

UNIVERSITY OF ADELAIDE.

The Council of the University of Adelaide has made the following appointments to lectureships, &c.:-

- Faculty of Medicine. Principles and Practice of Medicine.-C. T. C. de Crepigny, M.D., B.S., M.R.C.P. Principles and Practice of Surgery.-H. S. Newland, M.B., M.S. Public Health and Preventive Medicine.-F. S. Hone, B.A., M.B., B.S. Gynaecology and Obstetrics.-T. G. Wilson, M.D., F.R.C.S. Clinical Medicine.-D. R. W. Cowan, M.B., B.S. Clinical Surgery.-John Corbin, M.R.C.S., L.R.C.P. Instructor in Anaesthetics.-Gilbert Brown, M.B., Ch.B. Tutor in Medicine.-Guy A. Lendon, M.D. Tutor in Surgery.-M. L. Scott, M.B., M.S., F.R.C.S. Demonstrator in Pathology.-Effie J. Hone, M.B., B.S. Faculty of Law. Private International Law.-G. S. Reed, LL.B. Faculty of Dentistry. Demonstrator in Dental Mechanics.-L. A. M. Brougham. Demonstrator in Operative Technique.-A. P. R. Moore, D.D.Sc. Demonstrator in Orthodontics.-P. R. Begg, D.D.Sc.

ADVERTISER 24 12 27

The Council of the University of Adelaide has made the following appointments to lectureships, &c.:-Faculty of Medicine-Principles and practice of medicine, Dr. C. T. C. de Crepigny, M.D., B.S., M.R.C.P.; principles and practice of surgery, Dr. H. S. Newland, M.B., M.S.; public health and preventive medicine, Dr. F. S. Hone, B.A., M.B., B.S.; gynaecology and obstetrics, Dr. T. G. Wilson, M.D., F.R.C.S.; clinical medicine, Dr. D. R. W. Cowan, M.B., B.S.; clinical surgery, Dr. John Corbin, M.R.C.S., L.R.C.P.; instructor in anaesthetics, Dr. Gilbert Brown, M.B., Ch.B.; tutor in medicine, Dr. Guy A. Lendon, M.D.; tutor in surgery, Dr. M. L. Scott, M.B., M.S., F.R.C.S.; demonstrator in pathology, Dr. Effie J. Hone, M.B., B.S. Faculty of Law-Private international law, Mr. G. S. Reed, LL.B. Faculty of Dentistry-Demonstrator in dental mechanics, Mr. L. A. M. Brougham; demonstrator in operative technique, Mr. A. P. R. Moore, D.D.Sc.; demonstrator in orthodontics, Mr. P. R. Begg, B.D.Sc.

winning "blues" for tennis and lacrosse. He represented Balliol College in cricket, tennis, Rugby football, and hockey. The headmaster of Geelong Church of England Grammar School (Dr. Brown) speaks in high terms of Mr. Barbour's "good influence and happy relations with the boys in all school activities." Mr. Barbour is married and has one child. It is expected that he will be in Adelaide towards the end of January.

THE NUTRITION LABORATORY.

The new laboratory which is being erected in the grounds of the University of Adelaide by the Council for Scientific and Industrial Research, will make one of a fine group of buildings near what will probably be the main entrance to the University from Victoria-drive. It will be grouped with the new Barr Smith library and the new Students' Union building. It will be opened during the coming year. The chief purpose of the laboratory will be the investigation of the problems of animal nutrition, particularly regarding the production of wool.

THE ADVANCEMENT OF SCIENCE.

Twenty-four delegates will represent South Australia at the nineteenth meeting of the Australasian Association for the Advancement of Science, which will be held in Hobart from January 16 to 23. Among those who will attend from this State are Professor R. W. Chapman (Astronomical Society, Institute of Surveyors, and University of Adelaide), Sir William Sowden (Australian Forest League), Dr. S. W. Pennycook (Australian Chemical Institute), Professor J. B. Cleland (British Medical Association and Ornithological Union), Drs. F. S. Hone and A. A. Lendon (British Medical Association), Dr. C. Fenner and Mr. Ernest H. Ising (Field Naturalists' Section, Royal Society), Professor W. K. Hancock (History Society), Messrs. E. F. Gryst and M. C. Moore (Pharmaceutical Society), Dr. R. S. Rogers (Public Library, Museum, and Art Gallery), Mr. A. Grenfell Price (Royal Geographical Society and Workers' Educational Association), Sir Douglas Mawson and Professor J. A. Prescott (Royal Society), Mr. A. N. Roupell (State Advisory Council of Science and Industry), Dr. Constance Daye and Mr. A. L. Gordon MacKay (Workers' Educational Association), and Professor T. G. B. Osborn (University of Adelaide).

point regarding subjects of daily interest. He says that as an Australian he was most hospitably received everywhere, and while appreciating many of the methods of the Americans, there were others that did not at all appeal to him. A representative of The Register had a most interesting chat with Dr. Love on his return.

Praise for Adelaide University.

"To begin with," said Dr. Love, "my object in going to America was to take a post-graduate course in diseases of women and midwifery. After the war I worked in London, and the opportunity presenting itself, I determined to make myself familiar with American methods. During my stay I worked at the Mayo Clinic, Rochester; the Washington University, St. Louis; and at the New York, Harvard, Yale, Chicago, Denver, Philadelphia, San Francisco, Johns Hopkins, McGill, and Toronto clinics, and was greatly impressed with their systems. I found some of the best work was done at St. Louis. I am satisfied, however, that the medical training at the Adelaide University compares favourably with any in the world, and Dr. Hugh Cairns, of Riverton, a Rhodes scholar, whom I met at Boston, agreed with me. I understand that some of the undergraduates at our University are contemplating going to England to complete their medical course. If they are I think they are unwise, as the training here is equal to any I have seen anywhere.

The Eucalyptus in California.

During his stay in San Francisco Dr. Love several times visited Golden Gate Park. It has an area of about 1,500 acres, and 30 years ago was just a waste of sand and teatrees. It was planted with eucalypti, acacias, and every description of blackwood, laid out artistically, and to-day is one of the show places of California. Dr. Love saw specimens of eucalyptus finer, if anything, than we have in Australia, and they presented a most healthy appearance. At Hollywood he and Mrs. Love were present at a big concert given by the moving picture people there in aid of the sufferers by the Mississippi floods. They saw Mary Pickford, Gloria Swanson, Harold Lloyd and his wife, Jacky Coogan, Charlie Chaplin, Tom Mix, and several other well-known picture artists. Jacky Coogan is being educated at the Military Academy near Los Angeles.

Street Traffic Control.

Asked regarding street traffic control, Dr. Love said he thought the regulations at Los Angeles were the best he saw during his tour. The traffic was controlled by a system of coloured lights, worked electrically, and applied to pedestrians as well as motors. No one proceeded in face of a red light, but only when a green or orange showed, and attention was directed to the lights by warning bells. Pedestrians were only allowed to cross the streets at the intersections. An official would control about four blocks. He would, for instance, be stationed at the intersection of North terrace and King William street, and when he switched on the red light, for instance, simultaneously it would appear at the Rundle and Hindley, Grenfell and Currie, Pirie and Waymouth, Flinders and Franklin, and King William streets intersections. No one ever attempted to proceed in face of the red light, as the penalties for flouting the regulations were very severe. He had also seen the "Stop" and "Go" system, just introduced into Adelaide, in some cities. The motor traffic was speeded up, and there did not appear to be any speed limit. Slow traffic was sent to the by-roads, and he could not remember ever having seen a horse in an American town. Regarding

YOUNGEST SOLICITOR

Career of Mr. E. B. Beauchamp

Mr. Edward Benjamin Beauchamp is South Australia's youngest solicitor. A coincidence attended his recent admission to the Bar. Mr. Beauchamp was born on December 27, 1906, and was admitted on his twenty-first birthday. Nobody who has not attained his majority may be called; and had Mr. Beauchamp been born a day later, although fully qualified, he would have been obliged to wait another year before being admitted. Mr. Beauchamp, who was educated at Unley Public and High Schools before proceeding to St. Peter's College, passed for his qualifying certificate at the age of

eleven, was a successful candidate at the junior public examination when he was 15, took senior public at 15, and was successful in the higher public examination the following year. This promising student was articled to the late Mr. H. W. Varley on February 21, 1924, and served under him until March 28, 1927, when he continued his articles with Mr. H. Thomson. He sat for his final law examinations in November, and took his LL.B. degree at the recent commencement. Mr. Beauchamp holds the proud record of never having been failed in any examination. Outside his studies he has found time in which to become efficient at football and tennis; and he does much motor-

ST. ANDREW'S COLLEGE.

MR. BARBOUR'S APPOINTMENT.

Mr. R. R. P. Barbour, M.A. (Oxon.), has been appointed master of St. Andrew's, the residential college recently established in affiliation with the University of Adelaide, and in connection with the Presbyterian Church in South Australia. Mr. Barbour received his early education at Toowoomba Grammar School, Queensland. In 1918 he gained an open scholarship to the University of Queensland, being placed second on the list of twenty scholarship winners. While at that University he was a resident student at Immanuel College, the Presbyterian residential college in affiliation with the University. He graduated B.A. in classics in 1920, and in the same year was selected as Queensland Rhodes Scholar. He entered Balliol College, Oxford, in January, 1921, and proceeded to study for the final school of Literae Humaniores. He graduated with honors in this school in 1923. In 1924 he accepted an appointment as Brice Mackinnon classical master at Geelong Church of England Grammar School, being attached to Perry House as senior assistant to the house master (Mr. L. de C. Berthon, late headmaster of Haileybury College, Melbourne). He still held this position when he was offered the mastership of St. Andrew's.

While pursuing his academic career, Mr. Barbour has taken a prominent place in general university life. In the University of Queensland he was a recognised leader in many departments of student activity. In sport he has represented Queensland in inter-State cricket and tennis, and has been awarded university "blues" in these two games. At Oxford he was president of the Colonial Club, a member of the committee controlling all the athletic sports of his college, and a member of the junior common room committee. He represented the University of Oxford in cricket, tennis, and lacrosse

RETURN OF DR. J. A. LOVE.

Ten Months in America.

Views on the United States.

Dr. and Mrs. J. A. Love, formerly of Booleroo Centre, recently returned to Adelaide after a 10 months' sojourn in the United States and Canada. They visited all the chief cities, and Dr. Love, who held an honorary commission from the Government, took post-graduate courses at 12 different clinics for the purpose of studying midwifery and diseases of women. Dr. Love, who is a very keen observer, during his stay in America studied the life of the people from different angles, in order to glean their view-

the American railways, they were better than ours as regarded speed, easiness in running, and punctuality, but their Pullman cars did not compare with our sleeping cars. Indeed, the cars on the Adelaide-Melbourne service were the best he had struck anywhere, and he understood that even they were eclipsed by the sleepers on the East-West line.
