PHD CANDIDATE
SCHOOL OF CHEMICAL ENGINEERING
UNIVERSITY OF ADELAIDE

“DESIGN, DEVELOPMENT AND IMPLEMENTATION OF AN OBJECT-
ORIENTED DATA MODEL FOR SMALL AND MEDIUM SIZED
WINEMAKING ENTERPRISES IN AUSTRALIA.”

October 2013

Table Of Contents

Abstract.....	15
With Thanks To... ..	16
Declaration.....	17
Terminology and Assumptions.....	18
1. Introduction	19
2. Justification.....	21
2.1 The complexities of managing a winemaking enterprise	21
2.1.1 Bureaucracy.....	21
2.1.2 Economic Sophistication	22
2.1.3 Logistical Complexity.....	23
2.2 Software Development	23
2.2.1 The nature of the I.T. industry	23
2.2.2 The technical and business backgrounds of winemakers	25
2.2.3 Literature review.....	26
2.3 Data mining and the potential for enhanced management techniques	29
3. Structure of Development	31
4. Scope.....	32
4.1 Scale	32
4.2 Multiple entities within each enterprise.....	32
4.3 Functions.....	32
4.4 Sophistication.....	32
5. Data modelling and some basic design principles, independent of user specifications	34
5.1 Architecture	34
5.2 Record locking.....	35
5.3 Permissions	36
5.4 Audit Logging.....	36
5.5 Data Types.....	37
6. A high level data model as a starting point	39
6.1 Production Plan.....	40
6.2 Fruit Availability	41
6.3 Vineyard Operations	41
6.4 Vintage Plan	41
6.5 Blending Plan.....	42
6.6 Winery Operations	42
6.7 Sales and Bottled Stock.....	42
7. Case Studies.....	44
7.1 Case Study 1 – Medium sized winery with two vineyards	44
7.1.1 The Winery	44
7.1.1.1 Laboratory.....	45
7.1.1.2 Forklifts.....	45
7.1.1.3 Fruit Reception.....	45
7.1.1.4 Tanks	46
7.1.1.5 Staff	47

7.1.1.6	Barrel Hall.....	48
7.1.1.7	Filtration.....	48
7.1.1.8	Presses and Pumps.....	48
7.1.1.9	Micro-Oxygenation (MOX).....	49
7.1.1.10	Heating and Cooling.....	50
7.1.1.11	Water in the Winery.....	51
7.1.1.12	Plunging and cap maintenance.....	51
7.1.1.13	Bottling Line.....	53
7.1.1.14	Nitrogen Generator.....	53
7.1.1.15	Consumables and Materials Storage.....	53
7.1.1.16	Cleaning.....	54
7.1.2	The Vineyards.....	54
7.1.2.1	Seasonal Phases.....	56
7.1.2.2	Vineyard Activities.....	56
7.1.3	Winemaking style.....	57
7.1.4	Wine Tasting, Amelioration, and Fining Trials.....	64
7.1.5	Operations.....	64
7.1.6	Water.....	69
7.1.7	Waste Management.....	69
7.1.8	Safety.....	70
7.1.9	Storage Facilities.....	70
7.1.10	Labels.....	70
7.1.11	Exporting.....	71
7.1.12	Use of Barrels.....	72
7.1.13	Contract Work.....	73
7.1.14	Transport.....	73
7.1.15	Budgets, Accounting, and Costs.....	73
7.1.16	Phylloxera.....	76
7.1.17	Naming conventions.....	77
7.1.18	Current data systems.....	78
7.1.18.1	Vintage Planning.....	78
7.1.18.2	Worknotes.....	83
7.1.18.3	Wine Monitoring.....	85
7.1.18.4	The Vineyard.....	88
7.2	Case Study 2 – Very Small winery.....	88
7.3	Case Study 3 – Small vineyard.....	89
7.4	Case Study 4 – Small enterprise utilising contract fruit and production facilities.....	91
7.5	Case Study 5 - Medium scale winery with multiple external vineyard sources.....	93
7.6	Case Study 6 – High-end Medium small winery and vineyard.....	96
8.	Case study summary and implications for the data model.....	99
8.1	Philosophical Issues.....	99
8.1.1	Wine Industry Professionals.....	99
8.1.2	What aspects of the process can be improved by this model?.....	101
8.1.3	What aspects of the process could be adversely affected by this model?.....	102
8.2	Practical Issues.....	102

8.2.1	Make what you can sell or sell what you can make?	102
8.2.2	Tasks and actions	103
8.2.3	Subjective data	105
8.2.3.1	Fruit sampling for harvest date and yield estimates	106
8.2.3.2	Pressing	106
8.2.3.3	Routine tastings	106
8.2.3.4	Amelioration, Fining, and Blending	106
8.2.3.5	Bottling	107
8.2.3.6	Marketing and sales plan development	107
8.2.4	Budgets versus Costs	108
8.2.5	Managing Paperwork	109
8.2.6	The Vintage Plan	109
8.2.7	Material tracking	110
8.3	Systematic Issues	111
8.3.1	The Role of the Interface for Testing and Judging the Data Model	111
8.3.2	Concrete and Virtual Objects	112
8.3.3	Plans versus Actions – Data Integrity	114
8.3.4	Facilities	115
8.3.5	Volumes	116
8.3.6	Define “A Wine”	118
9.	User requirements – from the top, down	120
9.1	The Wish List	120
9.1.1	The Vineyard	120
9.1.2	The Winery	122
9.1.2.1	Modes of Operation	123
9.1.2.2	Roles and Permissions	124
9.1.2.3	Areas within the winery	124
9.1.2.4	Barrel Sets	125
9.1.2.5	User Definable Wine Groups and Wine Flags	125
9.1.2.6	Naming conventions for wines	126
9.1.2.7	Blending calculators	127
9.1.2.8	A Wine Tracker	127
9.1.3	Laboratories	127
9.1.4	Storage Facilities	129
9.2	Legislation to consider	129
9.2.1	Levies	129
9.2.2	AWBC Label Integrity Program	130
9.2.2.1	Label Claims	130
9.2.2.2	Record Keeping	130
10.	The Graphical User Interface	132
10.1	Vineyards	133
10.1.1	Main Menu	134
10.1.2	The Vineyard Shed	135
10.1.3	Work Diary	135
10.1.4	Generating worknotes	135

10.1.5	Data Mining – Analyse/Report.....	135
10.1.6	Unmanaged.....	135
10.2	Wineries	136
10.2.1	Vintage Plan	136
10.2.2	Vintage Logistics.....	136
10.2.3	Weighbridge.....	137
10.2.4	Winery Map.....	137
10.2.5	Work Diary	138
10.2.6	Monitoring	139
10.2.7	Tracker.....	139
10.2.8	Materials	139
10.2.9	Dry Goods.....	139
10.2.10	Unmanaged Wineries.....	140
10.3	Laboratories	140
11.	Design Issues and Resolutions	141
11.1	Internal Logistics	141
11.2	Transferring, Racking, Filtering, and Splitting Wines	141
11.3	Jobs and Worknotes.....	142
11.3.1	A Structure	142
11.3.2	A State Machine	144
11.3.3	Exceptions	145
11.3.4	Scope.....	145
11.3.5	Not just for Cellar Notes.....	146
11.3.6	Automating follow up jobs.....	146
11.4	Barrel Sets	147
11.5	Readings Inheritance.....	148
11.6	What colour is the wine?	148
11.7	A Configuration Application	149
12.	The Data Model Design – from the bottom, up.....	150
12.1	Global Parameters.....	150
12.1.1	Properties.....	151
12.1.2	Collections.....	152
12.1.2.1	Job Types	152
12.1.2.2	Worknote Types	153
12.1.2.3	Vessel Categories & Types	154
12.1.2.3.1	Vessel Categories	154
12.1.2.3.2	Vessel Types	154
12.1.2.4	Other Collections.....	155
12.2	Application Users	155
12.3	Data Layer	156
12.4	Enterprise Objects.....	157
12.4.1	Jobs.....	158
12.4.1.1	Methods	159
12.4.1.2	Job Properties.....	159
12.4.1.3	Job Methods.....	160

12.4.2	Worknotes.....	161
12.4.3	Fruit Reception Jobs and Allocations	161
12.4.3.1	Fruit Reception Jobs Collection	162
12.4.3.2	Fruit Reception Job.....	162
12.4.3.3	Allocations.....	163
12.4.4	Standing Orders.....	164
12.4.5	System Messages	165
12.4.6	Tracker Items.....	165
12.5	Facilities.....	165
12.5.1	Diary Entries	166
12.5.2	Wineries	166
12.5.2.1	Vintage Planning & Logistics	169
12.5.2.1.1	VinDefs	169
12.5.2.1.2	VinDef Wine Batches	170
12.5.2.1.3	Vindef Vessel Allocations	171
12.5.2.1.4	Vintage Logistics Vessel Allocations.....	171
12.5.2.2	Wine Batches.....	172
12.5.2.3	Vessels.....	172
12.5.2.4	Vessel Readings	175
12.5.2.5	Wines.....	176
12.5.2.5.1	LIP.....	178
12.5.2.5.2	Readings.....	179
12.5.2.6	Source Wines.....	180
12.5.2.7	Fruit Parcels.....	180
12.5.2.8	Chips.....	181
12.5.2.9	Barrel Set components.....	181
12.5.2.10	Monitoring Algorithms and Tests.....	182
12.5.2.11	Other Objects	182
12.5.2.11.1	Skins	182
12.5.2.11.2	Delivered Parcels.....	183
12.5.2.11.3	Equipment.....	184
12.5.2.11.4	Additives and Stock.....	184
12.5.2.11.5	Menu Labels.....	186
12.5.2.11.6	Heating and Cooling Methods	186
12.5.2.11.7	Dry Goods Stock	187
12.5.2.11.8	Wine Groups	187
12.5.3	Vineyards.....	188
12.5.3.1	Vineyard Readings.....	189
12.5.3.2	Vineyard Blocks	189
12.5.3.2.1	Parcels	190
12.5.3.2.2	Vineyard Block Readings	191
12.5.3.2.3	Materials and Stock	191
12.5.4	Storage Facilities	192
12.5.4.1	Bottled Wine	192
12.5.5	Laboratories	193

12.5.5.1	Enzyme Kits	193
12.5.6	Bottling Facilities	193
12.6	The Database and System Constants	194
13.	The Application	195
13.1	Loading the Data Model – Initialisation	195
13.2	The MDI interface	198
13.2.1	About Permissions and Facility Locking	199
13.2.2	The Menu	200
13.2.3	The System Panel	200
13.2.3.1	Vintage	201
13.2.3.2	System Date	202
13.2.3.3	Lab work system messages	202
13.2.3.4	Compact every X hours	202
13.2.3.5	Undo Actions	202
13.2.3.6	Facility Locking	204
13.2.4	System Messages	205
13.2.5	Other System Wide Dialogs.....	205
13.3	The Managed Winery.....	207
13.3.1	Vintage Plan	208
13.3.2	Vintage Logistics.....	213
13.3.3	Weighbridge.....	215
13.3.3.1	Fruit Reception Job.....	216
13.3.4	Winery Map.....	217
13.3.4.1	Object Icons.....	218
13.3.4.2	Menus.....	221
13.3.4.2.1	Equipment.....	221
13.3.4.2.2	Tank Farm.....	222
13.3.4.2.3	Barrel Hall.....	222
13.3.4.2.4	Vessels.....	223
13.3.4.2.5	Create Tank Worknotes	224
13.3.4.2.6	Create Wine Worknotes	225
13.3.4.2.7	Chips.....	230
13.3.4.2.8	Diffuser.....	230
13.3.4.2.9	Micro-Oxygenation	230
13.3.4.3	Find a Vessel.....	230
13.3.4.4	Find a Wine.....	231
13.3.4.5	Generate Job for Vessel	231
13.3.4.6	Create Wine Jobs.....	233
13.3.4.7	General Worknote.....	233
13.3.4.8	Barrel Set Management	234
13.3.4.9	Scum Run.....	237
13.3.4.10	Details.....	239
13.3.4.11	More Readings	239
13.3.4.12	Comments	240
13.3.4.13	Blend Calculator	241

13.3.4.14	Temperature Control	243
13.3.4.15	Rename Wine	243
13.3.4.16	Rename Barrel Set.....	244
13.3.4.17	Reset Wine Volume	244
13.3.4.18	Wine Settings	244
13.3.4.19	Create A Wine	246
13.3.4.20	Move a Vessel	246
13.3.4.21	Additions	247
13.3.4.21.1	Multiple Additions.....	249
13.3.4.21.2	Temporal additions and removal (Chips, Diffusers, Mox)	249
13.3.4.22	Processes.....	251
13.3.4.22.1	General rules for transferring wine	251
13.3.4.22.2	Option 1. Target tank is empty and no wine left in source tank	252
13.3.4.22.3	Option 2. Target tank is empty but some wine left in source tank	253
13.3.4.22.4	Option 3. Target tank already has wine in it and no wine left in source tank 254	
13.3.4.22.5	Option 4. Target tank already has wine in it but some wine left in source tank 255	
13.3.4.22.6	Transfer, Rack, and Filter	256
13.3.4.22.7	Rack test add return.....	258
13.3.4.22.8	Bottle Wine	259
13.3.4.22.9	Heat/Cool a Wine.....	260
13.3.4.22.10	Press.....	260
13.3.4.22.11	Topping	261
13.3.4.22.12	Move a Wine	262
13.3.4.22.13	Transfer Skins.....	262
13.3.4.23	Settings.....	263
13.3.4.24	Laboratory Tests.....	264
13.3.4.24.1	Multiple Analyses.....	264
13.3.4.24.2	Pre Coarse Filtering / Bottling.....	265
13.3.4.24.3	Addition Trials	266
13.3.4.24.4	Heat Stability Trial.....	267
13.3.5	Reading Ratification	267
13.3.6	Work Diary	269
13.3.6.1	Standing Orders.....	271
13.3.6.2	Find Job/Worknote	273
13.3.7	Monitoring and Algorithms.....	273
13.3.8	Wine Tracker	276
13.3.8.1	Generating the data	278
13.3.8.2	Presenting the Data.....	278
13.3.9	Materials Storage (Additives Stock).....	280
13.3.10	Dry Goods.....	280
13.4	The Unmanaged Winery	281
13.5	The Managed Vineyard	283
13.5.1	Vineyard Block Details.....	284

13.5.1.1	Vine Status	285
13.5.1.2	Block Yield Estimates.....	286
13.5.1.3	Yield Estimate Graph.....	286
13.5.1.4	Harvest Date Estimate.....	287
13.5.1.5	Harvest Date Parameters Graph	287
13.5.1.6	Block Parcels.....	288
13.5.2	Vineyard Jobs Dialog	289
13.5.3	Irrigation, Fertilisation, Spraying.....	289
13.6	The Unmanaged Vineyard.....	292
13.7	Laboratories	293
13.7.1	Enzymatic Tests.....	295
13.7.2	Calculated Tests	295
13.7.3	Direct Entry Tests	296
13.7.4	Trials & The Additive Calculator	296
13.8	Storage Facilities	297
13.8.1	Post Bottling Analysis.....	298
13.8.2	Move Wine.....	300
13.9	Reports	300
14.	A populated instance of the model.....	302
14.1	Jobs and worknotes	302
14.2	Adding new items.....	307
15.	Testing the system	309
15.1	Unit and Functional Testing	309
15.2	System and User Testing.....	310
15.3	Product Verification	310
15.3.1	Requirements Met?	311
15.3.2	Performance.....	311
15.3.3	Data Integrity	312
15.4	Enhancements and Key Issues	312
15.4.1	Planning – Overkill?.....	312
15.4.2	Worknote and Job Sequencing	313
15.4.3	Wine Names	314
15.4.4	Barrel Sets and Wine Splitting.....	315
15.4.5	Wine Volumes	316
15.4.6	The Data Model Language	317
15.4.6.1	Model Refreshing.....	317
15.4.6.2	Back References	317
15.4.7	Use of assumed and suspect.....	317
15.4.8	Some Rejected Ideas	318
15.4.8.1	Enzyme Kit Corrections	318
15.4.8.2	Wine Homogenisation.....	318
16.	Conclusions and Further Research Possibilities.....	319
16.1	A finger tip interface	321
16.2	Configuration Application	321
16.3	Location Objects.....	322

16.4	Blend Samples	322
16.5	Jobs created on the fly	322
16.6	More Advanced Monitoring Algorithms	323
16.7	Connection to other systems	323
16.8	Data Mining and Reporting Functions	323
16.9	A better standard of coding	324
17.	Bibliography	325
18.	Appendix A : Student Survey.....	327
19.	Appendix B : Database Tables.....	331
20.	Appendix C : System Constants.....	339

ABSTRACT

The management of winemaking enterprises in Australia has become complex because of the increased complexity of the market and the winemaking process itself. Accurate record keeping goes hand-in-hand with complex sequencing of processes required to efficiently operate these enterprises. Unfortunately, the record keeping aspect is often regarded as an added burden to the process rather than a necessary step within it.

The ability to link obligatory record keeping with the function of controlling the winemaking and grape-growing processes offers many benefits to the enterprise management as long as the performance of these functions is able to facilitate the control of these processes and not become the added burden they fear. The benefits come in the form of enhanced and useful records for the winemaker to truly understand the cause and effect of decision making and individual processes in their winemaking. The records capture the intent and motivation of the decisions as well as the results themselves, thereby potentially revealing the implications and relative performance of their actions.

The aim of this project was to investigate the practicality and scope of building a computer-based vineyard and winery managements system (VWMS) that is capable of fitting in and enhancing the grape-growing and winemaking process for the operator, not simply providing a means of generating reports for the tax department or AWBC auditors.

A system was developed based on extensive ethnographic research of many vineyard and winery operations as well as recorded interviews with dozens of key professionals in the Australian wine industry with vastly different roles within it. It was designed to be intuitive, thorough, and flexible enough for use by operators with very different techniques and levels of intervention in the process. It was able to take into account the relative sizes of the enterprises from the very small, up to medium sized wine making enterprises.

Several new virtual concepts were introduced to enable the data model to link and translate the real activities of winemaking into objects. These functions and processes were easily understood because they were simply formal declarations of practices that were normally carried out, but not formally named or declared in the industry.

The system was successfully piloted at a winery featured in the case studies and continues to be the primary winemaking reporting system for the enterprise.

WITH THANKS TO...

Mr. Peter Wilson: my brother, mentor, and the inspiration for this work and for my involvement in the wine industry.

Dr Carrodus: Bailey Carrodus was my mentor's mentor. He produced the first wine I ever tasted that actually shifted my sense of how good wine can and should be. He provided the greatest challenge to me for this thesis, and inspired me to focus on the pertinent issues; a brilliant man who is greatly missed by all those who had the great fortune to meet him.

Assoc. Pr. Brian O'Neill: My supervisor. Thanks for keeping me on the straight and narrow all the way, for both my Masters Project and this one. You allowed me to concentrate on the project and protected me from the extraneous. I am eternally grateful.

Mum & Dad: for your support, understanding, and for raising me to be the kind of person who wants to do this kind of work.

Sue, Brett, Juliana, and all my nieces and nephews. Thanks for the support, particularly while I was a reclusive, poverty stricken student.

Mrs Samantha Beck: Pure inspiration, support, and friendship. You provided the right encouragement when I needed it most.

Ms Carolyn Mooney: For your unconditional love, friendship and support.

Brett Hiemstra. Cheers Mate.

Rupert: my cat. Thanks for faithfully sitting by me for every minute I sat tapping away on my computer keyboard writing this thesis, and only requiring the occasional pat or cuddle.

DECLARATION

This work contains no material which has been accepted for the award of any other degree or diploma in any university or other tertiary institution to James Alexander Wilson and, to the best of my knowledge and belief, contains no material previously published or written by another person, except where due reference has been made in the text.

I give consent to this copy of my thesis, when deposited in the University Library, being made available for loan and photocopying, subject to the provisions of the Copyright Act 1968.

I also give permission for the digital version of my thesis to be made available on the web, via the University's digital research repository, the Library catalogue, the Australasian Digital Theses Program (ADTP) and also through web search engines, unless permission has been granted by the University to restrict access for a period of time.

James Wilson

TERMINOLOGY AND ASSUMPTIONS

Throughout this document the term “winemaker” will be used to refer to both winemakers and viticulturists, unless otherwise stated, or unless the term “grape-grower” is also used within the context. This convention is only used for the sake of brevity, and does not imply that the role of a winemaker in a winery should be confused with a viticulturist or grape-grower in a vineyard; a concept that would offend many winemakers and viticulturists.

Similarly, the term “enterprise” is used as an all-encompassing grouping term for the individual components that comprise a winemaking or viticultural business. These components, such as a vineyard or a winery are collectively owned and managed by the enterprise or they are integral to the business.

It is also assumed throughout this document that the reader understands that this information is specific for Australian vineyards and wineries only, although it may be applicable in other countries to a greater or lesser extent. Of major concern to any management system for Australian winemakers is the Label Integrity Program (L.I.P.) which mandates the ability to be able to justify claims made on a label with respect to, amongst other things, the proportions of each wine’s source fruit for regionality, vintage, and variety. This is discussed further in *9.2.2 AWBC Label Integrity Program* (page 130). It is interesting to note that the term L.I.P. has come to mean the description of these proportions for a wine as well as its original meaning as the name of the AWBC regulation. In this context the term LIP has come to have another meaning, although closely related to its original meaning. Many winemakers refer to a wine’s L.I.P. to mean its provenance.

There is nothing sinister or alien implied by the term “compute” which has been used in this thesis as a general term for when the data model program works out a value or detail by using an algorithm, structured query language, or other relational database or programming technique to manipulate data.
