

MR. W. FULLER RETIRES

Loss to University

Mr. William Fuller, who has been lecturer in histology at the Adelaide University since March, 1921, will retire from service at the end of the year.

For 47 years Mr. Fuller has given the whole of his energies to the university. In 1881 he was appointed laboratory assistant to Progs. Tate and Lamb. Three years later he became assistant to Dr. Stirling in the department of physiology. He was invited to give a course of extension lectures on elementary biology in 1898, and these classes aroused widespread interest.

Mr. Fuller was appointed demonstrator in physiology in April, 1902, and in 1908 he took the post of lecturer on physiology to dental and massage students.

Sir George Murray (Chancellor of the University) in accepting Mr. Fuller's resignation, wrote:—"The council desires to express its hearty appreciation of the faithful service given by you to the university. You have witnessed the growth from its modest beginning to the present time and have been most closely associated with the development of its medical school."

Affection and Esteem

"It is not too soon to say that during the many years you have been here you have won and maintained the affection and esteem of your colleagues and the gratitude of all the students who received the benefit of your counsel and help. The council desires me to express its recognition of your honorable and devoted services to the university."

Prof. Sir William Brazg, in a letter dated 1924, wrote to Mr. Fuller:—"The University of Adelaide has had a won-

derful career, largely due to the devoted services of so many members of its staff, including yourself. It is most satisfactory that you have been engaged in the general advance."

Mr. Fuller, who is jovial and well-spected, is too well known to the great majority of graduates in this State to need a eulogy. His record of service, his research, his work—these are his best memorials.

For several years Mr. Fuller was chairman of the microscopic section of the Royal Society. During that time he put out the epinastroscope with a projector capable of throwing solid objects on the screen. Various other scientific and the Government subscribed to have the instrument installed in the lecture room connected with the Public Libraries Board. These instruments represent three years of incessant work on the part of Mr. Fuller.

MR. WILLIAM FULLER
who has been a member of the university staff for 47 years.

When Mr. Fuller went home from his microscope and his students he looked after his rose garden. He was president of the Rose Society for many years, and justly proud of his success in 1915, when he captured two championships and 14 first awards.

"It is time I had a rest from my active work," Mr. Fuller said. "But I suppose it will mean that I shall become just a more intricate gardener than ever, if that is possible."

The department of histology over which Mr. Fuller has charge deals with the microscopic anatomy of the tissues and organs of the body.

The University will be quite the same place without the tried and proven teacher.

Lover of Roses

When Mr. Fuller went home from his microscope and his students he looked after his rose garden. He was president of the Rose Society for many years, and justly proud of his success in 1915, when he captured two championships and 14 first awards.

UNIVERSITY EXAMINATIONS.

Under the auspices of the Adelaide University, examinations for the intermediate standard, leaving, and leaving honors will begin to-day at the Exhibition Building, Brookman Hall, at the School of Mines, Brookman Hall, at the School of Mines, Brookman Hall. There are 2,380 candidates for the intermediate examination, 1,161 for leaving, and 109 for leaving honors. The entries are from all parts of the State, but more than two-thirds are from the metropolitan area. There are 40 permanent local candidates and 20 temporary candidates. The examinations will continue until Friday week, and the largest sitting is anticipated to-morrow, when the number will be about 1,400. There are 20 fewer candidates for the intermediate examination this year, compared with last year, but there is an increase of 40 in the leaving examination and 48 in the leaving honors. It is not expected that the results of the intermediate will be made known until about January 25. The leaving results may be published before the end of the year, and the leaving honors early in the new year. Many of the students of the Adelaide University are attending the examinations completed their studies last week for the year, and received injunctions from their teachers as to the leaving honors. The different subjects placed before them. Some teachers condemn the practice of studying right up to the last minute, because of the danger of becoming able, although others indulge in what is termed a "final flutter" in the effort to make up for lost time.

After 47 years of active service with the Adelaide University, Mr. William Fuller, who has been lecturer in histology, will retire at the end of the year.

In consequence of the death of Sir Edward Stirling, there was a rearrangement of the duties of the medical staff at the University, and Mr. Fuller, who was Professor Stirling's right-hand man, was promoted to the position of lecturer in histology, a branch of study which relates to the microscopic anatomy of the tissues and organs of the body. Mr. Fuller has been associated with the University since 1881, when he was appointed Laboratory Assistant to Professors Lamb and Tate. In 1883 he was transferred to the medical school as laboratory assistant to Sir Edward Stirling, and in 1902 he was made demonstrator under that gentleman. He became lecturer on physiology to the students in medicine and dentistry in 1905, and in 1911 was appointed lecturer in elementary biology. He has always carried out his duties in a capable and conscientious manner, and many stu-

dent boys and girls was to realize the wonderful opportunities now available for all earnest minded students. Modern life calls for all round education, and the modern curriculum and all school curriculums wisely combine healthy sport with lessons. The papers for examination to-day are far more difficult than they were some years ago, indicating a higher plane of intellectualism among the masses. So the ordinary candidate, even the "average" student, must invest in a two-hours' test, that in the words of the bard, "Either makes me or foredooms me quite."

REG. 22.11.27
CHAIR OF LITERATURE.

Melbourne University Appointment.

MELBOURNE, Monday. Mr. G. H. Cowling, Reader in English Language and Literature at the University of Leeds, was today appointed to the Chair of English Language and Literature at the Melbourne University, rendered vacant by the acceptance by Professor R. S. Wallace of the office of Chancellor of the Sydney University. The only Australian application was that of Mr. R. C. Bald, evening lecturer and tutor in English at the University Adelaide.

The council adopted the principle of increasing fees at the university in order to decrease the debt the matter was referred to the finance committee and professional board for report.

ADV. 22.11.27
A BATHROOM ACCIDENT.

Victor Harbour, November 20. Mr. C. R. Hodge was getting out of his bath on Saturday, when the slipper on the mat and severely injured his right arm and shoulder. He is under medical treatment. No bones were broken.

REG. 19.11.27
THE UNIVERSITY OF ADELAIDE.

EXAMINATION RESULTS, NOVEMBER, 1927.

ORDINARY EXAMINATION FOR THE DEGREE OF BACHELOR OF MUSIC.

FIRST YEAR.—Passed with Credit—Flands, Horace James, M.A.; Hall, Marjorie Gertrude.
SECOND YEAR.—Passed with Credit—Percival, Horace James, A.M.U.A. Passed—Esters, Frederick.
THIRD YEAR.—Passed—Burnard, David Alward, A.M.U.A.
FINAL EXAMINATION AS EXECUTANT, PIANOFORTE.—Passed—Burnard, David Alexander, A.M.U.A.

ADV. 21.11.27

Professor Sir Douglas Mawson and Mr. C. T. Madigan, who have been on a trip to Central Australia, returned to the city last night. They inspected silver, lead, and copper lenses at Barrow Creek, Springs. The party did not go farther north than Barrow Creek.

UNIVERSITY LECTURER.

RETIREMENT OF MR. W. FULLER.

After 47 years of active service with the Adelaide University, Mr. William Fuller, who has been lecturer in histology, will retire at the end of the year.

In consequence of the death of Sir Edward Stirling, there was a rearrangement of the duties of the medical staff at the University, and Mr. Fuller, who was Professor Stirling's right-hand man, was promoted to the position of lecturer in histology, a branch of study which relates to the microscopic anatomy of the tissues and organs of the body. "WRINKLED BROWS".

Youth at Examination Time.

"I know we will all be glad when it over. At present I feel as though I should have wrinkles on my brow for ever."

So said one of the girl candidates at the intermediate examinations on Tuesday, as she was wending her way to the entrance of the Exhibition Hall. All this week, and next week, too, hundreds of girls and boys, mostly about the age of 15 years, will sit at various subjects in order to try to qualify for entrance into successful careers. It was a great sight to watch that crowd of students gathered across the courtyard, and then suddenly fall into line, and march quietly into the eastern and western annexes. At each table—placed in front of the other, and with a corresponding distance on either side—the young people took their seats, indicated by numbers corresponding to their cards. All type of humanity were represented in the two divisions, numbering some hundreds, and in the main could visualize the brilliant mind, or slow, sure brain of the plodder, and ordinary, everyday worker. But all were intent upon their task, and applied themselves to a two-hours' test, that in the words of the bard, "Either makes me or foredooms me quite."
