- 3.2 A candidate who fails to pass in a subject and desires to take the subject again shall again attend lectures and satisfactorily do such written and practical work as the professor or lecturer concerned may prescribe, unless specifically exempted therefrom after written application to the Registrar for such exemption.
- 3.3 A candidate who has twice failed to pass the examination in any subject or division of a subject may not enrol for that subject again except by special permission to be obtained in writing from the Registrar and then only under such conditions as may be prescribed.

- 3.3 For the purpose of this Rule a candidate who is refused permission to sit for examination, or who fails, without a reason accepted by the Head of the Department of Computer Science as adequate, to attend all or part of a final examination (or supplementary examination if granted) after remaining enrolled for at least eight teaching weeks of that semester, shall be deemed to have failed to pass the examination.

### 4 Course of study

- 4.1 A candidate for the Graduate Diploma shall regularly attend lectures and tutorials, do such written work as shall be prescribed, and pass examinations in subjects offered by the Department of Computer Science totalling 24 points, including the 3 point subject 6263 *Software Engineering and Project*. Normally this would require at least 8 points at Level II and at least 7 points at Level III from the following list.

code	subject title	points
(a)	(i) Level II subjects:	
	9492 Computer Science Concepts	3
	1956 Computer Systems	2
	3169 Database and Information Systems	2
	5132 Data Structures and Algorithms	2
	3655 Numerical Methods	2
	2430 Programming Paradigms	2
	(ii) Level III subjects:	
	9811 Advanced Programming Paradigms	2
	6378 Artificial Intelligence	2

1234	Compiler Construction and Project	3
5141	Computer Architecture	2
2328	Computer Networks and Applications	2
3007	Knowledge Representation	2
9820	Numerical Analysis	2
4468	Operating Systems	2
2382	Programming Techniques	2
1116	Systems Analysis	2

(b) Subject to permission from the Head of the Department of Computer Science (or nominee) a student may also undertake a selection of subjects from the Specific Course Rules for the degree of Master of Computer Science.

4.2 On the recommendation of the Head of the Department of Computer Science, the Faculty may exempt a candidate from the need to satisfy the pre-requisites prescribed for the course.

## Syllabuses

---

### textbooks and reference books

Booklists will be made available by the Department of Computer Science.

### examinations

Details of subject assessment are made available at the relevant lectures during Orientation Week.

### 9492 Computer Science Concepts

*level:* II *points value:* 3 *duration:* summer semester

*contact hours:* 15 hours per week for 4 weeks

*content:* Programming in Ada: types, control structures, procedures and functions, input and output. Computer systems: assembly and machine language, gates, registers, data buses, adders. System software: compilers and operating systems. Discrete mathematics: logic, induction, set theory, relations and boolean algebra, graphs and counting. Algorithms: complexity, computability, pre-conditions, loop invariants, termination. AI data processing.

*assessment:* 2 hour written exam and compulsory practical exercises

*note:* Graduate Diploma students should note that Computer Science Concepts commences in late January and is run as a summer semester/pre-semester one course.

### All other Diploma subjects

*syllabus details:* see Bachelor of Science in the Faculty of Mathematical and Computer Sciences

# Graduate Diploma in Mathematical Science

note: Postgraduate tuition fees may apply to this course.

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar.

As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

## Specific Course Rules

### 1 Admission requirements

1.1 Except as provided for in 1.2 an applicant for admission to the course of study for the Graduate Diploma shall:

- (a) have qualified for a degree of the University or for a degree of another institution accepted for the purpose by the University.
- (b) have obtained the approval of the Dean (or nominee) of the Faculty of Mathematical and Computer Sciences.

1.2 Subject to the approval of the Council the Faculty may, in special cases subject to such conditions (if any) as it may see fit to impose in each case, accept as a candidate for the Graduate Diploma a person who does not hold a degree of a university but has given evidence satisfactory to the Faculty of fitness to undertake work for the Graduate Diploma.

### 2 Duration of course

2.1 To qualify for the Graduate Diploma a candidate shall satisfactorily complete a course of full-time study extending over at least one year or of part-time study extending over at least two years. Except with the permission of the Faculty, the work for the Graduate Diploma shall be completed within four years.

### 3 Assessment and examinations

3.1 There shall be four classifications of pass in each subject for the Graduate Diploma: Pass with High Distinction, Pass with Distinction, Pass with Credit, and Pass.

3.2 A candidate shall not be eligible to attend for examination unless the prescribed work has been completed to the satisfaction of the teaching staff concerned.

3.3 A candidate who fails to pass in a subject and desires to take the subject again shall again attend lectures and satisfactorily do such written

and practical work as the teaching staff concerned may prescribe, unless specifically exempted therefrom after written application to the Registrar for such exemption.

3.4 A candidate who has twice failed the examination in any subject or division of a subject may not enrol for that subject again except by special permission to be obtained in writing from the Registrar and then only under such conditions as may be prescribed.

3.5 For the purpose of this Rule a candidate who is refused permission to sit for examination, or who without a reason accepted by the Dean of Mathematical and Computer Sciences (or nominee) fails to attend all or part of a final examination (or supplementary examination if granted) after remaining enrolled for at least eight teaching weeks of that semester, shall be deemed to have failed the examination.

### 4 Course of study

4.1 To qualify for the Graduate Diploma, a candidate shall satisfactorily complete work to the value of at least 24 points.

4.2 The courses of study for the Graduate Diploma in Mathematical Science will consist of subjects to the value of at least 20 points chosen from:

(a) Any Level III subject listed in the Calendar by the Departments of the Faculty of Mathematical and Computer Sciences (including Level III subjects listed in the Faculty of Mathematical and Computer Sciences entry by the Department of Physics and Mathematical Physics).

(b) Other subjects listed in the Calendar for any Ordinary Degree of the University approved for the purpose by the Dean of Mathematical and Computer Sciences (or nominee) except that subjects chosen under this provision shall:

(i) not comprise more than one third of the requirements for the Graduate Diploma without the explicit approval of the Faculty.

(ii) Be chosen in consultation with the Dean of Mathematical and Computer Sciences (or nominee).

(c) Subjects listed in 8 for the degree of Master of Mathematical Science.

**4.3** Project option. This option may comprise up to 4 points of the work for the award. The topics and level of such project work will be decided in consultation with a supervisor appointed by the Faculty. The project options are:

code	subject title	points
1295	Applied Mathematics Diploma Project A	4
7128	Applied Mathematics Diploma Project B	2
7200	Mathematical Physics Diploma Project A	4
1122	Mathematical Physics Diploma Project B	2
8803	Pure Mathematics Diploma Project A	4
2019	Pure Mathematics Diploma Project B	2
8624	Statistics Diploma Project A	4
7505	Statistics Diploma Project B	2

**4.4** Formal approval of enrolment must be obtained from the Dean of Mathematical and Computer Sciences (or nominee).

The Faculty of Mathematical and Computer Sciences offers the Graduate Diploma in Mathematical Science as a full-time or part-time course to cater for a number of different demands:

(a) It is designed for graduates with some mathematical training who wish to extend their mathematical knowledge for professional (eg teachers) or other reasons. The Graduate Diploma allows a flexible program to suit the background of the individual. Thus it may

(i) extend a modest knowledge of mathematics to say the level attained by a graduate with an Ordinary Degree of Bachelor of Science in the Faculty of Mathematical and Computer Sciences; or

(ii) at the other extreme provide a program comparable to the level of the Honours degree.

(b) Graduates of a University or other institution who have an interest in proceeding to research in some area of the mathematical sciences but lack the preparation necessary may enrol for the Graduate Diploma in Mathematical Science with the view to gaining the background to begin a program at the Masters level either by coursework or by research.

Graduates wishing to enrol may consult the Dean of Mathematical and Computer Sciences for details of the subjects offered preferably in the December of the year preceding their enrolment.

The course is normally one year of full-time study or two years part-time. The Graduate Diploma requires a satisfactory performance in approved subjects totalling 24 points. Provision is made in the schedules for candidates to remedy deficiencies in preparation through inclusion of subjects at level II. Up to 4 points may be in the form of supervised project work. Students will be allocated a supervisor at the time of enrolment.

## Syllabuses

### textbooks

Information on appropriate textbooks will be provided by the Department concerned, and at the preliminary lecture in Orientation Week.

### examinations

Details of these are made available at the relevant lectures during orientation week.

### assumed knowledge

Applicants for the Graduate Diploma will be expected to have a knowledge of mathematics equivalent to that which would be obtained by passing 4 level II subjects offered by the Faculty of Mathematical and Computer Sciences (ie 8 points).

## Master of Applied Science (Communications)

note: Postgraduate tuition fees may apply to this course.

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar.

As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

### Specific Course Rules

#### 1 Admission requirements

1.1 The following may be accepted as a candidate for the degree:

- (a) a person who has qualified in The University of Adelaide for the degree of Bachelor of Engineering, Science or Applied Science or holds another academic qualification accepted by the Faculty of Mathematical and Computer Sciences as being sufficient for the purpose. A person admitted under this sub-Rule will normally be required satisfactorily to complete sufficient work of Honours standard as is deemed necessary by the Faculty in addition to satisfying the requirements of the Master's degree.
- (b) a person who has qualified in The University of Adelaide for the Honours degree of Bachelor of Science in the Faculty of Mathematical and Computer Sciences or the Honours degree of Bachelor of Engineering or the Honours degree of Bachelor of Science in Mathematical Physics.
- (c) a person who holds a qualification accepted for the purpose by the University.

1.2 With the approval of the Board of Graduate Studies acting with authority wittingly devolved to it by Council the Faculty may, in exceptional circumstances and subject to such conditions (if any) as it may see fit to impose in each case, accept as a candidate for the degree a person who does not qualify under 1.1 but who has given evidence satisfactory to the Faculty of fitness to undertake work for the degree.

#### 2 Review of Academic Progress

2.1 If in the opinion of the Faculty of Mathematical and Computer Sciences a candidate is not making satisfactory progress the Faculty may, with the consent of the Council, terminate the candidature.

#### 3 Qualification requirements

3.1 To qualify for the degree a candidate shall:

- (a) on completion of any preliminary work which may be prescribed in the Specific Course Rules and after consultation with the Dean (or nominee) of the Faculty of Mathematical and Computer Sciences, submit in writing to the Registrar, for approval by the Faculty, a program of advanced study and project work as prescribed in the Specific Course Rules and designed to extend over either one year if taken full-time or not less than two and not more than five years if taken part-time.
- (b) undertake an approved program of advanced study and project work under the direction of a supervisor or supervisors who shall be members of the full-time academic staff of the University and appointed by the Faculty, except that in special circumstances the Faculty may also appoint an external supervisor.
- (c) pass such examination on the candidate's course of advanced study as may be required by the Faculty; and
- (d) present a satisfactory dissertation on the candidate's project.

3.2 Subject to such conditions as it may determine, the Faculty may permit project work to be undertaken outside the University provided that it can be satisfied

- (a) that this will result in mutual academic benefit to the candidate and the supervising department.
- (b) that there will be adequate contact and interaction between the candidate and the supervising department; and
- (c) that the supervisor's access to any experimental work, the candidate's availability for seminars and other discussions, and the publication of results will not thereby be prejudiced.

#### 4 Unacceptable combinations of subjects

4.1 A candidate may not count a subject or closely related subject or part of a subject already presented for another degree or diploma.

#### 5 General

5.1 A candidate who fulfils the requirements of these Rules may, on the recommendation of the Faculty, be admitted to the degree of Master of Applied Science (Communications).

#### 6 Preliminary work

6.1 A person whose qualifications have been accepted under either 1.1(b) or 1.1(c) shall be deemed to have satisfied the requirements of this Rule.

6.2 Before being admitted either under 1.1(a) or 1.2 a person shall complete the requirements of this schedule by undertaking, and satisfying the examiners in, such courses of study and/or other work as may in his or her case be prescribed by the Faculty of Mathematical and Computer Sciences. The purpose of this schedule is that the person should demonstrate the ability to perform at Honours standard.

#### 7 Courses of study and project work

7.1 The program of study and project work shall consist of:

(a) One project option chosen from the following list:

code	subject title	points
8397	Applied Mathematics Communications Project A	2
6450	Applied Mathematics Communications Project B	4

3328	Applied Mathematics Communications Project C	6
2000	Applied Mathematics Communications Project D	8
8648	Applied Mathematics Communications Project E	10
7784	Pure Mathematics Communications Project A	2
5567	Pure Mathematics Communications Project B	4
6147	Pure Mathematics Communications Project C	6
3222	Pure Mathematics Communications Project D	8
3995	Pure Mathematics Communications Project E	10
4284	Electrical and Electronic Communications Project A	2
5208	Electrical and Electronic Communications Project B	4
9153	Electrical and Electronic Communications Project C	6
2206	Electrical and Electronic Communications Project D	8
4573	Electrical and Electronic Communications Project E	10

note: Candidates should consult the Department in which they intend to do their project about the choice of a suitable supervisor.

(b) Graduate subjects and seminars which may be chosen from the following list of subjects in the Communications area. All candidates must satisfactorily complete a minimum of 7 subjects. Each subject represents one twelfth of the requirements for the degree.

(i) compulsory subject

8662 Masters Seminar  
(Telecommunications)

(ii) Group A subjects

4485 Teletraffic Models  
8427 Mathematical Coding and  
Cryptology  
9694 Transform Methods and  
Signal Processing  
3908 Communication Network  
Design  
2297 Masters Topic in  
Communications

- (iii) Group B subjects - These are subjects offered by the Department of Electrical and Electronic Engineering and whose availability may vary from year to year.

7529 Network Architecture and Switching 2

1312 Communication Systems 2

9913 Signal Processing 1

5300 Telecommunication Networks 1

9334 Advanced Communication Theory 1

1008 Advanced Signal Processing 1

- (iv) Group C subjects

Electronic Engineering, University of South Australia

7156 Network Protocols

Candidates may also choose from subjects offered by the School of Information Science and Technology at The Flinders University of South Australia or by the Departments of Mathematics and Electronic Engineering at the University of South Australia and deemed suitable for the degree program by the Dean of Mathematical and Computer Sciences (or nominee) from whom a list of such subjects may be obtained at the commencement of studies.

- (c) other relevant subjects or work which may make up not more than one-third of the work for the degree, as may be approved by the Faculty of Mathematical and Computer Sciences.

The Dean of Mathematical and Computer Sciences (or nominee) shall approve in the case of each candidate a program of study consisting of lectures, seminars and project work and decide the relative proportion of each subject to the constraints listed above. To assist with this choice from time to time lists of subjects available to candidates for the degree in groups B and C will be issued by the Faculty of Mathematical and Computer Sciences (after they have been approved by Faculty and the Executive Committee). Notwithstanding the above the availability of all subjects is conditional on there being adequate staffing levels.

## Syllabuses

### textbooks

Information on appropriate textbooks will be provided by the Department concerned, and at the preliminary lecture in Orientation Week.

### examinations

For each subject students may obtain from the department concerned details of the examination in that subject including the relevant weight given to the components (eg such as the following as are relevant: assessments, semester or mid-semester tests, essays or other written or practical work, final written examinations, *viva voce* examinations).

note: The postgraduate subjects which are offered by departments may vary slightly from year to year. Details of which subjects will be available each year are obtainable from the Dean of the Faculty of Mathematical and Computer Sciences.

# Master of Computer Science

note: Postgraduate tuition fees may apply to this course.

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar.

As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

## Specific Course Rules

### 1 Admission requirements

1.1 The Faculty of Mathematical and Computer Sciences may accept as a candidate for the degree any person who has qualified:

- (a) for the degree of Bachelor of Science in the Faculty of Mathematical and Computer Sciences or the Bachelor of Information Science, with a major in Computer Science, of The University of Adelaide, or for a degree of some other institution accepted for the purpose by the University; or
- (b) for the Graduate Diploma in Computer Science of The University of Adelaide or some other award from another institution accepted for the purpose by the University.

1.2 With the approval of the Board of Graduate Studies acting with authority wittingly devolved to it by Council the Faculty may, in exceptional circumstances and subject to such conditions (if any) as it may see fit to impose in each case, accept as a candidate for the degree a person who does not qualify under 1.1, but who has given evidence satisfactory to the Faculty of fitness to undertake work for the degree.

### 2 Duration of course

2.1 A candidate may proceed to the degree by full-time study; or, with the approval of the Department of Computer Science and subject to any conditions imposed in the particular case, by part-time study; or as an external student. Except by permission of the Faculty, the work for the degree shall be completed:

- (a) in the case of a full-time candidate, not less than two years and not more than four years from the date of candidature accepted by the Faculty;

- (b) in the case of a part-time or external candidate, not less than four years and not more than six years from the date of candidature accepted by the Faculty;

- (c) in the case of a candidate with an Honours degree in Computer Science, or equivalent, in not less than one year of full-time study or two years of part-time study.

### 3 Qualification requirements

3.1 To qualify for the degree a candidate shall:

- (a) satisfy examiners in subjects of study as prescribed in the Specific Course Rules;
- (b) comply with conditions as prescribed in the Specific Course Rules; and
- (c) present a satisfactory written report and seminar on a supervised project on a subject approved by the Department of Computer Science.

### 4 Review of Academic Progress

4.1 If in the opinion of the Faculty of Mathematical and Computer Sciences a candidate for the degree is not making satisfactory progress, the Faculty may, with the consent of the Council, terminate the candidature and the candidate shall cease to be enrolled for the degree.

### 5 General

5.1 A candidate who fulfils the foregoing requirements shall on the recommendation of the Faculty of Mathematical and Computer Sciences be admitted to the degree of Master of Computer Science.

## 6 Subjects of study

note: Intending students should consult the Department of Computer Science early in the year in which they plan to study in order to ascertain

- whether particular subjects will be available in that year
- in which semester they will be taught
- their precise content

**6.1** A candidate for the degree shall complete satisfactorily a total of at least 48 points.

**6.2** A candidate for the degree shall regularly attend lectures and tutorials, do such written and practical work as may be prescribed, and pass examinations in at least twelve subjects offered by the Department of Computer Science at the Honours or Masters level. Other subjects may be included, subject to the approval of the Head of the Department. The subjects which may be offered by the Department of Computer Science are:

code	subject title	points
6521	Advanced Computer Architecture A	2.5
6102	Advanced Computer Architecture B	2.5
3280	Advanced Computer Architecture C	2.5
6430	Advanced Computer Architecture D	2.5
2775	Advanced Database A	2.5
1110	Advanced Database B	2.5
8058	Advanced Database C	2.5
3631	Advanced Database D	2.5
9037	Software Engineering A	2.5
2618	Software Engineering B	2.5
5711	Software Engineering C	2.5
6621	Software Engineering D	2.5
6731	Advanced Programming Languages A	2.5
6532	Advanced Programming Languages B	2.5
4069	Advanced Programming Languages C	2.5
5436	Advanced Programming Languages D	2.5
6938	Advanced Programming Languages E	2.5
5689	Advanced Artificial Intelligence A	2.5
2651	Advanced Artificial Intelligence B	2.5
3794	Advanced Artificial Intelligence C	2.5
2193	Advanced Artificial Intelligence D	2.5
1783	Advanced Operating Systems A	2.5
7513	Advanced Operating Systems B	2.5
9026	Advanced Operating Systems C	2.5
7933	Advanced Operating Systems D	2.5

6220	Advanced Numerical Analysis A	2.5
8109	Advanced Numerical Analysis B	2.5
8247	Advanced Numerical Analysis C	2.5
2630	Advanced Numerical Analysis D	2.5
5766	Relational Programming	2.5
2201	Programming Techniques (M.Comp.Sc.)	2.5
3903	Systems Analysis (M.Comp.Sc.)	2.5
8684	Parallel Computation	2.5
7024	Compiler Construction and Project (M.Comp.Sc.)	2.5
6293	Advanced Programming Paradigms (M.Comp.Sc.)	2.5
9516	Artificial Intelligence (M.Comp.Sc.)	2.5
6031	Computer Architecture (M.Comp.Sc.)	2.5
6794	Computer Networks (M.Comp.Sc.)	2.5
9901	Operating Systems (M.Comp.Sc.)	2.5
3675	Software Engineering and Project (M.Comp.Sc.)	2.5
9047	Numerical Analysis (M.Comp.Sc.)	2.5
7307	University of South Australia Subject A	2.5
6782	University of South Australia Subject B	2.5
1752	University of South Australia Subject C	2.5
6417	University of South Australia Subject D	2.5
6037	University of South Australia Subject E	2.5
9284	University of South Australia Subject F	2.5
1703	Flinders University Subject A	2.5
6156	Flinders University Subject B	2.5
9260	Flinders University Subject C	2.5
8031	Flinders University Subject D	2.5
8759	Flinders University Subject E	2.5
7470	Flinders University Subject F	2.5

**6.3** A candidate shall also satisfactorily undertake and complete at least five Masters Project subjects, under the guidance of a supervisor, and provide a public seminar and written report on the investigation. The Masters Project subjects are:

9112	Master Project A	2.5
3126	Master Project B	2.5
4292	Master Project C	2.5
5866	Master Project D	2.5
3444	Master Project E	2.5
9574	Master Project F	2.5
9882	Master Project G	2.5
8868	Master Project H	2.5

6.4 In the case of a candidate with an Honours degree in Computer Science, the subjects required for the award of the Master's degree may be reduced.

## Syllabuses

Prospective students should consult the Department early in the year in which the course is being offered to obtain advice as to the specific content of the course. The field of study of the project can also be determined at that time.

# Master of Mathematical Science

*note:* Postgraduate tuition fees may apply to this course.

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar.

As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

## Specific Course Rules

### 1 Admission requirements

1.1 The following may be accepted as a candidate for the degree:

(a) a person who has qualified in The University of Adelaide for the Honours degree of Bachelor of Science in the Faculty of Mathematical and Computer Sciences or the Honours degree of Bachelor of Engineering or the Honours degree of Bachelor of Science in Mathematical Physics, or holds another academic qualification accepted by the Faculty of Mathematical and Computer Sciences as equivalent.

(b) a person who has qualified in The University of Adelaide for the degree of Bachelor of Engineering, Science or Applied Science or holds another academic qualification accepted for the purpose by the Faculty of Mathematical and Computer Sciences. A person admitted under this sub-Rule will normally be required satisfactorily to complete sufficient work of Honours standard as is deemed necessary by the Faculty in addition to satisfying the requirements of the Master's degree;

1.2 With the approval of the Board of Graduate Studies acting with authority wittingly devolved to it by Council the Faculty may, in exceptional circumstances and subject to such conditions (if any) as it may see fit to impose in each case, accept as a candidate for the degree a person who does not qualify under 1.1 above but who has given evidence satisfactory to the Faculty of fitness to undertake work for the degree.

### 2 Duration of course

2.1 A candidate shall:

- (a) complete any preliminary work which may be prescribed;
- (b) undertake an approved program of advanced study and project work under

the direction of a supervisor or supervisors extended over one year if taken full-time or not less than two and not more than four years if taken part-time.

### 3 General

3.1 The Faculty shall appoint one or more supervisors to guide a candidate's work.

3.2 A candidate may not count a subject or closely related subject or part of a subject already presented for another degree or diploma.

3.3 A candidate who fulfils the requirements of these Rules may, on the recommendation of the Faculty, be admitted to the degree of Master of Mathematical Science.

### 4 Qualification requirements

4.1 To qualify for the degree a candidate shall:

- (a) pass such examination on the candidate's course of advanced study as may be required by the Faculty; and
- (b) present a satisfactory dissertation on the candidate's project.

### 5 Project work

5.1 Subject to such conditions as it may determine, the Faculty may permit project work to be undertaken outside the University provided that it can be satisfied:

- (a) that this will result in mutual academic benefit to the candidate and the supervising department.
- (b) that there will be adequate contact and interaction between the candidate and the supervising department; and
- (c) that the supervisor's access to any experimental work, the candidate's availability for seminars and other discussions, and the publication of results will not thereby be prejudiced.

**6 Review of Academic Progress**

**6.1** If in the opinion of the Faculty of Mathematical and Computer Sciences a candidate is not making satisfactory progress the Faculty may, with the consent of the Council, terminate the candidature.

**7 Preliminary work**

**7.1** A person whose qualifications have been accepted under 1.1(a) shall be deemed to have satisfied the requirements of this schedule.

**7.2** A candidate admitted under either 1.1(b) or 1.2 shall complete the requirements of this Rule by undertaking, and satisfying the examiners in, such courses of study and/or other work as may in his or her case be prescribed by the Faculty of Mathematical and Computer Sciences. The purpose of this schedule is that the person should demonstrate the ability to perform at Honours standard.

**8 Courses of study and project work**

**8.1** The program of study and project work to the value of at least 24 points shall consist of:

(a) supervised project work consisting of one of the following:

code	subject title	points
2427	Masters Applied Mathematics Minor Project	5
8223	Masters Applied Mathematics Major Project	7.5
4818	Masters Mathematical Physics Minor Project	5
4495	Masters Mathematical Physics Major Project	7.5
2545	Masters Pure Mathematics Minor Project	5
7538	Masters Pure Mathematics Major Project	7.5
2159	Masters Statistics Minor Project	5
2750	Masters Statistics Major Project	7.5

(b) 3672 Masters Seminar (Applied) 1.5  
 8042 Masters Seminar (Pure) 1.5  
 3652 Masters Seminar (Statistics) 1.5

note: Intending students should consult the relevant department early in the year in which they plan to study in order to ascertain

- whether particular subjects will be available in that year
- which semester they will be taught
- their precise content

(c) subjects:

(i) chosen from the following list

**Applied Mathematics**

5507	Advanced Hydrodynamics	2.5
5383	Aerodynamics	2.5
8510	Applied Mathematics Honours Topic A	2.5
6501	Applied Mathematics Honours Topic B	2.5
5819	Applied Mathematics Honours Topic C	2.5
1128	Applied Mathematics Honours Topic D	2.5
8796	Applied Mathematics Honours Topic E	2.5
8191	Applied Mathematics Honours Topic F	2.5
8918	Asymptotic Approximations	2.5
8943	Boundary Value Problems	2.5
6779	Chaos and Fractals	2.5
5621	Combinatorial Optimisation	2.5
6426	Communication Network Design (Masters)	2.5
5061	Continuum Mechanics	2.5
6574	Finite Difference Methods for PDEs	2.5
6650	Foundations of Financial Economics	2.5
6130	Martingales	2.5
6576	Mathematical Economics (Masters)	2.5
4820	Mathematical Methods (Masters)	2.5
4645	Modelling and Analysis of Computer Networks	2.5
6071	Networks of Queues	2.5
5136	Robotics	2.5
5440	Stochastic Differential Equations	2.5
8250	Stochastic Processes	2.5
4169	Systems of Queues	2.5
1178	Teletraffic Models (Masters)	2.5
4957	Tidal Models	2.5
3848	Transform Methods and Signal Processing (Masters)	2.5
2233	Variational Methods for PDEs	2.5

<b>Mathematical Physics</b>		5344 Pure Mathematics Honours Topic D	2.5
6080 Advanced Electromagnetism	2.5		
4928 Cosmology	2.5	<b>Statistics</b>	
3927 General Relativity	2.5	7464 Advanced Multivariate Methods	2.5
4578 Gauge Theory	2.5	2466 Advanced Nonparametric Statistics	2.5
4060 Quantum Mechanics/Particle Physics	2.5	8331 Statistical Software (Masters)	2.5
3681 Relativistic Quantum Mechanics and Fields	2.5	3228 Analysis of Repeated Measures	2.5
5938 Statistical Mechanics/ Many-Body Theory	2.5	9553 National Markets Statistics	2.5
1679 Topics in Mathematical Physics A	2.5	6061 Advanced Experimental Design	2.5
3348 Topics in Mathematical Physics B	2.5	9148 Regression Diagnostics	2.5
		1884 Advanced Medical Statistics	2.5
<b>Pure Mathematics</b>		9348 Advanced Inference	2.5
7757 Galois Theory	2.5	2684 Statistics Honours Topic A	2.5
9160 Measure Theory	2.5	6827 Statistics Honours Topic B	2.5
1179 Analysis 1	2.5	7467 Statistics Honours Topic C	2.5
7745 Analysis 2	2.5	4013 Statistics Honours Topic D	2.5
7584 Analysis 3	2.5	(ii) Other subjects offered by The University of Adelaide or other tertiary institutions in South Australia which are accepted by the Faculty as being equivalent to those listed above.	
4808 Algebra 1	2.5	(iii) Students may present other relevant subjects or work, to the value of at most five points, as may be approved by the Faculty of Mathematical and Computer Sciences.	
4276 Algebra 2	2.5		
2642 Algebra 3	2.5		
1820 Geometry 1	2.5		
5477 Geometry 2	2.5		
9480 Geometry 3	2.5		
1912 Number Theory 1	2.5		
8468 Number Theory 2	2.5		
7777 Advanced Convexity	2.5		
6406 Topology	2.5		
2903 Problem Solving	2.5		
2342 Coding Theory	2.5		
4362 Analysis and Signal Processing	2.5		
1512 Set Theory	2.5		
4122 History of Mathematics (Masters)	2.5		
7965 Pure Mathematics Honours Topic A	2.5		
1538 Pure Mathematics Honours Topic B	2.5		
9735 Pure Mathematics Honours Topic C	2.5		

8.2 The availability of all subjects in any year is conditional on there being adequate staffing levels.

## Syllabuses

Prospective students should consult the Department early in the year in which the course is being offered to obtain advice as to the specific content of the course. The field of study of the major and minor projects can also be determined at that time.

## Master of Science in the Faculty of Mathematical and Computer Sciences

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar.

As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

### Specific Course Rules

#### 1 Admission

1.1 The following persons may become candidates for the degree of Master of Science in the Faculty of Mathematical and Computer Sciences: (a) Bachelors of Arts, (b) Bachelors of Science, (c) other graduates whose academic qualifications are accepted by the Faculty of Mathematical and Computer Sciences as sufficient.

1.2 Provided that, subject to the approval of the Board of Graduate Studies acting with authority wittingly devolved to it by Council, the Faculty may, in special cases and subject to such conditions (if any) as it may see fit to impose in each case, accept as a candidate for the degree a person who does not hold a degree of a university, but has given evidence satisfactory to the Faculty of fitness to undertake work for the degree.

1.3 Unless an applicant has obtained an Honours degree from a University in a suitable Mathematical and Computer Sciences discipline or a qualification deemed by the Faculty to be equivalent, the applicant shall, before being admitted as a candidate, pass such qualifying examination as the Faculty may in the circumstances determine.

1.4 A person seeking enrolment as a candidate for the degree shall apply to the Registrar and shall submit as part of that application, a statement of that person's academic standing, accompanied, in the case of a person who is not a graduate of The University of Adelaide, by acceptable proof of such standing. Each applicant shall submit an outline of the research work or investigation on which it is intended to submit a thesis. The Faculty, if it approves the subject of this research, may appoint a supervisor to guide the candidate in the work.

#### 3 Duration of course

3.1 A candidate may proceed to the degree by full-time study; or, with the approval of the department concerned and subject to any conditions imposed in the particular case, by part-time study; or, as an external student. Except by special permission of the Faculty, the work for the degree shall be completed and the thesis submitted:

(a) in the case of a full-time candidate, not less than one year or more than three years from the date of candidature accepted by the Faculty;

(b) in the case of a part-time or external candidate, not less than two years nor more than six years from the date of candidature accepted by the Faculty.

#### 4 Qualification requirements

4.1 To qualify for the degree a candidate shall submit a thesis upon an approved subject and shall adduce sufficient evidence that the thesis is his or her own work. The thesis shall give the results of original research or of an investigation on which the candidate has been engaged. A candidate may also submit other contributions to mathematical sciences in support of his or her candidature.

#### 5 Review of Academic Progress

5.1 A candidate's progress shall be reviewed annually by the Faculty, under the provisions of clause 4C of Chapter XXV of the Statutes.

#### 6 Assessment and examinations

6.1 The Faculty shall appoint a Board of Examiners to report upon the thesis and any supporting papers that the candidate may submit. The Board of Examiners may require any candidate to pass

an examination in the branch of science to which the candidate's original research or investigation is cognate.

**6.2** A candidate for the degree of Doctor of Philosophy whose work is considered by the Faculty, after report by the examiners appointed to adjudicate upon it, not to be of sufficient merit to qualify for the degree of Doctor but of sufficient merit for the degree of Master may be admitted to the degree of Master provided that the candidate is qualified to become a candidate for the degree.

**6.3** On completion of the work a candidate shall lodge with the Registrar three copies of the thesis prepared in accordance with directions given to candidates from time to time. Refer to the Guidelines on Higher Degrees by Research and Specifications for Thesis in this volume.

**6.4** A candidate who complies with the foregoing conditions and satisfies the Board of Examiners shall on the recommendation of the Faculty of Mathematical and Computer Sciences be admitted to the degree of Master of Science in the Faculty of Mathematical and Computer Sciences.

## Doctor of Science in the Faculty of Mathematical and Computer Sciences

### Regulations

- 1 (a) Subject to these regulations a person who has been admitted in The University of Adelaide to an Honours degree of Bachelor of Science or a degree of Master of Science, Arts or Economics, or to the degree of Doctor of Philosophy in a field of study approved by the Faculty of Mathematical and Computer Sciences, may proceed to the degree of Doctor of Science in the Faculty of Mathematical and Computer Sciences.
  - (b) On the recommendation of the Faculty of Mathematical and Computer Sciences the Board of Graduate Studies acting with authority wittingly devolved to it by Council may accept as a candidate for the degree a person who has been admitted to a degree in The University of Adelaide other than one named in section (a) of this regulation, or who is a graduate of another university or institution of higher education recognised by The University of Adelaide and has a substantial association with the University; provided that in each case the graduate concerned has, in the opinion of the Faculty of Mathematical and Computer Sciences, had an adequate training in the mathematical sciences.
  - (c) No person shall be accepted as a candidate for the degree of Doctor of Science in the Faculty of Mathematical and Computer Sciences before the expiration of five years from the date of his original graduation.
- 2 (a) A person who desires to become a candidate for the degree shall give notice of his intended candidature in writing to the Registrar and with such notice shall furnish particulars of his achievements in the mathematical sciences and of the work which he proposes to submit for the degree.
  - (b) The Faculty of Mathematical and Computer Sciences shall appoint a committee to examine the information submitted and to advise the Faculty on whether the Faculty should (i) allow the applicant to proceed, and approve the subject or subjects of the work to be submitted; or (ii) advise the applicant not to submit his work: and the Faculty's decision shall be conveyed to the applicant.
  - (c) If it accepts the candidature and approves the subject or subjects of the work to be submitted the Faculty shall nominate examiners of whom one at least shall be an external examiner.
- 3 (a) To qualify for the degree the candidate shall furnish satisfactory evidence that he has made an original contribution of distinguished merit adding to the knowledge or understanding of any subject with which the Faculty is directly concerned.
  - (b) The degree shall be awarded primarily on a consideration of such of his published works as the candidate may submit for examination.
  - (c) The candidate in submitting his published works shall state generally in a preface and specifically in notes the main sources from which his information is derived and the extent to which he has availed himself of the work of others, especially where joint publications are concerned. He may also signify in general terms the portions of his work which he claims as original.
  - (d) The candidate is required to indicate what part, if any, of the work he has submitted for a degree in this or any other university.
- 4 The candidate shall lodge with the Registrar three copies of the work prepared in accordance with the directions given in sub-paragraph (b) of clause 2B of Chapter XXV of the Statutes. If the work is accepted for the degree the Registrar will transmit two of the copies to the University Library.
- 5 A candidate who complies with the foregoing conditions and satisfies the examiners may, on the recommendation of the Faculty of Mathematical and Computer Sciences, be admitted to the degree of Doctor of Science in the Faculty of Mathematical and Computer Sciences.

- 6 Notwithstanding anything contained in the preceding regulations, the Faculty may recommend the award of the degree to any person who is not a member of the staff of the University. Any such recommendation must be accompanied by evidence that the person for whom the award is proposed has made an original and substantial contribution of distinguished merit to the knowledge or understanding of a subject with which the Faculty is directly concerned, of a standard not less than required by regulation 3.

Regulations allowed 28 February, 1974.

Amended: 15 Jan. 1976: 6; 4 Feb. 1982: 2, 4; 21 Feb. 1991: 1.

Regulations .....908

# Faculty of Medicine

## Regulations

### Of Awards in the Faculty of Medicine

- 1 In the Faculty of Medicine there shall be the following awards:

Ordinary degree  
of Bachelor of Health Sciences

Honours degree  
of Bachelor of Health Sciences

Honours degree  
of Bachelor of Medical Science

Bachelor of Medicine  
and Bachelor of Surgery

Graduate Diploma in Accident and  
Emergency Nursing\*

Graduate Diploma in Alcohol and Drug  
Studies\*

Graduate Diploma in Anaesthetic  
Nursing\*

Graduate Diploma in Cardiac Nursing\*

Graduate Diploma in Clinical Nursing\*

Graduate Diploma in Clinical Science

Graduate Diploma in Intensive Care  
Nursing\*

Graduate Diploma in Occupational  
Health

Graduate Diploma in Oncology Nursing\*

Graduate Diploma in Orthopaedic  
Nursing\*

Graduate Diploma in Peri-Operative  
Nursing\*

Graduate Diploma in Psychotherapy

Graduate Diploma in Public Health

Master of Clinical Science

Master of Medical Science

Master of Nursing Science\*

Master of Public Health

Master of Surgery

- 2 The courses for the awards listed in Regulation 1 shall be governed by the General Course Rules and Specific Course Rules that the Council shall prescribe from time to time.
- 3 The syllabuses of subjects shall be specified by the Council.

Regulations effective from 1 August 1994.

\* Awaiting approval and confirmation.

notes not forming part of the Regulations

- 1 Council has delegated the power to approve minor changes to the General Course Rules to the Deputy Vice-Chancellor (Academic).
- 2 Council has delegated the power to approve minor changes to the Specific Course Rules to the Deans of Faculties.
- 3 Council has delegated the power to specify syllabuses to the Head of each department or centre concerned, such syllabuses to be subject to approval by the Faculty or by the Dean on behalf of the Faculty. The Head of department or centre may approve minor changes to any previously approved syllabus.
- 4 The Faculty also offers a Doctor of Medicine (M.D.). Higher doctorates are governed by their own sets of Regulations as printed in this volume of the Calendar.

## Bachelor of Medicine and Bachelor of Surgery

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar.

As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

### Specific Course Rules

#### 1 Duration of course

- 1.1 The course of study for the degrees of Bachelor of Medicine and Bachelor of Surgery, unless otherwise approved by the Council on the recommendation of the Faculty, shall extend over six years of full-time study.
- 1.2 A candidate may interrupt the course:
  - (a) for the purpose of proceeding to the Honours degree of Bachelor of Medical Science; or
  - (b) for such period and on such conditions as may in each case be determined by the Faculty.
- 1.3 Students wishing to interrupt their studies in accordance with 1.2(b) above must apply through the Registrar for permission and obtain beforehand the approval of the Dean on behalf of the Faculty for leave of absence for a defined period.
- 1.4 A student who leaves the course without approval or who extends a leave of absence beyond the time period approved under 1.2(b) above shall be deemed to have withdrawn his or her candidature for the degrees but may reapply for admission to the course in accordance with the procedures in operation at the time.
- 1.5 Students who have interrupted their studies in the prescribed subjects may be required to resume at such a point in the course and/or to undertake such additional or special program of study as the Dean of the Faculty deems appropriate.

#### 2 Qualification requirements

- 2.1 To qualify for the degrees a candidate must attend regularly such tutorials and seminar work, satisfactorily perform such laboratory, practical, clinical and written work, and pass such examinations as the Council may from time to time prescribe.

#### 3 Assessment and examinations

- 3.1 A candidate shall not present for the examinations unless the candidate has completed to the satisfaction of the professors and lecturers concerned, prior to the beginning of the examination, the courses of study and practice prescribed for it.
- 3.2 The examiners in any subject may take into consideration written or practical work required of candidates during the course of study and practice and the results of other examinations in the subjects.
- 3.3 A candidate who fails to pass in an examination shall, before presenting for the examination again, attend again such part or parts of the course of study and practice leading to that examination as the Faculty may direct.
- 3.4
  - (a) Candidates who pass in the whole of an examination prescribed in the Specific Course Rules shall be awarded a non-graded pass.
  - (b) Except as otherwise provided in the Specific Course Rules (for example, see 3.4(c) below) there shall be four classifications of pass in any component subject of the medicine course, as follows: Pass with High Distinction, Pass with Distinction, Pass with Credit, Pass.
  - (c) The results of the following subjects will not be classified: 5216 Introductory Medicine IM; 4376 Paediatrics V.
  - (d) A candidate whose results in the Third-Year, Fourth-Year, Fifth-Year and Final (Sixth-Year) Examinations, in the medicine course have been adjudged by the Faculty of Medicine to have been of distinguished merit may, by the decision of the Faculty on the recommendation of the Board of Examiners in the final year of the course, be awarded the degrees of Bachelor of Medicine and Bachelor of Surgery (with Honours).

- 3.5 (a) The Board of Examiners may grant a candidate who has been prevented by illness or other sufficient cause from sitting for the whole or part of an examination permission to sit for a special or supplementary examination, the extent of such special or supplementary examination to be determined by the Board in each case.
- (b) The Board of Examiners may grant a candidate who has failed in part only of an examination permission to sit for a supplementary examination in the subject or subjects in which the candidate has failed.
- (c) On passing in a special or supplementary examination granted under this Specific Course Rule a candidate shall be deemed to have completed the whole of the examination; but if the candidate fails in such special or supplementary examination the candidate shall take again, and pass in, the whole of the examination before proceeding with the courses of study and practice leading to the next examination.
- (d) A candidate granted permission to sit for a supplementary or special examination may enter provisionally upon the courses of study and practice leading to the next examination pending publication of the result of the supplementary examination.

notes

- 1 The reference to study and practice in the Specific Course Rules for the M.B., B.S. includes all that practical work and clinical instruction prescribed in 4.
- 2 The Faculty of Medicine regards lectures as a valuable teaching method. Consequently candidates are advised to attend regularly such courses of lectures as may be provided.
- 3 The hospital clinical year usually begins on the fourth Monday in the year

**4 Subjects of study**

4.1 The following are the subjects of study for the six Examinations for the degrees of Bachelor of Medicine and Bachelor of Surgery.

code	subject title	points
------	---------------	--------

**1870 First Year Examination**

- 5080 Cell and Molecular Biology IM  
 4230 Doctor, Patient and Society IM  
 3437 Human Structure and Function IM  
 5216 Introductory Medicine IM

**2034 Second Year Examination**

- 2916 Cell and Molecular Biology IIM  
 6992 Doctor, Patient and Society IIM  
 6589 Human Structure and Function IIM  
 9092 Introductory Medicine IIM

**3980 Third Year Examination**

- 8824 Clinical Science and Skills  
 9782 Human Physiology IIIMB  
 6105 Microbiology and Immunology IIIMB  
 6950 Pathology III  
 1494 Pharmacology IIIMB  
 9726 Social and Preventive Medicine III  
*New curriculum for Third Year Examination to be offered in 1996:*

**8508 Fourth Year Examination**

- 1113 Clinical Science IV  
 2976 Clinical Skills IV  
 8475 Psychiatry IV  
 6915 Research Project  
 The Board of Examiners may require a candidate repeating the Fourth Year Examination to complete  
 2643 Clinical Skills IVA  
 instead of  
 6915 Research Project

**3192 Fifth Year Examination**

- 9691 Clinical Science V  
 4369 Clinical Skills V  
 7240 Obstetrics and Gynaecology V  
 4376 Paediatrics V  
 The Board of Examiners may require a candidate who was unsuccessful in completing both the Fourth Year and Fifth Year Examinations at the first attempt to successfully complete the subjects  
 8425 Clinical Science IV/V  
 4943 Clinical Skills IV/V

in order to complete the requirements of the two Examinations.

**1106 Final (Sixth Year) Examination**

- 4686 Clinical Competence VI  
 9950 Applied Pathology and Forensic Medicine VI

- 4008 Medicine VI
- 4857 Surgery VI
- 8958 Community Practice VI
- 6460 Paediatrics VI
- 4364 Psychiatry VI

## 5 Course of study and examinations

5.1 To qualify for the degrees of Bachelor of Medicine and Bachelor of Surgery, a candidate shall complete the requirements of the six Examinations by:

- (a) regularly attending lectures, tutorials, seminars, demonstrations;
- (b) satisfactorily participating in tutorial, practical and project work, clinical programs and attachments; and
- (c) satisfactorily completing the range of assessment tasks, including examinations, that are prescribed in the Syllabus for each of the subjects of the Examinations as set out in 4.

In addition, a student is required to undertake either a period of elective study approved by the Faculty of Medicine before commencing the study and practice for the Final (Sixth Year) Examination or if so directed by the Board of Examiners for the Fourth or Fifth Year Examination, a prescribed revision course of study and clinical practice, in lieu of undertaking a period of elective study, in a subject area of the Fourth Year or Fifth Year Examination.

5.2 A student entering the First Year of the course shall be required to undertake an English Language Proficiency assessment. If deficiencies in the written and/or oral use of English are identified through the initial assessment or through the assessment tasks prescribed for the subjects of the First Year Examination, the Faculty may require the student to participate in a Language Development Program in parallel with the subjects of study for the degree.

5.3 (a) In the event that a student fails a subject of an examination the Faculty's Board of Examiners for the relevant Examination may offer supplementary or special assessment tasks, including examinations, after considering the student's academic performance in all subjects undertaken in an academic year and any evidence of a medical or compassionate nature which may be placed before it. Where

supplementary examinations are offered, they will normally be undertaken during an official University Supplementary Examination period.

(b) A candidate who has been offered a supplementary or special examination on account of a failure in a subject of the Fourth Year or Fifth Year Examination, shall normally be required to undertake a prescribed revision course of study and clinical practice, in lieu of undertaking a period of elective study, before undertaking the examination.

5.4 (a) A candidate shall normally pass the whole of one Examination before entering into the course of study and practice leading to the next examination.

(b) Where a candidate has been granted status in the course (under the provisions of 1.4.20 of the General Course Rules), on account of other tertiary studies, the Faculty may permit the student to undertake subjects from more than one Examination where the Dean or designated nominee is satisfied the candidate's program of study and practice for the degree is academically sound.

(c) The overall performance of a candidate who fails the Fourth Year Examination, and the extent of the failure, shall be considered by the Board of Examiners in determining whether:

(i) the candidate be permitted to proceed to the Fifth Year Examination and undertake, in lieu of a period of elective study, a prescribed revision course of study and clinical practice, in lieu of undertaking a period of elective study before undertaking a special examination.

(ii) the candidate be required to repeat the course of study and clinical practice and the assessment requirements for all the subjects including the Research Project set out for the Fourth Year Examination in 4.

(iii) the candidate be required to repeat the course of study and clinical practice and the assessment requirements for the subjects set out for the Fourth Year Examination in 4 with the variation that the subject

2643 Clinical Skills IVA be undertaken instead of 6915 Research Project.

- (d) A candidate who fails the Fifth Year Examination normally will be required to repeat the study and clinical practice and the assessment requirements of the subjects set out for the Fifth Year Examination in 4.
- (e) Notwithstanding 5.4(g) above, if a candidate has failed both the Fourth Year and the Fifth Year Examination at the first attempt, the Board of Examiners may
- (i) withdraw the requirement that the candidate undertake a prescribed revision course of study and clinical practice, in lieu of a period of elective study, and a special examination; and instead
  - (ii) require the candidate to complete the requirements of the Fourth Year and Fifth Year Examination by undertaking the study and clinical practice and assessment requirements for the subjects  
8425 Clinical Science IV/V  
4943 Clinical Skills IV/V  
and pass the assessment tasks, including examinations, that are prescribed.
  - (iii) A candidate who fails the Final (Sixth Year) Examination will be required to repeat the study, and clinical practice and assessment requirements of all subjects set out for the Examination in 4.

## 6 Approval of enrolment

- 6.1 A candidate for the degrees of Bachelor of Medicine and Bachelor of Surgery is required to enrol for the Examination and the component subjects as set out in 4 during an official enrolment period.
- 6.2 The following students must have their course of study approved by the Dean or designated nominee at the time of enrolment in the year in question:
- (a) students previously enrolled in the course of studies prescribed in these Specific Course Rules who did not enrol in that course in the immediately preceding year;

- (b) students who have been granted, or who are seeking exemption from the requirements of the regulations and schedules under the terms of section 1.4.20 of the General Course Rules;
- (c) students who wish to enrol in any subject or subjects and/or option within any subject, in addition to the course and subjects prescribed in these Specific Course Rules;
- (d) students previously enrolled in other courses or in other faculties and who are enrolling, or who are seeking to enrol, for the first time in subjects prescribed in these Specific Course Rules.

### Rules for the admission of medical students to the practice of the teaching hospitals, health centres and the Institute of Medical and Veterinary Science

- 1 Medical students admitted to the practice of a Teaching Hospital or Health Centre shall be under the control of the Medical Superintendent\* in relation to matters of common discipline; the University will otherwise be responsible for matters related to education.
- 2 No student shall publish the report of any case without the permission of the Hospital Board or Health Centre Management Committee and the Senior Medical Officer under whose care the patient is or has been.
- 3 Except in the performance of his clinical duties, no student may disclose any information whatsoever concerning a patient without the permission of both the patient and the Senior Medical Officer in charge.
- 4 No student may communicate directly or indirectly to the Press, radio or television any matter concerning the clinical practice of the Institution to which he or she is attached.
- 5 No student may introduce visitors into any Hospital or Health Centre to the practice of which he or she has been admitted, without the permission of the Medical Superintendent\* or his deputy.
- 6 Students shall pay such fees as are laid down from time to time by the University in conjunction with the Teaching Hospitals or Health Centres. Fees are payable directly to the University; no student will be admitted to a Teaching Hospital or Health Centre until such fees are paid.
- 7 Students shall discharge the duties assigned to them, and pay for or replace any article damaged or lost or destroyed by them through negligence or misconduct.
- 8 During any period of residence the student will comply with the directions of the Medical Superintendent\* of the Hospital or Health Centre in respect of discipline and general conduct.
- 9 Subject to rule 10 any student infringing any of these rules or the rules of the Hospital or Health Centre, or otherwise misconducting himself/herself may be suspended or dismissed by the Board of the Hospital or Health Centre from the practice of the Hospital or Health

Centre. If he/she is so dismissed he/she shall forfeit all payments which may have been made and all rights accruing therefrom.

- 10 In all instances where a student has been either suspended or dismissed from the practice of the Hospital or Health Centre his/her case shall be investigated by an Investigation Committee on which there shall be a representative appointed by the Hospital Board, a Senior Consultant Clinical Teacher nominated by the Head (or his/her deputy) of the appropriate Staff Committee of the Hospital or Health Centre concerned, a representative appointed by the University, and the Dean of the Faculty of Medicine (or his/her deputy). The committee should also normally include a representative of the Adelaide Medical Students' Society (eg a student member of the Faculty of Medicine). The Investigating Committee shall make its recommendation to the Board of the Hospital or Health Centre Management Committee concerned and to the Council of the University for confirmation or otherwise.

These rules apply equally to medical students who use the facilities of the IMVS where the Director of the Institute has the authority given in these Rules to the Medical Superintendent\* of a Teaching Hospital, and where the Council of the Institute replaces the Board of the hospital.

\*The Medical Director of the Queen Victoria Hospital Campus of the Women's and Children's Hospital.

## Syllabuses

### textbooks

Information on appropriate textbooks will be provided by the Department concerned, and at the preliminary lecture in Orientation Week.

In general, students are expected to have their own copies of textbooks; but they are advised to await advice from the lecturer concerned before buying any particular book. Only the prescribed edition of any textbook should be sought.

### reference books

Although lists of books and journals for reference purposes are regarded as important, details have not been included in this Volume. These will however be issued from time to time by the departments concerned. It is hoped that all books and journals set for reference will be available to be consulted in the Barr Smith Library.

### examinations

For each subject students may obtain from the department concerned details of the examination in that subject including the relative weights given to the components (eg such of the following as are relevant: assessments, semester tests, essays or other written or practical work, final written examinations, *viva voce* examinations).

#### 1870 First Year Examination

#### 5080 Cell and Molecular Biology IM

level: I    points value: 6    duration: full year

*assumed knowledge:* proficiency in English; SACE Stage 2 Chemistry

*contact hours:* 5 hours per week.

*content:* The course is an integrated program extending through the first two years of the medical curriculum. It will introduce the student to the structure and function of the cell and extracellular matrix. The course will encompass subject matter of chemistry, biochemistry, cell biology, molecular biology and genetics as these are seen to be relevant to the education of the medical student. An objective is to lead the student to an ability to understand cellular basis of normality and disease.

The emphasis of the course will be on understanding of basic principles, rather than on taxonomic details, and on problem solving and student directed learning. Introduction to chemistry is specifically directed to providing the necessary chemical background for students in the Medical Faculty. (5 weeks) Introduction to protein structure and function, mechanisms of

enzyme action, water in biological systems, introduction to carbohydrates, metabolic conversion of energy, lipid metabolism, structure and movement within the cell, introduction to genetics and molecular biology.

*assessment:* Assessment will be based on a written examination at the end of each semester. A detailed statement will be provided at the commencement of the course.

#### 4230 Doctor, Patient and Society IM

level: I    points value: 5    duration: full year

*assumed knowledge:* high proficiency in written and verbal English language

*contact hours:* 5 hours per week.

*content:* This subject introduces the three year program for the study of Doctor, Patient and Society. It provides an integrated understanding of the principles of human behaviour in health and illness, including individual, interpersonal, societal and cross cultural perspectives. The application of these principles to communication, the doctor-patient relationship and clinical practice are demonstrated through practical experience.

*assessment:* Assessment is based on exams and coursework. A detailed statement will be provided at the commencement of the course.

#### 3437 Human Structure and Function IM

level: I    points value: 9    duration: full year

*assumed knowledge:* proficiency in English and SACE Stage 2 Chemistry and Physics

*contact hours:* 6 hours per week.

*content:* The material covered in this stream will be taught in two separate units:

Introduction to the human body: in this unit the basic aspects of structure and function of the body will be considered, general features of cells and tissues will be dealt with, and structure and function of the body systems will be discussed in a manner which illustrates their relation to clinical medicine.

Basic neurosciences and musculoskeletal medicine: the structure and function of the cells and tissues of the nervous, muscular and skeletal systems will be explored. The topographical anatomy of the limbs will also be presented in the context of musculoskeletal medicine.

*assessment:* Assessment is based on exams and coursework. A detailed statement will be provided at the commencement of the course.

### 5216 Introductory Medicine IM

level: I points value: 4 duration: full year

contact hours: 4 hours per week

*content:* In semester 1 students are introduced to the technique of problem based learning in a large group setting and then afforded experience of the method in smaller groups. Group members are also given training in the dynamics of small group activities. In addition, students are introduced to library skills and are required to work through a library skills workbook, individually.

In semester 2 students work in small groups at problem based learning. The aims of the course are:

- 1 To train the student in the techniques of problem based learning as a learning approach, and to develop the skills of collaborative small group learning.
- 2 To introduce the student to clinical problem solving and patient management.
- 3 To encourage the student to understand, and to be able to explain, the mechanisms of production of clinical symptoms and signs.
- 4 To make the student aware of the extent of which (s)he will require to carry forward preclinical subject knowledge and understanding in order to be an effective clinical student and medical practitioner.
- 5 To motivate students to seek long-term learning through understanding, rather than superficial rote learning
- 6 To provide a stimulus to integration of learning between disciplines.

*assessment:* is based on written examinations at the end of each semester, on performance in the small group activities and on specified course work. A detailed statement will be provided at the commencement of the course. Assessment is non-competitive; satisfactory level of performance in each aspect of the program is required.

### 2034 Second Year Examination

#### 2916 Cell and Molecular Biology IIM

level: II points value: 6 duration: full year

*prerequisite:* Pass in 1870 First Year Examination

*contact hours:* 4 hours per week

*content:* Cell biology: cellular environment, dynamics of cell populations, cell signalling. Cancer and its molecular basis; molecular regulation of development; morphogenesis and differentiation; recombinant DNA technology; genes and human diseases; principles of immune defences and recognition in immune processes; introduction to human pathogens and their role in disease.

*assessment:* Assessment will be a written examination at the end of each semester. A detailed statement will be provided at the commencement of the course.

#### 6992 Doctor, Patient and Society IIM

level: II points value: 6 duration: full year

*prerequisite:* Pass in 1870 First Year Examination

*contact hours:* 5 hours per week

*content:* In this subject, students develop a more advanced understanding of the principles that were introduced in Doctor, Patient and Society I. It enables students to gain a sound understanding of the disciplines necessary to analyse the health of populations. Students learn about the relationships between the doctor, the patient and society at different stages of life and in the context of a variety of health issues. The theory and practice of medical communications skills relevant to these situations are taught. Students undertake a supervised family attachment in general practice which provides practical experience of the concepts of this stream.

*assessment:* Assessment is based on assignments, tutorial work and a written examination. Medical communication skills are assessed on the basis of practical course work and a simulated clinical interview examination. The general practice attachment is assessed by means of a written family case study. A detailed statement will be provided at the commencement of the course.

#### 6589 Human Structure and Function IIM

level: II points value: 12 duration: full year

*prerequisite:* Pass in 1870 First Year Examination

*contact hours:* 8 hours per week

*content:* The material covered in this stream will be taught in three separate units:

Cardiorespiratory Medicine: in this unit the development, structure and function of the cardiovascular, lymphatic and respiratory systems will be discussed in the context of their clinical relevance. Gastrointestinal and Genitourinary Medicine and a unit in Endocrinology, Metabolism and Reproduction units: the development, structure and function of the gastrointestinal, renal, endocrine and reproductive systems will be covered highlighting some common clinical conditions.

*assessment:* There will be a range of written and practical assessment throughout the year. A detailed statement will be provided at the commencement of the course.

#### 9092 Introductory Medicine IIM

level: II points value: 0 duration: full year

*contact hours:* 4 hours per week

*content:* Students continue to work in small groups, with a tutor, at problem based learning. During the second year the range of problems and clinical problems expands. Most of the cases and problems are

timed so that students have an opportunity to study particular fields of learning prior to didactic teaching in that field. Provision is also made for revision of previously studied material.

**assessment:** assessment is based on written examinations at the end of each semester, and on performance in the small group activities. A detailed statement will be provided at the commencement of the course. Assessment is non-competitive; a satisfactory level of performance in each aspect of the program is required.

### 3980 Third Year examination

#### 8824 Clinical Science and Skills

**level:** III *duration:* full year

**prerequisite:** Pass in 2034 Second Year Examination

**contact hours:** 1 lecture, 1 demonstration and 1 tutorial a week

**content:** This subject is intended to introduce the student to the skills of medical practice, the scientific study of the processes of disease states and the ethics of medicine. Emphasis will be placed on the acquisition of skills in clinical interviewing and communication as well as those required to elicit and record a clinical history and to perform a physical examination. Clinical data gathered at the bedside is to be interpreted in the context of a scientific understanding of the aetiology, pathophysiology and prognosis of common disease processes, aided where appropriate by information derived from elementary laboratory and other diagnostic investigations. In the study of biomedical ethics, the student will be equipped with the conceptual tools to think clearly about ethical problems and reach sound ethical judgements in a clinical context.

**assessment:** continuous assessment in demonstration and tutorial work, a project in biomedical ethics, a written exam in clinical science, and a *viva* in clinical skills

#### 9782 Human Physiology IIIMB

**level:** III *duration:* semester 1

**contact hours:** 2 one hour lectures per week

**prerequisite:** Pass in 2034 Second Year Examination

**content:** This subject provides an integrative view of central nervous system function, the control of human movement, and the endocrinological aspects of reproductive physiology.

**assessment:** a written exam at the end of the semester

#### 6105 Microbiology and Immunology IIIMB

**level:** III

*duration:* full year

**prerequisite:** Pass in 2034 Second Year Examination

**contact hours:** 2 one hour lectures per week, and a practical course using basic laboratory techniques (semester 1); problem based exercises involving approximately two contact hours per week (semester 2)

**content:** In Semester 1 the student is introduced to the principles and practice of clinical microbiology and immunology. The pathogenesis, laboratory diagnosis, epidemiology and control of common infections are presented, and clinical immunology topics such as transplantation, immune deficiency, allergic and autoimmune diseases are discussed. Other topics include; principles of sterilisation and disinfection; epidemiology and hospital cross-infection; the use of antibiotics and chemotherapy in the treatment of infection; fungal and parasitic diseases.

Semester 2 consists of a number of problem based exercises related to common problems in infectious disease and clinical immunology. Students will be required to assess the breadth of each problem, access the appropriate source material to examine each problem including underlying mechanisms and principles of management, and present their findings

**assessment:** exams at the end of each semester

#### 6950 Pathology III

**level:** III

*duration:* full year

**contact hours:** 3 lectures and 4 hours of practical work each week

**prerequisite:** Pass in 2034 Second Year Examination

**content:** In the first semester students are introduced to the general principles of Pathology and begin to look at the application of these to some clinical disease states. The nature and causes of disease are first considered, and then follows a full consideration of the inflammatory reaction, including tissue regeneration and repair. Other topics are thrombosis, embolism and infarction, cellular changes and degenerations, cardiovascular disease, the fundamentals of the neoplastic process, haemorrhage and shock, oedema, infiltrations and selected parasitic diseases.

In the second semester, these principles are applied to understanding the mechanisms of production of the clinical features and complications of the important diseases of the major organ systems.

Instruction is provided in lectures, tutorials, mortuary demonstrations and practical classes. Multidisciplinary Clinical and Pathological Science workshops address a range of clinical conditions with contributions from a range of specialists. Towards the end of the year the students are introduced to the principles of clinical

problem solving in a short series of clinico-pathological conferences.

*assessment:* an exam at the end of each semester

#### **1494 Pharmacology IIIMB**

*level:* III *duration:* full year

*prerequisite:* Pass in 2034 Second Year Examination

*contact hours:* 48 lectures, 16 hours of tutorials, 16 hours of demonstration workshops, 20 hours of self-directed learning

*content:* The subject covers (a) the principles of pharmacology; drug: receptor interactions; pharmacokinetics; toxicology; drug development; adverse drug reactions; factors causing variability in drug response; substance abuse; and (b) the mechanisms underlying the various transmitter and local hormone systems and the drugs and drug classes acting through these mechanisms. The course philosophy emphasises self-directed learning and is problem based.

*assessment:* Assessment will consist of an examination at the end of each semester and an assignment in each semester.

#### **9726 Social and Preventive Medicine III**

*level:* III *duration:* semester 2

*prerequisite:* Pass in 2034 Second Year Examination

*contact hours:* 3 hours a week

*content:* This subject involves 3 or 4 elective topics, one of which is to be chosen. The electives build on analytical approaches introduced in 6992 Doctor, Patient and Society IIM. Electives may involve particular subject areas within social and preventive medicine, or analytical approaches using epidemiological or social-science methods.

*assessment:* major assignment, final exam, and tutorial participation

#### **8508 Fourth Year examination**

#### **1113 Clinical Science IV**

*level:* IV *duration:* full year

*content:* The twelve week full-time program is designed to integrate the medical sciences with clinical medicine. It involves study and clinical experience in Orthopaedics, Musculoskeletal Disorders, Trauma, Geriatric Medicine, General Practice, Oncology, Anaesthetics.

Students principally will be based at the Royal Adelaide Hospital or the Queen Elizabeth Hospital but some clinical experience will also be gained at the other locations in metropolitan Adelaide.

Considerable emphasis is placed on the need to understand the scientific basis of clinical conditions and the rational approach to clinical tests and therapeutics. To support this, pharmacological clinical tutorials and clinico-pathological conferences are scheduled throughout the year.

*assessment:* there will be continuous assessment and examinations. A detailed assessment document will be provided at the beginning of the clinical year.

#### **2976 Clinical Skills IV**

*level:* IV *duration:* full year

*content:* The twelve week full-time clinical program, designed to give students a balanced introduction to clinical medicine will involve student undertaking clinical attachments in Medicine and Surgery at the Royal Adelaide Hospital, The Queen Elizabeth Hospital and/or the Lyell McEwin Hospital. Students will consolidate and expand their basic clinical skills and develop the ability to analyse the whole diagnostic process, including special diagnostic procedures and the management of medical conditions. There will also be six lecture on the Drug and Alcohol component in the programs.

*assessment:* Clinical Skills are principally assessed by continuous assessment but a detailed assessment document is provided at the beginning of the clinical year.

#### **8475 Psychiatry IV**

*level:* IV *duration:* full year

*content:* In the fourth year students are assigned to psychiatric units in general hospitals for clinical clerking, the detailed study of patients and families and an overview of the field of general psychiatry.

#### **6915 Research Project**

*level:* IV *duration:* full year

*content:* The project aims to develop student skills in assessing the reliability of evidence and the relevance of scientific knowledge, to reach conclusions by observation, experiment and logical analysis and evaluate critically the prevailing knowledge on which current medical practice is based. Students will be required to plan, carry out and write up a specific research project under the supervision of a faculty member. Research projects will be available in a variety of forms. The specified Topic could be epidemiological, clinical or laboratory based research. Clinical projects could be case reports, disease surveys, criteria for diagnosis, natural history including complications, and/or forms of treatment, review of medical services (diagnostic, treatment etc).

A list of possible topics will be available in October of the previous year. Students will be able to conduct their project individually or in pairs.

*assessment:* A report and oral presentation will be required at the end of the 6 week exercise.

### 2643 Clinical Skills IVA

*level:* IV *duration:* full year

*content:* This subject is designed to give a repeating student additional clinical experience in Medicine and Surgery. The program will involve undertaking clinical attachments in the University departments of Medicine and Surgery at either The Royal Adelaide Hospital or The Queen Elizabeth Hospital over a 6 week period.

*assessment:* Clinical skills will be assessed during the term by continuous assessment.

### 3192 Fifth Year Examination

#### 9691 Clinical Science V

*level:* V *duration:* full year

*content:* This subject is designed to continue and expand the Clinical Science program stated in the fourth year. It will ensure an adequate understanding of the clinical sciences and their integration with clinical medicine. Microbiology, pathology and pharmacology are key parts of this course. The subject involves student participation in the integrated problem-based learning programs Clinical Science 2 and Clinical Science 3, run throughout the year at The Royal Adelaide Hospital and The Queen Elizabeth Hospital.

*assessment:* Assessment will be by written examination at the end of the year. This examination will include material covered in Clinical Science IV and up to 40% of the examination may cover microbiology, pathology and pharmacology.

#### 4369 Clinical Skills V

*level:* V *duration:* full year

*content:* This subject is designed to continue development of a student's clinical skills and experience. It involves undertaking clinical attachments in Medical units at The Royal Adelaide Hospital, The Queen Elizabeth Hospital or Lyell McEwin Hospital.

*assessment:* Clinical Skills will be assessed during the term by continuous assessment.

#### 7240 Obstetrics and Gynaecology V

*level:* V *duration:* full year

*contact hours and content:* Students are rostered to The Queen Elizabeth Hospital or the Women's and Children's Hospital, the Royal Adelaide Hospital or the Lyell McEwin Health Service for one clinical term.

During this time students undertake clinical attachments in general obstetrics and gynaecology and are rostered to attend special clinics in family planning, coloscopy, infertility and gynaecological oncology. Students reside in hospital for six weeks.

A course of resource sessions totalling three hours in the major areas of obstetrics and gynaecology, is given during the fifth year. Formal teaching is carried out by tutorials in obstetrics and gynaecology, including problem based learning in obstetrics, gynaecology and neonatology. The subjects covered are fetal growth and development, antenatal and postnatal problems, the management of the normal neonate and selected neonatal disorders, high risk obstetrics and perinatology, reproductive endocrinology, infertility, malignancy, pelvic infections, family planning, applied pharmacology and problems of the peripubertal and perimenopausal years, human sexuality and sexually transmitted diseases. A comprehensive seminar on human sexuality is also given.

*assessment:* Students are expected to demonstrate competence in the clinical skills: history taking, examination, diagnosis and management during the clinical term (20%). Written assignments during the semester contribute 10%. Theoretical knowledge is assessed during the clinical term (clinical stations *viva* 35%) and at the end of the year (written 35%). Students may be required to re-sit the clinical examination and pass-fail and distinction *vivas* are held at the end of the year.

#### 4376 Paediatrics V

*level:* V *duration:* full year

*contact hours:* Students will attend the Women's and Children's Hospital for a six week period.

*content:* The course will include normal childhood growth and development, the child in the family and in the community, preventative health strategies, the child with disability, common minor disorders of childhood, and child and family psychiatry.

Instruction will be by student-led problem solving, supervised tutorials, visits to child health and educational facilities, and clinical experience in the recognition and management of variations and disorders of health in childhood. Neonatology is taught as part of 7240 Obstetrics and Gynaecology V.

*assessment:*

- 1 Written projects from home and community visits by students.
- 2 An O.S.C.E. examination at the end of the six week attachment.

The marks obtained in Year V will be 40% of the total marks in Paediatrics, and these marks will be included in consideration of the total assessment of performance in Paediatrics which will occur in Year VI.

### 8425 Clinical Science IV/V

level: IV/V

duration: full year

*content:* This subject is designed to strengthen a repeating student's understanding of the Clinical Science IV/V program. It will ensure an adequate understanding of the clinical sciences and their integration with clinical medicine. Microbiology, pathology and pharmacology are key parts of this course. The subject involves student participation in components (specified according to students' needs) of Clinical Science 1, Clinical Science 2 and Clinical Science 3, run throughout the year at The Royal Adelaide Hospital and The Queen Elizabeth Hospital.

*assessment:* Assessment will be by written examination at the end of the year. The examination will include material covered in Clinical Science IV and up to 40% of the examination may cover microbiology, pathology and pharmacology.

### 4943 Clinical Skills IV/V

level: IV/V

duration: full year

*content:* The subject is designed to strengthen a student's clinical skills.

The program will involve undertaking clinical attachments in the University departments of Medicine and Surgery at either The Royal Adelaide Hospital or The Queen Elizabeth Hospital and other hospital units.

*assessment:* Clinical skills will be assessed during the term by continuous assessment and by clinical *vivas*.

### 1106 Final (Sixth Year) examination

### 4686 Clinical Competence VI

level: VI

duration: full year

*content:* Students will spend eighteen weeks under the supervision of the University Departments of Medicine and Surgery and their clinical teachers at The Royal Adelaide Hospital, The Queen Elizabeth Hospital, Lyell McEwin Hospital, Modbury Hospital and at other venues. They will undertake periods of internship in general medicine, specialty medicine (including accident and emergency care), general surgery and specialty surgery (including anaesthetics) obtaining experience in direct patient care. There will be a minimum of formal teaching with the emphasis on the application of clinical science to medical practice. In addition the curriculum provides a six week elective at the beginning of the year and a two week program in ENT, Ophthalmology and Dermatology.

*assessment:* Assessment is undertaken in two ways. Throughout the year ratings are made of student's performance during the internship. Overall ratings are supported by an observed long-case assessment. At the end of the year each student is required to sit for an

examination of clinical competence which consists of a written and practical component. Clinical *vivas* are held for those students who fail to satisfy the assessors on the ward or the examiners in the examination of clinical competence.

### 9950 Applied Pathology and Forensic Medicine VI

level: VI

duration: full year

*content:* This course organised by the Department of Pathology comprises a series of combined presentations by pathologists and clinicians and is orientated towards relating clinical features to laboratory findings in selected diseases. There is also a series of lectures dealing with selected topics in forensic medicine and pathology.

*assessment:* The assessment in this subject is integrated into the examination of clinical competence (see under 4686 Clinical Competence VI). Separate *vivas* will be held to help in the determination of distinctions and prizes.

### 4008 Medicine VI

level: VI

duration: full year

*content:* The teaching of this subject is integrated with the teaching of Surgery and is described under 4686 Clinical Competence.

*assessment:* The assessment in this subject is integrated into the examination of clinical competence (see 4686 Clinical Competence). Separate *vivas* will be held to help in the determination of distinctions and prizes.

### 4857 Surgery VI

level: VI

duration: full year

*content:* The teaching of this subject is integrated with the teaching of Medicine and is described under 4686 Clinical Competence.

*assessment:* The assessment in this subject is integrated into the examination of clinical competence (see 4686 Clinical Competence). Separate *vivas* will be held to help in the determination of distinctions and prizes.

### 8958 Community Practice VI

level: VI

duration: full year

*contact hours and content:* The four week course in Community Practice is made up of a 16 day attachment to the Department of General Practice and a four day attachment to the Department of Community Medicine.

The Department of General Practice teaching is in the form of skills workshops and clinical attachments. Three days of workshops are held on counselling and

communication, loss and grief and the performance of practical procedures. Students are usually attached to city general practitioners for four days and to a country general practitioner for nine days. During this latter placement they will be expected to stay in the country town away from Adelaide.

During the four day attachment to the Department of Community Medicine students will undertake a multi-professional workshop with students from other health professions and have further teaching in public and occupational health.

*assessment:* assessment includes two patient management interviews, a mark awarded for the multi-professional workshop, evaluation both verbal and written of a 'critical thinking' log-diary kept during the general practice attachments and assessment of the ability to perform two practical procedures. Students are also given a performance grade by the general practitioners to whom they are attached.

### 6460 Paediatrics VI

*level:* VI *duration:* full year

*contact hours:* Students will attend an eight week full-time course based at The Adelaide Children's Hospital campus of the Women's and Children's Hospital.

*content:* The course will provide for the study of medical and surgical disorders of childhood. The course will provide practical experience in caring for children with acute and longer term illness. This will include the recognition and care of surgical and orthopaedic disorders in childhood.

*assessment:* Assessment of clinical competence in paediatric medicine and paediatric surgery will occur at the end of the eight week attachment. The assessment will include case presentation evaluations and an objective structured clinical examination. There will also be a paediatric component during the end of year written examinations.

### 4364 Psychiatry VI

*level:* VI *duration:* full year

*content:* In the sixth year students will be assigned to psychiatric treatment settings, where they will further develop knowledge of assessment techniques and the management of a wide variety of disorders. Students are required to submit an essay on a clinical psychiatric topic of their choice. A list of possible subjects is provided for guidance. Four brief summaries also contribute to the term assessment. A written paper occurs in the November examination.

### Medical Ethics

A short course of lectures on the ethics of the profession.

The relationship of practitioners to one another, to patients, nurses, chemists, friendly societies, the public, advertising, hospitals, the law courts, and the State.

## Bachelor of Medical Science

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar.

As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

### Specific Course Rules

#### 1 General

- 1.1 There shall be an Honours degree of Bachelor of Medical Science.

#### 2 Duration of course and qualification requirements

- 2.1 To qualify for the degree a candidate shall undertake a course of advanced study extending over one academic year, and shall satisfy the examiners in one of the subjects prescribed in the Specific Course Rules.

#### 3 Admission requirements

- 3.1 Before admission to a course of study for the degree a candidate shall have:
- passed the Third-Year Examination for the degrees of Bachelor of Medicine and Bachelor of Surgery;
  - been accepted by the head of the department concerned as a suitable candidate for advanced work in the subject he/she wishes to pursue; and
  - completed such prerequisite work as the head of the department concerned may prescribe.
- 3.2 On the recommendation of the Faculty of Medicine, the Council may accept as a candidate for the degree a person who in a medical course of another institution has passed examinations regarded as equivalent to that specified in 3.1(a).

#### 4 Assessment and examinations

- 4.1 The examination for the degree will consist of a written paper or papers, the essays submitted during the year, the thesis on the research project, an oral examination, and a practical examination if required by the examiners.
- 4.2 There shall be three classifications of Pass in the final assessment of any subject for the Honours degree as follows: First Class, Second Class,

Third Class. The Second Class classification shall be divided into two divisions as follows: Division A and Division B.

- 4.3 A candidate shall not be eligible to present himself/herself for examination unless he/she has regularly attended the prescribed lectures and has done written and laboratory or other practical work, where required, to the satisfaction of the professors and lecturers concerned.

#### 5 Course of study

- 5.1 A course of study for the degree may be undertaken in one of the following:
- 8110 Honours Anaesthesia and Intensive Care
  - 1739 Honours Anatomy and Histology
  - 6777 Honours Biochemistry
  - 9807 Honours Community Medicine
  - 9563 Honours General Practice
  - 5349 Honours Medicine
  - 4408 Honours Microbiology and Immunology
  - 8864 Honours Obstetrics and Gynaecology
  - 3500 Honours Orthopaedics and Trauma
  - 5702 Honours Paediatrics
  - 1551 Honours Pathology
  - 3950 Honours Pharmacology
  - 6740 Honours Physiology
  - 9196 Honours Psychiatry
  - 7274 Honours Surgery
- 5.2 The course comprises three equally important aspects undertaken concurrently:
- Course of Reading in selected fields, and the submission of a series of essays associated therewith.

- (b) Experimental work covering a wide range of techniques.
- (c) The undertaking of a research project which will be assigned early in the course and on which a thesis must be submitted.

## Syllabuses

### reference books

Although lists of books and journals for reference purposes are regarded as important, details have not been included in this Volume. These will however be issued from time to time by the departments concerned. It is hoped that all books and journals set for reference will be available to be consulted in the Barr Smith Library.

### examinations

For each subject students may obtain from the department concerned details of the examination in that subject including the relative weights given to the components (eg such of the following as are relevant: assessments, semester or mid-semester, essays or other written or practical work, final written examinations, *viva voce* examinations).

### The Honours degree of Bachelor of Medical Science

- 8110 Honours Anaesthesia and Intensive Care
- 6777 Honours Biochemistry
- 9807 Honours Community Medicine
- 9563 Honours General Practice
- 5349 Honours Medicine
- 4408 Honours Microbiology and Immunology
- 8864 Honours Obstetrics and Gynaecology
- 3500 Honours Orthopaedics and Trauma
- 5702 Honours Paediatrics
- 1551 Honours Pathology
- 3950 Honours Pharmacology
- 6740 Honours Physiology
- 9196 Honours Psychiatry
- 7274 Honours Surgery

Students requiring further information concerning syllabuses and work required for the Honours degree of Bachelor of Medical Science are advised to consult the Head of the appropriate department as early as possible.

## Bachelor of Health Sciences

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar.

As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

### Specific Course Rules

#### 1 General

- 1.1 There shall be an Ordinary and an Honours degree of Bachelor of Health Sciences. A candidate may obtain either degree or both.

#### 2 Assessment and examinations

- 2.1 A candidate shall not be eligible to attend for examination unless the prescribed work has been completed to the satisfaction of the teaching staff concerned. A candidate who is not eligible to attend for examination shall be deemed to have failed the examination.
- 2.2 In determining the final result in a subject (or part of a subject) the examiners may take into account a candidate's oral, written, practical and examination work, provided that the candidate has been given adequate notice at the commencement of the teaching of the subject of the way in which work will be taken into account and of its relative importance in the final result.
- 2.3 There shall be four classifications of pass in each subject for the Ordinary degree, as follows: Pass with High Distinction, Pass with Distinction, Pass with Credit, Pass. If the Pass classification be in two divisions, a pass in the higher division may be prescribed in the syllabuses as a prerequisite for admission to further studies in that subject or other subjects.
- 2.4 A candidate who fails a subject or who obtains a lower division pass and who desires to take that subject again shall, unless exempted wholly or partially therefrom by the head of the department concerned, again complete the required work in that subject to the satisfaction of the teaching staff concerned.
- 2.5 A candidate who has twice failed the examination in any subject for the Ordinary degree may not enrol for that subject again or for any other subject which in the opinion of the Faculty contains a substantial amount of the same material, except by permission of the Faculty and then only under such conditions as Faculty may prescribe.

- 2.6 There shall be three classifications of Pass in the final assessment of any subject for the Honours degree as follows: First Class, Second Class, Third Class. The Second Class classification shall be divided into two divisions as follows: Division A and Division B.

#### 3 Duration of course

- 3.1 The course of study for the Ordinary degree shall extend over three years of full-time study or its part-time equivalent.

#### 4 Qualification requirements

- 4.1 To qualify for the Ordinary degree a candidate shall, subject to the conditions specified in 4.2 and 4.3 below, pass subjects from 5 to the value of at least 72 points, which include the following:

- (a) Level I subjects to the value of at least 24 points, which must include, unless exempted by the Faculty:

3637 Human Biology I

7183 Public Health I

and a subject or subjects to the value of 6 points from those listed as Science Subjects or Mathematical Sciences Subjects.

- (b) Level II subjects to the value of at least 20 points, which must include, unless exempted by the Faculty:

1381 Biology of Disease II

and one other subject to the value of at least 4 points from those listed as Health Sciences subjects.

- (c) Level III subjects to the value of at least 24 points, which must include subjects from those listed as Health Sciences subjects, to the value of at least eight points but may not include subjects from those listed as Law subjects to the value of more than twelve points.

- (d) the completion of a major in the field of either health sciences or biological sciences, as follows:

Health Sciences: Level III subjects to the value of 12 points from those listed under this heading in 5.

Biological Sciences: Level III subjects to the value of 12 points from those listed under the heading of Science subjects in 5.

- 4.2 With the permission of the Dean and the Dean of the other Faculty, in lieu of up to 6 points prescribed under 4.1 above, a candidate may take subjects, from the Specific Course Rules of any Faculty, which are not listed in 5, but which are considered appropriate coursework for the degree of Bachelor of Health Sciences.
- 4.3 Candidates may be permitted to count towards the degree subjects which have been passed in another degree course, up to a maximum value of 24 points.\*

notes to 4.1(d)

**Health Sciences field**

Although some Level III Health Science subjects do not have prerequisites, candidates who wish to major in Public Health are advised to take Public Health I and II. When considering this field as a major, candidates should note that many Science subjects at Level III have prerequisites which may restrict their choice of subjects from other Level III subjects.

**Biological Sciences field**

Candidates who wish to select this field as a major should note that all Level III subjects, in this field, have prerequisite subjects and a major in this field requires careful planning of subject selection, from the first year of the course.

note (not forming part of the Specific Course Rules)

\*\*Studies in Law within the Degree of Bachelor of Health Science

1. Candidates who have gained a reserved place in Law studies on the basis of their SACE or equivalent results must, at the first attempt, successfully complete subjects to the value of 24 points at Level I of the B. Health Sc. before being eligible to take up their place in Law studies.
2. Candidates who have successfully completed subjects of the value of 24 points at Level I of the Bachelor of Health Science degree may apply for admission to the course for the degree of LL.B. Applications for admission to the LL.B. must be made through SATAC by early October of the year during which the Level I subjects are completed.
3. Except with the permission of the Dean of the Faculty of Law or a nominee, 6019 Law and Legal Process must be undertaken concurrently with the Law subject 3731 Contract. These two subjects are prerequisites for each of the third year Law subjects listed in 5. Students will remain candidates for the degree of B. Health Sc. and may present for the degree B. Health Sc. the Law subjects listed in 5 subject to the provisions of 3 and 4. Students must complete all the requirements for the B. Health Sc. before they can obtain their LL.B. degree.  
See also the Specific Course Rules of the LL.B. degree and see, in particular, the Introductory Notes to the LL.B. Syllabuses.

**6 The Honours degree**

6.1 A candidate may, subject to approval by the Head of the department concerned, proceed to the Honours degree in one of the following subjects:

8110	Honours Anaesthesia and Intensive Care
1739	Honours Anatomy and Histology
6777	Honours Biochemistry
9807	Honours Community Medicine

- 7599 Honours Genetics
- 5349 Honours Medicine
- 4408 Honours Microbiology and Immunology
- 3500 Honours Orthopaedics and Trauma
- 5702 Honours Paediatrics
- 1551 Honours Pathology
- 3950 Honours Pharmacology
- 6740 Honours Physiology
- 9196 Honours Psychiatry
- 7274 Honours Surgery

**6.2** The course comprises three equally important aspects undertaken concurrently:

- (a) Course of reading in selected fields, and the submission of a series of essays associated therewith.
- (b) Experimental or scholarly work covering a wide range of techniques.
- (c) The undertaking of a research project which will be assigned early in the course and on which a thesis must be submitted.

**6.3** The examination for the degree will consist of a written paper or papers, the essays submitted during the year, the thesis on the research project, an oral examination, and a practical examination if required by the examiners.

**6.4** A candidate may, subject to the approval of the Faculty in each case, proceed to the Honours degree in a subject taught in a department in another faculty. Candidates must consult the Head of the department concerned and apply, in writing, to the Registrar before 30 November in the preceding year for admission to the Honours course.

## Syllabuses

### textbooks

Information on appropriate textbooks will be provided by the Department concerned, and at the preliminary lecture in Orientation Week.

In general, students are expected to have their own copies of textbooks; but they are advised to await advice from the lecturer concerned before buying any particular book. Only the prescribed edition of any textbook should be sought.

### reference books

Although lists of books and journals for reference purposes are regarded as important, details have not been included in this Volume. These will however be issued from time to time by the departments concerned. It is hoped that all books and journals set for reference will be available to be consulted in the Barr Smith Library.

### examinations

For each subject students may obtain from the department concerned details of the examination in that subject including the relative weights given to the components (eg such of the following as are relevant: assessments, semester tests, essays or other written or practical work, final written examinations, *viva voce* examinations).

#### Level I

##### 3637 Human Biology I

*level:* I    *points value:* 6    *duration:* full year  
*contact hours:* 3 lectures and 3 hours practical work/tutorial per week

*content:* The aim of Human Biology I is to present an overview of the biology of the human species. Segments encompass various aspects of human genetics, structure and function, evolutionary origins, defence systems, disease, reproduction and ecology. Topics include the basic principles of genetics and the influence they have on human variation; the links between mutation and genetic disease; an investigation of the organisation of the human body and how the functions of the various cells, tissues, organs and systems relate to their structure and are controlled; basic concepts of human evolution together with the supporting molecular and fossil evidence; the effects of infectious agents on the human body; the principles underlying the functioning of the body's immune

system; the fundamentals of ecology and the impact of modern man on the environment. A study of human reproduction includes the origins and maturation of the male and female gametes, events culminating in fertilisation, and subsequent embryonic and fetal development.

*assessment:* each semester: a written examination, practical examination, continuous assessment, assignments and contributions to tutorial discussions.

##### 7183 Public Health I

*level:* I    *points value:* 6    *duration:* full year  
*contact hours:* 2 lectures and 1 tutorial per week

*content:* This course gives a broad overview of public health in Australia and critically examines basic concepts of health and illness in society. Several disciplines that help shape public health will be introduced; these include: the history and politics of health, public health law, health economics, sociology and epidemiology.

*assessment:* to be advised

#### Level II

##### 1381 Biology of Disease II

*level:* II    *points value:* 4    *duration:* semester 2  
*prerequisites:* 3637 Human Biology I

*contact hours:* 2 lectures a week, 4 hours of practicals and demonstrations

*content:* Causes of disease, basis for disease classification, body defence mechanisms, methods of study of disease processes, mechanisms of tissue injury, molecular and cellular pathology of tissue injury, local and systemic responses to tissue injury, inflammation and repair processes, disorders of cell growth and differentiation, tumours and derangements of body fluids.

*assessment:* written and practical exams

##### 4223 Craniofacial Growth and Development II

*level:* II    *points value:* 4    *duration:* semester 1  
*prerequisites:* 3637 Human Biology I.

*contact hours:* 1 lecture and 2 hours practical work/tutorial per week

*content:* The aim of this course is to introduce concepts of craniofacial morphology and growth with particular

emphasis on applications in medicine, surgery and dentistry. Introductory sessions cover aspects of evolution of head form and the comparative anatomy of the masticatory system. Theories of craniofacial growth serve to introduce the student to a detailed study of the mechanisms of craniofacial growth and development of dental occlusion. Both normal and pathological growth, as well as genetic considerations are covered. Clinical aspects of general child growth and its assessment are specifically related to craniofacial growth. Application of growth data in cranio-maxillo-facial surgery and orthodontics is also discussed.

The practical and tutorial component of the subject gives students an opportunity to examine records used in growth surveys and perform statistical analyses. Students also have the opportunity to examine skeletal material and to explore aspects of the course in more detail. Craniofacial imaging by three-dimensional computer simulation is demonstrated using data from individuals with craniofacial abnormalities.

*assessment:* to be advised

#### 6498 Human Biology II

*level:* II     *points value:* 8     *duration:* full year

*prerequisites:* Pass Div I in 3637 Human Biology I or 3174 Biology I or 7138 Molecular and Cell Biology I

*restrictions:* 9864 Human Anatomy I

*contact hours:* 3 lectures; 1 tutorial; up to 4 hours practicals per week

*content:* Two lectures on topographical anatomy and one lecture on reproductive biology and embryology per week. Functional aspects of anatomy are emphasised. The content includes a study of the thorax, abdomen, pelvis and limbs of the human body together with some coverage of biomechanics and kinesiology.

The reproductive biology and embryology section includes a series of lectures on early and general embryology together with an introduction to reproductive technology procedures in current use, methods to control human fertility and the causations of infertility. In addition an outline of the development of the various organ system is given.

Practical work includes dissection of the trunk and limbs; prosected specimens are also used as demonstration material and for self-directed learning.

*assessment:* There will be an examination each semester: topographical anatomy theory and practical (75%); and Embryology and Reproductive Biology (25%). Project work may also be assessed during semester.

#### 6484 Human Reproductive Biology II

*level:* II     *points value:* 4     *duration:* semester 1

*prerequisites:* 3637 Human Biology I

*contact hours:* 3 tutorial/lecture hours, 6 practical/project hours per week

*content:* The course aims to confront students with the scientific, social, medical, moral and ethical challenges presented by human population dynamics. Students should gain sufficient understanding of the biology of human reproduction to appreciate present and emerging technologies used in the investigation and management of reproductive function and the social and biological impact of their adoption on a global scale. The moral and ethical implications of such programs will be discussed.

The course comprises an introduction to human population dynamics in relation to world resources and the necessity for fertility regulation strategies followed by detailed study of the human reproduction process, reproductive pathology and reproductive technologies available for the assessment and management of fertility. A study of the international agencies attempts to implement national and global fertility regulation programs will be used to provide insight into present social, moral and ethical constraints and their impact on future prospects.

*assessment:* Students will be assessed on their tutorial and project reports, contribution to seminar and group discussions and an examination.

#### 5050 Public Health II

*level:* II     *points value:* 8     *duration:* full year

*prerequisites:* 7183 Public Health I

*contact hours:* 2 lectures and 1 tutorial per week

*content:* This subject introduces the population view of health, illness and health care. The curriculum will include the main quantitative techniques, data collection methods and data bases which are pertinent to the understanding of the population view and will include an introduction to demography, epidemiology and biostatistics and environmental health with some comparative material on the statistical methods of the social sciences. Substantial attention is given also to the major outputs from the Australian Census, to the main formal and informal collections of information pertinent to health and disease, and to other social indicators.

*assessment:* to be advised

**Level III**

**5398 Medical Microbiology and Immunology III**

*level:* III *points value:* 6 *duration:* semester 1

*prerequisite:* 1381 Biology of Disease II

*contact hours:* 2 or 3 lectures and a 3 hour practical or demonstration each week

*content:* The isolation, morphology, physiology and classification of bacteria of medical importance. The principles of sterilisation, disinfection and the use of antibiotics and chemotherapeutic agents. The role of micro-organisms in human disease, considered as a study of host-parasite relationships; epidemiology and its relation to hospital cross-infections. An outline of human virus, fungal and parasitic infections. The collection of specimens for bacteriological and viral diagnosis. The principles of immunology as applied to the diagnosis, prophylaxis and therapy of bacterial and virus diseases, transplantation, diseases due to allergy or hypersensitivity and autoimmunity. At all stages, the course is related, whenever possible, to clinical material.

*assessment:* written exam at the end of the semester

**6225 Pathology III HS**

*level:* III *points value:* 6 *duration:* full year

*prerequisites:* 9473 Cells and Tissues II, 3773 Physiology II, 1381 Biology of Disease II

*contact hours:* 3 lectures/workshops per week and 4 hours of practicals, tutorials and mortuary demonstrations

*content:* In the first semester, students will be introduced to the general principles of cellular and tissue pathology. The nature of cell and tissue degeneration and death will be considered first, followed by detailed appraisal of inflammation, wound and tissue repair, disorders of cell and tissue growth, infarction, ischaemic heart disease, hypertension, haemorrhage and shock, and neoplastic processes. In the second semester, the subject will address selected topics in the systematic pathology of various diseases. In both semesters, Clinical and Pathological Science workshops will be conducted by groups of contributors from a range of clinical disciplines.

*assessment:* an exam at the end of each semester

**3076 Oral Health and Disease III**

*level:* III *points value:* 6 *duration:* semester 2

*prerequisites:* 1381 Biology of Disease.

*contact hours:* 2 lectures and 2 hours practical work/tutorial per week

*content:* This subject introduces the structure, development and functions of the oral tissues, their interrelationships and their relation to other organ systems in health and disease. The curriculum includes a number of units covering oral mineralised tissues, oral mucosa and periodontium, salivary glands and saliva, the oral microbiological system, orofacial growth and development, oral motor and sensory systems and oral diagnostic methodology.

The practical component of the subject will introduce laboratory techniques such as collection, handling and analysis of oral fluids; laboratory techniques for examining dental plaque and micro-organisms in the oral cavity; and the use of electronic and electro-optical instruments for measurement and analysis in and around the oral cavity.

*assessment:* Assessment consists of written tests following each module and assessment of project reports and presentations.

**9674 Public Health III**

*level:* III *points value:* 12 *duration:* full year

*prerequisites:* 7183 Public Health II

*contact hours:* 1 lecture and 3 tutorials per week

*content:* This subject develops the skills and perspectives of Public Health I and Public Health II by applying quantitative and qualitative approaches to the analysis of a number of diseases of public health importance. The second half of the course provides opportunities for elective study in areas such as mental health, worker health, international health, occupational health, public health ethics, public health history or health promotion. Not all of the electives will be offered in every year.

*assessment:* to be advised

# Graduate Diploma in Accident and Emergency Nursing

## Course of Study

### Specific Course Rules

#### 1 Admission Requirements

- 1.1 An applicant for admission to the course for the Graduate Diploma in Accident and Emergency Nursing shall:
- have qualified for a Bachelor of Nursing of a university accepted for the purposes by the University OR have at least two years post registration experience as a registered nurse in the area of accident and emergency nursing, and
  - be registered, or be eligible for registration, as a nurse in South Australia;
  - have obtained the approval of the Department of Clinical Nursing.
- 1.2 Subject to the approval of Council, the Faculty may in special cases and subject to such conditions (if any) as it may seem fit to impose in each case, accept as a candidate for the Graduate Diploma in Accident and Emergency Nursing a person who does not qualify for admission to the course under (1.1) above, but has given evidence satisfactory to the Faculty of fitness to undertake work for the Graduate Diploma in Accident and Emergency Nursing

#### 2 Duration of Course

- 2.1 To qualify for the Graduate Diploma in Accident and Emergency Nursing a candidate shall satisfactorily complete a course of full time study extending over at least one year OR a course of part time study extending over at least two years.

#### 3 Assessment and Examinations

- 3.1 There shall be four classes of pass in each subject for the Graduate Diploma in Accident and Emergency Nursing: Pass with High Distinction, Pass with Distinction, Pass with Credit and Pass.
- 3.2 (a) A candidate who fails to pass in the subject and desires to take the subject again shall again attend lectures and satisfactorily do such written and practical

work as the teaching staff concerned may prescribe, unless specifically exempted therefrom after written application to the Registrar for such exemption.

- A candidate who has twice failed the examination in any subject or division of a subject may not enrol for the subject again except by special permission to be obtained in writing from the Registrar and then only under such conditions as may be prescribed.
- For the purpose of this Rule a candidate who is refused permission to sit for examination, or who, without a reason accepted by the Head of the Department of Clinical Nursing as adequate, fails to attend all or part of a final examination (or supplementary examination if granted) after remaining enrolled for at least 9 teaching weeks that semester, shall be deemed to have failed the examination.

#### 4 Course of Study

- 4.1 Unless exempted therefrom by the Faculty every candidate for the Graduate Diploma in Accident and Emergency Nursing shall satisfactorily complete the following subjects to the value of 24 points:

3571 Accident and Emergency Nursing I	4
<i>or</i>	
6475 Accident and Emergency Nursing I PT	4
8219 Accident and Emergency Nursing II	4
<i>or</i>	
8473 Accident and Emergency Nursing II PT	4
4692 Advanced Scientific Facts and Theories	4
1100 Nursing and Medical Science in Accident and Emergency Care	4
1704 Frameworks of Care	4
8287 Practice Inquiry in Accident and Emergency Nursing	4

## Syllabuses

Students enrolled in this course will be required to complete six coursework units of study, each of four credit points.

### 3571 Accident and Emergency Nursing I

*points value:* 4 *duration:* semester 1  
*contact hours:* 2 hours per week for 13 weeks plus 900 hours clinical practice.

*content:* This subject will largely consist of field based learning within the area of accident and emergency care, supported by tutorials. Advanced clinical skill acquisition will occur based on theoretical frameworks of care so that skills are not acquired within a vacuum which does not include the patient and family in context.

*assessment:* 2000 word case study (30%); viva voce examination (20%); competency assessment (50%)

### 8219 Accident and Emergency Nursing II

*points value:* 4 *duration:* semester 2  
*contact hours:* 2 hours per week for 13 weeks plus 900 hours clinical practice.

*content:* This subject will build on students' previous learning in Accident and Emergency Nursing I. It will focus on further advanced clinical skill acquisition occur based on theoretical frameworks of care through field based learning within the area of accident and emergency care.

*assessment:* 2000 word case study (30%); viva voce examination (20%); competency assessment (50%)

### 4692 Advanced Scientific Facts and Theories

*points value:* 4 *duration:* semester 1  
*contact hours:* 2 hours per week for 13 weeks

*content:* This subject will examine fundamental scientific facts and theories to introduce the basic principles of those areas of the physical and social sciences which inform specialist practice. Topics will include an introduction to advanced nursing science; advanced medical science and advanced therapeutics.

*assessment:* 1000 word mid-term assignment (25%); mid term test paper (25%); examination (50%)

### 1100 Nursing and Medical Science in Accident and Emergency Care

*points value:* 4 *duration:* semester 2  
*contact hours:* 3 hours per week for 13 weeks

*content:* This subject will build on Advanced Scientific Facts and Theories and will focus on nursing and medical science specific to specialist accident and emergency practice. The focus will be on anatomy, physiology, biochemistry, therapeutics and nursing science.

*assessment:* 1000 word mid-term assignment (25%); mid term test paper (25%); examination (50%)

### 1704 Frameworks of Care

*points value:* 4 *duration:* semester 1 or 2  
*contact hours:* 2 hours per week for 13 week

*content:* This subject will consider the supports and constraints within which nurses care. Topics will include ethics of care; legalities of health care; professional standards and competencies; current issues in health economics and management; skill mix; specialisation and multiskilling; and multidisciplinary perspectives on health care.

*assessment:* 2000 word mid term assignment (30%); class presentation (20%); 3000 word essay (50%)

### 8287 Practice Inquiry in Accident and Emergency Nursing

*points value:* 4 *duration:* semester 2  
*contact hours:* 2 hours per week for 13 weeks

*content:* This subject will build on the student's previous and current experience in accident and emergency practice. It will focus on the phenomena which nurses encounter in practice and which form the basis of nursing inquiry. It will consider reflective processes, the research process, and theory building in accident and emergency nursing.

*assessment:* 2000 word mid term assignment (30%); 1500 word class paper (20%); 3000 word essay (50%)

### 6475 Accident and Emergency Nursing I PT

*points value:* 4 *duration:* full year  
*contact hours:* 2 hours per week for 13 weeks plus 900 hours clinical practice.

*content:* This subject will largely consist of field based learning within the area of accident and emergency care, supported by tutorials. Advanced clinical skill

acquisition will occur based on theoretical frameworks of care so that skills are not acquired within a vacuum which does not include the patient and family in context.

*assessment:* 2000 word case study (30%); viva voce examination (20%); competency assessment (50%)

**8473 Accident and Emergency Nursing II PT**

*points value:* 4 *duration:* full year

*contact hours:* 2 hours per week for 13 weeks plus 900 hours clinical practice.

*content:* This subject will build on student's previous learning in Accident and Emergency Nursing I. It will focus on further advanced clinical skill acquisition occur based on theoretical frameworks of care through field based learning within the area of accident and emergency care.

*assessment:* 2000 word case study (30%); viva voce examination (20%); competency assessment (50%)

# Graduate Diploma in Alcohol and Drug Studies

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar.

As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

## Specific Course Rules

### 1 Admission requirements

1.1 An applicant for admission to the course for the Graduate Diploma in Drug and Alcohol Studies shall:

- (a) have qualified for a degree of the University or for a degree of another university accepted for the purposes by the University, and
- (b) have obtained the approval of the Department of Clinical and Experimental Pharmacology.

1.2 Subject to the approval of Council, the Faculty may in special cases and subject to such conditions (if any) as it may see fit to impose in each case, accept as a candidate for the Graduate Diploma a person who does not qualify for admission to the course under (1.1) above, but who has a significant level of experience and training in the field of alcohol and drug services and who has given evidence satisfactory to the Faculty of fitness to undertake work for the Graduate Diploma.

### 2 Duration of course

2.1 To qualify for the Graduate Diploma a candidate shall satisfactorily complete a course of part-time study extending over at least two years.

### 3 Assessment and examinations

3.1 There shall be four classes of pass in each subject for the Graduate Diploma: pass with High Distinction, pass with Distinction, pass with Credit and Pass.

3.2 (a) A candidate who fails to pass in a subject and desires to take the subject again shall again attend lectures and satisfactorily do such written and practical work as the teaching staff concerned may prescribe, unless specifically exempted therefrom after written application to the Registrar for such exemption.

(b) A candidate who has twice failed the examination in any subject or division of a subject may not enrol for the subject again except by special permission to be obtained in writing from the Registrar and then only under such conditions as may be prescribed.

(c) For the purpose of this Rule a candidate who is refused permission to sit for examination, or who, without a reason accepted by the Head of the Department of Clinical and Experimental Pharmacology as adequate, fails to attend all or part of a final examination (or supplementary examination if granted) after remaining enrolled in a subject for at least 5 teaching weeks, shall be deemed to have failed the examination for the subject concerned.

4.1 Unless exempted therefrom by the Faculty every candidate for the Graduate Diploma in Alcohol and Drug Studies shall satisfactorily complete the following subjects to the value of 24 points, in the sequence determined by the prerequisite subject requirements specified in the syllabuses:

3320 Principles of Drug Action	4
9903 Aetiology of Drug Problems	4
2606 Treatment Principles and Practice I	4
2595 Treatment Principles and Practice II	4
8718 Public Health Principles and Drug Use	4
2234 Practicum and Project	4

## Syllabuses

### 3320 Principles of Drug Action

*points value:* 4                      *duration:* semester 1

*contact:* 8 x 3 hours of lectures and tutorials

*content:* This subject will provide an introduction to the pharmacology of alcohol and other drugs of dependence. It will cover general principles of drug action as well as the pharmacology of specific drugs and drug classes. Also included will be material on drug interactions and pharmacological mechanisms of drug tolerance and dependence.

*assessment:* By examination and tutorial paper. Relative weights to be advised at commencement of teaching.

### 9903 Aetiology of Drug Problems

*points value:* 4                      *duration:* full year

*prerequisites:* Pass in 3320 Principles of Drug Action

*contact:* 8 x 3 hours of lectures and tutorials

*content:* This subject will examine the factors that predispose to problematic drug use. This will include the individual and social factors that can result in the development of drug problems. Epidemiology of drug use and of drug-related problems will be discussed, together with drug problems in specific populations.

*assessment:* Relative weights to be advised at commencement of teaching

### 2606 Treatment Principles and Practice I

*points value:* 4                      *duration:* semester 2

*prerequisites:* Pass in 3320 Principles of Drug Action and 9903 Aetiology of Drug Problems

*contact:* 8 x 3 hours of lectures and tutorials

*content:* This subject will provide an overview of both assessment of patients with alcohol and drug problems and the options for treatment that are available. It will also include management of biomedical problems associated with alcohol and drug use including management of withdrawal, overdose and associated medical conditions.

*assessment:* By examination, tutorial paper and simulated patient viva. Relative weights to be advised at commencement of teaching

### 2595 Treatment Principles and Practice II

*points value:* 4                      *duration:* semester 2

*prerequisites:* Pass in 2906 Treatment Principles and Practice I

*contact:* 8 x 3 hours of lectures and tutorials

*content:* This subject will focus on psychosocial interventions appropriate for people with alcohol and drug problems. While a range of approaches will be covered, emphasis will be on behavioural therapies developed for the treatment of alcohol and drug problems. Topics will include relapse prevention, controlled drinking, family therapy and brief intervention. Psychiatric problems associated with alcohol and drug use will also be covered.

*assessment:* By examination, tutorial paper and simulated patient viva. Relative weights to be advised at commencement of teaching

### 8718 Public Health Principles and Drug Use

*points value:* 4                      *duration:* semester 1

*prerequisites:* Pass in 3320 Principles of Drug Action and 9903 Aetiology of Drug Problems

*contact:* 8 x 3 hours of lectures and tutorials

*content:* The public health perspective will be employed to examine how policy influences drug use and drug problems in our society. Issues to be covered include health promotion in the drug and alcohol area, supply and demand reduction and community action.

*assessment:* By examination and tutorial paper. Relative weights to be advised at the commencement of teaching.

### 2234 Practicum and Project

*points value:* 4                      *duration:* full year

*prerequisites:* Pass in 2595 Treatment Principles and Practice II

*contact:* 4 weeks practical work

*content:* Practicum requirements include a minimum of 2 x 2-week blocks of supervised clinical experience in alcohol/drug units, or its equivalent in case management. Students will be required to complete a log-book recording attendance and case load and to summarise a variety of cases. The project will consist of a comprehensive write-up of one case study.

*assessment:* By case summaries and project report. Relative weights to be advised at commencement of teaching.

# Graduate Diploma in Anaesthetic Nursing

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar.

As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

## Specific Course Rules

### 1 Admission Requirements

1.1 An applicant for admission to the course for the Graduate Diploma in Anaesthetic Nursing shall:

- (a) have qualified for a Bachelor of Nursing of a university accepted for the purposes by the University OR have at least two years post registration experience as a registered nurse in the area of anaesthetic nursing, and
- (b) be registered, or be eligible for registration, as a nurse in South Australia;
- (c) have obtained the approval of the Department of Clinical Nursing.

1.2 Subject to the approval of Council, the Faculty may in special cases and subject to such conditions (if any) as it may seem fit to impose in each case, accept as a candidate for the Graduate Diploma in Anaesthetic Nursing a person who does not qualify for admission to the course under (1.1) above, but has given evidence satisfactory to the Faculty of fitness to undertake work for the Graduate Diploma in Anaesthetic Nursing

### 2 Duration of Course

2.1 To qualify for the Graduate Diploma in Anaesthetic Nursing a candidate shall satisfactorily complete a course of full time study extending over at least one year OR a course of part time study extending over at least two years.

### 3 Assessment and Examinations

3.1 There shall be four classes of pass in each subject for the Graduate Diploma in Anaesthetic Nursing: Pass with High Distinction, Pass with Distinction, Pass with Credit and Pass.

3.2 (a) A candidate who fails to pass in the subject and desires to take the subject again shall again attend lectures and satisfactorily do such written and practical

work as the teaching staff concerned may prescribe, unless specifically exempted therefrom after written application to the Registrar for such exemption.

(b) A candidate who has twice failed the examination in any subject or division of a subject may not enrol for the subject again except by special permission to be obtained in writing from the Registrar and then only under such conditions as may be prescribed.

(c) For the purpose of this Rule a candidate who is refused permission to sit for examination, or who, without a reason accepted by the Head of the Department of Clinical Nursing as adequate, fails to attend all or part of a final examination (or supplementary examination if granted) after remaining enrolled for at least 9 teaching weeks that semester, shall be deemed to have failed the examination.

### 4 Course of Study

4.1 Unless exempted therefrom by the Faculty every candidate for the Graduate Diploma in Anaesthetic Nursing shall satisfactorily complete the following subjects to the value of 24 points:

5671 Anaesthetic Nursing I	4
or	
8921 Anaesthetic Nursing I PT	4
5984 Anaesthetic Nursing II	4
or	
7834 Anaesthetic Nursing II PT	4
4692 Advanced Scientific Facts and Theories	4
6150 Nursing and Medical Science in Anaesthetics	4
1704 Frameworks of Care	4
9122 Practice Inquiry in Anaesthetic Nursing	4

## Syllabuses

Students enrolled in this course will be required to complete six coursework units of study, each of four credit points.

### 5671 Anaesthetic Nursing I

*points value:* 4 *duration:* semester 1

*contact hours:* 2 hours per week for 13 weeks plus 900 hours clinical practice.

*content:* This subject will largely consist of field based learning within the area of anaesthetic care, supported by tutorials. Advanced clinical skill acquisition will occur based on theoretical frameworks of care so that skills are not acquired within a vacuum which does not include the patient and family in context.

*assessment:* 2000 word case study (30%); viva voce examination (20%); competency assessment (50%)

### 5984 Anaesthetic Nursing II

*points value:* 4 *duration:* semester 2

*contact hours:* 2 hours per week for 13 weeks plus 900 hours clinical practice.

*content:* This subject will build on student's previous learning in Anaesthetic Nursing I. It will focus on further advanced clinical skill acquisition occur based on theoretical frameworks of care through field based learning within the area of anaesthetic care.

*assessment:* 2000 word case study (30%); viva voce examination (20%); competency assessment (50%)

### 4692 Advanced Scientific Facts and Theories

*points value:* 4 *duration:* semester 1

*contact hours:* 2 hours per week for 13 weeks

*content:* This subject will examine fundamental scientific facts and theories to introduce the basic principles of those areas of the physical and social sciences which inform specialist practice. Topics will include an introduction to advanced nursing science; advanced medical science and advanced therapeutics.

*assessment:* 1000 word mid-term assignment (25%); mid term test paper (25%); examination (50%)

### 6150 Nursing and Medical Science in Anaesthetics

*points value:* 4 *duration:* semester 2

*contact hours:* 3 hours per week for 13 weeks

*content:* This subject will build on Advanced Scientific Facts and Theories and will focus on nursing and medical science specific to specialist anaesthetic care practice. The focus will be on physiology, biochemistry, therapeutics and nursing science.

*assessment:* 1000 word mid-term assignment (25%); mid term test paper (25%); examination (50%)

### 1704 Frameworks of Care

*points value:* 4 *duration:* semester 1 or 2

*contact hours:* 2 hours per week for 13 weeks

*content:* This subject will consider the supports and constraints within which nurses care. Topics will include ethics of care; legalities of health care; professional standards and competencies; current issues in health economics and management; skill mix; specialisation and multiskilling; and multidisciplinary perspectives on health care.

*assessment:* 2000 word mid term assignment (30%); class presentation (20%); 3000 word essay (50%)

### 9122 Practice Inquiry in Anaesthetic Nursing

*points value:* 4 *duration:* semester 2

*contact hours:* 2 hours per week for 13 weeks

*content:* This subject will build on the student's previous and current experience in anaesthetic practice. It will focus on the phenomena which nurses encounter in practice and which form the basis of nursing inquiry. It will consider reflective processes, the research process, and theory building in anaesthetic nursing.

*assessment:* 2000 word mid term assignment (30%); 1500 word class paper (20%); 3000 word essay (50%)

### 8921 Anaesthetic Nursing I PT

*points value:* 4 *duration:* Full year

*contact hours:* 2 hours per week for 13 weeks plus 900 hours clinical practice.

*content:* This subject will largely consist of field based learning within the area of anaesthetic care, supported by tutorials. Advanced clinical skill acquisition will occur based on theoretical frameworks of care so that skills are not acquired within a vacuum which does not include the patient and family in context.

*assessment:* 2000 word case study (30%); viva voce examination (20%); competency assessment (50%)

**7834 Anaesthetic Nursing II PT**

points value: 4

duration: Full year

contact hours: 2 hours per week for 13 weeks plus 900 hours clinical practice.

content: This subject will build on student's previous learning in Anaesthetic Nursing I. It will focus on further advanced clinical skill acquisition occur based on theoretical frameworks of care through field based learning within the area of anaesthetic care.

assessment: 2000 word case study (30%); viva voce examination (20%); competency assessment (50%)

## Graduate Diploma in Cardiac Nursing

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar.

As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

### Specific Course Rules

#### 1 Admission Requirements

1.1 An applicant for admission to the course for the Graduate Diploma in Cardiac Nursing shall:

- (a) have qualified for a Bachelor of Nursing of a university accepted for the purposes by the University OR have at least two years post registration experience as a registered nurse in the area of cardiac nursing, and
- (b) be registered, or be eligible for registration, as a nurse in South Australia;
- (c) have obtained the approval of the Department of Clinical Nursing.

1.2 Subject to the approval of Council, the Faculty may in special cases and subject to such conditions (if any) as it may seem fit to impose in each case, accept as a candidate for the Graduate Diploma in Cardiac Nursing a person who does not qualify for admission to the course under (1.1) above, but has given evidence satisfactory to the Faculty of fitness to undertake work for the Graduate Diploma in Cardiac Nursing

#### 2 Duration of Course

2.1 To qualify for the Graduate Diploma in Cardiac Nursing a candidate shall satisfactorily complete a course of full time study extending over at least one year OR a course of part time study extending over at least two years.

#### 3 Assessment and Examinations

3.1 There shall be four classes of pass in each subject for the Graduate Diploma in Cardiac Nursing: Pass with High Distinction, Pass with Distinction, Pass with Credit and Pass.

3.2 (a) A candidate who fails to pass in the subject and desires to take the subject again shall again attend lectures and satisfactorily do such written and practical work as the teaching staff concerned may

prescribe, unless specifically exempted therefrom after written application to the Registrar for such exemption.

(b) A candidate who has twice failed the examination in any subject or division of a subject may not enrol for the subject again except by special permission to be obtained in writing from the Registrar and then only under such conditions as may be prescribed.

(c) For the purpose of this Rule a candidate who is refused permission to sit for examination, or who, without a reason accepted by the Head of the Department of Clinical Nursing as adequate, fails to attend all or part of a final examination (or supplementary examination if granted) after remaining enrolled for at least 9 teaching weeks that semester, shall be deemed to have failed the examination.

#### 4 Course of Study

4.1 Unless exempted therefrom by the Faculty every candidate for the Graduate Diploma in Cardiac Nursing shall satisfactorily complete the following subjects to the value of 24 points:

1485 Cardiac Nursing I	4
<i>or</i>	
3196 Cardiac Nursing I PT	4
5009 Cardiac Nursing II	4
<i>or</i>	
8464 Cardiac Nursing II PT	4
4691 Advanced Scientific Facts and Theories	4
4828 Nursing and Medical Science in Cardiac Care	4
1704 Frameworks of Care	4
8757 Practice Inquiry in Cardiac Nursing	4

## Syllabuses

Students enrolled in this course will be required to complete six coursework units of study, each of four credit points.

### 1485 Cardiac Nursing I

*points value:* 4 *duration:* semester 1

*contact hours:* 2 hours per week for 13 weeks plus 900 hours clinical practice.

*content:* This subject will largely consist of field based learning within the area of cardiac care, supported by tutorials. Advanced clinical skill acquisition will occur based on theoretical frameworks of care so that skills are not acquired within a vacuum which does not include the patient and family in context.

*assessment:* 2000 word case study (30%); viva voce examination (20%); competency assessment (50%)

### 5009 Cardiac Nursing II

*points value:* 4 *duration:* semester 2

*contact hours:* 2 hours per week for 13 weeks plus 900 hours clinical practice.

*content:* This subject will build on student's previous learning in Cardiac Nursing I. It will focus on further advanced clinical skill acquisition occur based on theoretical frameworks of care through field based learning within the area of cardiac care.

*Assessment:* 2000 word case study (30%); viva voce examination (20%); competency assessment (50%)

### 4692 Advanced Scientific Facts and Theories

*points value:* 4 *duration:* semester 1

*contact hours:* 2 hours per week for 13 weeks

*content:* This subject will examine fundamental scientific facts and theories to introduce the basic principles of those areas of the physical and social sciences which inform specialist practice. Topics will include an introduction to advanced nursing science; advanced medical science and advanced therapeutics.

*assessment:* 1000 word mid-term assignment (25%); mid term test paper (25%); examination (50%)

### 4828 Nursing and Medical Science in Cardiac Care

*points value:* 4 *duration:* semester 2

*contact hours:* 3 hours per week for 13 weeks

*content:* This subject will build on Advanced Scientific Facts and Theories and will focus on nursing and medical science specific to the specialist cardiac care practice. The focus will be on physiology, biochemistry, therapeutics and nursing science.

*Assessment:* 1000 word mid-term assignment (25%); mid term test paper (25%); examination (50%)

### 1704 Frameworks of Care

*points value:* 4 *duration:* semester 1 or 2

*contact hours:* 2 hours per week for 13 weeks

*content:* This subject will consider the supports and constraints within which nurses care. Topics will include ethics of care; legalities of health care; professional standards and competencies; current issues in health economics and management; skill mix; specialisation and multiskilling; and multidisciplinary perspectives on health care.

*assessment:* 2000 word mid term assignment (30%); class presentation (20%); 3000 word essay (50%)

### 8757 Practice Inquiry in Cardiac nursing

*points value:* 4 *duration:* semester 2

*contact hours:* 2 hours per week for 13 weeks

*content:* This subject will build on the student's previous and current experience in cardiac care practice. It will focus on the phenomena which nurses encounter in practice and which form the basis of nursing inquiry. It will consider reflective processes, the research process, and theory building in cardiac nursing.

*assessment:* 2000 word mid term assignment (30%); 1500 word class paper (20%); 3000 word essay (50%)

### 3196 Cardiac Nursing I PT

*points value:* 4 *duration:* Full year

*contact hours:* 2 hours per week for 13 weeks plus 900 hours clinical practice.

*content:* This subject will largely consist of field based learning within the area of cardiac care, supported by tutorials. Advanced clinical skill acquisition will occur based on theoretical frameworks of care so that skills are not acquired within a vacuum which does not include the patient and family in context.

*Assessment:* 2000 word case study (30%); viva voce examination (20%); competency assessment (50%)

**8464 Cardiac Nursing II PT**

**points value:** 4                      **duration:** Full year

**contact hours:** 2 hours per week for 13 weeks plus 900 hours clinical practice.

**content:** This subject will build on student's previous learning in Cardiac nursing I. It will focus on further advanced clinical skill acquisition occur based on theoretical frameworks of care through field based learning within the area of cardiac care

**assessment:** 2000 word case study (30%); viva voce examination (20%); competency assessment (50%)

# Graduate Diploma in Clinical Nursing

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar.

As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

## Specific Course Rules

### 1 Admission Requirements

1.1 An applicant for admission to the course for the Graduate Diploma in Clinical Nursing shall:

- (a) have qualified for a Bachelor of Nursing of a university accepted for the purposes by the University OR have at least two years post registration experience as a registered nurse, and
- (b) be registered, or be eligible for registration, as a nurse in South Australia;
- (c) have obtained the approval of the Department of Clinical Nursing.

1.2 Subject to the approval of Council, the Faculty may in special cases and subject to such conditions (if any) as it may seem fit to impose in each case, accept as a candidate for the Graduate Diploma in Clinical Nursing a person who does not qualify for admission to the course under (1.1) above, but has given evidence satisfactory to the Faculty of fitness to undertake work for the Graduate Diploma in Intensive care Nursing

### 2 Duration of Course

2.1 To qualify for the Graduate Diploma in Clinical Nursing a candidate shall satisfactorily complete a course of full time study extending over at least one year OR a course of part time study extending over at least two years.

### 3 Assessment and Examinations

3.1 There shall be four classes of pass in each subject for the Graduate Diploma in Clinical Nursing: Pass with High Distinction, Pass with Distinction, Pass with Credit and Pass.

3.2 (a) A candidate who fails to pass in the subject and desires to take the subject again shall again attend lectures and satisfactorily do such written and practical work as the teaching staff concerned may prescribe, unless specifically exempted therefrom after written application to the Registrar for such exemption.

(b) A candidate who has twice failed the examination in any subject or division of a subject may not enrol for the subject again except by special permission to be obtained in writing from the Registrar and then only under such conditions as may be prescribed.

(c) For the purpose of this Rule a candidate who is refused permission to sit for examination, or who, without a reason accepted by the Head of the Department of Clinical Nursing as adequate, fails to attend all or part of a final examination (or supplementary examination if granted) after remaining enrolled for at least 9 teaching weeks that semester, shall be deemed to have failed the examination.

### 4 Course of Study

4.1 Unless exempted therefrom by the Faculty every candidate for the Graduate Diploma in Clinical Nursing shall satisfactorily complete the two compulsory subjects to the value of 8 points and elective subjects, from those listed below, to the value of 16 points.

#### 4.1.1 Compulsory Subjects

4692 Advanced Scientific Facts and Theories	4
1704 Frameworks of Care	4

#### 4.1.2 Elective Subjects

6389 Stomal Therapy	8
9764 Hyperbaric Nursing	8
2016 Acute Pain Management	4
9557 Diabetes Education	4
7469 Infection Control	4
5521 Wound Management	4
8552 Rehabilitation Nursing	8
2946 Management of Incontinence	4
5046 Grief and Bereavement	4
9191 Cardiac Monitoring	4

## Syllabuses

Students enrolled in this course will be required to complete two core coursework units of study, each of four credit points and elective units to the value of sixteen credit points.

### Core units

#### 4692 Advanced Scientific Facts and Theories

*Points:* value 4 *duration:* semester 1

*contact hours:* 2 hours per week for 13 weeks

*content:* This subject will examine fundamental scientific facts and theories to introduce the basic principles of those areas of the physical and social sciences which inform specialist practice. Topics will include an introduction to advanced nursing science; advanced medical science and advanced therapeutics.

*Assessment:* 1000 word mid-term assignment (25%); mid term test paper (25%); examination (50%)

#### 1704 Frameworks of Care

*points value:* 4 *duration:* semester 1 or 2

*contact hours:* 2 hours per week for 13 weeks

*content:* This subject will consider the supports and constraints within which nurses care. Topics will include ethics of care; legalities of health care; professional standards and competencies; current issues in health economics and management; skill mix; specialisation and multiskilling; and multidisciplinary perspectives on health care.

*Assessment:* 2000 word mid term assignment (30%); class presentation (20%); 3000 word essay (50%)

### Elective units

#### 6389 Stomal Therapy

*points value:* 8 *duration:* semester 1

*contact hours:* 4 hours per week for 13 weeks plus field placements.

*content:* This subject will examine nursing and medical science in relation to the indications for the creation of a stoma, the principles of stomal therapy and the physical and psycho-social needs of those with a stoma. Topics will include anatomy, physiology, psychosocial care, stoma management and the teaching/learning process in patient education. Student will be required to participate in field experience.

*assessment:* 2000 word mid term assignment (20%); 1500 word class paper (20%); 3000 word essay (30%); examination (30%)

#### 9764 Hyperbaric Nursing

*points value:* 8 *duration:* semester 1

*contact hours:* 4 hours per week for 13 weeks plus field placements.

*content:* This subject will examine nursing and medical science in relation to the indications for hyperbaric treatment, the principles of hyperbaric nursing and the physical and psycho-social needs of those undergoing hyperbaric treatment. Topics will include anatomy, physiology, psychosocial care, hyperbaric management and the teaching/learning process in patient education. Student will be required to participate in field experience.

*assessment:* 2000 word mid term assignment (20%); 1500 word class paper (20%); 3000 word essay (30%); examination (30%)

#### 2016 Acute Pain Management

*points value:* 4 *duration:* semester 1 or 2

*contact hours:* 2 hours per week for 13 weeks.

*content:* This subject will examine nursing and medical science in relation to acute pain, pharmacology in pain control, the principles of pain management and the physical and psycho-social needs of those experiencing acute pain. Topics will include physiology, psychosocial care, pain management and the teaching/learning process in patient education.

*assessment:* 1500 word class paper (40%); 3000 word essay (60%)

#### 9557 Diabetes Education

*points value:* 4 *duration:* semester 1 or 2

*contact hours:* 2 hours per week for 13 weeks plus field visits.

*content:* This subject will examine nursing and medical science in relation to diabetes. Topics will include the pathophysiology of diabetes, the management of diabetes, pharmacology, human nutrition and the teaching/learning process in patient education.

*assessment:* 1500 word class paper (40%); 3000 word essay (60%)

### 7469 Infection Control

points value: 4

duration: semester 2

contact hours: 2 hours per week for 13 weeks plus field visits.

content: This subject will examine nursing and medical science in relation to the control of infection. Topics will include microbiology, the management of infection, the teaching/learning process in staff education; and contemporary issues in infection control.

assessment: 1500 word class paper (40%); 3000 word essay (60%)

### 5521 Wound Management

points value: 4

duration: semester 1 or 2

contact hours: 2 hours per week for 13 weeks plus field visits.

content: This subject will examine nursing and medical science in relation to the management of wounds. Topics will include anatomy and physiology of the integument, wound classification, wound management, microbiology, the management of infection and the teaching/learning process in staff and patient education.

assessment: 1000 word class paper (30%); 2000 essay (30%); examination (40%)

### 8552 Rehabilitation Nursing

points value: 8

duration: semester 1

contact hours: 4 hours per week for 13 weeks plus field visits.

content: This subject will examine nursing and medical science in relation to the process, principles and practice of rehabilitation nursing. Topics will include anatomy and physiology of disability; the development of rehabilitation as a specialist area of practice; the role of the multidisciplinary team; principles of rehabilitation nursing; and the teaching/learning process in patient education.

assessment: 1500 word class paper (40%); 3000 word essay (60%)

### 2946 Management of Incontinence

points value: 4

duration: semester 2

contact hours: 2 hours per week for 13 weeks plus field visits.

content: This subject will examine nursing and medical science in relation to continence management. Topics will include anatomy and physiology of the eliminatory system; diagnosis and treatment of incontinence; the management of incontinence; the lived experience of incontinence; and the teaching/learning process in patient education.

Assessment: 1000 word class paper (25%); viva voce (25%); 3000 word essay (50%)

### 5046 Grief and Bereavement

points value: 4

duration: semester 1 or 2

contact hours: 3 hours per week for 13 weeks.

content: This subject will examine the experience of loss and grief. Topics will include the psychology of loss and grief; coping with death; and the role of the nurse in caring for the dying and their significant others. Small group tutorials and experiential learning will be utilised to assist students to develop individual strategies to effectively help those who are grieving.

assessment: 1500 word essay (40%); 3000 word essay (60%)

### 9191 Cardiac Monitoring

points value: 4

duration: semester 1 or 2

contact hours: 2 hours per week for 13 weeks plus field visits.

content: This subject will examine nursing and medical science in relation to cardiac monitoring. Topics will include basic electrocardiography; identification of arrhythmias; nursing management of myocardial ischaemia, injury and infarction; and patient education processes.

assessment: 1000 word class paper (30%); viva voce (30%); examination (40%)

## Graduate Diploma in Intensive Care Nursing

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar.

As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

### Specific Course Rules

#### 1 Admission Requirements

1.1 An applicant for admission to the course for the Graduate Diploma in Intensive Care Nursing shall:

- (a) have qualified for a Bachelor of Nursing of a university accepted for the purposes by the University OR have at least two years post registration experience as a registered nurse in the area of intensive care nursing, and
- (b) be registered, or be eligible for registration, as a nurse in South Australia;
- (c) have obtained the approval of the Department of Clinical Nursing.

1.2 Subject to the approval of Council, the Faculty may in special cases and subject to such conditions (if any) as it may seem fit to impose in each case, accept as a candidate for the Graduate Diploma in Intensive care Nursing a person who does not qualify for admission to the course under (1.1) above, but has given evidence satisfactory to the Faculty of fitness to undertake work for the Graduate Diploma in Intensive Care Nursing

#### 2 Duration of Course

2.1 To qualify for the Graduate Diploma in Intensive Care Nursing a candidate shall satisfactorily complete a course of full time study extending over at least one year OR a course of part time study extending over at least two years.

#### 3 Assessment and Examinations

3.1 There shall be four classes of pass in each subject for the Graduate Diploma in Intensive Care Nursing: Pass with High Distinction, Pass with Distinction, Pass with Credit and Pass.

3.2 (a) A candidate who fails to pass in the subject and desires to take the subject again shall again attend lectures and satisfactorily do such written and practical

work as the teaching staff concerned may prescribe, unless specifically exempted therefrom after written application to the Registrar for such exemption.

(b) A candidate who has twice failed the examination in any subject or division of a subject may not enrol for the subject again except by special permission to be obtained in writing from the Registrar and then only under such conditions as may be prescribed.

(c) For the purpose of this Rule a candidate who is refused permission to sit for examination, or who, without a reason accepted by the Head of the Department of Clinical Nursing as adequate, fails to attend all or part of a final examination (or supplementary examination if granted) after remaining enrolled for at least 9 teaching weeks that semester, shall be deemed to have failed the examination.

#### 4 Course of Study

4.1 Unless exempted therefrom by the Faculty every candidate for the Graduate Diploma in Intensive Care Nursing shall satisfactorily complete the following subjects to the value of 24 points:

5036 Intensive Care Nursing I	4
or	
9657 Intensive Care Nursing I PT	4
7060 Intensive Care Nursing II	4
or	
9032 Intensive Care Nursing II PT	4
4692 Advanced Scientific Facts and Theories	4
2485 Nursing and Medical Science in Intensive Care	4
1704 Frameworks of Care	4
6166 Practice Inquiry in Intensive Care Nursing	4

## Syllabuses

Students enrolled in this course will be required to complete six coursework units of study, each of four credit points.

### 5036 Intensive Care Nursing I

*points value:* 4 *duration:* semester 1  
*contact hours:* 2 hours per week for 13 weeks plus 900 hours clinical practice.

*content:* This subject will largely consist of field based learning within the area of intensive care, supported by tutorials. Advanced clinical skill acquisition will occur based on theoretical frameworks of care so that skills are not acquired within a vacuum which does not include the patient and family in context.

*assessment:* 2000 word case study (30%); viva voce examination (20%); competency assessment (50%)

### 7060 Intensive Care Nursing II

*points value:* 4 *duration:* semester 2  
*contact hours:* 2 hours per week for 13 weeks plus 900 hours clinical practice.

*content:* This subject will build on student's previous learning in Intensive Care Nursing I. It will focus on further advanced clinical skill acquisition occur based on theoretical frameworks of care through field based learning within the area of intensive care.

*Assessment:* 2000 word case study (30%); viva voce examination (20%); competency assessment (50%)

### 4692 Advanced Scientific Facts and Theories

*points value:* 4 *duration:* semester 1  
*contact hours:* 2 hours per week for 13 weeks

*content:* This subject will examine fundamental scientific facts and theories to introduce the basic principles of those areas of the physical and social sciences which inform specialist practice. Topics will include an introduction to advanced nursing science; advanced medical science and advanced therapeutics.

*assessment:* 1000 word mid - term assignment (25%); mid term test paper (25%); examination (50%)

### 2485 Nursing and Medical Science in Intensive Care

*points value:* 4 *duration:* semester 2  
*contact hours:* 3 hours per week for 13 weeks

*content:* This subject will build on Advanced Scientific Facts and Theories and will focus on nursing and medical science specific to the specialist intensive care practice. The focus will be on physiology, biochemistry, therapeutics and nursing science.

*assessment:* 1000 word mid - term assignment (25%); mid term test paper (25%); examination (50%)

### 1704 Frameworks of Care

*points value:* 4 *duration:* semester 1 or 2  
*contact hours:* 2 hours per week for 13 weeks

*content:* This subject will consider the supports and constraints within which nurses care in the area of intensive care. Topics will include ethics of care; legalities of health care; professional standards and competencies; current issues in health economics and management; skill mix; specialisation and multi skilling; and multidisciplinary perspectives on health care.

*assessment:* 2000 word mid term assignment (30%); class presentation (20%); 3000 word essay (50%)

### 6166 Practice Inquiry in Intensive Care Nursing

*points value:* 4 *duration:* semester 2  
*contact hours:* 2 hours per week for 13 weeks

*content:* This subject will build on the student's previous and current experience in intensive care practice. It will focus on the phenomena which nurses encounter in practice and which form the basis of nursing inquiry. It will focus on reflective processes, the research process, and theory building in intensive care nursing.

*assessment:* 2000 word mid term assignment (30%); 1500 word class paper (20%); 3000 word essay (50%)

### 9657 Intensive Care Nursing I PT

*points value:* 4 *duration:* Full year  
*contact hours:* 2 hours per week for 13 weeks plus 900 hours clinical practice

*content:* This subject will largely consist of field based learning within the area of intensive care, supported by tutorials. Advanced clinical skill acquisition will occur based on theoretical frameworks of care so that skills are not acquired within a vacuum which does not include the patient and family in context.

*assessment:* 2000 word case study (30%); viva voce examination (20%); competency assessment (50%)

**9032 Intensive Care Nursing II PT**

points value: 4

duration: Full year

contact hours: 2 hours per week for 13 weeks plus 900 hours clinical practice.

content: This subject will build on student's previous learning in Intensive Care Nursing I. It will focus on further advanced clinical skill acquisition occur based on theoretical frameworks of care through field based learning within the area of intensive care.

assessment: 2000 word case study (30%); viva voce examination (20%); competency assessment (50%)

Intensive Care Nursing II

Intensive Care Nursing II is a full year subject that builds on the theoretical and practical knowledge gained in Intensive Care Nursing I. The subject focuses on advanced clinical skills and the application of theoretical frameworks of care through field based learning within the area of intensive care. The subject includes a 2000 word case study (30%), a viva voce examination (20%), and a competency assessment (50%).

# Graduate Diploma in Occupational Health

note: Postgraduate tuition fees may apply to this course.

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar.

As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

## Specific Course Rules

### 1 Admission requirements

- 1.1 The Faculty of Medicine may accept as a candidate for the Graduate Diploma any person who has qualified for a degree of The University of Adelaide or of another institution accepted for the purpose by the University.
- 1.2 Subject to the approval of the Council the Faculty of Medicine may, in special cases and subject to such conditions as it may see fit to impose in each case, accept as a candidate for the Graduate Diploma a person who does not meet the requirements specified in 1.1 above if it is satisfied that he or she is likely to be able satisfactorily to undertake work for the Graduate Diploma.
- 1.3 The Faculty of Medicine may require an applicant to complete such preliminary work as it may prescribe before being accepted as a candidate for the Graduate Diploma.

### 2 Qualification requirements

- 2.1 To qualify for the Graduate Diploma a candidate shall satisfactorily complete a course of study and a dissertation on a subject approved by the Faculty of Medicine.
- 2.2 On completion of the dissertation the candidate shall lodge with the Registrar three copies of the dissertation prepared in accordance with directions given to candidates from time to time. No material presented for any other Graduate Diploma within this or any other institution shall be submitted.

### 3 Duration of course

- 3.1 Except with the permission of the Faculty, the subjects of study and the dissertation shall be completed in not more than one year of full-time study or two years of part-time study.

- 3.2 A candidate who withdraws from all of the subjects in which he or she is enrolled in any one year or who fails to re-enrol after being enrolled in the previous year may only re-enrol in a subsequent year with the approval of the Faculty, and under such conditions as the Faculty may impose in each case.

- 3.3 A candidate proceeding with the dissertation whose work is interrupted for a period of time may be granted an intermission of candidature by the Dean on behalf of the Faculty. If such an application is approved the maximum period specified in 3.1 above will be adjusted accordingly by adding the length of the intermission.

### 4 Review of academic progress

- 4.1 If in the opinion of the Faculty of Medicine a candidate for the Graduate Diploma is not making satisfactory progress, the Faculty may, with the consent of the Council, terminate the candidature and the candidate shall cease to be enrolled for the Graduate Diploma.

### 5 Assessment and examinations

- 5.1 The Faculty shall appoint two examiners for each dissertation.

### 6 Subjects of study and dissertation requirements

- 6.1 To qualify for the Graduate Diploma the candidate shall complete satisfactorily:

- (a) compulsory studies (5)
 

3103 Principles of Occupational and Public Health	3
1563 Occupational Health and Safety Practice	3

5672 Occupational Hygiene and Ergonomics	3
6187 Industrial Toxicology	3
6287 Introduction to Epidemiology and Biostatistics	3

(b) elective studies (2)

Two to be chosen from the following subjects:

4742 Advanced Occupational Hygiene	3
8026 Epidemiological Research Methods*	3
4672 Prevention in Practice*	3
7258 Ethical Issues in Public Health*	3
4286 Biostatistics*	3
2836 Public Health Studies*	3
4126 Safety Engineering	3

(c) Dissertation

5768 Occupational Health Dissertation	3
---------------------------------------	---

\*from the Master of Public Health course

**6.2** Candidates who have partially completed the coursework requirements for the graduate diploma before 1994 shall complete the requirements as follows:

number of subjects completed before 1994	points value of subjects to be completed in 1994 or subsequent years (as approved) in addition to 5768 Occupational Health Dissertation
1	18
2	15
3	12
4	12
5	9
6	6
7	3

**6.5** For the purposes of the dissertation the candidate shall pursue an approved research topic on a subject of relevance to occupational health or occupational safety under the control of the University and under the general guidance of one or more supervisors appointed by the Faculty of Medicine. At least one supervisor shall be a member of the academic staff of a Department of the Faculty of Medicine.

**6.6** The examiners appointed under 5 above may recommend that, subject to the candidate completing the requirements of 6.1(a) and 6.1(b) above satisfactorily:

- (a) the candidate shall be awarded the Graduate Diploma; or
- (b) the candidate shall be awarded the Graduate Diploma but that minor amendments be made to the dissertation; or
- (c) the candidate shall be awarded the Graduate Diploma subject to,
  - (i) specified amendments being made to the dissertation; or
  - (ii) satisfactory performance in an oral or written examination; or
- (d) the candidate shall not be awarded the Graduate Diploma but shall be permitted to re-submit the treatise in a revised form; or
- (e) the candidate shall not be awarded the Graduate Diploma.

## 7 General

**7.1** A student who has completed part of the requirements for the degree of Master of Public Health in the University may with the approval of the Faculty, be admitted to candidature for the Graduate Diploma in Occupational Health, with such credit as the Faculty determines, subject to the student discontinuing candidature for the degree of Master of Public Health.

**6.3** There shall be four classifications of pass in each subject as follows: Pass with High Distinction, Pass with Distinction, Pass with Credit, and Pass.

**6.4** A candidate's enrolment in subjects of study must be approved by the Dean (or nominee) at enrolment each year.

## Syllabuses

As indicated in Specific Course Rule 6, candidates will be required to complete seven subjects, each of 26 contact hours, and a treatise. It is envisaged that each subject will involve two contact hours per week each for one semester. Detailed timetables will be issued at the beginning of each academic year.

### prerequisites

none

### textbooks

A reading list of recommended journal articles and textbooks will be issued by the coordinating lecturer for each subject and will be available from the Department of Community Medicine at the beginning of the year.

### assessment

For each subject of study there will be a written examination at the conclusion. In addition candidates will be expected to prepare tutorial assignments or papers for presentation.

### compulsory subjects

#### 6287 Introduction to Epidemiology and Biostatistics

*points value:* 3                      *duration:* semester 1

*content:* This subject will provide students with basic skills in epidemiological design and analysis, and will consider the application of epidemiology and biostatistics to occupational health. At the end of the subject, the student will also have a basic understanding of the range of techniques used in biostatistics including their broad assumptions and limitations. The subject will involve a combination of lectures, tutorials and practical exercises. Students will critically examine research protocols with a view to detecting flaws in research designs.

#### 6187 Industrial Toxicology

*points value:* 3                      *duration:* semester 1  
*syllabus details:* see Master of Public Health

#### 1563 Occupational Health and Safety Practice

*points value:* 3                      *duration:* semester 2  
*syllabus details:* see Master of Public Health

#### 5672 Occupational Hygiene & Ergonomics

*points value:* 3                      *duration:* semester 2  
*syllabus details:* see Master of Public Health

#### 3103 Principles of Occupational and Public Health

*points value:* 3                      *duration:* semester 1  
*content:* This subject will consider ways in which the occupational and general environments affect health, and in which the general concerns of public health apply to the world of work. It aims to develop a critical, historically-informed attitude toward occupational health and safety issues drawing on the insights of sociology and politics as well as of epidemiology and biostatistics. Methods of surveillance and measurements of toxic substances will be examined, using case studies of particular occupational and environmental hazards.

### elective subjects

#### 4742 Advanced Occupational Hygiene

*points value:* 3                      *duration:* semester 2

This elective deals with advanced topics in the areas of hazard evaluation and control. There will be practical coverage of industrial ventilation, confined space operations, noise propagation and control, ionising radiation and laboratory analytical methods. The program includes field visits to illustrate environmental monitoring and control technologies.

#### 4286 Biostatistics

*points value:* 3                      *duration:* semester 2  
*syllabus details:* see Master of Public Health

#### 8026 Epidemiological Research Methods

*points value:* 3                      *duration:* semester 1  
*syllabus details:* see Master of Public Health

#### 7258 Ethical Issues in Public Health

*points value:* 3                      *duration:* semester 1  
*syllabus details:* see Master of Public Health

#### 4672 Prevention in Practice

*points value:* 3                      *duration:* semester 2  
*syllabus details:* see Master of Public Health

**2836 Public Health Studies**

*points value:* 3                      *duration:* semester 1 or 2

*syllabus details:* see Master of Public Health

**4126 Safety Engineering**

*points value:* 3                      *duration:* semester 1

*content:* This subject presents a critical overview of models of accident causation and prevention and of their application in various occupational settings. Methods of risk analysis, risk control and of accident investigation will be described. Examples will be drawn from construction, mining and manufacturing industries. Field visits will be organised to illustrate the subject matter.

**02190 Occupational Health and Safety Law**

*enrolment at the University of South Australia*

*duration:* semester 2

*content:* This subject introduces the following aspects of the law relating to occupational health and safety; interpretation of statutes and delegated legislation; safety and workers' compensation laws; the industrial relations context of occupational health and safety; occupational health and safety and employment (contractual basis, implied terms, discipline, reinstatement and enforcement); employers' liability for damage; and comparative occupational health and safety law.

**Dissertation**

**5768 Occupational Health Dissertation**

*points value:* 3                      *duration:* semester 1 or 2

*content:* The dissertation should report on the critical study or analysis of an occupational health or safety research question.

**electives available at  
The University of South Australia**

**02746 Ergonomics**

*enrolment at the University of South Australia*

*duration:* semester 2

*content:* The aim of this unit is to give an understanding of ergonomics and human factors in the design of workplaces. Subjects include sensory processes, information processes and decision-making; man-machine interaction, repetitive work tasks and manual handling tasks; the physical work environment, including lighting, noise, vibration, heat and cold; the psychology of work; and the implementation of ergonomic strategies.

**02187 Management of Occupational Health  
and Safety IG**

*enrolment at the University of South Australia*

*duration:* semester 1

*content:* This subject will give an introduction to current thinking on accident phenomena and its value in the planning, organising and control of workplace hazards. It will cover the history of occupational health and safety management, theoretical models of planning, organisation and control, and of injury causation, and techniques of accident investigation. Consideration will also be given to the roles of managers and others, and appropriate structures and organisation for achieving occupational health and safety objectives.

# Graduate Diploma in Oncology Nursing

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar.

As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

## Specific Course Rules

### 1 Admission Requirements

1.1 An applicant for admission to the course for the Graduate Diploma in Oncology Nursing shall:

- (a) have qualified for a Bachelor of Nursing of a university accepted for the purposes by the University OR have at least two years post registration experience as a registered nurse in the area of oncology nursing, and
- (b) be registered, or be eligible for registration, as a nurse in South Australia;
- (c) have obtained the approval of the Department of Clinical Nursing.

1.2 Subject to the approval of Council, the Faculty may in special cases and subject to such conditions (if any) as it may seem fit to impose in each case, accept as a candidate for the Graduate Diploma in Oncology Nursing a person who does not qualify for admission to the course under (1.1) above, but has given evidence satisfactory to the Faculty of fitness to undertake work for the Graduate Diploma in Oncology Nursing

### 2 Duration of Course

2.1 To qualify for the Graduate Diploma in Oncology Nursing a candidate shall satisfactorily complete a course of full time study extending over at least one year OR a course of part time study extending over at least two years.

### 3 Assessment and Examinations

3.1 There shall be four classes of pass in each subject for the Graduate Diploma in Oncology Nursing: Pass with High Distinction, Pass with Distinction, Pass with Credit and Pass.

3.2 (a) A candidate who fails to pass in the subject and desires to take the subject again shall again attend lectures and satisfactorily do such written and practical

work as the teaching staff concerned may prescribe, unless specifically exempted therefrom after written application to the Registrar for such exemption.

(b) A candidate who has twice failed the examination in any subject or division of a subject may not enrol for the subject again except by special permission to be obtained in writing from the Registrar and then only under such conditions as may be prescribed.

(c) For the purpose of this Rule a candidate who is refused permission to sit for examination, or who, without a reason accepted by the Head of the Department of Clinical Nursing as adequate, fails to attend all or part of a final examination (or supplementary examination if granted) after remaining enrolled for at least 9 teaching weeks that semester, shall be deemed to have failed the examination.

### 4 Course of Study

4.1 Unless exempted therefrom by the Faculty every candidate for the Graduate Diploma in Oncology Nursing shall satisfactorily complete the following subjects to the value of 24 points:

4867 Oncology Nursing I	4
<i>or</i>	
3752 Oncology Nursing I PT	4
7805 Oncology Nursing II	4
<i>or</i>	
9018 Oncology Nursing II PT	4
4692 Advanced Scientific Facts and Theories	4
4155 Nursing and Medical Science in Oncology	4
1704 Frameworks of Care	4
8884 Practice Inquiry in Oncology Nursing	4

## Syllabuses

Students enrolled in this course will be required to complete six coursework units of study, each of four credit points.

### 4867 Oncology Nursing I

*points value:* 4 *duration:* semester 1

*contact hours:* 2 hours per week for 13 weeks plus 900 hours clinical practice.

*content:* This subject will largely consist of field based learning within the area of oncology care, supported by tutorials. Advanced clinical skill acquisition will occur based on theoretical frameworks of care so that skills are not acquired within a vacuum which does not include the patient and family in context.

*assessment:* 2000 word case study (30%); viva voce examination (20%); competency assessment (50%)

### 7805 Oncology Nursing II

*points value:* 4 *duration:* semester 2

*contact hours:* 2 hours per week for 13 weeks plus 900 hours clinical practice.

*content:* This subject will build on student's previous learning in Oncology Nursing I. It will focus on further advanced clinical skill acquisition occur based on theoretical frameworks of care through field based learning within the area of oncology care.

*assessment:* 2000 word case study (30%); viva voce examination (20%); competency assessment (50%)

### 4692 Advanced Scientific Facts and Theories

*points value:* 4 *duration:* semester 1

*contact hours:* 2 hours per week for 13 weeks

*content:* This subject will examine fundamental scientific facts and theories to introduce the basic principles of those areas of the physical and social sciences which inform specialist practice. Topics will include an introduction to advanced nursing science; advanced medical science and advanced therapeutics.

*assessment:* 1000 word mid - term assignment (25%); mid term test paper (25%); examination (50%)

### 4155 Nursing and Medical Science in Oncology

*points value:* 4 *duration:* semester 2

*contact hours:* 3 hours per week for 13 weeks

*content:* This subject will build on Advanced Scientific Facts and Theories and will focus on nursing and medical science specific to specialist oncology practice. The focus will be on physiology, physics, therapeutics and nursing science.

*assessment:* 1000 word mid-term assignment (25%); mid term test paper (25%); examination (50%)

### 1704 Frameworks of Care

*points value:* 4 *duration:* semester 1 or 2

*contact:* 2 hours per week for 13 weeks

*content:* This subject will consider the supports and constraints within which nurses care. Topics will include ethics of care; legalities of health care; professional standards and competencies; current issues in health economics and management; skill mix; specialisation and multi skilling; and multidisciplinary perspectives on health care.

*assessment:* 2000 word mid term assignment (30%); class presentation (20%); 3000 word essay (50%)

### 8884 Practice Inquiry in Oncology Nursing

*points value:* 4 *duration:* semester 2

*contact hours:* 2 hours per week for 13 weeks

*content:* This subject will build on the student's previous and current experience in oncology practice. It will focus on the phenomena which nurses encounter in practice and which form the basis of nursing inquiry. It will consider reflective processes, the research process, and theory building in oncology nursing.

*assessment:* 2000 word mid term assignment (30%); 1500 word class paper (20%); 3000 word essay (50%)

### 3752 Oncology Nursing I PT

*points value:* 4 *duration:* Full year

*contact hours:* 2 hours per week for 13 weeks plus 900 hours clinical practice.

*content:* This subject will largely consist of field based learning within the area of oncology care, supported by tutorials. Advanced clinical skill acquisition will occur based on theoretical frameworks of care so that skills are not acquired within a vacuum which does not include the patient and family in context.

*assessment:* 2000 word case study (30%); viva voce examination (20%); competency assessment (50%)

**9018 Oncology Nursing II PT**

points value: 4

duration: Full year

contact hours: 2 hours per week for 13 weeks plus 900 hours' clinical practice.

content: This subject will build on student's previous learning in Oncology Nursing I. It will focus on further advanced clinical skill acquisition occur based on theoretical frameworks of care through field based learning within the area of oncology care.

assessment: 2000 word case study (30%); viva voce examination (20%); competency assessment (50%)

## Graduate Diploma in Orthopaedic Nursing

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar.

As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

### Specific Course Rules

#### 1 Admission Requirements

1.1 An applicant for admission to the course for the Graduate Diploma in Orthopaedic Nursing shall:

- (a) have qualified for a Bachelor of Nursing of a university accepted for the purposes by the University OR have at least two years post registration experience as a registered nurse in the area of orthopaedic nursing, and
- (b) be registered, or be eligible for registration, as a nurse in South Australia;
- (c) have obtained the approval of the Department of Clinical Nursing.

1.2 Subject to the approval of Council, the Faculty may in special cases and subject to such conditions (if any) as it may seem fit to impose in each case, accept as a candidate for the Graduate Diploma in Orthopaedic Nursing a person who does not qualify for admission to the course under (1.1) above, but has given evidence satisfactory to the Faculty of fitness to undertake work for the Graduate Diploma in Orthopaedic Nursing

#### 2 Duration of Course

2.1 To qualify for the Graduate Diploma in Orthopaedic Nursing a candidate shall satisfactorily complete a course of full time study extending over at least one year OR a course of part time study extending over at least two years.

#### 3 Assessment and Examinations

3.1 There shall be four classes of pass in each subject for the Graduate Diploma in Orthopaedic Nursing: Pass with High Distinction, Pass with Distinction, Pass with Credit and Pass.

3.2 (a) A candidate who fails to pass in the subject and desires to take the subject again shall again attend lectures and satisfactorily do such written and practical work as the teaching staff concerned may

prescribe, unless specifically exempted therefrom after written application to the Registrar for such exemption.

(b) A candidate who has twice failed the examination in any subject or division of a subject may not enrol for the subject again except by special permission to be obtained in writing from the Registrar and then only under such conditions as may be prescribed.

(c) For the purpose of this Rule a candidate who is refused permission to sit for examination, or who, without a reason accepted by the Head of the Department of Clinical Nursing as adequate, fails to attend all or part of a final examination (or supplementary examination if granted) after remaining enrolled for at least 9 teaching weeks that semester, shall be deemed to have failed the examination.

#### 4 Course of Study

4.1 Unless exempted therefrom by the Faculty every candidate for the Graduate Diploma in Orthopaedic Nursing shall satisfactorily complete the following subjects to the value of 24 points:

7331 Orthopaedic Nursing I 4

or

7485 Orthopaedic Nursing I PT 4

3704 Orthopaedic Nursing II 4

or

7656 Orthopaedic Nursing II PT 4

4692 Advanced Scientific Facts and Theories 4

3986 Nursing and Medical Science in Orthopaedics 4

1704 Frameworks of Care 4

5559 Practice Inquiry in Accident and Emergency Nursing 4

## Syllabuses

Students enrolled in this course will be required to complete six coursework units of study, each of four credit points.

### 7331 Orthopaedic Nursing I

*points value:* 4 *duration:* semester 1

*contact hours:* 2 hours per week for 13 weeks plus 900 hours clinical practice.

*content:* This subject will largely consist of field based learning within the area of orthopaedic care, supported by tutorials. Advanced clinical skill acquisition will occur based on theoretical frameworks of care so that skills are not acquired within a vacuum which does not include the patient and family in context.

*assessment:* 2000 word case study (30%); viva voce examination (20%); competency assessment (50%)

### 3704 Orthopaedic Nursing II

*points value:* 4 *duration:* semester 2

*contact hours:* 2 hours per week for 13 weeks plus 900 hours clinical practice.

*content:* This subject will build on student's previous learning in Orthopaedic Nursing I. It will focus on further advanced clinical skill acquisition occur based on theoretical frameworks of care through field based learning within the area of orthopaedic care,.

*assessment:* 2000 word case study (30%); viva voce examination (20%); competency assessment (50%)

### 4692 Advanced Scientific Facts and Theories

*points value:* 4 *duration:* semester 1

*contact hours:* 2 hours per week for 13 week

*content:* This subject will examine fundamental scientific facts and theories to introduce the basic principles of those areas of the physical and social sciences which inform specialist practice. Topics will include an introduction to advanced nursing science; advanced medical science and advanced therapeutics.

*assessment:* 1000 word mid - term assignment (25%); mid term test paper (25%); examination (50%)

### 3986 Nursing and Medical Science in Orthopaedics

*points value:* 4 *duration:* semester 2

*contact hours:* 3 hours per week for 13 weeks

*content:* This subject will build on Advanced Scientific Facts and Theories and will focus on nursing and medical science specific to specialist orthopaedic practice. The focus will be on anatomy, physiology, physics, therapeutics and nursing science.

*assessment:* 1000 word mid - term assignment (25%); mid term test paper (25%); examination (50%)

### 1704 Frameworks of Care

*points value:* 4 *duration:* semester 1 or 2

*contact hours:* 2 hours per week for 13 weeks

*content:* This subject will consider the supports and constraints within which nurses care. Topics will include ethics of care; legalities of health care; professional standards and competencies; current issues in health economics and management; skill mix; specialisation and multiskilling; and multidisciplinary perspectives on health care.

*assessment:* 2000 word mid term assignment (30%); class presentation (20%); 3000 word essay (50%)

### 5559 Practice Inquiry in Orthopaedic Nursing

*points value:* 4 *duration:* semester 2

*contact hours:* 2 hours per week for 13 weeks

*content:* This subject will build on the student's previous and current experience in orthopaedic practice. It will focus on the phenomena which nurses encounter in practice and which form the basis of nursing inquiry. It will consider reflective processes, the research process, and theory building in orthopaedic nursing.

*assessment:* 2000 word mid term assignment (30%); 1500 word class paper (20%); 3000 word essay (50%)

### 7485 Orthopaedic Nursing I PT

*points value:* 4 *duration:* Full year

*contact hours:* 2 hours per week for 13 weeks plus 900 hours clinical practice.

*content:* This subject will largely consist of field based learning within the area of orthopaedic care, supported by tutorials. Advanced clinical skill acquisition will occur based on theoretical frameworks of care so that skills are not acquired within a vacuum which does not include the patient and family in context

*assessment:* 2000 word case study (30%); viva voce examination (20%); competency assessment (50%)

**7656 Orthopaedic Nursing II PT**

*points value:* 4

*duration:* Full year

*contact hours:* 2 hours per week for 13 weeks plus 900 hours clinical practice.

*content:* This subject will build on student's previous learning in Orthopaedic Nursing I. It will focus on further advanced clinical skill acquisition occur based on theoretical frameworks of care through field based learning within the area of orthopaedic care.

*assessment:* 2000 word case study (30%); viva voce examination (20%); competency assessment (50%)

## Graduate Diploma in Peri-Operative Nursing

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar.

As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

### Specific Course Rules

#### 1 Admission Requirements

1.1 An applicant for admission to the course for the Graduate Diploma in Peri-Operative Nursing shall:

- (a) have qualified for a Bachelor of Nursing of a university accepted for the purposes by the University OR have at least two years post registration experience as a registered nurse in the area of peri-operative nursing, and
- (b) be registered, or be eligible for registration, as a nurse in South Australia;
- (c) have obtained the approval of the Department of Clinical Nursing.

1.2 Subject to the approval of Council, the Faculty may in special cases and subject to such conditions (if any) as it may seem fit to impose in each case, accept as a candidate for the Graduate Diploma in Peri-Operative Nursing a person who does not qualify for admission to the course under (1.1) above, but has given evidence satisfactory to the Faculty of fitness to undertake work for the Graduate Diploma in Peri-Operative Nursing

#### 2 Duration of Course

2.1 To qualify for the Graduate Diploma in Peri-Operative Nursing a candidate shall satisfactorily complete a course of full time study extending over at least one year OR a course of part time study extending over at least two years.

#### 3 Assessment and Examinations

3.1 There shall be four classes of pass in each subject for the Graduate Diploma in Peri-Operative Nursing: Pass with High Distinction, Pass with Distinction, Pass with Credit and Pass.

3.2 (a) A candidate who fails to pass in the subject and desires to take the subject again shall again attend lectures and satisfactorily do such written and practical

work as the teaching staff concerned may prescribe, unless specifically exempted therefrom after written application to the Registrar for such exemption.

- (b) A candidate who has twice failed the examination in any subject or division of a subject may not enrol for the subject again except by special permission to be obtained in writing from the Registrar and then only under such conditions as may be prescribed.
- (c) For the purpose of this Rule a candidate who is refused permission to sit for examination, or who, without a reason accepted by the Head of the Department of Clinical Nursing as adequate, fails to attend all or part of a final examination (or supplementary examination if granted) after remaining enrolled for at least 9 teaching weeks that semester, shall be deemed to have failed the examination.

#### 4 Course of Study

4.1 Unless exempted therefrom by the Faculty every candidate for the Graduate Diploma in Peri-Operative Nursing shall satisfactorily complete the following subjects to the value of 24 points:

4601 Peri-Operative Nursing I	4
or	
6971 Peri-Operative Nursing I PT	4
5665 Peri-Operative Nursing II	4
or	
6077 Peri-Operative Nursing II PT	4
4692 Advanced Scientific Facts and Theories	4
4636 Nursing and Medical Science in Peri-operative care	4
1704 Frameworks of Care	4
5023 Practice Inquiry in Peri-Operative Nursing	4

## Syllabuses

---

Students enrolled in this course will be required to complete six coursework units of study, each of four credit points.

### 4601 Peri-Operative Nursing I

*points value:* 4                      *duration:* semester 1

*contact hours:* 2 hours per week for 13 weeks plus 900 hours clinical practice.

*content:* This subject will largely consist of field based learning within the area of peri-operative care, supported by tutorials. Advanced clinical skill acquisition will occur based on theoretical frameworks of care so that skills are not acquired within a vacuum which does not include the patient and family in context.

*assessment:* 2000 word case study (30%); viva voce examination (20%); competency assessment (50%)

### 5665 Peri-Operative Nursing II

*points value:* 4                      *duration:* semester 2

*contact hours:* 2 hours per week for 13 weeks plus 900 hours clinical practice.

*content:* This subject will build on student's previous learning in peri-operative nursing I. It will focus on further advanced clinical skill acquisition occur based on theoretical frameworks of care through field based learning within the area of peri-operative care.

*assessment:* 2000 word case study (30%); viva voce examination (20%); competency assessment (50%)

### 4692 Advanced Scientific Facts and Theories

*points value:* 4                      *duration:* semester 1

*contact hours:* 2 hours per week for 13 weeks

*content:* This subject will examine fundamental scientific facts and theories to introduce the basic principles of those areas of the physical and social sciences which inform specialist practice. Topics will include an introduction to advanced nursing science; advanced medical science and advanced therapeutics.

*assessment:* 1000 word mid - term assignment (25%); mid term test paper (25%); examination (50%)

### 4636 Nursing and Medical Science in Peri-Operative Care

*points value:* 4                      *duration:* semester 2

*contact hours:* 3 hours per week for 13 weeks

*content:* This subject will build on Advanced Scientific Facts and Theories and will focus on nursing and medical science specific to specialist peri-operative care practice. The focus will be on physiology, biochemistry, therapeutics and nursing science.

*Assessment:* 1000 word mid - term assignment (25%); mid term test paper (25%); examination (50%)

### 1704 Frameworks of Care

*points value:* 4                      *duration:* semester 1 or 2

*contact hours:* 2 hours per week for 13 weeks

*content:* This subject will consider the supports and constraints within which nurses care. Topics will include ethics of care; legalities of health care; professional standards and competencies; current issues in health economics and management; skill mix; specialisation and multiskilling; and multidisciplinary perspectives on health care.

*assessment:* 2000 word mid term assignment (30%); class presentation (20%); 3000 word essay (50%)

### 5023 Practice Inquiry in Peri-Operative Nursing

*points value:* 4                      *duration:* semester 2

*contact hours:* 2 hours per week for 13 weeks

*content:* This subject will build on the student's previous and current experience in peri-operative practice. It will focus on the phenomena which nurses encounter in practice and which form the basis of nursing inquiry. It will consider reflective processes, the research process, and theory building in peri-operative nursing.

*assessment:* 2000 word mid term assignment (30%); 1500 word class paper (20%); 3000 word essay (50%)

### 6971 Peri-Operative Nursing I PT

*points value:* 4                      *duration:* Full year

*contact hours:* 2 hours per week for 13 weeks plus 900 hours clinical practice.

*content:* This subject will largely consist of field based learning within the area of peri-operative care, supported by tutorials. Advanced clinical skill acquisition will occur based on theoretical frameworks of care so that skills are not acquired within a vacuum which does not include the patient and family in context.

*assessment:* 2000 word case study (30%); viva voce examination (20%); competency assessment (50%)

**6077 Peri-Operative Nursing II PT**

points value: 4

duration: Full year

contact hours: 2 hours per week for 13 weeks plus 900 hours clinical practice.

content: This subject will build on student's previous learning in peri-operative nursing I. It will focus on further advanced clinical skill acquisition occur based on theoretical frameworks of care through field based learning within the area of peri-operative care.

assessment: 2000 word case study (30%); viva voce examination (20%); competency assessment (50%)

## Graduate Diploma in Psychotherapy

note: Postgraduate tuition fees may apply to this course.

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar.

As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

### Specific Course Rules

#### 1 General

- 1.1 There shall be a postgraduate Graduate Diploma in Psychotherapy.

#### 2 Admission requirements

- 2.1 A candidate for admission to the course for the diploma shall have qualified for the degrees of Bachelor of Medicine and Bachelor of Surgery of the University, or to a corresponding degree or degrees of another university accepted for the purpose by the University.

#### 3 Duration of course and qualification requirements

- 3.1 To qualify for the Graduate Diploma a candidate shall:
- satisfactorily complete a course of part-time study extending over two years; and
  - submit evidence that subsequently to qualifying for the award of the degree or degrees referred to in 2.1 above hereof he or she has undergone in a hospital, practical clinical training in psychotherapy deemed satisfactory by the Faculty, for a period of not less than two years.

#### 4 Assessment and examinations

- 4.1 A candidate who has twice failed to pass the examination may not enrol for the Graduate Diploma again except by special permission of the Faculty and then only under such conditions as the Faculty may prescribe.

- 4.2 For the purpose of this Specific Course Rule a candidate who is refused permission to sit for examination, or who fails, without a reason accepted by the Dean as adequate, to attend all or part of an annual examination (or supplementary examination if granted) after having enrolled for at least two terms in that year, shall be deemed to have failed to pass the examination.

#### 5 Course of study

- 5.1 A candidate for the Graduate Diploma in Psychotherapy shall regularly attend lectures, complete such written, practical and tutorial work as may be prescribed, and pass examinations in:

8019 Individual Psychotherapy	6
3605 Cognitive Behavioural Psychotherapy	4
3607 Evaluative Techniques in Psychotherapy	6
5034 Marital and Family Therapy	4
6717 Group and Milieu Therapy	4

## Syllabuses

### textbooks

Details of required books will be provided at the beginning of the course; students are expected to procure the latest edition of all textbooks prescribed.

### examinations

Details of the method of examination in specific subjects may be obtained from the Department of Psychiatry: the methods will include continuous assessment of practical work, assessments of presentation of subjects in seminars, and written work.

The course is intended for graduates in Medicine, to provide systematic experience in a variety of treatment methods in psychotherapy; to foster a critical appraisal of indications for, limitations of, and evaluation of, such treatment methods. It is expected that the students will hold a concurrent clinical appointment. The timetable is devised so as to provide for the hospital commitments of students.

The course extends over two years of part-time study. It includes lectures, demonstrations, seminars and practical work on specific subjects as listed below.

### assessment

Assessments will be on the basis of the presentation of clinical material, presentation of subjects in seminars, and essays:

The subjects of study are:

- 8019 Individual Psychotherapy
- 3605 Cognitive Behavioural Psychotherapy
- 3607 Evaluative Techniques in Psychotherapy
- 5034 Marital and Family Therapy
- 6717 Group and Milieu Therapy

#### 8019 Individual Psychotherapy

*points value:* 6 *duration:* full year

*content:* Theoretical seminars will be conducted concurrently with supervisory seminars, as well as practical work (in individual psychotherapy with a selected patient or patients) in the student's own time. The course will include review of therapy, and provision will be made for evaluation of treatment. A written record of treatment progress will be required, and this will provide part of the assessment of the student.

Topics will include: the nature of the psychotherapeutic process; historical review of major theoretical systems of psychotherapy; criteria for selection for individual psychotherapy; limitations of individual psychotherapy; common factors in differing modes of individual psychotherapy; the place of short-term versus long-term therapy; psychotherapy in specific syndromes (eg psychosomatic disorders and psychotic states).

#### 3605 Cognitive Behavioural Psychotherapy

*points value:* 4 *duration:* semester 1 or 2

*content:* The course will include demonstrations of specific techniques, and opportunities for acquisition of skills in these techniques.

Topics will include: the relationship between cognitive behaviour therapy and individual psychotherapy; the theoretical bases of cognitive behavioural approaches to treatment; specific indications for cognitive behavioural techniques; the place of adjunctive drug therapy.

#### 3607 Evaluative Techniques in Psychotherapy

*points value:* 6 *duration:* full year

*content:* Lectures and seminars will be interspersed throughout the course (two sessions per semester) in order that the evaluative techniques may be applied to the particular psychotherapeutic method under study for that semester.

Topics will include: methodological issues in establishing criteria for 'change' in psychotherapy; patient/therapist variables affecting outcome; spontaneous remission of symptoms; the limitations of measurement; evaluation with specific treatment methods.

#### 5034 Marital and Family Therapy

*points value:* 4 *duration:* semester 1 or 2

*contact hours:* 1 session of 1.5 hours a week, as well as practical work (family assessment with selected patients) in the students' own time

Such work will be reviewed and provision made for evaluation of such treatment.

*content:* Topics will include: models of marital and family interaction; indications for, scope of, and limitations of marital therapy, problems with the adolescent in family therapy; family therapy and child psychiatry.

**6717 Group and Milieu Therapy**

points value: 4 duration: semester 1 or 2

contact hours: a session each week for lecture/seminar material, in addition to 1 session a week for direct observation and discussion of group therapy techniques

content: Topics will include: theoretical bases of group therapy approaches; 'closed' and 'open' groups; integration of group therapy in ward administration; criteria for selection for group therapy; indications for, scope of, and limitations of group therapy; techniques of leadership and facilitation of group processes.

## Graduate Diploma in Public Health

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar.

As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

### Specific Course Rules

#### 1 Admission requirements

- 1.1 The Faculty may accept as a candidate for the Graduate Diploma any person who has qualified for a degree of the University or of another institution accepted for the purpose by the University.
- 1.2 Subject to the approval of the Council the Faculty may, in special cases and subject to such conditions as it may see fit to impose in each case, accept as a candidate for the Graduate Diploma a person who does not meet the requirements specified in 1.1 above if it is satisfied that he or she is likely to be able satisfactorily to undertake work for the Graduate Diploma.
- 1.3 The Faculty may require an applicant to complete such preliminary work as it may prescribe before being accepted as a candidate for the Graduate Diploma.

#### 2 Qualification requirements

- 2.1 To qualify for the Graduate Diploma a candidate shall satisfy examiners in courses of study and satisfactorily complete an essay as set out in 5 below.

#### 3 Duration of course

- 3.1 Except with the permission of the Faculty, the subjects of study shall be completed in not more than one year of full-time study or two years of part-time study. A candidate who withdraws from all of the subjects in which he or she is enrolled in any one year or who fails to re-enrol after being enrolled in the previous year may only re-enrol in a subsequent year with the approval of the Faculty, and under such conditions as the Faculty may impose in each case.

#### 4 Review of academic progress

- 4.1 If in the opinion of the Faculty a candidate for the Graduate Diploma is not making satisfactory progress, the Faculty may, with the consent of the Council, terminate the candidature and the candidate shall cease to be enrolled for the Graduate Diploma.

#### 5 General

- 5.1 Each candidate's course of study must be approved by the Dean or a nominee at enrolment each year.
- 5.2 A person who holds the degree of Master of Public Health shall not be eligible to be admitted to the Graduate Diploma of Public Health.
- 5.3 Notwithstanding the foregoing Specific Course Rules a person who has been enrolled for the degree of Master of Public Health, who has completed the work prescribed for the Public Health studies components of that degree and who has not been awarded the Master's degree shall, on written application to the Registrar, be awarded the Graduate Diploma subject to the person discontinuing candidature for the degree of Master of Public Health, and submitting a satisfactory essay of 3-4,000 words which provides an integrated overview of the public health issues raised in the subjects undertaken towards the degree of Master of Public Health.

#### 6 Subjects of study

- 6.1 To qualify for the Graduate Diploma the candidate shall complete the requirements of:
  - 8152 Public Health Studies for Graduate Diploma
    - (a) by satisfactorily passing the assessment requirements in

(i) the following compulsory subjects:

2627	Introduction to Biostatistics	1.5
4628	Introduction to Environmental and Occupational Health	1.5
6635	Introduction to Epidemiology	3
2389	Prevention Principles	1.5
1292	Public Health Policy	3
4892	Research Methods in Public Health	1.5

(ii) elective subjects with an aggregate points value of not less than 12 points from the following:

7238	Aboriginal Health Policy	3
1563	Occupational Health and Safety Practice	3
1011	Public Health Biology	3
2836	Public Health Studies	3
3945	Health Services Organisation	3
4041	Primary Health Care	3
4286	Biostatistics	3
4463	Public Health Policy and the Age	3
4672	Prevention in Practice	3
5546	Public Health Law	3
5672	Occupational Hygiene and Ergonomics	3
6100	Dental Public Health	3
6187	Industrial Toxicology	3
7258	Ethical Issues in Public Health	3
8026	Epidemiological Research Methods	3

(iii) other subjects offered by this University or another University which the Faculty approves for presentation in lieu of elective subjects listed in (ii) up to the value of 6 points;

(b) by submitting a satisfactory essay of 3–4000 words which provides an integrated overview of the public health issues raised in the subjects undertaken in 6.1 above.

**6.2** Candidates who wish to enrol in a subject for which they do not have the necessary preliminary knowledge or approved qualifications, may be required to undertake such bridging studies prior to the commencement of the subject as may be deemed appropriate by the Head of the Department of Community Medicine.

**6.3** There shall be four classifications of pass in each subject as follows; Pass with Higher Distinction, Pass with Distinction, Pass with Credit, Pass, with the exception of 8152 Public Health Studies for Graduate Diploma for which the passing grade shall be a non-graded pass.

**6.4** The subjects presented for the Graduate Diploma shall not include any subject which is, in the opinion of the Faculty, substantially equivalent to another subject presented for the Graduate Diploma or already counted towards another qualification gained by the candidate.

**6.5** A candidate who has passed subjects in other Faculties of the University or in other educational institutions may, on written application to the Registrar, be granted such status or exemption from the requirements of these schedules as the Faculty shall determine. Otherwise no subject counted for any other award of the University shall be counted as part of the requirement for the Graduate Diploma.

**6.6** To complete a course of study, a candidate, unless exempted therefrom by the Faculty, shall

- (a) attend the prescribed lectures, tutorials and seminars; and
- (b) undertake such practical work, and field work and do such written work and pass such examinations as the Faculty may prescribe.

## Master of Clinical Science

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar.

As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

### Specific Course Rules

#### 1 Admission requirements

1.1 The Faculty may accept as a candidate for the degree a person who has been admitted to the degrees of Bachelor of Medicine and Bachelor of Surgery of The University of Adelaide, or degrees accepted by the Faculty as equivalent, and who has either:

- (a) qualified for the award of the Graduate Diploma in Clinical Science; or
- (b) holds qualifications acceptable to the Faculty in lieu of the Graduate Diploma.

#### 2 Duration of course and qualification requirements

2.1 To qualify for the degree a candidate shall:

- (a) undertake a program of research for a period of not less than one year and not more than two years from the date of his/her candidature in the case of a full-time candidate, or four years in the case of a part-time candidate;
- (b) submit a satisfactory dissertation thereon.

#### 3 General

3.1 The Faculty will appoint a supervisor to guide the candidate in his or her work.

3.2 The candidate shall lodge with the Registrar three copies of his or her dissertation which shall be prepared in accordance with directions given to candidates from time to time. Refer to the Guidelines on Higher Degrees by Research and Specifications for Thesis in this volume.

3.3 On submission or re-submission of the dissertation the Faculty shall nominate examiners who may recommend that it:

- (a) be accepted, with or without conditions; or

- (b) be accepted, with or without conditions, subject to satisfactory oral examinations; or

- (c) be sent back to the candidate for revision; or

- (d) be rejected.

3.4 A candidate who fulfils the requirements of these Specific Course Rules may, on the recommendation of the Faculty, be admitted to the degree of Master of Clinical Science.

#### 4 Review of academic progress

4.1 A candidate's progress shall be reviewed by the Faculty annually. If in the opinion of the Faculty of Medicine a candidate is not making satisfactory progress the Faculty may, with the consent of the Council, withdraw its approval of his/her candidature and the candidate shall cease to be enrolled for the degree.

### Syllabuses

*syllabus details:* see under Master of Public Health

## Master of Medical Science

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar.

As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

### Specific Course Rules

#### 1 Admission requirements

1.1 The Faculty of Medicine may accept as a candidate for the degree a person who has qualified for:

- (a) the degrees of Bachelor of Medicine and Bachelor of Surgery of The University of Adelaide; or
- (b) the Honours degree of Bachelor of Medical Science or Bachelor of Health Sciences or Bachelor of Science or Bachelor of Science in Dentistry of The University of Adelaide, at First or Second Class standard; or
- (c) a degree of another institution accepted for the purpose by the University.

1.2 Subject to the approval of the Board of Graduate Studies and subject to such conditions as it may see fit to impose in each case, the Faculty may accept as a candidate for the degree a person who does not meet the requirements specified in 1.1 above, if it is satisfied of the person's fitness to undertake work for the degree.

#### 2 Duration of course

2.1 Every candidate shall undertake an approved program of study and research, and shall submit a thesis embodying the results of that study and research, and may submit also, in support of the thesis, other relevant material.

2.2 A candidate shall proceed to the degree by full-time study or, provided that the Faculty is satisfied that the candidate has adequate time to pursue supervised research under the control of the University, by part-time study.

2.3 Except in circumstances approved by the Faculty, the work for the degree shall be completed and the thesis submitted:

- (a) in not less than one year nor more than two years of full-time study;
- (b) in not less than two years and not more than four years of part-time study.

#### 3 General

3.1 The Faculty shall appoint one or more supervisors to guide the candidate's research.

3.2 On completion of the thesis the candidate shall lodge with the Registrar three copies of the thesis prepared in accordance with directions given to candidates from time to time.

3.3 The Faculty shall appoint two examiners of the thesis, at least one of whom shall be external to the University.

#### 4 Review of academic progress

4.1 The Faculty may review the progress of a candidate at any time and if the candidate's progress is unsatisfactory, the Faculty may, with the consent of the Council, terminate the candidature.

# Master of Nursing Science

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar.

As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

## Specific Course Rules

### 1 Admission Requirements

1.1 An applicant for admission to the course for the Master of Nursing Science shall:

- (a) have qualified for a Bachelor of Nursing of a university accepted for the purposes by the University OR have at least two years post registration experience as a registered nurse, and
- (b) be registered, or be eligible for registration, as a nurse in South Australia;
- (c) have obtained the approval of the Department of Clinical Nursing.

1.2 Subject to the approval of Council, the Faculty may in special cases and subject to such conditions (if any) as it may seem fit to impose in each case, accept as a candidate for the Master of Nursing Science, a person who does not qualify for admission to the course under (1.1) above, but has given evidence satisfactory to the Faculty of fitness to undertake work for the Master of Nursing Science.

### 2 Duration of Course

2.1 To qualify for the Master of Nursing Science a candidate shall satisfactorily complete a course of full time study extending over at least two years OR a course of part time study extending over at least four years.

### 3 Assessment and Examinations

3.1 There shall be four classes of pass in each subject for the Master of Nursing Science: Pass with High Distinction, Pass with Distinction, Pass with Credit and Pass.

3.2 (a) A candidate who fails to pass in the subject and desires to take the subject again shall again attend lectures and satisfactorily do such written and practical work as the teaching staff concerned may prescribe, unless specifically exempted therefrom after written application to the Registrar for such exemption.

(b) A candidate who has twice failed the examination in any subject or division of a subject may not enrol for the subject again except by special permission to be obtained in writing from the Registrar and then only under such conditions as may be prescribed.

(c) For the purpose of this Rule a candidate who is refused permission to sit for examination, or who, without a reason accepted by the Head of the Department of Clinical Nursing as adequate, fails to attend all or part of a final examination (or supplementary examination if granted) after remaining enrolled for at least 9 teaching weeks that semester, shall be deemed to have failed the examination.

### 4 Course of Study

4.1 Unless exempted therefrom by the Faculty every candidate for the Master of Nursing Science shall:

- (a) satisfactorily complete the Stage I requirements by satisfactorily completing the subjects of one of the following:
  - Graduate Diploma in Clinical Nursing
  - Graduate Diploma in Accident and Emergency Nursing
  - Graduate Diploma in Anaesthetic Nursing
  - Graduate Diploma in Cardiac Nursing
  - Graduate Diploma in Intensive Care Nursing
  - Graduate Diploma in Oncology Nursing
  - Graduate Diploma in Orthopaedic Nursing
  - Graduate Diploma in Peri-Operative Nursing

(b) satisfactorily complete the following Stage II subjects to the value of 24 points:

2500 Empirical/Analytical Research in Nursing	3
5139 Interpretative and Critical Research in Nursing	3
1239 International Issues in Nursing Service Delivery	3
5148 The emergence of a theoretical base for nursing	3
7293 Research Dissertation	12

## Syllabuses

Students enrolled in this course will be required to complete four Stage II subjects, each of three credit points. Students will be required to prepare and submit a research based dissertation to the value of 12 credit points.

### 2500 Empirical/Analytical Research in Nursing

points value: 3

duration: semester 1

contact hours: 2 hours per week for 13 weeks

*content:* This subject will build on student's previous learning on the empirico/analytical paradigm and focus on research design from this perspective. Topics will include experimental and quasi-experimental design; surveys; developing hypotheses; sampling; approaches to data collection; reliability and validity. Students will also be introduced to published nursing research reports which utilise this perspective and will be required to subject these to rigorous critique.

*assessment:* 2000 word assignment critiquing published research report (30%); 1500 word class paper - draft research proposal (20%); Examination (50%)

### 5139 Interpretative and Critical Research in Nursing

points value: 3

duration: semester 2

contact hours: 2 hours per week for 13 weeks

*content:* This subject will build on student's previous learning on the interpretative and critical paradigms and focus on research design from this perspective. Topics will include the critique of positivism; introduction to interpretative methodologies (grounded theory, ethnography, phenomenology etc), introduction to critical methodologies (feminist methodology, action research etc), and introduction to post structuralist and post modernist thought. Students will also be introduced to published nursing research reports which utilise these perspectives and will be required to subject these to rigorous critique.

*assessment:* 2000 word assignment critiquing published research report (30%); 1500 word class paper - draft research proposal (20%); 3000 word essay (50%)

### 1239 International Issues in Nursing Service Delivery

points value: 3

duration: semester 1

contact hours: 2 hours per week for 13 weeks

*content:* This subject will examine contemporary issues and debate related to service delivery in nursing. Topics will include primary health care and the WHO "Health for All" declaration; extension and expansion of the nursing role; specialisation versus genericism; the changing role of hospitals in western and non-western societies; visioning new nursing roles for the future and contemporary approaches in western health systems to professionalism, cost containment, continuous quality improvement, customer focus and case mix.

*assessment:* 2000 word mid - term assignment (40%); 3500-4000 word essay (60%)

### 5148 The emergence of a theoretical base for nursing

points value: 3

duration: semester 2

contact hours: 2 hours per week for 13 weeks

*content:* This subject will build on student's previous learning on nursing theory and will critique current discourses in nursing on theory development. Approaches to understanding practice in nursing will be discussed and the role of personal theory, local theory and theory in action will be explored. Students will engage in the process of concept clarification and will be expected to contribute to small group discussion and debate on emerging theories in nursing and on the utility of extant nursing theory in developing nursing practice and on the development of a substantive base for nursing science.

*assessment:* 2000 word mid term assignment (30%); 1500 word class paper (20%); 3000 word essay (50%)

### 7293 Research Dissertation

points value: 12

duration: full year

contact hours: 3 hour dissertation workshop. Individual supervision.

*content:* This component of the course requires the student to identify a research question or problem; to carry out a small research study based on this question; and to submit a fully developed report.

*assessment:* 20-30,000 word dissertation (100%)

## Master of Public Health

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar.

As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

### Specific Course Rules

#### 1 Admission requirements

- 1.1 The Faculty of Medicine may accept as a candidate for the degree any person who has qualified for a degree of The University of Adelaide or of another university.
- 1.2 Subject to the approval of the Board of Graduate Studies acting with authority wittingly devolved to it by Council the Faculty of Medicine may in special cases and subject to such conditions as it may see fit to impose in each case, accept as a candidate for the degree a person who does not meet the requirements specified in 1.1 above if it is satisfied that he or she is likely to be able satisfactorily to undertake work for the degree.
- 1.3 The Faculty of Medicine may require an applicant to complete such preliminary work as it may prescribe before being accepted as a candidate for the degree.

#### 2 Qualification requirements

- 2.1 To qualify for the degree a candidate shall:
  - (a) satisfy examiners in subjects of study as prescribed in the Specific Course Rules; and
  - (b) present a satisfactory thesis on a subject approved by the Faculty of Medicine. The thesis shall give the results of original research or of an investigation on which the candidate has been engaged.
- 2.2 With the prior permission of the Faculty two or more candidates may submit a joint thesis. In the light of their assessment of each candidate's contribution and quality of work the examiners, to be appointed pursuant to 5.2 below, may recommend for each candidate:
  - (a) that their thesis be accepted;
  - (b) that their thesis be not accepted; or
  - (c) that one or more of the candidates be required to submit additional individual work or to contribute to a revision of their joint thesis.

- 2.3 If the examiners do not consider the joint thesis acceptable for the purposes of 2.2(a) above they may nevertheless in special circumstances, having regard to the individual work and contribution of any one or more of the candidates, recommend that the work and contribution of such one or more of such candidates complies with the requirements of 2.2(a) above to enable that one candidate or those several candidates to be treated as complying with the requirements of this Rule.

#### 3 Duration of course

- 3.1 Except with the permission of the Faculty, the subjects of study and the thesis shall be completed in not more than two years of full-time study or four years of part-time study.
- 3.2 A candidate who withdraws from all of the subjects in which he or she is enrolled in any one year or who fails to re-enrol after being enrolled in the previous year may only re-enrol in a subsequent year with the approval of the Faculty, and under such conditions as the Faculty may impose in each case.
- 3.3 A candidate proceeding with the thesis whose work is interrupted for a period of time may be granted an intermission of candidature by the Dean on behalf of the Faculty. If such an application is approved the maximum period specified in 3.1 above will be adjusted accordingly by adding the length of the intermission.

#### 4 Review of academic progress

- 4.1 If in the opinion of the Faculty of Medicine a candidate for the degree is not making satisfactory progress, the Faculty may, with the consent of the Council, terminate the candidature and the candidate shall cease to be enrolled for the degree.

## 5 General

- 5.1** On completion of the thesis the candidate shall lodge with the Registrar three copies of the thesis prepared in accordance with directions given to candidates from time to time. No thesis or material presented for any other degree within this or any other institution shall be submitted.
- 5.2** The Faculty shall appoint two examiners for each thesis, of whom at least one shall be external to the University.
- 5.3** A candidate who holds the Graduate Diploma in Public Health shall surrender the Graduate Diploma before being admitted to the degree.
- 5.4** There shall be four classifications of pass in each subject as follows: Pass with High Distinction, Pass with Distinction, Pass with Credit, and Pass.
- 5.5** The Faculty of Medicine may grant such status in any subject as it may determine up to a maximum of four subjects.
- 5.6** A candidate's enrolment in subjects of study must be approved by the Dean (or nominee) at enrolment each year.
- 5.7** The candidate shall pursue an approved research topic on a subject of relevance to environmental, public or community health under the control of the University and under the general guidance of one or more supervisors appointed by the Faculty of Medicine. At least one supervisor shall be a member of the academic staff of a Department of the Faculty of Medicine.
- 5.8** The examiners appointed under 5.2 above may recommend that:
- (a) the candidate shall be awarded the degree; or
  - (b) the candidate shall be awarded the degree but that minor amendments be made to the thesis; or
  - (c) the candidate shall be awarded the degree subject to,
    - (i) specified amendments being made to the thesis, or
    - (ii) satisfactory performance in an oral or written examination; or
  - (d) the candidate shall not be awarded the degree but shall be permitted to re-submit the thesis in a revised form; or
  - (e) the candidate shall not be awarded the degree.

## 6 Subjects of study and thesis requirements

- 6.1** Unless exempted therefrom by the Faculty of Medicine, every candidate for the degree shall complete the following components:

(a) compulsory subjects	
2627	Introduction to Biostatistics 1.5
4628	Introduction to Environmental and Occupational Health 1.5
6635	Introduction to Epidemiology 3
2389	Prevention Principles 1.5
1292	Public Health Policy 3
4892	Research Methods in Public Health 1.5
(b) elective subjects*	
subjects to the value of twelve points to be chosen from the following:	
7238	Aboriginal Health Policy 3
4286	Biostatistics 3
6100	Dental Public Health 3
8026	Epidemiological Research Methods 3
7258	Ethical Issues in Public Health 3
3945	Health Services Organisation 3
6187	Industrial Toxicology 3
1563	Occupational Health and Safety Practice 3
5672	Occupational Hygiene and Ergonomics 3
4041	Primary Health Care 3
4672	Prevention in Practice 3
1011	Public Health Biology 3
5546	Public Health Law 3
4463	Public Health Policy and the Aged 3
2836	Public Health Studies 3

\*Students may also be permitted to enrol in electives offered by Flinders University.

- (c) Master of Public Health Thesis

**6.2** Candidates who have partially completed the coursework requirements for the degree before 1994 shall complete the requirements as follows:

number of subjects completed before 1994	points value of subjects to be completed in 1994 or subsequent years (as approved)
1	21
2	18
3	15
4	15
5	12
6	9
7	6
8	3

## Syllabuses

### subjects of study

A candidate is required to complete the five compulsory subjects and four elective subjects. The availability of a particular elective subject in any academic year depends on student demand and departmental staffing arrangements. Detailed timetables will be issued at the beginning of each academic year. All candidates are advised to discuss their choice of electives with the coordinating lecturer.

### textbooks

A reading list of recommended journal articles and textbooks will be issued by the coordinating lecturer for each subject and will be available from the Department of Community Medicine at the beginning of the year.

### assessment

For each subject of study there will be a written examination at the conclusion. In addition candidates will be expected to prepare tutorial assignments or papers for presentation.

### compulsory subjects

#### 6635 Introduction to Epidemiology

level: postgraduate points value: 3  
duration: semester 2

*content:* This subject provides students with basic skills in epidemiological research design and analysis, with particular emphasis on the nature and methods of observational epidemiology. At the end of the subject students should grasp (and hence be able to apply in unfamiliar settings) basic concepts in epidemiology, have an understanding of the broad research strategies applied in the discipline, and be able to critically assess literature in the public domain which employs epidemiological methods. The subject involves a combination of lectures, tutorials and practical exercises. Students undertake some exercises with a view to detecting flaws in research designs.

#### 2627 Introduction to Biostatistics

level: postgraduate points value: 1.5  
duration: semester 1

*content:* This course introduces Biostatistics as a means of summarising sets of data, coping with the variability of individuals within populations, and

making decisions in the face of uncertainty. Applications of statistical methodology to public health research will be emphasised.

#### 4628 Introduction to Environmental and Occupational Health

level: postgraduate points value: 1.5  
duration: semester 2

*content:* This subject focuses on environmental hazards and the way in which they impinge on the workforce and the general population. There will be an introduction to key disciplines (toxicology, industrial hygiene and environmental measurement) in which hazards are measured and managed. Consideration will be given to the way in which hazards interact with each other and with host factors in the causation of disease. There will also be an introduction to the legislative responses (standards, laws and regulations) enacted to control occupational and environmental hazards

#### 2389 Prevention Principles

level: postgraduate points value: 1.5  
duration: semester 2

*content:* Prevention Principles deals with explanations of the stability and change in health related behaviours at the personal, interpersonal, social, community and environmental levels. Some of the epidemiological rationale for priorities in prevention is also considered.

#### 1292 Public Health Policy

level: postgraduate points value: 3  
duration: semester 1

*content:* This subject aims to help students analyse the health system with skills formed by the traditions of sociology, politics and economics. It aims to develop a critical, historically informed attitude toward the acquisition of knowledge and the evaluation of evidence about health institutions and their roles. Attention will be given also to the broad social and political context in which health policy is formed and implemented, and to the value assumptions implicit in policy. This analytical approach will be applied in case studies of current issues in public health policy.

#### 4892 Research Methods in Public Health

level: postgraduate points value: 1.5  
duration: semester 1

*content:* This course looks at the framework of research in the public health arena, the nature of enquiry, and the major approaches to research. Indicators of the Australian population's health and surveillance and information systems are considered. Specific research methods, both qualitative and quantitative, are discussed.

## elective subjects

### 7238 Aboriginal Health Policy

*level:* postgraduate *points value:* 3

*duration:* semester 2

*content:* This subject offers students the opportunity to analyse current public policy affecting the health of Aboriginal Australians. It uses historical and political analysis, and comparative studies of other indigenous populations, to provide a context for reflection on current Aboriginal health status and health needs. The subject provides opportunities for students to explore a wide range of Aboriginal health programs and issues, through an intensive and multi-disciplinary teaching program and individual research.

### 4286 Biostatistics

*level:* postgraduate *points value:* 3

*duration:* semester 2

*content:* This subject is designed to suit students requiring a high degree of self-sufficiency in the collection, analysis and interpretation of data. The topics will include survey sampling methods, analysis of categorical data, non-parametric statistical methods, multivariate linear modelling and survival analysis. A central feature of the subject will be instruction in the use of statistical packages on computers. Emphasis will be placed on the practical application of statistical skills to real data sets and the rational interpretation of results, especially results generated by statistical packages.

### 6100 Dental Public Health

*level:* postgraduate *points value:* 3

*duration:* semester 2

*content:* This subject is designed to suit students requiring specific understanding of dental public health. The subject will focus on (a) the assessment of various oral disease levels and related problems, identification of prevention and control measures, selection and implementation of appropriate measures and evaluation of the results; and (b) the structure of existing dental care programs, the coverage of the community and integration and organisation of all

types of dental resources including the supply, distribution and utilisation of dental personnel, facilities and funds.

### 8026 Epidemiological Research Methods

*level:* postgraduate *points value:* 3

*duration:* semester 1

*prerequisite:* completion of an introductory epidemiology course

*content:* This subject concentrates on conceptual and practical issues encountered by students in the design and implementation of epidemiological research. (Students will be required to develop and present a research protocol for class discussion). Theoretical material as it relates to carrying out such research will include the definition and control of bias and confounding in observational studies, implications of sampling, the analysis of research impact of interventions on the community, techniques of surveillance, and screening. Common pitfalls in epidemiological and statistical reasoning will be examined, and attention will be paid to research design, proposal writing, data presentation, and critical reading of the research literature.

### 7258 Ethical Issues in Public Health

*level:* postgraduate *points value:* 3

*duration:* semester 1

*content:* This subject consists of two sections. About 40% of the time is devoted to an examination of theoretical questions, including the bases for ethical argument in a pluralist society, the moral foundations of public policy and the justification of social demands for individuals to conform to policy. The second, larger part of the subject, includes a critique of the ethical implications of the public health movement and of particular policies. This second part attends to questions such as environmentalism, resource distribution in an ageing population, ethical dilemmas in primary care, and ethical problems in epidemiology.

### 3945 Health Services Organisation

*level:* postgraduate *points value:* 3

*duration:* semester 1

*content:* This subject is designed to provide a broad introduction to the analysis of health service organisations. There will be some emphasis on the provision of public health, primary care and preventive services, but not to the exclusion of hospitals and other institutions. Priority will be given to the forces which have been critical in shaping the structure and function of these services. The professional and technical

context of health service provision will be examined in the light of fundamental organisational and economic principles. Limited comparison will be made with institutions and practices in other O.E.C.D. countries.

### 6187 Industrial Toxicology

level: postgraduate points value: 3  
duration: semester 1

*content:* The unit focuses on chemical hazards in the workplace. It includes an overview of the principles of toxicology; the use of toxicity tests and other data to characterise a chemical's acute, chronic, systemic and local toxic effects, with specific emphasis on carcinogenicity, mutagenicity, neurotoxicity and reproductive toxicity. The compilation of material safety data sheets, the basis for setting and monitoring exposure limits, and the problem of estimating risk are discussed.

### 1563 Occupational Health and Safety Practice

level: postgraduate points value: 3  
duration: semester 2

*content:* This subject will focus on practical occupational health and safety issues. A prime concern will be with workers' compensation and rehabilitation; attention will be given to the evolution of the current system in South Australia, and associated problems in relation to common causes of occupational morbidity. There will also be tutorial sessions in which consideration will be given to specific occupational health problems: analysis of cause-effect relationships, practical problems in minimising health risks, and the management issues within companies involved in addressing the problems. As well as 'conventional' occupational health issues, there will be consideration of related contemporary issues such as smoking in the workplace, alcohol and industry, and worksite health promotion. The course will include some industrial visits.

### 5672 Occupational Hygiene & Ergonomics

level: postgraduate points value: 3  
duration: semester 2

*content:* This subject is an introduction to practical occupational hygiene and ergonomics. There is broad coverage of chemical and physical hazards and of technologies for evaluation and control. Topics include their noise, vibration, thermal stress, shift work, biohazards and toxic chemicals. There will be discussion of exposure standards and the interpretation of hygiene data. There will also be an overview of ergonomics, including consideration of work-station

and process design; displays and information systems; biomechanics; anthropometry; and psychological aspects.

### 4672 Prevention in Practice

level: postgraduate points value: 3  
duration: semester 2

*content:* In this subject, two or three of the major areas of disease prevention and health promotion are examined in depth. These areas may be drawn from infectious disease prevention, cardiovascular and cancer risk, worksite interventions, adolescent health or other areas in which there is current active practice in Australia. For each area selected, there will be consideration of prevalence data and the social context of the problem, intervention strategies and the evidence for their effectiveness, and how outcomes of interventions may be evaluated.

### 4041 Primary Health Care

level: postgraduate points value: 3  
duration: semester 1 or 2

*content:* This subject will critically examine the concept of primary health care as a component and instrument of 'health for all by the year 2000'. The role of traditional and non-traditional healers will be examined across a broad range of cultures and the history of primary health care in Australia will be discussed including evolution to the present state of a privately organised general practitioner workforce and a publicly funded community health network. Elements of present structure will be considered in some detail, including the provision of episodic and continuing care to families and defined populations, the inputs required to train practitioners from various professional groups to deal with undifferentiated illness and the individual and group counselling skills needed to ensure the public health needs and expectations of the community are appropriately met by a mix of public and private primary health care practice.

### 1011 Public Health Biology

level: postgraduate points value: 3  
duration: semester 2

*content:* The aim of this course is to examine the impact of environmental and social factors on the pathogenesis of human disease. An overview of the causes, tissue changes and laboratory manifestations of diseases of public health importance will be provided. The course will consist of a series of lectures and seminars which scans the biology and pathology of infection, immunity, cell injury and repair

mechanisms, tissue degeneration and aberrations of tissue growth and tumours with an ecological perspective on causation.

#### **5546 Public Health Law**

*level:* postgraduate *points value:* 3

*duration:* semester 2

*content:* A series of classes cover the major elements of public health law, the general theories about law and its development in contexts that are important for public health. There will be a detailed analysis of the law relating to the main public health areas, including disease control, environmental health, occupational health, epidemiology, public health litigation and legislation, drug and alcohol controls and health promotion.

#### **4463 Public Health Policy and the Aged**

*level:* postgraduate *points value:* 3

*duration:* semester 1

*content:* This subject explores the implications for the health care system of the change in demography and epidemiology that has accompanied a falling birth rate and a rising life expectancy. Issues to be examined include the prevention of disability, care of the confused elderly, housing policies and the elderly, nursing home needs, domiciliary support services, geriatric assessment units, preparation for retirement, pensions and health, health promotion in the elderly, hospice care. Students will become familiar with a range of research and program evaluation into geriatrics and gerontology in Australia and with the various initiatives being undertaken to address the health and social needs of elderly South Australians.

#### **2836 Public Health Studies**

*level:* postgraduate *points value:* 3

*duration:* semester 1 or 2

*content:* This subject enables students to develop an individualised reading course with an academic staff member in a field of significant public interest. It is not a specific preparation for thesis work. The details of the course will be arranged by negotiation between individual students and appropriate teachers within the department although cooperative arrangements may be organised with other departments or public health agencies. A written plan of study will be developed in consultation with a staff member including the criteria for formal assessment which may include a seminar presentation.

# Master of Surgery

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar.

As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

## Specific Course Rules

### 1 Admission requirements

- 1.1** The following persons may be accepted as candidates for the degree of Master of Surgery:
- (a) Bachelors of Surgery of The University of Adelaide;
  - (b) Graduates in surgery of another university who hold a degree which is accepted by the Council on the recommendation of the Faculty of Medicine as equivalent to the degree of Bachelor of Surgery of The University of Adelaide.
- 1.2** No person may be awarded the degree of Master of Surgery until three years have elapsed since becoming qualified to receive the degree by virtue of which that person qualified for acceptance as a candidate for the degree of Master of Surgery.
- 1.3** Except by special permission of the Faculty of Medicine, every candidate shall give at least two semesters' notice of intended candidature, and shall indicate in general terms the subject of the research work or investigation on which it is proposed to submit a thesis. The Faculty of Medicine may, if it considers it desirable, nominate a department under whose aegis the candidate will be required to undertake work and appoint a supervisor or supervisors to whom the candidate will be responsible for the preparation and presentation of the thesis.
- 1.4** A candidate for the degree shall submit: (a) evidence satisfactory to the Faculty of Medicine of having had special training in surgery including at least two years' such training in a teaching hospital recognised by the Faculty for the purpose; (b) a thesis embodying the results of original work relevant to the science or art of surgery or both; and (c) such other published papers in support of the candidature as may be thought fit.

### 2 Duration of course

- 2.1** Unless the Faculty shall otherwise determine, a candidate for the degree shall pursue his or her

approved course of study for a period of not more than three years from the date of his or her candidature.

### 3 Qualification requirements

- 3.1** To qualify for award of the degree the thesis must make a contribution to surgical knowledge.
- 3.2** A candidate's thesis must include: (a) a declaration by the candidate indicating clearly the extent (if any) to which the candidate is indebted for any portion of the work to any other person, and stating that the thesis does not contain any material which has been accepted for the award of any other degree in any university; (b) a statement of the nature of the problem investigated; (c) a review of the relevant scientific and historical background; (d) a detailed account of the methods of investigation employed, the results obtained, and their interpretation.
- 3.3** On completion of the work the candidate shall lodge with the Registrar three copies of the thesis prepared in accordance with directions given to candidates from time to time. Refer to the Guidelines on Higher Degrees by Research and Specifications for Thesis in this volume.
- 3.4** The Faculty of Medicine, if it approves the subject of the work submitted, shall nominate examiners, of whom at least one shall be an external examiner.
- 3.5** A candidate may be required to undergo an oral examination in the subject-matter of the thesis and in any other subject-matter cognate thereto.
- 3.6** After hearing the reports of the examiners the Faculty shall determine whether or not an oral examination is necessary, and may then recommend (a) that the degree be awarded, or (b) that the degree be awarded on satisfactory completion of an oral examination, or (c) that the thesis be returned to the candidate for revision, or (d) that the degree be not awarded.

## Doctor of Medicine

### Regulations

- 1 The following persons may be accepted as candidates for the degree of Doctor of Medicine:
  - (a) Bachelors of Medicine of The University of Adelaide;
  - (b) Graduates in medicine of another university who hold a degree which is accepted by the Council on the recommendation of the Faculty of Medicine as equivalent to the degree of Bachelor of Medicine of The University of Adelaide.
- 2 No person may be awarded the degree of Doctor of Medicine until three years have elapsed since he or she became qualified to receive the degree specified in Regulation 1 of these regulations. He or she may proceed to the degree either by completing a period of research and presenting a satisfactory thesis thereon, or by the submission of previously published work.
- 3 No thesis or other work presented for the degree may include material which has been accepted for any other degree or qualification of any university or institution. The degree shall not be awarded unless the thesis or work submitted contain an account of original work by the candidate for the degree amounting to a substantial contribution to medical knowledge.
- 4 When he or she submits his or her thesis or other work, a candidate shall:
  - (a) submit therewith a declaration that the thesis or work is his own composition;
  - (b) indicate wherein he or she considers the thesis or work to advance medical knowledge or practice;
  - (c) furnish a history of the progress of medical knowledge in the subjects of the thesis or work;
  - (d) indicate clearly and fully, by appropriate references, the extent to which he or she is indebted for any portion of his work to any other person.

### Regulations governing admission to the degree by thesis

- 5 A person who wishes to proceed to the degree of Doctor of Medicine by thesis shall make written application to the Registrar for enrolment as a candidate. The applicant shall include a brief statement of the topic upon which he or she proposes, upon the completion of a period of research, to submit a thesis.
- 6 A person accepted as a candidate shall conduct or continue research in the field of study approved by the Faculty of Medicine (hereinafter referred to as the Faculty). The Faculty will normally appoint a supervisor or supervisors and will nominate a department or departments under whose aegis the research will be carried out. Unless the Faculty shall otherwise determine, a candidate for the degree shall pursue his or her approved course of study for a period of not less than two years and not more than four years from the date of his or her candidature in the case of a full-time candidate or eight years in the case of part-time and external candidates.
- 7 The Faculty may permit a candidate to pursue his or her research at such place or places outside the University as it thinks fit.
- 8 A candidate shall give the Registrar one month's notice in writing of his intention to submit his/her thesis and shall give particulars of any other work which he/she desires to submit in support of his thesis. The Faculty may permit the submission of such work if in its opinion it may conveniently be examined along with the thesis.
- 9 The candidate shall lodge with the Registrar three copies of the work prepared in accordance with the directions\* given in sub-paragraph (b) of clause 2B of Chapter XXV of the Statutes. If the work is accepted for the degree the Registrar shall transmit two of the copies to the University Library.
- 10 The faculty shall nominate examiners of the thesis of whom at least one shall be an external examiner. The Faculty may require the candidate to submit for examination upon the subject of his or her thesis and matters related thereto.

- 11 After the examiners' reports have been considered the Faculty may recommend that the candidate:
- (a) be awarded the degree; or
  - (b) be awarded the degree on the satisfactory completion of an examination on the subject of his or her thesis and matters related thereto; or
  - (c) be not awarded the degree, but be allowed to revise and re-submit his or her thesis (within such period as the Faculty may allow); or
  - (d) be not awarded the degree and be not allowed to re-submit his or her thesis.
- 16 After the examiners' reports have been considered the Faculty may recommend that the candidate:
- (a) be awarded the degree; or
  - (b) be awarded the degree on the satisfactory completion of an examination on the subject of his/her work and matters related thereto; or
  - (c) be not awarded the degree.
- 17 Notwithstanding the provisions of the preceding regulations, the Council may, on the recommendation of the Faculty, admit to the degree any person other than a member of the staff of the University. Any such recommendation shall be accompanied by evidence that the person has made an original and substantial contribution to knowledge.

### Regulations concerning admission to the degree by previously published work.

- 12 Any person who satisfies the requirements of Regulation 1 hereof may seek the permission of the Faculty to submit, as evidence that he or she is a fit and proper person to receive the degree, work or papers previously published by him.
- 13 Any person who seeks the permission of the Faculty under Regulation 12 hereof shall apply in writing to the Registrar giving particulars of the work which he or she proposes to submit together with a curriculum vitae. The Faculty shall refer the matter to a committee which shall enquire into it and make recommendations to the Faculty. The Faculty may refuse to grant the permission sought or it may, if it entertains serious doubts about the suitability of the work which the applicant proposes to submit, advise him or her of its doubts and request him to reconsider his or her application.
- 14 The candidate shall lodge with the Registrar three copies of the work prepared in accordance with the directions\* given in clause 2B of Chapter XXV of the Statutes. If the work is accepted for the degree the Registrar shall transmit two of the copies to the University Library.
- 15 The Faculty shall nominate examiners of the work of whom at least one shall be an external examiner. The Faculty may require the candidate to submit himself for examination upon the subject of his work and matters related thereto.

Regulations allowed 21 December 1967.

Amended: 15 Jan. 1976: 17; 8 Feb. 1979: 6; 4 Feb. 1982: 5, 8, 9, 13, 14; 1 March 1984: 3,6.

## Regulations

### Of Awards in the Faculty of Performing Arts

- 1 In the Faculty of Performing Arts there shall be the following awards:
  - Certificate of Aboriginal Studies in Music
  - Advanced Certificate of Aboriginal Studies in Music
  - Associate Diploma in Aboriginal Studies in Music
  - Associate Diploma in Music
  - Associate Diploma in Music (Jazz)
  - Ordinary degree of Bachelor of Arts (Drama Studies)
  - Ordinary degree of Bachelor of Music (New)
  - Bachelor of Arts (Dance)
  - Honours degree of Bachelor of Arts (Drama Studies)
  - Honours degree of Bachelor of Music (New)
  - Graduate Diploma in Conducting\*
  - Graduate Diploma in Educational Theatre
  - Graduate Diploma in Intercultural Music
  - Graduate Diploma in Jazz Performance
  - Graduate Diploma in Music Education
  - Graduate Diploma in Music Performance
  - Graduate Diploma in Music Theory
  - Graduate Diploma in Musicology
  - Graduate Diploma in Piano Pedagogy\*
  - Graduate Diploma in Radio Broadcasting Studies\*
  - Master of Arts (Drama Studies)\*
  - Master of Arts (Educational Theatre)
  - Master of Music
  - Master of Music (Performance)
  - Master of Music Theory

- 2 The courses for the awards listed in Regulation 1 shall be governed by the General Course Rules that the Council shall prescribe from time to time.
- 3 The syllabuses of subjects shall be specified by the Council.

Regulations effective from 1 August 1994.

\* Awaiting approval and confirmation.

notes (not forming part of the Regulations)

- 1 Council has delegated the power to approve minor changes to the General Course Rules to the Deputy Vice-Chancellor (Academic).
- 2 Council has delegated the power to approve minor changes to the Specific Course Rules to the Deans of Faculties.
- 3 Council has delegated the power to specify syllabuses to the Head of each department or centre concerned, such syllabuses to be subject to approval by the Faculty or by the Dean on behalf of the Faculty. The Head of department or centre may approve minor changes to any previously approved syllabus.
- 4 The Faculty also offers a Doctor of Music (D.Mus.) Higher doctorates are governed by their own sets of Regulations as printed in this volume of the Calendar.

## Associate Diploma in Aboriginal Studies in Music

## Associate Diploma of Music

## Associate Diploma of Music (Jazz)

## Bachelor of Arts (Dance)

## Bachelor of Arts (Drama Studies)

## Bachelor of Music (New)

The above awards have been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar.

As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

### Specific Course Rules

---

#### 1 Admission requirements

The Associate Diploma in Aboriginal Studies in Music

- 1.1 (a) The Associate Diploma in Aboriginal Studies in Music is intended for Aboriginal and Torres Strait Islander people only.
- (b) Admission to any of this course of study shall be determined on the basis of (1) musical experience, ability and potential, (2) maturity, and (3) motivation. These will be assessed by written submission, interview, and audition.
- (c) An applicant will not be permitted to defer an offer to the course.

Associate Diploma of Music

- 1.2 (a) Admission to the course of study for the Associate Diploma of Music shall be determined primarily on academic merit and aptitude for practical work in classical performance. All applicants shall be auditioned prior to admission and shall be ranked, for selection purposes, in order of their audition and interview results and in order of the selection score from satisfactory completion of Year 12.
- (b) An applicant will not be permitted to defer an offer to the course.

Associate Diploma of Music (Jazz)

- 1.3 (a) Admission to the course of study for the degree of Associate Diploma of Music (Jazz) shall be determined primarily on academic merit and aptitude for practical work in Jazz. All applicants shall be auditioned prior to admission and shall be ranked, for selection purposes, in order of their audition and interview results and in order of the selection score from satisfactory completion of Year 12.
- (b) An applicant will not be permitted to defer an offer of admission to the course.

Bachelor of Arts (Dance)

- 1.4 (a) Admission to the course of study for the degree of Bachelor of Arts (Dance) shall be determined primarily on academic merit, and aptitude for practical work in Dance. All applicants shall be auditioned prior to admission and shall be ranked, for selection purposes, in order of their audition and interview results and in order of the selection score from satisfactory completion of Year 12.
- (b) An applicant will not be permitted to defer an offer of admission to the course.

### Bachelor of Arts (Drama Studies)

- 1.5 (a) Admission to the course of study for the degree of Bachelor of Arts (Drama Studies) shall be determined primarily on academic merit, and aptitude for practical work in Drama. All applicants shall be auditioned prior to admission and shall be ranked, for selection purposes, in order of their audition and interview results and in order of the selection score from satisfactory completion of Year 12.
- (b) An applicant will not be permitted to defer an offer of admission to the course.

### Bachelor of Music (New)

- 1.6 (a) Admission to the course of study for the degree of Bachelor of Music shall be determined on the basis of academic merit and musical performance. All applicants shall be auditioned prior to admission and shall be ranked, for selection purposes, in order of their audition results and in order of the selection score from satisfactory completion of Year 12.
- (b) A candidate will not be permitted to defer an offer of admission to the course.

## 2 Duration of courses

- 2.1 The course of study for the Associate Diploma in Aboriginal studies in Music shall normally extend over three academic years of full-time study or the equivalent.
- 2.2 The course of study for the Associate Diploma in Music shall occupy two years of full-time study or the equivalent.
- 2.3 The course of study for the Associate Diploma in Music (Jazz) shall occupy two years of full-time study or equivalent.
- 2.4 The course for the Ordinary degree of Bachelor of Arts (Dance) shall occupy three years of full-time study or equivalent.
- 2.5 The course of study for the Ordinary degree of Bachelor of Arts (Drama Studies) shall extend over three academic years and that for the Honours degree over four academic years of full-time study or equivalent. Details and requirements for the Honours degree are provided in 10 below.
- 2.6 The course of study for the Ordinary degree of Bachelor of Music (New) shall extend over three academic years and that for the Honours degree over four academic years of full-time study or equivalent. Details and requirements for the Honours degree are provided in 11 below.

## 3 Assessment and examinations

- 3.1 A candidate shall not be eligible to present for examination unless the prescribed classes have been regularly attended, and the written, practical or other work required has been completed to the satisfaction of the teaching staff concerned.
- 3.2 In determining a candidate's final result in a subject the examiners may take into account oral, written, practical and examination work, provided that the candidate has been given adequate notice at the commencement of the teaching of the subject of the way in which work will be taken into account and of its relative importance in the final result.
- 3.3 There shall be four classifications of pass in the final assessment of any subject for the undergraduate awards offered by the Faculty of Performing Arts: Pass with High Distinction, Pass with Distinction, Pass with Credit, and Pass.
- If the Pass classification be in two divisions, a pass in the higher division may be prescribed in the syllabuses as a pre-requisite for admission to further studies in that subject or to other subjects.
- 3.4 A candidate who fails a subject, or who obtains a lower division pass and who desires to take that subject again shall, unless exempted wholly or partially therefrom by the Faculty, again complete the required work in that subject to the satisfaction of the teaching staff concerned.
- 3.5 A candidate who has twice failed the examination in any subject for the course in which the candidate is enrolled may not enrol for that subject again or for any other subject which in the opinion of the Faculty of Performing Arts contains a substantial amount of the same material, except by special permission of the Faculty and then only under such conditions as the Faculty may prescribe.
- 3.6 A candidate who is not granted permission to sit for an examination, or who does not attend all or part of the examination after having attended substantially the full course of instruction in that subject, shall be deemed to have failed the examination.

## 4 Course of study: Associate Diploma in Aboriginal Studies in Music

- 4.1 The subjects listed for each level under Specific Course Rule 4.5 below need not all be taken in one and the same year. A candidate who has satisfied the pre-requisite requirements for

enrolment in later level subjects may so enrol before completing all the subjects of the preceding level.

4.2 The requirements for each subject must normally be completed in one year of study. The Faculty may permit a candidate to complete the requirements of a subject over a period of two years on such conditions as it may determine.

4.3 Except where otherwise determined by the Faculty, a candidate who is eligible in any year to enrol in 3595 First Practical Music Study I (and II and III) and who fails to do so, and who wishes to enrol in one of these subjects in a subsequent year, shall be required to attend an audition and to reach a minimum audition standard for enrolment in the subject in question before being authorised to so enrol.

4.4 Candidates must obtain the approval of the Dean of the Faculty of Performing Arts, or nominee, for the proposed subjects of study and are required to take part in the general practical and performance work of the Centre for Aboriginal Studies in Music.

4.5 To qualify for the Associate Diploma candidates shall satisfactorily complete the requirements for subjects listed below:

code	subject title	points
------	---------------	--------

**Level I**

2450	Aural/Rhythm I	1
2931	Ethnomusicology (CASM) I	3
3595	First Practical Music Study I	4
8224	General Studies I	2
7720	Performance (New) I	3
4326	Practical Elective I	2
5319	Pitjantjatjara Singing I	3
9177	Study Skills I	1
9322	Style Studies (New) I	2
3562	Theory of Music I	3

**Level II**

(a) *either*

6757	Ethnomusicology (CASM) IIA	3
2524	First Practical Music Study IIA	4
7771	Performance (New) IIA	4
5308	Style Studies (New) IIA	2
8476	Theory of Music IIA	3

or

9825	Ethnomusicology (CASM) IIB	3
2802	First Practical Music Study IIB	4
7483	Performance (New) IIB	
8012	Style Studies (New) IIB	2
5063	Theory of Music IIB	3

(b) *and*

4891	Aural/Rhythm II	1
9325	General Studies II	2
3342	Practical Elective II	2
8542	Pitjantjatjara Singing II	3

**Level III**

(a) *either*

3313	Ethnomusicology (CASM) IIIA	4
5352	First Practical Music Study IIIA (New)	4
9249	Performance (New) IIIA	4
5583	Style Studies (New) IIIA	2
6851	Theory of Music IIIA	4

or

3017	Ethnomusicology (CASM) IIIB	4
2362	First Practical Music Study IIIB (New)	4
4283	Performance (New) IIIB	4
4150	Style Studies (New) IIIB	2
5786	Theory of Music IIIB	4

(b) *and*

3051	Aural/Rhythm III	1
3508	General Studies III	3
4427	Practical Elective III	2

4.6 A candidate who satisfactorily completes all of the requirements of Level I of the course, but does not wish to proceed may be awarded, upon application the Certificate in Aboriginal Studies in Music.

4.7 A candidate who satisfactorily completes all of the requirements of Level I and II of the course, but does not wish to proceed may be awarded, upon application the Advanced Certificate in Aboriginal Studies in Music.

4.8 A candidate who holds the Certificate in Aboriginal Studies in Music or the Advanced Certificate in Aboriginal Studies in Music shall surrender the Certificate before being admitted to the Associate Diploma.

## 5 Course of study: Associate Diploma of Music

5.1 The subjects listed for each level under Specific Course Rule 5.4 need not be taken in one and the same year. A candidate who has satisfied the pre-requisite requirements for enrolment in later level subjects may enrol before completing all the subjects of the preceding level or levels.

5.2 Subjects in one semester must be completed within that same semester.

5.3 Candidates must obtain the approval of the Dean of the Faculty of Performing Arts, or the nominee of the Dean, for the proposed subjects of study and are encouraged to attend and participate in the general practical work of the Faculty.

5.4 To qualify for the Associate Diploma a candidate shall satisfactorily complete the requirements for subjects listed below:

### Performance stream

code	subject title	points
------	---------------	--------

The Performance stream will consist of:

#### Level I

5549	Aural Development I	1
6432	Basic Music Theory I	3
6273	Ensemble Performance I	4
4800	Introduction to Music Literature IA	2
5220	Performance IC	12

Elective subjects from Specific Course Rule 9.7.9 of the B.Mus.(New) course to the value of two points

#### Level II

1222	Aural Development II	1
9090	Ensemble Performance II	4
6636	Introduction to Ethnomusicology IIA	2
3379	Introduction to Music History I	2
1935	Music Theory I	3
<i>or</i>		
7942	Music Theory II	3
3100	Performance II	12

### Music Studies stream

The Music Studies stream will consist of:

#### Level I

5549	Aural Development I	1
1423	Introduction to Ethnomusicology I	1

3379	Introduction to Music History I	2
1268	Introduction to Music Literature I	1
1935	Music Theory I	3
2562	Performance ID	8

Pass in the Level I subjects from Specific Course Rule 8.1 of the degree of Bachelor of Arts to the value of six points.

*and*

Elective subjects from Specific Course Rule 9.7.9 of the B.Mus.(New) course to the value of two points

#### Level II

1222	Aural Development II	1
5355	Early 20th Century Modernism II	2
5384	Music since the 1940s II	2
7642	Music Theory II	3
3396	Performance IIA (New)	8

Pass in Level I subjects from Specific Course Rule 8.1 of the degree of Bachelor of Arts to the value of 6 points or an approved first year subject or 4650 Music Education IM (New) and an elective subject from Specific Course Rule 9.7.9 to the value of 2 points

*or*

Pass in the Level II subjects from Specific Course Rule 8.5 of the degree of Bachelor of Arts to the value of eight points.

notes (not forming part of the Specific Course Rules)

#### Work required to complete an Adelaide Diploma

To qualify for an award of the Associate Diploma, a candidate granted status under General Course Rule 1.4.20 must, except in special cases approved by the Faculty, complete all the work of the Level II of the prescribed course while attending the Elder Conservatorium and the Department of Music Studies.

## 6 Course of study: Associate Diploma of Music (Jazz)

### 6.1 Introductory remarks

The Associate Diploma of Music (Jazz) provides a programme of study for the performing musician who already possesses satisfactory technical skills.

The course aims to develop the student's potential for jazz performance, composition and arranging, while providing a thorough knowledge of the theoretical and historical aspects of jazz. Any instrument or voice may be studied.

This course provides training in professional jazz and popular music performance, introducing students to the various styles of jazz ranging from New Orleans to contemporary, and providing them with a thorough knowledge of the theoretical and historical aspects of jazz.

#### Entry requirements

The normal entry requirements for this course are a satisfactory audition on the applicant's principal instrument and the successful completion of South Australian Year 12 studies or the interstate/overseas equivalent.

People who have previously undertaken post-secondary study or who have special circumstances may also apply. They should give full details of their circumstances on the application form.

Selection is based mainly on the audition. However, Year 12 results or the equivalent are also taken into account by the Selection Committee.

#### Note on attendance

There are specific attendance requirements for all Faculty of Performing Arts programs. In particular, students are expected to attend all classes, lectures or ensemble sessions and this requires students to provide reasonable explanations for, or proper notification of, failure to attend. Students who do not comply with these requirements may be failed in a given unit. Full details on attendance requirements are available from the course adviser and lecturers.

- 6.2 The subjects listed for each level under Specific Course Rule 6.5 below need not all be taken in one and the same year. A candidate who has satisfied the pre-requisite requirements for enrolment in later level subjects, may so enrol before completing all the subjects of the preceding level or levels.
- 6.3 Subjects taught in one semester must be completed within that semester.
- 6.4 Candidates must obtain the approval of the Dean of the Faculty of Performing Arts or the nominee of the Dean, for the proposed subjects of study, and are encouraged to attend and participate in the general practical work of the Faculty.
- 6.5 To qualify for the Associate Diploma a candidate shall satisfactorily complete the requirements for subjects listed below:

#### Level I

7705 Aural Training IM	2
4391 Improvisation I	4
1782 Jazz Performance I	6
3424 Jazz Piano Class I	2
5451 Jazz Styles	2
2107 Jazz Theory I	2
5889 Large Jazz Ensemble I	2
1952 Small Jazz Ensemble I (New)	4

#### Level II

1930 Aural Training IIM	2
8148 Improvisation II	4
1212 Jazz Arranging	2
7533 Jazz Performance II	6
1433 Jazz Piano Class II	2
2008 Jazz Theory II	2
4557 Large Jazz Ensemble II	2
3457 Small Jazz Ensemble II (New)	4

notes (not forming part of the Specific Course Rules)

#### Work required to complete an Adelaide Diploma

To qualify for the award of the Associate Diploma a candidate granted status under General Course Rule 1.4.20 must, except in special cases approved by the Faculty, complete all the work of the Level II of the prescribed course while attending the Elder Conservatorium.

### 7 Course of study: Bachelor of Arts (Dance)

- 7.1 The subjects listed for each level under 7.4 need not all be taken in one and the same year. A candidate who has satisfied the pre-requisite requirements for enrolment in later level subjects, may so enrol before completing all the subjects of the preceding level or levels.
- 7.2 Subjects taught in one semester must be completed within that semester.
- 7.3 Candidates must obtain the approval of the Dean of the Faculty of Performing Arts or the nominee of the Dean, for the proposed subjects of study, and are encouraged to attend and participate in the general practical work of the Faculty.
- 7.4 To qualify for the Ordinary degree, a candidate shall satisfactorily complete the requirements for subjects listed below:

Performing Arts — Associate Diplomas and Bachelor degrees

- (1) Pass in the following subjects:
- |   |   |   |   |

notes (not forming part of the Specific Course Rules)

**Work required to complete an Adelaide degree**

To qualify for the award of the degree of Bachelor or Arts (Dance) a candidate granted status under General Course Rule 1.4.20 must, except in special cases approved by the Faculty, complete all the work of the final Level of the prescribed course while attending the Department of Dance.

**8 Course of study: Bachelor of Arts (Drama Studies)**

- 8.1 There shall be an Ordinary degree and an Honours degree (see section 10 Course of Study: The Honours degree of Bachelor of Arts (Drama Studies)). A candidate may obtain either degree or both.
- 8.2 The subjects listed for each level under 8.5 below need not all be taken in one and the same year. A candidate who has satisfied the pre-requisite requirements for enrolment in later level subjects, may so enrol before completing all the subjects of the preceding level or levels.
- 8.3 Subjects taught in one semester must be completed within that semester.
- 8.4 Candidates must obtain the approval of the Dean of the Faculty of Performing Arts or the nominee of the Dean, for the proposed subjects of study, and are encouraged to attend and participate in the general practical work of the Faculty.
- 8.5 To qualify for the Ordinary degree a candidate shall satisfactorily complete the requirements for subjects listed below:

**Level I**

- (1) Pass in the following subjects:
  - 4429 Foundations of Modern Theatre I 3
  - 6120 Improvisation and Voice IA 3
  - 1631 History of European Theatre I 3
  - 5147 Improvisation, Principles and Practice IB 3
  - 6394 Technical Theatre Studies I 3
  - 1931 Voice and Interpretation IB 3

- (2) Pass in subjects to the value of six points from:

Level I subjects from Specific Course Rule 8.I of the degree of Bachelor of Arts

or

Level I subjects from Specific Course Rule 4.2 of the degree of Bachelor of Science (Mathematical and Computer Sciences)

or

Level I subjects from Specific Course Rule 7 of the degree of Bachelor of Science

or

Level I subjects from Specific Course Rule 10 of the degree of Bachelor of Music

or

Level I subjects from Specific Course Rule 3.1 of the degree of Bachelor of Economics

or

Level I subjects from Specific Course Rule 7.2 of the degree of Bachelor of Labour Studies

or

Level I subjects from Specific Course Rule 7 of the degree of Bachelor of Arts (Dance)

or

Level I subjects from Specific Course Rule 4.5 of the degree of Bachelor of Design Studies

or

- 1378 Classical Ballet for Non-Majors 1
- 6606 Hatha Yoga I 1
- 6442 Modern Dance for Non-Majors 1

note: The permission to present subjects from other faculties is subject to the approval of the relevant faculty. Some subjects will be subject to quota and therefore not always available.

**Level II**

- (1) Pass in either
  - 8018 Contemporary Australian Drama II 4

or

- 8222 Themes in Australian Drama II 4

- (2) Pass in subjects to the value of 12 points from:

- 3302 Arts Administration II 4
- 7781 Asian Theatre II 4
- 2256 Improvisation and the Absurd IIA 4
- 9638 Improvisation and the Epic IIB 4
- 2765 Voice and Interpretation IIA 4
- 2760 Voice and Interpretation IIB 4

- (3) Pass in subjects to the value of eight points from:

Level II subjects from Specific Course Rule 8.5 of the degree of Bachelor of Arts

or

Level II subjects from Specific Course Rule 4.2 of the degree of Bachelor of Science (Mathematical and Computer Sciences)

or

Level II subjects from Specific Course Rule 7 of the degree of Bachelor of Science

or

Level II subjects from Specific Course Rule 10 of the degree of Bachelor of Music

or

Level II subjects from Specific Course Rule 3.1 of the degree of Bachelor of Economics

or

Level II subjects from Specific Course Rule 7.1 of the degree of Bachelor of Labour Studies

or

Level II subjects from Specific Course Rule 7 of the degree of Bachelor of Arts (Dance)

or

Level II subjects from Specific Course Rule 4.5 of the degree of Bachelor of Design Studies

or

Subjects not previously presented from Level II and not exceeding 8 points in value.

note: The permission to present subjects from other faculties is subject to the approval of the relevant faculty. Some subjects will be subject to quota and therefore not always available.

### Level III

- (1) Pass in subjects to the value of 12 from:

4805 Asian Theatre III	6
9817 Directing Studies IIIA	6
6039 Directing Studies IIIB	6
9496 Performance Studies IIIA	6
5273 Performance Studies IIIB	6

8304 Voice and Interpretation IIIA 6

8681 Voice and Interpretation IIIB 6

4608 Writing for Performance IIIA 6

7846 Writing for Performance IIIB 6

- (2) Pass in subjects to the value of 12 points from:

Level III subjects from Specific Course Rule 8.9 of the degree of Bachelor of Arts

or

Level III subjects from Specific Course Rule 4.3 of the degree of Bachelor of Science (Mathematical and Computer Sciences);

or

Level III subjects from Specific Course Rule 7 of the degree of Bachelor of Science;

or

Level III subjects from Specific Course Rule 10 of the degree of Bachelor of Music;

or

Level III subjects from Specific Course Rule 3.1 of the degree of Bachelor of Economics;

or

Level III subjects from Specific Course Rule 7.2 of the degree of Bachelor of Labour Studies;

or

Level III subjects from Specific Course Rule 7 of the degree of Bachelor of Arts (Dance);

or

Level III subjects from Specific Course Rule 4.5 of the degree of Bachelor of Design Studies;

or

subjects not previously presented from Level III or subjects not previously presented from Level II not exceeding six points in value.

or

any combination of the above with the permission of the Head of Department to the value of 12 points.

note: The permission to present subjects from other faculties is subject to the approval of the relevant faculty. Some subjects will be subject to quota and therefore not always available.

notes (not forming part of the Specific Course Rules)

**1 Work required to complete an Ordinary degree**

To qualify for the award of the degree of Bachelor of Arts (Drama Studies) a candidate granted status under General Course Rule 1.4.20 must, except in special cases approved by the Faculty, complete all the work of the final Level of the prescribed course while attending the Department of Drama.

2 Students intending to undertake studies towards a Graduate Diploma in Education are advised to undertake at Level I, II, and III subjects in the Faculty of Arts as specified under Level I (2) and Level II (3) above in order to obtain a second specialisation for the diploma.

**9 Course of study: the Ordinary degree of Bachelor of Music (New)**

9.1 There shall be an Ordinary degree and an Honours degree of Bachelor of Music (New) (for details of the Honours degree see 11 below).

9.2 The course for the Ordinary degree of Bachelor of Music (New) may be taken with a major study in Performance on an instrument or voice, or in Composition, Ethnomusicology, Jazz Performance, Music Education or Musicology.

9.3 The subjects listed for each level under 9.7 below need not all be taken in one and the same year. A candidate who has satisfied the pre-requisite requirements for enrolment in later level subjects may so enrol before completing all the subjects of the preceding level or levels.

9.4 The requirements for subjects taught over a full year are expected to be completed in one year of study. The Faculty may permit a candidate to complete the requirements of such a subject over a period of two years on such conditions as it may determine. Subjects taught in one semester must be completed within that semester.

9.5 Except where otherwise determined by the Faculty, a candidate who is eligible in any year to enrol in Performance subjects and who fails to do so, and who wishes to enrol in one of these subjects in a subsequent year, shall be required to attend an audition and to reach a minimum audition standard for enrolment in the subject in question before being authorised to enrol in that subject.

9.6 Candidates must obtain the approval of the Dean of the Faculty of Performing Arts, or the nominee of the Dean, for the proposed subjects of study.

9.7 To qualify for the Ordinary degree a candidate shall satisfactorily complete the requirements for subjects listed below and those subjects listed in any one of 9.7.1 to 9.7.9. Subjects to a total

value of 72 points must be presented. At least 20 points shall comprise Level III subjects. No student shall gain credit for a subject more than once.

**9.7.1 Composition**

Candidates shall satisfactorily complete the following subjects:

**Level I**

5549 Aural Development I	1
7349 Composition Studies I	6
3353 Counterpoint IA	2
1268 Introduction to Music Literature I	1
3130 Instruments for Composers I	2
1423 Introduction to Ethnomusicology I	1
3379 Introduction to Music History I	2
1041 Music Technology I	2
1935 Music Theory I	3
7231 Technical Studies in Composition I	4

**Level II**

1222 Aural Development II	1
5797 Composers' Workshop II	2
1548 Composition Studies II	6
5355 Early Twentieth Century Modernism II	2
5384 Music Since the 1940s II	2
7642 Music Theory II	3
7736 Orchestration Workshop II	2
7960 Technical Studies in Composition II	4

and Ensemble and Music Studies Electives selected from 9.7.9 below to complete a full load of 24 points.

**Level III**

4862 Composition Studies III	6
3035 Composers' Workshop III	2
8661 Harmony Workshop III	2
7564 Technical Studies in Composition III	4
<i>and one or two of the following:</i>	
3408 American Pathfinders in Music III	2
3392 Chinese Music III	2
3122 Composition in Australia III	2
8945 Diaghilev's 'Ballets Russes' III	2
4377 Jazz History III	2

3724 French Music of the Fourteenth Century III 2

7003 High Renaissance Franco-Flemish Composers III 2

and Ensemble and Music Studies Electives selected from 9.7.9 to complete a full load of 24 points.

note: Composition students may not take Performance subjects at Level I, II or III. Ensemble subjects from clause 9.7.9. may be available at the discretion of the Director.

### 9.7.2 Jazz

Candidates shall satisfactorily complete the following subjects:

#### Level I

5549 Aural Development I 1

1268 Introduction to Music Literature I 1

1423 Introduction to Ethnomusicology I 1

7320 Jazz Theory I (New) 3

5839 Jazz Keyboard I 2

5889 Large Jazz Ensemble I 2

and either

7321 Improvisation I (New) 3

1569 Jazz Ensemble Small I 3

1662 Performance I (Jazz) 8

or

6421 Jazz Workshop IA 4

7617 Performance IB (Jazz) 6

and Ensemble and Music Studies Electives selected from 9.7.9 to complete a full load of 24 points.

#### Level II

1222 Aural Development II 1

2008 Jazz Theory II 2

1212 Jazz Arranging II 2

5021 Jazz Keyboard II 1

5451 Jazz Styles (Listening and Analysis) 2

4557 Large Jazz Ensemble II 2

and either

9314 Improvisation II (New) 3

8010 Performance II (Jazz) 8

4602 Small Jazz Ensemble II 3

or

9641 Jazz Workshop II 4

7558 Performance IIB (Jazz) 6

and Ensemble and Music Studies Electives selected from 9.7.9 to complete a full load of 24 points.

#### Level III

5915 Australian Music III 1

4838 Jazz Theory III 3

3382 Jazz Arranging III 2

4377 Jazz History III 2

8964 Large Jazz Ensemble III 2

and either

8075 Improvisation III 3

3395 Jazz Ensemble Small III 3

7054 Performance III (Jazz) 8

or

1459 Jazz Workshop III 4

7268 Performance IIIB (Jazz) 6

and Ensemble and Music Studies Electives selected from 9.7.9 to complete a full load of 24 points.

### 9.7.3 Music Education

Candidates shall satisfactorily complete the following subjects:

#### Level I

5549 Aural Development I 1

1268 Introduction to Music Literature I 1

1423 Introduction to Ethnomusicology I 1

3379 Introduction to Music History I 2

6520 Large Ensemble Experience I 2

1935 Music Theory I 3

4650 Music Education IM (New) 6

either one of

1187 Performance IB (Brass) 6

1877 Performance IB (Cross-Cultural Performance) 6

5697 Performance IB (Electric Keyboard) 6

2324 Performance IB (Guitar) 6

7555 Performance IB (Harp) 6

5933 Performance IB (Harpsichord) 6

7617 Performance IB (Jazz) 6

4372 Brass Ensemble II	2
5355 Early Twentieth Century Modernism II	2
6358 Large Ensemble (Wind) II	2
5384 Music Since the 1940s II	2
7642 Music Theory II	3
1196 Performance II (Brass)	10
<i>and one of:</i>	
7880 Chamber Music II	2
3839 Contemporary Music Ensemble II	2
7325 Early Music Workshop II	2
4557 Large Jazz Ensemble II	2

**Level III**

5915 Australian Music III	1
7698 Brass Ensemble III	2
2705 Large Ensemble (Wind) III	2
4851 Music Theory III	3
2374 Performance III (Brass)	10
<i>and one of:</i>	
9050 Chamber Music III	2
4138 Contemporary Music Ensemble III	2
6252 Early Music Workshop III	2
8964 Large Jazz Ensemble III	2

Performing Arts — Associate Diplomas and Bachelor degrees

and one or two of the following subjects:

3408 American Pathfinders in Music III	2
3392 Chinese Music III	2
3122 Composition in Australia III	2
8945 Diaghilev's 'Ballet Russes' III	2
4377 Jazz History III	2
3724 French Music of the Fourteenth Century III	2
7003 High Renaissance Franco-Flemish Composers III	2

and Ensemble and Music Studies Electives selected from 9.7.9 to complete a full load of 24 points.

9.7.6 Performance: Percussion, Strings, Woodwind

Candidates shall satisfactorily complete the following subjects:

**Level I**

5549 Aural Development I	1
1268 Introduction to Music Literature I	1
1423 Introduction to Ethnomusicology I	1
3379 Introduction to Music History I	2
1935 Music Theory I	3

and either

9300 Large Ensemble (Wind) I	2
4460 Performance I (Percussion)	12
3665 Percussion Ensemble I	2

or

9300 Large Ensemble (Wind) I	2
7086 Performance I (Woodwind)	12

and one of:

3269 Chamber Music I	2
5187 Contemporary Music Ensemble I	2
6468 Early Music Workshop I	2

or

3269 Chamber Music I	2
5965 Orchestra I	2
5000 Performance I (Strings)	12

**Level II**

1222 Aural Development II	1
5355 Early Twentieth Century Modernism II	2

5384 Music Since the 1940s II	2
7642 Music Theory II	3

and either:

6358 Large Ensemble (Wind) II	2
1896 Performance II (Percussion)	12
4717 Percussion Ensemble II	2

or

6358 Large Ensemble (Wind) II	2
4042 Performance II (Woodwind)	12

and one of:

7880 Chamber Music II	2
3839 Contemporary Music Ensemble II	2
7325 Early Music Workshop II	2

or

7880 Chamber Music II	2
6902 Orchestra II	2
5463 Performance II (Strings)	12

**Level III**

5915 Australian Music III	1
4851 Music Theory III	3

One or two of the following subjects:

3408 American Pathfinders in Music III	2
3392 Chinese Music III	2
3122 Composition in Australia II	2
8945 Diaghilev's 'Ballets Russes' III	2
4377 Jazz History III	2
3724 French Music of the Fourteenth Century III	2
7003 High Renaissance Franco-Flemish Composers III	2

and either:

2705 Large Ensemble (Wind) III	2
6786 Performance III (Percussion)	12
8677 Percussion Ensemble III	2

or

2705 Large Ensemble (Wind) III	2
5580 Performance III (Woodwind)	12

and one of:

9050 Chamber Music III	2
4138 Contemporary Music Ensemble III	2
6252 Early Music Workshop III	2

Performing Arts — Associate Diplomas and Bachelor degrees

*or*

9050 Chamber Music III	2
8163 Orchestra III	2
7903 Performance III (Strings)	12

*and*

Ensemble and Music Studies Electives selected from 9.7.9 to complete a full load of 24 points.

9.7.7 Performance: Guitar, Harp, Keyboard

Candidates must satisfactorily complete the following subjects:

**Level I**

5549 Aural Development I	1
1268 Introduction to Music Literature I	1
1423 Introduction to Ethnomusicology I	1
3379 Introduction to Music History I	2
1935 Music Theory I	3

*and either:*

9012 Performance I (Guitar)	12
-----------------------------	----

*and one of:*

3269 Chamber Music I	2
5187 Contemporary Music Ensemble I	2
6468 Early Music Workshop I	2
8784 Large Vocal Ensemble I	2

and Ensemble and Music Studies Electives selected from clause 9.7.9 to complete a full load of 24 points

*or*

8752 Performance I (Harp)	12
---------------------------	----

*and one of:*

3269 Chamber Music I	2
6468 Early Music Workshop I	2
5187 Contemporary Music Ensemble I	2
8784 Large Vocal Ensemble I	2
5965 Orchestra I	2

and Ensemble and Music Studies Electives selected from 9.7.9 to complete a full load of 24 points

*or*

2716 Performance I (Harpsichord)	12
----------------------------------	----

and Ensemble and Music Studies Electives selected from 9.7.9 to complete a full load of 24 points

*or*

4744 Performance I (Organ)	12
----------------------------	----

and Ensemble and Music Studies Electives selected from 9.7.9 to complete a full load of 24 points

*or*

1659 Performance I (Pianoforte)	12
3357 Piano Accompaniment	2

and Ensemble and Music Studies Electives selected from 9.7.9 to complete a full load of 24 points

**Level II**

1222 Aural Development II	1
5355 Early Twentieth Century Modernism II	2
5384 Music Since the 1940s II	2
7642 Music Theory II	3

*and either:*

7693 Performance II (Guitar)	12
------------------------------	----

*and one of:*

7880 Chamber Music II	2
3839 Contemporary Music Ensemble II	2
7325 Early Music Workshop II	2
8463 Large Vocal Ensemble II	2

and Ensemble and Music Studies Electives selected from 9.7.9 to complete a full load of 24 points

*or*

6292 Performance II (Harp)	12
----------------------------	----

*and one of:*

7880 Chamber Music II	2
3839 Contemporary Music Ensemble II	2
7325 Early Music Workshop II	2
8463 Large Vocal Ensemble II	2
6902 Orchestra II	2

and Ensemble and Music Studies Electives selected from 10.10 to complete a full load of 24 points

*or*

7565 Performance II (Harpsichord)	12
-----------------------------------	----

and Ensemble and Music Studies Electives selected from 9.7.9 to complete a full load of 24 points

or

7795 Performance II (Organ) 12

and Ensemble and Music Studies Electives selected from 9.7.9 to complete a full load of 24 points

or

3269 Chamber Music I 2

3273 Performance II (Pianoforte) 12

and Ensemble and Music Studies Electives selected from 9.7.9 to complete a full load of 24 points

**Level III**

5915 Australian Music III 1

4851 Music Theory III 3

*one or two of the following subjects:*

3408 American Pathfinders in Music III 2

3392 Chinese Music III 2

3122 Composition in Australia III 2

8945 Diaghilev's 'Ballets Russes' III 2

4377 Jazz History III 2

3724 French Music of the Fourteenth Century III 2

7003 High Renaissance Franco-Flemish Composers III 2

*and either:*

9327 Performance III (Guitar) 12

*and one of:*

9050 Chamber Music III 2

4138 Contemporary Music Ensemble III 2

6252 Early Music Workshop III 2

5106 Large Vocal Ensemble III 2

and Ensemble and Music Studies Electives selected from 9.7.9 to complete a full load of 24 points

or

2470 Performance III (Harp) 12

*and one of:*

9050 Chamber Music III 2

4138 Contemporary Music Ensemble III 2

6252 Early Music Workshop III 2

5106 Large Vocal Ensemble III 2

8163 Orchestra III 2

and Ensemble and Music Studies Electives selected from 9.7.9 to complete a full load of 24 points

or

6935 Performance III (Harp) 12

and Ensemble and Music Studies Electives selected from 9.7.9 to complete a full load of 24 points

or

4037 Performance III (Organ) 12

and Ensemble and Music Studies Electives selected from 9.7.9 to complete a full load of 24 points

or

5972 Performance III (Pianoforte) 12

and Ensemble and Music Studies Electives selected from 9.7.9 to complete a full load of 24 points

**9.7.8 Performance: Voice**

Candidates must satisfactorily complete the following subjects:

**Level I**

5549 Aural Development I 1

1268 Introduction to Music Literature I 1

1423 Introduction to Ethnomusicology I 1

3379 Introduction to Music History I 2

3135 Italian for Singers 2

8784 Large Vocal Ensemble I 2

1935 Music Theory I 3

6664 Performance I (Voice) 10

7609 Stagecraft I 2

**Level II**

1222 Aural Development II 1

5355 Early Twentieth Century Modernism II 2

1933 Keyboard for Singers II 2

5384 Music Since the 1940s II 2

7642 Music Theory II 3

5953 Performance II (Voice) 10

7255 Stagecraft II 2

*together with one of the following not previously presented:*

2260 French for Singers 2

8434 German for Singers

Performing Arts — Associate Diplomas and Bachelor degrees

**Level III**

5915 Australian Music III	1
3269 Chamber Music I	2
851 Music Theory III	3
2881 Performance III (Voice)	10
2093 Stagecraft III	2

together with one of the following not previously presented:

2260 French for Singers	2
6320 German for Singers	2

one or two of the following subjects:

3408 American Pathfinders in Music III	2
3392 Chinese Music III	2
3122 Composition in Australia III	2
3724 French Music of the Fourteenth Century III	2
7003 High Renaissance Franco-Flemish Composers III	2
4377 Jazz History III	2

and Ensemble and Music Studies Electives selected from clause 9.7.9 to complete a full load of 24 points.

note: 8784 Large Vocal Ensemble I and 3269 Chamber Music I may be completed in any year of the course.

**9.7.9 Ensemble and Music Studies Electives**

Candidates must satisfactorily complete the following subjects:

2645 Analysis Workshop III	2
4433 Asian Performance I	1

notes (not forming part of the Specific Course Rules)

**1 Work required to complete the Ordinary degree**

To qualify for the award of the degree of Bachelor of Music (New) a candidate granted status under General Course Rule 1.4.20 must, except in special cases approved by the Faculty, complete all the work of the final Level of the prescribed course while attending the Faculty of Performing Arts.

**2 Availability of subjects and options:**

The Faculty of Performing Arts reserves the right not to offer certain subjects in any particular year. Decisions on which subjects are to be offered will be determined partly by the availability of relevant staff members and partly by the numbers of students who enrol in a subject or option. If the numbers are less than ten then the subject might not be offered.

**3 Candidates undertaking study for the degrees of Bachelor of Music (New) and Bachelor of Arts concurrently:**

Candidates may enrol for the degrees of Bachelor of Music (New) and Bachelor of Arts concurrently if they apply for admission and are admitted to both courses. Candidates already enrolled for the degree of Bachelor of Music (New) wishing to proceed to the degrees of B.Mus. (New) and B.A. concurrently may apply towards the end of their first year in the Faculty of Performing Arts for admission to the B.A. course in the following year.

The Faculty of Performing Arts advises:

- (1) The combined course takes five years of full-time study.
- (2) All of the requirements of the Bachelor of Music (New) course must be completed, together with subjects taken from the Specific Course Rules of the degree of Bachelor of Arts. The minimum Arts requirements to be satisfied are:
  - Level I subjects to the minimum value of 12 points
  - Level II subjects to the minimum value of 16 points
  - Level III subjects to the minimum value of 24 points

Candidates must complete all of the Level III requirements in accordance with Specific Course Rule 8.9 of the degree of Bachelor of Arts.
- (3) The attention of candidates is drawn to the Specific Course Rules of the degree of Bachelor of Arts. No subject may be counted twice towards the degree and two subjects which contain a substantial amount of the same material may not both be counted.
- (4) Candidates should have continuous enrolment in their instrumental or vocal studies. In some cases the performance subjects may be taken over two years with the permission of the Faculty of

Performing Arts. The attention of candidates is drawn to Specific Course Rule 9.4 of the Ordinary degree of Bachelor of Music (New).

- (5) Candidates should complete lower level pre-requisites before commencing higher level subjects.
- (6) Candidates should submit their proposed programs of study in the combined course to Faculty for approval.
- (7) Candidates should note that an enrolment in subjects exceeding a total points value of 24 points per year will result in a course overload. Candidates should be aware of the full implications of their choice to take a course overload.

**4 Unacceptable subject combinations:**

A list of unacceptable subject combinations is available from the Faculty office.

**5 Changing stream:**

Students may change stream by auditioning for the relevant stream or by counting the end of year result for the performance subject. Students should apply to the Director of the Conservatorium and the Head of the Department of Music Studies. Applications to change stream are subject to the approval of the Academic Committee of the Faculty of Performing Arts.

**10 Course of study: The Honours degree of Bachelor of Arts (Drama Studies)**

- 10.1** To qualify for the Honours degree a candidate shall complete the requirements for the Ordinary degree and comply with the provisions of Specific Course Rule 10.
- 10.2** The names of candidates who qualify for the Honours degree shall be published within the following classes and divisions in each subject  
First Class  
Second Class      Division A  
                                 Division B  
Third Class
- 10.3** Candidates may not enrol a second time for the Honours course if they
  - (a) have already qualified for Honours, or
  - (b) have presented for examination, but failed to obtain Honours, or
  - (c) have withdrawn from the Honours course, unless the Faculty on such conditions as it may determine permits re-enrolment.
- 10.4** Before entering upon the requirements for the Honours course a candidate must obtain the approval of the Head of the Department, who will take into account the candidate's academic record up to the time of application. Normally such approval should be sought towards the end

of Level III of the course for the ordinary degree. Before entering the Honours year, candidates for the Honours degree must have qualified for the Ordinary degree, including the subjects appropriate to the area in which it is proposed to undertake Honours Studies.

- 10.5** The work of the Honours year must normally be completed in one year of full-time study. The Faculty may permit a candidate to present the work over a period of not more than two years on such conditions as it may determine.
- 10.6** To qualify for the Honours degree a candidate shall satisfactorily complete the subject 4607 Honours Drama.

**11 Course of study: The Honours degree of Bachelor of Music**

- 11.1** To qualify for the Honours degree a candidate shall complete the requirements for the Ordinary degree and comply with the provisions of Specific Course Rule 11.
- 11.2** The names of candidates who qualify for the Honours degree shall be published within the following classes and divisions in each subject  
First Class  
Second Class      Division A  
                                 Division B  
Third Class
- 11.3** Candidates may not enrol a second time for the Honours course if they have
  - (a) have already qualified for Honours, or
  - (b) have presented for examination, but failed to obtain Honours, or
  - (c) have withdrawn from the Honours course, unless the Faculty on such conditions as it may determine permits re-enrolment.
- 11.4** Before enrolling in the Honours course a candidate must obtain the approval of the Head of the Department, who will take into account the candidate's academic record up to the time of application. Normally such approval should be sought towards the end of Level III of the course for the Ordinary degree. Before entering the Honours year, candidates must have qualified for the Ordinary degree, including Level III subjects in the field in which it is proposed to undertake Honours.
- 11.5** The work of the Honours year shall normally be completed in one year of full-time study. The Faculty may permit a candidate to present the work over a period of not more than two years on such conditions as it may determine.

**11.6** To qualify for the Honours degree a candidate shall satisfactorily complete either one of the following Honours subjects:

9392 Honours Composition

1750 Honours Ethnomusicology

3058 Honours Music Education

9916 Honours Musicology

2103 Honours Performance

or

a combination of the two of these subjects approved by the Faculty. The combination shall include such parts as shall, when combined, be deemed by the Faculty to be equivalent to one subject.

## Associate Diploma in Aboriginal Studies in Music

### Syllabuses

#### 2450 Aural/Rhythm I

*level:* I      *points value:* 1      *duration:* full year

*contact hours:* 1 one hour group session a week

*content:* Aural training in basic rhythmic, melodic, and harmonic structures.

*assessment:* continuous assessment (60%) and 2 examinations, one at the end of each semester (40%)

#### 1527 Directed Study I (CASM)

*level:* I      *points value:* 2      *duration:* full year

*restriction:* Pitjantjatjara Singing I

*contact hours:* as appropriate

*content:* This subject provides an opportunity for students who, for reasons of cultural sensitivity, are not able to study Pitjantjatjara Singing I. Students will undertake a supervised project of personal cultural significance in the area of traditional Aboriginal/Torres Strait Islander music. The project will take the form of any combination of the following: investigation of cultural contexts; notation of music; recording (audio and/ or visual). The content and conduct of the study will be negotiated with the Subject Coordinator, who will also act as supervisor.

*assessment:* assessment will be negotiated with the supervisor and approved by the departmental committee. It will take the form of any combination of written documentation, prepared manuscripts, annotated audio and/or visual recordings, or seminar presentations as appropriate to the topic.

*note:* Students who gain entry to Directed Study (CASM) I will not be permitted to enrol in Pitjantjatjara Singing I.

#### 2931 Ethnomusicology (CASM) I

*level:* I      *points value:* 3      *duration:* full year

*contact hours:* 1 one hour lecture and 1 one hour tutorial a week

*content:* Introduction to principle aims, techniques, and results of ethnomusicology.

*assessment:* regular assignments (60%); and 2 examinations, one at the end of each semester and each of one hour duration (40%)

#### 3595 First Practical Music Study I

*level:* I      *points value:* 4      *duration:* full year

*prerequisites:* audition

*contact hours:* 1 one hour individual lesson a week

*content:* Instrumental or vocal techniques, musicianship and repertoire.

*assessment:* continuous progress reports (60%); and 2 examinations, one at the end of each semester (40%)

#### 8224 General Studies I

*level:* I      *points value:* 2      *duration:* full year

*contact hours:* variable

*content:* A range of topics as diversification and broadening of individual student study programs. A minimum of 4 units a year must be taken (1 unit = 1 half-semester). At the discretion of the Director a student may be credited with units taken outside of CASM; in such cases the Director will also determine the appropriate weighting. See more information on General Studies topics at end of syllabus entries.

*assessment:* determined by the Director

#### 7720 Performance (New) I

*level:* I      *points value:* 3      *duration:* full year

*contact hours:* 4 hours per week

*content:* Instrumental or vocal technique, repertoire and ensemble musicianship.

*assessment:* attendance and participation in ensemble rehearsals and in public workshops and performances

#### 5319 Pitjantjatjara Singing I

*level:* I      *points value:* 3      *duration:* full year

*contact hours:* 66 one hour sessions a year plus a 9 day field trip.

*content:* Styles, beliefs, and attitudes of traditional Aboriginal music, using a public Pitjantjatjara inma (ceremony) as taught by its traditional owners. Instruction in Pitjantjatjara language and related dialects. Field experience and musical exchange in the Pitjantjatjara Lands, centred on inma and other music. (The Director may approve the field trip being taken, instead, as part of the requirements of 8542 Pitjantjatjara Singing II).

*assessment:* report on attitudinal and musical progress from the Pitjantjatjara Senior Lecturer, in consultation with other song owners, at the end of each Semester (60%); and report on cross-cultural skills from the Ethnomusicology Lecturer at the end of each semester (40%).

### 4326 Practical Elective I

*level:* 1     *points value:* 2     *duration:* full year

*contact hours:* One hour a week of instruction.

*content:* Practical introduction to a variety of musical instruments or voice that are different from the student's first practical music study; includes Sound Engineering, Composition, Computer Music, and Songwriting. It is an appropriate introductory unit to 8224 General Studies I or 9325 General Studies II.

*assessment:* determined by the Director

### 9177 Study Skills I

*level:* I     *points value:* 1     *duration:* full year

*contact hours:* 1 one hour tutorial a week

*content:* The development of language and learning skills in a culturally appropriate environment, and the integration of these into course requirements.

*assessment:* continuous assessment

### 9322 Style Studies (New) I

*level:* I     *points value:* 2     *duration:* full year

*content:* Historical and theoretical approach to the following musical styles: traditional and contemporary Aboriginal music; Afro-American music (Blues, Soul, Reggae, etc)

*assessment:* continuous assessment (60%), regular assignments (40%)

### 3562 Theory of Music I

*level:* I     *points value:* 3     *duration:* full year

*contact hours:* 3 one-hour lectures a week.

*content:* Notational elements, basic Western musical concepts and structures.

*assessment:* regular assignments (60%); and 2 one hour examinations, one at the end of each semester (40%)

### 4891 Aural/Rhythm II

*level:* II     *points value:* 1     *duration:* full year

*prerequisites:* 2450 Aural/Rhythm I

*contact hours:* 1 one hour group session a week

*content:* Aural training in advanced rhythmic, melodic, and harmonic structures.

*assessment:* continuous assessment (60%; and 2 examinations, one at the end of each semester (40%)

### 8348 Directed Study II (CASM)

*level:* II     *points value:* 2     *duration:* full year

*prerequisites:* 1527 Directed Study (CASM) I

*restriction:* Pitjantjatjara Singing II

*contact hours:* as appropriate

*content:* This subject provides an opportunity for students who, for reasons of cultural sensitivity, are not able to study Pitjantjatjara Singing II. Students will undertake a supervised project of personal cultural significance in the area of traditional Aboriginal/Torres Strait Islander music. The project will take the form of any combination of the following: investigation of cultural contexts; notation of music; recording (audio and/ or visual). The content and conduct of the study will be negotiated with the Subject Coordinator, who will also act as supervisor. Directed Study (CASM) II projects may extend studies undertaken for Directed Study (CASM) I.

*assessment:* assessment will be negotiated with the supervisor and approved by the departmental committee. It will take the form of any combination of written documentation, prepared manuscripts, annotated audio and/or visual recordings, or seminar presentations as appropriate to the topic.

*note:* Students who gain entry to Directed Study (CASM) II will not be permitted to enrol in Pitjantjatjara Singing II.

### 6757 Ethnomusicology (CASM) IIA

*level:* II     *points value:* 3     *duration:* full year

*prerequisites:* 2931 Ethnomusicology (CASM) I

*contact hours:* 1 one-hour seminar a week.

*content:* Literature searches, field techniques, regional surveys.

*assessment:* regular assignments (60%); 2 essays, one due at the end of each semester (20%); and one seminar presentation (20%)

### 9825 Ethnomusicology (CASM) IIB

*level:* II     *points value:* 3     *duration:* full year

*prerequisites:* 2931 Ethnomusicology (CASM) I

*contact hours:* 1 one hour seminar a week

*content:* Literature searches, field techniques, regional surveys.

*assessment:* regular assignments (60%); and 1 essay due at the end of semester 2 (40%)

**2524 First Practical Music Study IIA**

level: II points value: 4 duration: full year

prerequisites: 3595 First Practical Music Study I

contact hours: 1 one-hour individual lesson a week

content: Instrumental or vocal technique, musicianship and repertoire.

assessment: continuous progress reports (60%); and 2 examinations, one at the end of each semester (40%).

**2802 First Practical Music Study IIB**

level: II points value: 4 duration: full year

prerequisites: 3595 First Practical Music Study I

contact hours: 1 one hour individual lesson a week

content: Instrumental or vocal technique, musicianship and repertoire.

assessment: continuous progress reports (60%); and 2 examinations, one at the end of each semester (40%)

**9325 General Studies II**

level: II points value: 2 duration: full year

prerequisites: 8224 General Studies I

contact hours: variable

content: A range of topics as diversification and broadening of individual student study programs. A minimum of 4 units a year must be taken (1 unit = 1 half-semester). At the discretion of the Director a student may be credited with units taken outside of CASM; in such cases the Director will also determine the appropriate weighting. See more information on General Studies topics at end of syllabus entries.

assessment: determined by the Director

**7771 Performance (New) IIA**

level: II points value: 4 duration: full year

contact hours: 4 hours ensemble a week

content: Instrumental or vocal technique, repertoire and ensemble musicianship.

assessment: attendance and participation in ensemble rehearsals and in public workshops and performances

**7483 Performance (New) IIB**

level: II points value: 4 duration: full year

contact hours 4 hours ensemble a week

content: Instrumental or vocal technique, repertoire and ensemble musicianship.

assessment: attendance and participation in rehearsals and in public workshops and performances

**8542 Pitjantjatjara Singing II**

level: II points value: 3 duration: full year

prerequisites: 5319 Pitjantjatjara Singing I

contact hours: 66 one hour sessions a year

content: Styles, beliefs, and attitudes of traditional Aboriginal music, using a public Pitjantjatjara inma (ceremony) as taught by its traditional owners. Instruction in Pitjantjatjara language and related dialects.

assessment: Report on attitudinal and musical progress from the Pitjantjatjara Senior Lecturer, in consultation with other song owners, at the end of each Semester (60%); and report on cross-cultural skills from the Ethnomusicology lecturer at the end of each semester (40%).

**3342 Practical Elective II**

level: I points value: 2 duration: full year

contact hours: one hour a week of instruction

content; Practical introduction to a variety of musical instruments or voice that are different from the student's first practical music study; includes Sound Engineering, Composition, Computer Music, and Songwriting. It is an appropriate introductory unit to 8224 General Studies I or 9325 General Studies II.

assessment: determined by the Director

**5308 Style Studies (New) IIA**

level: II points value: 2 duration: full year

prerequisites: 9322 Style Studies I (New)

contact hours: one 1.5 hour seminar a week

content: Historical, theoretical, approach to the following musical styles: Jazz, Folk, Country, Rock.

assessment: continuous assessment (60%); and major assignment at the end of each semester (40%)

**8012 Style Studies (New) IIB**

level: II points value: 2 duration: full year

prerequisites: 9322 Styles Studies I (New)

contact hours: one 1.5 hour seminar a week

content: Historical, and theoretical approach to the following musical styles; Jazz, Folk, Country, Rock.

assessment: continuous assessment (60%) and major assignment at the end of each semester (40%)

**8476 Theory of Music IIA**

level: II points value: 3 duration: full year

prerequisites: 3562 Theory of Music I

*contact hours:* 3 one hour lectures a week

*content:* Melodic and harmonic texturing and progression using up to five modes and chords of complexity up to the 9th; composition and arranging.

*assessment:* regular assignments (60%); and 2 examinations, one at the end of each Semester and each of one-hour duration (40%)

### 5063 Theory of Music IIB

*level:* II *points value:* 3 *duration:* full year

*prerequisites:* 3562 Theory of Music I

*contact hours:* 3 one hour lectures a week

*content:* Basic melodic and harmonic texturing and progression using up to four modes and chords of complexity up to the 9th; elementary techniques of composition and arranging.

*assessment:* regular assignments (60%); and 2 examinations, one at the end of each semester and each of one hour duration (40%)

### 3051 Aural/Rhythm III

*level:* III *points value:* 1 *duration:* full year

*prerequisites:* 4891 Aural/Rhythm II

*contact hours:* 1 one hour group session a week

*content:* Aural training in advanced rhythmic, melodic, and harmonic structures.

*assessment:* continuous assessment (60%); and 2 examinations, one at the end of each semester (40%)

### 3313 Ethnomusicology (CASM) IIIA

*level:* III *points value:* 4 *duration:* full year.

*prerequisites:* 6757 Ethnomusicology (CASM) IIA; or Pass Div 1 (or higher) in 9825 Ethnomusicology (CASM) IIB

*contact hours:* 1 one hour seminar a week

*content:* Field and recording techniques, analysis, regional studies.

*assessment:* regular assignments (60%); 1 essay due at the end of semester 1 (10%); one analytical project due at the end of Semester 2 (20%); and one seminar presentation (10%)

### 3017 Ethnomusicology (CASM) IIIB

*level:* III *points value:* 4 *duration:* full year.

*prerequisites:* 9825 Ethnomusicology (CASM) IIB; or 6757 Ethnomusicology (CASM) IIA

*contact hours:* 1 one hour seminar a week

*content:* Field and recording techniques, analysis, regional studies.

*assessment:* regular assignments (70%); 1 essay due at the end of semester 2 (20%); and one seminar presentation (10%)

### 5352 First Practical Music Study IIIA (New)

*level:* III *points value:* 4 *duration:* full year.

*prerequisites:* 2524 First Practical Music Study IIA, or Pass Division I (or higher) in 2802 First Practical Music Study IIB

*contact hours:* 1 one hour individual lesson a week

*content:* Instrumental or vocal technique, musicianship and repertoire.

*assessment:* continuous progress reports (60%); and 2 examinations, one at the end of each semester (40%)

### 2362 First Practical Music Study IIIB (New)

*level:* III *points value:* 4 *duration:* full year.

*prerequisites:* 2802 First Practical Music Study IIB; or 2524 First Practical Music Study II

*contact hours:* 1 one hour individual lesson a week

*content:* Instrumental or vocal technique, musicianship and repertoire.

*assessment:* continuous progress reports (60%); and 2 examinations, one at the end of each Semester (40%)

### 3508 General Studies III

*level:* III *points value:* 3 *duration:* full year

*prerequisites:* 9325 General Studies II

*contact hours:* variable

*content:* A range of topics as diversification and broadening of individual student study programs. A minimum of 4 units a year must be taken (1 unit = 1 half-semester). At the discretion of the Director a student may be credited with units taken outside of CASM; in such cases the Director will also determine the appropriate weighting. See more information on General Studies topics at end of syllabus entries.

*assessment:* determined by the Director

### 9249 Performance (New) IIIA

*level:* III *points value:* 4 *duration:* full year

*prerequisites:* 7771 Performance (New)IIA or Pass Div 1 (or higher) in 7483 Performance (New)IIB

*contact hours:* 4 hours ensemble a week

*content:* Instrumental or vocal technique, repertoire and ensemble musicianship.

*assessment:* attendance and participation in ensemble rehearsals and in public workshops and performances

**4283 Performance (New) IIIB**

*level:* III *points value:* 4 *duration:* full year

*prerequisites:* 7483 Performance (New) IIB or 7771 Performance (New) IIIA

*contact hours:* 4 hours ensemble a week

*content:* Instrumental or vocal technique, repertoire and ensemble musicianship.

*assessment:* attendance and participation in ensemble rehearsals and in public workshops and performances

**4427 Practical Elective III**

*level:* III *points value:* 2 *duration:* full year

*contact hours:* one hour a week of instruction

*content:* Practical instruction in a variety of musical instruments or voice that are different from the student's first practical music study; includes Sound Engineering, Composition, Computer Music, and Songwriting. The prerequisite for Composition is 3562 Theory of Music I; for Sound Engineering, Computer Music, and Songwriting it is an appropriate introductory unit to 8224 General Studies I or 9325 General Studies II

*assessment:* determined by the Director

**5583 Style Studies (New) IIIA**

*level:* III *points value:* 2 *duration:* full year

*prerequisites:* 5308 Style Studies (New) IIA, or Pass Division I (or higher) in 8012 Style Studies (New) IIB

*contact hours:* one 1.5 half hour seminar a week

*content:* Historical, and theoretical approach to the following musical styles: global traditions, classical music, and 20th century Western classical music.

*assessment:* continuous assessment (60%); major assignment at the end of semester 2 (40%)

**4150 Style Studies (New) IIIB**

*level:* III *points value:* 2 *duration:* full year

*prerequisites:* 4319 Style Studies IIB, or 1542 Style Studies IIA

*contact hours:* one 1.5 hour seminar a week

*content:* Historical, and theoretical, approach to the following styles; global traditions, classical music, and 20th century Western classical music.

*assessment:* continuous assessment (60%); major assignment at the end of semester 2 (40%)

**6851 Theory of Music IIIA**

*level:* III *points value:* 4 *duration:* full year.

*prerequisites:* 8476 Theory of Music IIA, or Pass Div 1 (or higher) in 5063 Theory of Music IIB

*contact hours:* 3 one hour lectures a week

*content:* Musical texturing and progression using all seven modes and chords up to the 13th; words and music; form, composition, and arranging.

*assessment:* regular assignments (60%); and 2 one hour examinations, one at the end of each semester (40%)

**5786 Theory of Music IIIB**

*level:* III *points value:* 4 *duration:* full year.

*prerequisites:* 5063 Theory of Music IIB, or 8476 Theory of Music IIA

*contact hours:* 3 one hour lectures a week

*content:* Issues in musical structure pertaining to each student's stylistic and instrumental preferences; composition, and arranging; a major project.

*assessment:* regular assignments (60%); and 2 one hour examinations, one at the end of each semester (40%)

# Associate Diploma of Music

## Syllabuses

### 6432 Basic Music Theory I

level: 1 points value: 3 duration: full year

contact hours: 1 hour keyboard laboratory workshop a week

content: Primary aspects of music theory including basic intervals—primary, secondary chords—key signatures; circle of fifths—tempo and rhythmic ordering - elementary harmonic progression.

assessment: weekly assessments (50%), written examinations for semester 1 & 2 (50%)

### 6273 Ensemble Performance I

level: I points value: 4 duration: full year

contact hours: 3 hours per week

content: Experience in one of the following ensembles for two semesters: chamber music, big band, chamber choir, orchestra, wind ensemble, Adelaide University Choral Society, Jazz Vocal Ensemble, studio ensemble.

assessment: 60% of the assessment will reflect the level of achievement of the ensemble as a whole as demonstrated in rehearsals and performances. 40% of the assessment will reflect each individual student's contribution, including punctuality, professionalism of approach, promptness in returning performance parts etc. 100% attendance is required except in cases of illness or approved leave. Non-compliance will result in failure for the subject or a lowering of the final grade.

### 4800 Introduction to Music Literature IA

level: I points value: 2 duration: semester 1

corequisite: 6632 Basic Music Theory I

restriction: 1268 Introduction to Music Literature

contact hours: 2 hours per week for six weeks, 1 hour per week for six weeks

content: Introduction to the study of music in Australian society; music historiography; essay writing and similar presentation; information retrieval, the literature of music history.

assessment: 1 bibliographic exercise (10%), 1 repertoire study (50%), 1 essay of 800 words (40%)

### 5220 Performance IC

level: I points value: 12 duration: full year

prerequisite: audition

contact hours: 4-5 hours per week

content: Experience in each of the following areas: individual tuition 1 hour per week, performance class 2 hours per week, workshop/technique class as required 1 hour per week, student recital 1 hour per week

assessment: teacher's report (25%), performance class (25%), examination of 30 minutes playing time (50%)

### 2562 Performance ID

level: 1 points value: 8 duration: full year

prerequisite: audition

contact hours: 2.5 hours per week

content: Experience in each of the following areas: individual tuition (0.5 hours per week), performance class (2 hours per week).

assessment: teacher's report 40(%), examination of 20 minutes playing time (60%)

### 9094 Ensemble Performance II

level: I points value: 4 duration: full year

prerequisite: audition

contact hours: 3 hours per week

content: Experience in one of the following ensembles for two semesters: chamber music, big band, chamber choir, orchestra, wind ensemble, Adelaide University Choral Society, Jazz Vocal Ensemble, studio ensemble.

assessment: assessment: 60% of the assessment will reflect the level of achievement of the ensemble as a whole as demonstrated in rehearsals and performances. 40% of the assessment will reflect each individual student's contribution, including punctuality, professionalism of approach, promptness in returning performance parts etc. 100% attendance is required except in cases of illness or approved leave. Non-compliance will result in failure for the subject or a lowering of the final grade.

### 2673 Introduction to Ethnomusicology IIA

level: II points value: 2 duration: semester 1

corequisites: 1935 Music Theory

restriction: 5861 Introduction to Ethnomusicology IA

content: Introduction to the major principals of ethnomusicology; music as a cultural expression of society.

assessment: 2,000 word assessment (60%), and 1 one hour examination based on repertoire and general knowledge

**3100 Performance II**

*level:* I      *points value:* 12      *duration:* full year

*prerequisite:* 5220 Performance IC

*contact hours:* 4-5 hours per week

*content:* Experience in each of the following areas: individual tuition 1 hour per week, performance class 2 hours per week, workshop/technique class as required 1 hour per week, student recital 1 hour per week

*assessment:* teacher's report (25%), performance class (25%), examination of 30 minutes playing time (50%)

**3396 Performance IIA (New)**

*level:* I      *points value:* 8      *duration:* full year

*prerequisite:* 2562 Performance ID

*contact hours:* 2.5 hours per week

*content:* Experience in each of the following areas: individual tuition 0.5 hours per week, performance class 2 hours per week.

*assessment:* teacher's report 40(%), examination of 20 minutes playing time (60%)

# Associate Diploma of Music (Jazz)

## Syllabuses

### Level I

#### 7705 Aural Training IM

level: I points value: 2 duration: full year

contact hours: 1 one hour workshop

*content:* This unit aims to develop the aural recognition and comprehension of the basic elements of rhythm, melody and harmony, together with sight-reading and singing. The unit includes: progressive sight-singing exercises; progressive exercises in rhythmic reading and general aural skills, including interval and chord recognition and dictation.

*assessment:* attendance and performance in classes, and regular assessment

#### 4391 Improvisation I

level: I points value: 4 duration: full year

prerequisites: 2107 Jazz Theory I

corequisites: 2107 Jazz Theory I, 3424 Jazz Piano Class I

contact hours: 1 two hour lecture plus 1 one hour Applied Rhythm Class

*content:* This unit aims to enable students to develop and apply improvisation techniques. The unit considers the application of basic improvisational techniques such as rhythm, modal scales and patterns to the Jazz repertoire. The study of various styles beginning with Dixieland to Swing, and Blues up to Early Bebop also are considered. One hour of contact time will be devoted to the practical application of Afro-American rhythms.

*assessment:* continuous based on assignments and participation in class; written and practical examination at end of each semester. Improvisation: 80%; Rhythm: 20%

#### 3424 Jazz Piano Class I

level: I points value: 2 duration: full year

corequisites: 2107 Jazz Theory I, 7705 Aural Training IM

contact hours: 1 hour per week

*content:* This unit aims to provide sufficient stylistic knowledge and technique to allow the student to use

keyboard as a means of relating to other units (eg. Theory, Arranging, etc).

*assessment:* assignments/projects (25%); written and practical examination at the end of each semester (75%)

#### 1782 Jazz Performance I

level: I points value: 6 duration: semester 1 & 2

corequisites: 2107 Jazz Theory I; 4391 Improvisation I

contact hours: 1.5 hours per week

*content:* This unit aims to develop the students performing skills on a principal instrument. Progressive technique appropriate to the student's level of attainment, supported by the content of 4391 Improvisation I is pursued in this unit.

*assessment:* semester 1: a 15 minute examination, 40%; semester 2: a 20 minute examination, 60%. Students must also attend instrumental workshop (1 hour per week).

#### 5451 Jazz Styles (Listening and Analysis)

level: I points value: 2 duration: full year

contact hours: 1 hour per week

*content:* Study analysis, and application of the various styles of jazz ranging from New Orleans to contemporary.

*assessment:* one written/listening examination each semester (50%); assignments (50%)

#### 2107 Jazz Theory I

level: I points value: 2 duration: full year

contact hours: 2 hours per week

*content:* The unit aims to provide a theoretical framework which students can implement in jazz improvisation, composition and arranging. The unit considers nomenclature of chords, functional harmony and the studies of related harmonies, aural training, jazz rhythms and phrasing. All theoretical aspects will be followed by practical application.

*assessment:* weekly assignments (50%) and examination at the end of each semester (50%)

### 5889 Large Jazz Ensemble I

level: I points value: 2 duration: full year

contact hours: 3 hours per week

*content:* This unit aims to develop ensemble sensitivity through the medium of large jazz ensembles. Activities include rehearsals and performance in various styles of jazz for the following Large Ensembles: Keyboard Ensemble, Guitar Band, Big Band, Jazz Choir.

*assessment:* satisfactory participation in rehearsals and performances. Students are required to make themselves available for public performances and tours, the dates of which will be decided at the beginning of the year.

### 1952 Small Jazz Ensemble I (New)

level: I points value: 4 duration: full year

corequisite: 1782 Jazz Performance I

contact hours: 4 hours per week for 2 semesters, two 1.5 hour rehearsals, 45 min. of which will be supervised; 1 hour/week Jazz Forum

*content:* This unit aims to develop ensemble sensitivity through the medium of small jazz ensembles. Activities include rehearsals and performances in various styles of jazz.

*assessment:* there is an examination of 30 mins. playing time at the end of semesters I and II, the results of which comprise 50% of the semester grade. Continuous assessment for the semester comprises the other 50%. Students enrolled in the small ensemble unit must attend Jazz Forum each week. Students are required to perform at least twice per semester at the Jazz Forum.

## Level II

### 1930 Aural Training IIM

level: II points value: 2 duration: full year

prerequisites: 7705 Aural Training IM

contact hours: 1.5 hours per week

*content:* This unit aims to further develop the aural recognition and comprehension of rhythm, melody and harmony, together with sight-reading and singing. The unit includes progressive sight-singing exercises; progressive exercises in rhythmic reading, and general aural skills including interval and chord recognition and dictation.

*assessment:* attendance and performance in classes and regular assessment tests

### 8148 Improvisation II

level: II points value: 4 duration: full year

prerequisites: 4391 Improvisation I

corequisites: 2008 Jazz Theory II, 1433 Jazz Piano Class II

contact hours: 3 hours per week

*content:* This unit aims to enable students to further develop and apply improvisational techniques. The application of improvisation techniques in be-bop, Blues Modal and Contemporary Styles. This will entail a thorough knowledge of scales, modes and chords and will include transcribing solos, ear training and listening assignments. One hour of contact time will be devoted to the practical application of Afro-American rhythms.

*assessment:* continuous, based on assignments and participation in class.; written and practical examination at end of each semester. Improvisation: 80%; Rhythm: 20%

### 1212 Jazz Arranging II

level: II points value: 2 duration: full year

contact hours: 1 hour a week

*content:* Skills in developing working arrangements for typical small jazz ensemble combinations.

*assessment:* regular class assignments (70%); examinations at end of semesters (30%)

### 7533 Jazz Performance II

level: II points value: 6 duration: full year

prerequisites: 1782 Jazz Performance I

corequisites: 8148 Improvisation II, 2008 Jazz Theory II

contact hours: 1.5 hours per week

*content:* This unit aims to further develop the student's performing skills on the principal instrument. Progressive technique appropriate to the student's level of attainment, supported by the content of 1782 Jazz Performance I is pursued in this unit.

*assessment:* semester 1: 20 minute examination (30%); semester 2: 30 minute recital 70%. Students must also attend instrumental workshop (1 hour per week).

### 1433 Jazz Piano Class II

level: II points value: 2 duration: full year

prerequisites: 3424 Jazz Piano Class I

corequisites: 2008 Jazz Theory II, 1930 Aural Jazz Training IIM

*contact hours:* 1 hour per week

*content:* Further study on stylistic and technical areas of Jazz Piano. Simple accompaniment and improvisation.

*assessment:* assignments/projects (25%); written and practical examination at the end of each semester (75%)

Continuous assessment for the semester comprises the other 50%. Students enrolled in the small ensemble unit must attend Jazz Forum each week. Students are required to perform at least twice per semester at the Jazz Forum.

### **2008 Jazz Theory II**

*level:* II    *points value:* 2    *duration:* full year

*prerequisites:* 2107 Jazz Theory I

*contact hours:* 2 hours per week

*content:* The unit aims to develop an understanding of the tonal organisation and rhythmic structure of contemporary jazz. The unit considers modes-study and implementation of chord substitution, polytonality, and jazz rhythms. The Lydian Chromatic Concept of tonal organisation is introduced. Continued aural and practical application of above.

*assessment:* weekly assignments assessed in class (50%) and examinations at the end of each semester 50%

### **4557 Large Jazz Ensemble II**

*level:* II    *points value:* 2    *duration:* full year

*contact hours:* 3 hours per week

*content:* This unit aims to develop ensemble sensitivity through the medium of large jazz ensembles. Activities include rehearsals and performance in various styles of jazz for the following Large Ensembles: Keyboard Ensemble, Guitar Band, Big Band, Jazz Choir.

*assessment:* satisfactory participation in rehearsals and performance. Students are required to make themselves available for public performances and tours, the dates of which will be decided at the beginning of the year.

### **3457 Small Jazz Ensemble II (New)**

*level:* II    *points value:* 4    *duration:* full year

*prerequisites:* 3608 Small Jazz Ensemble I

*corequisites:* 7533 Jazz Performance II

*contact hours:* 4 hours per week, two 1.5 hour rehearsals, 45 minutes of which will be supervised; 1 hour/week Jazz Forum

*content:* This unit aims to develop ensemble sensitivity through the medium of small jazz ensembles. Activities include rehearsals and performances in various styles of jazz.

*assessment:* there is an examination of 30 mins. playing time at the end of semesters I and II, the results of which comprise 50% of the semester grade.

## Bachelor of Arts (Dance)

### Syllabuses

#### Level I

##### 4567 Anatomy and Biomechanics for Dancers

*level:* I    *points value:* 2    *duration:* semester 2

*contact hours:* 3 hours per week

*content:* Structure and function of human motion systems; anatomy and the dancer; physical and mechanical principles; fitness and lifestyle; application posture, everyday activities, injury.

*assessment:* examination (50%); laboratory assignments (50%)

##### 2268 Arts in Australia

*level:* I    *points value:* 2    *duration:* semester 1

*contact hours:* 2 hours per week

*content:* Defining the arts; the arts as related disciplines; an examination of key issues; the arts in Aboriginal culture; major Australian artists; national and state institutions supporting the arts.

*assessment:* seminar presentation (30%); group research project (40%); resource folder (30%)

##### 4956 Choreological Studies I

*level:* I    *points value:* 2    *duration:* semester 1

*contact hours:* 3 hours per week

*content:* Principles of Choreology; the work of Rudolf Laban; choreological analysis of dance body, action, space, dynamics and relationship; choreutic analysis; effort analysis; Laban-based systems of notation.

*assessment:* practical studies (30%); choreutic analysis (20%); working notebook (10%); examination (40%)

##### 2956 Classical Ballet and Multicultural Style Dance I

*level:* I    *points value:* 2    *duration:* semester 1

*assumed knowledge:* familiarity with basic dance techniques

*restriction:* by audition only

*contact hours:* Classical Ballet, 4.5 hours per week; Multicultural Style, 2 hours

*content:* Classical Ballet technique at level appropriate to an individual student's attainments. Multicultural-

Style technique at level appropriate to an individual student's attainments and dependent upon style-specific-lecturer availability.

*assessment:* students will be graded on progress made relative to their commencement standard in the technique class in which they are placed. Assessment will be based on progress in the following areas: (a) Overall increase in ability to move with clarity; (b) Attendance and cooperative participation in class ensemble; (c) Implementation of suggestions and corrections in technical improvement; (d) Evidence of commitment to extending fully individual physical and expressive performance abilities. A result of P2 or better is required in each subject area of the unified Classical Ballet and Multicultural styles in order to pass the entire unit.

##### 6246 Classical Ballet and Multicultural-Style Dance Techniques II

*level:* I    *points value:* 2    *duration:* semester 2

*prerequisites:* 2956 Classical Ballet and Multicultural-Style Dance Techniques I

*assumed knowledge:* familiarity with basic dance techniques

*restriction:* by audition only

*contact hours:* Classical ballet, 4.5 hours per week; Multicultural-Style, 2 hours per week

*content:* Classical Ballet technique at level appropriate to an individual student's attainments. Multicultural-Style technique at level appropriate to an individual student's attainments and dependent upon style-specific-lecturer availability.

*assessment:* students will be graded on progress made relative to their commencement standard in the technique class in which they are placed. Assessment will be based on progress in the following areas: (a) Overall increase in ability to move with clarity; (b) Attendance and cooperative participation in class ensemble; (c) Implementation of suggestions and corrections in technical improvement; (d) Evidence of commitment to extending fully individual physical and expressive performance abilities. A result of P2 or better is required in each subject area of the unified Classical Ballet and Multicultural Style in order to pass the entire unit.

### 7115 Composition I — Dance

level: I points value: 2 duration: semester 1

contact hours: 3 hours per week

content: Compositional studies beginning with the investigation of source materials; improvisation; compositional devices; investigation of the principles of art form; individual and group compositional studies.

assessment: practical work (90%), dance log (10%)

### 9317 Dance History I

level: I points value: 2 duration: semester 2

contact hours: 3 hours per week

content: An introduction to the history of dance from prehistoric cultures to the Baroque period, focusing particularly on four periods prehistory/primitive, Medieval, Renaissance and Baroque. Practical studio work recreating dances from the period studied is also included.

assessment: examination (30%); research paper (30%); seminar presentation (20%); practical workshop (20%)

### 3068 Elementary Labanotation

level: I points value: 2 duration: semester 1

contact hours: 2 hours per week

content: Basic principles of Labanotation including directional symbols, gestures, turns, airwork, floor-plans; application of principles and skills through repertory; application of Labanotation to composition.

assessment: class work (25%); assignments and tests (25%); Elementary Labanotation Certification (50%)

### 8088 Modern Dance Technique I

level: I points value: 2 duration: semester 1

assumed knowledge: familiarity with basic dance techniques

restriction: by audition only

contact hours: 7.5 hours per week

content: Modern Dance Technique at level appropriate to an individual student's attainments.

assessment: Students will be graded on progress made relative to their commencement standard in the technique class in which they are placed. Assessment will be based on progress in the following areas: (a) Overall increase in ability to move with clarity; (b) Attendance and cooperative participation in class ensemble; (c) Implementation of suggestions and corrections in technical improvement; (d) Evidence of commitment to extending fully individual physical and expressive performance abilities.

### 5918 Modern Dance Technique II

level: I points value: 2 duration: semester 2

prerequisites: 8088 Modern Dance Technique I

assumed knowledge: familiarity with basic dance techniques

restriction: by audition only

contact hours: 7.5 hours per week

content: Modern Dance Technique at level appropriate to an individual student's attainments.

assessment: students will be graded on progress made relative to their commencement standard in the technique class in which they are placed. Assessment will be based on progress in the following areas: (a) Overall increase in ability to move with clarity; (b) Attendance and cooperative participation in class ensemble; (c) Implementation of suggestions and corrections in technical improvement; (d) Evidence of commitment to extending fully individual physical and expressive performance abilities.

### 8370 Music for Dance

level: I points value: 2 duration: semester 2

contact hours: 2 hours per week

content: Elementary music notation: the role of music in dance; music as a stimulus for composition; music for technique class; rhythm ensemble; vocal ensemble; aural studies.

assessment: group participation (15%); theory assignments (20%); tutorial presentation (25%); practical work (25%); practical performance (15%)

### 3872 Repertory I

level: I points value: 2 duration: semester 2

contact hours: 3 hours per week

content: Practical studio sessions in the construction, reconstruction and performance of works in modern dance repertory; practical experience in the creation and performance of choreographic work by faculty and visiting artists.

assessment: practical work (90%); dance log (10%)

## Level II

### 6646 Choreological Studies II

level: II points value: 2 duration: semester 2

prerequisites: 4956 Choreological Studies I

contact hours: 3 hours per week

content: Advanced study in Choreutic Analysis and notation; advanced study of Effort Analysis and

## Performing Arts — B.A.(Dance)

notation; structural analysis of dance works; studies using choreologic principles as a basis for choreographic invention.

*assessment:* effort study (20%); choreutic study (20%); structural analysis (25%) major choreological project (35%)

### 7415 Classical Ballet and Multicultural-Style Dance Techniques III

*level:* II    *points value:* 2    *duration:* semester 1

*prerequisites:* 6246 Classical Ballet and Multicultural Dance Techniques II

*assumed knowledge:* familiarity with basic dance techniques

*restriction:* by audition only

*contact hours:* Classical Ballet, 4.5 hours per week; Multicultural-Style, 2 hours per week

*content:* Classical Ballet Technique at level appropriate to an individual student's attainments. Multicultural-Style Technique at level appropriate to an individual student's attainments and dependent upon style-specific-lecturer availability.

*assessment:* students will be graded on progress made relative to their commencement standard in the technique class in which they are placed. Assessment will be based on progress in the following areas: (a) Overall increase in ability to move with clarity; (b) Attendance and cooperative participation in class ensemble; (c) Implementation of suggestions and corrections in technical improvement; (d) Evidence of commitment to extending fully individual physical and expressive performance abilities. A result of P2 or better is required in each subject area of the unified Classical Ballet and Multicultural Style in order to pass the entire unit.

### 4773 Classical Ballet and Multicultural Style IV

*level:* II    *points value:* 2    *duration:* semester 2

*prerequisites:* 7415 Classical Ballet and Multicultural-Style Dance Techniques III

*assumed knowledge:* familiarity with basic dance techniques

*restriction:* by audition only

*contact hours:* Classical Ballet, 4.5 hours per week; Multicultural-Style, 2 hours per week

*content:* Classical Ballet Technique at level appropriate to an individual student's attainments. Multicultural-Style Technique at level appropriate to an individual student's attainments and dependent upon style-specific-lecturer available.

*assessment:* students will be graded on progress made relative to their commencement standard in the technique class in which they are placed. Assessment will be based on progress in the following areas: (a) Overall increase in ability to move with clarity; (b) Attendance and cooperative participation in class ensemble; (c) Implementation of suggestions and corrections in technical improvement; (d) Evidence of commitment to extending fully individual physical and expressive performance abilities. A result of P2 or better is required in each subject area of the unified Classical Ballet and Multicultural Style in order to pass the entire unit.

### 9628 Composition II — Dance

*level:* II    *points value:* 2    *duration:* semester 1

*prerequisites:* 7115 Composition I (Dance)

*contact hours:* 3 hours per week

*content:* Investigation of compositional devices including musical and theatrical aspects; individual and group studies and completed works; performance showings of work created during the semester.

*assessment:* practical class work (50%); choreographic experimentation (25%); performance showings (25%)

### 8368 Dance and the Child

*level:* II    *points value:* 2    *duration:* semester 2

*prerequisites:* satisfactory completion of Level I studies

*contact hours:* 3 hours per week

*content:* Dance as a form of knowledge; the nature of aesthetic education; types and stages of development; the history of dance education; the learning environment practices and strategies, dance activities for children.

*assessment:* minor assignments (40%); written sessions preparation and evaluation (15%); leading of workshop experiences (25%); participation in discussions (20%)

### 1015 Dance Criticism and Styles Analysis I

*level:* II    *points value:* 2    *duration:* semester 1

*contact hours:* 3 hours per week

*content:* Theoretical issues of criticism; modes of critical enquiry; historical survey of dance criticism; issues in criticism; skills of dance criticism; practical critical analysis.

*assessment:* research paper (30%); critical reviews (30%); seminar presentation (30%); class contribution (10%)

**7506 Dance Criticism and Styles Analysis II**

level: II points value: 2 duration: semester 2

prerequisites: 1015 Dance Criticism and Styles Analysis I

contact hours: 3 hours per week

content: Aesthetic theories and allied concepts the nature of art, creativity, process and product, perceptions, imagination, feeling, expression; the nature of dance as an art form; dance as a 'language'; the concept of style in dance; methods of dance style analysis; the study of dance styles.

assessment: research paper (30%); critical reviews (20%); critical appraisals (30%); seminar presentation (25); resource folder (20%)

**7561 Dance History II**

level: II points value: 2 duration: semester 2

prerequisites: 9317 Dance History I

contact hours: 3 hours per week

content: The origins of modern dance in the twentieth century; the development of modern dance; modern dance innovators; dance as reflection of socio-cultural development in the twentieth century; practical studio work recreating dances of the innovators studied.

assessment: book report (20%); research paper (40%); seminar presentation (20%); practical workshop (20%)

**8045 Intermediate Labanotation**

level: II points value: 2 duration: semester 1

prerequisites: 3068 Elementary Labanotation

contact hours: 3 hours per week

content: Advanced principles of Labanotation; movements of specific body parts; combined body movements; application of skills through repertory, composition and choreographic analysis.

assessment: classwork (25%); assignments and tests (25%); Intermediate Labanotation Certification Examination (50%)

**2392 Modern Dance Technique III**

level: II points value: 2 duration: semester 1

prerequisites: 5918 Modern Dance Technique II

assumed knowledge: familiarity with basic dance techniques

restriction: by audition only

contact hours: 7.5 hours per week

content: Modern Dance Technique at level appropriate to an individual student's attainments.

assessment: students will be graded on progress made relative to their commencement standard in the technique class in which they are placed. Assessment will be based on progress in the following areas: (a) Overall in ability to move with clarity; (b) Attendance and co-operative participation in class ensemble; (c) Implementation of suggestions and

corrections in technical improvement; (d) Evidence of commitment to extending fully individual physical and expressive performance abilities.

**1308 Modern Dance Technique IV**

level: II points value: 2 duration: semester 2

prerequisites: 2392 Modern Dance Technique III

assumed knowledge: familiarity with basic dance techniques

restriction: by audition only

contact hours: 7.5 hours per week

content: Modern Dance Technique at level appropriate to an individual student's attainments.

assessment: students will be graded on progress made relative to their commencement standard in the technique class in which they are placed. Assessment will be based on progress in the following areas: (a) Overall increase in ability to move with clarity; (b) Attendance and cooperative participation in class ensemble; (c) Implementation of suggestions and corrections in technical improvement; (d) Evidence of commitment to extending fully individual physical and expressive performance abilities.

**7621 Repertory II**

level: II points value: 2 duration: semester 2

prerequisites: 3872 Repertory I

contact hours: 3 hours per week

content: The study, construction, reconstruction and performance of works in established modern dance repertory; the creation and performance of new works by faculty and visiting artists.

assessment: practical work (60%); class participation (10%); working notebook (10%); performance showing (20%).

**Level III**

**3645 Classical Ballet and Multicultural-Style Dance Techniques V**

level: III points value: 2 duration: semester 1

prerequisites: 4773 Classical Ballet and Multicultural-Style Dance Techniques IV

assumed knowledge: familiarity with basic dance techniques

*restriction:* by audition only

*contact hours:* Classical Ballet, 4.5 hours per week;  
Multicultural-Style, 2 hours per week

*content:* Classical Ballet Technique at level appropriate to an individual student's attainments. Multicultural-Style Technique at level appropriate to an individual student's attainments and dependent upon style-specific-lecturer availability.

*assessment:* students will be graded on progress made relative to their commencement standard in the technique class in which they are placed. Assessment will be based on progress in the following areas: (a) Overall increase in ability to move with clarity; (b) Attendance and cooperative participation in class ensemble; (c) Implementation of suggestions and corrections in technical improvement; (d) Evidence of commitment to extending fully individual physical and expressive performance abilities. A result of P2 or better is required in each subject area of the unified Classical Ballet and Multicultural Style in order to pass the entire unit.

#### **2145 Classical Ballet and Multicultural-Style Dance Techniques VI**

*level:* III *points value:* 2 *duration:* semester 2

*prerequisites:* 3645 Classical Ballet and Multicultural-Style Dance Techniques V

*assumed knowledge:* familiarity with basic dance techniques

*restriction:* by audition only

*contact hours:* Classical Ballet, 4.5 hours per week;  
Multicultural Style, 2 hours per week

*content:* Classical Ballet Technique at level appropriate to an individual student's attainments. Multicultural-Style Technique at level appropriate to an individual student's attainments and dependent upon style-specific-lecturer availability.

*assessment:* Students will be graded on progress made relative to their commencement standard in the technique class in which they are placed. Assessment will be based on progress in the following areas: (a) overall increase in ability to move with clarity; (b) attendance and cooperative participation in class ensemble; (c) implementation of suggestions and corrections in technical improvement; (d) evidence of commitment to extending fully individual physical and expressive performance abilities. A result of P2 or better is required in each subject area of the unified Classical Ballet and Multi-Cultural Style in order to pass the entire unit.

#### **8774 Composition III — Dance**

*level:* III *points value:* 2 *duration:* semester 1

*prerequisites:* 9628 Composition II; 7621 Repertory II

*assumed knowledge:* Composition and repertory skills at intermediate/advanced level

*contact hours:* 3 hours per week

*content:* Outside preparation time, up to 6 hours per week for 13 weeks. Student pieces will be developed, rehearsed and performed. Students will both choreograph work and perform in other choreographed work.

*assessment:* attitude Approach to process of investigation and creativity: positive/negative? Approach to maintaining the discipline of the search until the assignment has been completed. Diligence in striving to attain physical and emotional abilities necessary for a performer/choreographer. Independence: Ability to focus and work responsibly when not receiving individual attention. Sociability: Ability to compose and dance with and around others throughout the assigned project. Process Imagination: The ability to creatively extend the assignment beyond that which is asked. Perseverance: The ability to actively pursue the goal of each assignment with diligence. Product Clarity in use of rhythms, space and ability to move in various tempi and with various appropriate tensions. Ability to give graciously through movement projection.

#### **6599 Modern Dance Technique V**

*level:* III *points value:* 2 *duration:* semester 1

*prerequisites:* 1308 Modern Dance Technique IV

*assumed knowledge:* familiarity with basic dance techniques

*restriction:* by audition only

*contact hours:* 7.5 hours per week

*content:* Modern Dance Technique at level appropriate to an individual student's attainments.

*assessment:* students will be graded on progress made relative to their commencement standard in the technique class in which they are placed. Assessment will be based on progress in the following areas: (a) Overall increase in ability to move with clarity; (b) Attendance and cooperative participation in class ensemble; (c) Implementation of suggestions and corrections in technical improvement; (d) Evidence of commitment to extending fully individual physical and expressive performance abilities.

### 5680 Modern Dance Technique VI

level: III points value: 2 duration: semester 2

prerequisites: 6599 Modern Dance Technique V

assumed knowledge: familiarity with basic dance techniques

restriction: by audition only

contact hours: 7.5 hours per week

content: Modern Dance Technique at level appropriate to an individual student's attainments.

assessment: students will be graded on progress made relative to their commencement standard in the technique class in which they are placed. Assessment will be based on progress in the following areas: (a) Overall increase in ability to move with clarity; (b) Attendance and cooperative participation in class ensemble; (c) Implementation of suggestions and corrections in technical improvement; (d) Evidence of commitment to extending fully individual physical and expressive performance abilities.

### 2091 Repertory III

level: III points value: 2 duration: semester 1 & 2

prerequisites: 9628 Composition II; 7621 Repertory II; 1308 Modern Dance Technique III; 4773 Classical B

assumed knowledge: Composition and repertory skills at inter/adv. level

contact hours: 3 hours per week

content: Both new work will be choreographed and performed and work from Labanotated scores will be restaged and performed. Practical approaches will be taken and may include lectures, rehearsals and performance problem solving.

assessment: attitude Approach to process of investigation and creativity: positive/negative? Approach to maintaining the discipline of the search until the assignment has been completed. Diligence in striving to attain physical and emotional abilities necessary for a performer/choreographer. Independence: Ability to focus and work responsibly when not receiving individual attention. Sociability: Ability to compose and dance with and around others throughout the assigned project. Process Imagination: The ability to creatively extend the assignment beyond that which is asked. Perseverance: The ability to actively pursue the goal of each assignment with diligence. Product Clarity in use of rhythms, space and ability to move in various tempi and with various appropriate tensions. Ability to give graciously through movement projection.

### 2857 Technical Theatre

level: I points value: 2 duration: full year

contact hours: 3 hours per week

content: Costume design and construction Exploration of traditional and non-traditional avenues for adorning the human body through the creation of costumes, and the stage presentation of costume for dance. Approaches include films, development of processes (and written expression of these), drawing the human form, pattern making and garment construction.

Lighting Design and Stage Management Classes will provide practical experience in stage and management through the design and development of stage plans using electrical accessories, cue sheets, colour and special effects. These will be conducted as workshops using teaching modes such as lectures, tutorials, discussion groups and practical sessions.

assessment: costume Design and Construction final costume project class log book; Lighting Design and Stage Management class participation final exam

### 3528 Touring the Dance Company

level: III points value: 2 duration: semester 2

prerequisites: 9628 Composition II; 7621 Repertory II; 1308 Modern Dance Technique IV; 4773 Classical Ballet and Multicultural Style IV

contact hours: 3 hours per week

content: At the commencement of the unit students will be advised of the approximate tour dates or alternative performance arrangements. Class planning for individual and team taught dance classes in Technique, Repertory, Composition and Labanotation.

assessment: student and lecturer assessment and critiques of student teaching techniques. Pre-tour preparation, management responsibility for either sound, costumes or props, scheduling, etc Daily log while on tour.

### electives

Students are required to complete electives equivalent to 8 points in their award. Electives may be chosen from a broad range of offerings. Electives offered within the dance programme include:

#### 5397 Apprenticeship Teaching Program

points value: 2

duration: semester 2

prerequisites: satisfactory completion of Level II studies

contact hours: 3 hours per week

## Performing Arts — B.A.(Dance)

*content:* Methods of teaching dance; the teaching of community dance groups;

construction and teaching of dance lessons.

*assessment:* practical teaching (50%); lesson plans (25%); resource journal (25%)

### 1588 Directed Study I (Dance)

*points value:* 2                      *duration:* semester 1

*prerequisites:* satisfactory completion of Level II studies or permission of Course Team

*contact hours:* to be negotiated

*content:* This subject provides the opportunity for the scholastically qualified student to undertake an in-depth study in a chosen area of dance scholarship. The student will be required to prepare and present a fully documented paper on the chosen tour. Specific study supervision may be undertaken by any person approved by the Course Team.

*assessment:* the completed study will be reviewed and assessed by the Course Committee.

### 7262 Directed Study II (Dance)

*points value:* 4                      *duration:* semester 1

### 2913 Directed Study III (Dance)

*points value:* 2                      *duration:* semester 2

*prerequisites:* satisfactory completion of Level II studies, or permission of Course Team

*contact hours:* to be negotiated

*content:* This subject provides the opportunity for the scholastically qualified student to undertake an in-depth study in a chosen area of dance scholarship. The student will be required to prepare and present a fully documented paper on the chosen topic. Specific study supervision may be undertaken by any person approved by the Course Team.

*assessment:* the completed study will be reviewed and assessed by the Course Committee.

### 8854 Directed Study IV (Dance)

*points value:* 4                      *duration:* semester 2

## elective subjects for students not enrolled in B.A. (Dance)

### 1378 Classical Ballet for Non-Majors I

*level:* I    *points value:* 1    *duration:* semester 1

*contact hours:* 3 hours per week for 13 weeks

*content:* Classical ballet technique at level appropriate to individual student's attainments.

*assessment:* students will be graded on progress made relative to their commencement standard in the technique class. Assessment will be based on progress in the following areas: (a) Overall increase in ability to move with clarity; (b) Attendance and cooperative participation in class ensemble; (c) implementation of suggestions and corrections in technical improvement; (d) Evidence of commitment to extending fully individual physical and expressive performance abilities. The availability of these subjects is conditional upon the availability of staff, facilities and student numbers. Subjects will not be offered if student enrolment is less than the minimum specified by the faculty.

### 3512 Classical Ballet for Non-Majors II

*level:* I    *points value:* 1    *duration:* semester 2

*prerequisites:* Classical Ballet for Non-Majors I

*contact hours:* 3 hours per week for 13 weeks

*content and assessment:* see 1378 Classical Ballet for Non-Majors I above.

### 9316 Classical Ballet for Non-Majors III

*level:* II    *points value:* 1    *duration:* semester 1

*prerequisites:* Classical Ballet for Non-Majors II

*contact hours:* 3 hours per week for 13 weeks

*content and assessment:* see 1378 Classical Ballet for Non-Majors I above.

### 9834 Classical Ballet for Non-Majors IV

*level:* II    *points value:* 1    *duration:* semester 2

*prerequisites:* Classical Ballet for Non-Majors III

*contact hours:* 3 hours per week for 13 weeks

*content and assessment:* see 1378 Classical Ballet for Non-Majors I above.

### 6361 Classical Ballet for Non-Majors V

*level:* III    *points value:* 1    *duration:* semester 1

*prerequisites:* Classical Ballet for Non-Majors IV

*contact hours:* 3 hours per week for 13 weeks

*content and assessment:* see 1378 Classical Ballet for Non-Majors I above.

### 2320 Classical Ballet for Non-Majors VI

*level:* III    *points value:* 1    *duration:* semester 2

*prerequisites:* Classical Ballet for Non-Majors V

*contact hours:* 3 hours per week for 13 weeks

*content and assessment:* see 1378 Classical Ballet for Non-Majors I above.

### **6606 Hatha Yoga I**

*level:* I    *points value:* 1    *duration:* semester 1

*contact hours:* 3 hours per week for 13 weeks

*content:* Hatha Yoga at a level appropriate to individual student's attainments

*assessment:* students will be graded on progress made relative to their commencement standard in the yoga class. Assessment will be based on progress in the following areas: (a) Overall increase in ability to move with clarity and focus; (b) Attendance and cooperative participation in yoga class; (c) Implementation of suggestions and corrections in technical improvement; (d) Evidence of commitment to extending fully individual physical and expressive performance abilities. The availability of these subjects is conditional upon the availability of staff, facilities and student numbers. Subjects will not be offered if student enrolment is less than the minimum specified by the faculty.

### **2210 Hatha Yoga II**

*level:* I    *points value:* 1    *duration:* semester 2

*prerequisite:* Hatha Yoga I

*contact hours:* 3 hours per week for 13 weeks

*content and assessment:* see 6606 Hatha Yoga I above.

### **1499 Hatha Yoga III**

*level:* II    *points value:* 1    *duration:* semester 1

*prerequisite:* Hatha Yoga II

*contact hours:* 3 hours per week for 13 weeks

*content and assessment:* see 6606 Hatha Yoga I above.

### **6783 Hatha Yoga IV**

*level:* II    *points value:* 1    *duration:* semester 2

*prerequisite:* Hatha Yoga III

*contact hours:* 3 hours per week for 13 weeks

*content and assessment:* see 6606 Hatha Yoga I above.

### **4183 Hatha Yoga V**

*level:* III    *points value:* 1    *duration:* semester 1

*prerequisite:* Hatha Yoga IV

*contact hours:* 3 hours per week for 13 weeks

*content and assessment:* see 6606 Hatha Yoga I above.

### **5793 Hatha Yoga VI**

*level:* III    *points value:* 1    *duration:* semester 2

*prerequisite:* Hatha Yoga V

*contact hours:* 3 hours per week for 13 weeks

*content and assessment:* see 6606 Hatha Yoga I above.

### **6442 Modern Dance for Non-Majors I**

*level:* I    *points value:* 1    *duration:* semester 1

*contact hours:* 3 hours per week for 13 weeks

*content:* Modern dance technique at level appropriate to individual student's attainments.

*assessment:* students will be graded on progress made relative to their commencement standard in the technique class. Assessment will be based on progress in the following areas: (a) overall increase in ability to move with clarity; (b) attendance and cooperative participation in class ensemble; (c) implementation of suggestions and corrections in technical improvement; (d) evidence of commitment to extending fully individual physical and expressive performance abilities.

The availability of these subjects is conditional upon the availability of staff, facilities and student numbers. Subjects will not be offered if student enrolment is less than the minimum specified by the Faculty.

### **3898 Modern Dance for Non-Majors II**

*level:* I    *points value:* 1    *duration:* semester 2

*prerequisites:* Modern Dance for Non-Majors I

*contact hours:* 3 hours per week for 13 weeks

*content and assessment:* see 6442 Modern Dance for Non-Majors I above.

### **1966 Modern Dance for Non-Majors III**

*level:* II    *points value:* 1    *duration:* semester 1

*prerequisites:* Modern Dance for Non-Majors II

*contact hours:* 3 hours per week for 13 weeks

*content and assessment:* See 6442 Modern Dance for Non-Majors I above.

### **5190 Modern Dance for Non-Majors IV**

*level:* II    *points value:* 1    *duration:* semester 2

*prerequisites:* Modern Dance for Non-Majors III

*contact hours:* 3 hours per week for 13 weeks

*content and assessment:* See 6442 Modern Dance for Non-Majors I above.

**5490 Modern Dance for Non-Majors V**

level: III points value: 1 duration: semester 1

prerequisites: Modern Dance for Non-Majors IV

contact hours: 3 hours per week for 13 weeks

content and assessment: See 6442 Modern Dance for Non-Majors I above.

**1078 Modern Dance for Non-Majors VI**

level: III points value: 1 duration: semester 2

prerequisites: Modern Dance for Non-Majors V

contact hours: 3 hours per week for 13 weeks

content and assessment: See 6442 Modern Dance for Non-Majors I above.

# Bachelor of Arts (Drama Studies)

## Syllabuses

### Level I

#### 4429 Foundations of Modern Theatre I

level: I points value: 3 duration: semester 2

quota: applies for B.A. students who must fill out an application form, available from the Drama Office

contact hours: 4 hours per week (2 x 1 hour lectures; 1 x 2 hour workshop/seminar)

content: The aim of this subject is to examine the immediate cultural forces that have shaped the development of Modern European theatre and to study selected works of the playwrights Büchner, Gogol, Ibsen, Chekhov and Strindberg. Students are expected to understand the theatrical movements of the Nineteenth Century evolving from romanticism to realism and symbolism, to be able to cite and explain evidence from the set playscripts to substantiate the changes and to relate them to the actual staging of the plays and the perceived function of drama in the society of the time. Character, character relationships, the development of dialogue, the style and function of scenic elements, music and design are all considered.

assessment: essay (1,500-2,000 words) (30%); seminar presentation (10%); group presentation (30%); final paper (30%)

#### 1631 History of European Theatre I

level: I points value: 3 duration: semester 1

quota: applies for B.A. students who must fill out an application form, available from the Drama Office

contact hours: 4 hours per week (2 x 1 hour lectures; 1 x 2 hour workshop/seminar)

content: This subject provides an overview of the history of European Theatre from the earliest times to the Nineteenth Century. In each period, the focus is on three main areas: The Content (Script); Production and Acting Methods and Styles; Performing Areas (Stages, Theatres); Audiences (including the social and/or religious background). Seminar workshops enable some of the playscripts to be tried out and discussed by the group. Assistance is provided with some script analysis, essay development and report writing.

assessment: short essay (750 words) (10%), tutorial paper (15%), research paper (2000

#### 6120 Improvisation and Voice IA

level: I points value: 3 duration: semester 1

contact hours: 4 hours per week (1 x 1 hour lecture; 1 x 1 hour tutorial; 1x2 hour workshop.)

content: *The process of drama: the individual and the group, thinking and response:* This section of the subject is designed to develop the personal skills and theoretical understanding of the students in the elements of drama, particularly in concentration, observation, imagination, self-discipline and problem solving. Students are introduced to a greater appreciation of their own creative impulses and to an awareness of both the processes and the structures of drama. *Introduction to the theory and practice of voice production:* The aim of the voice section of this subject is to give the student a sound basis of understanding in the theory and practice of voice production. Content will focus on: an elementary knowledge of anatomy and physiology; an examination of the speech process—breath, note, tone, word—both in theory and practice.

assessment: classwork exercises (26%); individual project (12%); ensemble activity (12%); end of semester written test on voice production (20%); practical tests on breath control, resonance articulation throughout semester (30%)

#### 5147 Improvisation: Principles and Practice IB

level: I points value: 3 duration: semester 2

prerequisite: 6120 Improvisation and Voice IA

contact hours: 4 hours per week (2 x 2 hour lecture workshops)

content: The creation and function of character in drama: Improvisational techniques are used to develop an understanding of character. Special stress is put upon extending the ability of the students to analyse problems and to provide solutions through using drama both as a means of research and as a medium for expression. As an adjunct to this study students pursue a working knowledge of the *commedia dell'arte*, the function of mask and the interplay of image.

Topics include: stillness and action, silence and noise; 'stripping down' to character; the centre; the imagined environment; mime and the power of a property; the refinement of sensory awareness; issue analysis and scenic developments; technical effects and clowning

devices; masking and busking; organisational skills; text and invention; music and song.

*assessment:* weekly workshops (contribution, insights, skill, development) (40%); individual project (written analysis and practice) (35%); group presentation (25%).

### 6394 Technical Theatre Studies I

*level:* I *points value:* 3 *duration:* semester 1

*contact hours:* 3 hours per week

*content:* Backstage equipment and terminology. Lighting and sound equipment operation and control. Stage management. Theatre safety.

*assessment:* classwork (20%); in-class and take-home tests (20%); backstage log book (20%); final technical exercise (practical exam) (40%)

### 1931 Voice and Interpretation IB

*level:* I *points value:* 3 *duration:* semester 2

*prerequisites:* 6120 Improvisation and Voice IA

*contact hours:* 4 hours per week (2 x 1 hour tutorials, 1 x 2 hour lecture/ workshop)

*content:* Continuation of voice production skills begun in Improvisation and Voice IA. Basic phonetics with special study of vowel and consonant formation. Techniques of reading aloud and storytelling. Analysis of the structure and rhythm of a variety of prose passages. The oral interpretation of a variety of texts.

*assessment:* end of semester written test on basic phonetics and voice production (30%), reading aloud, storytelling, vocal tests (30%), individual presentation of 10-15 min program of prose with student-devised introduction and linking narration (30%), participation, preparedness and application (10%).

words) (25%), rehearsal performance (30%), coverage test 10%, participation 10%

## Level II

### 7781 Asian Theatre II

*level:* II *points value:* 4

*availability:* not offered in 1996

*prerequisites:* Level I in Dance, Drama or Music subjects

*contact hours:* 4 hours per week

*content:* An examination and exploration of theatrical theory, aesthetics and practice in certain genres of Asian theatre for example: Noh, Kabuki, Chinese opera. Different concepts of the nature of performing space, the *mise-en-scene*, acting styles, movement-

dance, production methods, the use of music and scenography are studied. These concepts are explored to encourage students in processes of innovation and synthesis. Student projects include research papers or performances utilising Asian Theatre techniques. The subject is taught using a variety of methods, including lectures, demonstrations, practical sessions, workshops, seminars and viewing of documentary films.

*assessment:* 1 seminar paper of 1,500 words (25%); workshop participation and projects (25%); research paper (2,500 words) or performance and log (50%)

### 3302 Arts Administration II

*level:* II *points value:* 4 *duration:* semester 1

*prerequisites:* Level I B.A.(Drama Studies) subjects or lecturer's approval

*contact hours:* Minimum of 120 hours with placement organisation

*content:* Practical experience within an arts environment and within a variety of specialised areas of arts administration such as information service, venue management, youth and education programme, publicity and organising youth arts days.

*assessment:* field experience report (20%); log book of activities (40%); individual research project (40%)

### 8018 Contemporary Australian Drama II

*level:* II *points value:* 4 *duration:* semester 2

*prerequisites:* 2 subjects in Drama at level I; i.e. 7190 History of European Theatre and 4814 Foundations of Modern Theatre.

*contact hours:* 5 hours per week (1 x 3 hour lecture/seminar and 1 x 2 hour lecture/workshop).

*content:* Australian drama, including silent and sound film, radio and TV, leading up to World War II and then to the present the key plays and the playwrights, new wave realism, the APG and Nimrod, present day drama, focusing on violence, corruption, domestic disruption and the force of comedy in contemporary life: Williamson, Hibberd, Nowra, Sewell, Hewett, Radic, de Groen, Davis, Borg and Maris.

*assessment:* continuous, based upon research exercises, written and oral reports, an essay (or equivalent) in review of a contemporary work, personal contribution and group presentation.

### 2256 Improvisation and the Absurd IIA

*level:* II *points value:* 4 *duration:* semester 1

*prerequisites:* 5147 Improvisation: Principles and Practice IB

*contact hours:* 4 hours per week (2 x 2 hour lecture workshops)

*content:* Improvisation techniques: surrealism and the absurd. Selections from key playwrights are studied in the drama laboratory; improvisation is used to explore and report upon the findings, textual materials and vision of each playwright. This brings student skills, introduced at Level 1, to bear upon the textual material. There are set readings and specific research tasks based upon the evolution and characteristic styles of the avant garde in Western theatre during the past century. The playwrights considered are Jarry, Cocteau, Adamov, Arrabal, Beckett, Ionesco, Genet, Albee and Pinter.

*assessment:* Weekly workshops (40%); individual project, including written analysis and practice (35%); group presentation (25%)

### 9638 Improvisation and the Epic IIB

*level:* II *points value:* 4 *duration:* semester 2

*prerequisites:* 2256 Improvisation and the Absurd IIA

*contact:* 4 hours per week (2 x 2 hour seminar/workshops)

*content:* The development of political theatre in the 20th century through its various forms: Epic Theatre, Feminist Theatre, Documentary Theatre, Group Theatre, Street Theatre. Improvisation techniques: epic and documentary theatre. A study of the process of developing theatre pieces in the epic tradition: clowning, cabaret and song... Agitprop: creation and presentation skills; refinement of improvisatory techniques; text, the individual, the group and the audience (role and function).

*assessment:* weekly workshops (40%); individual project, including written analysis and practice (35%); group presentation (25%)

### 8540 Performance Studies II

*level:* II *points value:* 2 *duration:* semester 2

*prerequisites:* approval of the Director of the Elder Conservatorium or the Head of Department of Music Studies

*contact hours:* 2 hours of seminars and workshop a week, rehearsals as required

*content:* Workshops aimed at the integration of music, drama and dance at the creative and performance levels in evolving original theatre works involving music; performance of music theatre pieces from the repertoire

*assessment:* contribution to developmental sessions (50%); performance (30%); log (of 1000 words) 20%

### 8222 Themes in Australian Drama II

*level:* II

*points value:* 4

*availability:* not offered in 1996

*prerequisites:* 2 subjects in Drama at Level I, i.e. 7190 History of European Theatre and 4814 Foundations of Modern Theatre

*contact hours:* 4 hours per week (2 x 1 hour lectures and 1 x 2 hour workshop)

*content:* Predominant themes in Australian drama from the first settlers to the 1930's focusing on migration, bushrangers, the struggle for existence, theatre, promoters, Aboriginal drama, multicultural influences, the changing perspective on men and women, the evolution of the concept 'Australian', the impact of war, mateship and independence, the relevant plays and playwrights.

*assessment:* continuous based upon a major research exercise (40%), written and oral reports (25%), team presentation and personal contributions (35%).

### 2765 Voice and Interpretation IIA

*level:* II *points value:* 4 *duration:* semester 1

*prerequisites:* 1931 Voice and Interpretation 1B and 5147 Improvisation; Principles and Practice 1B.

*contact hours:* 4 hours per week (2 x 1 hour seminars and 1 x 2 hour lecture/workshop)

*content:* Four centuries of poetry. A progressive development of the vocal skills introduced at Level 1 matched to a close study of the theory and interpretation of select works of poetry from the 16th to the 20th centuries. Selections are studied of lyric, narrative, satirical and epic verse. Voice work focuses upon expanding vocal flexibility through a deeper understanding of resonance and range. The vocal techniques necessary for the presentation of a wide variety of verse forms are considered in theory and practice.

*assessment:* progressive vocal tests (20%); seminar on a poet: program design, justification and presentation (30%); end of semester presentation (40%); participation throughout semester (10%).

### 2760 Voice and Interpretation IIB

*level:* II *points value:* 4 *duration:* semester 2

*prerequisites:* 2765 Voice and Interpretation IIA

*contact hours:* 4 hours per week (2 x 1 hour seminars 1 x 2 hour lecture/ workshop)

*content:* Shakespearean verse. Analysis of and practice in the techniques required for the oral interpretation of Shakespeare's blank verse, prose and sonnets; the

structure and imagery of select speeches and sonnets. Continued refinement of voice production skills with particular concern for speech faults, theory and correction.

*assessment:* written test on voice theory (30%); practical exercises in speaking Shakespeare's works (30%); solo presentation of student-devised program (30%); participation throughout semester (10%).

### Level III

---

#### 4805 Asian Theatre III

*level:* III *points value:* 6

*availability:* not offered in 1996

*prerequisites:* Level II in Dance, Drama or Music subjects

*contact hours:* 4 hours per week

*content:* An examination and exploration of theatrical theory, aesthetics and practice in certain genres of Asian theatre for example: Noh, Kabuki, Chinese opera. Different concepts of the nature of performing space, the mise-en-scene, acting styles, movement-dance, production methods, the use of music and scenography are studied. These concepts are explored to encourage students in processes of innovation and synthesis. Student projects include research papers or performances utilising Asian Theatre techniques. The subject is taught using a variety of methods, including lectures, demonstrations, practical sessions, workshops, seminars and viewing of documentary films.

*assessment:* 1 seminar paper of 1,500 words (25%); workshop participation or project (25%); research paper of 3,500 words, or performance and log (50%)

#### 9897 Directing Studies IIIA

*level:* III *points value:* 6 *duration:* semester 1

*prerequisites:* Level II BA (Drama Studies) or lecturer's approval

*assumed knowledge:* 6394 Technical Theatre Studies I

*contact hours:* 5 hours per week, plus rehearsals.

*content:* An introduction to the major concepts and practices in artistic direction and design; play analysis and interpretation; the directorial concept; directing and design exercises. The emergence of the director in the 20th century.

*assessment:* study of a director (essay) (20%); design exercise (10%); theatre reviews (10%); directing and designing exercises (60%)

#### 6039 Directing Studies IIIB

*level:* III *points value:* 6 *duration:* semester 2

*prerequisites:* 9897 Directing Studies IIIA and lecturers approval required

*contact hours:* 5 hours per week plus rehearsals.

*content:* The direction and production of a one-act play or approved alternative. The further study of theory and practice introduced in 9897 Directing Studies IIIA.

*assessment:* production portfolio (40%); performance (40%); Director's seminar (20%)

#### 9496 Performance Studies IIIA

*level:* III *points value:* 6

*availability:* not offered in 1996

*prerequisites:* Level II Drama studies to the value of 16 points or lecturer's approval

*assumed knowledge:* experience in at least one of Dance, Drama or Music.

*contact hours:* 5 hours per week

*content:* Performance studies uses performance as the vehicle to interrelate expression in the performing arts, in order to modify the traditional boundaries of the respective disciplines. The subject focuses upon the theory, aesthetics, and practice of performance through collaboration. Original material and/or interpretations of text-based ideas are frequently the outcome.

The object of the study is that students and staff draw upon their knowledge and skills to discover ways to wed form to content in order to fulfil an agreed upon artistic vision. By adopting a workshop approach moments are conceived, developed and expressed in movement, song, sounds, words and visual images. Short scenes are created and explored through improvisation, original writing, the associations of ideas, choreography and musical composition. Continuing workshopping emphasises craft, the need to work and re-write, and the art of collaboration.

*assessment:* workshop sessions, research contribution and exercises (50%); performance (30%); report and log of activities (20%).

#### 5273 Performance Studies IIIB

*level:* III *points value:* 6

*availability:* not offered in 1996

*prerequisite:* 9496 Performance Studies IIIA

*contact hours:* 5 hours per week

*content:* This subject continues the work of Performance Studies IIIA and seeks to extend the range of means used to analyse concepts and to formulate

means of expression. The intention is that the experimental work be inter-disciplinary and include at least two or more arts disciplines. Wherever possible, alternative spaces are used within the community as centres of expression. Every attempt is made to incorporate writers in the creative team in an effort to expand upon the possibilities for interpretation and to enable writers to gain experiences in structuring their work to the demands of the performing arts. Wherever possible the created works are toured to other institutes and or venues in search of exchange and communication.

*assessment:* negotiations are necessary with each student in order to determine (a) commencement standard; (b) the nature of personal commitment anticipated; (c) performance ability. Accordingly these are in turn equated with work level in class, research and creative skills demonstrated, group contribution, working process, and so the overall participation. From such criteria discussed and agreed upon at the beginning of the semester, percentages are contracted by staff and students.

### 8304 Voice and Interpretation IIIA

*level:* III *points value:* 6 *duration:* semester 1  
*prerequisites:* 2765 Voice and Interpretation IIA and 2760 Voice and Interpretation IIB

*contact hours:* 2 x 1 hour lectures, 1 x 3 hour practicum  
*content:* Radio and associated techniques. Studies, theoretical and practical, in microphone technique: presentation, interviewing; reading, magazine and documentary broadcasting, advertising, radio drama according to the terms of reference of the Australian Broadcasting Tribunal, the ABC and commercial radio. A weekly three-hour practicum allows for studio experience. Voice classes and problems are pursued weekly in continuation of the studies at Level I and II in voice production.

*assessment:* voice classes (10%) and semester report (10%); theoretical paper on broadcasting (20%); individual practice (30%); group-devised radio magazine/program (30%).

### 8681 Voice and Interpretation IIIB

*level:* III *points value:* 6 *duration:* semester 2  
*prerequisites:* 8304 Voice and Interpretation IIIA

*contact hours:* 2 x 1 hour lectures, 1 x 3 hour practicum  
*content:* Researching a theme, the adaptation of written materials and the planning and presentation of a program of reader's theatre: theory and practice. Presentation techniques and interpretation possibilities for both the small group and the class as an ensemble. The testing of this achievement in a public forum.

Voice classes continue weekly, directed towards the continued refinement of voice quality, flexibility and interpretative skill. Students are also required to show knowledge and leadership in voice tutoring by assisting with voice training and problem solving in less advanced classes.

*assessment:* voice class to designated group (20%); Adaptation of a work for Readers' Theatre (25%); Readers' Theatre performance (25%); log book of program research, development and presentation (20%); attendance and participation (10%)

### 4608 Writing for Performance IIIA

*level:* III *points value:* 6 *duration:* semester 2  
*prerequisites:* 7846 Writing for Performance IIIB.

*contact hours:* 4 hours per week (2 x 2 hour workshop/seminars)

*content:* The one - act play. Topics covered in theory and practice include: structure and content; the nature of action; building the scenario; the germinal idea; the source and nature of materials; character; dialogue; time; place; format of presentation. The workshop method used ensures that students tackle a range of writing tasks and keep up their practice. All members of the group are encouraged to expand upon their writing potential. An original one-act playscript is developed by each participant in the final weeks of the study.

*assessment:* workshop participation (20%); interim exercises (30%); one original playscript (50%)

### 7846 Writing for Performance IIIB

*level:* III *points value:* 6 *duration:* semester 1

*prerequisites:* Fours subjects of drama (or equivalent in an arts or science area) with at least two of the subjects being at Level II. A background of creative writing is an important condition; evidence of this is to be submitted to the lecturer before approval for entry is granted.

*quota:* will apply. Some written work must be submitted prior to approval given

*contact hours:* 4 hours per week (2 x 2 hour workshop/seminars)

*content:* Adaptation for other media. The adaptation of materials from one genre to another is at the core of these studies. Students practice adaptation from stage plays, short stories and novels to the media of television, film and radio. Numerous opportunities are provided for the development of materials in a supportive if critically alert workshop atmosphere. Practice is balanced against fundamental matters of theory in all workshop exercises.

*Performing Arts — B.A.(Drama St.)*

*assessment:* interim exercises (30%); weekly contributions (20%); final adaptation/presentation (50%)

**Performing Arts electives**

**1378 Classical Ballet for Non-Majors I**

*syllabus details:* see B.A. (Dance)

**3512 Classical Ballet for Non-Majors II**

*syllabus details:* see B.A. (Dance)

**Honours degree**

**4607 Honours Drama**

*points value:* 24 *duration:* full year

*prerequisites:* The completion of a full course of drama studies covering Levels I, II and III (see Honours Handbook). Entry to Honours Level requires a high level of achievement in undergraduate studies to date. Candidates need to make their interest known to the Coordinator (Honours Drama) no later than mid-September in the year previous to that anticipating entry.

*assessment:* methodology seminar (25%); special drama study (25%); thesis (50%)

## Bachelor of Music (New)

### Syllabuses

#### 5549 Aural Development I

*level:* I    *points value:* 1    *duration:* full year

*assumed knowledge:* All students in their first year of the degree will take an aural test held during Enrolment week to determine in which stream they will begin.

*contact hours:* 1 hour workshop a week

*content:* Aural Development I and II contain within them four possible streams as follows:

**Stream 1:** Notation from dictation, advanced melodies and rhythms; error recognition in melody; rhythm and harmony; notation of complex harmonic progressions; sight singing of melodies that include chromatic alteration.

**Stream 2:** Recognition of triads and dominant sevenths in 4 parts; notation from dictation in 2, 3 and 4 parts of extended harmonic progressions; sight singing of melodies of 4 to 6 bars length in major or minor mode.

**Stream 3:** Recognition and completion of harmonic and melodic intervals; notation from dictation of rhythms 4 to 6 bars in length and 4 bar melodies; recognition of chordal progressions in four parts; sight singing simple melodies in major mode.

**Stream 4:** Recognition of intervals; notation from dictation of simple 4 bar rhythms and melodies; recognition of major, minor, augmented, diminished triads; major, minor, augmented and gypsy tetrachords; sight singing simple melodies in major mode.

*requirement:* Students will normally complete two years of Aural Development. If a student enters at Stream 3 in the first year, then that student will complete Stream 2 in the second year thus fulfilling the requirements for Aural Development I and II. If a student enters at Stream 2 in the first year, then that student will complete Stream I in the second year.

*assessment:* continuous through class exercises (50%) and end of semester tests (50%)

All students must complete and pass at least Stream 4 in order to pass Aural Development I.

#### 7349 Composition Studies I

*level:* I    *points value:* 6    *duration:* full year

*prerequisites:* satisfactory completion of audition and interview

*contact hours:* 1 hour composition lesson a week or equivalent (eg 2 hours per fortnight)

*content:* Studies in the techniques and skills of composition.

*assessment:* folio of compositions/exercises

#### 3353 Counterpoint IA

*level:* I    *points value:* 2    *duration:* full year

*restriction:* 3551 Composers' Workshop I

*contact hours:* 1 hour tutorial per week throughout the year

*content:* Study of the principles of traditional linear counterpoint as a compositional paradigm, proceeding through the five species in two and three parts. Emphasis is placed upon practical activities, in particular the composition of exercises with cantus firmus and in free counterpoint. Some consideration is given to alternative paradigms, including modal and atonal counterpoint.

*assessment:* A folio of counterpoint exercises, 100%

#### 7321 Improvisation I (New)

*level:* I    *points value:* 3    *duration:* full year

*corequisites:* 1662 Performance I (Jazz)

*contact hours:* 3 hours of workshops a week

*content:* Structures of scales and modes; guide tones and their functions; the use of motives in repetition; use of colour tones and tensions; construction of solos; tension and release; pacing chord progressions through the cycles; use of digital patterns through the key cycles in major dorian, minor mixolydian scales; elements of playing time through the use of anticipation and forward motion; understanding Jazz Terminology.

*assessment:* continuous assessment based on participation in class (20%); practical examination at end of each semester (60%); Applied Rhythm Class written and aural examination at the end of each semester (20%)

#### 3130 Instruments for Composers I

*level:* I    *points value:* 2    *duration:* semester 1

*quota:* may apply

*restriction:* 3551 Composers' Workshop I.

*contact hours:* 2 hours of lectures and seminars for 13 weeks

*content:* A practical course of study which introduces the characteristics and techniques of standard musical instruments. Students will apply the information gained to short compositions or arrangements for solo instruments and small ensembles. This subject is not restricted to composition students only.

*assessment:* A folio of compositions and exercises 100%

### 1423 Introduction to Ethnomusicology I

*level:* I *points value:* 1 *duration:* semester 1

*corequisites:* 1935 Music Theory I

*contact hours:* 2 one hour lectures per week for seven weeks

*content:* Introduction to the major principles of Ethnomusicology; music as a cultural expression of society.

*assessment:* 2 hour examination based on repertoire and general knowledge

### 3379 Introduction to Music History I

*level:* I *points value:* 2 *duration:* semester 2

*prerequisites:* 1268 Introduction to Music Literature I

*corequisites:* 1935 Music Theory I

*contact hours:* 2 one hour lectures per week

*content:* An introduction to representative works of the Western tradition, as well as a discussion of various approaches to the history of Music.

*assessment:* 1,500 word essay (50%); examination (50%)

### 1268 Introduction to Music Literature I

*level:* I *points value:* 1 *duration:* semester 1

*corequisites:* 1935 Music Theory I

*contact hours:* 1 hour lecture per week

*content:* Introduction to the study of music in the University context and Australian society; retrieval and evaluation of sources of music literature; citation styles and essay writing.

*assessment:* 1 library workbook (25%); 2 hour examination based on bibliographic and study skill exercises

### 1569 Jazz Ensemble Small I

*level:* I *points value:* 3 *duration:* full year

*corequisites:* 1662 Performance I (Jazz); 7321 Improvisation I (New)

*contact hours:* 2 ninety minute supervised rehearsals and 1 hour of Jazz Forum a week

*content:* Students will study the roles of band leader, soloist, sideman and rhythm section player. Materials used will be drawn from the first year course song list or other songs as introduced at the discretion of the teacher. Students must perform at Forum at least once a semester.

*assessment:* there is an examination of 30 minutes playing time at the end of semesters 1 and 2, the results of which comprise 50% of the semester grade. Continuous assessment for the semester comprises the other 50%.

### 5389 Jazz Keyboard I

*level:* I *points value:* 2 *duration:* full year

*contact hours:* 1 hour workshop a week

*content:* Technical keyboard skill, chord construction, scales, blues progressions, sight reading, accompaniment styles and simple chord voicing.

*assessment:* participation in class (25%), 2 examinations at the end of each semester (75%)

### 7320 Jazz Theory I (New)

*level:* I *points value:* 3 *duration:* full year

*contact hours:* 2 hours of lectures or tutorials a week

*content:* To introduce and develop basic concepts in Jazz Theory; digital and basic jazz patterns.

*assessment:* weekly class exercises (50%); written and practical examinations at the end of semester 1 and 2 (50%)

### 6421 Jazz Workshop IA

*level:* I *points value:* 4 *duration:* full year

*quota:* will apply

*corequisite:* Jazz Theory I

*contact hours:* 2 hours a week

*content:* The study of basic jazz improvisation techniques and small jazz ensemble skills with specific reference to various jazz standards and bebop tunes. Also a study of the above in relation to various jazz styles: traditional, swing and bebop.

*assessment:* continuous assessment based on class participation and assignments comprises 50%. A practical and written examination at the end of each semester comprises the other 50%.

### 5889 Large Jazz Ensemble I

*level:* I *points value:* 2 *duration:* full year

*corequisites:* 1662 Performance I (Jazz)

*contact hours:* 3 hours of supervised rehearsals a week

*content:* Study and practical implementation of Big Band and Large Jazz Ensemble repertoire. Consistent study and practice of the elements comprising large jazz ensemble playing through rhythm exercises, intonation, balance practice and sight reading.

*assessment:* continuous assessment in ensemble throughout the year

### 1935 Music Theory I

*level:* I      *points value:* 3      *duration:* full-year

*assumed knowledge:* Semester 2 assumes a good working knowledge of the elements of diatonic harmony. Students with insufficient background may attend a remedial theory class in semester 1.

*contact hours:* 2 hour lecture per week in semester 1; 2 hour class per week in semester 2

*content:* Semester 1: The sciences of musical sound: The nature of sound and the physical laws governing it; the nature of "musical" sound in particular; the production of musical sound by the various instrumental families; the basic principles of electronic generation of sound through synthesis and sampling; the basic principles of the psychoacoustics of music, psychology of music and architectural acoustics. Semester 2: Musical language in the Classical Era (c.1750-1800): The musical language, forms, techniques and stylistic features of classical music will be studied through analysis of appropriate repertoire and exercises in imitative composition. This will include: chords and chord progressions commonly found in classical music; techniques of harmonic and melodic embellishment; modulation; thematic development; classical forms such as sonata, variation, rondo, minuet and trio.

*assessment:* semester 1: 2 hour examination (50%); semester 2: 3 exercises in imitative composition (30%), 2 hour analysis examination (20%)

### 4650 Music Education IM (New)

*level:* I      *points value:* 6      *duration:* full year

*contact hours:* 4 hours of lectures or workshops per week

*content:* Stylistic aspects of rhythm section writing; modern harmony and elementary arranging and composition concepts; techniques of improvisation in jazz and contemporary forms. Introduction to music education literature, with an emphasis on the Australian context. Participation in rehearsals and performances of Music Education choir. Woodwind methodology, involving learning about the woodwind family, gaining experience in playing a woodwind instrument and basic methodology.

*assessment:* regular class work (50%) which includes exercises, practical demonstrations and written test; 1000 word essay (30%), and woodwind methodology journal (20%).

### 1662 Performance I (Jazz)

*level:* I      *points value:* 8      *duration:* full year

*prerequisites:* satisfactory completion of audition

*corequisites:* 7321 Improvisation I (New); 7320 Jazz Theory I (New)

*contact hours:* 1 hour a week of individual tuition; 2 hour performance class a week

*content:* The application of basic improvisational techniques such as modal scales and patterns to the jazz repertoire; the learning of various styles such as bop and jazz and melodies and chord changes to 'standard' songs.

*assessment:* teacher's report (25%); performance class (25%); end of year examination of 30 minutes (50%)

### 7231 Technical Studies in Composition I

*level:* I      *points value:* 4      *duration:* full year

*corequisites:* 7349 Composition Studies I

*contact hours:* 2 hours of lectures, tutorials or workshops a week

*content:* The resources, techniques and styles of composition, with special emphasis on 20th Century music.

*assessment:* regular assignments throughout the year

## Level II

---

### 1222 Aural Development II

*level:* II      *points value:* 1      *duration:* full year

*prerequisites:* 5549 Aural Development I

*contact hours:* 1 hour workshop a week

*content:* Aural Development II contains three possible streams as follows:

Stream 1: Notation from dictation, advanced melodies and rhythms; error recognition in melody; rhythm and harmony; notation of complex harmonic progressions; sight singing of melodies that include chromatic alteration.

Stream 2: Recognition of triads and dominant sevenths in 4 parts; notation from dictation in 2, 3 and 4 parts of extended harmonic progressions; sight singing of melodies of 4 to 6 bars length in major or minor mode.

**Stream 3:** Recognition and completion of harmonic and melodic intervals; notation from dictation of rhythms 4 to 6 bars in length and 4 bar melodies; recognition of chordal progressions in four parts; sight singing simple melodies in major mode.

**requirement:** Students will normally complete two years of Aural Development. If a student enters at Stream 3 in the first year, then that student will complete Stream 2 in the second year thus fulfilling the requirements for Aural Development I and II. If a student enters at Stream 2 in the first year, then that student will complete Stream I in the second year.

**assessment:** continuous through class exercises (50%) and end of semester tests (50%)

All students must complete and pass at least Stream 3 in order to pass Aural Development II.

### 4270 Baroque Music II

**level:** II **points value:** 2 **duration:** semester 1

**prerequisites:** 1268 Introduction to Music Literature I; 3379 Introduction to Music History I; 1935 Music Theory I

**contact hours:** 1 hour lecture and 1 hour tutorial a week

**content:** Prima and secunda prattica; rise of opera; establishment of 17th and early 18th instrumental genres; seminars on detailed analysis and study of complete works.

**assessment:** 2,000 word essay (40%); 1,500 word analytic study or equivalent (40%); tutorial presentations (20%)

### 5797 Composers' Workshop II

**level:** II **points value:** 2 **duration:** full year

**prerequisites:** 3130 Instruments for Composers I or any other subject approved by the Head of Department

**contact hours:** 2 hours of seminars or workshops a week

**content:** A weekly workshop during which aspects of composition practice and presentation are shared and discussed.

**assessment:** workshop presentations (50%); development of special project (50%)

### 1548 Composition Studies II

**level:** II **points value:** 6 **duration:** full year

**prerequisites:** 7349 Composition Studies I; 7231 Technical Studies in Composition I; 3353 Counterpoint IA; 3130 Instruments for Composers I

**corequisites:** 7642 Music Theory II; 7736 Orchestration Workshop II

**contact hours:** 1 hour composition lesson a week or equivalent (eg 2 hours per fortnight)

**content:** Studies in composition, including composition for various instrumental and vocal ensembles such as small orchestra, choir and solo voice.

**assessment:** folio of compositions/exercises

### 5355 Early 20th Century Modernism II

**level:** II **points value:** 2 **duration:** semester 1

**prerequisites:** 3379 Introduction to Music History I

**contact hours:** 1 hour lecture and 1 hour tutorial a week

**content:** Music in Europe from 1890 to the Second World War, including Debussy, Stravinsky, Bartok and the Second Viennese School; seminars on detailed analysis and study of complete works or substantial portions of complete works.

**assessment:** 2,000 word essay (50%); examination (50%)

### 1685 Ethnomusicology II

**level:** II **points value:** 4 **duration:** full year

**prerequisites:** 1423 Introduction to Ethnomusicology I

**contact hours:** 2 hour seminar a week

**content:** semester 1: History and philosophy of Ethnomusicology. Techniques of information collecting and analysis; semester 2: Regional studies of Music such as Asia, Oceania and Africa. Student Presentations.

**assessment:** semester 1: 750 word assignment and 3,000 word essay; semester 2: 3,500 word essay and presentation to seminar

### 9314 Improvisation II (New)

**level:** II **points value:** 3 **duration:** full year

**prerequisites:** 7321 Improvisation I (New)

**contact hours:** 3 hours a week

**content:** Development of phrasing and rhythm; forward motion, chromaticism, digital patterns, guide tones, use of altered scales; relaxation playing at speed; accompanying, polyrhythms, reharmonisation, application of modes, pentatonic scales, melodic development techniques, polychords in contemporary improvisation; playing an introduction, playing a coda or cadenza; unaccompanied playing, chord substitution systems.

**assessment:** continuous assessment based on participation in class (20%), written and practical examination at end of each semester (60%); Applied Rhythm Class written and aural examination at the end of each semester (20%)

### 1212 Jazz Arranging II

level: II points value: 2 duration: full year

prerequisites: 7320 Jazz Theory I (New)

corequisite: 2008 Jazz Theory II

contact hours: 1 hour a week

content: Skills in developing working arrangements for typical small jazz ensemble combinations.

assessment: regular class assignments (70%); examinations at the end of each semester 30%

### 4602 Jazz Ensemble Small II

level: II points value: 3 duration: full year

prerequisites: 1569 Jazz Ensemble Small I

corequisites: 8010 Performance II (Jazz); 9314 Improvisation II (New); 2008 Jazz Theory II

contact hours: 3 hours of supervised rehearsals and 1 hour of Jazz Forum a week

content: Students will study the roles of band leader, soloist, sideman and rhythm section player. Materials used will be drawn from the first year course song list or other songs as introduced at the discretion of the teacher. Students must perform at Forum at least once a semester.

assessment: There is an examination of 30 minutes playing time at the end of semesters 1 and 2, the results of which comprise 50% of the semester grade. Continuous assessment for the semester comprises the other 50%.

### 5021 Jazz Keyboard II

level: II points value: 1 duration: full year

prerequisites: 5839 Jazz Keyboard I.

contact hours: 1 hour workshop a week

content: Contemporary chord voicings; use of scales; left hand jazz styles; tune syllabus study.

assessment: participation in class (25%); two examinations, one at the end of each semester (75%)

### 5451 Jazz Styles (Listening and Analysis)

level: II points value: 2 duration: full year

prerequisites: 1268 Introduction to Music Literature I; 1423 Introduction to Ethnomusicology

contact hours: 1 hour lecture or tutorial a week

content: Analysis of various styles of jazz ranging from New Orleans to contemporary; musical concepts in jazz styles; the role of instruments; study of set works.

assessment: 2,000 word essay (35%); 1 hour listening and general knowledge test, which may include style recognition (20%); 2,000 word analytic study or equivalent (35%); tutorial presentations (10%)

### 2008 Jazz Theory II

level: II points value: 2 duration: full year

prerequisites: 7320 Jazz Theory I (New)

contact hours: 2 hour lecture or tutorial a week

content: To develop further study of scales, modes, chords and chord substitution, in angular intervals; skills in jazz arranging for various instrumental groups.

assessment: weekly class exercises (50%); written and practical examinations at the end of semester 2 (50%)

### 9641 Jazz Workshop II

level: II points value: 4 duration: full year

quota: will apply

prerequisite: Jazz Workshop I

contact hours: 2 hours a week

content: The study of jazz improvisation techniques and small jazz ensemble skills with specific reference to various jazz standards, bebop tunes, modal tunes, ballads and contemporary jazz.

assessment: continuous assessment based on class participation and assignments comprises 50%. A practical and written examination at the end of each semester comprises the other 50%.

### 4557 Large Jazz Ensemble II

level: II points value: 2 duration: full year

prerequisites: 5889 Large Jazz Ensemble I

contact hours: 3 hours of supervised rehearsals a week

content: Study and practical implementation of Big Band and Large Jazz Ensemble repertoire. Consistent study and practice of the elements comprising large jazz ensemble playing through rhythm exercises, intonation, balance practice and sight reading.

assessment: continuous assessment in ensembles throughout the year

### 8986 Later 18th and Early 19th Century Music II

level: II points value: 2 duration: semester 2

availability: odd years only

prerequisites: 1268 Introduction to Music Literature I; 3379 Introduction to Music History I; 1935 Music Theory I

contact hours: 1 hour lecture and 1 hour tutorial a week

content: The sonata principle; opera from Gluck to Weber; seminars on detailed analysis and study of complete works or substantial portions of complete works.

assessment: 2,000 word essay (40%); 2,000 word analytic study or equivalent (40%); tutorial presentations (20%)

### 7217 Medieval Music II

level: II points value: 2

availability: not offered in 1996

prerequisites: 1268 Introduction to Music Literature I; 3379 Introduction to Music History I; 1935 Music Theory I

contact hours: 1 hour lecture a week and 1 hour tutorial a week

content: Aspects of music in medieval Europe; basic techniques of modes, hexachords, musica ficta, rhythmic and polyphonic developments. The liturgical repertoires of plainsong, Ars Antiqua and Ars Nova; secular song and dance music; Seminars on detailed analysis and study of complete works; programmed listening tasks.

assessment: 2,000 word essay (35%); 1 hour repertoire and general knowledge test, which may include score recognition (20%); 2,000 word analytic study or equivalent (35%); tutorial presentation (10%)

### 5553 Music Education IIM (New)

level: II points value: 6 duration: full year

prerequisites: 4650 Music Education IM (New) and a Level I Performance subject (either IB or IE)

corequisite: A Level II performance subject either IIB or IIE

contact hours: 5 hours of lectures or workshops a week

content: Principles of arranging music for a variety of ensembles; concepts of composition; basic conducting techniques; observation visits to a variety of schools; issues in music education literature including methods and strategies in use in Australia, the UK and the USA; introduction to the application of technology in music education; participation in rehearsals and performances of Music Education Band and Choir involving repertoire of classical and popular genres. Brass methodology, involving learning about the brass family, gaining experience in playing a brass instrument and basic methodology.

assessment: regular class work (15%) which includes exercises and listening analysis; journal on school visits and 1500 word essay (20%), composition (25%), major arrangement (20%) and brass methodology journal (20%).

### 5384 Music since the 1940s II

level: II points value: 2 duration: semester 2

prerequisites: 5355 Early Twentieth Century Modernism II.

contact hours: 1 hour lecture and 1 hour tutorial a week

content: Music from 1940 to the present day including the later Stravinsky; music in France, Germany, England and Australia; post-Webern styles, post-Modernism, electro-acoustic music; seminars on detailed analysis and study of complete works or substantial portions of complete works.

assessment: 2,000 word essay (50%); one tutorial paper (50%)

### 7642 Music Theory II

level: II points value: 3 duration: full year

prerequisites: 1935 Music Theory I

contact hours: 2 hour class per week

content: Semester 1: Musical language in the Baroque Era (c.1700-1750). assessment: semester 1: 3 exercises in imitative composition (30%); 2 hour analysis examination (20%); semester 2: 3 exercises in imitative composition (30%); 2 hour analysis examination (20%)

### 9879 Musicology II

level: II points value: 4 duration: full year

prerequisites: 1268 Introduction to Music Literature I; 1423 Introduction to Ethnomusicology, 3379 Introduction to Music History I, 1935 Music Theory I.

corequisites: 7642 Music Theory II

contact hours: 2 hour seminar a week

content: semester 1: Introduction to music historiography; semester 2: The aesthetics of music.

assessment: 2 seminar papers (20%); a bibliographic project (20%); an essay of 1500 words (20%); an essay of 3000 words (20%)

**8010 Performance II (Jazz)**

level: I points value: 8 duration: full year

prerequisites: 1662 Performance I (Jazz); 7321 Improvisation I (New); 7320 Jazz Theory I (New)

corequisites: 9314 Improvisation II (New); 2008 Jazz Theory II

contact hours: 1 hour a week of individual instruction, 2 hours a week of performance classes

content: Progressive technique appropriate to the student's level of attainment supported by the content of Improvisation II.

assessment: teacher's report (15%); performance class (25%); end of year examination of 40 minutes (60%)

**6688 Renaissance Music II**

level: II points value: 2

availability: not offered in 1996

prerequisites: 1268 Introduction to Music Literature I; 3379 Introduction to Music History I; 1935 Music Theory I

contact hours: 1 hour lecture a week and 1 hour tutorial a week

content: Aspects of 15th and 16th century music; especially polyphonic liturgical music; music drama, secular vocal and instrumental music; seminars on detailed analysis and study of complete works; programmed listening tasks.

assessment: 2,000 word essay (35%); 1 hour repertoire and general knowledge test, which may include score recognition (20%); 2,000 word analytic study or equivalent (35%); tutorial presentations (10%)

**7960 Technical Studies in Composition II**

level: II points value: 4 duration: full year

prerequisites: 7349 Composition Studies I; 7231 Technical Studies in Composition I

corequisites: 1548 Composition Studies II

contact hours: 2 hours of lectures, tutorials or workshops a week

content: Advanced study in the resources, techniques and styles of 20th century music.

assessment: regular assignments throughout the year

**Level III**

**3408 American Pathfinders in Music III**

level: III points value: 2 duration: semester 2

quota: may apply

prerequisites: 7642 Music Theory II

contact hours: 2 hours of seminars a week for 12 weeks

content: The study of two of the most original and free-thinking composers of any age or nationality: Charles Ives and John Cage. The project will also include a study of the philosophers (Thoreau and Emerson), writers (Poe, Melville, Hawthorne) and painters (Pollock, Rauschenberg and Kooning).

assessment: 3,500 word essay

**5915 Australian Music III**

level: III points value: 1 duration: semester 1

prerequisites: any level II subjects in the Common Core of studies to the value of 8 points

contact hours: 1 hour lecture or seminar weekly

content: To introduce historical perspectives and draw together and consolidate an understanding of various styles of music in contemporary Australian society.

assessment: assignment with study package (100%)

**3392 Chinese Music III**

level: III points value: 2 duration: semester 1

quota: may apply

prerequisites: 1423 Introduction to Ethnomusicology I and 7642 Music Theory II.

contact hours: 2 hours of seminars a week for 12 weeks

content: A study of Chinese instrumental music and Chinese theatre with 2 broad themes: (i) a general introduction to traditional Chinese instruments, including the characteristics and techniques of instruments such as Pipa, Zheng, Er hu, Di zi, Sheng, with a special emphasis on the music and notation of the 7 string zither (Qin); (ii) the main forms of Chinese theatre; Beijing opera, Kun qu, Chuan ju, Yue ju, including general characteristics (plays, staging, character-roles, etc) and a study of the music of Beijing Opera.

assessment: 3,500 word essay

**3035 Composers' Workshop III**

level: III points value: 2 duration: full year

prerequisites: 5797 Composers' Workshop II

contact hours: 2 hours of seminars or workshops a week

content: A weekly workshop during which aspects of composition practice and presentation are shared and discussed.

assessment: workshop presentations (50%); development of a special project (50%)

### 3122 Composition in Australia III

level: III points value: 2 duration: semester 2

quota: may apply

prerequisites: 7642 Music Theory II.

corequisites: 5915 Australian Music III

contact hours: 2 hours of lectures and seminars for 13 weeks

content: An exploration of the achievement of composers in Australia in the 150 years between 1840 and 1990, beginning with the work of the migrant composers Nathan, Linger, Horsley and Marshall-Hall and concluding with the maturity of the generation of Sculthorpe's and Meale's pupils. ### 8075 Improvisation III

*level:* III *points value:* 3 *duration:* full year

*prerequisites:* 9314 Improvisation II (New)

*contact hours:* 2 hours a week of workshops

*content:* Advanced techniques of improvisation in all styles.

*assessment:* continuous assessment based on participation in class (20%); practical examination at end of each semester (80%)

### 1516 Japanese Music III

*level:* III *points value:* 2

*availability:* not offered in 1996

*quota:* may apply

*prerequisites:* 1423 Introduction to Ethnomusicology I and 7642 Music Theory II.

*contact hours:* 2 hours of seminars a week for 12 weeks

*content:* This subject offers broader perspectives for Music History students and also serves as an adjunct to Ethnomusicology subjects. It offers a method and concepts for studying Japanese music and it provides an overview of performance practice and musical genres in Japan.

### 3382 Jazz Arranging III

*level:* III *points value:* 2 *duration:* full year

*prerequisites:* 1212 Jazz Arranging II; 2008 Jazz Theory II

*corequisite:* 4838 Jazz Theory III

*contact hours:* 1 hour a week

*content:* Advanced techniques in textural and harmonic procedures and arranging for small and large jazz ensembles.

*assessment:* regular class assignments (50%); a major arranging project (50%)

### 3395 Jazz Ensemble Small III

*level:* III *points value:* 3 *duration:* full year

*prerequisites:* 4602 Jazz Ensemble Small II

*corequisites:* 7054 Performance III (Jazz); 8075 Improvisation III

*contact hours:* 3 hours of supervised rehearsals and 1 hour of Jazz Forum a week

*content:* Students will study the roles of band leader, soloist, sideman and rhythm section player. Materials used will be drawn from the first year course song list or other songs as introduced at the discretion of the teacher. Students must perform at Forum at least once a semester.

*assessment:* there is an examination of 30 minutes playing time at the end of semesters 1 and 2, the results of which comprise 50% of the semester grade. Continuous assessment for the semester comprises the other 50%.

### 4377 Jazz History III

*level:* III *points value:* 2 *duration:* full year

*prerequisites:* 5451 Jazz Styles (Listening and Analysis)

*contact hours:* 1 hour lecture or tutorial a week

*content:* A historical and sociological study of the African influence on American jazz and subsequent developments in the twentieth century.

*assessment:* 2,000 word essay (35%); 1 hour listening and general knowledge test, which may include style recognition (20%); 2,000 word analytic study or equivalent (35%); tutorial presentations (10%)

### 4838 Jazz Theory III

*level:* III *points value:* 3 *duration:* full year

*prerequisites:* 7320 Jazz Theory I (New)

*contact hours:* 2 hours of lectures or tutorials a week

*content:* Advanced studies in the analysis of jazz voicings, rhythm, harmony and improvisation techniques; practical application of theoretic concepts and techniques.

*assessment:* weekly class exercises (50%); written and practical examinations at the end of semester 2 (50%)

### 1459 Jazz Workshop III

*level:* III *points value:* 4 *duration:* full year

*quota:* will apply

*prerequisite:* Jazz Workshop II

*contact hours:* 2 hours a week

*content:* An advanced study of jazz improvisation techniques and small jazz ensemble skills with specific reference to various jazz standards, bebop tunes, modal/ bop tunes and contemporary jazz styles.

*assessment:* continuous assessment based on class participation and assignments comprises 50%. A practical and written examination at the end of each semester comprises the other 50%.

*assessment:* 3,500 word essay

### 8964 Large Jazz Ensemble III

*level:* III *points value:* 2 *duration:* full year

*prerequisites:* 4557 Large Jazz Ensemble II

*contact hours:* 3 hours of supervised rehearsals a week

*content:* Study and practical implementation of Big Band and Large Jazz Ensemble repertoire. Consistent study and practice of the elements comprising large jazz ensemble playing through rhythm exercises, intonation, balance practice and sight reading.

*assessment:* continuous assessment in ensembles throughout the year

### 5364 Music Education III

*level:* III *points value:* 6 *duration:* full year

*prerequisites:* 5553 Music Education IIM (New) and a level II Performance Subject (either IIIB or IIE)

*corequisite:* a level III performance subject either IIIB or IIE

*contact hours:* 5 hours of lectures or workshops per week

*content:* Issues in music education literature, including basic principles of teaching and learning; technology in music education; history of jazz and popular music; composition for ensembles; school music ensemble experience program; participation in, and direction of, Music Education Band and Choir which include a broad range of repertoire; string methodology, involving learning about the string family, gaining

experience in playing a string instrument and basic methodology.

*assessment:* Regular class work (15%) which includes exercises and journal on jazz and popular music history; 1500 word essay (15%); composition (15%); school music ensemble experience package (35%); and string methodology journal (20%).

### 4851 Music Theory III

*level:* III *points value:* 3 *duration:* full year

*prerequisites:* 7642 Music Theory II

*contact hours:* 2 hour class per week

*content:* semester 1: musical language in the Romantic Era (c.1800-1850). The harmonic language, forms, techniques and stylistic features of romantic music will be studied through analysis of appropriate repertoire and exercise in imitative composition. This will include chords and chord progressions commonly found in romantic music, techniques of harmonic and melodic embellishment; continuous modulation; chromatic harmony; romantic forms such as the lied and piano miniature; semester 2: options. *assessment:* semester 1: 3 exercises in imitative composition (30%); 2 hour analysis examination (20%). semester 2: a folio of assignments (50%)

### 9189 Musicology IIIA

*level:* III *points value:* 6 *duration:* full year

*prerequisites:* 9879 Musicology II

*contact hours:* 2 hour seminar a week

*content:* semester 1: Introduction to the history of music theory; semester 2: Issues and techniques in early music studies.

*assessment:* four seminars and essays of 3000 words

### 1256 Musicology IIIB

*level:* III *points value:* 6 *duration:* full year

*contact hours:* 2 hour seminar/workshop a week

*content:* semester 1: topic in historical musicology; semester 2: Australian studies

*assessment:* four seminars and essays of 3000 words each

### 4127 Musicology IIIC

*level:* III *points value:* 6 *duration:* full year

*prerequisites:* 7642 Music Theory II. A reading knowledge of a foreign language is highly recommended.

*restriction:* 9879 Musicology II

*contact hours:* 2 hour seminar a week

*content:* semester 1: Introduction to music historiography; semester 2: either Issues and techniques in early music studies or Australian studies or the aesthetics of music

*assessment:* 1 seminar paper (10%); a bibliographical project (20%); an essay of 2000 words (20%); two seminars and papers of 3000 words each (50%)

### 7054 Performance III (Jazz)

*level:* III *points value:* 8 *duration:* full year

*prerequisites:* 8010 Performance II (Jazz); 9314 Improvisation II (New)

*corequisites:* 8075 Improvisation III

*contact hours:* 1 hour a week of individual instruction, 2 hours of performance classes a week

*content:* Progressive technique appropriate to the student's level of attainment supported by the content of 9314 Improvisation II (New).

*assessment:* performance class (25%); end of year examination or recital of 60 minutes (75%)

### 7564 Technical Studies in Composition III

*level:* III *points value:* 4 *duration:* full year

*prerequisites:* 1548 Composition Studies II; 7960 Technical Studies in Composition II; 5797 Composers' Workshop II

*corequisites:* 4862 Composition Studies III

*contact hours:* 2 hours of lectures, tutorials or workshops a week

*content:* Advanced study in the resources, techniques and styles of 20th century music.

*assessment:* regular assignments throughout the year

### 7140 Wagner III

*level:* III *points value:* 2

*availability:* not offered in 1996

*quota:* may apply

*prerequisites:* 7642 Music Theory II

*contact hours:* 2 hours of seminars a week for 12 weeks

*content:* A survey of Wagner's life; his musical, dramatic and literary output; his operatic theories; his influence on the arts and society. A number of particular works will be studied in detail, illustrated by videos from Bayreuth and other opera houses.

*assessment:* 3,500 word essay

## Elective subjects

### 4433 Asian Performance I

*level:* I

*points value:* 1

*availability:* not offered in 1996

*contact hours:* 1 hour a week

*content:* Practical experience and insights into the performance of Asian Music; attention will be focused on zithers of Asia, particularly the Japanese koto.

*assessment:* regular attendance and participation

### 6683 Brass Ensemble I

*level:* I *points value:* 2 *duration:* full year

*prerequisites:* satisfactory audition

*corequisites:* 2600 Performance I (Brass)

*contact hours:* 2 hours per week of supervised rehearsals

*content:* Rehearsal and performance of compositions for large brass ensemble

*assessment:* 60% of the assessment will reflect the level of achievement of the ensemble as a whole as demonstrated in rehearsals and performances. 40% of the assessment will reflect each individual student's contribution, including punctuality, professionalism of approach, promptness in returning performance parts etc. 100% attendance is required except in cases of illness or approved leave. Non-compliance will result in failure for the subject or a lowering of the final grade.

### 6289 Broadcasting Techniques I

*level:* I *points value:* 2 *duration:* full year

*quota:* may apply

*prerequisites:* satisfactory completion of an audition

*contact hours:* 1 hour workshop a week or equivalent (eg 2 hour training session for half semester; supervised production sessions)

*content:* Production and presentation of radio programs under the supervision of the staff of Radio 5UV.

*assessment:* satisfactory completion of workshops (30%); production of a concert broadcast (30%); one prepared and presented radio program (40%)

### 3269 Chamber Music I

*level:* I *points value:* 2 *duration:* full year

*corequisites:* one of the performance subjects designated I, II, III, or IE, IIE, IIE

*contact hours:* 2 hours of classes and supervised rehearsals a week

*content:* To rehearse and perform works for chamber ensemble (ie one person to a part).

*assessment:* satisfactory participation in rehearsals and performances, plus examinations at the end of each semester.

### 1727 Chamber Music IA

*level:* I *points value:* 2 *duration:* full year

*prerequisites:* satisfactory audition

*corequisites:* 3269 Chamber Music I, 7880 Chamber Music II or 9050 Chamber Music III

*contact hours:* 2 hours of classes and supervised rehearsals per week

*content:* Rehearsal and performance of works for chamber ensemble (i.e. one person per part)

*assessment:* Satisfactory participation in rehearsals and performances plus examinations at the end of each semester

### 8341 Chamber Orchestra I

*level:* I *points value:* 2 *duration:* full year

*prerequisites:* satisfactory audition

*contact hours:* 3 hours of supervised rehearsal per week (or equivalent)

*content:* Rehearsal and performance of repertoire for Chamber Orchestra

*assessment:* 60% of the assessment will reflect the level of achievement of the ensemble as a whole as demonstrated in rehearsals and performances. 40% of the assessment will reflect each individual student's contribution, including punctuality, professionalism of approach, promptness in returning performance parts etc. 100% attendance is required except in cases of illness or approved leave. Non-compliance will result in failure for the subject or a lowering of the final grade.

### 1378 Classical Ballet for Non-Majors I

*syllabus details:* see B.A.(Dance)

### 5187 Contemporary Music Ensemble I

*level:* I *points value:* 2 *duration:* full year

*corequisites:* one of the Performance subjects designated I, II, III, or IE, IIE, IIIIE or IB, IIB, IIIB

*contact hours:* 2 hours of classes and supervised rehearsals a week

*content:* To rehearse and perform works for varying chamber ensembles (to include voice) from the twentieth century; improvisational techniques and non-traditional notation will also be studied.

*assessment:* satisfactory participation in rehearsals and performances

### 1786 Early Keyboard Technique I

*level:* I *points value:* 2 *duration:* full year

*quota:* will apply

*prerequisites:* satisfactory audition

*contact hours:* 1 hour tutorial a week

*content:* An introduction to the technique of Harpsichord playing with special consideration of touch, articulation, fingering, expressive effects. Introduction to the early keyboard repertoire from the 16th century to the late 18th century with practical applications to the harpsichord, organ, clavichord and forte-piano. Development of keyboard harmony skills, accompanying from figured bass.

*assessment:* weekly performance in the workshops (40%); performance of one piece and one accompaniment at the end of each semester (60%)

### 6468 Early Music Workshop I

*level:* I *points value:* 2 *duration:* full year

*corequisites:* one of the performance subjects designated I, II, III, or IE, IIE, IIIIE or IB, IIB, IIIB

*contact hours:* 2 hours of classes and supervised rehearsals a week

*content:* To rehearse and perform works for chamber ensemble (ie one person to a part), on instruments appropriate to music up to 1800, or in voice.

*assessment:* satisfactory participation in rehearsals and performances, including examinations at the end of each semester

### 6606 Hatha Yoga I

*syllabus details:* see B.A.(Dance)

### 3135 Italian for Singers

*level:* I *points value:* 2 *duration:* full year

*content:* Basic Italian grammar and pronunciation with guidance in the use of suitable dictionaries and language reference works. This will be accompanied by translation work at an appropriate level. Tutorials concentrate on the pronunciation and intonation of Italian relating to selected sung texts.

*assessment:* regular class assignments (50%); 2 hour written examination and oral examination at the end of semester 2 (50%)

### 6520 Large Ensemble Experience I

*level:* I *points value:* 2 *duration:* full year

*prerequisites:* satisfactory completion of audition

*contact hours:* 3 hours of supervised rehearsals a week

*content:* Experience in 1 of the following ensembles for two semesters: Adelaide University Choral Society (AUCS), Big Band, Chamber Choir, Chamber

Orchestra, Jazz Vocal Ensemble, Orchestra, Studio Ensemble, Wind Ensemble or such other large ensembles that may be constituted.

*assessment:* 60% of the assessment will reflect the level of achievement of the ensemble as a whole as demonstrated in rehearsals and performances. 40% of the assessment will reflect each individual student's contribution, including punctuality, professionalism of approach, promptness in returning performance parts etc. 100% attendance is required except in cases of illness or approved leave. Non-compliance will result in failure for the subject or a lowering of the final grade.

### 1338 Large Ensemble Experience IA

*level:* I     *points value:* 2     *duration:* full year

*prerequisites:* satisfactory completion of audition

*corequisites:* Large Ensemble Experience I

*contact hours:* 3 hours of supervised rehearsals a week

*content:* Experience in 1 of the following ensembles or an alternative approved by the Director of the Elder Conservatorium): Adelaide University Choral Society (AUCS), Big Band, Chamber Choir, Chamber Orchestra, Jazz Vocal Ensemble, Orchestra, Studio Ensemble, Wind Ensemble or such other large ensembles that may be constituted. No activity may be taken which is being counted towards any other ensemble subject.

*assessment:* 60% of the assessment will reflect the level of achievement of the ensemble as a whole as demonstrated in rehearsals and performances. 40% of the assessment will reflect each individual student's contribution, including punctuality, professionalism of approach, promptness in returning performance parts etc. 100% attendance is required except in cases of illness or approved leave. Non-compliance will result in failure for the subject or a lowering of the final grade.

### 9300 Large Ensemble (Wind) I

*level:* I     *points value:* 2     *duration:* full year

*prerequisites:* satisfactory audition

*contact hours:* 3 hours of supervised rehearsals per week

*content:* Rehearsal and performance of repertoire for wind ensemble and/or orchestra

*assessment:* 60% of the assessment will reflect the level of achievement of the ensemble as a whole as demonstrated in rehearsals and performances. 40% of the assessment will reflect each individual student's contribution, including punctuality, professionalism of approach, promptness in returning performance parts

etc. 100% attendance is required except in cases of illness or approved leave. Non-compliance will result in failure for the subject or a lowering of the final grade.

### 8784 Large Vocal Ensemble I

*level:* I     *points value:* 2     *duration:* full year

*prerequisites:* satisfactory audition

*contact hours:* up to 3 hours of supervised rehearsals per week

*content:* Participation in rehearsals and performance of one of the Conservatorium's vocal ensembles (Adelaide University Choral Society, Pro Canto, Adelaide Connection, Swing Choir).

*assessment:* 60% of the assessment will reflect the level of achievement of the ensemble as a whole as demonstrated in rehearsals and performances. 40% of the assessment will reflect each individual student's contribution, including punctuality, professionalism of approach, promptness in returning performance parts etc. 100% attendance is required except in cases of illness or approved leave. Non-compliance will result in failure for the subject or a lowering of the final grade.

### 6442 Modern Dance for Non-Majors I

*syllabus details:* see B.A.(Dance)

### 1041 Music Technology I

*level:* I     *points value:* 2     *duration:* full year

*contact hours:* 2 hours per week (1 hour class, 1 hour workshop)

*content:* semester 1: Introduction to the studio. The theory and practice of work in a sound synthesis studio. Instruction in: the use of computers, multi-channel mixers, monitoring systems, MIDI controllers, multi-track recording; sequencing; safety procedures. semester 2: Introduction to the theory and practice of sound synthesis using modular analogue synthesisers; digital synthesis; sampling; basic introduction to hard disk recording and post-production; introduction to music publishing software.

*assessment:* four assessment each worth 25%

### 5965 Orchestra I

*level:* I     *points value:* 2     *duration:* full year

*prerequisites:* satisfactory audition

*contact hours:* 3 hours of supervised rehearsals per week (or equivalent)

*content:* Rehearsal and performance of repertoire for Symphony Orchestra

*assessment:* 60% of the assessment will reflect the level of achievement of the ensemble as a whole as demonstrated in rehearsals and performances. 40% of the assessment will reflect each individual student's contribution, including punctuality, professionalism of approach, promptness in returning performance parts etc. 100% attendance is required except in cases of illness or approved leave. Non-compliance will result in failure for the subject or a lowering of the final grade.

### **3665 Percussion Ensemble I**

*level:* I     *points value:* 2     *duration:* full year

*prerequisites:* satisfactory audition

*contact hours:* 2 hours of supervised rehearsals per week

*content:* Rehearsal and performance of repertoire for percussion ensemble

*assessment:* 60% of the assessment will reflect the level of achievement of the ensemble as a whole as demonstrated in rehearsals and performances. 40% of the assessment will reflect each individual student's contribution, including punctuality, professionalism of approach, promptness in returning performance parts etc. 100% attendance is required except in cases of illness or approved leave. Non-compliance will result in failure for the subject or a lowering of the final grade.

### **3357 Piano Accompaniment**

*level:* I     *points value:* 2     *duration:* full year

*corequisites:* Piano I or IE, Harpsichord I or IE, Organ I or IE

*contact hours:* 1 hour a week

*content:* Practical study of vocal and instrumental standard repertoire; problems of accompanying.

*assessment:* regular class assignments (60%); examination at end of semester 2 (40%)

### **3321 Pitjantjatjara Singing IM**

*level:* I     *points value:* 2     *duration:* full year

*contact hours:* 1 one hour lecture a week

*content:* Styles, beliefs, attitudes, and contexts of traditional Aboriginal music, using open (public) Pitjantjatjara inma (song, ceremony) as taught by its traditional owners. Instruction in Pitjantjatjara and related dialects.

*assessment:* report on attitudinal and musical progress from the Pitjantjatjara Senior Lecturer, in consultation with other song owners and the Ethnomusicology Lecturer, at the end of each semester; and completion

of regular assignments (60%); examination on musical, cultural, and language material, also at the end of each semester (40%).

### **4585 Pitjantjatjara Singing IIM**

*level:* I     *points value:* 2     *duration:* full year

*contact hours:* 1 one hour lecture a week

*content:* Styles, beliefs, attitudes, and contexts of traditional Aboriginal music, using open (public) Pitjantjatjara inma (song, ceremony) as taught by its traditional owners. Instruction in Pitjantjatjara and related dialects.

*assessment:* report on attitudinal and musical progress from the Pitjantjatjara Senior Lecturer, in consultation with other song owners and the Ethnomusicology Lecturer, at the end of each semester; and completion of regular assignments (60%); examination on musical, cultural, and language material, also at the end of each semester (40%).

### **7609 Stagecraft I**

*level:* I     *points value:* 2     *duration:* full year

*corequisites:* 5953 Voice I or 2337 Voice IIE

*contact hours:* 2 hour workshop a week

*content:* Development of skills in presentation and stagecraft: movement, posture, gesture and acting; integration of movement skills with dramatic expression; characterisation and analysis.

*assessment:* regular class assignments (60%); examination at the end of semester 2 (40%)

### **4372 Brass Ensemble II**

*level:* II     *points value:* 2     *duration:* full year

*prerequisites:* 8891 Ensemble Experience - Brass I or 6683 Brass Ensemble I

*corequisites:* 1196 Performance II (Brass)

*contact hours:* 2 hours of supervised rehearsals per week

*content:* Rehearsals and performance compositions for large brass ensembles

*assessment:* 60% of the assessment will reflect the level of achievement of the ensemble as a whole as demonstrated in rehearsals and performances. 40% of the assessment will reflect each individual student's contribution, including punctuality, professionalism of approach, promptness in returning performance parts etc. 100% attendance is required except in cases of illness or approved leave. Non-compliance will result in failure for the subject or a lowering of the final grade.

### 7880 Chamber Music II

level: II points value: 2 duration: full year

prerequisites: 3269 Chamber Music I

contact hours: 2 hours of classes and supervised rehearsals a week

content: To rehearse and perform works for chamber ensemble (ie one person to a part).

assessment: satisfactory participation in rehearsals and performances, examinations at the end of each semester.

### 8584 Chamber Music IIA

level: II points value: 2 duration: full year

prerequisites: 3269 Chamber Music I

corequisites: 3269 Chamber Music I, 7880 Chamber Music II or 9050 Chamber Music III

contact hours: 2 hours of classes and supervised rehearsals per week

content: Rehearsal and performance of works for chamber ensemble (i.e. one person per part)

assessment: Satisfactory participation in rehearsals and performances plus examinations at the end of each semester.

### 9199 Chamber Orchestra II

level: II points value: 2 duration: full year

prerequisites: Chamber Orchestra I

contact hours: 3 hours of supervised rehearsals per week (or equivalent)

content: Rehearsal and performance of repertoire for Chamber Orchestra

assessment: 60% of the assessment will reflect the level of achievement of the ensemble as a whole as demonstrated in rehearsals and performances. 40% of the assessment will reflect each individual student's contribution, including punctuality, professionalism of approach, promptness in returning performance parts etc. 100% attendance is required except in cases of illness or approved leave. Non-compliance will result in failure for the subject or a lowering of the final grade.

### 2803 Conducting II

level: II points value: 4 duration: full year

prerequisites: one of the Performance subjects designated I, IIB, IIE contact hours: 2 hours of workshops per week

content: Studies in conducting techniques, orchestral idioms, musical and aesthetic aims, through a program of workshops, guided listening and practical projects

assessment: satisfactory participation in the workshops, rehearsals and performances, including one or two examinations at the end of the semester.

### 7919 Conducting IIA

level: II points value: 4 duration: semester 1 or 2

prerequisites: by audition; one of Performance subjects designated I, IIB, IIE

restriction: 2803 Conducting II

contact hours: 2 hours of workshops per week

content: Studies in conducting techniques, orchestral idioms, musical and aesthetic aims, through a program of workshops, guided listening and practical projects

assessment: satisfactory participation in the workshops, rehearsals and performances, including one or two examinations at the end of the semester.

### 3839 Contemporary Music Ensemble II

level: II points value: 2 duration: full year

prerequisites: 5187 Contemporary Music Ensemble I

corequisites: one of the performance subjects designated II, III, or IIE, IIIE or IIB, IIIB

contact hours: 2 hours of classes and supervised rehearsals a week

content: To rehearse and perform works for varying chamber ensembles (to include voice) from the twentieth century; improvisational techniques and non-traditional notation will also be studied.

assessment: satisfactory participation in rehearsals and performances.

### 6587 Early Keyboard Technique II

level: II points value: 2 duration: full year

quota: will apply

prerequisites: 1786 Early Keyboard Technique I

contact hours: 1 hour tutorial per week

content: A continuing study of the technique of Harpsichord playing with special consideration to touch, articulation, fingering, expressive effects. Continuing study of early keyboard repertoire from 16th to 18th centuries with practical application to the harpsichord, organ, clavichord and forte-piano. Further development of keyboard harmony skills, accompanying from figured bass.

assessment: weekly participation in workshops (40%); performance of one piece and one accompaniment at the end of each semester (60%)

### 7325 Early Music Workshop II

level: II points value: 2 duration: full year

prerequisites: 6468 Early Music Workshop I

contact hours: 2 hours of classes and supervised rehearsals a week

content: To rehearse and perform works for chamber ensemble (ie one person to a part), on instruments appropriate to music up to 1800, or in voice.

assessment: satisfactory participation in rehearsals and performances, plus examinations at the end of each semester.

### 6596 Electronic Music II

level: II points value: 2 duration: full year

quota: may apply

prerequisite: 1041 Music Technology I

contact hours: A combination of individual and class tuition amounting to one hour per week

content: Tuition in composition and performance involving electronic techniques. Study of selected works. Further tuition in Music Technology.

assessment: compositions, performances and assignments in electronic music

### 8434 German for Singers

level: II points value: 2 duration: full year

contact hours: 1 hour lecture and 1 hour tutorial a week

content: Basic German grammar and pronunciation with guidance in the use of suitable dictionaries and language reference works. This will be accompanied by translation work at an appropriate level. Tutorials concentrate on the pronunciation and intonation of German relating to selected sung texts.

assessment: regular class assignments (50%); 2 hour written examination and oral examination at the end of semester 2 (50%)

### 1933 Keyboard for Singers II

level: II points value: 2 duration: full year

prerequisites: 1935 Music Theory I, 6664 Performance I (Voice)

corequisite: 5953 Performance II (Voice)

contact hours: 1 hour workshop a week

content: Keyboard skills appropriate for vocal studies: technical studies, accompaniment.

assessment: performance in the workshops each week

### 1243 Large Ensemble Experience II

level: II points value: 2 duration: full year

prerequisites: any Level I ensemble subject; satisfactory completion of an audition

contact hours: 3 hours of supervised rehearsals a week

content: Experience in 1 of the following ensembles for two semesters: Adelaide University Choral Society (AUCS), Big Band, Chamber Choir, Chamber Orchestra, Jazz Vocal Ensemble, Orchestra, Studio Ensemble, Wind Ensemble, or such other large ensembles that may be constituted.

assessment: 60% of the assessment will reflect the level of achievement of the ensemble as a whole as demonstrated in rehearsals and performances. 40% of the assessment will reflect each individual student's contribution, including punctuality, professionalism of approach, promptness in returning performance parts etc. 100% attendance is required except in cases of illness or approved leave. Non-compliance will result in failure for the subject or a lowering of the final grade.

### 4674 Large Ensemble Experience IIA

level: II points value: 2 duration: full year

prerequisites: satisfactory completion of audition; any level I ensemble subject

corequisites: Large Ensemble Experience II

contact hours: 3 hours of supervised rehearsals a week

content: Experience in 1 of the following ensembles or an alternative approved by the Director of the Elder Conservatorium: Adelaide University Choral Society (AUCS), Big Band, Chamber Choir, Chamber Orchestra, Jazz Vocal Ensemble, Orchestra, Studio Ensemble, Wind Ensemble or such other large ensembles that may be constituted. No activity may be taken which is being counted towards any other ensemble subject.

assessment: 60% of the assessment will reflect the level of achievement of the ensemble as a whole as demonstrated in rehearsals and performances. 40% of the assessment will reflect each individual student's contribution, including punctuality, professionalism of approach, promptness in returning performance parts etc. 100% attendance is required except in cases of illness or approved leave. Non-compliance will result in failure for the subject or a lowering of the final grade.

### 6358 Large Ensemble (Wind) II

level: II points value: 2 duration: full year

prerequisites: Large Ensemble (Wind) I

contact hours: 3 hours of supervised rehearsals per week

content: Rehearsals and performance of repertoire for wind ensemble and/or orchestra.

assessment: 60% of the assessment will reflect the level of achievement of the ensemble as a whole as demonstrated in rehearsals and performances. 40% of the assessment will reflect each individual student's contribution, including punctuality, professionalism of approach, promptness in returning performance parts etc. 100% attendance is required except in cases of illness or approved leave. Non-compliance will result in failure for the subject or a lowering of the final grade.

### 8463 Large Vocal Ensemble II

level: II points value: 2 duration: full year

prerequisites: 8784 Large Vocal Ensemble I

contact hours: up to 3 hours of supervised rehearsals per week

content: Participation in rehearsals and performance of one of the Conservatorium's vocal ensembles (Adelaide University Choral Society, Pro Canto, Adelaide Connection, Swing Choir)

assessment: 60% of the assessment will reflect the level of achievement of the ensemble as a whole as demonstrated in rehearsals and performances. 40% of the assessment will reflect each individual student's contribution, including punctuality, professionalism of approach, promptness in returning performance parts etc. 100% attendance is required except in cases of illness or approved leave. Non-compliance will result in failure for the subject or a lowering of the final grade.

### 6902 Orchestra II

level: II points value: 2 duration: full year

prerequisites: 5965 Orchestra I

contact hours: 3 hours of supervised rehearsals per week (or equivalent)

content: Rehearsal and performance of repertoire for Symphony Orchestra

assessment: 60% of the assessment will reflect the level of achievement of the ensemble as a whole as demonstrated in rehearsals and performances. 40% of the assessment will reflect each individual student's contribution, including punctuality, professionalism of

approach, promptness in returning performance parts etc. 100% attendance is required except in cases of illness or approved leave. Non-compliance will result in failure for the subject or a lowering of the final grade.

### 7736 Orchestration Workshop II

level: II points value: 2 duration: semester 2

prerequisites: 1935 Music Theory I

contact hours: 2 hours workshop a week

content: Techniques of orchestration; analysis of texture, colour and balance; development of orchestration from the classical period to the present day.

assessment: participation in class (40%) and a folio of orchestration exercises (60%)

### 4717 Percussion Ensemble II

level: II points value: 2 duration: full year

prerequisites: 3665 Percussion Ensemble I

contact hours: 2 hours of supervised rehearsals per week

content: Rehearsal and performance of repertoire for percussion ensemble.

assessment: 60% of the assessment will reflect the level of achievement of the ensemble as a whole as demonstrated in rehearsals and performances. 40% of the assessment will reflect each individual student's contribution, including punctuality, professionalism of approach, promptness in returning performance parts etc. 100% attendance is required except in cases of illness or approved leave. Non-compliance will result in failure for the subject or a lowering of the final grade.

### 8540 Performance Studies II

level: II points value: 2 duration: semester 2

prerequisites: approval of the Director of the Elder Conservatorium or the Head of the Department of Music Studies

contact hours: 2 hours of seminars and workshops a week, rehearsals as required

content: Workshops aimed at the integration of music, drama and dance at the creative and performance levels in evolving original theatre works involving music; performance of music theatre pieces from the repertoire.

assessment: contribution to developmental sessions (50%); performance (30%); log of 1000 words (20%)

### 7255 Stagecraft II

level: II points value: 2 duration: full year

prerequisites: 7609 Stagecraft I

corequisites: 5953 Performance II (Voice) or 6843 Performance IE (Voice)

contact hours: 2 hour workshop a week

content: Development of skills in presentation and stagecraft: movement, posture, gesture and acting; integration of movement skills with dramatic expression; characterisation and analysis.

assessment: regular class assignments (60%); examination at the end of semester 2 (40%)

### 2645 Analysis Workshop III

level: III points value: 2 duration: semester 1

prerequisites: 7642 Music Theory II

contact hours: 2 hour seminar a week

content: Historical and current analytical theories; concepts and approaches to music within the western tradition including Schenkerian analysis, Rhetorical analysis and so on.

assessment: regular class assignments (40%); an analytic assignment of 2,000 words or its equivalent

### 7698 Brass Ensemble III

level: III points value: 2 duration: full year

prerequisites: 1945 Ensemble Experience - Brass II or 4372 Brass Ensemble II

corequisites: 2374 Performance III (Brass)

contact hours: 2 hours of supervised rehearsal per week

content: Rehearsal and performance of compositions for large brass ensemble.

assessment: 60% of the assessment will reflect the level of achievement of the ensemble as a whole as demonstrated in rehearsals and performances. 40% of the assessment will reflect each individual student's contribution, including punctuality, professionalism of approach, promptness in returning performance parts etc. 100% attendance is required except in cases of illness or approved leave. Non-compliance will result in failure for the subject or a lowering of the final grade.

### 9050 Chamber Music III

level: III points value: 2 duration: full year

prerequisites: 7880 Chamber Music II

contact hours: 2 hours of classes and supervised rehearsals a week

content: To rehearse and perform works for chamber ensemble (ie one person to a part).

assessment: satisfactory participation in rehearsals and performances, plus examinations at the end of each semester.

### 7399 Chamber Orchestra III

level: III points value: 2 duration: full year

prerequisites: 9199 Chamber Orchestra II

contact hours: 3 hours of supervised rehearsals per week (or equivalent)

content: Rehearsal and performance of repertoire for chamber orchestra.

assessment: 60% of the assessment will reflect the level of achievement of the ensemble as a whole as demonstrated in rehearsals and performances. 40% of the assessment will reflect each individual student's contribution, including punctuality, professionalism of approach, promptness in returning performance parts etc. 100% attendance is required except in cases of illness or approved leave. Non-compliance will result in failure for the subject or a lowering of the final grade.

### 9491 Conducting III

level: III points value: 4 duration: full year

prerequisites: 2803 Conducting II

restriction: Conducting IIIA

contact hours: 2 hours of workshops per week

content: Studies in conducting techniques, orchestral idioms, musical and aesthetic aims, through a program of workshops, guided listening and practical projects

assessment: satisfactory participation in the workshops, rehearsals and performances, including one or two examinations at the end of the semester.

### 9059 Conducting IIIA

level: III points value: 4 duration: semester 1 or 2

prerequisites: 7919 Conducting IIA

restriction: 9491 Conducting III

contact hours: 2 hours of workshops per week

content: Studies in conducting techniques, orchestral idioms, musical and aesthetic aims, through a program of workshops, guided listening and practical projects

assessment: satisfactory participation in the workshops, rehearsals and performances, including one or two examinations at the end of the semester.

**4138 Contemporary Music Ensemble III**

level: III points value: 2 duration: full year

prerequisites: 3839 Contemporary Music Ensemble II

corequisites: one of the Performance subjects designated III, or IIIE or IIIB

contact hours: 2 hours of classes and supervised rehearsals a week

content: To rehearse and perform works for varying chamber ensembles (to include voice) from the twentieth century; improvisational techniques and non-traditional notation will also be studied.

assessment: satisfactory participation in rehearsals and performances

**1671 Early Keyboard Technique III**

level: III points value: 2 duration: full year

quota: applies

prerequisites: Early Keyboard II

contact hours: 1 hour tutorial per week

content: A continuing study of the technique of Harpsichord playing with special consideration to touch, articulation, fingering, expressive effects. Continuing study of early keyboard repertoire from 16th to 18th Cs with practical application to the harpsichord, organ, clavichord and forte-piano. Further development of keyboard harmony skills, accompanying from figured bass.

assessment: weekly participation in workshops (40%); performance of one piece and one accompaniment at the end of each semester (60%)

**6252 Early Music Workshop III**

level: III points value: 2 duration: full year

prerequisites: 7325 Early Music Workshop II

contact hours: 2 hours of classes and supervised rehearsals a week

content: To rehearse and perform works for chamber ensemble (ie one person to a part), on instruments appropriate to music up to 1800, or in voice.

assessment: satisfactory participation in rehearsals and performances, plus examinations at the end of each semester

**4305 Electronic Music III**

level: III points value: 2 duration: full year

quota: may apply

prerequisite: 6596 Electronic Music II

contact hours: A combination of individual and class tuition amounting to one hour per week

content: Tuition in composition and performance involving electronic techniques. Study of selected works. Further tuition in Music Technology.

assessment: compositions, performances and assignments in electronic music

**2260 French for Singers**

level: III points value: 2 duration: full year

contact hours: 1 hour lecture and 1 hour tutorial a week

content: Basic French grammar and pronunciation with guidance in the use of suitable dictionaries and language reference works. This will be accompanied by translation work at an appropriate level. Tutorials concentrate on the pronunciation and intonation of French relating to selected sung texts.

assessment: regular class assignments (50%); 2 hour written examination and oral examination at the end of semester 2 (50%)

**8661 Harmony Workshop III**

level: III points value: 2 duration: full year

prerequisites: 7642 Music Theory II at Credit level or above

contact hours: 1 hour tutorial a week

content: Detailed study of chords and tonal functions in the eighteenth and nineteenth centuries; with emphasis on the composition of harmonic models in demonstration of those techniques.

assessment: folio of musical exercises (100%)

**3307 Industry Practicum  
(Music Performance)**

level: III points value: 2 duration: semester 2

contact hours: 13 hours per week plus project work

content: This subject provides students with the research tools required to undertake an industrial related project. Topics include research design and documentation, project planning and time management, costing and budgeting, quality assurance. An industry linked project will be commenced.

**5169 Industry Practicum (Music Studies)**

level: III points value: 2

availability: not offered in 1996

contact hours: 13 hours per week plus project work

content: This subject provides students with the research tools required to undertake an industrial

related project. Topics include research design and documentation, project planning and time management, costing and budgeting, quality assurance. An industry linked project will be commenced.

#### **4047 Introduction to Composition III**

*level:* III *points value:* 4 *duration:* full year

*prerequisites:* 7642 Music Theory II or 2008 Jazz Theory II

*contact hours:* 2 hour Technical Studies class a week; 1.5 hour individual or group lesson a week or equivalent (for example, 1 hour individual of group lesson per fortnight)

*content:* Detailed study of fundamental concepts of composition with particular attention to melody writing, rhythm and tonality; analytical study of relevant works and repertoire study through coordinated listening program.

*assessment:* weekly exercises (20%); listening test (20%); assignments (2 per semester) (20%); original composition (1 per semester) (40%)

#### **4152 Large ensemble Experience III**

*level:* III *points value:* 2 *duration:* full year

*prerequisites:* any Level II ensemble subject; satisfactory completion of an audition

*contact hours:* 3 hours of supervised rehearsals a week

*content:* Experience in 1 of the following ensembles for two semesters: Adelaide University Choral Society (AUCS), Big Band, Chamber Choir, Chamber Orchestra, Jazz Vocal Ensemble, Orchestra, Studio Ensemble, Wind Ensemble or such other large ensembles that may be constituted.

*assessment:* 60% of the assessment will reflect the level of achievement of the ensemble as a whole as demonstrated in rehearsals and performances. 40% of the assessment will reflect each individual student's contribution, including punctuality, professionalism of approach, promptness in returning performance parts etc. 100% attendance is required except in cases of illness or approved leave. Non-compliance will result in failure for the subject or a lowering of the final grade.

#### **4260 Large Ensemble Experience IIIA**

*level:* III *points value:* 2 *duration:* full year

*prerequisites:* satisfactory completion of audition; any level II ensemble subject

*corequisites:* Large Ensemble Experience III

*contact hours:* 3 hours of supervised rehearsals a week

*content:* Experience in 1 of the following ensembles or an alternative approved by the Director of the Elder Conservatorium): Adelaide University Choral Society (AUCS), Big Band, Chamber Choir, Chamber Orchestra, Jazz Vocal Ensemble, Orchestra, Studio Ensemble, Wind Ensemble or such other large ensembles that may be constituted. No activity may be taken which is being counted towards any other ensemble subject.

*assessment:* 60% of the assessment will reflect the level of achievement of the ensemble as a whole as demonstrated in rehearsals and performances. 40% of the assessment will reflect each individual student's contribution, including punctuality, professionalism of approach, promptness in returning performance parts etc. 100% attendance is required except in cases of illness or approved leave. Non-compliance will result in failure for the subject or a lowering of the final grade.

#### **2705 Large Ensemble (Wind) III**

*level:* III *points value:* 2 *duration:* full year

*prerequisites:* Large Ensemble (Wind) II

*contact hours:* 3 hours of supervised rehearsals per week

*content:* Rehearsals and performance of repertoire for wind ensemble and/or orchestra.

*assessment:* 60% of the assessment will reflect the level of achievement of the ensemble as a whole as demonstrated in rehearsals and performances. 40% of the assessment will reflect each individual student's contribution, including punctuality, professionalism of approach, promptness in returning performance parts etc. 100% attendance is required except in cases of illness or approved leave. Non-compliance will result in failure for the subject or a lowering of the final grade.

#### **5106 Large Vocal Ensemble III**

*level:* III *points value:* 2 *duration:* full year

*prerequisites:* 8463 Large Vocal Ensemble II

*contact hours:* up to 3 hours of supervised rehearsals per week

*content:* Participation in rehearsals and performance of one in one of the Conservatorium's vocal ensembles (Adelaide University Choral Society, Pro Canto, Adelaide Connection, Swing Choir)

*assessment:* 60% of the assessment will reflect the level of achievement of the ensemble as a whole as demonstrated in rehearsals and performances. 40% of

the assessment will reflect each individual student's contribution, including punctuality, professionalism of approach, promptness in returning performance parts etc. 100% attendance is required except in cases of illness or approved leave. Non-compliance will result in failure for the subject or a lowering of the final grade.

### 8163 Orchestra III

level: III points value: 2 duration: full year

prerequisites: 6902 Orchestra II

contact hours: 3 hours of supervised rehearsals per week (or equivalent)

content: Rehearsal and performance of repertoire for Symphony Orchestra.

assessment: 60% of the assessment will reflect the level of achievement of the ensemble as a whole as demonstrated in rehearsals and performances. 40% of the assessment will reflect each individual student's contribution, including punctuality, professionalism of approach, promptness in returning performance parts etc. 100% attendance is required except in cases of illness or approved leave. Non-compliance will result in failure for the subject or a lowering of the final grade.

### 7717 Orchestration Workshop IIIC

level: III points value: 2 duration: semester 2

prerequisites: 1935 Music Theory I and 7642 Music Theory II

restriction: 7736 Orchestration II

contact hours: 1 hour tutorial per week

content: Techniques of orchestration; analysis of texture, colour and balance; development of orchestration from the classical period to the present day.

assessment: participation in class (40%) and a folio of orchestration exercises (60%)

### 8677 Percussion Ensemble III

level: III points value: 2 duration: full year

prerequisites: Percussion Ensemble II

contact hours: 2 hours of supervised rehearsals per week

content: Rehearsal and performance of repertoire for percussion ensemble.

assessment: 60% of the assessment will reflect the level of achievement of the ensemble as a whole as demonstrated in rehearsals and performances. 40% of the assessment will reflect each individual student's

contribution, including punctuality, professionalism of approach, promptness in returning performance parts etc. 100% attendance is required except in cases of illness or approved leave. Non-compliance will result in failure for the subject or a lowering of the final grade.

### 5431 Performance Studies III

level: III points value: 3 duration: semester 2

availability: in 1996, consult Department

prerequisites: Level II Drama, Dance, Music subjects to the value of 4 points or approval of Head of Department

assumed knowledge: experience in theatrical and/or music performance

contact hours: 2 hour seminar/workshop plus rehearsals and presentations per week

content: This is an inter-disciplinary subject that encourages students to cross the conventional barriers of drama, music and dance in their creativity. The studies focus on the theory, aesthetics, and practices of performances through collaboration in the development of original material. The methodology encourages students and staff who are participating to draw upon their knowledge and respective skills, to contribute as a group to the creative project set for the study, and to discover ways to wed form to content in generating new works.

assessment: Weekly contribution 45%; performance 30%; essay/journal/report 25%.

### 2093 Stagecraft III

level: III points value: 2 duration: full year

prerequisites: 7255 Stagecraft II.

contact hours: 2 hour workshop a week

content: Aspects of performance and production; exploration of operatic roles, characterisation, rehearsal and stage skills; basic introduction to the design, production and presentation.

assessment: participation and presentation of projects in performance throughout the year

\* During each of the three years of the course, students are required to present at least one etude which demonstrates a high level of technical achievement. In addition, at some time during the course, the following need to be presented:

- a polyphonic work by Bach, Handel, Shostakovich, Hindemith etc.
- a sonata, concerto or set of variations by a classical composer.
- a work from the twentieth century.

notes: Individual Instrumental or Vocal subjects

**1 Duration:**

All subjects are of a full year's duration.

**2 Prerequisites**

All subjects have as prerequisites:

Level I: completion of a satisfactory audition at an appropriate standard.

Level II: a pass in the relevant Level I Performance subject except for subjects designated II which requires Pass Division 1 in the relevant Level I subject and subjects IIE, which require a Pass Division 1 in the relevant Level I subject.

Level III: a pass in the relevant Level II Performance subject, except for subjects designated III, which require a Pass Division 1 in the relevant Level II performance subject; and subjects designated IIIE, which require a Pass Division I in the relevant Level II subject.

note: With the permission of the Director of The Elder Conservatorium, a student may enrol in a Level II or Level III Performance subject not being a subject in sequence from Level I, if the appropriate Level I or Level II subject has been passed with Distinction.

**3 Contact hours:**

Subjects with four hours: one 1 hour lesson a week; one 2 hour performance class a week, one 1 hour per week (or equivalent) student recital.

Subjects with five hours: one 1 hour lesson each week; one 2 hour performance class a week; one 1 hour workshop a week or the equivalent (eg one 2 hour workshop for part of the semester), one 1 hour per week (or equivalent) student recital.

Subjects with 1.5 hours: one 30 minute lesson a week; one 1 hour workshop a week or the equivalent (eg one 2 hour workshop for part of the semester).

Students in all performance subjects may be required to attend an occasional additional workshop. Such attendance will not amount to more than 2 hours per quarter semester.

**4 Content:**

Technique and repertoire on an instrument or voice at levels appropriate to an individual students' attainments. All students must attend an individual lesson and a two hour workshop in special learning problems, additional technique and visiting lecturers on aspects of performance; students in subjects designated I, II, III, IE, IIE or IIIE must in addition attend a 2 hour performance class particular to their major study. Performance majors (I, II, III) must attend student recitals held fortnightly. The individual private study (hours per week) is a recommended guide to a minimum amount of practice and private study time, commensurate with the requirements of the subject.

The choice of instrument or vocal study in Jazz Performance IE, IIE, IIIE, IB, IIB, or IIIB and in Cross Cultural Performance IB, IIB or IIIB shall be undertaken on the advice of the lecturer in charge of Jazz, or Music Education, or Ethnomusicology, as appropriate.

**5 Assessment:**

Assessment in most subjects in performance comprises three areas: a teacher's report (based on standard of achievement, progress and technical development, punctuality and attendance), performance class and an examination at the end of the year (students must pass the end-of-year examination in order to pass the subject for the year). Proportions of assessment are distributed as follows:

Subjects designated I: Teacher's report 25%, Performance class 25%, Examination of 30 minutes playing time 50%.

Subjects designated II: Teacher's report 15%, Performance class 25%, Examination of 40 minutes playing time 60%.

Subjects designated III: Performance class 25% and Final open (public) recital or an examination of 50 minutes playing time 75%.

Subjects designated IE: Teacher's report 25%, Performance class 25%, Examination of 20 minutes playing time 50%.

Subjects designated IIE: Teacher's report 15%, Performance class 25%, Examination of 30 minutes playing time 60%.

Subjects designated IIIE: Teachers report 5%, Performance class 25%, Examination of 40 minutes playing time 70%.

Subjects designated IB, IIB: Teacher's report 40%, Examination of 20 minutes playing time 60%.

Subjects designated IIIB: Teacher's report 40%, Examination of 30 minutes playing time 60%.

**6 Ensemble Experience**

One hundred per cent attendance is required for all large ensemble activities. Exceptions will be made on the production of a medical certificate and in cases of approved leave.

Non compliance will result in failure for the subject or a lowering of the final grade.

Failure due to inadequate attendance is not redeemable.

Satisfactory participation will be required in rehearsals and performances; calculated according to the proportion of involvement in the various ensembles. Students are required to make themselves available for public performances and tours, dates for which will be decided in consultation between staff and students, at the beginning of the year. Students will keep a diary as a record of their attendance in the various ensembles. Where a student is involved in Chamber Music an examination will be held at the end of each semester.

## Honours Level

### 9392 Honours Composition

level: IV points value: 24 duration: full year

*prerequisites:* see Schedule IV(1(a))

*content:* A course of seminars and individual tuition in composition and analysis of music, with studies in music electronics in appropriate cases. Candidates will be required to submit a major work, or group of works, the general nature of which has been approved in advance by the candidate's supervisor. Assignments in advanced analysis must be completed during the year.

*assessment:* compositions at least 4 units; assignments in advanced analysis at least 1 unit

### 1750 Honours Ethnomusicology

level: IV points value: 24 duration: full year

*prerequisites:* see Schedule IV(1(a))

*content:* A course of seminars and individual tuition in the theoretical background to ethnomusicology, including field techniques, transcription analytical procedures, performance techniques.

*assessment:* (a) seminar paper of 5,000 words (1 unit); (b) fieldwork and field recording with a field report of 500 words to be presented to the Ethnomusicology postgraduate seminar (2 units); (c) thesis of 25,000 words including transcription and analysis based on (b) (3 units)

### 3058 Honours Music Education

level: IV duration: full year

*prerequisites:* See Schedule IV(1(a))

*content:* A course of seminars, workshops and individual tuition. Students will complete individual research assignments and a balanced proportion of related fieldwork.

*assessment:* seminar paper of 5000 words (30%); a project in an approved area of 5,000 words or equivalent, with a report to the Music Education postgraduate seminar (30%); thesis of 10,000 words (40%)

### 9916 Honours Musicology

level: IV points value: 24 duration: full year

*prerequisites:* See Schedule IV(1(a))

*assumed knowledge:* a reading knowledge of a language or languages necessary for the course of study

*content:* A course of seminars and individual tuitions in historical musicology, including studies in the theory

and performance of early music, transcriptions and editing, Australian studies and music-historical topics.

*assessment:* four seminar papers of 5000 words (60%); dissertations on a topic in historical musicology (with or without an accompanying edition) (40%)

*note:* Candidates enrolled in the course leading to the degree of B.A. can also proceed to Honours Musicology. (5276 Honours Musicology (B.A.). The course is identical to that of 9916 Honours Musicology.

### 2103 Honours Performance

level: IV points value: 24 duration: full year

*prerequisite:* See Schedule IV(1(a)).

*content:* A program of individual tuition in performance. Candidates will be required to submit their recital programs for approval to the Elder Conservatorium of Music, no later than the last working day in March (by end of Semester 1 for Jazz). With the permission of the Director of the Elder Conservatorium, candidates may devote one sixth of their course to an Honours Seminar, in which they would present a paper on a topic which is related to their field of study, and which is approved by their instrumental or vocal teacher.

*assessment:* All students except players of brass and jazz instruments and jazz voice shall be assessed as set out in A, B, and C, below.

#### A *Either*

- 1 (a) one full (65 min.) recital (12 points); and (b) one major concerted work (4 points); or
- 2 (a) one full recital including a major concerted work (65 min.) (12 points); and (b) an essay of 5,000 words: (4 points); and

#### B *E.ther*

- 1 one short (35 min.) recital (8 points); or
- 2 a chamber music performance (35 min.) or program of orchestral excerpts appropriate to the instrument studied (35 min.) (8 points); or

#### C two full (65 min.) recitals (12 points each), one of which must include a major concerted work.

Students of brass instruments shall be assessed as above except that they may give two short (30 min.) recitals in lieu of any full (65 min.) recital.

In the case of Jazz students, the following will apply:

**D**

- 1 one full recital (65 min.) (12 points) to include the following: (a) at least one piece completely solo; (b) 10-15 min. of the performance must be original work (composed by the student); (c) a longer (major) work should be included; and
- 2 an essay of 5,000 words (4 points); and
- 3 a regular program of Small Jazz Ensemble performance (at least 2 hours per week) assessed by means of a 35 minute examination.

In special cases the Director may approve different sets of assessment exercises provided that they are equivalent to 24 points.

notes:

- 1 Students shall participate in Large Ensemble or Chamber Music for the full year, the extent to which will be determined by the Director in consultation with the teacher and the student.
- 2 A major concerted work is a major concerto, major aria(s) or song cycle with orchestra.
- 3 Program notes are to be submitted on each work performed and should demonstrate careful research and independent thought. Students must avoid plagiarism. These notes will be taken into account by the examiners, the requirements are as follows:
  - (a) Full recital - 3 pages comprising approximately 1,000 words;
  - (b) Short recital - 2 pages comprising approximately 600-700 words;
  - (c) Concerto - 1 page comprising approximately 300-400 words.Program notes are required to be submitted not less than one week before the recital. They should be presented in camera ready form. They will be assessed as very good, average, or inadequate and increase or decrease the overall result by a margin of up to 5%.
- 4 Honours Performance students intending to apply to the Faculty of Performing Arts in a subsequent year for admission to the Degree of Master of Music (Performance) are advised, but not required, to take option A.2.b. in view of the seminar or dissertation requirements for the Master's degree.
- 5 Unless the Dean on the advice of the specialist panels approves otherwise, no complete work may be presented for examination which has been assessed previously in part or in its entirety.

## Graduate Diploma in Educational Theatre

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar.

As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

### Specific Course Rules

#### 1 Admission requirements

- 1.1 An applicant for admission to the course of study for the Graduate Diploma must hold (a) an Honours degree in drama studies or a postgraduate diploma in drama or the equivalent; or (b) an Ordinary degree and substantial professional experience in the field of drama as approved by the Faculty.
- 1.2 Subject to the approval of the Council, the Faculty may accept as a candidate for the Graduate Diploma a person who does not hold the qualifications specified in Specific Course Rule 1.1 above but who has given evidence satisfactory to the Faculty of fitness to undertake work for the Diploma.
- 1.3 The Faculty, if it sees fit to do so, may require the applicant to complete such additional preliminary work as it may prescribe before being accepted as a candidate for the Graduate Diploma.

#### 2 Duration of course

- 2.1 Except with the special permission of the Faculty, the course for the Graduate Diploma shall be completed in not more than three years of part-time study.

#### 3 Review of academic progress

- 3.1 If in the opinion of the Faculty a candidate for the Graduate Diploma is not making satisfactory progress the Faculty may with the consent of the Council withdraw its approval of candidature and the candidate shall thereupon cease to be enrolled for the Graduate Diploma.

#### 4 General

- 4.1 Notwithstanding the foregoing Specific Course Rules a candidate who has been enrolled for the degree of Master of Arts (Educational Theatre) and who has completed the work prescribed

herein for the Graduate Diploma and who has not been awarded the Master's degree shall, on written application to the Registrar, be awarded the Graduate Diploma.

#### 5 Course of study

- 5.1 To qualify for the Graduate Diploma candidates shall complete the following subjects to the satisfaction of examiners:

3231 Creative Laboratory IVA	6
4542 Research Method and Dramatic Analysis IV	6
5822 Contemporary Theatre: Structures and Intentions IV	6

*and one of the following subjects:*

4860 The Uses of Drama in Education and the Community IV	6
1976 Community Theatre: Models and Methods IV	6

- 5.2 Unless exempted by the Faculty, every candidate for the Graduate Diploma shall complete the compulsory subjects.
- 5.3 To complete a course of study, a candidate, unless exempted therefrom by the Faculty, shall:
  - (a) regularly attend the prescribed lectures, tutorials and seminars; and
  - (b) undertake such practical work, fieldwork and case studies, do such written work, and pass such examinations, as the Faculty may prescribe.
- 5.4 Each candidate's course of study must be approved by the Faculty, or its nominee, at enrolment each year.

note (not forming part of the Specific Course Rules)

1 The Diploma is available part-time in a two year-plan, as follows:

year one		year two
S1	S2	S3 L1

2 The laboratory studies and the core seminars are compulsory.

3 Entry to the course.

(a) Entry is competitive, dependent upon the places available;

(b) Candidates wishing to enter the Graduate Diploma in Educational Theatre should have achieved at least two credit results in year-length subjects or four credits in semester-length subjects, or some combination thereof, during the course of their undergraduate study. One of those credits in a year-length Year One subject, or two of those credits in semester-length subjects, at least, must have been obtained in drama studies in the final year. Other cases may be considered at the discretion of the Postgraduate Committee (Drama).

## Syllabuses

### compulsory subjects

#### 3231 Creative Laboratory IVA

level: IV

points value: 6

availability: not offered in 1996

contact hours: 5 hours per week

*content:* The theatre laboratory is planned for the study of both practice and theory in creative activities relevant to Educational Theatre. Music, writing, acting, dance, design and the range of theatrical media, namely light sound and film, are utilised to give students the chance: (1) to expand their skills in dramatic expression; (2) to work as contributing members of a tightly organised group; (3) to develop an ever widening range of sensitivities to the expression of ideas; and, (4) to realise new works of force and quality relevant to the social and educational interests of the community. Students are encouraged to reflect upon their practices, to date, and urged to sharpen their critical understanding of the contemporary world of their studies, both in Australia and overseas, with an eye to the future.

Theoretical studies concerned with contemporary performance theory and associated analytical and critical skills in the topics of the laboratory, are pursued as required by the needs of the laboratory. Matters of form and content arise from such interests. Of necessity, close attention is given to movements in Australian drama.

It is not envisaged that the formal mounting and performance of an established work, play or script, fulfils the basic creative spirit conceived for a laboratory in Educational Theatre. The laboratory is to serve as a creative experience to extend study skills in drama, not to reiterate old thoughts and tested practices.

*assessment:* interim research assignments (15%); interim performance activity and achievement (30%); final presentation (30%); 1 formal report (3,000 words) of processes and findings (25%)

#### 4542 Research Method and Dramatic Analysis IV

level: IV points value: 6 duration: semester 1

*prerequisites:* entry into MA studies

*contact hours:* 3 hours per week

*content:* This subject is studied in two parts, namely: (1) Research methodology and (2) Issues in dramatic analysis. The first-named deals with defining a field of study; research methods and purposes; practice and experiment; collecting data, library and media

research; interviewing techniques, presentation requirements, form at, convention and style; arguing and supporting a case; preparing an annotated bibliography. Students are encouraged at all times to refine their writing skills and report presentation.

The second section of study which is conducted in parallel with the methodological section provides an overview of select issues in dramatic theory related to the function and meaning of Western drama from Classical Greece to the present. Topics cover Aristotle, Horace, medievalism, the Renaissance, acting theory, political theatre, the comic tradition, stage structure and design, twentieth century theatre movements and styles, the influence of film and television

*assessment* research methodology (40%); Issues in dramatic analysis (60%).

#### 5822 Contemporary Theatre Structures and Intentions IV

level: IV

points value: 6

availability: not offered in 1996

*prerequisite:* entry into MA Studies

*contact hours:* 3 hours per week

*content:* The focus of this study is on ritual, the evolution, theory and practice of ritual in society from archaic time, and its incorporation in contemporary theatre practice. A number of set readings dealing with various social rituals from a variety of cultures address relevant issues. Contemporary theories and practice of the avant garde are carefully considered especially as evident in the work of Peter Brook, Richard Schechner, The Living Theatre, Jerzy Grotowski, Ariane Mnouchkine, Robert Wilson and Phillip Glass. Students are expected to be able to analyse a ritual in terms of not only structure but also origins. Each student is required to design, justify, produce and report upon a ritual devised and presented within the local community.

*assessment:* readings in ritual (15%); analytical essay (15%); seminar participation (20%); ritual design, production, justification and report (50%).

### elective subjects

#### 4860 The Uses of Drama in Education and the Community IV

level: IV

points value: 6

availability: not offered in 1996

*prerequisites:* 4542 Research Method and Dramatic Analysis IV; or lecturer approval

*contact hours:* 3 hours per week

*content:* Through this seminar, students expand upon their insight into the history and development of the use of drama, worldwide, in both the field of education and the life of the community at large. Research opportunities are given to explore the various approaches to drama within contemporary education systems at both a national and international level. Appropriate methodologies for making relevant comparisons and evaluating the processes are developed; the 'pros' and 'cons' of the respective approaches are carefully debated. Issues considered in the wider educational context include: current practices and future possibilities for the use of drama within the community; the use of drama for people with special needs, for instance, with the blind and the deaf and the bodily disadvantaged; techniques for using drama as a basis for training within business and industry; role-play as a learning device. Students are required to conduct personal in-depth research on at least one aspect of this topic in the South Australian community.

*assessment:* seminar presentations (30%); interim short reports (2 x 10) (20%); final paper (3,000 words) (50%)

### 1976 Community Theatre: Models and Methods IV

*level:* I

*points value:* 6

*availability:* not offered in 1996

*prerequisites:* 4542 Research Method and Dramatic Analysis IV; or lecturer approval

*contact hours:* 3 hours per week

*content:* The notion of the theatre as a vital element of community life is examined together with the many aspects of theatre activity in Australia from adult to children's theatre. Funding processes, staffing, artistic direction, management, promotion and audience are among the issues discussed. A framework for developing a community theatre from artistic vision to realisation is developed at depth by each student. This subject is an introduction to the development, principles and practice of community theatre. The subject traces a history of the major influences upon the varying contemporary practice of community theatre. Upon this foundation it then describes forms of contemporary community theatre practice, their concerns and aspirations and their trajectory over recent times. Concurrently, the subject will provide practice in a variety of methods employed within community theatre. To develop the abilities to make informed analyses of purposes and to appropriately devise and apply method to context are objectives of

this course. An interest is assumed in the application of theatrical methods to community contexts. Thus a guiding concern of the course is to enable students to enhance their own educational, social and theatrical practice by a deeper understanding and skilled practice of community theatre approaches.

*assessment:* seminar presentations (30%); interim short reports (2 x 10) (20%); final paper (3,000 words) (50%)

## Graduate Diplomas in Music

These awards have been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar.

As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

### Specific Course Rules

#### 1 General

##### 1.1 There shall be Graduate Diplomas in:

- Conducting
- Intercultural Music
- Jazz Performance
- Music Education
- Music Performance
- Music Theory
- Musicology
- Piano Pedagogy

##### 1.2 A candidate may hold more than one of the Graduate Diplomas.

#### 2 Admission requirements

##### 2.1 The Faculty of Performing Arts may accept as a candidate for the Graduate Diploma any person who has qualified for:

- (a) an ordinary degree of Bachelor of Music (New) of The University of Adelaide which the Faculty judges to have been attained at above-average standard;
- (b) the ordinary degree of the Bachelor of Arts of The University of Adelaide which has within it a major sequence in Music or its equivalent. These subjects must have been attained at above-average standard; or
- (c) a degree in Music of another institution which is accepted for the purpose by the Faculty.

##### 2.2 Subject to the approval of Council the Faculty may, in special cases and subject to such conditions (if any) as it may see fit to impose in each case, accept as a candidate for a Graduate Diploma a person who does not qualify for admission to the course under Specific Course Rule 2.1 but has given evidence satisfactory to the Faculty of fitness to undertake work for the Graduate Diploma.

#### 3 Duration of course

##### 3.1 To qualify for a Graduate Diploma a candidate shall complete a course of study extending over one year as a full-time student, or not less than two years as a part-time student.

#### 4 Review of academic progress

##### 4.1 If in the opinion of the Faculty a candidate is not making satisfactory progress the Faculty may, with the consent of the Council, terminate the candidature.

#### 5 Graduate Diploma in Intercultural Music Studies

##### 5.1 To qualify for the Graduate Diploma in Intercultural Music Studies a candidate shall satisfactorily complete the following subjects:

5871 Methods for Intercultural Music Studies IVA	6
9768 Methods for Intercultural Music Studies IVB	3
<i>and in addition, satisfactorily complete options from the following subjects to a total of 15 points:</i>	
8690 Asian Theatre IV	6
9633 Chinese Music IV	3
2768 Community Music Project IV	3
1950 Folk and Traditional Music of European Cultures IV	3
5503 Intercultural Music Performance Workshop IV	3
4627 Intercultural Music Studies Dissertation	9
8531 Japanese Music IV	3
2439 Music of Aboriginal Australia IV	3

##### 5.2 Candidates who have previously satisfactorily completed subjects for the Bachelor of Music (New) or Bachelor of Arts or other award which include substantially the same material as that in

any of the subjects listed above, shall complete alternative subjects in lieu of those already passed to a total value of 12 points.

## 6 Graduate Diploma in Jazz Performance

6.1 To qualify for the Graduate Diploma in Jazz Performance a candidate shall satisfactorily complete the following subjects:

7747	Improvisation IV	3
9890	Jazz History IV	2
3801	Jazz Performance IV	8
4375	Jazz Piano Class IV	2
9530	Jazz Theory IV	3
6684	Large Jazz Ensemble IV	2
8530	Small Jazz Ensemble IV	4

## 7 Graduate Diploma in Music Education

7.1 To qualify for the Graduate Diploma in Music Education a candidate shall satisfactorily complete the following subjects:

2333	Comparative Music Education Methodologies IV	6
1969	Conducting Methods IV	6

and, in addition, satisfactorily complete options from the following subjects to a total of 12 points:

9889	Jazz Education IV	6
9161	Music Education IV	6
6916	Music Education Composition and Harmony IV	6
7395	Music Education Dissertation IV	6

or up to two of the following subjects:

195	Folk and Traditional Music of European Cultures IV	3
5503	Intercultural Music Performance Workshop IV	3
2439	Music of Aboriginal Australia IV	3

7.2 Candidates who have previously satisfactorily completed subjects for the Bachelor of Music (New) or other award which include substantially the same material as that in any of the subjects listed above, shall complete alternative Graduate Diploma subjects in lieu of those already passed to a total value of 12 points.

7.3 With the permission of the Faculty in each case, candidates may be permitted to substitute other subjects from the Honours Degree of Bachelor of Music or another Graduate Diploma in Music, to a maximum value of 6 points, for any of the above subjects.

note (not forming part of the Specific Course Rules):

Candidates are advised that this course will not lead to Teacher Registration. Candidates wishing to obtain registration as a teacher should complete a Graduate Diploma in Education. (See entries in the Calendar under the Faculty of Arts.)

## 8 Graduate Diploma in Music Performance

8.1 To qualify for the Graduate Diploma in Music Performance, a candidate shall satisfactorily complete the following subjects:

(a)	one of:	
	5340 Major Recital IVA	12
	5763 Major Recital IVC	12

and

(b)	one of:	
	7143 Short Recital IV	8
	5435 Ensemble/Orchestral Performance IV	8

and

(c)	either	
	7779 Concerto IV	4

or

one of the Musicology subjects listed in Specific Course Rule 5.2 of the degree of Master of Music (Performance).

or

one of the following subjects from the Graduate Diploma in Music Theory:

8965	Advanced Tonal Theory IV	4
6564	Advanced Tonal Analysis IV	4
4796	Advanced Tonal Counterpoint IV	4
1331	20th Century Techniques and Analysis IV	4

8.2 Students of brass instruments or bassoon may give two short (30 minute) recitals in lieu of Major Recital IVA or IVC.

8.3 In special cases the Faculty may, on the recommendation of the Director of the Elder Conservatorium, approve different but equivalent sets of exercises.

**9 Graduate Diploma in Music Theory**

9.1 To qualify for the Graduate Diploma in Music Theory a candidate shall satisfactorily complete the following subjects:

4796 Advanced Applied Tonal Counterpoint IV	4
8965 Applied Tonal Theory IV	4
3803 Music Theory Research Project IV	6
3177 Music Theory Seminar IV	2
6564 Tonal Analysis IV	4
1331 20th Century Techniques and Analysis IV	4

**10 Graduate Diploma in Musicology**

10.1 To qualify for the Graduate Diploma in Musicology a candidate shall, subject to Specific Course Rule 2, satisfactorily complete the following subjects:

1543 Analysis Workshop IV	3
1117 Australian Music IV	3
7078 History of Music Theory IV	3
3696 Introduction to Musicology IV	3
9362 Studies in Early Music IV	3
6593 Studies in Music History IVA	3
6667 Studies in Music History IVB	3
4723 The Aesthetics of Music IV	3

10.2 Candidates who have previously satisfactorily completed subjects for the Bachelor of Music or Bachelor of Arts or other award which include substantially the same material as that in any of the subjects listed above, shall in lieu of these subjects satisfactorily complete further Musicology subjects listed in the Specific Course Rule 5.2 for the degree of Master of Music (Performance), and in addition complete:

8639 Musicology Dissertation IV	8
---------------------------------	---

to a total value of 24 points

10.3 With the permission of Faculty in each case, candidates may be permitted to substitute other subjects from the Honours degree of Bachelor of Music or another Graduate Diploma in Music, to a maximum value of 8 points, for any of the above subjects.

**11 Graduate Diploma in Conducting**

11.1 To qualify for the Graduate Diploma in Conducting a candidate shall satisfactorily complete the following subjects:

6232 Conducting Class IV	6
1391 Tonal Analysis for Conductors IV	6
6875 Conducting Practicum	12

**12 Graduate Diploma in Piano Pedagogy**

12.1 To qualify for the Graduate Diploma in Piano Pedagogy a candidate shall satisfactorily complete the following subjects:

8576 Piano Performance IV	12
6920 Teaching Practice IVA	3
9924 Teaching Techniques and Materials IV	3
8505 Teaching Practice IVB	3
8485 Educational Studies IV	3

# Graduate Diploma in Conducting

## Syllabuses

### 6232 Conducting Class IV

level: IV points value: 6 duration: full year

quota: applies

prerequisites: satisfactory audition

contact hours: 2 hour practical class per week

content: A study of Conducting techniques and an examination of standard repertoire.

assessment: viva voce examination dealing with (a) broad knowledge of repertoire; (b) detailed knowledge of a nominated area of specialisation; (c) detailed knowledge of scores studied during the course.

### 6875 Conducting Practicum IV

level: IV points value: 12 duration: full year

quota: applies

prerequisites: satisfactory audition

corequisites: 6232 Conducting Class IV

contact hours: Practical experience (2 hours per week or equivalent) taken concurrently with Conducting Class, plus additional activities as negotiated with the lecturer in charge.

content: Classroom work with piano or small chamber ensemble, attendance at professional rehearsals, section preparation etc. Students will be expected to form their own ensembles for assessment purposes.

assessment: performance (including program notes) of one work from the classical/ romantic repertoire and one work from the 20th Century (70%); demonstrated rehearsal skills (30%).

### 1391 Tonal Analysis for Conductors IV

level: IV points value: 6 duration: semester 1

quota: applies

prerequisites: 4851 Music Theory III or equivalent

assumed knowledge: 1935 Music Theory I, 7642 Music Theory II, 4851 Music Theory III

restriction: 6564 Advanced Tonal Analysis IV

contact hours: 2 hour seminar per week plus 1 half hour per week keyboard class

content: Harmonic analysis of representative works of the tonal repertoire from Vivaldi through to the late 19th Century with special reference to structure and form, thematic process and harmonic style. Development of skills in Keyboard musicianship, transposition and score reading.

assessment: analysis of selected works (or sections thereof) (60%); four weekly keyboard exercises (40%).

## Graduate Diploma in Intercultural Music Studies

### Syllabuses

#### 8690 Asian Theatre IV

*points value:* 6      *availability:* not offered in 1996

*restriction:* 4805 Asian Theatre III

*contact hours:* 1 one hour lecture, 1 two hour workshop and 1 two hour seminar per week

*content:* A series of lectures and workshops which investigate the principles and practice of Asian Theatre. Regional focus may include Japan, China and Indonesia. It is conducted in association with 4805 Asian Theatre.

*assessment:* essay of 3,500 words and short collaborative workshop performance

#### 9633 Chinese Music IV

*points value:* 3      *availability:* not offered in 1996

*restriction:* 3392 Chinese Music III

*contact hours:* equivalent of 1 two hour seminar a week

*content:* A study of Chinese instrumental music and Chinese theatre. It is conducted in association with 3392 Chinese Music III.

*assessment:* seminar paper of 5,000 words

#### 2768 Community Music Project IV

*points value:* 3      *availability:* not offered in 1996

*contact hours:* individual tuition and fieldwork

*content:* This subject provides the opportunity to undertake fieldwork in the community or workshops in an approved forum. The final program will be determined in consultation with the lecturer-in-charge at the commencement of the project.

*assessment:* to be determined in consultation with the lecturer-in-charge before the commencement of the project but equivalent to an essay of 3,500 words

#### 1950 Folk and Traditional Music of European Culture IV

*points value:* 3      *availability:* not offered in 1996

*restriction:* 1970 Folk Music Traditions III

*contact hours:* equivalent of 1 two-hour seminar per week

*content:* An examination of the folk music and traditional musical forms of Britain, Europe and related cultures such as Australia.

*assessment:* essay of 5,000 words

#### 5503 Intercultural Music Performance Workshop IV

*points value:* 3      *availability:* not offered in 1996

*contact hours:* 1 two hour workshop per week

*content:* This workshop draws upon the musical skills of its participants. It aims to develop the communicative and interpretative skills of the performer taking into consideration the requirement of different performance contexts. Students will also have the opportunity to gain further musical skills from different cultures. This may be conducted in association with Asian Performance.

*assessment:* attendance and participation; lecture demonstration to 5638 Ethnomusicology IIIB

#### 4627 Intercultural Music Studies Dissertation IV

*points value:* 9      *availability:* not offered in 1996

*contact hours:* regular supervision by appointment

*content:* A dissertation based on an intercultural music study approved in consultation with the lecturer-in-charge.

*assessment:* a dissertation of 10,000 words

#### 8531 Japanese Music IV

*points value:* 3      *availability:* not offered in 1996

*restriction:* 1516 Japanese Music III

*contact hours:* equivalent of 1 two hour seminar a week

*content:* This subject provides a detailed examination of Japanese music traditions and performance practice. It is conducted in association with 1516 Japanese Music III.

*assessment:* seminar paper of 5,000 words

#### 5871 Methods for Intercultural Music Studies IVA

*points value:* 6      *availability:* not offered in 1996

*restriction:* 6989 Ethnomusicology IIIA

*contact hours:* 1 two hour seminar and 1 hour tutorial per week

*content:* This subject provides an accelerated coverage of advanced theory and methods in the study of music of different cultures. It investigates the concepts and issues which are fundamental to the understanding and

presentation of music in the urban context and the development of techniques such as transcription and analysis of different musical traditions.

**assessment:** essay of 3,500 words and transcription assignment

**9768 Methods for Intercultural Music Studies IVB**

**points value:** 3 **availability:** not offered in 1996

**prerequisites:** 5871 Methods for Intercultural Music Studies IVA

**contact hours:** 1 two hour seminar per week

**content:** This subject examines advanced theory and literature of ethics. It investigates current issues with special reference to the Australian context. It is conducted in association with the Ethnomusicology postgraduate seminar.

**assessment:** 1 essay of 5,000 words

**2439 Music of Aboriginal Australia IV**

**points value:** 3 **availability:** not offered in 1996

**contact hours:** by consultation

**content:** The study of music of Aboriginal Australia in the tribal and/or urban context. In consultation with the lecturer-in-charge, the candidate may nominate a topic related to the content of this Diploma.

**assessment:** essay of 5,000 words or equivalent

## Graduate Diploma in Jazz Performance

### Syllabuses

#### 7747 Improvisation IV

level: IV points value: 3 duration: full year

contact hours: 2 hours per week

*content:* Aims to enable students to develop and apply improvisation techniques. This subject considers the application of improvisation techniques such as rhythm, modal scales and patterns to the jazz repertoire. The study of various styles (from early to contemporary) is made.

*assessment:* continuous (based on assignments and classwork) (25%); written and practical examinations at the end of each semester; (75%)

#### 9890 Jazz History IV

level: IV points value: 2 duration: full year

contact hours: 2 hours per week

*content:* Analysis of various styles of jazz ranging from New Orleans to contemporary; musical concepts in jazz styles; the roles of instruments; study of set works

*assessment:* 2,000 word essay (35%); 1 hour listening and general knowledge test, which may include style recognition (20%); 2,000 word analytic study or equivalent (35%); tutorial presentation (10%)

#### 3801 Jazz Performance IV

level: IV points value: 8 duration: full year

contact hours: 2-3 hours per week

*content:* This subject aims to develop the student's performing skills on a principal instrument. Progressive technique appropriate to the student's level of attainment is supported by skills attained in 7747 Improvisation IV class. Different styles of Jazz interpretation are taught, relevant to the instrument.

*assessment:* performance class (25%); end of year examination or recital of 60 minutes (75%)

#### 4375 Jazz Piano Class IV

level: IV points value: 2 duration: full year

contact hours: 1 hour per week

*content:* This subject aims to provide sufficient stylistic knowledge and technique to allow the student to use keyboard as a means of relating to other Jazz Studies areas (eg. theory, arranging, self-accompaniment)

*assessment:* assignments/projects (25%); written and practical examinations at the end of each semester (75%)

#### 9530 Jazz Theory IV

level: IV points value: 3 duration: full year

contact hours: 2 hours per week

*content:* This subject aims to provide a theoretical framework which students can implement in Jazz improvisation, composition and arranging. Nomenclature of chords and scales, functional harmony, related and substituted harmony, and aural training are studied.

*assessment:* weekly assignments (50%); examinations at the end of each semester (50%)

#### 6684 Large Jazz Ensemble IV

level: IV points value: 2 duration: full year

contact hours: 3 hours per week

*content:* Study and practical implementation of Big Band or similar Large Jazz Ensemble (eg. guitar band, jazz choir, keyboard orchestra) repertoire. Consistent study and practice of the elements comprising large jazz ensemble playing through rhythm exercises, intonation exercises, balance practice and sight reading.

*assessment:* continuous assessment in ensemble throughout the year

#### 8530 Small Jazz Ensemble IV

level: IV points value: 4 duration: full year

contact hours: 3 hours per week

*content:* This subject aims to develop ensemble sensitivity through the medium of small jazz ensembles. Activities include rehearsals and performances (eg. jazz forum) in various styles of jazz.

*assessment:* continuous assessment throughout each semester by means of assignments and general progress (50%); examination (of approx. 30 minutes playing time) at the end of each semester (50%)

# Graduate Diploma in Music Education

## Syllabuses

### 2333 Comparative Music Education Methodologies IV

*points value:* 6 *duration:* full year

*contact hours:* 2 hours per week

*content:* A detailed study of the principles of various approaches to music education, including the Kodaly method and jazz education methods, and their role in the development of musicality and creative potential in classroom and instrumental music programs.

*assessment:* 1 essay of 5,000 words or equivalent

### 1969 Conducting Methods IV

*points value:* 6 *duration:* full year

*contact hours:* 2 hours per week

*content:* Repertoire, score preparation, conducting techniques, rehearsal techniques and problem solving for choirs, bands, and mixed instrumental ensembles.

*assessment:* assignment (60%), including repertoire resource list and analysis and preparation of scores, of 3,000 words or equivalent, practical conducting assessment (40%)

### 7395 Music Education Dissertation IV

*points value:* 6 *duration:* full year

*contact hours:* regular supervision by appointment

*content:* A dissertation based on a music education topic approved in consultation with the lecturer-in-charge.

*assessment:* a dissertation of 8,000 words

### 9889 Jazz Education IV

*points value:* 6 *duration:* full year

*restriction:* 5451 Jazz Styles; 2008 Jazz Theory II; 1212 Jazz Arranging II

*contact hours:* 4 hours per week

*content:* Analysis of various styles of jazz ranging from New Orleans to contemporary. Scales, modes, chords and chord substitution. Skills in developing working arrangements for typical small jazz ensembles.

*assessment:* regular class exercises (40%); 2 essays of 2000 words each or equivalent (30%); exam (15%); arrangement (15%)

### 6916 Music Education Composition and Harmony IV

*points value:* 6 *duration:* full year

*restriction:* 4047 Introduction to Composition III; 8661 Harmony Workshop III

*contact hours:* 3.5 hours per week

*content:* Two of the following three areas: (1) Detailed study of fundamental concepts of composition, analytical study of works through coordinated listening program; (2) Detailed study of chords and tonal functions in the 18th and 19th centuries with emphasis on the composition of harmonic models in demonstration of those techniques. (3) Techniques of orchestration, analysis of texture, colour and balance, development of orchestration from the classical period to the present day.

*assessment:* composition exercises and assignments (20%); original compositions (20%); folio of musical exercises (40%) for Harmony or Orchestration; teaching methods assignment (20%) of 2,000 words pertaining to composition, harmony and/or orchestration

### 9161 Music Education IV

*points value:* 6 *duration:* full year

*restriction:* 5553 Music Education IIM(New); 3357 Piano Accompaniment; 5021 Jazz Keyboard II

*contact hours:* 3 hours per week

*content:* Ensemble rehearsal techniques, repertoire, arranging and composition. Observation and analysis of ensembles in schools.

*assessment:* essay and journal (40%); arrangement (30%); class exercises (20%); examination (10%)

## Graduate Diploma in Music Performance

### Syllabuses

#### 5340 Major Recital IV(A)

*points value:* 12

*duration:* full year

*prerequisites:* a credit or above in the appropriate Level III performance subject (eg 2281 Performance III (Voice)) or an audition or both

*contact hours:* one hour per week, concurrent with preparation for all Performance subjects in this diploma

*content:* A representative program of advanced works in the repertoire of the instrument studied.

*assessment:* a public recital of 65 minutes duration

*note:* Students in exceptional circumstances may commence their studies in the mid-year and enrol in 9305 Major Recital IV(A)(Mid-year).

#### 5763 Major Recital IV(C)

*point value:* 12

*duration:* full year

*prerequisites:* a credit or above in the appropriate Level III Performance subject (eg 2281 Performance III (Voice)) or an audition or both.

*contact hours:* 1 hour per week, concurrent with preparation for all Performance subjects in this diploma

*content:* A representative program of advanced works in the repertoire of the instrument studied which must also include a concerto or concerted work.

*assessment:* a public recital of 65 minutes duration (see notes below)

*note:* Students in exceptional circumstances may commence their studies in the mid-year and enrol in 9614 Major Recital IV(C)(Mid-year).

#### 7143 Short Recital IV

*points value:* 8

*duration:* full year

*prerequisites:* a credit or above in the Level III Performance subject (eg 2281 Performance III (Voice)) or an audition or both

*contact hours:* 1 hour per week, concurrent with preparation for all Performance subjects in this diploma

*content:* A representative program of advanced works in the repertoire of the instrument studied.

*assessment:* a public recital of 35 minutes duration

*note:* Students in exceptional circumstances may commence their studies in the mid-year and enrol in 9214 Short Recital IV(Mid-year).

#### 5435 Ensemble/Orchestral Performance IV

*points value:* 8

*duration:* full year

*prerequisites:* a credit or above in the appropriate Level III Performance subject (eg 2281 Performance III (Voice)) or an audition or both

*contact hours:* 1 hour per week, concurrent with preparation for all Performance subjects in this diploma

*content:* A program of study of chamber works or orchestral excerpts appropriate to the instrument studied.

*assessment:* a recital/examination of chamber music or orchestral excerpts of 35 minutes duration

*note:* Students in exceptional circumstances may commence their studies in the mid-year and enrol in 6161 Ensemble/Orchestral Performance IV(Mid-year).

#### 7779 Concerto IV

*points value:* 4

*duration:* full year

*prerequisites:* a credit or above in the appropriate Level III Performance subject (eg V) or an audition or both

*contact hours:* 1 hour per week, concurrent with preparation for all Performance subjects in this diploma

*content:* A concerto or concerted work appropriate to the instrument studied.

*assessment:* a performance of the concerto or concerted work

*note:* Students in exceptional circumstances may commence their studies in the mid-year and enrol in 8927 Concerto IV(Mid-year).

# Graduate Diploma in Music Theory

## Syllabuses

### 8965 Advanced Tonal Theory IV

*points value:* 4 *duration:* semester 1

*assumed knowledge:* 1935 Music Theory I, 7642 Music Theory II and 4851 Music Theory III

*contact hours:* 2 hour seminar per week

*content:* This subject involves a coverage of tonal techniques with special emphasis on the composition of harmonic models in demonstration of those techniques.

*proposed assessment:* a folio of not less than 10 originally composed harmonic exercises

### 6564 Advanced Tonal Analysis IV

*points value:* 4 *duration:* semester 1

*assumed knowledge:* 1935 Music Theory I, 7642 Music Theory II and 4851 Music Theory III

*contact hours:* 2 hour seminar per week

*content:* Harmonic analysis of representative works of the tonal repertoire from Vivaldi through to the late 19th Century with special reference to harmonic structure and form, chordal types and individual harmonic styles.

*proposed assessment:* harmonic analysis of six works (or sections of works) representative of the period covered

### 3458 Advanced 20th Century Techniques and Analysis IV

*points value:* 4 *duration:* semester 2

*assumed knowledge:* 1935 Music Theory I, 7642 Music Theory II and 4851 Music Theory III

*contact hours:* 2 hour seminar per week

*content:* A study of non-tonal techniques as typified in selected works of 20th Century composers with analysis and composition of models in demonstration of those techniques.

*proposed assessment:* a folio of not less than three analyses and not less than seven originally composed exercises

### 4796 Advanced Applied Tonal Counterpoint IV

*points value:* 4 *duration:* semester 2

*assumed knowledge:* 1935 Music Theory I, 7642 Music Theory II and 4851 Music Theory III

*contact hours:* 2 hour seminar per week

*content:* This subject involves a study of counterpoint techniques with special reference to Canon, Passacaglia, Fugue and Free-Counterpoint. Emphasis will be placed on baroque counterpoint; however 19th century counterpoint will also be studied.

*proposed assessment:* a folio of not less than 10 short originally composed contrapuntal exercises (the assessment may be less than 10 if a complete fugue is set for assessment or another larger complete movement or exercise)

### 3803 Music Theory Research Project IV

*points value:* 6 *duration:* full year

*assumed knowledge:* 1935 Music Theory I, 7642 Music Theory II and 4851 Music Theory III

*contact hours:* regular supervision by appointment

*content:* A dissertation or extended composition illustrating tonal or 20th Century techniques.

*proposed assessment:* in consultation with the lecturer-in-charge, the candidate may nominate a topic related to the content of this Diploma. The dissertation should be the equivalent of 8,000 words and may involve either: Option A: An analytical study of harmonic techniques of a specific composer within the period covered by the Diploma. This may be limited to a representative selection of a specific composer's output OR Option B: The writing of an extended tonal or non-tonal work which must demonstrate knowledge of the harmonic techniques covered throughout the Diploma and a harmonic analysis of the same. (Note: the work must be an original composition and must not have been presented elsewhere for assessment in another subject or course.)

### 3177 Music Theory Seminar IV

*points value:* 2 *duration:* semester 1 or 2

*assumed knowledge:* 1935 Music Theory I, 7642 Music Theory II and 4851 Music Theory III

*contact hours:* 2 hour seminar per week or equivalent

*content:* The subject examines advanced theoretical concepts in music and their application in analytical and compositional process. Comparison of harmony and counterpoint texts will be included in the seminar.

*assessment:* an oral presentation of one 2,500 word paper, or equivalent

## Graduate Diploma in Musicology

### Syllabuses

#### 1543 Analysis Workshop IV

*points value:* 3 *duration:* semester 1

*contact hours:* 2 hours a week seminar

Students are required to attend and participate in the lectures and seminars.

*content:* Various historical and current analytical theories, concepts and approaches to music within the Western tradition including Schenkerian analysis, Symbolic analysis, Hermeneutic analysis etc

*proposed assessment:* an analytical assignment of the equivalent of 3,000-5,000 words

#### 1117 Australian Music IV

*level:* IV *points value:* 3 *duration:* semester 2

*corequisites:* 3696 Introduction to Musicology IV

*contact hours:* 2 hour lecture per week

*content:* Resources and techniques in the study of Australian music; with a particular emphasis on composition from 'the colonial period to the 1980s'.

*assessment:* one essay of 3000 words; participation in seminars.

#### 7078 History of Music Theory IV

*points value:* 3 *duration:* semester 1

*contact hours:* 2 hours per week for one semester in odd years or by consultation in even years (see 9189 Musicology IIIA)

Students are required to attend and participate in the lectures and seminars.

*content:* A study of the history of music theory with special emphasis on medieval and renaissance periods but including baroque, classical and romantic periods to the present day.

*proposed assessment:* an essay of 2,500 - 3,500 words

#### 3696 Introduction to Musicology IV

*level:* IV *points value:* 3 *duration:* semester 1

*contact hours:* 2 hours per week

*content:* A study of the scope of modern musicological studies with special emphasis on Historic Musicology and music bibliography.

*assessment:* one essay of 2000 words; one bibliographic assignment; participation in seminars.

#### 7702 Music Bibliography IV

*points value:* 3 *duration:* semester 2

*contact hours:* 2 hours a week for one semester only

Students are required to attend and participate in the lectures and seminars.

*content:* Library practices and catalogues, primary source catalogues, indices, guides and concordances to music and musical literature, music lexicography and thematic catalogues.

*proposed assessment:* preparation of a bibliographic exercise, equivalent to an essay of 3,000 to 5,000 words

#### 6239 Music Palaeography IV

*points value:* 3 *availability:* not offered in 1996

*contact hours:* 2 hours a week for one semester in even years or by consultation in odd years

Students are required to attend and participate in the lectures and seminars.

*content:* The study of early music manuscripts and notations and the transcription of the same into modern notation.

*proposed assessment:* a small folio of exercises in palaeography

#### 9362 Studies in Early Music IV

*level:* IV *points value:* 3 *duration:* semester 1 & 2

*corequisites:* 3696 Introduction to Musicology IV

*contact hours:* 2 hour lecture per week

*content:* Issues and problems in early music studies; paleographic and editing techniques.

*assessment:* one essay of 2000 words; preparation of an edition of music.

#### 6593 Studies in Music History IVA

*level:* IV *points value:* 3 *duration:* semester 1

*corequisites:* 3696 Introduction to Musicology IV

*contact hours:* 2 hour lecture per week

*content:* A series of lectures and seminars on a topic in western music history to be announced at the beginning of the relevant academic year.

*assessment:* one essay of 3000 words; participation in seminars.

**6667 Studies in Music History IVB**

level: IV points value: 3 duration: semester 2

corequisites: 3696 Introduction to Musicology IV

contact hours: 2 hour lecture per week

content: A series of lectures and seminars on a topic in western music history to be announced at the beginning of the relevant academic year.

assessment: one essay of 3000 words, participation in seminars.

**4723 The Aesthetics of Music IV**

level: IV points value: 3 duration: semester 2

corequisites: 3696 Introduction to Musicology IV

contact hours: 2 hours lecture per week

content: The history of the aesthetics of music from the ancient Greeks to the 20th century and a study of some specific issues.

assessment: one essay of 3,000 words; participation in seminars.

## Graduate Diploma in Piano Pedagogy

### Syllabuses

#### 8485 Educational Studies IV

level: IV points value: 3 duration: semester 2

contact hours: 2 hour seminar per week

content: Detailed study of various approaches to music education including Orff, Kodaly, Dalcroze, Yamaha and Suzuki. Consideration of the practical implications of developmental growth of children and adults in creative teaching.

assessment: seminar paper of 3000 words

#### 8576 Piano Performance IV

level: IV points value: 12 duration: full year

prerequisites: satisfactory audition

contact hours: individual lesson (one hour per week); plus performance class (2 hours per week)

content: Study and performance of prime literature including the following: Bach: one prelude and fugue or suite/ ? or 3 ?. One sonata or set of ? by a classical composer. At least one work from each of the nineteenth and twentieth centuries. A significant chamber work and/or a grasp of ?

assessment: 2 recitals of 40 minutes playing time, with repertoire reflecting the guidelines outlined above. All categories must be represented.

#### 9924 Teaching Techniques and Materials IV

level: IV points value: 3 duration: semester 1

contact hours: 2 hours of seminars and practicum per week

content: Detailed assessment of a wide variety of print and software materials associated with the learning process including tutors, repertoire series and various approaches to the development of technical and theoretical understanding. Assessment and application of various methodologies of aural development including Kodaly and Orff.

assessment: oral presentation of 3000 word paper (70%); Lecturer's reports (30%).

#### 6920 Teaching Practice IVA

level: IV points value: 3 duration: semester 1

contact hours: 2 hours practicum per week

content: Assessment of approaches to creative teaching and learning through teaching practice. Particular reference to average age and younger beginning, elementary and intermediate pupils in a variety of learning modes appropriate to current educational and technological philosophies. Assessment and application of various methodologies of aural development including Kodaly and Orff.

assessment: lecturers' report

#### 8505 Teaching Practice IVB

level: IV points value: 3 duration: semester 2

prerequisites: 6920 Teaching Practice IVA

contact hours: 2 hours practicum per week

content: Assessment of approaches to creative teaching and learning through teaching practice. Particular reference to teenage and adult beginning, elementary, intermediate and advanced pupils in a variety of learning modes appropriate to current education and technological philosophies. Assessment and application of various methodologies of aural development including Kodaly and Orff.

assessment: lecturers' report

## Graduate Diploma in Radio Broadcasting Studies

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar.

As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

### Specific Course Rules

#### 1 Admission requirements

1.1 An applicant for admission to the course of study for the Graduate Diploma must hold a degree of Bachelor of Arts or equivalent qualification.

1.2 Subject to the approval of the Council, the Faculty may accept as a candidate for the Graduate Diploma a person who does not hold the qualifications specified in Specific Course Rule 1.1 above but who has given evidence satisfactory to the Faculty of fitness to undertake work for the Diploma.

1.3 The Faculty, if it sees fit to do so, may require the applicant to complete such additional preliminary work as it may prescribe before being accepted as a candidate for the Graduate Diploma.

#### 2 Duration of course

2.1 Except with the special permission of the Faculty, the course for the Graduate Diploma shall be completed in not more than one year of full-time study. The course is not available on a part-time basis.

#### 3 Review of academic progress

3.1 If in the opinion of the Faculty a candidate for the Graduate Diploma is not making satisfactory progress the Faculty may with the consent of the Council withdraw its approval of candidature and the candidate shall thereupon cease to be enrolled for the Graduate Diploma.

#### 4 Course of study

4.1 To qualify for the Graduate Diploma candidates shall complete the following subjects to the satisfaction of examiners:

2133 Elective in Radio Production IV	2
2633 Elective in Radio Industry Skills IV	2
7344 Live Broadcasting Practicum IV	3

1251 Radio Industry Practicum IV	2
6551 Radio Production IVA	3
8536 Radio Production IVB	3
1751 Radio Production IVC	3
6167 Radio Production IVD	3
6571 The Radio Medium IV	3

4.2 To complete a course of study, a candidate, unless exempted therefrom by the Faculty, shall:

- regularly attend the prescribed lectures, tutorials and seminars; and
- undertake such practical work, fieldwork and case studies, do such written work, and pass such examinations, as the Faculty may prescribe.

4.3 Each candidate's course of study must be approved by the Faculty, or its nominee, at enrolment each year.

#### 5 Assessment and examinations

There shall be four classifications of pass at the final examination in any subject for the Graduate Diploma: Pass with High Distinction, Pass with Distinction, Pass with Credit, and Pass.

#### 6 Status and exemption

No candidate may count toward the Graduate Diploma any subject which he or she has passed for another qualification.

## Syllabuses

### 6571 The Radio Medium IV

*level:* IV *points value:* 3 *duration:* semester 1

*quota:* will apply

*contact hours:* 4 hours per week (two 2 hour lecture-seminars) for 13 weeks

*content:* The nature of radio as a communication medium: its historical perspective and contemporary situation as an institution in Australia, covering: 1. Sound and listening; sound broadcasting technology; oral and literate communication; voice and radio voices; the radio host; radio forms, including interview, talkback, news, advertising, documentary, and music programming; broadcast formats; and station identity. 2. Australian radio history; structure and changes; regulations, codes, ethics and the law; radio audiences and their construction; new technologies; the uses and alternative conceptions of radio.

*assessment:* two 2000 word assignments (each 50%)

### 6551 Radio Production IVA

*level:* IV *points value:* 3 *duration:* semester 1

*quota:* will apply

*contact hours:* 8 hours per week (2 four hour studio sessions) for 5 weeks

*content:* Introducing studio operation, recording techniques and basic radio presentation skills, covering: 1. Basic panel operation - live to air, pre-recording; 2. Radio presentation - presenter's role, speaking scripts, ad-libbing, co-presentation; 3. Microphone use; 4. Recording - formats to include reel, cassette, DAT, cart, and so on; 5. Script writing; 6. Use of computers - MS word

*assessment:* presentation of 1 hour simulated live-to-air program (100%)

### 8536 Radio Production IVB

*level:* IV *points value:* 3 *duration:* semester 1

*quota:* will apply

*prerequisites:* 6551 Radio Production IVA

*assumed knowledge:* Radio Production IVA

*contact hours:* 8 hours per week (2 four hour studio sessions) for 5 weeks

*content:* Further work on studio operation, recording techniques and presentational skills, covering: 1. Voice technique - control and flexibility, breathing, style; 2. Interviewing - preparation, forms and styles, studio, telephone, location interviewing, listening,

administration; 3. Editing - electronic, dub and cut, computer editing; 4. Basic newswriting and production; 5. Program design, planning and administration - programming roles (production, research, music, presentation), sources, use of computer data bases.

*assessment:* production assignment 1 (Interviewing and Editing) (40%); Production Assignment 2 (News bulletin) (20%); Group project (daily magazine) (40%)

### 2133 Elective in Radio Production IV

*level:* IV *points value:* 2 *duration:* semester 1

*quota:* will apply

*prerequisites:* 8536 Radio Production IVB

*assumed knowledge:* 8536 Radio Production IVB

*contact hours:* 2 four hour studio workshops per week for 3 weeks

*content:* Special studies to suit student interests in production areas. A selection is made from the following topics available. Only two or three are offered in any one semester. 1. News production; 2. Music Programming; 3. Feature/Documentary Production; 4. Advertising production; 5. Radio drama; 6. Music recording and production; 7. Specialist commentaries; 8. Basic engineering.

*assessment:* production assignment (100%)

### 1251 Radio Industry Practicum IV

*level:* IV *points value:* 2 *duration:* semester 1

*quota:* will apply

*prerequisites:* 8536 Radio Production IVB, 6571 The Radio Medium IV

*contact hours:* Experience: 80 hours spread over 4 weeks

*content:* Hands on experience in the professional context of the radio industry: Students are assigned to specific locations within the industry to enable them to gain further knowledge through association on a daily basis with the many aspects of radio station practice. It is planned to fit this practicum and invaluable experience into the mid-year period. However, other times may be negotiated if found to be more convenient.

*assessment:* attendance and involvement (100%)

### **7344 Live Broadcasting Practicum IV**

*level:* IV *points value:* 3 *duration:* semester 2

*quota:* will apply

*prerequisites:* 8536 Radio Production IVB and the 6571 Radio Medium IV

*contact hours:* 8 hours per week (2 four hour studio sessions, or equivalent) for 13 weeks

*content:* The nature of radio production and live-to-air broadcasting. This practical study covers the preparation and presentation of a regular two-hour magazine program, weekly, throughout the thirteen weeks of the subject. The following areas will be covered: 1. Program planning and preparation; 2. Program production; 3. Conducting a two-hour broadcast on a weekly basis; 4. Program discussion and feed-back

*assessment:* Interim practicums (20%); Critical assignments (20%); Live broadcast (60%)

### **1751 Radio Production IVC**

*level:* IV *points value:* 3 *duration:* semester 2

*quota:* will apply

*prerequisites:* 8536 Radio Production IVB

*assumed knowledge:* 8536 Radio Production IVB

*contact hours:* 4 hours per week (2 two hour studio sessions) for 5 weeks

*content:* Advanced radio presentation, divided between the focus upon: 1. Announcing skills - co-presentation, panel discussions and debates, vocal styles for different formats, specialist interviewing, talkback production and presentation; 2. Advanced radio scripting - news, current affairs, advertising and promotions, documentary and features, commentaries, reviews.

*assessment:* Radio portfolio (50%), Presentation (demonstration) tape (50%)

### **6167 Radio Production IVD**

*level:* IV *points value:* 3 *duration:* semester 2

*quota:* applies

*prerequisites:* 6551 Radio Production IVA

*assumed knowledge:* 6551 Radio Production IVA

*contact hours:* 4 hours per week (2 two hour studio sessions) for 5 weeks

*content:* Further advanced radio presentation, giving attention to advanced theory of sound and sound treatment: 1. Multi-track recording - using mixers, layering tracks using the FX unit, short practicum in a recording studio; 2. Location recording.

*assessment:* Multi-track production/recording exercise (50%); Location sound recording (50%)

### **2633 Elective in Radio Industry Skills IV**

*level:* IV *points value:* 2 *duration:* semester 2

*quota:* will apply

*prerequisites:* 8536 Radio Production IVB

*assumed knowledge:* 8536 Radio Production IVB

*contact hours:* 4 hours of station participation per week for 3 weeks

*content:* Special studies to suit student interests in key areas of the radio industry. A selection is made from the following topics available. Only two or three are offered in any one semester. 1. Station management; 2. Volunteer liaison; 3. Developing station programming; 4. Research and audiences; 5. Radio sales and marketing; 6. Traffic and accounts.

*assessment:* written assignment (100%)

## Master of Arts (Drama Studies)

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar.

As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

### Specific Course Rules

#### 1 Admission requirements

- 1.1 The Faculty of Performing Arts may accept as a candidate for the degree of Master of Arts (Drama Studies) any person who:
  - 1.1.1 is recommended by a Department or Departments within the Faculty able and willing to provide supervision and facilities for the candidate's work towards the degree and
  - 1.1.2 has obtained an Honours degree, or other qualification accepted by the university as equivalent to an Honours degree, in a subject or subjects to which the candidate's proposed field of study relates.
- 1.2 Subject to the approval of the Board of Graduate Studies acting with authority wittingly devolved to it by Council, the Faculty may, in special cases and subject to such conditions (if any) as it may see fit to impose in each case, accept as a candidate for the degree a person who does not hold the qualification specified in clause 1.1 above, but who has given evidence satisfactory to the Faculty of their fitness to undertake work for the degree.
- 1.3 Before deciding such a person's fitness the Faculty may, if it so desires, require to complete prescribed preliminary work and thereafter, or alternatively to complete a prescribed course of study and pass a qualifying examination of honours standard.
- 1.4 The form and assessment of any preliminary work and/or any course of study shall be proposed by the department or departments concerned and approved by the Faculty. In any qualifying examination at least two examiners, approved by the Faculty for the purpose; must contribute to the assessment of the candidate's performance.

#### 2 Duration of course

- 2.1 Unless the Faculty expressly approves an extension of time in a particular case, the work for the degree shall be completed and the thesis or dissertation submitted:
  - a in the case of a full-time candidate, not less than one year nor more than three years from the date at which candidature was accepted by the Faculty; or
  - b in the case of a part-time candidate, not less than one year nor more than five years from the date at which candidature was accepted by the Faculty.

#### 3 Qualification requirements

- 3.1 Every candidate shall either:
  - (a) present a thesis; or
  - (b) pursue a course of advanced study, which may include practical exercises and present a thesis or dissertation.
- 3.2 The subject of any thesis or dissertation shall be approved by the Department or Departments concerned and by the Faculty.

#### 4 Required program of activities at the commencement for candidature

- 4.1 "Each candidate shall complete a structured program of activities within the first twelve months from commencement of candidature.
- 4.2 Continuation of the candidate's enrolment is conditional upon the completion of the activities to the satisfaction of the Department(s) concerned.
- 4.3 Such activities will be determined by the Department(s) in which the candidate is enrolled. They will include the completion and the presentation of a detailed research proposal, and other courses or skills training deemed necessary by the Department(s) concerned.

4.4 At the completion of the structured program, each candidate shall submit to the Board an outline of the proposed research in such form as the Board may prescribe.

## 5 Assessment and examinations

5.1 The content and method of assessment of any course of advanced study, shall be approved by the department or departments concerned and by the Faculty. Assessment shall in every case be by not less than two examiners of whom at least one shall be external to the University. The names of the examiners and the relative weighting of any course work and the thesis or dissertation in the overall assessment shall be proposed by the department or departments concerned and approved by the Faculty.

5.2 On completion of work for the degree the candidate shall:

- (a) inform the Head or Heads of the Department or Departments in which the candidate's work has been done, and the candidate's supervisor or supervisors of their intention to submit their thesis or dissertation. The Head or Heads shall forthwith propose the names of examiners for approval by the Faculty;
- (b) lodge with the Registrar three copies of the thesis or dissertation prepared in accordance with directions given to candidates from time to time.

5.3 The examiners of the thesis or dissertation may recommend that it either

- (a) be accepted, with or without conditions; or
- (b) be accepted, with or without conditions subject to satisfactory performance in an examination, either written or oral or both, in the field of study immediately relevant to the subject of the thesis or dissertation; or
- (c) be not accepted, but that the candidate be allowed to re-submit it after revision; or
- (d) be rejected.

5.4 The examiners of a thesis or dissertation re-submitted following recommendation (c) may recommend only (a), (b) or (d).

## Master of Arts (Educational Theatre)

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar.

As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

### Specific Course Rules

#### 1 Admission requirements

1.1 An applicant for admission to the course of study for the degree must hold:

- (a) an Honours degree in Educational Theatre or Drama or a Postgraduate Diploma in Drama, or the equivalent; or
- (b) a degree and substantial professional experience in the field of Drama as approved by the Faculty.

1.2 Subject to the approval of the Council, the Faculty may, in special cases and subject to such conditions (if any) as it may see fit to impose in each case, accept as a candidate for the degree a person who does not hold the qualifications specified in Specific Course Rule 1.1 above but who has given evidence satisfactory to the Faculty of fitness to undertake work for the degree.

1.3 The Faculty, if it sees fit to do so, may require the applicant to complete such additional preliminary work as it may prescribe before being accepted as a candidate for the degree.

1.4 Applications for admission shall be addressed to the Registrar.

#### 2 Duration of course

2.1 Except with the permission of the Faculty, the course for the degree shall be completed in not less than three years nor more than five years of part-time study.

#### 3 Review of academic progress

3.1 If in the opinion of the Faculty a candidate for the degree is not making satisfactory progress the Faculty may with the consent of the Council withdraw its approval of candidature and the candidate shall thereupon cease to be enrolled for the degree.

#### 4 General

4.1 A candidate who holds the Graduate Diploma in Educational Theatre shall surrender the Graduate Diploma before being admitted to the degree.

#### 5 Course of study

5.1 To qualify for the degree candidates shall complete the following subjects to the satisfaction of the examiners and according to the requirements of Specific Course Rule 5.3 (note 1, not forming part of the Specific Course Rules below):

3231 Creative Laboratory IVA 6

6066 Creative Laboratory VA 6

4542 Research Method and Dramatic Analysis IV 6

5822 Contemporary Theatre: Structures and Intentions IV 6

and two of the following subjects:

4860 The Uses of Drama in Education and the Community IV 6

1976 Community Theatre: Models and Methods IV 6

3182 Production VA 6

9229 Production VB 6

6249 Dramaturgical Studies in Australian Drama V 6

5.2 To complete a course of study, a candidate, unless exempted therefrom by the Faculty, shall:

(a) regularly attend the prescribed lectures, tutorials and seminars; and

(b) undertake such practical work, fieldwork and case studies, do such written work, and pass such examinations, as the Faculty may prescribe.

**5.3** Each candidate's course of study must be approved by the Faculty, or its nominee, at enrolment each year.

note (not forming part of the Specific Course Rules)

- 1 The course of study for the degree of Master of Arts (Educational Theatre) shall be made up of the following:
  - two creative studies (Level 1 and Level 2) 2 x 6 points = 12 points
  - two core seminars (Semester 1 & Semester 2) 2 x 6 points = 12 points
  - two other Level IV/V topics 2 x 6 points = 12 points.

- 2 The course is available part-time in a three-year plan, as follows:

Year One		Year Two		Year Three	
S1	S2	S3	L1	S4	L2

note: The laboratory studies and the core seminars are compulsory.

- 3 Entry to the course
  - (a) Entry is competitive, dependent upon the places available;
  - (b) Entry is available only through the Graduate Diploma in Educational Theatre course;
  - (c) To proceed from the Graduate Diploma in Educational Theatre, a candidate is required, normally, to have completed the Graduate Diploma with at least two credits in the four subjects studied.

## Syllabuses

### compulsory subjects

#### 3231 Creative Laboratory IVA

*points value:* 6      *availability:* not offered in 1996

*contact hours:* 5 hours per week

*content:* The theatre laboratory is planned along similar lines for the study of both practice and theory in creative activities relevant to Education Theatre. Music, writing, acting, dance, design and the range of theatrical media, namely light sound and film, are utilised to give students the chance: (1) to expand their skills in dramatic expression; (2) to work as contributing members of a tightly organised group; (3) to develop an ever widening range of sensitivities to the expression of ideas; and, (4) to realise new works of force and quality relevant to the social and educational interests of the community. Students are encouraged to reflect upon their practices, to date, and urged to sharpen their critical understanding of the contemporary world of their studies, both in Australia and overseas, with an eye to the future.

Theoretical studies concerned with contemporary performance theory and associated analytical and critical skills in the topics of the laboratory, are pursued as required by the needs of the laboratory. Matters of form and content arise from such interests. Of necessity, close attention is given to movements in Australian drama.

It is not envisaged that the formal mounting and performance of an established work, play or script, fulfils the basic creative spirit conceived for a laboratory in Educational Theatre. The laboratory is to serve as a creative experience to extend study skills in drama, not to reiterate old thoughts and tested practices.

It is expected that the final presentation be of considerable merit as an original piece of theatre.

*assessment:* interim research assignments (15%); interim performance activity and achievement (15%); final presentation (45%); 1 formal report (3,000 words) of processes and findings (25%)

#### 6066 Creative Laboratory VA

*points value:* 6      *availability:* not offered in 1996

*contact hours:* 5 hours per week

*content:* The second laboratory required in the M.A. (coursework) degree is planned along similar lines to the first laboratory: for the study of both practice and theory in creative activities relevant to Educational Theatre; focus is given to the elements of performance

and the associated individual and group processes necessary to generate ideas and to formulate theatre works. The studies of the second laboratory are planned: (1) to complement the work of the first laboratory; (2) to give students the chance to benefit from the knowledge gained in the first laboratory; and (3) to ensure that students continue to grow in the power and understanding of their own creative endeavours in the field. The second laboratory enables students to gain experiences with a second director and ensures that considerable time is devoted to experimentation and refinement in the full knowledge that group creative practices, while tending to be slow in evolution, are considered vital to furthering the learning objectives of the drama group. It is expected that the final presentation be of considerable merit as an original piece of theatre.

*assessment:* interim research assignments (15%); interim performance activity and achievement (15%); final presentation (45%); 1 formal report (3,000 words) of processes and findings (25%).

#### 4542 Research Method and Dramatic Analysis IV

*level:* IV      *points value:* 6      *duration:* semester 1

*prerequisites:* entry into MA Studies

*contact hours:* 3 hours per week

*content:* This subject is studied in two parts, namely: (1) research methodology and (2) issues in dramatic analysis.

The first-named deals with defining a field of study; research methods and purposes; practice and experiment; collecting data, library and media research; interviewing techniques, presentation requirements, format, convention and style; arguing and supporting a case; preparing an annotated bibliography. Students are required at all times to refine their writing skills and report presentation.

The second section of study which is conducted in parallel with the methodological section provides an overview of select issues in dramatic theory related to the function and meaning of Western drama from Classical Greece to the present. Topics cover Aristotle, Horace, medievalism, the Renaissance, acting theory, political theatre, the comic tradition, stage structure and design, twentieth century theatre movements and styles, the influence of film and television...

*assessment:* research methodology 40%; issues in dramatic analysis 60%

**5822 Contemporary Theatre Structures and Intentions IV**

level: IV points value: 6

availability: not offered in 1996

prerequisites entry into MA Studies

contact hours: 3 hours per week

*content:* The focus of this study is on ritual, the evolution, theory and practice of ritual in society from archaic time, and its incorporation in contemporary theatre practice. A number of set readings dealing with various social rituals from a variety of cultures address relevant issues. Contemporary theories and practice of the avant garde are carefully considered especially as evident in the work of Peter Brook, Richard Schechner, The Living Theatre, Jerzy Grotowski, Joseph Chaikan, Tadeusz Kantor, Ariane Mnouchkine, Robert Wilson and Philip Glass. Students are expected to be able to analyse a ritual in terms of not only structure but also origins. Each student is required to design, justify, produce and report upon a ritual devised and presented within the local community.

*assessment:* readings in ritual 15%; analytical essay 15%; seminar participation 20%; ritual design, production, justification and report 50%.

**elective subjects**

**4860 The Uses of Drama in Education and the Community IV**

points value: 6 availability: not offered in 1996

prerequisites: 4542 Research Method and Dramatic Analysis or lecturer approval.

contact hours: 3 hours per week

*content:* Through this seminar, students expand upon their insight into the history and development of the use of drama, worldwide, in both the field of education and the life of the community at large. Research opportunities are given to explore the various approaches to drama within contemporary education systems at both a national and international level. Appropriate methodologies for making relevant comparisons and evaluating the processes are developed; the 'pros' and 'cons' of the respective approaches are carefully debated. Issues considered in the wider educational context include: current practices and future possibilities for the use of drama within the community; the use of drama for people with special needs, for instance, with the blind and the deaf and the bodily disadvantaged; techniques for using drama as a basis for training within business and industry; role-play as a learning device. Students are required to conduct personal in-depth research on at least one aspect of this topic in the South Australian community.

*assessment:* seminar presentations (30%); interim short reports (2 x 10) (20%); final paper (3,000 words) (50%)

**1976 Community Theatre: Models and Methods IV**

points value: 6 availability: not offered in 1996

prerequisites: 4542 Research Method and Dramatic Analysis or lecturer approval.

contact hours: 3 hours per week

*content:* The notion of the theatre as a vital element of community life is examined together with the many aspects of theatre activity in Australia from adult to children's theatre. Funding processes, staffing, artistic direction, management, promotion and audience are among the issues discussed. A framework for developing a community theatre from artistic vision to realisation is developed at depth by each student. This subject is an introduction to the development, principles and practice of community theatre. The subject traces a history of the major influences upon the varying contemporary practice of community theatre. Upon this foundation it then describes forms of contemporary community theatre practice, their concerns and aspirations and their trajectory over recent times. Concurrently, the subject will provide practice in a variety of methods employed within community theatre. To develop the abilities to make informed analyses of purposes and to appropriately devise and apply method to context are objectives of this course. An interest is assumed in the application of theatrical methods to community contexts. Thus a guiding concern of the course is to enable students to enhance their own educational, social and theatrical practice by a deeper understanding and skilled practice of community theatre approaches.

*assessment:* seminar presentations (30%); interim short reports (2 x 10) (20%); Final paper (3,000 words) (50%)

**3182 Production VA**

points value: 6 availability: not offered in 1996

contact hours: as required by the demands of the production process

*content:* This option is concerned with creating a public performance in a formal theatre space and it is one of two options in theatre studies available to post-graduate students in the Department of Drama. The productions are part of the Department's annual Playbill which is designed by staff and students to give first hand experience in a wide variety of theatrical styles, processes of creativity and dramatic literature over the years of a student's participation in the life of The University of Adelaide. Any one study in Production inevitably focuses with great intensity on

the demands of realising a specially selected text. The actual playscript which is studied and produced varies every time, dependent upon the nature of the Playbill for the year. Thus, the precise nature of the learning varies from text to text as the plays change, the playwrights, the styles, and the historical and sociological backgrounds requiring to be investigated for a justifiable interpretation of the performance materials. When examining a text for production, the following matters always arise for discussion, solution and action: the historical context, period and style; the playwright, themes and other works; the analysis of the text, structure and function; performance, skills and refinements; staging and stagecraft; design, including set, costume and properties; rehearsal process; discipline; the responsibility of the individual to the ensemble; audience and communication; funding and marketing; management and organisation; interpretation; criticism.

*note:* Acceptance into this option is dependent entirely on winning a successful assignment, from the staff member who is the artistic director, to engage in the named production either as an actor or in a technical and management capacity.

*assessment:* To achieve a satisfactory standard a student is required to make a full contribution to the rehearsal schedule set up by the director and to participate with energy, showing insight and imagination, personal discipline and accomplishment, in all the rehearsals and performances as required by the season of the play presentation. Most of this activity occurs in the evening, as the availability of all personnel in the performance company pre-determines and the normal schedule of evening performances dictates. Such a rehearsal process is inevitably intense. Therefore, a flexibility of attitude, and a strong commitment to the production and the endeavours of the other people involved, together with a ready sense of compromising private interests, is necessary for a student wishing to participate in this option.

### 9229 Production VB

*points value:* 6      *availability:* not offered in 1996

*syllabus details:* see 3182 Production VA

### 6249 Dramaturgical Studies in Australian Drama V

*points value:* 6      *availability:* not offered in 1996

*contact hours:* negotiable

*content:* This option is planned to enable students particularly interested in historical research and cultural theory to pursue that interest in a carefully defined project of applied research into Australian drama. It is intended that the focus of this research is in the area of Australian drama and that the resources of

the Performing Arts Collection in South Australia, being readily accessible, provide an important base of materials from which to investigate a clearly defined topic of importance to the heritage of drama in this country. Students are at liberty to use resources in Australian drama available elsewhere, including interstate, for their research projects, providing any travelling, living, accommodation and other costs incurred during the studies are met by the students themselves. While appropriate interim reports are expected from each student, as negotiated with the lecturer-in-charge, the final report, formally presented, provides the focus for the student's achievement. It is expected that the report remains with the Department of Drama for inclusion in an annual publication of essays on Post-graduate research findings.

*assessment:* Staff consultations (15%); interim reports (25%); final report (4000 words) (60%).

*textbooks:* While no specific text is set for this study, it is to be appreciated that central to dramaturgical work is a thorough understanding of the methodology and considerations of performance documentation, theories and accounts of theatre processes, the nature of text in relation to venue, the roles of director and actor, the nature of performance and the context of production, including the critical view of works, all of which are areas of consideration that arise elsewhere in the M.A. course, especially in the core seminars. A continued acquaintance with these materials is necessary. A high level of understanding, evidence of a strong background of reading, continued reading and relevant experience in the above areas, together with an enthusiasm for such matters, is expected from a student of dramaturgical studies. A good writing style is essential as well as an above average interest in writing about drama, collecting, organising and analysing historical materials.

## Master of Music

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar.

As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

### Specific Course Rules

#### 1 Admission requirements

**1.1** The Faculty of Performing Arts may accept as a candidate for the degree of Master of Music a person who: (a) has qualified in The University of Adelaide for the degree of Bachelor of Music (New), or Graduate Diploma in Music Education or Graduate Diploma in Musicology or Graduate Diploma in Intercultural Music; or (b) has obtained, in another university or institution recognised for the purpose, a qualification which is accepted by the Faculty of Performing Arts as equivalent to the degree of Bachelor of Music (New) in The University of Adelaide.

**1.2** In special cases the Board of Graduate Studies acting with authority wittingly devolved to it by Council, on the recommendation of the Faculty and subject to such conditions (if any) as it may impose in each case, may accept as a candidate for the degree a person who, irrespective of whether or not he/she is a university graduate, has given evidence satisfactory to the Faculty of his or her fitness to undertake studies for the degree of Master of Music.

#### 2 Duration of course

**2.1** The course of study for the degree shall comprise two parts as follows and, unless the Faculty expressly approve an extension of time in a particular case, shall be completed within the time limits prescribed below:

Part A: Such preliminary study and examinations as may be prescribed in the Specific Course Rules of the degree extending over not more than one year of full-time study or two years of part-time study.

Part B: A course of advanced study and/or research extending over not less than one year nor more than three years of full-time study. The Faculty may, in special cases, permit a candidate to complete part B over not less than two years

nor more than five years of part-time study. A candidate shall not be permitted to proceed to part B until he/she has fulfilled the requirements of part A.

**2.2** A candidate may be exempted from the whole or such part of Part A as the Faculty may decide the candidate has:

- (a) qualified for the Honours degree of Bachelor of Music (New).
- (b) qualified for the Ordinary degree of Bachelor of Music (New) and has passed in (i) all the Ordinary degree subjects that are compulsory for the Honours degree in the field to which his subject of study related; and (ii) an examination of Honours standard approved by the Faculty; or
- (c) obtained a qualification which is accepted by the Faculty as equivalent to the Honours degree of Bachelor of Music (New) in The University of Adelaide; or
- (d) qualified for the Graduate Diploma in Musicology or Graduate Diploma in Intercultural Music or Graduate Diploma in Music Education.

**2.3** A candidate who has obtained qualifications which fully or partly satisfy the requirements specified in Specific Course Rule 2.2 (a), (b), (c) or (d) above may be exempted from the whole or such part of Part A as the Faculty may decide, and shall therefore fulfil the requirements of Part B, as prescribed in the Specific Course Rules.

#### 3 Required program of activities at the commencement for candidature

**3.1** Each candidate shall complete a structured program of activities within the first twelve months from commencement of candidature.

3.2 Continuation of the candidate's enrolment is conditional upon the completion of the activities to the satisfaction of the Department(s) concerned.

3.3 Such activities will be determined by the Department(s) in which the candidate is enrolled. They will include the completion and the presentation of a detailed research proposal, and other courses or skills training deemed necessary by the Department(s) concerned.

3.4 At the completion of the structured program, each candidate shall submit to the Board an outline of the proposed research in such form as the Board may prescribe.

#### 4 Review of academic progress

4.1 If in the opinion of the Faculty of Performing Arts a candidate is not making satisfactory progress the Faculty may, with the consent of the Council, withdraw its approval of his candidature and the candidate shall cease to be enrolled for the degree.

#### 5 Assessment and examinations

5.1 Every candidate shall pursue a program of advanced study in music as prescribed in the Specific Course Rules. The subjects and content and relative weighting of all sections of a candidate's program, together with the method of examination of advanced work shall be approved by the Faculty, provided that the work of Specific Course Rule 8 shall be examined as provided in Specific Course Rule 5.3.

5.2 On completion of work for the degree a candidate shall lodge with the Registrar three copies of his or her submission made in accordance with the requirements of Specific Course Rule 8, prepared in accordance with directions given to candidates from time to time.\*

5.3 (a) Not less than two examiners, at least one of whom shall be an external examiner, shall be appointed by, and shall report to, the Faculty of Performing Arts.

(b) The examiners may require a candidate to undergo further examination in the field of study immediately relevant to his subject.

(c) The examiners may recommend that the work under examination:

- (i) be accepted (subject, if they so recommend, to minor amendments being made); or

- (ii) be not accepted but returned to the candidate for revision and re-submission; or

- (iii) be rejected.

#### 6 General

6.1 A candidate who fulfils the requirements of these Specific Course Rules and satisfies the examiners in the field to which his subject relates shall on the recommendation of the Faculty of Performing Arts be admitted to the degree.

#### 7 Preliminary study and examinations: Part A

7.1 Such preliminary work and examinations as may be prescribed in each individual case. This shall normally comprise one Honours subject (other than Musicology or Ethnomusicology or Music Education) as prescribed in the Specific Course Rules for the Honours degree of Bachelor of Music.

#### 8 Programs of study: Part B

8.1 A candidate shall satisfactorily complete a program of advanced study to be approved by the Faculty after consultation with his supervisor including the following:

- (a) a composition or compositions; *or*

- (b) a thesis on a topic in Historical Musicology, Systematic Musicology, Ethnomusicology, Music in Education, Sonological Research, or in relevant interdisciplinary studies; *or*

- (c) an edition with critical commentary; *or*

- (d) a dissertation and a report on original field or practical work in any of the areas specified in (b) above.

8.2 Such other advanced course work or seminar work as may be prescribed or approved in each individual case. Candidates taking Specific Course Rule 8.1(a) must present two seminar papers or a major analysis, not assessed by the external examiner. Candidates taking Specific Course Rule 8.1(b), (c) and (d) must present at least four seminar papers which will not be assessed by the external examiner.

notes (not forming part of the Specific Course Rules)

It is expected that the length of seminar papers will normally be approximately 5,000 words.

# Master of Music (Performance)

## Specific Course Rules

### 1 Admission requirements

1.1 The Faculty of Performing Arts may accept as a candidate for the degree a person who has qualified for:

- (a) the Honours degree of Bachelor of Music (Performance) of The University of Adelaide at First Class or IIA standard; or
- (b) the Graduate Diploma in Music Performance of The University of Adelaide at a standard comparable to First Class or IIA Honours; or
- (c) a degree or diploma in Music of another institution accepted for the purpose by the University.

The Faculty reserves the right to require an acceptable level of performance at audition.

1.2 In special cases the Board of Graduate Studies acting with authority wittingly devolved to it by Council on the recommendation of the Faculty and subject to such conditions (if any) as it may impose in each case, may accept as a candidate for the degree an applicant who has given other evidence satisfactory to the Faculty of their fitness to undertake studies for the degree.

### 2 Duration of course

2.1 To qualify for the degree a candidate shall complete a course of advanced studies in Performance extending over not less than three semesters or more than two years of full-time study. The Faculty may, in special cases, permit a candidate to complete the degree over not less than two years nor more than four years of part-time study.

### 3 Qualification requirements

3.1 To qualify for the degree a candidate shall:

- (a) undertake an approved program of advanced study in singing, conducting or a musical instrument, under the direction of a supervisor or supervisors appointed by the Director of the Elder Conservatorium;

- (b) attend such seminars and present such papers in musicology or ethnomusicology as may be prescribed in the Specific Course Rules;

- (c) perform at a satisfactory standard at such public recitals as may be prescribed in the Specific Course Rules.

### 4 Review of academic progress

4.1 If in the opinion of the Faculty a candidate is not making satisfactory progress the Faculty may, with the consent of the Council, terminate the candidature.

### 5 Subjects of study

note: Notwithstanding the Specific Course Rules and Syllabuses published in this volume, a number of subjects listed may not be offered in 1996.

The availability of all subjects is conditional upon the availability of staff and facilities.

#### 5.1 Compulsory subjects

8857 Recital Studies IA	4
7222 Recital Studies IIA	4
4623 Masters Recital VA	8
9540 Masters Recital VB	8

provided that candidates may continue their enrolment for 4623 Masters Recital VA and 9540 Masters Recital VB for two semesters.

#### 5.2 Elective subjects

Subjects to the value of 12 points from:

2311 Ethnomusicology Seminar V(A)	4
9808 Ethnomusicology Seminar V(B)	4
1283 Ethnomusicology Seminar V(C)	4
6195 Medieval Studies V	4
9618 Renaissance Studies V	4
7552 Baroque Studies V	4
2327 Studies in Late 18th Century Classicism V	4
3566 Nineteenth Century Studies V	4
6174 Twentieth Century Studies V	4

6533 Australian Studies V	4
6185 Music Education Seminar V(A)	4
4505 Music Education Seminar V(B)	4
8975 Music Education Seminar V(C)	4
1895 Music Theory Seminar V(A)	4
6630 Music Theory Seminar V(B)	4
4710 Fundamentals of Musical Communication V	4

Specific Course Rule 5.2) as required by the Director of the Elder Conservatorium, and shall submit for assessment in each of the elective subjects seminar papers approximately 5,000 words in length.

- (b) Should any of the seminar papers be assessed as unsatisfactory, the candidate may re-present the paper or submit a paper in another seminar.

notes (not forming part of the Specific Course Rules)

**Pattern of study**

Candidates are advised to present 8857 Recital Studies IA and 7222 Recital Studies IIA and two of the elective subjects in their first year of enrolment. Candidates should present 4623 Masters Recital VA, 9540 Masters Recital VB and the one remaining elective subject in their final year of enrolment.

Candidates enrolled part-time may present 2852 Recital Studies I (part-time) and 2620 Recital Studies II (part-time).

**6 Recital requirements**

- 6.1 (a) Each candidate shall present two public recitals (4623 Masters Recital VA and 9540 Masters Recital VB) to be given at an interval of not more than 3 months, the duration of each to be approximately 75 minutes, provided that for Bassoon, Brass, Oboe and Voice recitals, it shall be approximately 65 minutes.

- (b) Details of the recital programs shall be submitted to the Director of the Elder Conservatorium for approval not less than six months before the first recital.

- 6.2 (a) For each candidate, a panel of at least four examiners including at least one external examiner shall be appointed by the Faculty to assess the two recitals (4623 Masters Recital VA and 9540 Masters Recital VB). The candidate's supervisor shall not be an examiner.

- (b) The examiners may recommend that the recitals

- (i) merit the award of the degree
- (ii) do not merit the award of the degree

In the latter case, the examiners may also recommend that the candidate be permitted to re-present all or part of a recital within a specified time. Should the Faculty accept the latter advice, the same examiners should, as far as practicable, assess the additional recital.

- (c) Unless a panel of examiners has recommended that a candidate be permitted to re-present a recital, no candidate may be examined for the degree more than once.

**7 Seminar requirements**

- 1 (a) Each candidate shall attend three postgraduate seminars in Musicology or Ethnomusicology (see elective subjects in

## Syllabuses

### compulsory subjects

#### 8857 Recital Studies IA

*points value:* 4      *duration:* semester 1 or 2

*restriction:* 3509 Recital Studies I

*contact hours:* 1 hour per week individual tuition

*content:* Candidates are required to prepare advanced performance repertoire in preparation for the recitals presented at the end of the course.

*assessment:* teacher's report based on standard and achievement, progress and technical development, attitude, punctuality and attendance

#### 2852 Recital Studies I (Part Time)

*points value:* 4      *duration:* full year

*prerequisite:* audition

*restriction:* 3509 Recital Studies I, 8857 Recital Studies IA

*contact hours:* half hour per week individual tuition

*content:* candidates are required to prepare advanced performance repertoire in preparation for the recitals presented at the end of the course

*assessment:* teacher's report based on standard and achievement, progress and technical development, attitude, punctuality and attendance.

#### 7222 Recital Studies IIA

*points value:* 4      *duration:* semester 1 or 2

*restriction:* 1940 Recital Studies II

*prerequisites:* 8857 Recital Studies IA

*contact hours:* 1 hour per week individual tuition

*content:* candidates are required to prepare advanced performance repertoire in preparation for the recitals presented at the end of the course.

*assessment:* teacher's report based on standard and achievement, progress and technical development, attitude, punctuality and attendance

#### 2620 Recital Studies II (Part Time)

*points value:* 4      *duration:* full year

*prerequisite:* 8857 Recital studies IA or 2852 Recital Studies I (Part Time)

*restriction:* 1940 Recital Studies II , 7222 Recital Studies IIA

*contact hours:* half hour per week individual tuition

*content:* candidates are required to prepare advanced performance repertoire in preparation for the recitals presented at the end of the course

*assessment:* teacher's report based on standard and achievement, progress and technical development, attitude, punctuality and attendance.

#### 4623 Masters Recital VA

*level:* V   *points value:* 8   *duration:* semester 1 or 2

*restriction:* 8087 Masters Recital A

*contact hours:* 30 minutes individual tuition per week

*content:* A selection of works from those prepared in preparation for 8857 Recital Studies IA are chosen for presentation at a public recital. Details of the recital program must be submitted to the Director of the Elder Conservatorium for approval not less than six months before the first recital.

*assessment:* one public recital to be given at an interval of not more than 3 months from the recital given for Masters Recital VB. The duration of the recital is to be approximately 75 minutes, provided that for Bassoon, Brass, Oboe and Voice recitals, it shall be approximately 65 minutes. A panel of 4 examiners including at least one external examiner, shall be appointed by the Faculty. The candidate's supervisor shall not be an examiner.

#### 9540 Masters Recital VB

*level:* V   *points value:* 8   *duration:* semester 1 or 2

*restriction:* 8354 Masters Recital B

*contact hours:* 30 minutes individual tuition per week

*content:* a selection of works from those prepared in Preparation for Recital Studies IIA are chosen for presentation at a public recital. Details of the recital performance must be submitted to the Director of the Elder Conservatorium for approval not less than 6 months before the first recital.

*assessment:* one public recital to be given at an interval of not more than 3 months from the recital given for Masters Recital VA. The duration of the recital is to be of approximately 75 minutes, provided that for Bassoon, Brass, Oboe and Voice recitals it shall be approximately 65 minutes. A panel of 4 examiners including at least one external examiner shall be appointed by the Faculty. The candidate's supervisor shall not be an examiner.

### elective subjects

#### 6533 Australian Studies V

*points value:* 4                      *duration:* semester 2

*contact hours:* Contact hours are usually held in a sequence until all papers are given the equivalent of one hour per week for one half-semester.

*content:* a series of introductory lectures and a sequence of individual papers given by the participants on a topic to be announced in Orientation Week of the relevant year.

*assessment:* a paper of 5,000 words or its equivalent

#### 7552 Baroque Studies V

*points value:* 4                      *duration:* semester 1 or 2

*contact hours:* Contact hours are usually held in a sequence until all papers are given the equivalent of one hour per week for one half-semester.

*content:* a series of introductory lectures and a sequence of individual papers given by the participants on a topic to be announced in Orientation Week of the relevant year.

*assessment:* a paper of 5,000 words or its equivalent

#### 2311 Ethnomusicology Seminar V(A)

*points value:* 4                      *availability:* not offered in 1996

*content:* this subject examines advanced theory and literature of ethnomusicology. It investigates current issues with special reference to the Australian context.

*assessment:* an oral presentation of one 5,000 word paper

#### 9808 Ethnomusicology Seminar V(B)

*points value:* 4                      *availability:* not offered in 1996

*content:* this subject examines advanced theory and literature of ethnomusicology. It investigates current issues with special reference to the Australian context.

*assessment:* an oral presentation of one 5,000 word paper

#### 1283 Ethnomusicology Seminar V(C)

*points value:* 4                      *availability:* not offered in 1996

*content:* this subject examines advanced theory and literature of ethnomusicology. It investigates current issues with special reference to the Australian context.

*assessment:* an oral presentation of one 5,000 word paper

#### 4710 Fundamentals of Musical Communication V

*level:* Masters    *points value:* 4    *duration:* full year

*contact hours:* 1 hour seminar per fortnight average

*content:* a series of lectures covering the following topics: (1) persons involved in musical communication; composer; performer; listener; tasks and side effects; (2) sources of music; (3) musical articulation; vocal communication and human behaviour; startle reaction and vocal communication; impulse intensity formula; musical articulation of one note and of adjoining notes; (4) sources of tension and energy in music; tension/relaxation patterns in the four basic relationships between notes; (5) elementary form; integration of rhythm and metre. Elementary form-motive; (6) typology of musical ideas and musical forms; (7) musical ideas; analysis of musical forms based on various kinds of musical ideas; (8) fantasy tools; three aspects of musical articulation; passage; articulation patterns; shape and form; tempo; breaching the regularity; tectonics; Student presentations will be included.

*assessment:* presentation of the students own recorded performance, covering the following musical forms, such as: sonata, rondo, variations, line, free development (N.B. the items might be chosen from M. Mus. Recital Studies or Masters Recitals programs) and presentation of a paper (5,000 words) analysing the chosen works and the performance.

#### 6195 Medieval Studies V

*points value:* 4                      *duration:* semester 1 or 2

*contact hours:* Contact hours are usually held in a sequence until all papers are given the equivalent of one hour per week for one half-semester.

*content:* a series of introductory lectures and a sequence of individual papers given by the participants on a topic to be announced in Orientation Week of the relevant year.

*assessment:* a paper of 5,000 words or its equivalent

#### 6185 Music Education Seminar V(A)

*level:* V    *points value:* 4    *duration:* semester 1 or 2

*contact hours:* as required by seminar series

*content:* the subject examines theoretical constructs, practical applications and literature in music education. It investigates current issues and practices with special reference to Australian contexts.

*assessment:* an oral presentation of one 5,000 word paper

**4505 Music Education Seminar V(B)**

*level:* V *points value:* 4 *duration:* semester 1 or 2

*contact hours:* as required by seminar series

*content:* the subject examines theoretical constructs, practical applications and literature in music education. It investigates current issues and practices with special reference to Australian contexts.

*assessment:* an oral presentation of one 5,000 word paper

**8975 Music Education Seminar V(C)**

*level:* V *points value:* 4 *duration:* semester 1 or 2

*contact hours:* as required by seminar series

*content:* the subject examines theoretical constructs, practical applications and literature in music education. It investigates current issues and practices with special reference to Australian contexts.

*assessment:* an oral presentation of one 5,000 word paper

**1895 Music Theory Seminar V(A)**

*level:* V *points value:* 4 *duration:* semester 1 or 2

*contact hours:* 2 hour seminar per week or equivalent

*content:* the subject examines advanced theoretical concepts in music, their application in analytical and compositional process and their relation to performance practice.

*assessment:* an oral presentation of one 5,000 word paper, or equivalent

**6630 Music Theory Seminar V(B)**

*level:* V *points value:* 4 *duration:* semester 1 or 2

*contact hours:* 2 hour seminar per week or equivalent

*content:* the subject examines advanced theoretical concepts in music, their application in analytical and compositional process and their relation to performance practice.

*assessment:* an oral presentation of one 5,000 word paper, or equivalent

**3566 Nineteenth Century Studies V**

*points value:* 4 *duration:* semester 1

*contact hours:* contact hours are usually held in a sequence until all papers are given the equivalent of one hour per week for one half-semester.

*content:* a series of introductory lectures and a sequence of individual papers given by the participants on a topic to be announced in Orientation Week of the relevant year.

*assessment:* a paper of 5,000 words or its equivalent

**9618 Renaissance Studies V**

*points value:* 4 *duration:* semester 1 or 2

*contact hours:* contact hours are usually held in a sequence until all papers are given the equivalent of one hour per week for one half-semester.

*content:* a series of introductory lectures and a sequence of individual papers given by the participants on a topic to be announced in Orientation Week of the relevant year.

*assessment:* a paper of 5,000 words or its equivalent

**2327 Studies in Late 18th Century  
Classicism V**

*points value:* 4 *duration:* semester 1 or 2

*contact hours:* contact hours are usually held in a sequence until all papers are given the equivalent of one hour per week for one half-semester.

*content:* a series of introductory lectures and a sequence of individual papers given by the participants on a topic to be announced in Orientation Week of the relevant year.

*assessment:* a paper of 5,000 words or its equivalent

**6174 Twentieth Century Studies V**

*points value:* 4 *duration:* semester 2

*contact hours:* contact hours are usually held in a sequence until all papers are given the equivalent of one hour per week for one half-semester.

*content:* a series of introductory lectures and a sequence of individual papers given by the participants on a topic to be announced in Orientation Week of the relevant year.

*assessment:* a paper of 5,000 words or its equivalent

## Master of Music Theory

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar.

As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

### Specific Course Rules

#### 1 Admission requirements

1.1 The Faculty of Performing Arts may accept as a candidate for admission to the course of study for the degree a person who has qualified for:

- (a) the Ordinary degree of Bachelor of Music (New), or Bachelor of Arts of The University of Adelaide, and in addition the Graduate Diploma in Music Theory; or
- (b) an award of another institution accepted for the purpose by the Faculty.

1.2 In special cases the Board of Graduate Studies, acting with the authority wittingly devolved to it by Council, on the recommendation of the Faculty and subject to such conditions (if any) as it may impose in each case, may accept as a candidate for the degree an applicant who has given other evidence satisfactory to the Faculty of their fitness to undertake studies for the degree.

#### 2 Duration of course

2.1 To qualify for the degree a candidate shall:

- (a) satisfactorily complete a course of study and research extending over not less than two years as a full-time student, and not less than three years as a part-time student; and
- (b) present a satisfactory dissertation on a research topic approved by the Faculty.

#### 3 Review of academic progress

3.1 If in the opinion of the Faculty a candidate is not making satisfactory progress the Faculty may, with the consent of the Board of Graduate Studies, terminate the candidature.

#### 4 General

4.1 A candidate shall submit for approval by the Faculty the subject of the candidate's dissertation. The Faculty shall appoint one or more supervisors to guide the candidate's research.

4.2 On completion of research work the candidate shall lodge with the Registrar three copies of the dissertation prepared in accordance with directions given to candidates from time to time. The Faculty shall appoint two examiners, one of whom shall be external to the University.

4.3 A candidate who holds the Graduate Diploma in Music Theory shall surrender the Graduate Diploma before being admitted to the degree.

#### 5 Admission requirements

5.1 To qualify for the degree of Master of Music Theory a candidate shall, unless exempt therefrom by the Faculty satisfactorily complete all of the following subjects:

8965 Advanced Applied Tonal Theory IV	4
6564 Advanced Tonal Analysis IV	4
1331 Advanced 20th Century Techniques and Analysis IV	4
4796 Advanced Tonal Counterpoint IV	4
3803 Music Theory Research Project IV	6
3177 Music Theory Seminar IV	4
1895 Music Theory Seminar VA	4
1334 Music Theory Thesis VA	12
6833 Pedagogy of Music Theory	4

and one elective subject to the value of 4 points from one of the Masters courses offered by the Faculty.

## Syllabuses

---

### **1895 Music Theory Seminar V(A)**

*level:* V *points value:* 4 *duration:* semester 1 or 2

*contact hours:* two hour seminar per week or equivalent

*content:* The subject examines advanced theoretical concepts in music, their application in analytical and compositional process and their relation to performance practice.

*assessment:* an oral presentation of one 5,000 word paper, or equivalent

### **1334 Music Theory Thesis VA**

*level:* V *points value:* 12 *duration:* full year

*prerequisites:* Graduate Diploma in Music Theory

*restriction:* 3354 Music Theory Thesis V

*contact hours:* regular supervision by appointment

*content:* A thesis on a topic not previously assessed of an analytical, philosophical and pedagogical type dealing with a music theory topic.

*assessment:* a thesis of the equivalent of 12,000-15,000 words

### **6022 Pedagogy of Music Theory VA**

*level:* V *points value:* 4 *duration:* semester 1 or 2

*prerequisites:* Graduate Diploma in Music Theory

*restriction:* 6833 Pedagogy of Music Theory V

*content:* this subject primarily involves supervised attendance and participation (including taking selected classes) in the undergraduate music theory course. Familiarity with music theory teaching manuals and pedagogical theory publications will be assessed at the viva voce.

*assessment:* based on attendance and participation in selected undergraduate classes and viva voce at the end of the semester.

## Doctor of Music

### Regulations

- 1 (a) The Faculty of Performing Arts may accept as a candidate for the degree of Doctor of Music a person who:
    - (i) has qualified in The University of Adelaide for the degree of Bachelor of Music (New), or the degree of Master of Music; or
    - (ii) has obtained another degree in The University of Adelaide and has satisfied the Faculty of his fitness to submit work for the degree of Doctor of Music.
  - (b) On the recommendation of the Faculty of Performing Arts, the Board of Graduate Studies acting with authority wittingly devolved to it by Council may accept as a candidate for the degree a person who
    - (i) has obtained in another university or institution of higher education recognised by The University of Adelaide a qualification accepted by the Faculty as equivalent to one of the qualifications specified in (a) above and
    - (ii) has, or has had, a substantial association with the University.
  - (c) No person may be admitted to the degree of Doctor of Music before the expiration of five years from the date on which he obtained the qualification prescribed in (a) or (b) (i) above.
- 2 A person who desires to become a candidate for the degree shall give notice of his intended candidature in writing to the Registrar and with such notice shall furnish particulars of his musical achievements and of the work which he proposes to submit for the degree.
    - (b) The Faculty of Performing Arts shall appoint a committee to examine the information submitted and to advise the Faculty whether the Faculty should:
      - (i) allow the applicant to proceed, and approve the details of the work to be submitted; or
      - (ii) advise the applicant not to submit his work; and the Faculty's decision shall be conveyed to the applicant.
    - (c) If it accept the candidature and approve the details of the work to be submitted, the Faculty shall nominate examiners of whom two at least shall be external examiners.
- 3 (a) To qualify for the degree the candidate shall furnish satisfactory evidence that he has made an original and substantial contribution of distinguished merit in the field of composition, performance, research or in any combination of these fields.
    - (b) The degree shall be awarded primarily on a consideration of such of his published or recorded compositions, recorded interpretations of music or published research as the candidate may submit for examination, but the examiners may take into account any unpublished material or other work that he may submit in support of his candidature.
    - (c) The candidate in submitting his work shall, where applicable, state generally in a preface and specifically in notes the main sources from which it is derived and the extent to which he has availed himself of the work of others. He may also signify in general terms the portions of his work which he claims as original.
    - (d) The candidate shall indicate what part, if any, of the work submitted in support of his candidature has been accepted for the award of any other degree in this or any other university.
- 4 The candidate shall lodge with the Registrar three copies of the work prepared in accordance with the directions given in sub-paragraph (b) of clause 2B of Chapter XXV of the Statutes. If the work is accepted for the degree the Registrar will transmit two of the copies to the University Library.
- 5 A candidate who complies with the foregoing conditions and satisfies the examiners may, on the recommendation of the Faculty of

Performing Arts, be admitted to the degree of Doctor of Music.

- 6 Notwithstanding anything contained in the preceding regulations the Faculty may recommend the award of the degree to any person who is not a member of the Staff of the University. Any such recommendation must be accompanied by evidence that the person for whom the award is proposed has made an original and substantial contribution of distinguished merit to some branch of musical knowledge of a standard not less than that required by Regulation 3.

Regulations allowed 17 December, 1970.

Amended: 15 Jan. 1976: 6; 4 Feb 1982: 2, 4; 24 Feb. 1983: 1, 2, 3. 21 Feb 1991: 1(b).

## Regulations

### Of Awards in the Faculty of Science

- 1 In the Faculty of Science there shall be the following awards:

Ordinary degree of Bachelor of Science  
 Ordinary degree of Bachelor of Science (Jurisprudence)  
 Honours degree of Bachelor of Science  
 Graduate Certificate in Marine and Freshwater Ecology and Management  
 Graduate Certificate in Petroleum Geology and Geophysics  
 Graduate Certificate in Physics  
 Graduate Certificate in Science Education  
 Graduate Certificate in Terrestrial Ecology and Management  
 Graduate Diploma in Aquatic and Terrestrial Ecology and Management  
 Graduate Diploma in Exercise Physiology  
 Graduate Diploma in Neuromuscular Physiology  
 Graduate Diploma in Physics  
 Master of Science in the Faculty of Science  
 Master of Science (Applied Physics)  
 Master of Science (Astrophysics)  
 Master of Science (Atmospheric Physics)  
 Master of Science (Ecological Management)  
 Master of Science (Exercise Physiology)  
 Master of Science (Immunology)  
 Master of Science (Medical and Health Physics)  
 Master of Science (Medical Mycology)\*  
 Master of Science (Microbiology)  
 Master of Science (Neuromuscular Physiology)

Master of Science (Optics and Lasers)  
 Master of Science (Theoretical Physics)  
 Master of Science (Virology)  
 Master of Science in Petroleum Geology and Geophysics

- 2 The courses for the awards listed in Regulation 1 shall be governed by the General Course Rules and Specific Course Rules that the Council shall prescribe from time to time.
- 3 The syllabuses of subjects shall be specified by the Council.

Regulations effective from 1 August 1994.

Regulations amended 23 February 1995.

\* Awaiting approval and confirmation.

notes not forming part of the Regulations

- 1 Council has delegated the power to approve minor changes to the General Course Rules to the Deputy Vice-Chancellor (Academic).
- 2 Council has delegated the power to approve minor changes to the Specific Course Rules to the Deans of Faculties.
- 3 Council has delegated the power to specify syllabuses to the Head of each department or centre concerned, such syllabuses to be subject to approval by the Faculty or by the Dean on behalf of the Faculty. The Head of department or centre may approve minor changes to any previously approved syllabus.
- 4 The Faculty also offers a Doctor of Science in the Faculty of Science (D. Sc.). Higher doctorates are governed by their own sets of Regulations as printed in this volume of the Calendar.

# Bachelor of Science in the Faculty of Science and Bachelor of Science (Jurisprudence)

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar.

As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

## Specific Course Rules

### 1 General

- 1.1 (a) There shall be an Ordinary degree of Bachelor of Science and an Ordinary degree of Bachelor of Science (Jurisprudence). A candidate may obtain only one of these degrees.
- (b) There shall be an Honours degree of Bachelor of Science.
- (c) A candidate may obtain an Ordinary degree, an Honours degree or both.
- 1.2 A graduate who has obtained the Honours degree of Bachelor of Arts, or the Honours degree of Bachelor of Science in the Faculty of Mathematical and Computer Sciences, may not proceed to the Honours degree of Bachelor of Science in the Faculty of Science in the same subject.

### 2 Duration of course

- 2.1 The course of study for the Ordinary degree shall extend over three years of full-time study or the part-time equivalent and that for the Honours degree over one additional year of full time study or, in exceptional circumstances, over two years of part-time study.

### 3 Status, exemption and credit transfer

- 3.1 Exemption from any part of the course on the first occasion on which a candidate takes a subject will be granted only in special cases and on grounds approved by the Faculty.
- 3.2 A graduate in another faculty or from another tertiary institution, who wishes to proceed to the degree of Bachelor of Science in the Faculty of Science and to count towards that degree subjects which have already been presented for another degree may do so, subject to the following conditions:

- (a) the graduate shall present a range of subjects which fulfils the requirements of the relevant Specific Course Rules, and
- (b) the graduate shall present subjects, satisfying the Level three subject and the major in a science discipline requirements of the relevant Specific Course Rules, which have not been presented for any other degree and which, in the opinion of the Faculty, do not contain a substantial amount of the same material as subjects which have been presented for any other degree.

- 3.3 Persons who have completed other qualifications and graduates in other faculties, who wish to proceed to the degree of Bachelor of Science (Jurisprudence) may be granted such credit towards that degree as is allowed under the relevant Specific Course Rule.

### 4 Assessment and examinations

- 4.1 (a) A candidate shall not be eligible to attend for examination unless written and laboratory or other practical work, where required, has been done to the satisfaction of the teaching staff concerned.
- (b) In determining a candidate's final result in a subject the assessors may take into account oral, written, practical or examination work, provided that the candidate has been given notice at the beginning of the subject of the way in which the work will be taken into account and of its relative importance in the final result.
- 4.2 There shall be four classifications of pass in any subject for the Ordinary degree, as follows: Pass with High Distinction, Pass with Distinction, Pass with Credit, Pass. The names of the candidates in each of the classifications shall be published in accordance with the provisions of

the relevant Specific Course Rule. If the list of candidates who pass be published in two divisions, a pass in the higher division may be prescribed in the appropriate syllabuses as prerequisite for admission to another subject. A candidate with a lower division pass who wishes to gain a higher division pass shall be allowed to repeat the subject, in accordance with the provisions of 4.3. In addition there shall be a pass classification of Conceded Pass; limits on its application and on the number of such passes that may be presented for the degree are prescribed in 5.4 below.

- 4.3 (a) A candidate who fails to pass in a subject or who obtains a lower division pass and who desires to take the subject again shall, unless exempted wholly or partially therefrom by the Head of Department concerned, do written and laboratory or other work in that subject to the satisfaction of the teaching staff concerned.
- (b) A candidate who has twice failed to obtain a Division I pass or higher in the examination in any subject shall not enrol for the subject again, or for any other subject which in the opinion of the Faculty contains a substantial amount of the same material, except by permission of the Faculty and under such conditions as the Faculty may prescribe. For the purpose of this clause a candidate who fails to receive permission to sit for or does not attend the examination in any subject after having attended substantially the full course of instruction in it, shall be deemed to have failed to pass the examination. A candidate who obtains a higher division pass only after being granted permission to enrol for the third time shall not take a subject for which that higher division pass is a prerequisite, save in exceptional circumstances and with the permission of the Faculty.

- 4.4 (a) There shall be the following classifications for the Honours degree and the names of successful candidates in each subject shall be published within each classification:

First Class	
Second Class	Division A
	Division B
Third Class	

- (b) A candidate who fails to obtain one of the foregoing classifications at the first attempt shall not be permitted to present again for the examination.

## 5 The Ordinary degree of Bachelor of Science

- 5.1 To qualify for the Ordinary degree a candidate shall, subject to the conditions and modifications specified under 5.2, 5.3 and 5.4 below, pass subjects from 7 below to the value of at least 70 points which satisfy the following requirements:
- (a) A candidate shall present passes in Level I subjects to the value of not more than 30 points.
- (b) A candidate shall present passes in Level III subjects to the value of at least 24 points.\*
- (c) A candidate shall complete a major in a science discipline as set out in 5.5 below.
- 5.2 (a) A candidate may, as part of the requirements of 5.1(a), present passes to the value of 6 points in Level I or Level II subjects offered by the Faculties of Arts, Architecture and Urban Design or Engineering, or another Faculty provided the enrolment in the subject(s) is approved by that Faculty.
- (b) A candidate will be permitted to present passes in Law subjects of at least the equivalent value in lieu of a maximum of 6 points at Level I.\*\*
- 5.3 No candidate will be permitted to count for the degree any subject together with any other subject which, in the opinion of the Faculty, contains a substantial amount of the same material; and no subject may be counted twice towards the degree. No candidate may present the same section of a subject in more than one subject for the degree or present the same subject towards more than one major.\*\*\*

\*Candidates proposing to undertake an Honours project in association with the Cooperative Education for Enterprise Development (CEED) program (Science) will also enrol in the Level III subject 4384 Industry Practicum (Science). This subject does not count towards the Ordinary degree of Bachelor of Science.

\*\*For entry to Law subjects see the Notes to the B.Sc.(Jur.).

\*\*\*A list of unacceptable combinations of subjects is available from the Faculty of Science Office.

5.4 There may be a pass classification of 'Conceded Pass' for a Level II or III subject of not more than 3 points but a candidate may only present subjects for which this result has been obtained up to a value of 6 points. Subjects for which a result of Conceded Pass has been obtained may not be presented towards a major in a Science discipline.

5.5 To complete a major in a Science discipline a candidate shall present Level III subjects, for which a result of Pass, Pass with Credit, Pass with Distinction or Pass with High Distinction has been obtained, which satisfy one of the following criteria:

### Science Discipline— major requirements

#### Anatomy & Histology

Subjects offered by the Department of Anatomy & Histology to the value of at least 9 points.

#### Biochemistry

Subjects offered by the Department of Biochemistry to the value of at least 9 points.

#### Biotechnology

Subjects offered by the Departments of Biochemistry, Genetics, Microbiology and Immunology to the value of at least 9 points including the following:

2599 Molecular and Structural Biology III

4236 Infection and Immunity A

3712 Genetic Analysis of Complex Biological Processes

#### Botany

Subjects offered by the Department of Botany to the value of at least 9 points. Alternatively, candidates may present a minimum of 6 points offered by the Department of Botany and a maximum of 3 points from the following:

*either*

1450 Molecular Genetics of Plants III

*or*

5506 Biogeohistory III

#### Chemistry

Subjects offered by the Department of Chemistry to the value of at least 9 points.

A major in Chemistry is distinct from a major in either Physical & Inorganic Chemistry or Organic Chemistry, but a candidate may not count a major in both Chemistry and in either Physical & Inorganic Chemistry or Organic Chemistry.

#### Chemistry — Organic Chemistry

Subjects offered by the Department of Chemistry to the value of at least 9 points which include any of the following:

1115 Heterocyclic Chemistry and Natural Products

4265 Mechanism and Synthesis A

6009 Mechanism and Synthesis B

5084 Spectroscopy and Physical Organic Chemistry

#### Chemistry — Physical & Inorganic Chemistry

Subjects offered by the Department of Chemistry to the value of at least 9 points which include any of the following:

9964 Electrolyte Solution and Reaction Dynamics

6386 Metal Complexes and Analytical Chemistry

8090 Organometallics and Inorganic Reaction Mechanisms

2115 Quantum Chemistry and Molecular Spectra

#### Environmental Biology

Environmental Biology subjects offered by the Departments of Botany and Zoology including a minimum of 3 points from each department with a total value of at least 9 points. Subjects from the Department of Botany may include 7839 Aquatic Plant Biology (3 points), 2179 The Ecology of Terrestrial Plants (3 points), 3488 The Evolution of the Australian Flora (3 points), 1458 Ecophysiology of Terrestrial Plants (3 points), 6327 Ecosystems Modelling for Environmental Biologists (2 points) and 2819 Seminars in Environmental Biology (1 point). Subjects from the Department of Zoology may include 5224 Comparative and Environmental Physiology (3 points), 8896 Freshwater Ecology (3 points), both 3301 Marine Ecology - Theory and 6896 Marine Ecology - Practical (total of 3 points) and 1427 Research Methods in Zoology (3 points).

#### Genetics

Subjects offered by the Department of Genetics to the value of at least 9 points.

#### Geology

Subjects offered by the Department of Geology and Geophysics to the value of at least 9 points including two of the following:

8667 Earth's Internal Processes and Petrogenesis III

9661 Earth's Structure, Geophysics and Geostatistics III

2011 Earth's Surface Processes and Earth History III.

## Geophysics

The following subjects offered by the Department of Geology and Geophysics to the value of 9 points:

5787 Geophysics IIIS

9661 Earth's Structure, Geophysics and Geostatistics III

## Microbiology &amp; Immunology

Subjects offered by the Department of Microbiology & Immunology to the value of at least 9 points.

## Pharmacology

Subjects offered by the Department of Clinical & Experimental Pharmacology to the value of at least 9 points.

## Physics\*

Subjects offered by the Department of Physics and Mathematical Physics to the value of at least 9 points including:

7828 Experimental Physics III

*and at least two of*

6459 Electromagnetism and Optics

6978 Quantum Mechanics III

5547 Statistical Mechanics

## Physics — theoretical

Subjects offered by the Department of Physics and Mathematical Physics to the value of at least 9 points including:

4413 Advanced Dynamics and Relativity

6978 Quantum Mechanics III

5547 Statistical Mechanics

*and at least one of*

1067 Advanced Quantum Mechanics

8709 Computational Physics

6459 Electromagnetism and Optics

2994 Mathematical Physics

3426 Structure of Matter

\* Candidates who have successfully completed three years of either the Bachelor of Engineering (Electrical and Electronic) course or the Bachelor of Engineering (Computer Systems) course may obtain a major in Physics by satisfactorily completing subjects offered by the Department of Physics and Mathematical Physics to the value of at least 9 points which include:

7828 Experimental Physics III

*and one of the following:*

6978 Quantum Mechanics III

5547 Statistical Mechanics

## Physics — Double Major

A double major in physics may be obtained by presenting subjects offered by the Department of Physics and Mathematical Physics to the value of at least 18 points including:

4413 Advanced Dynamics and Relativity

7828 Experimental Physics III

6978 Quantum Mechanics III

5547 Statistical Mechanics

*and at least one of*

1067 Advanced Quantum Mechanics

8709 Computational Physics

6459 Electromagnetism and Optics

2994 Mathematical Physics

3426 Structure of Matter

## Physiology

Subjects offered by the Department of Physiology to the value of at least 9 points.

## Psychology

Subjects offered by the Department of Psychology to the value of at least 9 points which include:

3170 Psychological Research Methodology III

## Zoology

Subjects offered by the Department of Zoology to the value of at least 9 points. Alternatively, candidates may present a minimum of 6 points offered by the Department of Zoology and a maximum of 3 points from the following:

8987 Biology of Insects (Science)

3310 Insect Behaviour (Science)

6865 Population Ecology of Insects (Science)

**5.6** A candidate who has completed two years of the Chemical Engineering course or three years of either the Electrical & Electronic Engineering or Computer Systems Engineering course for the degree of Bachelor of Engineering may qualify for the degree of Bachelor of Science by completing the requirements of 5.1(b) and 5.1(c) above.

notes (not forming part of the Specific Course Rules.)

Students enrolled for the B.E.(Chemical), (Electrical and Electronic) or (Computer Systems) who wish to qualify for the B.Sc. in this way must lodge an application with the South Australian Tertiary Admissions Centre (SATAC).

5.7 Candidates shall complete their course of study for the degree under the current Specific Course Rules except that candidates who commenced their course of study prior to 1989 may qualify for the degree by fulfilling the requirements of the regulations and schedules in force prior to 1989, with such modifications as the Faculty may deem necessary to take account of changes to subjects from 1989 onwards.

Alternatively, candidates enrolled prior to 1989 may complete their course of study under present Specific Course Rules, with such modifications as the Faculty may deem necessary to ensure that subjects validly passed under previous regulations and schedules may be counted under the present Specific Course Rules. For the purposes of this clause the following equivalences will be used:

### Subjects in schedules prior to 1989

	equivalent point values
First year subject	6 points at Level I
First year half subject	3 points at Level I
Second year subject	8 points at Level II
Second year half subject	4 points at Level II
Third year subject	12 points at Level III
Third year double subject	24 points at Level III
Palaeontology III	4 points at Level III
A candidate who has prior to 1989 passed component options or units of a third year subject, which have not been presented in a subject, shall be granted unspecified status on the following basis:	
Single option/unit	2 points at Level III
Double option/unit	4 points at Level III
Triple option	6 points at Level III

Where the syllabus of a unit or option which was passed prior to 1989 significantly overlaps the syllabus of a subject to be undertaken in 1989 or a later year, the Faculty of Science shall grant such exemption from the requirements of the latter subject as is practicable.

notes (not forming part of the Specific Course Rules)

#### 1 Pattern of study

Commencing students are encouraged to enrol in one of the recommended "foundation packages" which have been developed to ensure appropriate preparation for second and third level studies. However, provided that they comply with the pre-requisites for each subject, students may select their own combinations of subjects at first and subsequent year levels. Full time students normally take subjects with an aggregate value of 24 points at each of levels I, II and III. Information on "foundation packages" is available from the Faculty Registrar.

The "Thinking Skills" Workshop is an important component of the B.Sc. degree and will be held during the first week of semester. This workshop is designed to introduce entry-level students to the academic environment of the University and to expose them to skills necessary to meet the aims and objectives of the B.Sc. degree.

#### 2 Work required to complete an Adelaide degree (policy of the Faculty of Science).

- (a) Graduates in another Faculty who wish to qualify for the Ordinary degree of Bachelor of Science and to count towards that degree subjects which have already been presented for another degree may do so, provided that the subjects presented fulfil the requirements of 5.1 above, and include a major in a science discipline and Level III subjects to the value of at least 24 points which have not been presented for any other degree.
- (b) Students coming from other institutions and wishing to obtain an Adelaide degree, are required as a minimum to complete Level III subjects from 7 below with an aggregate points value of 24 including a major in a science discipline.
- (c) With special permission of the Faculty, a student who has completed most of the degree at The University of Adelaide including Level III subjects with an aggregate value of 12 points and a major in a science discipline may be permitted to complete the requirements for the degree at another institution. All applications must be made in writing to the Faculty Registrar.

### 6 The Ordinary degree of Bachelor of Science (Jurisprudence)

- 6.1 To qualify for the Ordinary degree of Bachelor of Science (Jurisprudence) a candidate, unless otherwise allowed by the Specific Course Rules, must satisfy the requirements of 6.2 and 6.3 below.
- 6.2 A candidate shall pass subjects to the value of at least 52 points from those listed in 7 below which shall include:
  - (a) Level I subjects to the value of not more than 24 points

- (b) Level III subjects to the value of not less than 12 points
- (c) A major in a Science discipline as set out in 5.1(c) and 5.5.
- 6.3** (a) A candidate shall present the two Law subjects 6019 Law and Legal Process and 3731 Contract
- (b) A candidate shall present Law subjects with an aggregate points value of at least 12 points chosen from the following:
- |  |   |
|--|---|
| 8433 Constitutional Law                            | 6 |
| 9365 Torts   | 6 |
| 8580 Criminal Law                                  | 6 |
| 8821 Property                                      | 6 |
| 7272 Environmental Planning and Protection Law     | 3 |
| 9844 Conservation and Heritage Law                 | 3 |
| 7730 Land-Use Planning Law                         | 3 |
| 4771 Media Law                                     | 3 |
| 7522 Selected Issues in Criminal Law and Procedure | 3 |
| 1901 Criminology                                   | 3 |
- 6.4** Credit towards the degree of Bachelor of Science (Jurisprudence) on account of previous studies in Law will be determined by the Faculty of Science in accordance with Faculty policy, subject to the requirements of these Specific Course Rules and to the following provisions:
- (a) Law subjects presented for 6.3(a) will count as 8 points at Level II, and
- (b) Law subjects presented for 6.3(b) will count as 12 points at Level III.
- 6.5** Credit towards the degree of Bachelor of Science (Jurisprudence) on account of studies prior to 1989 in subjects presented for 6.2(b) and 6.2(c) will be determined in accordance with 5.7 above.
- 6.6** Persons who have completed other qualifications, and graduates in other Faculties who wish to proceed to the degree of Bachelor of Science (Jurisprudence) and to count towards that degree appropriate subjects which they have already presented for another qualification may do so subject to the following conditions:
- (a) They shall present a range of subjects which fulfils the requirements of 6.2(b) and 6.2(c) above;

- (b) They shall present subjects, satisfying the Level three subject and the major in a science discipline requirements of 6.2(b) and 6.2(c) which have not been presented for any other degree and which, in the opinion of the Faculty, do not contain a substantial amount of the same material as subjects which have been presented for any degree.

- 6.7** There may be a pass classification of 'Conceded Pass' for a Level II or III subject of not more than 3 points but a candidate may only present subjects for which this result has been obtained up to a value of 3 points.

notes (not forming part of the Specific Course Rules )

**B.Sc.(Jur.)**

- 1 The B.Sc. (Jurisprudence) is designed to serve two purposes:
- (a) it allows students to incorporate in a Science degree a range of law studies including subjects at third year level;
- (b) it is the route for students to take if they wish to obtain Science and Law degrees in a minimum time of five years (with some overload).
- 2 Candidates who have gained a reserved place in Law studies on the basis of their SACE or equivalent results must, at the first attempt, successfully complete subjects to the value of 24 points at Level I of the B.Sc.(Jurisprudence) before being eligible to take up their place in Law studies.
- 3 Students who have successfully completed 24 points at Level I of the B.Sc. degree may be eligible for admission to Law Studies. Applications for admission to Law Studies may be made through SATAC by September/October of the year during which they complete their Level I subjects. If admitted to Law Studies, students will be able to present some Law subjects towards their B.Sc.(Jur.). Except with the permission of the Dean of the Faculty of Law or a nominee, 6019 Law and Legal Process must be undertaken concurrently with the Law subject 3731 Contract. These two subjects are prerequisites for each of the subjects listed in 6.3(b) above. Students remain enrolled for the B.Sc. degree while taking these subjects. Students must complete all the requirements for the B.Sc.(Jur.) before they can obtain their LL.B. degree.
- 4 For students wishing to take the Degree of Bachelor of Science (Jurisprudence), the change of enrolment from Bachelor of Science to Bachelor of Science (Jurisprudence) normally takes place in the year following completion of the subjects 6019 Law and Legal Process and 3731 Contract. No special application is needed, but students are required to have the transfer of enrolment endorsed on their enrolment form by a Course Adviser for the Faculty of Science and by the Course Adviser for the Faculty of Law.

**5 Pattern of Study**

Full-time students will normally take their subjects according to the following scheme, which involves some overload in second year and possibly in third year.

*First year*

Level I subjects to the value of 24 points, from those listed in Specific Course Rule 7

*Second year*

Level II subjects to the value of 16 points from those listed in Specific Course Rule 7 plus 6019 Law and Legal Process and 3731 Contract.

*Third year*

Level III subjects to the value of 12 points from those listed in Specific Course Rule 7 including a major in a Science discipline plus Law subjects to the value of 12 points from those listed in 6.3 above with the advice of the Law Course Adviser.

**6 Advice from the Faculty of Law**

Before enrolment in the Law subjects in the third year of the above scheme, students should consult the Law Course Adviser. This is particularly important for students who wish to proceed to the LL.B. degree. Although Law subjects in the third year as above to the value of 12 points are sufficient for the purposes of the degree of B.Sc. (Jurisprudence), completion of the LL.B. degree in minimum time involves some additional overload in the third year.

**7 Credit on account of previous studies in The University of Adelaide (Policy of the Faculty of Science)**

- (a) Candidates who hold an LL.B. degree and hold no other degree will be given status for 6.3(a) and 6.3(b).
- (b) Candidates who hold an LL.B. degree and also a degree in a Faculty other than Law will be given status for 6.3(a) and 6.3(b) and may, in addition, be granted credit for the purposes of 6.2 on account of appropriate studies for the non-Law degree. Such candidates will be required as a minimum to complete Level III subjects from Specific Course Rule 7 to the value of 12 points including a major in a Science discipline.
- (c) Candidates may also be granted credit towards the degree of B.Sc. (Jurisprudence) on account of studies not presented for a degree.

**8 Credit on account of Law subjects passed prior to 1987 (Policy of the Faculty of Science).**

- (a) Candidates who have completed their LL.B. shall be granted credit of 8 points at Level II and 12 points at Level III;
- (b) Candidates who have not completed their LL.B. shall be granted credit towards the B.Sc.(Jur.) as follows:
  - (i) candidates who have passed Elements of Law and Constitutional Law I shall be deemed to have passed Law and Legal Process and be granted 4 points at Level II;

- (ii) candidates who have passed Contract for the LL.B. shall be deemed to have passed Contract for the B.Sc.(Jur.) and be granted 4 points at Level II;
- (iii) credit to the value of a maximum of 12 points at Level III for the Law subjects listed in 6.3(b) shall be granted in equivalent Law subjects passed prior to 1987 with the points value of those Law subjects being determined by the value attributed to them in the current LL.B. Specific Course Rules 3.2,1(b)(i)and(2) and 3.27.

**9 Credit on account of studies in other Institutions (Policy of the Faculty of Science).**

With special permission of the Faculty, candidates may be permitted to take equivalent subjects at another institution for credit to the Adelaide degree of B.Sc. (Jurisprudence). Candidates may also be granted credit towards the Adelaide degree on account of work already completed at another institution but not presented for another degree or award. The minimum requirements for such candidates is that all Level III subjects required by 6.2 and 6.3 (that is, Level III Science subjects to the value of 12 points, and the Law subjects indicated in 6.3(b) to the value of 12 points) should have been taken at The University of Adelaide. Approval of credit as above for the purposes of the degree of B.Sc. (Jurisprudence) does not imply acceptability for the later purposes of the LL.B. degree, and candidates wishing to proceed to the LL.B. degree should therefore consult the Law Course Adviser.

**7 Subjects of study**

**Mathematical and Computer Sciences**

All Level III Mathematical and Computer Sciences subjects listed under Specific Course Rule 4.3.1 of the degree of Bachelor of Science in the Faculty of Mathematical and Computer Sciences.

**8 The Honours degree**

**8.1** A candidate may, subject to approval by the Head of the department concerned, proceed to the Honours degree in one of the following subjects:\*

- 1739 Honours Anatomy and Histology
- 6777 Honours Biochemistry
- 4392 Honours Botany
- 7530 Honours Environmental Biology
- 7599 Honours Genetics
- 5280 Honours Geology
- 5483 Honours Geophysics
- 4408 Honours Microbiology and Immunology
- 5724 Honours Mathematical Physics
- 1343 Honours Organic Chemistry
- 5844 Honours Petroleum Geology and Geophysics
- 3950 Honours Pharmacology
- 3845 Honours Physical and Inorganic Chemistry
- 1285 Honours Physics
- 6740 Honours Physiology
- 4702 Honours Psychology
- 4873 Honours Rangeland Science and Management (S)
- 5417 Honours Zoology

**8.2** A candidate may, subject to the approval of the Faculty in each case, proceed to the Honours degree in a subject taught in a department in another Faculty. Such candidates must consult the Head of the department concerned and apply, in writing, to the Registrar before 30 November in the preceding year for admission to the Honours course.

**8.3** A candidate for the Honours degree in any subject shall not begin Honours work in that subject until he or she has qualified for the Ordinary degree of Bachelor of Science in either the Faculty of Science or the Faculty of Mathematical and Computer Sciences or the Ordinary degree of Bachelor of Science (Jurisprudence), or has qualified for a degree regarded by the Faculty of Science as equivalent, and has completed such prerequisite subjects (if any) as may be prescribed in the syllabus.

**8.4** The work of the Honours course must be completed in one year of full-time study, except where, on the recommendation of the Head(s) of the department or departments concerned, the Faculty may permit a candidate to complete the work for the Honours degree over two consecutive years, but no more, under such conditions as it may determine.

\*Certain Honours courses may be undertaken in association with the CEED program (Science). Students who wish to participate in the program must apply to the Head of the appropriate department in Semester 1 of the preceding year. If accepted such students will undertake the Level III subject 4384 Industry Practicum (Science) in Semester 2 as preparation for their Honours courses.

## Syllabuses

---

### prerequisites

General Course Rule 1.4.14 sets out the requirement that a student may not undertake a subject for which the prerequisite subject requirements have not been satisfied. Although the Faculty of Science is reluctant to waive the prerequisite requirements of a subject it is recognised that there can be situations where it is appropriate. Accordingly if a student has sound academic reasons for a waiver of the requirement he or she should apply to the Faculty of Science through the Head of the Department which offers the subject concerned.

### textbooks

Information on appropriate textbooks will be provided by the Department concerned, and at the preliminary lecture in Orientation Week.

In general, students are expected to have their own copies of textbooks but they are advised to await advice from the lecturer concerned before buying any particular book. Only the prescribed edition of any textbook should be bought.

### reference books

Although lists of books and journals for reference purposes are regarded as important, details have not been included in this Volume. These will however be issued from time to time by the departments concerned. It is hoped that all books and journals set for reference will be available to be consulted in the Barr Smith Library.

### examinations

For each subject students may obtain from the department concerned details of the examination in that subject including the relative weights given to the components (eg such of the following as are relevant: assessments, semester tests, essays or other written or practical work, final written examinations, *viva voce* examinations).

### Anatomy and Histology

Anatomy is the study of biological structure ranging from the naked-eye level (gross anatomy) to the microscopic details of the tissues (histology) and cells (cytology) of an organism. It also includes development of the mature form (embryology). In these subjects the main emphasis is on human anatomy, but comparisons with other vertebrates, especially mammals, are made in some areas.

At Level II students may undertake one or both single semester subjects 9473 Cells and Tissues II and 9828 Comparative Morphology II from a Level I background of biology.

At Level III two 3 point semester subjects 7997 Topics and Techniques in Cytology and 6900 Comparative Reproductive Biology of Mammals will be offered in conjunction with two 6 point subjects that run across the full year. 9646 Head Neck and Neuroanatomy, which is being offered for the last time in 1996, requires students to have successfully completed 9864 Human Anatomy I or 6498 Human Biology II before undertaking it. 2761 Anthropological and Comparative Anatomy is being offered for the first time in 1996.

Suitable complementary subjects are 6878 Chemistry I, 9276 Computer Science I, 9615 General Physics I, 4357 Mathematics IH, 3617 Mathematics IM, 5104 Psychology I, 5543 Statistical Practice I, 1404 Biochemistry II, 4863 Genetics II, 6326 Immunology and Virology II, 9195 Microbiology II, 3773 Physiology II and 3472 Zoology II, and Level III subjects in Biochemistry, Genetics, Immunology, Microbiology, Pharmacology, Physiology and Zoology.

---

### Level II

---

#### 9473 Cells and Tissues II

level: II points value: 4 duration: semester 1

*prerequisites:* 3174 Biology I (Pass Div I), or 7138 Molecular and Cell Biology I (Pass Div I) and 8280 Biology of Organisms I (Pass Div I) or 3637 Human Biology I (Pass Div I) or an acceptable equivalent

*assumed knowledge:* 6878 Chemistry I

*contact hours:* 3 lectures and 6 hours of tutorial/practical work a week

*content:* This subject considers the structure and function of cells and tissues of the mammalian body. Study of ultrastructural characteristics of the typical mammalian cell is followed by consideration of the structure of tissues, organs and systems. The features of the cells, their arrangement, and their intercellular products are considered with emphasis on the relationship between microscopic structure and function. Human examples are mainly used with some material from other mammalian species. Routine techniques used for the study of cells and tissues at the light and electron microscope levels, and the principles of microscopy are presented early in the course. Seminars on pathological changes in various tissues

and organ systems are also included. Practicals illustrate the material covered in the lectures and concepts are reinforced by demonstration posters, displays and projections. Students are also given the opportunity to view material with the transmission and scanning electron microscopes. Each student receives a practical manual which provides guidelines and problem-solving exercises.

*assessment:* tutorials (20%); mid-semester test (theory and practical) (15%); final theory exam (50%); final practical exam (15%)

### 9828 Comparative Morphology II

*level:* II *points value:* 4 *duration:* semester 2

*prerequisites:* 3174 Biology I (Pass Div I) or 8280 Biology of Organisms (Pass Div I) or 3637 Human Biology I (Pass Div I) or 9864 Human Anatomy I or an acceptable equivalent

*contact hours:* 3 lectures and 6 hours of tutorial/practical work per week.

*content:* This subject deals particularly with the gross functional anatomy of the mammalian body, including that of the human and other primates. Emphasis is given to comparisons with submammalian vertebrates, where this is helpful in the understanding of evolution of mammalian features. Principles and mechanisms of evolution are also considered. Practical classes involve dissection and study of a variety of vertebrate material, and include tours to the Zoological Gardens, the South Australian Museum and museums in the Departments of Anatomy and Zoology.

*assessment:* end of semester examination; theory (65%); practical (25%); and an essay (10%)

## Level III

### 2761 Anthropological and Comparative Anatomy

*level:* III *points value:* 6 *duration:* full year

*prerequisites:* for 1996 only: 9473 Cells and Tissues II, 9828 Comparative Morphology II, 6498 Human Biology II or an acceptable equivalent

*contact hours:* 2 hours lectures and 4 hours practical per week

*content:* Comparative aspects of morphology will be studied in the context of the evolution of vertebrates with an emphasis on mammals including humans. Practical classes will consist of demonstrations and dissections of a variety of vertebrate species, especially mammals. Anthropological aspects of anatomy will deal with hominid evolution and the mechanisms of human evolution. Variation, and the place in nature, of

humans will also be considered. Other topics will include dental anthropology, primatology, human population dynamics, human physical growth and development, dermatoglyphics and palaeopathology.

*assessment:* written examinations (60%), practical work (20%), research work (20%)

### 6900 Comparative Reproductive Biology of Mammals

*level:* III *points value:* 3 *duration:* semester 1

*prerequisites:* 9473 Cells and Tissues II or an acceptable equivalent

*contact hours:* 2 lectures and 5 hours of project work a week

*content:* This subject covers a comparative study of mammalian reproductive biological processes with emphasis on the diversity and evolution of various reproductive mechanisms in the two major groups of mammals (marsupials and eutherians). The first few lectures cover the development of the gonads, gonadal ducts, and external genitalia together with the associated changes that occur with the evolution of viviparity. Subsequently the functional morphology, and dynamics of production, of the male and female gametes are considered together with changes that occur in the spermatozoa during transit of the male and female genital ducts. The cell biology of fertilisation and early embryonic development is then given, followed by the macromorphological and cellular processes of implantation and placentation in various mammalian groups. Finally the biological principles underlying the contraceptive technology in the human species are covered. Practicals include a research project in which students will gain experience in a variety of light and electron microscopic procedures.

*assessment:* end of semester exam (80%); evaluation of project (20%)

### 9646 Head and Neck and Neuroanatomy

*level:* III *points value:* 6 *duration:* full year

*availability:* offered for the last time in 1996

*prerequisites:* 9864 Human Anatomy I, 6498 Human Biology II or an acceptable equivalent

*restriction:* 9932 Neuroanatomy and Neuroendocrinology

*contact hours:* 4 hours of lecture/tutorial/practical work a week, plus essay/project work.

*content:* The major part of the subject deals with the regional gross anatomy of the head, neck and vertebral region, and the functional anatomy of the central nervous system. Additionally students undertake in-depth study of special topics, involving reading,

practical work and essays, in the areas of comparative anatomy of the skull and of the central nervous system, and functional anatomy of the vertebral column.

*assessment:* semester exams, essays and projects

### **7997 Topics and Techniques in Cytology**

*level:* III *points value:* 3 *duration:* semester 2

*prerequisites:* 9473 Cells and Tissues II or an acceptable equivalent

*contact hours:* 2 lectures and 5 hours of tutorial/practical work a week

*content:* This subject presents a wide coverage of the techniques used in morphological studies of cells, including various methods of light and electron microscopy, tissue preparation and histochemistry, tissue culture, and stereology. Principles, theory and application are emphasised rather than acquisition of technical expertise. A number of special topics in cytology are studied and used as practical examples of the application of some of the techniques presented.

*assessment:* end of semester examination, including assessment of students' practical notebooks

## **Honours Level**

---

### **1739 Honours Anatomy and Histology**

### **5253 Honours Anatomy and Histology (mid-year)**

*level:* Honours *points value:* 24 *duration:* full year

*prerequisite:* A major in Anatomy and Histology at a standard satisfactory to the Department. Students who have taken other biological majors may also be considered.

*requirements:* An intending candidate should consult the Head of the Department of Anatomy and Histology near the end of the semester preceding the Honours year, and give full attendance for an academic year of a special course of study and undertake laboratory research work under the supervision of Staff members of the Department. A course of reading, suggested by the Department of Anatomy and Histology, should be commenced during the vacation prior to the Honours year.

*assessment:* literature survey and project proposal, thesis and associated seminar and defence (70%); essays & seminar on other topics (30%)

## **Animal Science**

### **Honours Level**

---

### **2737 Honours Animal Science (B.Sc.)**

*level:* Honours *points value:* 24 *duration:* full year

This subject is available under the provisions of Specific Course Rule 8.2: The Honours Degree of the degree of Bachelor of Science.

*prerequisites:* a credit or higher standard pass in appropriate Level III subjects offered by a Science Department

*requirements:* A candidate will be required to pass such examinations on the chosen subject of study as may be prescribed by the Head of Department, and to submit a thesis reporting research work undertaken during the year under the supervision of one or more members of academic staff.

A candidate may also be required to attend lectures and pass examinations in related subjects.

Intending candidates should consult the Head of the Department and potential supervisors before 30 November in the final year of studies for the Ordinary degree of Bachelor of Science and should be prepared to begin studies in the Department on or about 1 February.

## **Biochemistry**

The process of life consists of a highly organised series of chemical reactions. Food, in the form of carbohydrates, fats and proteins is converted into chemical energy which is used to drive processes as diverse as cell growth and division, muscle contraction, nerve signal transmission and photosynthesis. The instructions for carrying out these processes are carried in the genes, part of the DNA.

Biochemistry is the study of all aspects of these processes — energy generation and utilisation, gene structure and activity, and the complex mechanisms that underlie life. It also deals with the special characteristics of viruses, bacteria and plants and with the applications to medicine, agriculture and industry of the modern technology of DNA manipulation and genetic engineering.

A Level II subject is offered in general metabolic biochemistry, molecular biology, cell biology and recombinant DNA technology. In Level III subjects there is an emphasis on molecular, cell and developmental biology — the major research interests of the Department.

In order to major in Biochemistry it is necessary to complete Level III subjects to the value of at least 9 points.

Several other disciplines are complementary to the Biochemistry subjects at Levels II and III and include the Chemistry subjects, Genetics and Microbiology.

### Level II

#### 1404 Biochemistry II

level: II points value: 8 duration: full year

*prerequisites:* 6878 Chemistry I (Pass Div I) and either 7138 Molecular & Cell Biology I (Pass Div I) or 3174 Biology I (Pass Div I). *However, Biology I students should note* that the material covered in 7138 Molecular & Cell Biology I will be assumed knowledge for this subject.

*contact hours:* 3 lectures, and 6 hours of practical and tutorial work a week

*content:* Metabolic biochemistry: Generation and storage of metabolic energy, integration and regulation of metabolic pathways, biosynthesis of cell components, function of biological membranes. Proteins: Introduction to protein structure and function, specialised proteins and their functions, mechanism of enzyme action. Molecular Biology: Nucleic acid structures, DNA synthesis, mutation and repair, synthesis of RNA, translation of proteins, gene function in bacteria and their viruses, properties of animal viruses. Cell Biology: Properties of the cytoskeleton, mode of action of hormones and other cellular signals on gene action. Recombinant DNA Technology: Importance to medicine, agriculture and biotechnology.

*assessment:* written examination on lecture material at the end of each semester (70%), practical component and tutorial material (30%)

### Level III

#### 9829 Cell and Developmental Biology III

level: III points value: 6 duration: semester 2

*prerequisites:* 2599 Molecular and Structural Biology III

*restrictions:* 2890 Molecular Biology of Development; 3090 Molecular Biology of the Cell; 5632 Cell and Developmental Biology Laboratory

*contact hours:* 3 lectures per week, 1 tutorial per week, and 8 hours practical per week

*content:* A subject covering at the molecular level the internal organisation of the cell and cell behaviour in response to intra- and extra-cellular signals. Topics will include membrane structure and molecule traffic; intracellular compartments and protein targeting; cytoskeleton and cell shape, adhesion and migration; chromosome replication, segregation, cell division and cell cycle controls; cell signalling. The subject also examines the molecular basis of animal development in both simple systems and in vertebrates including the coordination of cellular developmental decisions involving proliferation, differentiation, migration and apoptosis, the role of transcription factors in cell determination, the establishment of animal body plan/axes, transcriptional control of cell identity, the role of growth factors and cytokines in developmental decisions and in medical applications, the molecular basis of cancer, homeobox genes and animal transgenesis.

*assessment:* written examination 75%, laboratory 25%

#### 2599 Molecular and Structural Biology III

level: III points value: 6 duration: semester I

*prerequisites:* 1404 Biochemistry II

*assumed knowledge:* Students who completed Biochemistry II prior to 1995 should consult the department for advice

*restrictions:* 2123 Molecular Biology of the Gene; 4762 Protein Structure and Function; 6831 Molecular Biology and Protein Engineering Laboratory; 9510 Biochemistry of Control of Gene Expression

*contact hours:* 3 lectures per week, 1 tutorial per week, and 8 hours practical per week

*content:* This subject has two major aims - to extend the discussions presented in Biochemistry II of (i) molecular biology and (ii) structure and function of proteins. Topics include - supercoiled DNA, chromatin structure, integrity of genetic information and gene expression, RNA processing and intra-cellular transport, control of gene expression and strategies coordinating this with intra and extra-cellular signals, mechanisms underlying DNA rearrangements, determination and analysis of protein structure and assembly during synthesis, post-translational modification, assembly into quaternary structures, relationship of protein structure to function in catalysis, protein-DNA interactions, immune response and endocrine regulation of growth and development.

*assessment:* written examination 75%, laboratory 25%

## Honours Level

---

### 6777 Honours Biochemistry

*level:* Honours *points value:* 24 *duration:* full year

*prerequisites:* appropriate Level III subjects offered by the Department of Biochemistry at a standard satisfactory to the Department

*requirements:* Candidates are required to give their full time to a special course of study and experimental work in the Department of Biochemistry. Candidates will normally be expected to start the course on the first Monday of February, but this can be altered in special circumstances by arrangement with the Professor of Biochemistry.

The work includes participation in a series of lecture-symposia on topics of modern biochemistry; participation in research seminars, and the performance of research work under the supervision of one or more members of the Biochemistry Department staff. Early in the year students will report on the aim, significance and approach of their research topic. During the course candidates may present and defend an original proposition on science and submit the results of their research in the form of a thesis, which will also contain a literature review surrounding their research topic.

## Botany

Botany, or Plant Science, is one of the core biological disciplines. It includes a wide range of studies from cell biology, biochemistry and genetics to the physiology, taxonomy and ecology of the great diversity of plant life in the sea, in fresh water and on land. Because plants, animals and micro-organisms interact in complex and subtle ways, the study of Botany has close links with other biological disciplines.

The Botany Department in conjunction with the Zoology Department offers the following subjects at Level I: 3174 Biology I (6 points, full year), 8954 Environmental Biology I (3 points, first semester), 8280 Biology of Organisms I (3 points, second semester).

The Departments of Genetics, Biochemistry, Physiology and Microbiology offer the subject 7138 Molecular and Cell Biology I (6 points, full year).

The Level I prerequisites to major in Botany, Zoology or Environmental Biology are 3174 Biology I and 8954 Environmental Biology I plus the appropriate Level II subjects. An alternative path is to replace 3174 Biology I with 8280 Biology of Organisms I and 7138 Molecular and Cell Biology I.

At Level III there are several subjects which are closely related to the research interests of staff and may lead on to Honours or post-graduate study in Botany. A combination of selected Level III Botany and Zoology subjects may also be taken to make up a major in Environmental Biology. For entry to Botany Honours a credit in Botany Subjects at Level III is normally required. Environmental Biology Honours requires credit standard in subjects that can be presented for the major in Environmental Biology.

6878 Chemistry I is strongly recommended and 5543 Statistical Practice I may be valuable. For students interested in field work and environmental studies 2136 Geology I is a valuable complementary subject.

Field work is an important feature of botanical research and excursions will be held either at week-ends or in the mid-semester breaks.

## Level I

---

### 3174 Biology I

*level:* I *points value:* 6 *duration:* full year

*restriction:* 7138 Molecular and Cell Biology I, 8280 Biology of Organisms I

*contact hours:* 3 lectures, 1 tutorial per week and the equivalent of 3 hours of practical work per fortnight.

*content:* The subject introduces the major fields of biology and provides an introduction to further studies in all areas of biological science. It does not assume previous biological knowledge. Topics include: cell structure and function; biochemical concepts – respiration, photosynthesis, enzymes, energy flow; membranes, DNA, RNA, protein synthesis; introductory genetics; plant biology, including germination, growth, transport systems; plant diversity and evolution; the structure and physiology of vertebrates; major invertebrate phyla; evolution including natural selection, the origin of species, human evolution and ecology.

*assessment:* end of semester examinations, laboratory practical work, an essay and tutorial participation.

### 8280 Biology of Organisms I

*level:* I *points value:* 3 *duration:* semester 2

*corequisite:* 7138 Molecular and Cell Biology I

*restriction:* 3174 Biology I

*contact hours:* 3 lectures, 1 tutorial per week and the equivalent of 3 hours of practical work per fortnight

*content:* The subject extends the material covered in 7138 Molecular and Cell Biology I to topics in whole organism biology, the biology of plants and animals

and to evolution and ecology. The central theme is an understanding of how evolution works and how this forms the basis for appreciating plant and animal diversity. Plant biology also covers how plants obtain and transport water, energy and nutrients, how they reproduce and includes a focus on the evolution of the Australian flora. Animal biology looks at the physiological functions of respiration, circulation, nutrition, excretion and reproduction in both vertebrate and invertebrate animals. There is a brief introduction to human evolution and ecology.

*assessment:* an end of semester examination and an essay, laboratory practical work and tutorial participation.

### 8954 Environmental Biology I

*level:* I *points value:* 3 *duration:* semester 1  
*restriction:* 3821 Plants and the Environment I, 6191 Botany

*contact hours:* 3 lectures per week, 3 hours practical/tutorial per fortnight, 3 field trips.

*content:* This subject is an introduction to basic ecological theory in population ecology, community ecology and ecosystem processes and provides a basis for further studies in ecology and environmental biology. It covers population growth and regulation, interactions such as competition, predation and commensalism, the flow of energy and cycles of materials in ecosystems. Terrestrial and aquatic biomes will be studied with special reference to major Australian habitats. Finally global issues and the impact of humans on ecosystems will be considered.

*assessment:* final exam (70%), practical reports (30%)

## Level II

### 3673 Botany II

*level:* II *points value:* 8 *duration:* full year

*prerequisites:* either 3174 Biology I (Pass Division I) and 8954 Environmental Biology I (Pass Division I); or 7138 Molecular and Cell Biology I (Pass Division I) and 8280 Biology of Organisms I (Pass Division I) and 8954 Environmental Biology I (Pass Division I). Alternatively, 8954 Environmental Biology I can be taken as a corequisite with Botany II

*assumed knowledge:* 6878 Chemistry I

*contact hours:* 3 lectures and 6 hours of practical work a week plus 9 hours plant project and 4 day ecology camp.

*content:* The subject deals mainly with the biology of flowering plants. The first semester covers Structure

and Function. It begins with an examination of basic structure, leading on to an in-depth look at the functioning of these organisms, including plant biochemistry and physiology, plant nutrition, growth and development. Included in both sections will be practical introductions to the use of micro-computers in plant biology. The second semester covers Systematics and Ecology, in the context of the Australian environment. This includes the principles and practice of ecology and practical identification of the SA flora and is highlighted by a field camp to south-eastern SA in the mid second semester break. Also included is an introduction to general principles of taxonomy, including numerical methods, evolution and reproductive biology.

*assessment:* practical write-ups, quizzes, herbarium project and written examinations

## Level III

### 7839 Aquatic Plant Biology

*level:* III *points value:* 3 *duration:* semester 1  
*prerequisites:* 3673 Botany II (Pass Div I)

*contact hours:* 2 lectures and the equivalent of 5 hours of practical work a week including a 5-day field trip

*content:* The aim of this subject is to provide a theoretical and practical understanding of aquatic plant communities which can be used for the rational management of aquatic resources. The course draws examples from both marine and freshwater habitats, which include the phytoplankton, marine macro-algae, and the flora of wet-lands. Fieldwork is an essential part of the course, with excursions to coastal areas and wet-lands in the south-east.

*assessment:* written exam (60%); practical reports (40%)

### 1458 Ecophysiology of Terrestrial Plants

*level:* III *points value:* 3 *duration:* semester 2  
*prerequisite:* 3673 Botany II (Pass Division I)

*restrictions:* 2778 Ecophysiology of Plants; 7901 Terrestrial Plant Ecophysiology

*contact hours:* 2 lectures and the equivalent of 5 hours of practical work per week for 12 weeks, including field trip

*content:* The theme of this subject is interactions between the physical environment and the physiology of the plant. Topics covered will include measurement of micro-climatic variables such as radiation, temperature, humidity; the transport of water through plants and factors which affect this; the measurement

of transpiration; photosynthesis in whole plants — methods of measurement in the field, and parameters which influence the rates; the effects of lack of water and osmotic stress, drought resistance mechanisms; seed dormancy and environmental effects on germination; light as a factor that affects plant morphology; the integration of physiological traits into ecological strategies.

*assessment:* exam at end of semester II (50%); practical reports (50%)

### 6327 Ecosystem Modelling for Environmental Biologists

*level:* III *points value:* 2

*duration:* Summer semester (3 weeks)

*prerequisites:* Botany II or Zoology II or Genetics II or a suitable background in mathematics or computing at the discretion of the Head of department

*contact hours:* 16 lectures and 48 hours of computing laboratory work

*content:* The subject comprises a series of lectures, computing workshops and self study exercises covering the design and development of ecosystem models. These exercises will provide the student with a methodology for the development of their own models and discuss the ultimate relationship between models and the data upon which they are based. The course will involve a critical analysis of existing ecosystem models such as those for global carbon balance or primary productivity. Students will be required to develop a computer model using data from published sources. This development will involve library research to obtain appropriate data, the development of a working model and analysis of its robustness or sensitivity with respect to the underlying data and assumptions.

*assessment:* Assessment will be based on the model and supporting analysis (65%) and a seminar (35%).

### 5486 Molecular Activity of Plant Cells

*level:* III *points value:* 3 *duration:* semester 2

*assumed knowledge:* 3673 Botany II

*restriction:* 6836 Biochemistry of Plants, 9484 Plant Biochemistry, or 5052 Plant Biochemistry and Membrane Transport

*contact hours:* 2 hours of lectures per week (12 weeks); 5 hours practical per week or equivalent (12 weeks)

*content:* A study of the biochemistry of plant cells with emphasis on the regulation and energetics of metabolism during germination, growth, flowering and seed development. Topics to be covered include carbohydrate, lipid and nitrogen metabolism,

respiration, photosynthesis, photorespiration and organelle interaction. The course will also include the control and regulation of these processes, including metabolic control analysis and their cellular integration.

*assessment:* exam; practical reports.

### 1377 Plant Nutrition and Membrane Transport

*level:* III *points value:* 3 *duration:* semester 2

*prerequisites:* 3673 Botany II (Pass Div I)

*assumed knowledge:* 6878 Chemistry I

*restriction:* 1987 Membrane Transport and Nutrition of Plants, 8515 Plant Nutrition; 6092 Membrane Transport and Plant Nutrition

*contact hours:* 2 lectures per week for 12 weeks, 5 hours practical (or equivalent) for 12 weeks

*content:* This subject will integrate information on membrane transport proteins from their molecular structure and function to the physiological and ecological role for ion transport in higher plants. Topics discussing transporter molecular structure and function will include examples from both plant and mammalian systems. Model systems such as guard cells, root hair cells, pulvinus cells and fungal cells will be emphasised to illustrate the importance of ion transport to the growth and development of whole plants. Topics covered will include: the mechanisms and energetics of transport across the plasma and vacuolar membranes, regulation of cytoplasmic pH and  $\text{Ca}^{2+}$ , molecular techniques for cloning transport proteins, heterologous expression systems for studying the function of transport proteins and structural features important for specific functions. The influence of soil micro-organisms and abiotic factors such as salinity and acidity on plant growth and nutrient uptake will be explored.

*assessment:* exam and practical reports (90%); essay or seminar (10%).

### 2179 The Ecology of Terrestrial Plants

*level:* III *points value:* 3

*duration:* summer semester

*prerequisites:* 3673 Botany II (Pass Div I)

*restrictions:* 8318 Rangelands Ecology; 9222 Terrestrial Plant Ecology

*contact hours:* 9 days field work; 2.5 weeks in the Department during January

*content:* The subject focuses on terrestrial plant evolutionary, population and community ecology, covering both theoretical and methodological aspects.

Stress is placed on plant strategies, theories of community structure and biodiversity, and biological interactions. The methodological aspect will cover field survey techniques and data analysis, and experimental design. The intensive field work will focus on the ecology of arid lands of South Australia, the effect of human introduced disturbances and their effect on the biodiversity of the system, and the sustainability of the use of vegetation as a natural resource. The field work allows in-depth study of one particular system and the practice of several different field methods. The subject provides training for students interested in ecology, evolution, range management and environmental sciences.

*assessment:* exam (50%); written reports (50%).

### 3488 The Evolution of the Australian Flora

*level:* III *points value:* 3 *duration:* semester 1

*prerequisites:* 3673 Botany II (Pass Div I)

*contact hours:* 2 lectures and 5 hours of practical work a week, plus 2 days of field work

*content:* Australia's unique position as the only continent to have a 40+ million year old macrofossil record of its rainforest flora provides the central theme for this course. In this context a combination of palaeo and extant ecological approaches are used to interpret the environmental aspects of the evolution of the Australian flora, while its diversity is considered using modern systematic approaches and by tracing the evolution of selected flowering plant families (eg Proteaceae). Topics additional to this central theme include advanced angiosperm reproductive biology and systematic studies of selected non-flowering plant groups. Practical work includes computer based plant identification, plant photography using x-ray and ultra-violet techniques and numerical taxonomy/cladistics based on leaf features.

*assessment:* practical assignments, a quiz and examination.

## Honours Level

### 4392 Honours Botany

### 9080 Honours Botany (mid-year)

*level:* Honours *points value:* 24 *duration:* full year

*prerequisites:* A satisfactory, usually credit, standard in appropriate Botany Level III subjects to the value of 9 points offered by the Department or special permission of the Head of the Department.

*requirements:* Candidates are expected to acquire a more detailed knowledge than is required for the Ordinary degree. They are required to give seminars

and write essays. In addition, candidates are expected to study more deeply one branch of Botany, to carry out research in this field and to present the results in a written thesis. Approximately one fifth of the total course is flexible and candidates choose, with approval, between additional project work and courses.

Candidates should consult the Head of the Department and potential supervisors during the final year of the Ordinary degree course. The Honours course runs for 40 weeks, either from February to November or from August to June of the following year.

### 7530 Honours Environmental Biology

### 4946 Honours Environmental Biology (mid-year)

*syllabus details:* see Zoology in the Faculty of Science

### 4873 Honours Rangeland Science and Management S

*level:* Honours *points value:* 24 *duration:* full year

*prerequisites:* A satisfactory, usually credit standard in appropriate Level III subjects to the value of 9 points including 8318 Rangelands Ecology, 2179 The Ecology of Terrestrial Plants or special permission of the course coordinators.

*requirements:* Candidates are expected to acquire a more detailed knowledge of rangeland science and management than is required for the Ordinary degree. Candidates are expected to study deeply in one branch of rangelands science and management. Candidates are required to carry out research in this field and to present the results in a written thesis. Approximately two-fifths of the total course is flexible and candidates choose, with approval, between additional project work, essays, and course work.

Candidates should consult a Coordinator of the program and potential supervisors during the final year of the Ordinary degree course. The Honours course commences at the beginning of February, or at the beginning of second semester.

## Combined Honours courses

### 9102 Honours Applied Mathematics and Botany

*syllabus details:* see Calendar entry under the Faculty of Mathematical and Computer Sciences

## Chemistry

Chemistry is a central science concerned with the preparation, properties and reactions of compounds.

6878 Chemistry I provides an introduction to the main branches of chemistry. The principal Level II subjects are 3204 Physical and Inorganic Chemistry II and 1893

Organic Chemistry II. At Level III, the Chemistry Department offers a range of more specialised subjects. Majors in either Organic Chemistry, Physical and Inorganic Chemistry or both, are possible.

Those intending to make a career in chemistry would expect to obtain a B.Sc. degree with a major in at least one of Organic Chemistry or Physical and Inorganic Chemistry, and often in both.

For students intending to major in other areas, specialised chemistry subjects are available. Students in the Faculties of Agricultural and Natural Resource Sciences, Engineering and Medicine should consult the Calendar entry for their Faculty.

A number of subjects in the Faculty of Science are in some way complementary to a program in chemistry. Useful Level I subjects are 3643 Physics I, 9786 Mathematics I, 3174 Biology I and 2136 Geology I. Useful Level II subjects are more dependent on a student's particular chemical interests.

---

## Level I

---

### 6878 Chemistry I

level: I    points value: 6    duration: full year

*assumed knowledge:* SACE Stage 2 Chemistry and Physics. Present experience shows that students who have not achieved a Tertiary Entrance (adjusted) score of at least 14 in SACE Stage 2 Chemistry frequently have difficulty with this subject. Students who have achieved a Tertiary Entrance (adjusted) score of at least 14 in SACE Stage 2 Physics and in either Mathematics 1 or 2 will be advantaged.

*contact hours:* 3 lectures (or their equivalent) and 1 tutorial per week and about 8 x 3 hour practical sessions (or their equivalent) a semester as determined by the Department of Chemistry.

*content:* General Chemistry: Structure and bonding, Molecular geometry, electronic structure of the atom, theories of chemical bonding. Physical Chemistry: thermochemistry, the gaseous state, chemical kinetics, chemical equilibrium, thermodynamics and electrochemistry. Inorganic Chemistry: the chemistry of the main group and first-row transition elements with reference to halides, oxides, hydrides, coordination complexes and simple organometallic compounds. Organic Chemistry: an introduction to the properties, reactions (including mechanisms) and syntheses of representative organic compounds.

*assessment:* end of semester examinations - a minimum standard in each is needed to achieve a Pass Div I. Laboratory work and computer exercises assessed during practical classes comprises 20% of the total marks for the subject.

## Level II

---

### 9653 Chemistry IIE

level: II    points value: 8    duration: full year

*availability:* for Chemical Engineering and B.Sc. (Faculty of Science) students only

*prerequisites:* 6878 Chemistry I (Pass Div I) or an acceptable equivalent

*assumed knowledge:* A basic mathematical proficiency such as would be gained from undertaking a Level I Mathematical Sciences subject.

*contact hours:* 60 hours of lectures, 20 hours of tutorials and 108 hours of practical work in the Department of Chemistry. 26 hours of lectures, 26 hours of tutorials and 36 hours of practice and project sessions in the Department of Chemical Engineering.

*content:* Physical and Organic Chemistry (semesters 1 and 2). This component deals with thermodynamics, surface chemistry, chemical kinetics, physical organic chemistry, group transformations and synthetic methods in organic chemistry, application of spectroscopic techniques, and aspects of polymer chemistry, the petroleum industry and of catalysis. Thermodynamics (semester 2). Topics in chemical engineering, thermodynamics: thermodynamics of real substances; heat, work and engines; refrigeration and liquefaction; process analysis; phase equilibria and multicomponent systems; equilibria in chemically reacting systems.

*assessment:* end of semester examinations on lecture content. A component (20%) for the practical work continuously assessed will be included in the final assessment.

### 1893 Organic Chemistry II

level: II    points value: 8    duration: full year

*prerequisites:* 6878 Chemistry I (Pass Div I) or an acceptable equivalent

*contact hours:* 3 lectures (or their equivalent), 1 tutorial and 6 hours of practical work a week (or their equivalent).

*content:* An introduction to the physical and theoretical aspects of Organic Chemistry and of the synthesis, properties and reactions of compounds belonging to the major families of aliphatic and aromatic compounds.

*assessment:* 2 semester examinations, 100 marks each, practical work (continuously assessed), 70 marks and tutorials (continuously assessed), 30 marks

**3204 Physical and Inorganic Chemistry II**

level: II points value: 8 duration: full year

prerequisites: 6878 Chemistry I (Pass Div I) or an acceptable equivalent

assumed knowledge: a Level I Mathematics subject

contact hours: 3 lectures, 1 tutorial and 6 hours of practical work a week

content: This subject examines concepts relating to symmetry and molecular structure, solid state chemistry, transition metal complexes, Lewis acids and bases, bonding, organometallic chemistry, atomic structure and spectra, chemical kinetics: investigation and interpretation, thermodynamics: concepts, and applications to chemical systems, surface chemistry, colloids, electrochemistry: electrolytes, cells and kinetics. A more detailed syllabus is available from the Department during enrolment period. The laboratory work is designed to illustrate and link in with the lecture course and also to introduce essential experimental techniques.

assessment: end of semester written examinations. Practical work, which contributes 20% to the final assessment, is evaluated during laboratory sessions.

---

**Level III**

---

**1115 Heterocyclic Chemistry and Natural Products**

level: III points value: 3 duration: semester 2

prerequisites: 1893 Organic Chemistry II (Pass Div I) or an acceptable equivalent

contact hours: 2 lectures a week (or their equivalent) and 6 hours of practical and tutorial work a week (or their equivalent).

content: The chemistry of heterocyclic compounds with emphasis on those of biological significance; the chemistry of representative natural products; bio-organic chemistry; stereochemistry and conformations of natural products; biosynthesis.

assessment: final examination including a component for practical work (25%)

**4265 Mechanism and Synthesis A**

level: III points value: 3 duration: semester 1

prerequisites: 1893 Organic Chemistry II (Pass Div I) or an acceptable equivalent

contact hours: 2 lectures (or their equivalent) and 6 hours of practical and tutorial work a week (or their equivalent).

content: Theoretical aspects and synthetic applications of pericyclic reactions, organic free radicals. The chemistry of carbocations and carbenes. Application of organometallic chemistry to organic synthesis.

assessment: final examination including a component for practical work (25%)

**6009 Mechanism and Synthesis B**

level: III points value: 3 duration: semester 2

prerequisites: 1893 Organic Chemistry II (Pass Div I) or an acceptable equivalent

contact hours: 2 lectures (or their equivalent) and 6 hours of practical and tutorial work a week (or their equivalent).

content: Carbanions, general synthetic methods, selective reactions and protecting groups: stereochemistry and asymmetric synthesis. The chemistry of metal ammonia reductions. Wittig reagents and sulphur ylides. An overview of synthetic strategy including the design and control of stereochemistry in the synthesis of complex molecules.

assessment: final examination including a component for practical work (25%)

**6386 Metal Complexes and Analytical Chemistry**

level: III points value: 3 duration: semester 2

prerequisites: 3204 Physical and Inorganic Chemistry II (Pass Div I) or acceptable equivalent

contact hours: 2 lectures and 6 hours of practical work a week

content: Solid state structures of molecular compounds, aspects of their determination, interpretation and relevance. Formation of complexes in solution: speciation, equilibria and energetics. Electronic energy levels in metal complexes: bonding, spectra and magnetic properties. Sampling, statistics and standards in analytical chemistry. Optical, electrochemical, radiochemical and X-ray methods of analysis. Separations and chromatography. Applications in mining, manufacturing and environmental science.

assessment: final theory exam (75%); practical and/or assignments (25%)

**8090 Organometallics and Inorganic Reaction Mechanisms**

level: III points value: 3 duration: semester 1

prerequisites: 3204 Physical and Inorganic Chemistry II (Pass Div I) or acceptable equivalent

contact hours: 2 lectures and 6 hours of practical work per week

content: Chemistry of complexes containing carbon-metal bonds, including bonding, synthesis and reactions. Influence of metal substituents on reactivity of organic molecules. Industrially important processes catalysed by transition metals. Polyatomic clusters and metal-directed reactions. Inorganic and bioinorganic

reaction processes including solvent exchange, ligand substitution, host-guest complexation, ionophoric antibiotics reactions and electron transfer processes.

*assessment:* final theory exam (80%); practical and/or assignments during semester (20%).

### 9964 Electrolyte Solutions and Reaction Dynamics

*level:* III *points value:* 3 *duration:* semester 2

*prerequisites:* 3204 Physical and Inorganic Chemistry II (Pass Div I) or acceptable equivalent

*contact hours:* 2 lectures and 6 hours of practical work per week

*content:* Structural and dynamic properties of water and hydrated ions. Ion activities and Debye Huckel theory. Traditional and modern probes for liquid structure and dynamics. Introduction to statistical mechanics and computer simulation. Theories of chemical reactions. Potential energy surfaces and reaction rate constants. Photochemistry: the absorption and emission of light to induce and monitor chemical reactions. Molecular reaction dynamics.

*assessment:* final theory exam (80%); practical and/or assignments (20%)

### 2115 Quantum Chemistry and Molecular Spectra

*level:* III *points value:* 3 *duration:* semester 1

*prerequisites:* 3204 Physical and Inorganic Chemistry II (Pass Div I) or acceptable equivalent

*contact hours:* 2 lectures and 6 hours of practical work per week

*content:* Introduction to quantum chemistry. The theory of molecular wave functions and orbitals. The practice of computational chemistry for structures and reactions. Molecular spectra of diatomic and polyatomic molecules, including vibrational and electronic spectra.

*assessment:* final theory exam (80%); practical and/or assignments (20%)

### 5084 Spectroscopy and Physical Organic Chemistry

*level:* III *points value:* 3 *duration:* semester 1

*prerequisites:* 1893 Organic Chemistry II (Pass Div I) or an acceptable equivalent

*contact hours:* 2 lectures (or their equivalent) and 6 hours of practical and tutorial work a week (or their equivalent)

*content:* Theory and applications in organic chemistry of nuclear magnetic resonance and mass spectrometry;

thermodynamics and kinetics of organic systems; conformational analysis; solvent effects; structure-activity relationships; isotope effects.

*assessment:* final assessment includes a component for practical work (25%)

## Honours Level

### 1343 Honours Organic Chemistry

### 1844 Honours Organic Chemistry (Mid-Year)

*level:* Honours *points value:* 24 *duration:* full year

*prerequisites:* a major in Organic Chemistry at a standard satisfactory to the Department of Chemistry

*requirements:* Candidates are required to devote their full time to a special course of study and experimental work in the Department of Chemistry. The course will normally commence in the first week of February.

The work will include a course of lectures and tutorials on advanced organic chemistry, attendance at a series of seminars and research colloquia, and the investigation of a research problem under the personal guidance and supervision of one or more members of the staff of the Department of Chemistry. Candidates will be required to take written examinations and to present a thesis embodying the results of their research work.

Intending Honours candidates should consult the Head of Chemistry during the preceding year.

### 3845 Honours Physical and Inorganic Chemistry

### 2246 Honours Physical and Inorganic Chemistry (mid-year)

*level:* Honours *points value:* 24 *duration:* full year

*prerequisites:* Major in Physical and Inorganic Chemistry at an academic standard satisfactory to the Head of the Department of Chemistry together with other subjects in the Department of Chemistry, or subjects in any of the Departments of Biochemistry, Mathematics, Geology or Physics and Mathematical Physics, or such other third-year subjects as may be approved by the Head of Chemistry. Subject to the approval of the Head of the Department of Chemistry, a student may proceed to Honours in Physical and Inorganic Chemistry if he or she has taken a first degree program which has not included a major in Physical and Inorganic Chemistry

*requirements:* The Honours program consists of advanced lecture courses in Physical and Inorganic Chemistry. In addition, each student will be assigned a research problem which he or she will investigate under the personal guidance of a member of staff of the

Department of Chemistry. The performance of each student will be assessed on the basis of written and oral examinations and the student's written report of the research investigation.

Honours study in the Department of Chemistry may also commence in mid-year, with the approval of the Head of the Department.

## Crop Protection

### Level III

#### 8987 Biology of Insects (Science)

*level:* III *points value:* 3 *duration:* semester 1

*prerequisites:* 3472 Zoology II. Students without such qualification must obtain permission of the Head of Department before enrolling.

*contact hours:* 2 lectures, 4 hours practical work a week, plus additional project work

*content:* After a brief review covering the internal anatomy of insects and the processes involved in metamorphosis, excretion and reproduction, a number of specific topics will be explored in more detail, including: morphological and biological characteristics of the major insect orders; life histories of selected pest and beneficial species; sociality, caste formation and nest building in termites; sound production — methods and functions; feeding mechanisms; adaptations and biology of vertebrate ectoparasites; insects as disease vectors of plants and animals; production and function of silk in insects and arachnids; mimicry and defensive adaptations; sociality and parasitism in the Hymenoptera. The practical component will examine collecting techniques; identification of adult insects to family level; identification of immature stages and feeding damage. A requirement of the subject is the presentation of a well-curated insect collection.

*assessment:* written examination (40%); practical examination (35%) and insect collection project (25%)

#### 9718 Ecological Biochemistry (Science)

*level:* III *points value:* 3

*availability:* not offered in 1996

*prerequisites:* 1404 Biochemistry II or 3673 Botany II or 3472 Zoology II

Students without such qualification must obtain permission of the Head of Department before enrolling.

*content:* Evolution of defence strategies of plants to insect and pathogen attack. Physical and chemical barriers to penetration and metabolic changes associated with the pathogenic state. Allelopathy. Manipulation of natural defences into agronomically

important crops as environmentally sensitive protection mechanisms. The influence of secondary plant metabolites (non-protein amino acids, polyphenols, cyanogenic glucosides, terpenes) on the exploitation of plants by pathogens and herbivores, including man. Practical periods will include tutorials and student seminars.

*assessment:* details at first lecture

#### 3310 Insect Behaviour (Science)

*level:* III *points value:* 3 *duration:* semester 2

*availability:* odd years only

*prerequisites:* 3472 Zoology II (Pass Div I) or an acceptable equivalent

*contact hours:* 2 lectures and 4 hours of practical work a week, plus project work

*content:* This subject will take an evolutionary perspective on animal behaviour using insects as examples. Topics will include nervous coordinating mechanisms, genetics and development of behaviour, orientation and movement, behavioural ecology, mating and reproduction, communication, and social systems of insects.

*assessment:* written examination 60%, practicals and project 40%

#### 4534 Insect Biological Control

*syllabus details:* see B.Ag.Sc. in the Faculty of Agricultural and Natural Resource Sciences

#### 8867 Fungal Biology

*syllabus details:* see B.Ag.Sc. in the Faculty of Agricultural and Natural Resource Sciences

#### 6865 Population Ecology of Insects (Science)

*level:* III *points value:* 3

*availability:* not offered in 1996

*prerequisites:* 5543 Statistical Practice I and 3472 Zoology II or an acceptable equivalent

*contact hours:* 2 lectures and 4 hours of practical work a week, plus project work

*content:* This subject covers the following aspects of the population ecology of insects: rates of increase of populations; the ecological significance of diapause; population aspects of dispersal; the influence of weather, resources, mates and natural enemies on the population dynamics of insects; concepts of population stability, regulation and resilience.

*assessment:* written examination and practical books. Details to be given at the start of the subject.

## Honours Level

### 4921 Honours Crop Protection

### 7208 Honours Crop Protection (mid-year)

*level:* Honours *points value:* 24 *duration:* full year

This subject is available under the provisions of Specific Course Rule 8.2: The Honours Degree of the degree of Bachelor of Science.

*prerequisites:* a credit or higher standard in at least two appropriate Level III subjects offered by a Science Department

*requirements:* A candidate will be required to submit a thesis and deliver a seminar reporting research work undertaken during the year under the supervision of one or more members of the academic staff and to pass such examinations on the chosen subject of study as may be prescribed by the Head of the Department. A candidate may also be required to attend lectures and pass examinations in related subjects.

Intending candidates should consult the Head of the Department and potential supervisors during the final year of studies for the Ordinary degree of Bachelor of Science and should be prepared to begin studies in early February. *assessment:* to be advised on commencement of subject

## Genetics

Genetics is the study of inheritance and variation in all forms of life from viruses to mammals. It is concerned with the nature of the genetic material, its replication, transmission, organisation, expression and its role in development and evolution. The Department convenes an interdepartmental Level I subject entitled 7138 Molecular and Cell Biology I. It offers one Level II subject that provides a broad training in classical and molecular genetics and four Level III subjects that focus on gene and chromosome structure and function, evolutionary genetics and the genetic basis of biological processes such as development and behaviour. For entry to an Honours Genetics year, a major in Genetics is normally expected. Preparation for studying Genetics is expected to be by participation in 7138 Molecular and Cell Biology I. Entry to second level Genetics will normally be a Division I Pass in this course. Entry to second level Genetics may also be by achieving a Credit level in 3174 Biology I. Those students taking 3174 Biology I should note that they may include some subjects outside the Science Faculty (eg 7267 Genetics IW) towards their B.Sc. degree and that passes at Division I in 3174 Biology I together with 7267 Genetics IW will allow entry to Genetics II. 8280 Biology of Organisms I and 5543 Statistical Practice I are highly desirable additional subjects.

## Level I

### 7940 Genetics and Evolution I

This subject is no longer available. Students are advised that under Specific Course Rule 5.2 they may include 7267 Genetics IW towards their B.Sc. degree. This subject is very similar to the former Genetics and Evolution I but it may not be taken in combination with 7138 Molecular and Cell Biology I.

### 7138 Molecular and Cell Biology I

*level:* I *points value:* 6 *duration:* full year

*restrictions:* 3174 Biology I, 7940 Genetics and Evolution I, 7267 Genetics IW

*assumed knowledge:* SACE Stage 2 Chemistry

*contact hours:* 3 lectures per week, 2 hours tutorial/practical per week

*content:* This course is convened by the Department of Genetics and contains major contributions from the Departments of Biochemistry, Microbiology and Immunology, and Physiology. It is intended that a Division I Pass in this subject will be the major preparation for, and entry to, Level II subjects offered by these four departments. The subject aims to provide students with an understanding of living cells, stressing cell structure and function and biochemical and genetic mechanisms that are common to all cells. The course progresses to consider specialisation of cells. The subject illustrates that the reductionist approach and the techniques of molecular and cell biology have unified much of experimental biology.

*assessment:* 2 exams (35% each); tutorial/practical assignments (30%)

## Level II

### 4863 Genetics II

*level:* II *points value:* 8 *duration:* full year

*prerequisites:* 7138 Molecular and Cell Biology I (Pass Div I); or 7740 Genetics and Human Variation I (Pass Div I) before 1989; or 7940 Genetics and Evolution I (Pass Div I) before 1994; or 3174 Biology I (Credit); or 3174 Biology I (Pass Div I) together with 7267 Genetics IW (Pass Div I); or an acceptable equivalent

*contact hours:* 3 lectures, 1 two hour tutorial, and 4 hours of practical work a week throughout the year

*content:* Chromosome theory of heredity; organisation of the genome; Mendelian inheritance and linkage; recombination; the genetic material; the genetic code and mutation; transposable elements; inbreeding; quantitative inheritance; microbial genetics; advanced cloning strategies; regulation of gene expression;

developmental genetics; population genetics and evolution; human genetics; genetics and human disease.

*assessment:* exams; written assignments; practical class reports

### Level III

#### 3350 Advanced Human Genetics

*level:* III *points value:* 3 *duration:* semester 2

*prerequisites:* 4863 Genetics II (Pass Div I) or an acceptable equivalent

*restriction:* 3077 Immunogenetics; 3261 Selected Topics in Human Genetics

*contact hours:* 2 lectures, 4 hours tutorial/practical work per week

*content:* Advances in our understanding of human genetics and of the human genome are having a major impact on our lives and on our society. The largest coordinated scientific endeavour ever undertaken, determination of the sequence of the entire human genome, was recently initiated. This subject considers recent advances in human genetics. Topics to be discussed include: advances in the analysis of human genetic diseases; the genetic basis of cancer; immunogenetics; genetics and forensic science and human gene therapy. The subject will also consider methods used in the human genome project and include a discussion of the impact of this project on human genetics. Practical and ethical issues related to the use of the new human genetic technologies, such as genetic screening and gene therapy, will also be discussed.

*assessment:* written exam (60%); tutorial assignments and practical reports (40%)

#### 4329 Evolutionary Genetics

*level:* III *points value:* 3 *duration:* semester 2

*prerequisites:* 4863 Genetics II (Pass Div I) or an acceptable equivalent

*contact hours:* 2 lectures and 4 hours tutorial/practical work per week

*content:* The subject discusses the genetic basis of evolution, focusing on evolution at the molecular level. The subject commences with a consideration of methods for detecting and measuring genetic variation within and between naturally occurring populations of organisms. Neo-Darwinian concepts of evolution and the roles of natural selection and random genetic drift in causing evolutionary change are considered. Models of speciation and the genetics of small and threatened

populations (conservation genetics) are discussed. Molecular evolution is considered under the following topics: evolution of molecules capable of replication; origins of the genetic code, acquisition of new genetic functions; molecular taxonomy, phylogeny and molecular palaeontology.

*assessment:* written exam (60%); tutorial assignments, practical reports (40%)

#### 3712 Genetic Analysis of Complex Biological Processes

*level:* III *points value:* 3 *duration:* semester 1

*prerequisites:* 4863 Genetics II (Pass Div I) or an acceptable equivalent

*restriction:* 7218 Regulation of Gene Expression; 7241 Developmental Genetics

*contact hours:* 2 lectures and 4 hours tutorial/practical work per week

*content:* The intricate processes that underlie the growth, development and behaviour of biological organisms are extraordinarily complex. In this subject, the underlying genetic control of complex biological processes is explored using molecular genetic analysis. Major themes to be discussed are the regulation of gene expression in response to environmental and developmental cues, the control of cell proliferation, pattern formation and morphogenesis during plant and animal development, and neural development and animal behaviour.

*assessment:* written exam (60%); tutorial assignments, practical reports (40%)

#### 4704 Genomes and Chromosomes

*level:* III *points value:* 3 *duration:* semester 1

*prerequisites:* 4863 Genetics II (Pass Div I) or an acceptable equivalent

*restriction:* 8723 Cytogenetics; 7206 Nuclear/Extranuclear Genetics Compartments

*contact hours:* 2 lectures, 4 hours tutorial/practical work per week

*content:* The DNA that comprises the genetic material, collectively referred to as the genome, is found in discrete structures termed chromosomes. This subject considers the structure and function of genomes and chromosomes, including interactions between the nuclear, mitochondrial and chloroplast genomes that co-exist within the eukaryotic cell. Mechanisms for the generation of diversity in diploid genomes, such as self-incompatibility systems and variation in chromosome complements, will be discussed. The subject also provides practical training in cytogenetics and advanced gene manipulation.

*assessment:* written exam (60%); tutorial assignments, practical class reports (40%)

## Honours Level

---

### 7599 Honours Genetics

*level:* Honours *points value:* 24 *duration:* full year

*prerequisites:* a satisfactory standard in 6023 Genetics III (prior to 1989) or appropriate Level III subjects offered by the Department of Genetics or permission of the Head of the Department

*requirements:* Candidates are required to give their full attendance for one academic year to a course of study in the Department of Genetics. Each candidate will carry out a research investigation under the supervision of a member of staff. The course will include participation in seminars and discussions on advanced topics, essay writing and a research proposal. Candidates will be required to present a thesis embodying the results of their research work.

Intending Honours candidates should consult the Head of the Department or the Honours Coordinator during the previous year.

## Combined Honours courses

### 5700 Honours Applied Mathematics and Genetics

*syllabus details:* see the Calendar entry under the Faculty of Mathematical and Computer Sciences

## Geology and Geophysics

The heart of the earth sciences is the fact that this planet has a four-billion-year history which can be extracted from the rocks of its crust. Geology in its broadest sense draws at the same time on the physical, biological and numerical sciences, and it is basic to the problems of our finite resources, our finite planetary environment, and our place in the solar system.

2136 Geology I is the principal subject offered by the Department of Geology and Geophysics to students considering a career in the earth sciences. 3482 Introduction to Physical Geography I (semester 1) and 9624 Evolution, Dinosaurs and Greenhouse Earth I (semester 2) are also offered as single Semester Level I science subjects. None of these subjects has prerequisites.

The Department offers five semester-length Level II science subjects each year. They have been designed with three aims: (i) They cover the wide range of scientific disciplines that constitute modern earth sciences. (ii) They prepare students for a career in this

field. (iii) They demonstrate to students with primary interests in the physical, mathematical, biological or environmental fields how their interests can be applied in earth science. Students should check the pre-requisites and knowledge assumed for the five Level II subjects and are always encouraged to seek advice in the Department.

At Level III there are eight subjects. Different combinations of subjects lead to different Honours programs.

Information booklets on each of the years of the course are available from the departmental office.

The Department offers the following service subjects: 5683 Earth Science I, Faculty of Agricultural and Natural Resource Sciences; 3147 Engineering Geology, Faculty of Engineering; 3944 Hydrocarbon Reservoirs Elective, (B.E. Chem., Level IV) Faculty of Engineering.

## A Program of Education in Geology and Geophysics with Industrial Cooperation (EGGIC)

The Department offers a program whereby students enrolled for the third-year of the B.Sc. in the Faculty of Science, who have achieved an average credit level in the work of the first and second years and a credit level in 6725 Mineralogy & Petrology II, 2559 Structural Geology & Exploration Geophysics II, 5922 Historical Geology and Data Processing II and/or 4530 Earth Surface Processes II, can apply to enrol in a cooperative program with industry. The student would be a full-time paid employee in industry for 4-5 months of each of the following two years. Thus the student would be in full-time study in Semester 1 of Year 3, full-time work in Semester 2 of Year 3 and again in Semester 1 of Year 4. The degree of B.Sc. would be completed by full-time study in Semester 2 of Year 4.

Each work period in Years 3 and 4 involves a project agreed to jointly by the Department of Geology and Geophysics and the employer. A written report must be prepared on each project and approved by both the employer and the Department. The performance of each student will be monitored by a committee within the Department. Unsatisfactory work reports or course grades may result in the student leaving the EGGIC program.

## Level I

---

### 9624 Evolution, Dinosaurs and Greenhouse Earth I

*level:* I *points value:* 3 *duration:* semester 2

*contact hours:* 2 lectures, 2 hours tutorials/practicals per week; 2 excursions

*content:* This course addresses various topics, some controversial, in the necessary perspective of a planet which has been alive for four billion years. It will treat some basic and essential geological and biological concepts but requires no background in science. The enquiry will be holistic and interdisciplinary. Topics include: Fossils and strata and the idea of earth history. Rise and fall of the sea in geological time; the death of Tethys and the birth of the modern oceans. Icehouses and greenhouses: how has this planet kept itself moist and pleasant for so long? Human evolution: where did we come from and how did we get here? Organic evolution as a grand unifying theory; catastrophe and extinction. Origin of life on earth; the first animals. The day of the dinosaur. Australia as Noah's Ark. Fossil fuels: energy from the biosphere. From swamps to coals. Global climates and hydrocarbon accumulation. The kitchens of petroleum. How to construct a giant oil or gas field.

*assessment:* written examination 40% (redeemable), essay, field and laboratory report 60% (non-redeemable). A minimum of 40% in each of the two components is required for a pass in the subject.

### 2136 Geology I

*level:* I    *points value:* 6    *duration:* full year

*contact hours:* 3 lectures and 3 hours of practical work a week, field work: one week-end camp, two full days (Saturdays) and one half day (during the week).

*content:* semester 1A: Geology and the Earth Sciences: Earth in the Solar System. The restless crust of the earth and the three faces of earthquakes. Geological time and the rock cycle: from deep heat to deep time. Sediments and ancient environments — from upland weathering to deep oceans. Limestones and reefs. Deserts and glaciers. Mineral resources.

Semester 1B: Geophysics and the structure of the planet: Magnetism and fossil magnetism. Radioactivity and Earth's heat; how to measure the age of rocks. Plate tectonics and continental drift; island arcs and mountain ranges.

Semester 2A: Life on Earth: Fossils and strata and the idea of earth history. Rise and fall of the sea; death of Tethys and birth of the modern oceans. Icehouses and greenhouses: the Goldilocks question. Human evolution as a product of a cooling planet. Organic evolution as a grand unifying theory; catastrophe and extinction. Origin of life and the first animals. Dinosaurs and marsupials and drifting continents.

Semester 2B: Fossil fuels: energy from the biosphere from swamps to coals. Global climates and hydrocarbon accumulation. The kitchens of petroleum. How to construct a giant oil or gas field.

*assessment:* 2 written exams (50%) (redeemable); 2

practical examinations; a rock and mineral collection; laboratory work and field excursions (attendance and report) (50%); (non-redeemable). A pass in the subject requires a minimum of 40% in each of the theory and the practical sections.

### 3482 Introduction to Physical Geography I

*level:* I    *points value:* 3    *duration:* semester 1

*contact hours:* 3 lectures and equivalent of 3 hours tutorial/practical work per week

*content:* This subject is concerned with the dynamics of the Earth's crust, atmosphere, hydrosphere and biosphere; origin of the Earth's major relief; evolution of landscapes; world climates; climatic influences in landscapes; climatic change over the past 2 million years; river systems, coastal zones and other erosional and depositional environments; soil variation and development; vegetation patterns; ecosystem processes. We emphasise the interaction and interrelationships of various facets of the Earth's surface through time. We are concerned to examine how the present landscapes and systems came into being. We consider that the natural world is fascinating on its own account, and that human impacts (eg soil degradation, air and water pollution) are better understood if energy and time perspectives are clear.

*assessment:* 1 written examination, plus essays, tutorial and practical exercises, field excursions

### Level II

Five subjects are offered at Level II in 1996, as follows:

*semester one:* 6725 Mineralogy and Petrology II\*; 5922 Historical Geology and Data Processing II\*

*semester two:* 2559 Structural Geology and Exploration Geophysics II\*, 4530 Earth Surface Processes II\*, and 1443 Environmental Geology II

Students contemplating a career in Geology, and therefore Honours, should do all four of the subjects marked (\*).

There is a seven-day field mapping camp held during the mid-semester break in semester 1, during which students learn geology at a greatly accelerated rate. The camp is highly recommended for all students doing one or more of the subjects marked (\*) and is essential to those intending to do a Geology major at Level III.

### 4530 Earth Surface Processes II

level: II points value: 4 duration: semester 2

prerequisites: 2136 Geology I (Pass Div I)

restrictions: 1995 Historical Geology and Palaeobiology; 4532 Australian Landscape Evolution IIA; 7300 Australian Landscape Evolution IIIA; 9835 Australian Landscape Evolution IIS; 7242 Australian Landscape Evolution IIIS

contact hours: 3 lectures and 6 hours practical work per week

content: The processes begin with weathering of the land surface which is physical, chemical and biological; its rates and their changes through geological time are determined by climate and tectonism. Erosion, transportation and depositions and the hydrological cycle: topics include mass wasting, runoff and rivers, wind and deserts, glaciers and ice sheets, and coastal processes. Models of landscape evolution and problems of denudation: landscape has a history and profound economic and social implications. These processes produce the materials of sedimentation and sedimentary rocks. Detrital sediments (especially sands) carry in their structures, textures and mineralogy the imprint of environments of erosion (including tectonic context and palaeoclimate) and deposition, from plains and deltas to the deep oceans. Chemical sediments (especially carbonates) are of diverse biological and inorganic origins; marine limestones are emphasised and evaporites and the principles of low temperature geochemistry are included. The third group are the organic sediments which are the source of fossil fuels. Topics are the patterns of abundance, molecular composition and stratigraphic distribution in the geological record. Fieldwork is an essential part of the subject and not only on land - diving and snorkelling on the Noarlunga reef is an optional extra.

assessment: written exams (60%); weekly exercises, tutorials and field work (40%)

### 1443 Environmental Geology II

level: II points value: 4 duration: semester 2

prerequisites: either 2136 Geology I, or 5683 Earth Science I, or 6878 Chemistry I, 3643 Physics I, or 3174 Biology I, or an acceptable equivalent

contact hours: 3 lectures, 3 hours practicals and one-hour seminar per week plus field work and one essay

content: This course deals with various global processes, resources, and environmental hazards, and focuses on the increasing role of human activity on our planet. Topics to be examined include earth chemistry, pollution, the nature and movement of groundwaters and surface waters, human interference in river dynamics, soil movement, erosion and degradation, salinisation, coastal erosion, environmental impacts of mining, nuclear energy, and general waste disposal problems. Global perspectives also involve the natural interactions of the biosphere, hydrosphere and geosphere, the history of climatic and sea level changes, the frequency and distribution of earthquakes, volcanic and landslide hazards.

assessment: written examination (60%); practicals, essay, seminar (40%)

### 5922 Historical Geology and Data Processing II

level: II points value: 4 duration: semester 1

prerequisites: 2136 Geology I (Pass Div I)

assumed knowledge: SACE Stage 2 Mathematics I

restrictions: 1995 Historical Geology and Palaeobiology II, 7404 Data Processing in the Geological Sciences II

contact hours: 3 lectures and 6 hours practical per week

content: Palaeontology: The major groups of fossil invertebrate animals and their significance in the record of the rocks - telling geological time; reconstructing ancient communities; interpreting environments; and sketching the grand sweep of organic evolution. Stratigraphy and sedimentary basins: Facies and strata; tectonics and sea level; seismic stratigraphy and the filling of basins; ancient climates. The broad patterns of South Australian stratigraphy. Mathematical geology: The applications of mathematical geology - statistics; linear programming, discounted cash flow - to a wide array of geological problems. Computing: Introduction to personal computers and their applications in geology. Field work is an essential part of the course.

assessment: weekly exercises (30%); written exam (70%)

### 6725 Mineralogy and Petrology II

level: II points value: 4 duration: semester 1

prerequisites: 2136 Geology I (Pass Div I) or a credit in 5683 Earth Science I or an acceptable equivalent

*assumed knowledge:* SACE Stage 2 science

*restriction:* 6725 Chemical Geology II before 1993

*contact hours:* 3 lectures, 6 hours practical work per week

*content:* The materials of geology: the nature and origin of igneous and metamorphic rocks and minerals. The principles of crystallography, optics and geochemistry are applied to the recognition and genesis of igneous and metamorphic rocks and to the formation and growth of minerals in general. The course introduces the techniques of extracting geological information from igneous and metamorphic assemblages.

*assessment:* weekly exercises (30%); written examinations (70%).

### 2559 Structural Geology and Exploration Geophysics II

*level:* II *points value:* 4 *duration:* semester 2

*prerequisites:* 2136 Geology I (Pass Div I) or a credit in 5683 Earth Science I and or a credit in 3617 Mathematics IM or a credit in 3643 Physics I or an acceptable equivalent

*restriction:* 2559 Geophysics and Geodynamic Geology II

*contact hours:* 3 lectures, 6 hours practical per week

*content:* Structural geology: Introduction to fractures (faults, joints, veins), folds and fold geometry, rock fabrics (foliations and lineations). Rock mechanics: Theoretical aspects of stress, strain and rheology including experimental deformation. Geophysics: Principles of geophysical exploration methods including magnetic, gravity, radioactivity and seismic methods. We will outline the use of these techniques in the investigation of the earth beneath its outer visible skin and in particular with application to the discovery of economic mineral and hydrocarbon reserves.

*assessment:* weekly exercises (33%); written examination (67%).

## Level III

### 5506 Biogeohistory III

*level:* III *points value:* 3 *duration:* semester 2

*prerequisites:* 2136 Geology I and 3174 Biology I, or 5922 Historical Geology and Data Processing II or an acceptable equivalent

*restrictions:* 5043 Palaeontology and Macroevolution III

*contact hours:* 2 hours lectures and 5 hours tutorials/practicals per week

*content:* Neoproterozoic and Early Phanerozoic Organic Evolution: The emergence of metaphytes and metazoans. The place of the Ediacaran assemblage. The Cambrian explosion as a problem of disparity in radiation. Three billion years of evolution and environment in molecules and isotopes. Theories of Neoproterozoic environmental impact on evolution. The evolution of Terrestrial Floras: Evolutionary innovations in clothing the terrestrial environment. The greening of Gondwana. Vertebrate Evolution: Function and evolution in the archosaurs. The Australian Cainozoic radiation. The Australian megafauna and its extinction. Evolution at Geological Time Scales: Mega-evolution and global environmental change. Fossils and the theory of evolution. Palaeoceanographic transformation and environmental forcing of evolution. Punctuations in the record of life: mass extinctions.

*assessment:* one 3 hour written paper; practical assessment; essays

### 8667 Earth's Internal Processes and Petrogenesis III

*level:* III *points value:* 6 *duration:* full year

*prerequisites:* 6725 Mineralogy and Petrology II, Level II Mapping Camp

*restrictions:* 4332 Igneous and Metamorphic Petrology III, 7105 Magmatic and Hydrothermal Deposits III

*contact hours:* 2 hours of lectures and 5 hours of practicals per week

*content:* Igneous petrology: This section examines the physical controls on generation and differentiation of silicate melts within the earth. It considers the movement of melts and their emplacement or eruption, and volcanic processes. Also examined are aspects of tectonic controls on igneous composition and distribution. Practical work illustrates the lecture material. Metamorphic petrology: Metamorphic rocks are a key to understanding the geodynamic evolution of mountain belts. Graphical (phase diagrams) and quantitative (geothermometric and geobarometric) applications of equilibrium thermodynamic principles are used to evaluate the pressure-temperature evolution of metamorphic rocks. Practical work includes thermodynamic phase equilibria exercises and a study of mineral reactions in thin section. Excursions in the Mt Lofty-Kangaroo Island arc will reconstruct the tectonic evolution of a fold belt. Ore deposits: The geology and genesis of magmatic and hydrothermal ore deposits are studied in the context of their petrological associations. Deposit types discussed are (1) ores associated with mafic and ultramafic igneous rocks and with intrusive felsic igneous rocks; (2) epithermal deposits; (3) volcanic- and sediment-hosted base metal deposits; (4) metamorphic mineral deposits.

Practical work involves ore microscopy and thermodynamic calculations. A field excursion visits the major mineral deposits in South Australia. Geological mapping: There is a mapping camp in the inter-semester break on which a map and later a report are produced.

*assessment:* a two-hour written examination at the end of each semester, a one-hour examination of the field trip, and ongoing assessment of practical work.

### **9661 Earth's Structure, Geophysics and Geostatistics III**

*level:* III *points value:* 6 *duration:* full year

*prerequisites:* 2559 Structural Geology and Geophysics II, Level II Mapping Camp

*restrictions:* 1293 Structural Geology and Exploration Geophysics III, 1789 Geological Mapping III, 1037 Supergene Ore Deposits and Geostatistics III

*contact hours:* 2 hours of lectures per week and 5 hours of practicals per week

*content:* Structural geology: Structural geometry and kinematics are presented in some depth, qualitatively and quantitatively. They lead into concepts of deformation, strain analysis, fold geometry, fracturing and faulting, and extensional and wrench tectonics. Integrated practical exercises include stereographic analysis, drill hole problems, finite strain estimation, and balancing sections in contractional regimes. Geophysics: Added to the level II topics are electrical and electromagnetic methods and their application to mapping, environmental, mineral and groundwater exploration. Seismic methods are extended. Practical work includes the analysis of modern reflection seismic records and there is field work with Mines and Energy SA. Geostatistics: Topics introducing the ideas of geostatistics include covariance and semi-variogram, estimation variance, dispersion variances, and selective mining. Lectures are reinforced by a major practical exercise in which a large data set leads to a modelled and analysed orebody. Geological mapping: There is a mapping camp in the inter-semester break on which a map and later a report are produced. There will be two days of excursions to the Mt Lofty Ranges.

*assessment:* a two hour written examination at the end of each semester, assessment of practical exercises, field maps and reports.

### **2011 Earth's Surface Processes and Earth History III**

*level:* III *points value:* 6 *duration:* full year

*prerequisites:* 5922 Historical Geology and Data Processing II, 4530 Earth Surface Processes II, Level II Mapping Camp

*restrictions:* 4016 Petroleum Geochemistry and Sedimentology III, 8037 Stratigraphy and General Palaeontology III, 6722 Structural Geomorphology IIS, 7242 Australian Landscape Evolution IIIS

*contact hours:* 2 hours of lectures and 5 hours of practicals per week

*content:* Sediments and basin development: The three great classes of sediments - detrital, chemical, and organic-chemical - are studied in terms of their depositional environments, facies associations, diagenesis and subsequent history. Detrital sediments bear upon the problem of basin evolution in different tectonic regimes. Organic sediments are source rocks for hydrocarbons and the subject of organic geochemistry. Chemical sediments include neritic and oceanic carbonates as well as low-temperature ores. There are three days of field excursions. Micropalaeontology and stratigraphy: Principles of bio- and sequence stratigraphy, and of biofacies and palaeoenvironments leading to palaeoceanography, are based on marine and terrestrial microfossils. There is a one-day excursion illustrating sequences in outcrop. History of life: A general overview is given of the life and times of the Archaean and Phanerozoic eons and the Palaeozoic and Neozoic divisions of the Phanerozoic eon. Analysis of landforms: This topic centres on the development of the Australian land surface. Models and landform evolution are discussed against the three variables: underlying structure, surface processes, and variations in structure and process through time. There is a three-day field excursion. All topics are taught as whole-day mixes of lectures and closely integrated practicals, with some tutorials. Geological mapping: There is a mapping camp in the inter-semester break on which a map and later a report are produced.

*assessment:* a two-hour written examination at the end of each semester, assessment of practical and field work, written assignments.

### **2083 Environmental Geology III**

*level:* III *points value:* 3 *duration:* semester 2

*prerequisites:* 1443 Environmental Geology II or 5683 Earth Science I and 5681 Earth Science II

*restriction:* 2330 Pedology III

*contact hours:* 2 hours lectures and 4 hours practical work (or the equivalent) per week

*content:* This subject deals essentially with the regolith, or weathered rock mantle with its soils, groundwater and surficial sediments; and also with the geology of wetlands, coastal and nearshore areas. Special emphasis is given to the nature, history, and extent of human interaction, with coastal and nearshore 'developments', and with problems of pollution and waste management. Pedology includes the genesis, distribution, classification, and properties of soils, and methods by which these are mapped and assessed for agricultural and engineering use. Practicals deal with map interpretation using geological, hydrogeological, soil, and seafloor maps, soil analysis and soil hydrology measurements.

*assessment:* written and practical examination at end of semester, poster and seminar, and one essay, assessment of practical and field work

### 9372 Geochemistry III

*level:* III *points value:* 3 *duration:* semester 1

*prerequisites:* 6725 Mineralogy and Petrology II

*restrictions:* 9709 Geochemistry, Geochronology, Mineralogy, Diagenesis III

*contact hours:* 2 hours of lectures and 5 hours of practicals per week

*content:* Geochemistry deals with the composition and secular evolution of the earth and its envelopes, the hydrosphere and the atmosphere. A second section is geochronology and other geographical applications of radiogenic isotopes. Finally, there is a treatment of stable isotopes and their geological application.

*assessment:* one 3 hour theory paper; practical assessment by assignment or examination

### 5787 Geophysics III

*level:* III *points value:* 3 *duration:* semester 2

*prerequisites:* 9876 Mathematics I or an acceptable equivalent

*assumed knowledge:* 2136 Geology I, 3643 Physics I

*restrictions:* 9769 Theoretical Geophysics III

*contact hours:* 2 hours of lectures and 5 hours of practicals per week

*content:* This subject provides the mathematical and physical background for exploration and solid earth geophysics. It is a prerequisite for Honours Geophysics. The topics covered in gravity and magnetics include: potential field theory, gravity effect of simple geometrical shapes, enhancement of anomalies (regional removal, second derivative, analytic continuation), frequency analysis, filter theory, calculation of excess mass, Poisson's

relationship for gravity and magnetic fields, and geophysical inversion (Marquardt algorithm). Seismic topics include: the theory of elasticity, equations of motion, generalised wave equation, attenuation, absorption, dispersion, partitioning of energy and amplitude at an interface, and seismic processing theory (aliasing, deconvolution and migration). Earthquake magnitudes and frequencies and their inter-relationship, fault plane solutions, and the radial distribution of velocity, density, gravity and elastic moduli within the earth are covered. The state of stress in the lithosphere (the stress tensor, principle stresses, tectonic stress, differential stress and the effect of pore pressure) and the determination of lithospheric stress are also covered.

*assessment:* one 3 hour examination (75%); practical assignments (25%)

### 7072 Remote Sensing (S)

*level:* III *points value:* 3 *duration:* semester 2

*prerequisites:* Level II science to a value of 16 points, or an acceptable equivalent

*restriction:* 7198 Remote Sensing III, 4289 Remote Sensing IIIA

*contact hours:* 2 lectures and 3 hours of practical work per week

*content:* Remote sensing is concerned with interpretation of detailed information about the Earth's surface gathered by space and airborne platforms using various scanning systems. This subject examines both the principles and applications of remote sensing. The principles of remote sensing include the interaction of electromagnetic radiation with the earth's surface and the measurement of this radiation by a range of sensors. It will focus on the spectral aspects of earth objects: rocks, soils, vegetation and water and the way spectral data can be used to identify and characterise those objects and monitor changes over time. This data base is relevant to geological, botanical and soil-science inventorisation and environmental science. Information is extracted using digital image processing which includes correction, enhancement and classification of the digital data. (Workshops are used to give 'hands-on' experience with the basics of digital image processing and application to specific projects). Applications of remote sensing to atmospheric monitoring, geological mapping and air pollution will be discussed.

Additional applications will examine the spectral features observed in geological materials, soils and vegetation using high dimension data, including the application of remote sensing to geology and exploration for mineral deposits and petroleum. The applications deal with two aspects of the Earth's

surface: (1) Structural features which are not apparent from aerial photography due to scale factors and wavelength restrictions, and (2) narrow wavelength features due to soil chemistry and soil mineralogy.

*assessment:* written examination (50%); practical exercises (50%)

## Honours Level

---

### 5280 Honours Geology

*level:* Honours *points value:* 24 *duration:* full year

*prerequisites:* Students proceeding to Honours in Geology usually will have passed a minimum of two of the subjects: 8037 Stratigraphy and General Palaeontology, 1293 Structural Geology and Exploration Geophysics III, 4016 Petroleum Geochemistry and Sedimentology, 4332 Igneous and Metamorphic Petrology and 1789 Geological Mapping at a level acceptable to the Head. In addition it is recommended that students should have as broad a knowledge as possible in the other third year subjects offered by the Department of Geology and Geophysics.

Students with biological backgrounds wishing to pursue Honours based on a palaeontological topic may hold a good pass or better in 5043 Palaeontology and Macroevolution in lieu of one of the subjects listed. Admission is with permission of the Head of Geology and Geophysics. Students wishing to study Geomorphology at Honours Level should consult the Head of Geology and Geophysics.

*requirements:* Candidates will be required to attend several courses from a number which will be given in specialised fields of geology and economic geology including tectonics, stratigraphy, structure, geophysics, geochemistry and palaeontology. In addition, candidates will undertake supervised individual projects involving one or more of these fields. Special courses of reading and laboratory studies will be laid down and each candidate will be required to give all the time not required for lectures or in the field to work in the laboratory. Candidates will be required to contribute to a series of seminars.

An interstate field excursion is normally held early in the year.

Intending Honours students must apply, before the end of the year preceding that in which they wish to enrol, to the Head of Geology and Geophysics or nominee for approval of their proposed courses of study.

### 5483 Honours Geophysics

*level:* Honours *points value:* 24 *duration:* full year

*prerequisites:* Passes satisfactory to the Head of Geology and Geophysics in 1293 Structural Geology and Exploration Geophysics III, 9769 Theoretical Geophysics and, in addition at least one of the other third-year subjects offered by the Department of Geology and Geophysics, or third-year subjects offered by the Departments of Applied Mathematics or Physics and Mathematical Physics. Students with a different background of third-year courses may be accepted at the discretion of the Head of Geology and Geophysics or nominee.

*requirements:* Candidates will be required to attend several courses from a number which will be given in specialised fields of geology, economic geology, mathematics and physics. Honours students may, after consultation with the Head or nominee, also be required to take some level III subjects in the Departments of Geology and Geophysics, Applied Mathematics or Physics and Mathematical Physics which they did not take in third year. In addition, candidates will undertake supervised individual projects: possible topics should be discussed with the Head or nominee before the end of the preceding year. Special courses of reading and laboratory studies will be laid down and each candidate will be required to give all the time not required for lectures or in the field to work in the laboratory. Candidates will be required to contribute to a series of seminars.

Intending Honours students must apply, before the end of the year preceding that in which they wish to enrol, to the Head of Geology and Geophysics or nominee for approval of their proposed courses of study.

### 5844 Honours Petroleum Geology and Geophysics

*level:* Honours *points value:* 24 *duration:* full year

*prerequisites:* Geology students intending to do Honours in Petroleum Geology and Geophysics should have passes to the satisfaction of the Director of the National Centre for Petroleum Geology and Geophysics in the subjects 8037 Stratigraphy and General Palaeontology, 1293 Structural Geology and Exploration Geophysics III, 4016 Petroleum Geochemistry and Sedimentology and 1789 Geological Mapping. Geophysics students intending to do Honours in Petroleum Geology and Geophysics are advised to include in their third year enrolments the subjects 1293 Structural Geology and Exploration Geophysics III, 4016 Petroleum Geochemistry and Sedimentology, 9769 Theoretical Geophysics, 8037 Stratigraphy and General Palaeontology.

Students intending to do Honours in Petroleum Geology and Geophysics and who have satisfactory passes in third year subjects in Geology and/or Geophysics alone, or in combination with third year subjects in Applied Mathematics, Physical and Inorganic Chemistry, Organic Chemistry, Physics, Botany, Zoology or Geography may be accepted at the discretion of the Director of the Centre.

*requirements:* The subject comprises lectures, workshops and fieldwork in the Centre and on-the-job training in the petroleum industry. Each candidate will undertake a supervised individual project of research into some aspect of petroleum science. This is usually done in conjunction with the industrial experience, with work done during that time forming the basis of the thesis. The Centre will, in most cases, arrange for student placement with a relevant company or organisation for a six-week period during July–August.

Formal coursework is taught in conjunction with the Masters degree subjects 5189 Petroleum Geology and Geophysics (A) and 4746 Petroleum Geology and Geophysics (B) during the period February–June. The courses include general geological topics such as basin analysis, sedimentology, diagenesis and structure. Most of these subjects are revised during the field trip to the Flinders Ranges. Geophysical topics include seismic interpretation, seismic acquisition and processing, and sequence stratigraphy. Topics specifically related to the petroleum industry include wireline logs, petrophysics and wellsite geology.

There is some scope for specialisation between geology and geophysics although both streams are required to do the majority of the course. Geologists may do petroleum geochemistry, applied palaeontology and isotope studies while the geophysicists concentrate on seismic acquisition, signal analysis and seismic processing. Topics related to the development of personal skills include economics, management and communication skills. Many of the topics covered above are drawn together in case studies and all are made relevant to the petroleum industry.

On the basis of the nature of their previous studies and experience, some students may be required or permitted to substitute alternative studies for parts of the coursework component or to take additional studies. Specialised programs for this purpose may be arranged in consultation with the Director of the Centre. This may apply to students from institutions outside Australia. It may be necessary to substitute additional coursework and background study for the period of industrial placement.

Assessment of the subjects is spread across a variety of formats and throughout the year. Formal written and oral assessments are conducted at the end of 5 to 6 week periods. Assessment is also conducted via marked practical exercises, assignments and seminars. In the final assessment, a weighting of 50% is given to the coursework component and 50% to the project and thesis.

Intending Honours students must apply, before the end of the year preceding that in which they wish to enrol, to the Director of the Centre (or nominee) for approval of their proposed course of study.

## Horticulture, Viticulture and Oenology

### Honours Level

#### 3783 Honours Horticulture, Viticulture and Oenology (B.Sc.)

*level:* Honours *points value:* 24 *duration:* full year

This subject is available under the provisions of Specific Course Rule 8.2: The Honours Degree of the degree of Bachelor of Science.

*prerequisites:* A credit or higher standard pass in appropriate Level III subjects offered by a Science Department.

*requirements:* Intending candidates should consult the Head of Department of Horticulture, Viticulture and Oenology and potential supervisors during October of the final year of studies for the Ordinary degree of Bachelor of Science, and should be prepared to commence studies in the Department on or about 1 February. After consultation, each candidate will be assigned a research project which will be carried out under supervision. The results will be presented in a dissertation at the end of the subject. A candidate may also be required to prepare an essay, attend lectures, pass an examination, and give a seminar.

#### Microbiology and Immunology

Microbiology is concerned with all aspects of the various groups of microorganisms, including bacteria, fungi, viruses and protozoan and metazoan parasites. Immunology involves a study of host responses to substances that are recognised by the body as foreign or 'non-self'. Many of the fundamental concepts of immunology were developed by studying natural host reactions to infectious organisms, and knowledge of both microbiology and immunology is necessary for the study of infectious diseases.

The Department is a major contributor to the Level I subject 7138 Molecular and Cell Biology I and offers two consecutive Level II subjects and two consecutive Level III subjects. Entry into Level III normally requires at least a Division I pass average in both Level II subjects, and entry into Honours requires students to perform well in both Level III subjects.

## Level II

---

### 6326 Immunology and Virology II

*level:* II *points value:* 4 *duration:* semester 2

*prerequisites:* 7138 Molecular and Cell Biology I plus 8280 Biology of Organisms I; or 3174 Biology I

*assumed knowledge:* 6878 Chemistry I or acceptable equivalent

*contact hours:* 3 lectures, 1 tutorial and 6 hours of practical work each week

*content:* The course is designed to provide (a) the basic principles and fundamental concepts of immunological mechanisms underlying resistance to infection, rejection of tissue transplants, autoimmunity, allergy and (b) an understanding of the biology of animal viruses. Topics covered include: (a) the lymphoid system and lymphocyte circulation; antigens, antibodies and their interactions; the innate and adaptive mechanisms responsible for resistance to infection; the complement system; the characteristics and functions of receptors on cells of the immune system; gene products of the major histocompatibility complex; lymphocyte development and function; humoral and cell-mediated immunity; immunological tolerance; regulation of immune responses; hypersensitivity; autoimmunity; effector mechanisms in immunity to bacteria, viruses and parasites, (b) viruses as obligate intracellular parasites; structure, classification and replication of animal viruses and their effects on host cells; acute and persistent virus infections; epidemiology of virus infections; methods used to detect, study and quantitate viruses.

*assessment:* 3 hour written exam of lecture material (55%); laboratory and tutorial performance; written reports of practical work and assignments (45%)

### 9195 Microbiology II

*level:* II *points value:* 4 *duration:* semester 1

*prerequisites:* 7138 Molecular and Cell Biology I plus 8280 Biology of Organisms I; or 3174 Biology I

*assumed knowledge:* 6878 Chemistry I or an acceptable equivalent

*contact hours:* 3 lectures and 6 hours of practical and tutorial work each week

*content:* This course illustrates that while bacteria share with other forms of life many common features of structure, development and function, they also differ in some fundamental ways. Topics covered include: characteristics and anatomy of bacterial cells and protists; antibiotics; genetic organisation and regulation; mutagenesis and mutations; genetic mechanisms and the biology of plasmids; biology and ecology of various bacteria; bacterial viruses; bacteria in plant and animal disease.

*assessment:* 3 hour written exam of lecture material (55%); laboratory and tutorial performance, written reports of practical work and a written exam related to practical work (including handling of data) (45%)

## Level III

---

### 4236 Infection and Immunity A

*level:* III *points value:* 6 *duration:* semester 1

*restriction:* 9371 Advanced Microbiology, 7546 Mechanisms of Infection; 4236 Advanced Microbiology and Virology

*prerequisites:* 9195 Microbiology II and 6326 Immunology and Virology II (Div I average or better)

*contact hours:* 3 lectures per week, 8 hours of practical work and 1 tutorial per week

*content:* Examination of structural and functional aspects of bacteria and animal viruses, with emphasis on those which infect humans. The molecular basis of the interactions of microbes with the environment and various hosts, primarily from the point of view of microbes (including viruses and parasites). Particular emphasis is given to the molecular biological approach to these studies of pathogenesis.

The topics covered include: Cellular architecture and assembly – cell organisation, synthesis of membrane and cell wall components, protein secretion, the bacterial genome; bacterial growth characteristics – genes and chromosome replication, including sigma factors, heat shock proteins; cellular activity–transport systems, motility and chemotaxis.

Pathogenesis - of infections of man and animals – establishment of contact with, and colonisation of, target tissues; pili, fimbriae and adhesins; toxins and their modes of action; invasion and intracellular survival and multiplication; resistance to host defences; avoidance of host responses, antigenic and phase variations; transposons, insertion sequences and the evolution of multiple drug resistance; insect and parasite pathogens; molecular diagnostics.

Structure and replication of animal viruses; comparison of virus replication strategies; pathogenesis of virus infection using specific examples including hepatitis viruses, HIV (AIDS), herpes viruses, papilloma viruses, polio viruses, rubella, rabies.

*assessment:* 3 hour written exam on lecture material (50%); practical component and performance in tutorials and seminars (50%)

### 7025 Infection and Immunity B

*level:* III *points value:* 6 *duration:* semester 2

*restriction:* 7335 Advanced Immunology, 9570 Host Responses to Infection, 7025 Advanced Immunology and Perspectives in Infection

*prerequisites:* 9195 Microbiology II and 6326 Immunology and Virology II (Div I average, or better)

*contact hours:* 3 lectures per week; 8 hours of practical work; 1 tutorial per week

*content:* This subject includes a detailed examination of (a) the cellular and molecular biology of cell communication in the immune system and (b) immune responses to microbial pathogens and other antigenic stimuli. Topics covered include: (a) differentiation and activation of lymphocytes; the functions of lymphocyte subsets; the cell biology of antigen processing and presentation; the molecular recognition of antigen; characteristics and functions of cytokines; mechanisms of immunoregulation; leucocyte traffic through tissues; the production and use of monoclonal antibodies and (b) local immunity at mucosal surfaces; immunity to intracellular and extracellular bacterial pathogens; defence strategies against superficial and systemic viral infections; immunity to protozoan and metazoan parasites. Virus infections in man and animals are also considered in depth. Topics include: virus epidemiology, transmission and survival; laboratory diagnosis of virus infection; control and prevention of virus infections and virus vaccines; and a number of important virus diseases will be considered as specific examples.

*assessment:* 3 hour written exam on lecture material (50%); practical component (25%); performance in tutorials and seminars (25%)

## Honours Level

### 4408 Honours Microbiology and Immunology

*level:* Honours *points value:* 24 *duration:* full year

*prerequisites:* 4236 Infection and Immunity A and 7025 Infection and Immunity B; or 4236 Advanced Microbiology and Virology and 7025 Advanced Immunology and Perspectives in Infection; or 7546 Mechanisms of Infection and 9570 Host Responses to Infection, at a standard satisfactory to the Department. Performance in all parts of the courses will be taken into account in assessing acceptable students. In

exceptional cases, students having passed other, suitable Level III subjects may be considered for entry into Honours.

*requirements:* Candidates will normally be expected to start the course at the beginning of February but this may be altered in special circumstances. Candidates are required to devote their full time to a special course of study involving a series of lectures and seminars and a research project under the direction and supervision of one or more staff members. The course of study and project must be in the same general discipline of Microbiology, Virology or Immunology. Examination of a thesis presenting the results of each project undertaken is an essential part of the assessment procedure. Full details of assessment procedures may be obtained from the Department.

Students interested in taking the Honours course should consult the Head of the Department before 30 November in the final year of their studies for the B.Sc. degree.

## Pharmacology

Pharmacology is a subject which examines the actions and uses of drugs, and the experimental and regulatory procedures which are used in the development of new drugs. Two Level III subjects are offered.

### Level III

#### 1730 Introductory Pharmacology

*level:* III *points value:* 6 *duration:* semester 1

*quota:* will apply

*prerequisites:* Pass (Div I) in either 1404 Biochemistry II or 1893 Organic Chemistry II or 3773 Physiology II

*assumed knowledge:* 6878 Chemistry I

*restrictions:* 1730 Principles of Pharmacology and Toxicology; 4574 Systematic Pharmacology

*contact hours:* 3 lectures, 1 hour tutorial and 7 hours laboratory sessions per week

*content:* The subject familiarises students with the basic concepts associated with the study of drug effects in living systems. It also will acquaint them with certain major classes of therapeutic agents and their use in the treatment of disease. The practical component of the subject will provide an introduction to a comprehensive range of pharmacological laboratory techniques.

*assessment:* 3 hour written examination paper at end of semester (60%); laboratory/workshop reports/written assignments (40%)

### 4574 Advanced Topics in Pharmacology and Toxicology

level: III points value: 6 duration: semester 2

quota: will apply

*prerequisites:* Pass (Div I) in either 1404 Biochemistry II or 1893 Organic Chemistry II or 3773 Physiology II

*assumed knowledge:* 1730 Introductory Pharmacology

*restrictions:* 1730 Principles of Pharmacology and Toxicology; 4574 Systematic Pharmacology

*contact hours:* 3 lectures, 1 hour tutorial and 7 hours laboratory sessions per week

*content:* A number of specialised pharmacological and toxicological topics will be addressed in detail during this subject. Issues for discussion include pharmacogenetics, drug development and regulation, drugs and the CNS, drug dependence, cardiovascular pharmacology and molecular mechanisms of toxicology. Practical teaching sessions will comprise a major drug evaluation workshop intended to familiarise students with the drug development process and also small research projects carried out in laboratories located within the department.

*assessment:* 3 hour written examination paper (60%); laboratory/workshop reports (40%)

## Honours Level

### 3950 Honours Pharmacology

level: Honours points value: 24 duration: full year

*prerequisites:* 1730 Introductory Pharmacology and 4574 Advanced Topics in Pharmacology and Toxicology. Intending candidates should consult the Head of the Department of Clinical and Experimental Pharmacology (or nominee) during the final year of their course.

*requirements:* Candidates are required to give their full attendance to a special course of study and experimental work in the pharmacology laboratory, and to participate in a research project under the direction of a member of the academic staff. The results of the research project are to be embodied in a thesis in a form specified by the Head of the Department.

## Physics and Mathematical Physics

Physics provides a basis for a scientific understanding of the world. Physics may be studied in its own right or because it is crucial to developments in fields such as mathematics, engineering, medicine and biology.

For students intending to become professional physicists there is a set of subjects covering three or four years of study. Details of these subjects appear below.

For students intending to major in other areas, ranging from Arts to Engineering, specialised subjects are available: 2934 Physics, Ideas and Society I (for the degree of B.A., B.Des.St., B.Ec. and B.Sc. in Science and in Mathematical Sciences), 5599 Physics IHE (for Civil and Mechanical Engineers, degree of B.E.). The subjects 4145 Astronomy I and 2934 Physics, Ideas and Society I are suitable for students with no previous exposure to Physics. The subject 9615 General Physics I assumes previous exposure; it is intended for students who do not wish to proceed with further study in Physics or Engineering, and is orientated towards the Biological Sciences.

The Department of Physics and Mathematical Physics offers Level I, II and III subjects leading to a major in Physics, a major in Theoretical Physics, or a double major in Physics. A major in Mathematical Physics is offered in the Faculty of Mathematical and Computer Sciences.

For students intending to major in any of these options, the recommended course of study is:

*Level I:* 3643 Physics I and 9786 Mathematics I. Other subjects may include 4145 Astronomy I.

*Level II:* 2653 Physics II, 2656 Classical Mechanics II, 9600 Classical Fields and Mathematical Methods II, and Level II Mathematical Science subjects including the topics vector calculus, differential equations, Fourier series, and complex analysis. (The semester subjects 3418 Electromagnetism and Relativity II and 6051 Introductory Quantum Mechanics with Applications II are component parts of 2653 Physics II.)

*Level III:* Students intending to proceed to Honours should take as many as possible of the Level III subjects offered by the Department, preferably a double major in Physics. Students who might wish to undertake further work in experimental physics are strongly advised to take both 7828 Experimental Physics III and 3734 Introduction to Physics Research.

### EPIC (A Program of Education in Physics with Industrial Cooperation)

The Department offers a program whereby students enrolled for the third-year of the B.Sc. in the Faculty of Science, who have achieved an average credit level in the work of the first and second years and a credit level in 2653 Physics II, can apply to enrol in a cooperative program with industry. The student would be a full-time paid employee in industry for 4-5 months of each of the following two years. Thus the

student would be in full-time study in Semester I of Year 3, full-time work in Semester II of Year 3 and again in Semester I of Year 4. The degree of B.Sc. would be completed by full-time study in Semester II of Year 4.

Each work period in Years 3 and 4 involves a project agreed to jointly by the Department of Physics and Mathematical Physics and the employer. A written report must be prepared on each project and approved by both the employer and the Department. The performance of each student will be monitored by a committee within the Department. Unsatisfactory work reports or course grades may result in the student leaving the EPIC program.

## Level I

### 4145 Astronomy I

*level:* I    *points value:* 3    *duration:* semester I

*contact hours:* 3 lectures, 1 tutorial and 3 hours of take-home practical work a week

There will be one evening excursion for observations at a dark site and one evening session on campus for observation of the moon.

*content:* This subject is primarily for students who wish to obtain an overall view of contemporary astronomy and our place in the astronomer's universe. Historical introduction. Modern astronomical instruments. The solar system, structure, dimensions, orbits, theories of origin. Sun-system relations, individual planets, spacecraft results and minor members of the system. Stars, stellar distances, types of stars, variable stars, star clusters, the Milky Way, stellar evolution. Galaxies, galactic distance scale, radioastronomy, space astronomy, cosmology.

*assessment:* end of semester examination, practical work and an essay

### 9615 General Physics I

*level:* I    *points value:* 6    *duration:* full year

*prerequisites:* SACE Stage 2 Mathematics 1 and either Physics or Mathematics 2

*contact hours:* 3 lectures and 1 tutorial per week plus about 8 practical sessions of 3 hours per semester

*content:* This subject is primarily intended for students who do not intend to proceed with further study in physics or engineering. The main objectives are to present a contemporary view of classical mechanics, electromagnetism, optics and quantum physics and to offer students a glimpse of what is going on in physics today. The emphasis of the course is on physical

principles rather than mathematical rigour. Applications of physical principles in biological systems, astrophysics, sub-atomic physics and modern technology are special features of the course.

Students intending to continue to 2653 Physics II should take the subject 3643 Physics I. A student who gains a distinction in General Physics and who has an acceptable University mathematical background may be permitted to enrol in Physics II with the consent of the Head of the Department.

*assessment:* written examinations, and assignments and practical work

### 3643 Physics I

*level:* I    *points value:* 6    *duration:* full year

*Prerequisites:* SACE Stage 2 Mathematics 1, Mathematics 2 and Physics. Students who have not completed Mathematics 2 may be permitted to enrol upon successful completion of the Mathematics Bridging Course conducted by the Mathematics Learning Centre during February.

*assumed concurrent subject:* 9786 Mathematics I

*contact hours:* 3 lectures and 1 tutorial per week plus about 8 practical sessions of 3 hours per semester

*content:* Classical Mechanics (calculus based): vector kinematics, applications of Newton's laws, gravitation, conservative forces, collisions, statics, rotational motion, non-inertial frames of reference. Kinetic Theory and Thermodynamics: gas laws, Maxwell-Boltzmann distribution, mean free path, equipartition of energy, entropy, black-body radiation. Oscillations: simple harmonic motion, damped, forced and natural oscillations. Electricity and Magnetism: electric field, Coulomb and Gauss laws, electrostatics, capacitance, induced emf magnetic field, Ampere and Faraday laws, inductance, alternating currents, RCL circuits. Waves and Optics: superposition, wave equation, Fourier analysis, impedance, sound, decibel scale, interference and diffraction, Doppler effect, electromagnetic waves, speed of light, elements of geometrical and physical optics. Relativity: Einstein's postulates, time dilation, length contraction, Lorentz transformations, velocity addition, relativistic momentum and energy. Quantum Physics: X-rays as waves and photons, Compton effect, pair production, de Broglie waves, uncertainty principle, probability interpretation.

*assessment:* written examinations, and assignments and practical work

## Level II

### 9600 Classical Fields and Mathematical Methods II

*level:* II *points value:* 2 *duration:* semester 2

*prerequisites:* 9786 Mathematics I (Pass Div I) or 9595 Mathematics IIM (Pass Div I)

*assumed knowledge:* 3643 Physics I or 5599 Physics IHE; 7243 Differential Equations II and *either* 6649 Methods in Applied Mathematics II and 2959 Complex Analysis II (concurrently); *or* 2187 Vector Analysis and Complex Analysis

*contact hours:* 2 lectures a week and 1 tutorial a fortnight

*content:* Newtonian gravitation, electrostatics, Laplace and Poisson equations, method of images, boundary value problems, use of special functions. Delta-functions, Green's functions, eigenvalue expansions. Fourier transforms, multipole expansions, spherical harmonics. Heat equation.

*assessment:* class exercises; final 2 hour exam; tests

### 2656 Classical Mechanics II

*level:* II *points value:* 2 *duration:* semester 1

*prerequisites:* 9786 Mathematics I (Pass Div I) or 9595 Mathematics IIM (Pass Div I)

*assumed knowledge:* 3643 Physics I

*corequisites:* 7243 Differential Equations II and *either* 6649 Methods in Applied Mathematics II *or* 2187 Vector Analysis and Complex Analysis

*contact hours:* 2 lectures a week and 1 tutorial a fortnight

*content:* Newton's laws, conservation laws. Many particle systems. Rigid bodies. Angular momentum. Moment of inertia tensor. Lagrange's equations. Generalised coordinates

*assessment:* class exercises; final 2 hour exam; tests

### 3418 Electromagnetism and Relativity II

*level:* II *points value:* 2 *duration:* semester 1

*prerequisites:* (a) 3643 Physics I (Pass Div I) and 9786 Mathematics I (Pass Div I) or Mathematics IIM (Pass Div I); *or* (b) 5599 Physics IHE (Pass Div I) and 9786 Mathematics I (Pass Div I) or 9595 Mathematics IIM (Pass Div I); *or* (c) an acceptable equivalent

*assumed concurrent subjects:* 7243 Differential Equations II and *either* 6649 Methods in Applied Mathematics II *or* 2187 Vector Analysis and Complex Analysis

*contact hours:* 2 lectures a week and 8 tutorials

*content:* Electromagnetism: Electrostatics, electric and magnetic fields in material media, electromagnetic potentials. Maxwell's equations and their solution leading to electromagnetic waves. Relativity: Four-vectors, Minkowski space-time, Lorentz invariance, four-momentum, kinematics of collisions and conservation laws.

*assessment:* exam; weekend papers; tests

### 6051 Introductory Quantum Mechanics and Applications II

*level:* II *points value:* 2 *duration:* semester 2

*assumed knowledge:* 3643 Physics I or 5599 Physics IHE; 7243 Differential Equations II, and *either* 6649 Methods in Applied Mathematics II and 2959 Complex Analysis II (concurrently), *or* 2187 Vector Analysis and Complex Analysis

*contact hours:* 2 lectures a week and 8 tutorials

*content:* Wave Mechanics with examples from Atomic, Sub-atomic and Solid State physics. Double slit experiment, de Broglie hypothesis, Heisenberg Uncertainty Principle. Operators. Commutator. Interference of measurements. Polarised light. Wave equation. Probability density and current. Time independent Schrodinger equation. Energy quantisation. Particle in a 1-D box. The 3-D box. Harmonic oscillator in 1-D. Raising and lowering operators. Barrier penetration. Schrodinger equation in 3-D. Angular momentum. The Hydrogen atom. Kronig-Penny model. Pauli exclusion principle.

*assessment:* exam; weekend papers; tests

### 2653 Physics II

*level:* II *points value:* 8 *duration:* full year

*prerequisites:* (a) 3643 Physics I (Pass Div I) and 9786 Mathematics I (Pass Div I), *or* 9595 Mathematics IIM (Pass Div I); *or* (b) 5599 Physics IHE (Pass Div I) and 9786 Mathematics I (Pass Div I), *or* Mathematics IIM (Pass Div I); *or* (c) an acceptable equivalent

*corequisites:* 2656 Classical Mechanics II, 9600 Classical Fields and Mathematical Methods II, 7243 Differential Equations II; and *either* 6649 Methods in Applied Mathematics II and 2958 Complex Analysis II; *or* 2187 Vector Analysis and Complex Analysis

*contact hours:* 3 lectures; 1 tutorial; about 20 sessions of 3 hours of practical work per semester

*content:* Electromagnetism: Electrostatics, electric and magnetic fields in material media, electromagnetic potentials. Maxwell's equations and their solution leading to electromagnetic waves.

Relativity: Four-vectors, Minkowski space-time, Lorentz invariance, four-momentum, kinematics of collisions and conservation laws.

Electrical Circuit Theory: DC and AC Circuits; circuit theorems and network analysis; electrons in solids; solid-state devices.

Optics for today: Geometrical and physical optics, ray matrices, aberrations, polarisation with Jones matrices, Fresnel and Fraunhofer diffraction, holography, lasers. Emphasis on optics for applications.

Introduction to Classical and Statistical Thermodynamics.

Electro-optics and Photonics: the physics of the interface between optics and electronics and introduction to quantum and non-linear optics, with the objective of understanding modern devices such as light emitting diodes, semiconductor lasers, optical detectors, optical switching and modulation. Examples drawn from current research topics in optical sensing, computation and image processing.

Quantum Mechanics with Applications: Wave Mechanics with examples from Atomic, Sub-atomic and Solid State physics. Double slit experiment, de Broglie hypothesis, Heisenberg Uncertainty Principle. Operators. Commutator. Interference of measurements. Polarised light. Wave equation. Probability density and current. Time independent Schrodinger equation. Energy quantisation. Particle in a 1-D box. The 3-D box. Harmonic oscillator in 1-D. Raising and lowering operators. Barrier penetration. Schrodinger equation in 3-D. Angular momentum. The Hydrogen atom. Kronig-Penny model. Pauli exclusion principle.

*assessment:* end of semester exams; laboratory work; tests

### Level III

#### 4413 Advanced Dynamics and Relativity

*level:* III *points value:* 3 *duration:* semester 2

*prerequisites:* 3643 Physics I (Pass Div I), and 9786 Mathematics I (Pass Div I) or 9595 Mathematics IIM (Pass Div I)

*assumed knowledge:* 2656 Classical Mechanics II. 9600 Classical Fields and Mathematical Methods II. 3418 Electromagnetism and Relativity II or 2653 Physics II

*restrictions:* cannot be counted with 7099 Advanced Dynamics or 7633 Relativity and Classical Field Theory

*contact hours:* 3 lectures per week and 1 tutorial per fortnight

*content:* Variational principles, Lagrange's equations, Noether's theorem. Hamilton's equations, Poisson

brackets. Canonical transformations, Hamilton-Jacobi theory. Special relativity, tensors, relativistic mechanics. Tensor formulation of electromagnetism. Relativistic action principles for particles and fields. Radiation from relativistic charged particles.

*assessment:* class exercises, 3 hour examination

#### 1067 Advanced Quantum Mechanics

*level:* III *points value:* 2 *duration:* semester 2

*prerequisites:* 3643 Physics I (Pass Div I) and 9786 Mathematics I (Pass Div I) or 9595 Mathematics IIM (Pass Div I).

*assumed knowledge:* 6978 Quantum Mechanics III.

*contact hours:* 2 lectures a week and 1 tutorial a fortnight.

*content:* This subject studies advanced topics in quantum mechanics with an emphasis on symmetries and the mathematical structure of the theory. Postulates and formalism. Stern-Gerlach experiment. Angular momentum. Bell's inequalities. Symmetries, conservation laws, and unitary transformations. Position and momentum representation. Heisenberg and Schroedinger pictures. Annihilation and creation operators: harmonic oscillator. Feynman path integrals. Parity. Time-reversal. Periodic potentials and Bloch wavefunctions. Coupled oscillators. Density matrix approach. Interaction picture and the Dyson series. Introduction to relativistic quantum mechanics: Klein-Gordon equation, Dirac equation, probability current, electromagnetic coupling.

*assessment:* one 2 hour examination and class exercise

#### 8709 Computational Physics

*level:* III *points value:* 2 *duration:* semester 1

*availability:* not offered in 1996

*prerequisites:* 9786 Mathematics I (Pass Div I) or 9595 Mathematics IIM (Pass Div I)

*assumed knowledge:* 2653 Physics II; 6918 Scientific Computing I

*contact hours:* 2 lectures, 1 hour tutorial a week

*content:* Basic computational procedures. Accuracy, stability. Discretisation, numerical differentiation and integration. Roots of equations. Projects in semiclassical quantisation, scattering in molecular potentials, virial coefficients, neural nets. Interpolation, approximation by polynomials, splines. Partial wave solutions. Matrix operations, Gaussian elimination, eigenvalues of tri-diagonal matrices. Nuclear shell models. Ordinary differential equations. Runge-Kutta methods. Field mapping. Hamiltonian chaos. Structure of white dwarf stars. Boundary value and eigenvalue problems, shooting methods.

Stationary states of Schrodinger's equation, Hartree-Fock approximation. Random numbers, Monte Carlo methods. Ising model in 2 dimensions. Applications to  $H_2$  model. Algebraic computing and graphics. Overview of packages available in the department. IDL, IMSL, Mathematica, Maple.

*assessment:* 2 hour examination, project and exercises

### **6459 Electromagnetism and Optics**

*level:* III *points value:* 3 *duration:* semester 2

*prerequisites:* 2653 Physics II or acceptable equivalent

*restrictions:* cannot be counted with 6849 Electromagnetism or 1384 Optics

*contact hours:* 3 hours per week

*content:* Electrostatics; Laplace's equation, Poisson's equation, boundary value problems; electric fields in matter, electric dipole and multipoles, electric polarization; magnetostatics, vector potential and gauge transformations; Faraday's law, energy stored in magnetic field, inductance; transmission lines; magnetic fields in matter, magnetisation; Maxwell's equations; EM waves in free space: plane waves and Gaussian laser beams; Lorentz gauge; radiation from an accelerating charge; Maxwell's equations in matter, EM momentum and energy, Poynting's theorem, Maxwell's stress tensor; Fresnel equations: reflection and refraction of EM waves at interfaces; diffraction theory, Fraunhofer and Fresnel diffraction; Fourier optics, spatial filtering.

*assessment:* one 3 hour examination and class exercises

### **7828 Experimental Physics III**

*level:* III *points value:* 3 *duration:* semester 1

*prerequisites:* 2653 Physics II or acceptable equivalent

*restrictions:* cannot be counted with 2838 Experimental Physics and Electronics

*contact hours:* 9 hours of practicals per week

*content:* Electronics (analogue circuits), laboratory experiments in selected areas including atomic and nuclear physics, optics, and electromagnetism. Detectors and signal processing.

*assessment:* laboratory notebooks, tutorials and examination

### **3734 Introduction to Physics Research**

*level:* III *points value:* 3 *duration:* semester 2

*prerequisites:* 2653 Physics II or acceptable equivalent

*restrictions:* cannot be counted with 9116 Laboratory Physics

*contact hours:* 9 hours of practicals per week

*content:* Introductory technical training, one supervised project, oral presentation.

*assessment:* project report, essay

### **2994 Mathematical Physics**

*level:* III *points value:* 2 *duration:* semester 1

*prerequisites:* 9786 Mathematics I (Pass Div I) or 9595 Mathematics IIM (Pass Div I)

*assumed knowledge:* 9600 Classical Fields and Mathematical Methods II or equivalent

*restrictions:* cannot be counted with 4324 Mathematical Methods

*contact hours:* 2 lectures per week and 1 tutorial per fortnight

*content:* Symmetry groups with applications in classical mechanics, relativity and quantum mechanics. Vector spaces, linear functionals, linear operators, inner product spaces. Algebras. Grassmann algebra and Lie algebras with applications. Introduction to manifolds and differential geometry. Vector and tensor fields. Covariant derivatives. Banach and Hilbert space, self-adjoint and unitary operators. Hilbert space formulation of quantum mechanics. Equivalence of Heisenberg and Schrodinger picture. Distributions, Fourier transforms, Green's functions for Laplace's equation and the wave equation.

*assessment:* class exercises, 2 hour examination

### **6978 Quantum Mechanics III**

*level:* III *points value:* 3 *duration:* semester 1

*prerequisites:* 3643 Physics I (Pass Div I), and 9786 Maths I (Pass Div I) or 9595 Maths IIM (Pass Div I)

*assumed knowledge:* 6051 Introductory Quantum Mechanics and Applications II or 2653 Physics II

*restrictions:* cannot be counted with 4964 Quantum Mechanics

*contact hours:* 3 lectures per week and approximately 1 tutorial per week

*content:* This subject introduces concepts essential for the understanding of quantum mechanics and the microscopic structure of matter. Review of principles and postulates of quantum mechanics. Mathematical formalism and Dirac bra-ket notation. Commuting observables, compatibility, and the Heisenberg uncertainty relations. Unitary transformations. Schrodinger equation and time evolution. Orbital angular momentum, spherical harmonics, and spatial rotations. Angular momentum, addition of angular momenta, and Clebsch-Gordan coefficients.

Schroedinger equation in three dimensions. Separability and central forces: spherical square well, hydrogen-like atoms, three-dimensional oscillator. Time-independent approximation methods: Perturbation theory, variational methods, WKB approximation. Fine structure of hydrogen atom. time-dependent approximation methods: Time-dependent perturbation theory, Fermi's golden rule, stimulated emission. Scattering from a central potential. Several and many particle systems.

*assessment:* one 3 hour examination and class exercises

### 5547 Statistical Mechanics

*level:* III *points value:* 2 *duration:* semester 1

*prerequisites:* 3643 Physics I (Pass Div I) and 9786 Mathematics I (Pass Div I) or 9595 Mathematics IIM (Pass Div I)

*assumed knowledge:* 2653 Physics II

*contact hours:* 2 lectures per week and 1 tutorial per fortnight

*content:* This subject introduces concepts essential for the understanding of both classical and quantum statistical mechanics. Topics covered include the classical thermodynamic laws and their application, postulates of statistical mechanics, statistical interpretation of thermodynamics, microcanonical, canonical and grand canonical ensembles. The methods of statistical mechanics are then used to develop the statistics for Bose-Einstein, Fermi-Dirac and photon gases. Selected topics from low temperature physics, electrical and thermal properties of matter, and astrophysics will be discussed.

*assessment:* 2 hour examination and class exercises

### 3426 Structure of Matter

*level:* III *points value:* 3 *duration:* semester 2

*prerequisites:* 2653 Physics II or acceptable equivalent

*assumed knowledge:* 6978 Quantum Mechanics III

*restrictions:* cannot be counted with 2396 Atomic and Nuclear Physics or 4736 Solid State Physics

*contact hours:* 3 lectures per week and approximately 1 tutorial per week

*content:* This subject applies quantum mechanics and fundamental physics to study the microscopic structure of matter. Electromagnetic interaction of quantum systems with radiation. Atomic electromagnetic transitions, selection rules, transition probabilities. Stimulated emission, lasers and masers. Multi-electron atoms: Hartree and Hartree-Fock methods, LS and JJ coupling. Simple molecules, molecular orbitals, and

molecular spectra. Solid state physics: Bloch wavefunctions, band structure, conductors, insulators, semiconductors. Nuclear physics: nucleon-nucleon forces, nuclear shell model, systematics of nuclear shapes and sizes, nuclear stability. Introduction to particle physics: particles and antiparticles, leptons and hadrons, fundamental symmetries, the standard model.

*assessment:* one 3 hour examination and class exercises

## Honours Level

### 1285 Honours Physics

### 2259 Honours Physics (mid-year)

*level:* Honours *points value:* 24 *duration:* full year

*note:* Students who are considering taking this subject are advised to see the Head of the Department of Physics and Mathematical Physics as soon as possible, preferably before enrolling for their third year course.

*prerequisites:* The normal prerequisite for Honours Physics is a major in Experimental or Theoretical Physics. The preferred background is a double major in Physics. Any student wishing to take Honours Physics must obtain the approval of the Head of the Department of Physics and Mathematical Physics.

*requirements:* It is possible to take an Honours degree in either experimental or theoretical physics. The Honours course may include lecture courses on astrophysics, atmospheric physics, atomic and molecular physics, electrodynamics, experimental methods, general relativity, many-body theory, nuclear physics, particle physics, quantum mechanics, quantum field theory, statistical mechanics, solid state physics and unified gauge theories. Each student will also be expected to undertake a substantial experimental or theoretical research project on which a report will be prepared. Full details may be obtained by application to the Head of the Department.

### 5724 Honours Mathematical Physics

*syllabus details:* see Faculty of Mathematical and Computer Sciences

## Physiology

Physiology is *the* central biomedical science. It is the study of function of the cells, tissues, and organ systems of the body. Because physiology examines life processes and their consequences, it is a scientific discipline of the widest scope and application. We gain our knowledge of physiology from observations on individual cells, groups of cells grown in culture and from observations of animals and man. Most of the

body's systems interact with one another in complex ways and some problems can therefore only be addressed by studies in whole animals. The physiologist may study, for example, the function of the heart, the blood vessels and their control by nerves. He or she may investigate the responses of the body to exercise, stress and hostile environments. Studies in physiology increase our knowledge of the integrative functions of the human body and it is this knowledge which underpins all advances in biomedical research.

The Department of Physiology is a major participant in the Level I subject entitled 7138 Molecular and Cell Biology I and offers one Level II subject and two Level III subjects. Entry to second level Physiology will require either Chemistry I or Molecular and Cell Biology I. Students who wish to continue with Physiology as a major, are expected to gain at least a Division I Pass in Physiology II. Entry into the Physiology Honours year normally requires students to perform well in the Physiology major.

## Level II

---

### 3773 Physiology II

*level:* II *points value:* 8 *duration:* full year

*quota:* may apply

*prerequisites:* 6878 Chemistry I or 7138 Molecular and Cell Biology I

*assumed knowledge:* 3174 Biology I, 9615 General Physics I

*contact hours:* 3 lectures, 1 tutorial and 4 hours of practical work a week

*content:* This introductory subject in mammalian physiology describes the coordinated function of a range of physiological systems. Each physiological system is discussed in a manner which emphasises its relevance to the needs of the whole organism. Students participate in a research project based practical course. Students working in groups conduct two research projects, each research project lasting for a whole semester. Students prepare a background literature review, a poster presentation of their experimental work and a final written report, and these contribute to their assessment.

*assessment:* written exams at end of each semester (35% each); 2 practical assessments (30%)

## Level III

---

### 8880 Cellular Signalling Systems III

*level:* III *points value:* 6 *duration:* semester 1

*prerequisites:* 3773 Physiology II (Pass Div I) or an acceptable equivalent

*restrictions:* 5201 Physiology of Stress III; 7881 Cellular Physiology III; 5657 Physiology in Action III

*contact hours:* 3 lectures and 2 four hour practicals per week

*content:* Recently, there has been a rapid increase in our knowledge of the cellular events which underlie physiological responses. This has resulted in a much greater understanding of the regulation of the body's functions in health and disease. This subject will look at the basic and applied aspects of the endocrine and neural signalling systems, concentrating on events at the cellular level. A major component of the subject will seek to define what is meant by "stress" and examine the impact of acute and chronic stresses on key physiological systems. The hierarchy of the stress responses within the body will be covered and the roles of the autonomic, neuroendocrine and cardiovascular control systems in co-ordination of the physiological responses to stress will be emphasised. The broader issues of the role of stress in the aetiology of disease will be discussed. The aim of the practical course is to provide students with laboratory experience in research laboratories associated with the Department. The course will be structured as research projects based around the interests of the student and the project supervisors. Students will work in small groups and have access to equipment which is appropriate for investigations in this state-of-the-art course.

*assessment:* Final written exam; practical will be assessed on a number of grounds, including the background literature survey completed prior to undertaking the research project, the presentation of the project results as either an oral communication or poster, submission of a final written report on a the project presented in the style of a scientific manuscript and a critique of scientific manuscript.

### 7117 Human Movement Studies III

*level:* III *points value:* 6 *duration:* semester 2

*prerequisites:* 3773 Physiology II (Pass Div I) or an acceptable equivalent

*restrictions:* 8356 Exercise Physiology; 6867 Human Movement Research; 4632 Neurobiology

*contact hours:* 3 lectures and 2 four hour practical/tutorials per week

*content:* The term Human Movement Studies broadly encompasses the areas of exercise physiology and the neural control of human movement. The principal aim of the subject is to impart a sound scientific basis for understanding of the neural mechanisms that enable the muscles to carry out movements, and the metabolic mechanisms that underlie muscular performance. Techniques for investigating the human nervous system will be discussed. Exercise topics that will be considered in detail include the provision of energy, cardiorespiratory and neuromuscular function, hormonal interactions and the influence of the environment on physical performance. Biochemical nutritional and psychological aspects of performance, training methodology and adaptations, optimisation and assessment of performance are also considered in detail. Students will be given the opportunity to read widely in chosen areas of the subject and to review some research areas. Small-group discussion of specific research papers and research topics will be an important part of the subject.

*assessment:* Progressive assessment of some aspects; assessment of individual performance in small-group discussions including some critiques of scientific papers; final written examination.

### Honours Level

#### 6740 Honours Physiology

level: Honours points value: 24 duration: full year

*prerequisites:* a Pass at a standard satisfactory to the Head of the Department of Physiology in appropriate Level III subjects offered by the Department of Physiology or acceptable alternative subjects

*requirements:* Candidates are required to demonstrate an original and critical approach in the assimilation of current state of knowledge in an area of physiological research and engage in experimental work in this research field for a full academic year in the Department of Physiology or in an affiliated area under the general direction of the Head of the Department of Physiology. A brochure describing the range of research projects to be offered during the Honours year will be available from the Department of Physiology from October of the preceding year. Each project will be supervised by one or more members of the academic staff who will provide the student with a series of key references for each particular research project. Students will also be expected to attend a series of Honours workshops held throughout the year.

During the course students will be required to present at least two research seminars and submit a written literature review and a thesis. Other oral and written assessment tasks may also be required.

## Plant Science

### Level III

#### 1450 Molecular Genetics of Plants III

*syllabus details:* see B.Ag.Sc., Faculty of Agricultural and Natural Resource Sciences

### Honours Level

#### 7042 Honours Plant Science (B.Sc.)

level: Honours points value: 24 duration: full year

This subject is available under the provisions of Specific Course Rule 8.2, The Honours degree of Bachelor of Science.

*prerequisites:* a credit or higher standard in at least two appropriate Level III subjects offered by a Science Department

*requirements:* A candidate will be required to undertake a research project under the supervision of one or more members of academic staff and present seminars and a thesis on the research work undertaken. The research project could be undertaken in one of the following areas: Crop Physiology and Biochemistry, Plant Molecular Biology or Plant Breeding. A candidate may also be required to attend lectures and pass examinations in related subjects.

Intending candidates should consult the Head of the Department of Plant Science and potential supervisors during the final year of the Ordinary degree and be prepared to begin studies in the Department at the beginning of February.

## Psychology

#### 5104 Psychology I

level: I points value: 6 duration: full year

quota: will apply

*assumed knowledge:* Qualification for entry into SACE Stage 2 Mathematics I and satisfactory achievement at SACE Stage 2 in a literary subject using English.

*contact hours:* 3 lectures, and on average, 1 tutorial and 1 hour of practical work a week.

*content:* This subject aims to provide an introductory overview of contemporary psychology by considering a representative range of psychological topics of current interest, and to equip students for further study of psychology. The topics that may be covered include innate behaviour, conditioning, intelligence, personality, cognitive psychology, developmental

psychology, language, social psychology, abnormal psychology, the biological bases of behaviour and elementary descriptive and inferential statistics.

*assessment:* end of semester examinations. Marks will also be awarded for other assignments to be completed.

## Level II

---

### 3149 Psychology II

*level:* II *points value:* 8 *duration:* full year

*quota:* may apply

*prerequisites:* 5104 Psychology I

*contact hours:* 3 lectures and 1 tutorial/seminar a week, plus practical work involving analysis and report writing in student's own time.

*content:* The subject is oriented towards the controlled study of human and animal behaviour, both individual and social, and is concerned also with the possibilities for the wider application of contemporary psychological theories. Specialised tutorial sequences allow some choice of additional topics.

*assessment:* Marks in a range of assessable products including end of semester examinations, tutorial work and practical reports are combined to produce the final score for the subject.

## Level III

---

At the third year level, one subject (3170) will be offered in Psychological Research Methodology (4 points), and a set of subjects (2 points each) to cover a range of topics in psychology which are organised into the following two groups. The range of subjects to be offered in any year will be subject to the availability of staff and other necessary resources.

Group A: 7324 Studies in Personality III, 5673 The Philosophy and Psychology of Consciousness III, 8659 Social Psychology, 8779 Metapsychology III, 3650 Applied Behaviour Change and Training III.

Group B: 2196 Environmental Psychology III, 2921 Psychology of Language in Thought and Action III, 7196 Intelligence III; 8267 Animal Behaviour III, 4770 Neuroscience in Psychology III.

To qualify for entry into Honours Psychology, it will be necessary to complete the subject Psychological Research Methodology and 4 other subjects in psychology from the list above, with at least one subject chosen from each group, to provide a total value of 12 points.

Students wishing to complete a substantial proportion of their study at the third year level in psychology (to the value of 8 points or more) are advised to undertake

the subject Psychological Research Methodology, since the majority of the practicals assume competence in statistical analysis and in the use of the computer-based statistical package at the level provided in that subject. A similar assumption about familiarity with statistical procedures and methodological issues may be made in the presentation of the other material.

### Practical work

All Level III subjects have associated practical work assignments which contribute 25% of the final mark. In the case of Psychological Research Methodology, this consists of workshops and a substantial exercise in statistical computing.

Details about the practical work, including formal contact time, are included in the Third Year Psychology Handbook. It is not possible to stipulate formal contact hours for practical work in the syllabus entries below since this varies among the different practical exercises; in some cases the data-gathering, and in all cases the statistical analyses and the preparation of the reports, are completed in the students' own time. It is assumed that students will either be concurrently enrolled in Psychological Research Methodology, or have completed it (or some equivalent) previously; where this is not the case students may need to devote additional time to develop competence in the statistical techniques employed.

### 8267 Animal Behaviour III

*level:* III *points value:* 2 *duration:* semester 1

*quota:* may apply

*prerequisites:* 3149 Psychology II or other subjects approved by the Head of Department

*restriction:* 3609 Animal Behaviour prior to 1989

*contact hours:* 1 lecture a week, plus 4 tutorials and practical work

*content:* This subject will proceed from the point reached in the Psychology II section devoted to the topic. The central theme will be the behaviour of mammals and its evolution. Primates will receive particular attention but other species, notably the carnivora and ungulates, will also be treated. Play behaviour, domestication, behaviour in captivity and man-animal contacts will be emphasised. Extensive use will be made of film and it is hoped to organise visits to animal instrumentalities in the Adelaide area. Approximately 12 film screenings will be arranged in association with the subject and a film program will be available from the Departmental Office during Orientation Week.

*assessment:* final examination and the report of a practical exercise to be conducted in the Adelaide Zoological Gardens

**3650 Applied Behaviour Change and Training III***level:* III *points value:* 2 *duration:* semester 2*quota:* may apply*prerequisites:* 3149 Psychology II.*contact hours:* 1 lecture per week, 4 tutorials and practical work*content:* This subject of lectures is concerned with changing existing behaviours and training new skills in applied settings. The first part of the subject reviews the evidence concerning the effectiveness of psychotherapy and behaviour modification and their application to work behaviours in organisations. Particular emphasis is placed on the implications of this evidence for the design and evaluation of behaviour change programs in applied settings. The second part of the course is concerned with the principles and practice of training new work and social skills and with teaching work related information to adults in applied settings.*assessment:* final examination and the report of a practical exercise**2196 Environmental Psychology III***level:* III *points value:* 2 *duration:* semester 1*quota:* may apply*prerequisites:* 3149 Psychology II.*restriction:* 2766 Environmental Psychology before 1989*contact hours:* 1 lecture a week, plus 4 tutorials and practical work*content:* An introduction to environmental psychology including methods, perception and cognition, stressors, personal space and territoriality, aesthetics, and human-environment interactions.*assessment:* final examination and the report of a practical exercise**7196 Intelligence III***level:* III *points value:* 2 *duration:* semester 2*quota:* may apply*prerequisites:* 3149 Psychology II.*restriction:* 1508 Intelligence prior to 1989*contact hours:* 1 lecture a week, plus 4 tutorials and practical work*content:* This subject reviews recent cognitive analytical approaches to the study of individual differences in intelligence, comparing the psychometric paradigm with various information

processing models. Particular emphasis is given to the consequences of mental retardation, brain damage, and ageing for intellectual functioning.

*assessment:* final examination and the report of a practical exercise**8779 Metapsychology III***level:* III *points value:* 2 *duration:* semester 1*quota:* may apply*prerequisites:* 3149 Psychology II.*contact hours:* 1 lecture a week, plus 4 tutorials and 3 practical briefing sessions.*content:* This subject will treat the psychological enterprise as the object of study, that is the network of individuals, groups and institutions involved in the production, dissemination and application of psychological knowledge claims. Findings from philosophy, history, sociology and psychology itself will be considered in an attempt to extend the understanding of the enterprise. The aim of the course is not to provide final answers, but to assist participants to develop a more critical perspective to the discipline.*assessment:* final examination and the report of a practical exercise**4770 Neuroscience in Psychology III***level:* III *points value:* 2 *duration:* semester 2*quota:* may apply*prerequisites:* 3149 Psychology II.*restriction:* 8743 Physiological Psychology prior to 1989*contact hours:* 1 lecture a week, plus 4 tutorials and practical work*content:* This subject seeks to expose further some of the difficulties of understanding Psychology in brain terms, and to develop an impression of what, in principle, can be achieved by an interchange of ideas between the two disciplines, Psychology and Neuroscience: examining, on the one hand, emotion as a representative psychological construct, and, on the other, what can be understood of the brain's functional organisation. The subject consists, essentially, of three principal components: theoretical contemplations of the 'structure' of emotion, and its functional relevance in psychological explanation; research approaches in its various aspects; and the implications of physiological perspectives in a consideration of emotion.*assessment:* final examination and the report of a practical exercise

### **3170 Psychological Research Methodology III**

*level:* III *points value:* 4 *duration:* full year

*quota:* may apply

*prerequisites:* 3149 Psychology II.

*restriction:* 1759 Methodology and Statistics prior to 1989

*contact hours:* 2 lectures and up to 1 tutorial a week, plus practical work

*content:* This subject will add to the range of statistical significance tests taught in Psychology I and Psychology II a number of more complex techniques. These will include multiple regression, multifactor analysis of variance, planned and post-hoc contrasts, trend analysis and analysis of covariance. Students will be introduced to the use of statistical software (specifically SPSS) on the University's computers, and will carry out a range of practical exercises in this area. A wide range of issues relating to research design will be covered in lectures and tutorials. Topics dealt with will range from the general (eg the various concepts of reliability and validity, the logic of inference from data obtained in different ways, the use of quasi experimentation and unobtrusive measures) to the highly specific (eg the consideration of the inferences that have been made by specific researchers using particular research designs in particular areas of psychological interest).

*assessment:* 2 final examination papers (one at the end of each semester), and exercises in statistics and statistical computing.

### **2921 Psychology of Language in Thought and Action III**

*level:* III *points value:* 2 *duration:* semester 1

*quota:* may apply

*prerequisites:* 3149 Psychology II.

*contact hours:* 1 lecture a week, plus 4 tutorials and practical work

*content:* Pragmatic and figurative aspects of language have been neglected in traditional approaches to language operating within formalist or objective frameworks. However, analyses of these aspects are playing an increasingly important role in psychology, linguistics, and artificial intelligence in attempts to understand cognitive processes as well as natural language use. Similar analyses are also being employed in current debates on the nature of psychology as a scientific discipline and on the present and future orientation of particular fields, such as social psychology and personality theory. The aim of this option is to present a critical review of recent

approaches to pragmatic and figurative aspects of language use, and to provide a practical introduction to some of the principal methods of analysis which have been developed to study them.

Lectures will provisionally cover the following topics: From positivism to pragmatics: the philosophical background to modern approaches to language. Language and reality: the nature of categories and the Whorfian hypothesis. Categorisation, polysemy, and cognitive grammar. Metaphor and figurative language. Performatives, speech acts, implicature, and relevance. Discourse and conversation analysis.

*assessment:* final examination and the report of a practical exercise

### **8659 Social Psychology III**

*level:* III *points value:* 2 *duration:* semester 1

*quota:* may apply

*prerequisites:* 3149 Psychology II

*restriction:* 6423 Social Psychology and Intergroup Relations III; 4553 Cognition and Affect in Social Relationships III; 8659 Social Psychology and Intergroup Relations III; 8659 Social Psychology III before 1992

*contact hours:* 1 lecture a week plus 4 tutorials and practical work

*content:* An expanding body of research within contemporary social psychology has been the study of social cognition. This tradition concerns itself with the way in which individuals and groups attend to, process, interpret, mentally represent and understand complex social information. While this field borrows models and concepts from cognitive psychology, the study of social objects is markedly different from the study of non-social objects. The acquisition and processing of social knowledge requires the consideration of a range of affective, social, cultural and symbolic influences. Concepts predominant within social cognition research includes attribution theory and the concepts of schema, script and prototype. These will be considered along with less mainstream approaches, such as the French tradition of research in social representations theory. A practical exercise will be conducted to illustrate some of the processes central to the study of social cognition.

*assessment:* final examination and report of the practical exercise

### **7324 Studies in Personality III**

*level:* III *points value:* 2 *duration:* semester 2

*quota:* may apply

*prerequisites:* 3149 Psychology II.

*restriction:* 5202 Personality before 1989

*contact hours:* 1 lecture a week, plus 4 tutorials and practical work

*content:* The study of personality as a sociocultural product; interactional concepts of personality; discursive construction of identity, self, the subject and subjection; discourse analysis in studies of the person; poststructuralist, social constructionist and narrative perspectives.

*assessment:* final examination and the report of a practical exercise

### 5673 The Philosophy and Psychology of Consciousness III

*level:* III *points value:* 2 *duration:* semester 2

*quota:* may apply

*prerequisites:* 3149 Psychology II.

*restriction:* 1967 The Philosophy and Psychology of Consciousness before 1989

*contact hours:* 1 lecture a week, plus 4 tutorials and practical work

*content:* This subject examines the place in Psychology of the phenomena associated with such terms as 'consciousness', 'awareness' and 'experience'. Lectures and tutorials deal with the place of these types of concept in an overall scientific program, considering relevant issues at levels ranging from the philosophical to the physiological. Specific topics covered include the mind-body problem, the feasibility of a reductionist approach, the place of phenomenology and existentialism, and the suggestions of physiologists on the nature of the mechanisms that might underlie consciousness.

*assessment:* final examination and the report of a practical exercise

## Honours Level

---

### 4702 Honours Psychology

*level:* Honours *points value:* 24 *duration:* full year

*quota:* will apply

*prerequisites:* Students wishing to enrol in 4702 Honours Psychology must have reached a satisfactory standard in 5104 Psychology I, 3149 Psychology II, and third-year psychology subjects with a total of at least 12 points value, including the subject 3170 Psychological Research Methodology III; or an equivalent sequence of subjects from other degree courses deemed acceptable by the Head of the Department. The entry standard normally requires an overall Credit or Distinction in two of the first, second

or third-year assessments of psychology subjects, and, in any case, at least a good pass (60% or better) on average for level III subjects. Academic achievement is the only criterion for entry to the course. No more than nine places in the course are available for students who have degrees from Universities outside South Australia. Intending applicants seeking further information should obtain the Honours Introductory Booklet from the Department.

*content:* Honours Psychology is a full year's course of lectures and discussions on advanced topics. It also involves a dissertation embodying the results of a research investigation carried out under the supervision of a member of the staff of the Department, or other person nominated by the Department for the purpose.

*assessment:* Achievement in the examinations of six half-semester topics provides 60% of the assessment of the course, and an empirical research thesis provides the remaining 40%.

## Soil Science

### 4633 Soil Biology and Biochemistry

*level:* III *points value:* 3 *duration:* semester 1

*syllabus details:* see the Faculty of Agricultural and Natural Resource Sciences, Department of Soil Science

## Honours Level

---

### 6909 Honours Soil Science (B.Sc.)

### 7936 Honours Soil Science (B.Sc.) (mid-year)

*level:* Honours *points value:* 24 *duration:* full year

This subject is offered by the Department of Soil Science and is available under the provisions of Specific Course Rule 8.2, The Honours Degree of the degree of Bachelor of Science.

*prerequisites:* a credit or higher standard pass in appropriate Level III subjects offered by a Science Department

*requirements:* a candidate will be required to pass such examinations on the chosen subject of study as may be prescribed by the Head of Department, and to submit a thesis reporting research work undertaken during the year under the supervision of one or more members of academic staff.

Candidates may also be required to attend lectures and pass examinations in related subjects.

Intending candidates should consult the Head of the Department and potential supervisors before 30

November in the final year of studies for the Ordinary degree of Bachelor of Science and should be prepared to begin studies in the Department on or about 1 February, or at the beginning of semester 2.

## Zoology

Zoology, the scientific study of animals, is a very broad subject overlapping with a number of other disciplines. Within the Department there are teaching and research strengths in Systematics and Biodiversity, Comparative Physiology and Marine and Freshwater Ecology. Overall these provide for a department that is strong in teaching and research in environmental biology.

The Level I pre-requisites to a Level III major in Zoology, Botany or Environmental Biology are 3174 Biology I and 8954 Environmental Biology I plus the appropriate Level II subjects. An alternative path is to replace 3174 Biology I with 8280 Biology of Organisms I and 7138 Molecular and Cell Biology I.

One Level II subject, 3472 Zoology II is offered and at Level III there are several subjects which are closely related to the research interests of staff and may lead on to Honours or postgraduate study in Zoology. At least nine and advisably twelve points of these Level III subjects should be taken for a major in Zoology and entry to Honours. A combination of selected Level III Zoology and Botany subjects may also be taken to make up a major in Environmental Biology. For entry to Zoology Honours a credit in subjects at Level III that can be presented for a major is normally required. Environmental Biology Honours requires credit standard in subjects that can be presented for the major in Environmental Biology.

The Zoology Department believes that knowledge of chemistry and statistics is basic to modern zoological research and recommends that students intending to proceed to third year should take 6878 Chemistry I and 5543 Statistical Practice I.

### Level I

---

#### 3174 Biology I

*level:* I    *points value:* 6    *duration:* full year

*restriction:* 7138 Molecular and Cell Biology I, 8280 Biology of Organisms I

*contact hours:* 3 lectures, 1 tutorial per week, and the equivalent of 3 hours of practical work per fortnight

*content:* The subject introduces the major fields of biology and provides an introduction to further studies in all areas of biological science. It does not assume previous biological knowledge. Topics include: cell structure and function; biochemical concepts —

respiration, photosynthesis, enzymes, energy flow; membranes, DNA, RNA, protein synthesis; introductory genetics; plant biology, including germination, growth, transport systems; plant diversity and evolution; the structure and physiology of vertebrates; major invertebrate phyla; evolution including natural selection, the origin of species, human evolution and ecology.

*assessment:* end of semester exam, laboratory practical work, an essay and tutorial participation.

#### 8280 Biology of Organisms I

*level:* I    *points value:* 3    *duration:* semester 2

*corequisite:* 7138 Molecular and Cell Biology I

*restriction:* 3174 Biology I

*contact hours:* 3 lectures, 1 tutorial per week and the equivalent of 3 hours practical work per fortnight

*content:* The subject extends the material covered in 7138 Molecular and Cell Biology I to topics in whole organism biology, the biology of plants and animals and to evolution and ecology. The central theme is an understanding of how evolution works and how this forms the basis for appreciating plant and animal diversity. Plant biology also covers how plants obtain and transport water, energy and nutrients, how they reproduce and includes a focus on the evolution of the Australian flora. Animal biology looks at the physiological functions of respiration, circulation, nutrition, excretion and reproduction in both vertebrate and invertebrate animals. There is a brief introduction to human evolution and ecology.

*assessment:* an end of semester examination, and an essay, laboratory practical work and tutorial participation.

#### 8954 Environmental Biology I

*level:* I    *points value:* 3    *duration:* semester 1

*restriction:* 3821 Plants and the Environment I, 6191 Botany

*contact hours:* 3 lectures per week, 3 hours practical/tutorial per fortnight, 3 field trips

*content:* This subject is an introduction to basic ecological theory in population ecology, community ecology and ecosystem processes and provides a basis for further studies in ecology and environmental biology. It covers population growth and regulation, interactions such as competition, predation and commensalism, the flow of energy and cycles of materials in ecosystems. Terrestrial and aquatic biomes will be studied with special reference to major Australian habitats. Finally global issues and the impact of humans on ecosystems will be considered.

*assessment:* final exam (70%), practical reports (30%)

---

**Level II**

---

**3472 Zoology II**

*level:* II *points value:* 8 *duration:* full year

*prerequisites:* Either 3174 Biology I (Pass Division I) and 8954 Environmental Biology I (Pass Division I); or 7138 Molecular and Cell Biology I (Pass Division I) and 8280 Biology of Organisms I (Pass Division I) and 8954 Environmental Biology I (Pass Division I) or acceptable equivalents. Alternatively, 8594 Environmental Biology I can be taken concurrently with 3472 Zoology II. (For 1996, students may apply to the Head of the department for waiving of the Environmental Biology I requirement.)

*contact hours:* 3 lectures and 4 hours of practical work a week; occasional tutorials

*content:* The first semester is concerned with the diversity, phylogeny and biology of the invertebrates, including entomology and the biology of parasites, and with the phylogeny and biology of the vertebrates. The second semester is concerned with topics in physiology, namely energetics of organisms, intermediary metabolism, gas exchange, nerves, muscles and sense organs; with the ecology of animal populations including sampling statistics, population growth models, competition and predation; and with evolutionary mechanisms, speciation, and major trends in animal evolution, systematics and biogeography.

*assessment:* 2 theory and one practical examination; essay; project on biology of insects; laboratory practical work

---

**Level III**

---

**5224 Comparative and Environmental Physiology**

*level:* III *points value:* 3 *duration:* semester 1

*prerequisites:* 3472 Zoology II (Pass Div I) or an acceptable equivalent. Knowledge of SACE Stage 2 Chemistry and/or Physics is assumed.

*contact hours:* 2 lectures, 1 seminar and 4 hours of practical work a week

*content:* This subject covers the intersection between three biological fields — physiology, ecology and behaviour, and examines some of the ways animals are adapted to the environments in which they live. In many cases, these are adaptations to severe environments such as deserts, polar regions, high altitude and deep sea, where nature poses apparently insurmountable problems to survival. The primary approach is to examine the biophysical exchanges between the animal and its environment. Another

approach is to look at the physiology of animals with different life styles, and examine their evolutionary strategies for locomotion, thermoregulation, osmoregulation, circulation and respiration.

*assessment:* continuous assessment quizzes, examinations, seminar and practical work

**5464 Evolution, Systematics and Biogeography**

*level:* III *points value:* 3 *duration:* semester 2

*prerequisites:* 3472 Zoology II (Pass Div I) or an acceptable equivalent

*contact hours:* 2 lectures and 5 hours of practical work a week

*content:* This subject explores a wide range of topics concerned with the evolution, systematics and biogeography of vertebrate and invertebrate animals. The characteristics of taxa examined include biological, ecological, genetic and morphological features. Topics discussed may include the following: the history, importance and practice of taxonomy; diverse approaches to classification and phylogeny; reproduction, development and growth; the evolution and distribution of southern hemisphere biotas; effects of ecological and geological factors on distribution; islands and the role of systematics and biogeography in conservation; extinction; conservation and climatic change.

*assessment:* examination and practical assignments

**8896 Freshwater Ecology**

*level:* III *points value:* 3 *duration:* semester 2

*prerequisites:* 3472 Zoology II (Pass Div I) or an acceptable equivalent

*contact hours:* 2 lectures and 5 hours of practical work a week, plus 3 days field work

*content:* An introduction to the ecological characteristics of inland waters (lakes and streams), with emphasis on Australian environments. Topics discussed include the physical and chemical features of lakes, the plant and animal communities of lakes and rivers, physiological adaptations of aquatic animals and the impact of man on inland waters. Environments given particular attention include the River Murray, streams, lakes and reservoirs, salt lakes and ponds.

*assessment:* final examination; practical assessment

### **6896 Marine Ecology—Practical**

*level:* III *points value:* 1 *duration:* summer semester

*prerequisites:* 3472 Zoology II (Pass Div I) or an acceptable equivalent

*assumed knowledge:* 5543 Statistical Practice I or equivalent

*restrictions:* 9035 Marine Ecology

*contact hours:* A field camp of 8 days duration (including travel time), mid-February.

*content:* This subject is equivalent to the practical component of the former subject 9035 Marine Ecology. The course will take place over about 8 days (including travel) at the Department's Coobowie Marine Research Station on Yorke Peninsula. The main activity will be a field research project designed and conducted by students under the supervision of staff. Student groups will present their findings to the class at the end of the course and write them up as a formal report. There will also be excursions to a variety of marine habitats, and demonstrations or experience of some field techniques in marine ecology. Staff and students from Flinders University will be participating. It is expected that staff from at least two other universities will attend, work with students and give seminars on their research work.

*assessment:* written report on project plus note books on other components. Participation in group work and discussions will be taken into account.

### **3301 Marine Ecology—Theory**

*level:* III *points value:* 2 *duration:* semester 1

*pre-requisites:* 3472 Zoology II (Pass Div I) or an acceptable equivalent

*assumed knowledge:* 5543 Statistical Practice I or equivalent

*restriction:* 9035 Marine Ecology

*contact hours:* 2 lectures plus 1 tutorial per week

*content:* This subject is equivalent to the theory component of the former subject 9035 Marine Ecology. The course will consider the ecology of populations and communities, with emphasis on quantitative and experimental approaches. Specific topics will include the ecology of modular animals, larval ecology, the significance of life-histories, relationships between animals and their resources, marine fouling, environmental assessment and management, marine zooplankton, production and transfers between trophic levels, fish biology, fisheries management and aquaculture.

*assessment:* tutorial exercises; exam. Active participation in tutorials will be expected.

### **1427 Research Methods in Zoology**

*level:* III *points value:* 3 *duration:* semester 1

*prerequisites:* 3472 Zoology II (Pass Div I) and 5543 Statistical Practice I or an acceptable equivalent

*contact hours:* 2 lectures, 1 tutorial and 4 hours of practical work per week

*content:* An introduction to systematic methods of collection, analysis and reporting of field and laboratory data, and basic experimental design. Lectures will outline the nature of research and the value of experimental methods. A knowledge of basic statistics is assumed. Experimental design will be emphasised, and the elements of statistical tests, particularly analysis of variance, will be considered in a biological context. Practical work will complement methods introduced in lectures and will also incorporate an introduction to applications of microcomputers in zoology.

*assessment:* exam; practical assignments; participation in tutorials

## **Honours Level**

---

### **5417 Honours Zoology**

#### **5089 Honours Zoology (mid-year)**

*level:* Honours *points value:* 24 *duration:* full year

Students enrolled in at least three Level III Zoology subjects who wish to take an Honours degree in Zoology should consult the Head of the Department some time during Semester II.

*prerequisites:* As a rule, for entry into Honours Zoology, students must have attained a credit or better in appropriate Level III Zoology subjects to the value of 9 points.

*requirements:* Candidates are expected to study more deeply one branch of Zoology, to carry out research in this area, and to present the results in a written thesis. They must also complete other assignments, including seminars and essays, as prescribed.

Students normally are expected to begin work in February, and to work full-time at their courses throughout the year. Under special circumstances, by permission of the Head of Department the period of study can commence in Semester II to allow the research project to be pursued over the summer season.

**7530 Honours Environmental Biology****4946 Honours Environmental Biology (mid-year)**

*level:* Honours *points value:* 24 *duration:* full year

*prerequisites:* Normally, an average Credit standard in Level III subjects to a value of 9 points that can be presented for the major in Environmental Biology.

Environmental Biology Honours is organised jointly by the Departments of Botany and Zoology. Candidates will normally spend some of their time working in each Department. Candidates are expected to study Environmental Biology more deeply and to carry out a research exercise and present the results in a written thesis. They will also write a review on an applied environmental subject and be set a reading list and other assignments. The thesis, review and other assignments will be on topics relevant to environmental science and there will be emphasis on the kinds of communication, written and oral, expected of an environmental scientist.

Interested students should consult the Head of either Department during the final year of the Ordinary degree course. The Honours course normally commences at the beginning of February, but under certain circumstances commencement at the beginning of second semester is possible.

**Combined Honours courses****9401 Honours Applied Mathematics and Zoology**

*syllabus details:* see the Calendar entry under the Faculty of Mathematical and Computer Sciences

**The Honours degree of Bachelor of Science in association with the Cooperative Education for Enterprise Development Program (CEED)**

In certain disciplines the course for the Honours degree of Bachelor of Science may be undertaken in conjunction with the CEED program whereby students undertake their projects in association with an external organisation which employs persons trained in the discipline concerned. Students spend eight weeks in the long vacation period working with the employer organisation and receive some financial recompense.

Interested students must apply to the Head of the relevant Department in Semester 1 of the year preceding that in which they plan to take the Honours course.

If accepted they will then take the subject 4384 Industry Practicum (Science) as a preparation during semester 2 of that year.

**4384 Industry Practicum (Science)**

*level:* III *points value:* 0 *duration:* semester 2

*contact hours:* 13 hours lecture/tutorial

*content:* This subject provides students with the skills and preparation to undertake an industry related research project. Topics in research, design and documentation, project planning, time management, costing and budgeting, quality assurance. An industry-linked project will be commenced.

## Graduate Certificate in Marine and Freshwater Ecology and Management

## Graduate Certificate in Terrestrial Ecology and Management

The above awards have been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar.

As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

### Specific Course Rules

---

#### 1 General

##### 1.1 There shall be Graduate Certificates in:

Marine and Freshwater Ecology and  
Management

Terrestrial Ecology and Management

A candidate may hold more than one Graduate Certificate.

#### 2 Admission requirements

##### 2.1 An applicant for admission to the course of study for the Graduate Certificate shall:

- (a) have qualified for a degree in science of the University or hold qualifications from another institution accepted by the University for the purpose, and
- (b) have obtained approval of the Departments of Botany and Zoology.

##### 2.2 Subject to the approval of Council the Faculty may, in special cases and subject to such conditions as it may see fit to impose in each case, accept as a candidate for the Graduate Certificate a person who does not satisfy the requirements of 2.1 above but who has given evidence satisfactory to the Faculty of fitness to undertake work for the Graduate Certificate.

#### 3 Duration of course

##### 3.1 Except with the special permission of the Faculty the course for the Graduate Certificate shall be completed in one semester of full-time study or not more than two years of part-time study.

#### 4 Assessment and examinations

##### 4.1 There shall be four classifications of pass in each subject for the Graduate Certificate: Pass with High Distinction, Pass with Distinction, Pass with Credit, and Pass.

- ##### 4.2
- (a) A candidate who fails in a subject and desires to take the subject again shall again attend lectures and satisfactorily do such written and practical work as the teaching staff concerned may prescribe, unless specifically exempted therefrom after written application for such exemption.
  - (b) A candidate who has twice failed the examination in any subject or division of a subject may not enrol for that subject again except by special permission to be obtained in writing and then only under such conditions as may be prescribed.
  - (c) For the purpose of this Rule, a candidate who is refused permission to sit for examination, or who fails, without a reason accepted by the Dean of Science (or nominee), to attend all or part of a final examination (or supplementary examination if granted) after remaining enrolled for at least nine teaching weeks of that semester, shall be deemed to have failed the examination.

**5 Courses of study**

- 5.1** The following shall be the subjects for the Graduate Certificate in Marine and Freshwater Ecology and Management (12 points):
- |  |     |
|--|-----|
| 5823 Ecological Data Analysis, Modelling and Collation | 3   |
| 5408 Ecology and Management of Marine Environments     | 4.5 |
| 9448 Ecology and Management of Inland Waters           | 4.5 |
- 5.2** The following shall be the subjects for the Graduate Certificate in Terrestrial Ecology and Management (12 points):
- |   |   |
|---|---|
| 5517 Biological Statistics                              | 2 |
| 8101 Ecological Processes in Dry Terrestrial Ecosystems | 6 |
| 6317 Approaches to Management                           | 4 |
- 5.3** The Faculty may, in appropriate circumstances, allow a candidate to substitute one or more alternative subjects in lieu of the subjects listed in 5.1 and 5.2 above on the recommendation of the Heads of the Departments of Botany and Zoology.
- 5.4** The subjects presented for the Graduate Certificate shall not include any subject which is, in the opinion of the Faculty, substantially equivalent to another subject presented for the Graduate Certificate or already counted towards another qualification gained by the candidate.
- 5.5** To complete a course of study, a candidate, unless exempted by the Faculty, shall:
- (a) regularly attend the prescribed lectures, tutorials, workshops and seminars; and
  - (b) undertake such computing work, practical work, field work and case studies, do such reading, written and oral work and pass such examinations, as the Faculty may prescribe.

**Syllabuses**

*syllabus details:* see Master of Science in Ecological Management

## Graduate Certificate in Petroleum Geology and Geophysics

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar.

As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

### Specific Course Rules

#### 1 Admission requirements

1.1 An applicant for admission to the course of study for the Graduate Certificate shall:

- (a) have qualified for the Ordinary degree of Bachelor of Science of the University with a major sequence in Geology or Geophysics, or hold qualifications from another institution accepted by the Faculty for the purpose; and
- (b) have obtained the approval of the Director of the National Centre for Petroleum Geology and Geophysics.

1.2 Subject to the approval of the Council the Faculty may, in special cases and subject to such conditions (if any) as it may see fit to impose in each case, accept as a candidate for the Graduate Certificate a person who does not qualify for admission to the course under 1.1 above but has given evidence satisfactory to the Faculty of fitness to undertake work for the Graduate Certificate.

#### 2 Duration of course

2.1 Except with the special permission of the Faculty the course for the Graduate Certificate shall be completed in at least one semester of full-time study or at least two semesters of part-time study.

#### 3 Assessment and examinations

3.1 There shall be four classifications of Pass in each subject for the Graduate Certificate: Pass with High Distinction, Pass with Distinction, Pass with Credit, and Pass.

3.2 (a) A candidate who fails in a subject and desires to take the subject again shall again attend lectures and satisfactorily do such written and practical work as the teaching staff concerned may prescribe, unless specifically exempted therefrom after written application for such exemption.

(b) A candidate who has twice failed the examination in any subject or division of a subject may not enrol for that subject again except by special permission to be obtained in writing and then only under such conditions as may be prescribed.

(c) For the purpose of this Rule, a candidate who is refused permission to sit for examination, or who fails, without a reason accepted by the Dean of Science (or nominee), to attend all or part of a final examination (or supplementary examination if granted) after remaining enrolled for at least nine teaching weeks of that semester, shall be deemed to have failed the examination.

#### 4 Course of study

4.1 A candidate for the Graduate Certificate shall regularly attend lectures and tutorials, do such written work and practical work as may be prescribed, and pass examinations in subjects to the value of 12 points.

4.2 The following shall be the subjects for the Graduate Certificate in Petroleum Geology and Geophysics:

5189 Petroleum Geology and Geophysics (A) 6

4746 Petroleum Geology and Geophysics (B) 6

4.3 The Faculty of Science may require a candidate to undertake additional work needed as background to the course.

## Syllabuses

This course is intended for graduates in geology or geophysics to undertake specifically petroleum-related courses to enter that side of geology or, in view of the rapid expansion of geological knowledge, to update their skills in petroleum geology and geophysics. Consequently, the minimum requirement is a B.Sc. degree or equivalent with a major in geology or geophysics. Credit and above results are preferred but admission is at the discretion of the Director of the Centre with allowance made for experience in industry in lieu of a high pass.

The course comprises two subjects:

5189 Petroleum Geology and Geophysics (A) 6

and

4746 Petroleum Geology and Geophysics (B) 6

Coursework includes lectures, workshops and field work in the Centre taken in conjunction with 5844 Honours Petroleum Geology and Geophysics and the Masters course conducted from February to July each year.

The subjects include general geological topics such as basin analysis, sedimentology, diagenesis, and structure. Most of these topics are revised during the field trip to the Flinders Ranges. Geophysical topics include seismic interpretation, seismic acquisition and processing, and sequence stratigraphy. Topics specifically related to the petroleum industry include wireline logs, petrophysics and wellsite geology.

There is some scope for specialisation between geology and geophysics although both streams are required to do the majority of the course. Geologists may do petroleum geochemistry, applied palaeontology and isotope studies while the geophysicists concentrate on seismic acquisition, signal analysis and seismic processing. Topics related to the development of personal skills include economics, management and communication skills. Many of the topics covered above are drawn together in case studies and all are made relevant to the petroleum industry.

Assessment of the subjects is spread across a variety of formats. Formal written and oral assessments are conducted at the end of 5 to 6 week periods. Assessment is also conducted via marked practical exercises, assignments and seminars. A major essay on a topic agreed between the student and the Centre staff will account for 20% of the marks.

Intending students must apply, before the end of the year preceding that in which they wish to enrol, to the Director of the Centre, or nominee, for approval of their proposed courses of study.

## Graduate Certificate in Physics

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar.

As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

### Specific Course Rules

#### 1 Admission requirements

- 1.1 An applicant for admission to the course of study for the Graduate Certificate shall have qualified for a degree of The University of Adelaide or hold qualifications from another institution accepted by the University for the purpose; and obtained the approval of the Department of Physics and Mathematical Physics.
- 1.2 Subject to the approval of Council, the Faculty may in special cases and subject to such conditions (if any) as it may see fit to impose in each case, accept as a candidate for the Graduate Certificate a person who does not hold the qualifications specified in 1.1 above but has given evidence satisfactory to the Faculty of fitness to undertake work for the Graduate Certificate.

#### 2 Duration of course

- 2.1 To qualify for the Graduate Certificate a candidate shall satisfactorily complete a course of full-time study extending over at least one semester or part-time study extending over at least two semesters.

#### 3 Assessment and examinations

- 3.1 There shall be four classifications of pass in each subject for the Graduate Certificate: Pass with High Distinction, Pass with Distinction, Pass with Credit, and Pass.
- 3.2 (a) A candidate who fails in a subject and desires to take the subject again shall again attend lectures and satisfactorily do such written and practical work as the teaching staff concerned may prescribe, unless specifically exempted therefrom after written application for such exemption.
- (b) A candidate who has twice failed the examination in any subject or division of a subject may not enrol for that subject

again except by special permission to be obtained in writing and then only under such conditions as may be prescribed.

- (c) For the purpose of this Rule, a candidate who is refused permission to sit for examination, or who fails, without a reason accepted by the Head of the Department of Physics and Mathematical Physics, to attend all or part of a final examination (or supplementary examination if granted) after remaining enrolled for at least nine teaching weeks of that semester, shall be deemed to have failed the examination.

#### 4 Course of study

- 4.1 A candidate for the Graduate Certificate shall regularly attend lectures and tutorials, do such written work and practical work as may be prescribed, and pass examinations in a selection of options to an aggregate value of at least 12 points, including at least five points from options at Honours level.

The options may be chosen from:

- (a) Level III subjects offered by the Department of Physics and Mathematical Physics;
- (b) Level III subjects and Honours options offered by another Department of the University where appropriate; and
- (c) the following subjects:

code	subject title	points
2695	Advanced Astrophysics	2.5
9766	Advanced Atmospheric Physics	2.5
6080	Advanced Electromagnetism	2.5
5019	Atomic and Molecular Physics	2.5
4928	Cosmology	2.5
2255	Experimental Methods	2.5

4578	Gauge Theory	2.5
3927	General Relativity	2.5
4476	Laser Physics and Non-linear Optics	2.5
9036	Nuclear and Radiation Physics	2.5
3907	Nuclear Theory and Particle Physics	2.5
4060	Quantum Mechanics and Particle Physics	2.5
3681	Relativistic Quantum Mechanics and Fields	2.5
5938	Statistical Mechanics and Many Body Theory	2.5

4.2 The Faculty of Science may require a candidate to undertake additional work needed as background to the course.

## 5 General

5.1 No candidate will be permitted to count for the Graduate Certificate any subject that, in the opinion of the Faculty, contains substantially the same material as any other subject which he or she has already presented Syllabuses

## Syllabuses

The Department of Physics and Mathematical Physics offers a course leading to the Graduate Certificate in Physics. The aim of the course is to enable graduates of physics, or graduates of a related discipline, to further their knowledge of physics and obtain skills for career advancement or, in special cases, prepare to entry into the research program offered by the Department.

Graduates wishing to enrol should consult the Department of Physics and Mathematical Physics for advice and details of the options available. They are requested to commence their enquiries approximately two months before the semester in which they wish to commence their studies. The course will have a coherent theme. The initial selection of options will be made at the time of enrolment by the student in consultation with the Department, according to the student's background and interests. The course must be approved formally by the Head of Department or nominee.

*syllabus details:* see Master of Science (Physics)

# Graduate Certificate in Science Education

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar.

As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

## Specific Course Rules

### 1 Admission

1.1 An applicant for admission to the course of study for the Graduate Certificate shall:

- (a) have qualified for a degree in science or mathematics and a Graduate Diploma in Education of the University or hold qualifications from another institution accepted by the University for the purpose.
- (b) have completed such other work as may be prescribed in the Specific Course Rules.

1.2 Subject to the approval of the Council, the Faculty may, in special cases and subject to such conditions as it may see fit to impose in each case, accept as a candidate for the Graduate Certificate a person who does not satisfy the requirements of 1.1 above but who has given evidence satisfactory to the Faculty of fitness to undertake work for the Graduate Certificate.

### 2 Duration of course

2.1 Except with the special permission of the Faculty the course for the Graduate Certificate shall be completed in one semester of full-time study or not more than two years of part-time study.

### 3 Assessment and examinations

- 3.1 (a) A candidate who fails in a subject and desires to take the subject again shall again attend lectures and satisfactorily do such written and practical work as the teaching staff concerned may prescribe, unless specifically exempted therefrom after written application for such exemption.
- (b) A candidate who has twice failed the examination in any subject or division of a subject may not enrol for that subject

again except by special permission to be obtained in writing and then only under such conditions as may be prescribed.

- (c) For the purpose of this Rule, a candidate who is refused permission to sit for examination, or who fails, without a reason accepted by the Dean of Science (or nominee), to attend all or part of a final examination (or supplementary examination if granted) after remaining enrolled for at least nine teaching weeks of that semester, shall be deemed to have failed the examination.

### 4 Subjects of study

4.1 The following shall be the subjects for the Graduate Certificate in Science Education/Physics.

code	subject title	points
------	---------------	--------

#### Group A

##### core subject

6217	Teaching/Learning Physics in the Secondary School	3
------	---	---

##### optional subjects

	Educational Measurement and Evaluation	11.5
	Microprocessors and Computers in Physics Education	1.5
	Elements of Physics Curriculum Design	1.5
	Physics Problem Solving	1.5
	The Role of Practical Work in Physics Education	1.5
	History and Methodology of Science	1.5
	Educational Research and the Physics Teacher	1.5

**Group B**

*core subject*

2398 Concepts of Physics (Science Education) 3

*optional subjects*

Mechanics (Science Education) 1.5  
 Electromagnetism (Science Education) 1.5  
 Electronics (Science Education) 1.5  
 Waves (Science Education) 1.5  
 Atomic and Nuclear Physics (Science Education) 1.5  
 Heat and Thermodynamics (Science Education) 1.5  
 Project (Science Education) 1.5

**Group C**

Other science or science education subjects which may be offered from time to time, by this or other institutions, that are approved for the purpose by the Dean (or nominee).

A maximum of one subject from the following list of subjects offered by the Department of Education may be taken in lieu of a core subject or two optional subjects:

1595 Making Sense of the Scientific World 3  
 8950 Project (Science Education) 3  
 2502 Scientific Revolutions and Education 3  
 8671 The Nature of Science and Science Curricula 3

4.2 The following shall be the subjects for the Graduate Certificate in Science Education/Chemistry.

**Group A**

*core subject*

8132 Teaching/Learning Chemistry in Secondary Schools 3

*optional subjects*

Educational Measurement and Evaluation 1.5  
 Computers in Chemical Education 1.5  
 Elements of Chemical Curriculum Design 1.5  
 Problem Solving in Chemistry 1.5  
 Practical work in the School Chemical Curriculum 1.5  
 The Methodology of Chemical Science 1.5  
 Educational Research and the Chemistry Teacher 1.5

**Group B**

*core subject*

1202 The General Concepts of Chemistry 3

*optional subjects*

Chemistry of the Environment (Science Education) 1.5  
 From Atoms to Molecules (Science Education) 1.5  
 Electrons and Atoms (Science Education) 1.5  
 Topics in Current Chemistry (Science Education) 1.5  
 Chemistry and Life (Science Education) 1.5  
 Chemical and Physical Change (Science Education) 1.5  
 Chemical Industry in Australia (Science Education) 1.5

**Group C**

Other science or science education subjects which may be offered from time to time by this or other institutions, that are approved for the purpose by the Dean (or nominee).

A maximum of one subject from the following list of subjects offered by the Department of Education may be taken in lieu of a core subject or two optional subjects:

1595 Making Sense of the Scientific World 3  
 8950 Project (Science Education) 3  
 2502 Scientific Revolutions and Education 3  
 8671 The Nature of Science and Science Curricula 3

4.3 The following shall be the subjects for the Graduate Certificate in Science Education/Biology:

Bioethics and Experimental Design 1  
 Developmental Biology and Gene Regulation 1  
 Environmental Biology A: Ecology of Aquatic Systems 1  
 Environmental Biology B: Animal/Plant Relations 1  
 Fertilisation and Reproduction 1  
 Genetic Engineering and Recombinant DNA Techniques 1  
 Genetics and Molecular Biology 1  
 Immunology 1  
 Molecular Evolution 1

Plant Breeding and Disease Resistance	1
The Biology of Cancer	1
The Biology of Bacteria and Viruses	1

## 5 Course of study

- 5.1 To qualify for the Graduate Certificate in Science Education/Physics or Chemistry a candidate shall satisfactorily complete subjects from either 4.1 or 4.2 above with an aggregate points value of at least 12 satisfying the following requirements:
- (a) Unless otherwise permitted by the Faculty, the subjects presented for the Graduate Certificate must include both core subjects, 2 optional subjects from Group A and 2 from Group B. The Faculty may, in appropriate circumstances, allow a candidate to substitute for a core subject, 2 optional subjects from the same group.
  - (b) The Faculty may, in appropriate circumstances, allow a candidate to substitute one or more Group C subjects for subjects required under (a) above.
- 5.2 To qualify for the Graduate Certificate in Science Education/Biology, a candidate shall satisfactorily complete subjects listed in 4.3 above to the value of at least 12 points.
- 5.3 The subjects presented for the Graduate Certificate shall not include any subject which is, in the opinion of the Faculty, substantially equivalent to another subject presented for the Graduate Certificate or already counted towards another qualification gained by the candidate.
- 5.4 Candidates wishing to enrol in subjects for which they do not have the necessary preliminary knowledge may be required to take such bridging studies prior to the commencement of their Graduate Certificate studies as may be deemed appropriate by the Dean (or nominee).
- 5.5 To complete a course of study, a candidate, unless exempted by the Faculty, shall:
- (a) regularly attend the prescribed lectures, tutorials, workshops and seminars; and
  - (b) undertake such computing work, practical work, field work and case studies, do such reading, written and oral work and pass such examinations, as the Faculty may prescribe.
- 5.6 The syllabus for each subject for the Graduate Certificate shall specify whether passes shall be non-graded or whether there shall be four classifications of pass: Pass with High Distinction, Pass with Distinction, Pass with Credit, and Pass.
- 5.7 Each candidate's course of study must be approved by the Dean (or nominee) at enrolment each year.

## Syllabuses

### Physics

The Department of Physics and Mathematical Physics offers a Graduate Certificate in Science Education which is intended for teachers of physics in secondary schools. The subjects are in two groups. Group A subjects are largely methodological and Group B subjects deal with physics as a discipline. The syllabuses for the core subjects are as follows:

#### 6217 Teaching/Learning Physics in the Secondary School

*points value:* 3      *availability:* not offered in 1996

*content:* This subject introduces teachers to significant knowledge and skills which will assist them to facilitate meaningful learning of physics by their students. Emphasis is placed on teaching and learning strategies and assessment procedures which encourage students to be active participants in the learning process and to accept increasing responsibility for their own learning.

Topics considered include preconceptions that students bring to physics classes and how to identify and modify them, learning through guided experiences, questioning and explanations, group work, the role of language, problem solving, demonstrations and student practical work, gender inclusive teaching strategies, curriculum materials, and assessment.

A teaching/learning sequence developed from the SCIS learning cycle is discussed as a means of integrating a wide range of strategies as an example of a theory of instruction based upon an understanding of how children learn.

#### 2398 Concepts of Physics (Science Education)

*points value:* 3      *duration:* semester 2

*content:* This subject provides an overview of the main areas of physics and the concepts they embody, prior to a study of selected areas in more depth in the optional subjects. Areas examined are mechanics, fluids, heat, waves and sound, electromagnetism, optics, quantum physics and relativity. The emphasis is on a largely qualitative understanding of the phenomena, so as to directly facilitate subsequent verbal classroom explanations, and also to provide a solid basis upon which to build the more quantitative treatment in the optional subjects to follow. Much of the subject is spent on individual readings from the text and subsequent participation in tutorial discussions on the set exercises.

### Chemistry

The Department of Chemistry offers a Graduate Certificate in Science Education in Chemistry which is intended for secondary school teachers of chemistry. The subjects are in two groups. The Group A subjects are largely methodological and the Group B subjects deal with chemistry as a discipline.

#### 8132 Teaching/Learning Chemistry in Secondary Schools

*points value:* 3      *duration:* semester 1

*availability:* not offered in 1996

*content:* The subject is designed to provide the understanding and skills needed to present chemistry to students as a significant and important science.

#### 1202 The General Concepts of Chemistry

*points value:* 3      *duration:* semester 2

*content:* A review of the development of chemical and physical ideas and their similarities and differences. What is chemistry? The subject will emphasise the integrated use of concepts and ideas from different aspects of chemical science in providing a qualitative (and where appropriate, a quantitative) interpretation and explanation for chemical phenomena and processes. The subject will be taught largely through tutorial discussions and guided presentations by the students.

### Biology

The Biological Science Departments offer a Graduate Certificate in Science Education/Biology which is intended for the professional development of teachers of Biology in secondary schools.

The course consists of a number of relatively self-contained educational packages termed topic modules. Each topic module aims to highlight a fundamental scientific question in biology, and the various experimental approaches that have been and are currently being used to investigate the problem. In addition, topic modules will contain, as an integral component, material aimed at assisting teachers with the knowledge and skills needed to present biology as a science of fundamental relevance to everyday life. Topic modules will be related to the Year 11 and Year 12 (Stages I and II) SSABSA Biology Syllabuses, and will be presented by lectures, tutorials and practical classes. Topic modules will vary somewhat from year to year, depending on the availability of staff and the needs of Biology teachers.

**contact hours:** Each topic module will require approximately 10 hours contact time comprising three 1-hour lectures, three 1-hour tutorials and 4 hours of practicals.

In addition there will be a two-day field trip as part of the course.

**content:** The content of each topic module is described by its title.

**assessment:** written assignments

# Graduate Diploma in Aquatic and Terrestrial Ecology and Management

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar.

As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

## Specific Course Rules

### 1 Admission requirements

- 1.1 An applicant for admission to the course of study for the Graduate Diploma shall:
- have qualified for a degree of the University or for a degree of another institution accepted for the purpose by the University; and
  - have obtained the approval of the Departments of Botany and Zoology.
- 1.2 Subject to the approval of Council the Faculty may, in special cases and subject to such conditions as it may see fit to impose in each case, accept as a candidate for the Graduate Diploma a person who does not satisfy the requirements of 1.1 above but who has given evidence satisfactory to the Faculty of fitness to undertake work for the Graduate Diploma.

### 2 Duration of course

- 2.1 To qualify for the Graduate Diploma a candidate shall satisfactorily complete a course of full-time study extending over at least one year or part-time study extending over at least two years and comply with the conditions as prescribed in the Specific Course Rules.

### 3 Assessment and examinations

- 3.1 There shall be four classifications of pass in each subject for the Graduate Diploma: Pass with High Distinction, Pass with Distinction, Pass with Credit, and Pass.
- 3.2 (a) A candidate who fails in a subject and desires to take the subject again shall again attend lectures and satisfactorily do such written and practical work as the teaching staff concerned may prescribe, unless specifically exempted therefrom after written application for such exemption.

- (b) A candidate who has twice failed the examination in any subject or division of a subject may not enrol for that subject again except by special permission to be obtained in writing and then only under such conditions as may be prescribed.
- (c) For the purpose of this Rule, a candidate who is refused permission to sit for examination, or who fails, without a reason accepted by the Dean of Science (or nominee), to attend all or part of a final examination (or supplementary examination if granted) after remaining enrolled for at least nine teaching weeks of that semester, shall be deemed to have failed the examination.

### 4 Course of study

- 4.1 The following shall be the subjects for the Graduate Diploma in Aquatic and Terrestrial Ecology and Management (24 points):
- |   |     |
|---|-----|
| 5823 Ecological Data Analysis, Modelling and Collation  | 3   |
| 5408 Ecology and Management of Marine Environments      | 4.5 |
| 9448 Ecology and Management of Inland Waters            | 4.5 |
| 5517 Biological Statistics                              | 2   |
| 8101 Ecological Processes in Dry Terrestrial Ecosystems | 6   |
| 6317 Approaches to Management                           | 4   |
- 4.2 The Faculty may, in appropriate circumstances, allow a candidate to substitute one or more subjects with an approved alternative on the recommendation of the Heads of the Departments of Botany and Zoology.
- 4.3 The subjects presented for the Graduate Diploma shall not include any subject which is, in the opinion of the Faculty, substantially

equivalent to another subject presented for the Graduate Diploma or already counted towards another qualification gained by the candidate.

**4.4** To complete a course of study, a candidate, unless exempted by the Faculty, shall:

- (a) regularly attend the prescribed lectures, tutorials, workshops and seminars; and
- (b) undertake such computing work, practical work, field work and case studies, do such reading, written and oral work and pass such examinations, as the Faculty may prescribe.

## **5 General**

**5.1** A person who holds the Graduate Certificate in Marine and Freshwater Ecology and Management or the Graduate Certificate in Terrestrial Ecology and Management shall surrender it before being admitted to the Graduate Diploma in Aquatic and Terrestrial Ecology and Management.

## **Syllabuses**

*syllabus details:* see Master of Science in Ecological Management

# Graduate Diploma in Exercise Physiology and Graduate Diploma in Neuromuscular Physiology

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar.

As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

## Specific Course Rules

### 1 Admission requirements

- 1.1 The Faculty of Science may accept as a candidate for the Graduate Diploma a person who has qualified for a degree of The University of Adelaide with a major sequence of study in Physiology, or a qualification of another institution accepted by the University for the purpose.
- 1.2 Subject to the approval of Council, the Faculty may in special cases and subject to such conditions (if any) as it may see fit to impose in each case, accept as a candidate for the Graduate Diploma a person who does not satisfy the requirements of 1.1 above but who has given evidence satisfactory to the Faculty of fitness to undertake work for the Graduate Diploma.
- 1.3 A person whose qualifications have been accepted under 1.1 or 1.2 above and whose native language is not English may be admitted to the course subject to satisfactory performance in an English language test.
- 1.4 A person who has completed part of the requirements for the Master of Science (Exercise Physiology) or the Master of Science (Neuromuscular Physiology) at the University may be admitted to candidature for the relevant Graduate Diploma, with such credit as the Faculty may determine. Such applicants will discontinue their candidature for the Master of Science.

### 2 Duration of course

- 2.1 To qualify for the Graduate Diploma a candidate shall satisfactorily complete a course of full-time study extending over at least two semesters or the equivalent in part-time study.

### 3 Assessment and examinations

- 3.1 There shall be four classifications of pass in each subject for the Graduate Certificate: Pass with High Distinction, Pass with Distinction, Pass with Credit, and Pass.
- 3.2 (a) A candidate who fails in a subject and desires to take the subject again shall again attend lectures and satisfactorily do such written and practical work as the teaching staff concerned may prescribe, unless specifically exempted therefrom after written application for such exemption.
- (b) A candidate who has twice failed the examination in any subject or division of a subject may not enrol for that subject again except by special permission to be obtained in writing and then only under such conditions as may be prescribed.
- (c) For the purpose of this Rule, a candidate who is refused permission to sit for examination, or who fails, without a reason accepted by the Dean of Science (or nominee), to attend all or part of a final examination (or supplementary examination if granted) after remaining enrolled for at least nine teaching weeks of that semester, shall be deemed to have failed the examination.

### 4 Course of study

- 4.1 Unless exempted therefrom by the Faculty, every candidate for the Graduate Diploma in Exercise Physiology shall satisfactorily complete the following subjects to the value of 24 points:

codé	subject title	points
1148	Advanced Studies in Exercise Physiology Part I	6
7954	Advanced Studies in Exercise Physiology Part II	6
8208	Research Methodology in Physiology	6
7276	Research Project Practical in Exercise Physiology	6

4.2 Unless exempted therefrom by the Faculty, every candidate for the Graduate Diploma in Neuromuscular Physiology shall satisfactorily complete the following subjects to the value of 24 points:

7055	Advanced Studies in Neuromuscular Physiology Part I	6
7607	Advanced Studies in Neuromuscular Physiology Part II	6
8208	Research Methodology in Physiology	6
2957	Research Practical in Neuromuscular Physiology	6

## Syllabuses

For syllabus details of subjects other than the three research subjects listed below, refer to the degrees of Master of Science (Exercise Physiology) and Master of Science (Neuromuscular Physiology).

### 8208 Research Methodology in Physiology

*points value:* 6                      *duration:* semester 2

*contact hours:* 2 hours per week for 13 weeks

*content:* A series of seminars, colloquia and journal clubs directed at exploring all aspects of the scientific method of research. Some of the topics considered include preparation of a literature review, research project development, experimental design, techniques in statistical analysis, data acquisition and processing methodologies, oral and written research communication techniques, preparation of scientific manuscripts, etc.

*assessment:* Students will be assigned to a topic for their semester research project practical in semester 2 and will use this as their model in research methodology in physiology. Assessment will include: (i) an oral communication on the background and proposed experimentation in their chosen project (midway through semester 1); (ii) a 5,000 word background literature review and research proposal (end of semester 1); (iii) a scientific manuscript critique.

### 7276 Research Project Practical in Exercise Physiology

*points value:* 6                      *duration:* semester 2

*prerequisites:* 1148 Advanced Studies in Exercise Physiology Part 1; 8208 Research Methodology in Physiology

*contact hours:* 4 hours per week for 13 weeks

*content:* The Department of Physiology has an innovative research program in exercise physiology with full infrastructure support. Given that the experiments will be on human subjects, candidates will work as part of a research team but will be assessed independently. The candidates in a research group will choose their own area of research during semester 1 and the execution of the project will provide excellent training in problem-solving strategies. This experience will provide an excellent basis for whichever career field they intend to enter after graduation.

*assessment:* Several assessment procedures will be applied at all stages of the research project including: (i) completion of detailed research-style application and ethics clearance forms; (ii) presentation of results

as both a poster and oral communication; (iii) presentation of the final report as a scientific manuscript (it is hoped that some of these may be submitted for publication). Precise written assessment criteria will be provided to candidates.

### 2957 Research Practical in Neuromuscular Physiology

*points value:* 6                      *availability:* not offered in 1996

*prerequisites:* 7055 Advanced Studies in Neuromuscular Physiology Part 1; 8208 Research Methodology in Physiology

*contact hours:* Full time attendance will be required.

*content:* The Department of Physiology has an innovative research program in neuromuscular physiology with full infrastructure support. Given that the experiments will be on human subjects, candidates will work as part of a research team but will be assessed independently. The candidates in a research group will choose their own area of research during semester 1 and the execution of the project will provide excellent training in problem-solving strategies. This experience will provide an excellent basis for whichever career field they intend to enter after graduation.

*assessment:* Several assessment procedures will be applied at all stages of the research project including: (i) completion of detailed research-style application and ethics clearance forms; (ii) presentation of results as both a poster and oral communication; (iii) presentation of the final report as a scientific manuscript (it is hoped that some of these may be submitted for publication). Precise written assessment criteria will be provided to candidates.

## Graduate Diploma in Physics

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar.

As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

### Specific Course Rules

#### 1 Admission requirements

1.1 An applicant for admission to the course of study for the Graduate Diploma shall:

- (a) have qualified for a degree of the University or for a degree of another institution accepted for the purpose by the University.
- (b) have obtained the approval of the Department of Physics and Mathematical Physics.

1.2 Subject to the approval of the Council the Faculty may, in special cases and subject to such conditions (if any) as it may see fit to impose in each case, accept as a candidate for the Graduate Diploma a person who does not qualify for admission to the course under 1.1 above but has given evidence satisfactory to the Faculty of fitness to undertake work for the Graduate Diploma.

#### 2 Duration of course

2.1 To qualify for the Graduate Diploma a candidate shall satisfactorily complete a course of full-time study extending over at least one year or part-time study extending over at least two years.

#### 3 Assessment and examinations

3.1 There shall be four classifications of pass in each subject for the Graduate Diploma: Pass with High Distinction, Pass with Distinction, Pass with Credit, and Pass.

3.2 (a) A candidate who fails to pass in a subject and desires to take the subject again shall again attend lectures and satisfactorily do such written and practical work as the teaching staff concerned may prescribe, unless specifically exempted therefrom after written application to the Registrar for such exemption.

(b) A candidate who has twice failed the examination in any subject or division of a subject may not enrol for that subject again except by special permission to be obtained in writing from the Registrar and then only under such conditions as may be prescribed.

(c) For the purpose of this Rule a candidate who is refused permission to sit for examination, or who, without a reason accepted by the Head of the Department of Physics and Mathematical Physics as adequate, fails to attend all or part of a final examination (or supplementary examination if granted) after remaining enrolled for at least nine teaching weeks of that semester, shall be deemed to have failed the examination.

#### 4 Course of study

4.1 A candidate for the Graduate Diploma shall regularly attend lectures and tutorials, do such written work and practical work as may be prescribed, and pass examinations in a selection of Level III subjects and Honours options\* offered by the Department of Physics and Mathematical Physics, or another Department of the University where appropriate, to an aggregate value of at least 16 points.

4.2 In addition to the coursework each student will be expected to be associated with one of the research groups of the Department and to complete a project chosen in consultation with and supervised by a member of the group. The project has a value of 8 points:

6089 Diploma Project (Physics)

4.3 The Faculty of Science may require a candidate to undertake additional work needed as background to the course.

notes (not forming part of the Specific Course Rules)

The Honours options may be chosen from the following subjects:

2695	Advanced Astrophysics	2.5
9766	Advanced Atmospheric Physics	2.5
6080	Advanced Electromagnetism	2.5
5019	Atomic and Molecular Physics	2.5
4928	Cosmology	2.5
2255	Experimental Methods	2.5
4578	Gauge Theory	2.5
3927	General Relativity	2.5
4476	Laser Physics and Non-linear Optics	2.5
9036	Nuclear and Radiation Physics	2.5
3907	Nuclear Theory and Particle Physics	2.5
4060	Quantum Mechanics and Particle Physics	2.5
3681	Relativistic Quantum Mechanics and Fields	2.5
5938	Statistical Mechanics and Many Body Theory	2.5

and any other subjects that may be approved by the Dean (or nominee).

The number to be offered in any year will be dependent on staff availability and student demand.

## Syllabuses

The Department of Physics and Mathematical Physics offers a Graduate Diploma in Physics, the aim of which is to assist graduates of physics, or graduates in related disciplines, to further their knowledge of physics and to gain familiarity with experimental and computational techniques in areas of current research.

Coursework options will normally be selected from Level III subjects and Honours subjects offered by the Department, but may also be taken from courses given in other departments, where appropriate. No subject or option counted toward another course may be counted towards the diploma. The course will have a coherent theme. The initial selection of options is made at enrolment time by the student in consultation with the Department, according to the student's background, interests, and choice of diploma project.

The diploma project will normally be in the field of one of the research groups in the Department and will involve the student in the work of the group. Emphasis will be placed on gaining practical experience with modern research tools, using the Department's experimental and computing facilities.

Graduates wishing to enrol should consult the Department of Physics and Mathematical Physics for advice and details of the options available. They are requested to commence their enquiries approximately two months before the semester in which they wish to begin their studies. At enrolment, options are selected in consultation with the Department, and the course must be approved formally by the Head of Department or nominee.

*syllabus details:* see Master of Science (Physics)

## Master of Science in the Faculty of Science

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar.

As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

### Specific Course Rules

#### 1 Admission requirements

- 1.1 The following persons may become candidates for the degree of Master of Science in the Faculty of Science (a) persons qualified for the degree of Bachelor of Science, (b) Bachelor of Agricultural Science, and (c) others having qualified for a degree, whose academic qualifications are accepted by the Faculty of Science as sufficient:
- 1.2 Provided that, subject to the approval of the Council, the Faculty may, in special cases and subject to such conditions (if any) as it may see fit to impose in each case, accept as a candidate for the degree a person who does not hold a degree of a university, but has given evidence satisfactory to the Faculty of fitness to undertake work for the degree.
- 1.3 Unless an Honours degree of Bachelor of Science or Agricultural Science or a qualification accepted by the Faculty as being equivalent has been obtained, the applicant shall before being admitted as a candidate complete a course of study as prescribed by the Faculty and pass a qualifying examination of an Honours standard. This shall be completed within one year if the study is undertaken on a full-time basis or two years if it is undertaken on a part-time or external basis except where the Faculty grants an extension of time.
- 1.4 A candidate who holds the Honours degree of Bachelor of Science or Bachelor of Agricultural Science or its equivalent in a university recognised by The University of Adelaide may proceed to the degree of Master of Science in the Faculty of Science at the expiration of one year from the date of his or her admission to the Honours degree of Bachelor; no other candidate shall proceed to the degree before the expiration of two years from the date of the beginning of his or her candidature.

#### 2 Qualification requirements

- 2.1 To qualify for the degree a candidate shall submit a thesis upon an approved subject and shall adduce sufficient evidence that the thesis is his or her own work. The thesis shall give the results of original research or of an investigation on which the candidate has been engaged. A candidate may also submit other contributions to science in support of his or her candidature.
- 2.2 A person seeking enrolment as a candidate for the degree shall apply to the Registrar and shall submit as part of his or her application, a statement of his or her academic standing, accompanied, in the case of a person who is not a graduate of The University of Adelaide, by acceptable proof of such standing and an outline of the research work or investigation on which he or she intends to submit a thesis. The Faculty of Science, if it approves the subject of a candidate's research, may appoint a supervisor to guide the candidates in their work.

#### 3 Duration of course

- 3.1 A candidate may proceed to the degree by full-time or part-time study, or as an external student. Except by special permission of the Faculty, the work for the degree shall be completed and the thesis submitted:
  - (a) in the case of a full-time candidate, not less than one year nor more than three years from the date of candidature accepted by the Faculty;
  - (b) in the case of a part-time or external candidate, not less than two years nor more than six years from the date of candidature accepted by the Faculty.

#### 4 Assessment and examinations

- 4.1 The content and method of assessment of any course of advanced study shall be approved by the department or departments concerned and by

the Faculty. Assessment shall in every case be by not less than two examiners of whom at least one shall be external to the University.

- 4.2 (a) The Faculty shall appoint at least two examiners of the thesis of whom at least one shall be external. The examiners may recommend to the Faculty that the thesis:
- (i) be accepted; or
  - (ii) be accepted subject to minor corrections; or
  - (iii) be returned to the candidate for revision and re-submission (within such period of time as the Faculty may allow); or
  - (iv) be rejected
- (b) The examiners of a thesis resubmitted following recommendation (iii) may recommend only (i), (ii) or (iv).

4.3 A candidate for the degree of Doctor of Philosophy or Doctor of Science whose work is considered by the Faculty, after report by the examiners appointed to adjudicate upon it, not to be of sufficient merit to qualify for the degree of Doctor but of sufficient merit for the degree of Master may be admitted to the degree of Master provided that he or she is qualified to become a candidate for the degree.

## 5 Review of academic progress

5.1 If, in the opinion of the Faculty a candidate is not making satisfactory progress, the Faculty may, with the consent of the Council, terminate the candidature and the candidate shall thereupon cease to be enrolled for the degree.

## 6 General

6.1 A candidate who complies with the foregoing conditions and satisfies the Board of Examiners shall on the recommendation of the Faculty of Science be admitted to the degree of Master of Science in the Faculty of Science.

**Master of Science (Applied Physics)**  
**Master of Science (Astrophysics)**  
**Master of Science (Atmospheric Physics)**  
**Master of Science (Optics and Lasers)**  
**Master of Science (Theoretical Physics)**

The above awards have been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar.

As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

## Specific Course Rules

### 1 Admission requirements

1.1 (a) The Faculty may accept as a candidate for the degree any person who has qualified for an Honours degree of Bachelor of Science in Physics of The University of Adelaide or of another institution accepted for the purpose by the University; or

(b) The Faculty may accept as a candidate a person who has qualified for an Ordinary degree of Bachelor of Science of The University of Adelaide, or another institution accepted by the University for the purpose, with a major sequence in Physics and appropriate professional experience; or

(c) Subject to the approval of Council the Faculty may, in special cases and subject to such conditions (if any) as it may see fit to impose in each case, accept as a candidate for the degree a person who does not hold the qualifications specified in 1.1(a) above but who has given evidence satisfactory to the Faculty of fitness to undertake work for the degree.

1.2 A candidate admitted under 1.1(b) or 1.1(c) above may be required to undertake such preliminary work as the Faculty may determine.

### 2 Qualification requirements

2.1 To qualify for the degree a candidate shall:

(a) satisfy examiners in subjects of study as prescribed in the Specific Course Rules; and

(b) present a satisfactory research report on a subject approved by the Head of Department.

2.2 On the completion of the research report the candidate shall lodge with the Head of Department two copies of the research report prepared in accordance with directions given to candidates from time to time. No research report or material presented for any other degree within this or any other institution shall be submitted.

### 3 Duration of course

3.1 Except with the permission of the Faculty, the subjects of study and research report shall normally be completed in three semesters of full-time study or the equivalent of part-time study.

### 4 Review of academic progress

4.1 If in the opinion of the Faculty a candidate for the degree is not making satisfactory progress, the Faculty may, with the consent of the Council, terminate the candidature and the candidate shall cease to be enrolled for the degree.

### 5 Course of study

5.1 Unless exempted therefrom by the Faculty of Science every candidate for the degree shall satisfactorily complete units to the value of at least 36 points from the following components:

(a) Coursework comprising options with an aggregate value of at least 16 points. These options may be chosen from:

(i) Level III subjects offered by the Department of Physics and Mathematical Physics

(ii) Level III subjects and Honours options offered by another Department of the University where appropriate;

(iii) and the following subjects

2695	Advanced Astrophysics	2.5
9766	Advanced Atmospheric Physics	2.5
6080	Advanced Electromagnetism	2.5
5019	Atomic and Molecular Physics	2.5
4928	Cosmology	2.5
3927	General Relativity	2.5
2255	Experimental Methods	2.5
4578	Gauge Theory	2.5
4476	Laser Physics and Non-linear Optics	2.5
9036	Nuclear and Radiation Physics	2.5
3907	Nuclear Theory and Particle Physics	2.5
3681	Relativistic Quantum Mechanics and Fields	2.5
5938	Statistical Mechanics and Many Body Theory	2.5

(b) An advanced topic in Applied Physics, Astrophysics, Atmospheric Physics, Optics and Lasers or Theoretical Physics with a value of 8 points.

(c) An approved research project with a value of 12 points.

**5.2** There shall be four classifications of pass in any subject for the degree: Pass with High Distinction, Pass with Distinction, Pass with Credit, Pass. A pass in a research project shall be classified as satisfactory.

**5.3** The Faculty of Science may grant status in subjects for Honours or postgraduate study undertaken in another course in the University or in another university or tertiary institution.

**5.4** A candidate's enrolment in subjects of study and choice of supervisor or supervisors must be approved by the Head of the Department of Physics and Mathematical Physics, or the course coordinator, at enrolment each year.

**5.5** The Faculty of Science may require a candidate to undertake additional work needed as background to the course, where a student has not completed an Honours degree.

## Syllabuses

---

The Department of Physics and Mathematical Physics offers a course leading to the degree of Master of Science in a special physics topic. The special topics offered are Applied Physics, Atmospheric Physics, Astrophysics, Optics and Lasers, and Theoretical Physics. The aim of the course is to enable graduates of physics, or graduates of a related discipline, to further their knowledge of physics and prepare for entry into the research program offered by the Department or obtain skills for career advancement. Graduates wishing to enrol should consult the Department of Physics and Mathematical Physics for advice and details of the options available. They are requested to commence their enquiries approximately two months before the semester in which they wish to begin their studies. The initial selection of options will be made at the time of enrolment by the student in consultation with the Department, according to the student's background, interests and choice of special topic. The course options and project topic must be formally approved by the Head of Department or nominee.

Syllabuses for the subjects listed in the Specific Course Rules above and in the Specific Course Rules for the Graduate Certificate in Physics and Graduate Diploma in Physics are as follows (Syllabuses for Level III subjects may be found under the B.Sc.):

### 2695 Advanced Astrophysics

*points value:* 2.5      *duration:* semester 1 or 2

*content:* Application of radioactive transfer in astrophysics, and studies of the interstellar medium and magnetic fields. Cosmic ray acceleration and propagation; gamma-ray astrophysics; pulsars.

*assessment:* written examination and marked assignments

### 9766 Advanced Atmospheric Physics

*points value:* 2.5      *duration:* semester 1 or 2

*content:* A review of radiation and fluid dynamics and their role in planetary atmospheres and ionospheres.

*assessment:* written examination and marked assignments

### 6080 Advanced Electromagnetism

*points value:* 2.5      *duration:* semester 1 or 2

*content:* Boundary value problems, with applications to electrostatics and magnetostatics, time varying fields, and radiating systems.

*assessment:* written examination and marked assignments

### 5019 Atomic and Molecular Physics

*points value:* 2.5      *duration:* semester 1 or 2

*content:* A review of atomic structure theory. The dynamics and spectra of small molecules.

*assessment:* written examination and marked assignments

### 4928 Cosmology

*points value:* 2.5      *duration:* semester 1 or 2

*content:* Theoretical and observational foundations of cosmology; relativistic theories, black body radiations, and inflation and galaxy formation.

*assessment:* written examination and marked assignments

### 2255 Experimental Methods

*points value:* 2.5      *duration:* semester 1 or 2

*content:* An introduction to statistical and Fourier techniques, with applications to experimental design and data analysis.

*assessment:* written examination and marked assignments

### 4578 Gauge Theory

*points value:* 2.5      *duration:* semester 1 or 2

*content:* An introduction to quantised non-Abelian gauge theories, including Feynman diagrams, weak models, and quantum chromodynamics.

*assessment:* written examination and marked assignments

### 3927 General Relativity

*points value:* 2.5      *duration:* semester 1 or 2

*content:* Outline of differential geometry with applications to General Relativity, including the Schwarzschild solutions, weak fields and gravitational waves.

*assessment:* written examination and marked assignments

### 4476 Laser Physics and Non-Linear Optics

*points value:* 2.5      *duration:* semester 1 or 2

*assumed knowledge:* 1384 Optics

*content:* A review of laser physics and an introduction to non-linear optical phenomena with applications.

*assessment:* written examination and marked assignments

**9036 Nuclear and Radiation Physics**

*points value:* 2.5      *duration:* semester 1 or 2

*assumed knowledge:* Level III Physics.

*content:* Production, transmission and detection of ionising radiation, with applications. See 7799 Applied Nuclear and Radiation Physics under M.Sc. (Med & Health Physics)

*assessment:* written examination and marked assignments

**3907 Nuclear Theory and Particle Physics**

*points value:* 2.5      *duration:* semester 1 or 2

*content:* A discussion of local gauge theories and particularly quantum chromodynamics, with applications.

*assessment:* written examination and marked assignments

**4060 Quantum Mechanics and Particle Physics**

*points value:* 2.5      *duration:* semester 1 or 2

*content:* Role of symmetry in quantum mechanics with applications to particle physics, including quark models.

*assessment:* written examination and marked assignments

**3681 Relativistic Quantum Mechanics and Fields**

*points value:* 2.5      *duration:* semester 1 or 2

*content:* Relativistic wave equations, including Dirac equations, spinors, and introduction to field quantisation.

*assessment:* written examination and marked assignments

**5938 Statistical Mechanics and Many Body Theory**

*points value:* 2.5      *duration:* semester 1 or 2

*content:* A review of the aims and methods of classical and quantum statistical mechanics, with emphasis on the application of lattice models to phase transitions, and the simulation of quantum field theories.

*assessment:* written examination and marked assignments

**9517 Advanced Topic in Physics**

*points value:* 8      *duration:* semester 1 or 2

*content:* A review of contemporary developments and research in applied physics, astrophysics, atmospheric physics, optical lasers or theoretical physics.

*assessment:* marked assignments and seminar presentations

**8156 Research Project (M.Sc.Physics)**

*points value:* 12      *duration:* semester 1 or 2

*content:* Research project in the same area as the advanced topic selected for subject 9517 Advanced Topic in Physics.

*assessment:* research project

## Master of Science (Ecological Management)

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar.

As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

### Specific Course Rules

#### 1 Admission requirements

1.1 The Faculty may accept as a candidate for the degree any person who has qualified for:

- (a) the Graduate Diploma in Aquatic and Terrestrial Management of The University of Adelaide at credit level or an award from another educational institution accepted by the University for the purpose;
- (b) an Honours degree of Bachelor of Science at IIA level or higher of The University of Adelaide or for an award of another educational institution accepted by the University for the purpose;
- (c) an Ordinary degree of Bachelor of Science of The University of Adelaide or for an award of another educational institution accepted by the University for the purpose together with suitable professional experience of at least two years.

1.2 Subject to the approval of Council the Faculty may in special cases and subject to such conditions (if any) as it may see fit to impose in each case accept as a candidate for the degree an applicant who does not hold the qualifications specified in 1.1 above but who has given evidence satisfactory to the Faculty of fitness to undertake work for the degree.

1.3 A candidate accepted under 1.2 above may be required to complete satisfactorily such preliminary work as the Faculty may determine.

#### 2 Qualification requirements

2.1 To qualify for the degree a candidate shall:

- (a) satisfy examiners in subjects of study as prescribed in the Specific Course Rules; and
- (b) present a satisfactory research report on a subject approved by the Faculty.

#### 3 Duration of course

3.1 Except with the permission of Faculty, the course for the degree shall normally be completed in not less than three semesters and not more than two years of full-time study and in not less than two years and not more than three years of part-time study.

#### 4 Assessment and examinations

4.1 On completion of the research report the candidate shall lodge with the Registrar of Graduate Studies two copies prepared in accordance with the directions given to candidates from time to time.

4.2 The Faculty shall appoint two examiners for the research project.

#### 5 Review of academic progress

5.1 If in the opinion of the Faculty a candidate for the degree is not making satisfactory progress, the Faculty may, with the consent of the Council, terminate the candidature and the candidate shall cease to be enrolled for the degree.

#### 6 Course of study

6.1 The course of study for the degree of Master of Science (Ecological Management) shall be made up of two parts. Unless exempted therefrom by the Faculty, every candidate for the degree shall complete both Part I and Part II.

##### 6.2 Part I

In the first year a candidate shall complete the following subjects:

code	subject title	points
6317	Approaches to Management	4
5517	Biological Statistics	2
5823	Ecological Data Analysis, Modelling and Collation	3

8101 Ecological Processes in Dry Terrestrial Ecosystems	6
9448 Ecology and Management of Inland Waters	4.5
5408 Ecology and Management of Marine Environments	4.5

### 6.3 Part II

A candidate who obtains a credit average or above in the subjects of Part I may proceed to the second part which shall be a research report on an approved research topic in the field of Ecological Management. Candidates may complete the research report in either six months of full-time study, enrolling in 5887 Research Project: Ecological Management (FT), or in twelve months of part-time study, enrolling in 5345 Research Project: Ecological Management (PT), each with the points value of twelve.

### 6.4 The examiners may recommend that:

- (a) the research report be accepted; or
- (b) the research report be accepted, subject to amendments being made to the report; or
- (c) the research report be not accepted but the candidate be permitted to re-submit it in a revised form; or
- (d) the research report be rejected.

## 7 General

- 7.1 A candidate who holds a Graduate Certificate in Marine and Freshwater Ecology and Management and/or Terrestrial Ecology and Management, or a Graduate Diploma in Aquatic and Terrestrial Ecology and Management shall surrender it before being admitted to the degree.

## Syllabuses

---

### 6317 Approaches to Management

*points value:* 4 *duration:* semester 2

*assumed knowledge:* Science at degree level.

*contact hours:* 10 lectures and associated practicals and field work or their equivalent per week for 5 weeks, plus one week of independent study and assessment.

*content:* Approaches to Management: One two-week module (Biodiversity of Mediterranean Lands) followed by three one-week modules (GIS and Remote Sensing; Conservation Biology; from theory to practice; Ecological Land Classification). The first module explores various ecological options for the management of terrestrial ecosystems, starting with an overview of the species, their distinctive characteristics and diversity. The second module introduces the nature of remote sensing data, land surface responses and some applications in ecological mapping and monitoring as well as providing hands-on experience with a personal computer based image analysis and ERMS, a grid cell GIS. This is followed by an historical perspective of conservation biology, biodiversity and extinction. Rules of thumb for nature reserves design and management. Population viability analysis as a tool for assessing threatened populations, and endangered species legislation. The fourth module examines the ecology of human-dominated landscapes where the native vegetation cover has been fragmented and persists only in patches. This module has global significance, it will focus on dry sclerophyll forests and shrublands characteristic of southern Australia and contrast these with Western Europe and emphasise the different kinds of environmental change that operate at the landscape level to provide diagnostic features distinguishing between natural and human dominated ones. The course will involve lectures, case studies, group discussions and computer practicals and field excursions.

*assessment:* Will be at the completion of the subject and will be tailored to the individual needs of the constituent sections and students. Students will be informed of the relative percentages allocated to each component after class discussion at the start of each section.

### 5517 Biological Statistics

*points value:* 2 *duration:* semester 2

*quota:* required

*assumed knowledge:* Science at degree level

*contact hours:* 10 lectures and associated practicals and field work or their equivalent per week for 3 weeks, plus one week of independent study and assessment

*content:* Biological Statistics: Three one-week modules of full time study covering the detection and analysis of patterns in terrestrial communities. Emphasis will be placed on multivariate computer based methods such as classification and ordination techniques. The subject comprises lectures, computing workshops and self study.

*assessment:* Assessment will be at the completion of the subject and will be tailored to the individual needs of the constituent sections and students. Students will be informed of the relative %'s allocated to each component after class discussion at the start of each section.

### 5823 Ecological Data Analysis, Modelling and Collation

*points value:* 3

*duration:* semester 1 (including summer semester)

*quota:* required

*assumed knowledge:* Science at degree level.

*contact hours:* 10 lectures and associated practicals and field work or their equivalent per week for 6 weeks, plus one week of independent study and assessment

*content:* One and a half weeks introducing the processes and mechanics used in communicating science to other scientists and the public via the electronic and print media. Followed by three and a half weeks of advanced units in Ecological Data Collection, Analysis and Modelling. The subject comprises lectures, computing workshops and self study exercises covering the design and development of ecosystems models, experimental design and interpretation.

*assessment:* Assessment will be at the completion of the subject and will be tailored to the individual needs of the constituent sections and students. Students will be informed of the relative %'s allocated to each component after class discussion at the start of each section.

### 8101 Ecological Processes in Dry Terrestrial Ecosystems

*points value:* 6 *duration:* semester 2

*quota:* required

*assumed knowledge:* Science at degree level

*contact hours:* 10 lectures and associated practicals and field work or their equivalent per week for 7 weeks, plus one week of independent study and assessment

*content:* Ecological Processes in Dry Terrestrial Ecosystems: Four two-week modules (Plant Growth

and Mineral Nutrition in semi-arid climates; An Ecological Basis for the Pastoral Utilisation of semi-arid Rangelands. Plant-Animal Interactions, Pests; Ecology of Fragmented Dry Sclerophyll Forests and Shrublands). These modules explore the nutritional challenges faced by plants growing in Mediterranean climates especially dry, acid, low nutrient soils and the adaptations to increase fitness in these environments. The ecological processes governing the expansion and retreat of species, vegetation patterns and how interactions between domestic and pest animals, exotic plants and native vegetation shape the flora and influence management in dry sclerophyll forests, shrublands and rangelands. The course includes lectures, field excursions, group and self-study programs based upon recommended literature.

*assessment:* Assessment will be at the completion of the subject and will be tailored to the individual needs of the constituent sections and students. Students will be informed of the relative %'s allocated to each component after class discussion at the start of each section.

#### 9448 The Ecology and Management of Inland Waters

*points value:* 4.5

*duration:* semester 1 (including summer semester)

*quota:* required

*assumed knowledge:* Science at degree level

*contact hours:* 10 lectures and associated practicals and field work or their equivalent per week for 5 weeks, plus one week of independent study and assessment

*content:* The Ecology and Management of Inland Waters: Three modules (The Ecology of Floodplain Rivers, 1 week; The Ecology of Lakes, Reservoirs and Wetlands, 2 weeks; Water Resources Management and Conservation, 2 weeks). The first examines the ecology of Floodplain rivers and uses the River Murray as an Australian example of a manipulated river system in a semi-arid climate. The second module examines the interaction between catchment areas and inland aquatic systems, in particular the effects of nutrient loading and water regime on the ecology of these systems. The population ecology of a range of phytoplankton and aquatic plants which emphasises the reasons and causes of cyanobacterial blooms, the impact of the loss of aquatic macrophytes and biomanipulation as a strategy for improving water and habitat quality. The third module contrasts the principles of water resource management derived from temperate parts of the world with the Australian experience, an experience focused upon the management of water in semi-arid and sub-tropical

climates. It will consider the major physico-chemical and biological features of water in Australia of relevance to their management and conservation. The course will involve lectures, practicals, group discussions and some practicals and field excursions.

*assessment:* Assessment will be at the completion of the subject and will be tailored to the individual needs of the constituent sections and students. Students will be informed of the relative %'s allocated to each component after class discussion at the start of each section.

#### 5408 The Ecology and Management of Marine Environments

*points value:* 4.5

*duration:* semester 1 including summer semester)

*quota:* required

*assumed knowledge:* Science at degree level

*contact hours:* 10 lectures and associated practicals and field work or their equivalent per week for 5 weeks, plus one week of independent study and assessment

*content:* The Ecology and Management of Marine Environments. Three modules (Ecological Processes in Coastal Systems and Marine Population Dynamics, 2 weeks; Marine Pollution Ecology and Aquaculture, 2 weeks; Adaptive Management of Renewable Resources, 1 week). The first examines the population ecology of a variety of marine plants and animals, ranging from the highly mobile to the sessile. The second module examines the ecological effects of marine pollution (nutrients, heavy metals, hydrocarbons etc), methods of detection, the design of impact assessment studies and monitoring program to detect low- and high-level contamination, and the ecology of aquaculture systems from extensive to intensive and their impact on the environment. The third module introduces students to the concepts of adaptive management which embraces uncertainty and involves interaction between all people involved in the use of renewable resources from the perspective of the scientific ecologist. The subject will involve lectures, group discussions based upon assigned reading, and practical sessions using computers.

*assessment:* Assessment will be at the completion of the subject and will be tailored to the individual needs of the constituent sections and students. Students will be informed of the relative percentages allocated to each component after class discussion at the start of each section.

## Master of Science (Immunology)

## Master of Science (Medical Mycology)

## Master of Science (Microbiology)

## Master of Science (Virology)

The above awards have been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar.

As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

### Specific Course Rules

---

#### 1 Admission requirements

- 1.1 The Faculty may accept as a candidate for any of the foregoing degrees a person who has qualified for:
- (a) a degree of Bachelor of Medicine and Bachelor of Surgery or an Honours degree of Bachelor of Science (second class or above) of The University of Adelaide or another institution accepted by the University for the purpose, and who has had at least three years of professional work experience, or
  - (b) a degree of another institution accepted by the University for the purpose, and who has had professional experience in the relevant discipline of at least six years.
- 1.2 Subject to the approval of the Council, the Faculty may in special cases and subject to such conditions (if any) as it may see fit to impose in each case accept as a candidate for the degree an applicant who does not hold the qualifications specified in 1.1(a) or 1.1(b) above but who has given evidence satisfactory to the Faculty of fitness to undertake work for the degree.
- 1.3 A candidate accepted under 1.2 above may be required to complete satisfactorily such preliminary work as the Faculty may determine.
- 1.4 A person whose qualifications have been accepted under 1 above and whose native language is not English may be admitted to the course subject to satisfactory performance in an English language test.

#### 2 Qualification requirements

- 2.1 To qualify for the degree a candidate shall:
- (a) satisfy examiners in subjects of study as prescribed in the relevant Specific Course Rules; and
  - (b) present a satisfactory research report on a subject approved by the Faculty. The research report shall give the results of original research carried out by the candidate.

#### 3 Duration of course

- 3.1 Except with the permission of the Faculty, the subjects of study and the research project shall be completed: (a) in one year of full-time study; or (b) in two consecutive years of part-time study.

#### 4 Assessment and examinations

- 4.1 There shall be four classifications of Pass in all subjects: Pass with High Distinction, Pass with Distinction, Pass with Credit and Pass.
- 4.2 On completion of the research report the candidate shall lodge with the Head of Department two copies of the research report prepared in accordance with directions given to candidates from time to time. No material presented for any other degree within this or any other institution shall be submitted.

## 5 Review of academic progress

- 5.1 If in the opinion of the Faculty a candidate for the degree is not making satisfactory progress, the Faculty may, with the consent of the Council, terminate the candidature and the candidate shall cease to be enrolled for the course.

## 6 Course of study

The course of study for the degree shall be completed in one year of intensive work, commencing in mid-January of each year. Unless exempted therefrom by the Faculty of Science, every candidate for the degree shall satisfactorily complete units to the value of at least 36 points from the following:

- (a) compulsory subject

code	subject title	points
6206	Introductory Unit	6

- (b) two of the following subjects

7689	Advanced Topics in Immunology	9
1600	Advanced Topics in Medical Mycology	9
8121	Advanced Topics in Microbiology	9
3252	Advanced Topics in Virology	9

- (c) one of the following Research Projects

1139	Research Project in Immunology	12
7065	Research Project in Medical Mycology	12
7875	Research Project in Microbiology	12
5667	Research Project in Virology	12

## Syllabuses

---

### 6206 Introductory Unit

*points value:* 6

*duration:* 6 weeks (mid-January to end of February)

*contact hours:* 36 lectures and tutorials

*content:* An overview of two of the following disciplines: Immunology, Medical Mycology, Microbiology or Virology, designed to ensure that all candidates have a similar level of knowledge and to provide a grounding for the Advanced Units.

### Advanced units

The units of specialised study initially available will be Advanced Topics in Immunology, Advanced Topics in Medical Mycology, Advanced Topics in Microbiology and Advanced Topics in Virology and candidates will be required to select two of these. Each unit will involve 2-3 contact hours per week, of lectures and/or tutorials for 18 weeks and participation in a series of 9 seminars on selected topics in modern Immunology, Medical Mycology, Microbiology and Virology.

### 7689 Advanced Topics in Immunology

*points value:* 9

*duration:* 18 weeks (March to August)

*contact hours:* 45-65 (lectures, tutorials and seminars, 1-1.5 hours each)

*content:* The content will reflect the remarkable transformation in our understanding of the immune system and its functions that has been provided by the recent advances in cell identification using monoclonal antibodies, cell culture techniques, recombinant DNA methodology and protein chemistry. Detailed consideration will be given to the cellular and molecular aspects of the development of the immune system, and its response to infectious agents, tissue transplants and tumours. Topics to be covered include: Haemopoietic cells and their differentiation; Organisation of lymphoid tissues; The role of MHC products in the selection T cell repertoire; Antigen processing and presentations; Lymphocyte growth factors and cell surface receptors; Regulation of immune responses; Immunity to parasites, bacteria, tumours and tissue transplants.

### 1600 Advanced Topics in Medical Mycology

*points value:* 9

*duration:* 18 weeks (March to August)

*contact hours:* 45-65 (lectures, tutorials and seminars; 1-1.5 hours each)

*content:* Medical mycology is currently undergoing rapid changes on a global basis largely as a result of the dramatic increase in incidence of opportunistic fungal infection in the immunosuppressed group of patients. The aim of this subject is to provide an understanding of the aetiology, ecology, clinical disease, pathology, diagnosis and treatment of the superficial, cutaneous and subcutaneous mycoses, the dimorphic systemic mycoses and the emerging opportunistic systemic mycoses. The subject also contains a significant practical component: valuable work experience in a Medical Mycology Reference Laboratory will be gained. Specific topics to be covered include: The principles of antifungal therapy; *In vitro* antifungal susceptibility testing; The Epidemiology and identification of human pathogenic fungi; Rapid non-culture diagnostic procedures.

*assessment:* written examination and essays

### 8121 Advanced Topics in Microbiology

*points value:* 9

*duration:* 18 weeks (March to August)

*contact hours:* 45-65 (lectures, tutorials and seminars; 1-1.5 hours each)

*content:* In recent years great advances have been made in the characterisation of specific virulence determinants of bacteria and their modes of action, in the response of bacteria to specific environmental stimuli and in the rational basis for the design of vaccines and diagnostic agents. The application of molecular biology and recombinant DNA technology has been instrumental in many of these studies. The aim of this unit is to provide an understanding of how these advances were made and the directions being taken by research in these areas. Specific topics to be covered include: Molecular basis of bacterial pathogenesis; co-ordinate regulation of virulence determinants of bacteria; heat shock and stress responses; transport systems in bacteria.

### 3252 Advanced Topics in Virology

*points value:* 9

*duration:* 18 weeks (March to August)

*contact hours:* 45-65 (lectures, tutorials and seminars; 1-1.5 hours each)

*content:* The study of viruses, like many areas of biomedical science, has been revolutionised by the advent of nucleic acid hybridisation and molecular biology. This has permitted studies into the molecular

basis of pathogenicity. The aim of this unit is to examine how the above methods, coupled with classical virological techniques are used in modern Virology. Specific topics to be covered include: Detailed analysis of structure and function of selected viruses; Virus classification; Molecular biology of viruses; Assay and quantitation of viruses; Replication of RNA and DNA viruses; Viral pathogenesis and immune responses to viruses; Control of virus infections (viral vaccines and anti-viral drugs); Role of viruses in cellular transformation; Viroids.

**1139 Research Project in Immunology**

**7065 Research Project in Medical Mycology**

**7875 Research Project in Microbiology**

**5667 Research Project in Virology**

The syllabus details of each of the above four subjects are as follows:

*points value:* 12

*duration:* 19 weeks (September to January)

This part of the course will be taken on an individual basis and will require an independent investigation involving laboratory work, detailed analysis of data or a critical review of a selected topic in the candidate's chosen discipline. Appropriate supervision will be provided and some projects may need to be undertaken outside the Department of Microbiology and Immunology.

During three months of the course candidates will also be expected to attend a series of clinical and research seminars presented by invited speakers which will extend the areas covered in the units of specialised study.

A research report will have to be submitted at the completion of each research project. A period of 6 weeks will be devoted to this purpose (December–mid January).

*assessment:* The primary purpose of assessment and examination will be to aid candidates in achieving their academic goals by determining their depth of understanding of their areas of study and, when necessary, identifying problems in order to assist candidates in their training. Ultimately, candidates will have to satisfy the examiners that they have achieved a broad conceptual understanding of their fields of study and have developed the intellectual independence required to maintain their level of expertise after the completion of the course. Components which will contribute to the final assessment will include performance in tutorials, discussion groups and seminars (40%), in written examination and quality of essays (25%) and performance during the research project and the quality of the research report (35%).

## Master of Science (Medical and Health Physics)

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar.

As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

### Specific Course Rules

#### 1 Admission requirements

- 1.1 (a) The Faculty of Science may accept as a candidate for the degree any person who has qualified for an Honours degree of Bachelor of Science in Physics of The University of Adelaide or of another institution accepted for the purpose by the University;
- (b) The Faculty may accept a candidate who has qualified for an Ordinary degree of Bachelor of Science of The University of Adelaide, or another institution accepted by the University for the purpose, with a major sequence in Physics and appropriate practical experience, but may specify preliminary work to be undertaken by the candidate.
- (c) Subject to the approval of the Council and subject to such conditions as it may see fit to impose in each case, the Faculty of Science may accept as a candidate for the degree an applicant who does not hold the qualifications specified in 1.1(a) or 1.1(b) above but who has given evidence satisfactory to the Faculty of fitness to undertake work for the degree.

#### 2 Qualification requirements

- 2.1 To qualify for the degree a candidate shall:
- (a) satisfy examiners in subjects of study as prescribed in the Specific Course Rules; and
- (b) present a satisfactory thesis on a subject approved by the Faculty of Science.

#### 3 Duration of course

- 3.1 Except with the permission of the Faculty, the subjects of study and the thesis shall be completed:

- (a) in not less than three semesters nor more than five semesters of full-time study; or
- (b) in not less than five semesters nor more than eight semesters of part-time study.

#### 4 Review of academic progress

- 4.1 If in the opinion of the Faculty of Science a candidate for the degree is not making satisfactory progress, the Faculty may, with the consent of the Council, terminate the candidature and the candidate shall cease to be enrolled for the degree.

#### 5 Assessment and examinations

- 5.1 On completion of the thesis the candidate shall lodge with the Head of Department of Physics and Mathematical Physics two copies of the thesis prepared in accordance with directions given to candidates from time to time. No thesis or material presented for any other degree within this or any other institution shall be submitted.
- 5.2 The Faculty shall appoint two examiners for the thesis.

#### 6 Course of study and thesis requirements

- 6.1 Unless exempted therefrom by the Faculty of Science every candidate for the degree shall complete units to the value of 36 points from the following components, each of which counts as 4 points, and the project, 6.1(c), which counts as 12 points:
- (a) Coursework, comprising the following compulsory subjects:
- 7799 Applied Nuclear and Radiation Physics
  - 4743 Physical Measurement and Instrumentation
  - 3327 Radiation Biology, Protection and Epidemiology

Anatomy and Physiology M (Taught by the University of South Australia)

- (b) Coursework comprising two of the following optional units:
- 1264 Non-ionising Radiations
  - 1451 Radiology Physics
  - 2013 Radiotherapy Physics
  - 4341 Nuclear Medicine Physics
  - 2203 Environmental and Mining Health Physics
  - 8866 Laser Physics
- (c) A thesis on an approved short research project with clinical or field application.
- 6.2** (a) The course shall be a joint course, coordinated amongst the three participating institutions: The University of Adelaide, The University of South Australia and The Royal Adelaide Hospital by a Program Committee which contains a representative from each.
- (b) Students enrolled from The University of Adelaide shall be subject to the Statutes, Regulations and Rules of this University and the degree shall be awarded by this University. However, subjects may be given by staff from either University or the Royal Adelaide Hospital.
- 6.3** There shall be four classifications of pass in any subject for the degree: Pass with High Distinction, Pass with Distinction, Pass with Credit, Pass.
- 6.4** The Faculty of Science may grant status in subjects for Honours or postgraduate study undertaken in another course in the University or in another university or tertiary institution.
- 6.5** A candidate's enrolment in subjects of study and choice of supervisor or supervisors must be approved by the Head of the Department of Physics and Mathematical Physics (or by the Program Committee to its Coordinator) at enrolment each year.
- 6.6** The Faculty of Science may require a candidate to undertake additional work needed as background to the compulsory subjects, where a student has not completed an Honours degree.
- 6.7** The examiners appointed under 5.2 above after interviewing the student, may recommend that:
- (a) the thesis be accepted; or
  - (b) the thesis be not accepted but the candidate be permitted to resubmit it in a revised form; or
  - (c) the thesis be rejected.
- 6.8** In order to satisfy the requirements of the degree a candidate must satisfactorily complete any additional work required under 6.6 above, pass in each of the compulsory subjects and submit a thesis which is accepted by the Faculty of Science as satisfactory for the purposes of the degree.

## Syllabuses

---

This vocational degree aims to provide a bridge between the training of a professional physicist and the specialised knowledge and experience required in a clinical or field situation where the physicist is required to interact effectively with medical, technical and health professionals. It will enable the graduate to become productive more quickly, and will provide research training in an appropriate area of specialised interest. As such, it is a useful preliminary to Ph.D. study.

The degree is a coursework degree, with a significant research project. It involves close co-operation with the Royal Adelaide Hospital and University of South Australia through a Program Committee. Some coursework subjects may not be offered every year. The masters course is open to qualified graduates from either institution who are approved under the separate regulations. The specialised optional units may be offered with the assistance of visiting lecturers.

It is envisaged that the degree can be completed in three semesters of full-time study including a summer semester for the research project. A total of 36 points is required to complete the degree. Separate units normally count 4 points, except for the Research Project, 12 points. Status will be given in subjects taken previously up to 8 points.

It is permissible for students to enrol for individual units for credit without intending to complete the masters degree. Such entry is open to graduates in science, medicine or engineering.

### timetable

Detailed timetables are issued at the beginning of each academic semester.

### textbooks

Reading lists are provided by the Department throughout the course.

### assessment

Each subject may be examined immediately after formal instruction has been completed, or continuous assessment may be used. On submission of the thesis on the research project, a panel of examiners will interview the student before awarding a grade. In addition candidates are expected to become conversant with the literature in the project area, to attend seminars and may be called upon to give a seminar on their research projects.

## compulsory subjects

### 7799 Applied Nuclear and Radiation Physics

*duration:* semester 1 or 2

*assumed knowledge:* Level III Physics and Mathematics

*content:* Systematic properties of nuclei, stability, activities, types of decay and decay schemes and radioactive sources, natural backgrounds and the radioactive decay chains. Models of nuclei such as the liquid drop model which leads to the semi-empirical mass formula, shell model and magic numbers and the collective model are discussed. Nuclear reactions and spectroscopy, activation and source preparation, sources and detectors of neutrons and gamma rays, reactors and meson factories. Generation of high energy radiation. Theory of radiation transport, radiation interaction processes and energy losses, including build-up, kerma and absorbed dose, high energy electron-photon showers (Heitler model), radiation length and critical energy, range-energy relations, and shielding for electrons, photons and neutrons.

*assessment:* written examination (50%); and assignments (50%)

### 4743 Physical Measurement and Instrumentation

*duration:* semester 1 or 2

*assumed knowledge:* Level III Physics

*content:* General consideration of measurement in a medical environment. Introduction to pulse and analogue electronics, signal processing, biological and instrumentation amplifiers, radiation detectors, noise and resolution (diodes, ionisation chambers, proportional counters, scintillation detectors etc), quantitative measurements and dosimetry, laser applications and safety, electrical safety, transducers, sensors, electrocardiogram and intensive care monitoring, medical computing and data processing. Introduction to ionising and non-ionising radiation dosimetry, units, dosimeters (ion chambers, solid state detectors, thermoluminescent, chemical and film dosimetry). Ethics of measurement.

*assessment:* assignments and essay (50%); written examination (50%)

### 3327 Radiation Biology, Protection and Epidemiology

*duration:* semester 1 or 2

*assumed knowledge:* Level I Physics.

*content:* Cell biology, radiation genetics, effect of radiation and ultraviolet light on tissues and organs, clinical symptoms, late effects, absorbed dose, LET, RBE, radiation chemistry, genetic doubling doses in animals and man, expectations at low doses (adults vs. embryos), DNA, chromosomal and cellular effects, repair mechanisms and repair-deficient disorders, implications for protection, accidents and emergencies, epidemiological studies, atomic bomb survivors, cancer and background radiation levels, risk factors and risk assessment, preparedness and planning, decontamination, waste-disposal, handling of radioactive sources and X-ray apparatus, statistics, compartmental analysis, acute and chronic exposure, recommendations of ICRP, legislation and codes of practice. Infrared, microwaves and electromagnetic fields.

*assessment:* assignments and essay (50%); written examination (50%)

### Anatomy and Physiology M

(Taught by University of South Australia, School of Pharmacy and Medical Laboratory Science. Students should enrol at the University of South Australia by cross-institution enrolment.)

*duration:* semester 2

*content:* Chordate anatomy and physiology: circulatory system, respiratory system, alimentary system, excretory system, skeletal and muscular system, reproductive system, defence system, nervous system, endocrine systems. Developmental biology: basic processes, control mechanisms, human ecology.

*assessment:* written examination

### optional subjects

#### 2203 Environmental and Mining Health Physics

*duration:* semester 1 or 2

*content:* Exposure pathways, radon, mining and milling, naturally occurring radioactivity and series, mineral sands, wastes and waste management, environmental impacts. The general mechanisms of physical control, eg, time/distance/shielding, delay and decay, dilute and disperse, concentrate and contain. The general mechanisms of institutional control, regulatory regimes in Australia, ICRP, NHMRC, State regulations, licensing and registration. The ICRP scheme of things, control of quantitative risk, ALARA principle. Modelling, pathways, monitoring, the concept of critical group, UNSCEAR. Radiation in the

workplace, sealed sources, unsealed sources, natural sources in mining and milling, monitoring and control, accidents and emergencies.

Case studies, eg, uranium mines, rehabilitated and abandoned sites, rare earth plants, radwaste disposal sites, nuclear fuel cycle.

*assessment:* assignments (50%); written examination (50%)

#### 8866 Laser Physics

*duration:* semester 1

*assumed knowledge:* Level III Optics

*content:* Introduction to lasers and non-linear optics, interaction of light with matter, probability of emission and absorption, stimulated emission, Bose-Einstein statistics, coherence. Laser resonators, Fabry-Perot, classification of resonators, graded reflectivity, geometrics, rings, gaussian waves, diffraction, modes. Macroscopic description of gain medium, dispersion, rate equations, saturation, broadening, hole-burning, opto-coupling, pulsed lasers, Q-switching, mode-locking, second harmonic generation, holography. Particular lasers and their medical applications, eg, to surgery, lithotripsy, ophthalmology, angioplasty etc, laser safety.

*assessment:* assignments (50%); examination (50%)

#### 1264 Non-ionising Radiations

*duration:* semester 1 or 2

*content:* Study of UV, ultrasound and electromagnetic waves and their effect on living tissue. Electrostatic fields, electromagnetic wave propagation, energy transfer processes, interaction of static and ELF electric and magnetic fields with biological systems, experimental RF and microwave dosimetry, biological effects of RF and microwave fields, measurement techniques for static, ELF, RF and microwave fields, rationale for exposure standards.

*assessment:* assignments and essay (50%); written examination (50%)

#### 4341 Nuclear Medicine Physics

*duration:* semester 1 or 2

*content:* General overview of image process and perception. Imaging techniques and instrumentation, including scintillation detector, rectilinear scanner and gamma camera. Production and properties of radionuclides, generators and clinical radiochemistry. Static and dynamic imaging, dual photon absorptiometry, SPECT and PET. Theory of image processing and techniques, 3-D reconstruction and rendering.

Non-imaging metabolic techniques (eg, thyroid uptake), in-vitro studies and instrumentation (eg, well counters), compartment analysis. Dosimetry of internally-deposited radionuclides (MIRD). Therapeutic techniques using unsealed sources as above.

*assessment:* assignments and essay (50%); written examination (50%)

### 1451 Radiology Physics

*duration:* semester 1 or 2

*content:* General overview of image process and perception. Conventional radiology including diagnostic X-ray machines, image formation and enhancement (basic radiation interaction processes, attenuation, filtration, beam restriction, filters, grids, geometric effects, intensifiers). Photographic properties of X-ray film, X-ray image formation. Special techniques (cinefluorography, mammography, axial tomography, TV techniques, stereoscopy and subtraction techniques). Xeroradiography, computerised tomography and digital techniques. Theory of image processing, 3-D reconstruction and rendering, cost/benefit and risk analysis. Quality assurance.

*assessment:* assignments and essay (50%); written examination (50%)

### 2013 Radiotherapy Physics

*duration:* semester 1 or 2

*content:* Superficial and deep X-ray units,  $^{137}\text{Cs}$  and  $^{60}\text{Co}$  units, electron accelerators. Electron and photon interactions in biological tissues. Bragg-Gray theory and electronic equilibrium. Depth-dose curves and dose profiles. Primary and scattered radiation. Tissue-air ratios, tissue maximum ratios. Effects of source geometry, collimation and scattering media. Modelling of radiotherapy beam (equivalent path length, effective tissue air ratios, Batho power law, superposition theory and Monte Carlo modelling). Introduction to treatment planning. Radiotherapy dose meters and instrumentation. Calibration (dosimetry protocols) and quality assurance, beam data acquisition. Clinical radiobiology including tumour control probability, tissue tolerance, modelling and effects of oxygen tension, tumour volume, fractionation and particle LET. Brachytherapy. Neutron, neutron capture and pion therapy. Dosimetry of internally deposited radionuclides and therapeutic techniques using unsealed sources ( $^{32}\text{P}$ ,  $^{131}\text{I}$  and  $^{153}\text{Sm}$ ).

*assessment:* assignments and essay (50%); written examination (50%)

### 9938 Supervised Research Project

*points value:* 12

*duration:* full year

*content:* This short project affords students the opportunity of applying their coursework and gaining research techniques and experience related to the hospital or field environment. It is essential that the choice of project should reflect the vocational emphasis of the course by having direct clinical or field involvement as well as reflecting the particular interests of the student. Students are responsible for choosing a supervisor who must be approved by the Program Committee. The project may be taken in co-operation with a public or private organisation interested in radiological protection, in which case a supervisor in the organisation may be appointed. It should aim to be a complete investigation of a restricted field. It should contain a literature survey and references to the published literature.

*assessment:* thesis (70%); *viva voce* examination or seminar (30%)

# Master of Science (Exercise Physiology) and Master of Science (Neuromuscular Physiology)

The above awards have been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar.

As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

## Specific Course Rules

### 1 Admission requirements

- 1.1 (a) The Faculty of Science may accept as a candidate for either of the foregoing degrees a person who has qualified for the Honours degree of Bachelor of Science in Physiology, the degrees of Bachelor of Medicine and Bachelor of Surgery or the degree of Bachelor of Dental Surgery of the University, or who holds a qualification of another institution accepted by the University for the purpose.
- (b) The Faculty of Science may accept as a candidate for either of the foregoing degrees a person who has qualified for an Ordinary degree of Bachelor of Science of the University with a major in Physiology, or who holds a qualification of another institution accepted by the University for the purpose and provides satisfactory evidence of suitable experience.
- 1.2 Subject to the approval of the Council the Faculty may in special cases and subject to such conditions (if any) as it may see fit to impose in each case accept as a candidate for either of the degrees an applicant who does not qualify for admission to the course under 1.1 above but who has given evidence satisfactory to the Faculty of fitness to undertake work for the degree.
- 1.3 A candidate admitted under 1.2 above may be required to complete satisfactorily such preliminary work as the Faculty may determine.
- 1.4 A person whose qualifications have been accepted under 1 above and whose native language is not English may be admitted to the course subject to satisfactory performance in an English Language test.

### 2 Qualification requirements

- 2.1 To qualify for the degree a candidate shall:
- (a) satisfy examiners in subjects of study as prescribed in the Specific Course Rules; and
- (b) present a satisfactory research report on a subject approved by the Head of the Department of Physiology.

### 3 Duration of course

- 3.1 Except with the permission of Faculty, the subjects of study and the Research Project shall normally be completed in three semesters of full-time study or the equivalent in part-time study.

### 4 Assessment and examinations

- 4.1 There shall be four classifications of Pass in all subjects: Pass with High Distinction, Pass with Distinction, Pass with Credit and Pass
- 4.2 On completion of the Research Project the candidate shall lodge with the Head of Department two copies of the research report prepared in accordance with directions given to candidates from time to time. No material presented for any other degree within this or any other institution shall be submitted.

### 5 Review of academic progress

- 5.1 If in the opinion of the Faculty a candidate for the degree is not making satisfactory progress the Faculty may, with the consent of the Council, terminate the candidature and the candidate shall cease to be enrolled for the degree.

## 6 Course of study

6.1 Unless exempted therefrom by the Faculty of Science, every candidate for the Master of Science (Exercise Physiology) shall complete satisfactorily units to the value of at least 36 points as follows:

code	subject title	points
9953	Cellular Mechanisms in Human Movement Part I	6
7519	Cellular Mechanisms in Human Movement Part II	6
1148	Advanced Studies in Exercise Physiology Part I	6
7954	Advanced Studies in Exercise Physiology Part II	6
5375	Research Project in Exercise Physiology	12

6.2 Unless exempted therefrom by the Faculty of Science, every candidate for the Master of Science (Neuromuscular Physiology) shall complete satisfactorily units to the value of at least 36 points as follows:

code	subject title	points
9953	Cellular Mechanisms in Human Movement Part I	6
7519	Cellular Mechanisms in Human Movement Part II	6
7055	Advanced Studies in Neuromuscular Physiology Part I*	6
7607	Advanced Studies in Neuromuscular Physiology Part II*	6
5278	Research Project in Neuromuscular Physiology*	12

\* Not offered in 1996

## Syllabuses

### 9953 Cellular Mechanisms in Human Movement Part I

*points value:* 6 *duration:* semester 1

*contact hours:* 3 hours per week

*content:* Part I of the course is directed at exploring the cellular bases of neuromuscular function as they relate to human movements and performance.

### 7519 Cellular Mechanisms in Human Movement Part II

*points value:* 6 *duration:* semester 2

*contact hours:* 3 hours per week

*content:* Part II of the course is directed at exploring the cellular basis of human movements and performance.

*assessment:* For the two subjects above: Several assessment procedures will be applied and supported by clearly identified specific criteria provided to the candidates. The procedures will include: (i) assessment of acquisition of a factual knowledge base from the didactic components of the program. This will be in the form of a written examination; (ii) assessment of the candidates ability to use their knowledge and practical skills in a problem solving context; (iii) assessment of written assignments.

### 1148 Advanced Studies in Exercise Physiology Part I

*points value:* 6 *duration:* semester 1

*contact hours:* 4 hours per week

*content:* Part I of the advanced program will be concerned with a detailed analysis of the fundamental principles of the human physiological response to exercise, concentrating on energy delivery and the intricacies of integrative control and homeostasis and exploring the latest concepts and research initiatives in these areas. Environmental and comparative aspects of human performance will also be considered.

### 7954 Advanced Studies in Exercise Physiology Part II

*points value:* 6 *duration:* semester 2

*contact hours:* 4 hours per week

*content:* Part II of the advanced studies program will be concerned with the more applied aspects of human physical performance in general population across the broad age, gender and health spectra. The scientific basis to the physiological response to physical activity,

its consequences and particular features will be considered in individuals with cardio-respiratory, neuromuscular and other diseases, in the several recognised age groupings of the population and in elite athletes involving a spectrum of physical demands. In all of the above the consequences peculiar to each gender will be highlighted, discussed and compared.

*assessment:* For the two subjects above: Several assessment procedures will be applied and supported by clearly identified specific criteria provided to the candidates. The procedures, which for the most part are continuous, will include: (i) assessment of acquisition of a factual knowledge base from the didactic components of the Advanced Studies program. This will be in the form of a written examination; (ii) assessment of the candidates ability to use their knowledge and practical skills in a problem-solving context; (iii) assessment of written assignments.

### 5375 Research Project in Exercise Physiology

*points value:* 12 *duration:* semester 1

*contact hours:* 8 hours per week for 13 weeks

*content:* The Department of Physiology has an innovative research program in exercise physiology with full infrastructure support. Given that the experiments will be on human subjects, candidates will work usually as part of a research team but will be assessed independently. Students will be given advice on potential research topics but may choose their own area of research. The execution of the project will provide excellent training in problem-solving strategies and provide an excellent basis for whichever career field students enter after graduation.

*assessment:* Several assessment procedures will be applied at all stages of the research project including: (i) preparation of a background literature review for the proposed project and completion of detailed research-style application and ethics clearance forms; (ii) presentation of results as both a poster and oral communication; (iii) presentation of the final report as a scientific manuscript. It is hoped that some of these may be submitted for publication.

Precise written assessment criteria will be provided to the candidates for every form of assessment.

### 7055 Advanced Studies in Neuromuscular Physiology Part I

*points value:* 6 *availability:* not offered in 1996

*contact hours:* 3 hours per week

*content:* Part I of the advanced studies program will involve a detailed account of how movements are controlled by the human nervous system in health and, to a lesser extent, in disease. Particular attention will be paid to muscles and fatigue mechanisms, and their relationship to normal movements.

*assessment:* Several assessment procedures will be applied and supported by clearly identified specific criteria provided to the candidates. The procedures will include: (i) a written examination on the subject material presented in lectures; (ii) assessment of written assignments.

*assessment:* Several assessment procedures will be applied at all stages of the research project including: (i) preparation of a background literature review for the proposed project, completion of detailed research-grant style application and ethics clearance forms; (ii) presentation of results as both a poster and oral communication; (iii) presentation of the final report in the form of a scientific manuscript. It is hoped that some of these may be submitted for publication.

Precise written assessment criteria will be provided for the candidates for every form of assessment.

### **7607 Advanced Studies in Neuromuscular Physiology Part II**

*points value:* 6      *availability:* not offered in 1996

*contact hours:* 3 hours per week

*content:* Part II of the advanced program will involve a detailed account of how movements are controlled by the human nervous system in health and, to a lesser extent, in disease. Particular attention will be paid to muscles and fatigue mechanisms, and their relationship to normal movements. An additional objective will be to put the current concepts of how movements are controlled into the context of the participants' career interests, eg into physiotherapy, rehabilitation medicine or sports science.

*assessment:* Several assessment procedures will be applied and supported by clearly identified specific criteria provided to the candidates. The procedures will include: (i) a written examination on the subject material presented in lectures; (ii) assessment of written assignments.

### **5278 Research Project in Neuromuscular Physiology**

*points value:* 12      *availability:* not offered in 1996

*contact hours:* 8 hours per week for 13 weeks

*content:* The Department of Physiology has an innovative research program in neuromuscular physiology with full infrastructure support. Given that the experiments will be on human subjects, candidates will work as a research team but will be assessed independently. The candidates in a research group will choose their own area of research, and the execution of the project will provide training in problem-solving strategies. This experience will provide a sound basis for their chosen career field.

# Master of Science in Petroleum Geology and Geophysics

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar.

As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

## Specific Course Rules

### 1 Admission requirements

1.1 The Faculty of Science may accept as a candidate for the degree any person who has qualified for:

- (a) an Honours degree of Bachelor of Science with honours in Geology or Geophysics of The University of Adelaide or of another university; or
- (b) an Ordinary degree of Bachelor of Science of The University of Adelaide or another university with a major sequence of study in Geology or Geophysics, and appropriate practical experience.

1.2 Subject to the approval of the Council and subject to such conditions as it may see fit to impose in each case, the Faculty of Science may accept as a candidate for the degree a person who does not meet the requirements specified in 1.1 above if it is satisfied that he or she is likely to be able satisfactorily to undertake work for the degree.

1.3 The Faculty of Science may require a candidate to complete satisfactorily such additional work as it may prescribe.

### 2 Qualification requirements

2.1 To qualify for the degree a candidate shall:

- (a) satisfy examiners in subjects of study as prescribed in the Specific Course Rules;
- (b) comply with conditions as prescribed in the Specific Course Rules; and
- (c) present a satisfactory thesis on a subject approved by the Faculty of Science. The thesis shall give the results of original research or of an investigation on which the candidate has been engaged.

### 3 Duration of course

3.1 Except with the permission of the Faculty, the subjects of study and the thesis shall be completed:

(a) in not less than one year nor more than two years of full-time study; or

(b) in not less than two years nor more than four years of part-time study.

3.2 A candidate who withdraws from all of the subjects in which he or she is enrolled in any one year or who fails to re-enrol after being enrolled in the previous year may only re-enrol in a subsequent year with the approval of the Faculty, and under such conditions as the Faculty may impose in each case.

3.3 A candidate proceeding with the thesis whose work is interrupted for a period of time may be granted an intermission of candidature by the Dean on behalf of the Faculty. If such an application is approved the maximum period specified in 3.1 will be adjusted accordingly by adding the length of the intermission.

### 4 Review of academic progress

4.1 If in the opinion of the Faculty of Science a candidate for the degree is not making satisfactory progress, the Faculty may, with the consent of the Council, terminate the candidature and the candidate shall cease to be enrolled for the degree.

### 5 General

5.1 A candidate who holds the Honours degree of Bachelor of Science in Honours Petroleum Geology and Geophysics or the Graduate Certificate in Petroleum Geology and Geophysics shall surrender the Honours degree or the Graduate Certificate before being admitted to the degree of Master of Science in Petroleum Geology and Geophysics.

### 6 Subjects of study and thesis requirements

6.1 Unless exempted therefrom by the Faculty of Science, every candidate for the degree shall complete the following components:

- (a) Coursework, comprising the following compulsory subjects:
  - 5189 Petroleum Geology and Geophysics (A)
  - 4746 Petroleum Geology and Geophysics (B)
- (b) Thesis on approved research project.
- (c) Period of placement in industry.

## 7 Assessment and examinations

- 7.1 On completion of the thesis the candidate shall lodge with the Registrar of Graduate Studies three copies of the thesis prepared in accordance with directions given to candidates from time to time. Refer to the Guidelines on Higher Degrees by Research and Specifications for Thesis in this volume. No thesis or material presented for any other degree within this or any other institution shall be submitted.
- 7.2 The Faculty shall appoint two examiners who are external to the University for each thesis.
- 7.3 There shall be four classifications of pass in any subject for the degree: Pass with High Distinction, Pass with Distinction, Pass with Credit, Pass.
- 7.4 The Faculty of Science may grant status in either one or two subjects for Honours or postgraduate study undertaken in another course in the University or in another university or tertiary institution.
- 7.5 A candidate's enrolment in subjects of study must be approved by the Director of the National Centre for Petroleum Geology and Geophysics at enrolment each year.
- 7.6 The Faculty of Science may require a candidate to undertake additional work needed as background to the compulsory subjects.
- 7.7 A candidate shall pursue an approved research project of relevance to the interests of the Department of Geology and Geophysics in Petroleum Geology or Geophysics under the control of the Department and under the guidance of one or more supervisors appointed by the Faculty of Science. At least one supervisor shall be a member of the academic staff of the Department of Geology and Geophysics. The thesis required under 2.1(c) and 6.1(b) above shall embody the results of this research project.

7.8 In connection with his or her research project a candidate will be required to undertake a six to twelve week placement or an equivalent period of previous work experience with a company or other organisation, of relevance, involved in petroleum exploration, extraction processing and/or research approved by the Director of the National Centre.

7.9 The examiners appointed under 7.2 above may recommend that:

- (a) the thesis be accepted; or
- (b) the thesis be accepted but that minor amendments be made to it; or
- (c) the thesis be accepted subject to:
  - (i) specified amendments being made to it; or
  - (ii) the candidate satisfactorily undertaking an oral or written examination; or
- (d) the thesis be not accepted but the candidate be permitted to re-submit it in a revised form; or
- (e) the thesis be rejected.

7.10 In order to satisfy the requirements of the degree a candidate must satisfactorily complete any additional work required under 7.6 above, pass in each of the two compulsory subjects, complete a period of placement as in 7.8 above, and submit a thesis which is accepted by the Faculty of Science as satisfactory for the purposes of the degree.

## Syllabuses

The degree is primarily a research degree, with a significant coursework component. It involves close interaction with the petroleum industry via the research projects chosen and may involve a period of placement with a company or organisation associated with the industry. The Centre will, in most cases, arrange for student placement with a relevant company or organisation for a six week period during July – August when required. Full-time students undertake all their coursework during the first six months in association with 5844 Honours Petroleum Geology and Geophysics. The remainder of the two year period is devoted to the research project and thesis.

On the basis of the nature of their previous studies and experience, some students may be required or permitted to substitute alternative studies for parts of the coursework component or to take additional studies. Specialised programs for this purpose may be arranged in consultation with the Director of the Centre. This may apply to students from institutions outside Australia. It may be necessary to substitute additional coursework and background study for the period of industrial placement.

### timetable

Detailed timetables are issued at the beginning of each academic year.

### prerequisites

The pre-requisites for these subjects are the same as for entry as a candidate.

### textbooks

Reading lists are provided by the Centre throughout the course.

### assessment

Assessment of the subjects is spread across a variety of formats and throughout the year. Formal written and oral assessments are conducted at the end of 5 to 6 week periods. Assessment is also conducted via marked practical exercises, assignments and seminars.

### 5189 Petroleum Geology and Geophysics (A)

### 4746 Petroleum Geology and Geophysics (B)

The subjects include general geological topics such as basin analysis, sedimentology, diagenesis, and structure. Most of these subjects are revised during the field trip to the Flinders Ranges. Geophysical topics include seismic interpretation, seismic acquisition and processing, and sequence stratigraphy. Topics specifically related to the petroleum industry include wireline logs, petrophysics and wellsite geology.

There is some scope for specialisation between geology and geophysics although both streams are required to do the majority of the course. Geologists may do petroleum geochemistry, applied palaeontology and isotope studies while the geophysicists concentrate on seismic acquisition, signal analysis and seismic processing. Topics related to the development of personal skills include economics, management and communication skills. Many of the topics covered above are drawn together in case studies and all are made relevant to the petroleum industry.

5189 Petroleum Geology and Geophysics (A) includes the mainly geological component of the coursework and 4746 Petroleum Geology and Geophysics (B) includes the mainly geophysical component. As the amount of time devoted to each component will vary between geology and geophysics students, the total for each component is added and the average mark assigned to each subject.

## Doctor of Science in the Faculty of Science

### Regulations

- 1
  - (a) Subject to these regulations a person who has been admitted in The University of Adelaide to an Honours degree of Bachelor or a degree of Master in Science, Agricultural Science, Applied Science or Engineering, or to the degree of Doctor of Philosophy in a field of study approved by the Faculty of Science, may proceed to the degree of Doctor of Science in the Faculty of Science.
  - (b) On the recommendation of the Faculty of Science the Council may accept as a candidate for the degree a person who has been admitted to a degree in The University of Adelaide other than one named in section (a) of this regulation, or who has qualified for a degree of another university or institution of higher education recognised by The University of Adelaide and has had a substantial association with the University; provided that in each case the person concerned has, in the opinion of the Faculty of Science, had an adequate scientific training.
  - (c) On the recommendation of the Faculty of Science the Council may, in special cases, accept as a candidate for the degree a person who does not hold a degree of a university or institution of higher education, provided that in each case the candidate concerned has a substantial association with the University and has, in the opinion of the Faculty of Science, adequate scientific credentials.
  - (d) Except where a person has been accepted as a candidate under regulation 1(c), no person shall be accepted as a candidate for the degree of Doctor of Science in the Faculty of Science before the expiration of five years from the date of original graduation.
- 2
  - (a) A person who desires to become a candidate for the degree shall give notice of the intended candidature in writing to the Registrar and with such notice shall furnish particulars of his/her scientific achievements and of the work to be submitted for the degree.
- (b) The Faculty of Science shall appoint a committee to examine the information submitted and to advise the Faculty on whether the Faculty should (i) allow the applicant to proceed, and approve the subject or subjects of the work to be submitted; or (ii) advise the applicant not to submit his/her work; or (iii) not allow the applicant to proceed; and the Faculty's decision shall be conveyed to the applicant.
  - (c) If the Faculty approves the subject or subjects of the work and the candidate proceeds with the submission the Faculty shall nominate examiners of whom one at least shall be an external examiner.
- 3
  - (a) To qualify for the degree the candidate shall furnish satisfactory evidence that he/she has made an original contribution of distinguished merit adding to the knowledge or understanding of any subject with which the Faculty is directly concerned.
  - (b) The degree shall be awarded primarily on a consideration of such published works as a candidate may submit for examination.
  - (c) The candidate in submitting published works shall state generally in a preface and specifically in notes the main sources from which the information is derived and the extent to which the candidate has made use of the work of others, especially where joint publications are concerned. The candidate may also signify in general terms the portions of the work claimed as original.
  - (d) The candidate is required to indicate what part, if any, of the work has been submitted for a degree in this or any other university.
- 4
  - The candidate shall lodge with the Registrar three copies of the work prepared in accordance with the directions given in sub-paragraph (b) of clause 2B of Chapter XXV of the Statutes. If the work is accepted for the degree the Registrar will transmit two of the copies to the University Library.

- 5 A candidate who complies with the foregoing conditions and satisfies the examiners may, on the recommendation of the Faculty of Science, be admitted to the degree of Doctor of Science in the Faculty of Science.
- 6 Notwithstanding anything contained in the preceding regulations, the Faculty may recommend the award of the degree to any person who is not a member of the staff of the University. Any such recommendation must be accompanied by evidence that the person for whom the award is proposed has made an original and substantial contribution of distinguished merit to the knowledge or understanding of a subject with which the Faculty is directly concerned, of a standard not less than that required by regulation 3.

Regulation allowed 4 November, 1965.

Amended: 28 Feb. 1974: 1, 5; 23 Jan. 1975: 1; 15 Jan. 1976: 6;  
4 Feb. 1982: 2, 4; 24 Feb. 1983: 2.21 Feb. 1991: 1.13 Feb.  
1992: 1(b).

# Board of Graduate Studies

## Contents

<b>Doctor of Philosophy</b> <i>Ph.D.</i>	
Regulations .....	1126
Schedules .....	1127
<b>Higher degrees by research .....</b>	<b>1130</b>
<b>Specifications for thesis .....</b>	<b>1133</b>

# Doctor of Philosophy

## Regulations

- 1 There shall be a Board of Graduate Studies.
- 2 The Board shall comprise:
  - (a) a Dean of Graduate Studies, appointed by the University for a five-year term;
  - (b) four members of the academic staff elected by the Academic Board for two or three year terms;
  - (c) two postgraduate students appointed by the Postgraduate Students' Association in accordance with procedures drawn up from time to time and approved by the Council.
- 3 The Board shall perform the functions required of it under these regulations and such other functions as the Council may from time to time prescribe.

## The degree of Doctor of Philosophy

- 4 There shall be a degree of Doctor of Philosophy.
- 5
  - (a) The Council, after receipt of advice from the Board, shall from time to time prescribe schedules defining the academic standing required for the candidature, the course of study and research for the degree, the condition of candidature and the assessment for the degree.
  - (b) Such schedules shall become effective from the date of prescription by the Council or such other date as the Council may determine.
- 6 Except as otherwise prescribed in the schedules, the academic standing required for acceptance as a candidate shall be an Honours degree of Bachelor of at least a IIA Standard or a degree of Master of The University of Adelaide or the equivalent thereof.<sup>#</sup> Applications from students with other qualifications will require the approval of the Board of Graduate Studies.
- 7 The Board may, in accordance with conditions prescribed in the Schedules, grant credit in the course for the degree of Doctor of Philosophy for research undertaken in another course in the University or in another university or tertiary institution.
- 8 A candidate may proceed to the degree by full-time study or, if the Head of the Department concerned is satisfied that the candidate has adequate time to pursue supervised research under the control of the University, by half-time study. Except in circumstances approved by the Board, the work for the degree shall be completed and the thesis submitted:
  - (a) in the case of a full-time candidate, not less than two years and not more than four years from the date of commencement of candidature;
  - (b) in the case of a half-time candidate, not less than four years and not more than eight years from the date of commencement of candidature.
- 9 The Board may review the progress of a candidate at any time during the course of candidature and, if the candidate's progress is unsatisfactory, may recommend to the Council that the candidature be terminated.
- 10 On the completion of the approved course of study and research, a candidate shall submit a thesis embodying the results of that study and research, and may submit also, in support of the thesis, other relevant material. No thesis or material presented for any other degree within this or any other institution shall be so submitted. The Board shall prescribe the form in which the thesis shall be submitted and the number of copies to be submitted.
- 11 The thesis and any other material submitted shall be assessed by examiners external to the University and in accordance with the schedules. The thesis shall:
  - (a) display original and critical thought;
  - (b) be a significant contribution to knowledge;
  - (c) relate the topic of research to the broader framework of the discipline within which it falls; and
  - (d) be clearly, accurately and cogently written and be suitably illustrated and documented.

12 After consideration of the reports of the examiners and such other information as it thinks fit, the Board shall determine that:

- (a) the candidate shall be awarded the degree; or
- (b) the candidate shall be awarded the degree but that minor amendments be made to the thesis; or
- (c) the candidate shall be awarded the degree subject to,
  - (i) specified amendments being made to the thesis, or
  - (ii) satisfactory performance in an oral or written examination; or
- (d) the candidate shall not be awarded the degree but shall be permitted to re-submit the thesis in a revised form; or
- (e) the candidate shall be awarded the appropriate degree of Master; or
- (f) the candidate shall be awarded the appropriate degree of Master upon making suitable amendments to the thesis; or
- (g) the candidate shall not be awarded the degree of Doctor of Philosophy or the degree of Master.

13 Such number of copies of a thesis and any other material on which the degree is awarded shall be deposited in the Barr Smith Library or elsewhere in the University as determined by the Board. Unless otherwise determined by the Board, the copies shall be available for loan and photocopy.

Regulations allowed 21 December, 1967.

Amended: 16 Dec. 1971: 9; 21 Dec. 1972: 2; 15 Jan. 1976: 2, 3, 4, 5, 6, 9, 10; 4 Feb. 1982: 4, 10; 1 March 1984: 1-13; 21 Feb. 1991: 1, 2, 5; 24 Nov 1993:2.

#Where a Master's degree is presented as a qualification for admission to a PhD course, the Master's degree must contain a research component deemed appropriate by the Board of Graduate Studies. A Master's degree which contains only coursework will not be accepted for this purpose.

## Schedules

### Guidelines

1 The Council, on the recommendation of the Board, may from time to time approve guidelines or any matters included in the Schedules and may authorise Faculties, Deans of Faculties, Heads of Departments or the Registrar, Graduate Studies, to act in accordance with such guidelines without reference to the Board in each case.

### Acceptance

- 2 A person shall not be enrolled as a candidate for the degree unless:
  - (a) the applicant's proposed field of study and research is acceptable to the Department(s) responsible for the supervision of the candidate's work.
  - (b) in the case of a person granted credit under regulation 7, at least one year of full-time study and research, or its equivalent, will still be necessary to complete the work for the degree.

### Academic standing

- 3 The academic standing required for acceptance as a candidate for the degree is normally an Honours degree of Bachelor (with first or upper second class Honours) or a degree of Master of The University of Adelaide.
- 4 A person who holds a degree of another University may be accepted as a candidate provided that the course of study undertaken and the academic standard reached are equivalent to those required of a candidate who is a graduate of The University of Adelaide.
- 5 The Board may accept as a candidate a graduate who does not qualify under clause 3 or 4 but (a) has completed to the satisfaction of the Board at least one year of full-time postgraduate study or research and (b) has passed a qualifying examination of Honours standard prescribed by the appropriate faculty and approved by the Board.
- 6 The Board may also accept as a candidate for the degree, a person who is seeking enrolment under regulation 7, provided it is satisfied (a) that the person is of such academic standard as would be required of other candidates for the degree and (b) that the person's progress so far has been satisfactory.

### Date of candidature

- 7 The candidature shall normally date from the month in which the candidate begins the course

of study and research for the degree. In the case of a candidate granted credit under regulation 7 the candidature shall normally expire, (i) in the case of a full-time candidate, not less than two years and not more than four years from when the candidate commenced work in the other course, or (ii) in the case of a half-time candidate, not less than four years and not more than eight years from the month the candidate commenced work in the other course. The approval of the Board is required for any different expiry date.

### Work for the degree

**8** A candidate shall pursue an approved course of study and research under the control of the University and under the general guidance of one or more supervisors appointed by the University. At least one supervisor shall be a member of the academic staff of the Department of the University in which the candidate is registered.

### Required program of activities at the commencement of candidature

- 9**
- (a) Each candidate shall complete a structured program of activities within the first twelve months from commencement of candidature.
  - (b) Continuation of the candidate's enrolment is conditional upon the completion of the activities to the satisfaction of the Department(s) concerned.
  - (c) Such activities will be determined by the Department(s) in which the candidate is enrolled. They will include the completion and the presentation of a detailed research proposal, and other courses or skills training deemed necessary by the Department(s) concerned.
  - (d) At the completion of the structured program, each candidate shall submit to the Board a research proposal in such form as the Board may prescribe.
  - (e) Candidates who have completed the first year of a Master's course by research and who are qualified and permitted by the Board to transfer to the degree of Doctor of Philosophy will be deemed to have completed this structured program of activities.

### Split Ph.D. Program

- 10**
- (a) A candidate may be permitted to enrol in the Split Program on the conditions that the Department(s) concerned can ensure, and the Board of Graduate Studies is

satisfied, that appropriate external supervision, with appropriate affiliation, and facilities are available.

- (b) A student who is enrolled in the Split Program is required to complete a period of residence of at least 12 months in The University of Adelaide. At least six months of this period of residence must be at the commencement of the student's candidature to complete the structured program of activities as required under Schedule 9.
- (c) In accordance with Regulation 8, a student who is enrolled in the Split program may proceed to the degree either by full-time or half-time study.
- (d) On the recommendation of the Department, the Board may permit an enrolled student to enrol in the Split Program subject to the conditions specified in 10 (a), (b) and (c) above.
- (e) A student who is enrolled in the Split Program may be permitted to convert to the normal Ph.D. program and be subject to the conditions normally applied.
- (f) Notwithstanding 10 (a) to (d) above, students who are enrolled in the Split Program are also required to abide by the Regulations, Schedules and Guidelines for the Degree of Doctor of Philosophy.

### Annual Review

- 11** A formal review of a candidate's progress shall be conducted by Departments at least once a year, in accordance with the guidelines which are determined by the Board of Graduate Studies. A written report of the review (on the prescribed Annual Review proforma) must be forwarded to the Registrar, Graduate Studies, by no later than 30 October each year. A candidate's re-enrolment in the following year is conditional upon him/her having attained satisfactory progress in the year.

### Absence from the university

- 12** Except for those who are enrolled in the Split Program, the Board may permit a candidate to pursue at another university or institution part of the approved course under such conditions as it thinks fit. Normally, candidates will be required to work for at least two years full-time (or equivalent) under the control of the University, but in the case of a candidate enrolled under regulation 7, and in other exceptional circumstances, the Board may approve a reduced period on such conditions as it may determine in each case.

- 13 The Head of the relevant Department may permit a candidate who is not enrolled in the Split Program to spend six months in any one year of the candidature away from the University on work connected with the research for the degree. The total period of such absence should not normally exceed twelve months. A period in excess of twelve months should be approved in advance by the Board.

#### Intermission of candidature

- 14 A candidate whose work is interrupted for a period of time may be granted an intermission of candidature by the Board. If such an application is approved the minimum and maximum periods specified in regulation 8 will be adjusted accordingly by adding the length of the intermission.

#### Extension of candidature

- 15 A candidate may be granted one extension of candidature by the Board of twelve months beyond the maximum period specified in regulation 8, but if the thesis has not been submitted by the end of that period the candidature will be suspended.

#### Completion of thesis outside the university

- 16 A candidate who has completed the equivalent of two years full-time working under the control of the University, who has completed the experimental work (where appropriate) and whose progress is sufficiently well advanced to permit the satisfactory completion of the thesis outside the University, may be granted permission by the Board to complete the writing-up of the thesis outside the University. If such an application is approved the candidate will be allowed either twelve months or until the end of any extension of candidature which has been granted under clause 14 to submit the thesis. If the thesis has not been submitted by the end of that period the candidature will be suspended.

#### Resumption of suspended candidature

- 17 A candidature which has been suspended will be resumed if a final draft of the thesis which has not departed from the field of study which was being pursued before the candidature was suspended is subsequently submitted within two years from the date of suspension to the relevant Department and is satisfactory to that Department. Any extension beyond the two years shall be determined on a case by case basis by the Board of Graduate Studies in consultation with the relevant Faculty/Department. Approval

of the Board is required for resumption of a suspended candidature under any other conditions.

In special circumstances the Board may approve the resumption of a suspended candidature for one period of up to six months prior to the submission of the final draft.

#### Intention to submit thesis

- 18 A candidate shall notify the Registrar, Graduate Studies, in writing, approximately three months before he or she expects to submit the thesis required under regulation 10. A summary of the thesis, together with the proposed thesis title, should be submitted at the same time.

#### Loan or photocopy of thesis

- 19 A candidate who does not wish to allow the thesis to be lent or photo-copied when it is deposited in the Library under regulation 13 shall make written application to the Registrar, Graduate Studies, at the same time as he or she notifies his or her intention to submit. The withholding of such permission and the period of time involved shall be determined by the Board.

#### Examination of thesis

- 20 (a) Candidates shall have the right to submit objections to the appointment of potential examiners. Any such objections should be submitted to the Registrar, Graduate Studies, at the same time as the notification of intention to submit required under schedule 18.
- (b) The Board shall appoint two examiners who are external to the University, taking account of any objections raised under (a) and the recommendations of the Head of the relevant Department.
- (c) The examiners shall be requested to report in such form as the Board prescribes and to recommend one of the alternatives listed in regulation 12.
- (d) After consideration of the reports of the examiners, the Board may appoint a third external examiner and/or an external arbitrator.

#### General

- 21 When, in the opinion of the Board of Graduate Studies, special circumstances exist, the Board, on the recommendation of the relevant Department in each case, may vary any of the provisions of Clauses 1-20 above.

## Higher degrees by research

### Introduction

This document must be read in conjunction with the:

- (a) Regulations and Schedules for the relevant degree(s) which are published in Volume II of the University Calendar, and
- (b) *Code of Practice for Maintaining and Monitoring Academic Quality and Standards in Higher Degrees*, published by the Board of Graduate Studies.

These documents explain procedures to be followed and contain guidelines on supervision and research for the degree of Doctor of Philosophy and the various Masters degrees by research offered by The University of Adelaide. These degrees are awarded solely on the successful examination of a thesis prepared by the candidate under supervision and embodying the results of a period of research. (Faculties may also apply these guidelines to the research components of those Masters degrees which have an advanced study or coursework component and a research component.)

These documents are intended for use by supervisors and candidates throughout the period of candidature and will be a useful reference for intending candidates, Heads of Departments and Postgraduate Coordinators.

### 1 The enrolment process

#### 1.1 The decision to enrol

Several factors must be taken into account by a potential candidate and the Head of the relevant Department before the decision is made to enrol for a higher degree.

(a) *Academic*

In general, it is necessary for the potential candidate to have qualified for an Australian university honours degree (first or second class) or its equivalent, or higher. Please check with the Registrar, Graduate Studies, for further details.

(b) *Finance*

The degree of Doctor of Philosophy and some Masters degrees can be completed on a half-time basis, so that it is possible for students, in some instances, to be self-supporting from sources other than scholarships while enrolled. The University and the Commonwealth Government each offers a limited number

of postgraduate scholarships annually almost exclusively to full time students. Details of the scholarships available may be obtained from the Registrar, Scholarships.

Departments receive funding which is based (in part) on the number of postgraduate students enrolled in the Department, and the Department is generally expected to provide equipment and funds for the research to be carried out. In particular, the development of the research proposal must take account of both the academic acceptability of the project and the resource implications for the Department and Faculty concerned.

(c) *Choice of field of study and supervisor*

A person who is contemplating enrolling for a higher degree should discuss the proposed candidature with the Head or Postgraduate Coordinator and members of the relevant Department(s), and a decision must be made before the commencement of the candidature on the general area of study and the supervisor(s) to be appointed to guide the candidate in the research. Since it is important that the supervisor is active in the general area of research which is chosen, it is clear that the choice of the field of study and supervisor are inter-related and decisions on both matters will need to be made together.

Guidelines for the supervision of higher degree candidates are outlined in the *Code of Practice*. Intending candidates may find it useful to discuss the general approach to supervision with potential supervisors at the outset. Clear understandings on issues such as how closely the work is to be supervised, the planned frequency of meetings between supervisors and candidates, the expectation of such meetings and the nature and level of commentary on the various stages of the work should be reached as soon as the supervisor has been appointed.

Where a student is to participate in a team project, the student's specific contribution to the project and the relationship with other participants should be clarified at the outset.

Where a student is to enrol in the Split Program for the degree of Doctor of Philosophy (Refer Section 3 below), appropriate external supervision must be confirmed by the Head of Department, and approved by the Board of Graduate Studies, prior to enrolment. External supervisors should be affiliated with an appropriate university or research facility.

## 1.2 Enrolment

Research students are advised to enrol and commence their studies at the beginning of either Semester I or Semester II, as appropriate, so that they can participate in the Structured Program organised by their respective Faculty/Department.

If further information or clarification of any matter is required before enrolment, it may be obtained from the Graduate Studies Office.

Enrolment and HECS forms are issued only when an application for candidature has been accepted. In the case of an applicant who had previously enrolled in a course in The University of Adelaide, an enrolment form will NOT be issued if the applicant is in bad financial standing with the University. If you are in such a position, please contact the Registrar, Graduate Studies, to discuss the matter. Completed forms must be returned before the date on which work commences for the degree.

## 2 The structured program of activities at the commencement of candidature

Each candidate commencing a Ph.D. must complete a structured program of activities within the first twelve months of candidature, as specified by the Department in which the candidate is enrolled. The program will include the presentation of a detailed research proposal and the completion of any other courses or training that may be deemed necessary. The resource implications for the Department must be built into the development of the research proposal and departmental obligations must be specified at the conclusion of the required program. Departments/faculties may require candidates commencing Masters by research to participate in the structured program.

Candidates will be required to complete and submit to the Registrar, Graduate Studies, the *Completion of Structured Program and Research Proposal* form upon completion of the structured program.

Candidates are expected to be able to comprehend and read and write conversational and non-technical English when they commence. Although it is the candidate's responsibility to ensure that such skills are adequate, supervisors are expected to assess the candidate's proficiency in English Language within the first semester of candidature and where appropriate, as part of a structured program, to direct candidates to courses offered by the Language and Learning Service of the Advisory Centre for University Education (ACUE).

## 3 Split program for the degree of Doctor of Philosophy

Application for enrolment in the Split Program must be made on the appropriate form, obtainable from the Registrar, Graduate Studies. A candidate should normally complete a period of at least twelve months in residence at The University of Adelaide. At least six months of this period should be at the commencement of candidature in order to complete the structured program of activities. The Head of Department must ensure that appropriate external supervision and facilities are available before recommending to the Board of Graduate Studies that a candidate be permitted to enrol in the Split Program.

If the status of candidature is to be full-time, the Board of Graduate Studies must be satisfied that the candidate is able to devote their full attention to the research project. Accordingly, the candidate must provide documentation supporting their application in the form of, for example, a supporting letter from the external supervisor and/or the Head of the institution or facility in which the student is to undertake the research and this must be accepted by the Department and the Board of Graduate Studies.

The financial implications of the student's research project must be negotiated and clarified between the Department, and any other external institution that is involved in providing supervision or facilities, in advance of confirmation of the student's candidature. The University cannot accept any retrospective financial claims. Similarly, any claims to be made on the intellectual property generated by the student must be negotiated between and confirmed with all parties concerned in advance of confirmation of the student's candidature.

As with other Ph.D. candidates, candidates enrolled in the Split Program will also be subject to an annual review of academic progress and will be required to re-enrol each year. The University of Adelaide will at all times retain the ultimate authority over all matters pertaining to the student's candidature, the process of examination of the thesis and the award of the degree of Doctor of Philosophy.

#### **4 Intellectual property**

In instances where a student and supervisor identify a general area of research in a commercially sensitive area, the student must sign a Student Project Participation Agreement with the University at the time of enrolment or as soon as possible thereafter.

If a potential candidate is an employee of another organisation, a formal agreement must be reached between the candidate, the University and the candidate's employer with respect to the ownership of any intellectual property arising from the research, preferably prior to enrolment.

The Student Project Participation Agreement or any agreement between the University and a candidate's employer must be signed before completion of the structured program and confirmation of the student's candidature.

#### **5 Further information**

Intending candidates are requested to contact the Registrar, Graduate Studies, for further information regarding course details and requirements.

# Specifications for thesis

## 1 Preparation

The responsibility for the layout of the thesis and selection of the title rests with the candidate after discussion with the supervisor(s), and the completed thesis should be shown to the supervisor(s) before submission. The candidate must consult with the Department concerning selection of an appropriate style for the thesis. A list of useful guides and style manuals for theses may be obtained on request from the Information Services Librarian of the Barr Smith Library. The Language and Learning Service of the ACUE also runs seminars and workshops on thesis writing.

### 1.1 Thesis Format

The submission of a series of published papers bound together as a thesis is not acceptable for the degree of Doctor of Philosophy, for any degree of Master by research, the thesis component of the Master by coursework, and the Doctor of Medicine by research.

The thesis should incorporate in the following order:

- (a) A title page giving the title of the thesis in full, the name of the candidate, the name of the Department(s) of the University associated with the work and the date (month and year) when submitted for the degree. There is a limitation of 160 spaces and characters in the title of the thesis. You should ensure, therefore, that your thesis title does not exceed that limit
- (b) A table of contents
- (c) An abstract of the thesis in not more than three hundred and fifty words
- (d) A signed statement to the effect that:
  - the thesis contains no material which has been accepted for the award of any other degree or diploma in any university and that, to the best of the candidate's knowledge and belief, the thesis contains no material previously published or written by another person, except where due reference is made in the text of the thesis; and
  - the author consents to the thesis being made available for photocopying and loan if accepted for the award of the degree.

This statement should be included on the same page as the statement regarding originality (see sample below). If the candidate has any objections to including such a statement, the candidate must apply to the Registrar, Graduate Studies, immediately, in writing, for a period of embargo to be placed on the candidate's thesis.

*sample:*

This work contains no material which has been accepted for the award of any other degree or diploma in any university or other tertiary institution and, to the best of my knowledge and belief, contains no material previously published or written by another person, except where due reference has been made in the text.

I give consent to this copy of my thesis, when deposited in the University Library, being available for loan and photocopying.

The statement must be signed by the candidate and dated.

- (e) An acknowledgment of any help given or work carried out by any other person or organisation
- (f) The main text
- (g) Appendices (if any)
- (h) Bibliography.

Additional pages or other material not suitable for binding should be placed last and treated as indicated in 4(d).

## 2 Typing

A thesis should normally be produced on size A4 paper, in a clear and legible font (eg Times 12 or Geneva 10) using a Laser Writer, or some other printing device which gives a clear, legible result. It is strongly recommended that the top copy of your thesis be produced on acid-free paper to ensure its long-term preservation, with additional copies on bond, or similar high-quality paper. If work is being submitted which has been previously published, it may be presented in the form of copies of the original printed version. Other forms of presentation, such as computer output microform, may be acceptable if approved by the University Librarian (after discussion with the Supervisor).

The submission of recorded music as part of a thesis should be discussed with the Performing Arts Librarian. (See also section on "Copying" below.)

A thesis may be produced on both sides of the paper provided that all copies are made on paper of high opacity to prevent 'show-through'.

#### *Margins*

Margins for both text and figures should not be less than 35 mm on the inside edge and 15 mm on the other three sides to allow for binding and trimming. (See also "Soft-binding of thesis for examination" under "4 Binding" below.)

#### *Copying*

(a) Additional copies of a thesis should be produced using a copying method which produces a good-quality copy. Copies (other than those produced with carbon paper at the time of typing the top copy) should normally be on bond paper. Chemically coated paper is acceptable for the production of a thesis only if it is known to provide a high quality reproduction and proven long-term stability.

#### *Audio and audio-visual tapes*

(b) Additional copies of audio and audio-visual tapes should be produced using a copying method which creates a high quality audio and visual reproduction with proven longevity.

#### *Acid-free/Archival Copy*

(c) The acid-free/archival copy should be marked accordingly and will become the University's copy following the award of the degree. The Barr Smith Library may produce a copy on acid-free/archival paper at the same cost as a plain paper copy.

### **3 Diagrams and figures**

The following are general suggestions for normal practice, but they may be varied in special cases with the approval of the Librarian:

- (a) Diagrams and figures, etc, should be preferably drawn or photographed on size A4 paper and bound in the appropriate place in the text. If it is necessary to mount photographs the mounting should be on paper somewhat heavier than that of the other pages, and great care should be taken to avoid wrinkling the paper or distorting the shape of the volume.
- (b) Figures should either be inserted at an appropriate place in the text, or form a separate page. For normal orientation with the top of the figure upwards, the legend

should be at the bottom of the figure. If it is necessary to rotate the figure, it should be placed on a separate page with the top of the figure on the left-hand side of the page and the legend on the right-hand side of the page. This applies regardless of whether the figure forms a left-hand or a right-hand page, but if the thesis is produced with the text only on right-hand pages, then figures should also appear only on right-hand pages. If there is insufficient space for the legend, it may be placed on the page facing the figure.

- (c) Tables should be inserted in the appropriate place in the text, except that lengthy or bulky tables should appear as an appendix.
- (d) Folded diagrams, maps, tables, etc, should read as right-hand pages when open. Supplementary material, such as folded maps and other large folded sheets and primary data on microfiche may be placed in a pocket inside the back cover of the bound thesis.
- (e) Musical notation and similar forms of written notation should be inserted in the appropriate place in the text, except that lengthy examples should appear as an appendix.

### **4 Binding**

#### *Soft-binding of thesis for examination*

A higher degree candidate may opt to submit his/her thesis in soft bound form initially for examination purposes.

Candidates who wish to have their theses soft-bound should note that:

- It is not possible to rebind a thesis that has been soft-covered using the currently available methods, such as Thermo-Bind or Wire-Spiral, without having first to trim the left hand margin by 10 to 15 mm. This means that the provision for the left hand margin of the thesis must be at least 45 mm. This may result in an increase in the number of pages of the thesis and the consequent increase in cost of production.
- Most soft-binding processes will handle up to around 30 mm in thickness. Many theses are thicker than this and may have to be bound in more than one volume.

It is the candidate's responsibility to bear all costs incurred in the soft-binding of his/her

thesis as well as in the subsequent hard-binding.

When the examination process (including the completion of any required amendments) is complete, it is an obligation of the candidate to submit the required three hard-bound copies of his/her thesis to the Registrar, Graduate Studies, before a degree can be conferred.

*Hard-binding*

- (a) The thesis must be sewn and bound with cloth on stiff covers. (A sprint-type or screw-type binder is unacceptable. Stapling and plastic or 'perfect' binding without sewing are also unacceptable.)
- (b) During binding the edges should be trimmed.
- (c) On the spine of the thesis should be given, in gold lettering of suitable size, normally reading from the top to the bottom, the title of the thesis, shortened if necessary, followed by the candidate's surname. Where the width of the spine allows, the lettering may be placed horizontally, with the title of the thesis near the top of the spine and candidate's surname near the middle.
- (d) When published papers are submitted they should normally be bound near the back of the thesis as an appendix. In the case of published papers of unusual size it may be desirable to bind them in a separate volume. If they have been bound by a publisher it is desirable to keep them in a special case made and lettered to simulate a bound volume of a thesis.
- (e) Supplementary material such as folding maps and other large folded sheets and primary data on microfiche may be placed in a pocket inside the back cover of the bound thesis.
- (f) Supplementary material such as microfilm which cannot readily be kept in a pocket should be placed in a special case made and lettered to simulate a bound volume of the thesis.
- (g) In view of problems of long term storage stability, presentation of material in a form other than printed copy or microform should not be contemplated without prior consultation with the University Librarian. When audio or audio-visual tapes are submitted they should normally be inserted into the back cover of the thesis. In some cases, it may be desirable

to submit them in a separate volume made to simulate a bound volume of the thesis.

- (h) A supplementary case or additional volume of a thesis should be distinguished by a volume number but should otherwise be uniform with the first part of the thesis in respect to colour, lettering and, as far as possible, size.
